Alternatives to the Proposed Action

The EIR/EIS will discuss the alternatives that were considered for analysis, identify those that were eliminated from further consideration because they do not meet the stated purpose and need, and identify those that will be analyzed further. It is expected that project alternatives will continue to be developed and refined during the public scoping process, with input from the public, agencies, and other stakeholders. The EIR/EIS alternatives analysis will consist of a comparison of the impacts under each alternative pursuant to 24 CFR part 58, in addition to how well each alternative achieves the project’s purpose and need. This process, which will be described in detail in the EIR/EIS, will lead to the designation of a Preferred Alternative.

At this time, it is anticipated that the following alternatives will be analyzed:

1. No Project/No Action Alternative
2. Non-Historically Compliant Rehabilitation Alternative
3. Historic Rehabilitation

Probable Environmental Effects

The following subject areas will be analyzed in the combined EIR/EIS for probable environmental effects:

- Aesthetics
- Air Quality
- Biological Resources
- Cultural Resources
- Geology and Soils
- Greenhouse Gas Emissions
- Hazards and Hazardous Materials
- Land Use and Planning
- Noise
- Population and Housing
- Public Services
- Recreation
- Transportation/Traffic
- Tribal Cultural Resources

Scoping Meeting

A public scoping meeting will be held from 5:00 p.m. to 7:00 p.m. on October 4, 2018, at the Rose Hill Courts Community Center at 4446 Florizel Street, Los Angeles, California. The scoping process also includes the initiation of the NEPA Section 106 consultation process. We invite comments from all interested parties about the potential impacts this project may have on historic properties, cultural resources, or biological and natural resources as well as the impacts these resources may have on the project. We invite all interested parties to participate in the scoping meeting.

Lead Agencies
