alternative D would eliminate livestock grazing from BLM-managed lands within the Monument boundary and adjust two allotment boundaries. All livestock-related developments would be removed, and some fences would be required to exclude livestock from the Monument.

Alternative E would reduce AUMs by approximately 50 percent and close Larkspur Park kipuka to grazing. This alternative would adjust two allotment boundaries and make 272,800 acres available for grazing. No net gain in livestock-related infrastructure would be allowed.

The land use planning process was initiated on June 28, 2013, through a Notice of Intent published in the Federal Register (78 FR 39009), notifying the public of a formal scoping period and soliciting public participation in the planning process. Four scoping meetings were held in July 2013 in the communities of Arco, Carey, Rupert, and American Falls. During the scoping period, the public provided the BLM with input on relevant issues to consider in the planning process. Based on this input and the BLM’s goals and objectives, the five alternatives described above were formulated for consideration and analysis in the Draft EIS. Because Area of Critical Environmental Concern (ACEC) nominations were previously analyzed in the 2007 MMP/EIS, no new ACEC nominations were solicited during scoping.

Comments on the Draft EIS received from the public, Cooperating Agencies, and through internal BLM review were considered and incorporated as appropriate into the Proposed Plan and Final EIS, published on May 26, 2017 (82 FR 24387). Public comments on the Draft EIS resulted in the addition of clarifying text but did not significantly change proposed land use plan decisions.

Two protests were received on the Final EIS, and the issues raised have been resolved. As a result, only minor editorial modifications were made in preparing the Approved MMPA. These modifications provided further clarification of some of the decisions. The Idaho Governor’s consistency review identified that the ARMPA is inconsistent with the State of Idaho Sage Grouse Plan but identified no inconsistencies with the Approved MMPA. The Approved MMPA/ROD are in compliance with the current BLM policy on mitigation, but because the management actions are programmatic in nature, the mitigation hierarchy (avoid, minimize, or compensate) will be applied during site-specific NEPA analysis at the implementation stage following the ROD.
