Background: Each year, NHTSA executes a broad array of research programs in support of agency priorities. The agency's research portfolio covers program areas pertaining to vehicle safety, including safety countermeasures implemented through the vehicle, components, operation and use, among others, and behavioral safety, which includes safety countermeasures that pertain to the behavior and actions of the driver, occupant, and other road users.

The public meeting is intended to provide public outreach regarding the priority research activities at NHTSA for both vehicle and behavioral safety, including expected near-term deliverables. One of the key priority program areas for NHTSA's Vehicle Safety Research is Automated Driving Systems; thus, the public meeting will allocate dedicated time to discuss research in this program area.

For each of the areas of discussion at this public meeting, NHTSA will briefly discuss the work underway and allow

time to answer questions from participants.

The agency invites comments on the information presented regarding research priorities, research goals, and additional research gaps/needs the public may believe NHTSA should be addressing.
