(iv) Significance: This notification is provided to report the inclusion of MDE items and non-MDE item which represents an increase in capability over that previously notified. At the time of the original notification, the purchasing country had not finalized exact quantities of certain items. Further technical discussions highlighted the need for NVDs and additional spare items, training missiles, guided bomb kit components, and helmets. The additional items provide Slovakia with the necessary equipment to support the requested capability.

(v) Justification: This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a NATO ally. The proposed additions will support Slovakia’s F–16 program, which will modernize its Air Force and strengthen its homeland defense.

(vi) Sensitivity of Technology: AN/AVS–9 NVDs are third generation aviation NVDs offering higher resolution, high gain, and photo response to near-infrared. Hardware is UNCLASSIFIED and technical data and documentation to be provided are UNCLASSIFIED.

AIM–120 CATMS are non-functioning, inert missile rounds that simulate the correct weight and balance of live missiles; they are used for armament loading and unloading training as well as flown captive carry on training sorties.

The Sensitivity of Technology statement contained in the original AECA 36(b)(1) transmittal applies to all other MDE items reported here.
