I. Introduction

In Order No. 2480, the Commission approved the Priority Mail Express & Priority Mail Contract 18 negotiated service agreement (Existing Agreement).¹ On October 29, 2018, the Postal Service filed notice that it has agreed to the Amendment to the Existing Agreement.² On October 30,

¹ See Docket Nos. MC2015-49 and CP2015-61, Order Adding Priority Mail Express & Priority Mail Contract 18 to the Competitive Product List, May 12, 2015 (Order No. 2480).

² USPS Notice of Amendment to Priority Mail Express & Priority Mail Contract 18, Filed Under Seal, October 29, 2018 (Notice). The amendment is an attachment to the Notice (Amendment).

2018, the Commission issued a notice reopening this docket to consider the Amendment, appointing a Public Representative, and providing interested persons with an opportunity to comment.³

The Commission set the deadline for comments as November 6, 2018. Notice Initiating Dockets at 2. However, the Existing Agreement expires November 8, 2018,⁴ and the Amendment extending the agreement, if approved, would not take effect until two days after the Commission completes its review. Notice, Attachment A at 1. Under the current schedule, the soonest the Commission could issue a decision on the Amendment is November 7, 2018, which would cause the Existing Agreement to expire before the Amendment could take effect.

To permit the Commission time to review the comments and issue an order on the Amendment at least two days before the Existing Agreement expires, the deadline for comments is revised to November 5, 2018.

It is ordered:

1. The deadline to submit comments is revised to November 5, 2018.

2. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Secretary.

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing of Proposed Rule Change, as Modified by Partial Amendment No. 1, Related to The Options Clearing Corporation's Margin Methodology for Incorporating Variations in Implied Volatility

November 2, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act” or “Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on October 22, 2018, The

Options Clearing Corporation (“OCC”) filed with the Securities and Exchange Commission (“SEC” or “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by OCC. On October 30, 2018, OCC filed Partial Amendment No. 1 to the proposed rule change.³ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change is filed in connection with proposed changes to enhance OCC's model for incorporating variations in implied volatility within OCC's margin methodology (“Implied Volatility Model”), the System for Theoretical Analysis and Numerical Simulations (“STANS”).⁴ The proposed changes to OCC's Margins Methodology document are contained in confidential Exhibit 5 of the filing. Material proposed to be added is marked by underlining and material proposed to be deleted is marked by strikethrough text. The proposed changes are described in detail in Item 3 below. The proposed rule change does not require any changes to the text of OCC's By-Laws or Rules. The proposed rule change is available on OCC's website at <https://www.theocc.com/about/publications/bylaws.jsp>. All terms with initial capitalization that are not otherwise defined herein have the same meaning as set forth in the OCC By-Laws and Rules.⁵

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

³ In Partial Amendment No. 1, OCC corrected errors in Exhibits 1A and 5 without changing the substance of the proposed rule change.

⁴ OCC also has filed an advance notice with the Commission in connection with the proposed changes. See SR–OCC–2018–804.

⁵ OCC's By-Laws and Rules can be found on OCC's public website: <http://optionsclearing.com/about/publications/bylaws.jsp>.

Background

STANS Overview

STANS is OCC's proprietary risk management system for calculating Clearing Member margin requirements.⁶ The STANS methodology utilizes large-scale Monte Carlo simulations to forecast price and volatility movements in determining a Clearing Member's margin requirement.⁷ STANS margin requirements are calculated at the portfolio level of Clearing Member accounts with positions in marginable securities and consists of an estimate of two primary components: A base component and a stress test add-on component. The base component is an estimate of a 99% expected shortfall⁸ over a two-day time horizon. The concentration/dependence stress test charge is obtained by considering increases in the expected margin shortfall for an account that would occur due to (i) market movements that are especially large and/or in which certain risk factors would exhibit perfect or zero correlations rather than correlations otherwise estimated using historical data or (ii) extreme and adverse idiosyncratic movements for individual risk factors to which the account is particularly exposed. The STANS methodology is used to measure the exposure of portfolios of options and futures cleared by OCC and cash instruments in margin collateral.⁹

The econometric models underlying STANS currently incorporate a number of risk factors. A “risk factor” within OCC's margin system is defined as a product or attribute whose historical data is used to estimate and simulate the risk for an associated product. The majority of risk factors utilized in the

⁶ See Securities Exchange Act Release No. 53322 (February 15, 2006), 71 FR 9403 (February 23, 2006) (SR–OCC–2004–20). A detailed description of the STANS methodology is available at <http://optionsclearing.com/risk-management/margins/>.

⁷ See OCC Rule 601.

⁸ The expected shortfall component is established as the estimated average of potential losses higher than the 99% value at risk threshold. The term “value at risk” or “VaR” refers to a statistical technique that, generally speaking, is used in risk management to measure the potential risk of loss for a given set of assets over a particular time horizon.

⁹ OCC notes that, pursuant to OCC Rule 601(e)(1), OCC also calculates initial margin requirements for segregated futures accounts using the Standard Portfolio Analysis of Risk Margin Calculation System (“SPAN”). No changes are proposed to OCC's use of SPAN because the proposed changes do not concern futures. See Securities Exchange Act Release No. 72331 (June 5, 2014), 79 FR 33607 (June 11, 2014) (SR–OCC–2014–13).
