Number of Responses: 2,200 annually (550 filed each quarter; 515 reporting mandatory or voluntary data, and 35 that would not report data).

Average Hours per Response: 9 hours is the average for those reporting data and one hour is the average for those filing an exemption, but hours may vary considerably among respondents because of differences in company size and complexity.

Estimated Total Annual Burden Hours: 18,680.

Needs and Uses: The Quarterly Survey of Insurance Transactions by U.S. Insurance Companies with Foreign Persons (BE–45) is one of BEA’s primary data sources for its estimates of insurance services exports and imports. A U.S. insurance company must report if it had transactions with foreign persons, in any of the data items covered by the survey, that exceeded $8 million (positive or negative) in the prior calendar year, or are expected to exceed that amount during the current calendar year.

The data are needed to monitor U.S. trade in insurance services, to analyze the impact of these cross-border services on the U.S. and foreign economies, to compile and improve the U.S. economic accounts, to support U.S. commercial policy on trade in services, to conduct trade promotion, and to improve the ability of U.S. businesses to identify and evaluate market opportunities. The data are used in estimating the insurance services component of the U.S. international transactions accounts (ITAs) and national income and product accounts (NIPAs).

The Bureau of Economic Analysis (BEA) is implementing one change to the data collected on the BE–45 survey, beginning with reporting for first quarter 2019, which will allow BEA to improve the accuracy of our quarterly statistics on insurance services exports and imports.

Schedule B of the BE–45 survey, which currently collects annual data on primary insurance premiums and losses, reinsurance losses, and auxiliary insurance services receipts and payments, on a mandatory basis in the fourth quarter of the year, will now be collected on a mandatory basis every quarter.

BEA estimates the proposed changes, being implemented beginning with reporting for first quarter 2019, will increase the average number of hours per response from 8 hours to 9 hours for those reporting data. The reporting thresholds of the current BE–45 survey will be retained. The effort to keep current reporting thresholds unchanged is intended to minimize respondent burden while considering the needs of data users. Existing language in the instructions and definitions will be reviewed and adjusted as necessary to clarify survey requirements.

Affected Public: Businesses or other for-profit organizations.

Frequency: Quarterly.

Respondent’s Obligation: Mandatory.

Department of Commerce

Bureau of Economic Analysis

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of Economic Analysis (BEA), Department of Commerce.

Title: Quarterly Survey of Financial Services Transactions between U.S. Financial Services Providers and Foreign Persons.

OMB Control Number: 0608–0065.

Form Number: BE–185.

Type of Request: Regular submission. Number of Respondents: 2,860 annually (715 filed each quarter; 580 reporting mandatory data, and 135 that would file other responses).

Average Hours per Response: 10 hours is the average for those reporting data and one hour is the average for those filing an exemption or providing voluntary responses, but hours may vary considerably among respondents because of differences in company size and complexity.

Estimated Total Annual Burden Hours: 2,860.

Needs and Uses: The Quarterly Survey of Financial Services Transactions between U.S. Financial Services Providers and Foreign Persons (BE–185) is one of BEA’s primary data sources for its estimates of financial services exports and imports. A U.S. financial services provider must report if they had sales of covered services to foreign persons that exceeded $20 million for the previous fiscal year, or are expected to exceed that amount during the current fiscal year, or if they had purchases of covered services from foreign persons that exceeded $15 million for the previous fiscal year, or are expected to exceed that amount during the current fiscal year.

The data are needed to monitor U.S. trade in financial services, to analyze the impact of these cross-border services on the U.S. and foreign economies, to compile and improve the U.S. economic accounts, to support U.S. commercial policy on trade in services, to conduct trade promotion, and to improve the ability of U.S. businesses to identify and evaluate market opportunities. The data are used in estimating the financial services component of the U.S. international transactions accounts (ITAs) and national income and product accounts (NIPAs).

The Bureau of Economic Analysis (BEA) is not making any modifications to the current BE–185 survey. The effort to keep current reporting requirements unchanged is intended to minimize respondent burden while considering the needs of data users. Existing language in the instructions and definitions will be reviewed and adjusted as necessary to clarify survey requirements.

Affected Public: Businesses or other for-profit organizations.

Frequency: Quarterly.

Respondent’s Obligation: Mandatory.
