Fisheries of the Northeastern United States; Summer Flounder Fishery; Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the State of Maine is transferring a portion of its 2018 commercial summer flounder quota to the State of Connecticut. This quota adjustment is necessary to comply with the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan quota transfer provisions. This announcement informs the public of the revised commercial quotas for Maine and Connecticut.

DATES: Effective October 22, 2018, through December 31, 2018.

FOR FURTHER INFORMATION CONTACT: Cynthia Ferrio, Fishery Management Specialist, (978) 281–9180.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found in 50 CFR 648.100 through 648.110. These regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.102, and the initial 2018 allocations were published on December 22, 2017 (82 FR 60682), and corrected January 30, 2018 (83 FR 4165).

The final rule implementing Amendment 5 to the Summer Flounder Fishery Management Plan, as published in the **Federal Register** on December 17,

1993 (58 FR 65936), provided a mechanism for transferring summer flounder commercial quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can transfer or combine summer flounder commercial quota under § 648.102(c)(2). The Regional Administrator is required to consider the criteria in § 648.102(c)(2)(i)(A) through (C) in the evaluation of requests for quota transfers or combinations.

Maine is transferring 2,500 lb (1,134 kg) of summer flounder commercial quota to Connecticut through mutual agreement of the states. Based on the initial quotas published in the 2018 Summer Flounder, Scup, and Black Sea Bass Specifications and subsequent adjustments, the revised summer flounder quotas for calendar year 2018 are now: Maine, 561 lb (254 kg); and Connecticut, 147,768 lb (67,026 kg).

Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 18, 2018.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

RIN 0648–XG025

Pacific Island Pelagic Fisheries; 2018 U.S. Territorial Longline Bigeye Tuna Catch Limits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final specifications.

SUMMARY: In this final rule, NMFS specifies a 2018 limit of 2,000 metric tons (t) of longline-caught bigeye tuna for each U.S. Pacific territory (American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands (CNMI)). NMFS will allow each territory to allocate up to 1,000 t each year to U.S. longline fishing vessels in a valid specified fishing agreement. As an

accountability measure, NMFS will monitor, attribute, and restrict (if necessary), catches of longline-caught bigeye tuna, including catches made under a specified fishing agreement. These catch limits and accountability measures support the long-term sustainability of fishery resources of the U.S. Pacific Islands.

DATES: The final specifications are effective October 22, 2018, through December 31, 2018. The deadline to submit a specified fishing agreement pursuant to 50 CFR 665.819(b)(3) for review is November 21, 2018.

ADDRESSES: Copies of the Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific (Pelagic FEP) are available from the Western Pacific Fishery Management Council (Council), 1164 Bishop St., Suite 1400, Honolulu, HI 96813, tel 808–522–8220, fax 808–522–8226, or www.wpcouncil.org.

NMFS prepared environmental analyses that describe the potential impacts on the human environment that would result from the action. Copies of those analyses, which include a 2018 environmental assessment (EA) and a finding of no significant impact (FONSI), are available from www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2018-0026, or from Michael D. Tosatto, Regional Administrator, NMFS Pacific Islands Region (PIR), 1845 Wasp Blvd., Bldg. 176, Honolulu, HI 96818.

FOR FURTHER INFORMATION CONTACT: Rebecca Walker, NMFS PIRO Sustainable Fisheries, 808–725–5184.

SUPPLEMENTARY INFORMATION: NMFS is specifying a catch limit of 2,000 t of longline-caught bigeye tuna for each U.S. territory in 2018. NMFS is also authorizing each territory to allocate up to 1,000 t of its 2,000 t bigeye tuna limit to U.S. longline fishing vessels permitted to fish under the Pelagic FEP. NMFS will monitor catches of longline-caught bigeye tuna by the longline fisheries of each territory, including catches made by U.S. longline vessels operating under specified fishing agreements. The criteria that a specified fishing agreement must meet, and the process for attributing longline-caught bigeye tuna, will follow the procedures in 50 CFR 665.819. When NMFS projects that a territorial catch or allocation limit will be reached, NMFS will, as an accountability measure, prohibit the catch and retention of longline-caught bigeye tuna by vessels in the applicable territory (territorial catch limit), and/or vessels in a specified fishing agreement (allocation limit).
