Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Assessment Webinar are as follows:

1. Using datasets and initial assessment analysis recommended from the in-person workshop, panelists will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions.

2. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

## COMMODITY FUTURES TRADING COMMISSION

### Fees for Reviews of the Rule Enforcement Programs of Designated Contract Markets and Registered Futures Associations

**AGENCY:** Commodity Futures Trading Commission.

**ACTION:** Notice of 2018 schedule of fees.

**SUMMARY:** The Commodity Futures Trading Commission ("CFTC" or "Commission") charges fees to designated contract markets and registered futures associations to recover the costs incurred by the Commission in the operation of its program of oversight of self-regulatory organization rule enforcement programs, specifically National Futures Association ("NFA"), a registered futures association, and the designated contract markets. Fees collected from each self-regulatory organization are deposited in the Treasury of the United States as miscellaneous receipts. The calculation of the fee amounts charged for 2018 by this notice is based upon an average of actual program costs incurred during fiscal year (FY) 2015, FY 2016, and FY 2017.

**DATES:** Each self-regulatory organization is required to remit electronically the applicable fee on or before February 11, 2019.

**FOR FURTHER INFORMATION CONTACT:** Anthony C. Thompson, Executive Director, Commodity Futures Trading Commission; (202) 418-5697; Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581. For information on electronic payment, contact Jennifer Fleming; (202) 418-5034; Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.

#### SUPPLEMENTARY INFORMATION:

### I. Background Information

#### A. General

This notice relates to fees for the Commission's review of the rule enforcement programs at the registered futures associations<sup>1</sup> and designated contract markets ("DCM"), each of which is a self-regulatory organization ("SRO") regulated by the Commission. The Commission recalculates the fees charged each year to cover the costs of operating this Commission program.<sup>2</sup> The fees are set each year based on

<sup>1</sup> National Futures Association is the only registered futures association.

<sup>2</sup> See Section 237 of the Futures Trading Act of 1982, 7 U.S.C. 16a, and 31 U.S.C. 9701. For a broader discussion of the history of Commission fees, see 52 FR 46070, Dec. 4, 1987.

direct program costs, plus an overhead factor. The Commission calculates actual costs, then calculates an alternate fee taking volume into account, and then charges the lower of the two.<sup>3</sup>

#### B. Overhead Rate

The fees charged by the Commission to the SROs are designed to recover program costs, including direct labor costs and overhead. The overhead rate is calculated by dividing total Commission-wide overhead direct program labor costs into the total amount of the Commission-wide overhead pool. For this purpose, direct program labor costs are the salary costs of personnel working in all Commission programs. Overhead costs generally consist of the following Commission-wide costs: Indirect personnel costs (leave and benefits), rent, communications, contract services, utilities, equipment, and supplies. This formula has resulted in the following overhead rates for the most recent three years (rounded to the nearest whole percent): 211 percent for FY 2015, and 190 percent for FY 2016, and 175 percent for FY 2017.

#### C. Conduct of SRO Rule Enforcement Reviews

Under the formula adopted by the Commission in 1993, the Commission calculates the fee to recover the costs of its rule enforcement reviews and examinations, based on the three-year average of the actual cost of performing such reviews and examinations at each SRO. The cost of operation of the Commission's SRO oversight program varies from SRO to SRO, according to the size and complexity of each SRO's program. The three-year averaging computation method is intended to smooth out year-to-year variations in cost. Timing of the Commission's reviews and examinations may affect costs—a review or examination may span two fiscal years and reviews and examinations are not conducted at each SRO each year.

As noted above, adjustments to actual costs may be made to relieve the burden on an SRO with a disproportionately large share of program costs. The Commission's formula provides for a reduction in the assessed fee if an SRO has a smaller percentage of United States industry contract volume than its percentage of overall Commission oversight program costs. This adjustment reduces the costs so that, as a percentage of total Commission SRO oversight program costs, they are in line

<sup>3</sup> 58 FR 42643, Aug. 11, 1993, and 17 CFR part 1, appendix B

with the pro rata percentage for that SRO of United States industry-wide contract volume.

The calculation is made as follows: The fee required to be paid to the Commission by each DCM is equal to the lesser of actual costs based on the three-year historical average of costs for that DCM or one-half of average costs incurred by the Commission for each

DCM for the most recent three years, plus a pro rata share (based on average trading volume for the most recent three years) of the aggregate of average annual costs of all DCMs for the most recent three years.

The formula for calculating the second factor is:  $0.5a + 0.5vt = \text{current fee}$ . In this formula, "a" equals the average annual costs, "v" equals the

percentage of total volume across DCMs over the last three years, and "t" equals the average annual costs for all DCMs. NFA has no contracts traded; hence, its fee is based simply on costs for the most recent three fiscal years. This table summarizes the data used in the calculations of the resulting fee for each entity:

Note to Table 1: The 2018 Fee is the Lesser of the 3-year Average Actual cost or the Adjusted Volume Cost

An example of how the fee is calculated for one exchange, the Chicago Board of Trade, is set forth here:

a. Actual three-year average costs = \$48,465.

b. The alternative computation is:  $(.5) (\$48,465) + (.5) (.3014) (\$1,373,924) = \$231,283$ .

c. The fee is the lesser of a or b; in this case \$48,465.

As noted above, the alternative calculation based on contracts traded is not applicable to NFA because it is not a DCM and has no contracts traded. The Commission's average annual cost for conducting oversight review of the NFA rule enforcement program during fiscal years 2015 through 2017 was \$453,390.

The fee to be paid by the NFA for the current fiscal year is \$453,390.
