

Data collection will consist of surveys, as well as focus groups and interviews. For each population, we will collect data from (1) families (*i.e.*, parents/caregivers of children and adolescents, as well as adolescents themselves) with special health care needs and ASD; and (2) the medical,

social service and other providers who serve them. In addition, we will collect data from emergency response agency representatives and experts in health information and communications technology to ask cross-cutting questions regarding the use of technology to communicate during

disasters, and the perspectives and needs of individuals and agencies charged with leading disaster response efforts.

There are no costs to respondents other than their time. The estimated annualized burden is 419 hours.
