**SUPPLEMENTARY INFORMATION:**

**I. Background**

In the **Federal Register** of February 16, 2018 (83 FR 7052), FDA published a notice announcing the public meeting entitled “Pediatric Medical Device Development” with a 30-day comment period post the meeting to request comments. The public meeting was held on August 13 and 14, 2018. FDA is reopening the comment period for the public meeting until November 26, 2018. The Agency believes that this will allow adequate time for interested persons to submit comments without significantly delaying action by the Agency.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

FDA is announcing the availability of a draft document entitled "Recommendations for Requalification of Blood Donors Deferred Because of Reactive Test Results for Antibodies to Human T-Lymphotropic Virus Types I and II (anti-HTLV-I/II); Draft Guidance for Industry." The draft guidance provides blood establishments that collect Whole Blood and blood components with recommendations for a requalification method under 21 CFR 610.41(b) for deferred donors, based on a determination that their previous reactive test results for anti-HTLV-I/II were falsely positive. Blood establishments are not required to test Source Plasma for HTLV I/II (21 CFR 610.40 (a)(2)(ii)). Therefore, this guidance does not apply to the collection of Source Plasma.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on recommendations for requalification of blood donors deferred because of reactive test results for antibodies to human T-lymphotropic virus types I and II (anti-HTLV-I/II). It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.
