SUPPLEMENTARY INFORMATION:**Background**

Codex was established in 1963 by two United Nations organizations, the Food and Agriculture Organization (FAO) and the World Health Organization (WHO). Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to protect the health of consumers and ensure fair practices in the food trade.

The TFAMR is responsible for:

(1) Reviewing and revising, as appropriate, the *Code of Practice to Minimize and Contain Antimicrobial Resistance* (CAC/RCP 61–2005) to address the entire food chain, in line with the mandate of Codex; and

(2) considering the development of *Guidance on Integrated Surveillance of Antimicrobial Resistance*, taking into account the guidance developed by the WHO Advisory Group on Integrated Surveillance of Antimicrobial Resistance (AGISAR) and relevant World Organisation for Animal Health (OIE) documents.

The objective of the Task Force is to develop science-based guidance on the management of foodborne antimicrobial resistance, taking full account of the WHO *Global Action Plan on Antimicrobial Resistance*, in particular Objectives 3 and 4, the work and standards of relevant international organizations, such as FAO, WHO, and OIE, and the One-Health approach, to ensure members have the necessary guidance to enable coherent management of antimicrobial resistance along the food chain. The Task Force is expected to complete its work within three (or a maximum of four) sessions.

The TFAMR is hosted by Korea. The United States attends TFAMR as a member country of Codex.
