

Inventory of Approved Burdens. The change in burden occurred because the number of respondents, subject to these standards, has increased since the last ICR renewal period. In addition, this ICR assumes all existing respondents will have to familiarize with the regulatory requirements each year.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Lime Manufacturing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Lime Manufacturing (EPA ICR No. 1167.12, OMB Control No. 2060-0063), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2018. Public comments were previously requested, via the **Federal Register**, on June 29, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before November 30, 2018.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2014-0042, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

Abstract: The New Source Performance Standards (NSPS) for Lime Manufacturing (40 CFR part 60, subpart HH) apply to each existing and new rotary lime kiln used in the manufacturing of lime. These standards do not apply to facilities used in the manufacture of lime at kraft pulp mills. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 60, subpart HH.

Form Numbers: None.

Respondents/affected entities: Lime manufacturing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart HH).

Estimated number of respondents: 41 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 3,820 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$463,000 (per year), which includes \$61,500 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is an adjustment increase in the respondent labor hours and costs as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred due to a change in assumption. This ICR assumes all existing respondents will have to familiarize with the regulatory requirements each year.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Rubber Tire Manufacturing (40 CFR part 63, subpart XXXX) apply to existing and new facilities that are involved in rubber processing, tire production, tire cord production, and puncture sealant application. New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 63, subpart XXXX.

Form Numbers: None.

Respondents/affected entities: Rubber tire manufacturers.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart XXXX).

Estimated number of respondents: 23 (total).

Frequency of response: Initially, occasionally, semiannually, and annually.

Total estimated burden: 6,520 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$910,000 (per year), which includes \$0 annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: This ICR reflects the requirements for on-going compliance (existing facilities) with the rule. The number of sources presented in this ICR reflects current data obtained from industry, including information on the use of compliance alternatives used by the affected facilities. Based on consultations with the trade group, no facilities are using control devices to comply with the requirements.

Abstract: Section 609 of the Clean Air Act Amendments of 1990 (Act) provides general guidelines for the servicing of motor vehicle air conditioners (MVACs). It states that "no person repairing or servicing motor vehicles for consideration may perform any service on a motor vehicle air conditioner involving the refrigerant for such air conditioner without properly using approved refrigerant recycling equipment and no such person may perform such service unless such person has been properly trained and certified." In 1992, EPA developed regulations under section 609 that were published in 57 FR 31242, and codified
