OMB Control Number: 3060-0392.

Title: 47 CFR 1 Subpart J—Pole Attachment Complaint Procedures.

Form Number: N/A.

Type of Review: Revision of a currently-approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 1,775 respondents; 1,791 responses.

Estimated Time per Response: 10-14 hours.

Frequency of Response: On occasion reporting and third-party disclosure requirements.

Obligation to Respond: Required to obtain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Section 224.

Total Annual Burden: 3,149 hours.

Total Annual Cost: \$486,000.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: No questions of a confidential nature are asked. However, respondents may request that materials or information submitted to the Commission in a complaint proceeding be withheld from public inspection under 47 CFR 0.459.

Needs and Uses: The Commission is requesting OMB approval for a revision to an existing information collection. Currently, OMB Collection No. 3060-0392, among other things, tracks the burdens associated with utilities defending against complaints brought by incumbent local exchange carriers (ILECs) related to unreasonable rates, terms, and conditions for pole attachments. In *Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment*, WC Docket No. 17-84, WT Docket No. 17-70, Third Report and Order and Declaratory Ruling, FCC 18-111 (2018), the Commission, among other things, revised section 1.1413 of its rules to establish a presumption that an ILEC is similarly situated to an attachers that is a telecommunications carrier or a cable television system providing telecommunications services for purposes of obtaining comparable pole attachment rates, terms, or conditions. The Commission also established a presumption that an incumbent LEC may be charged no higher than the Commission-defined pole attachment rate for telecommunications carriers, as determined in accordance with section 1.1406(d)(2). To rebut these presumptions, the utility must demonstrate by clear and convincing evidence that the incumbent LEC receives benefits under its pole attachment agreement with a utility that materially advantages the incumbent LEC over other telecommunications carriers or cable television systems providing telecommunications services on the same poles. As a result, now there is an incremental paperwork burden on utilities should they elect to challenge the presumption that incumbent LECs are entitled to rates, terms, and conditions of similarly-situated telecommunications attachers. None of the other paperwork burdens as

set forth in the 2018 renewal of OMB Collection No. 3060–0392 will change. The Commission will use the information collected under this revision to 47 CFR 1.1413 to hear and resolve pole access complaints brought by ILECs and to determine the merits of the complaints.
