Sendero Carlsbad Gateway, LLC; Notice of Schedule for Environmental Review of the Gateway Project

On August 9, 2018, Sendero Carlsbad Gateway, LLC (Gateway) filed an application in Docket No. CP18–538–000 requesting a Certificate of Public Convenience and Necessity pursuant to section 7(c) of the Natural Gas Act to construct and operate certain natural gas pipeline facilities. The proposed project is known as the Gateway Project (Project), and would provide about 400 million standard cubic feet of natural gas per day from Gateway’s newly expanded Carlsbad Plant (a cryogenic gas processing plant) to the Agua Blanca intrastate pipeline owned by White

Water Midstream, LLC. According to Gateway, the Project would help alleviate natural gas supply delivery constraints in southeast New Mexico and satisfy overall demand in the western region of the United States.

On August 22, 2018, the Federal Energy Regulatory Commission (Commission or FERC) issued its Notice of Application for the Project. Among other things, that notice alerted agencies issuing federal authorizations of the requirement to complete all necessary reviews and to reach a final decision on a request for a federal authorization within 90 days of the date of issuance of the Commission staff’s Environmental Assessment (EA) for the Project. This instant notice identifies the FERC staff’s planned schedule for the completion of the EA for the Project.

Schedule for Environmental Review

Issuance of EA—January 11, 2019
90-day Federal Authorization Decision
Deadline—April 11, 2019

If a schedule change becomes necessary, additional notice will be provided so that the relevant agencies are kept informed of the Project’s progress.

Project Description

The Gateway Project would consist of the following facilities:

- Approximately 23 miles of 24-inch-diameter natural gas transmission pipeline in Eddy County, New Mexico and Culberson County, Texas;
- a new meter station (including a mainline block valve and pig¹ launcher) within the existing Carlsbad Plant in Eddy County;
- a mainline block valve at milepost 15.0 in Eddy County; and
- a pig receiver and mainline block valve at milepost 23.3 near a White Water Midstream, LLC meter station in Culberson County.

Background

On August 29, 2018, the Commission issued a *Notice of Intent to Prepare An Environmental Assessment for the Proposed Gateway Project, And Request for Comments on Environmental Issues* (NOI). The NOI was sent to affected landowners; federal, state, and local government agencies; elected officials; environmental and public interest groups; Native American tribes; other interested parties; and local libraries and newspapers.

In response to the NOI, the Commission received comments from

¹ A “pig” is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning the pipeline, conducting internal inspections, or other purposes.
