FOR FURTHER INFORMATION CONTACT: David Talley, APD, EPA Region III, telephone (215) 814-2117, or by email at talley.david@epa.gov.

SUPPLEMENTARY INFORMATION: The CAA affords EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator within 60 days after the expiration of this review period to object to a state operating permit if EPA has not done so. Petitions must be based only on objections raised with reasonable specificity during the public comment period, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or that the grounds for objection or other issue arose after the comment period.

The February 3, 2017 petition requested that the Administrator object to the proposed title V operating permit issued by MDE (Permit no. 24-003-0468) on the grounds that the proposed permit and permit record did not contain adequate monitoring and testing requirements to demonstrate compliance with the opacity and particulate matter emission limits contained in the permit.

The Order denying the petition to object to the state operating permit to the Raven Power Fort Smallwood Complex explains the reasons behind EPA's decision to deny the petition for objection.

Dated: January 23, 2018.

Cosmo Servidio,

Regional Administrator, Region III.

Proposed CERCLA Administrative Cost Recovery Settlement; Post Road Drum Site, Anchorage, Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice; request for public comment.

SUMMARY: In accordance with Section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (CERCLA), 42 U.S.C. 9622(i), notice is hereby given of a proposed administrative settlement for recovery of response costs incurred for the Post Road Drum Site located at 200 N. Post Road, in Anchorage, Alaska. Under this proposed settlement, the settling parties are Alaska Railroad Corporation (ARRC) and SAN LLC. The proposed settlement requires the settling parties to pay \$50,000 to the Environmental Protection Agency Hazardous Substance Superfund. Upon payment of this sum to the Environmental Protection Agency (EPA), the settling parties will be released from their obligations for payments to EPA for costs EPA incurred at the Site prior to the effective date of the proposed settlement. For 30 days following the date of publication of this notice, the EPA will receive written comments relating to the proposed

settlement. The EPA will consider all comments received and may modify or withdraw its consent to the settlement if comments received disclose facts or considerations which indicate that the settlement is inappropriate, improper, or inadequate. The EPA's response to any comments received will be available for public inspection at the U.S. EPA Region 10 Office, located at 1200 Sixth Avenue, Seattle, Washington 98101.

DATES: Comments must be received on or before March 8, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-R10-CERCLA-10-2017-0184, to the *Federal eRulemaking Portal*: <http://www.regulations.gov>. SUPPLEMENTARY INFORMATION:

I. General Information

The Post Road Drum Site is located at located at 200 Post Road, Anchorage, Alaska, within property owned by the ARRC. The Site is approximately four acres that ARRC leases to SAN LLC. Beginning in 2005 or 2006, SAN LLC subleased a portion of this property to William Vizvera, who did business as Precision Pavement Marking, Inc. (PPMI). In early November 2010, EPA received a citizen complaint regarding several 55 gallon drums and containers

on the Site that were suspected of leaking hazardous substances on to the ground and appeared to be abandoned. On November 10, 2010, EPA personnel conducted a Site visit and observed an estimated several hundred containers, including 55-gallon drums and 5-gallon pails, precariously stacked and scattered about the Site. Labels with the words "flammable liquid" and "organic peroxide" were observed on many containers. On December 15, 2010, EPA conducted a removal site evaluation. Drums were found in various states of deterioration as evidenced by bulging, corrosion, and other physical damage. EPA inventoried hundreds of containers, collected samples performed hazard categorization sample screening. Drums and containers were found across the Site on the ground or on top of or under the various vehicles at the Site—a flatbed trailer, two flatbed trucks and two box trailers. Approximately 340 fifty-five gallon drums, 140 five gallon pails and several pressurized paint vessels and several approximately 250-gallon liquid storage totes were found at the Site. Field screening and laboratory analysis of RSE samples indicates that the contents of containers at the site included ignitable and toxic characteristic RCRA hazardous wastes, which are hazardous substances. In response to the release or threatened release of hazardous substances at or from the Site, EPA oversaw the removal action at the Site.

EPA incurred approximately \$231,458 in response costs at the Site. Pursuant to the terms of the CERCLA Section 122(h)(1) Settlement Agreement for Recovery of Response Costs, the settling parties will pay EPA \$50,000. In return for the payment of this amount, EPA covenants not to sue the settling parties for past response costs—response costs incurred by EPA prior to the effective date of the Settlement Agreement—at the Site.

Dated: January 2, 2018.

Calvin Terada,

Manager, Emergency Management Program, Office of Environmental Cleanup, EPA Region 10.
