Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of Proposed Collection

The information collected from individuals and organizations is used to conduct screening to ensure that State funded activities do not provide support to entities or individuals deemed to be a risk to national security.

The State Department has implemented a Risk Analysis and Management Program to vet potential contractors and grantees seeking funding from the Department of State to mitigate the risk that such funds might benefit entities or individuals who present a national security risk. To conduct this vetting program the Department collects information from contractors, sub-contractors, grantees and sub-grantees regarding their directors, officers and/or key employees. The information collected is compared to information gathered from commercial, public, and U.S. government databases to determine the risk that the applying organization, entity or individual might use Department funds or programs in a way

that presents a threat to national security. The program is currently operating on a pilot basis consistent with the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2018 (Div. K, Pub. L. 115–141).

Methodology

The Department collects information through mail, fax, or electronic submission.

Petition for Exemption

Docket No.: FAA–2018–0911.

Petitioner: The Boeing Company.

Section(s) of 14 CFR Affected:

§ 91.527(a).

Description of Relief Sought: The Boeing Company seeks an exemption from § 91.527(a) at amendment 91–310 with respect to operating the 777–9 and 777–8 “777X” series aircraft in icing conditions. This exemption would permit The Boeing Company to operate such aircraft within the holdover times of the other critical surfaces of the aircraft without specific consideration of the folding wingtip (FWT) conditions. The exemption would be limited by the Airplane Flight Manual (AFM)—Miscellaneous Limitations notation that defines conditions under which takeoff without appropriate de/anti-icing treatment of the FWT is not permitted.
