BILLING CODE 4000-01-P

DEPARTMENT OF ENERGY

High Energy Physics Advisory Panel

AGENCY: Office of Science, Department of Energy.

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces a meeting of the High Energy Physics Advisory Panel (HEPAP). The Federal Advisory Committee Act requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Thursday, November 29, 2018, 8:30 a.m. to 6:00 p.m. and Friday, November 30, 2018, 8:30 a.m. to 4:00 p.m.

ADDRESSES: Gaithersburg Marriott Washingtonian Center, 9751 Washingtonian Boulevard, Gaithersburg, Maryland 20878.

FOR FURTHER INFORMATION CONTACT: John Kogut, Executive Secretary; High Energy Physics Advisory Panel (HEPAP); U.S. Department of Energy; Office of Science; SC-25/Germantown Building, 1000 Independence Avenue SW, Washington, DC 20585; Telephone: (301) 903-1298

SUPPLEMENTARY INFORMATION:

Purpose of Meeting: To provide advice and guidance on a continuing basis to the Department of Energy and the National Science Foundation on scientific priorities within the field of high energy physics research.

Tentative Agenda: Agenda will include discussions of the following:

- November 29–30, 2018
- Discussion of Department of Energy High Energy Physics Program
- Discussion of National Science Foundation Elementary Particle Physics Program
- Reports on and Discussions of Topics of General Interest in High Energy Physics
- Public Comment (10-minute rule)

Public Participation: The meeting is open to the public. A webcast of this meeting will be available. Please check the website below for updates and information on how to view the meeting. If you would like to file a written statement with the Committee, you may do so either before or after the meeting. If you would like to make oral statements regarding any of these items on the agenda, you should contact John Kogut, (301) 903-1298 or by email at: John.Kogut@science.doe.gov. You must make your request for an oral statement at least five business days before the meeting. Reasonable provision will be made to include the scheduled oral statements on the agenda. The Chairperson of the Panel will conduct the meeting to facilitate the orderly conduct of business. Public comment will follow the 10-minute rule.

Minutes: The minutes of the meeting will be available on the U.S. Department of Energy's Office of High Energy Physics Advisory Panel website: <http://science.energy.gov/hep/hepap/meetings/>.

Signed in Washington, DC, on October 3, 2018.

LaTanya Butler,

Deputy Committee Management Officer.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

[Case Number 2018-005, EERE-2017-BT-WAV-0043]

Energy Conservation Program: Extension of Waiver to Apple Inc. From the Department of Energy External Power Supply Test Procedure

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of extension of waiver.

SUMMARY: The U.S. Department of Energy ("DOE") is granting a waiver extension (Case No. 2018-005) to Apple Inc. ("Apple") to waive certain requirements of the DOE external power supply test procedure for determining

the energy efficiency of the Apple brand external power supply basic model A1882. Under this extension, Apple is required to test and rate this basic model in accordance with the applicable DOE test procedure, with the exception that the Nameplate Output Current shall be 2A when testing at the lowest achievable output voltage.

DATES: The Extension of Waiver is applicable as of October 10, 2018. The Extension of Waiver will terminate upon the compliance date of any future amendment to the test procedure for external power supplies located in 10 CFR part 430, subpart B, appendix Z that addresses the issues presented in this waiver. At such time, Apple must use the relevant test procedure for this product for any testing to demonstrate compliance with standards, and any other representations of energy use.

FOR FURTHER INFORMATION CONTACT:

Ms. Lucy deButts, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Avenue SW, Washington, DC 20585-0121. Email: AS_Waiver_Requests@ee.doe.gov.

Mr. Michael Kido, U.S. Department of Energy, Office of the General Counsel, Mail Stop GC-33, Forrestal Building, 1000 Independence Avenue SW, Washington, DC 20585-0103. Telephone: (202) 586-8145. Email: Michael.Kido@hq.doe.gov.

SUPPLEMENTARY INFORMATION: In accordance with Title 10 of the Code of Federal Regulations (10 CFR 430.27(g)), DOE gives notice of the issuance of an Extension of Waiver as set forth below. The Extension of Waiver extends the Decision and Order granted to Apple on March 16, 2018 (83 FR 11738; "March 2018 Decision and Order") to include Apple basic model A1882, as requested by Apple on May 17, 2018.¹ Apple must test and rate the specifically identified external power supply basic model in accordance with the alternate test procedure specified in the March 2018 Decision and Order. Apple's representations concerning the energy efficiency of the specified basic model must be based on testing according to the provisions and restrictions in the alternate test procedure set forth in the March 2018 Decision and Order, and the representations must fairly disclose the test results. Distributors, retailers, and private labelers are held to the same requirements when making representations regarding the energy

¹ Apple's request is available at <https://www.regulations.gov/docket?D=EERE-2017-BT-WAV-0043>.

efficiency of this product. (42 U.S.C. 6293(c)).

DOE makes decisions on waiver extensions for only those basic models specifically set out in the request, not future models that may be manufactured by the petitioner. Apple may submit a new or amended petition for waiver and request for grant of interim waiver, as appropriate, for additional basic models of EPSs. Alternatively, if appropriate, Apple may request that DOE extend the scope of a waiver to include additional basic models employing the same technology as the basic model(s) set forth in the original petition consistent with 10 CFR 430.27(g).

Signed in Washington, DC, on October 2, 2018.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

Case Number 2018–005

Extension of Waiver

I. Background and Authority

The Energy Policy and Conservation Act of 1975, as amended (“EPCA”)¹ (42 U.S.C. 6291–6317), among other things, authorizes DOE to regulate the energy efficiency of a number of consumer products and industrial equipment. Title III, Part B² of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency for certain types of consumer products. These products include external power supplies (“EPSs”), the focus of this extension. (42 U.S.C. 6291(36); 42 U.S.C. 6295(u)).

Under EPCA, DOE’s energy conservation program consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA include definitions (42 U.S.C. 6291), energy conservation standards (42 U.S.C. 6295), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), and the authority to require information and reports from manufacturers. (42 U.S.C. 6296).

The Federal testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) Certifying to DOE that their products comply with

the applicable energy conservation standards adopted pursuant to EPCA (42 U.S.C. 6295(s)), and (2) making representations about the efficiency of those products (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the product complies with relevant standards promulgated under EPCA. (42 U.S.C. 6295(s)).

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE is required to follow when prescribing or amending test procedures for covered products. EPCA requires that test procedures prescribed or amended under this section must be reasonably designed to produce test results which reflect the energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle or period of use and requires that test procedures not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)) The test procedure for external power supplies is contained in 10 CFR part 430, subpart B, appendix Z, *Uniform Test Method for Measuring the Energy Consumption of External Power Supplies* (“appendix Z”).

Under 10 CFR 430.27, any interested person may submit a petition for waiver from DOE’s test procedure requirements. DOE will grant a waiver from the test procedure requirements if DOE determines either that the basic model for which the waiver was requested contains a design characteristic that prevents testing of the basic model according to the prescribed test procedures, or that the prescribed test procedures evaluate the basic model in a manner so unrepresentative of its true energy or water consumption characteristics as to provide materially inaccurate comparative data. 10 CFR 430.27(f)(2). DOE may grant the waiver subject to conditions, including adherence to alternate test procedures. *Id.*

A petitioner may request that DOE extend the scope of a waiver or an interim waiver to include additional basic models employing the same technology as the basic model(s) set forth in the original petition. 10 CFR 430.27(g). DOE will publish any such extension in the **Federal Register**. *Id.*

II. Request for an Extension of Waiver: Assertions and Determinations

DOE issued a Decision and Order in Case Number EPS–001 (March 2018 Decision and Order), granting Apple a waiver to test its Apple brand basic models A1718, A1719, and A1540 using an alternate test procedure. 83 FR 11738 (March 16, 2018). In its petition for waiver, Apple had stated that the

specified basic models meet the provisions of the International Electrotechnical Commission’s “Universal serial bus interfaces for data and power—Part 1–2: Common components—USB Power Delivery” (“IEC 62680–1–2:2017”) specification. The IEC specification describes the particular architecture, protocols, power supply behavior, connectors, and cabling necessary for managing power delivery over a universal serial bus (“USB”) connection at power levels of up to 100 watts (“W”). The purpose behind this specification is to help provide a standardized approach for power supply and peripheral developers to ensure backward compatibility while retaining product design and marketing flexibility. See generally, IEC 62680–1–2:2017 (Abstract) (describing the standard’s general provisions and purpose).

In Apple’s view, applying the DOE test procedure to the adaptive EPS basic models identified in its petitions would yield results that would be unrepresentative of the active-mode efficiency of those products. The DOE test procedure requires that the average active-mode efficiency for adaptive EPSs³ be measured by testing the unit twice—once at the highest achievable output voltage (“V”) and once at the lowest. The test procedure requires that active-mode efficiency be measured at four loading conditions relative to the nameplate output current of the EPS. See generally 10 CFR 430.23(bb) and Appendix Z. The lowest achievable output voltage supported by the IEC 62680–1–2:2017 specification is 5V and the nameplate current at this voltage output is 3 amps (“A”), resulting in a power output of 15W. Apple contended that while the IEC 62680–1–2:2017 specification requires the tested EPS to support this power output, the 15W at 5V condition will be rarely used and only for brief periods of time. Accordingly, Apple asserted that the DOE test procedure’s measurement of efficiency at this power level is unrepresentative of the true energy consumption of the EPSs subject to the initial waiver request.

Based on the information provided by Apple, DOE determined that the current test procedure at Appendix Z would evaluate the adaptive EPS basic models specified in the March 2018 Decision and Order in a manner so unrepresentative of their true energy consumption characteristics as to

¹ All references to EPCA in this document refer to the statute as amended through the EPS Improvement Act of 2017, Public Law 115–115 (January 12, 2018).

² For editorial reasons, upon codification in the U.S. Code, Part B was redesignated as Part A.

³ An adaptive EPS is an EPS that can alter its output voltage during active-mode based on an established digital communication protocol with the end-use application without user-generated action. 10 CFR 430.2.

provide materially inaccurate comparative data. 83 FR 11739. The March 2018 Decision and Order specifies that Apple test and rate the subject basic models such that the 100% nameplate loading condition when testing at the lowest achievable output voltage is 2A (which corresponds to an output power of 10 watts). 83 FR 11740. The 75%, 50%, and 25% loading conditions shall be scaled accordingly and the nameplate output power of such an EPS, at the lowest output voltage, shall be equal to 10 watts. *Id.*

On May 17, 2018, Apple requested to extend the scope of the waiver it received in Case Number 2018–001, to the Apple brand basic model A1882. Apple stated that this basic model employs the same technology as the models covered by the existing waiver.

DOE has reviewed Apple's waiver extension request and determined that the adaptive EPS basic model identified in Apple's request incorporates the same design characteristics as those basic models covered under Apple's existing waiver such that the test procedure evaluates that basic model in a manner that is unrepresentative of its use when charging a product that is sold or intended to be used with the EPS. DOE also determined that the alternate procedure specified in Case Number EPS–001 will allow for the accurate measurement of the energy use of the basic model identified by Apple in its waiver extension request.

III. Order

After careful consideration of all the material submitted by Apple in this matter, it is Ordered that:

(1) Apple must test and rate the EPS of Apple brand basic model A1882, as of the date of publication of this Extension of Waiver in the **Federal Register**, as set forth in paragraph (2).

(2) The alternate test procedure for the basic model listed in paragraph (1) of this section is the test procedure for EPSs prescribed by DOE at 10 CFR part 430, subpart B, appendix Z, except that under section 4(a)(i)(E) and Table 1 of Appendix Z, the adaptive EPSs must be tested such that when testing at the lowest achievable output voltage (*i.e.*, 5V), the Nameplate Output Current shall be 2A (which corresponds to an output power of 10W at the 100% loading condition). The 75%, 50%, and 25% loading conditions shall be scaled accordingly and the nameplate output power of such an EPS, at the lowest output voltage, shall be equal to 10W.

(3) *Representations.* Apple may not make representations about the energy efficiency of the adaptive external power supply basic model identified in

paragraph (1) for compliance, marketing, or other purposes unless the basic model has been tested in accordance with the provisions set forth above and such representations fairly disclose the results of such testing.

(4) This Extension of Waiver shall remain in effect consistent with the provisions of 10 CFR 430.27.

(5) This Extension of Waiver is issued on the condition that the statements, representations, and documents provided by Apple are valid. If Apple makes any modifications to the controls or configurations of this basic model, the waiver will no longer be valid and Apple will either be required to use the current Federal test method or submit a new application for a test procedure waiver. DOE may rescind or modify this Extension of Waiver at any time if it determines the factual basis underlying the petition for Extension of Waiver is incorrect, or the results from the alternate test procedure are unrepresentative of the basic model's true energy consumption characteristics. 10 CFR 430.27(k)(1). Likewise, Apple may request that DOE rescind or modify the Extension of Waiver if the petitioner discovers an error in the information provided to DOE as part of its petition, determines that the Extension of Waiver is no longer needed, or for other appropriate reasons. 10 CFR 430.27(k)(2)

(6) Granting of this extension does not release Apple from the certification requirements set forth at 10 CFR part 429.

Signed in Washington, DC, on October 2, 2018.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

[Case Number 2018–008, EERE–2017–BT–WAV–0038]

Energy Conservation Program: Extension of Waiver to Panasonic Appliances Refrigeration Systems Corporation of America (PAPRSA) From the Department of Energy Consumer Refrigerator and Refrigerator-Freezer Test Procedures

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of extension of waiver.

SUMMARY: The U.S. Department of Energy (“DOE”) is granting a waiver

extension (Case Number 2018–008) to Panasonic Appliances Refrigeration Systems Corporation of America (“PAPRSA”) to waive the requirements of the DOE refrigerator and refrigerator-freezer test procedures for determining the energy consumption of combination cooler-refrigerator basic model PR5181JKBC. PAPRSA is required to test and rate this basic model in accordance with the applicable DOE test procedure, with the exception that it must calculate the specified basic model's energy consumption using a correction factor (“K-factor”) of 0.85, as specified in the Extension of Waiver.

DATES: This Extension of Waiver is effective October 10, 2018. The Extension of Waiver will terminate on October 28, 2019, in conjunction with the compliance date that applies to the published standards for miscellaneous refrigeration products (“MREFs”). See 81 FR 75194 (Oct. 28, 2016).

FOR FURTHER INFORMATION CONTACT: Ms. Lucy deButts, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Email: AS_Waiver_Requests@ee.doe.gov.

Mr. Michael Kido, U.S. Department of Energy, Office of the General Counsel, Mail Stop GC–33, Forrestal Building, 1000 Independence Avenue SW, Washington, DC 20585–0103. Telephone: (202) 586–8145. Email: Michael.Kido@hq.doe.gov.

SUPPLEMENTARY INFORMATION: In accordance with Title 10 of the Code of Federal Regulations (10 CFR 430.27(g)), DOE gives notice of the issuance of an Extension of Waiver as set forth below. The Extension of Waiver extends the Decision and Order granted to PAPRSA on May 5, 2017 (82 FR 21209, “May 2017 Decision and Order”) to include PAPRSA combination cooler-refrigerator basic model PR5181JKBC, as requested by PAPRSA on June 26, 2018.¹ PAPRSA must test and rate the specifically identified combination cooler-refrigerator basic model in accordance with the alternate test procedure described in the May 2017 Decision and Order. PAPRSA's representations concerning the energy consumption of the specified basic model must be based on testing according to the provisions and restrictions in the alternate test procedure set forth in the May 2017 Decision and Order, and the representations must fairly disclose the test results. Distributors, retailers, and

¹ PAPRSA's request is available at <http://regulations.gov> in docket ID EERE–2017–BT–WAV–0038.
