SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau is planning to resubmit to the Office of Management and Budget for approval, the Quarterly Financial Report (QFR) program information collection forms. The QFR forms to be submitted for approval are: The QFR 200 (MT) long form (manufacturing, mining, wholesale trade, and retail trade); QFR 201 (MG) short form (manufacturing); and the QFR 300 (S) long form (information services and professional and technical services). The Census Bureau is not requesting any changes to the current forms.

The QFR program collects and publishes up-to-date aggregate statistics on the financial results and position of U.S. corporations. The QFR target population consists of all corporations engaged primarily in manufacturing with total assets of $250,000 and over, and all corporations engaged primarily in mining; wholesale trade; retail trade; information; or professional and technical services (except legal services) industries with total assets of $50 million and over.

The QFR program is a principal federal economic indicator that has published up-to-date aggregate statistics on the financial results and position of U.S. corporations since 1947. The QFR provides critical source data to the Bureau of Economic Analysis (BEA) quarterly estimates of Gross Domestic Product (GDP) and Gross Domestic Income (GDI), key components of the National Income and Product Accounts (NIPA). The QFR data are also vital to the Federal Reserve Board’s (FRB) Financial Accounts. Title 13 of the United States Code, Section 91 requires that financial statistics of business operations be collected and published quarterly. Public Law 114–72 extended the authority of the Secretary of Commerce to conduct the QFR Program under Section 91 through September 30, 2030.

The main purpose of the QFR is to provide timely, accurate data on business financial conditions for use by government and private-sector organizations and individuals. Primary public users include U.S. governmental organizations with economic measurement and policymaking responsibilities such as the Bureau of Economic Analysis, the Bureau of Labor Statistic and the Federal Reserve Board. In turn, these organizations provide guidance, advice, and support to the QFR program. The primary non-governmental data users are a diverse group including universities, financial analysts, unions, trade associations, public libraries, banking institutions, and U.S. and foreign corporations.

II. Method of Collection

The Census Bureau uses two forms of data collection: Mail out/mail back paper survey forms and a secure encrypted internet data collection system called Centurion. Centurion has automatic data checks and is context-sensitive to assist respondents in identifying potential reporting problems before submission, thus reducing the need for follow-up from Census Bureau staff. Data collected through Centurion is completed via the internet, eliminating the need for downloading software and ensuring the integrity and confidentiality of the data.

Companies are asked to respond to the survey within 25 days of the end of the quarter for which the data are being requested. Census Bureau staff contact companies that have not responded by the designated time through letters and/or telephone calls to encourage participation.

SUPPLEMENTARY INFORMATION:

I. Abstract

The International Trade Administration provides a multitude of international trade related programs to help U.S. businesses. These programs include information products, services, and trade events. To accomplish its mission effectively, ITA needs ongoing feedback on its programs. This information collection item allows ITA to solicit clients’ opinions about the use of ITA products, services, and trade events. To promote optimal use and provide focused and effective improvements to ITA programs, we are requesting approval for this clearance package; including: Use of Comment Cards (i.e., transactional-based surveys) to collect feedback immediately after ITA assistance is provided to clients; use of annual surveys (i.e., relationship-based surveys) to gauge overall satisfaction, impact and needs for clients with ITA assistance provided over a period time; use of multiple data collection methods (i.e., web-enabled surveys sent via email, telephone interviews, automated telephone surveys, and in-person surveys via mobile devices/laptops/tablets at trade events/shows) to enable clients to conveniently respond to requests for feedback; and a forecast of burden hours. Without this information, ITA is unable to systematically determine the actual and relative levels of performance for its programs and products/services and to provide clear, actionable insights for managerial intervention. This information will be used for program evaluation and improvement, strategic planning, allocation of resources and stakeholder reporting.

II. Method of Collection

The International Trade Administration is seeking approval for the following data collection methods to provide flexibility in conducting customer satisfaction surveys and to reduce the burden on respondents: (1) An email message delivering a hot link to a web enabled survey with an email reminder sent if the client does not respond to the survey within two weeks; (2) a telephone survey/interview; and (3) a web-enabled survey conducted in-person at trade shows/events via a laptop, tablet or mobile phone so participants can immediately respond without having to provide their email address.

III. Data

OMB Control Number: 0625–0275. Form Number(s): ITA–XXXX.

Type of Review: Regular.

Affected Public: Business or other for-profit organizations; Not-for-profit institutions; State, Local, or Tribal government; and Federal government.

Estimated Number of Respondents: 50,000.

Estimated Time per Response: 5–30 minutes.

Estimated Total Annual Burden Hours: 25,000 hours.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Certain Small Diameter Seamless Carbon and Alloy Standard, Line and Pressure Pipe From Germany: Continuation of Antidumping Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of the determinations by the Department of Commerce (Commerce) and the International Trade Commission (ITC) that revocation of the antidumping duty (AD) order on certain small diameter seamless carbon and alloy standard, line and pressure pipe (seamless pipe) from Germany would likely lead to a continuation or recurrence of dumping and material injury to an industry in the United States, Commerce is publishing a notice of continuation of the AD order.

SUPPLEMENTARY INFORMATION:

Background

On August 1, 2017, Commerce published the notice of initiation of the fourth sunset review of the AD order on seamless pipe from Germany, pursuant to section 751(c) of the Tariff Act of
