

pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).² As a result of its reviews, Commerce determined that revocation of the *AD Orders* would likely lead to a continuation or recurrence of dumping and, therefore, notified the ITC of the magnitude of the margins of dumping likely to prevail should the orders be revoked.³ On December 6, 2018, the ITC published its determination, pursuant to sections 751(c) and 752 of the Act, that revocation of the *AD Orders* would likely lead to continuation or recurrence of material injury to an industry in the United States within a reasonably foreseeable time.⁴

Scope of the *AD Orders*

The merchandise covered by these orders is silicomanganese. Silicomanganese, which is sometimes called ferrosilicon manganese, is a ferroalloy composed principally of manganese, silicon, and iron, and normally contains much smaller proportions of minor elements, such as carbon, phosphorous and sulfur. Silicomanganese generally contains by weight not less than 4 percent iron, more than 30 percent manganese, more than 8 percent silicon and not more than 3 percent phosphorous. All compositions, forms and sizes of silicomanganese are included within the scope of these orders, including silicomanganese slag, fines and briquettes. Silicomanganese is used primarily in steel production as a source of both silicon and manganese.

Silicomanganese is currently classifiable under subheading 7202.30.0000 of the Harmonized Tariff Schedule of the United States (HTSUS). Some silicomanganese may also currently be classifiable under HTSUS subheading 7202.99.5040.⁵ The *AD Orders* cover all silicomanganese,

China, 59 FR 66003 (December 22, 1994) and *Suspension Agreement on Silicomanganese from Ukraine; Termination of Suspension Agreement and Notice of Antidumping Duty Order*, 66 FR 43838 (August 21, 2001) (*AD Orders*).

² See *Initiation of Five-Year (Sunset) Reviews*, 82 FR 46221 (October 4, 2017).

³ See *Silicomanganese from the People's Republic of China: Final Results of Expedited Fourth Sunset Reviews of the Antidumping Duty Orders*, 83 FR 5609 (February 8, 2018). See also *Silicomanganese from the People's Republic of China: Notice of Correction to the Final Results of the Expedited Fourth Sunset Review of the Antidumping Duty Order*, 83 FR 17995 (April 25, 2018).

⁴ See *Investigation No. 731-TA-672-673 (Fourth Review): Silicomanganese from China and Ukraine*: 83 FR 62900 (December 6, 2018), and USITC Publication 4845 (November 2018).

⁵ 7202.99.5040 is the applicable HTSUS statistical reporting prior to July 2, 2003. Effective July 2, 2003, the subject merchandise that would originally have entered under 7202.99.5040 now enters under 7202.99.8040.

regardless of its tariff classification. Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the *AD Orders* remains dispositive.

Continuation of the Orders

As a result of the determinations by Commerce and the ITC that revocation of the *AD Orders* would likely lead to a continuation or recurrence of dumping and material injury to an industry in the United States, pursuant to section 751(d)(2) of the Act and 19 CFR 351.218(a), Commerce hereby orders the continuation of the *AD Orders*. U.S. Customs and Border Protection will continue to collect cash deposits at the rates in effect at the time of entry for all imports of subject merchandise.

The effective date of the continuation of the *AD Orders* will be the date of publication in the **Federal Register** of this notice of continuation. Pursuant to section 751(c)(2) of the Act, Commerce intends to initiate the next five-year review of this order not later than 30 days prior to the fifth anniversary of the effective date of continuation.

Administrative Protective Order

This notice also serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return/destruction or conversion to judicial protective order of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Failure to comply is a violation of the APO which may be subject to sanctions.

These five-year (sunset) reviews and this notice are in accordance with sections 751(c) and 751(d)(2) of the Act and published pursuant to section 777(i)(1) of the Act and 19 CFR 351.218(f)(4).

Dated: December 7, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XG598

Atlantic Highly Migratory Species (HMS); Atlantic HMS Tournament Registration and Reporting; Selection of All Atlantic HMS Tournaments for Reporting

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: NMFS announces that all Atlantic HMS tournaments will be selected for reporting beginning on January 1, 2019. Previously, only a portion of Atlantic HMS tournaments were selected for reporting. An Atlantic HMS tournament is a tournament that awards points or prizes for catching Atlantic HMS (*i.e.*, swordfish, billfish, sharks and/or tunas). When selected for reporting, Atlantic HMS tournament operators are required to submit an HMS tournament catch summary report within seven days after tournament fishing has ended. NMFS uses the data to estimate the total annual catch of HMS and the impact of tournament operations in relation to other types of fishing activities.

DATES: Selection of all Atlantic HMS tournaments for reporting will begin January 1, 2019.

FOR FURTHER INFORMATION CONTACT: Nicolas Alvarado at 727-209-5955 or 727-824-5398 (fax), or email Nicolas.Alvarado@noaa.gov.

SUPPLEMENTARY INFORMATION:

The U.S. Atlantic HMS fisheries are managed under the 2006 Consolidated HMS Fishery Management Plan and its amendments. Implementing regulations at 50 CFR part 635 are issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 *et seq.*, and the Atlantic Tunas Convention Act (ATCA), 16 U.S.C. 971 *et seq.* ATCA authorizes the Secretary of Commerce to promulgate regulations, as may be necessary and appropriate, to implement recommendations of the International Commission for the Conservation of Atlantic Tunas.

An Atlantic HMS tournament is a tournament that awards points or prizes for catching Atlantic HMS (swordfish, billfish, sharks and/or tunas). Existing regulations at § 635.5(d) require Atlantic HMS tournament operators to register their tournaments with NMFS four weeks in advance of the tournament.

When registering, operators must provide contact information and the tournament's date(s), location(s), and target species. In addition, HMS tournament registration provides a method for tournament operators to request educational and regulatory outreach materials from NMFS.

In addition to requiring tournament operators to register, the regulations at § 635.5(d) also authorize NMFS to select HMS tournaments for reporting. Currently, all billfish and swordfish tournaments are selected for reporting. When selected for reporting, Atlantic HMS tournament operators are required to submit an HMS tournament catch summary report within seven days after tournament fishing has ended.

NMFS recently developed the online Atlantic Tournament Registration and Reporting (ATR) system that allows tournament operators to easily register their tournaments and report. For over a year, NMFS received positive feedback from tournament operators about the ease of use of the ATR system.

In this notice, NMFS announces that all Atlantic HMS tournaments, not just billfish and swordfish tournaments, will be selected for reporting beginning on January 1, 2019. The estimated burden to the public for all HMS tournaments to report has already been approved under the Paperwork Reduction Act (OMB 0648-0323). NMFS does not expect the burden on tournaments to increase as most of the catch data in the summary report is routinely collected in the course of regular tournament operations and all tournament operators may use the ATR system to report. NMFS uses the data collected in these reports to estimate the total annual catch of HMS and the potential impacts to tournament operations in relation to other types of fishing activities. For more information about Atlantic HMS tournament registration and reporting, please go to <https://www.fisheries.noaa.gov/atlantic-highly-migratory-species/atlantic-highly-migratory-species-tournaments>.

Dated: December 7, 2018.

Karen H. Abrams,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XG655

Endangered Species; File Nos. 21857, 22078, and 22324

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of applications for permits.

SUMMARY: Notice is hereby given that three applicants have applied in due form for permits to take smalltooth sawfish (*Pristis pectinata*) for purposes of scientific research, with one also requesting to receive, import, and export parts of five foreign species of sawfish, including dwarf (*P. clavata*), narrow (*Anoxypristis cuspidata*), green (*P. zijsron*), largetooth (*P. pristis*), and non-U.S. DPS smalltooth sawfish for scientific research.

DATES: Written, telefaxed, or email comments must be received on or before January 11, 2019.

ADDRESSES: The permit requests and related documents are available for review by selecting "Records Open for Public Comment" from the Features box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting the applicable File No. from the list of available applications. These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on the pertinent application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on the application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Malcolm Mohead or Erin Markin at (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permits are requested under the

authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

File No. 21857: Tonya Wiley, Havenworth Coastal Conservation, 5120 Beacon Road, Palmetto, FL 34221, requests a 10-year permit document the occurrence, distribution, biology, movements, and habitat use of smalltooth sawfish found in United States waters. Sampling may occur anywhere within the species' range, but primarily in the Gulf of Mexico coastal areas of Florida bordering Sarasota, Manatee, Hillsborough, Pinellas, Hernando and Pasco counties. To capture sawfish, researchers would use bottom longline, drum line, gillnet, angling gear, seine net, and cast net. Captured smalltooth sawfish would be sexed, measured, weighed (if possible), marked with passive integrated transponder (PIT) tags, dart tags, and roto tags, photographed, ultrasounded, and tissue sampled (*i.e.*, blood, fin clip, muscle biopsy). A maximum of 50 neonate and juvenile life stages and 50 adult and sub-adult life stages would be taken annually with subsets of 25 of each life stage group fitted with internal or external telemetry tracking devices. Up to one sawfish from each life stage group may unintentionally die during research activities. Additionally, the applicant requests to collect, receive, necropsy, analyze, and archive up to 100 salvaged dead smalltooth sawfish specimens (whole or parts) that have been legally collected or archived elsewhere within the U.S.

File No. 22078: The NFMS Southeast Fisheries Science Center (Responsible Party: Theo Brainerd, Ph.D.), 75 Virginia Beach Drive Miami, FL 33149, requests a 10-year permit monitoring the biology, habitat use, and movements of smalltooth sawfish primarily within the Everglades National Park, the Ten Thousand Islands National Wildlife Refuge, and Florida Bay.

Sampling would be conducted year-round with gillnets, longlines, seines, cast nets, and angling gear. The applicant anticipates annually capturing and sampling a maximum of 150 sawfish annually (100 neonates and juveniles and 50 subadults and adults). Depending on the life stage and research objective, research activities would include: Measurement, weigh (when possible), ultrasound, photograph/video, genetic tissue fin clip, muscle biopsy, external dart tag, PIT tag, and blood draw. Additionally, subsets of each life stage group would receive internal or external telemetry devices
