SUPPLEMENTARY INFORMATION: Under the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321, *et seq.*), we advise the public that:

1. We, the U.S. Fish and Wildlife Service (Service), have gathered the information necessary to determine impacts related to potentially issuing an incidental take permit (ITP) and have determined the proposed action qualifies as a low-effect habitat conservation plan (HCP) and is categorically excluded from the NEPA process; and

2. American Electric Power (AEP; the Applicant) has developed and proposes to implement its draft HCP, as part of the ITP application, which describes the measures the Applicant has agreed to take to minimize and mitigate the effects of American burying beetle incidental take to the maximum extent practicable under the Endangered Species Act of 1973 (ESA), section 10(a)(1)(B), as amended (16 U.S.C. 1531, *et seq.*).

The requested permit, which would be in effect for a three-year period, if granted, would authorize American burying beetle (*Nicrophorus americanus*) incidental take as a result of rebuilding two portions of the Fixico point of delivery (POD) to Weleetka electric transmission line. The proposed incidental take may occur along 21.5 miles of the existing Fixico POD to Weleetka transmission line in Hughes, Okfuskee, and Seminole Counties, OK, as a result of activities associated with the Applicant's construction (existing pole removal and new pole installation) and maintenance activities. Such actions may require disturbance within potential American burying beetle habitat. American Electric Power has proposed to mitigate the impacts to 124.416 acres of suitable American burying beetle habitat, including 124.4 acres of temporary impacts and 0.016

acres of permanent change. These habitat acres will be mitigated in perpetuity according to Service-approved mitigation ratios through purchasing credits at an approved conservation bank. Additionally, avoidance and minimization measures, including limiting clearing in temporary work areas, relieving soil compaction, and revegetating temporary and permanent cover change impacts with native vegetation will be implemented after construction is completed.

The ESA, section 9 and its implementing regulations prohibit taking fish and wildlife species listed as threatened or endangered under the ESA, section 4. However, the ESA, section 10(a) authorizes us to issue permits to take listed wildlife species where such take is incidental to, and not the purpose of, otherwise lawful activities and where the applicant meets certain statutory requirements.
