DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC19–5–000]

Commission Information Collection Activities (FERC–500); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the currently approved information collection, FERC–500 (Application for License/Relicense and Exemption for Water Projects with More than 5 Megawatt Capacity).

DATES: Comments on the collection of information are due January 22, 2019.

ADDRESSES: You may submit comments (identified by Docket No. IC19–5–000) by either of the following methods:

• eFiling at Commission’s website: http://www.ferc.gov/docs-filing/docs-filing.asp.
• Mail/Hand Delivery/Courier: Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE, Washington, DC 20426.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: http://www.ferc.gov/help/submission-guide.asp. For user assistance, contact FERC Online Support by email at ferconlinesupport@ferc.gov, or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at http://www.ferc.gov/docs-filing/docs-filing.asp.

FOR FURTHER INFORMATION CONTACT:

Ellen Brown may be reached by email at DataClearance@FERC.gov, telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Title: FERC–500, Application for License/Relicense and Exemption for Water Projects with More than 5 Megawatt Capacity. OMB Control No.: 1902–0058

Abstract: Pursuant to the Federal Power Act, the Commission is authorized to issue licenses and exemptions to citizens of the United States, or to any corporation organized under the laws of United States or any State thereof, or to any State or municipality for the purpose of constructing, operating, and maintaining dams, water conduits, reservoirs, power houses, transmission lines, or other project works necessary or convenient for the development and improvement of navigation and for the development, transmission, and utilization of power across, along, from, or in any of the streams or other bodies of water over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States, or upon any part of the public lands and reservations of the United States.

FERC–500 is an application (for water projects with more than 5 megawatt capacity) for a hydropower license or exemption. FERC–500 includes certain reporting requirements in 18 CFR 4.5, 8.16, 141.15, and 292. Depending on the type of application, it may include project description, schedule, resource allocation, project operation, construction schedule, cost, and financing; and an environmental report. After an application is filed, the Federal agencies with responsibilities under the Federal Power Act (FPA) and other statutes, the States, Indian tribes, and other participants have opportunities to request additional studies and provide comments and recommendations.

Submittal of the FERC–500 application is necessary to fulfill the requirements of the FPA in order for the Commission to make the required finding that the proposal is economically, technically, and environmentally sound, and is best adapted to a comprehensive plan for improving/developing a waterway or waterways.

Type of Respondent: Applicants for major hydropower licenses or exemptions greater than 5 MW

Estimate of Annual Burden:

Applicants for licenses are required to include an estimate of their cost to prepare the license application, which would include nearly all of the reporting requirements in FERC–500. Because the requirements for an exemption application are largely the same as that of a license application, the license application costs are a good estimate of the exemption application costs and of the overall burden of preparing license and exemption applications for projects greater than 5 MW.

To estimate the burden, we used actual data reported by applicants for proposed projects greater than 5 MW filed in fiscal years (FY) 2016 through 2018, and averaged the reported license application costs. The results are presented in the table below.

---

2 Statutes include the Electric Consumers Protection Act (ECPA), the National Environmental Policy Act (NEPA), the Endangered Species Act, the Federal Water Pollution Control Amendments of 1972 (the Clean Water Act), and the Coastal Zone Management Act.

2 “Burden” is the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to Title 5 Code of Federal Regulations 1320.3.

4 Exceptions would be 18 CFR 2.19, 4.201, 4.202, 4.303, 4.35, 8.1, 8.2, 16.19, 141.15, and 292.208, none of which directly relate to preparation of a license or exemption application for a project greater than 5 MW.
The average burden cost per application over the period FY 2016 through FY 2018 was approximately $3,344,686. We estimate a cost (salary plus benefits) of $79/hour. Using this hourly cost estimate, the average burden for each application filed from FY 2016 to FY 2018 is 42,338 hours.

Comments: Comments are invited on:

1. Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: November 14, 2018.

Kimberly D. Bose,
Secretary.

### DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP17–66–000; CP17–67–000]

Venture Global Plaquemines LNG, LLC and Venture Global Gator Express, LLC; Notice of Availability of the Draft Environmental Impact Statement for the Proposed Plaquemines LNG and Gator Express Pipeline Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a draft environmental impact statement (EIS) for the Plaquemines LNG and Gator Express Pipeline Project, proposed by Venture Global Plaquemines LNG, LLC and Venture Global Gator Express, LLC (collectively called Venture Global) in the above-referenced dockets. Venture Global requests authorization to construct and operate a new LNG export terminal and associated facilities along the west bank of the Mississippi River in Plaquemines Parish, Louisiana (LNG Terminal) and to construct and operate two new 42-inch-diameter natural gas pipeline laterals that would connect to the LNG Terminal. The new liquefaction facilities would have a design production capacity of 20 million metric tons of liquefied natural gas (LNG) per annum.

The draft EIS assesses the potential environmental effects of the construction and operation of the Plaquemines LNG and Gator Express Pipeline Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with the mitigation measures recommended in the draft EIS, would have some adverse environmental impacts. These impacts would be reduced to less-than-significant levels with the implementation of Venture Global’s proposed mitigation measures and the additional measures recommended in the draft EIS.

The U.S. Army Corps of Engineers, U.S. Coast Guard, U.S. Department of Energy, U.S. Environmental Protection Agency, and U.S. Department of Transportation participated as cooperating agencies in the preparation of the EIS. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposal and participate in the NEPA analysis.

The draft EIS addresses the potential environmental effects of the construction and operation of the following project facilities:

- LNG Terminal: Construction and operation of various liquefaction, LNG distribution, and appurtenant facilities within the boundaries of the site leased by Venture Global on the Mississippi River, including:
  - Six pretreatment facilities (three in each phase);
  - A liquefaction plant with 18 integrated single-mixed refrigerant blocks and support facilities (otherwise referred to as liquefaction blocks or blocks) to be constructed in two phases (nine blocks in each phase);
  - Four 200,000-cubic-meter aboveground LNG storage tanks;
  - Three LNG loading docks within a common LNG berthing area; and
  - Air-cooled electric power generation facilities.

- Pipeline System: Construction and operation of two parallel 42-inch-diameter natural gas pipelines that share one right-of-way corridor for the majority of their respective routes and appurtenant aboveground facilities, including the following:
  - 15.1-mile-long Southwest Lateral Tennessee Gas Pipeline, LLC (TGP) Pipeline;
  - 11.7-mile-long Southwest Lateral Texas Eastern Transmission, LP (TETCO) Pipeline;
  - TGP metering and regulation station; and
  - TETCO metering and regulation station.

Benefits, therefore, we are using the FERC FY 2018 hourly cost (salary plus benefits) of $79/hour.

---

\(^6\) FERC staff estimates that industry is similarly situated in terms of the hourly cost for salary plus benefits. Therefore, we are using the FERC FY 2018 hourly cost (salary plus benefits) of $79/hour.
