West Virginia received approval from the EPA to assume the NPDES program. EPA’s regulations at 40 CFR 123.62 establish procedures for revision of authorized state NPDES programs. Under § 123.62(a) a state may initiate a program revision and must keep EPA informed of proposed modifications to its statutory or regulatory authority. On May 13, 2015, West Virginia notified the EPA of enactment of HB 2283. On July 10, 2015, West Virginia submitted SB 357 for formal review by the EPA. Following additional correspondence between the EPA and the West Virginia Department of Environmental Protection and the West Virginia Environmental Hearing Board, the EPA has determined pursuant to 40 CFR 123.62(b)(1) that it has received such documents as are necessary for its review under the circumstances.

Section 123.62(b)(2) requires the EPA to issue a public notice and to provide at least a 30-day public comment period whenever the EPA determines that a state program revision is substantial. Section 123.62(b)(2) also requires the EPA to hold a public hearing regarding the proposed revision “if there is significant public interest based on requests received.” The EPA has determined that HB 2283 and SB357 constitute substantial revisions to West Virginia’s NPDES program. According to the West Virginia Department of Environmental Protection, SB 357 amends West Virginia Code § 22–11–6(2) and § 22–11–8(a) to prohibit the incorporation or enforcement of water quality standards either expressly or by reference as effluent standards or limitations in West Virginia NPDES permits. SB 357 also adds West Virginia Code § 22–11–22a to establish a mining industry specific procedure to collect civil or administrative penalties and to enjoin violations of the West Virginia Water Pollution Control Act. HB 2283 revises W. Va. CSR 40–30–5 to delete the following language: “The discharge or discharges covered by a WV/NPDES permit are to be of such quality so as to not cause a violation of applicable water quality standards promulgated by 47 C.S.R. 2.”

The 40 CFR 123.62(b)(3) states that the EPA will approve or disapprove program revisions on the requirements of this part. Furthermore 40 CFR 123.62(b)(4) indicates that a program revision shall become effective upon the approval of the EPA. Notice of approval of any substantial revision shall be published in the Federal Register.

The EPA received public comments received before October 17, 2018 when determining whether to approve the WV NPDES Program revision.

General Description of Collection:

The collection of information requirements are contained in 12 CFR part 344. The purpose of the regulation is to ensure that purchasers of securities in transactions affected by insured state nonmember banks are provided with adequate records concerning the transactions. The regulation is also designed to ensure that insured state nonmember banks maintain adequate records and controls with respect to the securities transactions they effect. Finally, this regulation requires officers and employees of FDIC-supervised institutions to report to the FDIC-supervised institution certain personal securities trading activity.

The FDIC has reviewed its previous submission related to the Paperwork Reduction Act of 1995 and has updated its methodology for calculating the burden in order to be consistent with the Federal Reserve Board and the Office of the Comptroller of the Currency. In addition, the FDIC has reviewed and revised its estimated number of respondents to ensure that only those institutions with income from securities brokerage activity are included its respondent count. The overall decrease in burden hours is the result of these changes.

Request for Comment

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the FDIC’s functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the information collection, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.

Dated at Washington, DC, on September 12, 2018.
