

k. The Technical Data to support the operations, maintenance, and Training for all aircraft communications, ASE, COMSEC, and ISR related equipment will be detailed enough (e.g., minimum Level II Engineering drawings) to allow support contractors and operators to independently conduct all ILS activities, implement obsolescence management, and support required Airworthiness activities. All aircraft operations and maintenance manuals are available to the public and have no ITAR restrictions. Technical Data for the mission equipment outlined above will be provided only to the level required to support operation, maintenance, and training. Maintenance is limited to the level required to provide immediate diagnostics and replacement or limited repair. No Technical Data or intellectual property sufficient in detail to support depot repair operations will be provided. The Technical Data for the mission equipment is Significant Military Equipment.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used

to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Canada can provide substantially the same degree of protection of this technology as the U.S. Government. This proposed sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification. Moreover, the benefits to be derived from this sale, as outlined in the Policy Justification, outweigh the potential damage that could result if the sensitive technology were revealed to unauthorized persons.

5. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Canada.

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office in the United States (TECRO)—Foreign Military Sales Order (FMSO) II Case

TECRO has requested a Foreign Military Sales Order (FMSO) II to provide funds for blanket order requisitions, under a Cooperative Logistics Supply Support Arrangement for stock replenishment supply of standard spare parts, and repair/replace of spare parts in support of the F-16, C-130, F-5, Indigenous Defense Fighter (IDF), all other aircraft systems and subsystems, and other related elements of logistics and program support. The total estimated program cost is \$330 million.

This proposed sale is consistent with U.S. law and policy as expressed in Public Law 96-8.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security and defensive capability of the recipient, which has been and continues to be an important force for political stability, military balance, and economic progress in the region.

The proposed sale of spare and repair parts is required to maintain the recipient's defensive and transport aerial fleet. The recipient has been operating these fleets since 1996 and will have no difficulty absorbing this equipment and support into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

There are no principal contractors involved with this potential sale. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the permanent assignment of any U.S. Government or contractor representatives.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
