SUPPLEMENTARY INFORMATION:

Background Information

On April 7, 2017, the Governor of North Dakota signed a bill into law mandating the creation of a new North Dakota Department of Environmental Quality. NDDEQ will be a cabinet-level agency that will implement all of the federally authorized or delegated environmental programs currently run by the Environmental Health Section of NDDOH. The law gives NDDOH until July 1, 2019, to obtain the necessary program authorizations and approvals from EPA to allow NDDEQ to implement the State's delegated and/or authorized environmental programs.

A state may revise its NPDES program. 40 CFR 123.62(a). In doing so, the State must submit a modified program description, Attorney General's statement, Memorandum of Agreement or other such documentation as EPA determines to be necessary under the circumstances. 40 CFR 123.62(b). States with approved programs are required to notify EPA whenever they propose to transfer all or part of the approved State agency to any other State agency and to identify any new division of responsibilities amongst the agencies involved. 40 CFR 123.62(c). Organizational charts required in the State's original authorization package must be revised and resubmitted. *Id.* The new agency is not authorized to administer the program until approved by the Regional Administrator.

On July 30, 2018, the EPA received a complete program revision package from the state of North Dakota. The EPA has determined the program revision package contains all the required elements. The full program revision package is available for inspection and copying at the addresses appearing in the **ADDRESSES** section of this notice.

B. What action is EPA taking?

With this action, the EPA is providing notice of a proposed program revision to the State of North Dakota’s approved NPDES program to transfer authority to administer the NDPDES program from the NDDOH to the NDDEQ. This action is not changing the current scope of North Dakota’s NDPDES program and is transferring authority to another agency to implement the state’s current NPDES program as part of the larger effort to move all federally authorized or delegated environmental programs from the NDDOH to the NDDEQ. If the proposed program revision is approved, EPA will retain the authority to issue permits for facilities located in Indian country¹ and/or discharging to waters in Indian country.

C. What is EPA’s authority for taking this action?

This action is taken under the authority of section 402 of the Clean Water Act as amended, 33 U.S.C. 1342. Under 40 CFR 123.62(b)(2), the EPA is

required to determine whether proposed program revisions are substantial and, if so, issue public notice and provide an opportunity to comment for a period of at least 30 days. The EPA considers this transfer of state authority to be substantial.
