

and recommend a risk management plan that addresses risk of life loss and significant economic, social, and environmental damages associated with a potential failure of Cherry Creek Dam. In addition to the No Action Alternative, Alternatives 2F (raise dam 7.1 feet and spillway to elevation 5610.5 feet from original design of 5599.8 feet NAVD88 to prevent overtopping) and 3B (dam raise of 6.2 feet and no spillway raise) were evaluated in the final array of alternatives.

Dam Raise Alternative 3B consists of the FWAC spillway and a dam raise to contain the PMF. A dam height for this alternative is 6.2 feet and the crest width was assumed to be approximately 38 feet to allow reconstruction of the crest road using current road design standards. Various methods for raising the dam were considered, including an earth raise, reinforced concrete wall, and mechanically stabilized earth. The most efficient method of raise depends on several factors including the height of raise, crest width, availability of on-site materials, and steepness of embankment side slopes. Earth/rock fill raises compete well for raises below 4 to 5 feet if the crest width can be minimized. Reinforced Concrete (RC) wall raises are clearly more cost effective for larger raises and when a wide crest is required to allow construction of a crest road that meets modern standards of construction, therefore, the dam would be raised using an RC wall if Alternative 3B is implemented.

Dam Raise Alternative 2F consists of a RC wall dam raise of 7.1 feet and a spillway raise to crest elevation 5610.5 feet NAVD88 to prevent overtopping during the PMF. This spillway crest elevation of 5610.5 feet was chosen to minimize non-breach flows in the spillway impact area. As with Alternative 3B the dam would be raised using an RC wall and the crest width would be approximately 38 feet to allow reconstruction of the crest road using current road design standards.

The Draft EIS evaluates the potential effects on the human environment associated with each of the alternatives. Issues addressed include: Land use and vegetation, social and economic conditions, recreation, water resources, air quality, noise, and environmental justice.

**Schedule.** The public comment period will begin December 12, 2018. Comments on the Draft EIS must be received by January 28, 2019. The Corps will consider and respond to all comments received on the Draft EIS when preparing the Final EIS. The Corps expects to issue the Final EIS in

the summer of 2019, at which time a Notice of Availability will be published in the **Federal Register**.

The public meeting date or location may change based on inclement weather or exceptional circumstances. If the meeting date or location is changed, the Corps will issue a press release and post it on the web at <http://www.nwo.usace.army.mil/Media/News-Releases/> to announce the updated meeting details.

**Public Disclosure Statement.** If you wish to comment, you may mail or email your comments as indicated under the **ADDRESSES** section of this notice. Before including your address, phone number, email address, or any other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made available to the public at any time. While you can request in your comment for us to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

## DEPARTMENT OF DEFENSE

### Department of the Army, Corps of Engineers

#### Availability of a Draft Environmental Impact Statement, Whittier Narrow Dam Safety Modification Study, Los Angeles County, California

**AGENCY:** Department of the Army, U.S. Army Corps of Engineers, DoD.

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The U.S. Army Corps of Engineers (Corps) announces the availability of a Draft Environmental Impact Statement (EIS) for the Whittier Narrows Dam Safety Modification Study, Los Angeles County, California for review and comment. Pursuant to the National Environmental Policy Act (NEPA). The Corps has prepared a Draft EIS for the Whittier Narrows Dam Safety Modification Study (DSMS). The Draft EIS evaluates risk management plans (alternatives) to remediate safety concerns such as overtopping and seepage. The Draft EIS describes and analyses the impacts of risk management plans (RMPs) that are formulated, evaluated and compared through the DSMS process in order to identify a recommended RMP that

reduces risks to downstream life-safety and property associated with dam failure. Implementation of the recommended risk management plan would mitigate the intolerable Dam safety risk and allow the Dam to safely function as originally intended and authorized. Without this action, the Dam could fail resulting in life-threatening floods to downstream communities. The Proposed Action is needed to provide life-safety to the communities downstream of the Whittier Narrows Dam.

**DATES:** Written comments pursuant to the NEPA will be accepted until the close of business on January 28, 2019.

**ADDRESSES:** The document is available for review at:

(1) <https://www.spl.usace.army.mil/Missions/Civil-Works/Projects-Studies/Whittier-Narrows-Dam-Safety-Modification-Study/>.

(2) U.S. Army Corps of Engineers, Los Angeles District, 915 Wilshire Blvd., Los Angeles, CA 90017-3401.

**FOR FURTHER INFORMATION CONTACT:** Ms. Deborah Lamb, U.S. Army Corps of Engineers, Los Angeles District, phone number (213) 452-3798. Questions or comments regarding the Whittier Narrows Dam DSMS Draft EIS, contact Ms. Deborah Lamb by phone or by email to [Deborah.L.Lamb@usace.army.mil](mailto:Deborah.L.Lamb@usace.army.mil). or Whittier Narrows DSMS EIS [Whittier\\_Narrows\\_DSMS@usace.army.mil](mailto:Whittier_Narrows_DSMS@usace.army.mil).

For further information regarding the Whittier Narrows DSMS, contact Mr. Doug Chitwood, (213) 452 3587, or by email to [Douglas.E.Chitwood@usace.army.mil](mailto:Douglas.E.Chitwood@usace.army.mil).

#### SUPPLEMENTARY INFORMATION:

1. *Background Information.* Construction of Whittier Narrows Dam was completed in 1957 as an integral component of the Los Angeles County Drainage Area (LACDA) system of dams and channelized rivers authorized by Congress in the Flood Control Act of 1936. The Whittier Narrows Dam primary purpose is flood risk management with recreation added in the Flood Control Act of 1944 (Pub. L. 78-534). Whittier Narrows Dam is located approximately 11 miles east of downtown Los Angeles, Los Angeles County, CA. The dam protects over one million people and reduces economic damages to the communities downstream during flood events. The Corps has classified Whittier Narrows Dam as very high risk due to the potential for seepage and hydrologic issues during rare storms that could lead to failure. The DSMS and Draft EIS identify and evaluate alternatives to address these deficiencies and reduce the annual probability of failure and the

risk to life safety to within the Corps' tolerable risk guidelines as presented in Engineering Regulation 1110-2-1156.

A Notice of Intent to prepare the Draft EIS was published on July 22, 2013 in the **Federal Register**. A public scoping meeting was conducted on September 11, 2013 in the City of Pico Rivera, California. The Draft EIS is available for a 45-day review period pursuant to the NEPA.

**2. Risk Management Plans (Alternatives).** In addition to a No Action Alternative, the Draft EIS evaluates an array of remediation alternatives including: (1) Raising the crest elevation of the dam with a 12 foot high parapet wall on top of the crest, constructing an auxiliary labyrinth spillway adjacent to the existing spillway, and a trench drain and filter blanket; (2) placing a 10 foot wide roller compacted concrete series of steps on the downstream slope of the Dam embankments with trench drain and filter blanket.

**3. NEPA Scope of Analysis.** The Draft EIS evaluates the impacts of risk management plans on environmental resources and the human environment. Resources initially identified in the NEPA scope of analysis as potentially significant without implementation of mitigation measures include noise and vibration and recreation.

Resources initially identified in the NEPA scope of analysis as potentially significant without implementation of mitigation measures include, but are not limited to: Water quality, noise and vibration, air quality, socioeconomics and environmental justice, land use, recreation, visual and esthetic resources, traffic and transportation, historical and cultural resources, vegetation and wildlife, and special status species.

**Public Participation:** As part of the public involvement process, the Corps' Los Angeles District anticipates the public meeting will be held in January 2019. The public review meeting will allow participants the opportunity to comment on the Draft EIS. Attendance at the public hearing is not necessary to provide comments. Written comments may also be given to the contact listed under **FOR FURTHER INFORMATION CONTACT** section.

## DEPARTMENT OF EDUCATION

[Docket ID ED-2017-IES-0081]

### Privacy Act of 1974; System of Records

**AGENCY:** Institute of Education Sciences, Department of Education.

**ACTION:** Notice of a new system of records.

**SUMMARY:** In accordance with the Privacy Act of 1974, as amended (Privacy Act), the Department of Education (the Department) publishes this notice of a new system of records entitled "Text Ed: A Study of Text Messaging to Improve College Enrollment Rates among Disadvantaged Adults (18-13-41)." This system contains individually identifying information voluntarily provided by grantees under the Department of Education's (Department's) Educational Opportunity Centers (EOC) program which were selected to participate in the study and adult participants who receive services from those grantees. The EOC program is one of the Department's TRIO programs and primarily focuses on disadvantaged adults. The information in this system will be used to conduct a rigorous study of the effectiveness of customized text messages as an enhancement to EOC services, examining whether the messages lead to increased college enrollment and Free Application for Federal Student Aid (FAFSA) completion rates among adults receiving support from EOCs.

**DATES:** Submit your comments on this new system of records notice on or before January 14, 2019.

This new system of records will become applicable upon publication in the **Federal Register** on December 14, 2018, unless the new system of records notice needs to be changed as a result of public comment. All proposed routine uses in the paragraph entitled "ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES" will become applicable on January 14, 2019, unless the new system of records notice needs to be changed as a result of public comment. The Department will publish any changes to the system of records or routine uses that result from public comment.

**ADDRESSES:** Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment

period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- **Federal eRulemaking Portal:** Go to [www.regulations.gov](http://www.regulations.gov) to submit your comments electronically. Information on using [Regulations.gov](http://Regulations.gov), including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under the "Help" tab.

- **Postal Mail, Commercial Delivery, or Hand Delivery:** If you mail or deliver your comments about this modified system of records, address them to: SORN Coordinator, Institute of Education Sciences, U.S. Department of Education, Potomac Center Plaza, 550 12th Street SW, Room 4126, Washington, DC 20202.

**Privacy Note:** The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at [www.regulations.gov](http://www.regulations.gov). Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

**Assistance to Individuals with Disabilities in Reviewing the Rulemaking Record:** On request, we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other documents in the public rulemaking record for this notice. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

**FOR FURTHER INFORMATION CONTACT:** Teresa Cahalan, Institute of Education Sciences, U.S. Department of Education, Potomac Center Plaza, 550 12th Street SW, Room 4126, Washington, DC 20202, or by email at [IES\\_SORN@ed.gov](mailto:IES_SORN@ed.gov).

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), you may call the Federal Relay Service at 1-800-877-8339.

### SUPPLEMENTARY INFORMATION:

#### Introduction

The information contained in the system will be used to conduct a study of the effectiveness of personalized text messaging in improving the college enrollment and FAFSA completion rates of disadvantaged adults. The messaging will be implemented as an enhancement to services provided by Educational Opportunity Centers. The information collected will be used to describe the implementation of the study's text
