SUMMARY: Consistent with the requirement that commercial remote sensing licensees operate their systems in a manner that protects national security concerns, foreign policy and international obligations, Section 1064, Public Law 104–201, (the 1997 Defense Authorization Act), referred to as the Kyl-Bingaman Amendment, requires that “[a] department or agency of the United States may issue a license for the collection or dissemination by a non-U.S. entity of satellite imagery with respect to Israel only if such imagery is no more detailed or precise than satellite imagery of Israel that is available from commercial sources.” Pursuant to this law, the Department of Commerce will make findings as to the level of detail or precision of satellite imagery of Israel available from commercial sources. The Department has found that imagery over Israel is not readily or consistently available in sufficient quantities from non-U.S. sources at under the 2 m Ground Sample Distance (GSD) resolution limit currently set by the Department; therefore, the Department is not changing this resolution limit.
