In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. The first page of any filing should include docket number P–13214–015.

k. *Description of Request:* Lock 12 Hydro Partners, LLC requests approval for an amendment to the license for the Ravenna Hydroelectric Project. Lock 12 Hydro Partners, LLC is proposing to change the powerhouse design approved in the license to simplify the project's design and better protect the generating equipment during extreme floods that can occur on the Kentucky River. Lock 12 Hydro Partners, LLC is proposing to use 5 Flygt submersible turbine-generators with a total generating capacity of 2.64 megawatts (MW), as opposed to the authorized 4 conventional Kaplan turbines (also with a total generating capacity of 2.64 MW). The 5 Flygt turbine-generators would have a total hydraulic capacity of 2,193 cubic feet per second (cfs), as opposed to the total hydraulic capacity authorized for the Kaplan units of 2,100 cfs. The applicant states that this slight increase in the maximum hydraulic capacity should have no impact on fish entrainment since the inlet speed at the trashrack would still be well below the maximum inlet speed of 1.5 feet per second in the project license.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE, Room 2A, Washington, DC 20426, or by calling (202) 502–8371. This filing may also be
