

operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

*Form Numbers:* None.

*Respondents/affected entities:*

Owners and operators of hazardous waste combustors.

*Respondent's obligation to respond:*

Mandatory (40 CFR part 63, subpart EEE).

*Estimated number of respondents:* 180 (total).

*Frequency of response:* Initially, occasionally, semiannually, and quarterly.

*Total estimated burden:* 62,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$9,560,000 (per year), which includes \$2,890,000 in annualized capital/startup and/or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The adjustment decrease in burden is due to a decrease in the number of respondents based on more accurate estimates of the number of existing and new respondents as provided by the Agency and industry consultations. The decrease in burden is also a result of the removal of burden items related to requirements that are not associated with the standard, testing and installation activities that are not information collection activities, submittal of certain conditional or optional information that is not required by the rule, and one-time activities that have been completed. These changes are further discussed below. These changes also result in an adjustment decrease in the number of responses. The number of responses also reflects updates to clarify those responses related to reporting and that related to recordkeeping activities where reports are not submitted.

There is an adjustment increase in the total capital and O&M costs based on the revised estimates of the number of new respondents. As discussed below, because this ICR assumes one new HWC unit per year, we have included capital and O&M costs for CO and O<sub>2</sub> CEMS, PM CEMS, COMs, and CMS. These items were not included in the previously approved ICR because it was assumed that existing sources had the

equipment required to meet the standard already installed.

*Abstract:* The EPA is required under section 183(e) of the Clean Air Act (CAA) to regulate volatile organic compound (VOC) emissions from the use of consumer and commercial products. Pursuant to CAA section 183(e)(3), the EPA published a list of consumer and commercial products and a schedule for their regulation (60 FR 15264). Aerosol coatings are included on the list, and the standards for such coatings are codified at 40 CFR part 59, subpart E. The reports required under the standards enable the EPA to identify coating formulations manufactured, imported, or distributed in the United States, and to determine the product-weighted reactivity. The ICR addresses the burden for activities conducted in 3-year increments after promulgation of the National VOC Emission Standards for Aerosol Coatings. Regulated entities read instructions to determine how they are affected by the rule. They are required to submit initial notifications when an aerosol coating is manufactured and notification of changes in the initial report, to report formulation data and exemptions claimed, and to maintain records. In addition, regulated entities are required to submit triennial reports that include formulation data and VOC usage.

*Form Numbers:* None.

*Respondents/affected entities:* Manufacturers, distributors, and importers of aerosol coatings (North American Industry Classification

System (NAICS) Code 32551, "Paint and Coating Manufacturing," and NAICS Code 325998, "All Other Miscellaneous Chemical Production and Preparation Manufacturing").

*Respondent's obligation to respond:* Mandatory under 40 CFR part 59, subpart E.

*Estimated number of respondents:* 65 (total).

*Frequency of response:* Annual, triennial.

*Total estimated burden:* 12,259 hours (per year). Burden is defined at 5 CFR 1320.03(b).

*Total estimated cost:* \$855,113 (per year), includes no annualized capital or operation and maintenance costs.

*Changes in Estimates:* There is a decrease of 6 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to addressing calculation errors in the previously approved ICR.
