NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC-2018-0212]

RIN 3150-AK16

List of Approved Spent Fuel Storage Casks: TN Americas LLC, Standardized NUHOMS® System, Certificate of Compliance No. 1004, Renewed Amendment No. 15

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is proposing to amend its spent fuel storage regulations by revising the TN Americas LLC Standardized NUHOMS® Horizontal Modular Storage System (NUHOMS® System) listing within the “List of approved spent fuel storage casks” to include Renewed Amendment No. 15 to Certificate of Compliance No. 1004. Because this amendment is subsequent to the renewal of the TN Americas LLC Standardized NUHOMS® Certificate of Compliance 1004 system and, therefore, subject to the Aging Management Program requirements of the renewed certificate, it is referred to as “Renewed Amendment No. 15.” Renewed Amendment No. 15 would revise the Certificate of Compliance’s technical specifications to: Unify and standardize fuel qualification tables; revise existing and add new heat load zoning configurations; increase the allowable maximum assembly average burnup; allow loading of damaged fuel assemblies under certain conditions; expand the definition of the poison rod assemblies to include rod cluster control assembly materials; allow other zirconium alloy cladding materials; add model OS197 as an authorized transfer cask; add the description for the solar shield in the updated final safety analysis report; and add flexibility to general licensees in verifying compliance regarding the storage pad

location and the soil-structure interaction. Additionally, the rulemaking would make clarifications to rule text related to Certificate of Compliance No. 1004 by removing redundant language.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include

identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Rulemaking Procedure

This proposed rule is limited to the changes contained in Renewed Amendment No. 15 to Certificate of Compliance 1004 and does not include other aspects of the TN Americas LLC Standardized NUHOMS® System design. Because the NRC considers this action non-controversial and routine, the NRC is publishing this proposed rule concurrently with a direct final rule in the Rules and Regulations section of this issue of the **Federal Register**. The direct final rule will become effective on January 22, 2019. However, if the NRC receives significant adverse comments on this proposed rule by December 7, 2018, then the NRC will publish a document that withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to these proposed revisions in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule’s underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

- (1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-

comment process. For example, a substantive response is required when:

- (a) The comment causes the NRC to reevaluate (or reconsider) its position or conduct additional analysis;
- (b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or
- (c) The comment raises a relevant issue that was not previously addressed or considered by the NRC.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC to make a change (other than editorial) to the rule.

For procedural information and the regulatory analysis, see the direct final rule published in the Rules and Regulations section of this issue of the **Federal Register**.

III. Background

Section 218(a) of the Nuclear Waste Policy Act (NWPA) of 1982, as amended, requires that “the Secretary [of the Department of Energy] shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the [Nuclear Regulatory] Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission.” Section 133 of the NWPA states, in part, that “[the Commission] shall, by rule, establish procedures for the licensing of any technology approved by the Commission under Section 219(a) [sic: 218(a)] for use at the site of any civilian nuclear power reactor.”

To implement this mandate, the Commission approved dry storage of spent nuclear fuel in NRC-approved casks under a general license by publishing a final rule which added a new subpart K in part 72 of title 10 of the *Code of Federal Regulations* (10 CFR) entitled “General License for Storage of Spent Fuel at Power Reactor Sites” (55 FR 29181; July 18, 1990). This rule also established a new subpart L in 10 CFR part 72 entitled “Approval of Spent Fuel Storage Casks,” which contains procedures and criteria for obtaining NRC approval of spent fuel storage cask designs. The NRC subsequently issued a final rule on December 22, 1994 (59 FR 65898), that approved the TN Americas LLC Standardized NUHOMS® System design and added it to the list of NRC-approved cask designs provided in § 72.214 as Certificate of Compliance No. 1004. Most recently, on September 27, 2017 (82 FR 44879), the NRC issued a Renewal of the revised initial certificate and Amendment Nos. 1 through 11, 13 and 14.

IV. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31883). The NRC requests comment on the proposed rule with respect to the clarity and effectiveness of the language used.

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to 26 CFR part 1 under section 846 of the Code. Section 846 was added to the Code by section 1023(c) of the Tax Reform Act of 1986, Public Law 99–514 (100 Stat. 2085, 2399). Final regulations under section 846 were published in the **Federal Register** (57 FR 40841) on September 8, 1992 (T.D. 8433). See §§ 1.846–0 through 1.846–4 (1992 Final Regulations).

This document provides guidance on discounting rules under section 846 of the Code, which were amended on December 22, 2017 by section 13523 of “An Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018,” Public Law 115–97, title 1, 131 Stat. 2152 (2017) (TCJA) for taxable years beginning after December 31, 2017. The discounting rules of section 846, both prior to and after amendment by the TCJA, are used to determine discounted unpaid losses and estimated salvage recoverable of property and casualty insurance companies and discounted unearned premiums of title insurance companies for Federal income tax purposes under section 832, as well as discounted unpaid losses of life insurance companies for Federal income tax purposes under sections 805(a)(1) and 807(c)(2). These rules are discussed in greater detail in parts A and B of this Background section.

Section 13523(a) of the TCJA amended section 846(c) to provide a new definition of the “annual rate” to be used by taxpayers for discounting purposes. Section 13523(b) of the TCJA amended the computational rules for determining loss payment patterns under section 846(d). Section 13523(c) of the TCJA repealed the election under former section 846(e) to use the taxpayer’s own historical loss payment pattern instead of the pattern published by the Secretary. These changes are effective for taxable years beginning after December 31, 2017. The proposed

regulations implement these changes in the law.

Part C of this Background section discusses smoothing adjustments, and part C of the Explanation of Provisions section of this preamble describes a proposed regulation authorizing the Secretary to adopt a methodology to smooth the loss payment patterns derived from the annual statement loss payment data to avoid negative payment amounts and to otherwise produce a stable pattern of positive discount factors less than one. Part A of the Other Discounting Considerations section of this preamble provides additional detail on the proposed methodology that the Department of the Treasury (Treasury Department) and the IRS anticipate developing under the authority provided in this proposed regulation. The Treasury Department and the IRS intend to describe the methodology used under the rules set forth in the proposed regulations in each revenue procedure that publishes discount factors for a determination year.

Part D of this Background section describes the existing procedures for discounting unpaid losses with respect to accident years not separately reported on the National Association of Insurance Commissioners’ (NAIC) annual statement, including the method described in section V of Notice 88–100, 1988–2 C.B. 439 (composite method). Part B of the Other Discounting Considerations section of this preamble describes proposed new procedures for discounting such unpaid losses. These procedures would simplify the discounting of unpaid losses by eliminating the need for a second set of discount factors to be used with respect to accident years not separately reported on the NAIC annual statement.

Part C of the Other Discounting Considerations section of this preamble describes an approach that the Secretary intends to adopt for discounting estimated salvage recoverable by applying the unpaid loss discount factors in each line of business to the estimated salvage recoverable in that line of business.

A. Discounted Unpaid Losses, Estimated Salvage Recoverable, and Discounted Unearned Premiums

Under section 832, the taxable income of a property and casualty insurance company (non-life insurance company), including a title insurance company, is the sum of its underwriting income and investment income (as well as gains and other income items), reduced by allowable deductions. Under section 832(b)(3), a non-life insurance company’s “losses incurred” is a
