Title: Limits of Acceptable Change
Study surveys in the Northeast Reserves and Calebra Island, Puerto Rico.
OMB Control Number: 0648–xxxx.
Form Number(s): None.
Type of Request: Regular (request for a new information collection).
Number of Respondents: 4,273.
Average Hours per Response:
Commercial fishers and water operators, 30 minutes; recreational boaters and
visitors, 10 minutes.
Burden Hours: 777.
Needs and Uses: The Coral Reef Conservation Program (CRCP),
developed under the authority of the Coral Reef Conservation Act of 2000, is
responsible for programs intended to enhance the conservation of coral reefs.
We intend to use the information collected through this instrument for
conducting a characterization project utilizing a limits of acceptable change
(LAC) framework that encompasses the Puerto Rico Northeast Marine Corridor
(NMC) as a continuous management area, addressing the following subjects
across the area and within individual natural reserves to create the
information base required to promote effective management: Biophysical
conditions, social conditions, stakeholder identification, stakeholder uses and
use patterns, stakeholder knowledge, attitudes, and beliefs, and stakeholder and
resource use conflicts. The study will build on past work conducted with
stakeholders on natural resources and social indicators in the region, developing a social conditions
baseline. Social conditions will be characterized via a series of stakeholder
participation protocols, which will result in stakeholder identification, use
and use patterns, knowledge, attitudes, and belief, and use conflicts. It will
engage the four, main NMC
stakeholders: Commercial fishers; commercial water operators;
recreational boaters, and visitors. All commercial fishers and commercial
water operators in the region will be surveyed with an in-person questionnaire. Recreational boaters will
be reached by sending out an internet/ email survey questionnaire sent to all
vessel registrants. Visitors in the NMC
will be surveyed using an intercept survey administered twice a month at a
ferry location and via self-administered surveys disseminated by commercial
water operators. It is expected that these multi-pronged approaches will provide
the information necessary to complete a stakeholder characterization for the
NMC that can be applied to evaluate LAC conditions and trends.

Affected Public: Business or other for
profit organizations; individuals or
households.
Frequency: One time.
Respondent’s Obligation: Voluntary.
This information collection request may be viewed at reginfo.gov. Follow
the instructions to view Department of Commerce collections currently under
review by OMB.
Written comments and recommendations for the proposed
information collection should be sent within 30 days of publication of this
notice to OIRA Submission@ omb.eop.gov or fax to (202) 395–5806.
