Application Details

Permit Application: 2019-011

1. *Applicant:* John Kennedy, 917 Porphyry, Ophir, CO 81426.

Activity for Which Permit is Requested: Waste Management. The applicant proposes to operate a sailing yacht, conduct shore excursions, and operate a remotely piloted aircraft system in the Antarctic Peninsula region. The yacht would carry up to 1200 liters of diesel fuel in a combination of internal and external storage tanks, up to 50 liters of gasoline, and two, 8-kg bottles of propane. A spill kit and absorbent pads would be available during all fueling and fuel transfers. Garbage and food waste, including poultry products, would be stored onboard the vessel and disposed of outside Antarctica. Human waste generated during shore excursions would be contained, stored on the vessel, and disposed of outside Antarctica. The applicant would operate small, battery-operated remotely piloted aircraft systems (RPAS) consisting, in part, of a quadcopter equipped with cameras to aid in navigation and to collect footage of the Antarctic. The quadcopter would not be flown over wildlife, or over Antarctic Specially Protected Areas or Historic Sites and Monuments. The RPAS would only be operated by a pilot with extensive experience and flights would not occur if the aircraft cannot be flown in GPS

mode. Several measures would be taken to prevent against loss of the quadcopters including painting the them a highly visible color; only flying when the wind is less than 20 knots; terminating flights with at least 40% battery life remaining; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and quadcopter does not exceed visual line of sight. The applicant is seeking a Waste Permit to cover any accidental releases that may result from operating the vessel, conducting shore excursions, or operating the RPAS.

Location: Antarctic Peninsula region.

Dates of Permitted Activities: December 5, 2018–January 5, 2019.

Permit Application: 2019-012

2. *Applicant:* Conrad Combrink, Senior Vice President, Strategic Development Expeditions and Experiences, Silversea Cruises, Ltd., Wells Fargo Center, 333 Southeast 2nd Avenue, Suite 2600, Miami, Florida 33131.

Activity for Which Permit is Requested: Waste Management. The applicant proposes to operate small, battery-operated remotely piloted aircraft systems (RPAS) consisting, in part, of a quadcopter equipped with cameras to collect commercial and educational footage of the Antarctic. The quadcopter would not be flown over concentrations of birds or mammals, or over Antarctic Specially Protected Areas or Historic Sites and Monuments. The RPAS would only be operated by pilots with extensive experience, who are pre-approved by the Expedition Leader. Several measures would be taken to prevent against loss of the quadcopter including painting the them a highly visible color; only flying when the wind is less than 25 knots; flying for only 15 minutes at a time to preserve battery life; having prop guards on propeller tips, a flotation device if operated over water, and an “auto go home” feature in case of loss of control link or low battery; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and quadcopter does not exceed an operational range of 500 meters. The applicant is seeking a Waste Permit to cover any accidental releases that may result from operating the RPAS.

Location: Antarctic Peninsula Region.
