

development and evaluation under a research collaboration.

Potential Commercial Applications

- Novel therapeutics for neurodegenerative diseases AND other indications which involve c-Abl kinase (e.g., lysosomal storage disorders, cancers, etc.).

Competitive Advantages

- Novel compounds that have a commercial advantage over those currently known because they are able to selectively bind to c-Abl at an allosteric site, can cross the blood-brain barrier, and show robust efficacy in several neurodegenerative models. All of this allows them to potentially treat neurodegenerative diseases, cancer etc.

Development Stage

- Pre-Clinical (in vivo validation).

This Notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology.
