FEDERAL REGISTER

Vol. 83 Tuesday,

No. 137 July 17, 2018

Pages 33119–33794

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 83 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 83, No. 137
Tuesday, July 17, 2018

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 232

[Release Nos. 33–10518; 34–83614; 39–2521; IC–33153]

Adoption of Updated EDGAR Filer Manual

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (the ''Commission'') is adopting revisions to the Electronic Data Gathering, Analysis, and Retrieval System (''EDGAR'') Filer Manual and related rules. The EDGAR system is scheduled to be upgraded on July 9, 2018.

DATES: Effective July 17, 2018. The incorporation by reference of the EDGAR Filer Manual is approved by the Director of the Federal Register as of July 17, 2018.

FOR FURTHER INFORMATION CONTACT: In the Division of Investment Management, for questions concerning Forms N–CSR or N–CSRS, contact Heather Fernandez at (202) 551–6708. In the Division of Trading and Markets, for questions concerning Form Funding Portal, contact Timothy White at (202) 551–7232. In the Office of Municipal Securities, for questions regarding Forms MA and MA–I, contact Ahmed A. Abonamah at (202) 551–3887. In the Division of Corporation Finance, for questions concerning the Form ABS–15G, Form C, and Form D, contact Heather Mackintosh at (202) 551–8111. In the Division of Economic and Risk Analysis, for questions concerning retired taxonomies and the updated 2018 IFRS taxonomy, contact Brian Hankin at (202) 551–8497.

SUPPLEMENTARY INFORMATION: We are adopting an updated EDGAR Filer Manual, Volume II. The Filer Manual describes the technical formatting requirements for the preparation and submission of electronic filings through the EDGAR system.[1] It also describes the requirements for filing using EDGARLink Online and the Online Forms/XML website.

The revisions to the Filer Manual reflect changes within Volume II, entitled EDGAR Filer Manual, Volume II: ''EDGAR Filing,'' Version 47 (July 2018). The updated manual will be incorporated by reference into the Code of Federal Regulations.

The Filer Manual contains all the technical specifications for filers to submit filings using the EDGAR system. Filers must comply with the applicable provisions of the Filer Manual in order to assure the timely acceptance and processing of filings made in electronic format.[2] Filers should consult the Filer Manual in conjunction with our rules governing mandated electronic filing when preparing documents for electronic submission.

The EDGAR System and Filer Manual will be updated in Release 18.2 and will reflect the changes described below.

Release No. 33–10486 amended Forms Funding Portal, Form MA, Form MA–I, and Form MSD to eliminate the portions of such forms that requested filers furnish certain sensitive personally identifiable information (''PII'') of natural persons, including Social Security numbers, foreign identity numbers, dates of birth, and places of birth.[3] In Release 18.2, the EDGAR filer interface will be revised to include new ''pop-up'' messages, which will warn filers not to provide such sensitive PII. These changes further support the revisions to the aforementioned forms. Pop-up messages will also instruct filers on how to complete the required fields using a numeric placeholder or CRD number placeholder in lieu of certain sensitive PII in specified fields on submission form types MA, MA–A, MA/A, MA–I, and MA–I/A and on the Form Funding Portal landing page. Corresponding changes have been made to Chapter 8 (Preparing and Transmitting Online Submissions) of the EDGAR Filer Manual, Volume II.

EDGAR will be revised to add the new exhibit ''EX–99. IND PUB ACCT (Change of Independent Public Accountant)'' for submission form types N–CSR, N–CSR/A, N–CSRS and N–CSRS/A. The new exhibit will allow registrants to report a change in their independent public accountant. Corresponding changes have been made to Appendix E (Automated Conformance Rules for EDGAR Data Fields) of the EDGAR Filer Manual, Volume II.

EDGAR will be revised to update submission form types ABS–15G and ABS–15G/A to remove ''Issuing Entity Name'' for the Registered Entity field in Items 2.01 and 2.02 and to remove ''Issuing Entity CIK'' from the Unregistered Entity field in Item 2.01 and from the Unregistered Entity under Rule 15Ga–2 field in Item 2.02. The revisions are designed to improve validation of filer identification header tag information by removing unnecessary header tag fields associated with these submission types. For further information, please see the ''EDGARLink Online XML Technical Specification document'' available on the SEC's public website at *https://www.sec.gov/oit/Article/info-edgar-tech-specs.html.* Corresponding changes have been made to Chapter 7 (Preparing and Transmitting EDGARLink Online Submissions) and Appendix A (Messages Reported by EDGAR) of the EDGAR Filer Manual, Volume II.

EDGAR will be revised to update submission form types C, C/A, C–AR, C–AR/A, and C–TR to provide filers with an error message if they do not adhere to the EDGAR file naming standards specified in Chapter 5 (Constructing Attached Documents and Document Types) of the EDGAR Filer Manual, Volume II. In addition, submission form types C, C/A, C–A, C–AR, C–AR/A and C–U will be updated to allow filers to input a decimal value in the ''Current Employees'' field to denote any part-time employees. Corresponding changes have been made to Chapter 8 (Preparing and Transmitting Online Submissions) of the EDGAR Filer Manual, Volume II.

EDGAR will be revised to update submission form types D and D/A to increase the character limits from 150 to 200 characters for the following fields:

[1] We originally adopted the Filer Manual on April 1, 1993, with an effective date of April 26, 1993. Release No. 33–6986 (April 1, 1993) [58 FR 18638]. We implemented the most recent update to the Filer Manual on April 25, 2018. *See* Release No. 33–10486 (April 25, 2018) [83 FR 22190].

[2] *See* Rule 301 of Regulation S–T (17 CFR 232.301).

[3] *See* Release No. 33–10486.

''Last Name'' under Item 3: Related Persons; ''Recipient'' under Item 12: Sales Compensation; and ''(Associated) Broker or Dealer'' under Item 12: Sales Compensation. For further information, please see the ''EDGAR Form D XML Technical Specification'' document available on the SEC's public website at *https://www.sec.gov/oit/Article/info-edgar-tech-specs.html.* Corresponding changes have been made to Chapter 8 (Preparing and Transmitting Online Submissions) of the EDGAR Filer Manual, Volume II.

The EDGAR system will be updated to remove, and will no longer accept, the following submission form types: F–9, F–9/A, F–9POS, F–9EF, N–MFP, N–MFP/A, N–MFP1, N–MFP1/A, 497K1, 497K2, 497K3A, and 497K3B. These submission types either allow for filing of forms that have been rescinded by prior Commission action, or have been replaced by newer submission form types and are now obsolete. Corresponding changes have been made to Chapter 2 (Quick Guide to EDGAR Filing), Chapter 3 (Index to Forms), Chapter 4 (Filing Fee Information), Chapter 6 (Interactive Data), Chapter 8 (Preparing and Transmitting Online Submissions), and Appendix C (EDGAR Submission Types) of the EDGAR Filer Manual, Volume II.

The EDGAR system will be upgraded to remove the following taxonomies, which have been superseded: US–GAAP–2016, DEI–2013, DEI–2009, EXCH–2016, and RR–2010. The EDGAR system will be updated to reflect the 2018 version of the IFRS taxonomy. For further information please refer to the SEC's public website at *https://www.sec.gov/info/edgar/edgartaxonomies.shtml.*

Chapter 5 (Constructing Attached Documents and Document Types) of the EDGAR Filer Manual, Volume II will be updated to provide clarifying instructions regarding the use of, and submission requirements for, PDF documents for specified submission form types. The EDGAR Filer Manual will also be revised to make clarifying changes to certain instructions by removing references to an application tool used to read XBRL data. The tool is no longer supported on sec.gov. Finally, the EDGAR Filer Manual will include revised instructions that clarify how filers may report shares outstanding for multiple classes of stock for XBRL validation. Corresponding changes have been made to Chapter 6 (Interactive Data) of the EDGAR Filer Manual, Volume II.

Along with the adoption of the Filer Manual, we are amending Rule 301 of Regulation S–T to provide for the incorporation by reference into the Code of Federal Regulations of today's revisions. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

The updated EDGAR Filer Manual will be available for website viewing and printing; the address for the Filer Manual is *https://www.sec.gov/info/edgar/edmanuals.htm.* You may also obtain paper copies of the EDGAR Filer Manual from the following address: Public Reference Room, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m.

Since the Filer Manual and the corresponding rule and form amendments relate solely to agency procedures or practice, publication for notice and comment is not required under the Administrative Procedure Act (''APA'').[4] It follows that the requirements of the Regulatory Flexibility Act[5] do not apply.

The effective date for the updated Filer Manual and the related rule and form amendments is July 17, 2018. In accordance with the APA,[6] we find that there is good cause to establish an effective date less than 30 days after publication of these rules. The Commission believes that establishing an effective date less than 30 days after publication of these rules is necessary to coordinate the effectiveness of the updated Filer Manual with these system upgrades.

Statutory Basis

We are adopting the amendments to Regulation S–T under the authority in Sections 6, 7, 8, 10, and 19(a) of the Securities Act of 1933,[7] Sections 3, 12, 13, 14, 15, 15B, 23, and 35A of the Securities Exchange Act of 1934,[8] Section 319 of the Trust Indenture Act of 1939,[9] and Sections 8, 30, 31, and 38 of the Investment Company Act of 1940.[10]

List of Subjects in 17 CFR Part 232

Incorporation by reference, Reporting and recordkeeping requirements, Securities.

Text of the Amendments

In accordance with the foregoing, title 17, chapter II of the Code of Federal Regulations is amended as follows:

PART 232 REGULATION S–T—GENERAL RULES AND REGULATIONS FOR ELECTRONIC FILINGS

■ 1. The authority citation for part 232 continues to read in part as follows:

Authority: 15 U.S.C. 77c, 77f, 77g, 77h, 77j, 77s(a), 77z–3, 77sss(a), 78c(b), 78*l,* 78m, 78n, 78*o*(d), 78w(a), 78*ll,* 80a–6(c), 80a–8, 80a–29, 80a–30, 80a–7, 7201 *et seq.;* and 18 U.S.C. 1350, unless otherwise noted.

* * * * *

■ 2. Section 232.301 is revised to read as follows:

§ 232.301 EDGAR Filer Manual.

Filers must prepare electronic filings in the manner prescribed by the EDGAR Filer Manual, promulgated by the Commission, which sets forth the technical formatting requirements for electronic submissions. The requirements for becoming an EDGAR Filer and updating company data are set forth in the updated EDGAR Filer Manual, Volume I: ''General Information,'' Version 30 (March 2018). The requirements for filing on EDGAR are set forth in the updated EDGAR Filer Manual, Volume II: ''EDGAR Filing,'' Version 47 (July 2018).

Additional provisions applicable to Form N–SAR filers are set forth in the EDGAR Filer Manual, Volume III: ''N–SAR Supplement,'' Version 6 (January 2017). All of these provisions have been incorporated by reference into the Code of Federal Regulations, which action was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. You must comply with these requirements in order for documents to be timely received and accepted. The EDGAR Filer Manual is available for website viewing and printing; the address for the Filer Manual is *https://www.sec.gov/info/edgar/edmanuals.htm.* You can obtain paper copies of the EDGAR Filer Manual at the following address: Public Reference Room, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. You can also inspect the document at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

By the Commission.

BILLING CODE 8011–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket No. USCG–2012–1036]

Special Local Regulations: Recurring Marine Events in Captain of the Port Long Island Sound Zone

AGENCY: Coast Guard, DHS.

ACTION: Notice of enforcement of regulation.

SUMMARY: The Coast Guard will enforce five special local regulations for marine events in the Sector Long Island Sound area of responsibility on the dates and times listed in the table below. This action is necessary to provide for the safety of life on navigable waterways during the events. During the enforcement periods, no person or vessel may enter the safety zones without permission of the Captain of the Port (COTP) Sector Long Island Sound or designated representative.

DATES: The regulation in 33 CFR 100.100, Table to § 100.100 will be enforced for the following safety zones identified in the **SUPPLEMENTARY INFORMATION** section during the dates and times specified.

FOR FURTHER INFORMATION CONTACT: If you have questions on this notice of enforcement, call or email Chief Petty Officer Katherine Linnick, Waterways Management Division, U.S. Coast Guard Sector Long Island Sound; telephone 203–468–4565, email *Katherine.E.Linnick@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard will enforce the special local regulations listed in 33 CFR 100.100 Table 1 on the specified dates and times as indicated below.

7.6 Aquapalooza, Zach's Bay	• Date: July 22, 2018. • Time: 11:30 a.m. to 5:30 p.m. • Location: All navigable waters of Zach's Bay, Wantagh, NY south of the line connecting a point near the western entrance to Zach's Bay in approximate position 40°36′29.20″ N, 073°29′22.88″ W and a point near the eastern entrance of Zach's Bay in approximate position 40°36′16.53″ N, 073°28′57.26″ W. • Additional stipulations: During the enforcement period vessel speed in the regulated area is restricted to no wake speed or 6 knots, whichever is slower. On the day of the event from 3 p.m. to 5:30 p.m. vessels may only transit the regulated area in the northbound direction or outbound direction.
8.1 Riverfront Dragon Boat and Asian Festival	• Date: August 18, 2018. • Time: 8:00 a.m. to 5:00 p.m. • Location: All waters of the Connecticut River in Hartford, CT between the Bulkeley Bridge at 41°46′10.10″ N, 072°39′56.13″ W and the Wilbur Cross Bridge at 41°45′11.67″ N, 072°39′13.64″ W (NAD 83). All positions are approximate.
8.2 Swim Across the Sound	• Date: August 4, 2018. • Time: 7:30 a.m. to 7:30 p.m. • Location: Waters of Long Island Sound from Port Jefferson, NY in approximate position 40°58′11.71″ N, 073°05′51.12″ W; then northwest to Captain's Cove Seaport, Bridgeport, CT in approximate position 41°09′25.07″ N, 073°12′47.82″ W (NAD 83).
8.4 Island Beach Two Mile Swim	• Date: August 4, 2018. • Time: 7:30 a.m. to 11:30 a.m. • Location: All waters of Captain Harbor between Little Captain's Island and Bower's Island that are located within the box formed by connecting four points in the following positions. Beginning at 40°59′23.35″ N, 073°36′42.05″ W; then northwest to 40°59′51.04″ N, 073°37′57.32″ W; then southwest to 40°59′45.17″ N, 073°38′01.18″ W; then southeast to 40°59′17.38″ N, 073°36′45.9″ W; then northeast to the point of origin (NAD 83). All positions are approximate.
8.6 Smith Point Triathlon	• Date: August 5, 2018. • Time: 6:15 a.m. to 8:15 a.m. • Location: All waters of Narrow Bay near Smith Point Park in Mastic Beach, NY within the area bounded by land along its southern edge and points in position at 40°44′14.28″ N, 072°51′40.68″ W; then north to a point at position 40°44′20.83″ N, 072°51′40.68″ W; then east to a point at position 40°44′20.83″ N, 072°51′19.73″ W; then south to a point at position 40°44′14.85″ N, 072°51′19.73″ W; and then southwest along the shoreline back to the point of origin (NAD 83). All positions are approximate.

Under the provisions of 33 CFR 100.100, the events listed above are established as special local regulations. During the enforcement period, persons and vessels are prohibited from entering into, transiting through, mooring, or anchoring within these regulated areas unless they receive permission from the COTP or designated representative.

This notice of enforcement is issued under authority of 33 CFR part 100 and 5 U.S.C. 552(a). In addition to this notice of enforcement in the **Federal Register**, the Coast Guard will provide the maritime community with advance notification of this enforcement period via the Local Notice to Mariners or marine information broadcasts. If the

COTP determines that these special local regulations need not be enforced for the full duration stated in this notice of enforcement, a Broadcast Notice to Mariners may be used to grant general permission to enter the regulated area.

Dated: June 14, 2018.

K.B. Reed,

Captain, U.S. Coast Guard, Captain of the Port Long Island Sound.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG–2018–0267]

RIN 1625–AA08

Special Local Regulation; Grand Haven Coast Guard Festival Waterski Show, Grand Haven, MI

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is amending a special local regulation for certain waters of the Grand River at Waterfront Stadium in Grand Haven, MI. This action is necessary and is intended to ensure safety of life on navigable waters to be used for a waterski show. This action will prohibit persons or vessels from entering certain waters immediately prior to, during, and immediately after the marine event. This special local regulation is needed to protect spectators, personnel, vessels, and the marine environment from potential hazards created by the Grand Haven Waterski Show.

DATES: This temporary final rule is effective from 7 p.m. through 9 p.m. on July 31, 2018.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2018–0267 in the ‘‘SEARCH’’ box and click ‘‘SEARCH.’’ Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions about this temporary rule, call or email marine event coordinator MSTC Kaleena Carpino, Prevention Department, Coast Guard Sector Lake Michigan, Milwaukee, WI; telephone (414) 747–7148, or email *D09-SMB-SECLakeMichgan-WWM@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR	Code of Federal Regulations
DHS	Department of Homeland Security
FR	Federal Register
NPRM	Notice of proposed rulemaking
§	Section
U.S.C.	United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ‘‘impracticable, unnecessary, or contrary to the public interest.’’ Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because The Grand Haven Waterski show is an annual event codified in 33 CFR 100.906. The coordinates listed therein are not accurate for this year's event, and final details for the event were not received in time to publish an NPRM. As such, it is impracticable to publish an NPRM because we lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would inhibit the Coast Guard's ability to protect participants, mariners and vessels from the hazards associated with this event.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1233. The Captain of the Port Lake Michigan (COTP) has determined that the combination of recreational vessels, commercial vessels, and an unknown number of spectators in close proximity to the waterski show pose extra and unusual hazards to public safety and property. Specific hazards include collisions among event participants, collisions between participants and recreational traffic, and other traffic that may cause injury or marine casualties. Therefore, the COTP is amending a Special Local Regulation around the event location to help minimize risks to safety of life and property to persons, vessels, and the marine environment during this event.

IV. Discussion of the Rule

This rule establishes a temporary special local regulation from 7 p.m. until 9 p.m. on July 31, 2018. In light of the aforementioned hazards, the COTP has determined that a special local regulation is necessary to protect spectators, vessels, and the marine environment. The special local regulation will cover all navigable waters within the following coordinates: 43°04′5 N, 086°14′12.4″ W; then east to 43°04′2″ N, 086°14′1″ W; then south to 43°03′45″ N, 086°14′10″ W; then west to 43°03′48″ N, 086°14′17″ W; then back to the point of origin. No vessel or person will be permitted to enter the regulated area without obtaining permission from the COTP or a designated representative.

The COTP or his designated on-scene representative will notify the public of the enforcement of this rule by all appropriate means, including a Broadcast Notice to Mariners and Local Notice to Mariners. The COTP or his designated on-scene representative may be contacted via VHF Channel 16, or at (404) 747–7182.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ‘‘significant regulatory action,’’ under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, duration, and time-of-day of the special local regulation. The event is in the evening hours, and will last for a maximum of 2 hours. Moreover, the Coast Guard will issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the special local regulation, and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting only 2 hours that will prohibit transit of the Grand River, in Grand Haven, MI in front of the Waterfront Stadium. It is categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 100

Harbors, Marine safety, Navigation (water), Reporting and record keeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Revise § 100.906 to read as follows:

§ 100.906 Grand Haven Coast Guard Festival Waterski Show, Grand Haven, MI.

(a) *Regulated area.* All waters of the Grand River in front of Waterfront Stadium from approximately 500 yards upriver to 150 yards downriver of Grand River Lighted Buoy 3A (Light list number 19000) within the following coordinates: 43°04′5 N, 086°14′12.4″ W; then east to 43°04′2″ N, 086°14′1″ W; then south to 43°03′45″ N, 086°14′10″ W; then west to 43°03′48″ N, 086°14′17″ W; then back to the point of origin (NAD 83).

(b) *Special local regulations.* The regulations of § 100.901 apply. No vessel may enter, transit through, or anchor within the regulated area without the permission of the Coast Guard Patrol Commander.

(c) *Effective date.* These regulations are effective and will be enforced from 7 p.m. through 9 p.m. on July 31, 2018. The time and date for this event is subject to change. In the event of a schedule change, the Coast Guard will issue a Notice of Enforcement with the exact date and time that this regulated area will be enforced.

Dated: June 8, 2018.

Thomas J. Stuhlreyer,

Captain, U.S. Coast Guard, Captain of the Port Lake Michigan.

Special Local Regulations; Annual Les Cheneaux Islands Antique Wooden Boat Show; Hessel, MI

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is adding a special local regulation to increase safety in the navigable waters of Marquette Bay, Hessel, MI during the annual Les Cheneaux Islands Antique Wooden Boat Show held annually in mid-August. The regulation will add a no wake zone to be enforced in the area around the show from 7 a.m. to 7 p.m.

DATES: This regulation is effective August 11th, 2018.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket go to *http://www.regulations.gov* type USCG–2018–0580 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Chief Steven Durden, Waterways Management, Coast Guard Sector Sault Sainte Marie, U.S. Coast Guard; telephone 906–635–3222, email *Steven.E.Durden@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR	Code of Federal Regulations
COTP	Captain of the Port
DHS	Department of Homeland Security
FR	Federal Register
NPRM	Notice of proposed rulemaking
§	Section
U.S.C.	United States Code

II. Background, Purpose, and Legal Basis

The Les Cheneaux Antique Wooden Boat Show was founded in 1978 and the event is held every year in mid-August. During this event, a variety of vessel traffic is attracted to the area in and surrounding the Hessel Marina. A commercial ferry vessel, jet skis, kayaks, paddle boards, sail and power vessels all use this this waterway to view the show and to transit the area. This mix of vessels in close proximity to each other warrants additional safety measures. In response, the Coast Guard published a notice of proposed rulemaking (NPRM) on June 18th, 2018. There, we stated why we issued the NPRM, and invited comments on our proposed regulatory action related to this no wake zone. During the comment period that ended July 9th, 2018, we received no comments.

We are issuing this rule, and under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making it effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would inhibit the Coast Guard's ability to provide for the public's safety during the August 11th, 2018 Les Cheneaux Islands Antique Wooden Boat Show.

The legal basis for this final rulemaking is found at 33 U.S.C. 1233.

III. Discussion of Comments, Changes and the Rule

We received no comments from the NPRM published June 18th, 2018. There are no changes in the regulatory text of this rule from the proposed rule in the NPRM. The Captain of the Port Sault Sainte Marie (COTP) has determined that adding the Annual Les Cheneaux Islands Antique Wooden Boat Show to the list of Special Local Regulations to establish a no wake zone in the navigable waters of Marquette Bay near Hessel, MI is necessary to ensure the safety of the boating public.

IV. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive Orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, duration, and time-of-day for the no wake zone. Vessel traffic will be able to safely transit through the no wake zone which will impact a small designated area within the COTP zone for a short duration of time. Moreover, the Coast Guard will issue Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received no comments from the Small Business Administration on this rulemaking. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the no wake zone may be small entities, for the reasons stated in section V.A. above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves creating a no wake zone for one day each year in a small area. It is categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. A preliminary Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Add § 100.922 to read as follows:

§ 100.922 Special Local Regulations; Annual Les Cheneaux Islands Antique Wooden Boat Show; Hessel, MI.

(a) *Regulated area.* These Special Local Regulations apply to all U.S. navigable waters of Marquette Bay, Hessel, MI, within an area bordered by a line from the crib piles charted in position 45°59′59″ N, 084°25′10″ W to Red Buoy ‘‘8’’ charted in position 45°59′46″ N, 084°25′37″ W to Red Buoy ‘‘6’’ charted in position 45°59′58″ N, 084°25′53″ W to Red Buoy ‘‘4’’ charted in position 45°59′57″ N, 084°26′23″ W to Green Buoy ‘‘5’’ charted in position 46°00′13″ N, 084°26′10″ W to land in position 46°00′18″ N, 084°26′04″ W.

(b) *Enforcement period.* These special local regulations are effective for one day in mid-August. The Coast Guard will issue a notice of enforcement with the exact time and date this regulated area will be enforced.

(c) *Special local regulation.* While in the regulated area all vessels will operate at a no wake speed and follow the directions of the on-scene patrol commander.

Dated: July 12, 2018.

M.R. Broz,

Captain, U.S. Coast Guard, Captain of the Port Sault Sainte Marie.

[Docket No. USCG–2018–0673]

RIN 1625–AA08

Special Local Regulation; 2018 Detroit Hydrofest, Detroit River, Detroit, MI

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a special local regulation for certain navigable waters of the Detroit River, Detroit, MI. This action is necessary and is intended to ensure safety of life on navigable waters immediately prior to, during, and immediately after the 2018 Detroit Hydrofest boat races.

DATES: This temporary final rule is effective from 7 a.m. on August 24, 2018, through 7 p.m. on August 26, 2018.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2018–0673 in the ‘‘SEARCH’’ box and click ‘‘SEARCH.’’ Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary rule, call or email Tracy Girard, Prevention Department, Sector Detroit, Coast Guard; telephone (313) 568–9564, or email *Tracy.M.Girard@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR	Code of Federal Regulations
DHS	Department of Homeland Security
FR	Federal Register
NPRM	Notice of proposed rulemaking
§	Section
COTP	Captain of the Port
U.S.C.	United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ‘‘impracticable, unnecessary, or contrary to the public interest.’’ Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because doing so would be impracticable. The Coast Guard did not receive the final details of the boat races in time to publish an NPRM. As such, it is impracticable to publish an NPRM because we lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would inhibit the Coast Guard's ability to protect participants, mariners and vessels from the hazards associated with this event.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1233. The Captain of the Port Detroit (COTP) has determined that the likely combination of recreation vessels, commercial vessels, and an unknown number of spectators in close proximity to a high speed boat race along the water pose extra and unusual hazards to public safety and property. Therefore, the COTP is establishing a special local regulation around the event location to help minimize risks to safety of life and property during this event.

IV. Discussion of the Rule

This rule establishes a temporary special local regulation from 7 a.m. on August 24, 2018 until 7 p.m. August 26, 2018. The regulation will be enforced from 12 p.m. until 7 p.m. on August 24, 2018, and from 7 a.m. until 7 p.m. on August 25 and August 26, 2018. In light of the aforementioned hazards, the COTP has determined that a special local regulation is necessary to protect spectators, vessels, and participants. The special local regulation will encompass all U.S. waters of the Detroit River in Scott Middle Ground, north of Belle Isle, Michigan, starting at positions 42°20.506′ N 083°00.016′ W on the Douglas MacArthur Bridge; extending east to the Belle Isle Crib Light at 42°21.205′ N 082°57.996′ W (NAD 83).

No vessel or person will be permitted to enter the special regulated area without obtaining permission from the COTP or a designated representative. The Captain of the Port Detroit or a designated on-scene representative may be contacted via VHF Channel 16 or via telephone at (313) 568–9560. The Coast Guard will issue Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone and the rule allows vessels to seek permission to enter the zone.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, duration, and time-of-year of the special local regulation. Vessel traffic will be able to safely transit around this special local regulation zone which will impact a small designated area of the Detroit River from 7 a.m. on August 24, 2018 until 7 p.m. on August 26, 2018. Moreover, the Coast Guard will issue Broadcast Notice to Mariners via VHF–FM marine channel 16 about the special local regulation and the rule allows vessels to seek permission to enter the area.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the special local regulation may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a special local regulation lasting 3 days that will prohibit entry into a designated area. It is categorically excluded from further review under paragraph L[61] of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. A Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and record keeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 33 U.S.C. 1233.

■ 2. Add § 100.T09–0673 to read as follows:

§ 100.T09–0673 Special Local Regulation; 2018 Detroit Hydrofest, Detroit River, Detroit, MI.

(a) *Location.* The special local regulation will encompass all U.S. waters of the Detroit River in Scott Middle Ground, north of Belle Isle, Michigan, starting at positions 42°20.506′ N 083°00.016′ W on the Douglas MacArthur Bridge; extending east to the Belle Isle Crib Light at 42°21.205′ N 082°57.996′ W (NAD 83).

(b) *Enforcement period.* A temporary special local is in effect from 7 a.m. on August 24, 2018 until 7 p.m. August 26, 2018. The regulation will be enforced from 12 p.m. until 7 p.m. on August 24, 2018, and from 7 a.m. until 7 p.m. on August 25 and August 26, 2018.

(c) *Regulations.* (1) No vessels or person may enter, transit through, or anchor within the regulated navigation area unless authorized by the Captain of the Port Detroit, or his on-scene representative.

(2) The regulated area is closed to all vessel traffic, except as may be permitted by the Captain of the Port Detroit or his on-scene representative.

(3) The ‘‘on-scene representative’’ of the Captain of the Port Detroit is any Coast Guard commissioned, warrant or petty officer or a Federal, State, or local law enforcement officer designated by or assisting the Captain of the Port Detroit to act on his behalf.

(4) Vessel operators shall contact the Captain of the Port Detroit or his on-scene representative to obtain permission to enter or operate within the regulated area. The Captain of the Port Detroit or his on-scene representative may be contacted via VHF Channel 16 or at (313) 568–9560. Vessel operators given permission to enter or operate in the regulated area must comply with all directions given to them by the Captain of the Port Detroit or his on-scene representative.

Dated: July 10, 2018.

Kevin D. Floyd,

Commander, U.S. Coast Guard, Acting Captain of the Port Detroit.

RIN 1625–AA00

Safety Zone; Yankee Air Museum's Fundraiser Air Demonstration, Lake St. Clair, Grosse Pointe Farms, MI

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for navigable waters in the vicinity of Grosse Pointe Farms, MI. This zone is necessary to protect spectators and vessels from potential hazards associated with the Yankee Air Museum's Fundraiser Air Demonstration.

DATES: This temporary final rule is effective from 8 p.m. until 8:30 p.m. July 18, 2018.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type USCG–2018–0690 in the ‘‘SEARCH’’ box and click ‘‘SEARCH.’’ Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary rule, call or email Tracy Girard, Prevention Department, Sector Detroit, Coast Guard; telephone 313–568–9564, or email *Tracy.M.Girard@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR	Code of Federal Regulations
COTP	Captain of the Port Detroit
DHS	Department of Homeland Security
FR	Federal Register
NPRM	Notice of proposed rulemaking
§	Section
U.S.C.	United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ‘‘impracticable, unnecessary, or contrary to the public interest.’’ Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because doing so would be impracticable. The Coast Guard did not receive the final details of this air demonstration in time to publish an NPRM. As such, it is impracticable to publish an NPRM because we lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would inhibit the Coast Guard's ability to protect participants, mariners and vessels from the hazards associated with this event.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 33 U.S.C. 1231. The Captain of the Port Detroit (COTP) has determined that an aircraft aerial display proximate to a gathering of watercraft poses a significant risk to public safety and property. This rule is needed to protect personnel, vessels, and the marine environment in the navigable waters within the safety zone while the air demonstration is being displayed.

IV. Discussion of the Rule

This rule establishes a safety zone from 8 p.m. through 8:30 p.m. July 18, 2018. The safety zone will encompass all U.S. navigable waters of Lake St. Clair with in the following corner points: Northeast corner, 42°24.670′ N, 082°51.594′ W, Northwest corner 42°24.671′ N, 082°51.368′ W, Southeast corner 42°24.034′ N, 082°51.857′ W, Southwest corner 42°24.023′ N, 082°51.626′ W (NAD 83). No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP or a designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, duration, and time-of-year of the safety zone. Vessel traffic will be able to safely transit around this safety zone which will impact a small designated area of Lake St. Clair for no more than thirty minutes. Moreover, the Coast Guard will issue Broadcast Notice to Mariners (BNM) via VHF–FM marine channel 16 about the zone and the rule allows vessels to seek permission to enter the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the

National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves a safety zone lasting less than thirty minutes that will prohibit entry into a designated area. It is categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. A Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and record keeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T09–0690 to read as follows:

§ 165.T09–0690 Yankee Air Museum's Fundraiser Air Demonstration, Lake St. Clair, Grosse Pointe Farms, MI.

(a) *Location.* A safety zone is established to include all U.S. navigable waters of Lake St. Clair within the following corner points: Northeast corner, 42°24.670′ N, 082°51.594′ W, Northwest corner 42°24.671′ N, 082°51.368′ W, Southeast corner 42°24.034′ N, 082°51.857′ W, Southwest corner 42°24.023′ N, 082°51.626′ W (NAD 83).

(b) *Enforcement period.* The regulated area described in paragraph (a) will be enforced 8 p.m. through 8:30 p.m. on July 18, 2018.

(c) *Regulations.* (1) No vessel or person may enter, transit through, or anchor within the safety zone unless authorized by the Captain of the Port Detroit (COTP), or his on-scene representative.

(2) The safety zone is closed to all vessel traffic, except as may be permitted by the COTP or his on-scene representative.

(3) The ''on-scene representative'' of COTP is any Coast Guard commissioned, warrant or petty officer or a Federal, State, or local law enforcement officer designated by or assisting the Captain of the Port Detroit to act on his behalf.

(4) Vessel operators shall contact the COTP or his on-scene representative to obtain permission to enter or operate within the safety zone. The COTP or his on-scene representative may be contacted via VHF Channel 16 or at 313–568–9464. Vessel operators given permission to enter or operate in the regulated area must comply with all directions given to them by the COTP or his on-scene representative.

Dated: July 11, 2018.

Kevin D. Floyd,

Commander, U.S. Coast Guard, Acting Captain of the Port Detroit.

RIN 0651–AD23

Removal of Rules Governing Trademark Interferences

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final rule.

SUMMARY: The United States Patent and Trademark Office (USPTO or Office) amends the Rules of Practice in Trademark Cases to remove the rules governing trademark interferences. This rule arises out of the USPTO's work during FY 2017 to identify and propose regulations for removal, modification, and streamlining because they are outdated, unnecessary, ineffective, costly, or unduly burdensome on the agency or the private sector. The revisions put into effect the work the USPTO has done, in part through its participation in the Regulatory Reform Task Force (Task Force) established by the Department of Commerce (Department or Commerce) pursuant to Executive Order 13777, to review and identify regulations that are candidates for removal.

DATES: This rule is effective on August 16, 2018.

FOR FURTHER INFORMATION CONTACT: Catherine Cain, Office of the Deputy Commissioner for Trademark Examination Policy, by email at *TMFRNotices@uspto.gov,* or by telephone at (571) 272–8946.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with Executive Order 13777, ''Enforcing the Regulatory Reform Agenda,'' the Department established a Task Force, comprising, among others, agency officials from the National Oceanic and Atmospheric Administration, the Bureau of Industry and Security, and the USPTO, and charged the Task Force with evaluating existing regulations and identifying those that should be repealed, replaced, or modified because they are outdated, unnecessary, ineffective, costly, or unduly burdensome to both government and private-sector operations.

To support its regulatory reform efforts on the Task Force, the USPTO assembled a Working Group on Regulatory Reform (Working Group), consisting of subject-matter experts from each of the business units that implement the USPTO's regulations, to consider, review, and recommend ways that the regulations could be improved, revised, and streamlined. In considering the revisions, the USPTO, through its Working Group, incorporated into its analyses all presidential directives relating to regulatory reform. The Working Group reviewed existing regulations, both discretionary rules and those required by statute or judicial order. The USPTO also solicited comments from stakeholders through a web page established to provide information on the USPTO's regulatory reform efforts and through the Department's **Federal Register** Notice titled ''Impact of Federal Regulations on Domestic Manufacturing'' (82 FR 12786, Mar. 7, 2017), which addressed the impact of regulatory burdens on domestic manufacturing. These efforts led to the development of candidate regulations for removal based on the USPTO's assessment that these regulations were not needed and/or that elimination could improve the USPTO's body of regulations. This rule removes certain trademark-related regulations. Other rules removing regulations on other subject areas may be published separately.

II. Regulations Being Removed

This rule removes the regulations concerning trademark interferences codified at 37 CFR 2.91–2.93, 2.96, and 2.98. The rule also revises the authority citation for part 2 and revises the undesignated center heading ''INTERFERENCES AND CONCURRENT USE PROCEEDINGS'' to read ''CONCURRENT USE PROCEEDINGS'' to more accurately reflect the final regulations. A trademark interference is a proceeding in which the Trademark Trial and Appeal Board (Board) determines which, if any, of the owners of conflicting applications (or of one or more applications and one or more conflicting registrations) is entitled to registration. 15 U.S.C. 1066. A trademark interference can be declared only upon petition to the Director of the USPTO (Director). However, the Director will grant such a petition only if the petitioner can show extraordinary circumstances that would result in a party being unduly prejudiced in the absence of an interference. 37 CFR 2.91(a). The availability of an opposition or cancellation proceeding to determine rights to registration ordinarily precludes the possibility of such undue prejudice to a party. *Id.* Thus, a petitioner must show that there is some extraordinary circumstance that would make the remedy of opposition or cancellation inadequate or prejudicial to the party's rights.

Trademark interferences have generally been limited to situations where a party would otherwise be required to engage in a series of opposition or cancellation proceedings involving substantially the same issues. Trademark Manual of Examining Procedure § 1507. The promulgation of the interference regulations suggests that at that time, the Office contemplated such situations arising with enough frequency to merit particular regulations governing interference proceedings. However, the rarity of interference proceedings over an extended period of time indicates that the regulations are unnecessary. To the extent that the USPTO's paper petition records are searchable, the USPTO reviewed them and its electronic records of petitions and found that since 1983, the USPTO has received an average of approximately one petition for a trademark interference per year, and almost all of them have been denied except for one petition that was granted in 1985 (32 years ago). The USPTO has been unable to identify a situation since that time in which the Director has granted a petition to declare a trademark interference. Given the extremely low rate of filing over this long period of time, and because parties would still retain an avenue for seeking a declaration of interference through the general petition regulations, the USPTO considers the trademark interference regulations unnecessary.

Section 16 of the Trademark Act, 15 U.S.C. 1066, states that the Director may declare an interference ''[u]pon petition showing extraordinary circumstances.'' Although eliminating §§ 2.91–2.93, 2.96, and 2.98 removes the regulations regarding the requirements for declaring a trademark interference, the statutory authority will remain. On the rare occasion that the Office receives a request that the Director declare a trademark interference, it is currently submitted as a petition under 37 CFR 2.146, a more general regulation on petitions. In the unlikely event that a need for an interference arose, it is still possible for a party to seek institution of a trademark interference by petitioning the Director under 37 CFR 2.146(a)(4), whereby a petitioner may seek relief in any case not specifically defined and provided for by Part 2 of Title 37. Thus, even after removal of these rules, parties retain an avenue for seeking a declaration of interference.

Removal of the identified trademark interference regulations in this rule achieves the objective of making the USPTO regulations more effective and more streamlined, while enabling the USPTO to fulfill its mission goals. The USPTO's economic analysis shows that while the removal of these regulations is not expected to substantially reduce the burden on the impacted community, the regulations are nonetheless being eliminated because they are ''outdated, unnecessary, or ineffective'' regulations encompassed by the directives in Executive Order 13777.

III. Proposed Rule: Comments and Responses

The USPTO published a proposed rule on October 18, 2017 at 82 FR 48469, soliciting comments on the proposed amendments. In response, the USPTO received three comments relevant to the proposed rule. The commenters generally supported the proposed amendments as meeting the stated objectives. The USPTO appreciates the positive input, and these comments require no response.

One commenter noted that the removal of the trademark interference rules will not relieve any burden, as a party can petition the Director to declare an interference with or without these rules, and suggested ''that there should be real amendments which actually mitigate regulatory burden to incent entrepreneurship and market growth.'' As noted above, removal of the identified regulations achieves the objective of making the USPTO regulations more effective and more streamlined, while enabling the USPTO to fulfill its mission goals. Moreover, although removal of these regulations is not expected to substantially reduce the burden on the impacted community, they are being eliminated because they are ''outdated, unnecessary, or ineffective'' regulations that are encompassed by the directives in Executive Order 13777. The Office sought public suggestions on regulatory changes to reduce burdens in order to benefit from the public's input.

All comments are posted on the USPTO's website at *https://www.uspto.gov/trademark/trademark-updates-and-announcements/comments-proposed-rulemaking-related-removal-rules.*

IV. Discussion of Rules Changes

The USPTO revises the authority citation for part 2 to add ''Sec. 2.99 also issued under secs. 16, 17, 60 Stat. 434; 15 U.S.C. 1066, 1067.'' The USPTO revises the undesignated center heading ''INTERFERENCES AND CONCURRENT USE PROCEEDINGS'' to read ''CONCURRENT USE PROCEEDINGS'' and removes the authority citation immediately following that heading. The USPTO removes and reserves §§ 2.91–2.93, 2.96, and 2.98.

Rulemaking Considerations

A. Administrative Procedure Act: The changes in this rulemaking involve rules of agency practice and procedure, and/or interpretive rules. *See Perez* v. *Mortg. Bankers Ass'n,* 135 S. Ct. 1199, 1204 (2015) (Interpretive rules ''advise the public of the agency's construction of the statutes and rules which it administers.'' (citation and internal quotation marks omitted)); *Nat'l Org. of Veterans' Advocates* v. *Sec'y of Veterans Affairs,* 260 F.3d 1365, 1375 (Fed. Cir. 2001) (Rule that clarifies interpretation of a statute is interpretive.); *Bachow Commc'ns Inc.* v. *FCC,* 237 F.3d 683, 690 (D.C. Cir. 2001) (Rules governing an application process are procedural under the Administrative Procedure Act.); *Inova Alexandria Hosp.* v. *Shalala,* 244 F.3d 342, 350 (4th Cir. 2001) (Rules for handling appeals were procedural where they did not change the substantive standard for reviewing claims.).

Accordingly, prior notice and opportunity for public comment for the changes in this rulemaking are not required pursuant to 5 U.S.C. 553(b) or (c), or any other law. *See Perez,* 135 S.

Ct. at 1206 (Notice-and-comment procedures are required neither when an agency ''issue[s] an initial interpretive rule'' nor ''when it amends or repeals that interpretive rule.''); *Cooper Techs. Co.* v. *Dudas,* 536 F.3d 1330, 1336–37 (Fed. Cir. 2008) (stating that 5 U.S.C. 553, and thus 35 U.S.C. 2(b)(2)(B), does not require notice and comment rulemaking for ''interpretative rules, general statements of policy, or rules of agency organization, procedure, or practice'' (quoting 5 U.S.C. 553(b)(A))). However, the Office chose to seek public comment before implementing the rule to benefit from the public's input.

B. Regulatory Flexibility Act: For the reasons set forth herein, the Senior Counsel for Regulatory and Legislative Affairs, Office of General Law, of the USPTO has certified to the Chief Counsel for Advocacy of the Small Business Administration that this rule will not have a significant economic impact on a substantial number of small entities. *See* 5 U.S.C. 605(b).

This rule removes the regulations addressing trademark interferences codified at 37 CFR 2.91–2.93, 2.96, and 2.98. In trademark interferences, the Board determines which, if any, of the owners of conflicting applications (or of one or more applications and one or more conflicting registrations) is entitled to registration. 15 U.S.C. 1066. Where searchable, the USPTO reviewed its paper and electronic records of petitions and found that since 1983, USPTO has received an average of approximately 1 such petition a year, and almost all of them have been denied except for one petition that was granted in 1985 (32 years ago). Because these regulations have rarely been invoked in the last 32 years and no trademark interference proceedings occurred during that time, the USPTO considers these regulations unnecessary and has determined to remove them. Removing the trademark interference regulations in this rule achieves the objective of making the USPTO regulations more effective and more streamlined, while enabling the USPTO to fulfill its mission goals. The removal of these regulations is not expected to substantively impact parties as, in the unlikely event that a need for a trademark interference arose, a party would be able to petition the Director under 37 CFR 2.146(a)(4) for institution of an interference. For these reasons, this rulemaking will not have a significant economic impact on a substantial number of small entities.

C. Executive Order 12866 (Regulatory Planning and Review): This rulemaking has been determined to be not significant for purposes of Executive Order 12866.

D. Executive Order 13563 (Improving Regulation and Regulatory Review): The Office has complied with Executive Order 13563. Specifically, the Office has, to the extent feasible and applicable: (1) Made a reasoned determination that the benefits justify the costs of the rule; (2) tailored the rule to impose the least burden on society consistent with obtaining the regulatory objectives; (3) selected a regulatory approach that maximizes net benefits; (4) specified performance objectives; (5) identified and assessed available alternatives; (6) involved the public in an open exchange of information and perspectives among experts in relevant disciplines, affected stakeholders in the private sector and the public as a whole, and provided on-line access to the rulemaking docket; (7) attempted to promote coordination, simplification, and harmonization across government agencies and identified goals designed to promote innovation; (8) considered approaches that reduce burdens and maintain flexibility and freedom of choice for the public; and (9) ensured the objectivity of scientific and technological information and processes.

E. Executive Order 13771 (Reducing Regulation and Controlling Regulatory Costs): This rule is not an Executive Order 13771 regulatory action because this rule is not significant under Executive Order 12866.

F. Executive Order 13132 (Federalism): This rulemaking does not contain policies with federalism implications sufficient to warrant preparation of a Federalism Assessment under Executive Order 13132 (Aug. 4, 1999).

G. Executive Order 13175 (Tribal Consultation): This rulemaking will not: (1) Have substantial direct effects on one or more Indian tribes; (2) impose substantial direct compliance costs on Indian tribal governments; or (3) preempt tribal law. Therefore, a tribal summary impact statement is not required under Executive Order 13175 (Nov. 6, 2000).

H. Executive Order 13211 (Energy Effects): This rulemaking is not a significant energy action under Executive Order 13211 because this rulemaking is not likely to have a significant adverse effect on the supply, distribution, or use of energy. Therefore, a Statement of Energy Effects is not required under Executive Order 13211 (May 18, 2001).

I. Executive Order 12988 (Civil Justice Reform): This rulemaking meets applicable standards to minimize litigation, eliminate ambiguity, and reduce burden as set forth in sections 3(a) and 3(b)(2) of Executive Order 12988 (Feb. 5, 1996).

J. Executive Order 13045 (Protection of Children): This rulemaking does not concern an environmental risk to health or safety that may disproportionately affect children under Executive Order 13045 (Apr. 21, 1997).

K. Executive Order 12630 (Taking of Private Property): This rulemaking will not affect a taking of private property or otherwise have taking implications under Executive Order 12630 (Mar. 15, 1988).

L. Congressional Review Act: Under the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), prior to issuing any final rule, the USPTO will submit a report containing the final rule and other required information to the United States Senate, the United States House of Representatives, and the Comptroller General of the Government Accountability Office. The changes in this notice are not expected to result in an annual effect on the economy of 100 million dollars or more, a major increase in costs or prices, or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic and export markets. Therefore, this notice is not expected to result in a ''major rule'' as defined in 5 U.S.C. 804(2).

M. Unfunded Mandates Reform Act of 1995: The changes set forth in this notice do not involve a Federal intergovernmental mandate that will result in the expenditure by State, local, and tribal governments, in the aggregate, of 100 million dollars (as adjusted) or more in any one year, or a Federal private sector mandate that will result in the expenditure by the private sector of 100 million dollars (as adjusted) or more in any one year, and will not significantly or uniquely affect small governments. Therefore, no actions are necessary under the provisions of the Unfunded Mandates Reform Act of 1995. *See* 2 U.S.C. 1501 *et seq.*

N. National Environmental Policy Act: This rulemaking will not have any effect on the quality of the environment and is thus categorically excluded from review under the National Environmental Policy Act of 1969. *See* 42 U.S.C. 4321 *et seq.*

O. National Technology Transfer and Advancement Act: The requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) are not applicable because this rulemaking does not contain provisions that involve the use of technical standards.

P. Paperwork Reduction Act: This rulemaking involves information collection requirements which are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). The collection of information involved in this rule has been reviewed and previously approved by OMB under control number 0651–0054.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB control number.

List of Subjects for 37 CFR Part 2

Administrative practice and procedure, Trademarks.

For the reasons stated in the preamble and under the authority contained in 15 U.S.C. 1123 and 35 U.S.C. 2, as amended, the Office amends part 2 of title 37 as follows:

PART 2—RULES OF PRACTICE IN TRADEMARK CASES

■ 1. The authority citation for part 2 is revised to read as follows:

Authority: 15 U.S.C. 1123 and 35 U.S.C. 2 unless otherwise noted. Sec. 2.99 also issued under secs. 16, 17, 60 Stat. 434; 15 U.S.C. 1066, 1067.

■ 2. Revise the undesignated center heading ''INTERFERENCES AND CONCURRENT USE PROCEEDINGS'' above § 2.91 to read ''CONCURRENT USE PROCEEDINGS'' and remove the authority citation immediately following that heading.

§ 2.91 [Reserved and Reserved]

■ 3. Remove and reserve § 2.91.

§ 2.92 [Reserved and Reserved]

■ 4. Remove and reserve § 2.92.

§ 2.93 [Reserved and Reserved]

■ 5. Remove and reserve § 2.93.

§ 2.96 [Reserved and Reserved]

■ 6. Remove and reserve § 2.96.

§ 2.98 [Reserved and Reserved]

■ 7. Remove and reserve § 2.98.

Dated: July 10, 2018.

Andrei Iancu,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2017–0740; FRL–9980–81—Region 4]

Air Plan Approval; Tennessee; Revisions to Stage I and II Vapor Recovery Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a State Implementation Plan (SIP) revision submitted by the State of Tennessee through the Tennessee Department of Environment and Conservation (TDEC) on November 11, 2017, for the purpose of establishing minor changes to the gasoline dispensing regulations, including adding clarifying language and effective and compliance dates and specifying the counties subject to the reporting requirement rule. EPA has determined that Tennessee's November 11, 2017, SIP revision is approvable because it is consistent with the Clean Air Act (CAA or Act) and with EPA's regulations and guidance.

DATES: This rule is effective August 16, 2018.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2017–0740. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Kelly Sheckler, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9222. Ms. Sheckler can also be reached via electronic mail at sheckler.kelly@ *epa.govsheckler.kelly@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On November 11, 2017, TDEC submitted a SIP revision to EPA seeking to add clarity for the benefit of the regulated community with gasoline dispensing facilities. Tennessee is making a minor change to its rules regarding gasoline dispensing facilities (GDF) at subparagraph (1)(d) of rule 1200–03–18–.24—''For any GDF otherwise exempt from subparagraph (c) of this paragraph based on monthly throughput, if the GDF *ever* exceeds the applicability threshold specified in subparagraph (c) of this paragraph, it shall be subject to the requirements of subparagraph (c) of this paragraph *and shall remain subject to those requirements* even if its throughput later falls below the threshold. The owner or operator shall inform the Technical Secretary within 30 days following the exceedance.'' The revision clarifies the meaning and application of subparagraph (1)(d) of rule 1200–03–18–.24 by adding the words ''ever'' and ''and shall remain subject to those requirements'' italicized above.

In addition, this revision replaces the phrase ''the effective date of this rule'' with the actual effective date of the rule (July 14, 2016) and replaces ''three years after effective date'' with the actual date of the rule for compliance (August 14, 2019). Finally, this revision adds the list of counties (Davidson, Rutherford, Shelby, Sumner, Knox, Anderson, Williamson and Wilson) that need to report to their permitting authority (if they emit more than 25 tons in a calendar year) and the cross reference to the existing reporting requirement in rule 1200–03–18–.02 to simplify the issuances of notices of authorization under pending permit-by-rule provisions.

Pursuant to CAA section 110(l), the Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress (as defined in CAA section 171), or any other applicable requirement of the Act. The State's addition of clarifying language, specific dates for the gas dispensing rule's effective and compliance dates, as well as specifying the counties subject to the reporting requirement under the cross-referenced rule are approvable under section 110(l) because they merely clarify the application of the rule and are consistent with the CAA and federal regulations.

In this action, EPA is approving TDEC's request to revise the Stage II requirements in the State of Tennessee. EPA published a proposed rulemaking on April 12, 2018 (83 FR 16279), to approve this revision. The details of Tennessee's submittal and the rationale for EPA's action are explained in the proposed rulemaking. The comment period for this proposed rulemaking closed on May 16, 2018. While EPA received six unrelated comments, EPA did not receive any adverse comments for the proposed approval during the public comment period.

II. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of TDEC Regulation section 1200–03–18–.24 entitled ''Gasoline Dispensing Facilities-Stage I and II Vapor Recovery,'' effective August 31, 2017. EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 4 Office (please contact the person identified in the ''For Further Information Contact'' section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the SIP, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[1]

III. Final Action

EPA is taking final action to approve the November 11, 2017, revision to the Tennessee SIP, concerning Regulation 1200–03–18–24, *Stage I and II Vapor Recovery Requirements,* submitted by the TDEC. This action makes minor changes to clarify the Regulation's meaning and applicability. EPA has determined that Tennessee's November 11, 2017, SIP revision related to the Stage I and II Vapor Recovery Requirements is consistent with the CAA and EPA's regulations and guidance related to removal of Stage II requirements from the SIP and that these changes will not interfere with any applicable requirement concerning attainment or any other applicable requirement of the CAA, and therefore satisfy section 110(l).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 17, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. *See* section 307(b)(2).

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) Region 5 is publishing a direct final Notice of Deletion of Operable Unit 3 (OU3) of the Naval Industrial Reserve Ordnance Plant (NIROP) Superfund Site (Site), located in Fridley, Minnesota, from the National Priorities List (NPL). The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This direct final partial deletion is being published by EPA with the concurrence of the State of Minnesota, through the Minnesota Pollution Control Agency (MPCA), because EPA has determined that all appropriate response actions under CERCLA at OU3, other than operation, maintenance, and five-year reviews, have been completed. However, this partial deletion does not preclude future actions under Superfund.

DATES: This direct final partial deletion is effective September 17, 2018 unless EPA receives adverse comments by August 16, 2018. If adverse comments are received, EPA will publish a timely withdrawal of the direct final partial deletion in the **Federal Register** informing the public that the partial deletion will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–1989–0007, by one of the following methods: *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

Email: cano.randolph@epa.gov.

Mail: Randolph Cano, NPL Deletion Coordinator, U.S. Environmental Protection Agency Region 5 (SR–6J), 77 West Jackson Boulevard, Chicago, IL 60604, (312) 886–6036.

Hand deliver: Superfund Records Center, U.S. Environmental Protection Agency Region 5, 77 West Jackson Boulevard, 7th Floor South, Chicago, IL 60604, (312)886–0900. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information. The normal business hours are Monday through Friday, 8 a.m. to 4 p.m., excluding Federal holidays.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–1989–0007. The *http://www.regulations.gov* website is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statue. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

U.S. Environmental Protection Agency, Region 5, Superfund Records Center, 77 West Jackson Boulevard, 7th Floor South, Chicago, IL 60604, Phone: (312) 886–0900, Hours: Monday through Friday, 8 a.m. to 4 p.m., excluding Federal holidays.

Mississippi Library, 410 Mississippi St. NE, Fridley, MN 55432, Phone: (763) 324–1560, Hours: Monday and Wednesday, 12:00 p.m. to 8:00 p.m., Tuesday and Thursday, 10:00 a.m. to 6:00 p.m., Friday, 12:00 p.m. to 6:00 p.m. and Saturday 10:00 a.m. to 5:00 p.m.

The Navy has an online repository for the NIROP Site at the link below. Please click on the Administrative Records link to see all the documents. *http://www.navfac.navy.mil/products_and_services/ev/products_and_services/env_restoration/administrative_records.html?p_instln_id=FRIDLEY_NIROP.*

The Minnesota Pollution Control Agency has an information repository for the NIROP Site at their offices: 520 Lafayette Road, St. Paul, MN 55155. Call (651) 296–6300 or toll-free at (800) 657–3864 to schedule an appointment.

FOR FURTHER INFORMATION CONTACT: Randolph Cano, NPL Deletion Coordinator, U.S. Environmental Protection Agency Region 5 (SR–6J), 77 West Jackson Boulevard, Chicago, IL 60604, (312)886–6036, or via email at *cano.randolph@epa.gov.*

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Partial Deletion Procedures
IV. Basis for Site Partial Deletion
V. Partial Deletion Action

I. Introduction

EPA Region 5 is publishing this direct final Notice of Partial Deletion for the Naval Industrial Reserve Ordnance Plant (NIROP) Superfund Site (Site) from the National Priorities List (NPL). This partial deletion pertains to OU3, which includes all the unsaturated soils underlying the former Plating Shop Area. The NPL constitutes Appendix B of 40 CFR part 300, which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). This partial deletion of the NIROP Site is proposed in accordance with 40 CFR 300.425(e) and is consistent with the Notice of Policy Change: Partial Deletion of Sites Listed on the National Priorities List. 60 FR 55466 (Nov. 1, 1995). As described in 300.425(e)(3) of the NCP, a portion of a site deleted from the NPL remains eligible for Fund-financed remedial action if future conditions warrant such actions.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses OU3 of the NIROP Site and demonstrates how OU3 meets the deletion criteria. Section V discusses EPA's action to partially delete OU3 of the Site from the NPL unless adverse comments are received during the public comment period.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the State, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts five-year reviews (FYRs) to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such FYRs even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Partial Deletion Procedures

The following procedures apply to the deletion of OU3 of the NIROP Site:

(1) EPA has consulted with the State of Minnesota prior to developing this direct final Notice of Partial Deletion and the Notification of Intent for Partial Deletion published in the ''Proposed Rules'' section of the **Federal Register**.

(2) EPA has provided the State thirty (30) working days for review of this action and the parallel Notification of Intent for Partial Deletion prior to their publication today, and the State, through the Minnesota Pollution Control Agency (MPCA), has concurred on the partial deletion of the Site from the NPL.

(3) Concurrent with the publication of this direct final Notice of Partial Deletion, a notice of the availability of the parallel Notification of Intent for Partial Deletion is being published in a major local newspaper, the Sun Focus, located in Fridley, Minnesota. The newspaper notice announces the 30-day public comment period concerning the Notification of Intent for Partial Deletion of the Site from the NPL.

(4) EPA placed copies of documents supporting the partial deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified in the Addresses Section of this rule.

(5) If adverse comments are received within the 30-day public comment period on this partial deletion action, EPA will publish a timely notice of withdrawal of this direct final Notice of Partial Deletion before its effective date and will prepare a response to comments and continue with the deletion process on the basis of the Notice of Intent for Partial Deletion and the comments already received.

Deletion of a portion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a portion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for further response actions, should future conditions warrant such actions.

IV. Basis for Site Partial Deletion

The following information provides EPA's rationale for deleting OU3 of the NIROP Site from the NPL. EPA believes it is appropriate to delete OU3 of the NIROP Site because all appropriate response actions under CERCLA, other than operation, maintenance, and FYRs, have been completed at OU3 and it is ready for redevelopment as a commercial and/or industrial property.

Site Background and History

The NIROP Site (CERCLIS ID MN3170022914) is located in the northern portion of the Minneapolis/St. Paul Metropolitan Area in an industrial/commercial area at 4800 E. River Road within the limits of Fridley, Anoka County, Minnesota. The NIROP Site is not adjacent to any residential areas and is not located in an environmentally sensitive area, nor near any known environmentally sensitive areas.

The Site is approximately 82.6 acres, most of which are covered with buildings or pavement. The U.S. Navy and/or its contractors produced advanced weapons systems at the facility beginning in 1940. In 2004, the U.S. Navy sold the property to FMC (now BAE). BAE then sold the property to ELT Minneapolis, LLC. ELT Minneapolis owned the former NIROP property and leased the space to United Defense LP until 2013. In 2013, ELT sold the property to Fridley Land, LLC, the current owner. Fridley Land LLC is in the process of redeveloping the property in phases for commercial and/or industrial use.

The formerly government-owned portion of the facility constitutes what is now the NIROP Site. See the site map in NIROP Map Delineating Operable Units, Docket Document ID No. EPA–HQ–SFUND–1989–0007–0075 in the Deletion Docket for OU3. (Note: portions of the main facility building depicted in the Site Map have since been demolished for redevelopment.) The Site Map also shows that the southern portion of the original facility is not part of the NIROP Site.

The Navy and/or its contractors disposed paint sludges and chlorinated solvents generated from ordnance manufacturing processes in pits and trenches in the undeveloped area of the NIROP Site immediately north of the main facility building in the early 1970s. This area is called the North 40 area. MPCA received information concerning the historical waste disposal practices at NIROP and about the contaminant sources in the North 40 area and beneath the NIROP building in 1980.

Trichloroethylene (TCE) was discovered in on-site groundwater wells and in the City of Minneapolis's drinking water treatment plant intake pipe, located in the Mississippi River less than 1 mile downstream from the Site, in 1981. The Navy conducted investigations in 1983 which identified pits and trenches in the North 40 area of the NIROP Site where drummed wastes were deposited. The Navy excavated approximately 1,200 cubic yards of contaminated soil and 43 (55-gallon) drums and disposed them off-site from November 1983 to March 1984.

EPA proposed the NIROP Site to the NPL on July 14, 1989 (54 FR 29820). EPA finalized the NIROP Site on the NPL on November 21, 1989 (54 FR 48184).

EPA, MPCA and the Navy signed a Federal Facilities Agreement (FFA) in March 1991. Per the FFA, one of the purposes of that agreement was to ''Identify alternatives for Remedial Action for Operable Units'' appropriate for the Site prior to the implementation of Final Remedial Actions for the Site.

EPA divided the NIROP Site into three operable units (OUs) to make it easier to address the contaminant issues at the Site. OU3, the subject of this partial deletion, includes all the unsaturated soils underlying the former Plating Shop Area of the Site. The extent of OU3 is detailed in the site map in NIROP Map Delineating Operable Units, Docket Document ID No. EPA–HQ–SFUND–1989–0007–0075 in the Deletion Docket for OU3.

The current scope of OU3 is provided in EPA's August 12, 2013 Memorandum to File that restructured the OUs at the Site. OU3 initially included: (1) All saturated and unsaturated soil underneath the main NIROP manufacturing building, excluding the extreme southern portion of the building, and (2) all saturated soil under and outside the main NIROP manufacturing building, within the legal boundaries of the Site.

EPA's 2013 Memorandum limited the scope of OU3 to unsaturated soil under the former Plating Shop Area. The saturated soils that were initially part of OU3 are now included with OU1. The remaining unsaturated soil under the main NIROP building outside the former Plating Shop Area that were part of OU3 are being addressed as part of OU2.

OU1, which includes the contaminated groundwater within and originating from the NIROP Site, and now saturated soils, will remain on the NPL and is not being considered for deletion as part of this action. EPA deleted OU2, which includes all the unsaturated soils within the legal boundaries of the NIROP Site excluding the unsaturated soils under the former Plating Shop Area, from the NPL effective August 29, 2014 (79 FR 36658, June 30, 2014).

Remedial Investigation and Feasibility Study (RI/FS)

The groundwater in the unconsolidated aquifer beneath the Site is contaminated with volatile organic compounds (VOCs), including: TCE, 1,1,1-trichloroethane (TCA), 1,2-dichloroethylene (DCE), tetrachloroethylene (PERC), 1,1-dichloroethane, toluene, xylene, and ethylbenzene. Some or all of the contaminants identified are hazardous substances as defined in section 104(14) of CERCLA, 42 U.S.C. 9601(14), and 40 CFR 302.4. TCE was found more frequently and at higher concentrations than any other VOC, and is considered to be the best indicator chemical for the Site.

In April 1995, the Navy was renovating the East Plating Shop (now called the former Plating Shop Area or OU3) inside the main manufacturing building, to accommodate an electrical assembly facility. During the renovation, when all of the tanks were removed and prior to the floor repairs being made, the Navy collected soil and groundwater samples to determine whether past plating activities had impacted soil and groundwater beneath the building.

The Navy detected TCE, TCA, PERC and DCE at elevated levels in soil and groundwater. The Navy also found elevated metals concentrations, including chromium, in the vicinity of a former sump. (Note: With the ongoing redevelopment at the Site, OU3 is no longer inside the main manufacturing building. The portion of the building that housed OU3 has since been demolished.)

The Navy detected the highest concentrations of TCE and PERC in the 1995 sampling event in surface (0 to 4 feet below ground surface [bgs]), shallow subsurface (4 to 12 feet bgs), and deep subsurface (>12 feet bgs) soil samples collected from the East Plating Shop. This indicated the possible presence of a ''hot spot'' of TCE and PERC in this area and the likelihood that the East Plating Shop was the source area for these VOCs and chromium.

The 2002 Baseline Human Health Risk Assessment (HHRA) identified an unacceptable potential risk/hazard in OU3 for exposure to soil in the East Plating Shop area under the major-infrequent construction worker exposure scenario. The major-infrequent construction worker exposure scenario assumed construction workers would have a short-term exposure to the maximum concentration of soil contaminants detected from 0–12 feet bgs in the East Plating Shop area during major modifications to the building slab and foundations. The HHRA did not identify any unacceptable risks or hazards to exposure to OU3 soil under a commercial/industrial scenario.

The cancer risk calculated for the major-infrequent construction worker in the 2002 HHRA was 2.1×10^{-6}. This risk is within EPA's acceptable risk range of 1×10^{-4} to 1×10^{-6}, but exceeds MPCA's acceptable subchronic incremental cancer risk of 1×10^{-6}.

The noncancer risks calculated for the major-infrequent construction worker in OU3 in the 2002 HHRA was a hazard quotient (HQ) of 1.35 for chromium, and a total hazard index (HI) of 2.9 for all chemicals. These levels exceed EPA's acceptable noncancer HQ of 1 for individual contaminants and a HI of 1 for multiple chemicals, and MCPA's acceptable subchronic HQ and HI levels of 1 for individual and multiple chemicals.

Chromium is most commonly present in its less-toxic trivalent form because environmental conditions typically favor the reduction of the more-toxic hexavalent chromium to its less-toxic trivalent state. The 2002 HHRA, however, conservatively assumed that 100 percent of the chromium detected in the East Plating Shop area was in the hexavalent form, due to the absence of site-specific speciated data and considering historic Site use. Based on this assumption of 100 percent hexavalent chromium, the potential risks to OU3 receptors from exposure to chromium in the 2002 HHRA were likely overestimated.

Several years after the OU3 remedy was selected and implemented, in 2015, the Navy conducted additional soil sampling in OU3 for total and hexavalent chromium analysis. The analytical results show that at most, the more toxic hexavalent chromium constitutes only 7 percent of the total OU3 chromium measured. The 2015 total and hexavalent chromium concentrations in soil were both below the MPCA soil reference values for industrial use. The Navy used these speciated chromium results to complete a more accurate, focused risk assessment for OU3 chromium in 2016.

In 2016, the Navy also excavated soils beneath the East Plating Shop to remove a potential source of TCE to the groundwater. The excavated soil was in the same area as the elevated chromium concentrations evaluated in the 2002 HHRA. This soil removal aided in reducing any potential health risks associated with chromium.

The Navy completed the Focused Human Health Risk Assessment (FHHRA) for the East Plating Shop area in 2016. The Navy did not include in the data set the soil samples collected in 2015 in the areas subsequently excavated as part of the 2016 East Plating Shop excavation because they were no longer present or available for contact by human receptors.

The FHHRA determined that, for the major-infrequent construction worker exposure scenario, the potential non-cancer HI for all contaminants of potential concern (COPCs)/target organs combined is 0.16. This HI is below EPA's and MPCA's target HI of 1 and does not exceed MPCA's target HQ level of 0.2 for individual COCs. Therefore, the 2016 FHHRA concluded that there are no unacceptable risks or hazards for major-infrequent construction workers who may be exposed to chemicals in mixed OU3 soil.

Selected Remedy

EPA, MPCA and the Navy issued a Record of Decision (ROD) for OU1 on September 28, 1990, and a ROD for OU2 and OU3 on September 17, 2003. EPA issued a Memorandum to File on September 5, 2013 clarifying the OU definitions at the site. The changes to the structure of the OUs in the 2013 Memorandum to File did not alter any of the selected remedies for the Site. EPA, MPCA and the Navy issued an Explanation of Significant Differences (ESD) documenting a requirement for groundwater institutional controls (ICs) as part of the OU1 remedy on September 26, 2014. EPA, MPCA and the Navy issued an ESD documenting a change in some of the IC requirements for OU3 on July 19, 2017. These documents are available the Docket under Docket Document IDs EPA–HQ–SFUND–1989–0007–0062 (1990 OU1 ROD), EPA–HQ–SFUND–1989–0007–0063 (2003 OU2 and OU3 ROD), EPA–HQ–SFUND–1989–0007–0068 (2013 Memorandum to File), EPA–HQ–SFUND–1989–0007–0069 (2014 OU1 ESD) and EPA–HQ–SFUND–1989–0007–0071 (2017 OU3 ESD).

The original remedial action objectives (RAOs) for OU3 in the 2003 OU2 and OU3 ROD were: (1) To prevent unacceptable risks due to residential or other unrestricted exposures to contaminated soils at the Site, and (2) to prevent unacceptable risks to industrial or construction workers due to exposures to contaminated soils at the Site. The remedial action specified for OU3 soils in the 2003 ROD were engineering controls (ECs) and ICs. The original selected remedy for OU3 was: (1) To restrict the use of the Property to industrial or restricted commercial use, until and unless EPA and MPCA determine that concentrations of hazardous substances in the soils have been reduced to levels that allow for a less restrictive use; (2) to prohibit the disturbance of soils beneath the Designated Restricted Area known as the concrete pit foundations where metal-finishing operations previously occurred at the former Plating Shop within the Main Manufacturing Building without the prior written approval of the EPA and MPCA; and (3) to ensure that the concrete pit floor (approximately 8 to 12 feet below grade floor) where metal finishing operations previously occurred at the former Plating Shop within the Main Manufacturing Building is not removed without the prior written approval of EPA and MPCA. That floor will serve as an EC.

On July 19, 2017, EPA, MPCA and the Navy issued an ESD to remove the requirement for some of the ICs and ECs in the OU3 remedy. The remedy components described in the 2003 OU2 and OU3 ROD were initially required to ensure the long-term protectiveness of the OU3 soil because the OU3 soil contamination remained at the Site above levels that allow for unlimited use and unrestricted exposure.

The 2017 ESD modified the selected remedy for OU3 by removing the second and third remedy components described above from the OU3 remedy.

Specifically, there was no longer a need to prohibit the disturbance of soils beneath the former Plating Shop area, nor to ensure that the concrete pit floor at the former Plating Shop remains in place.

EPA, MPCA and the Navy included these two OU3 remedy components in the 2003 ROD based on the conservative assumption in the 2002 HHRA that all of the chromium in OU3 soil was in the more-toxic hexavalent form. Based on the 2015 sampling data, which included speciated chromium results, and the 2016 FHHRA, which found no unacceptable risks or hazards for the major-infrequent construction worker scenario at OU3, the floor in the Plating Shop is no longer needed as an EC and OU3 ICs prohibiting the soils beneath the Plating Shop from being disturbed are no longer necessary.

The IC restricting OU3 to industrial or restricted commercial use in the 2003 OU2 and OU3 ROD [*i.e.,* OU3 remedy component (1) listed above], remains part of the selected remedy for OU3. Implemented ICs at the Site are shown in Figure 2 of the 2017 OU3 ESD in the Docket (Docket Document ID No. EPA–HQ–SFUND–1989–0007–0071).

Response Actions

EPA concurred with the Navy's March 2004 Land Use Control Remedial Design (LUCRD) for OU3 in August 2004. The LUCRD specifies how the OU3 remedy will be implemented, maintained, and enforced if any breach of the remedy should occur. The LUCRD details the Navy's continuing responsibilities with respect to OU3, including: Ensuring that annual on-site physical inspections of OU3 are performed to confirm continued compliance with all Land Use Control (LUC) Performance Objectives; ensuring that annual LUC Compliance Certifications are provided to EPA and MPCA that explain any deficiency, if found; conducting FYRs of the remedy as required by CERCLA and the NCP; notifying EPA and MPCA prior to any planned property conveyance; providing EPA and MPCA the opportunity to review the text of intended deed provisions; and notifying EPA and MPCA if Site activities might interfere with LUC effectiveness.

The LUCs were incorporated into a Quitclaim Deed that was executed by the property owner, the United States and MPCA on June 17, 2004. The Quitclaim Deed acts as an environmental covenant describing the property restrictions. The deed restrictions run with the land such that any subsequent property owner is bound by the same restrictions. The LUCs are to remain in place until EPA and MPCA determine that the concentrations of hazardous substances in the OU3 soils have been reduced to levels that allow for a less restrictive use.

In 2017, EPA, MPCA and the Navy issued an ESD for OU3 removing the requirement for two of the three OU3 LUCs required by the 2003 OU2 and OU3 ROD. The 2017 ESD removed the requirement for the LUCs that required the concrete pit floor in the former Plating Shop to remain in place and for the soils in the former Plating Shop area to remain undisturbed.

Cleanup Levels

There was no cleanup associated with the original remedy for OU3. In 2016, however, soils beneath the East Plating Shop were excavated and replaced with clean soil to address a potential source of TCE to the groundwater as part of OU1. The excavated soil was in the same area as the elevated chromium concentrations evaluated in the 2002 HHRA. The 2016 TCE soil removal also aided in reducing any potential health risk associated with chromium. This further justified the removal of the LUCs for the former Plating Shop floor and for the soil below the floor described in the 2017 OU3 ESD.

Operation and Maintenance

The Navy is the lead agency for the Site and is responsible for conducting routine inspections to ensure that the LUCs are maintained and enforced. The Navy is responsible for reporting the results of the inspections and any breach of the LUCs to the MPCA and EPA.

Five-Year Review

The Navy conducted the last FYR at the Site in October 2013. The 2013 FYR concluded that the remedy at NIROP for OU3 is protective of human health and the environment. The 2013 FYR did not identify any issues or recommendations for OU3. The FYR calls for the Navy to continue long-term stewardship to ensure that the LUC restricting land use at the Site to industrial or restricted commercial use is maintained. The next FYR for the Site is scheduled for October 2018.

Redevelopment

Redevelopment is currently underway to redevelop the NIROP Site into a commercial office/warehouse complex. This redevelopment is consistent with the existing Land Use Designation for the Site. The three parties to the FFA agree that delisting OU3 from the NPL will facilitate the redevelopment effort and allow OU3 to become eligible for State and Federal Brownfields funding. Superfund NPL site property is not eligible for Federal Brownfields funding.

A developer has enrolled the NIROP Site and adjacent land into MPCA's Voluntary Investigation and Cleanup (VIC) program. In conjunction with the redevelopment of the NIROP Site, any additional investigations will be conducted under the oversight and direction of MPCA's VIC program. Under the VIC program, MPCA also requested that all buildings at the NIROP Site have vapor mitigation units installed them and the builder has complied.

Community Involvement

Public participation activities have been satisfied as required in CERCLA section 113(k), 42 U.S.C. 9613(k), and CERCLA section 117, 42 U.S.C. 9617. EPA published a document announcing this proposed Direct Final Partial Deletion and announcing the 30-day public comment period in the Sun Focus concurrent with publishing this partial deletion in the **Federal Register**. Documents in the deletion docket, which EPA relied on for recommending the partial deletion of the Site from the NPL, are available to the public in the information repositories and at *www.regulations.gov.* Documents in the docket include maps which identify the specific parcels of land that are included in this proposed Direct Final Partial Deletion (*i.e.,* OU3).

Determination That the Criteria for Partial Deletion Have Been Met

The NCP (40 CFR 300.425(e)) states that portions of a site may be deleted from the NPL when no further response action is appropriate in that area or media. All cleanup actions specified for OU3 of the NIROP Site in the 2003 OU2 and OU3 ROD and the 2017 OU3 ESD have been implemented at the Site. EPA, in consultation with the State of Minnesota, has determined that no further action is warranted to protect human health and the environment at OU3 and that OU3 of the NIROP Site meets the criteria for Partial Deletion from the NPL.

V. Partial Deletion Action

EPA, with concurrence of the State of Minnesota through the MPCA, has determined that all appropriate response actions under CERCLA at OU3, other than operation, maintenance, and five-year reviews, have been completed. Therefore, EPA is deleting OU3 of the NIROP Site from the NPL.

Because EPA considers this action to be noncontroversial and routine, EPA is taking it without prior publication. This action will be effective September 17, 2018 unless EPA receives adverse comments by *August 16, 2018.* If adverse comments are received within the 30-day public comment period, EPA will publish a timely withdrawal of this direct final notice of partial deletion before the effective date of the partial deletion and it will not take effect. EPA will prepare a response to comments and continue with the deletion process on the basis of the notification of intent to partially delete and the comments already received. There will be no additional opportunity to comment.

47 CFR Part 54

[WC Docket No. 10–90, 16–271; FCC 16–115]

Connect America Fund, Connect America Fund—Alaska Plan

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved, for a period of three years, an information collection associated with the rules for the Connect America Fund contained in the Commission's *Connect America Fund—Alaska Plan Order,* FCC 16–115. This document is consistent with the *Connect America Fund—Alaska Plan Order,* which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of the new information collection requirements.

DATES: The amendments regarding §§ 54.313(f)(1)(i), 54.313(f)(3) and 54.313(l) published at 81 FR 69696, October 7, 2016, are effective July 17, 2018.

FOR FURTHER INFORMATION CONTACT: Alexander Minard, Wireline Competition Bureau at (202) 418–7400 or TTY (202) 418–0484. For additional information concerning the Paperwork Reduction Act information collection requirements contact Nicole Ongele at (202) 418–2991 or via email: *Nicole.Ongele@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Commission submitted revised information collection requirements for review and approval by OMB, as required by the Paperwork Reduction Act (PRA) of 1995, on May 30, 2018, which were approved by OMB on July 2, 2018. The information collection requirements are contained in the Commission's *Connect America Fund—Alaska Plan Order,* FCC 16–115, published at 81 FR 69696, October 7, 2016. The OMB Control Number is 3060–0986. The Commission publishes this document as an announcement of the effective date of the rules published October 7, 2016. If you have any comments on the burden estimates listed below, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Nicole Ongele, Federal Communications Commission, Room 1–A620, 445 12th Street SW, Washington, DC 20554. Please include the OMB Control Number, 3060–0986, in your correspondence. The Commission will also accept your comments via email at *PRA@fcc.gov.*

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the Commission is notifying the public that it received OMB approval on July 2, 2018, for the information collection requirements contained in 47 CFR 54.313(f)(1)(i), 54.313(f)(3) and 54.313(l), published at 81 FR 69696, October 7, 2016. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060–0986.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–0986.

OMB Approval Date: July 2, 2018.

OMB Expiration Date: July 31, 2021.

Title: High-Cost Universal Service Support.

Form Number: FCC Form 481, FCC Form 505, FCC Form 507, FCC Form 508, FCC Form 509 and FCC Form 525.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit, not-for-profit institutions and state, local or tribal government.

Number of Respondents and Responses: 1,877 respondents; 14,335 responses.

Estimated Time per Response: 0.5–15 hours.

Frequency of Response: On occasion, quarterly and annual reporting requirements, recordkeeping requirement and third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151–154, 155, 201–206, 214, 218–220, 251, 252, 254, 256, 303(r), 332, 403, 405, 410, and 1302.

Total Annual Burden: 63,486 hours.

Total Annual Cost: No Cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission notes that USAC must preserve the confidentiality of all data obtained from respondents; must not use the data except for purposes of administering the universal service programs; and must not disclose data in company-specific form unless directed to do so by the Commission. Privately-held rate-of-return carriers may file the financial information they disclose in FCC Form 481 pursuant to a protective order.

Needs and Uses: On November 18, 2011, the Commission adopted an order reforming its high-cost universal service support mechanisms. *Connect America Fund; A National Broadband Plan for Our Future; Establish Just and Reasonable Rates for Local Exchange Carriers; High-Cost Universal Service Support; Developing a Unified Intercarrier Compensation Regime;*

Federal-State Joint Board on Universal Service; Lifeline and Link-Up; Universal Service Reform—Mobility Fund, WC Docket Nos. 10–90, 07–135, 05–337, 03–109; GN Docket No. 09–51; CC Docket Nos. 01–92, 96–45; WT Docket No. 10–208, Order and Further Notice of Proposed Rulemaking, 26 FCC Rcd 17663 (2011) (*USF/ICC Transformation Order*), and the Commission and Wireline Competition Bureau have since adopted a number of orders that implement the *USF/ICC Transformation Order; see also Connect America Fund et al.,* WC Docket No. 10–90 et al., Third Order on Reconsideration, 27 FCC Rcd 5622 (2012); *Connect America Fund et al.,* WC Docket No. 10–90 et al., Order, 27 FCC Rcd 605 (Wireline Comp. Bur. 2012); *Connect America Fund et al.,* WC Docket No. 10–90 et al., Fifth Order on Reconsideration, 27 FCC Rcd 14549 (2012); *Connect America Fund et al.,* WC Docket No. 10–90 et al., Order, 28 FCC Rcd 2051 (Wireline Comp. Bur. 2013); *Connect America Fund et al.,* WC Docket No. 10–90 et al., Order, 28 FCC Rcd 7227 (Wireline Comp. Bur. 2013); *Connect America Fund,* WC Docket No. 10–90, Report and Order, 28 FCC Rcd 7766 (Wireline Comp. Bur. 2013); *Connect America Fund,* WC Docket No. 10–90, Report and Order, 28 FCC Rcd 7211 (Wireline Comp. Bur. 2013); *Connect America Fund,* WC Docket No. 10–90, Report and Order, 28 FCC Rcd 10488 (Wireline Comp. Bur. 2013); *Connect America Fund et al.,* WC Docket No. 10–90 et al., Report and Order, Order and Order on Reconsideration and Further Notice of Proposed Rulemaking, 31 FCC Rcd 3087 (2016). The Commission has received OMB approval for most of the information collections required by these orders. At a later date, the Commission plans to submit additional revisions for OMB review to address other reforms adopted in the orders (*e.g.,* 47 CFR 54.313(a)(6)).

More recently, on August 23, 2016, the Commission adopted the *Alaska Plan Order. See Connect America Fund et al.,* WC Docket Nos. 10–90, 16–271; WT Docket No. 10–208, Report and Order and Further Notice of Proposed Rulemaking, 31 FCC Rcd 10139 (2016) (*Alaska Plan Order*). In that order, the Commission adopted a plan for providing Alaskan rate-of-return carriers and competitive eligible telecommunications carriers (ETCs) the option to obtain a fixed level of funding for a defined term in exchange for committing to deployment obligations that are tailored to each Alaskan carrier's circumstances. ETCs receiving support pursuant to the Alaska Plan must comply with the Commission's existing high-cost reporting and oversight mechanisms, with certain exceptions and modifications.

On July 7, 2017, the Commission adopted the *ETC Reporting Streamlining Order. See Connect America Fund; ETC Annual Reports and Certifications,* WC Docket Nos. 10–90, 14–58, Report and Order, 32 FCC Rcd 5944 (2017) (*ETC Reporting Streamlining Order*). In that order, the Commission streamlined the annual reporting requirements for ETCs by eliminating rules duplicative of other reporting requirements or that are no longer necessary.

Further, since the previous filing deadline associated with this collection, changing circumstances have made filing certain information no longer necessary or required under the rules. For instance, the final Connect America Phase I incremental support deployment deadlines were in early 2017, so there are no longer any reporting obligations associated with that support.

Moreover, because the Connect America Phase II challenge process has ended, the Commission removed Form 505 from this collection. The Commission also moved FCC Form 507, FCC Form 508, FCC Form 509 and the accompanying instructions to information collection 3060–0233.

The Commission therefore revises this information collection, as well as Form 481 and its accompanying instructions, to reflect these new or modified requirements. The Commission also implemented a number of non-substantive changes to the Form 481 and accompanying instructions. Any increased burdens for particular reporting requirements are associated with ETCs newly subject to those requirements as a condition of receiving high-cost support.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket No. 17–169; FCC 18–78]

Protecting Consumers From Unauthorized Carrier Changes and Related Unauthorized Charges

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission takes measures to strengthen our rules to protect consumers from slamming and cramming by codifying rules against sales call misrepresentations and cramming and revising rules to improve the effectiveness of the third-party verification (TPV) process. Slamming is an unauthorized change in a consumers' telephone provider and cramming is the placement of an unauthorized charge on the consumers' telephone bill.

DATES: Effective August 16, 2018.

FOR FURTHER INFORMATION CONTACT: Richard D. Smith, Consumer and Governmental Affairs Bureau (717) 338–2797, email *Richard.Smith@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, document FCC 18–78, adopted on June 7, 2018, and released on June 8, 2018, in CG Docket No. 17–169. The full text of document FCC 18–78 will be available for public inspection and copying via the Commission's Electronic Comment Filing System (ECFS), and during regular business hours at the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY–A257, Washington, DC 20554. To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (844) 432–2272 (videophone), or (202) 418–0432 (TTY).

Congressional Review Act

The Commission will send a copy of document FCC 18–78 to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Final Paperwork Reduction Act of 1995 Analysis

The *Report and Order* does not contain any new or modified information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

Synopsis

Misrepresentations on Sales Calls

1. The Commission's recent enforcement actions reveal that misrepresentations on sales calls are a

continuing source of slamming. The Commission therefore codifies a rule to prohibit material misrepresentation, including material omissions, in sales calls to further reduce the incidence of slamming. A codified rule is consistent with the Commission's statutory authority and prior enforcement actions. In addition, codifying this prohibition in our rules will provide carriers and consumers with more specific information and notice of this prohibited practice. In so doing, the Commission notes that it revised the *Slamming and Cramming NPRM's* proposed rule, published at 82 FR 37830, August 14, 2017, on sales calls by deleting the reference to ''deception.'' The Commission finds that this term is vague and subject to an unclear interpretation absent a record to define it.

2. Upon a finding of material misrepresentation in the sales call, the consumer's authorization to change carriers will be deemed invalid even if the carrier has some evidence of consumer authorization of a switch. In this regard, our enforcement cases make clear that sales misrepresentations may not be cured by a facially valid TPV. When a consumer's decision to switch carriers is predicated on false information provided in a sales call, that consumer's authorization to switch carriers can no longer be considered binding.

3. A codified rule is consistent with the Commission's statutory authority and prior enforcement actions. Section 201(b) of the Act states, in pertinent part, that ''[a]ll charges, practices, classifications, and regulations for and in connection with [interstate or foreign] communication service [by wire or radio], shall be just and reasonable, and any such charge, practice, classification, or regulation that is unjust or unreasonable is declared to be unlawful.'' The Commission has found that misrepresentations made by interstate common carriers constitute unjust and unreasonable practices under section 201(b) of the Act. Sales calls that contain misrepresentations undermine the effectiveness of the carrier's validation procedures under Section 258 of the Act, and thus are an unjust and unreasonable practice that is ''in connection with'' the communication service that is the subject of the verification process.

4. *Material Violations.* The Commission bans only ''material'' misrepresentations on sales calls. In so doing, the Commission acknowledges that occasional minor or trivial inaccuracies that have no bearing on the consumer's decision to switch carriers can occur and may not rise to a level warranting enforcement action, consistent with how the Commission has exercised its enforcement discretion in the past. The Commission declines, however, to require that such misrepresentations also be ''intentional.'' The Commission has never articulated an intentionality standard when it has penalized carriers for misrepresentations on sales calls in the past. Rather, the Commission's forfeiture policies already require that, when determining the appropriate adjustment to a base forfeiture amount (rather than whether the act is a violation), the Commission considers ''egregious conduct'' and ''intentional violation'' consistent with section 503 of the Act. The Commission believes this allows sufficient flexibility to take ''intent'' into consideration as an aggravating or mitigating factor when a violation of this rule occurs.

5. *Defining ''Sales Call.''* The Commission's slamming rules are designed to prevent a provider from switching a consumer's preferred carrier without the consumer's permission. Section 258 of the Act makes it unlawful for any telecommunications carrier to ''submit or execute a change in a subscriber's selection of a provider of telephone exchange service or telephone toll service except in accordance with such verification procedures as the Commission shall prescribe.'' Thus, for purposes of the slamming rules, the Commission clarifies that a ''sales call'' is any telephone call in which a carrier encourages a subscriber to submit or execute a change in the subscriber's provider of telephone exchange service or telephone toll service.

6. *Recording Sales Calls.* The Commission declines to mandate that sales calls be recorded. Although the Commission agrees with commenters that recordings would aid in determining whether a misrepresentation occurred, the record contains unrebutted evidence that any such mandate would necessitate industry-wide installation of recording technologies, amending existing protocols with vendors that make such calls on carriers' behalf, recording large numbers of calls, and storing those records for some specified period when the vast majority of these calls do not result in consumer complaints. The principal consumer benefit of a recording mandate would be to aid enforcement, but the Commission is confident in light of the success of our prior enforcement actions that we can continue to enforce our rules even without a mandate, and nothing in the record persuades us otherwise.

7. Nonetheless, the Commission encourages carriers and their agents to record sales calls. The Commission clarifies that a consumer's allegation of a sales call misrepresentation shifts the burden of proof to the carrier making the sales call to provide persuasive evidence to rebut the claim. The Commission believes that in those instances in which a consumer has provided credible evidence of a misrepresentation that a carrier is uniquely positioned via its access to sales scripts, recordings, training, and other relevant materials relating to sales calls to proffer evidence to rebut those claims if they are without merit. In most instances, the consumer will not have access to these same materials. An accurate and complete sales call recording may be a carrier's best such evidence, and the record indicates that at least some carriers already record calls for training and monitoring purposes. Those carriers that do not and/or choose not to record sales calls will have to develop other means to rebut credible consumer allegations of misrepresentations on sales calls.

Unauthorized Charges on Telephone Bills

8. The Commission codifies a prohibition on the placement of unauthorized charges on telephone bills. Although cramming has been a long-standing issue addressed in various enforcement actions, and the Commission has adopted truth-in-billing rules to help detect it, the Commission has never codified a rule against cramming. The Commission thus codifies in a new § 64.2401(g) of the Commission's truth-in-billing rules the prohibition against cramming that it has long enforced under section 201(b) of the Act. The Commission believes codifying the cramming prohibition for wireline and wireless carriers will act as a deterrent to this conduct. In so doing, the Commission agrees with commenters that codifying a ban against cramming provides greater clarity to interested parties and will aid its enforcement efforts. In addition, codifying this prohibition into its rules will provide consumers with more specific information and notice of this prohibited practice.

9. The Commission agrees with those commenters who contend that wireless consumers should be afforded the same consumer protections as wireline consumers when such unauthorized charges appear on their telephone bills. This approach is also consistent with the Commission's prior enforcement

investigations conducted under section 201(b) holding wireless providers accountable for alleged unauthorized charges that appeared on wireless bills.

Third-Party Verification

10. *Authorizing Individual Services.* The Commission eliminates the requirement in § 64.1120(b) of its rules that carriers must obtain the authorization for each individual service sold when the carrier is selling more than one telecommunications service to a subscriber. The Commission agrees with those commenters who suggest there is minimal benefit to asking consumers if they want to separately switch individual services based on regulatory classifications that may be outdated and unfamiliar to them.

11. *TPV Abuses.* The Commission remains concerned that the TPV process has been misused in some instances to fraudulently verify consumer authorization to switch providers. Its prior enforcement actions confirm instances of abuse of the TPV process. Although the current record does not contain a sufficient basis to eliminate this widely-used verification mechanism, the Commission believes that these documented abuses warrant additional oversight. As a result, the Commission concludes that any carrier that becomes the subject of a Commission forfeiture order through abuse of that process will be suspended for a period of five years from using the TPV process to confirm consumer switches. That will necessitate that these carriers use other recognized sources of evidence under our rules, such as a letter of agency, to confirm a consumer switch during the pendency of that suspension. The Commission notes that this suspension process will be applied only going forward from the effective date of the rules adopted in document FC 18–78. Thus, carriers and verifiers will be afforded an opportunity to take proactive measures to correct any deficiencies that have resulted in prior enforcement actions. In addition to strengthening its requirements in this action, the Commission reminds carriers that it takes violations of its rules seriously and the Commission will continue to use its enforcement authority to stop bad actors, including through substantial monetary penalties and revocation of Commission operating authorization.

Other Measures

12. In light of the enhanced consumer protections afforded by the rules adopted in document FCC 18–78, the apparent diminishing nature of the slamming and cramming problem as evidenced by recent complaint data, and the potential costs of compliance with additional requirements, the Commission declines to mandate any other changes to its rules.

Final Regulatory Flexibility Analysis

13. As required by the Regulatory Flexibility Act of 1980, as amended (RFA) an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *Slamming and Cramming NPRM.* The Commission sought written public comment on the proposals in the *Slamming and Cramming NPRM,* including comments on the IFRA. This present Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

Need For, and Objectives of, the Proposed Rules

14. This document FCC 18–78 adopts rules to strengthen consumer protections from slamming and cramming. Slamming is the unauthorized change of a consumer's preferred interexchange telecommunications service provider, and cramming is the placement of unauthorized charges on a consumer's telephone bill. Despite existing slamming and truth-in-billing rules, recent enforcement actions indicate that the most vulnerable consumers, including the elderly and non-English speakers, remain at significant risk of being the victims of these fraudulent practices because unscrupulous carriers often make it difficult to detect such conduct. Specifically, the Commission adopts rules designed to provide greater clarity of these existing prohibitions and assist in our enforcement actions where such conduct occurs.

15. Section 258 of the Act makes it unlawful for any telecommunication carrier to ''submit or execute a change in accordance with such verification procedures as the Commission shall prescribe.'' The rules adopted in document FCC 18–78 will strengthen the Commission's ability to deter slamming by addressing misleading statements made in sales calls which the record confirms are a substantial factor in slamming. For example, when a consumer's decision to switch carriers is made based on false information provided in a sales call, that consumer's authorization to switch carrier will no longer be considered binding. In addition, the Commission streamlines the carrier change process by eliminating the requirement that the consumer's authorization be obtained for every service to be switched when selling more than one telecommunications service. This will improve the efficiency for both carriers and consumers when making carrier change requests by eliminating unnecessary regulatory impediments. Finally, any telecommunications carrier that is the subject of a Commission forfeiture action will be suspended for a period of five years from using that process to confirm a consumer switch. This will ensure that greater care is taken by both carriers and verifiers to avoid TPV abuses.

16. The Commission has found on numerous instances that cramming is an ''unjust and unreasonable'' practice in violation of section 201(b) of the Act but has never codified a prohibition against cramming in our rules. Doing so in document FCC 18–78 provides greater clarity of this long-recognized prohibition to interested parties and will assist in our enforcement efforts of this prohibited practice.

Summary of Significant Issues Raised by Public Comments in Response to the IRFA

17. One comment was filed that specifically addressed the proposed rules and policies presented in the IRFA. Although supporting the adoption of the two proposed rules contained in the *Slamming and Cramming NPRM,* NTCA argues that the IRFA was deficient because the other measures discussed therein were vague and lacked specificity.

Response to Comments by Chief Counsel for Advocacy of Small Business Administration

18. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration, and to provide a detailed statement of any change made to the proposed rules as a result of those comments.

19. The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

Small Entities Impacted

20. The rules adopted in document FCC 18–78 will affect obligations of Wireline and Wireless telecommunications carriers.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements

21. In document FCC 18–78, the Commission adopt rules to enhance the existing consumer protections from slamming and cramming. Specifically, the Commission adopts rules to codify a ban on: (i) Material misrepresentations

on sales calls for voice services; and (ii) unauthorized charges on telephone bills. Although the Commission has previously held that these practices are unjust and unreasonable practices under section 201(b) of the Act, its rules have not expressly prohibited them. Because these prohibitions have been long recognized pursuant to our enforcement actions, however, they should not necessitate any new burdens for those carriers are that in compliance. In addition, the Commission takes steps to improve the effectiveness of the existing carrier change process by eliminating the requirement that carriers obtain the authorization to switch each individual service when selling more than one service and by suspending any carrier for a five-year period from using the TPV process when it becomes the subject of a Commission forfeiture action.

Steps Taken To Minimize Significant Impact on Small Entities, and Significant Alternatives Considered

22. The RFA requires an agency to describe any significant, specifically small business alternatives that it has considered in developing its approach, which may include the following four alternatives (among others): ''(1) the establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.''

23. The rules adopted in document FCC 18–78 codify long-recognized consumer protections from slamming and cramming. In prior enforcement actions, the Commission has previously held that these practices are unjust and unreasonable practices under section 201(b) of the Act. As a result, the economic impact on affected carriers should be minimal because they impose no new requirements. In declining to adopt other measures discussed in the *Slamming and Cramming NPRM,* the Commission has taken into consideration the potential burdens on carriers, including smaller carriers, in determining that such actions are not justified at this time. In these instances, the Commission has taken into consideration the concerns of industry commenters that the potential costs and delays that may result from these measures outweigh the potential benefits to consumers.

Ordering Clauses

Pursuant to sections 1–4, 201(b), and 258 of the Communications Act of 1934, as amended, 47 U.S.C. 151–154, 201, 258, document FCC 18–78 *is adopted,* and part 64 of the Commission's rules, 47 CFR 64.1120 and 64.2401 *are amended.*

The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of document FCC 18–78 to Congress and the Government Accountability Office pursuant to the Congressional Review Act.

The Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of document FCC 18–78, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration.

List of Subjects in 47 CFR Part 64

Communications common carriers, Telecommunications.

Federal Communications Commission.
Marlene Dortch,
Secretary, Office of the Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 64 as follows:

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 1. The authority citation for part 64 is revised to read as follows:

Authority: 47 U.S.C. 154, 201, 202, 218, 222, 225, 226, 227, 228, 251(e), 254(k), 403(b)(2)(B), (c), 616, 620, 1401–1473, unless otherwise noted.

■ 2. Amend § 64.1120 by revising paragraphs (a)(1)(i) and (b) to read as follows:

§ 64.1120 Verification of orders for telecommunications services.

(a) * * *

(1) * * *

(i) Authorization from the subscriber, subject to the following:

(A) Material misrepresentation on the sales call is prohibited. Upon a consumer's credible allegation of a sales call misrepresentation, the burden of proof shifts to the carrier making the sales call to provide persuasive evidence to rebut the claim. Upon a finding that such a material misrepresentation has occurred on a sales call, the subscriber's authorization to switch carriers will be deemed invalid.

(B) [Reserved]

* * * * *

(b) Any telecommunications carrier that becomes the subject of a Commission forfeiture action through a violation of the third-party verification process set forth in paragraph (c)(3) of this section will be suspended for a five-year period from utilizing the third-party verification process to confirm a carrier change.

* * * * *

■ 3. Amend § 64.2401 by adding paragraph (g) to read as follows:

§ 64.2401 Truth-in-Billing Requirements.

* * * * *

(g) *Prohibition against unauthorized charges.* Carriers shall not place or cause to be placed on any telephone bill charges that have not been authorized by the subscriber.

[WC Docket No. 17–141; CC Docket No. 96–128; WC Docket No. 16–132; FCC 18–21]

Modernization of Payphone Compensation Rules; Implementation of the Pay Telephone Reclassification and Compensation Provisions of the Telecommunications Act of 1996; 2016 Biennial Review of Telecommunications Regulations

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Commission announces that the Office of Management and Budget (OMB) has approved, for a period of three years, the information collection associated with the Commission's payphone compensation rules. This document is consistent with the *Modernization of Payphone Compensation Rules Report and Order,* FCC 18–21, which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of those rules.

DATES: The amendment to 47 CFR 64.1310(a)(3) published at 83 FR 11422, March 15, 2018, is effective on July 17, 2018.

FOR FURTHER INFORMATION CONTACT: Michele Levy Berlove, Attorney Advisor, Wireline Competition Bureau, at (202) 418–1477, or by email at *Michele.Berlove@fcc.gov.* For additional information concerning the Paperwork Reduction Act information collection requirements, contact Nicole Ongele at (202) 418–2991 or *nicole.ongele@fcc.gov.*

SUPPLEMENTARY INFORMATION: This document announces that, on July 2, 2018, OMB approved, for a period of three years, the information collection requirements relating to certain payphone compensation rules contained in the Commission's *Modernization of Payphone Compensation Rules Report and Order,* FCC 18–21, published at 83 FR 11422, March 15, 2018, as specified above.

The OMB Control Number is 3060–1046. The Commission publishes this document as an announcement of the effective date of the rules. If you have any comments on the burden estimates listed below, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Nicole Ongele, Federal Communications Commission, Room 1–A620, 445 12th Street SW, Washington, DC 20554. Please include the OMB Control Number, 3060–1046, in your correspondence. The Commission will also accept your comments via email at *PRA@fcc.gov.*

To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received final OMB approval on July 2, 2018, for the information collection requirements contained in the modifications to the Commission's rules in 47 CFR part 64. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060–1046. The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1046.

OMB Approval Date: July 2, 2018.

OMB Expiration Date: July 31, 2021.

Title: Part 64, Modernization of Payphone Compensation Rules *et al.*, WC Docket No. 17–141 *et al.,* FCC 18–21.

Form Number: N/A.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 329 respondents; 2,257 responses.

Estimated Time per Response: 0.50 hours–122 hours.

Frequency of Response: On occasion, one-time, and quarterly reporting requirements; third party disclosure requirements; and recordkeeping requirement.

Obligation To Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in 47 U.S.C. 151, 154 and 276 of the Communications Act of 1934, as amended.

Total Annual Burden: 34,720 hours.

Total Annual Cost: No cost(s).

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission is not requesting that the respondents submit confidential information to the FCC. Respondents may, however, request confidential treatment for information they believe to be confidential under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: Section 276 of the Communications Act, as amended (the Act), requires that the Federal Communications Commission (Commission or FCC) establish rules ensuring that payphone service providers or PSPs are ''fairly compensated'' for each and every completed payphone-originated call. The Commission's Payphone Compensation Rules satisfy section 276 by identifying the party liable for compensation and establishing a mechanism for PSPs to be paid. A 2003 Report and Order (FCC 03–235) established detailed rules (Payphone Compensation Rules) ensuring that payphone service providers or PSPs are ''fairly compensated'' for each and every completed payphone-originated call pursuant to section 276 of the Communications Act, as amended (the Act). The Payphone Compensation Rules satisfy section 276 by identifying the party liable for compensation and establishing a mechanism for PSPs to be paid. The Payphone Compensation Rules: (1) Place liability to compensate PSPs for payphone-originated calls on the facilities-based long distance carriers or switch-based resellers (SBRs) from whose switches such calls are completed; (2) define these responsible carriers as ''Completing Carriers'' and require them to develop their own system of tracking calls to completion; (3) require Completing Carriers to file with PSPs a quarterly report and also submit an attestation by the chief financial officer (CFO) that the payment amount for that quarter is accurate and is based on 100% of all completed calls; (4) require quarterly reporting obligations for other facilities-based long distance carriers in the call path, if any, and define these carriers as ''Intermediate Carriers;'' and (5) give parties flexibility to agree to alternative compensation arrangements (ACA) so that small Completing Carriers may avoid the expense of instituting a tracking system and undergoing an audit. On February 22, 2018, the Commission adopted a Report and Order, FCC 18–21 (*2018 Payphone Order*), that: (1) Eliminated the payphone call tracking system audit and associated reporting requirements; (2) permitted a company official, including but no longer limited to, the chief financial officer (CFO), to certify that a Completing Carrier's quarterly compensation payments to PSPs are accurate and complete; and (3) eliminated expired interim and intermediate per-payphone compensation rules that no longer apply to any entity. We believe that the revisions adopted in the *2018 Payphone Order* significantly decrease the paperwork burden on carriers.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 74

[GN Docket No. 16–142; FCC 17–158]

Authorizing Permissive Use of the ''Next Generation'' Broadcast Television Standard

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Commission announces that the Office of Management and Budget (OMB) has approved, for a period of three years, the information collection requirements associated with FCC 17–158. This

document is consistent with the Commission's Report and Order, which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of those rules.

DATES: The additions of 47 CFR 73.3801, 73.6029, and 74.782 as published at 83 FR 4998, February 2, 2018, are effective as of July 17, 2018.

FOR FURTHER INFORMATION CONTACT: Evan Baranoff, Policy Division, Media Bureau, at 202–418–7142, or via email at *evan.baranoff@ffc.gov.*

SUPPLEMENTARY INFORMATION: This document announces that, on July 2, 2018, OMB approved the information collection requirements contained in §§ 73.3801, 73.6029, and 74.782 of the Commission's rules. The OMB Control Number is 3060–1254. The Commission publishes this document as an announcement of the effective date of these rules. If you have any comments on the burden estimates listed below, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Cathy Williams, Federal Communications Commission, Room 1–C823, 445 12th Street SW, Washington, DC 20554. Please include the OMB Control Number, 3060–1254, in your correspondence. The Commission will also accept your comments via email at *PRA@fcc.gov.* To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received final OMB approval on July 2, 2018, for the information collection requirements contained in §§ 73.3801, 73.6029, and 74.782 of the Commission's rules. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number.

No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1254.

OMB Approval Date: July 2, 2018.

OMB Expiration Date: July 31, 2021.

Title: Next Gen TV/ATSC 3.0 Local Simulcasting Rules; 47 CFR 73.3801 (full-power TV), 73.6029 (Class A TV), and 74.782 (low-power TV) and FCC Form 2100 (Next Gen TV License Application)

Form Number: FCC Form 2100 (Next Gen TV License Application)

Respondents: Business or other for-profit entities, state, local, or tribal government and not for profit institutions.

Number of Respondents and Responses: 1,130 respondents; 4,760 responses.

Estimated Time per Response: 0.017–8 hours.

Frequency of Response: On occasion reporting requirement; Recordkeeping requirement; Third party disclosure.

Obligation To Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in Sections 1, 4, 7, 301, 303, 307, 308, 309, 316, 319, 325(b), 336, 338, 399b, 403, 614, and 615 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154, 157, 301, 303, 307, 308, 309, 316, 319, 325(b), 336, 338, 399b, 403, 534, and 535.

Total Annual Burden: 3,504 hours.

Total Annual Cost: $130,500.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection.

Needs and Uses: On November 20, 2017, the Commission released a Report and Order (Order), FCC 17–158, in GN Docket No. 16–142, authorizing television broadcasters to use the ''Next Generation'' broadcast television (Next Gen TV) transmission standard, also called ''ATSC 3.0'' or ''3.0,'' on a voluntary, market-driven basis. This authorization is subject to broadcasters continuing to deliver current-generation digital television (DTV) service, using the ATSC 1.0 transmission standard, also called ''ATSC 1.0'' or ''1.0,'' to their viewers. The requirement to continue to provide ATSC 1.0 service is called ''local simulcasting.'' The local simulcasting rules (47 CFR 73.3801 (full-power TV), 73.6029 (Class A TV), and 74.782 (low-power TV),) contain the following information collection requirements which require OMB approval.

License Application to FCC/FCC Form 2100 (Reporting Requirement; 47 CFR 73.3801(f), 73.6029(f), and 74.782(g)): A broadcaster must file an application (FCC Form 2100) with the Commission, and receive Commission approval, before: (i) Moving its ATSC 1.0 signal to the facilities of a host station, moving that signal from the facilities of an existing host station to the facilities of a different host station, or discontinuing an ATSC 1.0 guest signal; (ii) commencing the airing of an ATSC 3.0 signal on the facilities of a host station (that has already converted to ATSC 3.0 operation), moving its ATSC 3.0 signal to the facilities of a different host station, or discontinuing an ATSC 3.0 guest signal; or (iii) converting its existing station to transmit an ATSC 3.0 signal or converting the station from ATSC 3.0 back to ATSC 1.0 transmissions. As directed by the Commission, the Media Bureau will be amending FCC Form 2100 and the relevant schedules (Schedules B, D & F) (See Schedule B—Full Power License to cover application (OMB control number 3060–0837); Schedule D—LPTV/Translator License to cover application (OMB control number 3060–0017); and Schedule F—Class A License to cover application (OMB control number 3060–0928)) as necessary to implement the Next Gen TV licensing process and collect the required information (detailed below). The form will be revised to establish the streamlined ''one-step'' licensing process for Next Gen TV applicants, including adding the above listed purposes (i-iii) to the form. FCC staff will use the license application to determine compliance with FCC rules and to determine whether the public interest would be served by grant of the application for a Next Gen TV station license.

Next Gen TV Broadcaster On-Air Notices to Consumers (Third-Party Disclosure Requirement; 47 CFR 73.3801(g), 73.6029(g), and 74.782(h)): Commercial and noncommercial educational (NCE) broadcast TV stations that relocate their ATSC 1.0 signals (*e.g.,* moving to a host station's facility, subsequently moving to a different host, or returning to its original facility) are required to air daily Public Service Announcements (PSAs) or crawls every day for 30 days prior to the date that the stations will terminate ATSC 1.0 operations on their existing facilities. Stations that transition directly to ATSC 3.0 will be required to air daily PSAs or crawls every day for 30 days prior to the date that the stations will terminate ATSC 1.0 operations. Broadcaster on-air notices to consumers will be used to inform consumers if stations they watch will be changing channels and encouraged to rescan their receivers for new channel assignments.

Next Gen TV Broadcaster Written Notices to MVPDs (Third-Party Disclosure Requirement; 47 CFR 73.3801(h), 73.6029(h), and 74.782(i)): Next Gen TV stations relocating their ATSC 1.0 signals (*e.g.,* moving to a temporary host station's facilities, subsequently moving to a different host, or returning to its original facility) must provide notice to MVPDs that: (i) No longer will be required to carry the station's ATSC 1.0 signal due to the relocation; or (ii) carry and will continue to be obligated to carry the station's ATSC 1.0 signal from the new location. Broadcaster notices to multichannel video programming distributors (MVPDs) will be used to notify MVPDs that carry a Next Gen TV broadcast station about channel changes and facility information.

Local Simulcasting Agreements (Recordkeeping Requirement; 47 CFR 73.3801(e), 73.6029(e), and 74.782(f)): Broadcasters must maintain a written copy of any local simulcasting agreement and provide it to the Commission upon request. FCC staff will review the local simulcasting agreement (when applicable) to determine compliance with FCC rules and to determine whether the public interest would be served by grant of the application for a Next Gen TV station license.

Federal Communications Commission.

BILLING CODE 6712–01–P

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

48 CFR Part 9903

Cost Accounting Standards: Revision of the Exemption From Cost Accounting Standards for Contracts and Subcontracts for the Acquisition of Commercial Items

AGENCY: Cost Accounting Standards Board, Office of Federal Procurement Policy, Office of Management and Budget.

ACTION: Final rule.

SUMMARY: The Office of Federal Procurement Policy (OFPP), Cost Accounting Standards (CAS) Board, is publishing a final rule revising the exemption for contracts or subcontracts for the acquisition of commercial items. This final rule clarifies the types of contracts that are exempt from the application of Cost Accounting Standards when acquiring commercial items.

DATES: *Effective* August 16, 2018.

FOR FURTHER INFORMATION CONTACT: Raymond Wong, Staff Director, Cost Accounting Standards Board (telephone: 202–395–6805; email: *rwong@omb.eop.gov*).

SUPPLEMENTARY INFORMATION: This final rule revises the exemption 48 CFR 9903.201–1(b)(6) for contracts or subcontracts for the acquisition of commercial items (hereafter referred to as the ''(b)(6) commercial item exemption'').

A. Regulatory Process—Changes to 48 CFR Part 9903

The CAS Board's regulations and Standards are codified at 48 CFR chapter 99. This final rule amends a CAS Board regulation other than a Standard and, as such, is not subject to the statutorily prescribed rulemaking process for the promulgation of a Standard at 41 U.S.C. 1502(c) [formerly, 41 U.S.C. 422(g)].

B. Background and Summary

In November 2012, the CAS Board issued a proposed rule to clarify the exemption from CAS when acquiring commercial items. 77 FR 69422. The exemption enumerates the contract types that are authorized when procuring commercial items. Over the years, the CAS Board has issued several rules addressing the exemption to reflect statutory changes regarding the types of contracts that may be used in commercial item acquisitions. See 61 FR 39360 (providing an exemption for firm-fixed-price contracts and subcontracts for the acquisition of commercial items as authorized by section 4305 of the Clinger-Cohen Act of 1996 (FARA), Pub. L. 104–106); 62 FR 31294 (adding fixed-price contracts with economic price adjustments other than those based on actual incurred costs for labor and materials); and 72 FR 36367 (expanding the list of exempt contract types to include time-and-material and labor-hour contracts, in response to changes made by section 1432 of the Services Acquisition Reform Act of 2003, Pub. L. 108–136, which authorized these types of contracts for the acquisition of commercial items).

Since enactment of the Federal Acquisition Streamlining Act in 1994 (Pub. L. 103–355), the Federal Acquisition Regulation (FAR) has included an enumerated list of contract types authorized for use in acquiring commercial items. See 48 CFR part 12.207. Similar to the CAS Board, the Federal Acquisition Regulatory Council has amended FAR 12.207 several times to reflect statutory changes and clarify the intent of the regulation. An inconsistency has developed between the list of contract types recognized for use in acquiring commercial items set forth in paragraph (b)(6) and that commercial item exemption and contract types reflected in FAR 12.207. For example, FAR 12.207 allows the use of firmed fixed price contracts in conjunction with award fee incentives or performance or delivery incentives, known as fixed-price incentive (FPI) contracts, when the award fee or incentive is based solely on factors other than cost. However, the (b)(6) exemption does not expressly recognize FPI contracts on the enumerated list of exempt contracts. Because of this discrepancy, some commenters on a prior CAS Board rulemaking expressed concern that these types of FPI contracts might be excluded under a literal reading of the (b)(6) exemption. See 72 FR 36367.

In its proposed rule, the CAS Board sought to address the inconsistencies between the lists in the (b)(6) exemption and FAR 12.207 by removing reference to specific contract types in the (b)(6) exemption and instead making simple reference to ''contracts and subcontracts for the acquisition of commercial items.'' The CAS Board explained that this generalized language would ''obviate the continuing need to update and keep current a detailed listing of permissible contract types for the acquisition of commercial items, which continues to evolve with the passage of time.'' 77 FR 69424. The CAS Board further explained that this language tracks the exemption set forth in its authorizing statute at 41 U.S.C. 1502(b)(1)(C)(i) as well as the language in section 4205 of the Clinger-Cohen Act.

The CAS Board received several comments in response to the proposed rule. A discussion of the comments and the Board's responses are set forth in section C. Of particular note, some commenters raised concern that more general language may perpetuate ambiguities regarding what contract types are covered by the exemption. After review of the public comments and further deliberation, the CAS Board has concluded that the desired goal of clarification can be more effectively achieved by adding language to the exemption that cross references to FAR 12.207 and its enumeration of contract types authorized for the acquisition of commercial items. The CAS Board believes this approach has multiple benefits. This linkage will eliminate disparities between the FAR and CAS Board rules regarding the description of contract types authorized for commercial item acquisitions. In addition, by maintaining reference to an enumerated list of authorized contract types for commercial item acquisitions, this formulation will avoid the ambiguity that could have been created if the more generalized language in proposed rule were adopted. The CAS Board also hopes that this change will avoid the need for additional CAS Board rulemakings in the event of future statutory actions addressing allowable contract types for commercial item procurements.

Accordingly, this final rule amends the language at 9903.201–1(b)(6) to exempt contracts and subcontracts authorized in 48 CFR 12.207 for the acquisition of commercial items. The CAS Board intends to monitor the effectiveness of this rule in achieving the intent of the law regarding CAS exemptions.

C. Public Comments

The CAS Board published a Notice of Proposed Rulemaking (NPR) on November 19, 2012, proposing to revise the (b)(6) commercial item exemption to read: ''[c]ontracts and subcontracts for the acquisition of commercial items,'' (77 FR 69422). In response to the NPR, the CAS Board received comments from four entities, one of which supported the proposed rule without change and three of which raised concerns. A summary of concerns and the CAS Board's response are below.

1. *Lack of clarity.* Three commenters raised concern that deletion of the more detailed explanation of what contract types are exempt from CAS will increase confusion. One commenter stated that the change ''may be confusing to the inexperienced, including both contractors and Government representatives'' who may not immediately understand how to interpret the phrase ''contracts and subcontracts for the acquisition of commercial items'' without further explanation. This commenter suggested that the exemption include a specific cross reference to statute or regulation so that the reader could more easily determine the exempt contract types. Other commenters warned that a blanket exemption could lead to overpayment. One of these commenters admonished the Board on the need to preserve a more tailored exemption that continues to clarify that the exemption does not apply to specific contract types that involve reimbursement or pricing based on actual costs.

Response: The Board agrees that readers need to be made aware of the specific contracts that are covered by the exemption. This specificity will help ensure easy, clear, and consistent application. As explained above, the Board believes that reference to FAR 12.207, which identifies contract types that may be used to acquire commercial items should accomplish this objective. In this regard, the CAS Board notes that amendments to the CAS Board's authorizing statute made by section 820 of the National Defense Authorization Act for FY 2017 make clear that the Board bears a responsibility to ''minimize the burden on contractors while protecting the interests of the Federal Government.'' The Board believes this goal is shared by the FAR Council, especially in light of direction provided in Executive Order (E.O.) 13771, Reducing Regulation and Controlling Regulatory Costs, which directs agencies to ''manage costs associated with the governmental imposition of private expenditures required to comply with Federal regulations.''

The Board intends to monitor the effectiveness of this final rule in achieving the intent of the law regarding CAS exemptions and retains the right to change the approach in the future should any changes to FAR 12.207 that the Board believes are inconsistent with this objective occur.

2. *Disclosure statements.* Two commenters recommended the CAS Board develop Cost Accounting Standards and Disclosure Statement requirements for commercial item acquisitions, as Congress had required in the Clinger-Cohen Act. One of those commenters stated that such steps were needed before the permissible contract types are expanded to include certain cost type contracts.

Response: Creating CAS and Disclosure Statements for commercial item acquisitions would be outside the scope of this rulemaking effort. The CAS Board is aware of the direction contained in the Conference Report to the Federal Acquisition Streamlining Act to ''establish guidance, consistent with commercial accounting systems and practices, to ensure that contractors appropriately assign costs to contracts (other than firm, fixed-price contracts) that are covered by the exemption for contracts or subcontracts where the price negotiated is based on established catalog or market prices of commercial items sold in substantial quantities to the general public.'' That assessment was made by the CAS Board when promulgating the 1997 final rule. However, since the law currently prohibits the use of cost type contracts for the acquisition of commercial items, the Board believes there is little to be gained from developing and imposing Cost Accounting Standards and Disclosure Statement requirements at this time. However, the CAS Board continues to reserve the right to issue such cost accounting standards and disclosure statement requirements should the need arise in the future.

3. *Hybrid and indefinite-delivery-indefinite-quantity (IDIQ) contracts.* One commenter raised the question of how to determine whether CAS is triggered on a ''hybrid'' contract that contains contract line item numbers (CLINs) for both commercial items and non-commercial items where the total value of the contract exceeds the CAS applicability threshold. The commenter suggested that CAS be clarified to ensure CLINs for commercial items on a hybrid contract are not covered by CAS, irrespective of the value of the contract. The commenter further recommended clarification of the CAS triggers for IDIQ contracts, which are often used to acquire commercial items—in particular whether to value the contract based on the size of orders or the size of the umbrella contract.

Response: While issues related to the applicability of CAS to hybrid and IDIQ contracts are outside the scope of this rulemaking effort, the CAS Board takes note of these issues. The Board intends to review these issues more carefully to determine whether clarification of its rules is needed to ensure appropriate application of CAS coverage.

D. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. Chapter 35, Subchapter I) does not apply to this rulemaking, because this rule will impose no paperwork burden on offerors, affected contractors and subcontractors, or members of the public which requires the approval of OMB under 44 U.S.C. 3501, *et seq.* The purpose of this rule is to clarify the application of CAS to contracts for commercial items. In addition, this rule is consistent with the intent of the objectives of the ''Streamlined Applicability of Cost Accounting Standards'' set forth in Section 802 of the National Defense Authorization Act for Fiscal Year 2000 (Pub. L. 106–65).

E. Executive Orders 12866 and 13771, the Congressional Review Act, and the Regulatory Flexibility Act

This rule provides technical clarification on the application of exemptions from CAS for commercial item acquisitions consistent with authorities in the Clinger-Cohen Act. By cross referencing FAR 12.207 and its enumeration of contract types authorized for the acquisition of commercial items, the CAS Board expects to eliminate disparities between the FAR and CAS Board rules that has created confusion for contractors and subcontractors. The economic impact on contractors and subcontractors is, therefore, expected to be minor. As a result, the Board has determined that this rule will not result in the promulgation of an ''economically significant rule'' under the provisions of Executive Order 12866, and that a regulatory impact analysis will not be required, and the requirements of E.O. 13771, *Reducing Regulation and Controlling Regulatory Costs,* do not apply. For the same reason, this final rule is not a ''major rule'' under the Congressional Review Act, 5 U.S.C. Chapter 8. Finally, this rule does not have a significant effect on a substantial number of small entities because small businesses are exempt from the application of the Cost Accounting Standards. Therefore, this rule does not require a regulatory flexibility analysis under the Regulatory Flexibility Act of 1980, 5 U.S.C. Chapter 6.

List of Subjects in 48 CFR Part 9903

Cost Accounting Standards, Government procurement.

Lesley A. Field,

Acting Chair, Cost Accounting Standards Board.

For the reasons set forth in this preamble, 48 CFR part 9903 is amended as follows:

PART 9903—CONTRACT COVERAGE

■ 1. The authority citation for part 9903 continues to read as follows:

Authority: Pub. L. 111–350, 124 Stat. 3677, 41 U.S.C. 1502.

■ 2. Section 9903.201–1 is amended by revising paragraph (b)(6) to read as follows:

9903.201–1 CAS applicability.

* * * * *

(b) * * *

(6) Contracts and subcontracts authorized in 48 CFR 12.207 for the acquisition of commercial items.

* * * * *

BILLING CODE 3110–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 180205129–8129–01]

RIN 0648–BH50

Atlantic Highly Migratory Species

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; technical amendments.

SUMMARY: This final rule makes editorial corrections amending the regulations for Atlantic highly migratory species (HMS). This final action will make the rules easier to use by making the cross-references in the regulations accurate, correcting grammatical and punctuation issues, and reformatting the regulations where needed to be consistent with **Federal Register** guidelines. The action also in several instances simplifies regulatory text by removing unnecessary language. The rule is administrative in nature and does not make any change with substantive effect to the regulations for HMS fisheries.

DATES: This final rule is effective on July 17, 2018.

ADDRESSES: Documents related to HMS fisheries management, such as the 2006 Consolidated HMS Fishery Management Plan (FMP) and its amendments, are available from the HMS Management Division website at *https://www.fisheries.noaa.gov/topic/atlantic-highly-migratory-species* or upon request from the HMS Management Division at 1315 East-West Highway, Silver Spring, MD 20910.

FOR FURTHER INFORMATION CONTACT: Lauren Latchford, Larry Redd, or Karyl Brewster-Geisz by phone at 301–427–8503.

SUPPLEMENTARY INFORMATION: Atlantic HMS are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act, 16 U.S.C. 1801 *et seq.,* (Magnuson-Stevens Act) and the Atlantic Tunas Convention Act, 16 U.S.C. 971 *et seq.,* (ATCA). On October 2, 2006, NMFS published in the **Federal Register** (71 FR 58058) regulations implementing the 2006 Consolidated HMS FMP, which details the management measures for Atlantic HMS fisheries; these management measures have been amended or otherwise modified numerous times. The implementing regulations for Atlantic HMS are at 50 CFR part 635.

Background

The regulations at 50 CFR part 635 are promulgated under ATCA and the Magnuson-Stevens Act for the conservation and management of Atlantic highly migratory species, including species of tunas, billfish, sharks, and swordfish. In 2006, NMFS consolidated Atlantic HMS management into one fishery management plan, the 2006 Consolidated HMS FMP. Since then, NMFS has amended the FMP ten times through the fishery management plan amendment process and has made numerous other regulatory changes through framework actions. With this volume of regulatory action, some small grammatical and other errors have accumulated over time. As described in the sections below, this technical amendment corrects grammatical, punctuation, consistency, cross-reference errors in the HMS regulations at 50 CFR part 635. As explained in the Consistency section below, it also simplifies regulatory text by removing unnecessary language in several limited instances.

Typographical Corrections

The following grammatical, punctuation, or clerical errors (*i.e.,* typographical errors) in the HMS regulations are corrected by this final rule:

The definition of ''CK'' at § 635.2 does not spell out the words for which it is an acronym. This final action therefore adds ''Cleithrum to Caudal Keel'' before the acronym ''CK.'' The definition of ''Hammerhead Sharks'' at § 635.2 capitalizes the word ''shark(s).'' This final action changes to lowercase the word ''shark(s).'' The regulation at § 635.4(l)(2)(viii) does not capitalize the word ''tunas'' in the permit title, ''Atlantic Tunas Longline category LAP.'' This final action capitalizes the word ''Tunas.'' The regulation at § 635.5(b)(1)(i) has commas incorrectly after the words ''all'' and ''swordfish'' in the sentence, ''All reports must be species-specific and must include the required information about all, swordfish, and sharks received by the dealer.'' This final action removes the misplaced commas. The regulation at § 635.5(c)(2) is missing apostrophes and has extra parentheses in three places where the text should read, ''owner's designee.'' This final action adds apostrophes and removes the mistaken parentheses to correct this text. The regulations at § 635.6(b)(1)(ii) and (c)(1) do not capitalize the word ''Arabic.'' This final action corrects this error and capitalizes ‘‘Arabic.’’ The regulation at § 635.9(e)(4) has two commas rather than one after the words ‘‘trip’’ and ‘‘*e.g.*’’ This final action removes the extra commas. The regulation at § 635.14(b)(1) uses two different styles of quotation marks around the words ‘‘bluefin tuna ratio.’’ This final action changes the quotation marks so that they are the same and removes the colon within this regulation. The regulation at § 635.14(b)(1) incorrectly capitalizes the word ‘‘Swordfish.’’ This final action changes ‘‘Swordfish’’ to ‘‘swordfish.’’ The regulation at § 635.15(c)(3)(iv) is missing the word ‘‘year’’ and has an extra period at the end of the first sentence. This final action adds the word ‘‘year’’ and removes the extra period. Additionally, this regulation incorrectly capitalizes the words ‘‘Eastern Time.’’ This final action changes ‘‘Eastern Time’’ to ‘‘eastern time.’’ The regulation at § 635.21(g)(1) uses ‘‘NOAA Fisheries,’’ and the final action changes it to ‘‘NMFS’’ for consistency across the regulations. The regulation at § 635.27(d)(1) incorrectly uses the word ‘‘this’’ in the second sentence. This final action changes ‘‘this’’ to ‘‘the.’’ Additionally, this final action removes outdated language regarding an effective date of January 1, 2007 from § 635.27(d)(1). Additionally, for § 635.28(d), this final action capitalizes the lower case ‘‘n’’ for the species Northern albacore tuna.

The regulations at §§ 635.2, 635.4(e)(3) and (g)(2), 635.21(d)(2)(ii), 635.27(b)(1), 635.28(b)(1)(iv), and 635.34(c) do not consistently capitalize the word ‘‘Table’’ and lowercase the word ‘‘appendix’’ in the phrase, ‘‘Table 1 of appendix A to this part.’’ This final action corrects the references to ‘‘Table 1 of appendix A to this part’’ in §§ 635.2, 635.4(e)(3) and (g)(2), 635.21(d)(2)(ii), 635.27(b)(1), 635.28(b)(1)(iv), and 635.34(c) so that capitalization and phrasing are consistent throughout.

Limited Access Permit Corrections

The HMS regulations at § 635.2 currently provide a definition for ‘‘LAP,’’ defining it as an acronym for the ‘‘limited access permit.’’ The HMS regulations do not consistently use the acronym, however, and still refer to ‘‘limited access permits’’ or ‘‘limited access vessel permits’’ sometimes in the regulations. Consistency across the regulations would make them clearer. The regulations at §§ 635.4(a)(3), (d)(4), (e)(2) through (4), (f)(1), (2), (4), and (5), (h)(2), (l)(2)(ii)(A) through (C), (l)(2)(iii) through (ix), and (m)(2), 635.8(a)(1) and (3), (c)(2) and (3), 635.15(k) introductory text and (k)(4)(iii), 635.19(e)(4), 635.21(b)(1), (c)(3) and (4), (c)(5)(iii)(A) and (B), (g)(2) and (3), 635.27(c)(1)(i)(A) and (B), 635.28(a)(3), and 635.71(a)(53) and (e)(10) and (11) do not use the acronym ‘‘LAP’’ for ‘‘limited access permit.’’ This final action changes ‘‘limited access permit’’ to ‘‘LAP’’ so that the acronym defined at § 635.2 is used consistently across the HMS regulations. The regulations at §§ 635.15(k) and (l)(4)(iii) and 635.21(c)(5)(iii)(B) incorrectly use the word ‘‘permit’’ or ‘‘permitted’’ instead of the acronym ‘‘LAP’’ when referring to the Atlantic Tunas Longline category limited access permit. For consistency within the regulations referring to the Atlantic Tunas Longline category limited access permit, this final action changes the word ‘‘permit’’ or ‘‘permitted’’ to ‘‘LAP.’’ The regulations at §§ 635.4(l)(2)(iii) and 635.21(b)(1) incorrectly name a permit as ‘‘tuna longline LAPs.’’ This final action corrects the permit name to ‘‘Atlantic Tunas Longline category LAP.’’ The regulations at §§ 635.21(c)(5)(iii)(A) and 635.71(a)(40) and (b)(36) through (38), incorrectly list a permit name as ‘‘tunas Longline category permit.’’ This final action corrects the permit name to ‘‘Atlantic Tunas Longline category LAP.’’ The regulations at § 635.15(k) improperly exclude the word ‘‘category’’ from the permit name, ‘‘Atlantic Tunas Longline category LAP.’’ This final action corrects the error by adding the word ‘‘category.’’ The regulations at § 635.23(a)(2) incorrectly list the permit as ‘‘General category Atlantic Tunas permit.’’ This final action corrects the permit name to ‘‘Atlantic Tunas General category permit.’’ Additionally this final action removes language referring specifically to ‘‘one large medium or giant BFT per day’’ allowed to be caught or landed on days other than RFDs. Because NMFS may increase or decrease the daily retention limit of large medium and giant BFT over a range of zero to a maximum of five under cross reference § 635.23(a)(4), it is more clear to refer to the ‘‘daily retention limit in effect for that day.’’ The regulation at § 635.71(b)(20) incorrectly lists the relevant permit as ‘‘Purse Seine category Atlantic tuna permit.’’ This final action corrects the permit name to ‘‘Atlantic Tunas Purse Seine category LAP.’’

Cross References Corrections

This final action corrects the incorrect cross references found in the definitions and regulations at §§ 635.2 (definitions of ‘‘Display Permit’’ and ‘‘EFP’’), 635.4(a)(8) and (h)(1)(iii), 635.5(a)(5)(ii), 635.21(c)(5)(ii)(C)(*1*) and (c)(5)(iv), 635.28(b)(7), (c)(3), and (d), 635.31(d)(2), and 635.40(b)(1). Section 635.21(c)(5)(iv) references paragraphs (A), (B), (C), (G), (H), and (K) as specifying ‘‘[o]ther devices proposed for use as line clippers or cutters or de-hookers.’’ This final action adds references to paragraphs (I) and (J) to that list. Additionally, §§ 635.22(c)(1) and (5) and (d) and 635.23(a)(2) and (4), have cross references that are broadly referenced and need to be more specific to the correct provision under part 635. This action corrects those cross references by adding the specific cross reference location (*e.g.,* within § 635.22(c)(1), changing the reference from § 635.4 to § 635.4(e)).

Consistency Corrections

Regulations at §§ 635.2 (definition of ‘‘Exporter’’) and 635.4(a)(6) use a **Federal Register** citation format that is inconsistent with the citation format otherwise used in part 635. This final action revises the citation format for consistency purposes.

At § 635.4(c)(2), this final action changes the word ‘‘issued’’ to ‘‘with’’ to be more internally consistent.

At § 635.4(l)(2)(viii), this final action removes the word ‘‘an’’ to be more internally consistent.

The current regulations do not consistently refer to swordfish and shark LAPs, sometimes referring to them as ‘‘catch LAPs’’ and other times spelling out ‘‘limited access permit.’’ This inconsistency in terminology can lead to confusion. As such, this final action changes these swordfish and shark LAP references to be more internally consistent to clarify the regulations. Specifically, the regulations at § 635.4(l)(2)(viii) and (ix) use the phrase, ‘‘a directed or incidental LAP for swordfish, a directed or an incidental catch LAP for shark.’’ This final action will correct the phrase to, ‘‘a directed or incidental swordfish LAP, a directed or incidental shark LAP.’’ The regulations at § 635.4(l)(2)(viii) uses the phrase ‘‘a LAP for swordfish.’’ This final action corrects the phrase to ‘‘a swordfish LAP.’’ The regulations at § 635.4(l)(2)(viii) and (ix) uses the phrase ‘‘a directed or incidental catch shark LAP,’’ respectively. This final action corrects the phrase to ‘‘a directed or incidental shark LAP,’’ respectively. The regulations at § 635.4(l)(2)(ix) use the phrase ‘‘directed or incidental catch swordfish or shark LAP.’’ This final action will correct the phrase to ‘‘directed or incidental swordfish or shark LAP.’’ The regulation at § 635.22(f) uses the phrase ‘‘incidental or handgear limited access swordfish permit.’’ This final action will correct the phrase to ‘‘incidental or handgear swordfish LAP.’’

The definition of ''Fishing Year'' at § 635.2 includes incorrect language left over from past definitions. The fishing year for all tunas, sharks, billfish, and swordfish is January 1 through December 31, as reflected in the 2006 Consolidated HMS FMP. This final action removes this outdated text and simplifies the definition for tunas, sharks, billfish and swordfish to match the dates established in previous actions, reading ''January 1 through December 31.''

The first sentence at § 635.20(b) starts with the phrase, ''The size class of a BFT found with the head removed shall be determined using . . .'' This phrase, referring to a BFT that is ''found,'' is confusing and inconsistent with a similar regulation at § 635.20(f) (''For a swordfish that has its head naturally attached . . .''). This final action re-words the phrase found in § 635.20(b) to be less confusing and more consistent with the wording at § 635.20(f). With this change, § 635.20(b) will read, ''If the head of a BFT is no longer attached, the size class of the BFT shall be determined using . . .''

The regulation at § 635.40(b)(3) references 19 CFR 10.79, the ''Declaration of Master and Two Members of Crew on Entry of Products of American Fisheries.'' Section 10.79 no longer exists within title 19, and has instead been reserved. This final action removes language referencing this obsolete regulation and reserves this location. This change would not have any effect on the part 635 regulations since 19 CFR 10.79 has been amended and reserved.

Finally, the regulation at § 635.21(d)(1)(iii)(D) refers to out-of-date coordinates for the Charleston Deep Artificial Reef. This final action updates the old boundary coordinates for the Charleston Deep Artificial Reef to match the boundary changes that were recently made to the Charleston Deep Artificial Reef MPA via Snapper Grouper Amendment 36 (82 FR 29772, June 30, 2017).

Classification

The Assistant Administrator for Fisheries has determined that this final rule is necessary for the conservation and management of U.S. fisheries and that it is consistent with the Magnuson-Stevens Act, the 2006 Consolidated Atlantic HMS FMP and its amendments, ATCA, and other applicable law.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment are unnecessary and contrary to the public interest. This final rule makes only corrective, non-substantive changes to regulatory text, adds missing cross-references and/or corrects cross-references to HMS regulations, and in several instances, removes unnecessary language, and is solely administrative in nature. Therefore, public comment would serve no purpose and is unnecessary. Furthermore, it is in the public interest to revise the regulations as quickly as possible to reduce any potential confusion to the public of the regulatory requirements at 50 CFR part 635. Any delay in implementation would result in the continuation of this potential confusion. Thus, there is also good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delay in effective date.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, and a proposed rule is not being published, the analytical requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* are inapplicable.

NMFS has determined that fishing activities conducted pursuant to this rule will not affect endangered and/or threatened species or critical habitat listed under the Endangered Species Act, or marine mammals protected by the Marine Mammal Protection Act, because the action is purely administrative in nature by making editorial corrections or clarifications to existing regulatory text, with no substantive changes or effects.

List of Subjects in 50 CFR Part 635

Fisheries, Fishing, Fishing vessels, Foreign relations, Imports, Penalties, Reporting and recordkeeping requirements, Treaties.

Dated: July 9, 2018.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 635 is amended as follows:

PART 635—ATLANTIC HIGHLY MIGRATORY SPECIES

■ 1. The authority citation for part 635 continues to read as follows:

Authority: 16 U.S.C. 971 *et seq.;* 16 U.S.C. 1801 *et seq.*

■ 2. In § 635.2, revise the definition of ''Atlantic Aggregated LCS,'' remove the definition of ''CK,'' add the definition of ''Cleithrum to Caudal Keel or CK,'' and revise the definitions of ''Display permit,'' ''EFP,'' ''Exporter,'' ''Fishing year,'' ''Gulf of Mexico Aggregated LCS,'' ''Hammerhead Shark(s),'' ''Highly migratory species (HMS),'' ''Large coastal shark (LCS),'' ''Non-blacknose SCS,'' ''Pelagic shark,'' ''Prohibited shark,'' ''Research LCS,'' ''Small coastal shark (SCS),'' and ''Smoothhound shark(s)'' to read as follows:

§ 635.2 Definitions.

* * * * *

Atlantic Aggregated LCS means one of the following species, or parts thereof, as listed in Table 1 of appendix A to this part: Atlantic blacktip, bull, lemon, nurse, silky, spinner, and tiger.

* * * * *

Cleithrum to Caudal Keel or *CK* measurement means the length of a fish measured along the body contour, *i.e.,* a curved measurement, from the point on the cleithrum that provides the shortest possible measurement along the body contour to the anterior portion of the caudal keel. The cleithrum is the semicircular bony structure at the posterior edge of the gill opening.

* * * * *

Display permit means a permit issued in order to catch and land HMS for the purpose of public display pursuant to § 635.32(d).

* * * * *

EFP means an exempted fishing permit issued pursuant to § 600.745 of this chapter or to § 635.32(c).

* * * * *

Exporter, for purposes of this subpart, is the principal party in interest, meaning the party that receives the primary benefit, monetary or otherwise, of the export transaction. For exports from the United States, the exporter is the U.S. principal party in interest, as identified in 15 CFR part 30. An exporter is subject to the requirements of this subpart, even if exports are exempt from statistical reporting requirements under 15 CFR part 30.

* * * * *

Fishing year means January 1 through December 31.

* * * * *

Gulf of Mexico Aggregated LCS means one of the following species, or parts thereof, as listed in Table 1 of appendix A to this part: Bull, lemon, nurse, silky, spinner, and tiger.

Hammerhead shark(s) means great, scalloped, and smooth hammerhead shark species, or parts thereof, as listed in Table 1 of appendix A to this part.

* * * * *

Highly migratory species (HMS) means bluefin, bigeye, yellowfin, albacore, and skipjack tunas; swordfish; sharks (listed in Table 1 of appendix A to this part); white marlin; blue marlin; sailfish; longbill spearfish; and roundscale spearfish.

* * * * *

Large coastal shark (LCS) means one of the species, or a part thereof, listed in heading A, Large Coastal Sharks, of Table 1 of appendix A to this part.

* * * * *

Non-blacknose SCS means one of the species, or part thereof, listed in heading B, Small Coastal Sharks, of Table 1 of appendix A to this part other than the blacknose shark.

* * * * *

Pelagic shark means one of the species, or a part thereof, listed in heading C, Pelagic Sharks, of Table 1 of appendix A to this part.

* * * * *

Prohibited shark means one of the species, or a part thereof, listed in heading D, Prohibited Sharks, of Table 1 of appendix A to this part.

* * * * *

Research LCS means one of the species, or part thereof, listed in heading A, Large Coastal Sharks, of Table 1 of appendix A to this part, other than sandbar sharks.

* * * * *

Small coastal shark (SCS) means one of the species, or a part thereof, listed in heading B, Small Coastal Sharks, of Table 1 of appendix A to this part.

* * * * *

Smoothhound shark(s) means one of the species, or part thereof, listed in heading E, Smoothhound Sharks, of Table 1 of appendix A to this part.

* * * * *

■ 3. In § 635.4, revise paragraphs (a)(3), (6), and (8), (c)(2), (d)(4), (e)(2) through (4), (f)(1), (2), (4), and (5), (g)(2), (h)(1)(iii), (h)(2), (l)(2)(ii)(A) through (C), (l)(2)(iii) through (ix), and (m)(2) to read as follows:

§ 635.4 Permits and fees.

* * * * *

(a)

* * * * *

(3) *Property rights.* LAPs or any other permit issued pursuant to this part do not represent either an absolute right to the resource or any interest that is subject to the takings provision of the Fifth Amendment of the U.S. Constitution. Rather, LAPs represent only a harvesting privilege that may be revoked, suspended, or amended subject to the requirements of the Magnuson-Stevens Act or other applicable law.

* * * * *

(6) *Sanctions and denials.* A permit issued under this section may be revoked, suspended, or modified, and a permit application may be denied, in accordance with the procedures governing enforcement-related permit sanctions and denials found at 15 CFR part 904, subpart D.

* * * * *

(8) *Replacement.* NMFS may issue a replacement permit upon the request of the permittee. An application for a replacement permit will not be considered a new application. An appropriate fee, consistent with paragraph (a)(9) of this section, may be charged for issuance of the replacement permit.

* * * * *

(c) * * *

(2) A vessel with a valid Atlantic Tunas General category permit issued under paragraph (d) of this section or with a valid Swordfish General Commercial permit issued under paragraph (f) of this section may fish in a recreational HMS fishing tournament if the vessel has registered for, paid an entry fee to, and is fishing under the rules of a tournament that has registered with NMFS' HMS Management Division as required under § 635.5(d). When a vessel with a valid Atlantic Tunas General category permit or a valid Swordfish General Commercial permit is fishing in such a tournament, such vessel must comply with HMS Angling category regulations, except as provided in paragraphs (c)(3) through (5) of this section.

* * * * *

(d) * * *

(4) A person can obtain an Atlantic Tunas Longline category LAP for a vessel only if the vessel has been issued both a LAP for shark and a LAP, other than handgear, for swordfish. Atlantic Tunas Longline category LAPs may only be obtained through transfer from current owners consistent with the provisions under paragraph (l)(2) of this section.

* * * * *

(e) * * *

(2) The owner of vessels that fish for, take, retain, or possess the Atlantic oceanic sharks listed in headings A, B, or C of Table 1 of appendix A to this part with an intention to sell must obtain a Federal Atlantic commercial shark directed or incidental LAP or an HMS Commercial Caribbean Small Boat permit. The only valid Federal commercial shark directed and shark incidental LAPs are those that have been issued under the limited access program consistent with the provisions under paragraphs (l) and (m) of this section.

(3) A vessel owner issued or required to be issued a Federal Atlantic commercial shark directed or shark incidental LAP may harvest, consistent with the other regulations in this part, any shark species listed in headings A, B, or C of Table 1 of appendix A to this part.

(4) Owners of vessels that fish for, take, retain, or possess the Atlantic oceanic sharks listed in heading E, Smoothhound Sharks, of Table 1 of appendix A to this part with an intention to sell them must obtain a Federal commercial smoothhound permit. In addition to other permits issued pursuant to this section or other authorities, a Federal commercial smoothhound permit may be issued to a vessel alone or to a vessel that also holds either a Federal Atlantic commercial shark directed or incidental LAP.

(f) * * *

(1) Except as specified in paragraphs (n) and (o) of this section, the owner of a vessel of the United States used to fish for or take swordfish commercially from the management unit, or on which swordfish from the management unit are retained or possessed with an intention to sell, or from which swordfish are sold, must obtain an HMS Charter/Headboat permit with a commercial sale endorsement issued under paragraph (b) of this section, or one of the following swordfish permits: A swordfish directed LAP, swordfish incidental LAP, swordfish handgear LAP, or a Swordfish General Commercial permit. These permits cannot be held in combination with each other on the same vessel, except that an HMS Charter/Headboat permit with a commercial sale endorsement may be held in combination with a swordfish handgear LAP on the same vessel. It is a rebuttable presumption that the owner or operator of a vessel on which swordfish are possessed in excess of the recreational retention limits intends to sell the swordfish. (2) The only valid commercial Federal vessel permits for swordfish are the HMS Charter/Headboat permit with a commercial sale endorsement issued under paragraph (b) of this section (and only when on a non for-hire trip), the Swordfish General Commercial permit issued under paragraph (f) of this section, a swordfish LAP issued consistent with paragraphs (l) and (m) of this section, or permits issued under paragraphs (n) and (o) of this section.

* * * * *

(4) A directed or incidental swordfish LAP is valid only when the vessel has on board a valid shark LAP and a valid Atlantic Tunas Longline category LAP issued for such vessel.

(5) A Swordfish General Commercial permit may not be held on a vessel in conjunction with an HMS Charter/Headboat permit issued under paragraph (b) of this section, an HMS Angling category permit issued under paragraph (c) of this section, a swordfish LAP issued consistent with paragraphs (l) and (m) of this section, an Incidental HMS Squid Trawl permit issued under paragraph (n) of this section, or an HMS Commercial Caribbean Small Boat permit issued under paragraph (o) of this section. A vessel issued a Swordfish General Commercial open access permit for a fishing year shall not be issued an HMS Angling permit or an HMS Charter/Headboat permit for that same fishing year, regardless of a change in the vessel's ownership.

(g) * * *

(2) *Shark.* A dealer, as defined in § 600.10 of this chapter, must possess a valid federal Atlantic shark dealer permit to purchase, trade, or barter any Atlantic shark listed in Table 1 of appendix A to this part except as noted under paragraph (o) of this section.

* * * * *

(h) * * *

(1) * * *

(iii) NMFS may require an applicant to provide documentation supporting the application before a permit is issued or to substantiate why such permit should not be revoked or otherwise sanctioned under paragraph (a)(6) of this section.

* * * * *

(2) *LAPs for swordfish and shark.* See paragraph (l) of this section for transfers of LAPs for shark and swordfish. See paragraph (m) of this section for renewals of LAPs for shark and swordfish.

* * * * *

(l) * * *

(2) * * *

(ii) * * *

(A) The vessel baseline specifications are the respective specifications (length overall, gross registered tonnage, net tonnage, horsepower) of the first vessel that was issued an initial LAP or, if applicable, of that vessel's replacement owned as of May 28, 1999.

(B) Subsequent to the issuance of a swordfish handgear LAP, the vessel's horsepower may be increased, relative to the baseline specifications of the vessel initially issued the LAP, through refitting, replacement, or transfer. Such an increase may not exceed 20 percent of the baseline specifications of the vessel initially issued the LAP.

(C) Subsequent to the issuance of a swordfish handgear LAP, the vessel's length overall, gross registered tonnage, and net tonnage may be increased, relative to the baseline specifications of the vessel initially issued the LAP, through refitting, replacement, or transfer. An increase in any of these three specifications of vessel size may not exceed 10 percent of the baseline specifications of the vessel initially issued the LAP. This type of upgrade may be done separately from an engine horsepower upgrade.

(iii) No person or entity may own or control more than 5 percent of the vessels for which swordfish directed, shark directed, or Atlantic Tunas Longline category LAPs have been issued.

(iv) In order to transfer a swordfish, shark, or an Atlantic Tunas Longline category LAP to a replacement vessel, the owner of the vessel issued the LAP must submit a request to NMFS, at an address designated by NMFS, to transfer the LAP to another vessel, subject to requirements specified in paragraph (l)(2)(ii) of this section, if applicable. The owner must return the current valid LAP to NMFS with a complete application for a LAP, as specified in paragraph (h) of this section, for the replacement vessel. Copies of both vessels' U.S. Coast Guard documentation or state registration must accompany the application.

(v) For swordfish, shark, and Atlantic Tunas Longline category LAP transfers to a different person, the transferee must submit a request to NMFS, at an address designated by NMFS, to transfer the original LAP(s), subject to the requirements specified in paragraphs (l)(2)(ii) and (iii) of this section, if applicable. The following must accompany the completed application: The original LAP(s) with signatures of both parties to the transaction on the back of the permit(s) and the bill of sale for the permit(s). A person must include copies of both vessels' U.S. Coast Guard documentation or state registration for LAP transfers involving vessels.

(vi) For LAP transfers in conjunction with the sale of the permitted vessel, the transferee of the vessel and LAP(s) issued to that vessel must submit a request to NMFS, at an address designated by NMFS, to transfer the limited access permit(s) LAP(s), subject to the requirements specified in paragraphs (l)(2)(ii) and (iii) of this section, if applicable. The following must accompany the completed application: The original LAP(s) with signatures of both parties to the transaction on the back of the permit(s), the bill of sale for the LAP(s) and the vessel, and a copy of the vessel's U.S. Coast Guard documentation or state registration.

(vii) The owner of a vessel issued a LAP(s) who sells the permitted vessel but retains the LAP(s) must notify NMFS within 30 days after the sale of the change in application information in accordance with paragraph (i) of this section. If the owner wishes to transfer the LAP(s) to a replacement vessel, he/she must apply according to the procedures in paragraph (l)(2)(iv) of this section.

(viii) As specified in paragraph (f)(4) of this section, a directed or incidental swordfish LAP, a directed or incidental shark LAP, and an Atlantic Tunas Longline category LAP are required to retain swordfish for commercial purposes. Accordingly, a swordfish LAP obtained by transfer without either a directed or incidental shark LAP or an Atlantic Tunas Longline category LAP will not entitle an owner or operator to use a vessel to fish in the swordfish fishery.

(ix) As specified in paragraph (d)(4) of this section, a directed or incidental swordfish LAP, a directed or incidental shark LAP, and an Atlantic Tunas Longline category LAP are required to retain Atlantic tunas taken by pelagic longline gear. Accordingly, an Atlantic Tunas Longline category LAP obtained by transfer without either a directed or incidental swordfish or shark LAP will not entitle an owner or operator to use the permitted vessel to fish in the Atlantic tunas fishery with pelagic longline gear.

(m) * * *

(2) *Shark and swordfish permits.* A vessel owner must obtain the applicable LAP(s) issued pursuant to the requirements in paragraphs (e) and (f) of this section and/or a Federal commercial smoothhound permit issued under paragraph (e) of this section; or an HMS Commercial Caribbean Small Boat permit issued under paragraph (o) of this section, if: The vessel is used to fish for or take sharks commercially from the management unit; sharks from the management unit are retained or possessed on the vessel with an intention to sell; or sharks from the management unit are sold from the vessel. A vessel owner must obtain the applicable LAP(s) issued pursuant to the requirements in paragraphs (e) and (f) of this section, a Swordfish General Commercial permit issued under paragraph (f) of this section, an Incidental HMS Squid Trawl permit issued under paragraph (n) of this section, an HMS Commercial Caribbean Small Boat permit issued under paragraph (o) of this section, or an HMS Charter/Headboat permit with a commercial sale endorsement issued under paragraph (b) of this section,

which authorizes a Charter/Headboat to fish commercially for swordfish on a non for-hire trip subject to the retention limits at § 635.24(b)(4) if: The vessel is used to fish for or take swordfish commercially from the management unit; swordfish from the management unit are retained or possessed on the vessel with an intention to sell; or swordfish from the management unit are sold from the vessel. The commercial retention and sale of swordfish from vessels issued an HMS Charter/Headboat permit with a commercial sale endorsement is permissible only when the vessel is on a non for-hire trip. Only persons holding non-expired shark and swordfish LAP(s) in the preceding year are eligible to renew those LAP(s). Transferors may not renew LAP(s) that have been transferred according to the procedures in paragraph (l) of this section.

* * * * *

■ 4. In § 635.5, revise paragraphs (a)(5)(ii), (b)(1)(i), and (c)(2) to read as follows:

§ 635.5 Recordkeeping and reporting.

* * * * *

(a) * * *

(5) * * *

(ii) Before fishing under a chartering arrangement, the owner of a fishing vessel subject to U.S. jurisdiction must apply for, and obtain, a chartering permit as specified in § 635.32(e) and (g). If a chartering permit is obtained, the vessel owner must submit catch information as specified in the terms and conditions of that permit. All catches will be recorded and counted against the applicable quota of the Contracting Party to which the chartering foreign entity is a member and, unless otherwise provided in the chartering permit, must be offloaded in the ports of the chartering foreign entity or offloaded under the direct supervision of the chartering foreign entity.

* * * * *

(b) * * *

(1) * * *

(i) Dealers that have been issued or should have been issued a Federal Atlantic BAYS tunas, swordfish, and/or shark dealer permit under § 635.4 must submit to NMFS all reports required under this section within the timeframe specified under paragraph (b)(1)(ii) of this section. BAYS tunas, swordfish, and sharks commercially-harvested by a vessel can only be first received by dealers that have been issued or should have been issued an Atlantic tunas, swordfish, and/or shark dealer permit under § 635.4. All federal Atlantic HMS dealers must provide a detailed report of all fish first received to NMFS within the period specified under paragraph (b)(1)(ii) of this section. All reports must be species-specific and must include the required information about all swordfish and sharks received by the dealer, including the required vessel information, regardless of where the fish were harvested or whether the harvesting vessel is permitted under § 635.4. For sharks, each report must specify the total weight of the carcass(es) without the fins for each species, and the total fin weight by grade for all sharks combined. Dealers are also required to submit ''negative'' reports, indicating no receipt of any species, within the timeframe specified under paragraph (b)(1)(ii) of this section if they did not first receive any fish during the reporting period. As stated in § 635.4(a)(6), failure to comply with these recordkeeping and reporting requirements may result in existing dealer permit(s) being revoked, suspended, or modified, and in the denial of any permit applications.

* * * * *

(c) * * *

(2) *Non-tournament landings.* The owner, or the owner's designee, of a vessel permitted, or required to be permitted, in the Atlantic HMS Angling or Atlantic HMS Charter/Headboat category must report all non-tournament landings of Atlantic blue marlin, Atlantic white marlin, roundscale spearfish, and Atlantic sailfish, and all non-tournament and non-commercial landings of North Atlantic swordfish to NMFS by telephone to a number designated by NMFS, or electronically via the internet to an internet website designated by NMFS, or by other means as specified by NMFS, within 24 hours of that landing. For telephone landing reports, the owner, or the owner's designee, must provide a contact phone number so that a NMFS designee can call the vessel owner, or the owner's designee, for follow up questions and to confirm the reported landing. Regardless of how submitted, landing reports submitted to NMFS are not complete unless the vessel owner, or the owner's designee, has received a confirmation number from NMFS or a NMFS designee.

* * * * *

■ 5. In § 635.6, revise paragraphs (b)(1)(ii) and (c)(1) to read as follows:

§ 635.6 Vessel and gear identification.

* * * * *

(b) * * *

(1) * * *

(ii) In block Arabic numerals permanently affixed to or painted on the vessel in contrasting color to the background.

* * * * *

(c) * * *

(1) The owner or operator of a vessel for which a permit has been issued under § 635.4 and that uses handline, buoy gear, harpoon, longline, or gillnet, must display the vessel's name, registration number, or Atlantic Tunas, HMS Angling, or HMS Charter/Headboat permit number on each float attached to a handline, buoy gear, or harpoon, and on the terminal floats and high-flyers (if applicable) on a longline or gillnet used by the vessel. The vessel's name or number must be at least 1 inch (2.5 cm) in height in block letters or Arabic numerals in a color that contrasts with the background color of the float or high-flyer.

* * * * *

■ 6. In § 635.8, revise paragraphs (a)(1) and (3) and (c)(2) and (3) to read as follows:

§ 635.8 Workshops.

(a) * * *

(1) Both the owner and operator of a vessel that fishes with longline or gillnet gear must be certified by NMFS, or its designee, as having completed a workshop on the safe handling, release, and identification of protected species before a shark or swordfish LAP, pursuant to § 635.4(e) and (f), is renewed. For the purposes of this section, it is a rebuttable presumption that a vessel fishes with longline or gillnet gear if: Longline or gillnet gear is onboard the vessel; logbook reports indicate that longline or gillnet gear was used on at least one trip in the preceding year; or, in the case of a permit transfer to new owners that occurred less than a year ago, logbook reports indicate that longline or gillnet gear was used on at least one trip since the permit transfer.

* * * * *

(3) The owner of a vessel that fishes with longline or gillnet gear, as specified in paragraph (a)(1) of this section, is required to possess on board the vessel a valid protected species safe handling, release, and identification workshop certificate issued to that vessel owner. A copy of a valid protected species safe handling, release, and identification workshop certificate issued to the vessel owner for a vessel that fishes with longline or gillnet gear must be included in the application package to renew or obtain a shark or swordfish LAP.

* * * * *

(c) * * *

(2) If a vessel fishes with longline or gillnet gear as described in paragraph (a)(1) of this section, the vessel owner may not renew a shark or swordfish LAP, issued pursuant to § 635.4(e) or (f), without submitting a valid protected species workshop certificate with the permit renewal application. (3) A vessel that fishes with longline or gillnet gear as described in paragraph (a)(1) of this section and that has been, or should be, issued a valid LAP pursuant to § 635.4(e) or (f), may not fish unless a valid protected species safe handling, release, and identification workshop certificate has been issued to both the owner and operator of that vessel.

* * * * *

■ 7. In § 635.9, revise paragraph (e)(4) to read as follows:

§ 635.9 Electronic monitoring.

* * * * *

(e) * * *

(4) *Completion of trip.* Within 48 hours of completing a fishing trip, the vessel owner or operator must mail the removable EM system hard drive(s) containing all data to NMFS or NMFS-approved contractor, according to instructions provided by NMFS. The vessel owner or operator is responsible for using shipping materials suitable to protect the hard drives (*e.g.,* bubble wrap), tracking the package, and including a self-addressed mailing label for the next port of call so replacement hard drives can be mailed back to the vessel owner or operator. Prior to departing on a subsequent trip, the vessel owner or operator must install a replacement EM system hard drive(s) to enable data collection and video recording. The vessel owner or operator is responsible for contacting NMFS or NMFS-approved contractor if they have requested but not received a replacement hard drive(s) and for informing NMFS or NMFS-approved contractor of any lapse in the hard drive management procedures described in the VMP.

* * * * *

■ 8. In § 635.14, revise paragraph (b)(1) to read as follows:

§ 635.14 Performance metrics.

* * * * *

(b) * * *

(1) *Bluefin tuna interactions performance metric.* The basis for the bluefin tuna interactions performance metric is the ratio of the number of bluefin tuna interactions (*i.e.,* the number of fish landed, discarded dead, and discarded alive) to the total weight of designated target species landings (in pounds). For the purposes of this section, the designated target species are swordfish; yellowfin, bigeye, albacore, and skipjack tunas; dolphin; wahoo; and porbeagle, shortfin mako, and thresher sharks. A relatively low bluefin tuna interaction to designated species ratio ('bluefin tuna ratio') indicates that the vessel has successfully avoided catching bluefin tuna while fishing with pelagic longline gear in the performance metric period.

* * * * *

■ 9. In § 635.15, revise paragraphs (c)(3)(iv), (k) introductory text, and (k)(4)(iii) to read as follows:

§ 635.15 Individual bluefin tuna quotas.

* * * * *

(c) * * *

(3) * * *

(iv) *Temporary prohibition of leasing IBQ allocation.* No leasing of IBQ allocation is permitted between 6 p.m. eastern time on December 31 of one year and 2 p.m. eastern time on January 1 of the next year. This period is necessary to provide NMFS time to reconcile IBQ accounts, and update IBQ shares and allocations for the upcoming fishing year.

* * * * *

(k) *Initial IBQ shares.* During year one of implementation of the IBQ Program described in this section, NMFS will issue IBQ shares to eligible Atlantic Tunas Longline category LAP holders, as specified in paragraph (k)(1) of this section. New entrants to the pelagic longline fishery would need to obtain an Atlantic Tunas Longline category LAP, as well as other required LAPs, as described under § 635.4(l), and would need to lease IBQ allocations per paragraph (c) of this section if the LAPs acquired did not qualify for an initial IBQ share.

* * * * *

(4) * * *

(iii) *Items subject to IAD and appeal.* The only items subject to an IAD or appeal are: Initial IBQ share eligibility based on ownership of an active vessel with a valid Atlantic Tunas Longline category LAP combined with the required shark and swordfish LAPs; the accuracy of NMFS records regarding that vessel's amount of designated species landings and/or bluefin interactions; and correct assignment of target species landings and bluefin interactions to the vessel owner/permit holder. As described under paragraph (k)(1) of this section, the IBQ share formulas are based upon historical data associated with a permitted vessel. Because vessels may have changed ownership or permits may have been transferred during 2006 through 2012, the current owner of a permitted vessel may also appeal on the basis of historical changes in vessel ownership or permit transfers. Appeals based on hardship factors (*e.g.,* illness of vessel owner, divorce, etc.) will not be considered.

* * * * *

■ 10. In § 635.19, revise paragraph (e)(4) to read as follows:

§ 635.19 Authorized gears.

* * * * *

(e) * * *

(4) Except for persons aboard a vessel that has been issued a directed, incidental, or handgear swordfish LAP, a Swordfish General Commercial permit, an Incidental HMS squid trawl permit, or an HMS Commercial Caribbean Small Boat permit under § 635.4, no person may fish for North Atlantic swordfish with, or possess a North Atlantic swordfish taken by, any gear other than handline or rod and reel.

* * * * *

■ 11. In § 635.20, revise paragraph (b) to read as follows:

§ 635.20 Size limits.

* * * * *

(b) *BFT size classes.* If the head of a BFT is no longer attached, the size class of the BFT shall be determined using pectoral fin curved fork length (PFCFL) multiplied by a conversion factor of 1.35. The CFL, as determined by conversion of the PFCFL, will be the sole criterion for determining the size class of a beheaded BFT. The conversion factor may be adjusted after consideration of additional scientific information and fish measurement data, and will be made effective by filing notification of the adjustment with the Office of the Federal Register for publication.

* * * * *

■ 12. In § 635.21, revise paragraphs (b)(1), (c)(3) and (4), (c)(5)(ii)(C)(*1*), (c)(5)(iii)(A), (c)(5)(iii)(B) introductory text, (c)(5)(iv), (d)(1)(iii)(D), (d)(2)(ii), and (g)(1) through (3) to read as follows:

§ 635.21 Gear operation and deployment restrictions.

* * * * *

(b) * * *

(1) All vessels that have pelagic or bottom longline gear onboard and that have been issued, or are required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico must possess inside the wheelhouse the document provided by NMFS entitled

''Careful Release Protocols for Sea Turtle Release with Minimal Injury,'' and must also post inside the wheelhouse the sea turtle handling and release guidelines provided by NMFS.

* * * * *

(c) * * *

(3) A vessel that has been issued, or is required to have been issued, a LAP under this part may fish with pelagic longline gear in the Cape Hatteras gear restricted area described in paragraph (c)(2)(v) of this section, provided the vessel has been determined by NMFS to be ''qualified,'' (for the relevant year) using the performance metrics described in § 635.14.

(4) In the Gulf of Mexico, pelagic longline gear may not be fished or deployed from a vessel issued or required to have been issued a LAP under this part with live bait affixed to the hooks; and, a person aboard a vessel issued or required to have been issued a LAP under this part that has pelagic longline gear on board may not possess live baitfish, maintain live baitfish in any tank or well on board the vessel, or set up or attach an aeration or water circulation device in or to any such tank or well. For the purposes of this section, the Gulf of Mexico includes all waters of the U.S. EEZ west and north of the boundary stipulated at 50 CFR 600.105(c).

(5) * * *

(ii) * * *

(C) * * *

(*1*) Non-boated turtles should be brought close to the boat and provided with time to calm down. Then, it must be determined whether or not the hook can be removed without causing further injury. A front flipper or flippers of the turtle must be secured with an approved turtle control device from the list specified in paragraph (c)(2)(vii)(D) of this section.

* * * * *

(iii) * * *

(A) *Gangion length.* The length of any gangion on vessels that have pelagic longline gear on board and that have been issued, or are required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean including the Caribbean Sea and the Gulf of Mexico must be at least 10 percent longer than any floatline length if the total length of any gangion plus the total length of any floatline is less than 100 meters.

(B) *Hook size, type, and bait.* Vessels fishing outside of the NED gear restricted area, as defined at § 635.2, that have pelagic longline gear on board, and that have been issued, or are required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico, are limited, at all times, to possessing on board and/or using only whole finfish and/or squid bait, and the following types and sizes of fishing hooks:

* * * * *

(iv) *Approval of sea turtle bycatch mitigation gear.* NMFS will file with the Office of the Federal Register for publication an initial list of required sea turtle bycatch mitigation gear that NMFS has approved as meeting the minimum design standards specified under paragraph (c)(5)(i) of this section. Other devices proposed for use, such as line clippers or cutters or dehookers, as specified under paragraphs (c)(5)(i)(A) through (C), (G), and (H) through (K) of this section, must be approved as meeting the minimum design standards before being used. NMFS will examine new devices, as they become available, to determine if they meet the minimum design standards, and will file with the Office of the Federal Register for publication notification of any new devices that are approved as meeting the standards.

* * * * *

(d) * * *

(1) * * *

(iii) * * *

(D) *Charleston Deep Artificial Reef.* Bounded by rhumb lines connecting, in order, the following points: 32°9.65′ N lat., 79°9.2′ W long.; 32°7.155′ N lat., 79°5.595′ W long.; 32°2.36′ N lat., 79°9.975′ W long.; 32°5.04′ N lat., 79°13.575′ W long.

* * * * *

(2) * * *

(ii) *Handling and release requirements.* Sea turtle bycatch mitigation gear, as required by paragraph (d)(2)(i) of this section, must be used to disengage any hooked or entangled sea turtle as stated in paragraph (c)(5)(ii) of this section. This mitigation gear should also be employed to disengage any hooked or entangled species of prohibited sharks as listed under heading D, Prohibited Sharks, of Table 1 of appendix A to this part, any hooked or entangled species of sharks that exceed the retention limits as specified in § 635.24(a), and any hooked or entangled smalltooth sawfish. In addition, if a smalltooth sawfish is caught, the fish should be kept in the water while maintaining water flow over the gills and the fish should be examined for research tags. All smalltooth sawfish must be released in a manner that will ensure maximum probability of survival, but without removing the fish from the water or any research tags from the fish.

* * * * *

(g) * * *

(1) Persons fishing with gillnet gear must comply with the provisions implementing the Atlantic Large Whale Take Reduction Plan, the Bottlenose Dolphin Take Reduction Plan, the Harbor Porpoise Take Reduction Plan, and any other relevant Take Reduction Plan set forth in §§ 229.32 through 229.35 of this title. If a listed whale is taken, the vessel operator must cease fishing operations immediately and contact NMFS as required under part 229 of this title.

(2) While fishing with a drift gillnet, a vessel issued or required to be issued a Federal Atlantic commercial shark LAP and/or a Federal commercial smoothhound permit must conduct net checks at least every 2 hours to look for and remove any sea turtles, marine mammals, Atlantic sturgeon, or smalltooth sawfish, and the drift gillnet must remain attached to at least one vessel at one end, except during net checks. Smalltooth sawfish must not be removed from the water while being removed from the net.

(3) While fishing with a sink gillnet, vessels issued or required to be issued a Federal Atlantic commercial shark LAP and/or a Federal commercial smoothhound permit must limit the soak time of the sink gillnet gear to no more than 24 hours, measured from the time the sink gillnet first enters the water to the time it is completely removed from the water. Smalltooth sawfish must not be removed from the water while being removed from the net.

* * * * *

■ 13. In § 635.22, revise paragraphs (c)(1) and (5), (d), and (f) introductory text to read as follows:

§ 635.22 Recreational retention limits.

* * * * *

(c) * * *

(1) The recreational retention limit for sharks applies to any person who fishes in any manner, except to persons aboard a vessel that has been issued a Federal Atlantic commercial shark vessel permit under § 635.4. The retention limit can change depending on the species being caught and the size limit under which they are being caught as specified under § 635.20(e). If a commercial Atlantic shark quota is closed under § 635.28(b), the recreational retention limit for sharks and no sale provision in paragraph (a) of this section may be applied to persons aboard a vessel issued a Federal Atlantic commercial shark vessel permit under § 635.4(e),

only if that vessel has also been issued an HMS Charter/Headboat permit with a shark endorsement under § 635.4(b) and is engaged in a for-hire fishing trip. A person on board a vessel that has been issued or is required to be issued a permit with a shark endorsement under § 635.4 may be required to use non-offset, corrodible circle hooks as specified in § 635.21(f) and (k) in order to retain sharks per the retention limits specified in this section.

* * * * *

(5) Sharks listed in Table 1 of appendix A to this part that are not listed in this section, must be released by persons aboard a vessel that has not been issued a Federal Atlantic commercial shark vessel permit under § 635.4(e).

* * * * *

(d) *Yellowfin tuna.* Three yellowfin tunas per person per day may be retained. Regardless of the length of a trip, no more than three yellowfin tuna per person may be possessed on board a vessel. The recreational retention limit for yellowfin tuna applies to a person who fishes in any manner, except to a person aboard a vessel issued an Atlantic Tunas vessel permit under § 635.4(d). The recreational retention limit for yellowfin tuna applies to persons, including captain and crew, aboard a vessel that has been issued an Atlantic HMS Charter/Headboat permit under § 635.4(b) only when the vessel is engaged in a for-hire trip.

* * * * *

(f) *North Atlantic swordfish.* The recreational retention limits for North Atlantic swordfish apply to persons who fish in any manner, except to persons aboard a vessel that has been issued an HMS Charter/Headboat permit with a commercial sale endorsement under § 635.4(b) and only when on a non for-hire trip; a directed, incidental or handgear swordfish LAP under § 635.4(e) and (f); a Swordfish General Commercial permit under § 635.4(f); an Incidental HMS Squid Trawl permit under § 635.4(n); or an HMS Commercial Caribbean Small boat permit under § 635.4(o).

* * * * *

■ 14. In § 635.23, revise paragraphs (a)(2) and (4) to read as follows:

§ 635.23 Retention limits for bluefin tuna.

* * * * *

(a) * * *

(2) On an RFD, no person aboard a vessel that has been issued an Atlantic Tunas General category permit may fish for, possess, retain, land, or sell a BFT of any size class, and catch-and-release or tag-and-release fishing for BFT under § 635.26(a) is not authorized from such vessel. On days other than RFDs, and when the General category is open, large medium or giant BFT may be caught and landed from such vessels up to the daily retention limit in effect for that day. NMFS will annually publish a schedule of RFDs in the **Federal Register**.

* * * * *

(4) To provide for maximum utilization of the quota for BFT, NMFS may increase or decrease the daily retention limit of large medium and giant BFT over a range from zero (on RFDs) to a maximum of five per vessel. Such increase or decrease will be based on the criteria provided under § 635.27(a)(8). NMFS will adjust the daily retention limit specified in paragraph (a)(2) of this section by filing an adjustment with the Office of the Federal Register for publication. In no case shall such adjustment be effective less than 3 calendar days after the date of filing with the Office of the Federal Register, except that previously designated RFDs may be waived effective upon closure of the General category fishery so that persons aboard vessels permitted in the General category may conduct tag-and-release fishing for BFT under § 635.26(a).

* * * * *

■ 15. In § 635.27, revise the paragraphs (b)(1) introductory text, (c)(1)(i)(A) and (B), and (d)(1) to read as follows:

§ 635.27 Quotas.

* * * * *

(b) * * *

(1) *Commercial quotas.* The commercial quotas for sharks specified in this section apply to all sharks harvested from the management unit, regardless of where harvested. Sharks caught and landed commercially from state waters, even by fishermen without Federal shark permits, must be counted against the appropriate commercial quota. Any of the base quotas listed below, including regional and/or sub-regional base quotas, may be adjusted per paragraph (b)(2) of this section. Any sharks landed commercially as ''unclassified'' will be counted against the appropriate quota based on the species composition calculated from data collected by observers on non-research trips and/or dealer data. No prohibited sharks, including parts or pieces of prohibited sharks, which are listed under heading D, Prohibited Sharks, of Table 1 of appendix A to this part, may be retained except as authorized under § 635.32. For the purposes of this section, the boundary between the Gulf of Mexico region and the Atlantic region is defined as a line beginning on the east coast of Florida at the mainland at 25°20.4′ N. lat., proceeding due east. Any water and land to the south and west of that boundary is considered, for the purposes of quota monitoring and setting of quotas, to be within the Gulf of Mexico region. Any water and land to the north and east of that boundary, for the purposes of quota monitoring and setting of quotas, is considered to be within the Atlantic region.

* * * * *

(c) * * *

(1) * * *

(i) * * *

(A) A swordfish from the North Atlantic stock caught prior to the directed fishery closure by a vessel for which a directed swordfish LAP, a swordfish handgear LAP, an HMS Commercial Caribbean Small Boat permit, a Swordfish General Commercial open access permit, or an HMS Charter/Headboat permit with a commercial sale endorsement (and only when on a non for-hire trip) has been issued or is required to have been issued is counted against the directed fishery quota. The total baseline annual fishery quota, before any adjustments, is 2,937.6 mt dw for each fishing year. Consistent with applicable ICCAT recommendations, a portion of the total baseline annual fishery quota may be used for transfers to another ICCAT contracting party. The annual directed category quota is calculated by adjusting for over- or under harvests, dead discards, any applicable transfers, the incidental category quota, the reserve quota and other adjustments as needed, and is subdivided into two equal semiannual periods: One for January 1 through June 30, and the other for July 1 through December 31.

(B) A swordfish from the North Atlantic swordfish stock landed by a vessel for which an incidental swordfish LAP, an incidental HMS Squid Trawl permit, an HMS Angling permit, or an HMS Charter/Headboat permit (and only when on a for-hire trip) has been issued, or a swordfish from the North Atlantic stock caught after the effective date of a closure of the directed fishery from a vessel for which a swordfish directed LAP, a swordfish handgear LAP, an HMS Commercial Caribbean Small Boat permit, a Swordfish General Commercial open access permit, or an HMS Charter/Headboat permit with a commercial sale endorsement (when on a non for-hire trip) has been issued, is counted against the incidental category quota. The annual incidental category quota is 300 mt dw for each fishing year.

* * * * *

(d) * * *

(1) Unless adjusted under paragraph (d)(2) of this section or by an ICCAT recommendation, the annual landings limit is 250 Atlantic blue and white marlin, combined. Annual landings of roundscale spearfish are also included to the blue and white marlin annual landings limit. Should the U.S. recreational Atlantic marlin landing limit be adjusted by an ICCAT recommendation, NMFS will file a notice identifying the new landing limit with the Office of the Federal Register for publication prior to the start of the next fishing year or as early as possible.

* * * * *

■ 16. In § 635.28, revise paragraphs (a)(3) introductory text, (b)(1)(iv), (b)(7), (c)(3), and (d) to read as follows:

§ 635.28 Fishery closures.

* * * * *

(a) * * *

(3) When the Atlantic Tunas Longline category quota is reached, projected to be reached, or exceeded, or when there is high uncertainty regarding the estimated or documented levels of bluefin tuna catch, NMFS will file a closure action with the Office of the **Federal Register** for publication. On and after the effective date and time of such action, for the remainder of the fishing year or for a specified period as indicated in the closure action, vessels that have been issued or are required to have a LAP under § 635.4 and that have pelagic longline gear onboard are prohibited from leaving port, regardless of the amount of bluefin tuna quota allocation remaining to each vessel or the amount of fishery quota remaining for other species. In addition to providing notice in the **Federal Register**, NMFS will also notify vessels of any closures and their timing via VMS and may use other electronic methods, such as email. Vessels would be required to return to port prior to the closure date/time. When considering whether to close or reopen the Longline category quota, NMFS may consider the following factors:

* * * * *

(b) * * *

(1) * * *

(iv) The species is a prohibited species as listed under heading D, Prohibited Species of Table 1 of appendix A to this part; or

* * * * *

(7) If the Atlantic Tunas Longline category quota is closed as specified in paragraph (a)(3) of this section, vessels that have pelagic longline gear on board cannot possess, retain, land, or sell sharks.

(c) * * *

(3) *Bluefin tuna Longline category closure.* If the Atlantic Tunas Longline category quota is closed as specified in paragraph (a)(3) of this section, vessels that have pelagic longline gear on board cannot possess or land any North Atlantic swordfish or bluefin tuna.

(d) *Northern albacore tuna.* When the annual fishery quota specified in § 635.27(e) is reached, or is projected to be reached, NMFS will file a closure action with the Office of the Federal Register for publication. When the fishery for Northern albacore tuna is closed, Northern albacore tuna may not be retained. If the Atlantic Tunas Longline category quota is closed as specified in paragraph (a)(3) of this section, vessels that have pelagic longline gear on board cannot possess or land any Northern albacore tuna.

■ 17. In § 635.31, revise paragraph (d)(2) to read as follows:

§ 635.31 Restrictions on sale and purchase.

* * * * *

(d) * * *

(2) Atlantic swordfish dealers may first receive a swordfish harvested from the Atlantic Ocean only from an owner or operator of a fishing vessel that has a valid commercial permit for swordfish issued under this part, and only if the dealer has submitted reports to NMFS according to reporting requirements of § 635.5(b)(1)(ii). Atlantic swordfish dealers may first receive a swordfish from a vessel that has pelagic longline gear onboard only if the Atlantic Tunas Longline category has not been closed, as specified in § 635.28(a)(3).

■ 18. In § 635.34, revise the introductory text of paragraph (c) to read as follows:

§ 635.34 Adjustment of management measures.

* * * * *

(c) NMFS may add species to the prohibited shark species group specified in heading D, Prohibited Sharks, of Table 1 of appendix A to this part if, after considering the criteria in paragraphs (c)(1) through (4) of this section, the species is determined to meet at least two of the criteria. Alternatively, NMFS may remove species from the prohibited shark species group and place them in the appropriate shark species group in Table 1 of appendix A if, after considering the criteria in paragraphs (c)(1) through (4) of this section, NMFS determines the species only meets one criterion.

* * * * *

■ 19. In § 635.40, revise the introductory text of paragraph (b)(1) and remove and reserve paragraph (b)(3) to read as follows:

§ 635.40 Restrictions to enhance conservation.

* * * * *

(b) * * *

(1) For the purposes of paragraph (a) of this section and section 971d(6)(a) of ATCA, a shipment of fish in any form of the species under regulation or under investigation by ICCAT offered for entry, directly or indirectly, from a country named in a finding filed with the Office of the Federal Register for publication under paragraph (a) of this section is eligible for entry if the shipment is accompanied by a completed ATCA COE attached to the invoice certifying that the fish in the shipment:

* * * * *

■ 20. In § 635.71 revise paragraphs (a)(53), (b)(20), (36) through (38), and (40), and (e)(10) and (11) to read as follows:

§ 635.71 Restrictions on sale and purchase.

* * * * *

(a) * * *

(53) Fish for, catch, possess, retain, or land an Atlantic swordfish using, or captured on, ‘‘buoy gear’’ as defined at § 635.2, unless the vessel owner has been issued a swordfish directed limited access 125 permit or a swordfish handgear LAP in accordance with § 635.4(f) or a valid HMS Commercial Caribbean Small Boat permit in accordance with § 635.4(o).

* * * * *

(b) * * *

(20) Approach to within 100 yd (91.5 m) of the cork line of a purse seine net used by a vessel fishing for Atlantic tuna, or for a purse seine vessel to approach to within 100 yd (91.5 m) of a vessel actively fishing for Atlantic tuna, except that two vessels that have Atlantic Tunas Purse Seine category LAPs may approach closer to each other.

* * * * *

(36) Possess J-hooks onboard a vessel that has pelagic longline gear onboard, and that has been issued, or is required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean, including the Caribbean Sea and the Gulf of Mexico, except when green-stick gear is onboard,

as specified at § 635.21(c)(2)(vii)(A) and (c)(5)(iii)(B)(*3*).

(37) Use or deploy J-hooks with pelagic longline gear from a vessel that has been issued, or is required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean, including the Caribbean Sea and Gulf of Mexico, as specified in § 635.21(c)(5)(iii)(B).

(38) As specified in § 635.21(c)(5)(iii)(B)(*3*), possess more than 20 J-hooks onboard a vessel that has been issued, or is required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean, including the Caribbean Sea and Gulf of Mexico, when possessing onboard both pelagic longline gear and green-stick gear as defined in § 635.2.

* * * * *

(40) Possess, use, or deploy J-hooks smaller than 1.5 inch (38.1 mm), when measured in a straight line over the longest distance from the eye to any part of the hook, when fishing with or possessing green-stick gear onboard a vessel that has been issued, or is required to have, a swordfish, shark, or Atlantic Tunas Longline category LAP for use in the Atlantic Ocean, including the Caribbean Sea and Gulf of Mexico, as specified at § 635.21(c)(5)(iii)(B)(*3*) or (c)(2)(vii)(A).

* * * * *

(e) * * *

(10) Fish for, catch, possess, retain, or land an Atlantic swordfish using, or captured on, ‘‘buoy gear’’ as defined at § 635.2, unless, as specified in § 635.19(e)(3), the vessel owner has been issued a swordfish directed LAP or a swordfish handgear LAP in accordance with § 635.4(f) or a valid HMS Commercial Caribbean Small Boat permit in accordance with § 635.4(o).

(11) As the owner of a vessel permitted, or required to be permitted, in the swordfish directed, swordfish handgear LAP category, or issued a valid HMS Commercial Caribbean Small Boat permit and utilizing buoy gear, to possess or deploy more than 35 individual floatation devices, to deploy more than 35 individual buoy gears per vessel, or to deploy buoy gear without affixed monitoring equipment, as specified at § 635.21(h).

BILLING CODE 3510–22–P

Proposed Rules

Federal Register

Vol. 83, No. 137

Tuesday, July 17, 2018

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2018–0554; Product Identifier 2018–NM–064–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Airbus Model A318 series airplanes; Model A319 series airplanes; Model A320 series airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, –232, –251N, –253N, and –271N airplanes. This proposed AD was prompted by a revision of an airworthiness limitation item (ALI) document, which requires more restrictive maintenance requirements and airworthiness limitations. This proposed AD would require revising the maintenance or inspection program, as applicable, to incorporate new maintenance requirements and airworthiness limitations. We are proposing this AD to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by August 31, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Airbus, Airworthiness Office—EIAS, Rond-Point Emile Dewoitine No: 2, 31700 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* internet *http://www.airbus.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0554; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this NPRM, the regulatory evaluation, any comments received, and other information. The street address for Docket Operations (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3223.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2018–0554; Product Identifier 2018–NM–064–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. We will consider all comments received by the closing date and may amend this NPRM because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this NPRM.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2017–0168, dated September 7, 2017 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Airbus Model A318 series airplanes; Model A319 series airplanes; Model A320 series airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, –232, –251N, –253N, and –271N airplanes. The MCAI states:

> The airworthiness limitations for Airbus A320 family aeroplanes are currently defined and published in Airbus A318/A319/A320/A321 Airworthiness Limitations Section (ALS) documents. The airworthiness limitations applicable to the Certification Maintenance Requirements (CMR), which are approved by EASA, are published in ALS Part 3.
>
> The instructions contained in the ALS Part 3 have been identified as mandatory actions for continued airworthiness. Failure to comply with these instructions could result in an unsafe condition.
>
> Previously, EASA issued AD 2016–0092 [which corresponds to FAA AD 2017–25–04, Amendment 39–19118 (82 FR 58098, December 11, 2017) (''AD 2017–25–04'')], to require accomplishment of all maintenance tasks as described in ALS Part 3 at Revision 03. The new ALS Part 3 Revision 05 (hereafter referred to as ''the ALS'' in this [EASA] AD) includes new and/or more restrictive requirements and extends the applicability to model A320–251N, A320–271N, A321–251N, A321–253N and A321–271N aeroplanes.
>
> For the reason described above, this [EASA] AD retains the requirements of EASA AD 2016–0092, which is superseded, and requires accomplishment of all maintenance tasks as described in the ALS.

The unsafe condition is a safety-significant latent failure (that is not annunciated), which, in combination with one or more other specific failures or events, could result in a hazardous or catastrophic failure condition. You may examine the MCAI in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0554.

Relationship Between Proposed AD and AD 2017–25–04

This NPRM does not propose to supersede AD 2017–25–04. Rather, we have determined that a stand-alone AD would be more appropriate to address the changes in the MCAI. This proposed AD would require revising the maintenance or inspection program, as applicable, to incorporate new maintenance requirements and airworthiness limitations. Accomplishment of the proposed actions would then terminate all of the requirements of AD 2017–25–04.

Related Service Information Under 1 CFR Part 51

Airbus has issued Airbus A318/A319/A320/A321 Airworthiness Limitations Section (ALS) Part 3, Certification Maintenance Requirements (CMR), Revision 05, dated April 6, 2017. The service information describes maintenance instructions and airworthiness limitations, including updated inspections and intervals to be incorporated into the maintenance or inspection program. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop on other products of these same type designs.

Proposed AD Requirements

This proposed AD would require revising the maintenance or inspection program to incorporate new or revised airworthiness limitation requirements, except as discussed under ‘‘Differences Between this Proposed AD and the MCAI.’’

This proposed AD would require revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this proposed AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance according to paragraph (j)(1) of this proposed AD. The request should include a description of changes to the required inspections that will ensure the continued operational safety of the airplane.

Airworthiness Limitations Based on Type Design

The FAA recently became aware of an issue related to the applicability of ADs that require incorporation of an ALS revision into an operator's maintenance or inspection program.

Typically, when these types of ADs are issued by civil aviation authorities of other countries, they apply to all airplanes covered under an identified type certificate (TC). The corresponding FAA AD typically retains applicability to all of those airplanes.

In addition, U.S. operators must operate their airplanes in an airworthy condition, in accordance with 14 CFR 91.7(a). Included in this obligation is the requirement to perform any maintenance or inspections specified in the ALS, and in accordance with the ALS as specified in 14 CFR 43.16 and 91.403(c), unless an alternative has been approved by the FAA.

When a type certificate is issued for a type design, the specific ALS, including the current revision in effect, is a part of that type design, as specified in 14 CFR 21.31(c).

The sum effect of these operational and maintenance requirements is an obligation to comply with the ALS revision defined in the type design referenced in the manufacturer's conformity statement. This obligation may introduce a conflict with an AD that requires a specific ALS revision if new airplanes are delivered with a later revision as part of their type design. Note: When a new airplane is delivered with a later ALS revision, the revised ALS must correct the unsafe condition associated with an existing AD, as specified in 14 CFR 21.21(b)(2).

To address this conflict, the FAA has approved alternative methods of compliance (AMOCs) that allow operators to incorporate the most recent ALS revision (*i.e.,* a later revision) into their maintenance/inspection programs, in lieu of the earlier ALS revision required by the AD. This eliminates the conflict and enables the operator to comply with both the AD and the type design.

However, compliance with AMOCs is normally optional, and we recently became aware that some operators choose to retain the AD-mandated ALS revision in their fleet-wide maintenance/inspection programs, including those for new airplanes delivered with later ALS revisions, to help standardize the maintenance of the fleet. To ensure that operators comply with the applicable ALS revision for newly delivered airplanes containing a later revision than that specified in an AD, we plan to limit the applicability of ADs that mandate ALS revisions to those airplanes that are subject to an earlier revision of the ALS, either as part of the type design or as mandated by an earlier AD.

This proposed AD therefore would apply to Airbus Model A318 series airplanes; Model A319 series airplanes; Model A320 series airplanes; and Model A321–111, –112, –131, –211, –212, –213, –231, –232, –251N, –253N, and –271N airplanes with an original certificate of airworthiness or original export certificate of airworthiness that was issued on or before the date of the ALS revision identified in this proposed AD. Operators of airplanes with an original certificate of airworthiness or original export certificate of airworthiness issued after that date must comply with the airworthiness limitations specified as part of the approved type design and referenced on the type certificate data sheet.

Difference Between This Proposed AD and the MCAI

The MCAI specifies that if there are findings from the ALS inspection tasks, corrective actions must be accomplished in accordance with Airbus maintenance documentation. However, this proposed AD does not include that requirement. Operators of U.S.-registered airplanes are required by general airworthiness and operational regulations to perform maintenance using methods that are acceptable to the FAA. We consider those methods to be adequate to address any corrective actions necessitated by the findings of ALS inspections required by this proposed AD.

Costs of Compliance

We estimate that this proposed AD affects 1,250 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

We have determined that revising the maintenance or inspection program takes an average of 90 work-hours per operator, although we recognize that this number may vary from operator to operator. In the past, we have estimated that this action takes 1 work-hour per airplane. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), we have determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, we estimate the total cost per operator to be

$7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes to the Director of the System Oversight Division.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA–2018–0554; Product Identifier 2018–NM–064–AD.

(a) Comments Due Date

We must receive comments by August 31, 2018.

(b) Affected ADs

This AD affects AD 2017–25–04, Amendment 39–19118 (82 FR 58098, December 11, 2017) (''AD 2017–25–04'').

(c) Applicability

This AD applies to the Airbus airplanes identified in paragraphs (c)(1), (c)(2), (c)(3), and (c)(4) of this AD, certificated in any category, with an original certificate of airworthiness or original export certificate of airworthiness issued on or before April 6, 2017.

(1) Model A318–111, –112, –121, and –122 airplanes.

(2) Model A319–111, –112, –113, –114, –115, –131, –132, and –133 airplanes.

(3) Model A320–211, –212, –214, –216, –231, –232, –233, –251N, and –271N airplanes.

(4) Model A321–111, –112, –131, –211, –212, –213, –231, –232, –251N, –253N, and –271N airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Reason

This AD was prompted by a revision of an airworthiness limitation item (ALI) document, which requires more restrictive maintenance requirements and airworthiness limitations. We are issuing this AD to address a safety-significant latent failure (that is not annunciated), which, in combination with one or more other specific failures or events, could result in a hazardous or catastrophic failure condition.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Revision of Maintenance or Inspection Program

Within 90 days after the effective date of this AD, revise the maintenance or inspection program, as applicable, to incorporate the information specified in Airbus A318/A319/A320/A321 Airworthiness Limitations Section (ALS) Part 3, Certification Maintenance Requirements (CMR), Revision 05, dated April 6, 2017 (''ALS Part 3 CMR, R5''). The initial compliance time for accomplishing the tasks specified in ALS Part 3 CMR, R5, is at the applicable time specified in ALS Part 3 CMR, R5, or within 90 days after the effective date of this AD, whichever occurs later.

(h) Terminating Actions for AD 2017–25–04

Accomplishing the actions required by paragraph (g) of this AD terminates all of the requirements of AD 2017–25–04.

(i) No Alternative Actions or Intervals

After the maintenance or inspection program, as applicable, has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (j)(1) of this AD.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Section, Transport Standards Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Section, send it to the attention of the person identified in paragraph (k)(2) of this AD. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.*

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(ii) AMOCs applicable previously for AD 2017–25–04 or AD 2014–22–08, Amendment 39–18013 (79 FR 67042, November 12, 2014) that require incorporation of ALS Part 3 CMR, R5, are considered approved as AMOCs for the corresponding provisions of this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by The Manager, International Section, Transport Standards Branch, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA AD

2017–0168, dated September 7, 2017, for related information. This MCAI may be found in the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0554.

(2) For more information about this AD, contact Sanjay Ralhan, Aerospace Engineer, International Section, Transport Standards Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3223.

(3) For service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, Rond-Point Emile Dewoitine No: 2, 31700 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* internet *http://www.airbus.com.* You may view this service information at the FAA, Transport Standards Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

Issued in Des Moines, Washington, on June 19, 2018.

Michael Kaszycki,

Acting Director, System Oversight Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM); removal of airworthiness directive (AD).

SUMMARY: We propose to remove AD 93–14–19, which applies to certain The Boeing Company Model 767–200 and –300 series airplanes. AD 93–14–19 requires inspections for disbonding of the trailing edge wedge of the leading edge slat; and repair, if necessary. Since we issued AD 93–14–19, an updated stability and control analysis showed that the worst-case scenario of a trailing edge wedge disbond in-flight would not adversely affect the controllability of the airplane. Accordingly, we propose to remove AD 93–14–19.

DATES: We must receive comments on this proposed AD by August 31, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0582; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposal, any comments received, and other information. The street address for Docket Operations (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Wayne Lockett, Aerospace Engineer, Airframe Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3524; email: *wayne.lockett@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposal. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2018–0582; Product Identifier 2018–NM–085–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

We issued AD 93–14–19, Amendment 39–8644 (58 FR 41177, August 3, 1993) (''AD 93–14–19''), for certain The Boeing Company Model 767–200 and -300 series airplanes. AD 93–14–19 requires visual inspections and either ''Coin Tap'' inspections or ultrasonic inspections for disbonding of the trailing edge wedge of the leading edge slat, and repair, if necessary. AD 93–14–19 resulted from reports of wedge damage or disbonding; in two cases the damage resulted in loss of a portion of the trailing edge wedge. The trailing edge wedge disbonding was caused by moisture ingression at the wedge end seals and in the skin bonds along the spar chords. Moisture in the aluminum honeycomb core would cause corrosion that would eventually result in disbonding between the skin and the aluminum honeycomb core. We issued AD 93–14–19 to prevent the loss of a trailing edge wedge, which could result in reduced maneuver margins, reduced speed margins to stall, and unexpected roll before stall warning, all of which would adversely affect the controllability of the airplane.

Actions Since AD 93–14–19 Was Issued

Since we issued AD 93–14–19, an updated stability and control analysis showed that the worst-case scenario of a trailing edge wedge disbond in-flight would not adversely affect the controllability of the airplane. Simulation analysis shows that the airplane has sufficient lateral control up to the stick shaker to counter the rolling moment caused by a trailing edge wedge loss, at all flap settings. Therefore, the unsafe condition no longer exists on these products worldwide.

FAA's Conclusions

Upon further consideration, we have determined that AD 93–14–19 must be removed. Accordingly, this proposed AD would remove AD 93–14–19. Removal of AD 93–14–19 would not preclude the FAA from issuing another related action or commit the FAA to any course of action in the future.

Related Costs of Compliance

AD 93–14–19 affects approximately 180 airplanes of U.S. registry. The estimated costs for the actions required by AD 93–14–19 for U.S. operators is $79,200, or $440 per airplane. Removing AD 93–14–19 would eliminate those costs.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority.

This proposed AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to transport category airplanes and associated appliances to the Director of the System Oversight Division.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) AD 93–14–19, Amendment 39–8644 (58 FR 41177, August 3, 1993), and adding the following new AD:

The Boeing Company: Docket No. FAA–2018–0582; Product Identifier 2018–NM–085–AD.

(a) Comments Due Date

The FAA must receive comments on this AD action by August 31, 2018.

(b) Affected ADs

This AD removes AD 93–14–19, Amendment 39–8644 (58 FR 41177, August 3, 1993).

(c) Applicability

This AD applies to The Boeing Company Model 767 series airplanes, certificated in any category, line numbers 1 through 488 inclusive.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Related Information

For more information about this AD, contact Wayne Lockett, Aerospace Engineer, Airframe Section, FAA, Seattle ACO Branch, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3524; email: *wayne.lockett@faa.gov.*

Issued in Des Moines, Washington, on June 22, 2018.

Michael Kaszycki,

Acting Director, System Oversight Division, Aircraft Certification Service.

RIN 2120–AA66

Proposed Amendment of Class E Airspace, Belfast, ME

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to amend Class E airspace extending upward from 700 feet above the surface at Belfast Municipal Airport, Belfast, ME, to accommodate airspace reconfiguration due to the decommissioning of the Belfast non-directional radio beacon and cancellation of the NDB approach. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations at this airport. This action also would update the geographic coordinates of this airport.

DATES: Comments must be received on or before August 31, 2018.

ADDRESSES: Send comments on this proposal to: The U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; Telephone: (800) 647–5527, or (202) 366–9826. You must identify the Docket No. FAA–2018–0199; Airspace Docket No. 18–ANE–3, at the beginning of your comments. You may also submit comments through the internet at *http://www.regulations.gov.*

FAA Order 7400.11B, Airspace Designations and Reporting Points, and subsequent amendments can be viewed on line at *http://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC, 20591; telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11B at NARA, call (202) 741–6030, or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Ave., College Park, GA 30337; telephone (404) 305–6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class E airspace at Belfast Municipal Airport, Belfast, NH, to support IFR operations at this airport.

Comments Invited

Interested persons are invited to comment on this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (Docket No. FAA–2018–0199 and Airspace Docket No. 18–ANE–3) and be submitted in triplicate to DOT Docket Operations (see **ADDRESSES** section for the address and phone number.) You may also submit comments through the internet at *http://www.regulations.gov.*

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: ‘‘Comments to FAA Docket No. FAA–2018–0199; Airspace Docket No. 18–ANE–3.’’ The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this document may be changed in light of the comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at *http://www.regulations.gov.* Recently published rulemaking documents can also be accessed through the FAA's web page at *http://www.faa.gov/air_traffic/publications/airspace_amendments/.*

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11B, Airspace Designations and Reporting Points, dated August 3, 2017, and effective September 15, 2017. FAA Order 7400.11B is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11B lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA proposes an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to modify Class E airspace extending upward from 700 feet or more above the surface within an 9.4-mile radius (increased from a 6.4-mile radius) of Belfast Municipal Airport, Belfast, NH, due to the decommissioning of the Belfast NDB, and cancellation of the NDB approach. The airspace redesign would enhance the safety and management of IFR operations at the airport. The geographic coordinates of the airport also would be adjusted to coincide with the FAAs aeronautical database.

Class E airspace designations are published in Paragraph 6005 of FAA Order 7400.11B, dated August 3, 2017, and effective September 15, 2017, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a ‘‘significant regulatory action'' under Executive Order 12866; (2) is not a ‘‘significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, ‘‘Environmental Impacts: Policies and Procedures'' prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11B, Airspace Designations and Reporting Points, dated August 3, 2017, and effective September 15, 2017, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ANE ME E5 Belfast, ME [Amended]

Belfast Municipal Airport, ME
(Lat. 44°24′33″ N, long. 69°00′43″ W)

That airspace extending upward from 700 feet above the surface within a 9.4-mile radius of Belfast Municipal Airport.

Issued in College Park, Georgia, on July 10, 2018.

Ryan W. Almasy,

Manager, Operations Support Group, Eastern Service Center, Air Traffic Organization.

Filing Requirements for Information Returns Required on Magnetic Media (Electronically); Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correction to a notice of proposed rulemaking.

SUMMARY: This document contains a correction to notice of proposed rulemaking (REG–102951–16) that was published in the **Federal Register** on Thursday, May 31, 2018 (83 FR 24948). The proposed regulations are relating to amending rules for determining whether information returns must be filed by using magnetic media (electronically).

DATES: Written or electronic comments and request for a public hearing for the notice of proposed rulemaking at 83 FR 24948, May 31, 2018, are still being accepted and must be received by July 30, 2018.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Michael Hara at (202) 317–6845; concerning the submission of comments and request for a public hearing, Regina L. Johnson, (202) 317–5177 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The notice of proposed rulemaking that is subject of this document is under section 6011 of the Internal Revenue Code.

Need for Correction

As published, the notice of proposed rulemaking (REG–102951–16) contains an error that may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, in the notice of proposed rulemaking (REG–102951–16) that is subject to FR Doc. 2018–11749, beginning on page 24948 in the issue of May 31, 2018, make the following correction in the **SUPPLEMENTARY INFORMATION** section. On page 24949 in the first column, under the caption ‘‘Explanation of Provisions’’, the last line from the bottom of the second full paragraph, the language ‘‘§ 301.6011–2 (c)(1)(iv), Example 4.’’ is corrected to read ‘‘§ 301.6011–2 (b)(4).’’.

Martin V. Franks,

Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel, (Procedure and Administration).

[Docket Number USCG–2018–0343]

RIN 1625–AA00

Safety Zone, S99 Alford Street Bridge—Emergency Grid Replacement Project, Mystic River, Charlestown and Everett, MA

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to establish a temporary safety zone for the navigable waters within 150-yards of the S99 Alford Street Bridge, at mile 1.4 on the Mystic River between Charlestown and Everett, Massachusetts from October 1, 2018 through April 30, 2019. The safety zone is necessary to protect personnel, vessels and the marine environment from potential hazards created during the emergency replacement of the steel grid deck on all four bascule spans of the S99 Alford Street Bridge. This proposed rule would prohibit vessels and persons from being in the safety zone unless authorized by the Captain of the Port Boston or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before August 16, 2018.

ADDRESSES: You may submit comments identified by docket number USCG–2018–0343 using the Federal eRulemaking Portal at *http://www.regulations.gov.* See the ‘‘Public Participation and Request for Comments’’ portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Mark Cutter, Waterways Management Division, U.S. Coast Guard Sector Boston, telephone 617–223–4000, email *Mark.E.Cutter@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR	Code of Federal Regulations
COTP	Captain of the Port
DHS	Department of Homeland Security
FR	Federal Register
NPRM	Notice of proposed rulemaking
§	Section
U.S.C.	United States Code

II. Background, Purpose, and Legal Basis

On April 6, 2018, the City of Boston notified the Coast Guard that the Massachusetts Department of Transportation's Highways Division will be conducting emergency repairs to the S99 Alford Street Drawbridge at mile 1.4 on the Mystic River between Charlestown and Everett Massachusetts from May 2018 through the summer of 2019. The emergency repairs consist of replacing the steel grid bridge decking on all four bascule spans. To complete these repairs by the summer of 2019 and still maintain regional transportation, each side span of the bascule bridge will need to be closed at different times. To make the necessary repairs, workers will need to use barges in the waterway underneath the bridge span to access the side spans. Bridge span closures and use of the waterway underneath the bridge to effectuate the repairs are scheduled to commence on October 1, 2018, and be completed by April 30, 2019.

Hazards from bridge span closures and use of the waterway underneath include heavy lift operations, falling equipment and materials, and construction vessels. The Captain of the Port (COTP) Boston has determined that potential hazards associated with the bridge repairs would be a safety concern for anyone in or on Mystic River waters within 150-yards of the bridge. No vessel or person will be permitted to enter the safety zone without obtaining permission from the COTP Boston or a designated representative. The Coast Guard will notify the public through the Massachusetts Bay Harbor Safety Committee meetings, Boston's Port Operators Group meetings, and Local Notice to Mariners. Moreover, the Coast Guard would issue a Safety Marine Information Broadcast via marine channel 16 (VHF–FM) fourteen (14) days in advance of the commencement of the Safety Zone. If the project is completed before April 30, 2019, enforcement of the safety zone will be suspended and notice given to the public to the greatest extent possible.

The purpose of this rulemaking is to protect personnel, vessels and the marine environment from potential hazards created during repairs on the

S99 Alford Street Bridge, at mile 1.4 on the Mystic River between Charlestown and Everett Massachusetts. The Coast Guard proposes this rulemaking is under authority in 33 U.S.C. 1231.

III. Discussion of Proposed Rule

The Coast Guard proposes to establish a safety zone starting at 12:01 a.m. on October 1, 2018, and to make it effective to 11:59 p.m. on April 30, 2019. The safety zone would cover all navigable waters within 150-yards of the S99 Alford Street Bridge, at mile 1.4 on the Mystic River between Charlestown and Everett Massachusetts. The duration of the zone is intended to ensure the safety of vessels, the maritime public, construction workers, and these navigable waters during the repairs on the S99 Alford Street Bridge over the main channel of the Mystic River. No vessel or person would be permitted to enter the safety zone without obtaining permission from the COTP Boston or a designated representative.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, duration, and time-of-year of the safety zone. We expect the adverse economic impact of this proposed rule to be minimal since we will provide ample notice of the safety zone effective dates and vessels will be able to enter safety zone when construction equipment is not occupying the channel. Although this regulation may have some adverse impact on the public, the potential impact will be minimal because boating season for vessels on the Mystic River usually concludes around mid-October and consequently the amount of traffic in this waterway during the effective period for the safety zone is limited.

This safety zone is of similar dimension and a shorter duration to the one established in 2011 (73916 FR/Vol. 77, NO. 239) for the original rehabilitation of the bridge. The regulatory text we are proposing appears at the end of this document.

Notification of the emergency repairs to the Alford Street Drawbridge and the associated safety zone will be made to mariners through the Massachusetts Bay Harbor Safety Committee meetings, Boston's Port Operators Group meetings, and Local Notice to Mariners. Moreover, the Coast Guard would issue a Safety Marine Information Broadcast via marine channel 16 (VHF–FM) fourteen (14) days in advance of the commencement of the Safety Zone. The rule would allow vessels to seek permission to enter the zone when the channel is not being occupy by construction equipment.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves the establishment of a temporary safety zone extending 150 yards around a bridge to complete emergency repairs to the S99 Alford Street Bridge during a seven month period when boating traffic is minimal on the Mystic River. Normally such actions are categorically excluded from further review under paragraph L60(a) of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 01. A preliminary Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *http://www.regulations.gov.* If your material cannot be submitted using *http://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, visit *http://www.regulations.gov/privacyNotice.*

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at *http://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add a new § 165.T01–0343 to read as follows:

§ 165.T01–0343 Safety Zone, S99 Alford Street Bridge—Emergency Grid Replacement Project, Mystic River, Charlestown and Everett MA.

(a) *Location.* The following area is a safety zone: All navigable waters of the Mystic River between Charlestown and Everett, Massachusetts from surface to bottom, within 150-yards of the S99 Alford Street Bridge, at mile 1.4 on the Mystic River between Charlestown and Everett, Massachusetts.

(b) *Definitions.* As used in this section—

Designated representative means any Coast Guard commissioned, warrant, petty officer, or any federal, state, or local law enforcement officer who has been designated by the Captain of the Port (COTP) Boston, to act on his or her behalf. The designated representative may be on an official patrol vessel or may be on shore and will communicate with vessels via VHF–FM radio or loudhailer. In addition, members of the Coast Guard Auxiliary may be present to inform vessel operators of this regulation.

Official patrol vessels means any Coast Guard, Coast Guard Auxiliary, state, or local law enforcement vessels assigned or approved by the COTP Boston to enforce this section.

(c) *Enforcement period.* This section is enforceable 24 hours a day from 12:01 a.m. on October 1, 2018, through 11:59 p.m. on April 30, 2019. When enforced as deemed necessary by the COTP Boston, vessels will be prohibited from entering this safety zone during the emergency grid replacement on the bridge.

(d) *Regulations.* The general regulations contained in 33 CFR 165.23, as well as the following regulations, apply:

(1) No person or vessel may enter or remain in this safety zone without the permission of the COTP Boston or the COTP's designated representatives. However, any person or vessel permitted to enter the safety zone must comply with the directions and orders of the COTP Boston or the COTP's designated representatives.

(2) To obtain permission required by this regulation, individuals may reach the COTP Boston or a COTP designated representative via Channel 16 (VHF–FM) or 617–223–5757 (Sector Boston Command Center).

(3) *Penalties.* Those who violate this section are subject to the penalties set forth in 33 U.S.C. 1232.

Dated: July 11, 2018.

Eric. J. Doucette,

Captain, U.S. Coast Guard Captain of the Port Boston.

FOR FURTHER INFORMATION CONTACT: Patrick Rooney, U.S. Department of Education, 400 Maryland Avenue SW, Room 3W202, Washington, DC 20202. Telephone: (202) 453–5514. Email: *patrick.rooney@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Section 1118(b)(2) of the ESEA, as amended by the ESSA, contains a new provision for demonstrating compliance with the title I, part A supplement not supplant requirement. Pursuant to section 1601(b)(3)(A) of the ESEA, prior to issuing any regulations that implement the supplement not supplant requirement, the Department must engage in negotiated rulemaking. The Department conducted negotiated rulemaking on draft supplement not supplant regulations in spring 2016 but the negotiating committee did not reach consensus.

Subsequently, on September 6, 2016, the Department published in the **Federal Register** an NPRM (81 FR 61148) proposing regulations relating to the supplement not supplant requirement in title I, part A of the ESEA, as amended by the ESSA. In January 2017, the Department announced that it would not publish final regulations on this requirement. As a result, the Department withdraws its NPRM. We note that this is considered a deregulatory action under Executive Order 13771. Because the Department did not publish final regulations, this withdrawal will have no effect on existing regulations, which do not include provisions implementing the title I, part A supplement not supplant requirement.

Accessible Format: Individuals with disabilities can obtain this document and the NPRM in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) on request to the person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at this site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Dated: July 12, 2018.

Frank Brogan,

Assistant Secretary for Elementary and Secondary Education.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2018–0116; FRL–9980–80—Region 4]

Air Plan Approval; Georgia; Revisions to VOC Definitions and Ambient Air Quality Standards

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: On November 13, 2017, the State of Georgia through the Georgia Environmental Protection Division (EPD), submitted revisions to the Georgia State Implementation Plan (SIP). The Environmental Protection Agency (EPA) is proposing to approve SIP revisions, which modify the State's air quality regulations as incorporated into the SIP. Specifically, the revisions pertain to definition changes, including the modification of the definition of ''volatile organic compounds,'' (VOC) and changes to the State's air quality standards for sulfur dioxide (SO_2), particulate matter (both $PM_{2.5}$ and PM_{10}), carbon monoxide (CO), ozone (O_3), lead (Pb) and nitrogen dioxide (NO_2) to be consistent with the National Ambient Air Quality Standards (NAAQS). EPA is proposing to approve these provisions of the SIP revisions because the State has demonstrated that these changes are consistent with the Clean Air Act (CAA or Act).

DATES: Comments must be received on or before August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R04–OAR–2018–0116 at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Tiereny Bell, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. The telephone number is (404) 562–9088. Ms. Bell can also be reached via electronic mail at *bell.tiereny@epa.gov.*

I. Background

In this rulemaking, EPA is proposing to approve changes into the Georgia SIP, submitted by the State on November 13, 2017. The submission revises Rule 391–3–1–.01, ''Definitions'' by adding t-Butyl acetate (also known as tertiary butyl acetate or TBAC) and 1,1,2,2-Tetrafluoro-1-(2,2,2-trifluoroethoxy) ethane to the list of organic compounds having negligible photochemical reactivity. The definition of VOC is also being updated by removing the recordkeeping requirements for t-Butyl acetate. Finally, the definition of VOC is being revised to include chemical names to clarify previous exemptions. EPA is also proposing to approve changes into the Georgia SIP to amend Rule 391–3–1–.02(4), ''Ambient Air Standards,'' by updating Georgia's air quality standard to be consistent with the NAAQS. The submittal by the State can be found in the docket for this rulemaking at *www.regulations.gov* and is further summarized below. Also on November 29, 2017, EPD submitted a separate SIP revision to make changes to Rule 391–3–1–.03(6), ''Exemption'' under Permits and Rule 391–3–1–.02(7)(a)(1), ''General Requirements'' under Prevention of Significant Deterioration (PSD). EPA will address these changes in a separate notice. Additionally, EPD withdrew from EPA's consideration, Rule 391–3–1–.02(7)(a)2(ix), ''Regulated NSR pollutant'' under PSD, and Rule 391–3–1–.03(8)(c)(16), ''Additional Provisions for $PM_{2.5}$ Non-Attainment Areas'' under Permits.[1]

[1] The State withdrew Rule 391–3–1–.02(7)(a)2(ix), ''Regulated NSR pollutant'' and Rule 391–3–1–.03(8)(c)(16), ''Additional Provisions for $PM_{2.5}$ Non-

II. EPA's Analysis of Georgia's SIP Revisions

a. Revisions to Definitions

Tropospheric ozone, commonly known as smog, occurs when VOC and nitrogen oxides (NO_X) react in the atmosphere in the presence of sunlight. Because of the harmful health effects of ozone, EPA and state governments implement rules to limit the amount of certain VOC and NO_X that can be released into the atmosphere. VOC have different levels of reactivity; they do not react at the same speed or do not form ozone to the same extent. Section 302(s) of the CAA specifies that EPA has the authority to define the meaning of ''VOC,'' and hence what compounds shall be treated as VOC for regulatory purposes.

EPA determines whether a given carbon compound has ''negligible'' reactivity by comparing the compound's reactivity to the reactivity of ethane. It has been EPA's policy that compounds of carbon with negligible reactivity need not be regulated to reduce ozone and should be excluded from the regulatory definition of VOC. *See* 42 FR 35314 (July 8, 1977), 70 FR 54046 (September 13, 2005). EPA lists these compounds in its regulations at 40 CFR 51.100(s) and excludes them from the definition of VOC. The chemicals on this list are often called ''negligibly reactive.'' EPA may periodically revise the list of negligibly reactive compounds to add or delete compounds.

On November 29, 2004,[2] and August 1, 2016,[3] EPA issued final rules revising the definition of VOC by adding new compounds, t-Butyl acetate and 1,1,2,2-Tetrafluoro-1-(2,2,2-trifluoroethoxy) ethane, to the list of those considered to be negligibly reactive compounds, and on February 25, 2016 (81 FR 9339), EPA issued a final rule removing recordkeeping, emissions reporting, photochemical dispersion modeling, and inventory requirements for t-Butyl acetate.[4] The State's November 13, 2017, SIP revision adds t-Butyl acetate and 1,1,2,2-Tetrafluoro-1-(2,2,2-trifluoroethoxy) ethane to the list of negligibly reactive compounds to be consistent with federal and other similar SIP-approved regulations. They are excluded from the VOC definition on the basis that they make a negligible contribution to tropospheric ozone formation. The revision also removes the recordkeeping requirements for t-Butyl acetate and includes the addition of certain chemical names to clarify previous exemptions: Dichloromethane; HFE–7100; HFE–7200; HCOOCH3; and HFE–7300. EPA is proposing to approve this revision because it is consistent with the definition of VOC at 40 CFR 51.100(s).

Pursuant to CAA section 110(l), the Administrator shall not approve a revision of a plan if the revision would interfere with any applicable requirement concerning attainment and reasonable further progress, or any other applicable requirement of the Act. The State's addition of certain chemical names is approvable under section 110(l) because the revision merely clarifies previous exemptions. The State's addition of exemptions from the definition of VOCs, and the removal of recordkeeping, emissions reporting, photochemical dispersion modeling, and inventory requirements for t-Butyl acetate[5] are approvable under section 110(l) because they reflect changes to Federal regulations based on findings that the exempted compounds are negligibly reactive, and additionally for t-Butyl acetate, that there was no evidence it was being used at levels that cause concern for ozone formation, and the data that had been collected under the recordkeeping, emissions reporting, photochemical dispersion modeling, and inventory requirements had proven to be of limited utility in judging it's cumulative impact.

b. Updated NAAQS

The November 13, 2017, SIP submission revises the State's ambient air quality standards to reflect the historical and current NAAQS for SO_2, PM_{10}, $PM_{2.5}$, CO, O_3, Pb, and NO_2. Specifically, the revisions add provisions related to the 2015 ozone NAAQS to the State's regulations, and modify language in the regulations to provide clarity and consistency with the NAAQS.

Sections 108 and 109 of the CAA govern the establishment, review, and revision, as appropriate, of the NAAQS to protect public health and welfare. The CAA requires periodic review of the air quality criteria—the science upon which the standards are based—and the standards themselves. EPA's regulatory provisions that govern the NAAQS are found at 40 CFR 50—*National Primary and Secondary Ambient Air Quality Standards.* In this rule, EPA is proposing to approve the portions of the revisions to the State of Georgia air quality regulations addressing Rule 391–3–1–.02(4), *Ambient Air Standards,* in the Georgia SIP, submitted by Georgia on November 13, 2017. Rule 391–3–1–.02(4) is amended by updating air quality standards to reflect the most recent NAAQS. The SIP submission amending the State of Georgia regulations to incorporate the most recent SO_2, particulate matter (both $PM_{2.5}$ and PM_{10}), CO, O_3, Pb and NO_2 NAAQS can be found in the docket for this rulemaking at *www.regulations.gov* and is summarized below.

i. SO_2

On June 22, 2010, EPA promulgated a revised primary SO_2 NAAQS to an hourly standard of 75 parts per billion (ppb), based on a 3-year average of the annual 99th percentile of 1-hour daily maximum concentrations, and revoked the 24-hour SO_2 NAAQS. *See* 75 FR 35520. Accordingly, in the November 13, 2017, SIP submission, Georgia revised Rule 391–3–1–.02(4)(b) to update its primary air quality standards for SO_2 to be consistent with the NAAQS promulgated by EPA in 2010, with the exception of Rule 391–3–1–.02(4)(b)2 and 391–3–1–.02(4)(b)3.[6] EPA is proposing to approve this change because it is consistent with the SO_2 NAAQS as defined by EPA.

ii. PM

On July 18, 1997, EPA promulgated a new 24-hour primary and secondary NAAQS for $PM_{2.5}$ at a level of 65 micrograms per cubic meter (µg/m^3), based on the 98th percentile of 24-hour $PM_{2.5}$ concentrations averaged over three years. EPA also promulgated a new annual primary and secondary NAAQS for $PM_{2.5}$ at a level of 15.0 µg/m^3, based on the annual arithmetic

Attainment Areas'' on December 1, 2016, and July 26, 2017, respectively. The State also acknowledges this in the response to comment of the pre-hearing in the November 13, 2017, submittal. The information is in the Docket.

[2] In EPA's November 29, 2004, final rulemaking, the Agency adds t-Butyl acetate to the list of excluded compounds from the definition of VOCs. *See* 69 FR 69298.

[3] In EPA's August 1, 2016, final rulemaking, the Agency adds 1,1,2,2-Tetrafluoro-1-(2,2,2-trifluoroethoxy) ethane to the list of excluded compounds from the definition of VOCs. *See* 81 FR 50330.

[4] EPA removed these requirements in part because there was no evidence that TBAC was being used at levels that cause concern for ozone formation and because the data that had been collected under these requirements had proven to be of limited utility in judging the cumulative impacts of exempted compounds. *See* 81 FR 9339.

[5] This current proposed rulemaking does not, and is not intended to, reopen any prior final EPA rulemaking or findings made therein, including EPA's 2004 final rule (69 FR 69298) and EPA's 2016 final rule (81 FR 9339).

[6] The former primary SO_2 NAAQS set forth in 40 CFR 50.4 will continue to apply to an area until one year after the effective date of the designation of that area, pursuant to section 107 of the CAA, for the 2010 SO_2 NAAQS set forth in § 50.17. Therefore, Georgia is asking that EPA not act on the SO_2 NAAQS in Rule 391–3–1–.02(4)(b)2. and Rule 391–3–1–.02(4)(b)3 until final designations are complete for all areas in Georgia for the 2010 SO_2 NAAQS.

mean averaged over three years. *See* 62 FR 38652. On October 17, 2006, EPA revised the 24-hour primary and secondary $PM_{2.5}$ NAAQS to 35 µg/m^3, based on the 98th percentile of 24-hour $PM_{2.5}$ concentrations averaged over three years. At that same time, EPA revoked the annual PM_{10} NAAQS. *See* 71 FR 61144. On December 14, 2012, EPA revised the primary annual NAAQS for $PM_{2.5}$ at a level of 12 µg/m^3, based on the annual arithmetic mean averaged over three years. *See* 78 FR 3085; January 15, 2013. Accordingly, in the November 13, 2017, SIP submission, Georgia revised Rule 391–3–1–.02(4) to update its air quality standards for PM_{10} and $PM_{2.5}$ to be consistent with the NAAQS promulgated by EPA in 1997, 2006, and 2012. EPA is proposing to approve this change because it is consistent with the PM_{10} and $PM_{2.5}$ NAAQS as defined by EPA.

iii. CO

EPA initially established the NAAQS for CO on April 30, 1971. The standards were set at 9 parts per million (ppm), as an 8-hour average, and 35 ppm, as a 1-hour average, neither to be exceeded more than once per year. *See* 36 FR 8186. In 1985, EPA concluded its first periodic review of the criteria and standards for CO. EPA decided not to revise the existing primary standards and to revoke the secondary standard for CO. *See* 50 FR 37484 (September 13, 1985). On August 1, 1994, EPA concluded its second periodic review of the criteria and standards for CO by deciding that revisions to the CO NAAQS were not warranted at that time. Thus, the primary standards were retained at 9 ppm with an 8-hour averaging time, and 35 ppm with a 1-hour averaging time, neither to be exceeded more than once per year. *See* 59 FR 38906.[7] On August 31, 2011, EPA issued a final rulemaking concluding that the CO NAAQS was still requisite to protect public health with an adequate margin of safety and thus retained the CO NAAQS. *See* 76 FR 542494. Accordingly, in the November 13, 2017, SIP submission, Georgia revised Rule 391–3–1–.02(4) to update its air quality standards for CO to be consistent with the current CO NAAQS. EPA is proposing to approve this change because it is consistent with the CO NAAQS as defined by EPA.

iv. O_3

On March 27, 2008, EPA promulgated a new 8-hour primary and secondary NAAQS for ozone at a level of 0.075 ppm (the 2008 8-hour Ozone NAAQS), based on an annual fourth-highest maximum 8-hour concentration averaged over three years. *See* 73 FR 16436. On October 26, 2015, EPA promulgated a new primary and secondary NAAQS for ozone at a level of 0.070 ppm (the 2015 8-hour Ozone NAAQS), based on an annual fourth-highest maximum 8-hour concentration averaged over three years. *See* 80 FR 65292. Accordingly, in the November 13, 2017, SIP submission, Georgia revised Rule 391–3–1–.02(4) to add the 2015 8-hour Ozone NAAQS promulgated by EPA in 2015. EPA is proposing to approve this change because it is consistent with the ozone NAAQS as defined by EPA.

v. Pb

On November 12, 2008, EPA promulgated a new 1-hour primary and secondary NAAQS for Pb at a level of 0.15 µg/m^3, based on a rolling 3-month average. *See* 73 FR 66964. Accordingly, in the November 13, 2017, SIP submission, Georgia revised Rule 391–3–1–.02(4) to update its air quality standards for Pb to be consistent with the NAAQS promulgated by EPA in 2008. EPA is proposing to approve this change because it is consistent with the Pb NAAQS as defined by EPA.

vi. NO_2

On February 9, 2010, EPA promulgated a new 1-hour primary NAAQS for NO_2 at a level of 100 parts per billion (ppb), based on a 3-year average of the 98th percentile of the yearly distribution of 1-hour daily maximum concentrations. *See* 75 FR 6474. Accordingly, in the November 13, 2017, SIP submission, Georgia revised Rule 391–3–1–.02(4) to update its air quality standards for NO_2 to be consistent with the NAAQS promulgated by EPA in 2010. EPA is proposing to approve this change because it is consistent with the NO_2 NAAQS as defined by EPA.

EPA has reviewed the revisions to Rule 391–3–1–.02(4) in the November 13, 2017, SIP submission, including the NAAQS updates for SO_2, PM_{10}, $PM_{2.5}$, CO, O_3, Pb, and NO_2, and has made the preliminary determination that these changes are consistent with the CAA. As mentioned above, EPA is proposing to approve these changes to the NAAQS into the Georgia SIP.

III. Incorporation by Reference

In this document, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference Georgia Rule 391–3–1–.01, ''Definitions,'' effective July 20, 2017, which revises the definition of VOC; and Rule 391–3–1–.02(4), ''Ambient Air Standards,'' effective July 20, 2017, which revises the State's ambient air quality standards to be consistent with the NAAQS. EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 4 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Proposed Action

EPA is proposing to approve the State of Georgia's November 13, 2017, SIP revisions identified in section II above. These changes are consistent with the CAA.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866.
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

[7] EPA initiated the next period review in 1997 but did not conduct rulemaking to complete the review.

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 2, 2018.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[EPA–HQ–SFUND–1983–0002; FRL–9980–73—Region 4]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Whitehouse Oil Pits Superfund Site

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 4 is issuing a Notice of Intent to Delete the Whitehouse Oil Pits Superfund Site (Site) located in Whitehouse, Florida, from the National Priorities List (NPL) and requests public comments on this proposed action. This site is also known as the Whitehouse Waste Oil Pits Site. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the State of Florida (State), through the Florida Department of Environmental Protection (FDEP), have determined that all appropriate response actions under CERCLA, other than operations and maintenance, monitoring and five-year reviews, have been completed. However, this deletion does not preclude future actions under Superfund.

DATES: Comments must be received by August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1983–0002 by one of the following methods:

(1) *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

(2) *Email:* Rusty Kestle, Remedial Project Manager, *kestle.rusty@epa.gov.*

(3) *Mail:* Rusty Kestle, Remedial Project Manager, Superfund Restoration and Sustainability Branch, Superfund Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960.

(4) *Hand delivery:* USEPA Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Attention: Rusty Kestle, Remedial Project Manager, Superfund Restoration and Sustainability Branch. Hours of Operation: Monday to Friday 7:30 a.m. to 4:30 p.m. Phone: 404–562–8819.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–1983–0002. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

(1) USEPA Region 4, 61 Forsyth Street SW, Atlanta, GA 30303–8909, Monday through Friday, 7:30 a.m. to 4:30 p.m., Contact Tina Terrell 404–562–8835; and

(2) West Regional Jacksonville Public Library, 1425 Chaffee Rd. S, Jacksonville, FL 32221, Monday–

Thursday 10:00 a.m. to 9:00 p.m., Friday and Saturday 10:00 a.m.–6:00 p.m., Sunday CLOSED.

FOR FURTHER INFORMATION CONTACT: Rusty Kestle, Remedial Project Manager, Superfund Restoration and Sustainability Branch, Superfund Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, GA 30303–8960, phone 404–562–8819, email: *kestle.rusty@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

The EPA announces its intent to delete the Whitehouse Oil Pits Superfund Site from the NPL and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR part 300 which is the NCP, which the EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. The EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in 40 CFR 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions if future conditions warrant such actions.

The EPA will accept comments on the proposal to delete this site for thirty (30) days after publication of this document in the **Federal Register**.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that the EPA is using for this action. Section IV discusses the Whitehouse Oil Pits Superfund Site and demonstrates how it meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), the EPA will consider, in consultation with the State, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. All appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, the EPA conducts five-year reviews (FYRs) to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. The EPA conducts such FYRs even if a site is deleted from the NPL. The EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to deletion of the Site:

(1) The EPA consulted with the State before developing this Notice of Intent to Delete.

(2) The EPA has provided the State 30 working days for review of this notice prior to publication of it today.

(3) In accordance with the criteria discussed above, the EPA has determined that no further response is appropriate.

(4) The State, through the FDEP, has concurred with deletion of the Site from the NPL.

(5) Concurrently with the publication of this Notice of Intent to Delete in the **Federal Register**, a notice is being published in a major local newspaper, The Florida Times-Union. The newspaper notice announces the 30-day public comment period concerning the Notice of Intent to Delete the site from the NPL.

(6) The EPA placed copies of documents supporting the proposed deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

If comments are received within the 30-day public comment period on this document, the EPA will evaluate and respond appropriately to the comments before making a final decision to delete. If necessary, the EPA will prepare a responsiveness summary to address any significant public comments received. After the public comment period, if the EPA determines it is still appropriate to delete the Site, the Regional Administrator will publish a final Notice of Deletion in the **Federal Register**. Public notices, public submissions and copies of the responsiveness summary, if prepared, will be made available to interested parties and in the Site's information repositories listed above.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter the EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist the EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Intended Site Deletion

The following information provides the EPA's rationale for deleting the Site from the NPL:

Site Background and History

The Whitehouse Oil Pits Superfund Site is an abandoned waste oil sludge disposal facility located in Whitehouse, about 10 miles west of downtown Jacksonville, Duval County, Florida. The Site occupies seven acres west of Chaffee Road, about four tenths of a mile north of U.S. Highway 90. Between 1958 and 1968, Allied Petro Product, Inc. (Allied), disposed of contaminated acidic waste oil sludge from their oil reclaiming operations in seven unlined pits on the Site. Allied operated the Site as a repository for waste oil sludge and acidic oil re-refinery byproducts from 1958 until 1968. The waste oil recovery process used an acid-clay process to form corrosive by-products including waste-acid tar and spent acidic clays. Allied constructed the first pits in 1958 to dispose of waste oil sludge and acid from its oil reclaiming process, and by 1968 the company had constructed and filled seven pits. The EPA later found that the waste contained Polycyclic Aromatic Hydrocarbons (PAHs), Polychlorinated Biphenyls (PCBs) and heavy metals, which impacted soil, groundwater, surface water and sediment. Allied went bankrupt in 1968 and the pits containing wastes were abandoned; the City of Jacksonville assumed ownership of the Site by tax default.

In 1968, the diking around pit number 7 ruptured and spilled waste into the

McGirts Creek tributary and neighboring private properties. The pit was backfilled following this incident. The City of Jacksonville recognized the need to take action to prevent further spread of contamination. The Jacksonville Mosquito Control Branch began building water-oil separators with limestone filters at the Site, but was not able to finish construction due to budget issues. Wastewater from the pits continued to be released into the adjacent wetland area and the McGirts Creek tributary. These releases resulted in contamination of surface water and sediment. In 1976, the Jacksonville Mosquito Control Branch implemented a dike wall reconstruction project at the Site when an estimated 200,000 gallons of waste oil spilled on the adjacent land and creek. On June 29, 1976, the EPA Region 4's Environmental Emergency Branch was contacted by the City of Jacksonville following the 200,000-gallon oil spill. The EPA began the spill assessment and cleanup of McGirts Creek under section 311 of the Clean Water Act, spending about $200,000 in the process. The EPA, in conjunction with the City of Jacksonville, constructed a treatment system to drain the pits.

After draining water from the pits, the Jacksonville Mosquito Control Branch took measures to stabilize the ponds. Since the remaining viscous waste oil sludge would not support heavy construction equipment, the ponds were backfilled with selected construction debris, scrap lumber, trees, wood chips and non-degradable wastes. A three-inch layer of automobile shredder waste was placed on top of these materials. The liquid portion of the waste oil sludge was pumped off, mixed with a stabilizing agent, and then used as a backfill/sealer over the automobile shredder waste. The relatively impervious layer of stabilizing agent and oil was intended to prevent vertical percolation of rainwater. The stabilizing agent and oil mixture was covered with eight to twelve inches of clean earth (mostly sand). After the project ran out of stabilizing agent, local clay was substituted as a landfill capping material. The Site was then planted with local grasses and ditches were constructed to control drainage.

In 1979, monitoring by the City of Jacksonville showed the continuing release of contaminants to surface water and groundwater which the City of Jacksonville attempted to address by covering the surface and sides of the pits and dike with six inches of low-permeability local clay, followed by twelve inches of topsoil. This cover was revegetated using local grasses. The drainage was modified to control leachate seepage into the ditches. The dikes around the pits were strengthened and drop structures were constructed to control flow velocity and erosion in the ditches. The modified drainage configuration diverted surface water away from the landfill, thus reducing the mechanism for contaminant transport. This second stabilization project was completed during the summer of 1980.

On December 30,1982 (47 FR 58476), the Site was proposed for listing on the EPA's NPL. The Site's listing on the NPL was finalized on September 8, 1983 (48 FR 40865). The Site ID is FLD980602767.

Remedial Investigation and Feasibility Study (RI/FS)

In 1983, the Florida Department of Environmental Regulation (FDER), which is now referred to as the FDEP, completed a remedial investigation (RI) under a cooperative agreement with the EPA. The RI characterized Site wastes and the extent of contamination. The Site's RI showed contamination of soil, groundwater, surface water, and sediment with numerous organic compounds, including PAHs and PCBs, and heavy metals. In 1985, the EPA completed a feasibility study (FS), which evaluated risk and remedial alternatives for the Site. The risk assessment indicated that the greater risk was posed by migration of contaminants into drinking water supplies. Several alternative remedies were considered: No action; no action with groundwater monitoring; excavation with variations that included a treatment or offsite disposal of soil, sludges, and sediment and treatment of groundwater; and excavation, extraction, and treatment supplemented by construction of a barrier wall to contain the remaining contaminated media and prevent its leaching into the groundwater and surface water.

Ultimately, several remedies were required over time to address the contamination or prior remedy failures. The remedies were selected in a 1985 Record of Decision (ROD), revised in an amended ROD (AROD) in 1992, and then further revised in the 1998 AROD based on additional investigations and a treatability study. An Explanation of Significant Differences (ESD) was issued in 2001.

Selected Remedies

1985 ROD

Based on the findings of the 1985 RI/FS, the EPA issued a ROD on May 30, 1985. Remedial action objectives (RAOs) defined in the 1985 ROD included:

1. Prevent further migration of contaminated groundwater into the underlying aquitard.
2. Prevent contamination of the local drinking water supply.
3. Reduce or eliminate migration of contamination to surface water.
4. Eliminate the source sludge, treat the source sludge to a less hazardous or non-hazardous state, or contain the release of the hazardous pollutants offsite.
5. Reduce or eliminate the migration of contaminated soils and sediments.

The remedy components included in the 1985 ROD were:

1. Installation of a slurry wall around the Site, isolating the waste.
2. Recovery and treatment of contaminated groundwater within the walled area, thus contributing to waste isolation.
3. Removal of contaminated sediment from the northeast tributary of McGirts Creek and placement within the isolation area.
4. Construction of a surface cap over the Site to reduce the flow of water into the walled area.

The 1985 ROD did not provide a tabulation of specific remediation goals. However, the goals were generally defined to meet the FDER's drinking water standards and surface water quality criteria. Where no cleanup criteria had been established, the cleanup goals were set at background or minimal risk levels.

1992 AROD

The EPA began but suspended implementation of the 1985 remedy for several reasons, including failure of the cap, a determination that the groundwater treatment methodology was inappropriate for the Site, discovery that the analysis of the shallow aquifer was unreliable, and realization that the operations and maintenance costs were grossly underestimated. Moreover, in 1986, Congress amended CERCLA by passing the Superfund Amendments and Reauthorization Act (SARA) which stressed the importance of permanent remedies. As a result, the EPA reevaluated the 1985 remedy and began to search for alternatives that would permanently and significantly reduce the mobility, toxicity, and volume of hazardous substances at the Site. The EPA conducted additional studies between 1989 and 1992. These studies included a baseline risk assessment, a supplemental feasibility study, and a treatability study in 1991 to examine a treatment train of soils washing, biological treatment and stabilization.

The studies led to the EPA's issuance of an AROD on June 16, 1992 (the 1992 AROD). Under the 1992 AROD, the cleanup objectives were to prevent current and future exposure to contaminated groundwater.

The remedy components included in the 1992 AROD were:

1. Excavation of contaminated waste pits.
2. Separation of construction debris, stumps, etc., from contaminated soils and steam cleaning prior to offsite disposal.
3. Volume reduction by soils washing.
4. Biotreatment to biologically degrade wash water contaminants.
5. Stabilization/solidification of biotreated material exceeding cleanup criteria.
6. On-site disposal of washed soils and stabilization/solidification of contaminant fines and sludge.
7. Extraction and treatment of contaminated groundwater using activated carbon and chemical precipitation, with discharge to the northeast tributary of McGirts Creek.
8. Installation and maintenance of a six-inch vegetative cover over the excavated area.
9. Installation and maintenance of a fence around the Site during remedial activities.
10. Implementation of institutional controls (ICs), including deed restrictions.

The 1992 AROD included contingencies if groundwater recovery and treatment were determined to be ineffective. Contingencies included:

1. Containment measures involving engineering controls or long-term gradient controls.
2. Waiver of chemical-specific ARARs for the aquifer based on the technical impracticability of achieving further contaminant reduction.
3. Institutional controls for groundwater.
4. Continued monitoring of on-site and off-site wells.

Cleanup goals were developed for soils and groundwater in the 1992 AROD. Following the signing of the 1992 AROD, the EPA issued special notice letters to initiate negotiations with the potentially responsible parties (PRPs). Because a settlement could not be reached, the EPA proceeded with a fund-lead remedial design. During the design phase for the 1992 AROD remedy, the EPA discovered most of the components of the treatment train identified for source materials would not work. For example, lead concentrations and pH levels encountered in the waste sludge would be toxic to bacteria, rendering biological treatment ineffective. In April 1994, the EPA and the PRPs, the Whitehouse Remedial Action Group (WRAG), signed an Administrative Order on Consent (AOC) under which the PRPs conducted the additional studies. The results of those studies indicated that additional treatability and feasibility studies were required. In January1995, the WRAG agreed to modify the AOC with the EPA to perform the additional work. After completing these additional studies, the WRAG prepared and finalized the supplemental treatability and feasibility study (FS) in July 1997.

1998 AROD

Based on the treatability and feasibility study findings in July 1997, the EPA issued an AROD in September 1998 to incorporate elements of the contingency remedy in the 1992 AROD, as well as elements of the original 1985 ROD. The 1998 AROD addressed all contaminated media at the Site by containing the onsite waste sludge, contaminated soils, wetlands, sediment and groundwater. The remedy's function was to isolate the Site as a source of groundwater and surface water contamination and reduce the risks associated with exposure to the contaminated materials.

The major components of the selected remedy included:

1. In-situ stabilization/solidification treatment of lifts 1 (topsoil and clay) and 2 (thin layer of shredded foam rubber and plastic overlying a layer of sawdust, wood chips, dimensional lumber, debris and silty sand) with a geogrid to enhance structural stability.
2. Installation of a slurry wall (slurry wall or geosynthetic sheet pile wall) to isolate and contain contaminated soils, sludge, wetlands, sediments and groundwater.
3. Installation of a lime curtain inside the containment system to adjust groundwater pH.
4. Construction of a low permeability cap over the contained area that meets Resource Conservation and Recovery Act (RCRA) closure requirements under 40 CFR 264.228(a)(2).
5. Realignment of the McGirts Creek tributary to optimize the area of groundwater containment.
6. Extension of the municipal water supply to residents along Machelle Drive and Chaffee Road and plugging of private supply wells.
7. Installation of a permanent security fence around the containment area and installation and maintenance of appropriate storm water management controls.
8. Monitored natural attenuation of contaminated groundwater outside the containment system.
9. Sampling of offsite surface soils and downstream surface water and sediment during design to determine if additional measures are necessary.
10. Imposition of deed restrictions to control future land and groundwater use.

The AROD established cleanup goals for groundwater and soils based on federal or state primary maximum contaminant levels (MCLs) or risk based numbers. These cleanup goals and the source of the cleanup level can be found Tables 8–1 and 8–2 of the Final Risk Assessment, dated September 1, 1991, and Table 2–1 of the Final Remedial Action Report. Soils contaminants of concern addressed by the remedy include organic compounds (Benzene, Benzo(a)pyrene, Bis (2-Ethyl Hexyl) Phthalate, Chlorobenzene, 1,4-Dichlorochlorobenzene, Di-N-Butyl Phthalate, Methylene Chloride, Polychlorinated Biphenyls (PCB) 1260, 2-Methylnaphthalene, Naphthalene, Phenol, Tetrachloroethene, Toluene and Trichloroethene) and inorganic compounds (Antimony, Arsenic, Barium, Cadmium, Chromium, Copper, Lead and Nickel). Groundwater contaminants of concern include organic compounds (Acetone, Benzene, Benzo(a)pyrene, Bis (2-Ehtyl Hexyl) Phthalate, Carbon Disulfide, Di-N-Butyl Phthalate, Ethylbenzene, Methyl Ethyl Ketone, 3/4 Methylphenol, Naphthalene, 2-Methylnaphthalene, Phenol, Toluene, Trichloroethene and Xylene) and inorganic compounds (Antimony, Arsenic, Barium, Cadmium, Chromium, Copper, Lead, Manganese, Nickel, Selenium, Vanadium and Zinc).

2001 ESD

An ESD was issued in 2001 to remove the lime curtain from the selected remedy due to concerns that it might adversely affect the sodium based slurry wall. The ESD also increased the size of the slurry wall, size of the cap, and area of the tributary to be realigned based on the discovery of additional contamination.

Remedial action objectives (RAOs) established in the 1985 ROD and adopted in the 1998 AROD address groundwater, surface water, sludge, sediment and soils. The 2001 ESD did not alter the original RAOs. The RAOs include:

1. Prevent further migration of contaminated groundwater into the underlying aquitard.
2. Prevent contamination of the local drinking water supply.

3. Reduce or eliminate migration of contamination to surface water.
4. Eliminate the source sludge, treat the source sludge to a less hazardous or non-hazardous state, or contain the release of the hazardous pollutants off site.
5. Reduce or eliminate the migration of contaminated soils and sediments.

Response Actions

Response actions are discussed above. Construction of the remedy began in 2003 and was completed in May 2007 with the finalization of the Remedial Action Report. The City of Jacksonville, now the owner of the property comprising the Site, entered into a restrictive covenant with FDEP on January 27, 2011. This institutional control restricts activities on the property and the future use of the property.

Cleanup Levels

Groundwater sampling events have occurred at the Site since August 2006 when the first year of operations maintenance and monitoring (OM&M) began and have continued over the last ten years under the thirty-year OM&M Plan. The groundwater levels are determined inside the barrier wall and groundwater levels and monitoring data are collected at monitoring wells outside of the barrier wall. Contaminants 1,4-dichlorobenzene, chlorobenzene, methylene chloride, tetrachloroethene, di-n-butyl phthalate, and PCB–1260 were sampled for during the first quarter of groundwater sampling. The sampling verified that these contaminants were not found at detectable levels outside of the barrier wall and would not require monitoring during future sampling. Manganese has been detected at levels slightly above the State of Florida secondary MCL of 50 ppb upgradient and downgradient of the contaminant source. Therefore, the elevated manganese levels are not thought to be Site related. Monitoring for manganese will continue and action will be taken if levels continue to be elevated and are determined to be Site related. All other groundwater COCs were monitored regularly over the last ten years and their detected levels were below cleanup levels; this includes groundwater arsenic concentrations which have largely been below 1 µg/L. The highest reading was less than 2 µg/L which is well below the current MCL of 10 µg/L. Groundwater is the only media that is monitored at the Site because the remaining contamination in soils and sediment is contained within a barrier wall and cap that prevents lateral contaminant migration.

Operations, Monitoring and Maintenance (OM&M)

The OM&M Plan for the Site was approved by the EPA and OM&M activities began in July 2006, and continue to this day. The scope of the OM&M Plan included monthly Site inspections to monitor the following components, except for passive gas management (quarterly) and wetland planting monitoring (semi-annual):

1. Closure cap.
2. Passive gas management system.
3. Storm water management system.
4. Created wetland planting areas.
5. Site security system.
6. Groundwater monitoring system.

In addition to inspecting the remedial components above, the cap is mowed on a quarterly basis. Originally, water levels of wells inside and outside of the barrier wall were monitored on a monthly basis to evaluate the performance of the barrier wall. Groundwater wells were sampled semi-annually for Volatile Organic Compounds (VOCs), Semi-Volatile Compounds (SVOCs) and metals. In April 2013, the EPA and FDEP agreed that sampling could be limited to metals. Now, the monitoring program consists of semi-annual monitoring of 23 wells for metals only and semi-annual water level monitoring of 23 wells and 6 piezometers. At this time, all sampling data are below cleanup criteria. The Site is owned by the City of Jacksonville, which is part of the WRAG PRP group. ICs are maintained by the PRP group through OM&M inspections. City/county zoning and permitting requirements for land and groundwater use in the area add another layer of protection.

Five-Year Reviews (FYR)

Pursuant to CERCLA section 121(c), 42 U.S.C. 9601 *et seq.,* and the EPA's FYR Guidance, statutory FYRs are required for the Whitehouse Oil Pits Superfund Site because the completed remedy does not allow for unlimited use and unrestricted exposure. The first FYR was completed on November 13, 2008, which was five years after onsite construction activities began. The second FYR was signed on May 7, 2014 and indicated that the remedy was still protective of human health and the environment. A multilayered cap covers all impacted soils; a barrier wall contains the contaminated groundwater; and the municipal water supply was extended to residents who live near the Site. The cap, together with the containment provided by the slurry wall, prevents contamination from entering the groundwater and migrating offsite into the soil, groundwater, surface water, and sediment.

The 2014 FYR stated the remedy was protective only in the short term and included two issues and recommendations. The Operations, Maintenance and Monitoring (OM&M) Plan did not include contingency activities to address groundwater overtopping the containment area and internal flow gradients had not been adequately monitored to assess the structural integrity of the containment system. Recommendations were made to continue to monitor metals concentrations in the groundwater and to modify the OM&M Plan. The OM&M Plan was modified in June 2015 to include more specific contingency actions to address groundwater overtopping the containment area and include monitoring of groundwater flow gradients inside and outside the barrier wall to assess the effectiveness of the containment remedy. Monitoring of groundwater for metals continues. Required actions were completed to make the Site protective of human health and the environment. However, the EPA does not consider groundwater overtopping the containment area to be a justifiable concern for several reasons: (1) The average depth of the barrier wall was designed to extend through the full depth of the surficial unconfined aquifer and key into the underlying semi-confining strata (estimated to be 40 ft.), thus, there can be no lateral or vertical movement of groundwater into the containment area; (2) the entire Site is covered with a multi-layered cap system with a permeability of at least 1E–07 intended to shed any rainwater falling on the cap; (3) the cap system has a network of internal drains which carry any flows penetrating the cap to the ditch system surrounding the cap; and (4) there is no evidence that groundwater levels within the barrier wall are trending up. The Site will continue to be monitored as part of the OM&M Plan and the next FYR is due May 2019.

Community Involvement

Community involvement activities were undertaken throughout the thirty-year history of the Site in the form of public meetings, FYR interviews and Site update mail-outs. There are currently no major community concerns about the Site. The FYR community involvement process will continue to monitor any potential community concerns.

The residents of the surrounding neighborhood stated in the 2013 Site interviews that they are concerned about periodic flooding that occurs in their yards after heavy rains. However, the main factor that is contributing to flooding in the McGirts Creek floodplain is not Site related; the construction of dams by beavers in McGirts Creek is responsible for flooding problems in the area. In the past, the beaver dams were removed by the Site contractors as a courtesy, but has never been part of the actual OM&M Plan requirements. The beaver dam issue has been communicated to the residences of the surrounding neighborhood and the residents are responsible for taking any action to remove beaver dams in the future.

Determination That the Site Meets the Criteria for Deletion in the NCP

The implemented remedy achieves the degree of cleanup and protection specified in the RODs for the Site for all pathways of exposure. The selected remedy at the Site is protective of human health and the environment because all exposure pathways that could result in unacceptable risks are being controlled. Contamination remaining onsite is being contained to the capped portion. The barrier walls were designed and constructed to contain the contamination and prevent any lateral or vertical movement of groundwater in or out of the containment area; ICs are in place in the form of land and groundwater use restrictions. These ICs are in the form of a Declaration of Restrictive Covenant executed between FDEP and the City of Jacksonville. This IC was executed on the 2nd of February 2011, and restricts activities on the property and the future use of the property. All selected remedial and removal actions, remedial action objectives, and associated cleanup goals are consistent with the EPA policy and guidance; the EPA has followed the procedures required by 40 CFR 300.425(e) and these actions, objectives and goals have all been achieved and, therefore, no further Superfund response is needed to protect human health and the environment.

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the Naval Industrial Reserve Ordnance Plant Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notification of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 5 is issuing a Notice of Intent to Delete Operable Unit 3 (OU3) of the Naval Industrial Reserve Ordnance Plant (NIROP) Superfund Site (Site), located in Fridley, Minnesota, from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). EPA and the State of Minnesota, through the Minnesota Pollution Control Agency (MPCA), have determined that all appropriate response actions at the OU, identified under CERCLA, other than operation, maintenance, and five-year reviews, have been completed. However, this partial deletion does not preclude future actions under Superfund. This partial deletion pertains to the OU3 portion of the NIROP Site, which includes all the unsaturated soils underlying the former Plating Shop Area of the NIROP Superfund Site.

DATES: Comments must be received by August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1989–0007, by mail to Randolph Cano, NPL Deletion Coordinator, U.S. Environmental Protection Agency Region 5 (SR–6J), 77 West Jackson Boulevard, Chicago, IL 60604. Comments may also be submitted electronically or through hand delivery/courier by following the detailed instructions in the **ADDRESSES** section of the direct final rule located in the Rules section of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: Randolph Cano, NPL Deletion Coordinator, U.S. Environmental Protection Agency Region 5 (SR–6J), 77 West Jackson Boulevard, Chicago, IL 60604, (312) 886–6036, email: *cano.randolph@epa.gov.*

SUPPLEMENTARY INFORMATION: In the ''Rules and Regulations'' section of this issue of the **Federal Register**, we are publishing a direct final Notice of Partial Deletion for OU3 of the NIROP Superfund Site without prior Notice of Intent for Partial Deletion because EPA views this as a noncontroversial revision and anticipates no adverse comment. We have explained our reasons for this partial deletion in the preamble to the direct final Notice of Partial Deletion, and those reasons are incorporated herein. If we receive no adverse comment(s) on this partial deletion action, we will not take further action on this Notification of Intent for Partial Deletion. If we receive adverse comment(s), we will withdraw the direct final Notice of Partial Deletion, and it will not take effect. We will then, as appropriate, address all public comments in a subsequent final Notice of Partial Deletion based on this Notification of Intent for Partial Deletion. We will not institute a second comment period on this Notification of Intent for Partial Deletion. Any parties interested in commenting must do so at this time.

For additional information, see the direct final Notice of Partial Deletion which is located in the ''Rules and Regulations'' section of this issue of the **Federal Register**.

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Dorney Road Landfill Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region III is issuing a Notice of Intent to Delete the Dorney Road Landfill Superfund Site (Site) located in Longswamp and Upper Macungie Townships, in Berks and Lehigh Counties, Pennsylvania from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the Commonwealth of Pennsylvania (the Commonwealth), through the Pennsylvania Department of Environmental Protection (PADEP), have determined that all appropriate response actions under CERCLA, other than operation and maintenance (O&M), monitoring, and Five-Year Reviews, have been completed. However, this deletion would not preclude future actions under Superfund.

DATES: Comments must be received by August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–SFUND–2005–0011, by one of the following methods:

- *http://www.regulations.gov* Follow on-line instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*
- *Email: greaves.david@epa.gov.*
- *Mail:* U.S. EPA Region III, 1650 Arch Street, Philadelphia, PA 19103.
- *Hand delivery:* U.S. EPA Region III, 1650 Arch Street, Philadelphia, PA 19103. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA–HQ–SFUND–2005–0011. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

U.S. EPA Region III Administrative Records Room, 1650 Arch Street—6th Floor, Philadelphia, PA 19103–2029, Business Hours: Monday through Friday, 8:00 a.m.–4:30 p.m.; by appointment only

Local Repository, Upper Macungie Township Building, 8330 Schantz Road, Breinigsville, PA 18031, Business Hours: Monday through Friday, 7:30 a.m.–4:00 p.m.

FOR FURTHER INFORMATION CONTACT: David Greaves, Remedial Project Manager, U.S. Environmental Protection Agency, Region 3, 3HS211650 Arch Street Philadelphia, PA 19103, (215) 814–5729, email: *greaves.david@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

EPA Region III announces its intent to delete the Dorney Road Landfill Superfund Site from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in 40 CFR 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions if future conditions warrant such actions.

EPA will accept comments on the proposal to delete this Site for thirty (30) days after publication of this document in the **Federal Register**.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Dorney Road Landfill Superfund Site and demonstrates how it meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the Commonwealth, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts five-year reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such five-year reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to deletion of the Site:

(1) EPA consulted with the Commonwealth before developing this Notice of Intent to Delete.

(2) EPA has provided the Commonwealth 30 working days for review of this notice prior to publication of it today.

(3) In accordance with the criteria discussed above, EPA has determined that no further response is appropriate.

(4) The Commonwealth of Pennsylvania, through the Pennsylvania Department of Environmental Protection (PADEP), has concurred with deletion of the Site from the NPL.

(5) Concurrently with the publication of this Notice of Intent to Delete in the **Federal Register**, a notice is being published in a major local newspaper, the *Reading Eagle.* The newspaper notice announces the 30-day public comment period concerning the Notice of Intent to Delete the Site from the NPL.

(6) The EPA placed copies of documents supporting the proposed deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

If comments are received within the 30-day public comment period on this document, EPA will evaluate and respond appropriately to the comments before making a final decision to delete. If necessary, EPA will prepare a Responsiveness Summary to address any significant public comments received. After the public comment period, if EPA determines it is still appropriate to delete the Site, the Regional Administrator will publish a final Notice of Deletion in the **Federal Register**. Public notices, public submissions and copies of the Responsiveness Summary, if prepared, will be made available to interested parties and in the site information repositories listed above.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Site Deletion

The following information provides EPA's rationale for deleting the Site from the NPL:

Site Background and History

EPA proposed the Dorney Road Landfill Superfund Site (Site) (CERCLIS ID PAD980508832) to the NPL on September 8, 1983 (48 FR 40674) and added the Site as final on the NPL on September 21, 1984 (49 FR 37070). The Site is located along the southwest boundary of Upper Macungie Township in Lehigh County, PA, with a small portion of the Site extending into Longswamp Township in Berks County.

The 27-acre Site consists of an abandoned iron mine pit that was used as a landfill, a surrounding soil berm, and adjacent land. Beginning in 1962, the Site was operated as an open dump, with the majority of waste disposed in an abandoned mine pit. The landfill was expanded to except a variety of household and industrial waste from regional municipalities and local businesses, until operations ceased in December 1978.

In all areas of the Site, except for the northwestern portion, the water table occurs in the bedrock near or below the bedrock/overburden interface. The overburden is approximately 70 feet thick. The landfill waste is contained within the overburden. The water table exists within the overburden areas of relatively thick overburden and in the bedrock where the overburden is relatively thin. The water table is not in contact with the waste material. The direction of regional groundwater flow in the bedrock-overburden aquifer is generally from the northwest to the southeast.

In January 1970, the Pennsylvania State Health Center notified the landfill owner that the landfill constituted a public health threat and required the owner to compact the fill and apply cover to the landfill. A follow-up letter stated that the owner did not comply with the directive. In June 1970, a representative from the Pennsylvania Department of the Environmental Resources (PADER, formerly, the Pennsylvania State Health Center) visited the landfill and noted the approximate location of an on-site area used for the disposal of sludge. Other visits identified the disposal of petroleum products, asbestos, and battery casings.

Contaminants in the leachate and groundwater included ketones, vinyl chloride, trichloroethene (TCE), benzene, heavy metals, and arsenic. Soils contained the pesticide dieldrin, as well as lead and chromium. The apparent source of contamination was the waste buried and dumped on the soil at the landfill.

In 1986, EPA performed an Emergency Removal Action at the Site to ensure that landfill-related materials were not transported off of the property by storm water. The removal action consisted of re-grading the Site to prevent surface water runoff. The construction of on-site ponds allowed for controlled discharge of surface water via two major spillways. Although a soil cover was applied to portions of the Site, the landfill had never been graded and capped, and waste continued to be exposed in some areas.

Remedial Investigation and Feasibility Study (RI/FS)

The Site consists of two operable units (OUs). OU1 addresses the source of the contamination by capping the landfill. OU2 focuses on addressing groundwater contamination which is the principal exposure pathway.

A Cooperative Agreement was signed between EPA and PADER, and PADER became the lead agency for work in the RI/FS phase. The OU1 RI was performed from January to June 1988. Due to difficulties encountered during Phase I activities, additional data needs were identified and investigative activities were proposed as a Phase II RI effort. Results of the OU1 RI were presented in the Final Remedial Investigation Report for OU1 dated August 11, 1988. A Feasibility Study for OU1, focusing on the landfill waste, was also submitted in August 1988. The OU2 RI/FS was performed by PADER from March to July 1991. The study focused on the groundwater and primarily consisted of additional sampling of wells installed during the OU1 RI.

Major field activities conducted during Phase I of the OU1 RI included:

- Air sampling;
- On-site surface water and seep sampling;
- On-site sediment sampling;
- On-site and off-site, surface and subsurface soil sampling;
- Monitoring well installation;
- Groundwater monitoring well and residential well sampling;
- Hydraulic conductivity testing;
- Fracture trace analysis;
- Surface geophysical investigation.

The major field activities performed during Phase II of the OU1 RI included:

- Installed one deep well off-site (MW–6) to the southeast to obtain downgradient groundwater data.
- Installed an off-site well nest (MW–7/7D) to the northwest of the landfill to provide additional groundwater quality data and flow information.
- Installed on-site boring (TB–LMW–4) to determine the thickness of gravel between the base of the refuse and the top of the bedrock.
- Installed four borings (TB–1,2,3,4) along the southeast corner of the site to identify the presence or absence of a shallow groundwater zone identified during the OU1 Phase I RI.
- Obtained six additional groundwater samples (MW–6, 7, 7D, two rounds) and analyzed for unfiltered metals.
- Performed borehole geophysics in off-site wells (MW–2D, 3D, 4, 5D, 6, 7, 7D). Borehole geophysics were performed to supplement the minimal lithological data obtained during the OU1 Phase 1 and Phase II RI drilling and well installation activities due to difficulty in drilling and poor recoveries.

Air sampling was performed to determine the quantity and quality of ambient airborne contaminants to evaluate the potential exposure to on-site workers and neighboring populations. The data was used to determine the appropriate level of protection on-site, and to establish the exclusion, contamination reduction, and support zone delineations used during the field activities.

A fracture trace analysis was performed to provide information on the number, size, frequency and orientation of bedrock joints, fractures, and large-scale lineaments. The data was used for determining monitoring well locations and for evaluation of the potential for contaminant migration through bedrock.

A geophysical investigation (seismic refraction survey) was performed to obtain information on the thickness of overburden and the depth to bedrock, the thickness of the landfill waste, the condition of the bedrock at the iron mine pit, and to verify any lineaments previously identified.

Sampling and analysis of the on-site ponds was performed to collect data on the contaminant concentrations in the standing liquid and bottom sediments. The data was used to estimate the extent and degree of contamination and estimate the volumes of liquid and soil to be treated and/or removed.

Soil sampling was performed to provide data on the chemical characteristics of soils both on-site and off-site, to determine the degree of off-site migration of contamination, and to provide data concerning the on-site vertical and horizontal extent of contamination. For comparison to on-site data, a background sample was collected approximately 900 ft. west of the Site and was assumed to be isolated from any site-related conditions. On-site soils exceeded EPA's acceptable levels for both cancer risk and non-cancer hazard index primarily due to polycyclic aromatic hydrocarbons (PAHs), arsenic, lead and chromium. Contaminants in leachate and groundwater included ketones, 1,1-dichloroethene (1,1-DCE), 1,2-dichloroethane (1,2-DCA), TCE, tetrachloroethylene (PCE), vinyl chloride, benzene and arsenic. Both cancer and non-cancer groundwater risk substantially exceeded EPA's acceptable criteria. Risk at the Site was due to dermal contact and incidental ingestion of landfill soil, solid waste and on-site ponded waters (OU1) and residential exposure via ingestion of contaminated groundwater and inhalation of volatile contaminants while showering (OU2).

Selected Remedy

On September 29, 1988, the Acting Regional Administrator signed a Record of Decision (ROD) for OU1. The Selected Remedy in the 1988 OU1 ROD consists of the following components:

- Elimination of on-site ponded waters
- Regrading
- Pennsylvania-Type Multi-layer Cap
- Run-on/Run-off Controls
- Run-off Monitoring
- Groundwater Monitoring
- Perimeter Fence
- Deed Notice

The Remedial Action objectives (RAOs) were not explicitly stated in the ROD for OU1. The following RAOs were inferred:

- Control contaminant migration off-site by containment of contaminated landfill soil and waste material;
- Prevent dermal contact and incidental ingestion; and
- Prevent continued leaching of precipitation and ponded waters through the contaminated landfill material.

On September 18, 1991, the Regional Administrator signed an Explanation of Significant Differences (ESD) for OU1. The 1991 ESD was issued to address compliance with wetlands Applicable or Relevant and Appropriate Requirements (ARARs). The Selected Remedy in the 1988 OU1 ROD required the destruction of approximately seven acres of wetlands during construction of the cap. The 1991 ESD allowed the sedimentation ponds required to control run-on/run-off from the cap to also mitigate the destroyed wetlands and become a quality habitat for the varied wildlife at the Site.

On September 30, 1991, the Regional Administrator signed a ROD for OU2 (1991 OU2 ROD), selecting a remedy with the following major components:

- Wellhead treatment units to be provided to residences if levels of site-related contaminants exceeded federal Maximum Contaminant Levels (MCLs);
- Groundwater monitoring.

The RAO for OU2 was not explicitly stated in the 1991 OU2 ROD; however, the RAO is inferred to be to eliminate exposure to contaminated groundwater.

Response Actions

In September 1990, EPA issued a Unilateral Administrative Order (UAO), EPA Docket No. III–90–45–DC, to seven Potentially Responsible Parties (PRPs) after negotiations were unsuccessful. A second UAO, EPA Docket No. III–91–26–DC, was issued to an eighth PRP on January 25, 1991, and a third UAO, EPA Docket No. III–92–33–DC, was issued to five additional PRPs on August 13, 1992. The UAOs required the PRPs to implement the Selected Remedy described in the 1988 OU1 ROD. The modifications to the Selected Remedy specified in the September 18, 1991 ESD were incorporated into the UAOs. The Remedial Design (RD) was approved in June 1995.

The Remedial Action (RA) for OU1 began in April 1998. The major components of the RA included the following:

- Site clearing which included removal of ponded water, clearing of vegetative cover, chipping woody vegetation, and relocation of fugitive surface debris under the cover system;
- Monitoring well abandonment;
- Gas trench construction, which was designed to minimize the lateral flow of landfill gas outside the landfill limits below the surface. The design included a peripheral gas collection trench just beyond the lateral extent of the landfill;
- Landfill regrading to achieve the grades and slopes for the acceptance of the cover system;
- Subgrade preparation which involved grading and placement of compacted general fill;
- Construction of a gas vent layer on top of the landfill. A geocomposite was used as a gas vent layer on the side slopes of the landfill.
- Gas vent collection piping system consisting of flexible 4-inch perforated High Density Polyethylene (HDPE) pipe along the top of the gas trench connected to seventeen 4-inch HDPE conveyance pipes which were connected to seventeen peripheral passive vents along the crest of the cap. On the surface of the cap, an additional fourteen passive vents were installed with four horizontal perforated flexible HDPE feeder pipes to collect the gas and vent it passively through vent pipes;
- A geotextile was placed over the gas venting layer prior to installation of the grading layer;
- Two types of geomembrane were installed. A 40-millimeter smooth HDPE geomembrane was installed where the slopes were minimal and a 40-millimeter textured HDPE geomembrane was installed on the embankment slopes along the periphery of the landfill;
- On the top of the landfill, a geotextile cushion layer was placed over the geomembrane to protect it from the overlying sand drainage layer;
- A sand drainage layer was put in place and another separation geotextile was put on top of the drainage layer;
- An 18-inch layer of compacted general fill on the cover system and 24-inches of general fill on the cover system slopes serve as protection layer over the underlying system;
- A vegetative layer was the final cover;
- Surface drainage was designed with five basic drainage patterns. These patterns were rough graded during initial landfill grading operations and incorporated as part of the temporary erosion sediment control plan. Permanent drainage incorporated the use of stormwater pipes, riprap channels and natural drainage systems;
- A replacement wetland was constructed, which also serves as a stormwater drainage area; and
- A chain link security fence was installed with proper signage.

The contractor conducted the RA basically as designed, with only minor modifications. One modification had to be made for the construction of the wetlands. The west pond contained a large rock which had to be excavated with a rock hammer and processed using a rock crusher. This generated approximately 30,000 cubic yards of fill that was used on the general fill layer of the landfill cap. Another modification was with the placement of the fence on Dorney Road. A variance was needed from the Township to construct the fence closer to the street than 6 feet in order to avoid puncturing the cap with the fence posts. The variance was granted and the fence was installed according to the specifications.

EPA, PADEP and the U.S. Army Corps of Engineers (COE) conducted a pre-final inspection on September 20, 1999. The inspection resulted in a schedule for the contractor to correct some minor construction items.

EPA issued a UAO for the OU2 RD/RA, EPA Docket No. III–92–27–DC, to twelve PRPs on August 18, 1992. The baseline residential well sampling for OU2 was conducted during the first two weeks of March 1999. The 1991 OU2 ROD and RD required residential groundwater samples to be compared to federal MCLs. If the sampling results were above the MCLs, wellhead treatment units would be required. The baseline results were below the MCLs at all residential wells and no wellhead treatment units were installed. Residential monitoring is ongoing. The operation and maintenance plans (O&M Plans) for OU1 and OU2 were approved by EPA and PADEP in October 1997 and September 1996, respectively. The Preliminary Closeout Report (PCOR) was issued for the Site on September 28, 1999. The PCOR documents that construction activities were completed at the Site in accordance with *Closeout Procedures For National Priorities Sites (OSWER Directive 9320.2–09A–P).*

Cleanup Levels

Groundwater monitoring is performed in accordance with the 1988 OU1 ROD and 1995 OU1 O&M Plan at the landfill monitoring well network and in accordance with the 1991 OU2 ROD and 1996 O&M Plan at the residential well monitoring network.

Landfill monitoring is conducted to detect any changes in groundwater quality due to leaching of landfill contaminants. The landfill monitoring network consists of the following wells: MW–2S, MW–2DR, MW–3S, MW–7S, MW–11S and MW–11D. During each sampling event, groundwater samples are analyzed for volatile organic compounds (VOCs) and dissolved metals. Field activities, groundwater elevation data, groundwater quality data and the results of the data validation are presented in each summary report. A summary of all historical data is also presented in the summary reports.

During the 2013–2017 period, several metals were detected in the landfill monitoring wells. The detected VOCs included PCE, TCE, and chloromethane. All detections during the 2013–2017 period were within the historical range of concentrations and remain very low. Most are well below MCLs except for manganese, mercury and thallium in MW–7S and thallium in MW–3S. MW–7S is up gradient of the landfill and these exceedances do not appear to be site related. Thallium was only detected in MW–3S during two sampling events in 2016, but had not been detected previously or in subsequent sampling events. Based on a review of historical monitoring from 2013 to 2017 from all other monitoring wells, there have been no exceedances of MCLs during this period.

The 1988 OU1 ROD did not select chemical-specific ARARs for groundwater. Instead, the 1988 OU1 ROD required groundwater monitoring upgradient and downgradient of the Site to detect any changes in groundwater quality due to the potential leaching of landfill contaminants into groundwater. As indicated above, detections of Site-related compounds in groundwater are generally below the respective MCLs and have remained consistent with historic groundwater sampling results. Therefore, no impacts to groundwater as a result of leaching of landfill contaminants have been observed and the groundwater cleanup goal established in the 1988 OU1 ROD has been achieved.

Residential wells are sampled quarterly on a rotating basis so the same wells are not sampled every event. Groundwater samples are collected from an inside or outside spigot and analyzed for VOCs. Twenty-eight residential wells were sampled between the 2013 and 2017. Of those 28 wells, 14 wells had one or more detections of VOCs. The most commonly detected VOC is PCE. The PCE concentrations are consistent with historical concentrations at these locations. Chloroform was detected at two locations in 2016 and TCE was detected once in 2013. All detections from 2013 to 2017 have been well below respective MCLs and have never exceeded MCLs during any monitoring event.

The 1991 OU2 ROD waived the Pennsylvania Hazardous Waste Management Regulations [25 PA Code §§ 264.90–264.100, specifically 25 PA Code § 264.97(i) and (j) and § 264.100(a)(9)], which require remediation of groundwater to background levels, as well as the requirement to remediate groundwater to federal Maximum Contaminant Levels (MCLs) under the Safe Drinking Water Act, 42 U.S.C. 300g-l and set forth in 40 CFR 141.61. These ARARs were waived in accordance with CERCLA (42 U.S.C. 9621(d)(4)(C)) and the NCP (40 CFR 300.430(f)(1)(ii)(C)(3)) due to technical impracticability of achieving background levels (from an engineering perspective) and MCLs throughout the groundwater contaminant plume. As indicated above, detections of Site-related compounds in groundwater are generally below the respective MCLs in Site monitoring wells.

The 1991 OU2 ROD required that MCLs be met for Site related contaminants of concern (COCs) at the tap prior to use of the groundwater by nearby residents. Wellhead treatment systems would be provided if any Site related MCL exceedances were identified. As indicated above, no Site-related compounds exceeded MCLs in any residential samples during the most recent Five-Year Review period from 2013 to 2017. Additionally, no Site related COCs have been identified in any residential samples above MCLs since sampling began in 1999. Therefore, the RAO of eliminating exposure to contaminated groundwater has been achieved. Residential monitoring will continue to ensure that groundwater cleanup goals continue to be met.

Operation and Maintenance

The PRP group conducts long-term monitoring and maintenance activities at the Site in accordance with the EPA-approved August 1995 OU1 O&M Plan and January 1996 OU2 O&M Plan. The primary activities associated with O&M include the following:

- Visual inspection of the cap with regard to vegetative cover, settlement, stability, and any need for corrective action. In addition, the cap is scheduled for periodic mowing;
- Inspection of the drainage swales for blockage, erosion and instability, and any need for corrective action;
- Inspection of the condition of the groundwater monitoring wells;
- Quarterly groundwater monitoring, which includes monitoring of the landfill wells and residential wells; and
- Engineered wetlands inspection and assessment. Inspections are conducted primarily for the purposes of assessing both weed control needs and the survival of plantings. Assessments are performed to determine if engineered wetlands are meeting the performance standards regarding survival and density of the desired wetlands species.

The City of Allentown conducts the quarterly inspections of the landfill, as well as the quarterly groundwater sampling of both the landfill wells and the residential wells. Over the last five years there have been few, if any, problems with the landfill.

As established in the 1991 OU2 ROD, long-term monitoring is conducted on a quarterly basis at five residences selected based on the previous sampling results. The quarterly sampling is conducted by the City of Allentown. The quarterly sampling program may be modified by EPA, in such areas as the number of wells, location of wells, frequency of sampling, and analytical parameters. If quarterly sampling indicates that a residential well that exceeds MCLs, a wellhead treatment system would be provided and maintained. There have been no quarterly residential samples which have been above MCLs since sampling began in March 1999.

In March of 2007 EPA issued a second ESD (2007 ESD) that required institutional controls (ICs) (*e.g.* easements, covenants, title notices or land use restrictions through orders or agreements with EPA), to be established to prevent any future use of the Site that could compromise the effectiveness of the Selected Remedy.

The ICs were established to prevent the disturbance of the landfill cap and the installation of groundwater wells on the capped portion of the Dorney Road Landfill property and to prevent future use of the property that would compromise the effectiveness of the Selected Remedy.

EPA surveyed the landfill property to determine the parcel boundaries and to confirm the current property owners in 2011. An assessment of the ICs already in place concluded that ICs to protect the integrity of the cap cover system and prevent the installation of drinking water wells on the landfill were implemented by the following instruments with the four Site owners:

- Unilateral Administrative Order Docket No. III–98–011–DC, March 3, 1998, for access to conduct RA
- Unilateral Administrative Order for Access Docket No. III–96–79–DC, September 18, 1996, for access to conduct RA
- Administrative Order by Consent, Docket No. III–97–84–DC, May 14, 1997, for access and resolution of liability
- Administrative Order by Consent Docket No. III–97–85–DC, May 14, 1997, for access and resolution of liability
- Administrative Order for Access Docket No. III–98–013–DC, for access to conduct RA
- Docket No. III–98–012–DC, March 3, 1998, for access to conduct RA, respondent *In Rem*
- Deed Notice No. 8665–9544 May 10, 1991 states that property is part of Dorney Road Landfill CERCLA action in Docket No. III–90–45–DC

Five-Year Review

Pursuant to CERCLA section 121(c) and as provided in the current guidance on Five-Year Reviews, *Comprehensive Five-Year Review Guidance, OSWER Directive 9355.7–03B–P, June 2001,* EPA must conduct a statutory Five-Year Review if hazardous substances remain on-site above levels that would not allow for unlimited use and unrestricted exposure. The Five-Year Reviews for the Site were signed on the following dates:

1. First Five-Year Review—July 11, 2003
2. Second Five-Year Review—July 28, 2008
3. Third Five-Year Review—May 29, 2013
4. Fourth Five-Year Review—May 18, 2018

No issues or recommendations were identified in the 2018 Fourth Five-Year Review. The Protectiveness Statement in the 2018 Fourth Five-Year Review was as follows:

The remedies in place at the Site are protective of human health and the environment. The landfill cap prevents direct contact with site contamination and prevents migration of contaminants to groundwater. Groundwater contamination is stable in landfill wells with most contaminants below MCLs. Residential monitoring indicates site contaminants remain below MCLs. The institutional controls in place are adequate to protect the engineered remedy and prevent installation of drinking water wells on the landfill.''

Community Involvement

EPA community relations staff conducted an active campaign to ensure that the residents were well informed about activities at the Site. Community relations activities included the following:

- Interviews of Township officials for Five-Year Reviews
- Fact Sheets

In accordance with the requirements of 40 CFR 300.425(e)(4), EPA's community involvement activities associated with this deletion will consist of information supporting the deletion docket in the local Site information repository and placing a public notice of EPA's intent to delete the Site from the NPL in the *Reading Eagle,* a major, local newspaper of general circulation.

Determination That the Site Meets the Criteria for Deletion in the NCP

Construction of the Selected Remedy at the Site has been completed and O&M has been untaken and is still ongoing in accordance with the EPA-approved O&M Plans. All RAOs, Performance Standards, and cleanup goals established in the 1988 OU1 ROD, 1991 OU2 ROD, 1991 ESD and 2007 ESD have been achieved and the Selected Remedy is protective of human health and the environment. No further Superfund response actions, other than O&M, monitoring, and Five-Year Reviews, are necessary to protect human health and the environment.

The procedures specified in 40 CFR 300.425(e) have been followed for the deletion of the Site. EPA, with concurrence of the Commonwealth through PADEP, has determined that all appropriate response actions under CERCLA, have been completed. Therefore, EPA is deleting the Site from the NPL.

List of Subjects in 40 CFR Part 300

40 CFR Part 300

[EPA–HQ–SFUND–2000–0003; FRL–9980–72—Region 4]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Davis Timber Company Superfund Site

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 4 is issuing a Notice of Intent to Delete the Davis Timber Company Superfund Site (Site) located in Hattiesburg, Lamar County, Mississippi, from the National Priorities List (NPL). The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the State of Mississippi (State), through the Mississippi Department of Environmental Quality (MDEQ), have determined that all appropriate response actions under CERCLA, other than operations and maintenance and five-year reviews, have been completed. However, this deletion does not preclude future actions under Superfund.

DATES: Comments must be received by August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–2000–0003, by one of the following methods:

(1) *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

(2) *Email:* Scott Martin, Remedial Project Manager, *martin.scott@epa.gov.*

(3) *Mail:* Scott Martin, Remedial Project Manager, Superfund Restoration and Sustainability Branch, Superfund Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street, SW, Atlanta, Georgia 30303–8960.

(4) *Hand delivery:* USEPA Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Attention: Scott Martin, Remedial Project Manager, Superfund Restoration and Sustainability Branch. Hours of Operation: Monday to Friday 7:30 a.m. to 4:30 p.m. Phone: 404–562–8951.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–2000–0003. EPA policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statue. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

(1) USEPA Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960, Monday–Friday 7:30 a.m.–4:30 p.m., Contact Tina Terrell 404–562–8835; and

(2) Oak Grove Public Library (in the Reference Section) 4958 Old Highway 11, Hattiesburg, Mississippi, 39402, Monday–Friday 9:00 a.m.–6:00 p.m.; and Saturdays 10:00 a.m. to 2:00 p.m.; Phone: 601–296–1620.

FOR FURTHER INFORMATION CONTACT: Scott Martin, Remedial Project Manager, Superfund Restoration and Sustainability Branch, Superfund Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960, phone 404–562–8916, email: *martin.scott@epa.gov.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

The EPA announces its intent to delete the Davis Timber Company Superfund Site from the NPL and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR part 300 which is the NCP, which the EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. The EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in 40 CFR 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions if future conditions warrant such actions.

The EPA will accept comments on the proposal to delete this site for thirty (30) days after publication of this document in the **Federal Register**.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that the EPA is using for this action. Section IV discusses the Davis Timber Superfund Site and demonstrates how it meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), the EPA will consider, in consultation with the State, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. All appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. The remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, the EPA conducts five-year reviews (FYRs) to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. The EPA conducts such FYRs even if a site is deleted from the NPL. The EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to deletion of the Site:

(1) The EPA consulted with the State before developing this Notice of Intent to Delete.

(2) The EPA has provided the State 30 working days for review of this notice prior to publication of it today.

(3) In accordance with the criteria discussed above, the EPA has determined that no further response is appropriate.

(4) The State, through the MDEQ, has concurred with deletion of the Site from the NPL.

(5) Concurrently with the publication of this Notice of Intent to Delete in the **Federal Register**, a notice is being published in a major local newspaper, Hattiesburg American. The newspaper notice announces the 30-day public comment period concerning the Notice of Intent to Delete the site from the NPL.

(6) The EPA placed copies of documents supporting the proposed deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

If comments are received within the 30-day public comment period on this document, the EPA will evaluate and respond appropriately to the comments before making a final decision to delete. If necessary, the EPA will prepare a responsiveness summary to address any significant public comments received. After the public comment period, if the EPA determines it is still appropriate to delete the Site, the Regional Administrator will publish a final Notice of Deletion in the **Federal Register**. Public notices, public submissions and copies of the responsiveness summary, if prepared, will be made available to interested parties and in the site's information repositories listed above.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter the EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist the EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Site Deletion

The following information provides the EPA's rationale for deleting the Site from the NPL.

Site Background and History

The Davis Timber Company Site is located at 107 Jackson Road, approximately 6 miles northwest of Hattiesburg, in Lamar County, Mississippi. The Davis Timber Company produced treated pine poles, pilings, and timber at the Site from 1972 to 1987. Operations at the Site included bark removal, treatment of wood with pentachlorophenol (PCP), and product storage. The Site is approximately 30 acres and was comprised of a scragg mill, debarker, pole peeler, office and shop, treatment cylinder, cooling pond, oil storage tank, two aboveground PCP-solution storage tanks, a storage yard, and a large former PCP and waste bark Impoundment (Impoundment).

Surface soil on the Site consists of a very thin layer of sandy clay, which overlies a very thick clay unit, the Hattiesburg formation, that inhibits vertical migration of precipitation. Surface water runoff from the property flows into two intermittent tributaries of Mineral Creek: East Mineral Creek and West Mineral Creek. Mineral Creek flows northeast into Country Club Estates Lake, a 66-acre lake located approximately 1.25 miles downstream of the Site. Country Club Estates Lake is a recreational fishery and designated recreation area. Wastewater from Site operations containing PCP, dioxin and furan compounds, was discharged into the Impoundment. In 1980, the Impoundment was backfilled and capped by the property owner with approximately 6 to 8 inches of clay.

Between December 1974 and January 1987, the MDEQ documented six fish kills in Country Club Estates Lake. Several of the fish kills were attributed to documented releases of PCP from the Impoundment. In 1987, MDEQ ordered Davis Timber Company to discontinue wood preserving operations. According to MDEQ, Davis Timber Company subsequently declared bankruptcy in 1990. Since 1987, Mississippi officials collected fish from Country Club Estates Lake seven times and analyzed the fish tissue for dioxin compounds. In 1989, after obtaining the first set of fish tissue data, MDEQ issued an advisory against both commercial fishing and consumption of fish caught in Country Club Estates Lake due to the high levels of dioxin compounds in the fish tissue. In 1989, the Agency for Toxic Substances and Disease Registry (ATSDR) was petitioned by the MDEQ to conduct a public health assessment at Country Club Estates Lake on behalf of the residents of Country Club Estates. In that public health assessment, released in January 1993, ATSDR classified Country Club Estates Lake as a public health hazard because of concentrations of PCP and chlorinated dibenzodioxins (dioxins) and dibenzofurans (furans) detected in the Lake. In July 2000, MDEQ collected fish from Country Club Estates Lake. According to these sampling results, dioxin levels in fish from Country Club Estates Lake declined below 5 pg/g, which is Mississippi's lower limit for issuing consumption advisories for dioxin. In June 2001, Mississippi officials lifted the ban on consumption of fish caught near the Site because dioxin levels in fish showed a significant decrease over a 10-year period.

The Site was proposed as a NPL Site on May 11, 2000 (65 FR 30489). It was finalized as a NPL Site in July 2000 (65 FR 46096). The EPA's Identification Number is MSD046497012.

Remedial Investigation and Feasibility Study (RI/FS)

The Remedial Investigation (RI) was conducted by the EPA Region 4 Science and Ecosystem Support Division (SESD) between May 2000 and September 2001. During this period, SESD collected 30 subsurface soil samples, 6 groundwater samples, 51 sediment samples, 11 surface water samples, 27 surface soil samples, and multiple fish tissue samples (individual and composite). The Site was divided into 49 grids measuring 200-ft by 200-ft except in the central-northern portion of the Site, which was divided into 100-ft by 100-ft grids. A 3 to 5-point composite surface sample was collected from each grid and a subsurface sample was collected from the center of each grid at a depth of 18 to 24 inches.

Contamination was delineated based on those constituents detected at concentrations exceeding the EPA Region 9 Preliminary Remediation Goals (PRGs) and/or Federal Maximum Contaminant Levels (MCLs) for surface water and groundwater; or human health risk-based Region 4 PRGs (*e.g.,* for dioxins/furans in soil and sediment). Risk-based remediation goals derived from Site-specific data are identified by the Human Health Risk Assessment (HHRA) for residential, industrial and recreational receptors and the ecological risk assessment. Arsenic, aluminum, thallium, and iron are identified in soil as chemicals of potential concern (COPCs) assuming residential use of the property in the RI; however, they were not Chemicals of Concern (COCs) when considering the property will likely be utilized for a recreational future land use, not residential purposes. As a result, COCs for the Site are limited to PCP and dioxin/furans.

Appreciable quantities of groundwater have not been observed at the Site. Of the four permanent monitoring wells installed outside the Impoundment area, only one produced an adequate quantity of water to collect a groundwater sample. No Volatile Organic Compounds (VOCs), PCP, or Polycyclic Aromatic Hydrocarbons (PAHs) were detected in the groundwater sample collected from this well outside the Impoundment area. Temporary monitoring wells were installed and sampled in the initial field investigation. After evaluation of historical aerial photographs, it is believed these temporary monitoring wells were installed within the footprint of the Impoundment and the fluid sampled was not groundwater but fluid remaining within the Impoundment. The four permanent monitoring wells have been properly abandoned. The groundwater was not a pathway of contaminant migration, and a groundwater response action was not required.

Selected Remedy

The site is comprised of one Operable Unit (OU). The Record of Decision (ROD) for the Davis Timber Site was signed on September 24, 2009 following consideration of public comment on the proposed plan. The Site's ROD identified the following Remedial Action Objectives (RAOs):

i. Reduce or eliminate human exposure to contaminated surface and subsurface soil;

ii. Reduce human exposure to contaminated surface water; and

iii. Reduce exposure of ecological receptors to contaminated surface soil and sediment.

The remedial action specified for this site has been deemed necessary by the EPA to protect public health, welfare, and the environment from actual or threatened releases of hazardous substances from this site into the environment. The remedial actions chosen for the Site are summarized as follows:

(1) Extract the liquid from the closed Impoundment, and treat the liquid to remove the dissolved contamination and discharge the clean water to West Mineral Creek;

(2) Move a 500 to 1,000-foot portion of West Mineral Creek (immediately adjacent to the Impoundment area) approximately 200 feet west of its current location;

(3) Construct an earthen retaining wall or berm structure along the western boundary of the Impoundment between it and the relocated portion of West Mineral Creek;

(4) Excavate and move contaminated soil into the Impoundment area;

(5) Dredge contaminated sediment from the creeks, ponds, and wetlands, and remove excess water and move into the Impoundment area;

(6) Construct a cap over the Impoundment area (designed with a stabilizing sub-cap);

(7) Backfill excavated and dredged locations with clean borrow material;

(8) Implement land-use/deed restrictions to limit construction over the capped Impoundment and contaminated soil areas;

(9) Grade and prepare the site for optimal storm water drainage control; and

(10) Establish and implement a long-term monitoring program to assess the effectiveness of the remedial action.

Response Actions

Remedial action physical construction activities began during October 2011 following receipt of remedial action funding through the President's Jobs Initiative Program. Remedial action construction services were procured through the existing Region 4 Emergency Response and Removal Services (ERRS) contract.

Construction activities were completed in August 2012, and included the following:

(1) Site clearing and demolition of on-site structures;

(2) Installation of the Impoundment liquid extraction and treatment system (this system treated approximately 539,000 gallons of liquid);

(3) West Mineral Creek Relocation (relocated approximately 1,046 linear feet of creek approximately 200 feet west of its current location);

(4) Impoundment berm construction;

(5) Cooling pond and areas of surface soil contamination excavation (excavated approximately 3,060 cubic yards);

(6) East Mineral Creek Excavation (approximately 525 linear feet and 101 cubic yards of soil);

(7) Impoundment cap construction; and

(8) Final grading and vegetation.

The selected remedy required Institutional Controls (land use or deed restrictions) to control and limit on-site activities to preserve the integrity of the capped Impoundment and all components of the engineered containment system. Site use is restricted to activities compatible with the future anticipated recreational land use.

The Site parcel has an environmental covenant which does not allow residential use and restricts excavation before meeting notification requirements of Mississippi's One Call law.

Cleanup Levels

The RA successfully achieved compliance with the defined performance standards documented in the ROD and the RD.

Impoundment Water Extraction and Treatment

The water extraction and treatment system removed and treated 539,454 gallons of contaminated water from the closed Impoundment. Approximately 77 percent of the water was removed from the Impoundment. The remedial design established performance standards for the treatment system discharge to West Mineral Creek as the Mississippi Water Quality Criteria for Intrastate, Interstate and Coastal Waters. These standards comply with the requirements of a Mississippi National Pollutant Discharge Elimination System (NPDES) permit. Operation of the treatment system continued until May 30, 2012, when diminishing recovery volumes and water levels indicated the practical limit of dewatering had been reached.

Soil

The remedial design specified excavation of contaminated soil from two areas of the Site:

(1) Within the footprint of the former cooling pond; and

(2) Within the delineated area of surface soil contamination surrounding the former cooling pond and process area.

Two additional areas of contaminated soil were discovered during the remedial action and were also excavated:

(1) Beneath the former maintenance building; and

(2) Beneath the location of the former treatment cylinder.

Contaminated soil in these additional soil areas were excavated and disposed of in the Impoundment area until the visible extent of contamination was removed and vapor screening indicated total organic vapors of less than 10 parts per million.

Post-excavation subsurface soil samples collected from the base of the cooling pond excavation and the surface soil excavation were analyzed for dioxins, furans and PCP. The 2013 Remedial Action Report summarized the sampling results as follows:

(1) Three composite subsurface soil samples were collected from the base of the cooling pond excavation and compared to the dioxin Toxic Equivalency Quotient (TEQ) cleanup level of 5 µg/kg. All three sample results were below the cleanup level, ranging from 0.088 to 0.40 µg/kg.

(2) Five composite subsurface soil samples and one duplicate sample were collected from the bottom of the surface soil excavation area. All of the sample results were below the dioxin TEQ cleanup goal of 5 µ g/kg.

Sediment

Prior to excavation, the EPA contractor collected additional sediment samples from East Mineral Creek and analyzed for dioxins and furans. All results were below the cleanup goal for dioxin TEQs. Contaminated sediment was excavated from three areas of East Mineral Creek that had shown the highest concentrations during the RI. A total of 101 cubic yards of sediment was removed and disposed of in the closed Impoundment area. Three post-excavation sediment samples and one duplicate sample were collected from the creek to confirm that cleanup goals were achieved. Dioxin TEQ results were below the ROD cleanup level of 1.9 µg/kg for all samples, with values ranging from 0.21 to 0.73 µg/kg. All samples collected during the RI were below the sediment cleanup goal for PCP except for one (8,200 µg/kg, performance standard 7,600 µg/kg).

Groundwater

No appreciable quantities of groundwater have been observed at the Site. Of the four permanent monitoring wells installed outside the Impoundment area, only one produced an adequate quantity of water to collect a groundwater sample. No volatile organic compounds (VOCs), PCP, or polycyclic aromatic hydrocarbons (PAHs) were detected in the groundwater sample collected from this well outside the Impoundment area.

Post-excavation soil sampling performed by Onedia Total Integrated Enterprise (OTIE) confirmed that soil and sediment cleanup levels were achieved. All work performed by WRS Compass (WRSC) during the RA was conducted in accordance with the RD specifications, unless otherwise documented and approved by the EPA Remedial Project Manager (RPM). The EPA had a representative on-site for much of the RA construction who, in conjunction with the OTIE representative, ensured that the remedy was constructed in accordance with the RD specifications and that the construction quality control requirements of the specifications were strictly adhered to.

Operations and Maintenance

The responsibility for operations and maintenance (O&M) was transferred to the State on October 20, 2014. Future O&M activities at the site are expected to be limited to mowing, inspections, and FYRs. Periodic inspections will need to be implemented to ensure the Impoundment cap and berm retain their integrity, and to ensure that stormwater and sediment controls, the West Mineral Creek channel, and revegetated areas operate as intended.

Five-Year Review

The purpose of a the FYR is to evaluate the implementation and performance of a remedy to determine if the remedy is and will continue to be protective of human health and the environment. In addition, FYR reports identify issues found during the review, if any, and document recommendations to address them. The first FYR was conducted in December 2016.

The FYR was conducted pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) section 121, consistent with the NCP (40 CFR 300.430(f)(4)(ii)), and considering the EPA policy. The triggering action for this statutory review is the on-site construction start date of the remedial action. The FYR has been prepared because hazardous substances, pollutants or contaminants remain at the Site above levels that allow for unlimited use and unrestricted exposure (UU/UE).

The Site consists of one operable unit (OU1), and OU1 consisted of all contaminated media, which includes soil and sediment, associated with the Site.

The FYR concluded that the remedy at OU1 currently protects human health and the environment because there are no completed exposure pathways; contaminated soil and sediment were excavated and capped, and Impoundment water was treated and discharged. The FYR had no issues or recommendations. The next FYR will be conducted in 2021.

Community Involvement

Throughout the removal and remedial process, the EPA has kept the public informed of the activities being conducted at the Site by way of public meetings, progress fact sheets, and the announcement through local newspaper advertisement on the availability of documents related to the site and FYRs.

The notice of the availability of the Administrative Record and an announcement of the Proposed Plan for a public meeting was published in the Hattiesburg American newspaper on July 15, 2009. A public comment period was held from July 15, 2009, to August 14, 2009. The Proposed Plan was presented to the community during a public meeting on August 10 at the Breland Community Center, 79 Jackson Road, Hattiesburg, MS 39402. At this meeting, representatives from the EPA and MDEQ answered questions from the community concerning the proposed remedy and the remedial alternatives that were evaluated. The Administrative Record file was available to the public and was placed in the information repository maintained at the EPA Region 4 Superfund Record Center and at the Oak Grove Public Library (in the Reference Section) 4958 Old Highway 11, Hattiesburg, Mississippi, 39402.

Public participation activities have been satisfied as required in CERCLA section 113(k), 42 U.S.C. 9613(k) and CERCLA section 117, 42 U.S.C. 9617. Documents in the deletion docket, which the EPA relied on for recommendation of the deletion from the NPL, are available to the public in the information repositories identified above.

Determination That the Site Meets the Criteria for Deletion in the NCP

The EPA has followed the procedures required by 40 CFR 300.425(e) as mentioned above and the implemented remedy achieves the degree of cleanup specified in the ROD for all pathways of exposure. Specifically, post-excavation soil sampling performed by OTIE confirmed that soil and sediment cleanup levels were achieved. These results verify that the Site has achieved the ROD cleanup standards, and that all cleanup actions specified in the ROD have been implemented. All selected remedial and removal action objectives and associated cleanup levels are consistent with agency policy and guidance. This Site meets all the site completion requirements as specified in Office of Solid Waste and Emergency Response (OSWER) Directive 9320.22, *Close-Out Procedures for National Priorities List Sites.* No further Superfund response is needed to protect human health and the environment.

The EPA, with concurrence of the State through MDEQ, has determined that all appropriate response actions under CERCLA have been completed. Therefore, the EPA is proposing to delete the Site from the NPL.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[EPA–HQ–SFUND–1989–0011; FRL–9980–58—Region 3]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Recticon/Allied Steel Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region III is issuing a Notice of Intent to Delete the Recticon/Allied Steel Superfund Site (Site) located in East Coventry Township, Chester County, Pennsylvania, from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the Commonwealth of Pennsylvania (the Commonwealth), through the Pennsylvania Department of Environmental Protection (PADEP), have determined that all appropriate response actions under CERCLA have been completed. However, this deletion does not preclude future actions under Superfund.

DATES: Comments must be received by August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1989–0011, by one of the following methods:

- *http://www.regulations.gov.* Follow on-line instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

- *Email:* hass.andrew@epa.gov
- *Mail:* USEPA Region III, 1650 Arch Street, Mail Code: 3HS21; Philadelphia, PA. 19103.
- *Hand delivery:* USEPA Region III, 1650 Arch Street, Philadelphia, PA 19103. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–1989–0011 EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *http://www.regulations.gov,* including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through *http://www.regulations.gov* or email. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statue. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction
II. NPL Deletion Criteria
III. Deletion Procedures
IV. Basis for Intended Site Deletion

I. Introduction

EPA Region III announces its intent to delete the Recticon/Allied Steel Superfund Site from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in 40 CFR 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions if future conditions warrant such actions.

EPA will accept comments on the proposal to delete this Site for thirty (30) days after publication of this document in the **Federal Register**.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Recticon/Allied Steel Superfund Site and demonstrates how it meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the Commonwealth, whether any of the following criteria have been met:

i. responsible parties or other persons have implemented all appropriate response actions required;

ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts Five-Year Reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. Five-Year Reviews are no longer required at this Site; however, EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to deletion of the Site:

(1) EPA consulted with the Commonwealth before developing this Notice of Intent to Delete.

(2) EPA has provided the Commonwealth 30 working days for review of this notice prior to publication of it today

(3) In accordance with the criteria discussed above, EPA has determined that no further response is appropriate;

(4) The Commonwealth of Pennsylvania, through the Pennsylvania Department of Environmental Protection (PADEP), has concurred with deletion of the Site from the NPL.

(5) Concurrently with the publication of this Notice of Intent to Delete in the **Federal Register**, a notice is being published in a major local newspaper, the *Pottstown Mercury.* The newspaper notice announces the 30-day public comment period concerning the Notice of Intent to Delete the Site from the NPL.

(6) The EPA placed copies of documents supporting the proposed deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

If comments are received within the 30-day public comment period on this document, EPA will evaluate and respond appropriately to the comments before making a final decision to delete. If necessary, EPA will prepare a Responsiveness Summary to address any significant public comments received. After the public comment period, if EPA determines it is still appropriate to delete the Site, the Regional Administrator will publish a final Notice of Deletion in the **Federal Register**. Public notices, public submissions and copies of the Responsiveness Summary, if prepared, will be made available to interested parties and in the site information repositories listed above.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Site Deletion

The following information provides EPA's rationale for deleting the Site from the NPL:

Site Background and History

EPA proposed the Recticon/Allied Steel Superfund Site (Site) (CERCLIS ID PAD002353969) to the NPL on June 24, 1988 (53 FR 23988) and added the Site as final on the NPL on October 4, 1989 (54 FR 41000). The Site is located at the intersection of State Route 724 and Wells Road in East Coventry Township, PA and is approximately 8 miles northwest of Phoenixville, PA and 3.2 miles southeast of Pottstown, PA. The 5-acre Recticon/Allied Steel Site consists of two properties, the former Allied Steel Products Corporation facility and the former Recticon facility.

From 1972–1988, Allied Steel Products Corporation (Allied) began fabrication of various steel products on a property located on the eastern corner of the intersection. Recticon was a subsidiary of Rockwell International and manufactured silicon wafers for the electronics industry from 1974 to 1981 on the western corner of the intersection. In 1979, the Pennsylvania Department of Environmental Resources (PADER), now known as the Pennsylvania Department of Environmental Protection (PADEP), detected trichloroethylene (TCE) in the groundwater beneath the Site. In 1980, a contractor determined that leakage in the area of Allied's compressor room had released TCE onto the ground. High levels of TCE were found in Allied's on-site well. In addition, sediment samples taken from the drainage ditch alongside the Allied building yielded high levels of copper and zinc, well above ecological risk levels.

The Commonwealth of Pennsylvania and Recticon entered into a Consent Order in 1981 to undertake initial cleanup actions at the Site. Recticon, under PADER oversight, removed contaminated soils from the Site and transported them to an EPA-approved facility for disposal. Recticon also pumped and treated some of the groundwater beneath the Site for a few months. Under PADER oversight, Allied Steel also excavated contaminated soil and shipped it off-site for proper disposal. In 1990, EPA entered into two Consent Orders with Rockwell International, the former parent company of Recticon, to provide residential well filters to nearby residents and to conduct the Remedial Investigation/Feasibility Study (RI/FS).

Remedial Investigation and Feasibility Study (RI/FS)

The RI/FS was conducted from January 1991 through May 1993 and determined that soil, sediment, and groundwater were impacted by volatile organic compounds (VOCs) and metals from the historic operation of the Allied and Recticon facilities.

Selected Remedy

The Selected Remedy for the Site was documented in a June 30, 1993 Record of Decision (ROD) and modified in an August 29, 1997 ROD Amendment; a September 10, 2004 Explanation of Significant Differences (ESD); and a May 26, 2010 ESD. The following sections discuss the components of the Selected Remedy and details on implementation.

1993 Record of Decision

The Remedial Action Objectives (RAOs) for the Site as established in the 1993 ROD were as follows:

1. Prevent human exposure to contaminants in the groundwater.
2. Restore contaminated groundwater to its beneficial use and to background concentrations, if technically practicable, or Maximum Contaminant Levels (MCLs), whichever is more stringent.
3. Protect uncontaminated groundwater and surface water for current and future use, and environmental receptors.

After the 1993 ROD was finalized, EPA divided the Site remedial work into three operable units (OUs) to facilitate management of the remedial process.

- Operable Unit 1 (OU1)—Water Line
- Operable Unit 2 (OU2)—Soil
- Operable Unit 3 (OU3)—Groundwater

OU1—Water Line

The Selected Remedy for OU1 in the 1993 ROD consisted of the installation of a public water supply to East Coventry Township to 14 residences and businesses.

OU2—Soil

The Selected Remedy for OU2 in the 1993 ROD consisted of the excavation and off-site disposal of contaminated soils. The soil cleanup levels in the 1993 ROD were based on the amount of contamination that could remain in the soil without further contributing to groundwater contamination above ''background'' concentrations.

The 1997 ROD Amendment changed the cleanup levels for Site contaminants of concern (COCs) in groundwater from ''background'' concentrations to MCLs. This change was based on the Commonwealth of Pennsylvania's enactment of the Land Recycling and Environmental Remediation Standards Act (Act 2) on May 19, 1995, 35 Pa. Stat. § 6026.101 *et seq.,* which established MCLs as the protective groundwater cleanup levels. As a result of the change in groundwater cleanup levels to MCLs, a new soil cleanup level was calculated for the proposed soil excavation response at the Site. Site-specific modeling was used to determine the maximum concentration of TCE that could be in the soil and not cause leaching into the groundwater above the MCL. The modeling resulted in a cleanup level of 1,600 μg/kg of TCE in soil. It was determined that additional soil excavation was no longer necessary because the concentrations of contaminants in the soil after the initial response action were below this cleanup level.

The 1997 ROD Amendment also required that institutional controls be implemented to prohibit soil excavation on the Recticon property that could result in exposure to contaminated soil via direct contact and to prohibit any new wells on Site until the groundwater cleanup levels are met.

The 2004 ESD eliminated the requirement for institutional controls to prohibit direct contact with the soil on the Recticon property. The ESD identified PADEP Act 2 Media Specific Concentrations (MSCs) for TCE for direct contact with soils as the cleanup level that would need to be exceeded for new institutional controls to be necessary. No TCE was detected in soil at the Site exceeding the PADEP Act 2 MSC for direct contact.

The ESD also eliminated the requirement to prohibit the construction of new groundwater wells at the Site.

OU3—Groundwater

The Selected Remedy for OU3 initially consisted of extraction and treatment of groundwater with discharge to the Schuylkill River following a pre-design hydrogeologic investigation and well abandonment. In accordance with the 1993 ROD, a comprehensive pre-design study of the groundwater at the Site was conducted to further define the outer boundaries of the groundwater plume and the hydraulic properties within the aquifer. Based on the findings of this study, a groundwater recovery system for contaminated groundwater was designed. The groundwater recovery system consisted of extraction, shallow tray air stripping and granular activated carbon treatment to remove the VOCs, and discharge of treated water to the Schuylkill River.

The 2010 ESD changed the groundwater extraction and treatment remedy to enhanced natural bioremediation of TCE. A successful pilot test, which reduced the levels of TCE in the Site wells, had been conducted using this technology. The 2010 ESD also re-instituted the requirement for institutional controls for groundwater use on both the Recticon and Allied properties, since all wells on these properties were not below the cleanup levels.

Response Actions

The Remedial Design and Remedial Action (RD/RA) were performed by Rockwell under Unilateral Administrative Order (UAO) No. III–94–16–DC issued on March 24, 1994. In accordance with the 1993 ROD, a Phase 1 Archeological Survey was performed in April 1995 prior to the start of onsite construction activity and determined that the Site had no historical significance. In 1999, Rockwell spun off its semiconductor business as an independent company called Conexant Systems, Inc. Conexant assumed responsibility for performing the RD/RA as required by the UAO.

OU1—Water Line

Construction of the water line was completed between September 1998 through November 1999 and consisted of extending a water main to the Site area and connecting 14 residences and businesses. Once the municipal water lines were connected, filtration systems previously used at the properties were no longer necessary. EPA performed the final inspection of the water line and connections on December 13, 1999.

OU2—Soil

In accordance with the 1993 ROD, verification sampling was conducted on the soil at the former Allied facility to determine the source and extent of copper and zinc contamination. An ecological assessment indicated that the copper and zinc levels exceeded the Region III Biological Technical Assistance Group (BTAG) screening values, and that any terrestrial or aquatic receptors on or near the Site would be exposed to unacceptable levels of these contaminants. As a result, EPA conducted a time-critical removal at the Site in April 1998. Six inches of contaminated soil were excavated and removed from a small portion of the Site known as the ‘‘crane area’’ and shipped off-site for proper disposal. The area was backfilled with clean soil and grass was planted.

The 1993 ROD also required the excavation of TCE contaminated soils on the former Recticon facility. This requirement was modified by the 1997 ROD Amendment, which changed the soil cleanup level. As a result of this change, no further soil excavation was required and institutional controls were instead required to prohibit soil excavation. The 2004 ESD subsequently eliminated the requirement for institutional controls for soil.

OU3—Groundwater

Construction of the groundwater portion of the remedy started in June 1998 and consisted of the installation of approximately 10 additional monitoring wells, an extraction well and the construction of a groundwater extraction and treatment system. EPA conducted a pre-final inspection of OU3 on April 19, 1999 and determined that Rockwell and its contractors had constructed the remedy in accordance with remedial design plans and specifications. A Preliminary Closeout Report (PCOR) was issued on December 14, 1999, documenting Construction Completion for the Site.

A Pilot Study was initiated in 2001 to evaluate the effectiveness of using enhanced bioremediation to treat groundwater contamination more effectively than groundwater extraction and treatment. The study consisted of injecting non-toxic food-grade amendments and other approved supplements into the groundwater to enhance the natural biodegradation occurring at the Site. A total of 13 injections were completed during the Pilot Study from June 2001 through February 2007 utilizing several different amendments. The Pilot Study effectively reduced VOC contamination in the groundwater close to groundwater cleanup levels. The 2010 ESD replaced groundwater extraction and treatment with enhanced bioremediation based on the results of the Pilot Study.

Cleanup Levels

Table 1 describes the soil and groundwater cleanup levels established in the 1997 ROD Amendment:

TABLE 1

COC	Medium	Standard
TCE	Soil	1,600 μg/kg
TCE	Groundwater	5 μg/L
Vinyl Chloride	Groundwater	2 μg/L
1,1 dichloroethene	Groundwater	7 μg/L
1,2 dichloroethane	Groundwater	5 μg/L
1,2 dichloroethene	Groundwater	70 μg/L
Tetrachloroethene	Groundwater	5 μg/L

No soil was identified with TCE concentrations exceeding 1,600 μg/kg; therefore, no soil excavation was performed. Soil contaminated with zinc and copper at the Allied facility was excavated and disposed offsite under a time-critical removal action by EPA in 1998.

Groundwater COC concentrations at all sampling locations were below the groundwater cleanup levels during the 2011 annual sampling event. In accordance with the 1993 ROD, twelve (12) quarters of groundwater sampling were performed between October 2011 and September 2014 to confirm that the cleanup levels have been achieved. Vinyl chloride was detected in one well during this sampling at a concentration exceeding the cleanup level of 2 μg/L and TCE was detected in one well at a concentration exceeding the cleanup level of 5 μg/L. For these two wells, statistical tools specified in EPA program guidance were used to evaluate attainment for vinyl chloride and TCE. These data were statistically analyzed and the cleanup level exceedances were determined not to be statistically significant. No other samples identified any COC above the groundwater cleanup levels throughout the twelve quarters of sampling.

Additionally, EPA performed a cumulative risk assessment using the 2014 groundwater sampling results. Groundwater COC concentrations were compared to EPA Tap Water Risk Screening Level (RSLs) and if the RSL was exceeded during any of the 2014 sampling events, a risk assessment was performed. The data were grouped in Exposure Areas (EAs) based on groundwater sampling locations. The cumulative risk results were below or within EPA's acceptable risk range for each of the EAs.

Based on the results of the twelve quarters of groundwater monitoring and the results of the cumulative risk assessment, the groundwater cleanup levels have been achieved at the Site.

EPA subsequently issued a Final Close Out Report (FCOR) for the Site dated December 17, 2017. The FCOR summarized the remedial activities conducted at the Site, and concluded that EPA has successfully completed all response actions for the Site in accordance with *Close Out Procedures for National Priorities List Sites* (OSWER Directive 9320.2–09A–P).

Operation and Maintenance

Operation and Maintenance (O&M) activities for the Site were focused on the groundwater portion of the remedy (OU3). The initial groundwater remedy involved extraction and treatment of contaminated groundwater at the Site from 1998 through 2002. The water was treated using a shallow tray air stripper and GAC and the treated water was discharged to the Schuylkill River. The discharge was in continuous compliance with the substantive requirements of the National Pollutant Discharge Elimination System (NPDES). The system treated approximately 200 million gallons of contaminated groundwater prior to being shut down in December 2002.

The 2010 ESD replaced the groundwater extraction and treatment component of the Selected Remedy with enhanced bioremediation. Groundwater monitoring confirmed that groundwater cleanup levels have been achieved at the Site and no ongoing or future O&M or additional groundwater monitoring is necessary.

Institutional Controls

The 1993 ROD required an institutional control to restrict access to those portions of the aquifer where contaminants remain above performance standards. Institutional controls were also included in the 1997 ROD Amendment to prohibit soil excavation on the Recticon property and installation of new wells on the Recticon property until groundwater cleanup levels were met.

The 2004 ESD stated that institutional controls were no longer required for soil and that the groundwater was making progress toward achieving cleanup levels, therefore, institutional controls prohibiting new wells were no longer required. However, in the 2010 ESD, EPA determined that institutional controls for groundwater were still required since the groundwater cleanup levels had not yet been achieved. Therefore, the installation of new groundwater wells on the two properties comprising the Site needed to be prohibited until the groundwater at the Site meets the cleanup levels selected in the 1997 ROD Amendment. This institutional control has been implemented by deed notices which have been placed on the titles for the two Site properties pursuant to a 2002 Prospective Purchaser Agreement with the current owner of the Allied portion of the Site, and a 2005 Consent Decree with Wellsford, Inc., the current owner of the Recticon portion of the Site.

The Chester County Health Departments Rules and Regulations, § 501.12.5.1, currently provide an additional layer of use restriction for the Site groundwater by prohibiting the installation or use of drinking water supply wells in the vicinity of the Site unless the wells are tested for contamination and treated if contamination is identified. The relevant provisions of the regulations are provided below:

501.12.5.1 A permit shall be denied and/or approval to use the water supply shall be withheld in those areas of the County where the Chester County Health Department has been notified by State or Federal agencies or other sources that the area is unsuitable for the installation of on-site water wells due to known groundwater contamination unless the following conditions are met:

501.12.5.1.1 The water well must be tested prior to use and on a yearly basis for all known and suspected contaminants in the area.

501.12.5.1.2 When the water quality analysis shows that the contaminant level exceeds the maximum contaminant levels allowed by the Safe Drinking Water Act, the water must be treated by the appropriate treatment unit before approval can be granted.

As discussed in detail above, groundwater cleanup levels have been achieved at the Site. Therefore, in accordance with the 2010 ESD, institutional controls prohibiting the installation of new wells at the Site are no longer required.

Five-Year Review

Pursuant to CERCLA section 121(c) and as provided in the current guidance on Five-Year Reviews *Comprehensive Five-Year Review Guidance, OSWER Directive 9355.7–03B–P, June 2001,* EPA must conduct a statutory Five-Year Review if hazardous substances remain on-site above levels that would not allow for unlimited use and unrestricted exposure. The Five-Year Reviews for the Site were signed on the following dates:

1. First Five-Year Review—May 14, 2005
2. Second Five-Year Review—June 23, 2010
3. Third Five-Year Review—May 11, 2015

No issues or recommendations were identified in the 2015 Third Five-Year Review. The Protectiveness Statement in the 2015 Third Five-Year Review was as follows:

''*The Site is protective of human health and the environment. The RAOs established for the Site have been accomplished.*''

There are no hazardous substances or materials left on-site above levels that would not allow for unlimited use and unrestricted exposure; therefore, additional Five-Year Reviews are not required in the future.

Community Involvement

EPA community relations staff conducted an active campaign to ensure that the residents were well informed about activities at the Site. Community relations activities included the following:

- Interviews of East Coventry Township officials for Five-Year Reviews
- Annual Meetings with Chester County Board of Health

In accordance with the requirements of 40 CFR 300.425(e)(4), EPA's community involvement activities associated with this deletion will consist of placing the deletion docket in the local Site information repository and placing a public notice of EPA's intent to delete the Site from the NPL in the *Pottstown Mercury,* a major, local newspaper of general circulation.

Determination That the Site Meets the Criteria for Deletion in the NCP

Construction of the Selected Remedy at the Site has been completed and O&M was completed in accordance with the EPA-approved O&M Plan. Institutional controls are no longer necessary at the Site. All RAOs, performance standards, and cleanup levels established in the 1993 ROD, 1997 ROD Amendment, 2004 ESD, and 2010 ESD have been achieved and the Selected Remedy is protective of human health and the environment in the short- and long-term. No further Superfund response is necessary to protect human health and the environment.

The Site Deletion procedures specified in 40 CFR 300.425(e) have been followed for the deletion of the Site. EPA, with concurrence of the Commonwealth through PADEP, has determined that all appropriate response actions under CERCLA, have been completed. Therefore, EPA is deleting the Site from the NPL.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Notices

Federal Register
Vol. 83, No. 137
Tuesday, July 17, 2018

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

July 11, 2018.

The Department of Agriculture will submit the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13 on or after the date of publication of this notice. Comments are requested regarding: (1) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, Washington, DC; New Executive Office Building, 725 17th Street NW, Washington, DC 20503. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@omb.eop.gov* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602.

Comments regarding these information collections are best assured of having their full effect if received by August 16, 2018. Copies of the submission(s) may be obtained by calling (202) 720–8681.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

National Agricultural Statistics Service

Title: Field Crops Production.

OMB Control Number: 0535–0002.

Summary of Collection: The primary functions of the National Agricultural Statistics Services' (NASS) are to prepare and issue State and national estimates of crop and livestock production, disposition, and prices and to collect information on related environmental and economic factors. The Field Crops Production Program consists of probability field crops surveys and supplemental panel surveys. These surveys are extremely valuable for commodities where acreage and yield are published at the county level. NASS will use surveys to collect information through a combination of the internet, mail, telephone, and personnel interviews. The general authority for these data collection activities is granted under U.S. Code Title 7, Section 2204.

Need and Use of the Information: NASS collects information on field crops to monitor agricultural developments across the country that may impact on the nation's food supply. The Secretary of Agriculture uses estimates of crop production to administer farm program legislation and import and export programs. Collecting this information less frequently would eliminate the data needed to keep the Department abreast of changes at the State and national level.

Description of Respondents: Farms; Business or other for-profits.

Number of Respondents: 626,115.

Frequency of Responses: Reporting: Weekly, Monthly, Quarterly, Annually.

Total Burden Hours: 181,411.

Ruth Brown,
Departmental Information Collection Clearance Officer.

BILLING CODE 3410–20–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

July 12, 2018.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 16, 2018 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *OIRA_Submission@omb.eop.gov* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Study of School Food Authority (SFA) Procurement Practices.

OMB Control Number: 0584—NEW.

Summary of Collection: The purpose of the Study of SFA Procurement Practices is to describe and assess the practices of SFAs related to procuring goods and services for the National School Lunch Program (NSLP), School Breakfast Program (SBP), Fresh Fruit and Vegetable Program (FFVP), Summer Food Service Program (SFSP), and Child and Adult Care Food Program (CACFP) and to better understand how SFAs make decisions that lead to these procurement practices. Study findings will describe similarities and differences in how SFAs procure goods and services and explain key issues and experiences of SFAs. Using a nationally representative sample of SFAs, this study will be one of the first Food and Nutrition Service (FNS) studies of SFA procurement practices for Child Nutrition (CN) meal programs that comprehensively examines the use of Food Service Management Companies and Cooperative Purchasing Agreements, recordkeeping, local purchases, and food purchase specifications. Procurement for CN meal programs can be affected by federal regulations (such as the Richard B. Russell National School Lunch Act, which set procurement requirements for NSLP and SBP in 2014), policy memos, program guidance, and grant funding, in addition to State and local policies.

Additionally, there are government-wide regulations under 7 CFR 210.21, 220.16, 225.17, 226.22, and 2 CFR 200 that also apply to these procurements. SFA procurement procedures must adhere to CN program and government-wide regulations and guidance, and State and local policies related to procurement.

Need and Use of the Information: This study will collect data on a voluntary basis from SFAs using a web survey and in-depth interviews. FNS will use the information collected through this study to better understand how SFAs make decisions that lead to their procurement practices for CN programs, to assist SFAs in understanding FNS regulations and complying with program requirements, to provide more effective policy guidance, and to provide supplemental training.

Description of Respondents: State, Local, or Tribal Government.

Number of Respondents: 760.

Frequency of Responses: Reporting: One-time.

Total Burden Hours: 1,268.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS–2018–0040]

Notice of Request for Revision to and Extension of Approval of an Information Collection; Importation of Fruits and Vegetables

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Revision to and extension of approval of an information collection; comment request.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Animal and Plant Health Inspection Service's intention to request a revision to and extension of approval of an information collection associated with the regulations for the importation of fruits and vegetables into the United States.

DATES: We will consider all comments that we receive on or before September 17, 2018.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0040.*
- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2018–0040, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road, Unit 118, Riverdale, MD 20737–1238.

Supporting documents and any comments we receive on this docket may be viewed at *http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0040* or in our reading room, which is located in room 1141 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 799–7039 before coming.

FOR FURTHER INFORMATION CONTACT: For information on the regulations for the importation of fruits and vegetables into the United States, contact Mr. Juan Román, Senior Regulatory Policy Specialist, RCC, RPM, PHP, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737; (301) 851–2242. For copies of more detailed information on the information collection, contact Ms. Kimberly Hardy, APHIS' Information Collection Coordinator, at (301) 851–2483.

SUPPLEMENTARY INFORMATION:

Title: Importation of Fruits and Vegetables.

OMB Control Number: 0579–0264.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: The Plant Protection Act (PPA, 7 U .S.C. 7701 *et seq.*) authorizes the Secretary of Agriculture to restrict the importation, entry, or interstate movement of plants, plant products, and other articles to prevent the introduction of plant pests into the United States or their dissemination within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service, which administers regulations to implement the PPA.

The regulations in ''Subpart—Fruits and Vegetables'' (7 CFR 319.56–1 through 319.56–83) allow a number of fruits and vegetables to be imported into the United States, under specified conditions, from certain parts of the world while continuing to protect against the introduction of pests into the United States. Under these regulations, the importation of a variety of fruits and vegetables from specified countries require the use of information collection activities such as phytosanitary certificates, trapping records, compliance agreements, application of sterile insect technique, monitoring, safeguarding, emergency action notifications, and notices of arrival.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.,* permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 0.45 hours per response.

Respondents: National plant protection organization officials of countries exporting to the United States and businesses.

Estimated annual number of respondents: 65.

Estimated annual number of responses per respondent: 13.

Estimated annual number of responses: 855.

Estimated total annual burden on respondents: 381 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 11th day of July 2018.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection: Forest Industries and Logging Operations Data Collection Systems

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the USDA Forest Service is seeking comments from all interested individuals and organizations on the renewal of a currently approved information collection, *Forest Industries and Logging Operations Data Collection Systems (0596–0010),* with a revision for a new sampling approach.

DATES: Comments must be received in writing on or before September 17, 2018 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to: USDA, Forest Service, Attn: James Bentley, Southern Research Station, Forest Inventory and Analysis, 4700 Old Kingston Pike, Knoxville, TN 37919. Comments also may be submitted via facsimile to 865–862–0262 or by email to: *jamesbentley@fs.fed.us.*

Comments submitted in response to this notice may be made available to the public through relevant websites and upon request. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

The public may inspect comments received at the Southern Research Station, 4700 Old Kingston Pike, Knoxville, TN, during normal business hours. Visitors are encouraged to call ahead to 865–862–2000 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT: James Bentley, Southern Research Station, at 865–862–2056. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Forest Industries and Logging Operations Data Collection Systems.

OMB Number: 0596–0010.

Expiration Date of Approval: December 31, 2019.

Type of Request: Renewal with Revision.

Abstract: The Forest and Range Renewable Resources Planning Act of 1974 and the Forest and Rangeland Renewable Resources Research Act of 1978 require the Forest Service to evaluate trends in the use of logs and wood chips, to forecast anticipated levels of logs and wood chips, and to analyze changes in the harvest of these resources from the Nation's forest resource. This important survey has been conducted since the 1940s, with various adjustments along the ways to accommodate new questions or data collection needs. Information provided in this data collection can be used to:

- Describe the timber resource and its use in detail;
- Evaluate trends in resource use;
- Forecast future anticipated level of demand on the resource; and
- Analyze the ramifications of any changes in timber demand.

For this renewal, we are proposing a new sample design to guide the annual collection of information from primary wood-using mills, replacing the periodic approach. This new approach is more efficient and cost-effective, and ultimately will generate more accurate, comprehensive, and timely information.

To collect this information, USDA Forest Service or state natural resource agency personnel will use three questionnaires. Two questionnaires, the Pulpwood Questionnaire and the Logs and Other Roundwood Questionnaire, will be paper or electronic. Paper questionnaires will be returned in pre-paid postage envelopes, and electronic questionnaires returned via email. The third questionnaire, the Logging Operations Questionnaire, will be administered in person by field personnel collecting tree utilization data at sampled logging sites.

Pulpwood Received Questionnaire: USDA Forest Service personnel will use this questionnaire to collect and evaluate information from pulp mills in order to monitor the volume, types, species, sources, and prices of timber products harvested throughout the United States. The data collected will be used to provide essential information about the current use of the Nation's timber resources for pulpwood industrial products and is not available from other sources.

Logs and Other Roundwood Received Questionnaire: This questionnaire is used by USDA Forest Service or state natural resource agency personnel to collect and evaluate information from the other, non-pulp, primary wood-using mills, including small, part-time mills, as well as large corporate entities. Primary wood-using mills are facilities that use harvested wood in log or chip form, such as sawlogs, veneer logs, composite panel, posts, and poles, to manufacture a secondary product, such as lumber or veneer. USDA Forest Service personnel evaluate the information collected and use it to monitor the volume types, species, sources, and prices of timber products harvested throughout the United States.

Logging Operations Questionnaire: This questionnaire is used by USDA Forest Service and/or state natural resource agency personnel to collect and evaluate information from logging operations, to help characterize the logging industry and its response to outside influences. The information will be used to measure the 'health' of the logging industry, as well as to provide background information for decision-making.

Affected Public: Individuals and the Private Sector (Businesses and Non-Profit Organizations), in particular mill owners, procurement foresters, logging operations owners, and loggers will be affected.

Estimate of Burden per Response: An average of 30 minutes for the Pulpwood Questionnaire for 132 respondents (estimated); an average of 42 minutes for the Logs and Other Roundwood Questionnaire for 2,875 respondents (estimated); an average of 11 minutes for the Logging Operations Questionnaire for 435 respondents (estimated).

Estimated Annual Number of Respondents: 3,442.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 2,147 hours.

Comment Is Invited

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request toward Office of Management and Budget approval.

Dated: June 29, 2108.

Carlos Rodriguez-Franco,

Deputy Chief for Research and Development.

BILLING CODE 3411–15–P

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility To Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, U.S. Department of Commerce.

ACTION: Notice and opportunity for public comment.

SUMMARY: The Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below. Accordingly, EDA has initiated investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each of the firms contributed importantly to the total or partial separation of the firms' workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

SUPPLEMENTARY INFORMATION:

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION OF ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT ASSISTANCE

[06/27/2018 through 07/10/2018]

Firm name	Firm address	Date accepted for investigation	Product(s)
Centerless Technology, Inc	45 Wells Street, Rochester, NY 14611.	6/27/2018	The firm manufactures steel parts through precision grinding.
DeLong's, Inc	301 Dix Road, Jefferson City, MO 65109.	6/27/2018	The firm manufactures fabricated structural steel products.
Fusion Systems, Inc. d/b/a Fusion OEM.	6951 High Grove Boulevard, Burr Ridge, IL 60527.	7/2/2018	The firm manufactures electro-mechanical devices, control systems, and communications equipment as well as associated racks, cabinets and housings. The firm also provides related assembly services.
La Mar Lighting Company, Inc.	485 Smith Street, Farmingdale, NY 11735.	7/3/2018	The firm manufactures fluorescent and light-emitting diode (LED) light fixtures as well as related sensor controls.

Any party having a substantial interest in these proceedings may request a public hearing on the matter. A written request for a hearing must be submitted to the Trade Adjustment Assistance Division, Room 71030, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than ten (10) calendar days following publication of this notice. These petitions are received pursuant to section 251 of the Trade Act of 1974, as amended.

Please follow the requirements set forth in EDA's regulations at 13 CFR 315.9 for procedures to request a public hearing. The Catalog of Federal Domestic Assistance official number and title for the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance for Firms.

Irette Patterson,

Program Analyst.

International Trade Administration

[A–570–088]

Steel Racks From the People's Republic of China: Initiation of Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable July 10, 2018.

FOR FURTHER INFORMATION CONTACT: Jonathan Hill or Patrick O'Connor at (202) 482–3518 or (202) 482–0989, respectively; AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petition

On June 20, 2018, the U.S. Department of Commerce (Commerce) received an antidumping duty (AD) Petition concerning imports of steel racks from the People's Republic of China (China), filed in proper form on behalf of the Coalition of Fair Rack Imports (the petitioner).[1] The AD Petition was accompanied by a countervailing duty (CVD) Petition concerning imports of steel racks from China.

On June 22, 2018, Commerce requested supplemental information pertaining to certain aspects of the Petition in two separate supplemental questionnaires, one dealing with general issues with the petition and the other with issues related to Volume II of the Petition.[2]

The petitioner filed its responses to the supplemental questionnaires on June 26.[3] On June 28, and June 29, 2018, Commerce requested supplemental information pertaining to certain areas of the Petition.[4] The petitioner filed responses to Commerce's requests on June 29, and July 2, 2018.[5] On July 5, 2018, we spoke with the petitioner regarding the scope language submitted in its July 2, 2018 submission.[6] On July 9, 2018, the petitioner filed an amendment to the scope, further clarifying the scope language.[7]

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the Act), the petitioner alleges that imports of steel racks from China are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act, and that such imports are materially injuring, or threatening material injury to, the domestic industry producing steel racks in the United States. Consistent with section 732(b)(1) of the Act, the Petition is accompanied by information reasonably available to the petitioner supporting its allegation.

Commerce finds that the petitioner filed the Petition on behalf of the domestic industry because the petitioner is an interested party as defined in section 771(9)(E) of the Act. Commerce also finds that the petitioner demonstrated sufficient industry support with respect to the initiation of the AD investigation that the petitioner is requesting.[8]

Period of Investigation

Because China is a non-market economy (NME) country, pursuant to 19 CFR 351.204(b)(1), the period of investigation (POI) is October 1, 2017, through March 31, 2018.

Scope of the Investigation

The product covered by this investigation is steel racks from China. For a full description of the scope of this investigation, *see* the Appendix to this notice.

Scope Comments

During our review of the Petition, Commerce contacted the petitioner regarding the proposed scope language to ensure that the scope language in the Petition is an accurate reflection of the products for which the domestic industry is seeking relief.[9] As a result, the scope of the Petition was modified to clarify the description of merchandise covered by the Petition. The description of the merchandise covered by this initiation, as described in the Appendix to this notice, reflects these clarifications.

As discussed in the preamble to Commerce's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (scope).[10] Commerce will consider all comments received from interested parties and, if necessary, will consult with interested parties prior to the issuance of the preliminary determination. If scope comments include factual information,[11] all such factual information should be limited to public information. To facilitate preparation of its questionnaires, Commerce requests that all interested parties submit scope comments by 5:00 p.m. Eastern Time (ET) on July 30, 2018, which is 20 calendar days from the signature date of this notice.[12] Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on August 9, 2018, which is 10 calendar days from the initial comments deadline.

Commerce requests that any factual information parties consider relevant to the scope of the investigation be submitted during this period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact Commerce and request permission to submit the additional information. All such submissions must be filed on the records of the concurrent AD and CVD investigations.

Filing Requirements

All submissions to Commerce must be filed electronically using Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS).[13] An electronically filed document must be received successfully in its entirety by the time and date it is due. Documents exempted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Comments on Product Characteristics for AD Questionnaire

Commerce is providing interested parties an opportunity to comment on the appropriate physical characteristics

of steel racks to be reported in response to Commerce's AD questionnaire. This information will be used to identify the key physical characteristics of the merchandise under consideration in order to report the relevant factors of production accurately, as well as to develop appropriate product-comparison criteria.

Interested parties may provide any information or comments that they feel are relevant to the development of an accurate list of physical characteristics. In order to consider the suggestions of interested parties in developing and issuing the AD questionnaire, all product characteristics comments must be filed by 5:00 p.m. ET on July 30, 2018, which is 20 calendar days from the signature date of this notice.[14] Any rebuttal comments must be filed by 5:00 p.m. ET on August 9, 2018. All comments and submissions to Commerce must be filed electronically using ACCESS, as explained above, on the record of the China less-than-fair-value investigation.

Determination of Industry Support for the Petition

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, Commerce shall: (i) poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs Commerce to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both Commerce and the ITC must apply the same statutory definition regarding the domestic like product,[15] they do so for different purposes and pursuant to a separate and distinct authority. In addition, Commerce's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[16]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioner does not offer a definition of the domestic like product distinct from the scope of the investigation.[17] Based on our analysis of the information submitted on the record, we have determined that steel racks, as defined in the scope, constitute a single domestic like product, and we have analyzed industry support in terms of that domestic like product.[18]

In determining whether the petitioner has standing under section 732(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in the Appendix to this notice. To establish industry support, the petitioner provided its own 2017 shipments of the domestic like product and compared this to the estimated total shipments of the domestic like product for the entire domestic industry.[19] The petitioner explained that it relied on shipment data because production data for the entire domestic industry were not available.[20] In addition, the petitioner contends that shipments are a reasonable proxy for data on production of steel racks.[21] We relied on data the petitioner provided for purposes of measuring industry support.[22]

In its July 3, 2018, letter, Jiaxing Zhongda Import & Export Co., Ltd. (Jiaxing Zhongda), a Chinese exporter/producer, submitted comments on industry support and requested that Commerce poll the industry to determine industry support.[23] The petitioner responded to these comments in the Industry Support Supplement, dated July 3, 2018.[24] In a letter dated July 5, 2018, Guangdong Wireking Housewares and Hardware Co., Ltd. (Guangdong Wireking), a Chinese exporter/producer, submitted comments on industry support and requested that Commerce poll the industry to determine industry support.[25] The petitioner responded to Guangdong Wireking's comments on July 6, 2018.[26] In a letter dated July 9, 2018, United Material Handling (UMH), a U.S. importer of subject merchandise, submitted comments on industry support and requested that Commerce poll the industry to determine industry support.[27] The petitioner responded to these comments in the Third Industry Support Supplement, dated July 10,

2018.[28] For further discussion of these comments, *see* Attachment II of the China AD Initiation Checklist.

Our review of the data provided in the Petition, the General Issues Supplement, the Second General Issues Supplement, letters from Jiaxing Zhongda, Guangdong Wireking, and UMH, the Industry Support Supplement, the Second Industry Support Supplement, the Third Industry Support Supplement, and other information readily available to Commerce indicates that the petitioner has established industry support for the Petition.[29] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, Commerce is not required to take further action in order to evaluate industry support (*e.g.,* polling).[30] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[31] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[32] Accordingly, Commerce determines that the Petition was filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act.

Commerce finds that the petitioner filed the Petition on behalf of the domestic industry because it is an interested party as defined in section 771(9)(E) of the Act and it has demonstrated sufficient industry support with respect to the AD investigation that it is requesting that Commerce initiate.[33]

Allegations and Evidence of Material Injury and Causation

The petitioner alleges that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of the imports of the subject merchandise sold at less than normal value (NV). In addition, the petitioner alleges that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[34]

The petitioner contends that the industry's injured condition is illustrated by a significant and increasing volume of subject imports; reduced market share; underselling and price depression or suppression; lost sales and lost revenues; decline in production, quantity of U.S. shipments, and capacity utilization rate; and decline in the domestic industry's profitability.[35] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence, and meet the statutory requirements for initiation.[36]

Allegations of Sales at Less Than Fair Value

The following is a description of the allegations of sales at less than fair value upon which Commerce based its decision to initiate an AD investigation of imports of steel racks from China. The sources of data for the deductions and adjustments relating to U.S. price and NV are discussed in greater detail in the China AD Initiation Checklist.

Export Price

The petitioner based U.S. export prices (EP) on price quotes.[37] Where applicable, the petitioner made deductions from U.S. price for distributor markup, movement and other expenses, consistent with the terms of sale.[38]

Normal Value

Commerce considers China to be an NME country.[39] In accordance with section 771(18)(C)(i) of the Act, any determination that a foreign country is an NME country shall remain in effect until revoked by Commerce. Therefore, we continue to treat China as an NME country for purposes of the initiation of this investigation. Accordingly, NV in China is appropriately based on factors of production (FOPs) valued in a surrogate market economy country, in accordance with section 773(c) of the Act.[40]

The petitioner claims that Brazil is an appropriate surrogate country for China because it is a market economy country that is at a level of economic development comparable to that of China and it is a significant producer of comparable merchandise.[41] The petitioner provided publicly available information from Brazil to value all FOPs.[42] Therefore, based on the information provided by the petitioner, we determine that it is appropriate to use Brazil as the primary surrogate country for initiation purposes.

Interested parties will have the opportunity to submit comments regarding surrogate country selection and, pursuant to 19 CFR 351.301(c)(3)(i), will be provided an opportunity to submit publicly available information to value FOPs within 30 days before the scheduled date of the preliminary determination.

Factors of Production

Based on its assertion that information regarding the FOPs and volume of inputs consumed by Chinese producers/exporters of steel racks was not reasonably available to the petitioner, the petitioner used the consumption rates of a U.S. steel racks producer to estimate the Chinese manufacturers' FOPs.[43] The petitioner valued the estimated FOPs using surrogate values from Brazil, as noted above.[44] The petitioner used the average

POI exchange rate to convert surrogate values expressed in Brazilian reals to U.S. dollars.[45]

Fair Value Comparisons

Based on the data provided by the petitioner, there is reason to believe that imports of steel racks from China are being, or are likely to be, sold in the United States at less than fair value. Based on comparisons of EP to NV in accordance with sections 772 and 773 of the Act, the estimated dumping margins for steel racks from China are 130.0–144.5 percent.[46]

Initiation of Less-Than-Fair-Value Investigation

Based upon the examination of the Petition, we find that the Petition meets the requirements of section 732 of the Act. Therefore, we are initiating an AD investigation to determine whether imports of steel racks from China are being, or are likely to be, sold in the United States at less than fair value. In accordance with section 733(b)(1)(A) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determination no later than 140 days after the date of this initiation.

Respondent Selection

The petitioner named 93 producers/exporters as accounting for the majority of exports of steel racks to the United States from China.[47] In accordance with our standard practice for respondent selection in AD cases involving NME countries, we intend to issue quantity and value (Q&V) questionnaires to producers/exporters of merchandise subject to this investigation. In the event Commerce determines that it cannot individually examine each company, where appropriate, Commerce intends to select mandatory respondents based on the responses received to its Q&V questionnaire. Commerce will request Q&V information from known exporters and producers identified with complete contact information in the Petition. In addition, Commerce will post the Q&V questionnaires along with filing instructions on Enforcement and Compliance's website at *http://www.trade.gov/enforcement/news.asp.*

Producers/exporters of steel racks from China that do not receive Q&V questionnaires by mail may still submit a response to the Q&V questionnaire and can obtain a copy of the Q&V questionnaire from Enforcement & Compliance's website. The Q&V questionnaire response must be submitted by the relevant Chinese exporters/producers no later than 5:00 p.m. ET on July 24, 2018, which is two weeks from the signature date of this notice. All Q&V responses must be filed electronically via ACCESS.

Separate Rates

In order to obtain separate-rate status in an NME investigation, exporters and producers must submit a separate-rate application.[48] The specific requirements for submitting a separate-rate application in this investigation are outlined in detail in the application itself, which is available on Commerce's website at *http://enforcement.trade.gov/nme/nme-sep-rate.html.* The separate-rate application will be due 30 days after publication of this initiation notice.[49] Exporters and producers who submit a separate-rate application and have been selected as mandatory respondents will be eligible for consideration for separate-rate status only if they respond to all parts of Commerce's AD questionnaire as mandatory respondents. Commerce requires that companies from China submit a response to both the Q&V questionnaire and the separate-rate application by the respective deadlines in order to receive consideration for separate-rate status. Companies not filing a timely Q&V questionnaire response will not receive separate-rate consideration.

Use of Combination Rates

Commerce will calculate combination rates for certain respondents that are eligible for a separate rate in an NME investigation. The Separate Rates and Combination Rates Bulletin states:

> {w}hile continuing the practice of assigning separate rates only to exporters, all separate rates that the Department will now assign in its NME Investigation will be specific to those producers that supplied the exporter during the period of investigation. Note, however, that one rate is calculated for the exporter and all of the producers which supplied subject merchandise to it during the period of investigation. This practice applies both to mandatory respondents receiving an individually calculated separate rate as well as the pool of non-investigated firms receiving the weighted-average of the individually calculated rates. This practice is referred to as the application of "combination rates" because such rates apply to specific combinations of exporters and one or more producers. The cash-deposit rate assigned to an exporter will apply only to merchandise both exported by the firm in question *and* produced by a firm that supplied the exporter during the period of investigation.[50]

Distribution of Copies of the Petition

In accordance with section 732(b)(3)(A) of the Act and 19 CFR 351.202(f), copies of the public version of the Petition have been provided to the government of China *via* ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petition to each exporter named in the Petition, as provided under 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 732(d) of the Act.

Preliminary Determination by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of steel racks from China are materially injuring or threatening material injury to a U.S. industry. A negative ITC determination will result in the investigation being terminated.[51] Otherwise, the investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). 19 CFR 351.301(b) requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted [52] and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[53] Time limits for the submission of factual

[45] *Id.* at Exhibit II–9.

[46] *See* China AD Initiation Checklist.

[47] *See* Volume I of the Petition at Exhibit I–6; *see also* General Issues Supplement, at 1 and Exhibit 1.

[48] *See* Policy Bulletin 05.1: Separate-Rates Practice and Application of Combination Rates in Antidumping Investigation involving Non-Market Economy Countries (April 5, 2005), available at *http://enforcement.trade.gov/policy/bull05-1.pdf* (Policy Bulletin 05.1).

[49] Although in past investigations this deadline was 60 days, consistent with 19 CFR 351.301(a), which states that "the Secretary may request any person to submit factual information at any time during a proceeding," this deadline is now 30 days.

[50] *See* Policy Bulletin 05.1 at 6 (emphasis added).

[51] *Id.*

[52] *See* 19 CFR 351.301(b).

[53] *See* 19 CFR 351.301(b)(2).

information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Interested parties should review the regulations prior to submitting factual information in this investigation.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in a letter or memorandum of the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Parties should review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[54] Parties must use the certification formats provided in 19 CFR 351.303(g).[55] Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, Commerce published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed at 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 732(c)(2) and 777(i) of the Act, and 19 CFR 351.203(c).

Dated: July 10, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by this investigation is steel racks and parts thereof, assembled, to any extent, or unassembled, including but not limited to, vertical components (*e.g.,* uprights, posts, or columns), horizontal or diagonal components (*e.g.,* arms or beams), braces, frames, locking devices (*i.e.,* end plates and beam connectors), and accessories (including, but not limited to, rails, skid channels, skid rails, drum/coil beds, fork clearance bars, pallet supports, column and post protectors, end row and end aisle protectors, corner guards, row spacers, and wall ties). Subject steel racks and parts thereof are made of steel, including, but not limited to, cold and/or hot-formed steel, regardless of the type of steel used to produce the components and may, or may not, include locking tabs, slots, or bolted, clamped, or welded connections.

Steel rack components can be assembled into structures of various dimensions and configurations by welding, bolting, clipping, or with the use of devices such as clips, end plates, and beam connectors, including, but not limited to the following configurations: (1) Racks with upright frames perpendicular to the aisles that are independently adjustable, with positive locking beams parallel to the aisle spanning the upright frames with braces; and (2) cantilever racks with vertical components parallel to the aisle and cantilever beams or arms connected to the vertical components perpendicular to the aisle. Steel racks may be referred to as pallet racks, storage racks, stacker racks, retail racks, pick modules, selective racks, or cantilever racks and may incorporate moving components and be referred to as pallet-flow racks, carton-flow racks, push-back racks, movable-shelf racks, drive-in racks, and drive-through racks. While steel racks may be made to ANSI MH16.l or ANSI MH16.3 standards, all steel racks and parts thereof meeting the description set out herein are covered by the scope of this investigation, whether or not produced according to a particular standard.

The scope includes all steel racks and parts thereof meeting the description above, regardless of

(1) dimensions, weight, strength, gauge, or load rating;

(2) vertical components or frame type (including structural, roll-form, or other);

(3) horizontal support or beam/brace type (including but not limited to structural, roll-form, slotted, unslotted, Z-beam, C-beam, L-beam, step beam, and cantilever beam);

(4) number of supports;

(5) number of levels;

(6) surface coating, if any (including but not limited to paint, epoxy, powder coating, zinc, or other metallic coatings);

(7) shape (including but not limited to rectangular, square, corner, and cantilever);

(8) the method by which the vertical and horizontal supports connect (including but not limited to locking tabs or slots, bolting, clamping, and welding); and

(9) whether or not the steel rack has moving components (including but not limited to rails, wheels, rollers, tracks, channels, carts, and conveyors).

Subject merchandise includes merchandise matching the above description that has been finished or packaged in a third country. Finishing includes, but is not limited to, coating, painting, or assembly, including attaching the merchandise to another product, or any other finishing or assembly operation that would not remove the merchandise from the scope of the investigation if performed in the country of manufacture of the steel racks and parts thereof. Packaging includes packaging the merchandise with or without another product or any other packaging operation that would not remove the merchandise from the scope of the investigation if performed in the country of manufacture of the steel racks and parts thereof.

Steel racks and parts thereof are included in the scope of this investigation whether or not imported attached to, or included with, other parts or accessories such as wire decking, nuts, and bolts. If steel racks and parts thereof are imported attached to, or included with, such non-subject merchandise, only the steel racks and parts thereof are included in the scope.

The scope of this investigation does not cover: (1) Decks, *i.e.,* shelving that sits on or fits into the horizontal supports to provide the horizontal storage surface of the steel racks; (2) wire shelving units, *i.e.,* shelves made from wire that incorporate both a wire deck and wire horizontal supports (taking the place of the horizontal beams and braces) into a single piece with tubular collars that slide over the posts and onto plastic sleeves snapped on the posts to create a finished unit; (3) pins, nuts, bolts, washers, and clips used as connecting devices; and 4) non-steel components.

Specifically excluded from the scope of this investigation are any products covered by Commerce's existing antidumping and countervailing duty orders on boltless steel shelving units prepackaged for sale from the People's Republic of China. *See Boltless Steel Shelving Units Prepackaged for Sale From the People's Republic of China: Antidumping Duty Order,* 80 FR 63,741 (October 21, 2017); *Boltless Steel Shelving Units Prepackaged for Sale From the People's Republic of China: Amended Final Affirmative Countervailing*

[54] *See* section 782(b) of the Act.

[55] *See also Certification of Factual Information to Import Administration During Antidumping and Countervailing Duty Proceedings,* 78 FR 42678 (July 17, 2013) (*Final Rule*). Answers to frequently asked questions regarding the *Final Rule* are available at *http://enforcement.trade.gov/tlei/notices/factual_info_final_rule_FAQ_07172013.pdf.*

Duty Determination and Countervailing Duty Order, 80 FR 63,745 (October 21, 2017). Also excluded from the scope of this investigation are bulk-packed parts or components of boltless steel shelving units that were specifically excluded from the scope of the *Boltless Steel Shelving Orders* because such bulk-packed parts or components do not contain the steel vertical supports (*i.e.,* uprights and posts) and steel horizontal supports (*i.e.,* beams, braces) packaged together for assembly into a completed boltless steel shelving unit.

Merchandise covered by this investigation is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under the following subheadings: 7326.90.8688, 9403.20.0080, and 9403.90.8041. Subject merchandise may also enter under subheadings 7308.90.3000, 7308.90.6000, 7308.90.9590, and 9403.20.0090. The HTSUS subheadings are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

[FR Doc. 2018–15225 Filed 7–16–18; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–570–089]

Certain Steel Racks From the People's Republic: Initiation of Countervailing Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable July 10, 2018.

FOR FURTHER INFORMATION CONTACT: Eli Lovely or Robert Galantucci at (202) 482–1593 or (202) 482–2923, respectively, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petition

On June 20, 2018, the U.S. Department of Commerce (Commerce) received a countervailing duty (CVD) Petition concerning imports of certain steel racks (steel racks) from the People's Republic of China (China), filed in proper form on behalf of the Coalition for Fair Rack Imports (the petitioner), the members of which are domestic producers of steel racks.[1] The CVD Petition was accompanied by an antidumping duty (AD) Petition concerning imports of steel racks from China.

On June 22, 2018, Commerce requested supplemental information pertaining to certain aspects of the Petition in two separate supplemental questionnaires, one dealing with CVD programs and one primarily with scope clarification issues.[2] The petitioner filed additional information on June 26, 2018.[3]

On June 28, 2018, Commerce requested supplemental information pertaining to industry support and import statistics.[4] The petitioner filed a response to Commerce's request on July 2, 2018.[5] On July 5, 2018, we spoke with the petitioner regarding the scope language submitted in its July 2, 2018, submission.[6] On July 9, 2018, the petitioner filed an amendment to the scope, further clarifying the scope language.[7]

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), the petitioner alleges that the Government of China (GOC) is providing countervailable subsidies, within the meaning of sections 701 and 771(5) of the Act, to producers of steel racks in China and that imports of such products are materially injuring, or threatening material injury to, the domestic steel racks industry in the United States. Consistent with section 702(b)(1) of the Act and 19 CFR 351.202(b), for those alleged programs on which we are initiating a CVD investigation, the Petition is accompanied by information reasonably available to the petitioner supporting its allegations.

Commerce finds that the petitioner filed the Petition on behalf of the domestic industry because the petitioner is an interested party as defined in section 771(9)(E) of the Act. Commerce also finds that the petitioner demonstrated sufficient industry support necessary for the initiation of the requested CVD investigation.[8]

Period of Investigation

Because the Petition was filed on June 20, 2018, the period of investigation is January 1, 2017, through December 31, 2017.

Scope of the Investigation

The product covered by this investigation is steel racks from China. For a full description of the scope of these investigations, *see* the Appendix to this notice.

Scope Comments

During our review of the Petition, Commerce received proposed scope language from the petitioner to ensure that the scope language in the Petition is an accurate reflection of the products for which the domestic industry is seeking relief.[9] As a result of petitioner's submissions, the scope of the Petition was modified to clarify the description of merchandise covered by the Petition. The description of the merchandise covered by this initiation, as described in the Appendix to this notice, reflects this clarification.

As discussed in the Preamble to Commerce's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (scope).[10] Commerce will consider all comments received from interested parties and, if necessary, will consult with interested parties prior to the issuance of the preliminary determination. If scope comments include factual information,[11] all such factual information should be limited to public information. To facilitate preparation of its questionnaires, Commerce requests that all interested parties submit such comments by 5:00 p.m. Eastern Time (ET) on July 30, 2018, which is 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on August 9, 2018, which is 10 calendar days from the initial comments deadline.[12]

Commerce requests that any factual information parties consider relevant to the scope of the investigation be submitted during this period. However,

[12] *See* 19 CFR 351.303(b).

if a party subsequently finds that additional factual information pertaining to the scope of the investigation may be relevant, the party may contact Commerce and request permission to submit the additional information. All such submissions must be filed on the records of the concurrent AD and CVD investigations.

Filing Requirements

All submissions to Commerce must be filed electronically using Enforcement and Compliance's Antidumping Duty and Countervailing Duty Centralized Electronic Service System (ACCESS).[13] An electronically filed document must be received successfully in its entirety by the time and date it is due. Documents exempted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Consultations

Pursuant to sections 702(b)(4)(A)(i) and (ii) of the Act, Commerce notified representatives of the GOC of the receipt of the Petition and provided them the opportunity for consultations with respect to the CVD Petition.[14] The GOC did not request consultations.

Determination of Industry Support for the Petition

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, Commerce shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs Commerce to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both Commerce and the ITC must apply the same statutory definition regarding the domestic like product,[15] they do so for different purposes and pursuant to a separate and distinct authority. In addition, Commerce's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[16]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the petition).

With regard to the domestic like product, the petitioner does not offer a definition of the domestic like product distinct from the scope of the investigation.[17] Based on our analysis of the information submitted on the record, we have determined that steel racks, as defined in the scope, constitute a single domestic like product, and we have analyzed industry support in terms of that domestic like product.[18]

In determining whether the petitioner has standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in the Appendix to this notice. To establish industry support, the petitioner provided its own 2017 shipments of the domestic like product and compared this to the estimated total shipments of the domestic like product for the entire domestic industry.[19] The petitioner explained that it relied on shipment data because production data for the entire domestic industry are not available.[20] In addition, the petitioner contends that shipments are a reasonable proxy for data on production of steel racks.[21] We relied on data the petitioner provided for purposes of measuring industry support.[22]

In its July 3, 2018, letter, Jiaxing Zhongda Import & Export Co., Ltd. (Jiaxing Zhongda), a Chinese exporter/producer, submitted comments on industry support and requested that Commerce poll the industry to determine industry support.[23] The petitioner responded to these comments in the Industry Support Supplement, dated July 3, 2018.[24] In a letter dated July 5, 2018, Guangdong Wireking Housewares and Hardware Co., Ltd. (Guangdong Wireking), a Chinese exporter/producer, submitted comments on industry support and requested that

Commerce poll the industry to determine industry support.[25] The petitioner responded to Guangdong Wireking's comments on July 6, 2018.[26] In a letter dated July 9, 2018, United Material Handling (UMH), a U.S. importer of subject merchandise, submitted comments on industry support and requested that Commerce poll the industry to determine industry support.[27] The petitioner responded to these comments on July 10, 2018.[28] For further discussion of these comments, *see* Attachment II of the China CVD Initiation Checklist.

Our review of the data provided in the Petition, the General Issues Supplement, the Second General Issues Supplement, letters from Jiaxing Zhongda, Guangdong Wireking, and UMH, the Industry Support Supplement, the Second Industry Support Supplement, the Third Industry Support Supplement, and other information readily available to Commerce indicates that the petitioner has established industry support for the Petition.[29] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total production of the domestic like product and, as such, Commerce is not required to take further action in order to evaluate industry support (*e.g.*, polling).[30] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total production of the domestic like product.[31] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act because the domestic producers (or workers) who support the Petition account for more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[32] Accordingly, Commerce determines that the Petition was filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.

Commerce finds that the petitioner filed the Petition on behalf of the domestic industry because it is an interested party as defined in section 771(9)(E) of the Act, and it has demonstrated sufficient industry support with respect to the CVD investigation that it is requesting that Commerce initiate.[33]

Injury Test

Because China is a ''Subsidies Agreement Country'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to this investigation. Accordingly, the ITC must determine whether imports of the subject merchandise from China materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

The petitioner alleges that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. In addition, the petitioner alleges that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[34]

The petitioner contends that the industry's injured condition is illustrated by a significant and increasing volume of subject imports; reduced market share; underselling and price depression or suppression; lost sales and lost revenues; decline in production, quantity of U.S. shipments, and capacity utilization rate; and decline in the domestic industry's profitability.[35] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence, and meet the statutory requirements for initiation.[36]

Initiation of CVD Investigation

Based on the examination of the Petition, we find that the Petition meets the requirements of section 702 of the Act. Therefore, we are initiating a CVD investigation to determine whether imports of steel racks from China benefit from countervailable subsidies conferred by the GOC. In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 65 days after the date of this initiation.

Based on our review of the Petition, we find that there is sufficient information to initiate a CVD investigation on 25 of the 28 subsidy programs alleged in the petition. For a full discussion of the basis for our decision to initiate or not on each program, *see* China CVD Initiation Checklist. A public version of the initiation checklist for this investigation is available on ACCESS.

Respondent Selection

The petitioner named 93 producers/exporters as accounting for the majority of exports of steel racks to the United States from China.[37] In the event Commerce determines that the number of companies is large and it cannot individually examine each company based upon Commerce's resources, where appropriate, Commerce intends to select mandatory respondents based on quantity and value (Q&V) questionnaires issued to potential respondents. Commerce normally selects mandatory respondents in a CVD investigation using U.S. Customs and Border Protection (CBP) entry data, and on July 5, 2018, we released CBP data under Administrative Protective Order (APO) to all parties with access to information protected by APO and indicated that interested parties wishing to comment regarding the CBP data and respondent selection must do so within three business days of the publication date of the notice of initiation of this CVD investigation.[38] However, for this investigation, the Harmonized Tariff Schedule of the United States (HTSUS) numbers of the subject merchandise would enter under (7326.90.8688, 9403.20.0080, and 9403.90.8041) are basket categories containing products unrelated to steel racks, and much of the reported entry data do not contain

[36] *See* China Initiation Checklist at Attachment III, Analysis of Allegations and Evidence of Material Injury and Causation for the Antidumping and Countervailing Duty Petitions Covering Steel Racks from the People's Republic of China.

[37] *See* Volume I of the Petition, at Exhibit I–6; *see also* General Issues Supplement, at 1 and Exhibit 1.

[38] *See* Memorandum, ''Steel Racks from the People's Republic of China Countervailing Duty Petition: Release of Customs Data from U.S. Customs and Border Protection,'' dated July 5, 2018.

quantity information. We, therefore, cannot rely on CBP entry data in selecting respondents. We instead intend to issue Q&V questionnaires to each potential respondent, for which the petitioner has provided a complete address, that is: (1) Named in the Petition, and (2) appears in the CBP entry data, and base respondent selection on the responses received. Commerce will post the Q&V questionnaire along with the filing instructions on the Enforcement and Compliance website at *http://trade.gov/enforcement/news.asp.*

Exporters and producers of steel racks from China that do not receive Q&V questionnaires by mail may still submit a response to the Q&V questionnaire and can obtain a copy of the Q&V questionnaire from the Enforcement and Compliance website. The Q&V questionnaire must be submitted by the relevant Chinese exporters/producers no later than 5:00 p.m. ET on July 24, 2018, which is two weeks from the signature date of this notice. All Q&V responses must be filed electronically via ACCESS.

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on the Commerce's website at *http://enforcement.trade.gov/apo.*

Comments must be filed electronically using ACCESS. An electronically filed document must be received successfully, in its entirety, by ACCESS no later than 5:00 p.m. ET on the date noted above. We intend to finalize our decisions regarding respondent selection within 20 days of publication of this notice.

Distribution of Copies of the Petition

In accordance with section 702(b)(4)(A)(i) of the Act and 19 CFR 351.202(f), copies of the public versions of the Petition have been provided to the GOC *via* ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petition to each exporter named in the Petitions, as provided under 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 702(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petition was filed, whether there is a reasonable indication that imports of steel racks from China are materially injuring, or threatening material injury to, a U.S. industry.[39] A negative ITC determination will result in the investigation being terminated.[40] Otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by Commerce; and (v) evidence other than factual information described in (i)–(iv). 19 CFR 351.301(b) requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted[41] and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct.[42] Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Interested parties should review the regulations prior to submitting factual information in these investigations.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under 19 CFR 351.301. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. ET on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Parties should review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in these investigations.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[43] Parties must use the certification formats provided in 19 CFR 351.303(g).[44] Commerce intends to reject factual submissions if the submitting party does not comply with the applicable certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, Commerce published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed at 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 702 and 777(i) of the Act and 19 CFR 351.203(c).

Dated: July 10, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix

Scope of the Investigation

The merchandise covered by this investigation is steel racks and parts thereof, assembled, to any extent, or unassembled, including but not limited to, vertical components (*e.g.,* uprights, posts, or columns), horizontal or diagonal components (*e.g.,* arms or beams), braces, frames, locking devices (*i.e.,* end plates and beam connectors), and accessories (including, but

[40] *See* section 703(a)(1) of the Act.

[41] *See* 19 CFR 351.301(b).

[42] *See* 19 CFR 351.301(b)(2).

[43] *See* section 782(b) of the Act.

[44] *See Certification of Factual Information to Import Administration During Antidumping and Countervailing Duty Proceedings,* 78 FR 42678 (July 17, 2013) (''*Final Rule*''); *see also* frequently asked questions regarding the *Final Rule,* available at *http://enforcement.trade.gov/tlei/notices/factual_info_final_rule_FAQ_07172013.pdf.*

not limited to, rails, skid channels, skid rails, drum/coil beds, fork clearance bars, pallet supports, column and post protectors, end row and end aisle protectors, corner guards, row spacers, and wall ties). Subject steel racks and parts thereof are made of steel, including, but not limited to, cold and/or hot-formed steel, regardless of the type of steel used to produce the components and may, or may not, include locking tabs, slots, or bolted, clamped, or welded connections.

Steel rack components can be assembled into structures of various dimensions and configurations by welding, bolting, clipping, or with the use of devices such as clips, end plates, and beam connectors, including, but not limited to the following configurations: (1) Racks with upright frames perpendicular to the aisles that are independently adjustable, with positive locking beams parallel to the aisle spanning the upright frames with braces; and (2) cantilever racks with vertical components parallel to the aisle and cantilever beams or arms connected to the vertical components perpendicular to the aisle. Steel racks may be referred to as pallet racks, storage racks, stacker racks, retail racks, pick modules, selective racks, or cantilever racks and may incorporate moving components and be referred to as pallet-flow racks, carton-flow racks, push-back racks, movable-shelf racks, drive-in racks, and drive-through racks. While steel racks may be made to ANSI MH16.l or ANSI MH16.3 standards, all steel racks and parts thereof meeting the description set out herein are covered by the scope of this investigation, whether or not produced according to a particular standard.

The scope includes all steel racks and parts thereof meeting the description above, regardless of

(1) Dimensions, weight, strength, gauge, or load rating;

(2) vertical components or frame type (including structural, roll-form, or other);

(3) horizontal support or beam/brace type (including but not limited to structural, roll-form, slotted, unslotted, Z-beam, C-beam, L-beam, step beam, and cantilever beam);

(4) number of supports;

(5) number of levels;

(6) surface coating, if any (including but not limited to paint, epoxy, powder coating, zinc, or other metallic coatings);

(7) shape (including but not limited to rectangular, square, corner, and cantilever);

(8) the method by which the vertical and horizontal supports connect (including but not limited to locking tabs or slots, bolting, clamping, and welding); and

(9) whether or not the steel rack has moving components (including but not limited to rails, wheels, rollers, tracks, channels, carts, and conveyors).

Subject merchandise includes merchandise matching the above description that has been finished or packaged in a third country. Finishing includes, but is not limited to, coating, painting, or assembly, including attaching the merchandise to another product, or any other finishing or assembly operation that would not remove the merchandise from the scope of the investigation if performed in the country of manufacture of the steel racks and parts thereof. Packaging includes packaging the merchandise with or without another product or any other packaging operation that would not remove the merchandise from the scope of the investigation if performed in the country of manufacture of the steel racks and parts thereof.

Steel racks and parts thereof are included in the scope of this investigation whether or not imported attached to, or included with, other parts or accessories such as wire decking, nuts, and bolts. If steel racks and parts thereof are imported attached to, or included with, such non-subject merchandise, only the steel racks and parts thereof are included in the scope.

The scope of this investigation does not cover: (1) Decks, *i.e.,* shelving that sits on or fits into the horizontal supports to provide the horizontal storage surface of the steel racks; (2) wire shelving units, *i.e.,* shelves made from wire that incorporate both a wire deck and wire horizontal supports (taking the place of the horizontal beams and braces) into a single piece with tubular collars that slide over the posts and onto plastic sleeves snapped on the posts to create a finished unit; (3) pins, nuts, bolts, washers, and clips used as connecting devices; and (4) non-steel components.

Specifically excluded from the scope of this investigation are any products covered by Commerce's existing antidumping and countervailing duty orders on boltless steel shelving units prepackaged for sale from the People's Republic of China. *See Boltless Steel Shelving Units Prepackaged for Sale From the People's Republic of China: Antidumping Duty Order,* 80 FR 63,741 (October 21, 2017); *Boltless Steel Shelving Units Prepackaged for Sale From the People's Republic of China: Amended Final Affirmative Countervailing Duty Determination and Countervailing Duty Order,* 80 FR 63,745 (October 21, 2017). Also excluded from the scope of this investigation are bulk-packed parts or components of boltless steel shelving units that were specifically excluded from the scope of the *Boltless Steel Shelving Orders* because such bulk-packed parts or components do not contain the steel vertical supports (*i.e.,* uprights and posts) and steel horizontal supports (*i.e.,* beams, braces) packaged together for assembly into a completed boltless steel shelving unit.

Merchandise covered by this investigation is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under the following subheadings: 7326.90.8688, 9403.20.0080, and 9403.90.8041. Subject merchandise may also enter under subheadings 7308.90.3000, 7308.90.6000, 7308.90.9590, and 9403.20.0090. The HTSUS subheadings are provided for convenience and U.S. Customs purposes only. The written description of the scope is dispositive.

Cast Iron Soil Pipe Fittings From the People's Republic of China: Final Affirmative Determination of Sales at Less Than Fair Value and Final Determination of Critical Circumstances, in Part

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) determines that cast iron soil pipe fittings from the People's Republic of China (China) are being, or are likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is January 1, 2017, through June 30, 2017.

DATES: Applicable July 17, 2018.

FOR FURTHER INFORMATION CONTACT: Sergio Balbontin or Denisa Ursu, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–6478 and (202) 482–2285 respectively.

SUPPLEMENTARY INFORMATION:

Background

On February 20, 2018, Commerce published in the **Federal Register** the *Preliminary Determination* in the LTFV investigation of cast iron soil pipe fittings from China.[1] The mandatory respondents in this investigation are Shanxi Xuanshi Industrial Group Co. Ltd. (Xuanshi), Wor-Biz International Trading Co., Ltd. (Anhui) (Wor-Biz), Sibo International Limited (Sibo), and Kingway Pipe Co., Ltd. (Kingway). Commerce exercised its discretion to toll all deadlines affected by the closure of the Federal Government from January 20 through 22, 2018. If the new deadline falls on a non-business day, in accordance with Commerce's practice, the deadline will become the next business day. The revised deadline for the final determination of this investigation is now July 5, 2018.[2]

[1] *See Cast Iron Soil Pipe Fittings from the People's Republic of China: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Affirmative Determination of Critical Circumstances, in Part, Postponement of Final Determination and Extension of Provisional Measures,* 83 FR 7145 (February 20, 2018) (*Preliminary Determination*) and accompanying Preliminary Decision Memorandum.

[2] *See* Memorandum for The Record from Christian Marsh, Deputy Assistant Secretary for

Continued

A summary of the events that occurred since Commerce published the *Preliminary Determination,* as well as a full discussion of the issues raised by interested parties for this final determination may be found in the Issues and Decision Memorandum issued concurrently with this notice.[3] The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov,* and is available to all parties in the Central Records Unit, Room B8024 of the main Department of Commerce building. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.* The signed Issues and Decision Memorandum and the electronic version are identical in content.

Scope of the Investigation

The products covered by this investigation are cast iron soil pipe fittings from China. For a full description of the scope of this investigation, *see* the ''Scope of the Investigation'' in Appendix I of this notice. For this final determination, Commerce has issued a scope memorandum addressing interested parties' comments regarding scope issues presented in the case briefs and in subsequent scope comments.[4] Commerce has determined to modify the scope of the investigation to include two additional subheadings of the U.S. Harmonized Tariff Schedule under which subject merchandise may enter. Commerce has also provided a clarification in the Final Scope Memorandum. For further discussion, *see* Commerce's Final Scope Memorandum. The scope in Appendix I reflects the final scope language.

Analysis of Comments Received

The issues raised in the case and rebuttal briefs submitted by parties in this investigation are addressed in the Issues and Decision Memorandum. A list of the issues that parties raised, and to which we responded in the Issues and Decision Memorandum is attached to this notice at Appendix II.

Final Affirmative Determination of Critical Circumstances, in Part

In accordance with section 733(e)(1) of the Act and 19 CFR 351.206, we preliminarily found that critical circumstances exist with respect to imports of cast iron soil pipe fittings from the China-wide entity, the non-selected separate rate respondents, and Sibo, but do not exist with respect to Xuanshi and Wor-Biz.[5] Commerce received no comments regarding its preliminary critical circumstances findings. For the final determination, we continue to find that, in accordance with section 735(a)(3) of the Act and 19 CFR 351.206, critical circumstances exist with respect to imports of the subject merchandise from the China-wide entity. Based on updated shipment and import data, we find that critical circumstances do not exist with respect to Xuanshi, Wor-Biz, and the non-selected separate rate respondents.[6] As discussed below, we have determined that Sibo is no longer eligible for a separate rate, and is now considered to be part of the China-wide entity.

China-Wide Entity and Use of Adverse Facts Available

After the *Preliminary Determination* and prior to verification, Sibo notified Commerce that it was withdrawing from participation in this investigation. By withdrawing from participation in this investigation, Sibo prevented us from conducting verification of its questionnaire responses, including its claim that it is a wholly foreign-owned company. Therefore, we find that Sibo has failed to demonstrate its eligibility for a separate rate, and is considered to be part of the China-wide entity.[7] For the reasons explained in the *Preliminary Determination,* we continue to find that the use of adverse facts available (AFA), pursuant to sections 776(a) and (b) of the Act, is warranted in determining the rate for the China-wide entity, which includes Sibo, Kingway, and other uncooperative respondents.

China-Wide Rate

In selecting the AFA rate for the China-wide entity, Commerce's practice is to select a rate that is sufficiently adverse to ensure that the uncooperative party does not obtain a more favorable result by failing to cooperate than if it had fully cooperated.[8] Specifically, it is Commerce's practice to select, as an AFA rate, the higher of: (a) The highest dumping margin alleged in the petition; or, (b) the highest calculated dumping margin of any respondent in the investigation.[9] For the final determination and for the reasons explained in the Issues and Decision Memorandum, we are relying on the highest non-aberrational control-number-specific dumping margin calculated for Sibo in the *Preliminary Determination* to determine the rate for the China-wide entity.[10]

Separate Rates

For the final determination, we continue to find that Xuanshi and Wor-Biz are eligible to separate rates, as noted below. Section 735(c)(5)(A) of the Act provides that the estimated ''all-others'' rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding zero or *de minimis* margins, and any margins determined entirely under section 776 of Act. Consistent with our practice, we calculated a dumping margin for the companies determined to be eligible for separate rates, but which were not individually examined, based on the final dumping margins calculated for Xuanshi and Wor-Biz.[11] With two respondents, we would normally calculate (A) a weighted-average of the dumping margins calculated for the

Enforcement and Compliance, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance, ''Deadlines Affected by the Shutdown of the Federal Government'' (Tolling Memorandum), dated January 23, 2018. All deadlines in this segment of the proceeding have been extended by 3 days.

[10] *See* Issues and Decision Memorandum at Comment 1 for a full discussion of this issue.

[11] *See* Memorandum, ''Cast Iron Soil Pipe Fittings from the People's Republic of China: Calculation of the Final Margin for Separate Rate Companies,'' dated concurrently with this notice.

mandatory respondents; (B) a simple average of the dumping margins calculated for the mandatory respondents; and (C) a weighted-average of the dumping margins calculated for the mandatory respondents using each company's publicly-ranged values for the merchandise under consideration. We would compare (B) and (C) to (A) and select the rate closest to (A) as the most appropriate rate for the separate rate companies.[12] In this case, as complete publicly-ranged sales data was unavailable, we based the separate rate on a simple average of the two calculated margins.

Combination Rates

In the *Initiation Notice,*[13] Commerce stated that it would calculate producer/exporter combination rates for the respondents that are eligible for a separate rate in this investigation. Accordingly, we have assigned combination rates to certain companies as provided in the ''Final Determination'' section below.

Changes Since the Preliminary Determination

Based on our review and analysis of the comments received from interested parties and our findings at verification, we made certain changes to the calculation of the antidumping duty margin applicable to Xuanshi and Wor-Biz. For a discussion of these changes, *see* the Issues and Decision Memorandum.

Final Determination

Commerce determines that cast iron soil pipe fittings from China are being, or are likely to be, sold in the United States at LTFV, and that the following dumping margins exist:

Producer	Exporter	Estimated weighted-average dumping margin (percent)	Cash deposit rate (adjusted for subsidy offsets) (percent)
Shanxi Xuanshi Industrial Group Co., Ltd	Shanxi Xuanshi Industrial Group Co., Ltd	27.18	27.09
Guang Zhou Premier & Pinan Foundry Co., Ltd/Botou Chenyuan Foundry Co., Ltd/Wuhu Best Machines Co., Ltd.	Wor-Biz Trading Co., Ltd (Anhui)	22.11	21.88
Shijiazhuang Asia Casting Co., Ltd	Shijiazhuang Asia Casting Co., Ltd	24.65	24.49
Qinshui Shunshida Casting Co., Ltd/Xinle Xinye Metal Products Co., Ltd.	Shanxi Zhongrui Tianyue Trading Co., Ltd	24.65	24.49
Qinshui Shunshida Casting Co., Ltd/Xinle Rishuo Casting Factory/Shijiazhuang Shunjinguangao Trade Co., Ltd/Xinle Tang Rong Fa Lan Pan Co., Ltd.	Dalian Lino F.T.Z. Co., Ltd	24.65	24.49
Xinle City Zhile Pipeline Industry Co., Ltd/Qinshui Shunshida Casting Co., Ltd/Foshan City Deying Metal Products Co., Ltd.	Dinggin Hardware (Dalian) Co., Ltd	24.65	24.49
Xinle Rishuo Casting Factory/Qinshui Shunshida Casting Co., Ltd.	Dalian Metal I/E Co., Ltd	24.65	24.49
Qinshui County Xinwei Precision Co., Ltd	Qinshui Shunshida Casting Co., Ltd	24.65	24.49
Shanxi Guruiwei Casting Co., Ltd	Richang Qiaoshan Trade Co., Ltd	24.65	24.49
Shijiazhuang Jingruisheng Metal Products Co., Ltd/Qinshui Shunshida Casting Co., Ltd/Xinle City Zhile Pipe Co., Ltd.	Hebei Metals & Engineering Products Trading Co., Ltd.	24.65	24.49
China-Wide Entity		360.39	360.30

Disclosure

Commerce intends to disclose to interested parties the calculations performed in connection with this final determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of the notice of final determination in the **Federal Register**, in accordance with 19 CFR 351.224(b).

Continuation of Suspension of Liquidation

In accordance with section 735(c)(1)(B) of the Act, we will instruct U.S. Customs and Border Protection (CBP) to continue to suspend liquidation of all entries of cast iron soil pipe fittings from China, as described in the ''Scope of the Investigation'' section, exported by Xuanshi and Wor-Biz, entered or withdrawn from warehouse, for consumption on or after February 20, 2018, the date of publication of the *Preliminary Determination* notice in the **Federal Register**.

Furthermore, we continue to find that critical circumstances exist pursuant to section 735(c)(4)(A) of the Act with respect to the China-wide entity. Therefore, for this entity, we will instruct CBP to continue to suspend liquidation for all appropriate entries of cast iron soil pipe fittings entered, or withdrawn from warehouse, for consumption on or after November 22, 2017, which is 90 days prior to the date of publication of the *Preliminary Determination.*

To determine the cash deposit rate,[14] Commerce normally adjusts the estimated weighted-average dumping margin by the amount of domestic subsidy pass-through and export subsidies determined in a companion countervailing duty (CVD) proceeding where appropriate. Accordingly, because Commerce has made a final affirmative determination for export subsidies, we offset the calculated

[12] *See Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed Circumstances Review, and Revocation of an Order in Part,* 75 FR 53661, 53663 (September 1, 2010).

[13] *See Cast Iron Soil Pipe Fittings from the People's Republic of China: Initiation of Less-Than-Fair Value Investigation,* 82 FR 37053, 37056 (August 8, 2017).

[14] *See Modification of Regulations Regarding the Practice of Accepting Bonds During the Provisional Measures Period in Antidumping and Countervailing Duty Investigations,* 76 FR 61042 (October 3, 2011).

estimated weighted-average dumping margins by the appropriate rates as indicated in the above chart.[15] We made no adjustment for domestic subsidy pass-through in this case because we found no basis upon which to make such an adjustment.[16]

In addition, pursuant to section 735(c)(1)(B)(ii) of the Act, Commerce will instruct CBP to require a cash deposit equal to the weighted-average amount by which NV exceeds U.S. price as follows: (1) The cash deposit rate for the exporter/producer combination listed in the table above will be the rate identified for that combination in the table; (2) for all combinations of exporters/producers of merchandise under consideration that have not received their own separate rate above, the cash-deposit rate will be the cash deposit rate established for the China-wide entity; and (3) for all non-Chinese exporters of the merchandise under consideration which have not received their own separate rate above, the cash deposit rate will be the cash deposit rate applicable to the Chinese exporter/producer combination that supplied that non-Chinese exporter. These suspension of liquidation instructions will remain in effect until further notice.

International Trade Commission Notification

In accordance with section 735(d) of the Act, we will notify the International Trade Commission (ITC) of the final affirmative determination of sales at LTFV.

As Commerce's final determination is affirmative, in accordance with section 735(b)(2) of the Act, the ITC will determine, within 45 days, whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports of cast iron soil pipe fittings from China, or sales (or the likelihood of sales) for importation, of cast iron soil pipe fittings from China. If the ITC determines that such injury does not exist, this proceeding will be terminated and all securities posted will be refunded or canceled. If the ITC determines that such injury does exist, Commerce intends to issue an antidumping duty order directing CBP to assess, upon further instruction by Commerce, antidumping duties on all imports of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the effective date of the suspension of liquidation.

Notification Regarding Administrative Protective Orders

In the event that the ITC issues a final negative injury determination, this notice will serve as the only reminder to parties subject to an APO of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a)(3). Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This determination is issued and published pursuant to sections 735(d) and 777(i) of the Act and 19 CFR 351.210(c).

Dated: July 5, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is cast iron soil pipe fittings, finished and unfinished, regardless of industry or proprietary specifications, and regardless of size. Cast iron soil pipe fittings are nonmalleable iron castings of various designs and sizes, including, but not limited to, bends, tees, wyes, traps, drains, and other common or special fittings, with or without side inlets.

Cast iron soil pipe fittings are classified into two major types—hubless and hub and spigot. Hubless cast iron soil pipe fittings are manufactured without a hub, generally in compliance with Cast Iron Soil Pipe Institute (CISPI) specification 301 and/or American Society for Testing and Materials (ASTM) specification A888. Hub and spigot pipe fittings have hubs into which the spigot (plain end) of the pipe or fitting is inserted. Cast iron soil pipe fittings are generally distinguished from other types of nonmalleable cast iron fittings by the manner in which they are connected to cast iron soil pipe and other fittings.

The subject imports are normally classified in subheading 7307.11.0045 of the Harmonized Tariff Schedule of the United States (HTSUS): Cast fittings of nonmalleable cast iron for cast iron soil pipe. They may also be entered under HTSUS 7324.29.0000 and 7307.92.3010. The HTSUS subheadings and specifications are provided for convenience and customs purposes only; the written description of the scope of this investigation is dispositive.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Economic Expenditure Survey of Golden Crab Fishermen in the U.S. South Atlantic Region

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on

[15] *See* the Issues and Decision Memorandum for further discussion.

[16] *Id.*

proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before September 17, 2018.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW, Washington, DC 20230 (or via the internet at *pracomments@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Dr. Scott Crosson, (305) 361–4468 or *scott.crosson@*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection. The National Marine Fisheries Service (NMFS) proposes to collect economic information from golden-crab landing commercial fishermen in the United States (U.S.) South Atlantic region. The data gathered will be used to evaluate the likely economic impacts of management proposals. In addition, the information will be used to satisfy legal mandates under Executive Order 12898, the Magnuson-Stevens Fishery Conservation and Management Act (U.S.C. 1801 *et seq.*), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act, and other pertinent statues.

II. Method of Collection

A standardized survey will be administered via in-person, telephone and/or mail to all fishermen participating in the fishery.

III. Data

OMB Number: 0648–0631.

Form Number: None.

Type of Review: Regular submission (extension of a currently approved information collection).

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 9.

Estimated Time per Response: 1 hour.

Estimated Total Annual Burden Hours: 9.

Estimated Total Annual Cost to Public: $0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: July 12, 2018.

Sarah Brabson,

NOAA PRA Clearance Officer.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XG302

Endangered Species; File Nos. 18238, 21327 and 22123

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of applications for permits and a permit modification.

SUMMARY: Notice is hereby given that three applicants have applied in due form for a permit or permit modification to take green (*Chelonia mydas*), hawksbill (*Eretmochelys imbricata*), Kemp's ridley (*Lepidochelys kempii*), loggerhead (*Caretta caretta*), and olive ridley (*L. olivacea*) sea turtles for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before August 16, 2018.

ADDRESSES: The application and related documents are available for review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov,* and then selecting the applicable File No. from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on the applications should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713–0376, or by email to *NMFS.Pr1Comments@noaa.gov.* Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on the application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Hapeman (for File No. 18238–01) or Erin Markin (for File Nos. 21327 and 22123), (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permits and permit modification are requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

File No. 18238–01: Permit No. 18238 issued on April 21, 2016 (81 FR 43589) authorizes the NMFS Southwest Fisheries Science Center, 8901 La Jolla Shores Drive, La Jolla, CA 92037, (Responsible Party: Lisa Ballance, Ph.D.,) to take green, loggerhead, and olive ridley sea turtles for research in southern California waters. Researchers may conduct vessel surveys for sea turtle counts, captures, examination, observation, marking, biological sampling, tagging, and morphometrics. The permit holder requests authorization to: (1) Increase the number of green sea turtles that may be taken from 60 to 100 turtles annually to accommodate an increase in survey effort needed to improve population abundance estimates, and (2) extend the duration of the permit until September 30, 2025.

File No. 21327: Raymond Carthy, Florida Cooperative Fish and Wildlife Research Unit, USGS–BRD, P.O. Box 110485, Gainesville, FL 23611, proposes to continue research to determine (1) distribution and abundance, (2) use of benthic habitats, (3) demographics and movement patterns, and (4) human impacts for sea turtles in the Florida Panhandle and Big Bend region of Florida. Up to 1720 green, 160 hawksbill, 285 Kemp's ridley, and 180 loggerhead sea turtles, annually, may be harassed, but not captured, during vessel surveys and when using a remotely operated vehicle to study brumating behavior. Up to 540 green, 40 hawksbill, 210 Kemp's ridley, and 130 loggerhead sea turtles would be captured, annually, by hand, or dip, tangle, or strike net, marked, biologically sampled (blood, tissue, scute), tagged (flipper and passive integrated transponder [PIT]), measured, weighed, and photographed prior to release. A subset of captured sea turtles would receive a satellite tag or a combination of an acoustic and archival tag and a subset of green sea turtles would be lavaged prior to release. The permit would be valid for 10 years from the date of issuance.

File No. 22123: Jeffrey Schmid, Ph.D., Conservancy of Southwest Florida, 1495 Smith Preserve Way, Naples, FL 34102, proposes to continue long-term in-water studies of sea turtles inhabiting the Charlotte Harbor and Ten Thousand Islands estuarine complexes on the southwest coast of Florida to determine species composition, abundance, size-class distribution, migration patterns, growth, habitat preference, and site fidelity. Up to 60 Kemp's ridley and 30 loggerhead sea turtles, annually, would be captured by strike net, biologically sampled (blood, scute, tissue), tagged (PIT, flipper), transported to and temporarily held in a facility for opportunistic fecal collection, photographed, measured, and weighed prior to release. A subset of captured Kemp's ridley and loggerhead sea turtles also would receive a satellite tag or radio and sonic tags prior to release. Up to 20 green sea turtles, annually, would be captured by strike net, biologically sampled (blood, scute, tissue), tagged (PIT, flipper), photographed, measured, weighed, and receive a satellite tag or radio and sonic tags prior to release. Up to five hawksbill sea turtles, annually, would be captured by strike net, biologically sampled (blood, scute, tissue), tagged (PIT, flipper), photographed, measured, and weighed prior to release. The permit would be valid for 10 years from the date of issuance.

Dated: July 12, 2018.

Julia Marie Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XG336

International Whaling Commission; 67th Meeting; Announcement of Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: This notice announces the date, time, and location of the public meeting being held prior to the 67th meeting of the International Whaling Commission (IWC). Because the meeting will address U.S. positions, any U.S. citizen with an identifiable interest in U.S. whale conservation policy may participate, but NOAA reserves the authority to inquire about the interests of any person who appears at the meeting and to determine the appropriateness of that person's participation.

DATES: The public meeting will be held August 7, 2018 at 9:00 a.m.

ADDRESSES: The meeting will be held at the Silver Spring Civic Center, 1 Veterans Pl, Silver Spring, MD 20910, in the Spring Room.

FOR FURTHER INFORMATION CONTACT: Carolyn Doherty, Office of International Affairs and Seafood Inspection, NOAA Fisheries (phone: (301) 427–8385 or email: *Carolyn.Doherty@noaa.gov*).

SUPPLEMENTARY INFORMATION: The Secretary of Commerce is responsible for discharging the domestic obligations of the United States under the International Convention for the Regulation of Whaling, 1946. The U.S. IWC Commissioner has responsibility for the preparation and negotiation of U.S. positions on international issues concerning whaling and for all matters involving the IWC. The U.S. IWC Commissioner is staffed by the Department of Commerce and assisted by the Department of State, the Department of the Interior, the Marine Mammal Commission, and other U.S. Government agencies.

Additional information about the IWC meeting, including a draft agenda for the meeting, is posted on the IWC Secretariat's website at *https://iwc.int/iwc67.*

NOAA will a hold public meeting to discuss the tentative U.S. positions for the September 2018 IWC meeting in Florianopolis, Brazil. Because the meeting will address U.S. positions, the substance of the meeting must be kept confidential. Any U.S. citizen with an identifiable interest in U.S. whale conservation policy may participate, but NOAA reserves the authority to inquire about the interests of any person who appears at the meeting and to determine the appropriateness of that person's participation. In particular, persons who represent foreign interests may not attend. Persons deemed by NOAA to be ineligible to attend will be asked to leave the meeting. These stringent measures are necessary to protect the confidentiality of U.S. negotiating positions.

The August 7, 2018, meeting will be held at 9:00 a.m. in the Spring Room of the Silver Spring Civic Center, 1 Veterans Pl, Silver Spring, MD 20910.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Carolyn Doherty, *Carolyn.Doherty@noaa.gov* or (301) 427–8385, by July 23, 2018.

Dated: July 12, 2018.

Christopher W. Rogers,

Acting Director, Office of International Affairs and Seafood Inspection, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Environmental Compliance Questionnaire for National Oceanic and Atmospheric Administration Federal Financial Assistance Applicants

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before September 17, 2018.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental

Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW, Washington, DC 20230 (or via the internet at *pracomments@doc.gov*).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Frank M. Sprtel, (301) 628–1641 or *frank.sprtel@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension of a currently approved information collection through the *Environmental Compliance Questionnaire for National Oceanic and Atmospheric Administration Federal Financial Assistance Applicants* (Questionnaire). This Questionnaire is used by the National Oceanic and Atmospheric Administration (NOAA) to collect information about proposed activities for the purpose of complying with the National Environmental Policy Act (''NEPA,'' 42 U.S.C. 4321–4370) and other environmental compliance requirements associated with proposed activities. NEPA requires federal agencies to complete an environmental analysis for all major federal actions, including funding non-federal activities through federal financial assistance awards where federal participation in the funded activity is expected to be significant. The Questionnaire is used in conjunction with NOAA Notices of Funding Opportunity (NOFO).

The NOFO will indicate the specific questions to which an applicant must respond in one of three ways: (1) The applicable questions are inserted directly into the NOFO with reference to the OMB Control Number (0648–0538) for this form; (2) the NOFO will specify which questions (*e.g.,* 1, 2) an applicant must answer, with the entire OMB-approved Questionnaire attached to the NOFO; or (3) applicants to be recommended for funding will be required to answer relevant questions from the Questionnaire. The federal program officer will determine which questions are relevant to each specific applicant. Answers must be provided before the application can be submitted for final funding approval.

This Questionnaire has been revised to (1) remove repetitive questions; (2) revise specific questions to use plain language; and (3) add questions that would be helpful to a wider range of NOAA programs.

II. Method of Collection

The information may be submitted electronically or on paper (faxed or mailed).

III. Data

OMB Control Number: 0648–0538.

Form Number(s): None.

Type of Review: Regular submission (revision and extension of a currently approved information collection).

Affected Public: Business or other for profit organizations; individuals or households; not-for-profit institutions; state, local, or tribal government; and Federal government.

Estimated Number of Respondents: 736.

Estimated Time per Response: 4 hours.

Estimated Total Annual Burden Hours: 1,030.

Estimated Total Annual Cost to Public: $0 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: July 12, 2018.

Sarah Brabson,

NOAA PRA Clearance Officer.

[FR Doc. 2018–15192 Filed 7–16–18; 8:45 am]

BILLING CODE 3510–NW–P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

BroadbandUSA Webinar Series

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of open meetings—monthly webinars.

SUMMARY: The National Telecommunications and Information Administration (NTIA), as part of its BroadbandUSA program, will host a series of webinars on a monthly basis to engage the public and stakeholders with information to accelerate broadband connectivity, improve digital inclusion, strengthen policies and support local priorities. The Practical Broadband Conversations webinar series will provide an ongoing source of information on a range of topics and issues being addressed by BroadbandUSA, including but not limited to best practices for improving broadband deployment, digital inclusion, workforce skills, and e-government.

DATES: BroadbandUSA will hold the webinars from 2:00 p.m. to 3:00 p.m. Eastern Time on the third Wednesday of every month, beginning October 17, 2018 and continuing through September 18, 2019.

ADDRESSES: This is a virtual meeting. NTIA will post the registration information on its BroadbandUSA website *https://broadbandusa.ntia.doc.gov* under Events.

FOR FURTHER INFORMATION CONTACT: Elaine Sloan, National Telecommunications and Information Administration, U.S. Department of Commerce, Room 4872, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–8231; email: *broadbandusawebinars@ntia.doc.gov.* Please direct media inquiries to NTIA's Office of Public Affairs, (202) 482–7002; email *press@ntia.doc.gov.*

SUPPLEMENTARY INFORMATION: NTIA's BroadbandUSA program serves as a trusted and neutral strategic advisor, collaborating with federal, state and local government, and industry leaders working to advance smart city and broadband initiatives designed to attract new employers, create quality jobs, improve educational opportunities, increase health outcomes and advance public safety.

BroadbandUSA convenes workshops on a regular basis to bring stakeholders together to discuss ways to improve broadband policies, share best practices, and connect state and local stakeholders to other federal agencies and funding sources for the purpose of expanding broadband infrastructure and adoption throughout America. Experts from NTIA's BroadbandUSA program are available to provide technical assistance and to connect stakeholders with additional resources, such as best practices, guides and program models.

NTIA's BroadbandUSA team convenes events around the country to bring together government, industry and non-profit personnel working to expand broadband connectivity and improve digital inclusion and workforce skills. These webinars are among the events BroadbandUSA uses to share broadband information with the public, broadband stakeholders, tribal, local and state governments and federal programs.

Details on specific webinar topics and webinar registration information will be posted on the BroadbandUSA website *https://broadbandusa.ntia.doc.gov* under Events. The presentation, transcript, and recording of the webinars will be posted on the BroadbandUSA website within 7 days following the live webinar.

The public is invited to participate in these webinars. General questions and comments are welcome at any time during webinars via email to *broadbandusawebinars@ntia.doc.gov.* The webinars are open to the public and press. Pre-registration is recommended. NTIA asks each registrant to provide their first and last name, city, state, zip code, job title, organization and email address for both registration purposes and to receive any updates on BroadbandUSA or via email at *BroadbandUSA@ntia.doc.gov.* Information on webinar content and how to register for one or more webinars will available on NTIA's website at *https://broadbandusa.ntia.doc.gov* under Events. Individuals requiring accommodations, such as language interpretation or other ancillary aids, are asked to notify the NTIA contact listed above at least seven (7) business days before the meeting.

Dated: July 11, 2018.

Kathy Smith,

Chief Counsel, National Telecommunications and Information Administration.

BILLING CODE 3510–60–P

DEPARTMENT OF DEFENSE

Department of the Navy

[Docket ID USN–2018–HQ–0009]

Privacy Act of 1974; System of Records

AGENCY: Department of the Navy, DoD.

ACTION: Notice of a new system of records.

SUMMARY: The Department of the Navy (DON) is proposing to establish a new system of records that will be used to verify eligibility of current DON law enforcement officers for assigned duties and to determine if reassignment, reclassification, detail or other administrative action is warranted based on an officer's ability to obtain or maintain credential qualification requirements; verify and validate eligibility of current, separating or separated and retired DON law enforcement officers to ship, transport, possess or receive Government-issued or private firearms or ammunition; and to verify and validate eligibility of current, separating or separated, and retired DON law enforcement officers to receive DON endorsed law enforcement credentials, to include Law Enforcement Officers Safety Act (LEOSA).

DATES: Comments will be accepted on or before August 16, 2018. This proposed action will be effective the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

- *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail:* Department of Defense, Office of the Chief Management Officer, Directorate for Oversight and Compliance, Regulatory and Advisory Committee Division, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Sally A. Hughes, Head, FOIA/PA Programs (ARSF), Headquarters, U.S. Marine Corps, 3000 Marine Corps Pentagon, Washington, DC 20350–3000, telephone (703) 614–3685.

SUPPLEMENTARY INFORMATION: The Law Enforcement Officers Safety Act (LEOSA) is a United States federal law that allows two classes of persons—the ''qualified law enforcement officer'' and the ''qualified retired law enforcement officer''—to carry a concealed firearm in any jurisdiction in the United States.

The Department of the Navy's notices for systems of records subject to the Privacy Act of 1974, as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or from the Defense Privacy and Civil Liberties Division website at *http://defense.gov/privacy.*

The proposed system report, as required by the Privacy Act of 1974, as amended, was submitted on May 16, 2018 to the House Committee on Oversight and Government Reform, the Senate Committee on Governmental Affairs, and the Office of Management and Budget (OMB) pursuant to paragraph 7 of OMB Circular No. A–108, ''Federal Agency Responsibilities for Review, Reporting, and Publication under the Privacy Act,'' revised December 23, 2016 (December 23, 2016 81 FR 94424).

Dated: July 12, 2018.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

SYSTEM NAME AND NUMBER:

Law Enforcement Officer Eligibility and Credential Records, NM05580–2.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Organization elements of the Department of the Navy (DON). Official mailing addresses are published in the Standard Navy Distribution List available, as an appendix to the Navy's compilation of system of records notices, or may be obtained from the system manager. Applications are submitted via Defense Consulting Services, 15750–W–1–10, San Antonio, TX 78249. Third Party services for USMC are provided by LEOSA Credential Manager, 701 South Courthouse Road, Building 2, Floor 2, Arlington, VA 22204. Tel: (703) 604–4502, Email: *leosa@usmc.mil.*

SYSTEM MANAGER(S):

LEOSA Program Manager, Commander, Navy Installations Command, 716 Sicard Street SE, Suite 1000, Washington Navy Yard, DC 20374–5140. Tel: (202)-433–9567.

Marine Corps Policy Official, Head, Law Enforcement and Corrections Branch, Security Division, Plans, Policies and Operations (PP&O), Headquarters, U.S. Marine Corps, 3000 Pentagon, Room 4A324, Washington, DC 20350–3000. Tel: (703) 614–1068.

Record Holders Commanding officers of the U.S. Navy activity in question and/or Marine Corps Credential Approving Authorities at Marine Corps Headquarters, installations, and units. Official mailing addresses are published in the Standard Navy Distribution List that is available at *http://doni.daps.dla.mil/sndl.aspx.*

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 5013, Secretary of the Navy; 10 U.S.C. 5041, Headquarters, Marine Corps function, composition; 18 U.S.C. 922, Unlawful Acts; 18 U.S.C. 926B and 926C, Carrying of concealed firearms by qualified retired law enforcement officers; DoD Instruction 5525.12 Implementation of the Law Enforcement Officers Safety Act of 2004 (LEOSA); and E.O. 9397 (SSN), as amended.

PURPOSE(S) OF THE SYSTEM:

To verify eligibility of current DON law enforcement officers for assigned duties and to determine if reassignment, reclassification, detail or other administrative action is warranted based on an officer's ability to obtain or maintain credential qualification requirements.

To verify and validate eligibility of current, separating or separated and retired DON law enforcement officers to ship, transport, possess or receive Government-issued or private firearms or ammunition.

To verify and validate eligibility of current, separating or separated, and retired DON law enforcement officers to receive DON endorsed law enforcement credentials, to include LEOSA credentials.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current, separating or separated, and retired DON law enforcement officers including military police, masters at arms, and civilian police officers.

CATEGORIES OF RECORDS IN THE SYSTEM:

Name, Social Security Number (SSN), Department of Defense (DoD) Identification (ID) Number, date and place of birth, gender, citizenship, badge number, physical description, passport type photograph, copy of military identification card, copy of state driver's license or state issued identification card, copy of Federal Bureau of Investigation (FBI) Identity History Summary, service status, dates of service, Military Occupational Specialty (MOS) code, title/series/grade, assignments, related education and training completed, statements of medical qualification, certifications granted and/or revoked, copies of credentials, clearances, notice of personnel actions, notice of convictions, type of separation, affiliated law enforcement experience including dates of employment, position/job title and reason for leaving, work and home phone numbers, email addresses, and mailing addresses, applications for DON issued certification of eligibility, applicant signed statements of eligibility and understanding of requirements, copies of DD 2760, DD–214, and SF–50.

RECORD SOURCE CATEGORIES:

Individuals, DoD, DON, Navy and U.S. Marine Corps security offices, the FBI, and system managers.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act of 1974, as amended, the records contained herein may specifically be disclosed outside the DoD as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

a. To the Department of Justice for the purpose of inclusion in the National Instant Criminal Background Check System, which may be used by firearm licensees (importers, manufacturers or dealers) to determine whether individuals are qualified to receive or possess firearms and ammunition.

b. To contractors, grantees, experts, consultants, students, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for the federal government when necessary to accomplish an agency function related to this system of records.

c. To designated officers and employees of Federal, State, local, territorial or tribal, international, or foreign agencies maintaining civil, criminal, enforcement, or other pertinent information, such as current licenses, if necessary to obtain information relevant and necessary to a DoD Component decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

d. To designated officers and employees of Federal, State, local, territorial, tribal, international, or foreign agencies in connection with the hiring or retention of an employee, the conduct of a suitability or security investigation, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter and the Department deems appropriate.

e. To the Office of Personnel Management (OPM) for the purpose of addressing civilian pay and leave, benefits, retirement deduction, and any other information necessary for the OPM to carry out its legally authorized government-wide personnel management functions and studies

f. To the appropriate Federal, State, local, territorial, tribal, foreign, or international law enforcement authority or other appropriate entity where a record, either alone or in conjunction with other information, indicates a violation or potential violation of law, whether criminal, civil, or regulatory in nature.

g. To any component of the Department of Justice for the purpose of representing the DoD, or its components, officers, employees, or members in pending or potential litigation to which the record is pertinent.

h. In an appropriate proceeding before a court, grand jury, or administrative or adjudicative body or official, when the DoD or other Agency representing the DoD determines that the records are relevant and necessary to the proceeding; or in an appropriate proceeding before an administrative or adjudicative body when the adjudicator determines the records to be relevant to the proceeding.

i. To the National Archives and Records Administration for the purpose of records management inspections conducted under the authority of 44 U.S.C. 2904 and 2906.

j. To a Member of Congress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of, and at the request of, the individual who is the subject of the record.

k. To appropriate agencies, entities, and persons when (1) the DoD suspects or has confirmed that there has been a breach of the system of records; (2) the DoD has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, the DoD (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the DoD's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

l. To another Federal agency or Federal entity, when the DoD determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Paper records and/or electronic storage media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Name, last four of SSN or DoD ID number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Current DON law enforcement officer general eligibility verification records: Destroy upon separation or transfer of employee or when 2 years old, whichever is earlier.

Application packages for active duty/currently employed Navy and Marine Corps law enforcement officer 926B LEOSA Credentials:

1. DD Form 2760, Qualification to Possess Firearms or Ammunition.

a. Enlisted military police (MP): Destroy 5 years after initial issuance of law enforcement credentials or upon submission of updated DD Form 2760 during law enforcement credential renewal.

b. Commissioned officers, warrant officers, and Navy and Marine Corps civilian police officers: Destroy 10 years after initial issuance of law enforcement credentials or upon submission of updated DD Form 2760 during law enforcement credential renewal.

2. LEOSA 926B Certificate of Eligibility.

Destroy 5 years after initial issuance of law enforcement credentials or upon submission of updated LEOSA 926B Certificate of Eligibility during law enforcement credential renewal.

Application packages for Retired/Separated Navy and Marine Corps law enforcement officer 926C LEOSA Credentials are destroyed 2 years after issuance of law enforcement credentials.

The DD Form 2760, Qualification to Possess Firearms or Ammunition and the LEOSA 926C Certification of Eligibility are PERMANENT records and transferred to the National Archives 2 years after issuance of law enforcement credentials.

a. Destroy paper/electronic copies upon receipt of acceptance by NARA.

Collection forms, paper and/or plastic badges/passes are shredded or incinerated using DoD approved procedures. If any IT system or data storage media fails and must be replaced, the data storage component (*e.g.,* disks/hard drives) is removed from the hardware and degaussed with DoD approved degaussing systems and are then mechanically shredded prior to disposal.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Access is provided on a need-to-know basis only. Paper records are maintained in file cabinets under the control of authorized personnel during working hours. The office space in which the file cabinets are located is locked outside of official working hours. Computer terminals are located in supervised areas. Access is controlled by password and/or Primary Key Infrastructure (PKI)/Common Access Card (CAC). Computerized records maintained in a controlled area are accessible only to authorized personnel. Records are maintained in a controlled facility. Physical entry is restricted by the use of locks, guards, and is accessible only to authorized personnel. Physical and electronic access is restricted to designated individuals having a need-to-know in the performance of official duties and who are properly screened and cleared for need-to-know.

RECORD ACCESS PROCEDURES:

Individuals seeking access to records about themselves contained in this system should address written inquiries to Commanding Officer of the activity in question. Official mailing addresses are published in the Standard Navy Distribution List available as an appendix to the Navy's compilation of system of records notices or may be obtained from the system manager.

For Marine Corps LEOSA 926C and 926B Credential application records, individuals should address written inquiries to the Commandant of the Marine Corps, Plans, Policies, and Operations, Security Division, Law Enforcement and Corrections Branch (PSL), 3000 Marine Corps Pentagon, Washington, DC 20380–1775.

For verification purposes, the individual should provide full name, SSN and/or DoD ID Number, sufficient details to permit locating pertinent records, and either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).''

If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature)''.

CONTESTING RECORD PROCEDURES:

The Navy's rules for accessing records, and for contesting contents and appealing initial agency determinations are published in Secretary of the Navy Instruction 5211.5E; 32 CFR part 701; or may be obtained from the system manager.

NOTIFICATION PROCEDURES:

Individuals seeking to determine whether information about themselves is contained in this system should address written inquiries to the Commanding Officer of the activity in question. Official mailing addresses are published in the Standard Navy Distribution List available as an appendix to the Navy's compilation of system of records notices or may be obtained from the system manager.

For Marine Corps LEOSA 926C and 926B Credential application records, individuals should address written inquiries to the Commandant of the Marine Corps, Plans, Policies, and Operations, Security Division, Law Enforcement and Corrections Branch (PSL), 3000 Marine Corps Pentagon, Washington, DC 20380–1775.

For verification purposes, individual should provide full name, SSN and/or DoD ID Number, sufficient details to permit locating pertinent records, and either a notarized statement or an unsworn declaration made in accordance with 28 U.S.C. 1746, in the following format:

If executed outside the United States: ''I declare (or certify, verify, or state) under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on (date). (Signature).''

If executed within the United States, its territories, possessions, or commonwealths: ''I declare (or certify, verify, or state) under penalty of perjury that the foregoing is true and correct. Executed on (date). (Signature)''.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

BILLING CODE 5001–06–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1894–211]

South Carolina Electric & Gas Company; Notice of Application Tendered for Filing With the Commission and Soliciting Additional Study Requests and Establishing Procedural Schedule for Relicensing and a Deadline for Submission of Final Amendments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Major License.

b. *Project No.:* P–1894–211.

c. *Date filed:* June 28, 2018.

d. *Applicant:* South Carolina Electric & Gas Company (SCE&G).

e. *Name of Project:* Parr Hydroelectric Project.

f. *Location:* The existing project is located on the Broad River, in Newberry and Fairfield Counties, South Carolina. The project includes 162.61 acres of federal lands administered by the U.S. Forest Service.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791 (a)–825(r).

h. *Applicant Contact:* Mr. William Argentieri, P.E., Manager of Civil Engineering, South Carolina Electric & Gas Company, 220 Operation Way, Mail Code A221, Cayce, SC 29033–3701; (803) 217–9162; or email at *bargentieri@scana.com.*

i. *FERC Contact:* Monte TerHaar at (202) 502–6035; or *monte.terhaar@ferc.gov.*

j. This application is not ready for environmental analysis at this time.

k. *Cooperating agencies:* Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item m below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See,* 94 FERC 61,076 (2001).

l. Pursuant to section 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the date of filing of the application, and serve a copy of the request on the applicant.

m. *Deadline for filing additional study requests and requests for cooperating agency status:* August 27, 2018.

The Commission strongly encourages electronic filing. Please file additional study requests and requests for cooperating agency status using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. The first page of any filing should include docket number P–1894–211.

n. *Project Description:* The project consists of two developments; the 14.88 Megawatt (MW) Parr Shoals Development and the 511.2–MW Fairfield Pumped Storage Development.

The Parr Shoals Development consists of: (1) The 15-mile-long, 4,250-acre Parr Reservoir, at full pond elevation 265.3 feet North American Vertical Datum of 1988 (NAVD 88); (2) the 2,690-foot-long Parr Shoals Dam, which includes a non-overflow section and powerhouse intake section; (3) a powerhouse integral with the dam, with six generating units; and (4) transmission facilities that consist of three 950-foot-long, 13.8-kilovolt lines extending from the hydro station to the non-project Parr sub-station.

The Fairfield Pumped Storage Development consists of: (1) The 6,800-acre Monticello Reservoir (upper reservoir), at normal maximum elevation 424.3 feet NAVD 88, formed by four earthen dams (A, B, C, and D); (2) a 265-foot-long gated intake channel, located between dams B and C; (3) four 800-foot-long surface penstocks bifurcating into eight penstocks; (4) an underground generating station, which houses eight pumped-turbine units; and (5) transmission facilities that consist of three 7,000-foot-long lines extending from the Fairfield switch station to the non-project V.C. Summer switchyard.

The Fairfield Pumped Storage Development is operated to generate during peak demand periods. Generation usually occurs during the day, with the upper reservoir replenished by pumping water at night (non-peak period). The Parr Shoals Development serves as the lower reservoir for the pumped storage project.

o. A copy of the application is available for review at the Commission in the Public Reference Room, or may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support. A copy is also available for inspection and reproduction at the address in item h above.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

p. *Procedural schedule and final amendments:* The application will be processed according to the following preliminary schedule. Revisions to the schedule will be made, as appropriate.

Milestone	Target date
Issue Deficiency Letter (if necessary)	September 2018.
Request Additional Information	September 2018.
Issue Scoping Document 1 for comments	October 2018.
Comments on Scoping Document 1	December 2018.
Issue Notice of Ready for Environmental Analysis	August 2019.
Filing of recommendations, preliminary terms and conditions, and fishway prescriptions	October 2019.
Commission issues EA or draft EA	February 2020.
Comments on EA or draft EA	April 2020.
Commission Issues Final EA (if necessary)	June 2020.

Final amendments to the application must be filed with the Commission no later than 30 days from the issuance date of the notice of ready for environmental analysis.

Dated: July 11, 2018.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER18–1990–000]

Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization: Stonepeak Kestrel Energy Marketing LLC

This is a supplemental notice in the above-referenced proceeding Stonepeak Kestrel Energy Marketing LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is July 31, 2018.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: July 11, 2018.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

Description: § 205(d) Rate Filing: Reactive Rate Schedule to be effective 12/31/9998.

Filed Date: 7/11/18.

Accession Number: 20180711–5137.

Comments Due: 5 p.m. ET 8/1/18.

Docket Numbers: ER18–2003–000.

Applicants: Lorenzo Wind, LLC.

Description: Baseline eTariff Filing: Lorenzo Wind,LLC Application for Market-Based Rate Authority to be effective 9/1/2018.

Filed Date: 7/11/18.

Accession Number: 20180711–5153.

Comments Due: 5 p.m. ET 8/1/18.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: July 11, 2018.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 1894–211]

Notice of Settlement Agreement and Soliciting Comments: South Carolina Electric & Gas Company

Take notice that the following settlement agreement has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Settlement Agreement.

b. *Project No.:* P–1894–211.

c. *Date filed:* June 28, 2018.

d. *Applicant:* South Carolina Electric & Gas Company (SCE&G).

e. *Name of Project:* Parr Hydroelectric Project.

f. *Location:* The existing project is located on the Broad River, in Newberry and Fairfield Counties, South Carolina. The project includes 162.61 acres of federal lands administered by the U.S. Forest Service.

g. *Filed Pursuant to:* Rule 602 of the Commission's Rules of Practice and Procedure, 18 CFR 385.602.

h. *Applicant Contact:* Mr. William Argentieri, P.E., Manager of Civil Engineering, South Carolina Electric & Gas Company, 220 Operation Way, Mail Code A221, Cayce, SC 29033–3701; (803) 217–9162; or email *bargentieri@scana.com.*

i. *FERC Contact:* Monte TerHaar at (202) 502–6035; or *monte.terhaar@ferc.gov.*

j. *Deadline for filing comments:* Comments on the Settlement Agreement are due August 13, 2018. Reply comments are due August 27, 2018.

The Commission strongly encourages electronic filing. Please file comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. The first page of any filing should include docket number P–1894–211.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Settlement:* SCE&G filed a Settlement Agreement on behalf of itself, American Rivers, American Whitewater, Congaree Riverkeeper, Mr. Jeffrey Carter, and the South Carolina Department of Natural Resources. The U.S. Fish and Wildlife Service and the National Marine Fisheries Service are currently reviewing the Settlement Agreement. The purpose of the Settlement Agreement is to resolve, among the signatories, all issues associated with issuance of a new license for the project regarding recreation; flow fluctuations downstream from Parr Shoals Dam; fisheries habitat in Monticello Reservoir; monitoring of American eel and freshwater mussels; diadromous fish protection; enhancement of aquatic habitat; water quality; shoreline management and erosion in Parr and Monticello Reservoirs; and historic properties. SCE&G requests that the Commission accept and incorporate into any new license measures as described in Appendix A of the Settlement Agreement. In addition, Appendix B of the Settlement Agreement includes off-license agreements between the signatories of the Settlement Agreement.

l. A copy of the Settlement Agreement is available for review at the Commission in the Public Reference Room, or may be viewed on the Commission's website at *http://www.ferc.gov,* using the eLibrary link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. For assistance, contact FERC Online Support. A copy is also available for inspection and reproduction at the address in item h above.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Dated: July 11, 2018.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OAR–2004–0065; FRL 9980–91–OAR]

Proposed Information Collection Request; Comment Request; Application Requirements for the Approval and Delegation of Federal Air Toxics Programs to State, Territorial, Local, and Tribal Agencies

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is planning to submit an information collection request (ICR), ''Proposed Information Collection Request; Comment Request; Application Requirements for the Approval and Delegation of Federal Air Toxics Programs to State, Territorial, Local, and Tribal Agencies'' (EPA ICR No. 1643.09, OMB Control No. 2060–0264) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA). Before doing so, the EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a proposed extension of the ICR, which is currently approved through August 31, 2018. An Agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before September 17, 2018.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA–HQ–OAR–2004–0065, online using *https://www.regulations.gov* (our preferred method), by email to *a-and-r-docket@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

The EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: John Schaefer, Sector Policies and Programs Division (D205–02), Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, NC 27711; telephone number: 919–541–0296; fax number: 919–541–4991; email address: *schaefer.john@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *https://www.regulations.gov* or in person at the EPA Docket Center, EPA WJC West Building, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about the EPA's public docket, visit *https://www.epa.gov/dockets.*

Pursuant to section 3506(c)(2)(A) of the PRA, the EPA is soliciting comments and information to enable it to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (2) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) enhance the quality, utility, and clarity of the information to be collected; and; (5) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, the EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: This information collection is an application from state, local, or tribal agencies (S/L/Ts) for delegation of regulations developed under section 112 of the Clean Air Act (CAA). The five options for delegation are (1) straight delegation, (2) rule adjustment, (3) rule substitution, (4) equivalency by permit, or (5) state program approval. The information is needed and used to determine if the entity submitting an application has met the criteria established in 40 CFR part 63, subpart E. This information is necessary for the EPA Administrator to determine the acceptability of approving S/L/T's rules, requirements, or programs in lieu of the Federal CAA section 112 rules or programs. The collection of information is authorized under 42 U.S.C. 7401–7671q.

Form Numbers: None.

Respondents/affected entities: Entities potentially affected by this action are S/L/Ts participating in this voluntary program. These government establishments are classified as Air and Water Resource and Solid Waste Management Programs under Standard Industrial Classification (SIC) code 9511 and North American Industry Classification System (NAICS) code 92411. No industries under any SIC or NAICS codes will be included among respondents.

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: 119 S/L/Ts for maximum achievable control technology standards and 95 S/L/Ts for area source standards per year.

Frequency of response: One time per delegation request.

Total estimated burden: 30,383 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: $1,587,350 (per year). This includes an estimated labor burden cost of $1,585,000 and an estimated cost of $2,350 for operation and maintenance costs resulting from photocopying and postage expenses.

Changes in Estimates: Preliminary results indicate an increase of 588 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an increase in the number of maximum achievable control technology standard promulgations compared to last period. We are still in the process of reviewing the key assumptions in the ICR that will affect the overall burden estimate. These include the number of delegation activities expected to occur during the upcoming collection period, the delegation options most likely to be used by the delegated S/L/Ts, and the burden associated with each of the options. Depending on the outcome of this review, there could be changes in the overall burden estimates.

Dated: July 11, 2018.

David Cozzie,

Acting Director, Sector Policies and Program Division.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9980–10—Region 6]

Clean Air Act Operating Permit Program; Petitions for Objection to State Operating Permit for Motiva Enterprises LLC, Port Arthur Refinery, Jefferson County, Texas

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final Order on Petition for objection to Clean Air Act title V operating permit.

SUMMARY: The Environmental Protection Agency (EPA) Administrator signed an Order dated May 31, 2018, granting in part and denying in part a Petition dated November 8, 2016 from the Environmental Integrity Project, Sierra Club, and Air Alliance Houston. The Petition requested that the EPA object to a Clean Air Act (CAA) title V operating permit issued by the Texas Commission on Environmental Quality (TCEQ) to Motiva Enterprises LLC (Motiva) for its Port Arthur Refinery located in Jefferson County, Texas.

ADDRESSES: The EPA requests that you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section to view copies of the final Order, the Petition, and other supporting information. You may review copies of the final Order, the Petition, and other supporting information at the EPA Region 6 Office, 1445 Ross Avenue, Dallas, Texas 75202–2733. You may view the hard copies Monday through Friday, from 9 a.m. to 3 p.m., excluding federal holidays. If you wish to examine these documents, you should make an appointment at least 24 hours before the visiting day. Additionally, the final Order and Petition are available electronically at: *https://www.epa.gov/title-v-operating-permits/title-v-petition-database.*

FOR FURTHER INFORMATION CONTACT: Kyndall Cox, EPA Region 6, (214) 665–8567, *cox.kyndall@epa.gov.*

SUPPLEMENTARY INFORMATION: The CAA affords EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities under title V of the CAA. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator to object to a title V operating permit within 60 days after the expiration of the EPA's 45-day review period if the EPA has not objected on its own initiative. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the state, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or unless the grounds for the issue arose after this period.

The EPA received the Petition from the Environmental Integrity Project, Sierra Club, and Air Alliance Houston dated November 8, 2016, requesting that the EPA object to the issuance of operating permit no. O1386, issued by TCEQ to Motiva's Port Arthur Refinery in Jefferson County, Texas. The Petition has six claims (1–6) that the proposed permit fails to require monitoring, recordkeeping and reporting sufficient to assure compliance with various emission limits and operational requirements for units authorized by New Source Review (NSR) permits and permits by rule (PBRs); one claim (7) that the proposed permit's incorporation by reference of permit by rule requirements fails to assure compliance with applicable requirements; and one claim (8) that the proposed permit fails to identify monitoring, recordkeeping and reporting for emission units subject to NSPS and NESHAP federal rules.

On May 31, 2018, the EPA Administrator issued an Order granting in part and denying in part the Petition. The Order explains the basis for EPA's decision.

Sections 307(b) and 505(b)(2) of the CAA provide that a petitioner may request judicial review of those portions of an order that deny issues in a petition. Any petition for review shall be filed in the United States Court of Appeals for the appropriate circuit no later than September 17, 2018.

Dated: July 3, 2018.

Anne L. Idsal,

Regional Administrator, Region 6.

[FR Doc. 2018–15205 Filed 7–16–18; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL ACCOUNTING STANDARDS ADVISORY BOARD

Notice of Request for Comment on the Exposure Draft of a Classified Interpretation of Federal Financial Accounting Standards (SFFAS) 56: Classified Activities

AGENCY: Federal Accounting Standards Advisory Board.

ACTION: Notice.

Pursuant to 31 U.S.C. 3511(d), the Federal Advisory Committee Act (Pub. L. 92–463), as amended, and the FASAB Rules Of Procedure, as amended in October 2010, notice is hereby given that the Federal Accounting Standards Advisory Board (FASAB) has issued an exposure draft of a classified Interpretation of Federal Financial Accounting Standards (SFFAS) 56: *Classified Activities.*

Due to the classified nature of the proposal, the exposure draft will only be made available to those individuals who have been designated as having a need to know and who hold the proper clearances.

Additionally, FASAB staff will hold two classified reading sessions for those individuals without SIPR accounts to review the exposure draft. Only those individuals who have been designated as having a need to know and hold the proper clearances will be allowed to attend.

—Session I: Wednesday July 18, 2018 9:30–11:30 a.m.
—Session II: Wednesday August 1, 2018 1:30–3:30 p.m.

To request attendance at one of the reading sessions please contact Monica Valentine at *valentinem@fasab.gov* by July 16, 2018 for Session I and July 27, 2018 for Session II. Please provide your name, organization, and contact information.

The Board requests comments on the exposure draft by August 13, 2018 and encourages respondents to provide responses to all of the questions raised and the reasons for their positions.

FOR FURTHER INFORMATION CONTACT: Ms. Wendy M. Payne, Executive Director, 441 G Street NW, Suite 1155, Washington, DC 20548, or call (202) 512–7350.

Authority: Federal Advisory Committee Act, Pub. L. 92–463.

Dated: July 12, 2018.

Wendy M. Payne,

Executive Director.

BILLING CODE 1610–02–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0979]

Information Collections Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before September 17, 2018. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0979.

Title: License Audit Letter.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Individuals or households, business or other for-profit entities, not-for-profit institutions and state, local or tribal government.

Number of Respondents: 25,000 respondents; 25,000 responses.

Estimated Time per Response: .50 hours.

Frequency of Response: One-time reporting requirement.

Obligation To Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 152, 154(i), 155(c), 157, 201, 202, 208, 214, 301, 302a, 303, 307, 308, 309, 310, 311, 314, 316, 319, 324, 331, 332, 333, 336, 534 and 535.

Total Annual Burden: 12,500 hours.

Total Annual Cost: No cost.

Privacy Impact Assessment: Yes. Records of the Wireless Radio Services may include information about individuals or households, and the use(s) and disclosure of this information is governed by the requirements of a system of records, FCC/WTB–1, ''Wireless Services Licensing Records''. However, the Commission makes all information within the Wireless Radio Services publicly available on its Universal Licensing System (ULS) web page.

Nature and Extent of Confidentiality: Respondents may request materials or information submitted to the Commission be withheld from public inspection under 47 CFR 0.459 of their rules. Information within Wireless Radio Services is maintained in the Commission's system or records notice or 'SORN', FCC/WTB–1, ''Wireless Services Licensing Records''. These licensee records are publicly available and routinely used in accordance with subsection b of the Privacy Act of 1973, 5 U.S.C. 552a(b), as amended. Material that is afforded confidential treatment pursuant to a request made under 47 CFR 0.459 of the Commission's rules will not be available for public inspection. The Commission has in place the following policy and procedures for records retention and disposal: Records will be actively maintained as long as the individual remains a licensee. Paper records will be archived after being keyed or scanned into the system and destroyed when 12 years old; electronic records will be backed up and deleted twelve years after the licenses are no longer valid.

Needs and Uses: The Commission is seeking OMB approval for an extension of this information collection in order to obtain their full three-year approval. There is no change to the reporting requirement. There is no change to the Commission's burden estimates. The Wireless Telecommunications (WTB) and Public Safety and Homeland Security Bureaus (PSHSB) of the FCC periodically conduct audits of the construction and/or operational status of various Wireless radio stations in its licensing database that are subject to rule-based construction and operational requirements. The Commission's rules for these Wireless services require construction within a specified timeframe and require a station to remain operational in order for the license to remain valid. The information will be used by FCC personnel to assure that licensees' stations are constructed and currently operating in accordance with the parameters of the current FCC authorization and rules.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 9, 2018.

A. Federal Reserve Bank of Minneapolis (Mark A. Rauzi, Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291:

1. *WNB Holding Company, Winona, Minnesota;* to acquire First State Bank of Wabasha, Wabasha, Minnesota.

Board of Governors of the Federal Reserve System, July 12, 2018.

Ann Misback,

Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Determination Concerning a Petition To Add a Class of Employees to the Special Exposure Cohort

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention, Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: HHS gives notice of a determination concerning a petition to add a class of employees from the Feed Materials Production Center (FMPC), in Fernald, Ohio, to the Special Exposure Cohort (SEC) under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA).

FOR FURTHER INFORMATION CONTACT: Stuart L. Hinnefeld, Director, Division of Compensation Analysis and Support, National Institute for Occupational Safety and Health (NIOSH), 1090 Tusculum Avenue, MS C–46, Cincinnati, OH 45226–1938, Telephone 1–877–222–7570. Information requests can also be submitted by email to *DCAS@CDC.GOV.*

SUPPLEMENTARY INFORMATION: On June 21, 2018, the Secretary of HHS determined that the following class of employees does not meet the statutory criteria for addition to the SEC as authorized under EEOICPA:

> ''(1) All employees of the Department of Energy (DOE), its predecessor agencies, and their contractors and subcontractors who worked in any area of the Feed Materials Production Center at Fernald, Ohio, from January 1, 1984, through December 31, 1989; and (2) all employees of the DOE, its predecessor agencies, National Lead of Ohio, or NLO, Inc., in any area of the Feed Materials Production Center from January 1, 1979, through December 31, 1983.''

Authority: 42 U.S.C.7384q.

John J. Howard,

Director, National Institute for Occupational Safety and Health.

Centers for Medicare & Medicaid Services

[Document Identifier CMS–10008, CMS–R–234, and CMS–R–194]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by September 17, 2018.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number _________, Room C4–26–05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10008 Eligibility of Drugs, Biologicals, and Radiopharmaceutical Agents for Transitional Pass-Through Status Under the Hospital Outpatient Prospective Payment System (OPPS)
CMS–R–234 Subpart D-Private Contracts
CMS–R–194 Medicare Disproportionate Share Adjustment Procedures and Criteria

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Reinstatement with a change of a previously approved collection; *Title of Information Collection:* Eligibility of Drugs, Biologicals, and Radiopharmaceutical Agents for Transitional Pass-Through Status Under the Hospital Outpatient Prospective Payment System (OPPS); *Use:* Section 201(b) of the BBRA 1999 amended section 1833(t) of the Act by adding new section 1833(t)(6). This provision requires the Secretary to make additional payments to hospitals for a period of 2 to 3 years for certain drugs, radiopharmaceuticals, biological agents, medical devices and brachytherapy devices. Section 1833(t)(6)(A)(iv) establishes the criteria for determining the application of this provision to new items. Section 1833(t)(6)(C)(i) provides that the additional payment for drugs and biologicals be the amount by which the amount determined under section 1842(o) of the Act exceeds the portion of the otherwise applicable hospital outpatient department fee schedule amount that the Secretary determines to be associated with the drug or biological. Section 1833(t)(6)(D)(i) of the Act sets the payment rate for pass-through eligible drugs and biologicals (assuming that no pro rata reduction in pass-through payment is necessary) as the amount determined under section 1842(o) of the Act. Section 303(c) of Public Law 108–173 amended Title XVIII of the Act by adding new section 1847A. This new section establishes the use of the average sales price (ASP) methodology for payment for drugs and biologicals described in section 1842(o)(1)(C) of the Act furnished on or after January 1, 2005. Therefore, as we stated in the November 15, 2004 **Federal Register** (69 FR 65776), in CY 2005, we will pay under the OPPS for drugs, biologicals and radiopharmaceuticals with pass-through status consistent with the provisions of section 1842(o) of the Act as amended by Public Law 108–173 at a rate that is equivalent to the payment these drugs and biologicals will receive in the physician office setting, and established in accordance with the methodology described in the CY 2005 Physician Fee Schedule final rule. Information on Average Sales Price is found at *http://www.cms.hhs.gov/McrPartBDrugAvgSalesPrice/.* The intent of these provisions is to ensure that timely beneficiary access to new pharmacological technologies is not jeopardized by inadequate payment levels. *Form Number:* CMS–10008 (OMB Control Number 0938–0802); *Frequency:* Yearly; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 30; *Total Annual Responses:* 30; *Total Annual Hours:* 480. (For policy questions regarding this collection contact Raymond Bulls at 410–786–7267).

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Subpart D—Private Contracts; *Use:* Section 4507 of the Balanced Budget Act of 1997 (BBA 1997) amended section 1802 of the Social Security Act (the Act) to permit certain physicians and practitioners to opt-out of Medicare and to provide through private contracts services that would otherwise be covered by Medicare. Under such contracts the mandatory claims submission and limiting charge rules of section 1848(g) of the Act would not apply. Subpart D and the supporting regulations contained in 42 CFR 405.410, 405.430, 405.435, 405.440, 405.445, and 405.455, counters the effect of certain provisions of Medicare law that, absent section 1802 of the Act, preclude physicians and practitioners from contracting privately with Medicare beneficiaries to pay without regard to Medicare limits. The most recent approval of this information collection request (ICR) was issued by the Office of Management and Budget on March 2, 2016. We are now seeking to renew this approval before it expires on March 31, 2019. We have made no changes to the information being collected. We updated our burden estimate to reflect changes in the number of physicians and practitioners who have opted out and refinements to our methodology for estimating the burden associated with contracts. We have also updated the cost estimate to account for the current Bureau of Labor Statistics (BLS) wage estimates and to include the estimated costs for Medicare Advantage plans. *Form Number:* CMS–R–234 (OMB Control Number 0938–0730); *Frequency:* Yearly; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 57,722; *Total Annual Responses:* 57,722; *Total Annual Hours:* 23,557. (For policy questions regarding this collection contact Frederick Grabau at 410–786–0206).

3. *Type of Information Collection Request:* Reinstatement without a change of a previously approved collection; *Title of Information Collection:* Medicare Disproportionate Share Adjustment Procedures and Criteria; *Use:* Section 1886(d)(5)(F) of the Social Security Act established the Medicare disproportionate share adjustment (DSH) for hospitals, which provides additional payment to hospitals that serve a disproportionate share of the indigent patient population. This payment is an add-on to the set amount per case the Centers for Medicare and Medicaid Services (CMS) pays to hospitals under the Medicare Inpatient Prospective Payment System (IPPS). Under current regulations at 42 CFR 412.106, in order to meet the qualifying criteria for this additional DSH payment, a hospital must prove that a disproportionate percentage of its patients are low income using Supplemental Security Income (SSI) and Medicaid as proxies for this determination. This percentage includes two computations: (1) The ''Medicare fraction'' or the ''SSI ratio'' which is the percent of patient days for beneficiaries who are eligible for Medicare Part A and SSI and (2) the ''Medicaid fraction'' which is the percent of patient days for patients who are eligible for Medicaid but not Medicare. Once a hospital qualifies for this DSH payment, CMS also determines a hospital's payment adjustment based on these two fractions. 42 CFR 412.106 allows hospitals to request that the Medicare fraction of the DSH adjustment be calculated on a cost reporting basis rather than a federal fiscal year. Once requested, the hospital must accept the result irrespective of whether it increases or decreases their DSH payment. The routine use procedure and the DUA allows hospitals to request the detailed Medicare data so they can make an informed choice before deciding whether to request that the Medicare fraction be calculated on the basis of a cost reporting period rather than a federal fiscal year. *Form Number:* CMS–R–194 (OMB Control Number 0938–0691); *Frequency:* Yearly; *Affected Public:* Private sector (Business or other for-profits); *Number of Respondents:* 800; *Total Annual Responses:* 800; *Total Annual Hours:* 400. (For policy questions regarding this collection contact Emily Lipkin at 410–786–3633).

Dated: July 11, 2018.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–R–153]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, HHS.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by August 16, 2018.

ADDRESSES: When commenting on the proposed information collections, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be received by the OMB desk officer via one of the following transmissions: OMB, Office of Information and Regulatory Affairs, Attention: CMS Desk Officer, Fax Number: (202) 395–5806 *OR*, Email: *OIRA_submission@omb.eop.gov.*

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at *http://www.cms.hhs.gov/PaperworkReductionActof1995.*

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to *Paperwork@cms.hhs.gov.*

3. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786–1326.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Medicaid Drug Use Review (DUR) Program; *Use:* States must provide for a review of drug therapy before each prescription is filled or delivered to a Medicaid patient. This review includes screening for potential drug therapy problems due to therapeutic duplication, drug-disease contraindications, drug-drug interactions, incorrect drug dosage or duration of drug treatment, drug-allergy interactions, and clinical abuse/misuse. Pharmacists must make a reasonable effort to obtain, record, and maintain Medicaid patient profiles. These profiles must reflect at least the patient's name, address, telephone number, date of birth/age, gender, history, *e.g.,* allergies, drug reactions, list of medications, and pharmacist's comments relevant to the individual's drug therapy.

The State must conduct RetroDUR which provides for the ongoing periodic examination of claims data and other records in order to identify patterns of fraud, abuse, inappropriate or medically unnecessary care. Patterns or trends of drug therapy problems are identified and reviewed to determine the need for intervention activity with pharmacists and/or physicians. States may conduct interventions via telephone, correspondence, or face-to-face contact.

Annual reports are submitted to CMS for the purposes of monitoring compliance and evaluating the progress of States' DUR programs. The information submitted by States is reviewed and results are compiled by CMS in a format intended to provide information, comparisons and trends related to States' experiences with DUR. The States benefit from the information and may enhance their programs each year based on State reported innovative practices that are compiled by CMS from the DUR annual reports. *Form Number:* CMS–R–153 (OMB control number: 0938–0659); *Frequency:* Yearly, quarterly, and occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 51; *Total Annual Responses:* 663; *Total Annual Hours:* 41,004. (For policy questions regarding this collection contact Emeka Egwim at 410–786–1092.)

Dated: July 12, 2018.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Community Living

Notice of Intent To Award a Single Supplement to the National Association of Area Agencies on Aging

ACTION: Notice of Intent to award a single supplement to the National Association of Area Agencies on Aging.

SUMMARY: The Administration for Community Living (ACL) is announcing supplemental funding for the National Resource Center for Engaging Older Adults program. The National Resource Center for Engaging Older Adults program works to identify and disseminate information about emerging trends, resources, and replication strategies that the Aging Network can use and tailor in their communities to support the engagement of older adults. The purpose of this announcement is to award supplemental funds to the National Association of Area Agencies on Aging to support staff and the development of enhanced resources and tools to support the Aging Network.

Program Name: The National Resource Center for Engaging Older Adults.

Award Amount: $62,000.

Budget Period: 9/1/2018 to 8/31/2019.

Award Type: Cooperative Agreement.

Statutory Authority: The statutory authority for grants under this notice is contained in Title IV of the Older Americans Act (OAA) (42U.S.C. 3032), as amended by the Older Americans Act Amendments of 2006.

Catalog of Federal Domestic Assistance (CFDA) Number: 93.048 Discretionary Projects.

I. Program Description

The Administration on Aging, an agency of the U.S. Administration for Community Living, established the Engagement and Older Adults Resource Center to better ensure that the Aging Network has the tools and resources necessary for the development of programs that provide older adults effective ways to stay socially engaged. Through myriad approaches such as a website, webinars, fact sheets, and other materials the project is identifying, synthesizing, and disseminating innovative social engagements practices and programming.

II. Justification for the Supplemental Funding

In recent years with growing research demonstrating the correlation between social engagement and healthy aging, there has been an increase in the Aging Network's desire to seek new and innovative approaches to assist older adults remain active and engaged in the community. The Resource Center has been conducting webinars and identifying engagement resources to highlight on the Center's website, but there is a need for the project to accelerate the development of tools and resources, such as best practice profiles, fact sheets, and toolkits, to meet the needs of the Aging Network. The supplemental funding will be used to support additional staff to more rapidly identify successful engagement programs and strategies that can be shared with the aging network via the website, webinars, and other written products.

III. Eligible Applicants: Current Grantee

Evaluation Criteria: ACL will use the following evaluation criteria to ensure that proposed activities are within the approved scope and budget of the grant:

Approach

Is the purpose of the funding clearly described? Does it reflect a coherent and feasible approach for successfully achieving the identified outcome(s)? Is the project work plan clear and comprehensive? Does it include sensible and feasible timeframes for the accomplishment of tasks presented?

Budget

Is the budget justified with respect to the adequacy and reasonableness of resources requested? Are budget line items clearly delineated and consistent with project objectives?

Project Impact

Are the expected project benefits/results clear, realistic, and consistent with the objectives and purpose of the project?

IV. Application Review Information

Application will be reviewed by Federal staff.

V. Agency Contact

For further information or comments regarding this program expansion supplement, contact Sherri Clark, U.S. Department of Health and Human Services, Administration for Community Living, Administration on Aging, Washington, DC 20201; telephone (202) 795–7327; email *sherri.clark@acl.hhs.gov.*

Dated: July 6, 2018.

Lance Robertson,

Administrator and Assistant Secretary on Aging.

BILLING CODE 4154–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier OS–0990–0391]

Agency Information Collection Request. 30-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before August 16, 2018.

ADDRESSES: Submit your comments to *OIRA_submission@omb.eop.gov* or via facsimile to (202) 395–5806.

FOR FURTHER INFORMATION CONTACT: Sherrette Funn, *Sherrette.Funn@hhs.gov* or (202) 795–7714. When submitting comments or requesting information, please include the document identifier 0990–0391 and Hospital Preparedness Program Data Collection for reference.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Hospital Preparedness Program.

Type of Collection: Extension.

OMB No.: 0990–0391.

Abstract: The Hospital Preparedness Program (HPP) within the Division of National Healthcare Preparedness Programs (NHPP), in the Office of Emergency Management (OEM), Office of Assistant Secretary for Preparedness and Response (ASPR), in the Department of Health and Human Services is seeking clearance by the Office of Management of Budget (OMB) for an extension on Generic Data Collection Form. The Generic Data Collection Form will serve as the foundation for assessment and evaluation for HPP stakeholders, recipients, and sub-recipient programs and performance under the HPP Cooperative Agreement (CA) Program.

Program data are gathered from recipients for both ad-hoc episodic reporting as well as required reporting as part of the HPP Cooperative Agreement. Ad-hoc reporting includes but is not limited to Coalition Assessment Tool (CAT) Data Collection Tool, Impact Survey, HPP Partner Survey, CA after action reports, Ebola and Other Special Pathogens. Required reporting include Mid-Year and End-of-Year Progress Reports and other similar information collections (ICs) that account for recipient spending and program performance on all activities conducted in pursuit of achieving the HPP Cooperative Agreement goals.

This generic data collection effort is crucial to HPP's decision-making process regarding the continued existence, design and funding levels of this program. Results from these data analyses enable HPP to monitor health care emergency preparedness and progress towards national preparedness and response goals. HPP supports priorities outlined by the National Preparedness Goal (the Goal) established by the Department of Homeland Security (DHS) in 2005.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
All program recipients with supporting data submitted by sub-recipients and participating HCCs and HPP stakeholders	62	1	58	3,596
Total	62	1	58	3,596

Terry Clark,

Asst Paperwork Reduction Act Reports Clearance Officer.

[FR Doc. 2018–15185 Filed 7–16–18; 8:45 am]

BILLING CODE 4150–37–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier OS–0937–0166]

Agency Information Collection Request; 60-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before September 17, 2018.

ADDRESSES: Submit your comments to *Sherrette.Funn@hhs.gov* or by calling (202) 795–7714.

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 0990–New–60D and project title for reference, to *Sherrette.funn@hhs.gov,* or call the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: HHS 42 CFR subpart B; Sterilization of Persons in Federally Assisted Family Planning Projects;

Type of Collection: Extension;

OMB No.: 0937–0166.

Abstract: This is a request for extension of a currently approved collection for the disclosure and recordkeeping requirements codified at 42 CFR part 50, subpart B (''Sterilization of Persons in Federally Assisted Family Planning Projects''). The consent form solicits information to assure voluntary and informed consent to persons undergoing sterilization in programs of health services which are supported by federal financial assistance administered by the PHS. It provides additional procedural protection to the individual and the regulation requires that the consent form be a copy of the form that is appended to the PHS regulation. In 2003, the PHS sterilization consent form was revised to conform to OMB government-wide standards for the collection of race/ethnicity data and to incorporate the PRA burden statement as part of the consent form. We are requesting a three-year extension.

Type of respondent: Individuals seeking sterilization. Frequency: Once; prior to procedure.

ANNUALIZED BURDEN HOUR TABLE

Forms	Type of respondents	Number of respondents	Number of responses per respondents	Average burden per response	Total burden hours
Information Disclosure for *Sterilization Consent Form*.	Citizens Seeking Sterilization.	100,000	1	1	1000,000
Record-keeping for *Sterilization Consent Form*	Citizens Seeking Sterilization.	100,000	1	15/60	25,000
Total					125,000

Terry Clark,

Asst Paperwork Reduction Act Reports Clearance Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier OS–0990–0430, 0431, 0432, 0433, 0434, 0436]

Agency Information Collection Request. 60-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the following summary of proposed extensions of collections for public comment.

DATES: Comments on the ICR must be received on or before September 17, 2018.

ADDRESSES: Submit your comments to *Sherrette.Funn@hhs.gov* or by calling (202) 795–7714.

FOR FURTHER INFORMATION CONTACT: When submitting comments or requesting information, please include the document identifier 0990–New–60D and project title for reference, to *Sherrette.funn@hhs.gov,* or call the Reports Clearance Officer.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: Crime Control Act—Requirement for Background Checks.

Type of Collection: Extension.

OMB No.: 0990–0430—Office of the Assistant Secretary for Financial Resources, Office of Grants and Acquisition Policy, and Accountability, Division of Acquisition.

Abstract: Crime Control Act—Requirement for Background Checks: Performance of HHS mission requires the support of contractors. In some circumstances, depending on the requirements of the specific contract, the contractor is tasked to provide personnel who will be dealing with children under the age of 18. After contract award contractor personnel must undergo a background check as required by HHS Acquisition Regulation (HHSAR) 337.103(d)(3) and the clause at HHSAR 352.237–72 Crime Control Act—Requirement for Background Checks before working on the contract as required by federal law (Crime Control Act of 1990). The contractor is therefore required to provide information on the individual so that a proper background check can be performed.

The Agency is requesting a 3 year extension to collect this information from public or private businesses.

ANNUALIZED BURDEN HOUR TABLE

Number of respondents	Total annual responses	Average burden per response (in hours)	Total burden hours
160	160	1	160

Title of the Collection: Acquisitions Involving Human Subjects.

Type of Collection: Extension.

OMB No.: 0990–0431—Office of the Assistant Secretary for Financial Resources, Office of Grants and Acquisition Policy, and Accountability, Division of Acquisition.

Abstract: Acquisitions Involving Human Subjects: Performance of HHS mission requires the support of contractors involving human subjects. Before awarding a contract to any contractor that will need to use human subjects, the Contracting Officer is required to verify that, the contractor holds a valid Federal Wide Assurance (FWA) approved by the Office for Human Research Protections (OHRP). The provisions are implemented via contract clauses found at HHSAR 352.270–4a (Protection of Human Subjects), the clause at HHSAR 352.270–4b (Protection of Human Subjects), the provision at HHSAR 352.270–10 (Notice to Offerors—Protection of Human Subjects, Research Involving Human Subjects Committee (RIHSC) Approval of Research Protocols Required), and the clause at HHSAR 352.270–11 (Protection of Human Subjects—Research Involving Human Subjects Committee (RIHSC) Approval of Research Protocols Required).

The Agency is requesting a 3-year extension to collect this information from public or private businesses.

ANNUALIZED BURDEN HOUR TABLE

Number of respondents	Total annual responses	Average burden per response (in hours)	Total burden hours
90	318	5	1590

Title of the Collection: Acquisitions Involving the Use of Laboratory Animals.

Type of Collection: Extension.

OMB No.: 0990–0432—Office of the Assistant Secretary for Financial Resources, Office of Grants and Acquisition Policy, and Accountability, Division of Acquisition.

Abstract: Acquisitions Involving the Use of Laboratory Animals: Performance of HHS mission requires the use of live vertebrate animals. Before awarding a contract to any contractor, which will need to use live vertebrate animals, the Contracting Officer is required to verify that the contractor holds a valid Animal Welfare Assurance from the Office of Laboratory Animal Welfare (OLAW) within NIH. Contractors are required to file the appropriate forms to obtain this approval. The applicable clauses are found at HHSAR 352.270–5a (Notice to Offerors of Requirement for Compliance with the Public Health Service Policy on Humane Care and Use of Laboratory Animals), and the clause at HHSAR 352.270–5b (Care of Live Vertebrate Animals).

The Agency is requesting a 3-year extension to collect this information from public or private businesses.

Title of the Collection: Indian Child Protection and Family Violence Act.

Type of Collection: Extension.

OMB No. 0990–0433—Office of the Assistant Secretary for Financial Resources, Office of Grants and Acquisition Policy, and Accountability, Division of Acquisition

Abstract: Indian Child Protection and Family Violence Act: Performance of IHS mission requires the support of contractors. In some circumstances, depending on the requirements of the specific contract, the contractor is tasked to provide personnel who will be dealing with Indian children under the age of 18. After contract award contractor personnel must undergo a background check as required by HHSAR 337.103(d)(4) and the clause at HHSAR 352.237–73 Indian Child Protection and Family Violence Act before working on the contract as required by federal law (Indian Child Protection and Family Violence Act (ICPFVA)). The contractor is therefore required to provide information on the individual so that a proper background check can be performed, as stated in the HHS Acquisition Regulation.

The Agency is requesting a 3-year extension to collect this information from public or private businesses.

ANNUALIZED BURDEN HOUR TABLE

Number of respondents	Total annual responses	Average burden per response (in hours)	Total burden hours
40	160	1	160

Title of the Collection: Meetings, Conferences, and Seminars.

Type of Collection: Extension.

OMB No.: 0990–0434—Office of the Assistant Secretary for Financial Resources, Office of Grants and Acquisition Policy, and Accountability, Division of Acquisition.

Abstract: Meetings, Conferences, and Seminars: Performance of HHS mission requires the support of contractors. In some circumstances, depending on the requirements of the specific contract, the contractor is tasked to conduct meetings, conferences, and seminars. HHSAR 311.7101(a) (Responsibilities) and the clause at HHSAR 352.211–1 (Accessibility of meetings, conferences and seminars to persons with disabilities) require contractors to provide a plan describing the contractor's ability to meet the accessibility standards in 28 CFR part 36. HHSAR 311.7202(b) (Responsibilities) and the clause at HHSAR 352.211–2 (Conference sponsorship request and conference materials disclaimer) require contractors to provide funding disclosure and a content disclaimer statement on conference materials. As a result of these clauses, HHS contractors providing conference, meeting, or seminars services are required to provide specific information to HHS as stated in the HHS Acquisition Regulation.

The Agency is requesting a 3-year extension to collect this information from public or private businesses.

ANNUALIZED BURDEN HOUR TABLE

Number of respondents	Total annual responses	Average burden per response (in hours)	Total burden hours
1604	1604	1	1604

Title of the Collection: Contractor Collection of Information.

Type of Collection: Extension.

OMB No.: 0990–0436—Office of the Assistant Secretary for Financial Resources, Office of Grants and Acquisition Policy, and Accountability, Division of Acquisition.

Abstract: Contractor Collection of Information: Performance of HHS mission requires the support of contractors. In some circumstances, depending on the requirements of the specific contract, the contractor is tasked to gather data that involves requesting this data from sources outside of HHS (*i.e.,* the public). In those circumstances HHSAR 352.211–3 Paperwork Reduction Act is included in the contract and prevents the contractor from initiating the solicitation of information from third parties unless and until a proper clearance from OMB has been obtained, specific to that data collection. This clearance covers the data collection necessary to determine what information should be collected in order to prepare the contract-specific OMB clearance request as required by the Paperwork Reduction Act or 1995 44 U.S.C. 3501, and as stated in the HHS Acquisition Regulation.

The Agency is requesting a 3-year extension to collect this information from public or private businesses.

Substance Abuse and Mental Health Services Administration

Advisory Committee for Women's Services (ACWS); Notice of Meeting

Pursuant to Public Law 92–463, notice is hereby given of a meeting of the Substance Abuse and Mental Health Services Administration's (SAMHSA) Advisory Committee for Women's Services (ACWS) on August 1, 2018.

The meeting will include discussions on assessing SAMHSA's current strategies and a discussion on American Indian/Native American women with behavioral health needs. Additionally, the ACWS will be speaking with the Assistant Secretary of Mental Health and Substance Use regarding priorities and directions around behavioral health services and access for women and children.

The meeting is open to the public and will be held at SAMHSA, 5600 Fishers Lane, Rockville, MD, 20857, in Conference Room 5E29. Attendance by the public will be limited to space available. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions should be forwarded to the contact person by July 24, 2018. Oral presentations from the public will be scheduled at the conclusion of the meeting. Individuals interested in making oral presentations are encouraged to notify the contact person on or before July 24, 2018. Up to five minutes will be allotted for each presentation.

The meeting may be accesed via telephone. To attend on site, obtain the call-in number and access code, submit written or brief oral comments, or request special accommodations for persons with disabilities, please register on-line at *http://nac.samhsa.gov/Registration/meetingsRegistration.aspx,* or communicate with SAMHSA's Designated Federal Officer, Ms. Valerie Kolick.

Substantive meeting information and a roster of ACWS members may be obtained either by accessing the SAMHSA Committees' Web *https://www.samhsa.gov/about-us/advisory-councils/meetings,* or by contacting Ms. Kolick.

Committee Name: Substance Abuse and Mental Health Services Administration Advisory Committee for Women's Services (ACWS).

Date/Time/Type: Wednesday, August 1, 2018, from: 9:00 a.m. to 4:45 p.m. EDT, Open.

Place: SAMHSA, 5600 Fishers Lane, Conference Room 5E29, Rockville, Maryland 20857.

Contact: Valerie Kolick, Designated Federal Official, SAMHSA's Advisory Committee for Women's Services, 5600 Fishers Lane, Rockville, MD 20857, Telephone: (240) 276–1738, Email: *Valerie.kolick@samhsa.hhs.gov.*

BILLING CODE 4162–20–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Quarterly IRS Interest Rates Used in Calculating Interest on Overdue Accounts and Refunds on Customs Duties

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This notice advises the public that the quarterly Internal Revenue Service interest rates used to calculate interest on overdue accounts (underpayments) and refunds (overpayments) of customs duties will remain the same from the previous quarter. For the calendar quarter beginning July 1, 2018, the interest rates for overpayments will be 4 percent for corporations and 5 percent for non-corporations, and the interest rate for underpayments will be 5 percent for both corporations and non-corporations. This notice is published for the convenience of the importing public and U.S. Customs and Border Protection personnel.

DATES: The rates announced in this notice are applicable as of July 1, 2018.

FOR FURTHER INFORMATION CONTACT: Shawn Kaus, Revenue Division, Collection Refunds & Analysis Branch, 6650 Telecom Drive, Suite #100, Indianapolis, Indiana 46278; telephone (317) 614–4485.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 19 U.S.C. 1505 and Treasury Decision 85–93, published in the **Federal Register** on May 29, 1985 (50 FR 21832), the interest rate paid on applicable overpayments or underpayments of customs duties must be in accordance with the Internal Revenue Code rate established under 26 U.S.C. 6621 and 6622. Section 6621 provides different interest rates applicable to overpayments: One for corporations and one for non-corporations.

The interest rates are based on the Federal short-term rate and determined by the Internal Revenue Service (IRS) on behalf of the Secretary of the Treasury on a quarterly basis. The rates effective for a quarter are determined during the first-month period of the previous quarter.

In Revenue Ruling 2018–18, the IRS determined the rates of interest for the calendar quarter beginning July 1, 2018, and ending on September 30, 2018. The interest rate paid to the Treasury for underpayments will be the Federal short-term rate (2%) plus three percentage points (3%) for a total of five percent (5%) for both corporations and non-corporations. For corporate overpayments, the rate is the Federal short-term rate (2%) plus two percentage points (2%) for a total of four percent (4%). For overpayments made by non-corporations, the rate is the Federal short-term rate (2%) plus three percentage points (3%) for a total of five percent (5%). These interest rates used to calculate interest on overdue accounts (underpayments) and refunds (overpayments) of customs duties are the same from the previous quarter. These interest rates are subject to change for the calendar quarter beginning October 1, 2018, and ending December 31, 2018.

For the convenience of the importing public and U.S. Customs and Border Protection personnel the following list of IRS interest rates used, covering the period from July of 1974 to date, to calculate interest on overdue accounts and refunds of customs duties, is published in summary format.

Beginning date	Ending date	Under-payments (percent)	Over-payments (percent)	Corporate overpayments (eff. 1–1–99) (percent)

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

[1651–0096]

Agency Information Collection Activities: Transfer of Cargo to a Container Station

AGENCY: U.S. Customs and Border Protection (CBP), Department of Homeland Security.

ACTION: 60-Day notice and request for comments; extension of an existing collection of information.

SUMMARY: The Department of Homeland Security, U.S. Customs and Border Protection will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). The information collection is published in the **Federal Register** to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted (no later than September 17, 2018) to be assured of consideration.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice must include the OMB Control Number 1651–0096 in the subject line and the agency name. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Email.* Submit comments to: *CBP_PRA@cbp.dhs.gov.*

(2) *Mail.* Submit written comments to CBP Paperwork Reduction Act Officer, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, Economic Impact Analysis Branch, 90 K Street NE, 10th Floor, Washington, DC 20229–1177.

FOR FURTHER INFORMATION CONTACT: Requests for additional PRA information should be directed to Seth Renkema, Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection, Office of Trade, Regulations and Rulings, 90 K Street NE, 10th Floor, Washington, DC 20229–1177, Telephone number (202) 325–0056 or via email *CBP_PRA@cbp.dhs.gov.* Please note that the contact information provided here is solely for questions regarding this notice. Individuals seeking information about other CBP programs should contact the CBP National Customer Service Center at 877–227–5511, (TTY) 1–800–877–8339, or CBP website at *https://www.cbp.gov/.*

SUPPLEMENTARY INFORMATION: CBP invites the general public and other Federal agencies to comment on the proposed and/or continuing information collections pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). This process is conducted in accordance with 5 CFR 1320.8. Written comments and suggestions from the public and affected agencies should address one or more of the following four points: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) suggestions to enhance the quality, utility, and clarity of the information to be collected; and (4) suggestions to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. The comments that are submitted will be summarized and included in the request for approval. All comments will become a matter of public record.

Overview of This Information Collection

Title: Transfer of Cargo to a Container Station.

OMB Number: 1651–0096.

Current Actions: CBP proposes to extend the expiration date of this information collection with no change to the burden hours or to the information collected.

Type of Review: Extension (without change).

Affected Public: Businesses.

Abstract: Before the filing of an entry of merchandise for the purpose of breaking bulk and redelivering cargo, containerized cargo may be moved from the place of unlading to a designated container station or may be received directly at the container station from a bonded carrier after transportation in-bond in accordance with 19 CFR 19.41. This also applies to loose cargo as part of containerized cargo. In accordance with 19 CFR 19.42, the container station operator may make a request for the transfer of a container to the station by submitting to CBP an abstract of the manifest for the transferred containers including the bill of lading number, marks, numbers, description of the contents and consignee.

Estimated Number of Respondents: 14,327.

Estimated Number of Annual Responses per Respondent: 25.

Estimated Total Annual Responses: 358,175.

Estimated Time per Response: 7 minutes.

Estimated Total Annual Burden Hours: 41,548.

Dated: July 12, 2018.

Seth D. Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

Overview of This Information Collection

Title: General Declaration (Outward/Inward) Agriculture, Customs, Immigration, and Public Health.

OMB Number: 1651–0002.

Form Number: Form 7507.

Action: CBP proposes to extend the expiration date of this information collection with no change to the burden hours. There is no change to the information collected or CBP Form 7507.

Type of Review: Extension (without change).

Abstract: An aircraft commander or agent must file CBP Form 7507, *General Declaration (Outward/Inward) Agriculture, Customs, Immigration, and Public Health* at the time of arrival for all aircraft required to enter pursuant to 19 CFR 122.41 and at the time of clearance for all aircraft departing to a foreign area with commercial airport cargo pursuant to 19 CFR 122.72. This form is used to document clearance and inspections by appropriate regulatory agency staffs. CBP Form 7507 collects information about the flight routing, the number of passengers embarking and disembarking, the number of crew members, a declaration of health for the persons on board, and details about disinfecting and sanitizing treatments during the flight. This form also includes a declaration attesting to the accuracy, completeness, and truthfulness of all statements contained in the form and in any document attached to the form.

CBP Form 7507 is authorized by 42 U.S.C 268, 19 U.S.C. 1431, 1433, and 1644a; and provided for by 19 CFR 122.43, 122.52, 122.54, 122.73, 122.144, 42 CFR 71.21 and 71.32. This form is accessible at: *https://www.cbp.gov/newsroom/publications/forms?title=7507&=Apply.*

Affected Public: Businesses.

Estimated Number of Respondents: 500.

Estimated Number of Total Annual Responses: 1,322,000.

Estimated Time per Response: 5 minutes.

Estimated Annual Burden Hours: 110,122.6.

Dated: July 12, 2018.

Seth D. Renkema,

Branch Chief, Economic Impact Analysis Branch, U.S. Customs and Border Protection.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2018–0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities. The flood hazard determinations modified by each LOMR will be used to calculate flood insurance premium rates for new buildings and their contents.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at *https://msc.fema.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP and are used to calculate the appropriate flood insurance premium rates for new buildings, and for the contents in those buildings. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at *https://msc.fema.gov.*

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2018–0018; OMB No. 1660–0131]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Threat and Hazard Identification and Risk Assessment (THIRA)—Stakeholder Preparedness Review (SPR) Reporting Tool

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. The submission will describe the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort and resources used by respondents to respond) and cost, and the actual data collection instruments FEMA will use.

DATES: Comments must be submitted on or before August 16, 2018.

ADDRESSES: Submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the Desk Officer for the Department of Homeland Security, Federal Emergency Management Agency, and sent via electronic mail to *dhsdeskofficer@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Information Management Division, 500 C Street SW, Washington, DC 20472, email address *FEMA-Information-Collections-Management@fema.dhs.gov* or Dante Randazzo, Supervisory Emergency Management Specialist, FEMA, National Preparedness Assessment Division, *Dante.Randazzo@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This proposed information collection previously published in the **Federal Register** on March 13, 2018 at 83 FR 10864 with a 60 day public comment period. FEMA received a total of 17 public comments, 11 were anonymous public comments that were not relevant to the information collection.

Three commenters suggested that FEMA use the Tribal Consultation process for information collection 1660–0131. Two commenters stated that FEMA should not be placing additional unfunded requirements for Tribes to participate in the Tribal Homeland Security Grant Program (THSGP). One commenter stated that a Tribe should not be charged for FEMA's help and should be able to obtain help without any penalties. Two commenters stated that the Federal Government has a trust responsibility to meet its treaty obligations to all Tribes by providing for base level capability and capacities.

FEMA's Response: The information collection was not revised because of the comments as in 2017, FEMA involved Tribal partners in our discussions about the Threat and Hazard Identification Risk Assessment (THIRA)-Stakeholder Preparedness Review (SPR) methodology (ultimately FEMA received feedback from over 150 State, local, Tribal, and territorial representatives), and used their input to update the process. On April 10, 2018 and April 12, 2018, FEMA provided an overview of the updated THIRA/SPR methodology that included a detailed walkthrough of the specific requirements for THSGP recipients. Tribal participants had an opportunity to ask questions and share concerns about the updated methodology. On June 4, 2018, FEMA released a fact sheet outlining the requirements for THSGP recipients.

While THSGP recipients, generally 24 Tribes each year, will now have to complete the SPR in addition to the THIRA, FEMA has determined that the new Tribal requirements will not only likely decrease their reporting burden, but produce more useful information Tribes can use to support other emergency management activities. FEMA will also be able to use this information to improve the support it offers to Tribes. Previously, when

THSGP recipients were required to complete only the THIRA, they had to address all 32 core capabilities. This year, as they complete the THIRA and SPR, THSGP recipients will only be required to address 8 of the 32 core capabilities. Therefore, Tribal Governments' estimated average burden per response (in hours) has decreased from 408 to 290 hours. Only THSGP recipients are required to complete the THIRA/SPR, but FEMA encourages other Tribes to do so as well.

FEMA is hosting three in-person technical assistance sessions this year to help communities understand and complete the THIRA/SPR, and offered invitational travel for grantees required to complete the THIRA/SPR. The technical assistance sessions themselves are free for communities to attend, with no admission fee, nor are there any penalties for obtaining FEMA's help.

FEMA is also developing tools, materials, and guidance to help communities learn and complete the new methodology. Communities requiring assistance with their THIRA/SPR can also reach out to their Regional Preparedness Analysts and Planning Officers or the THIRA/SPR helpdesk at *FEMA-SPR@fema.dhs.gov.* These materials and services are provided at no cost to Tribes or other communities. It is also important to note that completing the THIRA and SPR are allowable expenses under the grant award. FEMA acknowledges the inherent sovereignty of Tribal governments, the trust responsibility of the Federal Government, and the nation-to-nation relationship between the U.S. government and Tribal governments as established by the U.S. Constitution, statutes, treaties, court decisions, executive orders, regulations, and policies as a foundation of the Tribal Homeland Security Grant Program.

The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Threat and Hazard Identification and Risk Assessment (THIRA)—Stakeholder Preparedness Review (SPR) Reporting Tool.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0131.

Form Titles and Numbers: FEMA Form 008–0–19 (THIRA), Threat and Hazard Identification and Risk Assessment (THIRA) Reporting Tool; FEMA Form 008–0–20 (SPR), Stakeholder Preparedness Review (SPR) Reporting Tool; FEMA Form 008–0–23, THIRA/SPR After-Action Call Questions.

Abstract: The assessment is structured by the 32 core capabilities from the 2015 National Preparedness Goal. States, Territories, urban areas, and Tribes provide information on capability targets, their current capability levels and capability gaps for each core capability. Respondent States, Territories, Tribes and urban areas gather the information and complete the THIRA and SPR following the ''Comprehensive Preparedness Guide (CPG) 201, Third Edition.''

Affected Public: State, Local or Tribal Government.

Estimated Number of Respondents: 113.

Estimated Number of Responses: 113.

Estimated Total Annual Burden Hours: 84,414.

Estimated Total Annual Respondent Cost: $4,328,749.92.

Estimated Respondents' Operation and Maintenance Costs: $12,404,962.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $2,648,063.63.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Tammi Hines,

Privacy Branch Chief, Office of the Chief Administrative Officer, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–46–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4372–DR; Docket ID FEMA–2018–0001]

Massachusetts; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the Commonwealth of Massachusetts (FEMA–4372–DR), dated June 25, 2018, and related determinations.

DATES: The declaration was issued June 25, 2018.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated June 25, 2018, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

> I have determined that the damage in certain areas of the Commonwealth of Massachusetts resulting from a severe winter storm and flooding during the period of March 2–3, 2018, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the Commonwealth of Massachusetts.
>
> In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.
>
> You are authorized to provide Public Assistance in the designated areas and Hazard Mitigation throughout the Commonwealth. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Hazard Mitigation will be limited to 75 percent of the total eligible costs. Federal funds provided under the Stafford Act for Public Assistance also will be limited to 75 percent of the total eligible costs, with the exception of projects that meet the eligibility criteria for a higher Federal cost-sharing percentage under the Public Assistance Alternative Procedures Pilot Program for Debris Removal implemented pursuant to section 428 of the Stafford Act.

Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, James N. Russo, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the Commonwealth of Massachusetts have been designated as adversely affected by this major disaster:

Barnstable, Bristol, Essex, Nantucket, Norfolk, and Plymouth Counties for Public Assistance.

All areas within the Commonwealth of Massachusetts are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Brock Long,

Administrator, Federal Emergency Management Agency.

Alaska; Major Disaster and Related Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Alaska (FEMA–4369–DR), dated June 8, 2018, and related determinations.

DATES: The declaration was issued June 8, 2018.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW, Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that, in a letter dated June 8, 2018, the President issued a major disaster declaration under the authority of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''), as follows:

> I have determined that the damage in certain areas of the State of Alaska resulting from a severe storm on December 4, 2017, is of sufficient severity and magnitude to warrant a major disaster declaration under the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121 *et seq.* (the ''Stafford Act''). Therefore, I declare that such a major disaster exists in the State of Alaska.
>
> In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes such amounts as you find necessary for Federal disaster assistance and administrative expenses.
>
> You are authorized to provide Public Assistance in the designated area and Hazard Mitigation throughout the State. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under the Stafford Act for Hazard Mitigation will be limited to 75 percent of the total eligible costs. Federal funds provided under the Stafford Act for Public Assistance also will be limited to 75 percent of the total eligible costs, with the exception of projects that meet the eligibility criteria for a higher Federal cost-sharing percentage under the Public Assistance Alternative Procedures Pilot Program for Debris Removal implemented pursuant to section 428 of the Stafford Act.
>
> Further, you are authorized to make changes to this declaration for the approved assistance to the extent allowable under the Stafford Act.

The Federal Emergency Management Agency (FEMA) hereby gives notice that pursuant to the authority vested in the Administrator, under Executive Order 12148, as amended, Thomas J. Dargan, of FEMA is appointed to act as the Federal Coordinating Officer for this major disaster.

The following areas of the State of Alaska have been designated as adversely affected by this major disaster:

The Kenai Peninsula Borough for Public Assistance.

All areas within the State of Alaska are eligible for assistance under the Hazard Mitigation Grant Program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

Brock Long,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2018–0002; Internal Agency Docket No. FEMA–B–1840]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Federal Regulations. The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *https://www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *https://msc.fema.gov* for comparison.

[FR Doc. 2018–15213 Filed 7–16–18; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Agency Information Collection Activities: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Department of Homeland Security (DHS).

ACTION: 30-Day notice and request for comments; extension without change of a currently approved collection, 1601–0014.

SUMMARY: DHS will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. DHS previously published this ICR in the **Federal Register** on Wednesday, April 4, 2018 for a 60-day public comment period. No comments were received by DHS. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until August 16, 2018. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to OMB Desk Officer, DHS and sent via electronic mail to *dhsdeskofficer@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: The information collection activity will garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management. Feedback collected under this generic clearance will provide useful information, but it will not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: The target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential nonresponse bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

This is an extension of a currently approved collection, 1601–0014. DHS previously published this ICR in the **Federal Register** on Wednesday, April 4, 2018 at 83 FR 14484 for a 60-day public comment period, and is soliciting public comment for another 30 days. OMB is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

Analysis

Agency: The Department of Homeland Security.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Number: 1601–0014.

Frequency: One per Request.

Affected Public: Individuals and Households, Businesses and Organizations, State, Local or Tribal Government.

Number of Respondents: 215,100.

Estimated Time per Respondent: 10 minutes.

Total Burden Hours: 34,732 Hours.

Dated: June 20, 2018.

Melissa Bruce,

Executive Director, Enterprise Business Management Office.

BILLING CODE 9110–9B–P

DEPARTMENT OF HOMELAND SECURITY

Agency Information Collection Activities: Case Assistance Form (Ombudsman Form DHS–7001, and Instructions)

AGENCY: Office of the Citizenship and Immigration Services Ombudsman, Department of Homeland Security (DHS).

ACTION: 30-Day notice and request for comments; extension of a currently approved collection, 1601–0004.

SUMMARY: The DHS Office of the Citizenship and Immigration Services (CIS) Ombudsman will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collected on this form will allow the CIS Ombudsman to identify the problem such as: (1) A case problem which is a request for information about a case that was filed with U.S. Citizenship and Immigration Services (USCIS) (''case problem''); or (2) the identification of a systemic issue that may or may not pertain to an individual case which the individual, attorney or employer is seeking to bring to the attention of the CIS Ombudsman (''trend''). DHS previously published this information collection request (ICR) in the **Federal Register** on Tuesday, April 24, 2018 for a 60-day public comment period. One comment was received by DHS. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until August 16, 2018. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, OMB. Comments should be addressed to OMB Desk Officer, DHS and sent via electronic mail to *dhsdeskofficer@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: The CIS Ombudsman was created under section 452 of the Homeland Security Act of 2002 (Pub. L. 107–296) to: (1) Assist individuals and employers in resolving problems with the USCIS; (2) to identify areas in which individuals and employers have problems in dealing with USCIS; and (3) to the extent possible, propose changes in the administrative practices of USCIS to mitigate problems. This form is used by an applicant who is experiencing problems with USCIS during the processing of an immigration benefit.

The information collected on this form will allow the CIS Ombudsman to identify the problem such as: (1) A case problem which is a request for information about a case that was filed with USCIS (''case problem''); or (2) the identification of a systemic issue that may or may not pertain to an individual case which the individual, attorney or employer is seeking to bring to the attention of the CIS Ombudsman (''trend'').

For case problems, the CIS Ombudsman will refer case specific issues to the Customer Assistance Office for USCIS for further research, and review.

For trends received, the CIS Ombudsman notes the systemic issue identified in the correspondence which may or may not be incorporated into future recommendations submitted to the Director of USCIS pursuant to section 452(d)(4) of Public Law 107–296.

The use of this form provides the most efficient means for collecting and processing the required data. The CIS Ombudsman also employs the use of information technology in collecting and processing information by offering the option for electronic submission of the DHS Form 7001 through the Ombudsman Online Case Assistance System. Per PRA requirements, a fillable PDF version of the form is provided on the CIS Ombudsman's website. The PDF form can be completed online, printed out and sent to the CIS Ombudsman's office at the address indicated on the form. It is noted on the form that using the paper method can result in significant processing delays for the CIS Ombudsman's office to provide the requested case assistance. After approval of the changes to the form detailed in this supporting statement, both the online form and PDF will be updated and posted on the Ombudsman's website at *http://www.dhs.gov/case-assistance* for submission of the form.

The assurance of confidentiality provided to the respondents for this information collection is provided by: (a) The CIS Ombudsman authorizing legislation and mandate as established by Homeland Security Act of 2002 at Section 452; (b) the Privacy Impact Assessment and the (c) Systems of Records Notice titled ''Department of Homeland Security Citizenship and Immigration Services Ombudsman—001 Online Ombudsman Form DHS–7001 and Ombudsman Case Assistance Online System of Records''. The DHS Privacy Office will receive the entire package of documents for this information collection to assure authorization for renewal of the collection.

The Ombudsman Form DHS–7001 (PDF) and the Ombudsman Case Assistance Online System are constructed in compliance with all applicable DHS Privacy Office, DHS CIO, DHS Records Management, and OMB regulations regarding data collection, use, storage, and retrieval. The proposed public use data collection system is therefore intended to be distributed for public use primarily by electronic means with limited paper distribution and processing of paper forms.

The Ombudsman Form DHS–7001 (PDF) and the Online Ombudsman Form DHS–7001 (Ombudsman Case Assistance Online System) have been constructed in compliance with regulations and authorities under the purview of the DHS Privacy Office, DHS CIO, DHS Records Management, and OMB regulations regarding data collection, use, sharing, storage, information security and retrieval of information.

There has been an increase of 3,200 in the estimated annual burden hours previously reported for this information collection. The increase in burden hours is a reflection of agency estimates.

There is no change in the information being collected, however there have been cosmetic changes to the form including punctuation, formatting, and text changes to make the form more understandable and streamlined for use by respondents. In 2015, the following changes were made:

a. Number of response fields was reduced from 13 to 12 and arranged in a way that streamlines completion, submission and processing of the form.

b. The title of the form was changed from ''Case Problem Submission Worksheet (CIS Ombudsman Form DHS–7001)'' to ''Case Assistance Form (Ombudsman Form DHS–7001)''.

c. The name of the system was changed from ''Virtual Ombudsman System'' to ''Ombudsman Case Assistance Online System''.

The following narrative explains the changes made on the form in 2015 and the corresponding instructions. The ORIGINAL 7001 form had the sections arranged in the following order:

1. Name: Please identify the individual or employer encountering difficulties with USCIS (applicant/beneficiary/petitioner).
2. Contact Information: Please provide information on the individual or employer encountering difficulties with USCIS (applicant/beneficiary/petitioner).
3. Date of Birth.
4. Country of Birth and Citizenship.
5. Alien Registration Number (A-Number); The A-number appears in the following format: A123–456–789.
6. Person Preparing This Form: Please indicate who is completing this form.
7. Applications/Petitions Filed: List all applications and/or petitions

pending with USCIS related to your case inquiry.

8. Type of Immigration Benefit: Please provide the type of immigration benefit sought from USCIS.

9. Reason for Inquiry: Please indicate if any of the options apply. Provide a description in section 10.

10. Description: Describe the difficulties experienced with USCIS. Attach additional pages if needed.

11. Prior Actions Taken: Check all that apply: Please describe the response USCIS provided and attach any relevant correspondence.

12. Consent: If you are the beneficiary of an immigration petition, consent of the individual who submitted the petition on your behalf is required. The petitioner must sign.

13. Attorney or Accredited Representative: Please complete this section if you are an attorney, a representative of an organization, an accredited representative, or anyone else preparing this form on behalf of the individual or employer encountering difficulties with USCIS.

The AMENDED 7001 form has the sections arranged in the following order:

1. Name: Please identify the name of the individual or employer (applicant/beneficiary/petitioner) encountering or difficulties with USCIS. Do not enter the attorney/law firm's name here.

2. Date of Birth: Country of Birth: Country of Citizenship.

3. Alien Registration Number (A-Number); The A-number appears in the following format: A123–456–789.

4. Contact Information: Please provide the contact information of the individual or employer (applicant/beneficiary/petitioner) encountering difficulties with USCIS. Please include the primary E-Mail address for the CIS Ombudsman to provide updates.

5. Applications/Petitions Filed: List all applications and/or petitions pending with USCIS related to your case inquiry.

6. Type of Immigration Benefit Sought: Please provide the type of immigration benefit sought from USCIS.

7. Reason for Inquiry/Case Assistance Request: Check all that apply. Provide a description in section 8 and add documentation related to your inquiry.

8. Description of your Case Problem: Describe the difficulties experienced with USCIS including all responses USCIS provided. Attach relevant correspondence concerning actions taken to resolve the issue before submitting with the Ombudsman's Office including: Receipt notices; requests for evidence; decisions; notices and any other correspondence from USCIS about your case. Attach additional pages if needed.

9. Prior Actions Taken to Remedy the Problem:

Check all that apply and provide the additional information requested for each selection in the space provided. Note that if selecting Option a ''Visited USCIS My Case Status at *www.uscis.gov*'', you must indicate what additional actions (b through g) were taken to remedy the problem before submitting the form to the Ombudsman.

a. Visited USCIS My Case Status at *http://www.uscis.gov/.*

b. Contacted the National Customer Service Center (NCSC) for information and/or assistance regarding this case at their toll-free number 1–800–375–5283. Provide SRMT Number:

c. Attended an InfoPass Appointment with USCIS. Provide InfoPass Number:

d. Sent an Email to USCIS. Provide date E-Mail sent: Provide USCIS Email address:

e. Contacted a U.S. Government Department or Agency for assistance. Provide name and contact information:

f. Contacted a U.S. Congressional Representative for assistance. Provide name and contact information:

g. Other. Please describe.

10. Person Preparing This Form:

Please indicate who is completing this form.

11. Attorney or Accredited Representative:

Please complete this section if you are an attorney, a representative of an organization, an accredited representative, or anyone else preparing this form on behalf of the individual or employer encountering difficulties with USCIS. Please attach copy of your Form G–28.

12. Consent: Please note that if you are the beneficiary of an immigration petition, consent of the individual or employer that submitted the petition on your behalf is required. The petitioner must sign.

The instructions have been updated to reflect the electronic submission options as detailed in the previous paragraphs.

Instructions for electronic submission will be posted on the CIS Ombudsman website at *www.dhs.gov/cisombudsman.* The electronic version of the form was developed by DHS OCIO (Office of the Chief Information Officer) based upon the approved version of the amended 7001 form as described herein. Sample screenshots were provided with the 2015 submission.

There is no change in the terms of clearance from the previously approved collection as addressed by the: (a) Privacy Impact Assessment and (b) Systems of Records Notice titled ''Department of Homeland Security Citizenship and Immigration Services Ombudsman—001 Online Ombudsman Form DHS–7001 and Ombudsman Case Assistance Online System of Records''.

This is an extension of a currently approved collection, 1601–0004. DHS previously published this ICR in the **Federal Register** on Tuesday, April 24, 2018 at 83 FR 17833 for a 60-day public comment period, and is soliciting public comment for another 30 days. OMB is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

BILLING CODE 9110–9B–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0104]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Petition for U Nonimmigrant Status

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until September 17, 2018.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0104 in the body of the letter, the agency name and Docket ID USCIS–2010–0004. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2010–0004;

(2) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW, Washington, DC 20529–2140.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW, Washington, DC 20529–2140, telephone number 202–272–8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS National Customer Service Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2010–0004 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition for U Nonimmigrant Status.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–918; Form I–918, Supplement A; Form I–918, Supplement B; Biometric Services; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households; Federal Government. This information collection permits victims of certain qualifying criminal activity and their immediate family to petition for temporary nonimmigrant status.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–918 is 36,000 and the estimated hour burden per response is 5 hours. The estimated total number of respondents for the information collection I–918, Supplement A is 25,000 and the estimated hour burden per response is 1.5 hours. The estimated total number of respondents for the information collection I–918, Supplement B is 36,000 and the estimated hour burden per response is 1 hour. The estimated total number of respondents for the biometric services is 61,000 and the estimated hour burden per response is 1.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 324,870 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $259,250.

Dated: July 11, 2018.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0028]

Agency Information Collection Activities; Revision of a Currently Approved Collection: Petition To Classify Orphan as an Immediate Relative; Application for Advance Processing of an Orphan Petition; Supplement 1, Listing of an Adult Member of the Household; Supplement 2, Consent To Disclose Information

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed revision of a currently approved collection of information or new collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until September 17, 2018.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0028 in the body of the letter, the agency name and Docket ID USCIS–2008–0020. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2008–0020;

(2) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW, Washington, DC 20529–2140.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, 20 Massachusetts Avenue NW, Washington, DC 20529–2140, telephone number 202–272–8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS National Customer Service Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2008–0020 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition to Classify Orphan as an Immediate Relative; Application for Advance Processing of an Orphan Petition; Supplement 1, Listing of an Adult Member of the Household; Supplement 2, Consent to Disclose Information.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–600, Form I–600A, Form I–600A Supplement 1, Form I–600A Supplement 2; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. A U.S. adoptive parent may file a petition to classify an orphan as an immediate relative through Form I–600 under section 101(b)(1)(F) of the INA.A U.S. prospective adoptive parent may file Form I–600A in advance of the Form I–600 filing and USCIS will make a determination regarding the prospective adoptive parent's eligibility to file Form I–600A and their suitability and eligibility to properly parent an orphan. A U.S. adoptive parent may file a petition to classify an orphan as an immediate relative through Form I–600 under section 101(b)(1)(F) of the INA. If a U.S. prospective/adoptive parent has an adult member of his or her household, as defined at 8 CFR 204.301, the prospective/adoptive parent must include the Supplement 1 when filing both Form I–600A and Form I–600. The U.S. prospective/adoptive parent files Supplement 2 to authorize USCIS to disclose case-related information to adoption service providers that would otherwise be protected under the Privacy Act, 5 U.S.C. 552a. Authorized disclosures will assist USCIS in the adjudication of Forms I–600A and I–600.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection Form I–600 is 1,200 and the estimated hour burden per response is 1 hour; the estimated total number of respondents for the information collection Form I–600A is 2,000 and the estimated hour burden per response is 1 hour; the estimated total number of respondents for the information collection Form I–600A Supplement 1 is 301 and the estimated hour burden per response is 1 hour; the estimated total number of respondents for the

information collection Form I–600A Supplement 2 is 1,260 and the estimated hour burden per response is 0.25 hours; the estimated total number of respondents for the Home Study information collection is 2,500 and the estimated hour burden per response is 25 hours; the estimated total number of respondents for the Biometrics information collection is 2,520 and the estimated hour burden per response is 1.17 hours; the estimated total number of respondents for the Biometrics—DNA information collection is 2 and the estimated hour burden per response is 6 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 35,451 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $110,871,772.

Dated: July 3, 2018.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS–R2–ES–2016–0141; FXES11140200000–189–FF02ENEH00]

Final Environmental Impact Statement and Draft Record of Decision on the Barton Springs/Edwards Aquifer Conservation District Habitat Conservation Plan for Two Salamander Species in Travis and Hays Counties, Texas

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Notice of availability.

SUMMARY: We, the U.S. Fish and Wildlife Service, under the National Environmental Policy Act, make available the final environmental impact statement and draft record of decision analyzing the impacts of issuance of an incidental take permit for implementation of the Barton Springs/Edwards Aquifer Conservation District (BSEACD) Habitat Conservation Plan (HCP). Our decision is to issue a 20-year incidental take permit for implementation of the BSEACD HCP, which authorizes incidental take of two listed salamanders under the Endangered Species Act.

DATES: We will finalize the record of decision and issue a permit no sooner than August 13, 2018.

ADDRESSES: You may obtain copies of the documents in the following formats:

- *Electronic:*
  ○ *http://www.regulations.gov,* in Docket No. FWS–R2–ES–2016–0141.
  ○ *http://www.fws.gov/southwest/es/AustinTexas.*
  ○ *CD–ROM:* Contact Mr. Adam Zerrenner (see **FOR FURTHER INFORMATION CONTACT**).
  ○ *Telephone:* 512–490–0057.
- *Hard copy:* You may review the documents at the following locations (by appointment only):
  ○ Department of the Interior, Natural Resources Library, 1849 C Street NW, Washington, DC 20240. Call (202) 208–5815.
  ○ U.S. Fish and Wildlife Service, 500 Gold Avenue SW, Room 6034, Albuquerque, NM 87102. Call (505) 248–6920.
  ○ U.S. Fish and Wildlife Service, 10711 Burnet Road Suite 200, Austin, TX 78758. Call (512) 490–0057.

FOR FURTHER INFORMATION CONTACT: Mr. Adam Zerrenner, Field Supervisor, by phone at 512–490–0057, via fax at 512–490–0974, or by U.S. mail at U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200, Austin, TX 78758.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service (Service), announce the availability of several documents related to an incidental take permit (ITP) application under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The final environmental impact statement (EIS) and draft record of decision (ROD) were developed in compliance with the agency decision-making requirements of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), and are based on the habitat conservation plan (HCP) as submitted by the Barton Springs/Edwards Aquifer Conservation District (BSEACD, or applicants). We described all four alternatives in detail, which were fully evaluated and analyzed in our 2018 final EIS. The draft ROD documents the rationale for our decision.

Our proposed action is to issue an ITP to the applicants under section 10(a)(1)(B) of the ESA that authorizes incidental take of the Barton Springs salamander (*Eurycea sosorum*) and Austin blind salamander (*Eurycea waterlooensis*) during management of the Barton Springs segment of the Edwards Aquifer. The aquifer is the primary water supply for more than 70,000 people in the region and the source water for the Barton Springs complex. The applicants requested a term of 20 years from the date of issuance. The applicants will fully implement minimization and mitigation measures to offset impacts to the covered species according to their HCP.

The minimization measures include: Providing the most efficient use of groundwater, controlling and preventing waste of groundwater, addressing conjunctive surface water management issues, addressing natural resource management issues, addressing drought conditions, addressing demand reduction through conservation, addressing supply through structural enhancement, and quantitatively addressing established desired future conditions.

The mitigation measures include a commitment to:

- Support the operations of an existing refugium through in-kind, contracted support, cash provision, or other appropriate means;
- conduct a feasibility study of dissolved oxygen augmentation and, if warranted, implement a pilot project at Main Spring at Barton Springs;
- maintain and operate the Antioch Recharge Enhancement Facility for the permit term;
- establish a new reserve fund for closing abandoned wells to eliminate high-risk abandoned wells as potential conduits for contaminants from the surface or adjacent formations into the aquifer, with priority given to problematic wells close to the Barton Springs outlets or those associated with water chemistry concerns under severe drought conditions; and
- provide leadership and technical assistance to other government entities, organizations, and individuals when prospective land-use and groundwater management activities in those entities' purview will, in the District's assessment, significantly affect the quantity or quality of groundwater in the Aquifer.

In addition to this notice, the Environmental Protection Agency (EPA) published a notice announcing the EIS on July 13, 2018, as required under the Clean Air Act, section 309 (42 U.S.C. 7401 *et seq.*; see EPA's Role in the EIS Process below).

Background

The applicants have applied for an ITP (TE10607C–0) under the ESA that would authorize incidental take of two covered species and would be in effect for a period of 20 years. The proposed incidental take of the covered species would occur from lawful, non-Federal activities from groundwater withdrawals from registered wells (non-exempt) in the Edwards Aquifer that are authorized and regulated under the BSEACD's permitting program and activities necessary to manage potential habitat for the covered species within the permit area (covered activities). The BSEACD HCP Plan Area includes Hays and Travis Counties, Texas. The final EIS considers the direct, indirect, and cumulative effects of implementing the HCP, including the measures that will be implemented to minimize and mitigate such impacts to the maximum extent practicable.

Section 9 of the ESA and its implementing regulations in title 50 of the Code of Federal Regulations (CFR) prohibit ''take'' of fish and wildlife species listed as endangered or threatened under the ESA. The ESA defines ''take'' as ''to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect listed animal species, or attempt to engage in such conduct'' (16 U.S.C. 1533). The term ''harm'' is defined in the regulations as significant habitat modification or degradation that results in death or injury to listed species by significantly impairing essential behavioral patterns, including breeding, feeding, or sheltering (50 CFR 17.3). However, we may, under specified circumstances, issue permits that allow the take of federally listed species, provided that the take is incidental to, but not the purpose of, otherwise lawful activity. Regulations governing ITPs for endangered and threatened species are at 50 CFR 17.22 and 17.32, respectively.

On July 18, 2017, we issued a draft EIS and requested public comment on our evaluation of the potential impacts associated with issuance of an ITP for implementation of the BSEACD HCP and to evaluate alternatives (82 FR 32861). We held a public meeting in Austin, Texas, August 22, 2017. The public comment period closed on September 18, 2017.

We identified key issues and relevant factors through public scoping and meetings, working with other agencies and groups, and reviewing comments from the public. We received responses from one local government agency and two nongovernmental agencies. We believe these comments are addressed and reasonably accommodated in the final documents, and we have included the public's comments and our responses in Appendix A5–1 of the final EIS.

Decision

We intend to issue an ITP allowing the applicants to implement the BSEACD HCP. Our decision is based on a thorough review of the alternatives and their environmental consequences. Implementing this decision entails issuing an ITP to BSEACD and full implementation of the HCP by the applicants, including minimization and mitigation measures, monitoring and adaptive management, and complying with all terms and conditions in the ITP.

A final ITP decision will be made no sooner than 30 days after the publication of this notice of availability and completion of the record of decision.

EPA's Role in the EIS Process

In addition, EPA published a notice on July 13, 2018, in the **Federal Register** announcing the EIS for the April 2018 *Habitat Conservation Plan for Managed Groundwater Withdrawals from the Barton Springs Segment of the Edwards Aquifer,* as required under the Clean Air Act, section 309. The EPA's publication date of the notice of availability is the official beginning of the public review period. The EPA is charged with reviewing all Federal agencies' EISs and commenting on the adequacy and acceptability of the environmental impacts of proposed actions in EISs.

The EPA also serves as the repository (EIS database) for EISs, which Federal agencies prepare. All EISs must be filed with EPA, which publishes a notice of availability on Fridays in the **Federal Register**. For more information, see *https://www.epa.gov/nepa.* You may search for EPA comments on EISs, along with EISs themselves, at *https://cdxnodengn.epa.gov/cdx-enepa-public/action/eis/search.*

Authority: We provide this notice under section 10(c) of the ESA (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.22 and 17.32) and NEPA (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1506.6).

Amy L. Lueders

Regional Director, Southwest Region, Albuquerque, New Mexico.

BILLING CODE 4333–15–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–739 (Fourth Review)]

Clad Steel Plate From Japan; Scheduling of a Full Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the scheduling of a full review pursuant to the Tariff Act of 1930 (''the Act'') to determine whether revocation of the antidumping duty order on clad steel plate from Japan would be likely to lead to continuation or recurrence of material injury within a reasonably foreseeable time. The Commission has determined to exercise its authority to extend the review period by up to 90 days.

DATES: July 10, 2018.

FOR FURTHER INFORMATION CONTACT: Andrew Dushkes ((202) 205–3229), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this review may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—On Monday April 9, 2018, the Commission determined that circumstances related to the subject five-year review were such that a full review should proceed (83 FR 17446, April 19, 2018); accordingly, a full review is being scheduled pursuant to section 751(c)(5) of the Tariff Act of 1930 (19 U.S.C. 1675(c)(5)). A record of the Commissioners' votes, the Commission's statement on adequacy, and any individual Commissioner's statements are available from the Office of the Secretary and at the Commission's website.

Participation in the review and public service list.—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in this review as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's rules, by 45 days after publication of this notice. A party that filed a notice of appearance following publication of the Commission's notice of institution of the review need not file an additional notice of appearance. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the review.

For further information concerning the conduct of this review and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this review available to authorized applicants under the APO issued in the review, provided that the application is made by 45 days after publication of this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the review. A party granted access to BPI following publication of the Commission's notice of institution of the review need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff report.—The prehearing staff report in the review will be placed in the nonpublic record on October 3, 2018, and a public version will be issued thereafter, pursuant to section 207.64 of the Commission's rules.

Hearing.—The Commission will hold a hearing in connection with the review beginning at 9:30 a.m. on Thursday, October 18, 2018, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before October 12, 2018. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should participate in a prehearing conference to be held on October 16, 2018, at the U.S. International Trade Commission Building, if deemed necessary. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), 207.24, and 207.66 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

Written submissions.—Each party to the review may submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of section 207.65 of the Commission's rules; the deadline for filing is October 10, 2018. Parties may also file written testimony in connection with their presentation at the hearing, as provided in section 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of section 207.67 of the Commission's rules. The deadline for filing posthearing briefs is October 25, 2018. In addition, any person who has not entered an appearance as a party to the review may submit a written statement of information pertinent to the subject of the review on or before October 25, 2018. On November 9, 2018, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before November 13, 2018, but such final comments must not contain new factual information and must otherwise comply with section 207.68 of the Commission's rules. All written submissions must conform with the provisions of section 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of sections 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's Handbook on E-Filing, available on the Commission's website at *https://edis.usitc.gov,* elaborates upon the Commission's rules with respect to electronic filing.

Additional written submissions to the Commission, including requests pursuant to section 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the review must be served on all other parties to the review (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

The Commission has determined that this review is extraordinarily complicated and therefore has determined to exercise its authority to extend the review period by up to 90 days pursuant to 19 U.S.C.1675(c)(5)(B).

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.62 of the Commission's rules.

By order of the Commission.

Issued: July 12, 2018.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2018–15221 Filed 7–16–18; 8:45 am]

BILLING CODE 7020–02–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

192nd Meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans; Notice of Meeting

Pursuant to the authority contained in Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA), 29 U.S.C. 1142, the 192nd meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans (also known as the ERISA Advisory Council) will be held on August 14–16, 2018.

The three-day meeting will take place at the U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210, in C5521 Room 4. The meeting will run from 1:00 p.m. to approximately 5:30 p.m. on August 14 and from 9:00 a.m. to approximately 5:30 p.m. on August 15, with a one hour break for lunch, and from 9:00 a.m. to 11:00 a.m. on August 16. The purpose of the open meeting is for Advisory Council members to hear testimony from invited witnesses and to receive an update from the Employee Benefits Security Administration (EBSA). The EBSA update is scheduled for the morning of August 16, subject to change.

The Advisory Council will study the following topics: (1) Evaluating the Department's Regulations and Guidance on ERISA Bonding Requirements and Exploring Reform Considerations (on August 14); and, (2) Lifetime Income Products as a Qualified Default Investment Option (QDIA)—Focus on Decumulation and Rollovers (on August 15). It will continue with discussions of its topics on August 16. Descriptions of these topics are available on the Advisory Council page of the EBSA website, at *https://www.dol.gov/*

agencies/ebsa/about-ebsa/about-us/erisa-advisory-council.

Organizations or members of the public wishing to submit a written statement may do so by submitting 40 copies on or before August 7, 2018, to Larry Good, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Suite N–5623, 200 Constitution Avenue NW, Washington, DC 20210. Statements also may be submitted as email attachments in word processing or pdf format transmitted to *good.larry@dol.gov.* It is requested that statements not be included in the body of the email. Statements deemed relevant by the Advisory Council and received on or before August 7 will be included in the record of the meeting and made available through the EBSA Public Disclosure Room, along with witness statements. Do not include any personally identifiable information (such as name, address, or other contact information) or confidential business information that you do not want publicly disclosed. Written statements submitted by invited witnesses will be posted on the Advisory Council page of the EBSA website, without change, and can be retrieved by most internet search engines.

Individuals or representatives of organizations wishing to address the Advisory Council should forward their requests to the Executive Secretary or telephone (202) 693–8668. Oral presentations will be limited to 10 minutes, time permitting, but an extended statement may be submitted for the record. Individuals with disabilities who need special accommodations should contact the Executive Secretary by August 7.

Signed at Washington, DC, this 9th day of July 2018.

Preston Rutledge,

Assistant Secretary, Employee Benefits Security Administration.

[FR Doc. 2018–15207 Filed 7–16–18; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0088]

Proposed Extension of Information Collection; Ventilation Plans, Tests, and Examinations in Underground Coal Mines

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Ventilation Plans, Tests, and Examinations in Underground Coal Mines.

DATES: All comments must be received on or before September 17, 2018.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments for docket number MSHA–2018–0025.
- *Regular Mail:* Send comments to USDOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.
- *Hand Delivery:* USDOL-Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Under Section 101(a) of the Federal Mine Safety and Health Act of 1977 (Mine Act), the Secretary of Labor (Secretary) may by rule in accordance with procedures set forth in this section and in accordance with section 553 of Title 5, United States Code (without regard to any reference in such section to sections 556 and 557 of such title), develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines. In addition, section 303 requires that all underground coal mines be ventilated by mechanical ventilation equipment installed and operated in a manner approved by an authorized representative of the Secretary and such equipment be examined daily and a record be kept of such examination.

Underground coal mines usually present harsh and hostile working environments. The ventilation system is the most vital life support system in underground mining and a properly operating ventilation system is essential for maintaining a safe and healthful working environment. Lack of adequate ventilation in underground mines has resulted in fatalities from asphyxiation and explosions.

An underground mine is a maze of tunnels that must be adequately ventilated with fresh air to provide a safe environment for miners. Methane is liberated from the strata, and noxious gases and dusts from blasting and other mining activities may be present. The explosive and noxious gases and dusts must be diluted, rendered harmless, and carried to the surface by the ventilating currents. Sufficient air must be provided to maintain the level of respirable dust at or below specific exposure limits and air quality must be maintained in accordance with MSHA standards. Mechanical ventilation equipment of sufficient capacity must operate at all times while miners are in the mine. Ground conditions are subject to frequent changes, thus sufficient tests and examinations are necessary to ensure the integrity of the ventilation system and to detect any changes that may require adjustments in the system. Records of tests and examinations are necessary to ensure that the ventilation system is being maintained and that changes which could adversely affect the integrity of the system or the safety of the miners are not occurring. These examination, reporting and recordkeeping requirements of sections 75.310, 75.312, 75.342, 75.351, 75.360 through 75.364, 75.370, 75.371, and 75.382 also incorporate examinations of other critical aspects of the underground work environment such as roof conditions and electrical equipment which have historically caused numerous fatalities when not properly maintained and operated.

Section 75.362, On-shift Examinations, was revised at subsection 75.362 (a)(2) and (g)(2)-(4) by MSHA's rule titled ''Lowering Miners' Exposure to Respirable Coal Mine Dust, Including

Continuous Personal Dust Monitors, '' published May 1, 2014. This rule also revised subsection 75.371(f) and (j).

Subsection 75.362(a)(2) requires that a person designated by the operator conduct an examination and record the results and the corrective actions taken to assure compliance with the respirable dust control parameters specified in the approved mine ventilation plan.

Under subsection 75.362(g)(2)(i), the certified person directing the on-shift examination must certify by initials, date, and time on a board maintained at the section load out or similar location showing that the examination was made prior to resuming production. No increased burden is estimated for section 75.362(g)(2)(i) in this Information Collection Request (ICR) because MSHA does not expect the burden to be different from the burden in existing section 75.362(g)(2)).

Under section 75.362(g)(2)(ii), the certified person directing the on-shift examination must verify, by initials, date and time, the record of the results of the examination required under section 75.362(a)(2) to assure compliance with the respirable dust control parameters specified in the mine ventilation plan. Further, section 75.362(g)(3) requires a mine foreman or equivalent mine official to countersign each examination record required under section 75.362(a)(2) after it is verified by the certified person under section 75.362(g)(2)(ii), and no later than the end of the mine foreman's or equivalent mine official's next regularly scheduled working shift. Section 75.362(g)(2)(ii) and (g)(3) are additional burdens that are accounted for in this ICR and 75.362(g)(2)(ii)(4) requires the records be retained at a surface location at the mine for at least 1 year and shall be made available for inspection by authorized representatives of the Secretary and the representative of miners.

Paragraph (a)(2) in section 75.370 (Mine ventilation plan; submission and approval) contains the burden for underground coal mine operators to submit mine ventilation plan revisions for District Manager approval. Each mine ventilation plan must include information that is specified by section 75.371 (Mine ventilation plan; contents).

Section 75.371(f) adds the following information that a mine operator must include in the mine ventilation plan: the minimum quantity of air that will be delivered to the working section for each mechanized mining unit (MMU), and the identification by make and model, of each different dust suppression system used on equipment on each working section, including: (1) The number, types, location, orientation, operating pressure, and flow rate of operating water sprays; (2) the maximum distance that ventilation control devices will be installed from each working face when mining or installing roof bolts in entries and crosscuts; (3) procedures for maintaining the roof bolter dust collection system in approved condition; and (4) recommended best work practices for equipment operators to minimize dust exposure.

Section 75.371(j) adds a requirement that for machine mounted dust collectors, the ventilation plan must include the type and size of dust collector screens used and a description of the procedures to be followed to properly maintain dust collectors used on the equipment.

Section 75.370(a)(2) requires all underground coal mine operators to submit revisions for mine ventilation plans to MSHA. The burden to submit the additional information required by section 75.371(f) and (j) as proposed revisions to the plan is accounted for in this package under section 75.370(a)(2). In addition, section 75.370(a)(3)(i) requires underground coal mine operators to notify the miners' representative at least 5 days prior to submission of mine ventilation plan revisions and, if requested, provide a copy of the revisions to the miners' representative at the time of notification. Section 75.370(a)(3)(iii) and (f)(3) require the operator to post a copy of the plan revisions, and section 75.370(f)(1) requires that the operator provide a copy of the revisions to the miners' representative, if requested. MSHA assumes that a copy of the revisions will be requested. The burdens for notification, providing requested copies, and posting associated with mine ventilation plan revisions resulting from section 75.371(f) and (j) are accounted for in this package under section 75.370(a)(3)(i), (f)(1), (a)(3)(iii), and (f)(3) respectively.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Ventilation Plans, Tests, and Examinations in Underground Coal Mines. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

The information collection request will be available on *http://www.regulations.gov.* MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on *www.regulations.gov* and *www.reginfo.gov.*

The public may also examine publicly available documents at USDOL-Mine Safety and Health Administration, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Ventilation Plans, Tests, and Examinations in Underground Coal Mines. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0088.

Affected Public: Business or other for-profit.

Number of Respondents: 255.

Frequency: On occasion.

Number of Responses: 1,164,908.

Annual Burden Hours: 142,550 hours.

Annual Respondent or Recordkeeper Cost: $91,870.

Comments submitted in response to this notice will be summarized and included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Sheila McConnell,

Certifying Officer.

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0121]

Proposed Extension of Information Collection; Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines.

DATES: All comments must be received on or before September 17, 2018.

ADDRESSES: Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

- *Federal E-Rulemaking Portal: http://www.regulations.gov.* Follow the on-line instructions for submitting comments for docket number MSHA–2018–0027.
- *Regular Mail:* Send comments to USDOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.
- *Hand Delivery:* USDOL-Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

FOR FURTHER INFORMATION CONTACT: Sheila McConnell, Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal and metal and nonmetal mines.

Accidents involving falls of roof, face, and rib in underground mines or falls of highwall in surface mines, historically, have been among the leading causes of injuries and deaths. Prevention or control of falls of roof, face, and rib is uniquely difficult because of the variety of conditions encountered in mines that can affect the stability of various types of strata and the changing nature of the forces affecting ground stability at any given operation and time. Roof and rock bolts and accessories are an integral part of ground control systems and are used to prevent the fall of roof, face, and rib. Advancements in technology of roof and rock bolts and accessories have aided in reducing the hazards associated with falls of roof, face, and rib.

The American Society for Testing and Materials (ASTM) publication ''Standard Specification for Roof and Rock Bolts and Accessories'' is a consensus standard used throughout the United States. It contains specifications for the chemical, mechanical, and dimensional requirements for roof and rock bolts and accessories used for ground support systems. The ASTM standard for roof and rock bolts and accessories is updated periodically to reflect advances in technology.

Title 30 Code of Federal Regulations, Parts 56 and 57 Subpart B-Ground Control, section 56.3203 and section 57.3203, and Part 75 Subpart C-Roof Support, section 75.204, address the quality of roof and rock bolts and accessories and their installation. MSHA's objective in these regulations is to ensure the quality and effectiveness of roof and rock bolts and accessories and, as technology evolves, to allow for the use of new materials which are proven to be reliable and effective in controlling the mine roof, face, and rib.

Title 30 CFR 56.3203(a), 57.3203(a), and 75.204(a) require: (1) That mine operators obtain a certification from the manufacturer that roof and rock bolts and accessories are manufactured and tested in accordance with the applicable ASTM specifications, and (2) that the manufacturer's certification is made available to an authorized representative of the Secretary.

Title 30 CFR 56.3203(h) and 57.3203(h) require that if the mine operator uses other tensioned and nontensioned fixtures and accessories for ground control that are not addressed by the applicable ASTM standard listed in sections 56.3203(a) and 57.3203(a), test methods must be established by the mine operator and used to verify their ground control effectiveness. Title 30 CFR 56.3203(i) and 57.3203(i) require that the mine operator certify that the tests developed under sections 56.3203(h) and 57.3203(h) were conducted and such certifications be made available to an authorized representative of the Secretary.

Title 30 CFR 75.204(f)(6) requires that the mine operator or a person designated by the operator certify by signature and date the measurements required by paragraph (f)(5) of this section have been made. Paragraph (f)(5) requires that in working places from which coal is produced during any portion of a 24-hour period, the actual torque or tension on at least one out of every ten previously installed mechanically anchored tensioned roof bolts is measured from the outby corner of the last open crosscut to the face in each advancing section. This certification shall be maintained for at least one year and shall be made available to an authorized representative of the Secretary and representatives of the miners.

MSHA has found that the certification requirements have been successful in maintaining compliance with requirements for roof and rock bolts and accessories.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;

- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

The information collection request will be available on *http://www.regulations.gov.* MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on *www.regulations.gov* and *www.reginfo.gov.*

The public may also examine publicly available documents at USDOL-Mine Safety and Health Administration, 201 12th South, Suite 4E401, Arlington, VA 22202–5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

III. Current Actions

This request for collection of information contains provisions for Safety Standards for Roof Bolts in Metal and Nonmetal Mines and Underground Coal Mines. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

Type of Review: Extension, without change, of a currently approved collection.

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report of Rescissions Proposals Pursuant to the Congressional Budget and Impoundment Control Act of 1974

AGENCY: Executive Office of the President, Office of Management and Budget.

ACTION: Notice of monthly cumulative report pursuant to the Congressional Budget and Impoundment Control Act of 1974.

SUMMARY: Pursuant to the Congressional Budget and Impoundment Control Act of 1974, OMB is issuing a monthly cumulative report (for July, 2018) from the Director detailing the status of rescission proposals that were previously transmitted to the Congress on May 8, 2018, and amended by the supplementary message transmitted on June 5, 2018.

DATES: *Release Date:* July 10, 2018.

ADDRESSES: The July, 2018 cumulative report is available on-line on the OMB website at: *https://www.whitehouse.gov/omb/budget-rescissions-deferrals/.*

FOR FURTHER INFORMATION CONTACT: Jessica Andreasen, 6001 New Executive Office Building, Washington, DC 20503, Email address: *jandreasen@omb.eop.gov,* telephone number: (202) 395–3645. Because of delays in the receipt of regular mail related to security screening, respondents are encouraged to use electronic communications.

John Mulvaney,

Director.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Arts

Arts Advisory Panel Meetings

AGENCY: National Endowment for the Arts, National Foundation on the Arts and the Humanities.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the Federal Advisory Committee Act, as amended, notice is hereby given that 5 meetings of the Arts Advisory Panel to the National Council on the Arts will be held by teleconference.

DATES: See the **SUPPLEMENTARY INFORMATION** section for individual meeting times and dates. All meetings are Eastern time and ending times are approximate:

ADDRESSES: National Endowment for the Arts, Constitution Center, 400 7th St. SW, Washington, DC 20506.

FOR FURTHER INFORMATION CONTACT: Further information with reference to these meetings can be obtained from Ms. Sherry Hale, Office of Guidelines & Panel Operations, National Endowment for the Arts, Washington, DC 20506; *hales@arts.gov,* or call 202–682–5696.

SUPPLEMENTARY INFORMATION: The closed portions of meetings are for the purpose of Panel review, discussion, evaluation, and recommendations on financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency. In accordance with the determination of the Chairman of July 5, 2016, these sessions will be closed to the public pursuant to subsection (c)(6) of section 552b of title 5, United States Code.

The upcoming meetings are:

Literature (review of applications): This meeting will be closed.

Date and time: August 1, 2018; 1:00 p.m. to 3:00 p.m.

Literature (review of applications): This meeting will be closed.

Date and time: August 2, 2018; 1:00 p.m. to 3:00 p.m.

Research Labs (review of applications): This meeting will be closed.

Date and time: August 16, 2018; 11:00 a.m. to 1:00 p.m.

Research Labs (review of applications): This meeting will be closed.

Date and time: August 17, 2018; 11:00 a.m. to 1:00 p.m.

Research Labs (review of applications): This meeting will be closed.

Date and time: August 17, 2018; 2:30 p.m. to 4:30 p.m.

Dated: July 11, 2018.

Sherry Hale,

Staff Assistant, National Endowment for the Arts.

BILLING CODE 7537–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

Meeting of Humanities Panel

AGENCY: National Endowment for the Humanities.

ACTION: Notice of meeting.

SUMMARY: The National Endowment for the Humanities will hold twenty-one meetings of the Humanities Panel, a federal advisory committee, during August 2018. The purpose of the meetings is for panel review, discussion, evaluation, and recommendation of applications for financial assistance under the National Foundation on the Arts and Humanities Act of 1965.

DATES: See **SUPPLEMENTARY INFORMATION** for meeting dates. The meetings will open at 8:30 a.m. and will adjourn by 5:00 p.m. on the dates specified below.

ADDRESSES: The meetings will be held at Constitution Center at 400 7th Street SW, Washington, DC 20506, unless otherwise indicated.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Committee Management Officer, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *evoyatzis@neh.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given of the following meeting:

1. *Date:* August 1, 2018.

This meeting will discuss applications on the topics of American History and Studies, and Media Studies, for the NEH-Mellon Fellowships, submitted to the Division of Research Programs.

2. *Date:* August 9, 2018.

This meeting will discuss applications on the topics of European History and Archaeology: Ancient to Modern, for the Fellowships grant program, submitted to the Division of Research Programs.

3. *Date:* August 9, 2018.

This meeting will discuss applications on the topic of Literature, for the Fellowships grant program, submitted to the Division of Research Programs.

4. *Date:* August 10, 2018.

This meeting will discuss applications on the topics of Religion and Asian Studies, for the Fellowships grant program, submitted to the Division of Research Programs.

5. *Date:* August 10, 2018.

This meeting will discuss applications on the topic of the Arts, for the Fellowships grant program, submitted to the Division of Research Programs.

6. *Date:* August 13, 2018.

This meeting will discuss applications on the topic of American History, for the Fellowships grant program, submitted to the Division of Research Programs.

7. *Date:* August 13, 2018.

This meeting will discuss applications on the topics of Arts & Languages (Level I projects), for Digital Humanities Advancement Grants, submitted to the Office of Digital Humanities.

8. *Date:* August 14, 2018.

This meeting will discuss applications on the topic of American Studies, for the Fellowships grant program, submitted to the Division of Research Programs.

9. *Date:* August 14, 2018.

This meeting will discuss applications on the topics of Political Science, Social Sciences, History of Science, and Philosophy, for the Fellowships grant program, submitted to the Division of Research Programs.

10. *Date:* August 15, 2018.

This meeting will discuss applications on the topics of Area Studies and Anthropology, for the Fellowships grant program, submitted to the Division of Research Programs.

11. *Date:* August 15, 2018.

This meeting will discuss applications on the topic of Literature, for the Fellowships grant program, submitted to the Division of Research Programs.

12. *Date:* August 15, 2018.

This meeting will discuss applications on the topic of History (Level I projects), for Digital Humanities Advancement Grants, submitted to the Office of Digital Humanities.

13. *Date:* August 15, 2018.

This meeting will discuss applications for the Preservation Education and Training grant program, submitted to the Division of Preservation and Access.

14. *Date:* August 16, 2018.

This meeting will discuss applications for the Preservation Education and Training grant program, submitted to the Division of Preservation and Access.

15. *Date:* August 16, 2018.

This meeting will discuss applications on the topics of Textual Analysis and Linguistics, for Digital Humanities Advancement Grants, submitted to the Office of Digital Humanities.

16. *Date:* August 20, 2018.

This meeting will discuss applications on the topic of Media Studies, for Digital Humanities Advancement Grants, submitted to the Office of Digital Humanities.

17. *Date:* August 21, 2018.

This meeting will discuss applications on the topics of Digital Collections and Archives, for Digital Humanities Advancement Grants, submitted to the Office of Digital Humanities.

18. *Date:* August 21, 2018.

This meeting will discuss applications on the topic of Cultural Heritage, for the Research and Development grant program, submitted to the Division of Preservation and Access.

19. *Date:* August 22, 2018.

This meeting will discuss applications on the topics of Geospatial and Visualization, for Digital Humanities Advancement Grants, submitted to the Office of Digital Humanities.

20. *Date:* August 22, 2018.

This meeting will discuss applications on the topics of Conservation and Material Studies, for the Research and Development grant program, submitted to the Division of Preservation and Access.

21. *Date:* August 23, 2018.

This meeting will discuss applications on the topic of Digital Preservation, for the Research and Development grant program, submitted to the Division of Preservation and Access.

Because these meetings will include review of personal and/or proprietary financial and commercial information given in confidence to the agency by grant applicants, the meetings will be closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S.C., as amended. I have made this determination pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings dated April 15, 2016.

Dated: July 11, 2018.

Elizabeth Voyatzis,

Committee Management Officer, National Endowment for the Humanities.

NATIONAL TRANSPORTATION SAFETY BOARD

Sunshine Act Meeting

TIME AND DATE: 9:30 a.m., Tuesday, August 7, 2018.

PLACE: NTSB Conference Center, 429 L'Enfant Plaza SW, Washington, DC 20594.

STATUS: The one item is open to the public.

MATTERS TO BE CONSIDERED:

57568 Highway Accident Report—*Collision Between Freight Train and Charter Motorcoach at High-Profile Highway–Railroad Grade Crossing, Biloxi, Mississippi, March 7, 2017* (HWY17MH010)

NEWS MEDIA CONTACT: Telephone: (202) 314–6100.

The press and public may enter the NTSB Conference Center one hour prior to the meeting for set up and seating.

Individuals requesting specific accommodations should contact Rochelle McCallister at (202) 314–6305 or by email at *Rochelle.McCallister@ntsb.gov* by Wednesday, August 1, 2018.

The public may view the meeting via a live or archived webcast by accessing a link under ''News & Events'' on the NTSB home page at *www.ntsb.gov.*

Schedule updates, including weather-related cancellations, are also available at *www.ntsb.gov.*

FOR FURTHER INFORMATION CONTACT: Candi Bing at (202) 314–6403 or by email at *bingc@ntsb.gov.*

FOR MEDIA INFORMATION CONTACT: Peter Knudson at (202) 314–6100 or by email at *peter.knudson@ntsb.gov.*

Dated: July 13, 2018.

LaSean McCray,

Assistant Federal Register Liaison Officer.

NUCLEAR REGULATORY COMMISSION

[NRC–2018–0001]

Sunshine Act Meeting Notice

DATE: Weeks of July 16, 23, 30, August 6, 13, 20, 2018.

PLACE: Commissioners' Conference Room, 11555 Rockville Pike, Rockville, Maryland.

STATUS: Public and Closed.

Week of July 16, 2018

There are no meetings scheduled for the week of July 16, 2018.

Week of July 23, 2018—Tentative

There are no meetings scheduled for the week of July 23, 2018.

Week of July 30, 2018—Tentative

There are no meetings scheduled for the week of July 30, 2018.

Week of August 6, 2018—Tentative

There are no meetings scheduled for the week of August 6, 2018.

Week of August 13, 2018—Tentative

There are no meetings scheduled for the week of August 13, 2018.

Week of August 20, 2018—Tentative

There are no meetings scheduled for the week of August 20, 2018.

* * * * *

The schedule for Commission meetings is subject to change on short notice. For more information or to verify the status of meetings, contact Denise McGovern at 301–415–0681 or via email at *Denise.McGovern@nrc.gov.*

* * * * *

The NRC Commission Meeting Schedule can be found on the internet at: *http://www.nrc.gov/public-involve/public-meetings/schedule.html.*

* * * * *

The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings, or need this meeting notice or the transcript or other information from the public meetings in another format (*e.g.,* Braille, large print), please notify Kimberly Meyer-Chambers, NRC Disability Program Manager, at 301–287–0739, by videophone at 240–428–3217, or by email at *Kimberly.Meyer-Chambers@nrc.gov.* Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

* * * * *

Members of the public may request to receive this information electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555 (301–415–1969), or you may email *Patricia.Jimenez@nrc.gov* or *Wendy.Moore@nrc.gov.*

Dated: July 12, 2018.

Denise L. McGovern,

Policy Coordinator, Office of the Secretary.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2018–0104]

State of Wyoming: NRC Staff Assessment of a Proposed Agreement Between the Nuclear Regulatory Commission and the State of Wyoming

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed state agreement; request for comment.

SUMMARY: By letter dated November 14, 2017, Governor Matthew H. Mead of the State of Wyoming requested that the U.S. Nuclear Regulatory Commission (NRC or Commission) enter into an Agreement with the State of Wyoming as authorized by Section 274b. of the Atomic Energy Act of 1954, as amended (AEA).

Under the proposed Agreement, the Commission would discontinue, and the State of Wyoming would assume, regulatory authority over the management and disposal of byproduct materials as defined in Section 11e.(2) of the AEA and a subcategory of source material associated with uranium or thorium milling within the State. Pursuit to Commission direction, the proposed Agreement would state that the NRC will retain regulatory authority over the American Nuclear Corporation (ANC) license.

As required by Section 274e. of the AEA, the NRC is publishing the proposed Agreement for public comment. The NRC is also publishing the summary of a draft assessment by the NRC staff of the State of Wyoming's regulatory program. Comments are requested on the proposed Agreement, especially its effect on public health and safety. Comments are also requested on the draft staff assessment, the adequacy of the State of Wyoming's program, and the State's program staff, as discussed in this notice.

The proposed Agreement would exempt persons who possess or use byproduct materials as defined in Section 11e.(2) of the AEA and a subcategory of source material involved in the extraction or concentration of uranium or thorium in source material or ores at uranium or thorium milling facilities in the State of Wyoming from portions of the Commission's regulatory authority. Radioactive materials not covered by the proposed Agreement will continue to be subject to the Commission's regulatory authority. Section 274e. of the AEA requires that the NRC publish these exemptions. Notice is hereby given that the pertinent exemptions have been previously published in the **Federal Register** and are codified in the NRC's regulations.

The NRC is giving notice once each week for four consecutive weeks of the proposed Agreement. This is the second notice that has been published.

DATES: Submit comments by July 26, 2018. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

ADDRESSES: You may submit comments by the following method:

- *Federal Rulemaking website:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2018–0104. Address questions about NRC dockets to Jennifer Borges; telephone: 301–287–9127; email: *Jennifer.Borges@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Stephen Poy, Office of Nuclear Material Safety and Safeguards, telephone: 301–415–7135, email: *Stephen.Poy@nrc.gov;* or Paul Michalak, telephone: 301–415–5804, email: *Paul.Michalak@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2018–0104 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2018–0104.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to *pdr.resource@nrc.gov.* The draft application for a Section 274 Atomic Energy Act Agreement from the State of Wyoming, the final Wyoming Agreement State application, and the Draft Assessment of the Proposed Wyoming Program for the Regulation of Agreement Materials documents are available in ADAMS under Accession Nos. ML16300A294, ML17319A921, and ML18094B074.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2018–0104 in your comment submission. The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Additional Information on Agreements Entered Under Section 274 of the AEA

Since Section 274 of the AEA was added in 1959, the Commission has entered into Agreements with 37 States (Agreement States). The 37 Agreement States currently regulate approximately 16,500 Agreement material licenses, while the NRC regulates approximately 2,800 licenses. Under the proposed Agreement, 14 NRC uranium mill licenses will transfer to the State of Wyoming. The NRC periodically reviews the performance of the Agreement States to assure compliance with the provisions of Section 274.

Section 274e. of the AEA requires that the terms of the proposed Agreement be published in the **Federal Register** for public comment once each week for four consecutive weeks. This notice is being published in fulfillment of that requirement.

III. Proposed Agreement With the State of Wyoming

Background

(a) Section 274b. of the AEA provides the mechanism for a State to assume regulatory authority from the NRC over certain radioactive materials and activities that involve use of these materials. The radioactive materials, sometimes referred to as ''Agreement materials,'' are byproduct materials as defined in Sections 11e.(1), 11e.(2), 11e.(3), and 11e.(4) of the AEA; source material as defined in Section 11z. of the AEA; and special nuclear material as defined in Section 11aa. of the AEA, restricted to quantities not sufficient to form a critical mass.

The radioactive materials and activities (which together are usually referred to as the ''categories of materials'') that the State of Wyoming requests authority over are the possession and use of byproduct materials as defined in Section 11e.(2) of the AEA and a subcategory of source material involved in the extraction or concentration of uranium or thorium in source material or ores at uranium or thorium milling facilities (source material associated with milling activities).

(b) The proposed Agreement contains articles that

(i) Specify the materials and activities over which authority is transferred;

(ii) Specify the materials and activities over which the Commission will retain regulatory authority;

(iii) Continue the authority of the Commission to safeguard special nuclear material, and restricted data and protect common defense and security;

(iv) Commit the State of Wyoming and the NRC to exchange information as necessary to maintain coordinated and compatible programs;

(v) Provide for the reciprocal recognition of licenses;

(vi) Provide for the suspension or termination of the Agreement; and

(vii) Specify the effective date of the proposed Agreement.

The Commission reserves the option to modify the terms of the proposed Agreement in response to comments, to correct errors, and to make editorial changes. The final text of the proposed Agreement, with the effective date, will be published after the Agreement is approved by the Commission and signed by the NRC Chairman and the Governor of Wyoming.

(c) The regulatory program is authorized by law under the State of Wyoming Statute Section 35–11–2001, which provides the Governor with the authority to enter into an Agreement with the Commission. The State of Wyoming law contains provisions for the orderly transfer of regulatory authority over affected licensees from the NRC to the State. In a letter dated November 14, 2017, Governor Mead certified that the State of Wyoming has a program for the control of radiation hazards that is adequate to protect public health and safety within the State of Wyoming for the materials and activities specified in the proposed Agreement, and that the State desires to assume regulatory responsibility for these materials and activities. After the effective date of the Agreement, licenses issued by NRC would continue in effect as State of Wyoming licenses until the licenses expire or are replaced by State-issued licenses.

(d) The NRC draft staff assessment finds that the Wyoming Department of Environmental Quality, Land Quality Division, Uranium Recovery Program, is adequate to protect public health and safety and is compatible with the NRC program for the regulation of Agreement materials. Pursuant to Commission direction, the proposed Agreement includes a provision that the State of Wyoming has until the end of the 2019 legislative session to amend Wyoming Statute Section 35–11–2004(c) to be compatible with AEA Section 83b.(1)(A), or the Agreement will terminate without further NRC action. The proposed Agreement also explicitly states that, prior to the requisite amendment of Wyoming Statute Section 35–11–2004(c), the NRC will reject any State of Wyoming request to terminate a license that proposes to bifurcate the ownership of byproduct material and its disposal site between the State and the Federal government. Pursuant to Commission direction, the Agreement contains a provision that requires the State of Wyoming to revise Statute Section 35–11–2004(c) during the next legislative session to be compatible with AEA Section 83b.(1)(A). If the Wyoming Statute Section 35–11–2004(c) is not amended by the end of the 2019 legislative session, the Agreement will terminate.

Summary of the Draft NRC Staff Assessment of the State of Wyoming's Program for the Regulation of Agreement Materials

The NRC staff has examined the State of Wyoming's request for an Agreement with respect to the ability of the State's radiation control program to regulate Agreement materials. The examination was based on the Commission's Policy Statement, ''Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof by States Through Agreement,'' (46 FR 7540; January 23, 1981, as amended by Policy Statements published at 46 FR 36969; July 16, 1981, and at 48 FR 33376; July 21, 1983) (Policy Statement), and the Office of Nuclear Material Safety and Safeguards Procedure SA–700, ''Processing an Agreement'' (available at *https://scp.nrc.gov/procedures/sa700.pdf* and *https://scp.nrc.gov/procedures/sa700_hb.pdf*). The Policy Statement has 36 criteria that serve as the basis for the NRC staff's assessment of the State of Wyoming's request for an Agreement. The following section will reference the appropriate criteria numbers from the Policy Statement that apply to each section.

(a) Organization and Personnel. These areas were reviewed under Criteria 1, 2, 20, 24, 33, and 34 in the draft staff assessment. The State of Wyoming's proposed Agreement materials program for the regulation of radioactive materials is the Uranium Recovery Program. The Uranium Recovery Program will be located within the existing Land Quality Division of the Wyoming Department of Environmental Quality.

The educational requirements for the Uranium Recovery Program staff members are specified in the State of Wyoming's personnel position descriptions and meet the NRC criteria with respect to formal education or combined education and experience requirements. All current staff members hold a Bachelor of Science Degree or Master's Degree in one of the following subject areas: environmental science, health physics, nuclear engineering, geology, or ecology. All have training and work experience in radiation protection. Supervisory level staff have at least 5 years of working experience in radiation protection, with most having more than 10 years of experience.

The State of Wyoming performed an analysis of the expected workload under the proposed Agreement. Based on the NRC staff review of the State of Wyoming's analysis, the State has an adequate number of staff to regulate radioactive materials under the terms of the proposed Agreement. The State of Wyoming will employ the equivalent of 7.2 full-time professional and technical staff to support the Uranium Recovery Program.

The State of Wyoming has indicated that the Uranium Recovery Program has an adequate number of trained and qualified staff in place. The State of Wyoming has developed qualification procedures for license reviewers and inspectors that are similar to the NRC's procedures. The Uranium Recovery Program staff is accompanying the NRC staff on inspections of NRC licensees in Wyoming. The Uranium Recovery Program staff is also actively supplementing their experience through direct meetings, discussions, and facility visits with the NRC licensees in the State of Wyoming and through self-study, in-house training, and formal training.

Overall, the NRC staff concluded that the Uranium Recovery Program staff identified by the State of Wyoming to participate in the Agreement materials program has sufficient knowledge and experience in radiation protection, the use of radioactive materials, the standards for the evaluation of applications for licensing, and the techniques of inspecting licensed users of Agreement materials.

(b) Legislation and Regulations. These areas were reviewed under Criteria 1–14, 17, 19, 21, and 23–33 in the draft staff assessment. The Wyoming Statutes Sections 35–11–2001(a) through (c) provide the authority to enter into the Agreement and establish the Wyoming Department of Environmental Quality as the lead agency for the State's Uranium Recovery Program. The Department has the requisite authority to promulgate regulations under Wyoming Statute Section 35–11–2002(b) for protection against radiation. The Wyoming Statutes Sections 35–11–2001 through –2005 also provide the Uranium Recovery Program the authority to issue licenses and orders; conduct inspections; and enforce compliance with regulations, license conditions, and orders. The Wyoming Statute Section 35–11–2003(d) requires licensees to provide access to inspectors.

The Wyoming Statute Section 35–11–2001(e) does not provide the State of Wyoming with authority over independent or commercial laboratories. Under the proposed Agreement, the NRC would retain regulatory authority over laboratory facilities that are not located at facilities licensed under the State of Wyoming's regulatory authority. The State of Wyoming would only regulate laboratory facilities located at uranium or thorium mills. The NRC staff verified that the State of Wyoming adopted the relevant NRC regulations in parts 19, 20, 40, 71, and 150 of title 10 of the *Code of Federal Regulations* (10 CFR), into the Wyoming Uranium Recovery Program Rules Chapters 1 through 9. Therefore, on the proposed effective date of the Agreement, the State of Wyoming will have adopted an adequate and compatible set of radiation protection regulations that apply to byproduct materials as defined in Section 11e.(2) of the AEA and source material associated with milling activities. The NRC staff also verified that the State of Wyoming will not attempt to enforce regulatory matters reserved to the Commission.

(c) Storage and Disposal. These areas were reviewed under Criteria 8, 9a, 11, 29, 30, 31, and 32 in the draft staff assessment. The State of Wyoming has adopted NRC compatible requirements for the handling and storage of radioactive material. The State of Wyoming has adopted an adequate and compatible set of radiation protection regulations that apply to byproduct material as defined in Section 11e.(2) of the AEA and source material associated with milling activities.

As a result of the class of byproduct material it will be regulating (Section 11e.(2) of the AEA), the State of Wyoming is not required to have regulations compatible to 10 CFR part 61 for waste disposal. Rather, the State of Wyoming is required to have regulations that are compatible with 10 CFR part 40 for the disposal of byproduct material as defined in Section 11e.(2) of the AEA and source material associated with milling activities. The NRC staff confirmed that the State of Wyoming has adopted regulations that are compatible with the NRC regulations in 10 CFR part 40 for the disposal of byproduct material and source material associated with milling activities, which are equivalent to the applicable standards contained in 10 CFR part 61.

These regulations address the general requirements for waste disposal and are applicable to all licensees covered under this proposed Agreement.

The NRC staff identified one portion of the Wyoming Statute that is potentially not compatible with NRC requirements. Section 83b.(1)(A) of the AEA ensures that ownership of the byproduct material itself is inseparable from the site on which it is disposed. Consequently, the State of Wyoming has the option of taking title to the material and its disposal site, but the Uranium Mill Tailings Radiation Control Act (UMTRCA) does not permit a State to bifurcate ownership of the disposed byproduct material and the property rights necessary to ensure its safe disposal. The Wyoming Statute Section 35–11–2004(c), enacted in anticipation of the State of Wyoming's assumption of the NRC's regulatory authority for uranium and thorium milling, could permit the bifurcation of the disposed byproduct material and its disposal site by the State. As discussed in Criterion 30c. of the draft staff assessment, this bifurcation of the land and the disposed byproduct material could conflict with the AEA (as amended by UMTRCA), and Article II.B.2.b. in the proposed Agreement.

Based on Commission direction, the NRC staff concluded that Criterion 30c. is satisfied in the following manner: the Commission could complete the process for the final application package for the Agreement, including publishing the proposed Agreement for comment, by noting that the Commission's finding of compatibility is contingent on the State of Wyoming revising this provision, during the next legislative session, to be compatible with AEA Section 83b.(1)(A). Thus, an Agreement could be executed, but it would include a provision that the State of Wyoming has until the end of the 2019 legislative session to amend Wyoming Statute Section 35–11–2004(c) to be compatible with AEA Section 83b.(1)(A), or the Agreement will terminate without further NRC action. The Agreement would also explicitly state that the NRC will reject any State of Wyoming request to terminate a license that proposes to bifurcate the ownership of byproduct material and its disposal site between the State and the federal government. The NRC staff determined that there is little practical risk that the State of Wyoming's current statutory provisions would result in the bifurcation of the 11e.(2) byproduct material from the land since the NRC is required to review and approve any State-proposed termination of a uranium mill license.

(d) Transportation of Radioactive Material. This area was reviewed under Criteria 10 and 35 in the draft staff assessment. The State of Wyoming has adopted compatible regulations to the NRC regulations in 10 CFR part 71. Part 71 contains the requirements licensees must follow when preparing packages containing radioactive material for transport.

Part 71 also contains requirements related to the licensing of packaging for use in transporting radioactive materials.

(e) Recordkeeping and Incident Reporting. These areas were reviewed under Criteria 1, 11, and 35 in the draft staff assessment. The State of Wyoming has adopted compatible regulations to the sections of the NRC regulations that specify requirements for licensees to keep records and to report incidents or accidents involving the State's regulated Agreement materials.

(f) Evaluation of License Applications. This area was reviewed under Criteria 1, 7, 8, 9a, 13, 14, 20, 23, 25, and 29–35 in the draft staff assessment. The State of Wyoming has adopted compatible regulations to the NRC regulations that specify the requirements a person must meet to get a license to possess or use radioactive materials. The State of Wyoming has also developed a licensing procedure manual, along with accompanying regulatory guides, which are adapted from similar NRC documents and contain guidance for the program staff when evaluating license applications.

(g) Inspections and Enforcement. These areas were reviewed under Criteria 1, 16, 18, 19, 23, 35, and 36 in the draft staff assessment. The State of Wyoming has adopted a schedule providing for the inspection of licensees as frequently as, or more frequently than, the inspection schedule used by the NRC. The State of Wyoming's Uranium Recovery Program has adopted procedures for the conduct of inspections, reporting of inspection findings, and reporting inspection results to the licensees. Additionally, the State of Wyoming has also adopted procedures for the enforcement of regulatory requirements.

(h) Regulatory Administration. This area was reviewed under Criterion 23 in the draft staff assessment. The State of Wyoming is bound by requirements specified in its State law for rulemaking, issuing licenses, and taking enforcement actions. The State of Wyoming has also adopted administrative procedures to assure fair and impartial treatment of license applicants. The State of Wyoming law prescribes standards of ethical conduct for State employees.

(i) Cooperation with Other Agencies. This area was reviewed under Criteria 25, 26, and 27 in the draft staff assessment. The State of Wyoming law provides for the recognition of existing NRC and Agreement State licenses and the State has a process in place for the transition of active NRC licenses. Upon the effective date of the Agreement, all active uranium recovery NRC licenses issued to facilities in the State of Wyoming, with the exception of the ANC license, will be recognized as Wyoming Department of Environmental Quality licenses.

The State of Wyoming also provides for ''timely renewal.'' This provision affords the continuance of licenses for which an application for renewal has been filed more than 30 days prior to the date of expiration of the license. NRC licenses transferred while in timely renewal are included under the continuation provision.

The State of Wyoming regulations, in Chapter 4, Section 6(d), provide exemptions from the State's requirements for the NRC and the U.S. Department of Energy contractors or subcontractors; the exemptions must be authorized by law and determined not to endanger life or property and to otherwise be in the public interest. The proposed Agreement commits the State of Wyoming to use its best efforts to cooperate with the NRC and the other Agreement States in the formulation of standards and regulatory programs for the protection against hazards of radiation, and to assure that the State's program will continue to be compatible with the Commission's program for the regulation of Agreement materials. The proposed Agreement specifies the desirability of reciprocal recognition of licenses, and commits the Commission and the State of Wyoming to use their best efforts to accord such reciprocity. The State of Wyoming would be able to recognize the licenses of other jurisdictions by order or specific license.

There are six UMTRCA Title II sites in the State of Wyoming (ADAMS Accession No. ML16300A294) undergoing decommissioning. These sites are: (1) Anadarko Bear Creek, Powder River Basin; (2) Pathfinder, Lucky Mc, Gas Hills; (3) Umetco Minerals Corporation, Gas Hills; (4) Western Nuclear Inc., Split Rock, Jeffrey City; (5) Exxon Mobile, Highlands, Converse County; and (6) ANC, Gas Hills.

The State of Wyoming indicated it was opposed to assuming regulatory authority over the ANC site because the licensee is insolvent. To address the State of Wyoming's proposed exclusion of the ANC site from the proposed Agreement, the NRC staff provided SECY–17–0081 ''Status and Resolution of Issues Associated with the Transfer of Six Decommissioning Uranium Mill Sites to the State of Wyoming'' (ADAMS Accession No. ML17087A355) to the Commission. In SRM–SECY–17–0081 (ADAMS Accession No. ML17277A783), the Commission approved the NRC staff's recommendation for the NRC to retain regulatory authority over the ANC site and stated that the Commission's retention of the ANC site ''is not a change to the Commission's current Agreement State policy, but is instead an exception to that policy based on case-specific facts.'' Article II.A.14. of the proposed Agreement specifies that the Commission retains regulatory authority over the ANC license.

With regard to the five other decommissioning UMTRCA sites, the NRC staff has developed a draft Memorandum of Understanding (MOU) between the NRC and the State of Wyoming as a separate document from the proposed Agreement. The objective of the MOU is to delineate specific actions that the NRC and the State of Wyoming would take to verify completion of the decommissioning of these sites. The MOU has been drafted and the NRC staff is currently working with the State of Wyoming to delineate how license termination will be addressed for each of the five sites. An assessment of the decommissioning status of the five UMTRCA sites and the activities that need to be completed prior to license termination (ADAMS Accession No. ML17040A501) has been completed. Once the MOU is completed and signed by both the NRC and the State of Wyoming, it will be published in the **Federal Register**.

Staff Conclusion

Section 274d. of the AEA provides that the Commission shall enter into an Agreement under Section 274b. with any State if:

(a) The Governor of the State certifies that the State has a program for the control of radiation hazards adequate to protect public health and safety with respect to the Agreement materials within the State and that the State desires to assume regulatory responsibility for the Agreement materials; and

(b) The Commission finds that the State program is in accordance with the requirements of Subsection 274o. and in all other respects compatible with the Commission's program for the regulation of materials, and that the State program is adequate to protect public health and safety with respect to the materials covered by the proposed Agreement.

The NRC staff has reviewed the proposed Agreement, the certification of Wyoming Governor Mead, and the supporting information provided by the Uranium Recovery Program of the Wyoming Department of Environmental Quality and Wyoming's Office of the Attorney General. Based upon this review, the NRC staff concludes that the State of Wyoming Uranium Recovery Program satisfies the Section 274d. criteria as well as the criteria in the Commission's Policy Statement ''Criteria for Guidance of States and NRC in Discontinuance of NRC Regulatory Authority and Assumption Thereof by States Through Agreement.'' As noted above, the proposed Agreement includes a provision that the State of Wyoming has until the end of the 2019 legislative session to amend Wyoming Statute Section 35–11–2004(c) to be compatible with AEA Section 83b.(1)(A) or the Agreement will terminate without further NRC action. The proposed Agreement also explicitly states that the NRC will reject any State of Wyoming request to terminate a license that proposes to bifurcate the ownership of byproduct material and its disposal site between the State and the Federal government. Pursuant to Commission direction, the NRC staff finding of compatibility is contingent on the State of Wyoming revising Wyoming Statute Section 35–11–2004(c) during the next legislative session to be compatible with AEA Section 83b.(1)(A). The proposed State of Wyoming program to regulate Agreement materials, as comprised of statutes, regulations, procedures, and staffing is compatible with the Commission's program and is adequate to protect public health and safety with respect to the materials covered by the proposed Agreement. Therefore, the proposed Agreement meets the requirements of Section 274 of the AEA.

Dated at Rockville, Maryland, this 27th day of June 2018.

For the Nuclear Regulatory Commission.

Andrea L. Kock,

Acting Director, Division of Materials Safety, Security, State, and Tribal Programs, Office of Nuclear Material Safety and Safeguards.

Appendix A

An Agreement Between the United States Nuclear Regulatory Commission and the State of Wyoming for the Discontinuance of Certain Commission Regulatory Authority and Responsibility Within the State Pursuant to Section 274 of the Atomic Energy Act of 1954, as Amended

Whereas, The United States Nuclear Regulatory Commission (hereinafter referred to as ''the Commission'') is authorized under Section 274 of the Atomic Energy Act of 1954, as amended, 42 U.S.C. Section 2011 *et seq.* (hereinafter referred to as ''the Act''), to enter into agreements with the Governor of any State providing for discontinuance of the regulatory authority of the Commission within the State under Chapters 6, 7, and 8, and Section 161 of the Act with respect to byproduct material as defined in Section 11e.(2) of the Act and source material involved in the extraction or concentration of uranium or thorium in source material or ores at milling facilities; and,

Whereas, The Governor of the State of Wyoming is authorized under Wyoming Statute Section 35–11–2001 to enter into this Agreement with the Commission; and,

Whereas, The Governor of the State of Wyoming certified on November 14, 2017, that the State of Wyoming (hereinafter referred to as ''the State'') has a program for the control of radiation hazards adequate to protect public health and safety with respect to the materials within the State covered by this Agreement and that the State desires to assume regulatory responsibility for such materials; and,

Whereas, The Commission found on [date] that the program of the State for the regulation of the materials covered by this Agreement is compatible with the Commission's program for the regulation of such materials and is adequate to protect public health and safety; and,

Whereas, The State and the Commission recognize the desirability and importance of cooperation between the Commission and the State in the formulation of standards for protection against hazards of radiation and in assuring that State and Commission programs for protection against hazards of radiation will be coordinated and compatible; and,

Whereas, the Commission and the State recognize the desirability of the reciprocal recognition of licenses, and of the granting of limited exemptions from licensing of those materials subject to this Agreement; and, *Whereas,* This Agreement is entered into pursuant to the Act;

Now, therefore, It is hereby agreed between the Commission and the Governor of the State of Wyoming acting on behalf of the State as follows:

Article I

Subject to the exceptions provided in Articles II, IV, and V, the Commission shall discontinue, as of the effective date of this Agreement, the regulatory authority of the Commission in the State under Chapters, 7, and 8, and Section 161 of the Act with respect to the following materials:

A. Byproduct material as defined in Section 11e.(2) of the Act; and,

B. Source material involved in the extraction or concentration of uranium or thorium in source material or ores at uranium or thorium milling facilities (hereinafter referred to as ''source material associated with milling activities'').

Article II

A. This Agreement does not provide for the discontinuance of any authority, and the Commission shall retain authority and responsibility, with respect to:

1. Byproduct material as defined in Section 11e.(1) of the Act;

2. Byproduct material as defined in Section 11e.(3) of the Act;

3. Byproduct material as defined in Section 11e.(4) of the Act;

4. Source material except for source material as defined in Article I.B. of this Agreement;

5. Special nuclear material;

6. The regulation of the land disposal of byproduct, source, or special nuclear material received from other persons, excluding 11e.(2) byproduct material or source material described in Article I.A. and B. of this Agreement;

7. The evaluation of radiation safety information on sealed sources or devices containing byproduct, source, or special nuclear material and the registration of the sealed sources or devices for distribution, as provided for in regulations or orders of the Commission;

8. The regulation of the construction and operation of any production or utilization facility or any uranium enrichment facility;

9. The regulation of the export from or import into the United States of byproduct, source, or special nuclear material, or of any production or utilization facility;

10. The regulation of the disposal into the ocean or sea of byproduct, source, or special nuclear material waste as defined in the regulations or orders of the Commission;

11. The regulation of the disposal of such other byproduct, source, or special nuclear material as the Commission from time to time determines by regulation or order should, because of the hazards or potential hazards thereof, not to be so disposed without a license from the Commission;

12. The regulation of activities not exempt from Commission regulation as stated in 10 CFR part 150;

13. The regulation of laboratory facilities that are not located at facilities licensed under the authority relinquished under Article I.A. and B. of this Agreement; and,

14. Notwithstanding this Agreement, the Commission shall retain regulatory authority over the American Nuclear Corporation license.

B. Notwithstanding this Agreement, the Commission retains the following authorities pertaining to byproduct material as defined in Section 11e.(2) of the Act:

1. Prior to the termination of a State license for such byproduct material, or for any activity that results in the production of such material, the Commission shall have made a determination that all applicable standards and requirements pertaining to such material have been met.

2. The Commission reserves the authority to establish minimum standards governing reclamation, long-term surveillance or maintenance, and ownership of such byproduct material and of land used as its disposal site for such material. Such reserved authority includes:

a. The authority to establish terms and conditions as the Commission determines necessary to assure that, prior to termination of any license for such byproduct material, or for any activity that results in the production of such material, the licensee shall comply with decontamination, decommissioning, and reclamation standards prescribed by the Commission and with ownership requirements for such material and its disposal site;

b. The authority to require that prior to termination of any license for such byproduct material or for any activity that results in the production of such material, title to such byproduct material and its disposal site be transferred to the United States or the State at the option of the State (provided such option is exercised prior to termination of the license);

c. The authority to permit use of the surface or subsurface estates, or both, of the land transferred to the United States or a State pursuant to paragraph 2.b. in this section in a manner consistent with the provisions of the Uranium Mill Tailings Radiation Control Act of 1978, provided that the Commission determines that such use would not endanger public health, safety, welfare, or the environment;

d. The authority to require, in the case of a license for any activity that produces such byproduct material (which license was in effect on November 8, 1981), transfer of land and material pursuant to paragraph 2.b. in this section taking into consideration the status of such material and land and interests therein and the ability of the licensee to transfer title and custody thereof to the United States or a State;

e. The authority to require the Secretary of the United States Department of Energy, other Federal agency, or State, whichever has custody of such byproduct material and its disposal site, to undertake such monitoring, maintenance, and emergency measures as are necessary to protect public health and safety and other actions as the Commission deems necessary; and,

f. The authority to enter into arrangements as may be appropriate to assure Federal long-term surveillance or maintenance of such byproduct material and its disposal site on land held in trust by the United States for any Indian Tribe or land owned by an Indian Tribe and subject to a restriction against alienation imposed by the United States.

3. The Commission retains the authority to reject any State request to terminate a license that proposes to bifurcate the ownership of 11e.(2) byproduct material and its disposal site between the State and the Federal government. Upon passage of a revised Wyoming Statute Section 35–11–2004(c) that the NRC finds compatible with Section 83b.(1)(A) of the Act, this paragraph expires and is no longer part of this Agreement.

Article III

With the exception of those activities identified in Article II, A.8 through A.11, this Agreement may be amended, upon application by the State and approval by the Commission to include one or more of the additional activities specified in Article II, A.1 through A.7, whereby the State may then exert regulatory authority and responsibility with respect to those activities.

Article IV

Notwithstanding this Agreement, the Commission may from time to time by rule, regulation, or order, require that the manufacturer, processor, or producer of any equipment, device, commodity, or other product containing source, byproduct, or special nuclear material shall not transfer possession or control of such product except pursuant to a license or an exemption for licensing issued by the Commission.

Article V

This Agreement shall not affect the authority of the Commission under Subsection 161b. or 161i. of the Act to issue rules, regulations, or orders to protect the common defense and security, to protect restricted data, or to guard against the loss or diversion of special nuclear material.

Article VI

The Commission will cooperate with the State and other Agreement States in the formulation of standards and regulatory programs of the State and the Commission for protection against hazards of radiation and to assure that Commission and State programs for protection against hazards of radiation will be coordinated and compatible. The State agrees to cooperate with the Commission and other Agreement States in the formulation of standards and regulatory programs of the State and the Commission for protection against hazards of radiation and to assure that the State's program will continue to be compatible with the program of the Commission for the regulation of materials covered by this Agreement.

The State and the Commission agree to keep each other informed of proposed changes in their respective rules and regulations and to provide each other the opportunity for early and substantive contribution to the proposed changes.

The State and the Commission agree to keep each other informed of events, accidents, and licensee performance that may have generic implication or otherwise be of regulatory interest.

Article VII

The Commission and the State agree that it is desirable to provide reciprocal recognition of licenses for the materials listed in Article I licensed by the other party or by any other Agreement State.

Accordingly, the Commission and the State agree to develop appropriate rules, regulations, and procedures by which reciprocity will be accorded.

Article VIII

A. The Commission, upon its own initiative after reasonable notice and opportunity for hearing to the State or upon request of the Governor of the State, may terminate or suspend all or part of this agreement and reassert the licensing and regulatory authority vested in it under the Act if the Commission finds that (1) such termination or suspension is required to protect public health and safety, or (2) the State has not complied with one or more of the requirements of Section 274 of the Act.

1. This Agreement will terminate without further NRC action if the State does not amend Wyoming Statute Section 35–11–2004(c) to be compatible with Section 83b.(1)(A) of the Act by the end of the 2019 Wyoming legislative session. Upon passage of a revised Wyoming Statute Section 35–11–2004(c) that the NRC finds compatible with Section 83b.(1)(A) of the Act, this paragraph expires and is no longer part of the Agreement.

B. The Commission may also, pursuant to Section 274j. of the Act, temporarily suspend all or part of this agreement if, in the judgment of the Commission, an emergency situation exists requiring immediate action to protect public health and safety and the State has failed to take necessary steps. The Commission shall periodically review actions taken by the State under this Agreement to ensure compliance with Section 274 of the Act, which requires a State program to be adequate to protect public health and safety with respect to the materials covered by this Agreement and to be compatible with the Commission's program.

Article IX

In the licensing and regulation of byproduct material as defined in Section 11e.(2) of the Act, or of any activity that results in production of such material, the State shall comply with the provisions of Section 274o. of the Act, if in such licensing and regulation, the State requires financial surety arrangements for reclamation or long-term surveillance and maintenance of such material.

A. The total amount of funds the State collects for such purposes shall be transferred to the United States if custody of such material and its disposal site is transferred to the United States upon termination of the State license for such material or any activity that results in the production of such material. Such funds include, but are not limited to, sums collected for long-term surveillance or maintenance. Such funds do not, however, include monies held as surety where no default has occurred and the reclamation or other bonded activity has been performed; and,

B. Such surety or other financial requirements must be sufficient to ensure compliance with those standards established by the Commission pertaining to bonds, sureties, and financial arrangements to ensure adequate reclamation and long-term management of such byproduct material and its disposal site.

Article X

This Agreement shall become effective on [date], and shall remain in effect unless and until such time as it is terminated pursuant to Article VIII.

Done at [location] this [date] day of [month], 2018.

For the Nuclear Regulatory Commission.

Kristine L. Svinicki, *Chairman.*

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2018–0140]

Biweekly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Biweekly notice.

SUMMARY: Pursuant to Section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular biweekly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued, from June 18, 2018, to June 29, 2018. The last biweekly notice was published on July 3, 2018.

DATES: Comments must be filed by August 16, 2018. A request for a hearing must be filed by September 17, 2018.

ADDRESSES: You may submit comments by any of the following methods:

- *Federal Rulemaking Website:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2018–0140. Address questions about NRC dockets to Jennifer Borges; telephone: 301–287–9127; email: *Jennifer.Borges@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* May Ma, Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Janet C. Burkhardt, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1384, email: *Janet.Burkhardt@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2018–0140, facility name, unit number(s), plant docket number, application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2018–0140.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2018–0140, facility name, unit number(s), plant docket number, application date, and subject in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in section 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final no significant hazards consideration determination, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. The NRC's regulations are accessible electronically from the NRC Library on the NRC's website at *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* Alternatively, a copy of the regulations is available at the NRC's Public Document Room, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

As required by 10 CFR 2.309(d) the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements for standing: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest.

In accordance with 10 CFR 2.309(f), the petition must also set forth the specific contentions which the petitioner seeks to have litigated in the proceeding. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner must provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to the specific sources and documents on which the petitioner intends to rely to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant or licensee on a material issue of law or fact. Contentions must be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy the requirements at 10 CFR 2.309(f) with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene. Parties have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that party's admitted contentions, including the opportunity to present evidence, consistent with the NRC's regulations, policies, and procedures.

Petitions must be filed no later than 60 days from the date of publication of this notice. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii). The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document.

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission no later than 60 days from the date of publication of this notice. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. Alternatively, a State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

If a hearing is granted, any person who is not a party to the proceeding and is not affiliated with or represented by a party may, at the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of his or her position on the issues but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing and petition for leave to intervene (petition), any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities that request to participate under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Detailed guidance on making electronic submissions may be found in the Guidance for Electronic Submissions to the NRC and on the NRC website at *http://www.nrc.gov/site-help/e-submittals.html.* Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit adjudicatory documents. Submissions must be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public website at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

For further details with respect to these license amendment applications, see the application for amendment which is available for public inspection in ADAMS and at the NRC's PDR. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

Dominion Energy Nuclear Connecticut, Inc. (DENC), Docket No. 50–423, Millstone Power Station, Unit No. 3 (MPS3), New London County, Connecticut

Date of amendment request: April 4, 2018. A publicly-available version is in ADAMS under Accession No. ML18100A055.

Description of amendment request: The amendment would revise the MPS3 Technical Specifications (TSs). Specifically, with one Control Building Inlet Ventilation Radiation monitor channel inoperable for greater than 7 days, or if both radiation monitor channels are inoperable, DENC proposes to revise and reformat Action 18 in TS Table 3.3–3, Functional Unit 7.e, ''Control Building Inlet Ventilation Radiation,'' to allow control room operators to manually place one train of the Control Room Emergency Ventilation System (CREVS) in the emergency mode of operation to provide additional time to restore one channel of Control Building Inlet Ventilation Radiation monitoring to OPERABLE status.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

Operation of MPS3 in accordance with the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change removes an overly restrictive requirement and adds a conservative requirement for actions to be taken when there is a loss of operability of the CREVS actuation instrumentation. This does not increase the probability of an accident previously evaluated since the CREVS actuation itself is not an accident initiator. The proposed change is consistent with standard TSs for Westinghouse plants (NUREG–1431) and provides assurance that the CREVS is in the conservative mode of operation for a response to an accident. Analysis demonstrates that with one train of the CREVS in the emergency mode of operation, control room operators are adequately protected from the radiological consequences of design basis accident events. Therefore, the probability or consequences of an accident previously evaluated is not significantly increased.

Based on the above, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

Operation of MPS3 in accordance with the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change does not involve a physical alteration of the plant or change in the methods governing normal plant operation. The proposed change replaces the overly restrictive shutdown requirement with a conservative action to be taken upon loss of CREVS actuation instrumentation operability, thereby avoiding the risk associated with an immediate controlled shutdown. Therefore, the possibility of a new or different kind of accident from any accident previously evaluated is not created.

With one train of CREVS in the emergency mode of operation, DENC has confirmed that MPS3 is in compliance with the current radiological analyses of record for design basis accidents with dose consequences to the control room. Therefore, the proposed change does not affect the design basis analyses and does not alter the assumptions made in the MPS3 accident analysis.

Based on the above, the proposed amendment does not create the possibility of a new or different kind of accident previously evaluated.

3. Does the proposed change involve a significant reduction in the margin of safety?

Response: No.

Operation of MPS3 in accordance with the proposed change does not involve a significant reduction in the margin of safety. The proposed change revises and reformats the Control Building lnlet Ventilation Radiation TS to place the CREVS in the conservative mode of operation for a response to an accident. The proposed change provides additional time to restore an inoperable radiation monitor channel instead of requiring an immediate controlled plant shutdown and suspension of movement of recently irradiated fuel assemblies, if applicable. A plant shutdown is a transient that may be avoided by providing a limited time to make repairs. In addition, the control room operators are adequately protected from the radiological consequences of design basis accident events with one train of the CREVS in the emergency mode of operation. The potential to avoid a plant transient in conjunction with protecting control room operators offsets any risk associated with the proposed change.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

Based on the above, the proposed amendment does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Lillian M. Cuoco, Senior Counsel, Dominion Energy, Inc., 120 Tredegar Street, RS–2, Richmond, VA 23219.

NRC Branch Chief: James G. Danna.

Duke Energy Progress, LLC, Docket Nos. 50–325 and 50–324, Brunswick Steam Electric Plant, Units 1 and 2 (Brunswick or BSEP), Brunswick County, North Carolina

Date of amendment request: April 4, 2018, as supplemented by letter dated May 29, 2018. Publicly-available versions are in ADAMS under Accession Nos. ML18094B058 and ML18149A487, respectively.

Description of amendment request: The amendments would modify the BSEP Technical Specifications (TSs) to relocate the pressure-temperature limit curves to a licensee-controlled Pressure and Temperature Limits Report (PTLR). The amendment request was submitted in accordance with guidance provided in NRC Generic Letter 96–03, ''Relocation of the Pressure Temperature Limit Curves and Low Temperature Overpressure Protections System Limits,'' dated January 31, 1996.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed license amendment adopts the NRC approved methodology described in Boiling Water Reactor Owner's Group (BWROG) Licensing Topical Report (LTR) (BWROG–TP–11–022–A, SIR–05–044, Revision 1–A), ''Pressure Temperature Limits Report Methodology for Boiling Water Reactors.'' The BSEP PTLR was developed based on the methodology and template provided in the BWROG LTR.

10 CFR 50, Appendix G, establishes requirements to protect the integrity of the reactor coolant pressure boundary (RCPB) in nuclear power plants.

Implementing this NRC approved methodology does not reduce the ability to protect the reactor coolant pressure boundary as specified in Appendix G, nor will this change increase the probability of malfunction of plant equipment, or the failure of plant structures, systems, or components. Incorporation of the new methodology for calculating pressure and temperature limit curves, and the relocation of the pressure and temperature limit curves from the TS to the PTLR provides an equivalent level of assurance that the reactor coolant pressure boundary is capable of performing its intended safety functions.

The proposed changes do not adversely affect accident initiators or precursors, and do not alter the design assumptions, conditions, or configuration of the plant or the manner in which the plant is operated and maintained. The ability of structures, systems, and components to perform their intended safety functions is not altered or prevented by the proposed changes, and the assumptions used in determining the radiological consequences of previously evaluated accidents are not affected.

Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

Creation of the possibility of a new or different kind of accident requires creating one or more new accident precursors. New accident precursors may be created by modifications of plant configuration, including changes in allowable modes of operation.

The change in methodology for calculating pressure and temperature limits and the relocation of those limits to the PTLR do not alter or involve any design basis accident initiators. Reactor coolant pressure boundary integrity will continue to be maintained in accordance with 10 CFR part 50, Appendix G, and the assumed accident performance of plant structures, systems and components will not be affected. The proposed changes do not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed), and the installed equipment is not being operated in a new or different manner.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed changes do not affect the function of the reactor coolant pressure boundary or its response during plant transients. Calculating the Brunswick pressure temperature limits using the NRC approved structural integrity methodology ensures adequate margins of safety relating to reactor coolant pressure boundary integrity are maintained. The proposed changes do not alter the manner in which the Limiting Conditions for Operation pressure and temperature limits for the reactor coolant pressure boundary are determined. There are no changes to the setpoints at which protective actions are initiated, and the operability requirements for equipment assumed to operate for accident mitigation are not affected.

Therefore, the proposed amendment does not result in a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Kathryn B. Nolan, Deputy General Counsel, 550 South Tryon Street, M/C DEC45A, Charlotte, NC 28202.

NRC Acting Branch Chief: Booma Venkataraman.

Exelon FitzPatrick, LLC and Exelon Generation Company, LLC, Docket No. 50–333, James A. FitzPatrick Nuclear Power Plant (FitzPatrick), Oswego County, New York

Date of amendment request: January 31, 2018. A publicly-available version is in ADAMS under Accession No. ML18037A782.

Description of amendment request: The amendment would revise FitzPatrick's emergency plan by changing the emergency action level (EAL) schemes. The proposed changes are based on the Nuclear Energy Institute's (NEI's) guidance in NEI 99–01, Revision 6, ''Development of Emergency Action Levels for Non-Passive Reactors,'' which was endorsed by the NRC in a letter dated March 28, 2013 (ADAMS Accession No. ML12346A463).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes to FitzPatrick's EAL schemes to adopt the NRC-endorsed guidance in NEI 99–01, Revision 6 do not reduce the capability to meet the emergency planning requirements established in 10 CFR 50.47 and 10 CFR part 50, Appendix E. The proposed changes do not reduce the functionality, performance, or capability of FitzPatrick's ERO [emergency response organization] to respond in mitigating the consequences of any design basis accident.

The probability of a reactor accident requiring implementation of Emergency Plan EALs has no relevance in determining whether the proposed changes to the EALs reduce the effectiveness of the Emergency Plans. As discussed in Section D, ''Planning Basis,'' of NUREG–0654, Revision 1, ''Criteria for Preparation and Evaluation of Radiological Emergency Response Plants and Preparedness in Support of Nuclear Power Plants:''

''. . . The overall objective of emergency response plans is to provide dose savings (and in some cases immediate life saving) for a spectrum of accidents that could produce offsite doses in excess of Protective Action Guides (PAGs). No single specific accident sequence should be isolated as the one for which to plan because each accident could have different consequences, both in nature and degree. Further, the range of possible selection for a planning basis is very large, starting with a zero point of requiring no planning at all because significant offsite radiological accident consequences are unlikely to occur, to planning for the worst possible accident, regardless of its extremely low likelihood. . . .''

Therefore, Exelon did not consider the risk insights regarding any specific accident initiation or progression in evaluating the proposed changes.

The proposed changes do not involve any physical changes to plant equipment or systems, nor do they alter the assumptions of any accident analyses. The proposed changes do not adversely affect accident initiators or precursors nor do they alter the design assumptions, conditions, and configuration or the manner in which the plants are operated and maintained. The proposed changes do not adversely affect the ability of Structures, Systems, or Components (SSCs) to perform their intended safety functions in mitigating the consequences of an initiating event within the assumed acceptance limits.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of

accident from any accident previously evaluated?

Response: No.

The proposed changes to FitzPatrick's EAL schemes to adopt the NRC-endorsed guidance in NEI 99–01, Revision 6 do not involve any physical changes to plant systems or equipment. The proposed changes do not involve the addition of any new plant equipment. The proposed changes will not alter the design configuration, or method of operation of plant equipment beyond its normal functional capabilities. All FitzPatrick ERO functions will continue to be performed as required. The proposed changes do not create any new credible failure mechanisms, malfunctions, or accident initiators.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from those that have been previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed changes to FitzPatrick's EAL schemes to adopt the NRC-endorsed guidance in NEI 99–01, Revision 6 do not alter or exceed a design basis or safety limit. There is no change being made to safety analysis assumptions, safety limits, or limiting safety system settings that would adversely affect plant safety as a result of the proposed changes. There are no changes to setpoints or environmental conditions of any SSC or the manner in which any SSC is operated. Margins of safety are unaffected by the proposed changes to adopt the NEI 99–01, Revision 6 EAL scheme guidance. The applicable requirements of 10 CFR 50.47 and 10 CFR part 50, Appendix E will continue to be met.

Therefore, the proposed changes do not involve any reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Donald P. Ferraro, Assistant General Counsel, Exelon Generation Company, LLC, 200 Exelon Way, Suite 305, Kennett Square, PA 19348.

NRC Branch Chief: James G. Danna.

Exelon Generation Company, LLC, Docket No. 50–289 and 50–320, Three Mile Island Nuclear Station (TMI), Unit Nos. 1 and 2, Dauphin County, Pennsylvania

Date of amendment request: March 19, 2018. A publicly-available version is in ADAMS under Accession No. ML18078A578.

Description of amendment request: The amendment would revise the TMI Site Emergency Plan (SEP) on-shift and emergency response organization (ERO) staffing to support the planned permanent cessation of operations and permanent defueling of TMI, Unit 1. Specifically, the proposed changes would eliminate the on-shift positions not needed for the safe storage of spent fuel in the spent fuel pool during the initial decommissioning period and eliminate the ERO positions not necessary to effectively respond to credible accidents for a permanently shutdown and defueled power reactor facility. The proposed changes will also relocate full augmentation position requirements from the SEP to the Emergency Preparedness Implementing Procedures.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes to the TMI Emergency Plan do not impact the function of plant Structures, Systems, or Components (SSCs). The proposed changes do not involve the modification of any plant equipment or affect plant operation. The proposed changes do not affect accident initiators or precursors, nor do the proposed changes alter design assumptions. The proposed changes do not prevent the ability of the on-shift staff and ERO to perform their intended functions to mitigate the consequences of any accident or event that will be credible in the permanently defueled condition. The proposed changes only remove positions that will no longer be needed or credited in the Emergency Plan in the permanently defueled condition.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes reduce the number of on-shift and ERO positions commensurate with the hazards associated with a permanently shutdown and defueled facility. The proposed changes do not involve installation of new equipment or modification of existing equipment, so that no new equipment failure modes are introduced. Also, the proposed changes do not result in a change to the way that the equipment or facility is operated so that no new accident initiators are created.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

Margin of safety is associated with confidence in the ability of the fission product barriers (*i.e.,* fuel cladding, reactor coolant system pressure boundary, and containment structure) to limit the level of radiation dose to the public. The proposed changes do not adversely affect existing plant safety margins or the reliability of the equipment assumed to operate in the safety analyses. There are no changes being made to safety analysis assumptions, safety limits, or limiting safety system settings that would adversely affect plant safety as a result of the proposed changes. The proposed changes are associated with the Emergency Plan and staffing and do not impact operation of the plant or its response to transients or accidents. The proposed changes do not affect the Technical Specifications. The proposed changes do not involve a change in the method of plant operation, and no accident analyses will be affected by the proposed changes. Safety analysis acceptance criteria are not affected by the proposed changes and margins of safety are maintained. The revised Emergency Plan will continue to provide the necessary response staff with the proposed changes.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Tamra Domeyer, Associate General Counsel, Exelon Generation Company, LLC, 4300 Winfield Road, Warrenville, IL 60555.

NRC Branch Chief: James G. Danna.

Exelon Generation Company, LLC, Docket Nos. 50–352 and 50–353, Limerick Generating Station, Unit Nos. 1 and 2, Montgomery County, Pennsylvania

Exelon Generation Company, LLC, and PSEG Nuclear LLC, Docket Nos. 50–171, 50–277, and 50–278, Peach Bottom Atomic Power Station, Unit Nos. 1, 2, and 3, York and Lancaster Counties, Pennsylvania

Date of amendment request: May 10, 2018. Publicly-available version is in ADAMS under Package Accession No. ML18149A290.

Description of amendment request: The amendments would revise the emergency response organization (ERO) positions identified in the emergency plan for each site.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration for each site, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes to the [site] Emergency Plan do not increase the probability or consequences of an accident. The proposed changes do not impact the function of plant Structures, Systems, or Components (SSCs). The proposed changes do not affect accident initiators or accident precursors, nor do the changes alter design assumptions. The proposed changes do not alter or prevent the ability of the onsite ERO to perform their intended functions to mitigate the consequences of an accident or event. The proposed changes remove ERO positions no longer credited or considered necessary in support of Emergency Plan implementation.

Therefore, the proposed changes to the [site] Emergency Plan do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes have no impact on the design, function, or operation of any plant SSCs. The proposed changes do not affect plant equipment or accident analyses. The proposed changes do not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed), a change in the method of plant operation, or new operator actions. The proposed changes do not introduce failure modes that could result in a new accident, and the proposed changes do not alter assumptions made in the safety analysis. The proposed changes remove ERO positions no longer credited or considered necessary in support of Emergency Plan implementation.

Therefore, the proposed changes to the [site] Emergency Plan do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

Margin of safety is associated with confidence in the ability of the fission product barriers (*i.e.,* fuel cladding, reactor coolant system pressure boundary, and containment structure) to limit the level of radiation dose to the public.

The proposed changes do not adversely affect existing plant safety margins or the reliability of the equipment assumed to operate in the safety analyses. There are no changes being made to safety analysis assumptions, safety limits, or limiting safety system settings that would adversely affect plant safety as a result of the proposed changes. Margins of safety are unaffected by the proposed changes to the ERO staffing. The proposed changes are associated with the [site] Emergency Plan staffing and do not impact operation of the plant or its response to transients or accidents. The proposed changes do not affect the Technical Specifications. The proposed changes do not involve a change in the method of plant operation, and no accident analyses will be affected by the proposed changes. Safety analysis acceptance criteria are not affected by these proposed changes. The proposed changes to the Emergency Plan will continue to provide the necessary onsite ERO response staff.

Therefore, the proposed changes to the [site] Emergency Plan do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis for each site and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the requested amendments involve no significant hazards consideration.

Attorney for licensee: Tamra Domeyer, Associate General Counsel, Exelon Generation Company, LLC, 4300 Winfield Road, Warrenville, IL 60555.

NRC Branch Chief: David J. Wrona.

Indiana Michigan Power Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment request: May 4, 2018. A publicly-available version is in ADAMS under Accession No. ML18129A219.

Description of amendment request: The proposed change would modify technical specification (TS) requirements regarding Limiting Condition for Operation (LCO) and Surveillance Requirement (SR) usage, in accordance with NRC-approved Technical Specifications Task Force (TSTF) Traveler TSTF–529, Revision 4, ''Clarify Use and Application Rules.''

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes to Section 1.3 and LCO 3.0.4 have no effect on the requirement for systems to be Operable and have no effect on the application of TS actions. The proposed change to SR 3.0.3 states that the allowance may only be used when there is a reasonable expectation the surveillance will be met when performed. Since the proposed change does not significantly affect system Operability, the proposed change will have no effect on the initiating events for accidents previously evaluated and will have no significant effect on the ability of the systems to mitigate accidents previously evaluated.

Therefore, it is concluded that this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change to the TS usage rules does not affect the design or function of any plant systems. The proposed change does not change the Operability requirements for plant systems or the actions taken when plant systems are not operable.

Therefore, it is concluded that this change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change clarifies the application of Section 1.3 and LCO 3.0.4 and does not result in changes in plant operation. SR 3.0.3 is revised to allow application of SR 3.0.3 when an SR has not been previously performed if there is reasonable expectation that the SR will be met when performed. This expands the use of SR 3.0.3 while ensuring the affected system is capable of performing its safety function. As a result, plant safety is either improved or unaffected.

Therefore, it is concluded that this change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Robert B. Haemer, Senior Nuclear Counsel, One Cook Place, Bridgman, MI 49106.

NRC Branch Chief: David J. Wrona.

Southern Nuclear Operating Company, Inc., Docket Nos. 52–025 and 52–026, Vogtle Electric Generating Plant, Unit Nos. 3 and 4, Burke County, Georgia

Date of amendment request: May 18, 2018. A publicly-available version is in ADAMS under Accession No. ML18138A396.

Description of amendment request: The amendment request proposes to change Technical Specifications Limiting Condition for Operation 3.3.8, Engineered Safety Feature Actuation System (ESFAS) Instrumentation, related to Safeguard Actuation Functions. Various ESFAS Functions require applicability and corresponding actions changes to more accurately reflect their operation and related safety analysis assumptions. This submittal requests approval of the license amendment necessary to implement these changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes do not involve changes to current plant design or safety analysis assumptions. These changes provide Technical Specifications consistency with the approved plant design and safety analysis assumptions. The changes do not affect the operation of any systems or equipment that initiate an analyzed accident or alter any structures, systems, and components (SSCs) accident initiator or initiating sequence of events. The proposed changes do not result in any increase in the probability of an analyzed accident occurring. Therefore, the requested amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed changes do not involve changes to current plant design or safety analysis assumptions. These changes provide Technical Specifications consistency with the approved plant design and safety analysis assumptions. The proposed changes do not affect plant protection instrumentation systems, and do not affect the design function, support, design, or operation of mechanical and fluid systems. The proposed changes do not result in a new failure mechanism or introduce any new accident precursors. No design function described in the Updated Final Safety Analysis Report (UFSAR) is affected by the proposed changes. Therefore, the requested amendment does not create the possibility of a new or different kind accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed changes do not involve changes to current plant design or safety analysis assumptions. These changes provide Technical Specifications consistency with the approved plant design and safety analysis assumptions. No safety analysis or design basis acceptance limit/criterion is involved. Therefore, the proposed amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: M. Stanford Blanton, Balch & Bingham LLP, 1710 Sixth Avenue North, Birmingham, AL 35203–2015.

NRC Branch Chief: Jennifer Dixon-Herrity.

Tennessee Valley Authority (TVA), Docket Nos. 50–259, 50–260, and 50–296, Browns Ferry Nuclear Plant (BFN), Unit Nos. 1, 2, and 3, Limestone County, Alabama

Date of amendment request: May 3, 2018. A publicly-available version is in ADAMS under Accession No. ML18124A053.

Description of amendment request: The amendments would revise the BFN Units 1, 2, and 3 renewed facility operating licenses (RFOLs) to provide a correction to previously submitted information in relation to their approved fire protection program under 10 CFR 50.48(c), ''National Fire Protection Association Standard NFPA 805.'' Specifically, TVA requested to modify the BFN licenses to reflect changes to Item 3.3.4 in Table B–1, ''Transition of Fundamental Fire Protection Program & Design Elements,'' of Attachment A in its NFPA 805 license amendment request dated March 27, 2013 (ADAMS Accession No. ML13092A393).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below.

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed amendment adds the reference to this letter to the BFN RFOL License Condition paragraphs 2.C.(13), 2.C.(14), and 2.C.(7) for BFN Units 1, 2, and 3, respectively. The change encompassed by the proposed amendment is to correct the entry in Attachment A Table B–1 of the BFN Transition Report.

The proposed change does not adversely affect accident initiators or precursors nor alter the design assumptions, conditions, and configuration of the facility or the manner in which the plant is operated and maintained. The proposed change does not affect the ability of structures, systems and components (SSCs) to perform their intended safety function to mitigate the consequences of an initiating event within the assumed acceptance limits.

Therefore, these proposed changes do not involve a significant increase in the probability of consequences of an accident previously identified.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed amendment adds the reference to this letter to the BFN RFOL License Condition paragraphs 2.C.(13), 2.C.(14), and 2.C.(7) for BFN Units 1, 2, and 3, respectively. The change encompassed by the proposed amendment is to correct the entry in Attachment A Table B–1 of the BFN Transition Report.

There is no risk impact to Core Damage Frequency (CDF) or Large Early Release Frequency (LERF) because this is an administrative change. Plant secondary combustibles, including insulating materials, are considered in the fire modeling input to the Fire PRA [Probabilistic Risk Assessment].

The proposed change does not result in any new or different kinds of accident from that previously evaluated because it does not change any precursors or equipment that is previously credited for accident mitigation.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed amendment adds the reference to this letter to the BFN RFOL License Condition paragraphs 2.C.(13), 2.C.(14), and 2.C.(7) for BFN Units 1, 2, and 3, respectively. The change encompassed by the proposed amendment are to correct the entry in Attachment A Table B–1 of the BFN Transition Report.

This proposed change corrects erroneous information to previously approved information in the BFN Transition Report. This proposed change will have an insignificant impact on the accident analysis as it is a clarifying or administrative change. Plant secondary combustibles, including insulating materials, are considered in the fire modeling input to the Fire PRA.

The proposed change will not result in any new or different kinds of accident from that previously evaluated because it does not change any precursors or equipment that is previously credited for accident mitigation.

Therefore, based on the above discussion, these proposed changes do not involve a reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, 6A West Tower, Knoxville, TN 37902.

NRC Acting Branch Chief: Booma Venkataraman.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

Duke Energy Progress, LLC, Docket No. 50–400, Shearon Harris Nuclear Power Plant, Unit No. 1, Wake and Chatham Counties, North Carolina

Date of amendment request: June 5, 2017, as supplemented by letters dated October 30, 2017, November 27, 2017, and January 28, 2018.

Brief description of amendment: The amendment revised the Technical Specifications (TSs) to restrict the steady-state voltage and frequency limits for emergency diesel generator (EDG) operation to ensure that accident mitigation equipment can perform as designed. In addition, the amendment revised a TS to increase the voltage limit for the EDG full load rejection test to provide additional operating margin to test acceptance criteria.

Date of issuance: June 20, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days.

Amendment No.: 165. A publicly-available version is in ADAMS under Accession No. ML18130A270; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–63: The amendment revised the Renewed Facility Operating License and TSs.

Date of initial notice in ***Federal Register:*** September 26, 2017 (82 FR 44851). The supplemental letters dated October 30, 2017, November 27, 2017, and January 28, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the NRC staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 20, 2018.

No significant hazards consideration comments received: No.

Entergy Nuclear Operations, Inc., Docket No. 50–271, Vermont Yankee Nuclear Power Station, Vernon, Vermont

Date of amendment request: July 13, 2017.

Brief description of amendment: The amendment approved the removal of the existing cyber security license condition from the facility operating license.

Date of issuance: June 27, 2018.

Effective date: As of the date the licensee notifies the NRC in writing that all spent nuclear fuel assemblies have been transferred out of the spent fuel pool and have been placed in dry storage within the independent spent fuel storage installation, and shall be implemented within 60 days of the effective date.

Amendment No.: 268. A publicly-available version is in ADAMS under Accession No. ML18145A208; documents related to this amendment are referenced in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–28: This amendment revised the License.

Date of initial notice in ***Federal Register:*** September 26, 2017 (82 FR 44852).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 27, 2018.

No significant hazards consideration comments received: No.

Entergy Operations, Inc., Docket No. 50–313, Arkansas Nuclear One, Unit 1 (ANO–1), Pope County, Arkansas

Date of amendment request: July 17, 2017.

Brief description of amendment: The amendment revised the Technical Specifications (TSs) for ANO–1 and established a new Completion Time in ANO–1 TS 3.7.5, ''Emergency Feedwater (EFW) System,'' where one steam supply to the turbine-driven EFW pump is inoperable concurrent with an inoperable motor-driven EFW train. The amendment is consistent with NRC-approved Technical Specifications Task Force (TSTF) Traveler TSTF–412, Revision 3, ''Provide Actions for One Steam Supply to Turbine Driven AFW [Auxiliary Feedwater]/EFW Pump Inoperable,'' with certain plant-specific deviations.

Date of issuance: June 19, 2018.

Effective date: As of the date of issuance and shall be implemented within 90 days from the date of issuance.

Amendment No.: 260. A publicly-available version is in ADAMS under Accession No. ML18115A282; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–51: Amendment revised the Renewed Facility Operating License and Technical Specifications.

Date of initial notice in ***Federal Register:*** October 10, 2017 (82 FR 47036).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 19, 2018.

No significant hazards consideration comments received: No.

Entergy Operations, Inc., Docket No. 50–368, Arkansas Nuclear One, Unit No. 2 (ANO–2), Pope County, Arkansas

Date of amendment request: July 17, 2017.

Brief description of amendment: The amendment revised the Technical Specifications (TSs) for ANO–2 and established Actions and Allowable Outage Times in ANO–2 TS 3.7.1.2, ''Emergency Feedwater System,'' for several combinations of inoperable Emergency Feedwater (EFW) trains consistent with NUREG–1432, ''Standard Technical Specifications—Combustion Engineering Plants,'' Revision 4. The amendment includes changes incorporated by Technical Specifications Task Force (TSTF)-340, ''Allow 7 Day Completion Time for a Turbine-Driven AFW [Auxiliary Feedwater] Pump Inoperable,'' Revision 3 and TSTF–412, ''Provide Actions for One Steam Supply to Turbine Driven AFW/EFW Pump Inoperable,'' Revision 3.

Date of issuance: June 19, 2018.

Effective date: As of the date of issuance and shall be implemented within 90 days from the date of issuance.

Amendment No.: 310. A publicly-available version is in ADAMS under Accession No. ML18134A253; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–6: Amendment revised the Renewed Facility Operating License and TSs.

Date of initial notice in ***Federal Register:*** October 10, 2017 (82 FR 47036).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 19, 2018.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland, Exelon Generation Company, LLC, Docket Nos. 50–220 and 50–410, Nine Mile, Point, Nuclear Station, Unit Nos. 1 and 2, Oswego County, New York, Exelon Generation Company, LLC, Docket No. 50–244, R.E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request: May 31, 2017.

Brief description of amendments: The amendments revised the emergency plans for each facility by changing the emergency action level schemes. The changes are based on the Nuclear Energy Institute's (NEI's) guidance in NEI 99–01, Revision 6, ''Development of Emergency Action Levels for Non-Passive Reactors,'' which was endorsed by the NRC by letter dated March 28, 2013 (ADAMS Package Accession No. ML13091A209).

Date of issuance: June 26, 2018.

Effective date: As of the date of issuance and shall be implemented on or before June 28, 2019.

Amendment Nos.: Calvert Cliffs—324/302; Nine Mile Point—230/171; and, Ginna—128. A publicly-available version is in ADAMS under Accession No. ML18137A614; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Facility Operating License Nos. DPR–53, DPR–69, DPR–63, NPF–69, and DPR–18: Amendments revised the emergency plans.

Date of initial notice in ***Federal Register:*** August 1, 2017 (82 FR 35838).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 26, 2018.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket Nos. 50–237 and 50–249, Dresden Nuclear Power Station (DNPS), Unit Nos. 2 and 3, Grundy County, Illinois

Date of amendment request: May 3, 2017, as supplemented by letter dated February 14, 2018.

Brief description of amendments: The amendments revised the DNPS Technical Specification (TS) 5.5.12, ''Primary Containment Leakage Rate Testing Program,'' to allow for the permanent extension of the Type A integrated leak rate testing and the Type C leak rate testing frequencies.

Date of issuance: June 29, 2018.

Effective date: As of the date of issuance and shall be implemented within 30 days of issuance.

Amendment Nos.: 257 (Unit 2) and 250 (Unit 3). A publicly-available version is in ADAMS under Accession No. ML18137A271; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–19 and DPR–25: Amendments revised the Renewed Facility Operating Licenses and TS.

Date of initial notice in ***Federal Register:*** August 1, 2017 (82 FR 35838). The supplemental letter dated February 14, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 29, 2018.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket No. 50–244, R. E. Ginna Nuclear Power Plant (Ginna), Wayne County, New York

Date of amendment request: June 30, 2017, as supplemented by letters dated October 25, 2017, and June 5, 2018.

Brief description of amendment: The amendment revised the license to delete the modification to install overcurrent protection on its emergency diesel generators which was required as part of Ginna's implementation of its risk-informed, performance-based fire protection program in accordance with 10 CFR 50.48(c).

Date of issuance: June 25, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment No.: 127. A publicly-available version is in ADAMS under Accession No. ML18114A025; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–18: Amendment revised the Renewed Facility Operating License.

Date of initial notice in ***Federal Register:*** October 3, 2017 (82 FR 46097). The supplemental letters dated October 25, 2017, and June 5, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the NRC staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 25, 2018.

No significant hazards consideration comments received: No.

Exelon Generation Company, LLC, Docket Nos. STN 50–456 and STN 50–457, Braidwood Station, Unit Nos. 1 and 2, Will County, Illinois and Docket Nos. STN 50–454 and STN 50–455, Byron Station, Unit Nos. 1 and 2, Ogle County, Illinois

Date of amendment request: June 30, 2017, as supplemented by letters dated October 25, 2017, and May 29, 2018.

Brief description of amendments: The amendments revised Technical Specification (TS) 3.1.4, ''Rod Group Alignment Limits,'' TS 3.1.5, ''Shutdown Bank Insertion Limits,'' TS 3.1.6, ''Control Bank Insertion Limits,'' and TS 3.1.7, ''Rod Position Indication.''

Date of issuance: June 27, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days from the date of issuance.

Amendment Nos: 196 (Braidwood, Unit 1) and 196 (Braidwood, Unit 2); 202 (Bryon, Unit 1) and 202 (Bryon, Unit 2). A publicly-available version is in ADAMS under Accession No. ML18065A529; documents related to these amendments are listed in the related Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. NPF–72, NPF–77, NPF–37, and NPF–66: The amendments revised the Renewed Facility Operating Licenses and TSs.

*Date of initial notice in **Federal Register:*** August 29, 2017 (82 FR 41069). The supplemental letters dated October 25, 2017, and May 29, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the NRC staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 27, 2018.

No significant hazards consideration comments received: No.

FirstEnergy Nuclear Operating Company, Docket No. 50–440, Perry Nuclear Power Plant, Unit No. 1, Lake County, Ohio

Date of amendment request: September 11, 2017.

Brief description of amendment: The amendment revised the requirements in Technical Specification (TS) 3.3.6.1, ''Primary Containment and Drywell Isolation Instrumentation,'' by adding an ACTIONS note to Limiting Condition of Operation 3.3.6.1 to allow intermittent opening, under administrative control, of containment and drywell penetration flow paths that are isolated.

Date of issuance: June 25, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment No.: 181. A publicly-available version is in ADAMS under Accession No. ML18157A084; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Facility Operating License No. NPF–58: Amendment revised the Facility Operating License and TS.

*Date of initial notice in **Federal Register:*** November 7, 2017 (82 FR 51652).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 25, 2018.

No significant hazards consideration comments received: No.

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Docket No. 50–395, Virgil C. Summer Nuclear Station, Unit No. 1, Fairfield County, South Carolina

Date of amendment request: October 6, 2017, as supplemented by letter dated April 19, 2018.

Brief description of amendment: This amendment increased the Integrated Leak Rate Test Peak Calculated Containment Internal Pressure, Pa, listed in Technical Specification (TS) 6.8.4.g, ''Containment Leakage Rate Testing Program,'' from 45.1 pounds per square inch gauge (psig) to 46.0 psig. It also removed the reference to Regulatory Guide 1.163, ''Performance-Based Containment Leak Test Program,'' and American National Standards Institute/American Nuclear Society (ANSI/ANS)-56.8–2002, ''Containment System Leakage Testing Requirements,'' and replaced the reference of Nuclear Energy Institute (NEI) 94–01, Revision 3–A, ''Industry Guideline for Implementing Performance-Based Option of 10 CFR part 50, Appendix J,'' with NEI 94–01, Revision 2–A.

Date of issuance: June 28, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment No.: 210. A publicly-available version is in ADAMS under Accession No. ML18141A668, documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. NPF–12: Amendment revised the Renewed Facility Operating License and the TS.

*Date of initial notice in **Federal Register:*** November 21, 2017 (82 FR 55409). The supplemental letter dated April 19, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated June 28, 2018.

No significant hazards consideration comments received: No.

Southern Nuclear Operating Company, Docket Nos. 50–348 and 50–364, Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2, Houston County, Alabama

Date of amendment request: December 21, 2017.

Brief description of amendments: The amendments modified Technical Specification (TS) 3.7.5, ''Auxiliary Feedwater (AFW) System,'' to establish a new Completion Time for the Condition where one steam supply to the turbine driven AFW pump is inoperable concurrent with an inoperable motor driven AFW train. In addition, the amendments added specific Conditions and Action requirements: (1) For when two motor driven AFW trains are inoperable at the same time and; (2) for when the turbine driven AFW train is inoperable either (a) due solely to one inoperable steam supply, or (b) due to reasons other than one inoperable steam supply. The proposed changes are consistent with NRC-approved Technical Specification Task Force (TSTF) Traveler, TSTF–412, Revision 3, ''Provide Actions for One Steam Supply to Turbine Driven AFW/EFW [Emergency Feedwater] Pump Inoperable'' dated January 10, 2007.

Date of issuance: June 27, 2018.

Effective date: As of the date of issuance and shall be implemented within 90 days of issuance.

Amendment Nos.: 219 (Unit 1) and 216 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18151A174. Documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. NPF–2 and NPF–8: The amendments revised the Renewed Facility Operating Licenses and TS.

*Date of initial notice in **Federal Register:*** February 13, 2018 (83 FR 6234).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 27, 2018.

No significant hazards consideration comments received: No.

Susquehanna Nuclear, LLC, Docket Nos. 50–387 and 50–388, Susquehanna Steam Electric Station, Unit Nos. 1 and 2, Luzerne County, Pennsylvania

Date of amendment request: December 14, 2017.

Brief description of amendments: The amendments revised Technical Specification (TS) 3.6.4.1, ''Secondary Containment,'' Surveillance Requirement (SR) 3.6.4.1.1. The SR was revised to address conditions during which the secondary containment pressure may not meet the SR pressure requirements. The changes are based on Technical Specification Task Force (TSTF) Traveler TSTF–551, Revision 3, ''Revise Secondary Containment Surveillance Requirements.''

Date of issuance: June 26, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days.

Amendment Nos.: 270 (Unit 1) and 252 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18150A281. Documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. NPF–14 and NPF–22: The amendments revised the Renewed Facility Operating Licenses and TS.

*Date of initial notice in **Federal Register:*** February 27, 2018 (83 FR 8520).

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 26, 2018.

No significant hazards consideration comments received: No.

Tennessee Valley Authority, Docket Nos. 50–390 and 50–391, Watts Bar Nuclear Plant, Units 1 and 2, Rhea County, Tennessee

Date of amendment request: November 23, 2016, as supplemented by letters dated September 29, November 16, and December 27, 2017, and May 11, 2018.

Brief description of amendments: The amendments revised the Technical Specification (TS) requirements on control and shutdown rods, and rod and bank position indication in the Units 1 and 2, TS 3.1.5, ''Rod Group Alignment Limits,'' TS 3.1.6, ''Shutdown Bank Insertion Limits,'' TS 3.1.7, ''Control Bank Insertion Limits,'' and TS 3.1.8, ''Rod Position Indication.''

Date of issuance: June 26, 2018.

Effective date: As of the date of issuance and shall be implemented within 60 days of issuance.

Amendment Nos.: 120 (Unit 1) and 20 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18079A029; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Facility Operating License Nos. NPF–90 and NPF–96: Amendments revised the Facility Operating Licenses and TSs.

*Date of initial notice in **Federal Register:*** March 14, 2017 (82 FR 13672). The supplemental letters dated September 29, November 16, and December 27, 2017, expanded the scope of the amendment request as originally noticed in the **Federal Register**. A second notice was published in the **Federal Register** on February 21, 2018 (83 FR 7500), which superseded the original notice in its entirety. The supplemental letter dated May 11, 2018, provided additional information that clarified the application, did not expand the scope of the application as re-noticed, and did not change the NRC staff's proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated June 26, 2018.

No significant hazards consideration comments received: No.

IV. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Final Determination of No Significant Hazards Consideration and Opportunity for a Hearing (Exigent Public Announcement or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendment. The Commission has determined for this amendment that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual notice of consideration of issuance of amendment, proposed no significant hazards consideration determination, and opportunity for a hearing.

For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public comment on its no significant hazards consideration determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendment has been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that this amendment satisfies the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for this amendment. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License or Combined License, as applicable, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendment. Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. The NRC's regulations are accessible electronically from the NRC Library on the NRC's website at *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* Alternatively, a copy of the regulations is available at the NRC's Public Document Room, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (first floor), Rockville, Maryland 20852. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

As required by 10 CFR 2.309(d) the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements for standing: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest.

In accordance with 10 CFR 2.309(f), the petition must also set forth the specific contentions which the petitioner seeks to have litigated in the proceeding. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner must provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to the specific sources and documents on which the petitioner intends to rely to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant or licensee on a material issue of law or fact. Contentions must be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy the requirements at 10 CFR 2.309(f) with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene. Parties have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that party's admitted contentions, including the opportunity to present evidence, consistent with the NRC's regulations, policies, and procedures.

Petitions must be filed no later than 60 days from the date of publication of this notice. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii). The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document.

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission no later than 60 days from the date of publication of this notice. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. Alternatively, a State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

If a hearing is granted, any person who is not a party to the proceeding and is not affiliated with or represented by a party may, at the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of his or her position on the issues but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing and petition for leave to intervene (petition), any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities that request to participate under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Detailed guidance on making electronic submissions may be found in the Guidance for Electronic Submissions to the NRC and on the NRC website at *http://www.nrc.gov/site-help/e-submittals.html.* Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit adjudicatory documents. Submissions must be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public website at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

Exelon Generation Company, LLC, Docket Nos. 50–277 and 50–278, Peach Bottom Atomic Power Station, Unit Nos. 2 and 3 (Peach Bottom), York County, Pennsylvania

Date of amendment request: June 21, 2018.

Description of amendments: The amendments revised the Peach Bottom Technical Specifications (TSs) for a one-time suspension of the emergency diesel generator (EDG) No. 4 (E–4) surveillance requirements. Specifically, the amendments revised TS Surveillance Requirements 3.8.1.2, 3.8.1.3, 3.8.1.6, and 3.8.3.4 to suspend performing required monthly surveillance testing on the E–4 EDG until the E–3 EDG is returned to operable status, not to exceed 2205 hours Eastern Time on June 27, 2018.

Date of issuance: June 23, 2018.

Effective date: June 23, 2018.

Amendment Nos.: 318 (Unit 1) and 321 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18173A042. Documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–44 and DPR–56: The amendments revised the Renewed Facility Operating Licenses and TSs.

Public comments requested as to proposed no significant hazards consideration: No.

The Commission's related evaluation of the amendments, finding of emergency circumstances, State consultation, and final no significant hazards consideration determination are contained in a Safety Evaluation dated June 23, 2018.

Attorney for licensee: J. Bradley Fewell, Vice President and Deputy General Counsel, Exelon Generation Company, LLC, 200 Exelon Way, Kennett Square, PA 19348.

NRC Branch Chief: James G. Danna.

Dated at Rockville, Maryland, this 5th day of July 2018.

For the Nuclear Regulatory Commission.

Gregory F. Suber,

Deputy Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m. on Thursday, July 19, 2018.

PLACE: Closed Commission Hearing Room 10800.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (6), (7), (8), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matters at the closed meeting.

Commissioner Stein, as duty officer, voted to consider the items listed for the closed meeting in closed session.

The subject matters of the closed meeting will be:

Institution and settlement of injunctive actions;

Institution and settlement of administrative proceedings; and

Other matters relating to enforcement proceedings.

At times, changes in Commission priorities require alterations in the scheduling of meeting items.

CONTACT PERSON FOR MORE INFORMATION: For further information and to ascertain what, if any, matters have been added, deleted or postponed; please contact Brent J. Fields from the Office of the Secretary at (202) 551–5400.

Dated: July 12, 2018.

Lynn M. Powalski,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83618; File No. SR–NASDAQ–2018–050]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing of Proposed Rule Change Relating to the First Trust Senior Loan Fund of First Trust Exchange Traded Fund IV

July 11, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on June 27, 2018, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

[sic] Exchange's proposed rule change relating to the First Trust Senior Loan Fund (the ''Fund'') of First Trust Exchange-Traded Fund IV (the ''Trust''), the shares of which have been approved by the Commission for listing and trading under Nasdaq Rule 5735 (''Managed Fund Shares''). The shares of the Fund are collectively referred to herein as the ''Shares.''

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Commission has approved the listing and trading of Shares under Nasdaq Rule 5735, which governs the listing and trading of Managed Fund Shares on the Exchange.[3] The Exchange believes the proposed rule change reflects no significant issues not previously addressed in the Prior Release.

The Fund is an actively-managed exchange-traded fund (''ETF''). The Shares are offered by the Trust, which was established as a Massachusetts business trust on September 15, 2010. The Trust, which is registered with the Commission as an investment company under the Investment Company Act of 1940 (the ''1940 Act''), has filed a registration statement on Form N–1A (''Registration Statement'') relating to the Fund with the Commission.[4] The Fund is a series of the Trust. The Adviser is the investment adviser to the Fund. First Trust Portfolios L.P. is the principal underwriter and distributor of the Fund's Shares. The Bank of New York Mellon acts as the administrator, custodian and fund accounting and transfer agent to the Fund.

(1) Introduction

The purpose of this proposed rule change is to modify certain provisions set forth in the Prior Notice pertaining to (1) the meaning of the term ''under normal market conditions''; (2) the Fund's investments in Senior Loans[5] and other debt, including, in particular, its investments in Senior Loans and other floating rate loans that are in default; and (3) the Fund's ability to retain various instruments that, although not specifically selected by the Adviser, may be received by the Fund under certain circumstances.

It is important to note that notwithstanding the proposed changes, consistent with the Prior Notice, it is anticipated that the Fund, in accordance with its principal investment strategy, would continue to invest approximately 50% to 75% of its net assets in Senior Loans that are eligible for inclusion in and meet the liquidity thresholds of the S&P/LSTA U.S. Leveraged Loan 100 Index (the ''Primary Index'') and/or the Markit iBoxx USD Liquid Leveraged Loan Index (the ''Secondary Index''[6]). Brief descriptions of the eligibility criteria (including those relating to

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Commission approved Nasdaq Rule 5735 in Securities Exchange Act Release No. 57962 (June 13, 2008), 73 FR 35175 (June 20, 2008) (SR–NASDAQ–2008–039). The Commission previously approved the listing and trading of the Shares of the Fund. *See* Securities Exchange Act Release Nos. 69072 (March 7, 2013), 78 FR 16006 (March 13, 2013) (''Prior Notice'') and 69464 (April 26, 2013), 78 FR 25774 (May 2, 2013) (''Prior Order'' and, together with the Prior Notice, the ''Prior Release'') (SR–NASDAQ–2013–036).

[4] *See* Post-Effective Amendment No. 150 to Registration Statement on Form N–1A for the Trust, dated February 28, 2018 (File Nos. 333–174332 and 811–22559). The descriptions of the Fund and the Shares contained herein are based, in part, on information in the Registration Statement, as amended. First Trust Advisors L.P. (the ''Adviser'') represents that the Adviser will not implement the changes described herein until the instant proposed rule change is operative.

[5] For purposes of this filing, consistent with the description included in the Prior Notice, the Adviser considers ''Senior Loans'' to be first lien senior secured floating rate bank loans.

[6] As a conforming change, the reference to the index that was defined as the Secondary Index in the Prior Notice has been updated to include ''Liquid'' in the name, which is consistent with footnote 9 (and accompanying text) of this filing and footnote 34 (and accompanying text) of the Prior Notice.

liquidity) for the Primary Index and the Secondary Index are set forth below.[7]

Primary Index:[8] The Primary Index measures the performance of 100 large loan facilities meeting specific inclusion criteria. All syndicated leveraged loans covered by the S&P/LSTA Leveraged Loan Index (''LLI'') universe are eligible for inclusion in the Primary Index. Term loans from syndicated credits must meet the following criteria at issuance in order to be eligible for inclusion in the LLI: (i) Senior secured; (ii) U.S. dollar denominated; (iii) minimum initial term of one year; (iv) minimum initial spread of LIBOR + 125 basis points (LIBOR is calculated as the average rate for US Loans in Markit's WSO Database); (v) US$ 50 million initially funded loans; and (vi) the loan must have been bought by an institutional investor, and must currently be in their portfolio. All constituents of the Primary Index (the index loans) must have a publicly assigned CUSIP. There is no minimum size requirement on individual facilities in the Primary Index, but the LLI universe minimum is US$ 50 million. Only the 100 largest facilities from the LLI that meet all eligibility requirements are considered for inclusion. The Primary Index covers all issuers regardless of origin; however, all facilities must be denominated in U.S. dollars.

Secondary Index:[9] The Secondary Index is a subset of the benchmark Markit iBoxx USD Leveraged Loan Index (''USD LLI''). The Secondary Index limits the number of constituent loans in the index by selecting larger and more liquid loans from the USD LLI index universe as determined by a liquidity ranking procedure. As described further below, the procedure utilizes daily liquidity scores from the Markit Loan Pricing Service, which is a broader measure of liquidity, summarizing the performance of each loan across several liquidity metrics, such as number of quotes, or bid-offer sizes.

The following selection criteria are used to derive the eligible universe from the Markit/WSO USD-denominated loan universe: (i) Loan type (only USD-denominated loans are eligible, and the Secondary Index Description includes a list of eligible loan types and ineligible loan types); (ii) minimum size (a minimum facility size of USD $500 million nominal is required); (iii) liquidity/depth of market (described below); (iv) credit rating (only sub-investment grade loans are eligible, defaulted loans are eligible provided they meet all other criteria, and loans designated as ''Not Rated'' by both Moody's Investors Service, Inc., and Standard & Poor's must have a minimum current spread of 125 basis points over LIBOR); (v) spread (rated loans must have a minimum current spread of 125 basis points over LIBOR); and (vi) minimum time to maturity (a minimum initial time to maturity of one year is required).

According to the Secondary Index Description, liquidity/depth of the market can be measured by the number of prices available for a particular loan and the length of time prices have been provided by the minimum required number of price contributors. The liquidity check is based on the 3-month period prior to the rebalancing cut-off date (liquidity test period). Only loans with a minimum liquidity/depth of 2 for at least 50% of trading days of the liquidity test period are eligible. Loans issued less than three months prior to the rebalancing cut-off date require a minimum liquidity/depth of 3 for at least 50% of trading days in the period from the issue date to the rebalancing cut-off date.

In conjunction with the liquidity ranking procedure referenced above, in order to determine the final Secondary Index constituents, the loans in the eligible universe are ranked according to their liquidity scores, as provided by the Markit Loan Pricing Service. Each loan in the MarkitWSO database is assigned a daily score based on the loan's performance on the following liquidity metrics:

—*Sources Quote:* The number of dealers sending out runs.
—*Frequency of Quotes:* Total number of dealer runs.
—*Number of Sources With Size:* The number of dealer runs with associated size.
—*Bid-Offer Spreads:* The average bid-offer spread in dealer runs.
—*Average Quote Size:* The average size parsed from quotes.
—*Movers Count:* The end of the day composite contributions which have moved on that day.

Each loan carries a score ranging from 1 to 5 in ascending order of liquidity, depending on the daily values for the above components. A loan with a score of 1 will have the best performance in each of the categories above. In the liquidity ranking procedure (described in detail in the Secondary Index Description), average liquidity scores are calculated for each loan, over a calendar one- or three-month period immediately preceding each rebalancing date.

In addition, consistent with the Prior Notice, the aggregate amount of the Fund's net assets permitted to be held in illiquid securities (calculated at the time of investment), including Rule 144A securities, junior subordinated loans and unsecured loans deemed illiquid by the Adviser, would continue to be limited to 15%.

(2) Proposed Changes to the Term ''Under Normal Market Conditions''

The Prior Notice stated that according to the Fund's Registration Statement, in pursuing its investment objective, the Fund, under normal market conditions, would seek to outperform a primary and secondary loan index by investing at least 80% of its net assets (plus any borrowings for investment purposes) in ''Senior Loans'' (the ''80% Requirement''). In conjunction with describing and defining the term ''under normal market conditions,'' footnote 10 of the Prior Notice provided the following (the ''Normal Market Conditions Definition''):

> The term ''under normal market conditions'' as used herein includes, but is not limited to, the absence of adverse market, economic, political or other conditions, including extreme volatility or trading halts in the fixed income markets or the financial markets generally; operational issues causing dissemination of inaccurate market information; or *force majeure* type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance. In periods of extreme market disturbance, the Fund may take temporary defensive positions, by overweighting its portfolio in cash/cash-like instruments; however, to the extent possible, the Adviser would continue to seek to achieve the Fund's investment objective. Specifically, the Fund would continue to invest in Senior Loans (as defined herein). In response to prolonged periods of constrained or difficult market conditions the Adviser will likely focus on investing in the largest and most liquid loans available in the market.

To provide additional flexibility and greater consistency with more recent proposed rule change filings relating to other ETFs advised by the Adviser,[10] the

[7] The Prior Notice included descriptions of, and information relating to, the Primary Index and the Secondary Index. However, except to the extent provided below, such descriptions and information have not been updated for purposes of this filing.

[8] The following information regarding the Primary Index is based on information in ''S&P/LSTA U.S. Leveraged Loan 100 Index Methodology (February 2018)''. Information on the Primary Index is available at *www.spindices.com.*

[9] The following information regarding the Secondary Index is based on ''Markit iBoxx USD Liquid Leveraged Loan Index—Index Guide (November 2014)'' (the ''Secondary Index Description''). Information on the Secondary Index is available at *www.markit.com.*

[10] *See* Securities Exchange Act Release No. 80745 (May 23, 2017), 82 FR 24755 (May 30, 2017) (SR–

Exchange is proposing that, going forward, the Normal Market Conditions Definition be replaced with the following:

> The term ''under normal market conditions'' as used herein includes, but is not limited to, the absence of adverse market, economic, political or other conditions, including extreme volatility or trading halts in the fixed income markets or the financial markets generally; operational issues causing dissemination of inaccurate market information; or *force majeure* type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance. The Fund may adopt a defensive strategy (and depart from its principal investment strategies) when the Adviser believes securities in which the Fund normally invests have elevated risks due to political or economic factors and in other extraordinary circumstances. In addition, on a temporary basis, including for defensive purposes, during periods of extreme market disturbance and during periods of high cash inflows or outflows (*i.e.,* rolling periods of seven calendar days during which inflows or outflows of cash, in the aggregate, exceed 10% of the Fund's net assets as of the opening of business on the first day of such periods), the Fund may depart from its principal investment strategies; for example, it may hold a higher than normal proportion of its assets in cash. Under the circumstances described in the prior two sentences, the Fund may not be able to achieve its investment objectives; however, to the extent possible, the Adviser would continue to seek to achieve the Fund's investment objectives by continuing to invest in Senior Loans (as defined herein). In response to prolonged periods of constrained or difficult market conditions the Adviser will likely focus on investing in the largest and most liquid loans available in the market.

The proposed new Normal Market Conditions Definition reflects additional situations where it would be appropriate for the Fund to have the ability to depart from its principal investment strategies, including ''periods of high cash inflows or outflows'' and times when the Adviser believes that securities in which the Fund normally invests ''have elevated risks due to political or economic factors and in other extraordinary circumstances.'' The Exchange does not believe that the proposed changes to the Normal Market Conditions Definition raise concerns. Rather, the Exchange believes that the changes would provide the Fund with appropriate flexibility to adapt to challenging conditions. In particular, the Exchange notes that the term ''periods of high cash inflows or outflows'' is specifically and narrowly defined, and the proposed modifications would potentially help the Fund mitigate risks that may accompany adverse political or economic factors and other extraordinary circumstances.

(3) Proposed Changes to Provisions Pertaining to the Fund's Investments in Senior Loans and Other Debt

Under the heading ''Principal Investments'' (and in certain other provisions of the Prior Notice), the Prior Notice included various representations that were applicable to Senior Loans and, in certain cases, to other debt in which the Fund may invest. As described below, the Adviser is seeking to modify certain of these representations to permit the Fund to invest a limited portion of its net assets in Senior Loans and other floating rate loans that are in default. The Adviser believes that while the proposed changes would provide additional flexibility, the changes would not conflict with the Fund's investment objectives or overall investment strategies or be inconsistent with the Adviser's overall approach to managing the Fund. Rather, the proposed changes would enhance the Adviser's investment opportunities in managing the Fund. In this regard, as stated in the Prior Notice, in selecting securities for the Fund, the Adviser would continue to seek to construct a portfolio of loans that it believes is less volatile than the general loan market. In addition, as stated in the Prior Notice, when making investments, the Adviser would continue to seek to maintain appropriate liquidity and price transparency for the Fund, and the key considerations of portfolio construction would continue to include liquidity, diversification and relative value. The Exchange believes that concerns related to manipulation should be mitigated given that the proposed changes (a) would be limited in scope, and (b) would be subject to the provisions set forth below, which should provide support regarding the Fund's anticipated liquidity profile going forward.

The discussion set forth in the Prior Notice under the heading ''Principal Investments'' included the following ''Defaulted Senior Loan Representation'': ''The Adviser does not intend to purchase Senior Loans that are in default. However, the Fund may hold a Senior Loan that has defaulted subsequent to its purchase by the Fund.'' In addition, the discussion under the heading ''Other Investments'' (pursuant to which the Fund may invest a portion of its assets in, among other things, floating rate loans) included the following ''Floating Rate Loan Representation'': ''The Fund will not invest in floating rate loans of companies whose financial condition is troubled or uncertain and that have defaulted on current debt obligations, as measured at the time of investment.''

The Adviser believes that there may be situations where it would be desirable for the Fund, in pursuing its investment objectives, to have the ability to invest a limited portion of its net assets in Senior Loans and/or other floating rate loans that are in default (collectively, ''Defaulted Loans''). Therefore, to provide the Adviser with additional flexibility in managing the Fund, the Exchange is proposing that, going forward, the Defaulted Senior Loan Representation and the Floating Rate Loan Representation would be deleted and the Fund would be specifically permitted to purchase Defaulted Loans.[11] However, Defaulted Loans would comprise no more than 15% of the Fund's net assets, as determined at the time of purchase (the ''15% Limitation'').[12] If, subsequent to being purchased or otherwise obtained by the Fund, a Senior Loan or other floating rate loan defaults, the Fund may continue to hold such Senior Loan or other floating rate loan without regard to the 15% Limitation; however, such Senior Loan or other floating rate loan would be considered a Defaulted Loan for purposes of determining whether the Fund's purchase of additional Defaulted Loans would comply with the 15% Limitation.[13]

NASDAQ–2017–033) (order approving listing and trading of First Trust California Municipal High Income ETF); and Securities Exchange Act Release No. 78913 (September 23, 2016), 81 FR 69109 (October 5, 2016) (SR–NASDAQ–2016–002) (order approving listing and trading of First Trust Municipal High Income ETF).

[11] As a conforming matter, the representation set forth in footnote 37 of the Prior Notice, which indicated that the Adviser does not intend to invest in defaulted Senior Loans, would be deleted.

[12] For the avoidance of doubt, Defaulted Loans that are Senior Loans would be taken into account for purposes of compliance with the 80% Requirement. In addition, for the avoidance of doubt, the 15% Limitation would not restrict the Fund's ability to invest in loans of companies that have defaulted only on other debt obligations.

[13] Currently, the Prior Notice does not limit the Fund's ability to hold Senior Loans that have defaulted subsequent to being purchased by the Fund. In addition, the Commission has previously approved other proposed rule change filings involving actively-managed ETFs that incorporated the ability to invest a certain portion of their respective assets in defaulted securities. *See, e.g.,* Securities Exchange Act Release No. 80946 (June 15, 2017), 82 FR 28126 (June 20, 2017) (SR–NASDAQ–2017–039) (order approving listing and trading of Guggenheim Limited Duration ETF); Securities Exchange Act Release No. 80865 (June 6, 2017), 82 FR 26970 (June 12, 2017) (SR–NYSEArca–2017–48) (order approving listing and trading of Franklin Liberty Intermediate Municipal Opportunities ETF); Securities Exchange Act Release No. 80745 (May 23, 2017), 82 FR 24755

Continued

For consistency with the above proposed changes, the Exchange is proposing that certain other representations that are set forth under the heading ''Principal Investments'', but that apply to both Senior Loans and other debt, be modified. First, the discussion set forth under the heading ''Principal Investments'' included the following statement (the ''Credit Metrics Representation''): ''The Fund will include borrowers that the Adviser believes have strong credit metrics, based on its evaluation of cash flows, collateral coverage and management teams.'' In light of the proposed changes described above, the Exchange is proposing that the Credit Metrics Representation be modified to read as follows: ''As a general matter, the Fund will include borrowers that the Adviser believes have strong credit metrics, based on its evaluation of cash flows, collateral coverage and management teams.''

Additionally, to enhance consistency with the above proposed changes, the Exchange is proposing that the three paragraphs set forth in the Prior Notice immediately below the Defaulted Senior Loan Representation (which related to certain attributes that the Adviser intended to seek in selecting investments for the Fund) (the ''Senior Loan/Other Debt Representations'') be replaced with the following:

''As a general matter, the Adviser intends to invest in Senior Loans or other debt of companies that it believes have developed strong positions within their respective markets and exhibit the potential to maintain sufficient cash flows and profitability to service their obligations in a range of economic environments. The Adviser will generally seek to invest in Senior Loans or other debt of companies that it believes possess advantages in scale, scope, customer loyalty, product pricing, or product quality versus their competitors, thereby minimizing business risk and protecting profitability.

As a general matter, the Adviser will seek to invest in Senior Loans or other debt of established companies it believes have demonstrated a record of profitability and cash flows over several economic cycles. The Adviser does not generally intend to invest in Senior Loans or other debt of primarily start-up companies, companies in turnaround situations or companies with speculative business plans; however, it may invest in such companies from time to time.

As a general matter, the Adviser intends to focus on investments in which the Senior Loans or other debt of a target company has an experienced management team with an established track record of success. The Adviser will generally require companies to have in place proper incentives to align management's goals with the Fund's goals.''

The discussion set forth in the Prior Notice under the heading ''Criteria to Be Applied to the Fund'' included a representation by the Adviser that under normal market conditions, the Fund would generally satisfy the generic fixed income initial listing requirements in Nasdaq Rule 5705(b)(4) on a continuous basis measured at the time of purchase, as described in the discussion under such heading. The Adviser confirms that going forward, the Fund would generally satisfy the generic fixed income listing requirements in Nasdaq Rule 5705(b)(4) (as such requirements have been modified since the issuance of the Prior Order) on a continuous basis measured at the time of purchase,[14] as described in the discussion under such heading, subject to the exceptions and modifications described in the Prior Notice and in this filing.[15]

Additionally, the discussion set forth in the Prior Notice under the heading ''Description of Senior Loans and the Senior Loan Market'' (the ''Senior Loan Discussion'') included certain representations as well as information pertaining to the Senior Loan market as it existed at or close to the time of the Prior Notice. Given the time that has elapsed, the Adviser believes that although certain provisions of the Senior Loan Discussion continue to be relevant, much of such discussion is no longer particularly useful. Therefore, the Exchange is proposing that the Senior Loan Discussion and accompanying heading be deleted in their entirety and, for purposes of this filing, replaced with the following:

Additional Information About the Fund's Investments in Senior Loans

The Fund will primarily invest in the more liquid and higher rated segment of the Senior Loan market. In this regard, the average credit rating of the Senior Loans that the Fund typically will hold will be rated between the categories of BB and B as rated by S&P. Further, the most actively traded loans in the Senior Loan market will generally have a tranche size outstanding (or total float of the issue) in excess of $250 million. The borrowers of these broadly syndicated bank loans will typically be followed by many ''buy-side'' and ''sell-side'' credit analysts who will in turn rely on the borrower to provide transparent financial information concerning its business performance and operating results. The Adviser represents that such borrowers typically provide significant financial transparency to the market through the delivery of financial statements on at least a quarterly basis as required by the executed credit agreements. Additionally, bids and offers in the Senior Loans are available throughout the trading day on larger Senior Loans issues with multiple dealer quotes available.

The Adviser represents that the underwriters, or agent banks, which distribute, syndicate and trade Senior Loans are among the largest global financial institutions. It is common for multiple firms to act as underwriters and market makers for a specific Senior Loan issue.

The Adviser represents that the segment of the Senior Loan market that the Fund will focus on is highly liquid.[16]

(4) Proposed Changes to Provisions Pertaining to ''Received Instruments'' (as defined below)

As described in the Prior Notice, under normal market conditions, the Fund invests at least 80% of its net assets (plus any borrowings for investment purposes) in Senior Loans. Additionally, under the heading ''Other Investments'', the Prior Notice stated that the Fund ''may receive equity, warrants, corporate bonds and other such securities'' (collectively, ''Received

(May 30, 2017) (SR–NASDAQ–2017–033) (order approving listing and trading of First Trust California Municipal High Income ETF); Securities Exchange Act Release No. 78913 (September 23, 2016), 81 FR 69109 (October 5, 2016) (SR–NASDAQ–2016–002) (order approving listing and trading of First Trust Municipal High Income ETF); and Securities Exchange Act Release No. 68972 (February 22, 2013), 78 FR 13721 (February 28, 2013) (SR–NASDAQ–2012–147) (order approving listing and trading of First Trust High Yield Long/Short ETF).

[14] In conjunction with the Adviser's confirmation of this representation, the Exchange believes that is appropriate to retain the phrase ''at the time of purchase'' in order to be consistent with the Prior Notice and to avoid causing the representation to become more burdensome than originally approved. The Exchange also notes that the Fund is subject to extensive representations, set forth both in the Prior Notice and in this filing, that were specifically tailored for the Fund and are not included in Nasdaq Rule 5705(b)(4) or Nasdaq Rule 5735(b)(1)(B).

[15] *See infra* the discussions relating to the proposed changes regarding the ''Convertible Securities Restriction'' (referencing Nasdaq Rule 5705(b)(4)(A)(iii)) and the ''Par Amount Representation'' (referencing Nasdaq Rule 5705(b)(4)(A)(vi)).

[16] *See* the discussion under ''Introduction,'' *supra.* Further, based on data available from the Loan Syndications and Trading Association (''LSTA''), the average monthly market breadth (*i.e.,* the number of unique loans traded monthly) reached a record 1,472 loans during the first quarter of 2018, with March 2018 being the fifth consecutive month during which more than 1,450 unique loans traded. Further, secondary loan trading volume totaled $54.6 billion in March 2018, bringing first quarter 2018 volumes to $164 billion. Trade activity increased 10% quarter-over-quarter, but fell 11% year-over-year. However, a record-breaking $181.6 billion of secondary trading volume occurred during the first quarter of 2017.

Instruments'') as a result of the restructuring of the debt of an issuer, or a reorganization of a senior loan or bond, or acquired together with a high yield bond or senior loan(s) of an issuer (collectively, the ''Received Instruments Triggers''). Further, the Prior Notice stated that such investments (*i.e.,* the Received Instruments) would be subject to the Fund's investment objectives, restrictions and strategies, as described therein.

Although the Adviser's overall approach to managing the Fund would not change, the Adviser believes that under certain circumstances, a limited ability to retain Received Instruments beyond the parameters set forth in the Prior Notice may serve to benefit shareholders to the extent it helps the Fund to pursue its investment objectives by retaining an investment interest, which the Adviser believes has merit, relating to a particular issuer.[17] Accordingly, to provide the Fund with additional flexibility with respect to its ability to retain Received Instruments, going forward, the Exchange is proposing that the Received Instruments Triggers and certain other restrictions and representations set forth in the Prior Notice be modified, as described below. The Exchange believes that concerns related to manipulation should be mitigated given that the proposed changes (a) would be limited in scope, and (b) would be subject to the limits described below, which should provide support regarding the Fund's anticipated liquidity profile going forward. Additionally, in this regard, the Exchange believes that the Adviser's expectation that generally, over time, significantly less than 20% of the Fund's net assets would be comprised of Equity-Based Received Instruments (which means that significantly less than 20% of the Fund's net assets are expected to be comprised of instruments that do not satisfy the ''ISG Restriction'' (as defined below)) should help to alleviate manipulation concerns.

Received Instruments Triggers. Going forward, the Exchange is proposing that the Received Instruments Triggers be modified to provide that the Fund may receive Received Instruments (a) in conjunction with the restructuring or reorganization, as applicable, of an issuer or any debt issued by an issuer, whether accomplished within or outside of a bankruptcy proceeding under 11 U.S.C. 101 *et seq.* (or any other similar statutory restructuring or reorganization proceeding) or (b) together with one or more Senior Loans (or other debt instruments) of an issuer.[18] The Fund's ability to retain Received Instruments would be subject to the Fund's investment objectives, restrictions and strategies, as described in the Prior Notice, subject to the modifications set forth in this filing. The Fund's aggregate holdings in (1) Received Instruments that are not Senior Loans and (2) Received Instruments that are Senior Loans and do not satisfy the Par Amount Representation (as defined below) would be limited to 20% of the Fund's net assets.

Equity and Equity-Like Instruments and Interests. Under the heading ''Other Investments,'' the Prior Notice stated that except for investments in ETFs that may hold non-U.S. issues, the Fund would not otherwise invest in non-U.S. equity issues (the ''Non-U.S. Equity Restriction''). The Prior Notice also stated that the equity securities in which the Fund may invest would be limited to securities that trade in markets that are members of the Intermarket Surveillance Group (''ISG''), which includes all U.S. national securities exchanges and certain foreign exchanges, or are parties to a comprehensive surveillance sharing agreement with the Exchange (the ''ISG Restriction''). In light of the many types of interests that may be received under the circumstances described above in the proposed Received Instruments Triggers and variations in nomenclature, the Exchange is proposing that, going forward, the Fund may retain, without regard to the Non-U.S. Equity Restriction or the ISG Restriction, Received Instruments that would encompass a broad range of U.S. and non-U.S. equity and equity-like positions and interests (''Equity-Based Received Instruments''). For the avoidance of doubt, for purposes of this filing, such Equity-Based Received Instruments shall mean any one or more of the following (whether received individually or as part of a unit or package of securities and/or other instruments): (i) Common and preferred equity interests in corporations; (ii) membership interests (*e.g.,* in limited liability companies), partnership interests, and interests in other types of entities (*e.g.,* state law business trusts and real estate investment companies); (iii) warrants; (iv) Tax Receivable Agreement (TRA) rights; (v) claims (generally, rights to payment, which can come in various forms, including without limitation claims units and claims trusts); (vi) trust certificates representing an interest in a trust established under a confirmed plan of reorganization; (vii) interests in liquidating, avoidance or other types of trusts; (viii) interests in joint ventures; and (ix) rights to acquire any of the Equity-Based Received Instruments described in clauses (i) through (viii).[19]

Except as described in this filing, the Fund's ability to retain Equity-Based Received Instruments would continue to be subject to the Fund's investment objectives, restrictions and strategies, as described in the Prior Notice. As indicated above, the Fund would not hold more than 20% of its net assets in Equity-Based Received Instruments.[20]

Convertible Securities/Debt Instruments. Under the heading ''Principal Investments'', the Prior Notice included a representation that each of the Fund's Senior Loan investments was expected to have no less than $250 million USD par outstanding (the ''Par Amount Representation'').[21] Further, under the heading ''Criteria to Be Applied to the Fund,'' in connection with certain criteria to be applied to the Fund based on the generic listing standards for Index Fund Shares set forth under Nasdaq Rule 5705(b)(4), the Prior Notice included a representation by the Adviser that the Fund would not typically invest in convertible securities, but that should the Fund make such investments, the Adviser would direct the Fund to divest any

[17] For example, a situation may arise where in lieu of a Senior Loan, bond, or other debt instrument that the Adviser originally selected, the Fund would be presented with new equity of or relating to the applicable issuer, but, in light of certain restrictions and representations in the Prior Notice, would be precluded from retaining the instrument and would therefore be required to dispose of the instrument despite its perceived benefit to shareholders of the Fund, in order to maintain compliance with the continued listing standards of the Exchange.

[18] For example, incidental to the Fund's purchase of a Senior Loan, the Fund may from time to time receive warrants and/or other equity securities as part of a unit or package combining a Senior Loan and such warrants and/or other equity securities.

[19] The Fund may be entitled to acquire additional Equity-Based Received Instruments by exercising warrants (included in clause (iii)) and/or rights (included in clause (ix)). For the avoidance of doubt, the Fund's ability to retain Equity-Based Received Instruments that it acquires by exercising such warrants and/or rights will be the same as its ability to retain Equity-Based Received Instruments that it otherwise receives.

[20] In this regard, however, the Adviser expects that, generally, over time, significantly less than 20% of the Fund's net assets would be comprised of Equity-Based Received Instruments. In addition, for the avoidance of doubt, Equity-Based Received Instruments would not be taken into account for purposes of compliance with the 80% Requirement.

[21] The Par Amount Representation is also deemed to include the similar representation set forth under ''Criteria to Be Applied to the Fund'' which provided that the Fund may invest in Senior Loans borrowed by entities that would not meet the criteria set forth in Nasdaq Rule 5705(b)(4)(A)(vi) provided the borrower has at least $250 million outstanding in Senior Loans.

converted equity security as soon as practicable (the ''Convertible Securities Restriction'').

Going forward, the Exchange is proposing that the Fund may retain in its portfolio, without regard to the Credit Metrics Representation (modified as described above), the Senior Loan/Other Debt Representations (modified as described above), the Par Amount Representation or the Convertible Securities Restriction, Received Instruments. Further, the Exchange is proposing that the Fund would be permitted to continue to retain in its portfolio Received Instruments that are convertible securities after such securities have converted (*i.e.,* as Equity-Based Received Instruments, which would not be taken into account for purposes of compliance with the 80% Requirement) without regard to the Convertible Securities Restriction, the Non-U.S. Equity Restriction or the ISG Restriction. In addition, for the avoidance of doubt, Received Instruments that are convertible securities, bonds, loans or other debt instruments of any type may be issued by U.S. and/or non-U.S. issuers.[22]

Except as described in this filing, the Fund's investments in, and ability to hold, Senior Loans, convertible securities and other debt instruments would continue to be subject to the Fund's investment objectives, restrictions and strategies, as described in the Prior Notice. As indicated above, the Fund would not hold more than 20% of its net assets, in the aggregate, in (1) Received Instruments that are not Senior Loans and (2) Received Instruments that are Senior Loans and do not satisfy the Par Amount Representation. Although it is possible that the Fund's holdings may include certain Received Instruments that are Senior Loans that *do not* satisfy the Par Amount Representation, at least 80% of the Fund's net assets would be comprised of Senior Loans that *do* satisfy the Par Amount Representation.

Availability of Information

Intra-day executable price quotations for the Senior Loans, fixed income securities and other assets (including any Received Instruments and Defaulted Loans) held by the Fund would be available from major broker-dealer firms and/or market data vendors (and/or, if applicable, on the exchange on which they are traded). Intra-day price information for the holdings of the Fund would be available through subscription services, such as Markit, Bloomberg and Thomson Reuters, which can be accessed by authorized participants and other investors, and/or from independent pricing services.[23] In addition, the Fund's Disclosed Portfolio, as defined in Nasdaq Rule 5735(c)(2), would include the Received Instruments and Defaulted Loans held by the Fund. Further, for the Fund, an estimated value, defined in Nasdaq Rule 5735(c)(3) as the ''Intraday Indicative Value'' that reflects an estimated intraday value of the Fund's portfolio, would continue to be disseminated.

Surveillance

The Exchange represents that trading in the Shares would be subject to the existing trading surveillances, administered by both Nasdaq and also the Financial Industry Regulatory Authority (''FINRA''), on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws.[24] The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws.

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.

FINRA, on behalf of the Exchange, would communicate as needed regarding trading in the Shares and the exchange-listed instruments held by the Fund (including exchange-listed Equity-Based Received Instruments (if any) and any other exchange-listed equity securities) with other markets and other entities that are members of ISG or exchanges with which the Exchange has a comprehensive surveillance sharing agreement[25] and FINRA and the Exchange both may obtain trading information regarding trading in the Shares and such exchange-listed instruments held by the Fund from markets and other entities that are members of ISG, which include securities exchanges, or with which the Exchange has in place a comprehensive surveillance sharing agreement. Moreover, FINRA, on behalf of the Exchange, would be able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's Trade Reporting and Compliance Engine (''TRACE'').

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

Continued Listing Representations

All statements and representations made in this filing regarding (a) the description of the portfolio or reference assets, (b) limitations on portfolio holdings or reference assets, (c) dissemination and availability of the reference asset or intraday indicative values, or (d) the applicability of Exchange listing rules shall constitute continued listing requirements for listing the Shares on the Exchange. In addition, the issuer has represented to the Exchange that it will advise the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under the Nasdaq 5800 Series.

The Adviser represents that there would be no change to the Fund's investment objectives. Except as provided herein, all other representations made in the Prior Notice would remain unchanged.[26] Except for the generic listing provisions of Nasdaq Rule 5735(b)(1) (the ''generic listing standards'')[27] and as otherwise

[22] This is consistent with the terms of the Prior Release, which, as set forth under the heading ''Principal Investments'' in the Prior Notice, stated that the Fund would invest in Senior Loans that are made predominantly to businesses operating in North America, but may also invest in Senior Loans made to businesses operating outside of North America, and, as set forth under the heading ''Other Investments'' in the Prior Notice, permits the Fund to invest in debt securities issued by non-U.S. companies that are traded over-the-counter or listed on an exchange.

[23] In conjunction with the information provided in this paragraph, the Exchange is proposing that the second sentence of footnote 40 of the Prior Notice (which provided that International Data Corporation (''IDC'') is the primary price source for ''Other Investments'') be deleted.

[24] FINRA surveils trading on the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA's performance under this regulatory services agreement.

[25] For a list of the current members of ISG, *see www.isgportal.org.* The Exchange notes that not all components of the Disclosed Portfolio may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

[26] Certain provisions of the Prior Notice, however, were based on information as of a particular date and there has not been an undertaking to update such information for purposes of this filing.

[27] In particular, consistent with the statements in the Prior Notice to the effect that the Fund may not meet the criteria set forth in Nasdaq Rule

provided in this filing, the Fund and the Shares would continue to comply with the requirements applicable to Managed Fund Shares under Nasdaq Rule 5735.

2. Statutory Basis

Nasdaq believes that the proposal is consistent with Section 6(b) of the Act in general and Section 6(b)(5) of the Act, in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest. The purpose of the proposed rule change is to modify certain provisions set forth in the Prior Notice pertaining to (1) the Normal Market Conditions Definition; (2) the Fund's investments in Senior Loans and other debt, including, in particular, its investments in Defaulted Loans; and (3) the Fund's ability to retain Received Instruments. Except as provided herein, all other representations made in the Prior Notice would remain unchanged. Except for the generic listing standards and as otherwise provided in this filing, the Fund and the Shares would continue to comply with the requirements applicable to Managed Fund Shares under Nasdaq Rule 5735.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares would continue to be listed and traded on the Exchange pursuant to Nasdaq Rule 5735. The Exchange also notes the continued listing representations set forth above and that except as provided herein, all other representations made in the Prior Notice would remain unchanged. The Exchange represents that trading in the Shares would continue to be subject to the existing trading surveillances, administered by both Nasdaq and also FINRA, on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws. FINRA, on behalf of the Exchange, would communicate as needed regarding trading in the Shares and the exchange-listed instruments held by the Fund (including exchange-listed Equity-Based Received Instruments (if any) and any other exchange-listed equity securities) with other markets and other entities that are members of ISG or exchanges with which the Exchange has a comprehensive surveillance sharing agreement and FINRA and the Exchange both may obtain information regarding trading in the Shares and such exchange-listed instruments held by the Fund from markets and other entities that are members of ISG, which include securities exchanges, or with which the Exchange has in place a comprehensive surveillance sharing agreement. Moreover, FINRA, on behalf of the Exchange, would be able to access, as needed, trade information for certain fixed income securities held by the Fund reported to FINRA's TRACE. The Exchange notes that although the proposed changes in this filing would permit the Fund to retain, without regard to the ISG Restriction and the Non-U.S. Equity Restriction, Equity-Based Received Instruments, the Fund would not hold more than 20% of its net assets in Equity-Based Received Instruments (which would not be taken into account for purposes of compliance with the 80% Requirement), and the Adviser expects that generally, over time, significantly less than 20% of the Fund's net assets would be comprised of Equity-Based Received Instruments, which, together, should mitigate the risks associated with manipulation.

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Adviser represents that the purpose of the proposed changes is to provide it with greater flexibility in meeting the Fund's investment objectives by modifying certain provisions in the Prior Notice. Notwithstanding the proposed changes, however, consistent with the Prior Notice, it is anticipated that the Fund, in accordance with its principal investment strategy, would continue to invest approximately 50% to 75% of its net assets in Senior Loans that are eligible for inclusion in and meet the liquidity thresholds of the Primary Index and/or the Secondary Index.[28] Additionally, consistent with the Prior Notice, the aggregate amount of the Fund's net assets permitted to be held in illiquid securities (calculated at the time of investment), including Rule 144A securities, junior subordinated loans and unsecured loans deemed illiquid by the Adviser, would continue to be limited to 15%.

With respect to the proposed changes relating to the Normal Market Conditions Definition, the Exchange does not believe that the proposed changes raise concerns. Rather, the Exchange believes that the proposed changes would provide the Fund with appropriate flexibility to adapt to challenging conditions and would potentially help the Fund mitigate risks that may accompany adverse political or economic factors and other extraordinary circumstances. Moreover, the proposed changes are consistent with prior Commission approvals of proposed rule changes relating to other ETFs advised by the Adviser.

With respect to the proposed changes relating to Defaulted Loans, the Exchange notes that the Adviser believes that while the proposed changes would provide additional flexibility, the changes would not conflict with the Fund's investment objectives or overall investment strategies or be inconsistent with the Adviser's overall approach to managing the Fund. Rather, the proposed changes would enhance the Adviser's investment opportunities in managing the Fund. In this regard, as stated in the Prior Notice, in selecting securities for the Fund, the Adviser would continue to seek to construct a portfolio of loans that it believes is less volatile than the general loan market.

In addition, when making investments, the Adviser would continue to seek to maintain appropriate liquidity and price transparency for the Fund, and the key considerations of portfolio construction would continue to include liquidity, diversification and relative value. The Exchange believes that concerns related to manipulation should be mitigated given that the proposed changes (a) would be limited in scope, and (b) would be subject to the provisions described above, which should provide support regarding the Fund's anticipated liquidity profile going forward. In particular, pursuant to the 15% Limitation, Defaulted Loans would comprise no more than 15% of the Fund's net assets, as determined at the time of purchase. If, subsequent to being purchased or otherwise obtained by the Fund, a Senior Loan or other floating rate loan defaulted, the Fund could continue to hold such Senior

5705(b)(4)(A)(vi), the Fund may not meet the similar criteria of Nasdaq Rule 5735(b)(1)(B)(iv); however, under normal market conditions, the Fund would generally be expected to meet the other criteria set forth in Nasdaq Rule 5735(b)(1)(B). Additionally, the Fund's investments in equity securities are not generally expected to meet the criteria set forth in Nasdaq Rule 5735(b)(1)(A) and, to the extent the Fund invests in cash equivalents, such investments may not necessarily satisfy the criteria set forth in Nasdaq Rule 5735(b)(1)(C) (for example, the requirement that maturities be less than three months). The criteria set forth in Nasdaq Rules 5735(b)(1)(D), (E) and (F) are irrelevant given that the Fund does not and will not invest in listed or over-the-counter derivatives (and, for the avoidance of doubt, Equity-Based Received Instruments (including without limitation warrants and rights referenced above in footnote 19 and the accompanying text) will not be considered to be options or any other type of derivative).

[28] *See supra* footnotes 6–9 and accompanying text.

Loan or other floating rate loan without regard to the 15% Limitation; however, such Senior Loan or other floating rate loan would be considered a Defaulted Loan for purposes of determining whether the Fund's purchase of additional Defaulted Loans would comply with the 15% Limitation. Based on the foregoing, the Exchange does not believe that the proposed changes will adversely affect investors or Exchange trading.

With respect to the proposed changes relating to Received Instruments, although the Adviser's overall approach to managing the Fund would not change, the Adviser believes that under certain circumstances, a limited ability to retain Received Instruments beyond the parameters set forth in the Prior Notice may serve to benefit shareholders to the extent it helps the Fund to pursue its investment objectives by retaining an investment interest, which the Adviser believes has merit, relating to a particular issuer. The Exchange believes that concerns related to manipulation should be mitigated given that the proposed changes (a) would be limited in scope, and (b) would be subject to the limits described above, which should provide support regarding the Fund's anticipated liquidity profile going forward. As indicated above, the Fund would not hold more than 20% of its net assets, in the aggregate, in (1) Received Instruments that are not Senior Loans and (2) Received Instruments that are Senior Loans and do not satisfy the Par Amount Representation. Further, although it is possible that the Fund's holdings may include certain Received Instruments that are Senior Loans that *do not* satisfy the Par Amount Representation, at least 80% of the Fund's net assets would be comprised of Senior Loans that *do* satisfy the Par Amount Representation.

Additionally, the Exchange believes that the Adviser's expectation that generally, over time, significantly less than 20% of the Fund's net assets would be comprised of Equity-Based Received Instruments (which means that significantly less than 20% of the Fund's net assets are expected to be comprised of instruments that do not satisfy the ISG Restriction) should help to alleviate manipulation concerns. Further, Equity-Based Received Instruments would not be taken into account for purposes of compliance with the 80% Requirement. Based on the foregoing, the Exchange does not believe that the proposed changes will adversely affect investors or Exchange trading.

In addition, a large amount of information would continue to be publicly available regarding the Fund and the Shares, thereby promoting market transparency. For example, the Intraday Indicative Value, available on the Nasdaq Information LLC proprietary index data service, would continue to be widely disseminated by one or more major market data vendors and broadly displayed at least every 15 seconds during the Regular Market Session. On each business day, before commencement of trading in Shares in the Regular Market Session on the Exchange, the Fund would continue to disclose on the applicable website[29] the Disclosed Portfolio that will form the basis for the Fund's calculation of net asset value (''NAV'') at the end of the business day. Intra-day executable price quotations for the Senior Loans, fixed income securities and other assets (including any Received Instruments and Defaulted Loans) held by the Fund would be available from major broker-dealer firms and/or market data vendors (and/or, if applicable, on the exchange on which they are traded). Intra-day price information for the holdings of the Fund would be available through subscription services, such as Markit, Bloomberg and Thomson Reuters, which can be accessed by authorized participants and other investors, and/or from independent pricing services. In addition, the Fund's Disclosed Portfolio would include the Received Instruments and Defaulted Loans held by the Fund.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that the additional flexibility to be afforded to the Adviser under the proposed rule change is intended to enhance its ability to meet the Fund's investment objectives, to the benefit of investors. In addition, consistent with the Prior Notice, NAV per Share would continue to be calculated daily, and NAV and the Disclosed Portfolio would continue to be made available to all market participants at the same time. Further, as noted above and/or in the Prior Notice, investors would continue to have ready access to information regarding the Fund's holdings, the Intraday Indicative Value, the Disclosed Portfolio, and quotation and last sale information for the Shares.

For the above reasons, Nasdaq believes the proposed rule change is consistent with the requirements of Section 6(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed rule change would provide the Adviser with additional flexibility, thereby helping the Fund to achieve its investment objectives. As such, it is expected that the Fund may become a more attractive investment product in the marketplace and, therefore, that the proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2018–050 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2018–050. This

[29] *www.ftportfolios.com.*

file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2018–050 and should be submitted on or before August 7, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[30]

Eduardo A. Aleman,

Assistant Secretary.

[FR Doc. 2018–15177 Filed 7–16–18; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 33159; 812–14829]

TriLine Index Solutions, LLC and ETF Series Solutions

July 11, 2018.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 ("Act") for an exemption from section 15(a) of the Act and rule 18f–2 under the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6–07(2)(a), (b), and (c) of Regulation S–X ("Disclosure Requirements"). The requested exemption would permit an investment adviser to hire and replace certain sub-advisers without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the sub-advisers.

APPLICANTS: ETF Series Solutions (the "Trust"), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series, and TriLine Index Solutions, LLC (the "Initial Adviser"), a Delaware limited liability company registered as an investment adviser under the Investment Advisers Act of 1940.

FILING DATES: The application was filed on October 4, 2017 and amended on May 2, 2018.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on August 3, 2018, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. Applicants: ETF Series Solutions, 615 E Michigan Street, Milwaukee, WI 53202, and TriLine Index Solutions, LLC, 8117 Preston Road, Suite 260, Dallas, TX 75225.

FOR FURTHER INFORMATION CONTACT: Bruce R. MacNeil, Senior Counsel, at (202) 551–6817, or Kaitlin C. Bottock, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's website by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. The Initial Adviser is the investment adviser to the Trust's Pickens Oil Response ETF ("Initial Fund") pursuant to an investment management agreement with the Trust ("Investment Management Agreement").[1] Under the terms of the Investment Management Agreement, the Adviser, subject to the supervision of the board of trustees of the Trust ("Board"), provides continuous investment management of the assets of each Subadvised Fund. Consistent with the terms of the Investment Management Agreement, the Adviser may, subject to the approval of the Board, delegate portfolio management responsibilities of all or a portion of the assets of a Subadvised Fund to one or more Sub-Advisers.[2] The Adviser will continue to have overall responsibility for the management and investment of the assets of each Subadvised Fund. The Adviser will evaluate, select, and recommend Sub-Advisers to manage the assets of a Subadvised Fund and will oversee, monitor and review the Sub-Advisers and their performance and

[30] 17 CFR 200.30–3(a)(12).

[1] Applicants request relief with respect to the Initial Fund, as well as to any future series of the Trust and any other existing or future registered open-end management investment company or series thereof that, in each case, is advised by the Initial Adviser or any entity controlling, controlled by, or under common control with, the Initial Adviser or its successors (each, also an "Adviser"), uses the multi-manager structure described in the application, and complies with the terms and conditions set forth in the application (each, a "Subadvised Fund"). For purposes of the requested order, "successor" is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization. Future Subadvised Funds may be operated as a master-feeder structure pursuant to section 12(d)(1)(E) of the Act. In such a structure, certain series of the Trust (each, a "Feeder Fund") may invest substantially all of their assets in a Subadvised Fund (a "Master Fund") pursuant to section 12(d)(1)(E) of the Act. No Feeder Fund will engage any sub-advisers other than through approving the engagement of one or more of the Master Fund's sub-advisers.

[2] As used herein, a "Sub-Adviser" for a Subadvised Fund is (1) an indirect or direct "wholly owned subsidiary" (as such term is defined in the Act) of the Adviser for that Subadvised Fund, or (2) a sister company of the Adviser for that Subadvised Fund that is an indirect or direct "wholly-owned subsidiary" of the same company that, indirectly or directly, wholly owns the Adviser (each of (1) and (2) a "Wholly-Owned Sub-Adviser" and collectively, the "Wholly-Owned Sub-Advisers"), or (3) not an "affiliated person" (as such term is defined in section 2(a)(3) of the Act) of the Subadvised Fund, any Feeder Fund invested in a Master Fund, the Trust, or the Adviser, except to the extent that an affiliation arises solely because the Sub-Adviser serves as a sub-adviser to a Subadvised Fund ("Non-Affiliated Sub-Advisers").

recommend the removal or replacement of Sub-Advisers.

2. Applicants request an order to permit the Adviser, subject to the approval of the Board, to enter into investment sub-advisory agreements with the Sub-Advisers (each, a ''Sub-Advisory Agreement'') and materially amend such Sub-Advisory Agreements without obtaining the shareholder approval required under section 15(a) of the Act and rule 18f–2 under the Act.[3] Applicants also seek an exemption from the Disclosure Requirements to permit a Subadvised Fund to disclose (as both a dollar amount and a percentage of the Subadvised Fund's net assets): (a) The aggregate fees paid to the Adviser and any Wholly-Owned Sub-Adviser; (b) the aggregate fees paid to Non-Affiliated Sub-Advisers; and (c) the fee paid to each Affiliated Sub-Adviser (collectively, Aggregate Fee Disclosure'').[4]

3. Applicants agree that any order granting the requested relief will be subject to the terms and conditions stated in the application. Such terms and conditions provide for, among other safeguards, appropriate disclosure to Subadvised Funds' shareholders and notification about sub-advisory changes and enhanced Board oversight to protect the interests of the Subadvised Funds' shareholders.

4. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provisions of the Act, or any rule thereunder, if such relief is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act. Applicants believe that the requested relief meets this standard because, as further explained in the application, the Investment Management Agreements will remain subject to shareholder approval, while the role of the Sub-Advisers is substantially equivalent to that of individual portfolio managers, so that requiring shareholder approval of Sub-Advisory Agreements would impose unnecessary delays and expenses on the Subadvised Funds. Applicants believe that the requested relief from the Disclosure Requirements meets this standard because it will improve the Adviser's ability to negotiate fees paid to the Sub-Advisers that are more advantageous for the Subadvised Funds.

For the Commission, by the Division of Investment Management, under delegated authority.

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 33158; 812–14828]

SL Advisors, LLC and ETF Series Solutions

July 11, 2018.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice.

Notice of an application under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from section 15(a) of the Act and rule 18f–2 under the Act, as well as from certain disclosure requirements in rule 20a–1 under the Act, Item 19(a)(3) of Form N–1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6–07(2)(a), (b), and (c) of Regulation S–X (''Disclosure Requirements''). The requested exemption would permit an investment adviser to hire and replace certain sub-advisers without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the sub-advisers.

APPLICANTS: ETF Series Solutions (the ''Trust''), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series, and SL Advisors, LLC (the ''Initial Adviser''), a New Jersey limited liability company registered as an investment adviser under the Investment Advisers Act of 1940.

FILING DATES: The application was filed on October 2, 2017 and amended on May 3, 2018.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on August 3, 2018, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. Applicants: ETF Series Solutions, 615 E Michigan Street, Milwaukee, WI 53202, and SL Advisors, LLC, 210 Elmer Street, Westfield, NJ 07090–2128.

FOR FURTHER INFORMATION CONTACT: Bruce R. MacNeil, Senior Counsel, at (202) 551–6817, or Kaitlin C. Bottock, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's website by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Summary of the Application

1. The Initial Adviser is the investment adviser to the American Energy Independence ETF (''Initial Fund'') pursuant to an investment management agreement with the Trust (''Investment Management Agreement'').[1] Under the terms of the Investment Management Agreement, the Adviser, subject to the supervision of

[3] The requested relief will not extend to any sub-adviser, other than a Wholly-Owned Sub-Adviser, who is an affiliated person, as defined in section 2(a)(3) of the Act, of the Subadvised Fund, of any Feeder Fund, or of the Adviser, other than by reason of serving as a sub-adviser to one or more of the Subadvised Funds (''Affiliated Sub-Adviser'').

[4] For any Subadvised Fund that is a Master Fund, the relief would also permit any Feeder Fund invested in that Master Fund to disclose Aggregate Fee Disclosure.

[1] Applicants request relief with respect to the Initial Fund, as well as to any future series of the Trust and any other existing or future registered open-end management investment company or series thereof that, in each case, is advised by the Initial Adviser or any entity controlling, controlled by, or under common control with, the Initial Adviser or its successors (each, also an ''Adviser''), uses the multi-manager structure described in the application, and complies with the terms and conditions set forth in the application (each, a ''Subadvised Fund''). For purposes of the requested order, ''successor'' is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization. Future Subadvised Funds may be operated as a master-feeder structure pursuant to section 12(d)(1)(E) of the Act. In such a structure, certain series of the Trust (each, a ''Feeder Fund'') may invest substantially all of their assets in a Subadvised Fund (a ''Master Fund'') pursuant to section 12(d)(1)(E) of the Act. No Feeder Fund will engage any sub-advisers other than through approving the engagement of one or more of the Master Fund's sub-advisers.

the board of trustees of the Trust (''Board''), provides continuous investment management of the assets of each Subadvised Fund. Consistent with the terms of the Investment Management Agreement, the Adviser may, subject to the approval of the Board, delegate portfolio management responsibilities of all or a portion of the assets of a Subadvised Fund to one or more Sub-Advisers.[2] The Adviser will continue to have overall responsibility for the management and investment of the assets of each Subadvised Fund. The Adviser will evaluate, select, and recommend Sub-Advisers to manage the assets of a Subadvised Fund and will oversee, monitor and review the Sub-Advisers and their performance and recommend the removal or replacement of Sub-Advisers.

2. Applicants request an order to permit the Adviser, subject to the approval of the Board, to enter into investment sub-advisory agreements with the Sub-Advisers (each, a ''Sub-Advisory Agreement'') and materially amend such Sub-Advisory Agreements without obtaining the shareholder approval required under section 15(a) of the Act and rule 18f–2 under the Act.[3] Applicants also seek an exemption from the Disclosure Requirements to permit a Subadvised Fund to disclose (as both a dollar amount and a percentage of the Subadvised Fund's net assets): (a) The aggregate fees paid to the Adviser and any Wholly-Owned Sub-Advisers; (b) the aggregate fees paid to Non-Affiliated Sub-Advisers; and (c) the fee paid to each Affiliated Sub-Adviser (collectively, Aggregate Fee Disclosure'').[4]

3. Applicants agree that any order granting the requested relief will be subject to the terms and conditions stated in the application. Such terms and conditions provide for, among other safeguards, appropriate disclosure to Subadvised Funds' shareholders and notification about sub-advisory changes and enhanced Board oversight to protect the interests of the Subadvised Funds' shareholders.

4. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provisions of the Act, or any rule thereunder, if such relief is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act. Applicants believe that the requested relief meets this standard because, as further explained in the application, the Investment Management Agreements will remain subject to shareholder approval, while the role of the Sub-Advisers is substantially equivalent to that of individual portfolio managers, so that requiring shareholder approval of Sub-Advisory Agreements would impose unnecessary delays and expenses on the Subadvised Funds. Applicants believe that the requested relief from the Disclosure Requirements meets this standard because it will improve the Adviser's ability to negotiate fees paid to the Sub-Advisers that are more advantageous for the Subadvised Funds.

DEPARTMENT OF STATE

[Public Notice: 10464]

Notice of Renewal of the Charter of the International Telecommunication Advisory Committee (ITAC)

This notice announces the renewal of the Charter for the International Telecommunication Advisory Committees (ITAC). In accordance with the provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. Appendix) and the general authority of the Secretary of State and the Department of State set forth in Title 22 of the United States code, in particular Sections 2656 and 2707, the charter of the International Telecommunication Advisory Committee has been renewed for another two years. The ITAC consists of members of the telecommunications industry, ranging from network operators and service providers to equipment vendors, members of academia, members of civil society, and officials of interested government agencies. The ITAC provides views and advice to the Department of State on positions on international telecommunications and information policy matters. This advice has been a major factor in ensuring that the United States was well prepared to participate effectively in the international telecommunications and information policy arena, including the International Telecommunication Union (ITU), the Organization of American States Inter-American Telecommunication Commission (CITEL), the Organization for Economic Cooperation and Development (OECD), the Asia Pacific Economic Cooperation Forum Telecommunications and Information Working Group, and other international bodies addressing communication and information policy issues.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Notice of Public Meeting: National Dialogue on Highway Automation

AGENCY: Federal Highway Administration (FHWA), U.S. Department of Transportation (DOT).

ACTION: Notice of public meetings.

SUMMARY: The FHWA is holding a National Dialogue on Highway Automation through a series of public meetings across the country to seek input on the integration of automated vehicles on the Nation's roadways. The objectives of the public meetings are: (1) To engage with a diverse group of stakeholders to understand key issues regarding automated vehicles and their implications for the roadway infrastructure; and (2) to gather input on highway automation to help inform FHWA research, policy, and programs. The public meetings will have

presentations and breakout sessions during which participants can provide input to FHWA and DOT representatives. The National Dialogue meetings began on June 26 and will continue through the end of 2018.

DATE AND TIME: The FHWA will hold the public meetings in approximately five locations across the country. A tentative schedule is outlined below and is subject to change. Meeting information will be updated and made available on the FHWA National Dialogue on Highway Automation website: *https://ops.fhwa.dot.gov/automationdialogue/index.htm.*

Tentative meetings include the following:

- *Week of July 30, 2018:* National Workshop 2: Data and Digital Infrastructure (Seattle, Washington)
- *September 2018:* National Workshop 3: Freight (Chicago, Illinois)
- *October 24–25, 2018:* National Workshop 4: Operations (Phoenix, Arizona)
- *November 14–15, 2018:* National Workshop 5: Infrastructure and Multi-Modal Safety (Austin, Texas)

FOR FURTHER INFORMATION CONTACT: If you have questions about the public meeting, please contact John Corbin at *john.corbin@dot.gov* or *highwayautomation@dot.gov.*

SUPPLEMENTARY INFORMATION: Registration is necessary for all attendees. Registration information will be available at *https://ops.fhwa.dot.gov/automationdialogue/index.htm.* In-person attendance will be limited, so advance registration is required for all attendees. Should it be necessary to cancel the meeting due to inclement weather or other emergency, FHWA will take all available measures to notify registered participants beforehand.

Background

Automated vehicles have the potential to significantly transform the Nation's roadways. They could help save lives, expand access to transportation, and improve the convenience of travel. However, even as these technologies offer new opportunities, they may introduce new challenges for the agencies responsible for the planning, design, construction, operation, and maintenance of the Nation's roadway infrastructure. As a result, FHWA is interested in better understanding the implications of highway automation.

This National Dialogue on Highway Automation is an opportunity to engage the public and broader stakeholder community to understand their key areas of interest. These stakeholders will include original equipment manufacturers, technology suppliers, transportation network companies, associations, and public sector partners. The National Dialogue will help inform national research, policy, and implementation assistance activities to support automation readiness.

Meeting Format

The National Dialogue meetings are designed to support significant interaction among participants. Workshops will include discussions with government and industry leaders, breakout sessions, listening sessions, and opportunities to collaborate with meeting participants. Each workshop will run from 1 to 1.5 days and will have opportunities for general and topic-specific input. Focus areas identified include policy and planning, data and digital infrastructure, freight, operations, safety, infrastructure, and multi-modal safety.

Authority: 49 U.S.C. 1.25a.

Issued on: July 6, 2018.

Brandye L. Hendrickson,

Acting Administrator, Federal Highway Administration.

[FHWA Docket No. FHWA–2017–0023]

Proposed Guidance on Safe Harbor Rate Streamlining for Engineering and Design Services Consultant Contracts

AGENCY: Federal Highway Administration (FHWA), U.S. Department of Transportation (DOT).

ACTION: Notice; request for comment.

SUMMARY: The FHWA is soliciting comments regarding proposed guidance on implementation of a Safe Harbor indirect cost rate for certain engineering design service firms that find establishing such rates to be costly and a barrier to participating in engineering and design service contracts reimbursed with Federal-aid Highway Program (FAHP) Funds. The FHWA seeks comment on its proposed implementation of a Safe Harbor indirect cost rate and its intention to notify all contracting agencies receiving FAHP funds that an agency-developed Safe Harbor indirect cost rate for eligible consulting firms may be used as a component of a risk-based oversight process to provide reasonable assurance to FHWA that consultant costs on FAHP-funded contracts are allowable in accordance with the Federal regulations.

DATES: Comments must be received on or before August 16, 2018. Late-filed comments will be considered to the extent practicable.

ADDRESSES: Mail or hand deliver comments to the U.S. Department of Transportation, Dockets Management Facility, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, or fax comments to (202) 493–2251. Alternatively, comments may be submitted to the Federal eRulemaking portal at: *http://www.regulations.gov.* All comments must include the docket number that appears in the heading of this document. All comments received will be available for examination and copying at the above address from 9 a.m. to 5 p.m., ET, Monday through Friday, except Federal holidays. Those desiring notifications of receipt of comments must include a self-addressed, stamped postcard, or you may print the acknowledgment page that appears after submitting comments electronically. Anyone can search the electronic form of all comments in any one of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, or labor union). Anyone may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70, Pages 19477–78).

FOR FURTHER INFORMATION CONTACT: For questions about the program discussed herein, contact John McAvoy, Consultant Services Program Manager, FHWA Office of Program Administration, (202) 853–5593 or via email at *john.mcavoy@dot.gov.* For legal questions, please contact Steve Rochlis, Office of the Chief Counsel, (202) 366–1395, or via email at *steve.rochlis@dot.gov.* Office hours are from 8:00 a.m. to 4:30 p.m., ET, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access and Filing

You may submit or retrieve comments online through the Federal eRulemaking portal at: *http://www.regulations.gov.* The website is available 24 hours each day, 365 days each year. Please follow the instructions. Electronic submission and retrieval help and guidelines are available under the help section of the website. An electronic copy of this document may also be downloaded from the Office of the Federal Register's home page at: *http://www.archives.gov* and the U.S. Government Publishing

Office's web page at: *http://www.access.gpo.gov/nara.*

Purpose of This Notice

The FHWA is requesting comment on its proposed guidance for implementation of a Safe Harbor indirect cost rate and its intention to notify all contracting agencies receiving FAHP funds that an agency-developed Safe Harbor indirect cost rate for eligible consulting firms may be used as a component of a risk-based oversight process to provide reasonable assurance to FHWA that consultant costs on FAHP-funded contracts are allowable in accordance with the Federal regulations. Comments received through this notice will be considered by FHWA to assess implementation of a Safe Harbor indirect cost rate.

Background

Consulting firms and contractors providing services under a contract reimbursed with FAHP funds are required to account for, and bill, costs in accordance with the Federal cost principles of 48 CFR part 31. In addition, Federal law and regulations for the FAHP require contracting agencies to accept indirect cost rates developed in accordance with the Federal cost principles and to apply those rates for the purposes of contract estimation, negotiation, administration, reporting, and contract payment (as specified in 23 U.S.C. 112(b)(2) and 23 CFR 172.7). As such, consulting firms providing engineering and design-related services to a contracting agency under a contract funded by the FAHP are required to develop indirect cost rates in accordance with the Federal cost principles on an annual basis. Similarly, contracting agencies must provide reasonable assurance that consulting firm costs claimed under FAHP-funded contracts, including both direct and indirect costs, are allowable in accordance with the Federal cost principles.

Adhering to these accounting requirements can place a significant burden on some consulting firms and may create a barrier for otherwise eligible and qualified firms to compete for FAHP-funded contracts. For example, small firms, including many Disadvantaged Business Enterprise firms, may lack the financial expertise to develop an indirect cost rate that would be acceptable to a cognizant Federal or State government agency, or lack the resources to hire a Certified Public Accountant (CPA) to conduct an audit to provide assurance as to the development of an indirect cost rate compliant with Federal requirements. Often, a CPA audit is cost-prohibitive given the size and scope of the federally funded contracts for which the firm could compete. In addition, new or start-up firms generally do not have a contract-related cost history to use as a base for development of an indirect cost rate. Other well-established firms may not have previous experience with federally funded contracts for which a compliant indirect cost rate could be developed. Currently, these firms are prohibited from participating in FAHP-funded contracts without the development and application of a provisional indirect cost rate for the specific contract, which is adjusted based upon a contracting agency conducted final audit at the completion of the contract. Even the smallest final audit requires a significant commitment of contracting agency audit resources.

To remove these barriers for otherwise qualified consulting firms, and to enhance contracting agency oversight of compliance with Federal cost principles, in 2012, the FHWA developed the Safe Harbor Indirect Cost Rate Test and Evaluation pilot. Ten contracting agencies representing a diversity of location and size participated in the test. Eligible consulting firms with whom the contracting agencies do business have the option of applying a Safe Harbor indirect cost rate to contracts in instances where the firm does not have an established rate for the reasons stated above. The selected Safe Harbor indirect cost rate is significantly lower than the industry average rate, providing an incentive for firms to develop an actual rate, when able to do so and consistent with their cost experience, in accordance with the Federal cost principles as required in Federal law and regulation.

Test results have shown a reduction in the financial management barriers that prevented new, small, or disadvantaged but qualified consulting firms from entering the federally funded engineering services market, and creation of a framework for these consulting firms to establish a cognizant agency approved indirect cost rate. Contracting agencies report that 17 consulting firms have graduated from the program after developing a cost history leading to an approved indirect cost rate. In addition, following a risk-based approach allows contracting agency oversight and audit resources to shift focus from those firms opting to apply a Safe Harbor indirect cost rate (which are generally employed on fewer contracts or on smaller contracts) to those firms with multiple, higher dollar contracts and more complex accounting structures.

The test and evaluation of the Safe Harbor indirect cost rate was conducted by the following contracting agencies and respective FHWA Division Offices: Alabama DOT, California Department of Transportation, Michigan DOT, Missouri DOT, North Carolina DOT, North Dakota DOT, Ohio DOT, South Carolina DOT, Texas DOT, and Washington State DOT. In these States, eligible consulting firms have the option of using a Safe Harbor indirect cost rate on contracts executed within the established test period. A consulting firm is considered eligible if it has not had an indirect cost rate previously accepted by a cognizant agency (*i.e.,* a governmental agency that has performed or reviewed an audit in accordance with generally accepted government auditing standards (GAGAS) to test compliance with the requirements of the Federal cost principles (as specified in 48 CFR part 31) and issued an audit report of the consultant's indirect cost rate, as described in 23 CFR 172.3). Consulting firms with an audited, or otherwise accepted, actual indirect cost rate, developed in accordance with the Federal cost principles, are not considered eligible to participate in the Safe Harbor Program. Contracting agencies are given discretion to determine the eligibility of consulting firms for a Safe Harbor indirect cost rate for use on a case-by-case basis and are required to document their decision.

Through collaboration with the test contracting agencies, FHWA's test and evaluation pilot used a nationwide Safe Harbor indirect cost rate of 110 percent of a firm's direct salary rate. The test contracting agencies agreed that this rate was conservative and significantly lower than the industry average of typically claimed indirect cost rates. As such, while still providing for reimbursement of a significant portion of basic overhead costs, the use of this conservative rate incentivized consulting firms to develop an actual indirect cost rate when able to do so. The Safe Harbor indirect cost rate also provided a minimal risk to contracting agencies for overpayment to those consulting firms participating in the program. Based on FHWA's experience with this pilot, FHWA is proposing to expand the use of the Safe Harbor indirect cost rate, beyond the 10 pilot States, to allow eligible consulting firms to use a State contracting agency–developed indirect cost rate.

A Safe Harbor indirect cost rate is not intended for use on field-based contracts involving field overhead rates. Other direct costs that are not considered to be included within the Safe Harbor Program include: Travel costs (airfare, rental car, mileage, lodging, per diem, etc.), external printing and reproduction costs, mailing and shipping costs, equipment rental fees, sub-consultants, and other direct costs as appropriate to the contracted services.

A Safe Harbor indirect cost rate is applied to new contracts executed with a contracting agency, or subrecipient. Once applied to a contract, the Safe Harbor indirect cost rate should be used for the duration of the contract. It is not uncommon for new or start-up firms to show large fluctuations in an indirect cost rate in the initial years of operation, before contract workload normalizes. Using the Safe Harbor indirect cost rate for the duration of a contract provides cost certainty in estimating the total contract amount and helps reduce the risk of costly contract modifications, necessary due to a significant fluctuation of an indirect cost rate. Similarly, a Safe Harbor indirect cost rate may be used in the determination of the fixed fee portion of the contract, which would not be subject to adjustment unless warranted by changes to the scope of work or duration of the contract.

Eligible consulting firms that use the Safe Harbor indirect cost rate, and do not have established salaries or wage rates for employees or classes of employees, use negotiated, fixed hourly labor rates for the direct labor portion of the contracted services. The negotiated direct labor rate should meet the reasonableness provisions as set forth in 2 CFR 200.404, considering the nature of the services to be provided. Where appropriate for the scope of services under contract, a ''fully loaded'' hourly rate could be established utilizing a reasonable hourly direct labor rate, a Safe Harbor indirect cost rate as the overhead rate component, and an appropriate amount of fixed fee that considers the complexity and risk involved.

The Safe Harbor indirect cost rate is intended to be a component of a contracting agency's risk-based oversight process. Contracting agencies using the Safe Harbor indirect cost rate must first develop written risk-based oversight procedures designed to provide reasonable assurance of consultant compliance with the Federal cost principles in accordance with 23 CFR 172.11(c)(2). The use of the Safe Harbor indirect cost rate is voluntary for both the contracting agency and for eligible firms. In reviewing the eligibility of a consulting firm opting to use the Safe Harbor indirect cost rate, it may be necessary to contact the State department of transportation in the home State of the consulting firm to verify the audit history of the firm and ensure the firm does not have an audited or otherwise accepted indirect cost rate developed in accordance with the Federal cost principles. Use and application of the Safe Harbor indirect cost rate by eligible firms is one component of this risk-based oversight process. Some evaluation of the accounting system of the consulting firms choosing to use the Safe Harbor indirect cost rate may be necessary to verify the capability of accumulating and tracking direct labor for applying the Safe Harbor indirect cost rate, as well as for billing other direct costs by contract, segregating indirect costs, etc. The Internal Control Questionnaire provided in Appendix B of the *AASHTO Uniform Audit and Accounting Guide (2016 Edition)* may be used by contracting agencies as a tool for assessing the accounting system capabilities of firms opting to use the Safe Harbor indirect cost rate. A contracting agency may wish to conduct post contract audits or other evaluations to verify accurate accumulation and billing of direct contract costs. However, an audit of indirect costs is not necessary for Safe Harbor indirect cost rate contracts, as the rate should be applied for the duration of the contract, and retroactive adjustments to indirect costs incurred on these contracts is not necessary.

If a contracting agency elects to use a Safe Harbor indirect cost rate program as an element of a risk-based oversight process in compliance with 23 CFR 172.11(c)(2), the agency shall prepare and maintain written policies and procedures establishing the program in accordance with 23 CFR 172.5(c)(10). In conjunction with the development of written risk-based oversight procedures, the contracting agency should consider any actions necessary to comply with State regulation, policy, and/or procedures, as well as any revisions needed in boilerplate contract language or cost certifications on contracts applying the Safe Harbor indirect cost rate.

The FHWA Division Office will serve as the primary point of contact and liaison for the contracting agency. The FHWA Division Offices also will monitor the respective contracting agency's use of the Safe Harbor indirect cost rate in accordance with the approved, written risk-based oversight procedures.

Request for Comment

Federal regulations require contracting agencies to provide reasonable assurance to the FHWA that consultant costs on contracts reimbursed with FAHP funding are allowable in accordance with the Federal cost principles. The FHWA is seeking public comment on expanding the use of the Safe Harbor indirect cost rate, beyond the 10 pilot States, to allow other interested contracting agencies to use a self-administered Safe Harbor Program, under a risk-based approach compliant with 23 CFR 172.11(c), to provide that reasonable assurance. A self-administered Safe Harbor Program would involve, but not be limited to, the following:

(1) A contracting agency developed risk-based analysis compliant with 23 CFR 172.11(c)(2);

(2) Written policies and procedures (Work Plan) consistent with the pilot program detailed above; and

(3) Approval from the FHWA Division Office in the relevant State.

The workplan used in the test evaluation has been posted on the docket as an example of the elements that should be included in a risk-based oversight procedure submitted to FHWA for approval.

Commenters are encouraged to address any or all the areas listed above. The FHWA encourages commenters to submit any information or data demonstrating the benefits, costs, and cost-savings of this program. For example, FHWA would be interested in receiving quantifiable estimates of the burden associated with the annual development of an indirect cost rate, hiring a CPA to conduct necessary audits, and any other costs that would be avoided by a consulting firm or contracting agency in utilizing this Safe Harbor indirect cost rate. Commenters are also encouraged to focus on matters within the control of FHWA. The FHWA will consider public comment before adopting its final guidance on the application of a Safe Harbor indirect cost rate under a risk-based stewardship approach.

Authority: 23 U.S.C. 112, 145 and 315; 23 CFR 1.32, and 172; 49 CFR 1.85.

Issued on: July 9, 2018.

Brandye L. Hendrickson,

Acting Administrator, Federal Highway Administration.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2018–0181]

Hours of Service of Drivers: Waste Management Holdings, Inc.; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application from Waste Management Holdings, Inc., (WMH) requesting an exemption from the requirement of the hours-of-service (HOS) regulations that drivers of commercial motor vehicles (CMVs) qualifying for the ''short-haul—100 air-mile radius driver'' exception must return to the original work reporting location within 12 hours of coming on duty. WMH asks that its short-haul CMV drivers be permitted to return within 14 hours withour losing their short-haul status. FMCSA requests public comment on WMH's application for exemption.

DATES: Comments must be received on or before August 16, 2018.

ADDRESSES: You may submit comments identified by Federal Docket Management System Number FMCSA–2018–0181 by any of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* See the *Public Participation and Request for Comments* section below for further information.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal holidays.
- *Fax:* 1–202–493–2251.

Each submission must include the Agency name and the docket number of this notice. DOT posts all comments received without change to *www.regulations.gov,* including personal information in a comment. Please see the *Privacy Act* heading below.

Docket: To read background documents or comments, go to *www.regulations.gov* or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The on-line FDMS is available 24 hours each day, 365 days each year.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS) at *www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: For information concerning this notice, please contact Mr. Robert Schultz, FMCSA Driver and Carrier Operations Division; Telephone: (202) 366–2718; Email: *MCPSD@dot.gov.* If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2018–0181), the specific section of this document to which the comment applies, and provide reasons for suggestions or recommendations. You may submit online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in your document so the Agency can contact you if it has questions about your submission.

To submit your comments online, go to *www.regulations.gov* and put the docket number, ''FMCSA–2018–0181'' in the ''Keyword'' box, and click ''Search.'' When the new screen appears, click on the ''Submit a Formal Comment'' button and type your comment into the text box in the following screen. Indicate whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period and may grant or deny this application based on your comments.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period (up to 5 years) and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Request for Exemption

Drivers qualifying for the HOS short-haul exception in 49 CFR 395.1(e)(1) do not have to maintain a record of duty status (RODS) on board the vehicle, provided that (among other things) they return to their normal work reporting location and are relased from work within 12 hours after coming on duty. A driver who exceeds the 12-hour limit loses the short-haul exception and must immediately prepare RODS for the entire day, often by means of an electronic logging device (ELD) (49 CFR 395.8(a)(1)(i)).

WMH seeks an exemption for approximately 18,000 drivers in 84 separate subsidiaries or affiliates who operate CMVs to collect waste and recycling materials. These drivers routinely qualify for the short-haul exception. 395.1(e)(1). However, occasionally they cannot complete their duty day within 12 hours. WMH seeks an exemption to allow its drivers to continue to qualify for the short-haul exception up to the 14th hour after coming on duty.

WM states that ELDs delay and distract its drivers working to collect waste and recycling materials because they require excessive interaction. The exemption application states that, as a result of frequent stops to pick up trash, its drivers re required to interact with the ELD ''hundreds if not thousands of times a day.'' WMH asserts that ELDs are not designed for such operations and that they lack ''a provision for blocking service time.'' WMH also states that the ELDs do not accurately capture the duty status of its drivers. According to the application, WMH has been actively working with its ELD provider to improve ELD performance in this environment, but that progress has been limited. WMH also asserts that the excessive driver-ELD interaction impacts ''driver safety and the safety of the communities we serve.''

WMH notes that certain CMV drivers may already operate up to 14 hours without forfeiting short-haul status, for example those in the ready-mixed concrete industry [49 CFR 395.1(e)(1)(ii)(B)] or the asphalt-paving business [83 FR 3864, Jan. 26, 2018]. It asserts that WMH's operations are similar to these industries because its drivers ''spend a significant portion of their days conducting non-driving duties.'' It states that WMH anticipates ''no reduction in safety from the exemption requested, and a potential for increased safety due to reduced [driver] distraction.''

WMH cites its fatigue management program as further evidence that operations with the exemption in place would equal or exceed the level of safety under the current HOS regulations. This program includes the use of video event recorders triggered by unusual events suggestive of driver fatigue, like aggressive braking, steering, or acceleration. When WMH's assessment of the recording indicates that driver fatigue is involved, WMH managers may discipline the driver. More commonly, WMH managers assess the driver's overall lifestyle and health, including his or her off-duty activities and medical history, and counsel the individual on changes he or she can undertake to ameliorate fatigue. WMH managers also ride with each employee-driver several times a year to observe his or her performance.

WMH requests a 5-year exemption. WMH's application for exemption, including a list of its 84 operating companies, is available for review in the docket for this notice.

Issued on: June 22, 2018.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2018–0014]

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemption; request for comments.

SUMMARY: FMCSA announces receipt of applications from 13 individuals for an exemption from the vision requirement in the Federal Motor Carrier Safety Regulations (FMCSRs) to operate a commercial motor vehicle (CMV) in interstate commerce. If granted, the exemptions will enable these individuals to operate CMVs in interstate commerce without meeting the vision requirement in one eye.

DATES: Comments must be received on or before August 16, 2018.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket No. FMCSA–2018–0014 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number(s) for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments online.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the FMCSRs for a five-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the five-year period. FMCSA grants exemptions from the FMCSRs for a two-year period to align with the maximum duration of a driver's medical certification.

The 13 individuals listed in this notice have requested an exemption from the vision requirement in 49 CFR 391.41(b)(10). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting an exemption will achieve the required level of safety mandated by statute.

The physical qualification standard for drivers regarding vision found in 49 CFR 391.41(b)(10) states that a person is physically qualified to drive a CMV if that person has distant visual acuity of at least 20/40 (Snellen) in each eye without corrective lenses or visual acuity separately corrected to 20/40 (Snellen) or better with corrective lenses, distant binocular acuity of at least 20/40 (Snellen) in both eyes with or without corrective lenses, field of vision of at least 70° in the horizontal

Meridian in each eye, and the ability to recognize the colors of traffic signals and devices showing standard red, green, and amber.

In July 1992, the Agency first published the criteria for the Vision Waiver Program, which listed the conditions and reporting standards that CMV drivers approved for participation would need to meet (Qualification of Drivers; Vision Waivers, 57 FR 31458, July 16, 1992). The current Vision Exemption Program was established in 1998, following the enactment of amendments to the statutes governing exemptions made by § 4007 of the Transportation Equity Act for the 21st Century (TEA–21), Public Law 105–178, 112 Stat. 107, 401 (June 9, 1998). Vision exemptions are considered under the procedures established in 49 CFR part 381 subpart C, on a case-by-case basis upon application by CMV drivers who do not meet the vision standards of 49 CFR 391.41(b)(10).

To qualify for an exemption from the vision requirement, FMCSA requires a person to present verifiable evidence that he/she has driven a commercial vehicle safely with the vision deficiency for the past three years. Recent driving performance is especially important in evaluating future safety, according to several research studies designed to correlate past and future driving performance. Results of these studies support the principle that the best predictor of future performance by a driver is his/her past record of crashes and traffic violations. Copies of the studies may be found at Docket Number FMCSA–1998–3637.

FMCSA believes it can properly apply the principle to monocular drivers, because data from the Federal Highway Administration's (FHWA) former waiver study program clearly demonstrated the driving performance of experienced monocular drivers in the program is better than that of all CMV drivers collectively (See 61 FR 13338, 13345, March 26, 1996). The fact that experienced monocular drivers demonstrated safe driving records in the waiver program supports a conclusion that other monocular drivers, meeting the same qualifying conditions as those required by the waiver program, are also likely to have adapted to their vision deficiency and will continue to operate safely.

The first major research correlating past and future performance was done in England by Greenwood and Yule in 1920. Subsequent studies, building on that model, concluded that crash rates for the same individual exposed to certain risks for two different time periods vary only slightly (See Bates and Neyman, University of California Publications in Statistics, April 1952). Other studies demonstrated theories of predicting crash proneness from crash history coupled with other factors. These factors—such as age, sex, geographic location, mileage driven and conviction history—are used every day by insurance companies and motor vehicle bureaus to predict the probability of an individual experiencing future crashes (See Weber, Donald C., ''Accident Rate Potential: An Application of Multiple Regression Analysis of a Poisson Process,'' Journal of American Statistical Association, June 1971). A 1964 California Driver Record Study prepared by the California Department of Motor Vehicles concluded that the best overall crash predictor for both concurrent and nonconcurrent events is the number of single convictions. This study used three consecutive years of data, comparing the experiences of drivers in the first two years with their experiences in the final year.

II. Qualifications of Applicants

Ronald D. Blakely

Mr. Blakely, 63, has had amblyopia in his left eye since childhood. The visual acuity in his right eye is 20/20, and in his left eye, 20/50. Following an examination in 2018, his optometrist stated, ''I feel that Ron has sufficient vision to perform the driving tasks required to operate a commercial vehicle since the amblyopia is longstanding, stable, and he is well adjusted.'' Mr. Blakely reported that he has driven straight trucks for 35 years, accumulating 1.58 million miles, and buses for one year, accumulating 25,000 miles. He holds a Class CB CDL from Michigan. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Homero Dominguez

Mr. Dominguez, 51, has a prosthetic left eye due to a traumatic incident in 2000. The visual acuity in his right eye is 20/20, and in his left eye, no light perception. Following an examination in 2018, his optometrist stated, ''In my opinion Mr. Dominguez has sufficient vision to perform the driving tasks required to operate a commercial vehicle.'' Mr. Dominguez reported that he has driven tractor-trailer combinations for four years, accumulating 340,000 miles. He holds a Class A CDL from Texas. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Larry L. George

Mr. George, 59, has had a corneal scar in his right eye since childhood. The visual acuity in his right eye is counting fingers, and in his left eye, 20/25. Following an examination in 2018, his ophthalmologist stated, ''Mr. George's vision is sufficient to drive a commercial vehicle.'' Mr. George reported that he has driven straight trucks for two years, accumulating 100,000 miles, and tractor-trailer combinations for 30 years, accumulating 6 million miles. He holds an operator's license from Louisiana. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Jason C. Hetrick

Mr. Hetrick, 38, has complete loss of vision in his left eye due to a traumatic incident in 1987. The visual acuity in his right eye is 20/20, and in his left eye, no light perception. Following an examination in 2018, his optometrist stated, ''Based on my understanding of the visual requirements for commercial vehicle operation, Mr. Hetrick has sufficient vision to perform the driving tasks required to operate a commercial vehicle.'' Mr. Hetrick reported that he has driven straight trucks for 25 years, accumulating 381,250 miles, and tractor-trailer combinations for seven years, accumulating 3,500 miles. He holds an operator's license from Pennsylvania. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Michael A. Hildebrand

Mr. Hildebrand, 40, has had posterior staphyloma in his right eye since childhood. The visual acuity in his right eye is count fingers, and in his left eye, 20/20. Following an examination in 2018, his optometrist stated, ''In my medical opinion, Michael Hildebrand has sufficient vision to perform the driving tasks required to operate a commercial vehicle.'' Mr. Hildebrand reported that he has driven straight trucks for 12 years, accumulating 374,400 miles. He holds an operator's license from Pennsylvania. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Junior M. Isenberg

Mr. Isenberg, 63, has had amblyopia in his left eye since birth. The visual acuity in his right eye is 20/20, and in his left eye, 20/400. Following an examination in 2018, his optometrist stated, ''In my opinion, Junior Isenberg has sufficient vision to perform the driving task to operate a commercial vehicle.'' Mr. Isenberg reported that he has driven straight trucks for 30 years, accumulating 1.5 million miles. He holds a Class B CDL from Kentucky. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

David G. Livingston

Mr. Livingston, 55, has had amblyopia in his right eye since childhood. The visual acuity in his right eye is 20/200, and in his left eye, 20/20. Following an examination in 2018, his optometrist stated, ''This is a second letter to express that it is my medical opinion that Mr. Livingston has sufficient vision in his left eye to perform the driving tasks required to operate a commercial vehicle.'' Mr. Livingston reported that he has driven straight trucks for 18 years, accumulating 360,000 miles, and tractor-trailer combinations for 18 years, accumulating 360,000 miles. He holds a Class A CDL from Vermont. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Joseph P. Markley

Mr. Markley, 61, has had macular myelinated nerve fibers in his right eye since birth. The visual acuity in his right eye is counting fingers, and in his left eye, 20/25. Following an examination in 2018, his ophthalmologist stated, ''Mr. Markley has sufficient vision in left eye to perform the tasks required to operate a commercial vehicle.'' Mr. Markley reported that he has driven straight trucks for 39 years, accumulating 42,900 miles, and tractor-trailer combinations for 39 years, accumulating 91,650 miles. He holds a Class AM CDL from Pennsylvania. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Derek L. Redford

Mr. Redford, 65, has an irregularly shaped pupil in his left eye due to a traumatic incident in childhood. The visual acuity in his right eye is 20/20, and in his left eye, counting fingers. Following an examination in 2018, his optometrist stated, ''I hereby certify that in my medical opinion the patient has sufficient vision to perform the driving tasks required to operate a commercial vehicle.'' Mr. Redford reported that he has driven straight trucks for ten years, accumulating 500,000 miles. He holds an operator's license from Idaho. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

David Tavarez

Mr. Tavarez, 49, has had amblyopia in his right eye since birth. The visual acuity in his right eye is hand motion, and in his left eye, 20/20. Following an examination in 2018, his optometrist stated, ''Based upon the color vision testing,binocular *[sic]* field of vision tests and quality of vision in his left eye, it is my medical opinion that Mr. David Tavarez can adequately operate a commercial motor vehicle at this time.'' Mr. Tavarez reported that he has driven straight trucks for 21 years, accumulating 630,000 miles. He holds an operator's license from New Jersey. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

William B. Van Drielen

Mr. Van Drielen, 56, has a macular scar in his left eye due to a traumatic incident in 2012. The visual acuity in his right eye is 20/20, and in his left eye, 20/50. Following an examination in 2018, his optometrist stated, ''In my medical opinion, Mr. Vandrielen *[sic]* has sufficient vision to perform the driving tasks required to operate a commercial vehicle.'' Mr. Van Drielen reported that he has driven straight trucks for five years, accumulating 1 million miles, and tractor-trailer combinations for 36 years, accumulating 3.85 million miles. He holds a Class AM CDL from Nevada. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

Willie R. White, Jr.

Mr. White, 62, has had optic nerve damage in his left eye since 2012. The visual acuity in his right eye is 20/20, and in his left eye, light perception. Following an examination in 2018, his optometrist stated, ''In my medical opinion this patient has sufficient vision to perform the driving tasks required to operate a commercial vehicle.'' Mr. White reported that he has driven straight trucks for ten years, accumulating 150,000 miles, and tractor-trailer combinations for 20 years, accumulating two million miles. He holds a Class A CDL from Nevada. His driving record for the last three years shows no crashes and one conviction for a moving violation in a CMV; he exceeded the speed limit by 9 mph.

Curtis C. Williams

Mr. Williams, 63, has a retinal detachment in his right eye due to a traumatic incident in 2010. The visual acuity in his right eye is hand motion, and in his left eye, 20/20. Following an examination in 2017, his optometrist stated, ''In my opinion Mr. Williams has sufficient vision to perform the daily task required to operate a commercial vehicle.'' Mr. Williams reported that he has driven straight trucks for 26 years, accumulating 1.24 million miles, and tractor-trailer combinations for 26 years, accumulating 1.24 million miles. He holds a Class A CDL from Missouri. His driving record for the last three years shows no crashes and no convictions for moving violations in a CMV.

III. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments and material received before the close of business on the closing date indicated in the dates section of the notice.

IV. Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2018–0014 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and materials received during the comment period. FMCSA may issue a final determination at any time after the close of the comment period.

V. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2018–0014 and click ''Search.''

Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

Issued on: July 12, 2018.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew exemptions for 94 individuals from its prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. The exemptions enable these individuals with ITDM to continue to operate CMVs in interstate commerce.

DATES: Each group of renewed exemptions were applicable on the dates stated in the discussions below and will expire on the dates stated in the discussions below. Comments must be received on or before August 16, 2018.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket No. FMCSA–2006–24210; FMCSA–2010–0162; FMCSA–2012–0162; FMCSA–2012–0163; FMCSA–2014–0018 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number(s) for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day e.t., 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments online.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5:30 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption for five years if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the five-year period. FMCSA grants exemptions from the FMCSRs for a two-year period to align with the maximum duration of a driver's medical certification.

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control.

The 94 individuals listed in this notice have requested renewal of their exemptions from the diabetes standard in 49 CFR 391.41(b)(3), in accordance with FMCSA procedures. Accordingly, FMCSA has evaluated these applications for renewal on their merits and decided to extend each exemption for a renewable two-year period.

II. Request for Comments

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

III. Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application. In accordance with 49 U.S.C. 31136(e) and 31315, each of the 94 applicants has satisfied the renewal conditions for obtaining an exemption from the diabetes requirement (71 FR 32177; 71 FR 45097; 75 FR 36775; 75 FR 50797; 77 FR 36333; 77 FR 40941; 77 FR 46791; 77 FR 51845; 79 FR 41723; 79 FR 56105; 81 FR 91242). They have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous two-year exemption period. These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of these drivers for a period of two years is likely to achieve a level of safety equal to that existing without the exemption.

In accordance with 49 U.S.C. 31136(e) and 31315, the following groups of drivers received renewed exemptions in the month of August and are discussed below:

As of August 6, 2018, and in accordance with 49 U.S.C. 31136(e) and 31315, the following ten individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (77 FR 36333; 77 FR 46791; 81 FR 91242):

Bruce R. Bennett (MN)
Stephen W. Best (PA)
Steven D. Hancock (IN)
Michael A. Hendrickson (OR)
James B. Hills (KS)
Charles Keegan, Jr. (NJ)
Londell W. Luther (MD)
Darrell L. Meadows (TX)
Allyn E. Smith (SD)
Jason R. Zeorian (NE)

The drivers were included in docket number FMCSA–2012–0162. Their exemptions are applicable as of August 6, 2018, and will expire on August 6, 2020.

As of August 8, 2018, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 23 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (71 FR 32177; 71 FR 45097; 81 FR 91242):

Scott R. Anderson (WI)
Robert R. Chase (NE)
Todd A. Dean (WV)
Dale R. Gansz (IL)
Donald W. Havourd, Sr. (CT)
Jeffrey M. King (OR)
Jeffrey S. Knight (WA)
Edward V. Kruse (IA)
Lee P. Lembke (WI)
Dominick T. Mastroni (KS)
Derril W. Nunnally (GA)
Robert L. Pflugler, Jr. (PA)
Ronald B. Purdum (IL)
Wilbert C. Rasely, Jr. (PA)
Ron R. Rawson (AZ)
Duane C. Rieger (ND)
Gregory A. Rigg (MI)
Vernon L. Small (CO)
Walter D. Stowman (NJ)
Henry B. Walker-Waltz (OR)
Arthur C. Webber (PA)
Scott A. Wertz (ND)
Danny R. Wood (MO)

The drivers were included in docket number FMCSA–2006–24210. Their exemptions are applicable as of August 8, 2018, and will expire on August 8, 2020.

As of August 17, 2018, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 7 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (75 FR 36775; 75 FR 50797; 81 FR 91242):

Gary L. Alexander (MO)
Daniel E. Bergstresser (NY)
Stephen F. Clendenin (NY)
Pradip B. Desai (PA)
Howard M. Galton (IL)
Steve Gumienny (CA)
Hubert S. Paxton (KY)

The drivers were included in docket number FMCSA–2010–0162. Their exemptions are applicable as of August 17, 2018, and will expire on August 17, 2020.

As of August 19, 2018, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 45 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (79 FR 41723; 79 FR 56105; 81 FR 91242):

Charles Ackerman Jr. (NJ)
William J. Applebee (WI)
Benjamin L. Baxter (MI)
Stephen M. Berggren (MN)
Patrick J. Burns (MN)
Robert L. Caudill (OH)
Charles L. Cran (WI)
Kevin W. Elder (NC)
Michael J. Eldridge, Sr. (IA)
Kevin D. Erickson (WI)
Dale A. Godejohn (ND)
Robert R. Gonzales (CA)
Norman D. Groves (MO)
Kenneth F. Gwaltney (IN)
Mathew R. Hale (KS)
Donald K. Hamilton (FL)
John L. Holtzclaw (MO)
Christopher H. Horn (NH)
Kip J. Kauffman (WI)
Christopher J. Kittoe (WI)
Joshua L. Kroetch (MN)
Salvador Lopez (AZ)
Joseph M. Macias (NM)
Robert J. Marino (NJ)
David J. McCoy (UT)
William E. Medlin (MN)
Carlos A. Napoles, Jr. (NJ)
Kathryn J. Nelms (KS)
Antonio C. Oliveira (PA)
Christopher P. Overton (IL)
Stephen J. Pelton (PA)
Bryant S. Perry (NC)
Kenneth R. Perschon (IL)
Joseph R. Polhamus (LA)
Rodney B. Roberts (MS)
Mark J. Rone (IL)
John J. Steigauf (MN)
William L. Thompson (MN)
Robert D. Watts (TX)
Cindy L. Wells (NY)
Charles W. White (IN)
Michael G. Worl (MT)
Tommy W. Wornick (TX)
Robert T. Yeftich (IN)
Chad C. Yerkey (PA)

The drivers were included in docket number FMCSA–2014–0018. Their exemptions are applicable as of August 19, 2018, and will expire on August 19, 2020.

As of August 27, 2018, and in accordance with 49 U.S.C. 31136(e) and 31315, the following nine individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (77 FR 40941; 77 FR 51845; 81 FR 91242):

Randall W. Amtower (WV)
Steven Brickey (CO)
Randall L. Corrick (ND)
Raymond G. Gravesandy (NY)
Gregory M. Harris (TX)
Kelly M. Keller (ND)
Joseph L. Miska (MN)
Jacob D. Oxford (ID)
Ramon I. Zamora-Ortiz (WA)

The drivers were included in docket number FMCSA–2012–0163. Their exemptions are applicable as of August 27, 2018, and will expire on August 27, 2020.

IV. Conditions and Requirements:

The exemptions are extended subject to the following conditions: (1) Each driver must submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) each driver must report within two business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) each driver must submit an annual ophthalmologist's or optometrist's report; and (4) each driver must provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the exemption when driving, for presentation to a duly authorized Federal, State, or local enforcement official. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

V. Preemption

During the period the exemption is in effect, no State shall enforce any law or regulation that conflicts with this exemption with respect to a person operating under the exemption.

VI. Conclusion

Based upon its evaluation of the 94 exemption applications, FMCSA renews the exemptions of the aforementioned drivers from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. In accordance with 49 U.S.C. 31136(e) and 31315, each exemption will be valid for two years unless revoked earlier by FMCSA.

Issued on: July 12, 2018.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2018–0032]

Qualification of Drivers; Exemption Applications; Diabetes Mellitus

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemption; request for comments.

SUMMARY: FMCSA announces receipt of applications from 54 individuals for an exemption from the prohibition in the Federal Motor Carrier Safety Regulations (FMCSRs) against persons with insulin-treated diabetes mellitus (ITDM) operating a commercial motor vehicle (CMV) in interstate commerce. If granted, the exemptions would enable these individuals with ITDM to operate CMVs in interstate commerce.

DATES: Comments must be received on or before August 16, 2018.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket No. FMCSA–2018–0032 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number(s) for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue, SE, Washington, DC, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day e.t., 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments online.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Ms. Christine A. Hydock, Chief, Medical Programs Division, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE, Room W64–224, Washington, DC 20590–0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays. If you have questions regarding viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the FMCSRs for a five-year period if it finds ‘‘such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.’’ The statute also allows the Agency to renew exemptions at the end of the five-year period. FMCSA grants exemptions from the FMCSRs for a two-year period to align with the maximum duration of a driver's medical certification.

The 54 individuals listed in this notice have requested an exemption from the diabetes prohibition in 49 CFR 391.41(b)(3). Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

The physical qualification standard for drivers regarding diabetes found in 49 CFR 391.41(b)(3) states that a person is physically qualified to drive a CMV if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control. The Agency established the current requirement for diabetes in 1970 because several risk studies indicated that drivers with diabetes had a higher rate of crash involvement than the general population.

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled ‘‘A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century.’’ The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible. The September 3, 2003 (68 FR 52441), **Federal Register** notice in conjunction with the November 8, 2005 (70 FR 67777), **Federal Register** notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

FMCSA notes that section 4129 of the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users requires the Secretary to revise its diabetes exemption program established on September 3, 2003 (68 FR 52441). The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section 4018 of the Transportation Equity Act for the 21st Century (49 U.S.C. 31305). Section 4129 requires: (1) Elimination of the requirement for three years of experience operating CMVs while being treated with insulin; and (2) establishment of a specified minimum period of insulin use to demonstrate stable control of diabetes before being allowed to operate a CMV.

In response to section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 notice. FMCSA discontinued use of the three-year driving experience and fulfilled the requirements of section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the requisite level of safety required of all exemptions granted under 49 U.S.C. 31136 (e). Section

4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and medical requirements that are deemed medically necessary. The FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003, notice, except as modified, were in compliance with section 4129(d). Therefore, all of the requirements set out in the September 3, 2003, notice, except as modified by the notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

II. Qualifications of Applicants

David V. Amado

Mr. Amado, 45, has had ITDM since 2015. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Amado understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Amado meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from California.

Allan D. Arcand

Mr. Arcand, 60, has had ITDM since 1972. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Arcand understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Arcand meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2017 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from Wisconsin.

Nickie D. Archuleta

Mr. Archuleta, 58, has had ITDM since 2004. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Archuleta understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Archuleta meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Pennsylvania.

Mathew B. Bartlett

Mr. Bartlett, 28, has had ITDM since 2005. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Bartlett understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bartlett meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2017 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa

Sean S. Bateman

Mr. Bateman, 28, has had ITDM since 2005. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Bateman understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bateman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from New York.

Marvin E. Battle, Jr.

Mr. Battle, 40, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Battle, Jr. understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Battle, Jr. meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Georgia

Gordon R. Bayles

Mr. Bayles, 66, has had ITDM since 2015. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Bayles understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bayles meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Utah.

Kirk W. Behrer

Mr. Behrer, 55, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Behrer understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Behrer meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2017 and certified that he does not have diabetic retinopathy. He holds an operator's license from Pennsylvania.

Benjamin J. Boeding

Mr. Boeding, 39, has had ITDM since 1980. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Boeding understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Boeding meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Minnesota.

Robert A. Bowman

Mr. Bowman, 61, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Bowman understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bowman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Kentucky.

Michael G. Cohen

Mr. Cohen, 48, has had ITDM since 2014. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Cohen understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cohen meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New York.

John R. Delucca

Mr. Delucca, 69, has had ITDM since 2015. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Delucca understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Delucca meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Indiana.

James M. Dubay

Mr. Dubay, 57, has had ITDM since 2018. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Dubay understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Dubay meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Michigan.

Larry I. Frizell

Mr. Frizell, 57, has had ITDM since 2015. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Frizell understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Frizell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Gerson A. Gonzalez

Mr. Gonzalez, 32, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Gonzalez understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gonzalez meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from New Jersey.

David D. Gross

Mr. Gross, 57, has had ITDM since 2018. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Gross understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gross meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Ricky A. Kirby

Mr. Kirby, 58, has had ITDM since 2008. His endocrinologist examined him in 2017 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Kirby understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kirby meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Kentucky.

Dustin M. Kirkland

Mr. Kirkland, 37, has had ITDM since 2018. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Kirkland understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kirkland meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Ohio.

Scott M. Kiser

Mr. Kiser, 45, has had ITDM since 2016. His endocrinologist examined him in 2017 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Kiser understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kiser meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2017 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Georgia.

Lee E. Koehn

Mr. Koehn, 68, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Koehn understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Koehn meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Alabama.

Wayne L. Kracht

Mr. Kracht, 48, has had ITDM since 2015. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Kracht understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kracht meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Iowa.

Jeffrey L. Kramer

Mr. Kramer, 56, has had ITDM since 1992. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Kramer understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Kramer meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Ohio.

Brad M. Ligols

Mr. Ligols, 54, has had ITDM since 2000. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Ligols understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ligols meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Massachusetts.

Kenneth J. Lubanski

Mr. Lubanski, 29, has had ITDM since 2011. His endocrinologist examined him in 2017 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Lubanski understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Lubanski meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from New Jersey.

Thomas W. Markham

Mr. Markham, 61, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Markham understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Markham meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2017 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Richard T. McAtee II

Mr. McAtee, 49, has had ITDM since 2014. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. McAtee understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McAtee meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Ohio.

John T. McEntire III

Mr. McEntire, 24, has had ITDM since 2007. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. McEntire understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McEntire meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from South Carolina.

Jonathan D. Miles

Mr. Miles, 45, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Miles understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Miles meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Indiana.

Brian J. Morgan

Mr. Morgan, 46, has had ITDM since 2001. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Morgan understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Morgan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Vermont.

Cecil M. Morris, Jr.

Mr. Morris, 60, has had ITDM since 2014. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Morris understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Morris meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Kentucky.

Nicholas C. O'Connor

Mr. O'Connor, 32, has had ITDM since 2004. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. O'Connor understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. O'Connor meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Massachusetts.

Rowdy V. Orr

Mr. Orr, 38, has had ITDM since 2010. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Orr understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Orr meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Texas.

Neal J. Pangrazio

Mr. Pangrazio, 60, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Pangrazio understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pangrazio meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New York.

William T. Phipps, Jr.

Mr. Phipps, 48, has had ITDM since 2010. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Phipps understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Phipps meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he has stable nonproliferative and stable proliferative diabetic retinopathy. He holds a Class A CDL from Maryland.

Robert A. Pope

Mr. Pope, 53, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Pope understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pope meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Iowa.

Micky J. Powers

Mr. Powers, 71, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Powers understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Powers meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Missouri.

Shawn K. Richardson

Mr. Richardson, 54, has had ITDM since 2012. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Richardson understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Richardson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Washington.

Joselito Rosario

Mr. Rosario, 49, has had ITDM since 2004. His endocrinologist examined him in 2017 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Rosario understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rosario meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Massachusetts.

Gregory L. Ryan

Mr. Ryan, 61, has had ITDM since 2018. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Ryan understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ryan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Delaware.

Howard G. Schrepp

Mr. Schrepp, 63, has had ITDM since 2013. His endocrinologist examined him in 2017 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Schrepp understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Schrepp meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Georgia.

James W. Shirk

Mr. Shirk, 59, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Shirk understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Shirk meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2017 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Michael J. Simko

Mr. Simko, 28, has had ITDM since 2013. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Simko understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Simko meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Pennsylvania.

Roderick Q. Smith

Mr. Smith, 57, has had ITDM since 2005. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Smith understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Smith meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Illinois.

Walter C. Snodgrass, Jr.

Mr. Snodgrass, 57, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Snodgrass understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Snodgrass meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Indiana.

Robert W. Stewart

Mr. Stewart, 70, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Stewart understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Stewart meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from North Carolina.

Joseph W. Symons

Mr. Symons, 36, has had ITDM since 2018. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Symons understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Symons meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Michigan.

Felipe D. Torres

Mr. Torres, 48, has had ITDM since 2013. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Torres understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Torres meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Texas.

James J. Triplett

Mr. Triplett, 77, has had ITDM since 2004. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Triplett understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Triplett meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Tennessee.

Amos L. Trujillo

Mr. Trujillo, 50, has had ITDM since 2012. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Trujillo understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Trujillo meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Mexico.

Lynda D. Vance

Ms. Vance, 34, has had ITDM since 2018. Her endocrinologist examined her in 2018 and certified that she has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. Her endocrinologist certifies that Ms. Vance understands diabetes management and monitoring, has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Vance meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her optometrist examined her in 2018 and certified that she does not have diabetic retinopathy. She holds an operator's license from Tennessee.

Christopher E. Vazquez

Mr. Vazquez, 21, has had ITDM since 1997. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Vazquez understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Vazquez meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Connecticut.

Michael J. Vigna

Mr. Vigna, 61, has had ITDM since 2017. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Vigna understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Vigna meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Illinois.

Brian P. Walsh

Mr. Walsh, 47, has had ITDM since 1998. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Walsh understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Walsh meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2018 and certified that he does not have diabetic retinopathy. He holds an operator's license from Iowa.

Nathan L. Watson

Mr. Watson, 25, has had ITDM since 1994. His endocrinologist examined him in 2018 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (two or more) severe hypoglycemic episodes in the last five years. His endocrinologist certifies that Mr. Watson understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Watson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2017 and certified that he does not have diabetic retinopathy. He holds an operator's license from Texas.

III. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated in the dates section of the notice.

IV. Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2018–0032 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and materials received during the comment period. FMCSA may issue a final determination at any time after the close of the comment period.

V. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2018–0032 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to this notice.

Issued on: July 12, 2018.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Reports, Forms, and Record Keeping Requirements Agency Information Collection Activity Under OMB Review

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of the OMB review of information collection; request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, this notice announces that the Information Collection Request (ICR) abstracted below will be submitted to the Office of Management and Budget (OMB) for review. A **Federal Register** Notice with a 60-day comment period soliciting public comments on this information collection was published on August 24, 2017 (**Federal Register**/Vol. 82, No. 109/ pp. 34152–34154).

DATES: Submit comments on or before August 16, 2018.

ADDRESSES: Submit comments through one of the following methods:

- Electronically through *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Mail and Hand Delivery/Courier to:* Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), 725 17th Street NW, Washington, DC 20503, Attention NHTSA Desk Officer.

FOR FURTHER INFORMATION CONTACT: Kathryn Wochinger, Office of Behavioral Safety Research (NPD–310), NHTSA, W46–487, 1200 New Jersey Avenue SE, Washington, DC 20590. Dr. Wochinger's phone number is (202) 366–4300, and email address is *kathryn.wochinger@dot.gov.*

SUPPLEMENTARY INFORMATION:

Title: State of the Practice of Ignition Interlock Programs.

Form No.: NHTSA Form 1450 (questionnaire) and 1451 (discussion guide).

Type of Review: Regular.

Abstract: Alcohol impairment is one of the primary causes of motor vehicle crashes on the Nation's highways. For example, 28 percent of all motor vehicle traffic fatalities in 2016 involved alcohol-impairment. One countermeasure to alcohol-impaired driving is the ignition interlock, and nearly every State, the District of Columbia and Puerto Rico deliver interlock services for Driving While Impaired (DWI) offenders. Highway safety officials and traffic safety advocates identified a need for an inventory of interlock programs to support program management by documenting lessons learned and identifying solutions to common problems. The collected information would be from publicly available sources such as program websites, and from program administrators and staff. Administrators would be invited to take a 15-minute online self-administered questionnaire, and administrators and staff would be invited to participate in a semi-structured interview over the telephone, up to one hour (with one interview per program).

Respondents: Respondents will be administrators and staff of alcohol ignition interlock programs. There are up to 52 interlock programs; with nearly one in each state, the District of Columbia, and Puerto Rico.

Estimated Number of Respondents: 260 (If 52 administrators and four staff per program were to respond).

Estimated Time per Response: The expected average completion time for the questionnaire is 15 minutes, and for the group phone interview it is 60 minutes.

Estimate of the Total Annual Reporting and Record Keeping Burden Resulting from the Collection of Information: Participants will incur no burden related to annual reporting or record keeping due to the collection of information.

Total Estimated Annual Burden Hours: A total of 273 hours: The estimated burden hours for the questionnaire is 13 hours (52 administrators × .25 hours to take the questionnaire), and the estimated burden hours for the group interviews is 260 hours (260 people × 1 hour).

Frequency of Collection: The information collection will be administered a single time.

Previous Notice: A 60-day notice in the **Federal Register** on August 24, 2017 received three comments. The first comment recommended that the questionnaire and the topics of the group interview be provided ahead of time with the managers of each program's transportation department, to allow managers the opportunity to provide guidance to the staff. NHTSA concurs with this request. The second request was that the information collection should ''not ask for judgments'' about a department. NHTSA concurs with this request, as the collected information is on features and facts of the programs. The third comment was that ''other approaches to combatting impaired driving'' warrant support. NHTSA concurs with this comment.

Comments are Invited: Comments are invited on whether the proposed collection of information is (a) necessary for the Department's performance; (b) the accuracy of the estimated burden; (c) ways for the Department to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

A comment to OMB is most effective if OMB receives it within 30 days of publication of this notice.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Section 3506(c)(2)(A).

Issued in Washington, DC, on July 12, 2018.

Jeff Michael,

Associate Administrator, Research and Program Development.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–2018–XXXX]

Drugs that Impair Safe Driving; Request for Comments

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Request for comment.

SUMMARY: NHTSA is reviewing the literature on drug use and driving with the aim of updating its Drugs and Human Performance Fact Sheets that are used by the criminal justice community and others as they address drug-impaired driving. The current edition of the Fact Sheets was released in 2004 and included information on the following drugs: Carisoprodol, cocaine, dextromethorphan, diazepam, diphenhydramine, gamma-hydroxybutyrate (GHB), ketamine, lysergic acid diethylamide (LSD), marijuana, methadone, methamphetamine, methylenedioxymethamphetamine (MDMA), morphine, phencyclidine (PCP), toluene, and zolpidem. NHTSA welcomes comments and suggestions for additional drugs to be considered for inclusion in the new edition of the Fact Sheets as well as relevant research studies that have become available since 2004 that could be included in the updated fact sheets. To the extent possible, such comments and suggestions should be accompanied by information about the drug, including the extent of its use, its pharmacology and pharmodynamics, and how impairing it is for driving, along with references.

DATES: Interested parties are invited to submit comments and suggestions on or before September 1, 2018.

FOR FURTHER INFORMATION CONTACT: If you have questions about this request for comment, please contact Richard Compton at *NHTSAdruginfo@dot.gov* or 202–366–2699.

Written Comments: Written statements and supporting information submitted during the comment period will be considered. Please submit all written comments no later than September 1, 2018, by any of the following methods:

- *Federal Rulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility: U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590–0001, between 9 a.m. and 5 p.m. ET, Monday through Friday, except Federal Holidays.
- *Fax:* 202–366–1767.

Instructions: All submissions must include the agency name and docket number. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act discussion below.

Docket: For access to the docket go to *http://www.regulations.gov* at any time or to 1200 New Jersey Avenue SE, West Building, Ground Floor, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays. Telephone: 202–366–9826.

Privacy Act: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78), or you may visit *http://www.regulations.gov/privacy.html.*

Confidential Business Information: If you wish to submit any information under a claim of confidentiality, you should submit three copies of your complete submission, including the information you claim to be confidential business information, to the Chief Counsel, NHTSA, 1200 New Jersey Ave. SE, W41–326, Washington DC 20590. In addition, you should submit two copies, from which you have deleted the claimed confidential business information, to Docket Management at the address given above. When you send a comment containing information claimed to be confidential business information, you should submit a cover letter setting forth the information specified in our confidential business information regulation (49 CFR part 512).

SUPPLEMENTARY INFORMATION:

Background

In the early 2000s, NHTSA convened a panel of international experts on drug-impaired driving to review developments in the field of drugs and human performance and to identify the specific effects that both high priority illicit and prescription drugs have on driving. The experts represented the fields of psychopharmacology, behavioral psychology, drug chemistry, forensic toxicology, medicine, and law enforcement. That effort resulted in the publication of a document entitled Drugs and Human Performance Fact Sheets (DOT HS 809 725) in June 2004.

Each Fact Sheet covered one of the selected sixteen drugs that impair driving. The selected drugs included over-the-counter medications such as dextromethorphan and diphenhydramine; prescription medications such as carisoprodol, diazepam, and zolpidem; and abused and/or illegal drugs such as cocaine, GHB, ketamine, LSD, marijuana, methadone, methamphetamine, MDMA, morphine, PCP, and toluene. Each individual drug Fact Sheet covered information regarding drug chemistry, usage and dosage information, pharmacology, drug effects, effects on driving, drug evaluation and classification, and the panel's assessment of driving risks. More specifically, the Fact Sheets provided details on the physical description of the drug, synonyms, and pharmaceutical or illicit sources; medical and recreational uses, recommended and abused doses, typical routes of administration, and potency and purity; mechanism of drug action and major receptor sites; drug absorption, distribution, metabolism and elimination data; blood and urine concentrations; psychological and physiological effects, and drug interactions; drug effects on psychomotor performance effects; driving simulator and epidemiology studies; and drug recognition evaluation profiles. Each Fact Sheet concludes with general statements about the drugs' ability to impair driving performance. A list of key references and recommended reading was also provided for each drug.

Since 2004, new research on these and other impairing drugs has become available. As a result, NHTSA plans to evaluate whether additional drugs that impair driving should be included in the Fact Sheets and to add them as appropriate, as well as to update information on the effects of the sixteen aforementioned drugs on driving. NHTSA will base the revised Fact Sheets on the state of current scientific knowledge. The agency intends to design the revised Fact Sheets to continue to provide practical guidance to toxicologists, pharmacologists, law enforcement officers, attorneys, and the general public to use in the evaluation of future cases.

In order to assist on the development of the new edition of the Fact Sheets, NHTSA invites comments and suggestions from the general public on additional drugs as well as relevant research studies that have become available since 2004 that could be included in the updated fact sheets. To the extent possible, such comments and suggestions should be accompanied by information about the drug, including the extent of its use, its pharmacology and pharmodynamics, and how impairing it is for driving, along with references.

Authority: 44 U.S.C. Section 3506(c)(2)(A).

Issued in Washington, DC, on July 12, 2018.

Jeff Michael,

Associate Administrator, Research and Program Development.

BILLING CODE 4910–59–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[U.S. DOT Docket No. NHTSA–2018–0060]

Reports, Forms, and Record Keeping Requirements

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for public comment on proposed collection of information.

SUMMARY: Before a Federal agency can collect certain information from the public, it must receive approval from the Office of Management and Budget (OMB). Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections. This document describes the collection of information for which NHTSA intends to seek OMB approval.

DATES: Comments must be received on or before September 17, 2018.

ADDRESSES: You may submit comments identified by DOT Docket Number NHTSA–2018–0060 using any of the following methods:

Electronic submissions: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Mail: Docket Management Facility, M–30, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590.

Hand Delivery: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Instructions: Each submission must include the agency name and the docket number for this Notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Mary Byrd, Contracting Officer's Representative, Office of Behavioral Safety Research (NPD–320), National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, Washington, DC 20590. Ms. Byrd's phone number is 202–366–5595, and her email address is *mary.byrd@dot.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulations (5 CFR 1320.8(d)), an agency must ask for public comment on the following:

(i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) how to enhance the quality, utility, and clarity of the information to be collected; and

(iv) how to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

In compliance with these requirements, NHTSA asks public comment on the following proposed collection of information:

Title: Emergency Medical Services Sleep Health and Fatigue Education

Type of Request: New information collection.

OMB Clearance Number: None.

Form Number: NHTSA Forms 1460, 1461, 1462, 1463, 1464, 1465, 1466, and 1467.

Requested Expiration Date of Approval: Three years from date of approval.

Summary of the Collection of Information: The National Highway Traffic Safety Administration (NHTSA) proposes to collect information from Emergency Medical Services (EMS) personnel who operate ambulances on the roadway for a one-time voluntary study to evaluate the effectiveness of a fatigue mitigation intervention that delivers education and training. Up to 200 EMS agencies across the United States will be contacted and screened in order to recruit a total of 30 agencies to participate in the study. NHTSA anticipates contacting up to 100 EMS personnel per participating agency (3,000 total) to screen and recruit 1,500 eligible participants for the study. NHTSA expects 1,200 voluntary participants to complete the sign-up process, including providing demographic information and shift schedules, and to consent to participate in the 24-week study. Participants will complete a baseline survey that includes self-reported fatigue and sleepiness and will retake the survey halfway through the study and again at the end of the study. All participants will complete the ten ten-minute training modules during the study period. Once the study is underway, participants will be asked to respond to daily text messages about sleepiness and fatigue for eight weeks of the 24-week study. Finally, NHTSA will ask 30 of the 1,200 participants to provide additional information by keeping a daily sleep diary for eight weeks and by taking a brief vigilance task test to measure fatigue at the beginning and end of each shift over eight days.

Background: The mission of the NHTSA is to save lives, prevent injuries and reduce economic costs due to motor vehicle crashes. In support of this mission, NHTSA's Office of Behavioral Safety Research studies behaviors and attitudes in highway safety, focusing on drivers, passengers, pedestrians, and motorcyclists, and it uses the results to develop and refine countermeasures to deter unsafe behaviors and promote safe alternatives. An efficient EMS system is integral to reducing injury and mortality on and off our Nation's highways and is key to ensuring prompt emergency response to any type of illness or injury. The Nation's best preparation for any incident, large or small, is a comprehensive EMS system, ready every day for every emergency.

A 2015 NHTSA study published at EMSworld.com found that on average there are 4,500 crashes per year involving ambulances, and these crashes result in an average of 33 deaths per year. As indicated in various media reports of high profile crashes, fatigue and sleep deprivation are likely contributors. Furthermore, a 2012 study by Patterson, Weaver, Frank, et al. published in *Prehospital Emergency Care* found that the odds of injury, medical error, and safety-compromising behaviors among fatigued EMS personnel are twice that of personnel who do not report fatigue. A 2015 study by Patterson, Weaver and Hostler in *Emergency Medical Services: Clinical Practice and Systems Oversight* found that more than half of EMS personnel report fatigue, poor sleep, or inadequate recovery between shifts.

While greater than half of EMS personnel report work-related fatigue, there are no guidelines for the management of fatigue in EMS. In 2013, the National EMS Advisory Council (NEMSAC) adopted an advisory that recommended NHTSA and federal partners disseminate evidence-based information to aid the EMS community in efforts to develop fatigue risk management programs. In response, NHTSA kicked off the ''Fatigue in EMS'' initiative in 2016. The project aims to address the potential dangers of drowsiness and fatigue among EMS workers, including the risk of traffic crashes, injuries to providers and patients, and medical errors. After an extensive review of more than 30,000 published research articles, the project team released its evidence-based guidelines for fatigue risk management, along with companion materials and expert commentaries in January 2018. The guidelines, which are described in a 2018 publication by Patterson, Higgins, Van Dogen, et al. in *Prehospital Emergency* Care, intend to combat the effects of fatigue through the following five recommendations:

1. Reliable and/or valid fatigue and sleepiness survey instruments should be used to measure and monitor fatigue in EMS personnel.
2. EMS personnel should work shifts shorter than 24 hours in duration.
3. EMS workers should have access to caffeine as a fatigue countermeasure.
4. EMS personnel should have the opportunity to nap while on duty to mitigate fatigue.
5. EMS personnel should receive education and training to mitigate fatigue and fatigue-related risks.

Description of the Need for the Information and Proposed Use of the Information: After developing and disseminating the evidence-based guidelines for fatigue risk management, the second phase of NHTSA's ''Fatigue in EMS'' initiative is to test the impact of one or more of the recommendations. NHTSA proposes to use the information collected to evaluate the effectiveness of the fifth recommendation, education and training, on reducing fatigue among EMS personnel. The overarching goals of this project are to determine whether providing education and training to EMS personnel on the importance of sleep health and dangers of fatigue affect diverse indicators of sleep, fatigue, and safety as well as to enhance our general understanding of the relationships between shift work, sleep, and fatigue in EMS operations. If the training is demonstrated to be effective at improving sleep quality and reducing fatigue, then it will be more widely distributed to the EMS community through State offices as well as through the National Association of State Emergency Medical Services Officials.

Data Collection Plan: Members of the research team will coordinate recruitment and enrollment of EMS organizations and individual EMS personnel. Recruitment will be limited to EMS organizations and affiliated personnel located in the United States. The research team will use webinars, conference calls, and a website to advertise the research study to those that may be interested. The team expects to collect information from as many as 200 organizations to recruit the target of 30 moderately-sized EMS organizations (50 to 300 personnel) who provide around-the-clock ground-based services. The team will measure interest and eligibility using an agency-level screening form, which is estimated to take 5 minutes to complete for a total expected burden of 17 hours. The 30 participating agencies will then recruit EMS clinicians currently working full-time or part-time using a recruitment flyer distributed to employees. The research team expects to collect information from as many as 3,000 individuals to identify up to 1,500 eligible participants. The team will measure eligibility using an individual-level screening form, which is estimated to take 5 minutes to complete for a total expected burden of 250 hours.

The research team will have the 1,500 eligible individuals watch a video explaining the study and the consent process and will then ask them to indicate their consent to participate. The consenting process is expected to take 10 minutes for a total expected burden of 250 hours. The research team expects 1,200 eligible individuals to consent and agree to participate. These individuals will then complete the registration process including providing demographic information and shift schedules, complete a baseline survey including self-reported fatigue and sleepiness. Half of the participants will be asked to complete ten training sessions of ten minutes each within ten days. The other half will be asked to complete the training within ten days of the mid-point of the study. The expected burden for the registration process, baseline survey and training intervention is 145 minutes per participant for a total burden of 2,900 hours. Once the study is underway, participants will be asked to respond to daily text messages about sleepiness and fatigue for eight weeks of the 24-week study. The expected burden of responding is 5 minutes per response for a total burden of 5,600. The research team also will ask participants to complete follow-up surveys at the study mid-point and at the end of the study. The expect burden of responding is 25 minutes per survey for a total burden of 1,000 hours.

A subset of participants (30 of the 1,200) will complete a daily sleep diary for eight weeks of the 24-week study. Completing the diary is expected to take 3 minutes per day for a total burden of 84 hours. This subset also will be asked to take a brief Psychomotor Vigilance Task test twice per day (at the start and at the end of shift) for a total of eight days spread across the study period. Completing each test is expected to take five minutes for a total burden of 40 hours. The purpose of these additional data collections is to assess the validity and reliability of the self-reported study measures.

Estimate of the Total Annual Reporting and Record Keeping Burden Resulting from the Collection of Information: The total estimated burden for EMS agency recruitment (17 hours), recruitment of EMS clinicians (250 hours), the consenting process (250 hours), initial data collection and training (2,900), follow-up data collection (6,600), and additional data collection for assessing measurement error (124) is 10,141 hours.

Authority: 44 U.S.C. Section 3506(c)(2)(A).

Issued in Washington, DC, on July 12, 2018.

Jeff Michael,

Associate Administrator, Research and Program Development.

BILLING CODE 4910–59–P

DEPARTMENT OF VETERANS AFFAIRS

Health Services Research and Development Service, Scientific Merit Review Board; Notice of Meetings

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act that the Health Services Research and Development Service Scientific Merit Review Board will conduct in-person and teleconference meetings of its eleven Health Services Research (HSR) subcommittees on the dates below from 8:00 a.m. to approximately 4:30 p.m. (unless otherwise listed) at the FHI 360 Conference Center, 1825 Connecticut Avenue NW, Washington, DC 20009 (unless otherwise listed):

- HSR 0—Community Care on August 21, 2018;
- HSR 1—Health Care and Clinical Management on August 21–22, 2018;
- HSR 2—Behavioral, Social, and Cultural Determinants of Health and Care on August 23–24, 2018;
- HSR 3—Healthcare Informatics on August 23, 2018;
- HSR 4—Mental and Behavioral Health on August 21–22, 2018;
- HSR 5—Health Care System Organization and Delivery on August 23–24, 2018;
- HSR 6—Post-acute and Long-term Care on August 22, 2018;
- HSR 7—Opioid and Pain Management Special Emphasis on August 24, 2018;
- MRA 0—Mentored Research on August 24, 2018;
- HSR 8—Implementation Research Project on August 23, 2018;
- HS8 A—Randomized Program Evaluations on August 23, 2018; and
- HSR 9—Learning Health Initiative on August 23, 2018.

The purpose of the Board is to review health services research and development applications involving: the measurement and evaluation of health care services; the testing of new methods of health care delivery and management; and mentored research. Applications are reviewed for scientific and technical merit, mission relevance, and the protection of human and animal subjects. Recommendations regarding funding are submitted to the Chief Research and Development Officer.

Each subcommittee meeting of the Board will be open to the public the first day for approximately one half-hour from 8:00 a.m. to 8:30 a.m. at the start of the meeting on August 21 (HSR 0, 1, 4), August 22 (HSR 1, 4, 6), August 23 (HSR 2, 3, 5, 8, 9, and HS8A), and August 24 (HSR 2, 5, 7, and MRA 0) to cover administrative matters and to discuss the general status of the program. Members of the public who wish to attend the open portion of the subcommittee meetings may dial 1 (800) 767–1750, participant code 10443#.

The remaining portion of each subcommittee meeting will be closed for the discussion, examination, reference to, and oral review of the intramural research proposals and critiques. During the closed portion of each subcommittee meeting, discussion and recommendations will include qualifications of the personnel conducting the studies (the disclosure of which would constitute a clearly unwarranted invasion of personal privacy), as well as research information (the premature disclosure of which would likely compromise significantly the implementation of proposed agency action regarding such research projects). As provided by subsection 10(d) of Public Law 92–463, as amended by Public Law 94–409, closing the meeting is in accordance with 5 U.S.C. 552b(c)(6) and (9)(B).

No oral or written comments will be accepted from the public for either portion of the meetings. Those who plan to participate during the open portion of a subcommittee meeting should contact Ms. Liza Catucci, Administrative Officer, Department of Veterans Affairs, Health Services Research and Development Service (10P9H), 810 Vermont Avenue NW, Washington, DC 20420, or by email at *Liza.Catucci@va.gov.* For further information, please call Ms. Catucci at (202) 443–5797.

Dated: July 12, 2018.

LaTonya L. Small,

Federal Advisory Committee Management Officer.

BILLING CODE 8320–01–P

FEDERAL REGISTER

Vol. 83 Tuesday,

No. 137 July 17, 2018

Part II

Federal Housing Finance Agency

12 CFR Parts 1206 and 1240

Department of Housing and Urban Development

Office of Federal Housing Enterprise Oversight

12 CFR Part 1750

Enterprise Capital Requirements; Proposed Rule

FEDERAL HOUSING FINANCE AGENCY

12 CFR Parts 1206 and 1240

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Federal Housing Enterprise Oversight

12 CFR Part 1750

RIN 2590–AA95

Enterprise Capital Requirements

AGENCY: Federal Housing Finance Agency; Office of Federal Housing Enterprise Oversight

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Housing Finance Agency (FHFA or the Agency) is proposing a new regulatory capital framework for the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac) (collectively, the Enterprises), which includes a new framework for risk-based capital requirements and two alternatives for an updated minimum leverage capital requirement. The risk-based framework would provide a granular assessment of credit risk specific to different mortgage loan categories, as well as market risk, operational risk, and going-concern buffer components. The proposed rule would maintain the statutory definitions of core capital and total capital.

FHFA has suspended the Enterprises' capital requirements since the beginning of conservatorship, and FHFA plans to continue this suspension while the Enterprises remain in conservatorship. Despite this suspension, FHFA believes it is appropriate to update the Agency's standards on Enterprise capital requirements to provide transparency to all stakeholders about FHFA's supervisory view on this topic. In addition, while the Enterprises are in conservatorship, FHFA will expect Fannie Mae and Freddie Mac to use assumptions about capital described in the rule's risk-based capital requirements in making pricing and other business decisions. Feedback on this proposed rule will also inform FHFA's views in evaluating Enterprise business decisions while the Enterprises remain in conservatorship.

DATES: Comments must be received on or before September 17, 2018.

ADDRESSES: You may submit your comments on the proposed rule, identified by regulatory information number (RIN) 2590–AA95, by any one of the following methods:

- *Agency Website: www.fhfa.gov/open-for-comment-or-input.*
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. If you submit your comment to the Federal eRulemaking Portal, please also send it by email to FHFA at *RegComments@fhfa.gov* to ensure timely receipt by FHFA. Include the following information in the subject line of your submission: Comments/RIN 2590–AA95.
- *Hand Delivered/Courier:* The hand delivery address is: Alfred M. Pollard, General Counsel, Attention: Comments/RIN 2590–AA95, Federal Housing Finance Agency, Eighth Floor, 400 Seventh Street SW, Washington, DC 20219. Deliver the package at the Seventh Street entrance Guard Desk, First Floor, on business days between 9 a.m. and 5 p.m.
- *U.S. Mail, United Parcel Service, Federal Express, or Other Mail Service:* The mailing address for comments is: Alfred M. Pollard, General Counsel, Attention: Comments/RIN 2590–AA95, Federal Housing Finance Agency, Eighth Floor, 400 Seventh Street SW, Washington, DC 20219. Please note that all mail sent to FHFA via U.S. Mail is routed through a national irradiation facility, a process that may delay delivery by approximately two weeks. For any time-sensitive correspondence, please plan accordingly.

FOR FURTHER INFORMATION CONTACT: Naa Awaa Tagoe, Senior Associate Director, Office of Financial Analysis, Modeling & Simulations, (202) 649–3140, *NaaAwaa.Tagoe@fhfa.gov*; Andrew Varrieur, Associate Director, Office of Financial Analysis, Modeling & Simulations, (202) 649–3141, *Andrew.Varrieur@fhfa.gov*; or Miriam Smolen, Associate General Counsel, Office of General Counsel, (202) 649–3182, *Miriam.Smolen@fhfa.gov.* These are not toll-free numbers. The mailing address is: Federal Housing Finance Agency, 400 Seventh Street SW, Washington, DC 20219. The telephone number for the Telecommunications Device for the Hearing Impaired is (800) 877–8339.

SUPPLEMENTARY INFORMATION:

Comments

FHFA invites comments on all aspects of the proposed rule and will take all comments into consideration before issuing a final rule. Copies of all comments will be posted without change, and will include any personal information you provide such as your name, address, email address, and telephone number, on the FHFA website at *http://www.fhfa.gov.* In addition, copies of all comments received will be available for examination by the public through the electronic rulemaking docket for this proposed rule also located on the FHFA website.

I. Introduction

A. Rationale for Proposing a Capital Rule

FHFA's predecessor agency, the Office of Federal Housing Enterprise Oversight (OFHEO), last adopted capital rules for Fannie Mae and Freddie Mac in 2001. The Housing and Economic Recovery Act of 2008 (HERA) gave FHFA greater authority to determine capital standards for the Enterprises. Each Enterprise was placed into conservatorship shortly after the enactment of HERA. FHFA suspended the statutory capital classifications and regulatory capital requirements during conservatorship, due to the Enterprises having entered the control of the conservator. Today, the Senior Preferred Stock Purchase Agreements (PSPAs) with the U.S. Department of the Treasury (Treasury Department) limit each Enterprise's ability to hold capital.

Prior to proposing this rule, FHFA has taken other steps to assess adequate capital assumptions for the Enterprises while they operate in conservatorship. Despite the Enterprises' limited ability to hold capital, FHFA identified the need to develop an aligned risk measurement framework to better evaluate each Enterprise's business decisions while they are in conservatorship. FHFA's purpose in pursuing this effort was to ensure that the Enterprises make prudent business decisions when pricing transactions and managing their books of business. The initial framework developed as a result of this effort is called the Conservatorship Capital Framework (CCF) and was put into place in 2017 under FHFA's oversight as conservator.

The CCF is the foundation for FHFA's proposed capital regulation. Although the capital requirements in the rule would need to be suspended after adoption of a final rule because the Enterprises remain in conservatorship and are supported by the Treasury Department through the PSPAs which limit their ability to retain capital, the updated rule would achieve several objectives. The proposed rule serves to transparently communicate FHFA's views as a financial regulator about capital adequacy for the Enterprises under current statutory language and authorities. The fact that FHFA has suspended the Enterprises' capital requirements does not eliminate FHFA's responsibility, as a prudential regulator, to articulate a view about Enterprise capital requirements. It also prepares the Agency to modify the capital standards for future housing finance entities, even if they are significantly different from the Enterprises, upon completion of housing finance reform by Congress and the Administration, instead of starting from the outdated OFHEO rules. In addition, publication of this proposed rule will enable the public to provide input on these important issues.

While the Enterprises currently operate under the PSPAs with the Treasury Department, the proposed rule does not take the PSPAs into account. The proposed risk-based capital requirements are designed to establish the necessary minimum capital for the Enterprises to continue operating after a stress event comparable to the recent financial crisis. In a reformed housing finance system, policymakers would need to determine whether to retain support like that provided by the PSPAs for future housing finance entities.

In proposing this rule, FHFA is not attempting to take a position on housing finance reform. Similarly, this proposed rule is not a step towards recapitalizing the Enterprises and administratively releasing them from conservatorship. FHFA's position continues to be that it is the role of Congress and the Administration to determine the future of housing finance reform and what role, if any, the Enterprises should play in that system.

Publication of this proposed rule will assist with FHFA's administration of the conservatorships of Fannie Mae and Freddie Mac by potentially refining the CCF. As with other proposed rules, the rulemaking provides the public with an opportunity to comment on the proposed capital requirements. As FHFA reviews the public comments and works to finalize the rule, the Agency expects to adopt material and appropriate changes into the existing CCF.

B. Overview of the Proposed Rule

FHFA is proposing a regulatory capital framework for the Enterprises that would implement two components: A new framework for risk-based capital requirements and a revised minimum leverage capital requirement specified as a percentage of total assets and off-balance sheet guarantees. FHFA's proposed rule is based on a capital framework that is generally consistent with the regulatory capital framework for large banks, but reflects differences in the charters, business operations, and risk profiles of the Enterprises. The proposed rule uses concepts from the Basel framework with appropriate modifications for the Enterprises. FHFA's proposed framework recognizes that the Enterprises are monoline businesses with assets and guarantees heavily concentrated in residential mortgages with risk profiles that differ from large diversified banks.

In order to fulfill their charter responsibilities of providing stability to the secondary mortgage market, the Enterprises must remain as functioning entities both during and after a period of severe financial stress. To achieve this objective, the proposed risk-based capital framework targets a risk-invariant minimum capital level after surviving a stress event, referred to as the going-concern buffer.

The Enterprises' assets and operations are exposed to different types of risks. The proposed risk-based capital framework would address the key exposures by explicitly covering credit risk, including counterparty risk, as well as market risk and operational risk. The proposed framework would define the requirements by risk factor for each key group of the Enterprises' assets and guarantees.

In establishing risk-based capital requirements and updating the minimum leverage requirement, FHFA is seeking to ensure that the two sets of requirements complement one another. For the risk-based capital requirements, FHFA is proposing a comprehensive framework that provides a detailed assessment of the Enterprises' risk of incurring unexpected losses. Instead of applying the Basel standardized approach of a 50 percent risk weight for all mortgage assets regardless of different product features or terms, FHFA's proposed risk-based capital requirements would use a series of approaches, which include base grids, risk multipliers, assessments of counterparty risk, and capital relief due to credit risk transfer transactions, to produce tailored capital requirements for mortgage loans, guarantees, and securities. These asset-specific capital requirements would then be applied across each Enterprise's book of business to produce total risk-based capital requirements.

By differentiating between the types and features of mortgage assets, guarantees, and securities purchased by the Enterprises, FHFA believes the proposed risk-based capital requirements would represent a substantial step forward in articulating the relative risk levels of mortgage loans and quantifying the associated capital requirements for the Enterprises.

In coordination with the proposed risk-based capital requirements, FHFA is also proposing two alternative minimum leverage capital requirements. Each of these alternatives would update the existing minimum leverage requirements established by statute for the Enterprises. Under the first alternative, the ''2.5 percent alternative,'' the Enterprises would be required to hold capital equal to 2.5 percent of total assets (as determined in accordance with generally accepted accounting principles (GAAP)) and off-balance sheet guarantees related to securitization activities, regardless of the risk characteristics of the assets and guarantees or how they are held on the Enterprises' balance sheets. Under the second alternative, the ''bifurcated alternative,'' the Enterprises would be required to hold capital equal to 1.5 percent of trust assets and 4 percent of non-trust assets, where trust assets are defined as Fannie Mae mortgage-backed securities or Freddie Mac participation certificates held by third parties and off-balance sheet guarantees related to securitization activities, and non-trust assets are defined as total assets as determined in accordance with GAAP plus off-balance sheet guarantees related to securitization activities minus trust assets. The Enterprises' retained portfolios would be included in non-trust assets. In proposing these two alternatives, FHFA seeks to obtain feedback about how to balance the following considerations.

On the one hand, FHFA seeks to establish a minimum leverage requirement that would serve as a backstop capital requirement to guard against the potential that the risk-based capital requirements would be underestimated or would become too low in the future following periods of sustained, strong economic conditions. A meaningful minimum leverage requirement would also guard against the risk that the risk-based capital measure significantly underestimates necessary capital levels. An underestimation of capital could occur for different reasons, including the potential for model estimation error, the possibility that loans perform differently than similar loans did in the historical periods used to estimate the models, the emergence of new products that are inadequately capitalized because of a lack of historical performance data as occurred during the financial crisis, and the possibility that the proposed risk-based capital approach would overestimate the amount of capital relief attributed to CRT transactions. A leverage backstop would also protect against a reduced risk-based capital measure during times of overly aggressive house price appreciation and low unemployment, which would result in lower capital requirements and the release of capital when loan-to-value ratios fall. In the absence of a meaningful minimum leverage capital requirement, aggressively low risk-based capital requirements could result in the Enterprises facing difficulty raising capital in worsening economic conditions when capital is most needed. A leverage backstop would also mitigate the risk of rapid deleveraging for institutions that depend on short-term funding, though, as discussed herein, this rationale applies more to large depository institutions than to the Enterprises. Lastly, a leverage backstop would provide a floor beyond the proposed going-concern buffer and operational risk capital requirement for the amount of capital released as a result of credit risk transfer transactions.

On the other hand, FHFA also seeks to avoid setting a minimum leverage requirement that is too high and would regularly eclipse the risk-based capital requirements, which could have adverse consequences. Because leverage requirements generally require firms to hold the same amount of capital for any type of asset irrespective of the asset's risk profile, a binding leverage requirement could incent firms to hold riskier assets on their balance sheets. Instead of reducing risk to the Enterprises, a high leverage requirement that surpasses risk-based capital requirements could encourage the Enterprises to forgo lower-risk assets in favor of those with higher-risks because the same capital requirement would apply for either asset. In addition, a binding leverage requirement could lead an Enterprise to reduce or halt its CRT transactions. This could occur because the proposed risk-based capital requirements provide capital relief for CRT transactions, whereas the minimum leverage capital requirements in this proposed rule do not provide capital relief for CRT transactions. As a result, a binding leverage ratio could reduce an Enterprise's economic incentive to engage in these transactions, potentially resulting in greater concentration of credit risk at the Enterprise.

Each of these proposed capital requirements are discussed in section II.

C. Legislative Authority and History

Effective July 30, 2008, HERA created FHFA as a new independent agency of the Federal Government. The part of HERA that applies to FHFA is the Federal Housing Finance Regulatory Reform Act of 2008,[1] which amended the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act or statute).[2] The 1992 statute created OFHEO, one of FHFA's predecessor agencies.

HERA transferred to FHFA the supervisory and oversight responsibilities of OFHEO over Fannie Mae and Freddie Mac. HERA also transferred the oversight responsibilities of the Federal Housing Finance Board over the Federal Home Loan Banks (Banks) and the Office of Finance, which acts as the Banks' fiscal agent, and certain functions of the Department of Housing and Urban Development (HUD) with respect to the affordable housing mission of the Enterprises. In addition to transferring supervisory responsibilities to FHFA, HERA gave the Agency greater authority than OFHEO had to determine the capital standards for the Enterprises.

1992 Statute and OFHEO Risk-Based Capital Rulemaking

As originally enacted, the 1992 statute specified a minimum capital requirement in the form of a leverage ratio for the Enterprises and a highly prescriptive approach to risk-based capital requirements for the Enterprises. The statute required that OFHEO establish a risk-based capital stress test by regulation such that each Enterprise could survive a ten-year period with large credit losses and large movements in interest rates. The statute specified two interest rate scenarios, with falling and rising rates, and provided the interest rate paths for each scenario. The statute set parameters for a benchmark loss experience for default and loss severity, but provided OFHEO discretion to determine other aspects of the capital test.

To implement this statutory language, OFHEO developed a risk-based capital standard for the Enterprises, and issued a series of **Federal Register** notices to solicit public comment. Initially, the Agency issued an Advance Notice of Proposed Rulemaking (ANPR) to seek comment on a number of issues related to the rule's development. Those comments were considered when OFHEO subsequently developed two Notices of Proposed Rulemaking (NPRs). The first NPR contained the methodology for identifying the benchmark loss experience and the use of OFHEO's House Price Index (HPI). The second NPR proposed the remaining specifications of the stress test. OFHEO also issued a notice to give interested parties an opportunity to respond to comments received by the Agency from the second NPR. OFHEO's Final Rule included consideration of the comments received in the first and second NPRs, as well as the reply comments.

Suspension of Capital Requirements During Conservatorship and Existing Regulatory Capital Requirements

On September 6, 2008, the Director of FHFA appointed FHFA as the conservator for each Enterprise, pursuant to authority in the Safety and Soundness Act. Conservatorship is a statutory process intended to preserve and conserve the assets of the Enterprises and to put the companies in a sound and solvent condition. FHFA suspended the capital classifications and the regulatory capital requirements applicable at that time, and they remain suspended.[3]

Although the capital requirements are suspended while the Enterprises are in conservatorship, this section reviews the Enterprise capital standards in the prior OFHEO rule, which, though suspended, has not yet been replaced.[4] The OFHEO regulations on the Enterprises' minimum capital (leverage ratio) and risk-based capital requirements would be superseded by this rulemaking.

The Enterprises are required by statute to maintain the capital necessary to meet certain minimum leverage and risk-based capital levels. Under HERA, the Enterprises continue to operate under the regulations issued by OFHEO until those regulations are superseded by regulations issued by FHFA. The OFHEO rule's minimum leverage and risk-based capital requirements are applied simultaneously, but are not additive. The Enterprises must meet both requirements in order to be classified as adequately capitalized.

If any Enterprise is classified as other than adequately capitalized, it triggers a series of prompt corrective actions. Since the ability of the Enterprises to obtain adequate capital was fatally impaired due to the financial crisis, capital support for the Enterprises was provided by the PSPAs with the Treasury Department when the Enterprises were put into conservatorship. Accordingly, FHFA suspended the capital classifications as well as the OFHEO capital regulation.

The minimum leverage capital requirement specified in the Safety and Soundness Act is equal to 2.5 percent of on-balance sheet assets and 0.45 percent of off-balance sheet obligations. These levels are applied to the retained portfolio and guarantee business, respectively.[5] The statute, today as in 1992, requires the minimum leverage capital requirement to be met with core capital, which per the statute is composed of outstanding common stock (par value and paid-in capital), retained earnings, and outstanding non-cumulative perpetual preferred stock.

The statute, as amended by HERA, also requires the Enterprises to meet a risk-based capital standard, to be prescribed by FHFA by regulation. The OFHEO capital rule contains a stress test, which is to be applied to each Enterprise's book of business. As prescribed by the 1992 statute, the stress test is designed such that each Enterprise could survive a ten-year period with large credit losses and large movements in interest rates. There are two interest rate scenarios, with falling and rising rates, and interest rate paths for each scenario. The test has parameters for a benchmark loss experience for default and loss severity, and uses the House Price Index produced by OFHEO (which FHFA now produces).

The statute, both in 1992 and today, requires the risk-based capital requirement to be met with total capital, which is the sum of core capital and a general allowance for foreclosure losses, plus ''[a]ny other amounts from sources of funds available to absorb losses incurred by the enterprise, that the Director by regulation determines are appropriate to include in determining

[1] Public Law 110–289, Div. A, July 30, 2008, 122 Stat. 2659.

[2] Public Law 102–550, Title XIII, October 28, 1992, 106 Stat. 3941.

[3] Press Release, ''FHFA Announces Suspension of Capital Classifications During Conservatorship,'' Oct. 9, 2008.

[4] 12 CFR part 1750.

[5] Due to changes in GAAP after the statute was enacted, guaranteed mortgage-backed securities held by third parties are now consolidated by each Enterprise onto its balance sheet. However, for minimum leverage capital purposes, FHFA has interpreted the statute as continuing to apply the 0.45 percent capital requirement to these loans. *See* Regulatory Interpretation 2010–RI–1, Jan. 12, 2010.

total capital'' (a determination that OFHEO never made).

The statute, both in 1992 and today, defines a critical capital level, which is the amount of core capital below which an Enterprise is classified as critically undercapitalized. The critical capital level is 1.25 percent of on-balance sheet assets (retained portfolio) and 0.25 percent of off-balance sheet obligations (guarantee business).

Under the statute, both in 1992 and today, an Enterprise is considered adequately capitalized when core capital meets, or exceeds, the minimum capital requirement and total capital meets, or exceeds, the risk-based capital requirement. An Enterprise is considered undercapitalized if it fails the risk-based requirement, but meets the minimum capital requirement. It is significantly undercapitalized when it fails both the minimum and risk-based capital requirements, but still has enough critical capital. It becomes critically undercapitalized when it fails both the minimum and risk-based capital requirements, as well as the critical capital requirement.

If an Enterprise becomes undercapitalized or significantly undercapitalized, under the prompt corrective action framework in the statute the Enterprise is subject to heightened supervision. This includes being required to submit a capital restoration plan, and having restrictions imposed on capital distributions and asset growth. A significantly undercapitalized Enterprise must also improve management through a change in the board of directors or executive officers. If an Enterprise becomes critically undercapitalized, then the Enterprise may be placed in conservatorship or receivership.

HERA Amendments on Enterprise Capital Requirements

FHFA's broader capital regulation authority provided by the amendments made by HERA creates an opportunity for FHFA to develop a new risk-based capital standard and an increased minimum leverage requirement. FHFA's authority to establish risk-based capital requirements was amended under HERA by removing the specific stress test requirements that had been mandated for OFHEO's rulemaking and providing FHFA with the authority to establish risk-based capital requirements ''to ensure that the enterprises operate in a safe and sound manner, maintaining sufficient capital and reserves to support the risks that arise in the operations and management of the enterprises.'' [6] While HERA did not change the minimum leverage ratio levels specified in the statute, the legislation provided FHFA with authority to increase the minimum leverage requirement above those levels as necessary,[7] and to temporarily increase the minimum capital level for a regulated entity.[8] FHFA issued a final regulation to implement the temporary increase authority in 2011.[9] Additionally, as amended by HERA, the statute provides FHFA with the authority to establish capital or reserve requirements for specific products and activities as deemed appropriate by the Agency.[10] HERA also enhanced the Safety and Soundness Act's prompt-corrective-action provisions and added the agency's conservatorship and receivership authorities.

Dodd-Frank Act Stress Tests

Section 165 [11] of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 [12] (Dodd-Frank Act) required the capital adequacy stress testing of large financial companies with assets over $10 billion that are supervised by a federal regulator. FHFA issued regulations to implement this requirement.[13] However, the Dodd-Frank Act Stress Test is a reporting requirement, not a capital requirement. The purpose of the test is to assist in the evaluation of capital sufficiency, but it does not set any capital requirements for the Enterprises.

D. The Enterprises' Pre-Conservatorship Business and the Financial Crisis

Pre-Conservatorship Business

The Enterprises' business model of supporting single-family and multifamily housing consists of both a guarantee business and a portfolio business. In the portfolio business, the Enterprises issue debt and invest the proceeds in whole loans and mortgage-backed securities. The mortgage securities held in the retained portfolio were traditionally the Enterprises' own guaranteed mortgage-backed securities. In the years leading up to the crisis, however, the Enterprises became active participants in the market for private-label mortgage securities, which exposed the Enterprises to significant fair value losses.

The Enterprises earned net interest income on the difference between rates on the mortgage securities (interest income) and the debt costs (interest expense) on their retained portfolio business. The net interest income was at risk since longer-term assets were funded by shorter-term debt. The Enterprises managed this duration mismatch using interest-rate swaps and ''swaptions'' in the derivatives market. By holding leveraged positions in mortgage securities and funding them with shorter-term debt, the Enterprises took on substantial market risks, in addition to supporting core business functions. Sources of this market risk include the risk of loss from changes in interest rates and the basis risk associated with imperfect hedging.

The Enterprises also used the retained portfolios to hold whole loans that could not be easily securitized, such as certain affordable loans and loans being reworked through loss mitigation. In addition, the retained portfolios were used to support the cash window for smaller lenders. This use of the retained portfolio supported core business functions and helped the Enterprises to fulfill their mission. However, during the pre-conservatorship period, the purchase of mortgage securities dominated the portfolio business.

In the guarantee business, private lenders participated in the mortgage-backed security swap program and cash window program. Through these programs, private lenders originated loans according to Enterprises' standards, and either exchanged those loans for securities that were guaranteed by either Enterprise, or sold loans directly to the Enterprises for cash. When lenders in the swap program received guaranteed mortgage-backed securities, they often sold those securities to replenish funds, enabling the lenders to make more loans. When smaller lenders sold their loans to the Enterprises for cash, the price they received was the market price for the loans less an implied guarantee fee. The Enterprises were able to quickly aggregate the cash window purchases from multiple smaller lenders and issue the guaranteed securities with a larger pool size directly. In addition, loans purchased through Freddie Mac's cash window or Fannie Mae's whole loan conduit (collectively referred to

[10] 12 U.S.C. 4612(e).

[11] 12 U.S.C. 5365(i). The stress testing requirements of the Dodd-Frank Act have been adjusted by Title IV of the Economic Growth, Regulatory Relief, and Consumer Protection Act, Public Law 115–174, May 24, 2018, 132 Stat. 1356, to, among other things, reflect new asset thresholds and to reduce from 3 to 2 the number of testing scenarios. The effect, if any, of the new requirements will be considered and accounted for in any final rule FHFA issues.

[12] Public Law 111–203, July 21, 2010, 124 Stat. 1376.

[13] 12 CFR part 1238.

henceforth as the cash window) noted above were aggregated and later securitized. In both the swap and cash programs, the Enterprises assumed the credit risk on the loans in exchange for a guarantee fee. The lenders earned income through originating and servicing loans, and selling MBS they received from the Enterprises; and private investors assumed the market risk from price changes driven by movements in interest rates.

Growth in Subprime and Other High Risk Loans

In the years leading up to the financial crisis, competition in the primary mortgage market for revenue and market share led mortgage lenders to relax underwriting standards and originate riskier mortgages to less creditworthy borrowers. Many of these loans were packaged into subprime and ''Alt-A'' private-label securities that were sold without backing from the Enterprises. Investor appetite for these loans enabled lenders to lower standards for underwriting, including credit scores, which increased the potential pool of borrowers and helped to drive up house prices. Consequently, subprime mortgages were given to borrowers with lower credit scores and low down payments.

In addition, Alt-A loans were increasingly offered to borrowers considered riskier than ''A'' or prime paper and less risky than subprime. Alt-A mortgages were characterized by less than the full documentation by the lender of a borrower's income and assets, which markedly increased the credit risk and fueled speculation. These high-risk loans often had features that made it increasingly difficult for borrowers to repay the loans, including low teaser rates that would reset, balloon payments, prepayment penalties, interest-only periods, and negative amortization. Weak underwriting standards during this period often included inflated appraised values, which compounded the problems. In addition, many loans had ''risk-layering'' of more than one higher risk attribute, significantly increasing credit exposures.

The private-label securities were divided into tranches with different terms and credit risk attributes. Prior to 2003, the Enterprises maintained relatively high underwriting standards. However, as the Enterprises faced declining market shares of the total mortgage market with the growth of the private-label market, the Enterprises sought to increase business revenue by buying significant amounts of the AAA-rated tranches of private-label subprime and Alt-A securities for their retained portfolios. In addition, the Enterprises guaranteed increasingly larger amounts of Alt-A whole mortgage loans with non-traditional credit standards from lenders through bulk sales, outside of the normal business standards for the guarantee business.

2007–2008 Financial Crisis

The financial crisis began in 2007 with stresses in the subprime and Alt-A mortgage market. The crisis grew to other financial sectors in the United States and globally. Several large financial firms failed and others had to be supported through government intervention. After the crisis, the Dodd-Frank Act was enacted in the United States, and the Basel III capital standards were adopted globally to promote financial stability.

In the build-up to the crisis, growth in subprime and Alt-A lending drove house prices increasingly higher. The overvaluation of non-traditional mortgages was based on the assumption that house prices would continue to rise. However, as the market for those loans began to weaken, house prices started to decline nationwide, further exacerbating the problems and spreading stress to markets beyond the housing sector. By September 2008 when the Enterprises entered conservatorship, the average U.S. house price had declined by over 20 percent from its mid-2006 peak. Many borrowers were faced with underwater mortgages such that the unpaid balances of the loans exceeded the value of the homes. The economic stress affected not only the subprime and Alt-A mortgages in the Enterprises' guarantee book, but also the mortgages in the guarantee book that had been approved under more traditional mortgage underwriting standards.

The financial crisis had a major impact on the value of the private-label securities held by the Enterprises in their retained portfolios. From 2002 to 2008, Fannie Mae purchased $240 billion of subprime and Alt-A private-label single-family mortgage securities. From 2006 to 2008, Freddie Mac purchased $160 billion of these securities.[14] When the financial crisis hit, the Enterprises suffered sharp declines in the value of these securities, due to weakening collateral and credit rating downgrades.

The SFAS 157 accounting standard issued in 2006 for fair value accounting required that tradable assets such as mortgage securities that were purchased with the intent to resell in either a short time frame (trading securities) or in a longer time frame (available-for-sale securities) be valued according to their current market value rather than historic cost or some future expected value. When the market for private-label securities collapsed, the value losses had a major financial effect on the holders of these securities. Upon entering conservatorship, the Enterprises ceased buying both subprime and Alt-A securities, and began to wind down those positions.

In addition to the private-label security losses in the portfolio, the guarantee book experienced severe stress from the financial crisis. Fannie Mae's single-family serious delinquency rate rose from 0.65 percent in 2006 to 2.42 percent in 2008, peaking at 5.38 percent in 2009. Subsequently, the delinquency rate fell below 2.00 percent by 2014 and to 1.24 percent at the end of 2017. Freddie Mac's delinquency rate rose from 0.42 percent in 2006 to 1.83 percent in 2008, peaking at 3.98 percent in 2009. At the end of 2017, ten years after the start of the financial crisis, Freddie Mac's delinquency rate had fallen to 1.08 percent.

The serious delinquency rates from the financial crisis translated into high credit losses for the Enterprises and a sharp increase in real estate owned properties (REO)[15]—properties acquired through foreclosure. Fannie Mae's credit losses as a percent of its guarantee book increased from 0.02 percent in 2006 to a peak of 0.77 percent in 2010. REO increased from 0.09 percent in 2006 to a peak of 0.53 percent in 2010. Freddie Mac experienced a similar loss and REO experience. Its credit losses grew from 0.01 percent in 2006 to a peak of 0.72 percent in 2010, and REO grew from 0.04 percent to 0.36 percent over this period.

As asset prices fell and other large financial firms failed, it became increasingly difficult for the Enterprises to issue debt to fund their retained portfolios, to raise new capital to cover the mark-to-market losses from private-label securities, and to build reserves for projected credit losses from credit guarantees. In the financial crisis, it became apparent that the Enterprises were not adequately capitalized to absorb these types of shocks.

In response to the substantial deterioration in the housing market that

[14] *See* FHFA's Report to Congress for private-label security holdings, serious delinquency rate, and credit loss data.

[15] When a borrower is unable to repay a mortgage, and a loan goes through the foreclosure process, the lender takes possession of the property that was pledged as collateral. When the property is conveyed to an Enterprise, it becomes real estate owned (REO) on the Enterprise's book.

left Fannie Mae and Freddie Mac unable to fulfill their mission without government intervention, FHFA used its conservatorship authority in the newly amended Safety and Soundness Act. On September 6, 2008, the Director of FHFA appointed FHFA as the conservator for each Enterprise to preserve and conserve the assets of the Enterprises and to put the companies in a sound and solvent condition. The goals of conservatorship are to restore confidence in the Enterprises, enhance the Enterprises' abilities to fulfill their missions, and mitigate the systemic risk that contributed directly to the instability during the financial crisis.[16]

As conservator, FHFA directs the operations of each Enterprise. The Agency has empowered the Enterprises' boards of directors and senior management to manage most day-to-day operations of the Enterprises, so that the companies can continue to support the mortgage markets without interruption. The approach that FHFA uses to exercise control and manage the conservatorships of Fannie Mae and Freddie Mac is discussed in the next section.

While the Enterprises are in conservatorship, the Treasury Department provides Fannie Mae and Freddie Mac with financial support through PSPAs. This support is unprecedented, and was necessary for the Enterprises to be able to meet their outstanding obligations and to continue to provide liquidity to the mortgage market. The initial PSPAs in September 2008 included an initial issuance to the Treasury Department of preferred stock with a liquidation preference of $1 billion each in Fannie Mae and Freddie Mac and warrants for a 79.9 percent common equity stake in each Enterprise.

Quarterly draws were designed to allow each Enterprise to maintain positive net worth. The maximum permitted amount was set at $100 billion for each Enterprise. The dividend rate on senior preferred stock purchased by the Treasury Department was set at 10 percent. In addition, the PSPAs provided for a ''periodic commitment fee'' to compensate the Treasury Department for its continuing commitment to purchase further senior preferred stock, up to a maximum commitment amount, as necessary to maintain the solvency of the Enterprises. (The Treasury Department regularly waived that fee, and in the August 2012 third amendment to the PSPAs, the fee was indefinitely suspended for so long as the ''net worth sweep'' established by that amendment remained in effect.) The PSPAs also included a requirement for each Enterprise to reduce the size of the retained portfolio by at least 10 percent each year, but allowed a $250 billion portfolio per Enterprise to support core business functions. The first amendment to the agreement in May 2009 doubled the maximum cumulative draw per Enterprise to $200 billion, and a second amendment in December 2009 replaced the maximum draw amount with a formulaic approach.

The third amendment to the agreement in August 2012 replaced the 10 percent dividend and the periodic commitment fee with a variable structure, under which the net income of each Enterprise in excess of a small capital buffer (the ''Applicable Capital Reserve Amount'') is swept to the Treasury Department. In many quarters, the payment equals quarterly net profits. With this amendment, all of the Enterprises' earnings are used to benefit taxpayers. The third amendment also provided for the uniform reduction of the Applicable Capital Reserve Amount from $3 billion to $0 at the end of 2017. In addition, the third amendment increased the rate of reduction in the size of the retained portfolios. Each Enterprise must reduce its portfolio by 15 percent per year, which is a faster reduction rate than the previous 10 percent annual reduction. This reduces the maximum retained portfolios to $250 billion by the end of 2018.

In December 2017, the PSPAs were revised to restore the Applicable Capital Reserve Amount to $3 billion. FHFA considers this capital reserve amount to be sufficient to cover normal fluctuations in income in the course of each Enterprise's business.[17]

E. Enterprises' Business Model and Changes in Conservatorship

FHFA uses four key approaches to manage the conservatorships of Fannie Mae and Freddie Mac. First, it establishes the overall strategic direction for the Enterprises in the Strategic Plan for the Conservatorships and an annual scorecard. Next, within the scope of the Strategic Plan and annual scorecard, FHFA authorizes the board of directors and senior management of each Enterprise to carry out the day-to-day operations of the companies. Third, for certain actions which FHFA has carved out as requiring advance approval by the Agency, it reviews and considers those requests. Finally, FHFA oversees and monitors the Enterprises' activities.

FHFA's conservatorship strategic plan has three goals: (1) To maintain foreclosure prevention activities and new credit availability in a safe and sound manner, (2) to reduce taxpayer risk through increasing the role of private capital, and (3) to build a new securitization infrastructure. The annual scorecards provide more specific direction for meeting these goals. FHFA reports to the public on its yearly activities through a number of reports, including an Annual Report to Congress, scorecard progress reports, credit risk transfer progress reports, and updates on the implementation of the common securitization platform and single security.

As discussed earlier, the Enterprises' business model before conservatorship of supporting single-family and multifamily housing traditionally consisted of both a guarantee business and a portfolio business. In the guarantee business, lenders may exchange loans for a guaranteed mortgage-backed security, which may then be sold by the lender into the secondary market to recoup funds to make more loans, or they may sell loans directly to an Enterprise through the cash window. The Enterprises purchase loans through the cash window from multiple smaller-volume lenders to aggregate and later securitize and guarantee. Loans purchased through the cash window are held in portfolio until they are securitized and become part of the guarantee business. The Enterprises charge a guarantee fee to cover the costs of providing the guarantee. In the portfolio business, the Enterprises invest in assets such as whole loans or mortgage-backed securities, and funds those purchases with debt issuances.

Consistent with the terms of the PSPAs with the Treasury Department, the portfolio business has been reduced substantially in size during conservatorship, with the guarantee business assuming a much larger role. While the portfolio business involves both credit and market risk, in the guarantee business the Enterprises assume the credit risk and the market risk is borne by private investors in the guaranteed mortgage-backed securities. In conservatorship, consistent with direction provided by FHFA in its strategic plan and annual scorecard, the Enterprises have developed programs to transfer a significant portion of the credit risk in the single-family guarantee business to the private sector.

In addition to reducing the size of the retained portfolios, the Enterprises have also strengthened underwriting and

eligibility standards, aligned certain business processes, and worked toward implementing a common securitization platform.

Guarantee Fees

The Enterprises charge fees to lenders in return for guaranteeing the credit risk on mortgage-backed securities. In response to the housing crisis and in conservatorship, the Enterprises have made a number of changes to these guarantee fees. As a result, the average single-family guarantee fee increased from 22 basis points in 2007 to 57 basis points in 2016.

In 2008, to better align fees with credit risk, the Enterprises increased ongoing guarantee fees and added two new upfront fees: A fee based on the combination of a borrower's credit score and loan-to-value ratio, and a 25 basis point adverse market charge. In late 2008 through 2011, the Enterprises gradually raised fees and further refined their upfront fee schedules. In late 2011, as mandated by the Temporary Payroll Tax Cut Continuation Act of 2011,[18] FHFA directed the Enterprises to increase guarantee fees by 10 basis points on average to offset the cost to the Treasury Department of a temporary payroll tax cut enacted by Congress.

In 2012, FHFA directed the Enterprises to raise fees by an additional 10 basis points on average to better compensate taxpayers for the Enterprises' credit risk. Fees were raised in a manner that helped eliminate volume-based discounts and thereby provide a level playing field for lenders of all sizes.

In 2013, FHFA announced another round of fee increases but subsequently suspended the implementation of those changes in order to perform a comprehensive review of the Enterprises' guarantee fees. After completing that review in 2015, FHFA directed the Enterprises to implement certain adjustments. These adjustments included the elimination of the adverse market charge in all markets and targeted increases for specific loan groups. The set of fee changes was approximately revenue neutral with little to no impact for most borrowers.

In 2016, in response to findings in its ongoing quarterly guarantee fee reviews, FHFA established minimum guarantee fees by product type to help ensure the continued safety and soundness of the Enterprises.

Retained Portfolio

Under the PSPAs with the Treasury Department and direction from FHFA, the unpaid balance of each Enterprise's mortgage portfolio is subject to a cap that decreases by 15 percent each year until the cap reaches $250 billion. The Enterprises have made significant progress on reducing their retained portfolios, and toward using the portfolios to support core business activities rather than as a source of investment income. The Enterprises have reduced their retained portfolios by over 60 percent since 2009, and both Enterprises are ahead of schedule in meeting the 2018 maximum portfolio limits.

Most of the portfolio reduction has resulted from prepayments and regular amortization of mortgages. The Enterprises have also sold less-liquid assets, such as private-label securities and non-performing and re-performing loans, in order to transfer risk to private investors. The Enterprises also securitized certain re-performing mortgages held on their books and sold those securities into the market. Fannie Mae's holdings of Fannie Mae-guaranteed securities fell from $229 billion at the end of 2008 to $49 billion in 2017, and holdings of other securities fell from $133 billion to $5 billion over the same period. Freddie Mac's retained portfolio experienced similar declines, as holdings of Freddie Mac-guaranteed securities fell from $425 billion in 2008 to $132 billion in 2017, and other mortgage securities fell from $269 billion to $14 billion over the same period.

The Enterprises' retained portfolios now primarily support the core business activities of aggregating loans from single-family and multifamily lenders to facilitate securitization, and holding delinquent loans in portfolio to facilitate loan modifications in order to keep borrowers in their homes and reduce Enterprise losses. The portfolios also support certain affordable products that cannot be easily securitized. In addition, the Enterprises' retained portfolios may be used to support underserved markets under Duty-to-Serve Plans that the Enterprises have begun to implement in 2018.

Credit Risk Transfer

The Enterprises have significantly expanded their practice of transferring credit risk to the private sector in recent years. Credit risk transfer (CRT) has long been a part of each Enterprise's multifamily business. In 2016, the Enterprises transferred a portion of credit risk to private investors on over 90 percent of their combined multifamily acquisition volume. In 2013, the Enterprises began to develop programs to transfer a portion of the credit risk on their single-family new-acquisition businesses. The purpose is to reduce the risk to the Enterprises and taxpayers of future borrower defaults where it is economically sensible to do so.

FHFA assesses the Enterprises' CRT programs using certain core principles. The transactions must transfer a meaningful amount of credit risk to private investors to reduce taxpayer risk, and the cost of the credit risk transfers must be economically sensible in relation to the cost of the Enterprises self-insuring the risk. In addition, the transactions may not interfere with the Enterprises' core business, including the ability of borrowers to access credit. The CRT programs are intended to attract a broad investor base, be scalable, and incorporate a regular program of issuances. In transactions where credit risk may not be not fully collateralized, the program counterparties must be financially strong and able to fulfill their commitments even in adverse market conditions.

Loans targeted for single-family CRT include fixed-rate mortgages with loan-to-value ratios greater than 60 percent and original term greater than 20 years. These loans carry the majority of the Enterprises' credit risk exposure. Loans targeted for credit risk transfer have grown from 42 percent of total Enterprise acquisitions in 2013 to 62 percent of acquisitions in the first half of 2017. The Enterprises continue to assume the full credit risk on less risky loans with lower loan-to-value ratios and shorter terms, as well as on certain higher risk legacy loans where the economics do not favor CRT transactions. The Enterprises also transfer risk on loans outside of the targeted loan population.

The single-family CRT programs, implemented since 2013, supplement the more traditional credit enhancements required by the Enterprises' charters. The charters require loans with loan-to-value ratios above 80 percent to have loan-level credit enhancement, most often obtained through private mortgage insurance. From 2013 through the first half of 2017, the Enterprises transferred a portion of the credit risk through their single-family CRT programs on $1.8 trillion of mortgages with a combined risk in force of $61 billion, or 3.4 percent of the credit risk. During the same period, primary mortgage insurers also covered a portion of credit risk on $837 billion of unpaid principal

[18] Public Law 112–78, Dec. 23, 2011, 125 Stat. 1280.

balances (UPB) through traditional loan-level insurance.

Since 2013, the CRT programs have become a core part of the single-family business. In the second quarter of 2017, the Enterprises transferred risk on $213 billion of mortgages, with risk in force of $6 billion or nearly 3 percent of risk. Debt issuances accounted for 70 percent of the risk in force, insurance and reinsurance transactions accounted for 25 percent, and lender risk sharing accounted for the remaining 5 percent. Front-end reinsurance transactions increased from 2 percent of the risk in force in the first quarter of 2017 to 4 percent in the second quarter. In the first half of 2017, loans targeted for CRT represented 62 percent of the Enterprises' single-family loan production.

Enterprise debt issuances have been the primary risk transfer vehicle to date. Fannie Mae uses a structure called Connecticut Avenue Securities (CAS), while Freddie Mac issues Structured Agency Credit Risk (STACR) securities. CAS and STACR have been designed to track the performance of a reference pool of loans previously securitized in Enterprise guaranteed MBS. These debt transactions are fully collateralized, since investors pay for the notes in full and absorb credit losses through a reduction in the principal due on the underlying notes. The Enterprises typically retain the first 50 basis points of expected losses in most transactions because purchasing protection for this portion may not offer economic benefits. While debt transactions have been the primary CRT method, the Enterprises have worked to broaden their investor base through other structures, and to compare executions across different structures and market environments.

Insurance and reinsurance transactions are considered part of the Enterprises' CRT programs and are separate from the Enterprises' charter requirements for loans with loan-to-value ratios above 80 percent. These transactions generally involve pool-level policies that cover a specified amount of credit risk for a large pool of loans. Fannie Mae uses a structure called Credit Insurance Risk Transfer (CIRT), while Freddie Mac uses the Agency Credit Insurance Structure (ACIS). These structures are partially collateralized, and the Enterprises distribute risk among a group of highly-rated insurers and reinsurers to reduce counterparty and correlation risk.

In senior/subordinate transactions, an Enterprise sells a group of mortgages to a trust that securitizes the cash flows into different bond tranches. Prior to 2017, super conforming loans that would otherwise have backed Freddie Mac mortgage-backed securities were used as collateral in Freddie Mac's single-family senior/subordinate transactions called Whole Loan Securities (WLS). The subordinate and mezzanine tranches, which are not guaranteed, absorb the expected and unexpected credit losses. The senior bonds, which were guaranteed by the Enterprise, have historically traded at a slight discount to comparable Freddie Mac mortgage-backed securities. In order to provide a more scalable and economic solution, in 2017 Freddie Mac introduced a revised structure to its WLS, called STACR Securitized Participation Interests (SPI). This new structure allows for the issuance of mortgage-backed securities rather than guaranteed senior certificates to improve the pricing execution in the credit risk transfer. The STACR SPI trust will continue to issue unguaranteed credit certificates as subordinate and mezzanine tranches. In contrast to synthetic CRT structures, the senior/subordinate structure is eligible for purchase by real estate investment trusts (REITs).

Another form of single-family risk structure is lender front-end CRT, where the credit risk is transferred prior to or simultaneous with the Enterprise loan acquisition. Lender front-end risk transfer can be structured through the issuance of securities with the lender holding the credit risk by retaining the securities, or by selling the securities to credit risk investors. Alternatively, in traditional lender recourse transactions, the lender may forgo securities issuance and simply retain the credit risk. The lender will often, but not always, fully collateralize its obligation. While the Enterprise charter requirement for loan-level credit enhancement is typically through private mortgage insurance, the charters allow the Enterprises to accept lender recourse as an alternative, so lender retention of credit risk has been used to a lesser extent in the past. However, this lender recourse has not always been fully collateralized.

While the newest forms of single-family CRT started in 2013, risk sharing has been an integral part of the Enterprises' multifamily business for many years. Fannie Mae's primary multifamily risk-transfer program exists through its Delegated Underwriting and Servicing (DUS). In this program, lenders typically share up to one-third of the credit losses on a pro-rata basis with the Enterprises. In an effort to broaden its program offerings, Fannie Mae completed the first non-DUS CRT in 2016 when it transferred a portion of its credit risk to the reinsurance industry. Freddie Mac's multifamily risk-transfer program generally exists through its K-Deal program in which Freddie Mac purchases loans that are put into diversified pools, and placed into multiclass securities for sale to private investors. The subordinate and mezzanine bond tranches are not guaranteed by Freddie Mac. Instead, the subordinate or ''B-piece'' holders are in the first-loss position in the event of a mortgage default. If losses exceed the ''B-piece'' level, holders of the mezzanine bond tranche assume the additional losses. The subordinate and mezzanine tranches are sized such that virtually all credit risk is transferred to the investors in those securities. The senior bonds comprise the remainder of the K-Deal and are guaranteed by Freddie Mac.

Underwriting Standards and Qualified Mortgages

The Enterprises are required to emphasize sound underwriting practices in their purchase guidelines. Since entering conservatorship, the Enterprises have continued to refine automated underwriting systems to better assess risk, reduce risk layering, improve the use of compensating factors, and enable access to credit in a safe and sound manner. The Enterprises launched the Uniform Mortgage Data Program to standardize data in the mortgage industry to help improve loan quality and mortgage risk management. The Enterprises also revamped the Representation and Warranty Framework to reduce lender uncertainty around requirements to repurchase loans from the Enterprises and to support access to credit.

In the Dodd-Frank Act, Congress adopted ability-to-repay requirements for nearly all closed-end residential mortgage loans. Congress also established a presumption of compliance with these requirements for a certain category of loans called Qualified Mortgages (QM). The Consumer Financial Protection Bureau (CFPB) adopted an ability-to-repay rule to implement these provisions.

A loan is generally considered a Qualified Mortgage if: (1) The points and fees do not exceed 3 percent of the loan amount, (2) the term does not exceed 30 years, (3) the loan is fully amortizing with no negative amortization, interest-only, or balloon features, and (4) the borrower's debt-to-income (DTI) ratio does not exceed 43 percent. CFPB also defined a special transitional class of QM loans that are not subject to the 43 percent DTI limit if they are eligible for sale to either Enterprise.

Before the CFPB rule became final, the Enterprises had already improved underwriting standards and eliminated purchases of the higher risk products such as negative amortization and interest-only loans. In 2013, after the CFPB rule became final, FHFA directed each Enterprise to acquire only loans that meet the points and fees, term and amortization requirements of the CFPB's rule for Qualified Mortgages.

Loss Mitigation

FHFA has also worked with the Enterprises to develop effective loss mitigation programs to minimize losses and enable borrowers to avoid foreclosure whenever possible. The Enterprises aligned their loss mitigation standards and developed updated loan modification and streamlined refinance products. The Enterprises are also pursuing efforts to stabilize distressed neighborhoods through the Neighborhood Stabilization Initiative. Better underwriting standards, improved loss mitigation, and an improving economy have resulted in the Enterprises' serious delinquency rates falling to their lowest level since the Enterprises entered into conservatorship in 2008.[19]

Common Securitization Platform and Single Security

During conservatorship, the Enterprises have worked to build a new single-family securitization infrastructure. This includes development of a common securitization platform (CSP) and a single Enterprise mortgage-backed security. Fannie Mae and Freddie Mac established Common Securitization Solutions, LLC (CSS) as a jointly-owned company to develop and operate the platform. The platform will replace some of the proprietary systems used by the Enterprises to securitize mortgages and perform the back office functions.

In 2015, FHFA announced a two-part process for the CSP and single security. Release 1, which was implemented in 2016, uses the CSP to issue Freddie Mac's existing single-class securities. Release 2, the implementation of which is planned for the second quarter of 2019, will enable the issuance of the single security called the Uniform Mortgage Backed Security (UMBS) through the CSP. The single security initiative will increase the liquidity of the TBA market for newly issued mortgage-backed securities and will eliminate the differences in pricing between Fannie Mae and Freddie Mac securities.

Governance and Supervision

When FHFA placed the Enterprises into conservatorship, it replaced most members of the boards of directors and many senior managers. Through conservatorship and regular supervisory oversight, the Agency required the Enterprises to improve risk management, update legacy systems, and improve data management. As part of its supervision function, FHFA issues advisory bulletins, which communicate FHFA's supervisory expectations to the Enterprises on specific supervisory matters and topics. In addition, through its supervision program, FHFA's on-site examiners conduct supervisory activities to ensure safe and sound operations of the Enterprises. These supervisory activities include the examination of the Enterprises to determine whether they comply with their own policies and procedures and regulatory and statutory requirements, and whether they comply with FHFA directives and meet the expectations set in FHFA's advisory bulletins.

F. Comparison of Enterprises and Large Depository Institutions

FHFA has reviewed and used the regulatory capital standards applicable to commercial banks as a point of comparison in developing the proposed capital requirements for the Enterprises. In conducting this evaluation, it was important for FHFA to consider both similarities and differences in the Enterprise and bank business models. This section reviews capital requirements for depository institutions and then discusses the differences in Enterprise and bank business models.

Bank Capital Requirements

Basel Accords

The Basel Accords set the international framework for bank capital requirements. The initial framework, Basel I, was replaced by Basel II, which was in place during the financial crisis. After the financial crisis, regulators adopted standards consistent with Basel III. Each country has a different way of applying the Basel standards to meet their national legal framework. The Federal Reserve Board (Board), Office of the Comptroller of the Currency, and Federal Deposit Insurance Corporation have federal regulatory and supervisory jurisdiction over banks in the United States.

The Basel Accords have evolved over time. The 1988 Basel Accord, also known as Basel I, was implemented by the Group of Ten (G–10) countries in 1992. In Basel I, credit risk was addressed by using simple ratios, there was little attention given to market risk, and no provision was made for operational risk. The Basel II update was initially published in 2004 to make the capital calculation more risk sensitive. Basel II had three pillars: Risk-based capital requirements, supervisory review, and market discipline. For the risk-based capital requirements under Basel II, credit risk, market risk, and operational risk were all quantified based on data, and credit risk could be quantified using either the standardized approach or internal ratings based (IRB) approach. Under the supervisory review pillar, Basel II provided a framework for supervisory review of systemic, concentration, and liquidity risk among others. Under the market discipline pillar, Basel II included a set of disclosure requirements to allow market participants to better understand an institution's capital adequacy.

When the U.S. banking regulators issued the final Basel II rules in late 2007 and in 2008, the regulators required each bank to follow the set of rules that was the most conservative for the bank. The largest banks were required to use the internal ratings based approach, while the smaller banks were given a choice between using the standardized approach or the internal ratings based approach.

Basel III was developed in response to the financial crisis and was agreed to by Basel members in 2010–11. Basel III strengthened the requirements in Basel II and introduced bank liquidity requirements to reduce the risk of a run on a bank. Basel III also added capital buffers as extra capital cushions on top of regulatory capital minimums, to absorb unexpected shocks. Basel III is being phased in through 2019.

U.S. Risk-Based and Leverage Capital Requirements for Banks

Under current regulations implemented by U.S. regulators to align with Basel III, U.S. banks must meet certain leverage and risk-based capital requirements to be considered adequately capitalized. These capital adequacy standards protect deposit holders and the stability of the financial system. Two types of capital are measured: Tier 1 and Tier 2. Tier 1 capital comprises common stock, retained earnings, non-cumulative perpetual preferred stock, and accumulated other comprehensive income (AOCI). Common equity Tier 1 capital excludes cumulative preferred stock. Tier 2 capital is supplementary

[19] Fannie Mae's single-family serious delinquency rate fell from 2.42 percent at the end of 2008 to 1.24 percent at the end of 2017. Freddie Mac's single-family serious delinquency rate fell from 1.83 percent to 1.08 percent over the same period.

capital consisting of items such as, but not limited to, cumulative preferred stock, subordinated debt, and certain reserves that provide less protection.

Banks must also meet certain risk-based capital ratios and leverage ratios under existing regulations. As part of the risk-based capital standard for credit risk, the capital ratio is the ratio of capital to risk-weighted assets (RWA). Basel allows banks to choose between two methods for calculating their capital requirement for credit risk, and U.S. regulators have implemented both methods under existing regulations: The standardized approach and the internal ratings based approach. Under the standardized approach, regulators require use of prescribed risk weights for every type of exposure to determine the credit risk RWA amount. Mortgages have a risk weight of 50 percent under the standardized approach, regardless of the loan-to-value ratio, credit score, and other risk attributes. The largest banks in the U.S. are required to use the internal ratings based (IRB) approach to determine the risk weights of asset classes. In the IRB approach, the capital charge for a mortgage varies based on the risk attributes of the specific mortgage loan using the credit model and loss experience of the bank. However, when calculating minimum capital requirements, under the Dodd-Frank Act's Collins Amendment large U.S. banks must compute their risk-weighted assets using both a standardized approach and the advanced approach, and must use the higher of these two numbers when computing pre-stress risk-based capital ratios. Because the standardized approach often results in a higher ratio, the Collins Amendment effectively makes the standardized approach the binding requirement for large U.S. banks, and serves to place all banks, regardless of size, on equal footing in terms of minimum risk-based capital requirements. In contrast to the risk-based capital ratios, the leverage ratios compare capital to assets without any weighting for risk.

Prompt Corrective Action Framework

The Federal Deposit Insurance Act requires insured depository institutions and federal banking regulators to take prompt corrective action to resolve capital deficiencies as defined under the prompt corrective action framework.[20] To be considered well capitalized, banks must have a total risk-based capital ratio of 10 percent, Tier 1 risk-based capital ratio of 8 percent, common equity Tier 1 risk-based capital ratio of 6.5 percent, and Tier 1 leverage ratio of 5 percent. To be considered adequately capitalized, banks must have a total risk-based capital ratio of 8 percent, Tier 1 risk-based capital ratio of 6 percent, common equity Tier 1 risk-based capital ratio of 4.5 percent, and Tier 1 leverage ratio of 4 percent. Lower levels of capital result in a bank being classified as undercapitalized, significantly undercapitalized, or critically undercapitalized. At the extreme lower end, a bank would be placed into receivership.

The banking regulators also mandate three capital buffers relative to the risk-based capital ratios: The capital conservation buffer, the countercyclical capital buffer, and the global systemically important bank (G–SIB) surcharge. Banks must meet applicable buffers to avoid restrictions on capital distributions.

The capital conservation buffer requires banks to maintain each of the three risk-based capital ratios (Common Equity Tier 1, Tier 1, and Total Capital) at levels in excess of 2.5 percent above the minimum required levels. The countercyclical capital buffer requires banks to maintain an additional amount of excess capital during economic periods of non-stress. The countercyclical buffer has a potential range of 0 percent to 2.5 percent, and is currently set to zero. As it is structured, the countercyclical capital buffer functions as an extension of the capital conservation buffer. The G–SIB surcharge is applied in addition to the capital conservation buffer, but only on the largest banks identified as globally systemically important. The G–SIB surcharge is based on defined criteria that determine the size of the bank's systemic footprint, which represents the risk that the bank poses to the global financial system in excess of risk posed by financial institutions not subject to the surcharge. The different buffers are being phased-in through 2019.

In addition to the risk-based capital requirement, federal banking regulators have also established a 4 percent Tier 1 leverage ratio that measures the Tier 1 capital available relative to average consolidated assets. This measure does not capitalize off-balance sheet exposures.

Bank regulatory capital rules also require calculation of a supplementary leverage ratio (Tier 1 capital/total leverage exposure) for banks that are subject to that requirement starting in January 2018.[21] The supplementary leverage ratio is 3 percent of on-balance sheet assets and off-balance sheet exposures and applies to those banking institutions that must adhere to the advanced approach. In addition, those institutions with more than $700 billion in total consolidated assets are also subject to the enhanced supplementary leverage buffer of an additional 2 percent, totaling 5 percent when combined with the supplementary leverage ratio of 3 percent.[22] Banks must meet each of these minimum regulatory capital ratios, as required, after making all capital actions included in the capital plan, under both the baseline and stress scenarios over the nine-quarter planning horizon.[23]

Comprehensive Capital Analysis and Review (CCAR) and Capital Plan Requirements

In addition to the requirements that are tied to a prompt corrective action framework, the Federal Reserve Board's annual CCAR also assesses the capital adequacy of large bank holding companies with at least $50 billion in assets. The CCAR review is based on a going-concern structure, where the bank holding company must hold enough capital to withstand a severely adverse scenario, continue to lend, and meet creditor obligations over a nine-quarter period of time. The CCAR stress tests are tied to the Board's capital plan requiring that these bank holding companies submit a capital plan to the Federal Reserve each year. The bank holding companies are required to report the results of stress tests conducted under supervisory scenarios provided by the Board and under a baseline scenario and a stress scenario designed by the bank holding company.

The Board's qualitative assessment of each bank holding company's capital plan considers the institution's capital planning process, including the stress testing methods, internal controls, and governance. The quantitative assessment of the plan is based on the supervisory and institution-run stress tests that are conducted in part under the Dodd-Frank Act stress test rules.[24]

[20] 12 CFR 324.403.

[21] The supplemental leverage ratio includes off-balance sheet exposures for large banks.

[22] The Federal Reserve Board and the Office of the Comptroller of the Currency (OCC) recently proposed a rule that included changes to the enhanced supplementary leverage ratio standards. *See https://www.gpo.gov/fdsys/pkg/FR-2018-04-19/pdf/2018-08066.pdf.*

[23] *See* Table 1 at *https://www.federalreserve.gov/publications/comprehensive-capital-analysis-and-review-summary-instructions.htm.* Some banks, depending on their size and complexity, must meet additional buffers—capital conservation buffer, countercyclical buffer and globally systemically important bank surcharge—but these are not included in the stress test assessment.

[24] The DFAST and CCAR capital analyses use the same projections of income, assets and RWA, but

The Board may object to a capital plan based on the qualitative and quantitative assessments, and, as a result, may restrict capital distributions.[25] However, the stress test results do not trigger prompt corrective actions as described above under the Federal Deposit Insurance Act.

Under CCAR, during anticipated stress periods defined by the stress test scenarios required by the Board, banks are expected to maintain capital levels above the minimum risk-based and leverage capital ratios for adequately capitalized institutions under the prompt corrective action framework described earlier.[26]

Comparison of Enterprise and Bank Business Models

While the Enterprises are comparable in size to some of the largest depository institutions, the relative risks of banks compared to the Enterprises differ in important ways. These differences include, among others, the sources and associated risk level of income and assets, differences in funding risk, and the relative exposure to mortgage assets. Each of these differences is discussed below.

First, while banks have a more diversified source of income and assets compared to the Enterprises, the overall risk of Enterprise mortgage assets is lower than that of banks. Banks are depository institutions that attract customer deposits on which banks pay interest expense, and lend those funds through loans in diversified asset classes to other customers from whom the bank earns interest income, thereby earning net interest income. Bank lending covers a number of different asset classes, not just real estate lending, such as credit cards, car loans, and business loans. Since the repeal of the Glass-Steagall Act in 1999, banks have also been more active in earning non-interest income through brokerage fees and other business activities. However, traditional depository institutions still rely primarily on net-interest income, as compared to investment banks.

The Enterprises are monoline businesses focused on mortgage assets. For banks, mortgage assets carry a 50 percent risk weight in the Basel standardized framework. Therefore, the Enterprises' aggregate risk weight is lower than the average risk weight of banks with an abundance of assets with risk weights higher than 50 percent. To derive the risk-weighted asset density of bank assets, FHFA looked at the 31 largest bank holding companies subject to CCAR, to calculate an average risk-weighted asset density using end-of-quarter data from the first quarter of 2011 through the fourth quarter of 2014. The analysis estimated an overall risk-weighted asset density of 72 percent for the banks compared to 50 percent for residential mortgages.

Second, banks rely on more volatile funding sources compared to the Enterprises, which exposes banks to a greater degree of funding risk during times of market and economic stress. Banks use short-term customer deposits and debt as sources of funding for their business activity, both of which can leave a bank in need of new funding sources during times of economic uncertainty, such as during the recent financial crisis. In such situations, a bank could find that new sources of debt become considerably more expensive, if such sources are available at all. This type of funding risk is commonly referred to as rollover risk. By comparison, the Enterprises' core credit guarantee business of purchasing and securitizing mortgage loans provides a more stable source of funding that cannot be withdrawn during periods of market and economic stress, and is therefore not subject to rollover risk. Investors purchasing Enterprise mortgage-backed securities provide the companies with match-funding for these mortgage assets. The funding risk associated with the Enterprises' retained portfolios is more comparable to the funding risks of banks described above.

Third, even when comparing risk specifically associated with mortgage lending the Enterprises hold less risk compared to the mortgage investments of banks. Banks hold a larger portion of mortgages—both single-family and multifamily loans—as whole loans on their balance sheets. This exposes banks to interest rate, market, and credit risks associated with those loans. On the other hand, through their core guarantee business of purchasing mortgage loans and issuing mortgage-backed securities, the Enterprises transfer the interest rate and market risk of these loans to private investors. In addition, as mentioned above, the Enterprises also face substantially less funding risk compared to banks because of the match funding provided through mortgage-backed securities investors.

While the Enterprises remain responsible following securitizations for guaranteeing the credit risk of securitized loans, they have also developed ways to transfer significant parts of their credit risk to private market participants. During conservatorship, the Enterprises have developed credit risk transfer programs to transfer a portion of the credit risk for single-family mortgage purchases to private investors. In addition, the Enterprises' unique business models transfer credit risk on multifamily loans to private investors. Thus, the Enterprises have transferred a significant portion of the credit risk associated with their whole mortgage loans, whereas comparable whole mortgage loans are typically held by banks on their balance sheets.

The risk associated with the Enterprises' retained portfolios is similar in nature to risks held by banks. However, the Enterprises' retained portfolios have declined by more than a combined 60 percent while in conservatorship and are required by the PSPAs not to exceed $250 billion. While the Enterprises still have legacy assets that were purchased before conservatorship as part of their retained portfolios, their ongoing use of retained portfolios during conservatorship has focused on supporting their core credit guarantee business. The Enterprises use their cash window to purchase single-family and multifamily loans directly from lenders, often smaller lenders, and aggregate these loans for subsequent securitization. The cash window enables smaller lenders to access the secondary market at competitive rates. The Enterprises also use their retained portfolios to repurchase non-performing loans as part of loss mitigation efforts to reduce losses for the Enterprises and taxpayers, and to help homeowners stay in their homes whenever possible.

FHFA is also not including separate buffers in this proposed rule beyond the proposed risk-invariant going-concern buffer for several reasons. First, FHFA believes that the robust features it selected for the proposed risk-based capital requirements make including a separate buffer unnecessary. These features include (1) covering losses for different loan categories for a severe stress event comparable to the recent financial crisis,[27] with somewhat more

use different capital action assumptions to project post-stress capital levels.

[25] The Federal Reserve Board recently published a notice of proposed rulemaking that would create a single, integrated capital requirement by combining the quantitative assessment of the CCAR with the buffer requirements in the Board's regulatory capital rule, and eliminate the CCAR quantitative objection in the process. *See* 83 FR 18160 (April 25, 2018).

[26] The stress test uses RWA based on the standardized approach, but these large banks may use the model-based internal ratings-based approach for capital adequacy under the prompt corrective action framework.

[27] The 25 percent home price decline assumption in the severe stress event is also consistent with assumptions used in the DFAST severely adverse scenario over the past several years, although the

Continued

conservative house price recoveries than were observed following the recent financial crisis, (2) setting capital requirements without including future revenue, consistent with the Basel methodology, (3) requiring the full life-of-loan capital be put in place for each loan acquisition, and (4) the proposed risk-based capital requirements would include components for operational risk, market risk, and a risk-invariant going-concern buffer. Second, FHFA has the authority to increase capital requirements when prudent—either for risk-based capital or minimum leverage capital requirements—by order or regulation. Third, while bank capital buffers are used to decide whether to restrict distributions of income, rather than changing the level of capital that is necessary to declare a bank undercapitalized and activate the prompt-corrective-action framework if the level is not met, the primary intent of the FHFA capital rule would be to establish the level of capital that should be considered ''adequate'' for the prompt-corrective-action framework of the Safety and Soundness Act.

G. Dodd-Frank Act Stress Test Process

Section 165 of the Dodd-Frank Act required the annual stress testing of certain financial companies with consolidated assets over $10 billion that are supervised by a federal regulator. Consistent with the Act, FHFA conducts stress tests of the Enterprises to determine whether each firm has the capital necessary to absorb losses during a period of adverse economic conditions. While in conservatorship, the Enterprises receive financial support through the PSPAs with the Treasury Department. Although the PSPAs restrict the ability of the Enterprises to hold equity capital beyond their approved capital buffers, FHFA expects the Enterprises to have procedures in place to support sound business decisions and the Enterprises have continued to consider capital levels and return on capital as integral parts of their business decision-making processes.

FHFA's stress testing rule establishes the basic requirements for the Enterprises on how to conduct the Dodd-Frank Act Stress Test (DFAST) each year. The Dodd-Frank Act requires financial regulators to use generally consistent and comparable stress scenarios. FHFA has generally aligned the stress scenarios for the Enterprises with the Federal Reserve Board's supervisory scenarios for annual stress testing required under the DFAST rule and CCAR. Each year, FHFA provides the Enterprises with specific instructions and guidance for conducting the stress tests, as well as for reporting and publishing results.

The annual stress testing process includes three distinct scenarios—baseline, adverse, and severely adverse—with each scenario covering a nine-quarter period. The scenarios include macroeconomic variables, interest-rate variables, and indices (*e.g.,* unemployment rates, mortgage rates, house price paths, and gross domestic product). The Enterprises use these variables and indices as model inputs to stress the retained portfolios and guarantee business.

Since the Enterprises began conducting the annual DFAST process in 2014, the severely adverse scenario has generally represented economic conditions similar to those that occurred during the 2008 financial crisis. Although the specific scenario variables differ from year to year, the conditions represented by the macroeconomic, interest rate, and asset price shocks in the severely adverse scenario are consistent with a major market disruption similar to the disruption experienced in the 2008 crisis.

The severely adverse scenario also includes a global market shock component which is tailored to include particular risks faced by the Enterprises. This shock is treated as an add-on to the macroeconomic scenario and is taken as an instantaneous loss and reduction of capital in the first quarter of the nine-quarter planning horizon. It is assumed that none of these losses are recovered over the nine quarters. The Enterprises apply the shock to portfolio assets that are subject to fair value accounting (*i.e.,* assets classified as held-for-trading, available-for-sale, and held-for-sale). In addition, the global market shock includes a default of each Enterprise's largest counterparty. The shock assumes that each Enterprise incurs losses due to the sudden and unexpected default of the counterparty to which it has the greatest financial exposure. Counterparties within the scope of the largest counterparty default component include security dealers for derivatives, private mortgage insurers, and multifamily credit enhancement providers.

The Federal Reserve Board releases DFAST supervisory scenarios in January or February of each year. FHFA provides the Enterprises with summary instructions and guidance within 30 days following the issuance of the Federal Reserve Board's final element of its supervisory scenarios. The instructions include submission templates for use in compiling and reporting the DFAST results for the three stress scenarios. The Enterprises conduct the stress tests and submit their results to FHFA on or before May 20 each year. For capital planning purposes, the Enterprises focus on the severely adverse scenario. FHFA requires the Enterprises to publicly disclose the DFAST stress test results under the severely adverse scenario between August 1 and August 15 each year.

For DFAST reporting purposes, FHFA requires the Enterprises to report two sets of financial results for the severely adverse scenario: One with and one without the establishment of a valuation allowance on deferred tax assets. In general, deferred tax assets are considered a capital component because these assets have loss absorbing capability by offsetting losses through the reduction of taxes. A valuation allowance on deferred tax assets is typically established to reduce deferred tax assets when it is more likely than not that an institution would not generate sufficient taxable income in the foreseeable future to realize all or a portion of its deferred tax assets. A valuation allowance on deferred tax assets is a non-cash charge resulting in a reduction in income and the retained earnings component of capital.

In 2008, during the financial crisis, Fannie Mae and Freddie Mac established partial valuation allowances on deferred tax assets of $30.8 billion and $22.4 billion, respectively. The reduction in capital from partial valuation allowances in 2008 contributed to the Enterprises' draws from the Treasury Department. Both Enterprises released the valuation allowances on deferred tax assets several years later, which resulted in a benefit to income at both Enterprises. For full transparency of the potential impact of deferred tax assets on the Enterprises' capital positions in a stress scenario, FHFA requires the Enterprises to disclose the severely adverse results both with and without the establishment of a valuation allowance on deferred tax assets. In the 2017 DFAST severely adverse scenario, for results that do not include establishing a valuation allowance on deferred tax assets, Fannie Mae's cumulative stress losses were $15 billion and Freddie Mac's cumulative stress losses were $20 billion. For results that include establishing a valuation allowance on deferred tax assets, Fannie Mae's cumulative stress losses were $58 billion and Freddie Mac's cumulative stress losses were $42 billion.

2017 DFAST cycle assumes a 30 percent home price decline in its severely adverse scenario.

H. Important Considerations for the Proposed Rule

In summary, in developing the proposed rule, FHFA considered all information in this proposal and developed the proposed rule with the following factors in mind:

1. The Enterprises should operate under a robust capital framework that is similar to capital frameworks applicable to banks and other financial institutions, but appropriately differentiates from other capital requirements based on the actual risks associated with the Enterprises' businesses;
2. In proposing capital requirements, FHFA should use the substantial expertise and experience gained during the protracted conservatorships of the Enterprises to ensure that the capital requirements secure the safety and soundness of the Enterprises while also supporting their statutory missions to foster and increase liquidity of mortgage investments and promote access to mortgage credit throughout the Nation;
3. FHFA considers it prudent to have risk-based capital requirements that include components of credit risk, operational risk, market risk, and a risk-invariant going-concern buffer; that require full life-of-loan capital for each loan acquisition; that are calculated to cover losses in a severe stress event comparable to the recent financial crisis, but with house price recoveries that are somewhat more conservative than experienced following that crisis; and that do not count future Enterprise revenue toward capital;
4. FHFA's ongoing authority under the Safety and Soundness Act to increase by order or regulation capital requirements—either risk-based or minimum leverage—reduces the need to put in place at this time specific limited-purpose or countercyclical buffers; and
5. It may be necessary in the future for FHFA to revise this rule or to develop a separate capital planning rule to more fully address stress testing of the Enterprises, the timing and substance of which will depend on the status of the Enterprises after housing finance reform.

II. The Proposed Rule

A. Components of the Proposed Rule

Risk-Based Capital Requirements

The Enterprises' assets and operations are exposed to different types of risk, and the proposed risk-based capital requirements would provide a granular and comprehensive approach for assigning capital requirements to individual asset and guarantee categories. The proposed risk-based capital requirements cover credit risk, including counterparty risk, as well as market risk and operational risk capital requirements for each asset and guarantee category. The proposed risk-based capital requirements also include a going-concern buffer, which would require the Enterprises to hold additional capital beyond what is required to cover economic losses during a severe financial stress event in order to maintain market confidence.

The credit risk capital requirements in the proposed rule are based on unexpected losses (stress losses minus expected losses) over the lifetime of mortgage assets. The proposed requirements were developed using historical loss data, including loss experience from the recent financial crisis. In addition, the proposed rule requires the Enterprises to hold this capital at the time of purchasing or guaranteeing an asset, and it does not, in general, count any future revenue toward the credit risk capital requirements.

For single-family and multifamily whole loans and guarantees, the proposed credit risk capital requirements use look-up tables consisting of base grids and risk multipliers to adjust capital requirements for the risk characteristics of each type of mortgage asset. Under this approach, an Enterprise's required capital will change with the composition of its book of business.

The proposed rule also includes a framework through which the Enterprises' credit risk capital requirements would be reduced to reflect the benefit of credit risk transfer transactions that protect the Enterprises and taxpayers from bearing potential credit losses. FHFA's proposed approach to calculating the capital relief provided by credit risk transfer transactions seeks to capture the credit risk protection provided while also accounting for counterparty risk for those transactions that are not fully funded up front.

The market risk component of the proposed risk-based capital framework establishes specific requirements for the market risk associated with certain Enterprise assets. The proposed approach focuses on capturing the spread risk associated with holding different assets in the retained portfolio: Single-family whole loans, multifamily whole loans, private label securities (PLS), commercial mortgage-backed securities (CMBS) and other assets with market risk exposure.[28] These mortgages include legacy assets acquired by the Enterprises prior to conservatorship and assets purchased as part of the Enterprises' ongoing aggregation function, including aggregating single-family loans through the cash window before securitizing the loans into MBS, and Freddie Mac's aggregation of multifamily loans before placing the loans in K-deals or other securitizations.

The operational risk component of the proposed risk-based capital framework establishes an operational risk capital requirement of 8 basis points for all assets and guarantees to reflect the inherent risk in ongoing business operations.

The going-concern buffer component of the proposed risk-based capital framework establishes a 75 basis point requirement for most assets and guarantees, regardless of credit, market, or operational risk capital requirements. This buffer would ensure that the Enterprises maintain at least 75 basis points of capital on any mortgage guarantee, whole loan, or mortgage-related security held by the Enterprises. Based on the current size and composition of the Enterprises' books of business, FHFA estimates that the going-concern buffer would provide the Enterprises with sufficient capital to continue operating without external capital support for one to two years after a stress event.

FHFA sought to reduce model risk by developing the proposed risk-based requirements using a combination of the results from multiple models.[29] The proposed capital requirements are based on the model results from both Enterprises, and in some cases on model results from both Enterprises and from FHFA. In all cases the models were estimated to the extent possible using the Enterprises' historical loss data, including experiences from the recent housing crisis. While the proposed risk-based capital requirements reflect the Agency's view of the relative risk of Enterprise assets, which is subject to model risk, the two proposed alternative minimum leverage capital requirements are intended to provide a backstop to offset and balance this risk.

[28] The Enterprises are no longer acquiring PLS and CMBS, and their holdings of these assets are currently in run-off mode.

[29] FHFA acknowledges that multiple models could increase the burden of ongoing model risk management. However, FHFA sought to increase the reliability of the estimations used in the proposed grids and multiplier framework by combining the results of multiple models, and hence decreasing overall model risk.

Minimum Leverage Capital Requirement

The proposed rule includes two alternative minimum leverage capital requirement proposals for consideration. Under the first approach, the 2.5 percent alternative, the Enterprises would be required to hold capital equal to 2.5 percent of total assets (as determined in accordance with GAAP) and off-balance sheet guarantees related to securitization activities, regardless of the risk characteristics of the assets and guarantees or how they are held on the Enterprises' balance sheets. Under the second approach, the bifurcated alternative, the Enterprises would be required to hold capital equal to 1.5 percent of trust assets and 4 percent of non-trust assets, where trust assets are defined as Fannie Mae mortgage-backed securities or Freddie Mac participation certificates held by third parties and off-balance sheet guarantees related to securitization activities, and non-trust assets are defined as total assets as determined in accordance with GAAP plus off-balance sheet guarantees related to securitization activities minus trust assets. The Enterprises' retained portfolios would be included in non-trust assets. Both the 2.5 percent alternative and the bifurcated alternative are discussed in greater detail in the Minimum Leverage Capital Requirements section.

In considering both the need for and the structure of an updated minimum leverage capital requirement, FHFA has taken into consideration several factors, including (1) how to best set the minimum leverage requirement as a backstop to the risk-based capital requirements; and (2) how to appropriately capture the funding risks of the Enterprises. The Safety and Soundness Act requires that FHFA establish, like other financial regulators, a minimum leverage requirement that can serve as a backstop in the event the risk-based capital standard becomes too low. As discussed earlier, risk-based capital requirements depend on models and, therefore are subject to the risk that the applicable model will underestimate or fail to address a developing risk. Another factor relevant in considering the leverage requirement's role as a backstop is the pro-cyclicality of a risk-based capital framework. Because the proposed risk-based requirements use mark-to-market LTVs for loans held or guaranteed by the Enterprises in determining capital requirements, as home prices appreciate the Enterprises would be allowed to release capital as LTVs fall. Should home prices continue to rise and unemployment continue to fall, as each have done over the last several years, risk-based capital requirements such as the requirements in this proposed rule, would be expected to fall. In this context, a minimum leverage capital requirement would reduce the amount of capital released as risk-based capital levels fell below an applicable leverage requirement. In addition, and as discussed further below, FHFA has authority to adjust components of the risk-based capital requirements as a means of avoiding the pro-cyclical release of capital.

In the banking regulatory context, leverage requirements serve to help mitigate the risk that short-term funding, on which many banks rely, will become unavailable during a stress event. In proposing minimum leverage requirements, FHFA has considered the unique funding risks facing the Enterprises. As discussed in more detail below, in both the single-family and multifamily guarantee business lines the Enterprises are provided a stable source of funding that is match-funded with the mortgage assets they purchase. While these mortgage assets are reflected on the balance sheets of the Enterprises and represent the vast majority of their assets, the funding for these assets has already been provided and cannot be withdrawn during times of market stress.

FHFA is seeking comment on all aspects of both the 2.5 percent alternative and the bifurcated alternative proposed minimum leverage capital requirements, including how the different approaches relate to and complement the proposed risk-based capital measure.

B. Impact of the Proposed Rule

This section provides information about the impact of the proposed rule both at the end of 2007 (December 31, 2007) and at the end of the third quarter of 2017 (September 30, 2017). FHFA is providing this information to inform commenters about the impact the proposed rule would have on the Enterprises' capital requirements both leading up to the crisis and under the Enterprises' current operations in conservatorship. The summary information through the third quarter of 2017 is intended solely to provide context for commenters about what the impact of the proposed rule would be on the Enterprises if the Enterprises were able to build capital, and is specifically not intended by FHFA as suggesting steps toward recapitalizing the Enterprises while the Enterprises are in conservatorship. The summary information also provides context about the impact of the proposed rule on Enterprise business decisions being made while the Enterprises operate in conservatorship. While they are in conservatorship, FHFA expects the Enterprises to include capital assumptions in pricing and business decisions even though the Enterprises are unable to build capital and FHFA has suspended their regulatory capital classifications.

Impact of the Proposed Rule at the End of 2007

In 2008, the entire net worth of both Enterprises was depleted by losses. The Treasury Department invested in senior preferred stock of both Enterprises in order to offset losses. To offset losses and eliminate negative capital positions, Fannie Mae drew $116 billion from the Treasury Department between 2008 and the fourth quarter of 2011, while Freddie Mac drew $71 billion between 2008 and the first quarter of 2012. Including the loss of net worth at the start of 2008, Fannie Mae lost a total of $167 billion and Freddie Mac lost a total of $98 billion in the housing and financial crisis.[30]

FHFA assessed whether the capital requirements in the proposed rule would have required the Enterprises to hold sufficient capital at the end of 2007, when combined with the Enterprises' revenues, to absorb losses sustained between 2008 and the dates at which the Enterprises no longer required draws from the Treasury Department to eliminate negative net worth—the fourth quarter of 2011 for Fannie Mae and the first quarter of 2012 for Freddie Mac.

FHFA compared each Enterprise's estimated minimum leverage capital requirement under both alternatives and the risk-based capital requirement based on the proposed rule for the entire portfolio of business at the end of 2007 to the Enterprises' peak cumulative capital losses as described above. The

[30] Between the second quarter of 2012 and the third quarter of 2017, neither Enterprise required additional funds from the Treasury Department, and the PSPA's capital reserve had been set to decline to zero in 2018. However, in December 2017, FHFA entered into a letter agreement with the Treasury Department on behalf of the Enterprises to reinstate a $3.0 billion capital reserve amount under the PSPA for each Enterprise, beginning in the fourth quarter of 2017, against income fluctuations and future losses. Since the agreement was reached, Congress passed and the President signed the Tax Cut and Jobs Act of 2017 on December 22, 2017, that lowered the corporate tax rate from 35 percent to 21 percent. As a result, the value of Fannie Mae's net deferred tax assets declined by $9.9 billion in the fourth quarter of 2017, necessitating a $3.7 billion draw from the Treasury Department, while the value of Freddie Mac's net deferred tax assets declined by $5.4 billion, necessitating a draw from the Treasury Department of $312 million.

peak cumulative capital losses include losses due to establishing valuation allowances on deferred tax assets (DTAs) during the crisis. To calculate the minimum leverage capital requirement at the end of 2007, FHFA made a simplifying assumption because accounting rules have changed since 2007. Credit-guaranteed loans are now reported as assets, while in 2007 most credit guarantees were not on the balance sheet as they were netted with guarantee obligations. For purposes of this analysis FHFA treated the credit guarantees in 2007 as assets.[31]

FHFA also compared each Enterprise's single-family credit risk capital requirement as of December 31, 2007 to the Enterprise's single-family lifetime credit losses, where lifetime losses are defined in this section as actual single-family credit losses through June 30, 2017 plus projected remaining lifetime single-family credit losses on the December 31, 2007 portfolio.

A significant portion of the Enterprises' credit losses since 2007 resulted from higher risk loans which the Enterprises no longer purchase or guarantee due to the Ability to Repay and Qualified Mortgage rule issued by the CFPB in 2013 and due to the Enterprises' strengthened underwriting standards. Because the Enterprises no longer purchase these loans, FHFA also assessed whether the credit risk capital requirement under the proposed rule would have been sufficient to cover projected lifetime losses on loans that meet the Enterprises' current acquisition criteria.

In sum, the amount of capital required by the Enterprises under the proposed risk-based capital requirements would have exceeded the cumulative losses, net of revenues earned, at both Enterprises between 2008 and the respective date at which each Enterprise no longer required draws from the Treasury Department. In this analysis, cumulative losses include credit losses on all loans purchased, including those no longer eligible for purchase, and losses due to establishing a valuation allowance on DTAs. In evaluating how the proposed risk-based capital requirements would have applied to the Enterprises at the end of 2007, it is important to note that the proposed rule would establish a risk-based capital requirement for DTAs that would offset the DTAs included in core capital in a manner generally consistent to the U.S. financial regulators' treatment of DTAs.[32] In addition, the credit risk capital component of the proposed risk-based capital requirements exceeded projected credit losses for both Enterprises for all loans acquired or guaranteed, excluding those that are not currently eligible for purchase.

Fannie Mae

Fannie Mae's statutory minimum leverage capital requirement was $42 billion as of December 31, 2007. For comparison, and as illustrated in the table below, Fannie Mae's estimated minimum leverage capital requirement as of December 31, 2007 based on the proposed rule would have been $76 billion under the 2.5 percent alternative or $68 billion under the bifurcated alternative. Fannie Mae's estimated minimum leverage capital requirement under either proposed alternative as of December 31, 2007 would have been insufficient to cover Fannie Mae's peak cumulative capital losses of $167 billion. However, Fannie Mae's estimated risk-based capital requirement of $171 billion based on the proposed rule would have exceeded Fannie Mae's peak cumulative capital losses of $167 billion. We include in Fannie Mae's peak cumulative capital losses the valuation allowance on deferred tax assets of $64 billion and revenues of $78 billion earned between 2008 and the fourth quarter of 2011.

TABLE 1—FANNIE MAE'S CAPITAL REQUIREMENT COMPARISON TO PEAK CUMULATIVE CAPITAL LOSSES

	$ in billions	% of total assets and off-balance sheet guarantees as of Dec 31, 2007 *
Net Worth as of Dec 31, 2007	$44	1.4
Equity Issuance in 2008	7	0.2
Cumulative Draws **	116	3.8
Peak Cumulative Losses since Dec 31, 2007	167	5.5
Statutory Minimum Capital Requirement as of Dec 31, 2007	42	1.4
. . . Relative to Peak Capital Losses	(126)	(4.1)
2.5% Alternative as of Dec 31, 2007	76	2.5
. . . Relative to Peak Capital Losses	(91)	(3.0)
Bifurcated Alternative as of Dec 31, 2007	68	2.2
. . . Relative to Peak Capital Losses	(100)	(3.3)
Proposed Risk-based Capital Requirement as of Dec 31, 2007	171	5.6
. . . Relative to Peak Capital Losses	3	0.1

* Includes Fannie Mae MBS and Freddie Mac participation certificates held by third parties, and off-balance sheet guarantees related to securitization activities.

** Includes the valuation allowance on deferred tax assets of $64 billion, Treasury draws of $20 billion related to senior preferred dividends paid to the Treasury Department between 2008 and the fourth quarter of 2011, and revenues of $78 billion earned over the same period.

Next, we analyzed Fannie Mae's single-family portfolio in the fourth quarter of 2007 and stripped out the loans that would not be acquired today under Fannie Mae's current acquisition criteria. We then added projected future credit losses for the loans that remained to the already realized credit losses to determine Fannie Mae's lifetime single-family credit losses on that portfolio. In both cases, the credit risk capital requirement would have exceeded the projected lifetime credit losses. As illustrated in the table below, Fannie Mae's estimated single-family credit risk

[31] The Enterprises continue to report their capital levels based on prior accounting rules. *See* Regulatory Interpretation 2010–RI–1, Jan. 12, 2010.

[32] *See* section II.C.8 for a detailed discussion of DTAs.

capital requirement of $94 billion as of December 31, 2007 based on the proposed rule would have exceeded Fannie Mae's lifetime single-family credit losses of $85 billion on the December 31, 2007 guarantee portfolio for all loans purchased. In addition, excluding loans that the Enterprises no longer acquire, Fannie Mae's credit risk capital requirement per the proposed rule of $30 billion would have exceeded projected lifetime losses of $21 billion.

TABLE 2—FANNIE MAE'S SINGLE-FAMILY CREDIT RISK CAPITAL REQUIREMENT COMPARISON TO LIFETIME SINGLE-FAMILY CREDIT LOSSES

	$ in billions	% of UPB as of Dec 31, 2007
Lifetime Single-Family Credit Losses on the Dec 31, 2007 Guarantee Portfolio	$85	3.4
Proposed SF Credit Risk Capital Requirement as of Dec 31, 2007	94	3.7
. . . Relative to Lifetime Credit Losses	9	0.4
Lifetime Single-Family Credit Losses on the Dec 31, 2007 Guarantee Portfolio using Current Acquisition Criteria *	21	1.5
Proposed SF Credit Risk Capital Requirement using Current Acquisition Criteria *	30	2.1
. . . Relative to Lifetime Credit Losses	9	0.7

* Excludes loans with the following characteristics: Debt-to-income ratio at origination greater than 50 percent, cash out refinances with total LTV greater than 85 percent, investor loans with total LTV greater than or equal to 90 percent, Alt-A, Negative Amortization, Interest-only, Low or No Documentation, and other legacy programs.

Freddie Mac

Freddie Mac's statutory minimum capital requirement was $26 billion as of December 31, 2007. For comparison, and as illustrated in the table below, Freddie Mac's estimated minimum leverage capital requirement as of December 31, 2007 based on the proposed rule would have been $54 billion under the 2.5 percent alternative or $53 billion under the bifurcated alternative. Freddie Mac's estimated minimum leverage capital requirement under either proposed alternative as of December 31, 2007 would have been insufficient to cover Freddie Mac's peak cumulative capital losses of $98 billion. However, Freddie Mac's estimated risk-based capital requirement of $110 billion based on the proposed rule would have exceeded Freddie Mac's peak cumulative capital losses of $98 billion by $12 billion. We include in Freddie Mac's peak cumulative capital losses the valuation allowance on deferred tax assets of $34 billion and revenues of $64 billion earned between 2008 and the first quarter of 2012.

TABLE 3—FREDDIE MAC'S CAPITAL REQUIREMENT COMPARISON TO PEAK CUMULATIVE CAPITAL LOSSES

	$ in billions	% of total assets and off-balance sheet guarantees as of Dec 31, 2007 *
Net worth as of Dec 31, 2007	$27	1.2
Cumulative Treasury Draws **	71	3.3
Peak cumulative losses since Dec 31, 2007	98	4.5
Statutory Minimum Capital Requirement as of Dec 31, 2007	26	1.2
. . . Relative to Peak Capital Losses	(72)	(3.3)
2.5% Alternative as of Dec 31, 2007	54	2.5
. . . Relative to Peak Capital Losses	(44)	(2.0)
Bifurcated Alternative as of Dec 31, 2007	53	2.4
. . . Relative to Peak Capital Losses	(45)	(2.1)
Proposed Risk-based Capital Requirement as of Dec 31, 2007	110	5.0
. . . Relative to Peak Capital Losses	12	0.5

* Includes Fannie Mae MBS and Freddie Mac participation certificates held by third parties, and off-balance sheet guarantees related to securitization activities.

** Includes the valuation allowance on deferred tax assets of $34 billion, Treasury draws of $18 billion related to senior preferred dividends paid to the Treasury Department between 2008 and the first quarter of 2012, and revenues of $64 billion earned over the same period.

Next, we analyzed Freddie Mac's single-family portfolio in the fourth quarter of 2007 and stripped out the loans that would not be acquired today under Freddie Mac's current acquisition criteria. We then added projected future credit losses for the loans that remained to the already realized credit losses to determine Freddie Mac's lifetime single-family credit losses on that portfolio. After stripping out the loans that would not be acquired under Freddie Mac's current acquisition criteria, the credit risk capital requirement would have exceeded the projected lifetime credit losses. As illustrated in the table below, Freddie Mac's estimated single-family credit risk capital requirement of $59 billion as of December 31, 2007 based on the proposed rule would not have exceeded Freddie Mac's lifetime single-family credit losses of $64 billion on the December 31, 2007 guarantee portfolio for all loans purchased. However, excluding loans that the Enterprises no longer acquire, Freddie Mac's credit risk capital requirement per the proposed rule of $24 billion would have exceeded projected lifetime losses of $20 billion.

TABLE 4—FREDDIE MAC'S SINGLE-FAMILY CREDIT RISK CAPITAL REQUIREMENT COMPARISON TO LIFETIME SINGLE-FAMILY CREDIT LOSSES

	$ in billions	% of UPB as of Dec 31, 2007

Lifetime Single-Family Credit Losses on the Dec 31, 2007 Guarantee Portfolio using Current Acquisition Criteria *	20	1.7
Proposed SF Credit Risk Capital Requirement using Current Acquisition Criteria *	24	2.1
. . . Relative to Lifetime Credit Losses	4	0.4

* Excludes loans with the following characteristics: Debt-to-income ratio at origination greater than 50 percent, cash out refinances with total LTV greater than 85 percent, investor loans with total LTV greater than or equal to 90 percent, Alt-A, Negative Amortization, Interest-only, Low or No Documentation, and other legacy programs.

Impact of the Proposed Rule as of September 30, 2017

FHFA estimated the impact of the proposed rule on the Enterprises as of September 30, 2017. Under the 2.5 percent alternative, FHFA estimates a combined minimum leverage capital requirement for both Enterprises of $139.4 billion as of September 30, 2017, while under the bifurcated alternative FHFA estimates a combined minimum leverage capital requirement for both Enterprises of $103 billion. FHFA also estimates a combined risk-based capital requirement of $180.9 billion or 3.2 percent of the Enterprises' portfolios as of September 30, 2017. Credit risk capital accounts for $112.0 billion before CRT and $90.5 billion after CRT, market risk capital accounts for $19.4 billion, operational risk capital accounts for $4.3 billion, and the going-concern buffer accounts for $39.9 billion. The capital requirement for the Enterprises' DTAs accounts for the remaining $26.8 billion. A detailed breakdown of FHFA's estimated risk-based capital requirements by risk category for the Enterprises combined, and separately for Fannie Mae and Freddie Mac, as of September 30, 2017 is presented in Table 5. A breakdown of FHFA's estimated risk-based capital requirements by asset category for the Enterprises combined, as of September 30, 2017, is presented in Table 6. A breakdown of FHFA's estimated minimum leverage capital requirement under both proposed alternatives for the Enterprises combined, and separately for Fannie Mae and Freddie Mac, as of September 30, 2017, is presented in Table 7.

TABLE 5—FANNIE MAE AND FREDDIE MAC ESTIMATED RISK-BASED CAPITAL REQUIREMENTS AS OF SEPTEMBER 30, 2017—BY RISK CATEGORY

	Fannie Mae capital requirement			Freddie Mac capital requirement			Enterprises' combined capital requirement		
	$billions	bps	Share (%)	$billions	bps	Share (%)	$billions	bps	Share (%)
Net Credit Risk	$70.5			$41.5			$112.0		
Credit Risk Transferred	(11.5)			(10.0)			(21.5)		
Post-CRT Net Credit Risk	59.0	176	51	31.5	142	48	90.5	162	50
Market Risk	9.5	28	8	9.9	44	15	19.4	35	11
Going-Concern Buffer	24.0	72	21	15.9	71	24	39.9	72	22
Operational Risk	2.6	8	2	1.7	8	3	4.3	8	2
Other (DTA) * **	19.9	59	17	6.8	31	10	26.8	48	15
Total Capital Requirement	115.0	343	100	65.9	296	100	180.9	324	100
Total Assets and Off-Balance Sheet Guarantees, $billions	3,353.1			2,226.0			5,579.0		

* The DTA capital requirement is a function of Core Capital. Both Enterprises have negative Core Capital as of September 30, 2017. In order to calculate the DTA capital requirement, we assume Core Capital is equal to the Risk-Based Capital Requirement without consideration of the DTA capital requirement.

** Both Enterprises' DTAs were reduced in December 2017 as a result of the change in the corporate tax rate. The risk-based capital requirement for DTAs as of December 31, 2017 would be $10.0 billion or 30 bps for Fannie Mae and $1.2 billion or 5 bps for Freddie Mac. See Table 33 and Table 34 for more detail.

Trust Assets	$2,950	$1,838	$4,788

C. Risk-Based Capital Requirements

1. Overall Approach

The proposed rule would establish risk-based capital requirements across five categories of the Enterprises' mortgage guarantees and portfolio holdings: (1) Single-family whole loans, guarantees, and related securities, (2) private-label mortgage-backed securities (PLS), (3) multifamily whole loans, guarantees, and related securities, (4) commercial mortgage-backed securities (CMBS), and (5) other assets. An additional category, ''Unassigned Assets,'' would provide an approach to assigning capital requirements to new products or activities that do not have an explicit treatment in this rule. Under this proposal, each of these asset and guarantee categories may include capital requirements for three kinds of risk: Credit risk, market risk, and operational risk. FHFA's proposal for the credit risk and market risk associated with the five asset and guarantee categories reflects the Agency's view about the relative risks of these assets. The proposed rule would also establish a risk-invariant capital requirement for operational risk that applies across all asset and guarantee categories. Lastly, the proposal would apply a going-concern buffer across all asset and guarantee categories.

Each of the three risk categories (credit risk, market risk, and operational risk), in addition to the going-concern buffer, is further summarized below.

Credit Risk

In evaluating the credit risk faced by the Enterprises, mortgage credit risk can be segmented into the following categories: (1) Expected loss; (2) unexpected loss; and (3) catastrophic loss. Expected losses result from the failure of some borrowers to make their payments during stable housing market conditions. Even in a stable and healthy housing market, some borrowers are likely to default on their loan as a result of certain life events such as illness, job loss, or divorce. Unexpected losses are the potentially much larger losses that could occur above expected losses should there be a stressful, yet plausible, macroeconomic event, such as a severe downturn in house price levels as might accompany a recession. For example, the credit losses that took place during the recent financial crisis and were in excess of the predicted loss amounts would be considered unexpected losses. Catastrophic losses are those losses beyond unexpected loss and would be deemed highly unlikely to occur. In general, losses beyond those experienced during the recent financial crisis would be considered catastrophic losses. However, there is not a bright line marking the transition from unexpected to catastrophic loss.

For purposes of this proposed rule, FHFA defines the risk-based credit risk capital requirement for single-family and multifamily whole loans and guarantees as unexpected loss. As described above, these stress losses are forecasted under scenarios that are generally comparable to stress experienced during the recent financial crisis. The proposed rule would calculate unexpected loss as the difference in the present value of lifetime losses under a stressful macroeconomic event scenario and lifetime losses under an expected scenario. Losses under the expected scenario (''expected losses'') are netted out from losses under the stressful macroeconomic event scenario (''stress losses'') in order to be consistent with other regulatory regimes. In particular, the loss scenarios draw on conceptual and methodological inputs from regulatory frameworks such as DFAST, CCAR, and the Basel Accords. The Enterprises set guarantee fees at a level to cover the lifetime cost of expected losses; therefore, there is no need for the Enterprises to hold capital for expected loss.

The starting point of the proposed risk-based credit risk capital requirement for single-family and multifamily whole loans and guarantees would be implemented through a series of look-up tables (''grids and risk multipliers'') that take into account loan risk characteristics. The proposed rule would utilize look-up tables because they are simple and transparent, are easily implemented, and allow easy comparison to other capital standards by regulators and the public. As an alternative to the use of look-up tables to implement the risk-based credit risk capital requirement for single-family and multifamily whole loans, FHFA considered using collections of econometric equations (''models''), either the Enterprises' internal models or an FHFA-specified model. FHFA determined that the use of a model would produce more nuanced results than the look-up tables, but would result in greater opacity and operational complexity. Furthermore, the use of the Enterprises' internal models for credit risk was rejected because it would result in inconsistent requirements between the Enterprises for assets with the same risk characteristics.

The proposed rule would use lifetime losses, as opposed to using a shorter horizon, in calculating the credit risk capital requirement in order to fully capture any variation in losses due to differences in loan risk characteristics. For example, if a seven year horizon were used, the risk associated with the payment reset of a multifamily loan with a ten year interest-only period would not be captured in the credit risk capital requirement. Furthermore, the use of lifetime losses is more conservative than a requirement based on losses over a shorter horizon as it covers the unexpected losses over the lifetime of the loan.

FHFA considered the inclusion of revenues into the credit risk capital requirements to reflect the fact that the Enterprises would be conducting new business and that vast majority of borrowers would continue to pay their mortgage even during a stressful macroeconomic event. For example, at the lowest point during the Great Recession, approximately 92 percent of borrowers with Enterprise guaranteed mortgages were current on their mortgages.[33] On the other hand, FHFA believes there is greater benefit to having a risk-based capital requirement that ensures sufficient capital without considering new revenue. Inclusion of revenues could result in very low or zero risk-based capital requirements for specific portfolio segments. FHFA also considered additional reasons for excluding revenues such as that Basel capital requirements exclude revenue, and that revenue serves to build capital during stress events so that the Enterprises can continue as going concerns.

The proposed rule also would not incorporate the tax deductibility of losses in order to create a simple and transparent measure of risk and to maintain general consistency with other regulatory regimes. Inclusion of the tax deductibility of losses would add significant complexity to the proposed rule. Additionally, FHFA already has an assessment of capitalization, the annual Dodd-Frank Act Stress Test exercise which incorporates revenue, the tax deductibility of losses and accounting impacts.

Question 1: FHFA is soliciting comments on all aspects of the proposed risk-based capital framework. What modifications to the proposed risk-based capital framework should be considered and why?

Market Risk

The Enterprises are exposed to market risk, including interest rate risk and spread risk, through their ownership of whole loans and their investments in MBS. Interest rate risk is the risk of loss from adverse changes in the value of the Enterprises' assets or liabilities due to changes in interest rates. Spread risk is the risk of a loss in value of an asset relative to a risk free or funding benchmark due to changes in perceptions of performance or liquidity. The Enterprises have historically actively managed interest rate risk but have not fully hedged spread risk.

The proposed rule would establish risk-based capital requirements for the market risk associated with single-family whole loans, multifamily whole loans, single-family mortgage-backed securities (MBS) and collateralized mortgage obligations (CMOs), Government National Mortgage Association (Ginnie Mae) single-family and multifamily MBS, PLS, commercial mortgage-backed securities (CMBS), and other assets with market risk exposure held in the Enterprises' respective retained portfolios. While the Enterprises have legacy assets acquired prior to entering conservatorship, such as certain private-label securities investments, the ongoing use of the Enterprises' retained portfolios during conservatorship is now limited to transactions that support the Enterprises' core mortgage guarantee business activities. This includes supporting acquisitions through the cash window primarily for smaller lenders and buying delinquent loans out of securities in order to facilitate loss mitigation activities that benefit both borrowers and taxpayers. Because the Enterprises' retained portfolio activities have been greatly limited through conservatorship, these portfolios now represent a small share of the Enterprises' overall risk exposure, and the proposed methodology for calculating market risk capital requirements is therefore simple and straightforward. Although FHFA will automatically suspend a final rule because the Enterprises are in conservatorship and cannot build capital, the proposed rule is only intended to address market risks for the Enterprises as they are currently established under conservatorship. In a post-conservatorship housing finance system, FHFA may consider additional methodologies for calculating market risk capital requirements, and FHFA would have the regulatory flexibility to undertake such actions outside the scope of this proposed rulemaking.

The primary target of the risk-based capital requirement for market risk would be spread risk, as the Enterprises closely hedge interest rate risk at the portfolio level through the use of callable debt and derivatives. Spread risk is a loss in value of an asset relative to a risk free or funding benchmark. Generally, spread risk is calculated by multiplying the amount of spread widening by the spread duration of the asset. Spread widening is typically based on historical spread shocks. Spread duration, or the sensitivity of the market value of an asset to changes in the spread, is determined by using

[33] February 2010 Foreclosure Prevention and Refinance Report.

models that involve assumptions about interest rate movements and prepayment sensitivity. Prepayment sensitivity reflects the relationship between the volume and timing of cash flows and changes in the interest rate or the spread.

The proposed rule would establish three approaches to determining the risk-based market risk capital requirement, each tailored to the Enterprises' businesses. The first approach defines market risk capital as a single point estimate provided by the proposed rule. The second approach is a spread duration approach that defines market risk capital by multiplying a spread shock, provided by the proposed rule, by a spread duration generated from an Enterprise's internal models. The third approach defines market risk capital through the exclusive use of an Enterprise's internal models. The proposed rule would assign the Enterprises' assets to one of the three approaches based on: (i) Whether the asset belongs to a small and declining portfolio where acquisition is limited as the result of conservatorship, (ii) the relative importance of market risk to credit risk for the asset, and (iii) the complexity of the product structure or prepayment sensitivity.

In general, the proposed rule would assign the simplified single point estimate to assets that are either (i) part of a small and declining portfolio or (ii) where credit risk is the predominant risk. A single point estimate, while simple, may inadequately capture the market risk attributes for assets with complex structures or products with high prepayment sensitivity. For instance, assets with complex structures, such as CMOs, can have different prepayment risk across different tranches, and products with high prepayment sensitivity can have spread durations varying across a wide range of characteristics.

For products with complex structures or high prepayment sensitivity, market risk capital results that rely on internal model calculations (the second and third approaches) could provide more accurate market risk capital estimates when compared with a single point estimate. Therefore, the proposed rule would rely on an Enterprise's internal models only when the market risk complexity is sufficiently high that using a single point estimate would inadequately represent the product's underlying market risk.

Market risk capital requirements resulting from the Enterprises' internal models are derived under an established model risk management governance process that includes FHFA's supervisory review. In particular, FHFA issues advisory bulletins, which are public documents that communicate FHFA's supervisory expectations to FHFA supervision staff and to the Enterprises on specific supervisory matters and topics. In addition, through FHFA's supervision program, FHFA on-site examiners conduct supervisory activities to ensure safe and sound operations of the Enterprises. These supervisory activities may include the examination of the Enterprises to determine whether they meet the expectations set in the advisory bulletins. Examinations may also be conducted to determine whether the Enterprises comply with their own policies and procedures, regulatory and statutory requirements, or FHFA directives.

FHFA's 2013–07 Advisory Bulletin reflects supervisory expectations for an Enterprise's model risk management. The Advisory Bulletin sets minimum thresholds for model risk management and differentiates between large, complex entities and smaller, less complex entities. As the Enterprises are large complex entities that develop and maintain internal market risk models, the Advisory Bulletin subjects them to heightened standards for internal audit, model risk management, model control framework, and model lifecycle management.

Question 2: FHFA is soliciting comments on alternative approaches to determining market risk including using the global market shock component of DFAST, discussed in section I.G. Should alternative approaches be considered and why?

Operational Risk

The proposed rule would establish a risk-invariant capital requirement for operational risk as discussed below. The operational risk capital requirement would be assessed as a fixed capital requirement on the unpaid principal balance of instruments with credit risk or on the market value of instruments with market risk. The Basel Basic Indicator Approach for operational risk would be used to determine the fixed capital requirement.

Going-Concern Buffer

As also discussed below, the proposed rule would also establish a going-concern buffer to ensure the Enterprises have sufficient capital to support the mortgage markets during and after a period of severe financial stress. The going-concern buffer would be assessed as a fixed capital requirement on the unpaid principal balance of instruments with credit risk or on the market value of instruments with market risk.

Question 3: FHFA is soliciting comments on the use of updated risk characteristics, including LTV and credit score, in the proposed risk-based capital requirements, particularly as it relates to the pros and cons of having risk-based capital requirements with elements of pro-cyclicality. Risk-based capital requirements that rely on inputs like house prices and loan risk characteristics that change over time have benefits and drawbacks. On the one hand, using updated risk characteristics such as performance history to determine risk-based capital requirements would result in a more accurate assessment of the risks faced by the Enterprises at any particular point in time within credit and economic cycles. On the other hand, using updated risk characteristics would result in pro-cyclical risk-based capital requirements, which may make it more difficult for the Enterprises to raise capital during periods of deteriorating credit or economic conditions.

As discussed above, the proposed rule's approach of using mark-to-market LTVs to determine credit risk capital requirements would more accurately represent the Enterprises' current risk profile than would using original LTVs. This is because the current value of a house influences both the probability that a homeowner will default on the mortgage and the magnitude of losses if a homeowner defaults. In times of house price appreciation mark-to-market LTVs would fall and credit risk capital requirements would decrease, while in times of house price depreciation mark-to-market LTVs would rise and credit risk capital requirements would increase. Therefore, not updating LTVs during a market downturn with decreasing house prices would, all else held constant, result in lower risk-based capital requirements relative to using mark-to-market LTVs. In such a scenario, not updating risk characteristics during a stress event could result in risk-based capital requirements being too low because original LTVs would be understated relative to current LTVs that account for decreased home values during the stress event. Whether using original LTVs or mark-to-market LTVs, the proposed credit risk capital requirements in the base grids for new originations are designed to account for a decline in house prices comparable to the 2008 financial crisis.

However, using original LTVs to determine credit risk capital requirements would reduce the pro-cyclicality of the proposed risk-based capital requirements and smooth out the Enterprises' credit risk capital requirements across economic and credit cycles, making the Enterprises' capital planning more predictable. Maintaining original LTVs for single-family loans would, for example, result in higher credit risk capital requirements during times of house price appreciation, such as the present time, relative to the proposed rule. Because the credit risk capital requirements in the proposed rule are determined using grids based on LTVs, if original LTVs were not updated over time credit risk capital requirements would not increase as a direct result of falling house prices during a market downturn.

Comparing the use of constant or mark-to-market LTVs under the U.S. regulatory implementation of Basel III requires consideration of how the standardized approach and internal ratings-based approach interact with one another. The standardized approach maintains a 50 percent risk weight for mortgages and does not update this risk weight as house prices increase or decrease. The internal ratings-based approach allows, but does not require, institutions to use updated risk factors such as mark-to-market LTVs.

Should FHFA consider reducing the pro-cyclicality of the proposed risk-based capital requirement? For example, should FHFA consider holding LTVs and/or other risk factors constant? What modifications or alternatives, if any, should FHFA consider to the proposed risk-based capital framework, and why?

The next sections discuss the components of FHFA's proposed risk-based capital requirements in more detail. This discussion begins with operational risk, which applies consistently across all of the Enterprises' mortgage loan/asset categories. The discussion continues with the proposed going-concern buffer, which would also apply consistently across all of the Enterprises' asset and guarantee categories. The following sections then discuss risk-based capital requirements for each asset and guarantee category, with subsections that address credit risk and market risk in detail along with summaries of the operational risk and going-concern buffer provisions.

2. Operational Risk

The proposed rule would include an operational risk capital requirement of 8 basis points in the risk-based capital requirement. For assets and guarantees with credit risk, the 8 basis points would be multiplied by the unpaid principal balance of the asset or guarantee. For assets with market risk, the 8 basis points would be multiplied by the market value of the asset. For assets and guarantees with both credit and market risk, the 8 basis points would be multiplied by the unpaid principal balance.

Operational risk is the risk of loss resulting from inadequate or failed internal processes, errors made by people and systems, or from external events. Operational risk is inherent in each Enterprise's business operations. Given the nature of such risks, it is challenging to quantify or estimate operational risk at the asset level. Under the Basel II framework, which requires banks to hold capital related to operational risk, there are three approaches used to measure the operational risk capital requirement: The Basic Indicator Approach, the Standardized Approach, and the Advanced Measurement Approach.[34]

The Basic Indicator Approach is the simplest approach of the three, and it is generally used by banks without significant international operations. The Standardized Approach and the Advanced Measurement Approach employ increasing complexity for calculating operational risk capital requirements. The Advanced Measurement Approach is the most advanced approach and is subject to supervisory approval.[35] In the proposed rule, FHFA uses the Basic Indicator Approach to calculate the operational risk capital requirement for the Enterprises, as it is simple and transparent, and it ensures a consistent treatment across the Enterprises.

The Basic Indicator Approach requires banks to hold capital for operational risk equal to a fixed percentage (scalar) of the average positive gross income relative to total assets over the previous three years. The scalar of 15 percent is the fixed percentage set by the Basel Committee on Banking Supervision (BCBS), representing the prescribed relationship between operational risk loss and the aggregate level of gross income. The prescribed scalar of 15 percent is consistent with the percentage prescribed for the commercial banking business line under the Basel Standardized Approach. Gross income is defined as net interest income plus net non-interest income. The measure is gross of any provisions and operating expenses, and excludes realized profits or losses from the sale of securities and extraordinary or irregular items.

As reflected in the table below, FHFA calculated the operational risk capital requirement for each Enterprise based on a three-year average of gross income from 2014 to 2016.

TABLE 8—OPERATIONAL RISK CAPITAL REQUIREMENT

[Three year average (2014–2016)]

Amounts in $billions	Fannie Mae	Freddie Mac	Weighted average
(1) Gross consolidated income	$17.9	$9.8	
(2) Scalar	15%	15%	
(3) Guarantee book of business	$3,064	$1,954	
Capital Requirement (bps) = (1 × 2)/3	8.7	7.5	8.2

The Basic Indicator Approach

Banks using the Basic Indicator Approach must hold capital for operational risk equal to the average over the previous three years of a fixed percentage (denoted alpha) of positive annual gross income. Figures for any year in which annual gross income is negative or zero should be excluded from both the numerator and denominator when calculating the

[34] *See* the Basel Committee on Banking Supervision—International Convergence of Capital Measurement and Capital Standards, June 2004.

[35] The Basel III framework replaces the collection of Basel II approaches used to measure operational risk with a single, risk-sensitive standardized approach based on two components: (1) A measure of a bank's income, and (2) a measure of a bank's historical losses. The new standardized approach would be used by all banks. *See https://www.bis.org/bcbs/publ/d424.htm.*

average. The requirement may be expressed as follows:

$$KBIA = [\Sigma(GI1 \ldots n \times \alpha)]/n$$

Where:

KBIA = the capital requirement under the Basic Indicator Approach
GI = annual gross income, where positive, over the previous three years
n = number of the previous three years for which gross income is positive
α = 15 percent, which is set by the Committee, relating the industry wide level of required capital to the industry wide level of the indicator.

Gross income is defined as net interest income plus net non-interest income. It is intended that this measure should: (i) Be gross of any provisions (*e.g.,* for unpaid interest); (ii) be gross of operating expenses, including fees paid to outsourcing service providers; (iii) exclude realized profits/losses from the sale of securities in the banking book; and (iv) exclude extraordinary or irregular items as well as income derived from insurance.

FHFA combined the Enterprises' results to determine an operational risk capital requirement of 8 basis points.

Question 4: FHFA is soliciting comments on the proposed operational risk capital requirements. Should FHFA consider requiring the Enterprises to calculate operational risk capital requirements using the new standardized approach for operational risk included in the Basel III framework? What additional modifications to the proposed operational risk capital requirements should be considered and why?

3. Going-Concern Buffer

The proposed rule would include a going-concern buffer of 75 basis points in the risk-based capital requirement. For assets and guarantees with credit risk, the 75 basis points would be multiplied by the unpaid principal balance of the asset or guarantee. For assets or guarantees with market risk, the 75 basis points would be multiplied by the market value of the asset or guarantee. For assets and guarantees with both credit and market risk, the 75 basis points would be multiplied by the unpaid principal balance.

The Enterprises are required by charter to provide liquidity to the mortgage markets during and after a period of severe financial stress. During a period of severe financial distress, the Enterprises would need capital to offset credit and market losses on their existing portfolios, to support the mortgage market by purchasing new loans, and more generally, to maintain market confidence in the Enterprises' securities. Losses on the Enterprises' existing portfolios would deplete capital and would incent the Enterprises to withdraw from riskier segments of the mortgage market in order to preserve capital. Raising new capital during a period of severe housing market stress, like that envisioned in this rule, would be very expensive, if not impossible; therefore, the proposed rule would require the Enterprises to hold additional capital on an on-going basis (''going-concern buffer'') in order to continue purchasing loans and to maintain market confidence during a period of severe distress.

To quantify the size of the going-concern buffer, FHFA looked to the Enterprises' DFAST results for the severely adverse scenario. The DFAST severely adverse scenario specified by FHFA incorporates an assumption that the Enterprises will originate new business during the stress period. DFAST results reflect the impact of the stress scenario on the earnings and capital of each Enterprise.

FHFA calculated the amount of capital necessary for the Enterprises to meet a 2.5 percent leverage requirement at the end of each quarter of the simulation of the severely adverse DFAST scenario (without DTA valuation allowance) and compared that amount to the aggregate risk-based capital requirement. The difference between these two measures provided an indicator for the size of the going-concern buffer. FHFA ultimately determined that the size of the going-concern buffer should be 75 basis points and that the going-concern buffer would be risk-invariant. This approach is useful because it includes a severe stress, an assumption of new business during the severe stress, and an assumption that an Enterprise has enough capital to meet its minimum leverage requirement during and at the end of the stress period, which should contribute to maintaining market confidence. As further validation of the proposed 75 basis points going-concern buffer, FHFA compared the capital obtained by applying the proposed going-concern buffer to the 2017 single-family book of business with the capital required to fund each Enterprise's 2017 new acquisitions. FHFA found the proposed going-concern buffer would provide sufficient capital for each Enterprise to fund an additional one to two years of new acquisitions comparable to their 2017 new acquisitions.

Question 5: FHFA is soliciting comments on the proposed going-concern buffer. What modifications to the proposed going-concern buffer should be considered and why?

4. Single-Family Whole Loans, Guarantees, and Related Securities

This section corresponds to Proposed Rule §§ 1240.5 through 1240.23.

Overview

The proposed rule would establish risk-based capital requirements for the Enterprises' single-family whole loans, guarantees, and securities held for investment. The core of the Enterprises' single-family businesses is acquiring and packaging single-family loans into mortgage-backed securities (MBS) and providing credit guarantees on the issued securities. The aim of the proposed single-family capital requirements is to ensure the continued operation of these important single-family business operations throughout periods of economic uncertainty. In the context of the proposed rule, single-family whole loans are single-family mortgage loans acquired by the Enterprises and held in portfolio, including those purchased out of MBS trusts due to issues related to payment performance. Likewise, single-family guarantees are guarantees provided by the Enterprises of the timely receipt of principal and interest payments to investors in mortgage-backed securities (MBS) that have been issued by the Enterprises and are backed by single-family mortgage loans. Except in cases where they transfer the risk to private investors, the Enterprises are exposed to credit risk through their ownership of single-family whole loans and guarantees issued on MBS. In addition, the Enterprises are exposed to market risk through their ownership of single-family whole loans and mortgage-backed securities held for investment purposes.

To implement the proposed single-family capital requirements, the Enterprises would use a set of single-family grids and risk multipliers to calculate credit risk capital, as well as a collection of straightforward formulas to calculate market risk capital, operational risk capital, and a going-concern buffer.

The proposed rule would first establish a framework through which the Enterprises would calculate their gross single-family credit risk capital requirements. The proposed methodology is simple and transparent, relying on a set of look-up tables (grids and risk multipliers) that would account for many important single-family risk factors in the calculation of gross credit risk capital requirements, including loan characteristics such as age, payment performance, loan-to-value (LTV), and credit score.

The proposed grid and multiplier framework is consistent with existing financial regulatory regimes, and would therefore facilitate comparison to those regimes and promote understanding of the framework's methodology and resulting capital requirements. In particular, the proposed rule is conceptually and methodologically similar to regulatory frameworks such as DFAST, CCAR, and the Basel Accords. FHFA believes that this straightforward and transparent approach, as opposed to one involving a complex set of credit models and econometric equations, would provide sufficient risk differentiation across the Enterprises' single-family businesses without obfuscating capital calculations or placing undue implementation and compliance burdens on the Enterprises.

Next, the proposed rule would provide a mechanism through which the Enterprises would calculate net credit risk capital requirements for single-family whole loans and guarantees by accounting for the benefits associated with loan-level credit enhancements such as mortgage insurance, while also accounting for the counterparty credit risk associated with third parties such as mortgage insurance companies.

The proposed rule would then provide a mechanism for the Enterprises to calculate capital relief by reducing net single-family credit risk capital requirements based on the amount of loss shared or risk transferred to private sector investors through the Enterprises' respective credit risk transfer programs. Collectively, the Enterprises engage in a variety of types of single-family credit risk transfer transactions, and this aspect of the proposed rule would account for differences in the Enterprises' single-family business models.

The proposed rule would establish market risk capital requirements for single-family whole loans and mortgage-backed securities held for investment. The proposed methodology would account for spread risk using either simple formulas or the Enterprises' internal models, depending on the risk characteristics of the single-family whole loans or guarantees being considered.

In addition, the proposed rule would establish an operational risk capital requirement for the Enterprises' single-family businesses that is invariant to risk. The proposed operational risk capital requirement is based on the Basel Basic Indicator Approach and would require the Enterprises to calculate operational risk capital as a fixed percentage of total unpaid principal balances or market values, depending on whether the Enterprises retain both credit and market risk for particular single-family assets or merely market risk.

Finally, as described above, the proposed rule would establish a going-concern buffer for the Enterprises' single-family businesses that is also invariant to risk with the objective of ensuring that, when combined with Enterprise revenue, the Enterprises have sufficient capital to continue operating their single-family businesses during and after a period of severe financial distress. Under the proposed rule, the Enterprises would be required to calculate the single-family going-concern buffer as a fixed percentage of total unpaid principal balances or market values, depending on whether the Enterprises retain both credit and market risk for particular single-family assets or merely market risk.

Single-Family Business Model

The proposed rule would apply equally to both Enterprises regardless of differences in their single-family business models. Although the Enterprises operate independently of one another, the common core of their single-family businesses is the acquisition of single-family mortgage loans from mortgage companies, commercial banks, credit unions, and other financial institutions, packaging those loans into mortgage-backed securities (MBS), and selling the MBS either back to the original lenders or to other private investors in exchange for a fee that represents a guarantee of timely principal and interest payments on those securities.

The Enterprises engage in the acquisition and securitization of single-family mortgages primarily through two types of transactions: Lender swap transactions and cash window transactions. In a lender swap transaction, lenders pool similar single-family loans together and deliver the pool of loans to an Enterprise in exchange for an MBS backed by those single-family mortgage loans, which the lenders generally then sell in order to use the proceeds to fund more mortgage loans. In a cash window transaction, an Enterprise purchases single-family loans from a large, diverse group of lenders and then securitizes the acquired loans into an MBS to sell at a later date. For MBS issued as a result of either lender swap transactions or cash window transactions, the Enterprises provide investors with a guarantee of the timely receipt of payments in exchange for a guarantee fee. Single-family loans that have been purchased but have not yet been securitized are held in the Enterprises' whole loan portfolios. In addition, the Enterprises also repurchase loans that have been delinquent for four or more consecutive months from the MBS they guarantee.

The Enterprises are exposed to credit risk through their ownership of single-family whole loans and the guarantees they issue on MBS. The Enterprises may incur a credit loss when borrowers default on their mortgage payments, so the Enterprises attempt to mitigate the likelihood of incurring such a loss in a variety of ways. One way to reduce potential credit losses is through the use of credit enhancements such as primary mortgage insurance. Credit enhancement is required by the Enterprises' charter acts for single-family loans with loan-to-value ratios over 80 percent.[36] In addition to loan-level credit enhancements, the Enterprises may, and indeed often do, engage in pool-level credit risk transfer transactions (CRT) in order to transfer a portion of their retained single-family credit risk to investors.

Rule Framework and Implementation

The proposed rule would establish risk-based capital requirements for the Enterprises' single-family businesses, including requirements for their whole loans, guarantees, and securities held for investment. Using the proposed requirements, the Enterprises would calculate the minimum amount of funds needed to continue their single-family business operations under stressed economic conditions, as discussed in detail below. The proposed single-family capital requirements would have the following components: Credit risk capital, including relief for credit risk transfers; market risk capital; operational risk capital; and a going-concern buffer. Each component is discussed in detail in the ensuing subsections.

a. Credit Risk

This section corresponds to Proposed Rule §§ 1240.5 through 1240.13.

Single-Family Whole Loans and Guarantees

The proposed rule would establish credit risk capital requirements for the Enterprises' conventional single-family whole loans and guarantees. For reasons discussed below, loans with a government guarantee would not be subject to the credit risk capital requirement. The single-family credit risk capital requirements would

[36] The charter acts permit three types of credit enhancement for such high-LTV loans, but private mortgage insurance is by far the most commonly used.

determine the minimum funding necessary to cover the difference between estimated lifetime credit losses in severely adverse economic conditions (alternatively referred to as stress losses) and expected losses. As adverse economic conditions are not explicitly defined, the loss projections that underpin the credit risk capital requirements in the proposed rule are based on several different economic scenarios.

Each Enterprise used economic scenarios that they defined to project loan-level credit risk capital. In addition, FHFA leveraged the baseline and severely adverse scenario defined in the Dodd-Frank Act Stress Tests (DFAST) to project expected and stress losses. The DFAST scenarios are well understood economic conditions updated annually by the Federal Reserve Board. FHFA used these pre-existing scenarios as a starting point for its estimations in order to provide economic scenarios consistent with those issued by other regulators to large financial institutions for stress tests required under DFAST. FHFA also used these scenarios to ensure a straightforward, transparent approach to the proposed rule's capital requirements. The DFAST scenarios include forecasts for macroeconomic variables including home prices, interest rates, and unemployment rates.

Home prices are generally considered to be the most important determinant of a strong single-family housing market. Home prices are used to define the loan-to-value ratio, where the likelihood of a loss occurring upon default increases as the proportion of equity to loan value deceases. Therefore, the projected home price path is the predominant macroeconomic driver for the requirements single-family stress scenarios.

The Enterprises used similar house price paths to project credit risk capital. In the stress scenarios used by FHFA and the Enterprises, nationally averaged home prices declined by 25 percent from peak to trough (the period of time between the shock and the recovery), which is consistent with the decline in home prices observed during the recent financial crisis. The 25 percent home price decline is also consistent with assumptions used in the DFAST severely adverse scenario over the past several years, although the 2017 DFAST cycle assumes a 30 percent home price decline in its severely adverse scenario. However, the trough and recovery assumptions used by FHFA and the Enterprises are somewhat more conservative than the observed house price recoveries post crisis. The single-family credit risk capital grids, discussed below, reflect estimations of stress losses and expected losses under these severely adverse economic conditions.

The proposed rule would require the Enterprises to calculate credit risk capital requirements for single-family whole loans and guarantees by completing the following simplified steps:

(1) Determine base single-family credit risk capital requirements using single-family-specific credit risk capital grids;

(2) Determine gross single-family credit risk capital requirements by adjusting base single-family credit risk capital requirements for additional risk characteristics using a set of single-family-specific risk multipliers;

(3) Determine net single-family credit risk capital requirements by adjusting gross single-family credit risk capital requirements for loan-level credit enhancements, including accounting for counterparty risk; and

(4) Determine capital relief from net single-family credit risk capital requirements due to credit risk transfer transactions.

Base Credit Risk Capital Requirements

This section corresponds to Proposed Rule §§ 1240.5 through 1240.16.

The proposed rule would require the Enterprises to calculate base credit risk capital requirements for single-family whole loans and guarantees using a set of five look-up tables or grids, one for each single-family loan segment. Accordingly, for the purpose of the proposed rule, the Enterprises would categorize their single-family whole loans and guarantees into five loan segments, with each loan segment representing a different period in the possible life cycle of a single-family mortgage loan.

The proposed single-family loan segments are based on age and payment performance because the expectation of a credit loss depends heavily on these two risk factors. Additional risk factors affect the expectation of credit loss differently depending on where a loan is in its life cycle. The amount of credit risk capital required for a single-family whole loan or guarantee therefore would change over the life cycle of a loan, decreasing when the loan is seasoned and performing, and increasing when the loan is delinquent or has recently experienced delinquency. These dynamics are often captured in credit loss forecasts by estimating different mortgage performance equations for loans in different life-cycle stages. The proposed rule would capture these dynamics in a similar fashion by having five different single-family credit risk capital grids and sets of multipliers for whole loans and guarantees in different life-cycle stages. The five proposed loan segments for single-family whole loans and guarantees are:

- *New originations:* Loans that were originated within 5 months of the capital calculation date and have never been 30-days delinquent. Streamlined refinance loans, including HARP loans, are excluded from this category.
- *Performing seasoned:* Loans that were originated at least 5 months before the capital calculation date and have been neither 30-days delinquent nor modified within 36 months of the capital calculation date. Newly originated streamlined refinance loans, including HARP loans, are included in this category.
- *Non-modified re-performing:* Loans that are currently performing and have had a prior 30-day delinquency, but not a prior modification.
- *Modified re-performing:* Loans that are currently performing and have had a prior 30-day delinquency and a prior modification.
- *Non-performing:* Loans that are currently at least 30-days delinquent.

Each single-family loan segment would have a unique two-dimensional credit risk capital grid that the Enterprises would use to calculate base credit risk capital requirements for every whole loan and guarantee in the loan segment. The dimensions of the credit risk capital grids would vary by loan segment to allow the grids to differentially incorporate key risk drivers into the base credit risk capital requirements on a segment-by-segment basis. For example, current (refreshed) credit scores and mark-to-market LTV (MTMLTV) are two primary drivers of credit losses in performing seasoned loans, while a primary driver of credit losses in modified re-performing loans (RPL) is the payment change due to modification. Accordingly, the dimensions of the credit risk capital grids for these segments would reflect the respective primary drivers of risk.

The credit risk capital grid for each single-family loan segment would determine the base credit risk capital requirement for any single-family whole loan or guarantee in that loan segment (where the base credit risk capital requirement refers to a capital calculation that does not yet recognize either the full impact of risk factors that are not one of the base grid's two dimensions or loan-level credit enhancements). The proposed grids were populated after carefully considering a combination of estimates of credit risk capital from the Enterprises' internal models and FHFA's models. To derive the underlying estimates for each loan segment's credit risk capital grid, the Enterprises were asked to run their single-family credit models using comparable stressed economic conditions, as discussed above, and synthetic loans with a baseline risk profile with respect to risk factors other than those represented in the dimensions of the segment's credit risk capital grid.[37] In the proposed rule, each single-family loan segment has its own baseline risk profile, which is discussed segment-by-segment below. Consequently, each cell of the single-family credit risk capital grids represents an estimated difference, in basis points, between estimated stress losses and expected losses for a segment-specific, baseline synthetic loan with a particular combination of primary risk factors as described in the grid's dimensions. In the proposed rule, this capital requirement, in basis points, would be applied to the unpaid principal balance (UPB) of each conventional single-family whole loan and guarantee held by the Enterprises with exposure to credit risk.

FHFA believes that constructing the proposed base credit risk capital grids in this manner provides for sufficient levels of granularity, accuracy, and transparency in the credit risk capital calculations. Each single-family whole loan and guarantee is segmented first by age and payment performance, then broken down further by its two primary risk drivers while simultaneously considering ''typical'' values for secondary risk drivers (which are further accounted for in the calculation of gross credit risk capital requirements using risk multipliers). FHFA carefully evaluated its own model estimations using these categorizations, as well as estimations provided by the Enterprises. The credit risk capital requirements in the five proposed grids do not take into account the effect of credit enhancements such as mortgage insurance and generally represent averages of the individual estimations, although in certain cases adjustments were made to ensure the capital requirements were reasonable. In addition, the risk factor breakpoints and ranges represented in the grids' dimensions were chosen in light of FHFA analysis and internal discussions, as well as discussions with the Enterprises. FHFA concluded that the proposed breakpoints and ranges would combine to form sufficiently granular pairwise buckets without imposing an undue compliance burden on the Enterprises. The proposed process for calculating credit risk capital requirements is therefore straightforward, and does not rely on quarterly calculations of complicated, opaque economic models or econometric equations.

Base Credit Risk Capital Grids by Loan Segment

New Originations

The primary risk factors for single-family whole loans and guarantees in the new originations loan segment are original credit score and original loan-to-value (OLTV). The dimensions in the segment's credit risk capital grid would reflect these two risk factors. Original credit score correlates strongly with the probability of a borrower default, while OLTV relates to the severity of a potential loss should a borrower default (loss given default). Credit score and OLTV are often used by lenders to price new loans.

The proposed single-family credit risk capital grid for new originations is presented in Table 9.

BILLING CODE 8070–01–P

[37] In the context of this rule, a baseline risk profile means that the secondary risk factors included in each baseline synthetic loan take values such that they would receive a risk multiplier of 1.0, as discussed further in section II.C.4.a.

Table 9: Single-Family New Originations Base Credit Risk Capital (in bps)

	OLTV <= 30%	30% < OLTV <= 60%	60% < OLTV <= 70%	70% < OLTV <= 75%	75% < OLTV < 80%	OLTV = 80%	80% < OLTV <= 85%	85% < OLTV <= 90%	90% < OLTV <= 95%	95% < OLTV <= 97%	OLTV > 97%

BILLING CODE 8070–01–C

Credit scores have values ranging from 300 to 850, and LTVs at origination typically range from 10 percent to 97 percent. FHFA chose the ranges and breakpoints represented in the dimensions of the Table 9 after reviewing the distributions of unpaid principal balances in the Enterprises' single-family businesses. FHFA notes that the Enterprises currently rely on Classic FICO for product eligibility, loan pricing, and financial disclosure purposes, and therefore the base grid for new originations was estimated using Classic FICO credit scores.[38] Furthermore, throughout the proposed rule, the use of credit scores should be interpreted to mean Classic FICO credit scores. If the Enterprises were to begin using a different credit score for these purposes, or multiple scores, the grid for new originations, along with any other grid reliant on credit scores, would need to be recalibrated. In the proposed grid for new originations, OLTV ranges are more granular between OLTVs of 70 and

[38] FHFA has issued a Request for Input on Fannie Mae and Freddie Mac Credit Score Requirements. *See https://www.fhfa.gov/Media/PublicAffairs/Pages/FHFA-Issues-Request-for-Input-on-Fannie-Mae-and-Freddie-Mac-Credit-Score-Requirements.aspx.*

95 percent, where the Enterprises conduct the majority of their new single-family businesses. In addition, the credit risk capital grid for new originations has a separate category for loans with an 80 percent OLTV to account for the high volume and distinct features of these particular loans. Under the Enterprises' charter acts, 80 percent represents the maximum LTV for which loans do not require credit enhancement, which creates an incentive for borrowers to finance exactly 80 percent of a home's value. The grid in Table 9 presents proposed capital requirements before taking into account credit enhancements such as mortgage insurance, which would lower the Enterprises' net capital requirements for single-family loans with an OLTV greater than 80 percent. For example, for a single-family 30-year amortizing loan with guide-level mortgage insurance coverage and an OLTV of 93 percent, mortgage insurance would reduce the Table 9 gross credit risk capital requirement by 69 percent (see Table 15) prior to counterparty haircut adjustments. Subsequent tables 10 through 13 are also presented before taking into account credit enhancements.

Aside from the primary risk factors represented in the dimensions of Table 9, there are several secondary risk factors accounted for in the risk profile of the synthetic loan used in the estimations underlying the credit risk capital requirements presented in Table 9. Those secondary risk factors, along with the values that determine the baseline risk profile for the credit risk capital grid for new originations, are as follows: Loan age less than six months, 30-year fixed rate, purchase, owner-occupied, single-unit, retail channel sourced, debt-to-income ratio between 25 percent and 40 percent, loan size greater than $100,000, no second lien, and has multiple borrowers. Variations from these risk characteristics would make the whole loan or guarantee more or less risky and would result in a higher or lower credit risk capital requirement relative to the base credit risk capital requirement. In the proposed rule, variations in these secondary risk factors would be captured using risk multipliers as described in the next section.

Performing Seasoned Loans

The primary risk factors for single-family whole loans and guarantees in the performing seasoned loan segment are refreshed credit score and mark-to-market loan-to-value (MTMLTV). The dimensions in the segment's credit risk capital grid would reflect these two risk factors. The more seasoned a loan gets, or the longer it has been since the loan was originated, the less relevant its original credit score and original LTV become.

But since credit score and LTV still relate strongly to the probability of default and loss given default, respectively, refreshed (updated) values of these two important risk factors are used as the primary risk factors and dimensions. The proposed single-family credit risk capital grid for whole loans and guarantees in the performing seasoned loan segment is presented in Table 10.

BILLING CODE 8070–01–P

Table 10: Single-Family Performing Seasoned Loans Base Credit Risk Capital (in bps)

Refreshed Credit Score >= 780	10	19	59	87	124	148	200	258	301	382	463	578

BILLING CODE 8070–01–C

Credit scores have values ranging from 300 to 850, and MTMLTVs typically range from 10 percent to upwards of 120 percent. FHFA chose the ranges and breakpoints represented in the dimensions of the Table 10 after reviewing the distributions of unpaid principal balances in the Enterprises' single-family seasoned loan businesses. In the proposed credit risk capital grid for performing seasoned loans, FHFA included MTMLTV buckets beyond 95 percent to account for adverse changes in home prices subsequent to loan origination, as well as to account for the inclusion of streamlined refinance loans in the segment. In addition, loans with an 80 percent LTV are no longer highlighted.

Aside from the primary risk factors represented in the dimensions of Table 10, there are several secondary risk factors accounted for in the risk profile of the synthetic loans used in the estimations underlying the credit risk capital requirements presented in Table 10. Those secondary risk factors, along with the values that determine the baseline risk profile for the credit risk capital grid for performing seasoned loans, are: Loan age between six months and 12 months, 30-year fixed rate, purchase, owner-occupied, single-unit, retail channel sourced, debt-to-income ratio between 25 percent and 40 percent, loan size greater than $100,000, no second lien, has multiple borrowers, full documentation for documentation level, non-interest-only for amortization type, not streamlined refinance loans, and zero refinance (cohort) burnout (described below). Several of these risk factors, such as documentation level, interest-only, and those related to refinancing, are included in the performing seasoned loan segment despite the fact that they are not included in the new originations segment, in some cases due to the Qualified Mortgage rule that prohibits interest-only and low-documentation loans on new originations. However, these risk factors may be present on loan originated prior to the financial crisis. Variations from these risk characteristics would make the whole loan or guarantee more or less risky and would result in a higher or lower credit risk capital requirement relative to the base credit risk capital requirement. In the proposed rule, variations in these secondary risk factors would be captured using risk multipliers as described in the next section.

Non-Modified Re-Performing Loans

The primary risk factors for single-family whole loans and guarantees in the non-modified re-performing loan segment are re-performing duration and MTMLTV. The dimensions in the segment's credit risk capital grid would reflect these two risk factors. Re-performing duration is the number of months since a whole loan or guarantee was last delinquent, and is a strong predictor of the likelihood of a subsequent default for re-performing loans that have cured without prior modifications. MTMLTV is a strong predictor of loss given default for whole loans and guarantees in this segment.

The proposed single-family credit risk capital grid for whole loans and guarantees in the non-modified re-performing loan segment is presented in Table 11.

BILLING CODE 8070–01–P

Table 11: Single-Family Non-Modified Re-Performing Loans Base Credit Risk Capital (in bps)

		MTMLTV <= 30%	30% < MTMLTV <= 60%	60% < MTMLTV <= 70%	70% < MTMLTV <= 75%	75% < MTMLTV <= 80%	80% < MTMLTV <= 85%	85% < MTMLTV <= 90%	90% < MTMLTV <= 95%	95% < MTMLTV <= 100%	100% < MTMLTV <= 110%	110% < MTMLTV <= 120%	MTMLTV > 120%

	36 < Months <= 48	8	46	132	198	285	349	447	550	642	766	893	1088

BILLING CODE 8070–01–C

In the proposed rule, re-performing duration is divided into four categories such that credit risk capital requirements would decrease as re-performing duration increases. When the re-performing duration is greater than three years, the proposed credit risk capital requirement for a re-performing loan would approximate the credit risk capital requirements for a performing seasoned loan. Loans that re-perform for greater than four years, and have not been modified, would revert to being classified as performing seasoned and use the appropriate credit risk capital grid. The proposed ranges and breakpoints for MTMLTV are unchanged from those found in the performing seasoned loan grid (Table 10).

Aside from the primary risk factors represented in the dimensions of Table 11, there are many secondary risk factors accounted for in the risk profile of the synthetic loan used in the estimations underlying the credit risk capital requirements presented in Table 11. In particular, although much of the predictive power of current credit score is captured by re-performing duration, variations in credit score are still accounted for through a multiplier. These secondary risk factors, along with the values that determine the baseline risk profile for the credit risk capital grid for non-modified re-performing loans, are the same as those for performing seasoned loans with the inclusion of two additional features: Refreshed credit scores between 660 and 700, and a maximum previous delinquency of one month. Variations from these risk characteristics would make the whole loan or guarantee more or less risky and would result in a higher or lower credit risk capital requirement relative to the base credit risk capital requirement. In the proposed rule, variations in these secondary risk factors would be captured using risk multipliers as described in the next section.

Modified Re-Performing Loans

The primary risk factors for single-family whole loans and guarantees in the modified re-performing loan segment are similar to those in the non-modified re-performing loan segment. However, along with the MTMLTV, the second primary risk factor in the modified re-performing segment is either the re-performing duration or the performing duration, whichever is smaller. The re-performing duration measures the number of months since the last delinquency, while the performing duration measures the number of months a loan has been performing since it was last modified. The dimensions in the segment's credit risk capital grid would reflect these risk factors.

The proposed single-family credit risk capital grid for whole loans and guarantees in the modified re-performing loan segment is presented in Table 12.

BILLING CODE 8070–01–P

Table 12: Single-Family Modified Re-Performing Loans Base Credit Risk Capital (in bps)

		MTMLTV <= 30%	30% < MTMLTV <= 60%	60% < MTMLTV <= 70%	70% < MTMLTV <= 75%	75% < MTMLTV <= 80%	80% < MTMLTV <= 85%	85% < MTMLTV <= 90%	90% < MTMLTV <= 95%	95% < MTMLTV <= 100%	100% < MTMLTV <= 110%	110% < MTMLTV <= 120%	MTMLTV > 120%

BILLING CODE 8070–01–C

Aside from the primary risk factors represented in the dimensions of Table 12, there are many secondary risk factors accounted for in the risk profile of the synthetic loan used in the estimations underlying the credit risk capital requirements presented in Table 12. These secondary risk factors, along with the values that determine the baseline risk profile for the credit risk capital grid for modified re-performing loans, are the same as those for non-modified re-performing loans. Variations from these risk characteristics would make the whole loan or guarantee more or less risky and would result in a higher or lower credit risk capital requirement relative to the base credit risk capital requirement. In the proposed rule, variations in these secondary risk factors would be captured using risk multipliers as described in the next section.

Contrary to re-performing single-family loans that have not been modified, loans in the modified re-performing loan segment never revert to being classified as performing seasoned loans, even after four or more years of re-performance.

Non-Performing Loans

The primary risk factors for single-family whole loans and guarantees in the non-performing loan (NPL) segment are delinquency level and MTMLTV. The dimensions in the segment's credit risk capital grid would reflect these two risk factors. In the proposed rule, a non-performing single-family loan is a loan where at least the most recent payment has been missed. The delinquency level of a non-performing whole loan or guarantee is the number of payments missed since the loan became delinquent, and is a strong predictor of the likelihood of default for non-performing loans. MTMLTV is a strong predictor of loss given default for whole loans and guarantees in this segment. The proposed single-family credit risk capital grid for whole loans and guarantees in the non-performing loan segment is presented in Table 13.

TABLE 13—SINGLE-FAMILY NON-PERFORMING LOANS BASE CREDIT RISK CAPITAL

[In bps]

	MTMLTV <= 30%	30% < MTMLTV <= 60%	60% < MTMLTV <= 70%	70% < MTMLTV <= 75%	75% < MTMLTV <= 80%	80% < MTMLTV <= 85%	85% < MTMLTV <= 90%	MTMLTV > 90%
Number of Missed Payments:								
1	46	387	1,054	1,195	1,300	1,404	1,496	1,663
2	60	507	1,233	1,374	1,462	1,535	1,612	1,695
3–6	80	603	1,315	1,437	1,503	1,556	1,600	1,638
>=7	198	884	1,565	1,619	1,650	1,659	1,667	1,577

The capital requirements detailed in Table 13 are non-monotonic as the number of missed payments increases, particularly in the highest (right-most) MTMLTV column. This is because as the number of missed payments increases for a non-performing loan with a very high LTV, so does the expected loss. Because capital is defined as the difference between stress loss and expected loss, when expected loss increases and grows closer to stress loss, the capital requirement shrinks. The increase in expected loss is reflected in commensurately higher loss reserves.

Aside from the primary risk factors represented in the dimensions of Table 13, there are many secondary risk factors accounted for in the risk profile of the synthetic loan used in the estimations underlying the credit risk capital requirements presented in Table 13. These secondary risk factors, along with the values that determine the baseline risk profile for the credit risk capital grid for non-performing loans, are the same as those for performing seasoned loans, with the inclusion of one additional feature: Refreshed credit scores between 640 and 700. Variations from these risk characteristics would make the whole loan or guarantee more or less risky and would result in higher or lower credit risk capital requirement relative to the base credit risk capital requirement. In the proposed rule, variations in these secondary risk factors would be captured using risk multipliers as described in the next section.

Gross Credit Risk Capital Requirements

After the Enterprises calculate base credit risk capital requirements for single-family whole loans and guarantees using the single-family credit risk capital grids, the proposed rule would require the Enterprises to calculate gross credit risk capital requirements by adjusting the base credit risk capital requirements to account for additional loan characteristics using a set of single-family-specific risk multipliers. The proposed risk multipliers would refine single-family base credit risk capital requirements to account for risk factors beyond the primary risk factors reflected in the credit risk capital grids, and for variations in secondary risk factors not captured in the risk profiles of the synthetic loans underlying the credit risk capital grids. Gross single-family credit risk capital requirements would be the product of base single-family credit risk capital requirements and the single-family risk multipliers.

The proposed single-family risk multipliers represent common characteristics that increase or decrease the riskiness of a single-family whole loan or guarantee. Therefore, the proposed rule would provide a mechanism through which single-family credit risk capital requirements would be adjusted and refined up or down to reflect a more or less risky loan profile, respectively. FHFA believes that risk multipliers would provide for a simple and transparent characterization of the risks associated with different types of single-family whole loans and guarantees, and an effective way of adjusting credit risk capital requirements for those risks. Although the specified risk characteristics are not exhaustive, they capture key real estate loan performance drivers, and are commonly used in mortgage loan underwriting and rating. For these reasons, FHFA believes the use of risk multipliers in general, and the proposed risk multipliers in particular, would facilitate analysis and promote understanding of the Enterprises' single-family credit risk capital requirements while mitigating concerns associated with compliance and complex implementation.

The proposed risk multiplier values were determined using FHFA staff analysis and expertise, and in consideration of the Enterprises' contribution of model results and business expertise. To derive the proposed risk multiplier values, the Enterprises were asked to run their single-family credit models using comparable stressed economic conditions, as discussed above, and synthetic loans with a baseline risk profile with respect to risk factors other than those represented in the dimensions of each segment's credit risk capital grid. The segment-specific secondary risk factors, and their segment-specific baseline risk values, are discussed in detail in the prior section. The Enterprises then varied the secondary risk factors, by loan segment, to estimate each risk factor's multiplicative effects on the Enterprises' base credit risk capital projections (stress losses minus expected losses) for baseline whole loans and guarantees in each loan segment. FHFA then considered the multiplier values estimated by the Enterprises, which were generally consistent in magnitude and direction, in conjunction with its own estimated values before combining values to determine the proposed single-family risk multipliers. The proposed single-family risk multipliers are presented in Table 14.

TABLE 14—SINGLE-FAMILY RISK MULTIPLIERS

Risk factor	Value or range	Risk multipliers by single-family loan segment				
		New originations	Performing seasoned	Non-modified RPL	Modified RPL	NPL
Loan Purpose	Purchase	1.0	1.0	1.0	1.0

	700 <= Refreshed Credit Score < 720.					0.9
	720 <= Refreshed Credit Score < 760.					0.8
	760 <= Refreshed Credit Score < 780.					0.7
	Refreshed Credit Score >= 780.					0.5

Table 14 is structured in the following way: The first column represents secondary risk factors, the second column represents the values or ranges each secondary risk factor can take, and the third through seventh columns contain proposed risk multipliers, with each column containing proposed risk multipliers pertaining only to the single-family loan segment designated at the top of the column. There would be a different set of risk multipliers for each of the five single-family loan segments.

In the proposed rule, each risk factor could take multiple values, and each value or range of values would have a risk multiplier associated with it. For any particular single-family whole loan or guarantee, each risk multiplier could take a value of 1.0, above 1.0, or below 1.0. A multiplier of 1.0 would imply that the risk factor value for a whole loan or guarantee is similar to, or in a certain range of, the particular risk characteristic found in the segment's synthetic loans. A multiplier value above 1.0 would be assigned to a risk factor value that represents a riskier characteristic than the one found in the segment's synthetic loans, while a multiplier value below 1.0 would be assigned to a risk factor value that represents a less risky characteristic than the one found in the segment's synthetic loans. Finally, the risk multipliers would be multiplicative, so each single-family whole loan and guarantee in a loan segment would receive a risk multiplier for every risk factor pertinent to that loan segment, even if the risk multiplier is 1.0 (implying no change to the base credit risk capital requirement for that risk factor). The total combined risk factor for a single-family whole loan or guarantee would be, in general, the product of all individual risk multipliers pertinent to the appropriate loan segment.

There are two general types of single-family risk factors in the proposed rule for which risk multipliers are applied: Risk factors determined at origination and risk factors that change as a loan seasons, or ages.

Risk factors determined at origination include common characteristics such as loan purpose, occupancy type, and property type. The impacts of this type of risk factor on single-family mortgage performance and credit losses are well understood and commonly used in mortgage pricing and underwriting. Many of these risk factors can be quantified and applied in a straightforward manner using risk multipliers as indicated in Table 14. The full set of single-family risk factors determined at origination for which the proposed rule requires risk multipliers is:

- *Loan purpose.* Loan purpose reflects the reason for the mortgage at origination. The proposed risk multiplier would be at least 1.0 for any purpose other than ''purchase,'' suggesting any other purpose would imply a mortgage that is at least as risky.
- *Occupancy type.* Occupancy type reflects the borrowers' intended use of the property, with an owner-occupied property representing a baseline level of risk (a multiplier of 1.0), and an investment property being more risky (a multiplier greater than 1.0).
- *Property type.* Property type describes the physical structure of the property, with a 1-unit property representing a baseline level of risk (a multiplier of 1.0), and other property types such as 2–4 unit properties or manufactured homes being more risky (a multiplier greater than 1.0).
- *Number of borrowers.* Number of borrowers reflects the number of borrowers on the mortgage note, with multiple borrowers representing a baseline level of risk (a multiplier of

1.0), and one borrower being more risky (a multiplier greater than 1.0).

- *Third party origination channel.* Third party origination channel reflects the source of the loan, and whether or not it originated from a third party, including a broker or correspondent. Loans that did not originate from a third party represent a baseline level of risk (a multiplier of 1.0).
- *Product type.* Product type reflects the mortgage product type as of the origination date, with a 30-year fixed rate mortgage and select adjustable rate mortgages (including ARM 5/1 and ARM 7/1, captured in the ''Other'' category) representing a baseline level of risk (a multiplier of 1.0). Adjustable rate loans with an initial one year fixed rate period followed by a rate that adjusts annually (ARM 1/1) are considered more risky (a multiplier greater than 1.0), while shorter-term fixed rate loans are considered less risky (a multiplier less than 1.0).
- *Interest-only.* Interest-only reflects whether or not a loan has an interest-only payment feature. Interest-only loans are generally considered more risky (a multiplier greater than 1.0) than non interest-only loans due to their slower principal accumulation and an increased risk of default driven by the potential increase in principal payments at the expiration of the interest-only period. Interest-only loans are not permitted at origination under the Qualified Mortgage rule.
- *Loan documentation level.* Loan documentation level refers to the level of income documentation used to underwrite the loan. Loans with low or no documentation have a high degree of uncertainty around a borrower's ability to pay, and are considered more risky (a multiplier greater than 1.0) than loans with full documentation where a lender is able to verify the income, assets, and employment of a borrower. Loans with low or no documentation are not permitted at origination under the Qualified Mortgage rule.
- *Streamlined refinance.* Streamlined refinance reflects an indicator for a loan that was refinanced through one of the streamlined refinance programs offered by the Enterprises, including HARP. These loans generally cannot be refinanced under normal circumstances due to high MTMLTV, and therefore would be considered more risky (a multiplier greater than 1.0).

Risk factors that change dynamically and are updated as a loan seasons include characteristics such as loan age, loan size, current credit score, and delinquency or modification history. While not important for underwriting or original loan pricing, these risk factors are strongly associated with probability of default and/or loss given default, and are therefore important in estimating capital requirements. The full set of dynamic single-family risk factors for which the proposed rule requires risk multipliers is:

- *DTI.* DTI, or debt-to-income ratio, is the back-end ratio of the sum of the borrowers' monthly payment for principal, interest, taxes, homeowners' association fees and insurance, plus all fixed debts to the total monthly income of all borrowers as determined at the time of origination. DTI affects and reflects a borrower's ability to make payments on a loan. A DTI between 25 percent and 40 percent would reflect a baseline level of risk (a multiplier of 1.0), and as a borrower's income rises relative to the borrower's debt obligations (a lower DTI), the loan would be considered less risky (a multiplier less than 1.0). If a borrower's income shrinks relative to the borrower's debt obligations (a higher DTI), the loan would be considered more risky (a multiplier greater than 1.0).
- *Loan size.* Loan size reflects the current unpaid principal balance of a loan. Loans with a low unpaid principal balance would be considered more risky than loans with a high unpaid principal balance due to the fact that fixed foreclosure costs represent a higher percentage of the unpaid principal balance for loans with a low unpaid principal balance. As a result, loans with a low balance would require higher capital in basis points than an otherwise identical loan with a high balance. Consequently, loans with an unpaid principal balance under $100,000 would receive a multiplier greater than 1.0.
- *Subordination (OLTV × second lien).* Subordination refers to the ratio of the original loan amount of the second lien to the lesser of the appraised value of a loan or the sale price. Loans with no subordination would represent a baseline level of risk (a multiplier of 1.0), whereas loans with varying combinations of original loan-to-value (OLTV) and subordination percentages would be generally considered more risky (a multiplier greater than 1.0).
- *Loan age.* Loan age reflects the number of months since the loan was originated. In the proposed rule, older loans are considered less risky because in general as loans age the likelihood of events occurring that would trigger mortgage default decreases. Older loans have relatively low potential cumulative losses remaining, and would require lower credit risk capital requirements than newer loans.
- *Cohort burnout.* Cohort burnout reflects the number of times a borrower has not taken advantage of the opportunity to refinance the mortgage when the borrower's mortgage rate exceeds the current mortgage rate by 50 basis points. When a borrower refinances a mortgage, the lender's credit risk decreases because the loan is repaid. Cohort burnout is an indicator that a borrower is less likely to refinance in the future given the opportunity to do so. Borrowers that demonstrate a lower propensity to refinance thus have higher credit risk, and a loan with a cohort burnout greater than zero would receive a multiplier greater than 1.0.
- *Refreshed credit score for re-performing loans (RPLs) and non-performing loans (NPLs).* Refreshed credit scores refer to credit scores that have been updated as of the capital calculation date. In general, a credit score reflects the credit worthiness of a borrower, and a higher credit score implies lower risk and a lower multiplier. For RPLs, a refreshed credit score between 660 and 700 reflects a baseline level of risk (a multiplier of 1.0). For NPLs, a refreshed credit score between 640 and 700 represents a baseline level of risk (a multiplier of 1.0).
- *Payment change from modification.* For modified loans, the payment change from modification reflects the change in the monthly payment, as a percentage of the original monthly payment, resulting from a permanent loan modification. In general, higher payment reductions tend to reduce the likelihood of future default, so loans with higher payment reductions from modifications would have a lower capital requirement (a multiplier less than 1.0).
- *Previous maximum delinquency.* For RPLs, previous maximum delinquency reflects the maximum number of months a loan has been at least 30-days delinquent during the prior three years. The longer a loan has been delinquent, the more likely it will default in the future, and the more risky it is considered. Therefore, loans with a previous maximum delinquency between 0 and 1 month represent a baseline level of risk (a multiplier of 1.0), and loans with a maximum delinquency greater than 1 month would be considered more risky (a multiplier greater than 1.0).

Not all risk multipliers would apply to every loan segment, because the multipliers were estimated separately for each single-family loan segment. In cases where a risk factor did not influence the estimated credit risk of whole loans and guarantees in a loan segment, or a risk factor did not apply at all (refreshed credit scores in the new origination segment, for example), there would be no multiplier for that risk factor in that loan segment.

In the proposed rule, single-family risk multipliers would adjust base credit risk capital requirements in a multiplicative manner. Consequently, and as a result of the simple and straightforward structure of the proposed multiplier framework, certain combinations of risk factors may result in over-capitalizing certain types of single-family whole loans and guarantees. This could occur in part because the risk factors for which multipliers would be applied are not independent. Single-family whole loans and guarantees with a MTMLTV greater than 95 percent were particularly vulnerable to this phenomenon. Thus, the proposed rule would implement a multiplier cap of 3.0 for the product of risk multipliers for single-family whole loans and guarantees with a MTMLTV greater than 95 percent. Based on FHFA empirical analysis, less than 3 percent of loans with a MTMLTV greater than 95 percent would be affected by the cap.

Net Credit Risk Capital Requirements: Loan-Level Credit Enhancements

Loan-level credit enhancements are credit guarantees on individual loans. The Enterprises primarily use loan-level credit enhancements to satisfy the credit enhancement requirement of their charter acts. The Enterprises' charter acts require single-family mortgage loans with an unpaid principal balance exceeding 80 percent of the value of the property to have one of three forms of credit enhancement. The credit enhancement requirement can be satisfied through: The seller retaining a participation of at least 10 percent in the mortgage (participation agreement); the seller agreeing to repurchase or replace the mortgage in the event the mortgage is in default (repurchase or replacement agreements; recourse and indemnification agreements); or a guarantee or insurance on the unpaid principal balance which is in excess of 80 percent LTV (guarantee or insurance). The third form, mortgage insurance, is the most common form of charter-required credit enhancement.

The proposed rule would require the Enterprises to calculate net credit risk capital requirements by reducing the gross credit risk capital requirement on single-family loans to reflect the benefits from loan-level credit enhancements. Similar to the use of multipliers to adjust the base credit risk capital requirement for various risk factors, the proposed rule would use multipliers (''CE multipliers'') to reduce the gross credit risk capital requirement for the benefit from loan-level credit enhancements. CE multipliers would take values of less than or equal to 1.0 to reflect a reduction in the gross credit risk capital requirement. For example, a CE multiplier of 0.65 on a single-family loan would imply that an Enterprise is responsible for 65 percent of the credit risk of the loan and that the counterparty providing the credit enhancement is responsible for the remaining 35 percent of the credit risk. A higher CE multiplier would imply an Enterprise is taking a greater share of the losses and a lower CE multiplier would imply the counterparty is taking a greater share of the losses.

Participation Agreements

Participation agreements are rarely utilized by the Enterprises and for reasons of simplicity, the proposed rule would not assign any benefit for these agreements (a CE multiplier of 1.0).

Repurchase, Replacement, Recourse, and Indemnification Agreements

Repurchase, replacement, recourse, and indemnification agreements may be unlimited or limited. Unlimited agreements provide full coverage for the life of the loan, while limited agreements provide partial coverage or have a limited duration. In the proposed rule, a counterparty would be responsible for all credit risk in the presence of an unlimited agreement, and the loan would be assigned a CE multiplier of zero. For limited agreements, the proposed rule would require the Enterprises to use the single-family CRT techniques described section II.C.4.b to determine the appropriate benefit from the limited agreement.

Mortgage Insurance

Mortgage insurance (MI) is an insurance policy where an insurance company covers a portion of the loss if a borrower defaults on a single-family mortgage loan. In the proposed rule, the benefit from MI would vary based on a number of MI coverage and loan characteristics, including (i) whether MI is cancellable or non-cancellable, (ii) whether MI is charter-coverage or guide-coverage, and (iii) loan characteristics, including original LTV, loan age, amortization term, and loan performance segment.

- *Non-cancellable versus cancellable MI.* Non-cancellable MI provides coverage for the life of the loan. Non-cancellable MI is typically associated with single premium insurance policies. Cancellable MI allows for the cancellation of coverage upon a borrower's request, when the loan balance falls to 80 percent of the original property value, or automatic cancellation when the loan balance falls below 78 percent of the original property value or the loan reaches the midpoint of the loan's amortization schedule, if the mortgage is current. Due to the longer period of coverage, non-cancellable MI provides more credit risk protection than cancellable MI. In the proposed rule, non-cancellable MI CE multipliers would be lower than cancellable MI CE multipliers. The proposed rule would provide separate sets of multipliers for non-cancellable and cancellable MI to reflect this difference in risk protection.
- *Charter-level versus guide-level MI coverage.* Charter-level coverage provides the minimum level of coverage required by the Enterprises' charter acts for loans with LTVs greater than 80 percent. Guide-level coverage provides deeper coverage, roughly double the coverage provided by charter-level coverage. Guide-level coverage implies greater credit risk protection from the MIs. Therefore, in the proposed rule, the CE multipliers for guide-level coverage would be lower than the CE multipliers for charter-level coverage to reflect the Enterprises having a lower share of the credit risk.
- *Original LTV.* Loans with higher original LTV require higher MI coverage levels than loans with lower original LTV. Higher MI coverage levels imply greater credit risk protection from the MIs. Therefore, in the proposed rule, loans with higher original LTVs would have lower CE multipliers.
- *Amortization term.* For cancellable MI, loans with a 15- to 20-year amortization period will have MI cancellation triggered earlier than loans with a 30-year amortization period. Therefore, loans with longer amortization terms have a longer period of credit risk protection from MIs and the Enterprises have a lower share of the risk. In the proposed rule, loans with a 30-year amortization period would have a lower CE multiplier than loans with a 15- to 20-year amortization period for loans with cancellable MI.
- *Loan segment.* MI coverage on delinquent loans cannot be cancelled. Cancellation of MI coverage on modified performing loans is based on the modified LTV and the modified amortization term, which are typically higher than the original LTV and the original amortization term. In both of these cases, the MI coverage is extended for a longer period, resulting in greater credit risk protection, relative to performing loans. Therefore, in the proposed rule, delinquent and modified

loans would have a lower CE multiplier than performing loans.

- *Loan age.* MI cancellation will be triggered sooner for older loans than for younger loans because the older loans will reach an amortized LTV of 78 percent or the mid-point of the loan's amortization period first. Therefore, older loans with cancellable MI have a shorter period of remaining MI coverage and thus have less credit risk protection from MI. In the proposed rule, older loans with cancellable MI would have a higher CE multiplier than would younger loans.

The proposed rule would use the following set of tables to present the CE multipliers for loans with MI. These tables take into consideration the MI factors that were discussed above.

The first table contains proposed CE multipliers for non-cancellable MI coverage. This table would be used for all loan segments, except the NPL loan segment. The table differentiates multipliers by type of coverage (charter and guide), original LTV, amortization term, and coverage percent.

TABLE 15—CE MULTIPLIERS FOR NEW ORIGINATIONS, PERFORMING SEASONED LOANS, AND RPLS WHEN MI IS NON-CANCELLABLE

Product/coverage type	Coverage category	CE multiplier
15/20 Year Amortizing Loan with Guide-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.846
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.701
	90% < OLTV <= 95% and MI Coverage Percent = 25%	0.408
	95% < OLTV <= 97% and MI Coverage Percent = 35%	0.226
	OLTV > 97% and MI Coverage Percent = 35%	0.184
30 Year Amortizing Loan with Guide-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 12%	0.706
	85% < OLTV <= 90% and MI Coverage Percent = 25%	0.407
	90% < OLTV <= 95% and MI Coverage Percent = 30%	0.312
	95% < OLTV <= 97% and MI Coverage Percent = 35%	0.230
	OLTV > 97% and MI Coverage Percent = 35%	0.188
15/20 Year Amortizing Loan with Charter-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.846
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.701
	90% < OLTV <= 95% and MI Coverage Percent = 16%	0.612
	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.570
	OLTV > 97% and MI Coverage Percent = 20%	0.535
30 Year Amortizing Loan with Charter-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.850
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.713
	90% < OLTV <= 95% and MI Coverage Percent = 16%	0.627
	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.590
	OLTV > 97% and MI Coverage Percent = 20%	0.558

The proposed rule would have three tables for cancellable MI. The first cancellable MI table contains proposed CE multipliers for the new originations loan segment, the performing seasoned loans segment, and the non-modified RPL loan segment. The table differentiates multipliers by type of coverage (charter-level and guide-level), original LTV, coverage percent, amortization term, and loan age.

BILLING CODE 8070–01–P

Table 16: CE Multipliers for New Originations, Performing Seasoned, and Non-Modified RPLs when MI is Cancellable

BILLING CODE 8070–01–C

The final MI table contains proposed CE multipliers for the NPL loan segment. MI on delinquent loans cannot be cancelled; therefore, there is no differentiation between cancellable and non-cancellable MI for the NPL loan segment. The table differentiates multipliers by type of coverage (charter-level and guide-level), original LTV, amortization term, and coverage percent.

TABLE 19—CE MULTIPLIERS FOR NPLS

	OLTV > 97% and MI Coverage Percent = 20%	0.663
30 Year Amortizing Loan with Charter-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.902
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.835
	90% < OLTV <= 95% and MI Coverage Percent = 16%	0.787
	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.765
	OLTV > 97% and MI Coverage Percent = 20%	0.760

The proposed CE multipliers reflect the average of the Enterprises' estimates. The Enterprises, however, would not necessarily apply the CE multipliers in isolation, but would first adjust the multipliers to account for the probability that a counterparty may not fully meet its payment obligations. The following section describes the proposed approach for adjusting CE multipliers for counterparty risk.

Counterparty Credit Risk

Sharing loss with counterparties exposes the Enterprises to counterparty credit risk. To account for this exposure, the proposed rule would reduce the recognized benefits from credit enhancements to incorporate the risk that counterparties are unable to meet claim obligations. For this reason, the proposed rule would establish a counterparty haircut multiplier (CP multiplier) to the CE benefit. The CP haircut multiplier would take values from zero to one. A value of zero, the smallest haircut, would imply a counterparty will fully meet its claim obligations, while a value of one, the largest haircut, would imply a counterparty will not meet its claim obligations. A value between zero and one would imply a counterparty will meet a portion of its claim obligations.

The CP haircut multiplier would depend on a number of factors that reflect counterparty credit risk. The two main factors are the creditworthiness of the counterparty and the counterparty's level of concentration in mortgage credit risk. The proposed rule would require the Enterprises to assign a counterparty rating using the rating scheme provided in Table 20. In assigning a rating, the Enterprises would assign the counterparty rating that most closely aligns to the assessment of the counterparty from its internal counterparty risk framework. Similarly, the proposed rule would require the Enterprises to utilize their counterparty risk management frameworks to assign each counterparty a rating of ''not high'' or ''high'' to reflect the counterparty's concentration in mortgage credit risk.

TABLE 20—COUNTERPARTY FINANCIAL STRENGTH RATINGS

Counterparty rating	Description
1	The counterparty is exceptionally strong financially. The counterparty is expected to meet its obligations under foreseeable adverse events.
2	The counterparty is very strong financially. There is negligible risk the counterparty may not be able to meet all of its obligations under foreseeable adverse events.
3	The counterparty is strong financially. There is a slight risk the counterparty may not be able to meet all of its obligations under foreseeable adverse events.
4	The counterparty is financially adequate. Foreseeable adverse events will have a greater impact on ’4’ rated counterparties than higher rated counterparties.
5	The counterparty is financially questionable. The counterparty may not meet its obligations under foreseeable adverse events.
6	The counterparty is financially weak. The counterparty is not expected to meet its obligations under foreseeable adverse events.
7	The counterparty is financially extremely weak. The counterparty's ability to meet its obligations is questionable.
8	The counterparty is in default on an obligation or is under regulatory supervision.

During the most recent financial crisis, three out of seven mortgage insurance companies were placed in run-off by their state regulators, and payments on the Enterprises' claims were deferred by the state regulators. This posed a serious counterparty risk and financial losses for the Enterprises. More generally, the crisis highlighted that counterparty risk can be amplified when the counterparty's credit exposure is highly correlated with the Enterprises' credit exposure. This amplification of counterparty risk due to the correlation between counterparties' credit exposures is referred to as wrong-way risk. Counterparties whose main lines of business are highly concentrated in mortgage credit risk have a higher probability to default on payment obligations when the mortgage default rate is high. Therefore, counterparties with higher levels of mortgage credit risk concentration have higher counterparty risk relative to diversified counterparties. The proposed rule would assign larger haircuts to counterparties with higher levels of mortgage credit risk concentration relative to diversified counterparties. The Enterprises would assess the level of mortgage risk concentration for each individual counterparty to determine whether the insurer is well diversified or whether it has a high concentration risk.

To calculate the CP haircut, the proposed rule would use a modified version of the Basel Advanced Internal Ratings Based (IRB) approach. The modified version leverages the IRB approach to account for the creditworthiness of the counterparty but makes changes to reflect the level of mortgage credit risk concentration. The Basel IRB framework provides the ability to differentiate haircuts between counterparties with different levels of risk. The proposed rule would augment the IRB approach to capture risk across counterparties. In this way, the proposed adjustment would help capture wrong-way risk between the Enterprises and their counterparties.

In particular, the proposed approach calculates the counterparty haircut by multiplying stress loss given default by the probability of default and a maturity adjustment for the asset:

$$CP\ Haircut = LGD_{\text{stress}} * PD_{\text{stress}} * MA$$

where LGD_{stress} denotes stress loss given default, PD_{stress} is stress default probability, and MA is maturity adjustment. MA is calculated as follows:

$$MA = \left(\frac{1+(M-2.5)*b}{1-1.5*b}\right),$$

where

$$b = [0.11852 - 0.05478 * \ln(PD)]^2.$$

$\text{PD}_{\text{stress}}$ is a function of expected probability of default *PD,* asset value correlation ρ, and an asset value correlation multiplier (*AVCM*). $\text{PD}_{\text{stress}}$ is calculated as follows:

$$PD_{stress} = \left[N\left(\left(\frac{1}{\sqrt{1-AVCM*\rho}}\right) * G(PD) - \left(\sqrt{\frac{AVCM*\rho}{1-AVCM*\rho}}\right) * G(SCI)\right)\right],$$

$$\rho = \left[0.12 * \left(\frac{1-\exp(-50*PD)}{1-\exp(-50)}\right) + 0.24 * \left(1 - \frac{1-\exp(-50*PD)}{1-\exp(-50)}\right)\right]$$

where *SCI* is supervisory confidence interval, N(.) is the standard normal distribution, and G(.) is the inverse standard normal distribution.

The following table highlights the parameterization of the proposed approach.

TABLE 21—PARAMETERIZATION OF THE SINGLE-FAMILY COUNTERPARTY HAIRCUT MULTIPLIERS

Parameters	Proposed values
$\text{LGD}_{\text{Stress}}$	45%.
SCI	99.9%.
Correlation function (ρ)	Basel (PD).
AVCM for High level of Mortgage Concentration Risk	175%.
AVCM for Not High level of Mortgage Concentration Risk	125%.
Maturity 30yr (M)	5.
Maturity 15/20yr (M)	3.5.
NPL Maturity (M)	1.5.

From the parameters table, stress loss given default (LGD) is calibrated to 45 percent according to the historic average stress severity rates. The maturity adjustment is calibrated to 5 years for 30-year products and to 3.5 years for 15- to 20-year products to approximately reflect the average life of the assets. The expected probability of default (PD) is calculated using a historical 1-year PD matrix for all financial institutions.

As mentioned earlier, counterparties with a lower concentration of mortgage credit risk and therefore a lower potential for wrong-way risk would be afforded a lower haircut relative to the counterparties with higher concentrations of mortgage credit risk. This difference is captured through the asset valuation correlation multiplier, AVCM. An AVCM of 1.75 is assigned to counterparties with high exposure to mortgage credit risk and 1.25 is assigned to diversified counterparties. The parameters of the Basel IRB formula, including the AVCM, were augmented to best fit the internal counterparty credit risk haircuts developed by the Enterprises. This method of accounting for wrong-way risk is transparent and parsimonious.

The NPL loan segment represents a different level of counterparty risk relative to the performing loans segment. Unlike performing loans, the Enterprises expect to submit claims for non-preforming loans in the near future. The proposed rule would reduce Basel's effective maturity from 5 (or 3.5 for 15/20Yr) to 1.5 for all loans in the NPL loan segment. The reduced effective maturity would lower counterparty haircuts on loans in the NPL loan segment.

The proposed rule would use the following look-up table to determine the counterparty risk haircut multiplier.

TABLE 22—SINGLE-FAMILY COUNTERPARTY RISK HAIRCUT (CP HAIRCUT) MULTIPLIERS BY RATING, MORTGAGE CONCENTRATION RISK, SEGMENT, AND PRODUCT

Counterparty rating (%)	CP haircut					
	Mortgage concentration risk: Not high			Mortgage concentration risk: High		
	New originations, performing seasoned, and re-performing loans		Non-performing loans (%)	New originations, performing seasoned, and re-performing loans		Non-performing loans (%)
	30 Yr product (%)	20/15 Yr product (%)		30 Yr product (%)	20/15 Yr product (%)	
1	1.8	1.3	0.6	2.8	2.0	0.9
2	4.5	3.5	2.0	7.3	5.6	3.2
3	5.2	4.0	2.4	8.3	6.4	3.9
4	11.4	9.5	6.9	17.2	14.3	10.4
5	14.8	12.7	9.9	20.9	18.0	14.0
6	21.2	19.1	16.4	26.8	24.2	20.8
7	40.0	38.2	35.7	43.7	41.7	39.0
8	47.6	46.6	45.3	47.6	46.6	45.3

Net Credit Risk Capital Requirement for Single-Family Whole Loans and Guarantees

The proposed rule would use the following formula to calculate the net credit risk capital requirement for single-family whole loans and guarantees with loan-level credit enhancement, taking into account the credit enhancement benefit adjusted for the counterparty haircut:

Net Credit Risk Capital = Gross Credit Risk Capital * (1 − (1 − CE Multiplier) * (1 − CP Haircut Multiplier)).

For single-family whole loans and guarantees without loan-level credit enhancements, the net credit risk capital requirement would equal the gross credit risk capital requirement.

Question 6: FHFA is soliciting comments on the proposed framework for calculating credit risk capital requirements for single-family whole loans and guarantees, including the loan segments, base grids, and risk multipliers. What modifications should FHFA consider and why?

Question 7: FHFA is soliciting comments on the proposed use of separate single-family credit risk capital grids for new originations and performing seasoned loans. The proposed new originations grid has a unique requirement for loans with an OLTV of 80 percent due to the volume of such loans, but this could lead to increases in capital requirements for loans originated with an OLTV between 75 percent and 80 percent when those loans season. Should FHFA consider combining the single-family new originations and performing seasoned loan grids? What other modifications should FHFA consider and why?

Enterprise- and Ginnie Mae-Guaranteed Single-Family Mortgage-Backed Securities

There is no credit risk capital requirement in the proposed rule for single-family mortgage-backed securities (MBS) held in portfolio that were issued and guaranteed by an Enterprise or Ginnie Mae, and collateralized mortgage obligations (CMOs) held in portfolio that are collateralized by Enterprise or Ginnie Mae whole loans or securities. Ginnie Mae securities are backed by the U.S. government and therefore do not have credit risk. For MBS and CMOs issued by an Enterprise and later purchased by the same Enterprise for its portfolio, the credit risk is already reflected in the credit risk capital requirement on the underlying single-family whole loans and guarantees (section II.C.4.a). For MBS and CMOs held by an Enterprise that were issued by the other Enterprise, there is counterparty risk. However, these holdings are typically small and, for reasons of simplicity, the proposed rule does not include a capital requirement for this exposure.

Question 8: Should single-family MBS and CMOs held by an Enterprise that were issued by the other Enterprise be subject to a counterparty haircut to reflect counterparty risk?

b. Credit Risk Transfer

This section corresponds to Proposed Rule §§ 1240.14 through 1240.16.

Overview

The Enterprises systematically reduce the credit risk on their single-family books of business by transferring and sharing risk beyond loan-level credit enhancements through single-family credit risk transfers (CRTs). These CRTs include capital markets and insurance/reinsurance transactions, among others. In the proposed rule, single-family capital relief for the Enterprises would be equal to the reduction in credit risk capital from transferring all or part of a credit risk exposure that remains after considering loan-level credit enhancements. For a given single-family CRT, the proposed rule would restrict capital relief to be no greater than total net credit risk capital requirements on all single-family whole loans and guarantees underlying the CRT (or belonging to the reference pool underlying the CRT). Therefore, the single-family operational risk capital requirement and the single-family going-concern buffer would not contribute to capital relief.

The proposed rule would require the Enterprises to calculate capital relief on every CRT. If a CRT has multiple pool groups, the requirement would apply separately to each pool group. The proposed rule would then require each Enterprise to calculate total capital relief as the sum of capital relief across all its CRTs, including across all pool groups.

This section provides (i) a background on single-family CRTs, (ii) types of single-family CRTs offered by the Enterprises, (iii) the proposed rule's approach for CRT capital relief, (iv) alternative approaches considered, and (v) estimated effects of the proposed rule's approach.

Background

CRT transactions provide credit protection beyond that provided by loan-level credit enhancements. CRTs can be viewed as the Enterprise paying a portion of the guarantee fee as a cost of transferring credit risk to private sector investors. To date, single-family

CRTs have been focused on transferring expected and unexpected credit risk. This amounts to the Enterprises obtaining the equivalent of insurance to cover their potential credit losses. The proposed rule proposes an approach to measuring capital relief on CRT transactions from the transfer of unexpected losses while also accounting for potential counterparty credit risks where appropriate.

Types of Single-Family CRTs

The Enterprises have developed a variety of single-family CRTs. The types of transactions include structured debt issuances known as Structured Agency Credit Risk (STACR) for Freddie Mac and Connecticut Avenue Securities (CAS) for Fannie Mae, insurance/reinsurance transactions, front-end lender risk sharing transactions, and senior-subordinate securities.

Enterprise Debt Issuance

The STACR and CAS securities account for the majority of single-family CRTs to date. These securities are issued as Enterprise debt and do not constitute the sale of mortgage loans or their cash flows. Instead, STACR and CAS are considered to be synthetic notes or derivatives because their cash flows track to the credit risk performance of a notional reference pool of mortgage loans. For the STACR and CAS transactions, the Enterprises receive the proceeds of the note issuance at the time of sale to investors. The Enterprises pay interest to investors on a monthly basis and allocate principal to investors based on the repayment and credit performance of the loans in the underlying reference pool. Investors ultimately receive a return of their principal, less any covered credit losses. The debt transactions are fully collateralized since investors pay for the notes in full. Thus, the Enterprises do not bear any counterparty credit risk on debt transactions.

Insurance or Reinsurance

Insurance or reinsurance transactions that are over and above loan-level mortgage insurance are considered CRTs. To date, the insurance and reinsurance CRTs have focused primarily on pool-level insurance transactions. In contrast to loan-level insurance structures such as MI, pool-level insurance covers an entire pool of hundreds or thousands of loans. Pool insurance transactions are typically structured with an aggregated loss amount. The Enterprises, as policy holders, typically retain some portion (or all) of the first loss. The cost of pool-level insurance is generally paid by the Enterprise, not the lender or borrower. In general, because the insurance transactions are partly collateralized the Enterprises may bear some counterparty credit risk.

Reinsurance companies have been the primary provider of pool-level insurance for the Enterprises' CRTs.[39] Fannie Mae's reinsurance risk transfer transactions are known as Credit Insurance Risk Transfer (CIRT), and Freddie Mac's reinsurance transactions are known as Agency Credit Insurance Structure (ACIS). One advantage of conducting transactions with reinsurers is that they are generally diversified in their risk exposures. This may result in lower counterparty risk because their books of business risk should be less correlated with the Enterprise's book of business risk and thus may be better able to withstand a home price stress cycle than a monoline mortgage insurer. The Enterprises further reduce counterparty risk in pool-level transactions through collateral requirements.

Front-End Lender Risk Sharing Transactions

Front-end (or upfront) lender risk sharing transactions include various methods of CRT where an originating lender or aggregator retains a portion of the credit risk associated with the loans that they sell to or service for the Enterprises. In this case, the credit risk sharing arrangement is entered into prior to the lender delivering the loans to the Enterprise. In exchange, the lender is compensated for the risk. In these transactions, the Enterprises bear some counterparty credit risk. However, the Enterprise typically requires some form of collateral or other arrangement to offset the counterparty risk inherent in the front-end transaction. Front-end lender risk sharing transactions are generally described as lender recourse or indemnification arrangements, or collateralized recourse. One benefit of the lender recourse or indemnification structure in which the credit risk is retained by the lender is that it aligns the interest of the lender and servicer with the credit risk purchaser and the Enterprise.

Senior-Subordinate Securitization

In a senior-subordinate (senior-sub) securitization, the Enterprise sells a pool of mortgages to a trust that securitizes cash flows from the pool into several tranches of bonds, similar to private label security transactions. A tranche refers to all securitization exposures associated with a securitization that have the same seniority. The subordinated bonds, also called mezzanine and first-loss bonds, provide the credit protection for the senior bond. Unlike STACR and CAS, the bonds created in a senior-sub transaction are mortgage-backed securities, not synthetic securities. In addition, unlike typical MBS issued by the Enterprises, only the senior tranche is credit-guaranteed by the Enterprise.

Proposed Approach for Single-Family CRT Capital Relief

The proposed rule would require that the Enterprises calculate capital relief using a step-by-step approach. To identify capital relief, the proposed rule would combine credit risk capital and expected losses on the underlying single-family whole loans and guarantees, tranche structure, ownership, timing of coverage, and counterparty credit risk. In general, the proposed rule would require five steps when calculating capital relief.

In the first step, the Enterprises would distribute credit risk capital on the underlying single-family whole loans and guarantees to the tranches of the CRT independent of tranche ownership, while controlling for expected losses, such that the riskiest, most junior tranches would be allocated capital before the most senior tranches. Under the proposed approach, an Enterprise would hold the same level of capital if the Enterprise held every tranche of its risk transfer vehicle or held the underlying assets in portfolio. The total credit risk capital across all tranches of the CRT would equal credit risk capital on the underlying single-family whole loans and guarantees.

In the second step, the Enterprises would calculate capital relief accounting for tranche ownership. The proposed approach would provide the Enterprises capital relief from transferring all or part of a credit risk exposure. For each tranche or exposure, the Enterprises would identify the portion of the tranche owned by private investors or covered by a loss sharing agreement. Then, in general, the Enterprises would calculate the capital relief as the product of the credit risk

[39] Many reinsurance companies do not wish to be or are not licensed to write polices directly to non-insurance companies, such as the Enterprises. Thus, although it is the reinsurance company that ultimately provides all of the risk capital, if the reinsurer is not writing the policy directly to the Enterprise, an insurance company must stand in the middle of the transaction. In many cases, this insurance company is a "protected cell," that is, a vehicle established to write insurance policies solely for the insured and to transfer that risk to reinsurers. The cell is used exclusively for Enterprise CRT purposes. The protected cell acts purely as a pass-through entity and takes no credit risk itself.

capital allocated to the exposure and the portion of the tranche owned by private investors or covered by a loss sharing agreement.

However, this initial calculation of capital relief must be adjusted to account for loss timing and counterparty credit risk. In particular, CRT coverage can expire before the underlying loans mature. Also, loss sharing agreements may be subject to counterparty credit risk. Capital relief afforded by credit risk transfers would be overstated absent such an adjustment.

Therefore in the third step, for each tranche, capital relief would be lowered by a loss timing factor that accounts for the timing of coverage. The loss timing factor would address the mismatch between lifetime single-family losses on the whole loans and guarantees underlying the CRT and the term of coverage on the CRT.

In the fourth step, for loss sharing agreements, the Enterprises would apply haircuts to previously calculated capital relief to adjust for counterparty credit risk. In particular, the Enterprises would consider the credit worthiness of each counterparty when assessing the contribution of loss sharing arrangements such that the capital relief is lower for less credit worthy counterparties. At the same time, in the proposed approach, collateral posted by a counterparty would be considered when determining the counterparty credit risk, as posted collateral would at least partially offset the effect of the counterparty exposure.

Lastly, the Enterprises would calculate total capital relief by adding up capital relief for each tranche in the CRT. Further, in the event that the CRT has multiple pool groups, then the proposed rule would calculate each group's capital relief separately.

Overall, the proposed approach would afford relatively higher levels of capital relief to the riskier, more junior tranches of a CRT that are the first to absorb unexpected losses, and relatively low levels of capital relief to the most senior tranches. The proposed approach would also afford greater capital relief for transactions that provide coverage (i) on a higher percentage of unexpected losses, (ii) for a longer period of time, and (iii) with lower levels of counterparty credit risk.

For comparison, the proposed approach is analogous to the Simplified Supervisory Formula Approach (''SSFA'') under the banking regulators' capital rules applicable to banks, savings associations, and their holding companies.[40] However, the proposed approach deviates from SSFA in that it: (i) Provides for a more refined view of risk differentiation across transactions by accounting for differences in maturities between the CRT and its underlying whole loans and guarantees, and (ii) does not discourage CRT transactions by elevating aggregate post-transaction risk-based capital requirements above risk-based capital requirements on the underlying whole loans and guarantees. In particular, the SSFA requires more capital on a transaction-wide basis than would be required if the underlying assets had not been part of a risk transfer to account for the complexity introduced by the securitization structure. Under SSFA, if an Enterprise held every tranche of a CRT, its overall capital requirement would be greater than if the Enterprise held the underlying assets in portfolio. In order to avoid creating incentives that would discourage the Enterprises from selling tranches as part of their credit risk transfer programs, under the proposed rule, an Enterprise would be required to hold the same level of capital whether the Enterprise held every tranche of its CRT or whether the Enterprise held the underlying assets in portfolio.

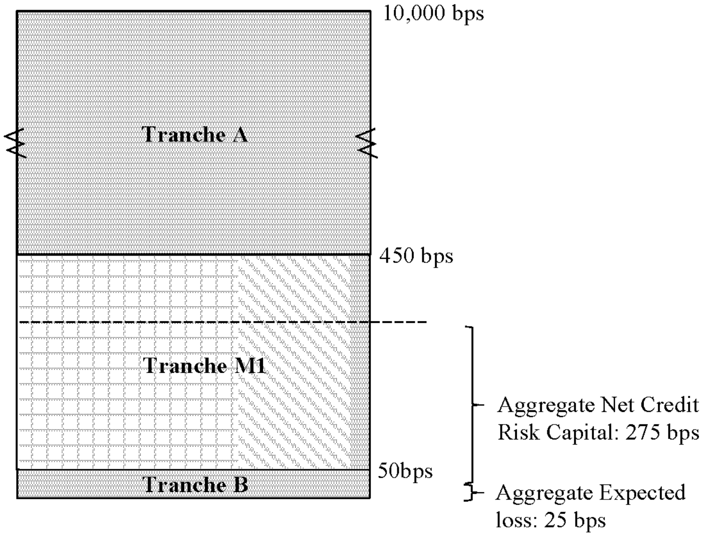
Single-Family CRT Example

The proposed rule would require each Enterprise to calculate capital relief using a five-step approach. The following example provides an illustration of the five steps. Consider the following inputs from an illustrative CRT (see Figure 1):

- $1,000 million in UPB of performing 30-year fixed rate single-family whole loans and guarantees with original LTVs greater than 60 percent and less than or equal to 80 percent;
- CRT coverage term of 10 years;
- Three tranches—B, M1, and A—where tranche B attaches at 0 bps and detaches at 50 bps, tranche M1 attaches at 50 bps and detaches at 450 bps, and tranche A attaches at 450 bps and detaches at 10,000 bps;
- Tranches B and A are retained by the Enterprise, and ownership of tranche M1 is split between capital markets (60 percent), a reinsurer (35 percent), and the Enterprise (5 percent);
- An aggregate net credit risk capital requirement on the single-family whole loans and guarantees underlying the CRT of 275 bps;
- Aggregate expected losses on the single-family whole loans and guarantees underlying the CRT of 25 bps; and
- The reinsurer posts $2.8 million in collateral, has a counterparty financial strength rating of 3, and does not have a high level of mortgage concentration risk.

[40] *See* 12 CFR 3.211 (OCC); 12 CFR 217.43 (Federal Reserve Board); 12 CFR 324.43 (FDIC).

Figure 1: Single-Family CRT Example



10,000 bps
Tranche A
450 bps
Tranche M1
Aggregate Net Credit Risk Capital: 275 bps
50bps
Tranche B
Aggregate Expected loss: 25 bps

Ownership:
Tranche A: 100% retained (in solid gray).
Tranche M1: 60% to capital markets (gray grid lines), 35% reinsured (in gray diagonal lines), and 5% retained (in solid gray).
Tranche B: 100% retained (in solid gray).

In the first step, the Enterprises would distribute the aggregate net credit risk capital to the tranches of the CRT independent of tranche ownership, while controlling for aggregate expected losses. For the illustrative CRT, the Enterprise would allocate aggregate net credit risk capital and expected losses to the riskiest, most junior tranche (tranche B) before the mezzanine tranche (tranche M1) and the most senior tranche (tranche A).

For the illustrative CRT, the Enterprise would allocate aggregate net credit risk capital and expected losses such that the riskiest, most junior tranche (tranche B) would receive its allocation before the mezzanine tranche (tranche M1) and the most senior tranche (tranche A). In particular, the Enterprise would first distribute aggregate expected losses (25 bps) and 25 bps of aggregate net credit risk capital to tranche B. The Enterprise would then distribute the remaining aggregate credit risk capital (250 bps) to tranche M1. As tranche A's attachment point exceeds the sum of aggregate expected losses and aggregate net credit risk capital, the Enterprise would not allocate net credit risk capital to tranche A.

In the second step, the Enterprises would calculate capital relief accounting for tranche ownership. This approach would provide the Enterprise capital relief from transferring all or part of a credit risk exposure. For the illustrative CRT, the Enterprise would only receive capital relief from 95 percent of tranche M1 since the Enterprise retains all of tranches A and B and retains only 5 percent of tranche M1. The Enterprise would calculate the capital relief on tranche M1 as the product of the allocated aggregate net credit risk capital (250 bps) and sum of the portion of the tranche owned by private investors (60 percent) and covered by a reinsurer (35 percent). Thus, the Enterprise would calculate initial capital relief of 237.5 bps or the product of 250 bps and 95 percent.

However, this initial calculation of capital relief must be adjusted to account for loss timing and counterparty credit risk. Therefore, in the third step the proposed rule lowers initial capital relief by a loss timing factor that accounts for the timing of coverage. The loss timing factor addresses the mismatch between lifetime losses on the 30-year fixed-rate single-family whole loans and guarantees underlying the illustrative CRT and the CRT's coverage of 10 years. The loss timing factor for the illustrative CRT with 10 years of coverage and backed by 30-year fixed-rate single-family whole loans and guarantees with original LTVs greater than 60 percent and less than or equal to 80 percent is 88 percent. Therefore, the Enterprise would lower the capital relief to 209 bps by multiplying together the loss timing factor (88 percent) and initial capital relief (237.5 bps).

In the fourth step, the Enterprise would apply haircuts to previously calculated capital relief to adjust for counterparty credit risk from the reinsurance arrangement. In practice, the Enterprise would identify the reinsurer's uncollateralized exposure and apply a haircut. For the illustrative CRT, the Enterprise would first determine the reinsurer's uncollateralized exposure by subtracting the reinsurer's collateral amount ($2.8 million) from the reinsurer's exposure as follows:

$$\$1{,}000\ million * \left(\frac{35\%}{60\%+35\%}\right) * \left(\frac{209\ bps}{10{,}000}\right) - \$2.8\ million = \$4.9\ million$$

The Enterprise would then consider the credit worthiness of the reinsurer and apply a haircut. For the illustrative CRT, the reinsurer has a counterparty financial strength rating of 3 and does not have a high level of mortgage concentration risk. Further, the single-family whole loans and guarantees backing the illustrative CRT are performing and have a 30-year term. Thus, the CP Haircut from Table 22 is 5.2 percent. The Enterprise would calculate counterparty credit risk from the reinsurer as the product of the CP Haircut and the reinsurer's uncollateralized exposure. The product would be converted into basis points as follows:

$$10{,}000 * \left(\frac{\$4.9\,million * 5.2\%}{\$1{,}000\,million}\right) = 2.5\ bps$$

Lastly, the Enterprise would calculate total capital relief by adding up capital relief for each tranche in the CRT and reducing capital relief by any counterparty credit risk capital. For the illustrative CRT, the Enterprise would calculate total capital relief at 206.5 bps or capital relief after adjusting for ownership and loss timing (209 bps) less counterparty credit risk (2.5 bps).

Seasoned Single-Family CRT Capital Relief

A seasoned single-family CRT differs from when it was newly-issued due to the changing risk profile on the whole loans and guarantees underlying the CRT. Therefore, under the proposed rule, the Enterprises would be required to re-calculate capital relief on their seasoned single-family CRT transactions with each submission of capital results.

For each seasoned single-family CRT, the proposed rule would require the Enterprises to update the data elements originally considered. In particular, the proposed rule would require the Enterprises to update credit risk capital and expected losses on the underlying whole loans and guarantees, tranche structure, ownership, and counterparty credit risk.

CRT Prepayments

The rate at which principal on a CRT's underlying loans is paid down (principal paydowns) affects the allocation of credit losses between the Enterprises and investors/reinsurers. Principal paydowns include regularly scheduled principal payments and unscheduled principal prepayments. In general, a CRT's tranches are paid down in the order of their seniority outlined in the CRT's transaction documents. For tranches with shared ownership, principal paydowns are allocated on a pro-rata basis. As CRT analysts have noted, under certain conditions unusually fast prepayments can erode the credit protection provided by the CRT by paying down the subordinate tranches and leave the Enterprises more vulnerable to credit losses. In particular, unexpectedly high prepayments can compromise the protection afforded by CRTs and reduce the CRT's benefit or capital relief.

FHFA reviewed the effect on capital relief of applying stressful prepayment and loan delinquency projections to recent CRTs. FHFA concluded that deal features, specifically triggers, mitigate the effects of fast prepayments by diverting unscheduled principal prepayments to the Enterprise-held senior tranche. For example, a minimum credit enhancement trigger redirects prepayments to the senior tranche when the senior credit enhancement falls below a pre-specified threshold. Similarly, a delinquency trigger diverts prepayments when the average monthly delinquency balance (*i.e.,* underlying single-family whole loans and guarantees that are 90 days or more delinquent, in foreclosure, bankruptcy, or REO) exceeds a pre-specified threshold.

In addition to triggers, FHFA considered three other possible approaches to address the impact of stressful CRT prepayments. First, FHFA considered whether it would be desirable to include language in the proposed rule requiring specific triggers in the Enterprises' CRT transactions. However, FHFA decided against such language because variations across transactions complicate the establishment of fixed triggers that could be prudently applied uniformly across deals. Further, mandating a fixed set of triggers could reduce innovation in managing principal paydowns. Moreover, FHFA has the authority to review CRT terms before issuance and therefore can ensure transactions include appropriate triggers. Second, FHFA considered using a simple multiplier to reduce the capital relief from CRTs. However, this would inadequately capture differences in collateral, subordination, and trigger structures between transactions. Finally, FHFA considered an approach that would define capital relief based on a weighted average of losses arising from averaging cash flows derived under multiple prepayment scenarios. However, FHFA decided that the complexity and opacity of this approach would be inconsistent with the overall goal of having simple and transparent credit risk capital requirements.

After considering these alternatives, FHFA believes that the proposed rule appropriately considers single-family CRT prepayments. However, FHFA is seeking public comment on CRT prepayments and is soliciting specific alternative approaches for addressing CRT prepayments in the proposed capital framework.

Question 9: FHFA is soliciting detailed proposals for a simple and transparent approach to reflect the impact of stressful prepayments on CRT capital relief. What modifications or alternatives should FHFA consider and why?

FHFA is soliciting comments on the capital relief treatment of single-family CRTs in the proposed rule. Providing capital relief for the Enterprises' credit risk transfer transactions is an aspect of the proposed rule that has received much consideration.

Credit risk transfer transactions reduce risk to taxpayers. Providing capital relief for CRTs, no matter what form the CRTs take, gives the Enterprises an incentive to transfer credit risk to third parties to reduce the risk the Enterprises pose to taxpayers. The Enterprises design their credit risk transfer transactions to protect against the risk that an investor might not have the funds to cover agreed-upon credit losses—often referred to as reimbursement risk—when such losses occur. The Enterprises use a number of different approaches to transfer credit risk, including transaction structures that are fully funded upfront and, therefore, have no reimbursement risk, and other transactions that require investors to partially or fully collateralize the investment to provide the Enterprises with assurance of available funds in the future. In addition, the credit risk protection provided by investors on fully funded CRT transactions is solely dedicated to absorbing credit risk and cannot be redirected for other uses. The Enterprises target loans that have the highest relative credit risk for CRT transactions, thereby providing a significant amount of credit risk protection.

While CRT transactions are designed to provide credit risk protection for the

Enterprises, this protection is not the same as the protection provided by capital. Because third parties assume the credit risk on the specific loans included in CRT reference pools, the credit protection for individual CRTs is not fungible to cover losses on other loans, whereas capital can be used to absorb losses at the portfolio level and is available to cover all loans.

In addition to the remaining reimbursement risk of certain CRT transactions, there is also the risk that loan prepayments could reduce the amount of credit risk protection able to be provided by investors. As discussed above, the Enterprises work to mitigate this prepayment risk by incorporating deal triggers into CRT transactions, but there remains risk that these triggers will not act as intended during a credit event. Additionally, the Enterprises' single-family CRTs have not been tested in a period of market stress because the programs started in 2013 and have expanded in a period of strong house price appreciation. Lastly, U.S. bank regulators have not given banks capital relief for credit risk transfers as FHFA has proposed to do in this rule for the Enterprises.

Question 10: Does the proposed rule's approach of providing capital relief for CRTs adequately capture the risk and benefits associated with the Enterprises' CRT transactions? Should FHFA consider modifications or alternatives to the proposed rule's approach of providing capital relief for the Enterprises' CRTs, and if so, what modifications or alternatives, and why?

Question 11: FHFA is soliciting comments on the proposed approaches for calculating CRT loss timing factors. Should the CRT loss timing factors be updated as the CRT ages? What modifications should FHFA consider and why?

c. Market Risk

This section corresponds to Proposed Rule §§ 1240.17 through 1240.18.

Single-Family Whole Loans and Guarantees

Single-family whole loans held in the Enterprises' portfolios have market risk from changes in value due to movements in interest rates and credit spreads. As the Enterprises currently hedge interest rate risk at the portfolio level, the market risk capital requirements in the proposed rule focus on spread risk.

The proposed rule would determine market risk capital requirements for single-family whole loans using both single point estimates and the Enterprises' internal models.

Single-Family Re-Performing and Non-Performing Whole Loans

The proposed rule would require an Enterprise to calculate market risk capital on single-family re-performing and non-performing whole loans using a single point estimate approach. The primary risk on these loans is credit risk and, in general, borrowers in these categories tend to have limited refinancing opportunities due to recent or current delinquencies. Therefore, re-performing and non-performing loans are relatively insensitive to prepayment risk, and FHFA believes the market risk profile of these loans would be sufficiently represented by a single point capital requirement.

The proposed rule would assign a single point estimate of 4.75 percent of the market value of assets for re-performing and non-performing whole loans. This proposal reflects the average of the Enterprises' internal model estimates.

New Originations and Performing Seasoned Loans

The proposed rule would require an Enterprise to calculate market risk capital on single-family new originations and performing seasoned whole loans using the internal models approach.

In general, the complexity of the market risk profile on newly originated and performing seasoned whole loans is amplified due to high prepayment sensitivity. In particular, prepayment risk on performing whole loans may vary significantly across amortization terms, vintages, and mortgage rates. The high prepayment sensitivity might suggest that more simplified approaches, such as the single point estimate approach, would not capture key risk drivers. Also, spread shocks may vary across a variety of single-family loan characteristics. Thus, the spread duration approach, which relies on a constant spread shock, may not capture key single-family market movements. An internal models approach, however, would allow the Enterprises to differentiate market risk across multiple risk characteristics such as amortization term, vintage, and mortgage rates. Further, the Enterprises could account for important market risk factors, such as updated spread shocks, to reflect market changes.

Enterprise- and Ginnie Mae-Guaranteed Single-Family Mortgage-Backed Securities

Enterprise and Ginnie Mae single-family MBS and CMOs held in the Enterprises' portfolios have market risk stemming from changes in value due to movements in interest rates and credit spreads. As discussed in Section II.C.4.c with regard to the market risk capital requirements for single-family whole loans, the Enterprises currently hedge interest rate risk at the portfolio level, and therefore the market risk capital requirements in the proposed rule focus on spread risk. In the proposed rule, the market risk capital requirement for Enterprise and Ginnie Mae single-family MBS and CMOs would be determined using the internal models approach and the Enterprises' internal models for market risk.

In general, the complexity of the market risk profile on single-family MBS and CMOs is amplified due to high prepayment sensitivity of the underlying collateral. Further, CMOs can often contain complex features and structures that alter prepayments across different tranches based on the CMO's structure. As a result, within this category of assets, spread durations may vary significantly across mortgage products, amortization terms, vintages and mortgage rates and tranches. The use of an Enterprise's internal models to calculate market risk capital requirements would allow the Enterprise to account for important market risk factors that affect spreads and spread durations.

Notably, capital results that rely on internal model calculations can be opaque and result in different capital requirements across Enterprises for the same or similar exposures. Hence, the proposed rule would rely on an Enterprise's internal models solely only when the market risk complexity is sufficiently high that using a single point estimate or spread duration approach would inadequately represent the exposure's underlying single-family market risk. Further, internal models used in the determination of market risk capital requirements will be subject to ongoing supervisory review. Finally, an Enterprise's model risk management is subject to FHFA's 2013–07 Advisory Bulletin.

Question 12: FHFA is soliciting comments on the proposed approaches for calculating market risk capital requirements for single-family whole loans. What modifications should FHFA consider and why?

Question 13: FHFA is soliciting comments on the proposed approach for calculating market risk capital requirements for Enterprise and Ginnie Mae single-family MBS and CMOs. What modifications should FHFA consider and why?

d. Operational Risk

This section corresponds to Proposed Rule §§ 1240.19 through 1240.20.

As described in section II.C.2 above, the proposed rule would establish an operational risk capital requirement of 8 basis points for all assets. For single-family whole loans and guarantees, and Enterprise and Ginnie Mae single-family MBS and CMOs, the operational risk capital requirement would be 8 basis points of the unpaid principal balance of assets with credit risk or 8 basis points of the market value of assets with market risk.

e. Going-Concern Buffer

This section corresponds to Proposed Rule §§ 1240.21 through 1240.22.

As described in section II.C.3 above, the proposed rule would establish a going-concern buffer of 75 basis points for all assets. For single-family whole loans and guarantees, and Enterprise and Ginnie Mae single-family MBS and CMOs, the going-concern buffer would be 75 basis points of the unpaid principal balance of assets with credit risk or 75 basis points of the market value of assets with market risk.

f. Impact

Credit Risk Transferred	(13.5)		
Post-CRT Net Credit Risk	77.7	4,657	167

* Excludes both Enterprises' retained portfolio holdings of MBS guaranteed by the other Enterprise, and Ginnie Mae MBS.

5. Private-Label Securities

This section corresponds to Proposed Rule §§ 1240.24 through 1240.29.

The Enterprises have exposure to residential private-label securities (PLS) in that they hold PLS in portfolio as investments and guarantee PLS that have been re-securitized by an Enterprise (PLS wraps). The proposed rule would establish risk-based capital requirements for the credit risk associated with private-label securities, including PLS wraps, and the market risk associated with private-label securities with market risk exposure. The risk-based capital requirement for PLS and PLS wraps would also include a risk-invariant operational risk capital requirement and a going-concern buffer.

Credit Risk

The proposed rule would use the SSFA methodology to determine the credit risk capital requirement for private-label securities with credit risk exposure in a manner based upon how banks use the SSFA to determine the capital requirements for securitized assets. For each private-label security, the proposed rule would set forth a minimum risk-based capital requirement as provided in the SSFA methodology, which would be adjusted based upon SSFA methodology to account for the performance of the underlying collateral and the level of subordination. The SSFA formulas would impose high capital requirements on subordinated risky tranches of a securitization relative to more senior positions that are less subject to credit losses.

Defining the PLS capital requirements using the SSFA methodology provides two advantages. First, the SSFA is a relatively simple and transparent approach to calculate private-label securities capital requirements. Second, using the SSFA methodology would create consistency in capital calculations between the Enterprises and private industry, as the banking agencies apply the SSFA to banking institutions subject to their jurisdiction. While there are shortcomings associated with using the SSFA methodology, the relatively high data demands associated with alternative loan-level approaches, along with the Enterprises' relatively limited amount of PLS holdings, lead

FHFA to believe that the straightforward SSFA methodology would be appropriate for determining credit risk capital requirements for PLS and PLS wraps.

Market Risk

Because PLS wraps do not expose the Enterprises to market risk, PLS wraps would have a zero market risk capital requirement. For each private-label security with market risk exposure, the proposed rule would define market risk capital only with respect to spread risk, namely a loss in value of an asset relative to a risk free or funding benchmark due to changes in perceptions of performance or liquidity. Absent hedging, changes in interest rates would also have a direct effect on the value of private label securities. However, the Enterprises make extensive use of callable debt and derivatives to hedge interest rate risk. Therefore, in the proposed rule, market risk would affect the capital requirements for private-label securities only through changes in spreads.

In particular, the market risk capital requirement for PLS would be defined as the product of a change in the spread of the private-label security (spread shock) and the sensitivity of a private-label security's expected price to changes in the private-label security's spread (spread duration). The constant spread shock would be set at 265 basis points, reflecting estimates provided to FHFA by the Enterprises, while the Enterprises would use their own internal approaches to estimate the spread duration for each PLS in order to account for variation in spread durations across private-label securities. Finally, the product of the PLS market risk capital requirement in basis points and the market value of a private-label security would yield the PLS market risk capital requirement in dollars. Internal models used in the determination of market risk capital requirements would be subject to ongoing supervisory review.

Operational Risk

As described in section II.C.2 above, the proposed rule would require the Enterprises to hold an operational risk capital requirement of 8 bps for all assets. For private label securities, the operational risk capital requirement would be 8 bps of the securities' market value.

Going-Concern Buffer

As described in section II.C.3 above, the proposed rule would require the Enterprises to hold a going-concern buffer of 75 bps for all assets. For private label securities, the going-concern buffer would be 75 bps of the securities' market value.

Impact

TABLE 25—FANNIE MAE AND FREDDIE MAC COMBINED ESTIMATED RISK-BASED CAPITAL REQUIREMENTS FOR PRIVATE-LABEL SECURITIES AS OF SEPTEMBER 30, 2017

	Capital requirement		
	$billions	bps	Share (%)
Credit Risk	$2.2	1,502	64
Market Risk	1.1	767	33
Going-Concern Buffer	0.1	60	3
Operational Risk	0.01	6	0
Total Capital Requirement	3.4	2,336	100
Total UPB, $billions	14.4		

Question 14: FHFA is soliciting comments on the proposed risk-based capital requirements for private-label securities. What modifications should FHFA consider and why?

6. Multifamily Whole Loans, Guarantees, and Related Securities

This section corresponds to Proposed Rule §§ 1240.31 through 1240.45.

Overview

The proposed rule would establish risk-based capital requirements for the Enterprises' multifamily businesses. It is important to specify separate multifamily capital requirements in order to capture the unique nature of the multifamily lending business and its particular risk drivers. A typical multifamily loan, including those packaged together into mortgage-backed securities (MBS), is roughly $10 million, requires a 10-year balloon payment, and includes a 30-year amortization period. In addition, multifamily loans finance the acquisition and operation of commercial property collateral, as opposed to single-family dwellings. Multifamily properties are typically apartment buildings owned by real estate investors who rent the apartment units expecting to realize a profit after paying property operating and financing expenses.

The proposed rule would apply to multifamily whole loans, guarantees, and related securities held for investment. Multifamily whole loans are those that the Enterprises keep in their portfolios after acquisition. Multifamily guarantees are guarantees provided by the Enterprises of the timely receipt of payments to investors in mortgage-backed securities that have been issued by the Enterprises or other security issuers and are backed by previously acquired multifamily whole loans. Except in cases where the Enterprises transfer credit risk to third-party private investors, the Enterprises retain the credit risk from whole loans and guarantees. The Enterprises also retain market risk on whole loans held in portfolio and loans that they retain but intend to sell at a later date.

To implement the proposed capital requirements, the Enterprises would use a set of multifamily grids and risk multipliers to calculate credit risk capital, as well as a collection of straightforward formulas to calculate market risk capital, operational risk capital, and a going-concern buffer.

The proposed rule would first establish a framework through which the Enterprises would determine their gross multifamily credit risk capital requirements. The proposed methodology is simple and transparent, relying on a set of look-up tables (grids and risk multipliers) that take into account several important loan characteristics including debt-service-coverage ratio (DSCR), loan-to-value ratio (LTV), payment performance, loan term, interest-only (IO), loan size, and special products, among others.

The proposed grid and multiplier framework is consistent with existing financial regulatory regimes and would thereby facilitate comparison and examination of the Enterprises' risk-based capital requirements. FHFA believes that this straightforward and transparent approach, as opposed to one involving a complex set of credit models and econometric equations, would provide sufficient risk differentiation across the Enterprises' different types of multifamily business exposures without placing an undue compliance burden on the Enterprises.

The proposed rule would then provide a mechanism for the Enterprises to calculate multifamily capital relief by reducing gross credit risk capital requirements based on the amount of loss shared or risk transferred to other parties. The proposed CRT calculation would include a capital requirement for multifamily counterparty credit risk stemming from contractual arrangements with lenders, re-insurers, and other counterparties with which the Enterprises engage. In doing so, the rule would account for differences in the Enterprises' multifamily business models.

The proposed rule would establish market risk capital requirements for multifamily whole loans using the spread duration approach. For multifamily securities held for investment, the parameters would apply to two asset types: Whole loans and Enterprise—and Ginnie Mae-issued mortgage-backed securities (MBS).

In addition, the proposed rule would establish an operational risk capital requirement for the Enterprises' multifamily businesses that is invariant to risk. The proposed rule would base the operational risk capital requirement on the Basel Basic Indicator Approach, which accounts for gross income and assets by product line.

Lastly, the proposed rule would establish a going-concern buffer for the Enterprises' multifamily businesses that is invariant to risk. The purpose of the going-concern buffer is to allow the Enterprises, in this case as it pertains to their multifamily businesses, to remain as functioning entities during and after a period of severe financial distress.

Multifamily Business Models

The proposed rule would apply to both Enterprises equally. However, when appropriate, the proposed rule would account for differences in the Enterprises' multifamily business models. These differences are evident, for example, when considering certain elements of the proposed rule related to credit risk transfer.

As of late 2017, Fannie Mae's multifamily business relied on the Delegated Underwriting and Servicing (DUS) program. The DUS program is a loss-sharing program that seeks to facilitate the implementation of common underwriting and servicing guidelines across a defined group of multifamily lenders. The number of multifamily lenders in the DUS program has historically ranged between 25 and 30 since the program's inception in the late 1980s. Fannie Mae typically transfers about one-third of the credit risk to those lenders, while retaining the remaining two-thirds of the credit risk plus the counterparty risk associated with the DUS lender business relationship. The proportion of risk transferred to the lender may be more or less than one-third under a modified version of the typical DUS loss-sharing agreement.

In contrast, as of late 2017, Freddie Mac's multifamily model focused almost exclusively on structured, multi-class securitizations. While Freddie Mac has a number of securitization programs for multifamily loans, the most heavily used program is the K-Deal program. Under the K-Deal program, which started in 2009, Freddie Mac sells a portion of unguaranteed bonds (mezzanine and subordinate), generally 10 to 15 percent, to private market participants. These sales typically result in a transfer of a very high percentage of, if not all of, the credit risk. Freddie Mac generally assumes credit and market risk during the period between loan acquisition and securitization. In addition, after securitization, Freddie Mac generally retains a portion of the credit risk through ownership or guarantee of senior K-Deal tranches.

Despite these differences in the Enterprises' multifamily business models, the proposed rule would accommodate both Enterprises' current lending practices, and would not preclude them from adopting a version of one another's lending practices in the future. Specifically, the proposed rule would explicitly include variations in the estimation of required credit risk capital under each Enterprise's risk transfer approach, but would not limit an Enterprise to a particular approach.

Rule Framework and Implementation

The proposed rule would establish risk-based capital requirements for the Enterprises' multifamily businesses, including their whole loans and guarantees and securities held for investment. Using the proposed capital requirements, the Enterprises would calculate the minimum amount of funds needed to support their multifamily operations under stressed economic conditions, as discussed briefly above and in detail below. The proposed multifamily capital requirements would comprise the following components: Credit risk capital, including adjustments for credit risk transfers; market risk capital; operational risk capital; and a going-concern buffer. Each component is discussed individually below.

a. Credit Risk

This section corresponds to Proposed Rule §§ 1240.31 through 1240.36.

Multifamily Whole Loans and Guarantees

The proposed rule would establish credit risk capital requirements for the Enterprises' multifamily whole loans and guarantees. The multifamily credit risk capital requirements would be determined by the minimum funding necessary to cover the difference between estimated lifetime stress losses in severely adverse economic conditions and expected losses. For the purpose of the proposed rule, the multifamily-specific stress scenario involves two parameters:

- Net Operating Income (NOI), where NOI represents Gross Potential Income (gross rents) net of vacancy and operating expenses, and
- Property values.

Adverse economic conditions are generally accompanied by either a decrease in expected property revenue or an increase in perceived risk in the multifamily asset class, or both. A decrease in expected occupancy would lead to a decline in income generated by the property, or a lower NOI, while an increase in perceived risk would lead to an increase in the capitalization rate used to discount the NOI when assessing property value. A capitalization rate, or cap rate, is defined as NOI divided by property value, so if NOI is held constant, an increase in the cap rate is directly related to a decrease in property values. For the purpose of the proposed rule, the multifamily-specific stress scenario assumes an NOI decline of 15 percent and a property value decline of 35 percent. This stress scenario is consistent with market conditions observed during the recent financial crisis, views from third-party market participants and data vendors, and assumptions behind the Dodd-Frank Act Stress Test (DFAST) severely adverse scenario. The estimated differences between stress losses in a severely adverse scenario and expected losses are reflected in the multifamily credit risk capital grids discussed below.

Under the proposed rule, the Enterprises would calculate credit risk capital for multifamily whole loans and guarantees by completing the following simplified steps:

(1) Determine gross multifamily credit risk capital through the use of multifamily-specific credit risk capital grids;

(2) Adjust gross multifamily credit risk capital for additional risk characteristics using a set of multifamily-specific risk multipliers; and

(3) Determine net multifamily credit risk capital by adjusting gross multifamily credit risk capital for credit risk transfers.

Base Credit Risk Capital Requirements

The proposed rule would require the Enterprises to determine base multifamily credit risk capital using a set of two look-up tables, or grids—one for each multifamily segment. Accordingly, for the purpose of the proposed rule, the Enterprises would divide their multifamily whole loans and guarantees into two segments by interest rate contract: One segment for whole loans and guarantees with fixed rate mortgages (FRMs), and one segment for whole loans and guarantees with adjustable rate mortgages (ARMs). Multifamily whole loans that have both a fixed rate period and an adjustable rate period, also known as hybrid loans, would be classified and treated as a multifamily FRM during the fixed rate period, and classified and treated as a multifamily ARM during the adjustable rate period.

Each segment would have a unique two-dimensional multifamily credit risk capital grid which the Enterprises would use to determine base credit risk capital for each whole loan and guarantee before applying subsequent credit risk multipliers, discussed in the next section. The dimensions of the multifamily credit risk capital grids would be ranges based on two important underlying multifamily loan characteristics: Debt-service-coverage ratio (DSCR) and loan-to-value ratio (LTV). These two risk factors are crucial for forecasting the future performance of loans on commercial real estate properties, including multifamily properties. DSCR is the ratio of property Net Operating Income (NOI) to the loan payment. A DSCR greater than 1.0 indicates that the property generates sufficient funds to cover the loan obligation, while the opposite is true for a DSCR less than 1.0. LTV, in turn, is the ratio of loan amount to property value. In commercial real estate financing, a DSCR of 1.25 and an LTV of 80 percent represent common and reasonable standards for underwriting and performance evaluation purposes.

In the proposed rule, the multifamily credit risk capital grids were populated using model estimates from both Enterprises, averaged to determine the capital requirement associated with each cell in the multifamily credit risk capital grids. To derive the estimates, the Enterprises were asked to run their multifamily credit models using the multifamily-specific stress scenario described above and a synthetic loan with a baseline risk profile with respect to risk factors other than DSCR and LTV. Specifically, the proposed FRM credit risk capital grid was populated using loss estimates (stress losses minus expected losses) for a multifamily loan with varying DSCR and LTV combinations and the following risk characteristics: $10 million loan amount, 10-year balloon with a 30-year amortization period, non-interest-only, not a special product, and never been delinquent or modified. Similarly, the proposed ARM credit risk capital grid was populated using loss estimates (stress losses minus expected losses) for a multifamily loan with varying DSCR and LTV combinations and the following risk characteristics: 3 percent origination interest rate, $10 million loan amount, 10-year balloon with a 30-year amortization period, non-interest-only, not a special product, and never been delinquent or modified. Thus, each cell of the proposed FRM (ARM) credit risk capital grid represents the average estimated difference, in basis points, between stress losses and expected losses for synthetic FRM (ARM) loans described above with a DSCR and LTV in the tabulated ranges. This capital requirement, in basis points, would be applied to the unpaid principal balance (UPB) of each multifamily whole loan and guarantee held by the Enterprises with exposure to credit risk.

The proposed rule would require that the Enterprises use the multifamily credit risk capital grids in their regulatory capital calculations for both newly acquired multifamily whole loans and guarantees, as well as seasoned multifamily whole loans and guarantees. A newly acquired multifamily whole loan or guarantee is a whole loan or guarantee originated within the prior 5 months, while a seasoned multifamily whole loan or guarantee is a whole loan or guarantee originated more than 5 months ago. For newly acquired whole loans and guarantees, the proposed rule would require the Enterprises to use DSCRs and LTVs determined at acquisition to calculate capital requirements using the multifamily credit risk capital grids. For seasoned whole loans and guarantees, the proposed rule would require the Enterprises to use DSCRs and LTVs updated as of the relevant capital calculation date, also known as the mark-to-market DSCR (MTMDSCR) and mark-to-market LTV (MTMLTV), to calculate capital requirements using the multifamily credit risk capital grids.

The proposed multifamily credit risk capital grids for the FRM and ARM loan segments are presented in Tables 26 and 27, respectively:

BILLING CODE 8070–01–C

The proposed multifamily credit risk capital grids provide for a straightforward determination of multifamily credit risk capital that is easy to interpret. In both multifamily credit risk capital grids, the credit risk capital requirement would increase as DSCR decreases (moving toward the top of a grid) and as LTV increases (moving toward the right of the grid). Thus, the Enterprises would generally be required to hold more capital for a multifamily whole loan or guarantee with a low DSCR and a high LTV (the upper-right corner of each grid) than for a multifamily whole loan or guarantee with a high DSCR and a low LTV (the lower-left corner of each grid).

The risk factor breakpoints and ranges represented in the multifamily credit risk capital grids were chosen following internal FHFA analysis and discussions with the Enterprises. After reviewing the distributions of the Enterprises' multifamily whole loan and guarantee unpaid principal balances (UPBs) across both dimensional risk factors (DSCR and LTV), FHFA concluded that the proposed breakpoints and ranges would combine to form sufficiently granular pairwise buckets without sacrificing simplicity or imposing an undue compliance burden on the Enterprises. Furthermore, for ease of interpretation and implementation, the proposed rule would contain one set of DSCR and LTV ranges for both newly acquired and seasoned whole loans and guarantees.

However, as discussed, and as labeled on the grids, the risk factor dimensions would apply to acquisition DSCR and LTV for newly acquired whole loans and guarantees, and updated MTMDSCR and MTMLTV for seasoned whole loans and guarantees.

The proposed rule would require a unique treatment for interest-only (IO) loans. IO loans allow for payment of interest without any principal amortization during all or part of the loan term, creating increased amortization risk and additional leveraging incentives for the borrower. To partially capture these increased risks, the proposed rule would require the Enterprises to use the fully amortized payment to calculate DSCR (or MTMDSCR) during the IO period in order to calculate base capital requirements using one of the two multifamily credit risk capital grids. Specifically, the proposed rule would require the Enterprises to assign each multifamily IO loan into a multifamily loan segment, either FRM or ARM, and to calculate a base credit risk capital requirement for each IO whole loan and guarantee using the corresponding segment-specific multifamily credit risk capital grid, where the DSCR (in the case of a new acquisition) or the MTMDSCR (in the case of a seasoned loan) is based on the IO loan's fully amortized payment.

Gross Credit Risk Capital Requirements

After the Enterprises calculate base credit risk capital requirements for multifamily whole loans and guarantees using the multifamily credit risk capital grids, the proposed rule would require the Enterprises to adjust these capital requirements to account for additional risk characteristics using a set of multifamily-specific risk multipliers. The proposed risk multipliers would refine multifamily base credit risk capital requirements for whole loans and guarantees that possess additional risk factors beyond those reflected in the dimensions of the multifamily credit risk capital grids, and would include considerations for both seasoned loans and new acquisitions. Accordingly, the Enterprises would apply these risk multipliers on top of the base credit risk capital requirements obtained from the multifamily credit risk capital grids. The proposed rule would include multipliers to capture variations in the following multifamily loan characteristics: Payment performance, interest-only, loan term, amortization term, loan size, and special products.

The proposed multifamily risk multipliers represent common characteristics that increase or decrease the riskiness of a particular multifamily whole loan or guarantee. The proposed rule would provide a mechanism through which multifamily credit risk capital requirements would be adjusted and refined up or down to reflect a more or less risky loan profile, respectively. FHFA believes that risk multipliers would provide for a simple and transparent characterization of the risks associated with different types of multifamily whole loans and guarantees, and an effective way of adjusting credit risk capital requirements for those risks. Although the specified risk characteristics are not exhaustive, they capture key commercial real estate loan performance drivers, and are common in commercial real estate loan underwriting and rating. Therefore, FHFA believes the use of risk multipliers in general, and the proposed multipliers in particular, would facilitate analysis of the Enterprises' multifamily credit risk capital requirements while mitigating concerns associated with compliance and complex implementation.

The proposed multifamily risk multipliers would capture variations in risk specific to individual whole loans and guarantees, and augment the base credit risk capital requirements. The numerical multipliers populating the multifamily risk multiplier table were determined using FHFA staff analysis and expertise, along with the Enterprises' contributions of model results and business expertise. Specifically, FHFA asked the Enterprises to run their multifamily credit models using the multifamily-specific stress scenario described above and synthetic loans with a baseline risk profile with respect to risk factors other than DSCR and LTV, in the same way the Enterprises populated the multifamily credit risk capital grids. However, FHFA then asked the Enterprises to vary the additional risk factors to estimate the risk factors' multiplicative effects on the Enterprises' loss estimates (stress losses minus expected losses). In general, the multiplier values estimated by the Enterprises were consistent with one another in magnitude and direction. Using judgement, FHFA combined the estimates to determine the final multifamily risk multiplier values.

The proposed rule would require that multifamily whole loans and guarantees with characteristics similar to, and within a certain range of, the risk characteristics of the synthetic loans underlying the multifamily credit risk capital grids would take a multiplier of 1.0. Risk factor values dissimilar to the characteristics of the synthetic loans would be assigned risk multiplier values greater than or less than 1.0, such that the total risk multiplier applied to a given multifamily whole loan or guarantee could be above 1.0, below 1.0, or 1.0, depending on how the risk factor values compare to the pertinent risk factor values in the synthetic loans. A multiplier value above 1.0 would be assigned to risk factor values that represent riskier loan characteristics, while a multiplier value below 1.0 would be assigned to risk factor values that represent less risky characteristics. For each multifamily whole loan and guarantee, the individual risk multipliers would be multiplicative, and their product would be applied to the gross credit risk capital requirements determined by the multifamily credit risk capital grids.

The proposed multifamily risk multiplier values are presented in Table 28:

TABLE 28—MULTIFAMILY RISK MULTIPLIERS

Risk factor	Value or range	Risk multiplier
Payment Performance	Performing	1.00.
	Delinquent	1.10.
	Re-Performing (without Modification)	1.10.
	Modified	1.20.
Interest-Only	Not Interest-Only	1.00.
	Interest-Only	1.10.
Original/Remaining Loan Term	Loan Term <= 1Yr	0.70.
	1Yr < Loan Term <= 2Yr	0.75.
	2Yr < Loan Term <= 3Yr	0.80.
	3Yr < Loan Term <= 4Yr	0.85.

TABLE 28—MULTIFAMILY RISK MULTIPLIERS—Continued

Risk factor	Value or range	Risk multiplier
	4Yr < Loan Term <= 5Yr	0.90.
	5Yr < Loan Term <= 7Yr	0.95.
	7Yr < Loan Term <= 10Yr	1.00.
	Loan Term > 10Yr	1.15.
Original Amortization Term	Amort. Term <= 20Yr	0.70.
	20Yr < Amort. Term <= 25Yr	0.80.
	25Yr < Amort. Term <= 30Yr	1.00.
	Amort. Term > 30Yr	1.10.
Original Loan Size	Loan Size <= $3M	1.45.
	$3m < Loan Size <= $5M	1.15.
	$5m < Loan Size <= $10M	1.00.
	$10m < Loan Size <= $25M	0.80.
	Loan Size > $25M	0.70.
Special Products	Government-Subsidized	0.60.
	Not a Special Product	1.00.
	Student Housing	1.15.
	Rehab/Value-Add/Lease-Up	1.25.
	Supplemental	Use FRM or ARM Capital Grid by adding supplemental UPB to the base loan and recalculating DSCR and LTV.

Each multifamily risk factor represented in Table 28 can take multiple values, and each value or range of values has a risk multiplier associated with it. FHFA determined these values and ranges after analyzing the Enterprises' multifamily portfolios and the associated distributions of UPBs, and subsequent to significant discussions both internally and with the Enterprises. FHFA believes that the proposed values and ranges would provide an appropriate level of granularity in the risk multiplier framework, both within each risk factor and cumulatively across risk factors, to sufficiently capture the variations in observable risk given the Enterprises' multifamily businesses and without imposing an undue compliance or implementation burden on the Enterprises. The risk factors in the multifamily risk multiplier table are:

- *Payment performance.* The payment performance risk multiplier captures risks associated with historical payment performance of whole loans and guarantees. In the proposed risk multiplier table, multifamily whole loans and guarantees would be assigned one of four values: Performing, delinquent (defined as 30-days for multifamily whole loans and guarantees in the context of the proposed rule), re-performing (without modification), and modified. A performing loan is one that has never been delinquent in its payments; a delinquent loan is one that is not current in its payments at the time of the capital calculation; a re-performing loan is one that is current in its payments at the time of the capital calculation, but has been delinquent in its payments at least once since origination and has cured without modification; and a modified loan is one that is current in its payments at the time of the capital calculation, but has been modified at least once since origination or has gone through a workout plan. In the proposed rule, the Enterprises would be required to hold more capital for multifamily whole loans and guarantees that have a delinquency and/or modification history than for those that do not. Specifically, performing whole loans and guarantees would receive a risk multiplier of 1.0, while delinquent, re-performing, and modified whole loans and guarantees would receive a risk multiplier greater than 1.0.
- *Interest-only.* The interest-only (IO) risk multiplier captures risks associated with IO whole loans and guarantees during the IO period. As discussed earlier, IO loans are generally considered riskier than non-IO loans, and the proposed rule would partially account for this increased amortization and leveraging risk by requiring the Enterprises to use fully amortized payments to calculate DSCR (for new acquisitions) and MTMDSCR (for seasoned loans) for use in the multifamily credit risk capital grids. The use of the amortized payment would lower the DSCR, resulting in a higher capital requirement all else equal. In addition, the proposed rule would further account for IO risk in the risk multiplier table. Specifically, non-IO whole loans and guarantees would receive a risk multiplier of 1.0, while IO whole loans and guarantees would receive a risk multiplier of 1.1 during the IO period.
- *Original or remaining loan term.* The loan term risk multiplier captures risks associated with the term of a multifamily whole loan or guarantee, either the original loan term for new acquisitions or the remaining loan term for seasoned loans. The majority of the Enterprises' multifamily whole loans and guarantees have a loan term of 5 years or longer, and in general, whole loans and guarantees with a shorter term are less risky than those with a longer term. Loans with shorter loan terms carry relatively less uncertainty about eventual changes in property performance and future refinancing opportunities, while loans with longer loan terms carry relatively higher uncertainty about the borrower's ability to refinance in the future. In the proposed rule, a 10-year loan term would be considered a baseline risk, so whole loans and guarantees with a loan term between 7 years and 10 years would receive a risk multiplier of 1.0. The 7- to 10-year range represents a conservative range FHFA believes is appropriate. Whole loans and guarantees with loan terms shorter than 7 years would receive risk multipliers less than 1.0, and whole loans and guarantees with loan terms longer than 10 years would receive a risk multiplier greater than 1.0. Whole loans and guarantees that are new acquisitions would use the original loan term, while those that are seasoned would use the remaining loan term.
- *Original amortization term.* The amortization term risk multiplier captures risks associated with the amortization term of a multifamily whole loan or guarantee. In general, whole loans and guarantees with a

shorter repayment period face less risk of a borrower defaulting on its payments than do those with a longer repayment period. The most common amortization term for multifamily whole loans and guarantees is 30 years, even though most have an original loan term with a balloon payment due earlier, often in 10 years. While amortization terms can potentially take any value, FHFA believes that given the very high number of whole loans and guarantees with an amortization term between 25 and 30 years, the values represented in the risk multiplier table would sufficiently account for the differences in risk associated with amortization term. In the proposed rule, a 30-year amortization term would represent a baseline level of risk, and multifamily whole loans and guarantees with a 30-year amortization term would receive a risk multiplier of 1.0. Whole loans and guarantees with an amortization term less than 25 years would receive a risk multiplier less than 1.0, while whole loans and guarantees with an amortization term greater than 30 years would receive a risk multiplier of 1.1.

- *Original loan size.* Multifamily whole loans and guarantees with larger original loan balances are generally considered less risky than those with smaller balances, because larger balances are usually associated with larger investors with more access to capital and experience. In addition, the collateral securing a large loan is often a larger, more established, and/or newer property. Alternatively, whole loans and guarantees with smaller original balances are often associated with investors with limited funding and smaller, less competitive properties. In the proposed rule, an original loan size of $10 million represents a baseline level of risk, and multifamily whole loans and guarantees meeting that criterion would receive a risk multiplier of 1.0. Whole loans and guarantees with an original loan balance greater than $10 million would receive a risk multiplier less than 1.0, and whole loans and guarantees with an original loan balance less than $5 million would receive a risk multiplier greater than 1.0.
- *Special products.* The final risk factor in the multifamily risk multiplier table captures risks associated with certain special products. The special products represented in the table contain risks unique to each product, and, while not exhaustive, were selected for their importance based on FHFA staff analysis and expertise and pursuant to discussions with the Enterprises and their collective multifamily business experiences. The special products, discussed individually below, are government subsidized, student housing, rehab/value-add/lease-up, and supplemental.

In the context of the proposed rule, multifamily whole loans and guarantees that are government-subsidized have financing that includes HUD or FHA subsidies. These subsidies could have value to an investor or to a renter, depending on the specific HUD or FHA program used, through their effect on the loan balance or on any tax credits related to the operation of the property supporting the loan. The benefits of these subsidies to investors and/or renters generally lead to property incomes that are less volatile than incomes associated with otherwise comparable whole loans and guarantees. Less volatile income broadly translates to lower risk, and as a result, government-subsidized whole loans and guarantees would be assigned a risk multiplier lower than 1.0.

Student housing loans provide financing for the operation of apartment buildings for college students. The rental periods for units in these properties often correspond with the institution's academic calendar, so the properties have a high annual turnover of occupants. Student renters, by and large, are not as careful with the use and maintenance of the rental units as more mature households. As a result, apartment buildings focusing on student housing customarily have more volatile occupancy and less predictable maintenance expenses. In the proposed rule, this would imply higher risk, which would lead to a risk multiplier greater than 1.0 for student housing whole loans and guarantees.

The third type of special product in the risk multiplier table would include loans issued to finance rehab/value-add/lease-up projects. In the context of the proposed rule, rehab and value-add projects are different types of renovations, where a rehab project is a like-for-like renovation and a value-add project is one that increases a property's value by adding a new feature to an existing property or converts one component of a property into a more marketable feature, such as converting unused storage units into a fitness center. A lease-up property is one that is recently constructed and still in the process of securing tenants for occupancy. Recently built properties, and those subject to improvements, typically require more intense marketing efforts in the early stages of property operation. It often takes longer for these properties to reach and stabilize at reasonable occupancy levels. In the proposed rule, this would elevate the property's risk, which would lead to a risk multiplier greater than 1.0 for whole loans and guarantees backing these properties.

Finally, supplemental loans, in the context of the proposed rule, are multifamily loans issued to a borrower for a property for which the borrower has previously received a loan. There can be more than one supplemental loan. These loans, by definition, increase loan balances, which would lead to higher LTVs and could lead to lower DSCRs, which could lead to higher risk. Therefore, the proposed rule would require the Enterprises to account for this potentially higher risk by recalculating DSCRs and LTVs for the original and supplemental loans using combined loan balances and income/payment information, and calculating the capital requirement for a supplemental loan as the marginal increase in total capital due to the addition of the supplemental loan. In practice, however, supplemental loans do not exist in a vacuum and the capital calculation for supplemental loans could be slightly more complicated than just described. For example, a higher loan balance due to a supplemental loan could push the total loan balance into a loan size bucket with a size multiplier smaller than it had before the supplemental was added, which could lower the overall credit risk capital requirement for the group of loans as a whole.

Multifamily Risk Multiplier Floor

In the proposed rule, multifamily risk multipliers would adjust base credit risk capital requirements in a multiplicative manner. As a result, combinations of overlapping characteristics could potentially result in an extremely low risk assessment of certain multifamily whole loans and guarantees, which would arguably undermine the conservative approach to capital requirements FHFA aims to take in the proposed rule. Thus, in the proposed rule, the Enterprises would be required to impose a floor of 0.5 to any combined multifamily risk multiplier calculation. This floor would ensure that combinations of overlapping characteristics would not result in potentially dangerous risk assessments, which is important since the proposed multipliers themselves are designed to represent the average behavior of loans with the associated multiplier characteristics.

Question 15: FHFA is soliciting comments on the proposed framework for calculating credit risk capital requirements for multifamily whole loans and guarantees, including comments on the loan segments, base grids, and risk multipliers. What modifications should FHFA consider and why?

Question 16: FHFA is soliciting comments on the proposed multifamily size multiplier and how it is applied to a loan's entire balance, rather than marginally to a portion of a loan that exceeds a certain size threshold. What modifications to the multifamily size multiplier should FHFA consider and why?

Question 17: FHFA is soliciting comments on the proposed multifamily IO multiplier, and how it is applied to full-IO loans with no amortization term and IO loans that have seasoned beyond the IO period. What modifications to the proposed multifamily IO multiplier should FHFA consider and why?

Question 18: FHFA is soliciting comments on the proposed risk multiplier for government-subsidized multifamily whole loans, and how the proposed multiplier would be applied to all such multifamily whole loans. What modifications to the proposed multiplier for government-subsidized multifamily whole loans should FHFA consider and why?

Enterprise- and Ginnie Mae-Guaranteed Multifamily Mortgage-Backed Securities

There is no credit risk capital requirement in the proposed rule for multifamily MBS held in portfolio that were issued and guaranteed by an Enterprise or Ginnie Mae or are collateralized by Enterprise or Ginnie Mae multifamily whole loans or securities. Ginnie Mae securities are backed by the U.S. government and therefore do not have credit risk. For MBS issued by an Enterprise and later purchased by the same Enterprise for its portfolio, the credit risk is already reflected in the credit risk capital requirement on the underlying multifamily whole loans and guarantees (Section II.C.7.a). For MBS held by an Enterprise that were issued by the other Enterprise, there is counterparty risk. However, these holdings are typically small and, for reasons of simplicity, the proposed rule does not include a capital requirement for this exposure.

Question 19: Should multifamily MBS held by an Enterprise that were issued by the other Enterprise be subject to a counterparty haircut to reflect counterparty risk?

b. Credit Risk Transfer

This section corresponds to Proposed Rule §§ 1240.37 through 1240.38.

The Enterprises often seek to reduce the credit risk on their multifamily guarantee books of business by transferring and sharing risk through multifamily Credit Risk Transfers (CRTs). In the proposed rule, the Enterprises would be able to reduce their multifamily credit risk capital requirements by engaging in CRTs. In the context of the proposed rule, multifamily capital relief would be the reduction in required credit risk capital afforded to the Enterprises from transferring all or part of a credit risk exposure using a multifamily CRT transaction. To calculate capital relief, the proposed rule would require the Enterprises to use a formulaic approach that accounts for counterparty credit risk on each CRT.

To date, the Enterprises have generally utilized two broad types of CRTs for their multifamily books of business: Loss sharing and securitizations. Within these broad types, CRT transactions can have unique structures. The proposed approach is general enough to accommodate the variable nature of CRTs.

The first type of multifamily CRT transaction used by the Enterprises utilizes a loss sharing structure. In this type of CRT, which can be regarded as a front-end risk transfer with a vertical tranche, an Enterprise enters into a loss sharing agreement with a lender before the lender delivers the loan to the Enterprise. The Enterprise and lender share future losses according to a specified arrangement, commonly from the first dollar of loss, and in exchange the lender is compensated for the risk. For loss sharing CRT transactions, the proposed capital relief would be a proportional share of the gross credit risk capital requirements implied by the underlying multifamily whole loans and guarantees. However, because these transactions are not necessarily fully collateralized, loss sharing CRTs generally expose the Enterprises to counterparty credit risk. Therefore, the proposed rule would reduce capital relief to account for counterparty credit risk.

The second type of multifamily CRT transaction used by the Enterprises utilizes a multiclass securitization structure. In this type of CRT, an Enterprise sells a pool of loans to a trust that securitizes cash flows from the pool into several tranches of bonds. The subordinated bonds, also called mezzanine and first-loss bonds, are sold to market participants. These subordinated bonds provide credit protection for the senior bond, which is the only tranche that is credit-guaranteed by the Enterprises. For securitization CRT transactions, the proposed rule would require that the Enterprises calculate capital relief using a step-by-step approach. To identify capital relief, the proposed approach would combine credit risk capital and expected losses on the underlying whole loans and guarantees, tranche structure, and ownership.

Multifamily Credit Risk Transfer Models

Under the loss sharing and securitization umbrellas, the Enterprises have generally used two distinct models. Fannie Mae's multifamily business has relied heavily on its Delegated Underwriting and Servicing (DUS) program, a loss sharing CRT program. Freddie Mac's multifamily business, in turn, has focused almost exclusively on securitizations, predominately through its K-Deal program.

Under the DUS program, Fannie Mae typically transfers about one-third of the credit risk per deal under a pari-passu DUS arrangement. Fannie Mae retains the remaining two-thirds of the credit risk plus the counterparty credit risk associated with the DUS lender business relationship. To offset the counterparty credit risk, the program requires lenders to post a certain amount of collateral, primarily in the form of restricted liquidity, which Fannie Mae can access in the event of lender default. The collateral, which for the purposes of restricted liquidity is treated uniformly in the proposed rule, includes Treasury money market funds, Treasury securities, and Enterprise MBS, and is currently marked-to-market on a monthly basis by a custodian. Fannie Mae currently has agreements with 25 lenders to deliver multifamily loans that meet the criteria specified in the DUS underwriting and servicing guidelines.

Freddie Mac, on the other hand, typically transfers credit risk by tranching pools of multifamily loans and selling unguaranteed bonds (mezzanine and subordinate) to private market participants. These sales, which generally account for 10 to 15 percent of the underlying loans, typically result in a transfer of more than 80 percent of the credit risk, and often result in a transfer of close to 100 percent of the credit risk. Freddie Mac, however, does assume credit and market risk during the period between loan acquisition and securitization. In addition, after securitization, Freddie Mac retains a portion of the credit risk through ownership and/or guarantee of senior K-Deal tranches.

Despite these differences in the Enterprises' multifamily business models, the proposed rule accommodates both Enterprises' lending practices.

Proposed Approach for Multifamily CRT Capital Relief

In general, the proposed approach would require four steps when calculating capital relief. In the first step, the Enterprises would distribute credit risk capital on the underlying whole loans and guarantees to the tranches of the CRT independent of tranche ownership, while controlling for expected losses. In practice, the Enterprises would allocate credit risk capital such that the riskiest, most junior tranches would be allocated capital before the most senior tranches.

In the second step, the Enterprises would calculate capital relief accounting for tranche ownership. The proposed approach would provide the Enterprises with capital relief from transferring all or part of a credit risk exposure. For each tranche or exposure, the Enterprises would identify the portion of the tranche owned by private investors or covered by a loss sharing agreement. Then, in general, the Enterprises would calculate the capital relief as the product of the credit risk capital allocated to the exposure and the portion of the tranche owned by private investors or covered by a loss sharing agreement.

However, this initial calculation of capital relief must be adjusted to account for counterparty credit risk because loss sharing agreements may be subject to counterparty credit risk. Capital relief afforded by credit risk transfers would be overstated absent such an adjustment.

In the third step, for loss sharing agreements, the Enterprises would apply haircuts to previously calculated capital relief to adjust for counterparty credit risk. In particular, the Enterprises would consider the credit worthiness of each counterparty when assessing the contribution of loss sharing arrangements such that the capital relief is lower for less credit worthy counterparties. At the same time, in the proposed approach, collateral posted by a counterparty would be considered when determining the counterparty credit risk, as posted collateral would at least partially offset the effect of the counterparty exposure.

Lastly, the Enterprises would calculate total capital relief by adding up capital relief for each tranche in the CRT.

The proposed approach would afford relatively higher levels of capital relief to the riskier, more junior tranches of a CRT that are the first to absorb unexpected losses, and relatively low levels of capital relief to the most senior tranches. The approach would also afford greater capital relief for transactions that provide coverage: (i) On a higher percentage of unexpected losses, (ii) for a longer period of time, and (iii) with lower levels of counterparty credit risk.

Loss Sharing Approach

The distinguishing feature of the loss sharing CRT approach is the addition of a counterparty. To calculate capital relief under the loss sharing approach, the proposed rule would require the Enterprises to conduct a counterparty risk analysis in which the Enterprises would calculate counterparty exposure as per the loss sharing agreement, consider applicable restricted liquidity rules, determine if the counterparty has posted collateral, and assess the uncollateralized exposure to apply a haircut.

In the proposed rule, the counterparty haircut would be calculated using a modified version of the Basel Advanced IRB approach that takes into account the creditworthiness of the counterparty. Echoing the single-family discussion from Section II.C.4.a of how counterparty risk is amplified due to the correlation between a counterparty's credit exposure and the Enterprises' credit exposure (concentration risk), the proposed rule would assign larger haircuts to multifamily counterparties with higher levels of concentration risk relative to diversified counterparties. The Enterprises would assess the level of multifamily mortgage risk concentration for each individual counterparty to determine whether the counterparty is well diversified or whether it has a high concentration risk, and counterparties with a lower concentration risk would be assigned a smaller counterparty haircut relative to counterparties with higher concentration risk. This difference is captured through the asset valuation correlation multiplier, AVCM. An AVCM of 1.75 would be assigned to counterparties with high concentration risk and an AVCM of 1.25 would be assigned to more well-diversified counterparties.

The proposed approach calculates the haircut by multiplying stress loss given default by stress probability of default and by a maturity adjustment for the asset. Along with the AVCM, other parameterization assumptions in the proposed rule include a stress LGD of 45 percent, a maturity adjustment calibrated to 5 years, a stringency level of 99.9 percent, and expected probabilities of default calculated using historical 1-year PD matrix for all financial institutions. The multifamily counterparty risk haircut multipliers are presented below in Table 29.

TABLE 29—MULTIFAMILY COUNTERPARTY RISK HAIRCUT MULTIPLIERS BY CONCENTRATION RISK

Counterparty rating	CP haircut for concentration risk: Not high (%)	CP haircut for concentration risk: High (%)
1	2.1	3.4
2	5.3	8.5
3	6.0	9.6
4	12.7	19.2
5	16.2	22.9
6	22.5	28.5
7	41.2	45.1
8	48.2	48.2

The Enterprises would select a counterparty haircut from Table 29 and would apply the haircut to the uncollateralized exposure in a CRT. Further, if in the case of lender failure an Enterprise has contractual control of the lender's guarantee fee revenue, then the uncollateralized exposure would also be adjusted for lender guarantee fee revenue associated with the multifamily loan guarantee fees. In this lender loss sharing case, lender revenue would generally reduce the Enterprises' required counterparty credit risk capital. In particular, under the DUS framework, Fannie Mae has contracted with lenders to service the loans while retaining control of the servicing rights.

Securitization Approach

To calculate capital relief under the securitization approach, the proposed rule would require the Enterprises to analyze the levels of subordination involved in the securitization structure, and identify the portion of the tranches owned by private investors or covered by a loss sharing agreement. The Enterprises would then apply risk transfer calculations that resemble those used for the single-family CRT transactions, with minor changes to some of the required parameters.

Other Multifamily CRT Considerations

The Enterprises may engage in other forms of CRT, which can be generally thought of as loss sharing with multiple tranches—vertical, horizontal, or both. These types of CRT could include back-end reinsurance coverage (*e.g.,* Fannie Mae's CIRT program), through which the Enterprises enter into an agreement with a third party (typically a lender) to cover first losses on a pool of loans up to a certain percentage. In the back-end reinsurance model, the Enterprises, as policy holders, typically retain some portion (or all) of the first loss on a pool of covered multifamily loans, and compensate the reinsurer directly. In this design, the Enterprises bear some counterparty credit risk. Accordingly, calculating capital relief for reinsurance CRT transactions in the proposed rule would require the Enterprises to determine the amount of transferrable capital and stress losses, allocate stress losses to each tranche in the deal, determine the losses owned by the reinsurers, and adjust the calculated capital relief for counterparty credit risk, including any reinsurer haircut or posted collateral. Under the top-loss approach, the Enterprises are responsible for losses after the counterparty pays the agreed top-loss coverage percentage. In this model, the Enterprises also bear counterparty risk, which requires an adjustment of the capital relief to account for counterparty credit risk.

In general, the Enterprises would calculate the multifamily CRT capital relief as the product of the credit risk capital allocated to the exposure and the portion of the tranche owned by private investors or covered by a loss sharing agreement. The Enterprise would then adjust capital relief for counterparty credit risk, if applicable. The proposed approach implies that the CRT provides loss coverage through the entire duration of the loans subject to risk transfer. This includes the period at which a balloon payment, if the loan involves one, is due. If multifamily CRT coverage expires before the underlying loans mature, then capital relief afforded by the multifamily CRT may be overstated absent such a loss timing adjustment. However, because multifamily loans typically include a balloon payment, it is assumed that CRT coverage includes all potential losses including those associated with the borrower's failure to make the balloon payment.

Seasoned CRT Capital Calculations

In the proposed rule, the Enterprises would need to recalculate post-deal CRT capital on seasoned multifamily CRT transactions.

Fannie Mae's current risk transfer method (the DUS program) largely involves proportional front-end loss-sharing. In the proposed rule, for each group of loans that have been acquired through a loss-sharing transaction, including Fannie Mae's DUS program, the Enterprises would recalculate capital relief to reflect changes in restricted liquidity and counterparty exposure.

The majority of Freddie Mac's current risk transfer method involves structured securitizations through the K-deal program. Prepayment penalty structures, including defeasance, that prevent unpaid balances from changing significantly are often part of multifamily structured securitizations. These situations limit the effect of updating and recalculating the post-deal CRT capital. Nevertheless, in anticipation of future growth in multifamily CRT activities, the proposed rule would establish guidelines for post-deal CRT capital reporting.

In the proposed rule, for each group of loans remaining in a securitization CRT transaction, including those in Freddie Mac's K-deals, the Enterprises would recalculate capital relief by aggregating the updated loan-level capital requirements for each pool to determine how much capital is effectively transferred through the CRT at the time of the update. For each deal, the Enterprises would be required to update asset fundamentals that may affect the amount of expected or unexpected losses associated with the deal, as well as any potential changes in the deal's loan balances as a result of voluntary or involuntary terminations, including prepayments within or outside any applicable prepayment penalty period. In addition, for each tranche, the Enterprises would be required to update which parties are responsible for changes in a given tranche's exposure. A deal may involve different forms of credit enhancements in addition to the typical senior-subordinated structure (*e.g.,* retention, insurance, re-insurance). This step would require the Enterprises to consider changes to risk exposure due to changes in expected or unexpected losses associated with the deal and any potential changes in UPB following voluntary or involuntary terminations, including prepayments within or outside any applicable prepayment penalty period.

Question 20: FHFA is soliciting comments on the proposed approaches for calculating multifamily CRT capital relief. What modifications should FHFA consider and why?

Question 21: Should the proposed multifamily CRT formulae differentiate the capital relief allowed in CRT transactions with low loan counts from that allowed in CRT transactions with high loan counts?

Question 22: FHFA is soliciting comments on multifamily counterparty haircuts. What modifications should FHFA consider and why?

Question 23: FHFA is soliciting comments on whether CRT loss timing should be accounted for in measuring CRT capital relief. What modifications should FHFA consider and why?

c. Market Risk

This section corresponds to Proposed Rule §§ 1240.39 through 1240.40.

Multifamily Whole Loans and Guarantees

Multifamily whole loans held in the Enterprises' portfolios have market risk stemming from changes in value due to movements in interest rates and credit spreads. As the Enterprises currently hedge interest rate risk closely at the portfolio level, the market risk capital requirements in the proposed rule would focus on spread risk.

The proposed rule would require the Enterprises to calculate market risk capital requirements on fixed- and adjustable-rate multifamily whole loans using a spread duration approach, which relies, in part, on the Enterprises' internal models.

For the spread duration approach in the proposed rule, the Enterprises would calculate market risk capital as the product of a spread shock and spread duration. The proposed rule would include a specified spread shock and require an Enterprise to use its internal models to estimate spread durations.

Capital results that rely on internal model calculations can be opaque and result in different capital requirements across Enterprises for the same or similar exposures. Hence, the proposed rule would partly rely on an Enterprise's internal models only when the market risk complexity is sufficiently high that using a single point estimate would inadequately represent the exposure's underlying multifamily market risk.

Notably, internal models used in the determination of multifamily market risk capital requirements would be subject to ongoing supervisory review. As an example, an Enterprise's model risk management is subject to FHFA's 2013–07 Advisory Bulletin.

The market risk capital requirement for the Enterprises' multifamily fixed- and adjustable-rate whole loans would be the product of a defined credit spread shock (15 bps) and the spread duration, calculated individually by the Enterprises using each Enterprise's internal models. For a given multifamily whole loan, the product of the spread shock and the spread duration would then be multiplied by the market value of the asset to compute the market risk capital requirement in dollars. The proposed 15 basis point spread duration assumes strong historical multifamily market performance, high multifamily whole loan liquidity, and low cash flow pricing sensitivity to changes in interest rate spreads.

Question 24: FHFA is soliciting comments on the proposed approach for calculating market risk capital requirements for multifamily whole loans. What modifications should FHFA consider and why?

Enterprise- and Ginnie Mae-Guaranteed Multifamily Mortgage-Backed Securities

Enterprise- and Ginnie Mae-guaranteed multifamily MBS held in the Enterprises' portfolios have market risk stemming from changes in value due to movements in interest rates and credit spreads. As discussed in Section II.C.6.c with regard to the market risk capital requirements for multifamily whole loans, the Enterprises currently hedge interest rate risk closely at the portfolio level, and therefore the market risk capital requirements in the proposed rule would focus on spread risk.

In the proposed rule, the market risk capital requirement for Enterprise- and Ginnie Mae-guaranteed multifamily MBS would be determined using a spread duration approach, which would rely, in part, on the Enterprises' internal models. For the spread duration approach in the proposed rule, the Enterprises would calculate market risk capital as the product of a spread shock and spread duration. The proposed rule would include a specific spread shock and require an Enterprise to use its internal models to estimate spread durations.

The use of internal models would allow the Enterprises to more frequently update spread durations to reflect market changes. However, capital results that rely on internal model calculations can be opaque and result in different capital requirements across Enterprises for the same or similar exposures. Hence, the proposed rule would partly rely on an Enterprise's internal models only when the market risk complexity is sufficiently high that using a single point estimate inadequately represents the exposure's underlying multifamily market risk.

Notably, internal models used in the determination of multifamily market risk capital requirements would be subject to ongoing supervisory review. As an example, an Enterprise's model risk management is subject to FHFA's 2013–07 Advisory Bulletin.

The market risk capital requirement for Enterprise- and Ginnie Mae-guaranteed multifamily MBS would be the product of a defined credit spread shock (100 bps) and the spread duration calculated individually by the Enterprises using each Enterprise's internal models. The proposed 100 basis point spread shock reflects a combination of the Enterprises' estimates, and is driven by the complexity of structured products relative to whole loans which could decrease liquidity and increase cash flow pricing sensitivity to changes in interest rate spreads.

Question 25: FHFA is soliciting comments on the proposed approach for calculating risk-based capital requirements for Enterprise and Ginnie Mae multifamily MBS. What modifications should FHFA consider and why?

d. Operational Risk

This section corresponds to Proposed Rule §§ 1240.41 through 1240.42.

As described in section II.C.2 above, the proposed rule would establish an operational risk capital requirement of 8 basis points for all assets. For multifamily whole loans and guarantees, and Enterprise and Ginnie Mae multifamily MBS, the operational risk capital requirement would be 8 basis points of the unpaid principal balance of assets with credit risk or 8 bps of the market value of assets with market risk.

e. Going-Concern Buffer

This section corresponds to Proposed Rule §§ 1240.43 through 1240.44.

As described in section II.C.3 above, the proposed rule would establish a going-concern buffer of 75 basis points for all assets. For multifamily whole loans and guarantees, and Enterprise and Ginnie Mae multifamily MBS, the going-concern buffer would be 75 basis points of the unpaid principal balance of assets with credit risk or 75 basis points of the market value of assets with market risk.

f. Impact

Post-CRT Net Credit Risk	8.5	492	174

* Excludes both Enterprises' retained portfolio holdings of MBS guaranteed by the other Enterprise, and Ginnie Mae MBS.

7. Commercial Mortgage-Backed Securities

This section corresponds to Proposed Rule § 1240.46.

Credit Risk and Market Risk

In the proposed rule, the capital requirement for multifamily commercial mortgage-backed securities (CMBS) held by the Enterprises that are not guaranteed by an Enterprise or by Ginnie Mae would be a single 200 basis point requirement that accounts for both credit and market risk. The 200 basis point requirement reflects a combination of the Enterprises' internal model estimates. FHFA chose this approach based on internal staff analysis and discussions with the Enterprises. FHFA believes this simple approach is justified given the small, and shrinking, non-Enterprise and non-Ginnie Mae CMBS portfolios held by the Enterprises.

Operational Risk

As described in section II.C.2 above, the proposed would require the Enterprises to hold an operational risk capital requirement of 8 bps for all assets. For multifamily CMBS held by the Enterprises that were not issued by the Enterprises or by Ginnie Mae, the operational risk capital requirement would be 8 bps of the securities' market value.

Going-Concern Buffer

As described in section II.C.3 above, the proposed rule uses a going-concern buffer of 75 bps for all assets. For multifamily CMBS held by the Enterprises that were not issued by the Enterprises or by Ginnie Mae, the going-concern buffer would be 75 bps of the securities' market value.

Impact

TABLE 32—FANNIE MAE AND FREDDIE MAC COMBINED ESTIMATED RISK-BASED CAPITAL REQUIREMENTS FOR COMMERCIAL MORTGAGE-BACKED SECURITIES AS OF SEPTEMBER 30, 2017

	Capital requirement

Operational Risk	0.001	8	3
Total Capital Requirement	0.018	279	100
Total UPB, $billions	0.656		

Question 26: FHFA is soliciting comments on the proposed approach for calculating risk-based capital requirements for CMBS. What modifications should FHFA consider and why?

8. Other Assets and Guarantees

This section corresponds to Proposed Rule § 1240.47.

This section describes the proposed rule for certain assets and guarantees that are not covered by the Enterprises' core business activities. This section also describes the proposed rule for new products that are not covered in the proposed rule.

For assets with credit risk exposure, the proposed rule defines credit risk capital requirements. The proposed rule allows the Enterprises to use internal methodologies to calculate market risk capital requirements for other assets and guarantees.

Deferred Tax Assets

The proposed rule would establish a risk-based capital requirement for deferred tax assets (DTAs) that would offset the DTAs included in core capital in a manner generally consistent to the Basel III treatment of DTAs. DTAs are recognized based on the expected future tax consequences related to existing temporary differences between the financial reporting and tax reporting of existing assets and liabilities given established tax rates. In general, DTAs are considered a component of capital because these assets are capable of absorbing and offsetting losses through the reduction to taxes. However, DTAs may provide minimal to no loss-absorbing capability during a period of stress as recoverability (via taxable income) may become uncertain.

In 2008, during the financial crisis, both Enterprises recognized a valuation allowance to reduce their DTAs to amounts that were more likely than not to be realized based on the facts that existed at the time and estimated future taxable income. A valuation allowance on DTAs is typically recognized when all or a portion of DTAs is unlikely to be realized considering projections of future taxable income. The recognition of the valuation allowances on DTAs resulted in non-cash charges to income and reductions to the Enterprises' net DTA balances (included in the retained earnings components of capital). Fannie Mae established a partial valuation allowance on DTAs of $30.8 billion in 2008, which was a major contributor to the overall capital reduction of $66.5 billion at Fannie Mae in 2008. Similarly, Freddie Mac established a partial valuation allowance on DTAs of $22.4 billion in 2008, which was also a major contributor to the overall capital reduction of $71.4 billion at Freddie Mac in 2008.

Other financial regulators recognize the limited loss absorbing capability of DTAs, and therefore limit the amount of DTAs that may be included in Common Equity Tier 1 (CET1) capital. Under Basel III guidance, certain DTAs are excluded from CET1, while other DTAs are included in CET1 capital up to a cap of 10 percent of CET1 capital. Most other DTAs are included in risk-weighted assets.

Given the Enterprises' experiences with DTAs during the financial crisis, FHFA would like to limit the amount of DTAs counted as capital, similar to the limitations of the other financial regulators. However, FHFA does not have the authority to change the statutory definition of core capital for the Enterprises. The proposed rule would instead adopt a modified version of the Basel III treatment whereby DTA amounts that would be deducted from CET1 under Basel are included in the risk-based capital requirement. The result of this modification would be to neutralize the impact of DTAs on Enterprise capital to the same degree that the Basel framework limits the amount of DTAs included in CET1. Similarly, DTA amounts included in risk weighted assets under Basel would also be included in the risk-based capital requirement. Specifically, the risk-based capital requirement for DTAs would be the sum of:

- 100 percent of DTAs that arise from net operating losses and tax credit carryforwards, net of any related valuation allowances and net of deferred tax liabilities (DTLs);
- 100 percent of DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs that exceed 10 percent of adjusted core capital; [41]
- 20 percent (8 percent × 250 percent) of DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs that do not exceed 10 percent of adjusted core capital; and
- 8 percent of DTAs arising from temporary differences that could be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs.

The capital requirement for DTAs is highly sensitive to the amount of core capital held by an Enterprise. While the Enterprises currently have negative core capital, Table 33 below shows the impact of the proposed DTA treatment for the third and fourth quarters of 2017, assuming the Enterprises held core capital equal to the risk-based capital requirement (before DTAs), in order to show the DTA impact on a post-conservatorship basis. The fourth quarter impact is significantly lower due to the reduction in DTAs because of the Tax Cuts and Jobs Act of 2017.

TABLE 33—FANNIE MAE AND FREDDIE MAC ESTIMATED RISK-BASED CAPITAL REQUIREMENTS FOR DEFERRED TAX ASSETS ASSUMING CORE CAPITAL EQUAL TO RISK-BASED CAPITAL REQUIREMENT *

	As of September 30, 2017 (in $billions)			As of December 31, 2017 (in $billions)		
	Fannie Mae	Freddie Mac	Total	Fannie Mae	Freddie Mac	Total
Category 1	$2.5	$1.4	$3.9	$2.5		$2.5
Category 2	15.3	4.0	19.3	5.6		6.6
Category 3	1.9	1.2	3.0	1.8	$0.9	1.8
Category 4	0.3	0.3	0.5		0.3	0.3
Total Capital Requirement	19.9	6.8	26.8	10.0	1.2	11.2

* The DTA capital requirement is a function of Core Capital. Both Enterprises have negative Core Capital as of September 30, 2017 and December 31, 2017. In order to calculate the DTA capital requirement, we assume Core Capital is equal to the Risk-Based Capital Requirement without consideration of the DTA capital requirement.

Category 1: 100 percent of DTAs arising from net operating losses and tax credit carryforwards, net of any related valuation allowances and net of DTLs.

Category 2: 100 percent of DTAs arising from temporary differences that could not be realized through net operating loss carry backs, net of related valuation allowances and net of DTLs that exceed 10 percent of adjusted core capital. Adjusted core capital is core capital, per the statute, less DTAs that arise from net operating losses and tax credit carryforwards, net of any related valuation allowances and net of deferred tax liabilities.

Category 3: 20 percent of DTAs arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs that do not exceed 10 percent of adjusted core capital.

Category 4: 8 percent of DTAs arising from temporary differences that could be realized through net operating loss carrybacks, net of related valuation allowances and net of DTLs.

[41] Adjusted core capital is core capital, per the statute, less DTAs that arise from net operating losses and tax credit carryforwards, net of any related valuation allowances and net of deferred tax liabilities.

Table 34 shows the impact of the proposed DTA treatment with the Enterprises' actual negative core capital in the third and fourth quarters of 2017.

TABLE 34—FANNIE MAE AND FREDDIE MAC ESTIMATED RISK-BASED CAPITAL REQUIREMENTS FOR DEFERRED TAX ASSETS ASSUMING CORE CAPITAL AS OF SEPTEMBER 30, 2017

	As of September 30, 2017 (in $billions)			As of December 31, 2017 (in $billions)		
	Fannie Mae	Freddie Mac	Total	Fannie Mae	Freddie Mac	Total
Category 1	$2.5	$1.4	$3.9	$2.5		$2.5
Category 2	24.5	9.8	34.3	14.8	$4.7	19.6
Category 3						
Category 4	0.3	0.3	0.5		0.3	0.3
Total Capital Requirement	27.3	11.5	38.8	17.4	5.0	22.4

Municipal Debt

Municipal debt is debt securities issued by states, local governments, or state agencies such as state housing finance agencies. As municipal debt generally has minimal default risk, the proposed rule would assign a zero credit risk capital requirement to municipal debt. The proposed rule would assign a market risk capital requirement of 760 bps, an operational risk capital requirement of 8 bps, and a going-concern buffer of 75 bps to municipal debt. The 760 basis point market risk capital requirement reflects a combination of the Enterprises' internal model estimates.

The proposed rule would use the single point estimate approach to market risk for a number of reasons. Municipal debt is a shrinking component of the Enterprises' portfolios. A more complicated approach would not be warranted, as it would not result in a material change to the Enterprises' overall capital position. Municipal debt has a simple market risk profile due to the absence of a prepayment option. Additionally, the credit spread for municipal debt is stable across maturities. The single point estimate for market risk capital represents the average of estimates from the Enterprises.

Reverse Mortgages and Reverse Mortgage Securities

The proposed rule would not subject reverse mortgages and securities backed by reverse mortgages to a credit risk capital requirement due to Federal Housing Administration insurance on the mortgages. The proposed rule would assign a market risk capital requirement of 500 bps to reverse mortgages and 410 bps to reverse mortgage securities, an operational risk capital requirement of 8 bps to reverse mortgages and reverse mortgage securities, and a going-concern buffer of 75 bps to reverse mortgages and reverse mortgage securities. The 500 and 410 basis point market risk capital requirements reflect Fannie Mae's internal model estimates since Freddie Mac did not own reverse mortgages.

The rationale for applying the single point estimate approach to market risk for reverse mortgages and reverse mortgage securities is that (i) these assets are a shrinking component of the Enterprises' portfolios and (ii) these assets have low and stable market risk resulting from low prepayment sensitivity. In particular, for reverse mortgages, refinance is rare and not driven by changes in interest rates. As a result, market value on reverse mortgages and reverse mortgage securities is relatively insensitive to prepayment.

Cash and Cash Equivalents

Cash and cash equivalents are highly liquid investment securities that have a maturity at the date of acquisition of three months or less and are readily convertible to known amounts of cash. The proposed rule would assign a zero credit risk capital requirement and a zero market risk capital requirement to cash and cash equivalents as they are not subject to default and market risks. Further, cash and cash equivalents would receive a zero operational risk capital requirement and a zero going-concern buffer.

Single-Family Rentals

The proposed rule would include a credit risk capital requirement for single-family rentals. Single-family rentals are multiple income-producing single-family units owned by an investor for the purpose of renting them and deriving a profit from their operation. The concept of single-family rentals has been traditionally associated with individual-investor single-family units, which are usually covered under the single-family framework and include either single or two-to-four unit assets. However, the single-family rental market also includes investors that own portfolios of more than ten units, and sometimes up to thousands of units across different cities. The Enterprises have explored and have already executed deals on this type of assets.

Although this type of multi-unit ownership cannot be defined as a typical multifamily investment, the income-producing nature would allow the Enterprises to evaluate them as a traditional multifamily investment for the purpose of estimating capital. To do so would require the Enterprises to calculate a DSCR and LTV on the portfolio of single-family rentals, which is a relatively simple calculation once income and values for every property are available. The proposed rule would require the Enterprises to calculate DSCR and LTV in this manner for this type of single-family rental deals, and to subsequently calculate base credit risk capital requirements using the appropriate multifamily FRM or ARM base credit risk capital grid.

Impact

TABLE 35—FANNIE MAE AND FREDDIE MAC COMBINED ESTIMATED RISK-BASED CAPITAL REQUIREMENTS FOR OTHER ASSETS AS OF SEPTEMBER 30, 2017

Total Capital Requirement	33.1	1,002	100
Total UPB, $billions	330.0		

Question 27: FHFA is soliciting comments on the proposed approaches for calculating risk-based capital requirements for other assets and guarantees. What modifications should FHFA consider and why?

9. Unassigned Activities

This section corresponds to Proposed Rule § 1240.48.

Given the continuing evolution and innovation in the financial markets, FHFA recognizes that the Enterprises could continue to develop and purchase new products and engage in other new activities.

The proposed rule would require an Enterprise to provide written notice of an Unassigned Activity, which includes any asset, guarantee, off-balance sheet guarantee, or activity for which the proposed rule does not have an explicit risk-based capital treatment. An Enterprise must provide a proposed capital treatment along with sufficient information about the Unassigned Activity for FHFA to understand the risks and benefits of the activity. The proposed rule would require FHFA to analyze the Unassigned Activity and to provide the Enterprise with written notice of the appropriate capital treatment. If FHFA does not provide the Enterprise with written notice of a treatment in time for the Enterprise to prepare its quarterly capital report, the proposed rule would require an Enterprise to use its proposed capital treatment to determine an interim capital requirement. FHFA will monitor the Enterprises' activities and when appropriate propose amendments to this regulation addressing the treatment of activities that do not have an explicit risk-based capital treatment.

Given the dynamics of the marketplace and the Enterprises' business, it is not possible to construct a regulation that specifies a detailed treatment for every new type of instrument or capture every new type of risk that might emerge from quarter to quarter. It will not always be possible for FHFA to analyze and determine an appropriate treatment for a new asset or activity in time for an Enterprise to file its capital report, either due to the timing of the notice from the Enterprise or due to the complexity of the new product or activity. The proposed rule strikes a balance between accuracy and timeliness by requiring FHFA to determine the appropriate long-term treatment of an Unassigned Activity, while allowing the Enterprises to use their internal models on an interim basis.

D. Minimum Leverage Capital Requirements

This section corresponds to Proposed Rule § 1240.50.

Overview

The proposed rule includes two alternative minimum leverage capital requirement proposals for public comment. Under the first approach, the Enterprises would be required to hold capital equal to 2.5 percent of total assets (as determined in accordance with GAAP) and off-balance sheet guarantees related to securitization activities, regardless of the risk characteristics of the assets and guarantees or how they are held on the Enterprises' balance sheets (the ''2.5 percent alternative''). Under the second approach, the Enterprises would be required to hold capital equal to 1.5 percent of trust assets and 4 percent of non-trust assets (the ''bifurcated alternative''), where trust assets are defined as Fannie Mae mortgage-backed securities or Freddie Mac participation certificates held by third parties and off-balance sheet guarantees related to securitization activities, and non-trust assets are defined as total assets as determined in accordance with GAAP plus off-balance sheet guarantees related to securitization activities minus trust assets. The Enterprises' retained portfolios would be included in non-trust assets.

The considerations for the two alternative approaches to the minimum leverage capital requirement in the proposed rule are discussed below, followed by a more detailed discussion of each alternative. FHFA seeks feedback from commenters on both alternatives to the minimum leverage capital requirement.

Considerations for Establishing an Updated Minimum Leverage Capital Requirement

Establishing an updated minimum leverage capital requirement is an important component of the proposed regulatory capital requirements for the Enterprises. While FHFA believes that the proposed risk-based capital requirements included in this rulemaking reflect a detailed and robust assessment of risk to Fannie Mae and Freddie Mac, FHFA also believes that it is appropriate and prudent to establish a backstop to guard against the potential that the risk-based requirements underestimate the risk of an Enterprises' assets. The Safety and Soundness Act authorizes FHFA to set a higher leverage ratio than the minimum required by the statute, and this proposed rule, under either of the proposed alternatives, would do so.

In considering both the need for and the structure of an updated minimum leverage capital requirement, FHFA has taken into consideration how to best set the minimum leverage requirement as a backstop to the proposed risk-based capital framework. These considerations include the model risk associated with any risk-based measure, the pro-cyclicality of using mark-to-market LTV ratios in the proposed risk-based capital requirement, the funding risks of the Enterprises' business, and the impact of having a leverage ratio serve as the binding capital constraint. Each of these considerations is discussed below.

First, because risk-based capital requirements are subject to a number of assumptions and can change over time, a minimum leverage requirement can serve as a backstop in the event that risk-based requirements become too low. As discussed earlier, risk-based capital frameworks depend on models and, thus, are subject to the risk that the applicable model will underestimate or fail to address a developing risk. In particular, new activities, given their lack of historical performance data, are subject to significant uncertainty. As a result, any models that assess new activities may under-predict risk.

Second, a leverage requirement can serve as a backstop because the proposed risk-based capital requirements are pro-cyclical, while a leverage requirement is risk-invariant. Because the proposed risk-based requirements use mark-to-market LTVs for loans held or guaranteed by the Enterprises in determining capital requirements, as home prices appreciate and LTVs consequently fall, the Enterprises would be allowed to release capital. In this context, a minimum leverage capital requirement could mitigate the amount of capital released as risk-based capital levels fell below the applicable leverage requirement. The housing market can be highly cyclical and downturns are often preceded by rapid and unsustainable home price appreciation, resulting in the potential for the Enterprises to release capital ahead of a downturn when their access to the capital markets may be constrained.

In addition to the two minimum capital requirement alternatives included in this proposed rule, FHFA also has the authority to temporarily increase the Enterprises' leverage requirements through order or regulation to address pro-cyclical or other concerns about the Enterprises' capital levels. It is also important to note that, separate from the leverage requirement proposals discussed in this section, FHFA's authority to address pro-cyclicality concerns also includes tools on the risk-based capital requirements proposed in this rule. Specifically, as is discussed in section II.F, FHFA could make upward adjustments by regulation or order to the risk-based capital requirements under the provisions of the Safety and Soundness Act to take into account changing economic conditions, such as rising house prices and asset levels, and to adjust the risk-based capital requirements for specified products or activities.

Third, ensuring a sufficient minimum leverage capital requirement could also address the funding risks of the Enterprises' business activities. Both in the single-family and multifamily mortgage-backed security guarantee business lines, investors provide the Enterprises a stable source of funding that is match-funded with the mortgage assets that Fannie Mae and Freddie Mac purchase and hold in trust accounts. While these mortgage assets are reflected on the balance sheets of the Enterprises and represent the vast majority of their assets, the funding for these assets has already been provided and cannot be withdrawn during times of market stress.

As discussed previously, this stable funding for trust assets is in contrast to the banking deposits and short-term debt that banks rely on, which could become unavailable during a stress event and force a rapid and disorderly sale of assets into a declining market. While the securitization process does not transfer credit risk from the Enterprises, Fannie Mae and Freddie Mac also currently engage in significant credit risk transfer transactions that transfer a substantial portion of credit risk to private investors. As a result of both their securitization funding and credit risk transfer practices, the risk profile of Enterprise assets held in trusts differs markedly from mortgage assets held by depository institutions.

In contrast, however, the Enterprises' retained portfolio assets do pose funding risk to Fannie Mae and Freddie Mac. These retained portfolio assets must be funded in much the same way that bank assets are generally funded, through the issuance of debt. During conservatorship, Enterprise retained portfolio asset levels have declined considerably since the financial crisis, and the majority of the Enterprises' recent portfolio asset purchases support their core credit guarantee business, in particular the purchase of mortgages via their respective cash windows for aggregation purposes and the repurchase of mortgages out of securitizations for purposes of loss mitigation. The amount of Enterprise legacy assets held for investment has been reduced significantly during conservatorship. The reduction of the Enterprises' retained portfolios is required by limits imposed by the PSPAs and also furthers the conservatorship objectives of reforming the Enterprises' business models and reducing their volume of non-credit-guarantee-related investments and illiquid assets.

Fourth, in setting the minimum leverage capital requirement as a backstop capital measure, FHFA is also considering the potential adverse impact of having the leverage requirement exceed the risk-based requirement and become the binding capital constraint for the Enterprises. Because a leverage requirement is designed to be risk-insensitive, a binding leverage requirement could influence Enterprise decision-making in ways that encourage risk-taking. For instance, during periods of rising home prices, leverage requirements could exceed risk-based capital requirements and this could reduce an Enterprise's economic incentive to differentiate among the relative riskiness of different mortgages. A binding leverage requirement could also reduce an Enterprise's incentive to enter into credit risk transfer transactions.

The two alternatives included in this proposed rule offer different methodologies for establishing the Enterprises' minimum leverage capital requirement, and these methodologies reflect different considerations and trade-offs in weighing the factors discussed above. FHFA requests feedback on how best to balance the benefits of a leverage requirement that would serve as a backstop to the proposed risk-based capital requirements and therefore mitigate the risk that risk-based requirements would be insufficient, with the downsides of a leverage requirement that could influence how the Enterprises evaluate risk.

Asset Base

In the proposed rule, each minimum leverage capital alternative would be applied to total assets as determined in accordance with GAAP and off-balance sheet guarantees related to securitization activities. This would differ from the approach used by commercial banks that are subject to multiple leverage ratio requirements, some of which exclude off-balance sheet items from the asset base. For both the 2.5 percent alternative and the bifurcated alternative, FHFA believes it is appropriate, and generally consistent with the Safety and Soundness Act's capital requirements and the Supplementary Leverage Ratio for banks, to include off-balance sheet guarantees as part of the minimum leverage capital requirement to ensure that these risks are capitalized.

Consistent with the treatment in bank capital regulations and the Safety and Soundness Act, FHFA includes cash and cash equivalents in the asset base for both the 2.5 percent alternative and the bifurcated alternative for the minimum leverage capital requirement.

Under the bifurcated alternative, cash and cash equivalents would be treated as a non-trust asset and receive a 4 percent leverage requirement. Cash and cash equivalents are highly liquid investment securities that have a maturity at the date of acquisition of three months or less and are readily convertible to known amounts of cash. However, cash and cash equivalents remain subject to funding risk in much the same way as other Enterprise portfolio assets. While securitized mortgage assets benefit from matched funding in the Enterprises' single-family and multifamily business lines, funding for short-term, even highly liquid, assets, must be separately obtained. Therefore, FHFA is proposing to include cash and cash equivalents in the asset base for the minimum leverage capital requirement under both of the alternatives included in this proposed rulemaking.

The 2.5 Percent Minimum Leverage Capital Requirement Alternative

FHFA's first proposed alternative for a minimum leverage capital requirement would establish a single leverage requirement of 2.5 percent of total assets (as determined in accordance with GAAP) and off-balance sheet guarantees related to securitization activities, which is referred to here as the 2.5 percent alternative. This compares to the current minimum leverage capital requirement, set by statute, of 2.5 percent of retained portfolio assets, 0.45 percent of mortgage-backed securities outstanding to third parties, and 0.45 percent of other off-balance sheet obligations.

The 2.5 percent alternative would set the proposed threshold based on a number of analyses that are designed to supplement the total proposed risk-based capital framework in identifying the minimum capital that would be required to fund all of an Enterprise's assets through economic and credit cycles, and therefore minimize the probability that the Enterprises would again require public support. The proposed risk-based capital requirements are pro-cyclical in that the capital requirements decrease in favorable economic scenarios and increase in stress economic scenarios. In the absence of a credible minimum leverage capital requirement, an Enterprise could release or redeploy capital during favorable economic periods when the risk-based capital requirements are low, and could be unable to raise sufficient capital to meet increasing risk-based capital requirements in a subsequent stress scenario. In the 2.5 percent alternative, FHFA is proposing a minimum leverage capital requirement that would provide a substantial, risk-insensitive backstop to the total proposed risk-based capital requirements, including credit risk, market risk, operational risk, and the going-concern buffer.

Impact of the 2.5 Percent Minimum Leverage Capital Requirement Alternative

If the proposed 2.5 percent alternative had been in place at the end of the third quarter of 2017, the combined minimum leverage capital requirement would have been $139.5 billion for the Enterprises. Fannie Mae's requirement would have been $83.8 billion based on total ending assets and guarantees of $3.4 trillion, and Freddie Mac's requirement would have been $55.6 billion based on total ending assets and guarantees of $2.2 trillion. Similarly, if the proposed risk-based capital requirements had been in place, Fannie Mae's risk-based capital requirement would have been $115 billion or 3.4 percent, including the going-concern buffer of 75 bps. Similarly, Freddie Mac's risk-based capital requirement would have been $66 billion or 3.0 percent, including the going-concern buffer of 75 bps. Therefore, in considering the proposed risk-based capital requirements, the 2.5 percent minimum leverage capital requirement alternative would represent a backstop to the Enterprises' total proposed risk-based capital requirement including a going-concern buffer.

If the capital requirements in the proposed rule were implemented today, both Enterprises' risk-based capital requirements would, by significant margins, be the binding constraint regardless of which proposed leverage requirement alternative was in place. However, should home prices continue to increase and benign unemployment trends continue, as has occurred over the past several years, and should the credit quality of the Enterprises' new acquisitions continue to remain at historically high levels, FHFA expects that the 2.5 percent alternative would become the binding capital constraint for one or both Enterprises in 2018 or 2019.

Methodology for Developing the 2.5 Percent Minimum Leverage Capital Requirement Alternative

FHFA conducted five analyses that together support a risk-invariant minimum leverage capital requirement of 2.5 percent:

1. Adjusting the 4 percent bank leverage ratio for the relative risk of the Enterprises' business;
2. Determining the capital threshold for bank downgrades and adjusting the threshold for the relative risk of the Enterprises' business;
3. Determining the capital threshold for bank failures and adjusting the threshold for the relative risk of the Enterprises' business;
4. Analyzing the lifetime credit losses on the Enterprises' December 2007 books of business, with adjustments for loans the Enterprises no longer acquire and for credit risk transfers; and
5. Analyzing the CCF risk-based capital requirement on the Enterprises' September 2017 books of business, with adjustments for loans the Enterprises no longer acquire and for credit risk transfers.

These analyses produced estimates for the minimum leverage capital requirement in the 2.2 to 2.8 percent range, and FHFA selected 2.5 percent as the midpoint of the estimates for this proposed leverage requirement alternative. The five analyses are described below.

Adjusting the 4 Percent Bank Leverage Ratio

In the first analysis, FHFA considered the requirements in place for commercial banks. Specifically, FHFA adjusted the commercial bank leverage ratio requirement to recognize the lower risk of the Enterprises' assets compared to risk of the average bank's assets, where risk is defined using Basel risk weights. This adjustment recognizes the Enterprises' concentration in residential mortgage assets, which under the Basel Accords are assigned a 50 percent risk weight.

Under the U.S. implementation of Basel III, U.S. financial regulators require that banks maintain a Tier 1 leverage ratio of 4 percent to be considered adequately capitalized. FHFA adjusted this ratio to take into account the Enterprises' lower risk-weighted asset density (risk-weighted assets divided by total assets) relative to the risk-weighted asset density of commercial banks.

Most of the Enterprises' assets are conforming residential mortgages, which have a 50 percent risk weight in the Basel standardized approach. In contrast, FHFA found that for the 34 bank holding companies subject to CCAR in 2017, the banks' assets had higher risk weights on average than the Enterprises' assets. FHFA calculated the average risk-weighted density as of the fourth quarter of 2016 for the 34 bank holding companies subject to CCAR. The analysis yielded an estimated overall risk-weighted asset density of 72 percent for the banks compared to 50 percent for the Enterprises. This suggests that the risk weighted asset density for the Enterprises' assets is about 69 percent (calculated as 50 percent divided by 72 percent) of the risk weighted asset density for the largest bank holding companies. Through this approach, FHFA estimated a minimum leverage capital requirement for the Enterprises of 2.8 percent (69 percent multiplied by 4 percent).

Determining the Capital Threshold for Bank Downgrades

In the second analysis, FHFA estimated a minimum leverage capital requirement from empirical analyses of bank credit rating downgrades. The Agency reviewed capital levels for banks that experienced downgrades in credit ratings. FHFA found that the number of credit rating downgrades declined markedly for banks with Tier 1 common equity capital levels in excess of 5.5 percent of risk-weighted assets. The credit downgrades reflected a lack of market confidence that the banks could survive as going concerns, despite the banks still having positive levels of capital.

The bank credit rating downgrade analysis was based on 72 banks that had both ratings from Standard & Poor's and total assets over $5 billion during a ten-year study period. The Agency found that banks with a risk-based capital ratio below 5.5 percent had a notable increase in the occurrence of a two-notch or three-or-more-notch rating downgrade within 4 quarters. For example, 53.0 percent of the banks with less than 4 percent risk-based capital experienced a two-notch credit rating downgrade and 37.0 percent experienced a three-or-more-notch downgrade. High rates of credit rating downgrades were also observed for banks with risk-based capital ratios between 4.0 percent and 5.5 percent.[42] Banks with at least 5.5 percent risk-based capital performed substantially better, and had a two-notch downgrade rate of between 7.0 percent and 19.0 percent depending on the risk-based capital ratio group (*e.g.,* 5.5 percent–6.0 percent, 6.0–6.5 percent, etc.), and a three-or-more-notch downgrade rate of between 4.0 percent to 10.0 percent depending on the risk-based capital group.

It was clear from the analysis of credit rating downgrades that considerably better outcomes for depository institutions were associated with a risk-based capital ratio above 5.5 percent. A 50 percent average risk weight for Enterprise assets as applied in the previous analysis of bank leverage ratios corresponds to a minimum leverage capital requirement of 2.8 percent for the Enterprises.

Determining the Capital Threshold for Bank Failures

In the third analysis, FHFA estimated a minimum leverage capital requirement from empirical analyses of bank failures in a manner similar to the analysis for credit rating downgrades. The Agency reviewed capital levels for banks that experienced failures. FHFA found that the number of bank failures declined markedly for banks with Tier 1 common equity capital levels in excess of 5.5 percent of risk-weighted assets.

FHFA's bank failure analysis was based on 122 bank holding companies with assets of over $5 billion each. The Agency reviewed Tier 1 common equity capital ratios for each bank across a nearly 9-year study period (between the fourth quarter of 2004 and the first quarter of 2013). Banks with a risk-based capital ratio below 5.5 percent at the end of any quarter during the study period showed a marked increase in the rate of failure or government takeover. Almost half of the banks with a risk-based capital ratio below 4.0 percent failed. Less severe, but still high rates of failure were observed for banks with risk-based capital ratios between 4.0 percent and 5.5 percent.[43] Banks with at least 5.5 percent risk-based capital over the time horizon performed much better with a failure rate below 5.0 percent.

Similar to the analysis of credit rating downgrades, FHFA found that considerably better outcomes in the bank failure data were associated with a risk-based capital ratio above 5.5 percent. A 50 percent average risk weight for Enterprise assets as applied in the previous analysis of bank leverage ratios corresponds to a minimum leverage capital requirement of 2.8 percent for the Enterprises.

Analyzing the Lifetime Credit Losses on the Enterprises' December 2007 Books of Business

In the fourth analysis, and as discussed above in section II.B, FHFA estimated the Enterprises' lifetime credit losses for the December 31, 2007 book of business, excluding loans that the Enterprises would no longer acquire according to their current acquisition criteria. FHFA also adjusted (*i.e.,* reduced) the Enterprises' lifetime credit losses for the December 31, 2007 book of business to account for current business practices of credit risk transfer. To calculate an Enterprise leverage ratio, FHFA added estimated requirements for market risk, operational risk, and a going-concern buffer to the adjusted lifetime losses on the December 31, 2007 book. Based on this approach, FHFA estimated a minimum leverage capital requirement for the Enterprises of 2.2 percent consisting of adjusted lifetime credit losses of 1.2 percent, market risk capital requirements of 0.2 percent, operational risk capital requirements of 0.08 percent, and a going-concern buffer of 0.75 percent.

Analyzing the Risk-Based Capital Requirements on the Enterprises' June 2017 Books of Business

In the fifth and final analysis, and in order to establish a point of comparison using recent data, FHFA calculated risk-based capital requirements per the proposed rule for all loans held or guaranteed by the Enterprises as of June 30, 2017, excluding assets that the Enterprises no longer acquire. The level of the Enterprises' aggregate risk-based capital requirements as of June 30, 2017 provides a point-in-time benchmark for a minimum, non-risk-based capital backstop to the proposed risk-based capital requirements because of the recent long stretch of favorable economic conditions and several years of the Enterprises acquiring predominately high-credit quality loans. Specifically, as presented below in Figure 2, the FHFA U.S. Purchase-Only House Price Index reached an all-time high in the second quarter of 2017, the U.S. unemployment rate of 4.3% as of May 2017 was at its lowest level in 16 years, and as of June 2017, the average credit scores of the Enterprises' guarantee books of business were at all-time highs (approximately 745), and the average loan-to-value ratios (60 percent) were nearing lows last seen in 2006. The risk-based capital requirements as of June 30, 2017 could represent close to a cyclical low point for the proposed risk-based capital requirements, and would therefore be nearing the point at which a non-risk-based leverage requirement would provide a useful backstop to the risk-based requirements.

[42] The two- and three-or-more-notch downgrade rates were 45%/40% for 4–4.5% capital, 50%/39% for 4.5%–5% capital, and 37%/27% for 5–5.5% capital.

[43] The failure or takeover rate was 25% for 4–4.5% capital, 40% for 4.5%–5% capital, and 13% for 5–5.5% capital.

Source for Panels A and B: Federal Reserve Economic Data (FRED), Federal Reserve Bank of St. Louis

The analysis described above resulted in risk-based capital requirements net of CRT and excluding loans the Enterprises no longer acquire of $61 billion for Fannie Mae, or 2.3 percent of UPB, and $39 billion for Freddie Mac, or 2.4 percent of UPB.

The estimates derived from the Enterprises' 2007 results, 2017 data, current acquisition criteria, and the proposed risk-based capital requirements complement the prior bank-based estimates and further suggest a minimum capital leverage requirement for the Enterprises in the range of 2 percent to 3 percent. FHFA considered factors that would indicate an appropriate requirement more towards either side of the range. Selecting a lower requirement would recognize that the Enterprises have largely passed market risk onto mortgage-backed security investors, while the banks continue to hold large amounts of whole loans on their balance sheet. A lower requirement would also recognize that the Enterprises have more stable funding sources than banking deposits, which are callable. Selecting a higher requirement would recognize that the Enterprises pose a greater level of systemic risk than many of the banks. The Enterprises have an asset base that is less diversified than the banks, which can increase loss severity during periods of stress. After considering the relevant factors, FHFA selected the 2.5 percent mid-point of the range for this proposed minimum leverage capital requirement alternative, which aligns with the estimates derived from the analyses previously cited in this subsection.

The 2.5 Percent Minimum Leverage Capital Requirement Alternative

As illustrated in Table 1 and Table 3, the statutory minimum capital requirement for the Enterprises was far too low during the recent financial crisis. In proposing the 2.5 percent alternative, FHFA considered the need for a leverage requirement to serve as a backstop to risk-based capital requirements, such as those in this proposed rulemaking, that would provide the Enterprises with sufficient capital to continue to operate effectively through all economic and credit cycles while simultaneously providing protection against the model risk inherent in risk-based capital standards, including the possibility that capital relief allocated to the Enterprises' risk transfer mechanisms is overestimated.

While model risk broadly covers errors and omissions in the design and implementation of models, one common manifestation of model risk is the high level of uncertainty around the performance of new products in a stress event given the lack of historical performance data on new products. This was made evident in the recent financial crisis when the risk-based capital rule then in place for the Enterprises did not adequately identify the risk in the Enterprises' assets, reinforcing the need for a leverage ratio to serve as a backstop for total risk-based capital requirements.

In addition, there are also non-economic risks that are typically not captured in a risk-based capital framework. For example, there is a mismatch with risk-based capital being measured on an economic basis, while available capital is measured on an accounting basis. Changes in accounting standards, regulatory standards, or tax law can cause accounting losses, which deplete available capital, potentially contributing to insolvency. The proposed risk-based capital requirements, which are based on estimates of unexpected economic losses, make no provision for non-economic losses.

While an excessively high minimum leverage capital requirement could have adverse consequences on the Enterprises' economic incentives to conduct certain business transactions, the absence of a credible minimum leverage capital requirement could lead an Enterprise to release or redeploy capital during favorable economic periods when the risk-based capital requirements are low and could result in the Enterprise being unable to raise sufficient capital to meet increasing risk-based capital requirements in a subsequent stress scenario. The economic environment in which this rule is being proposed could indicate the approach of such an economic scenario, and could indicate a cyclical low in risk-based capital requirements in light of the large increase in home prices in recent years and the steep drop in national unemployment, combined with the historically high credit quality of recent Enterprise acquisitions. The 2.5 percent alternative could avoid a situation in which declining Enterprise capital levels affect their ability to raise capital and provide the market with a certain level of stability. This alternative would indicate a plan to maintain capital and demonstrate a commitment to safety and soundness, and present a market-facing statement of a significant baseline level of capital in good or bad market conditions.

The Bifurcated Minimum Leverage Capital Requirement Alternative

The second minimum leverage capital requirement alternative included in this proposed rule, the bifurcated alternative, would establish different minimum leverage capital requirements for different Enterprise business segments, which would be applied to total assets (as determined in accordance with GAAP) and off-balance sheet guarantees related to securitization activities. Specifically, under the bifurcated alternative, the Enterprises would be required to hold 4 percent capital for non-trust assets and 1.5 percent capital for trust assets. This compares to the current minimum leverage capital requirement, set by statute, of 2.5 percent of retained portfolio assets, 0.45 percent of mortgage-backed securities outstanding to third parties, and 0.45 percent of other off-balance sheet obligations.

The bifurcated alternative proposes a minimum leverage capital requirement that would differentiate between the greater funding risks of the Enterprises' non-trust assets and the minimal funding risks of the Enterprises' trust assets, while also providing a backstop that is anchored to the proposed risk-based capital framework itself. The proposed approach of a minimum leverage capital requirement equal to 1.5 percent of trust assets would identify the risk-based capital requirements as the ''primary'' capital measure for the Enterprises because it was derived using empirical losses experienced during the recent financial crisis and reflects a refined approach to risk. This approach would result in a combined minimum leverage capital requirement that would more frequently fall below the risk-based capital requirements than the 2.5 percent alternative. As a result, as discussed below, the bifurcated alternative would be less likely to produce a binding leverage requirement that could negatively impact an Enterprises' marginal economic decision-making.

For the Enterprises' non-trust assets, the 4 percent requirement would be comparable to the 4 percent leverage requirement for commercial banks, because these assets face similar stability concerns that motivated the Basel Committee to adopt a leverage ratio on top of the Basel risk-based capital framework in the wake of the recent financial crisis.[44] For the Enterprises' trust assets, the 1.5 percent requirement is calibrated to be comparable to the proposed post-CRT credit risk capital requirements for the Enterprises' single-family and multifamily portfolios as of September 30, 2017. The intention of this 1.5 percent requirement, therefore, would be to provide a backstop to the proposed credit risk capital requirements to address the possibility of credit risk model mis-estimation and pro-cyclicality risks. The 1.5 percent requirement is also calibrated to be lower than the proposed aggregate risk-based capital requirements in order to avoid incentives that could reduce the amount of CRT transactions conducted by the Enterprises and other distortions in the Enterprises' marginal economic decision-making. Finally, the 1.5 percent requirement is calibrated to recognize that the risk composition of the Enterprises' business has fundamentally shifted through conservatorship and the requirements of the PSPAs that limit the Enterprises' retained portfolios to $250 billion.

Under the bifurcated alternative, as under the 2.5 percent alternative, FHFA would retain its authority to increase an Enterprise's leverage requirement by regulation or order if the Agency determined that capital levels had become too low—for example, because of pro-cyclical concerns during a housing bubble—and that it was appropriate to increase these levels. FHFA would also have the authority, as discussed below, to increase the risk-based capital requirements by regulation or order as determined to be appropriate, including as a result of pro-cyclical concerns.[45]

Using the Agency's authority in this way would provide FHFA with the ability to increase capital requirements in the event it was deemed necessary without the negative consequences of a minimum leverage ratio that was the binding constraint, thus discouraging CRT transactions in the interim period. One downside of this authority, however, is that this flexibility could make it more challenging for the Enterprises to make capital allocation decisions as FHFA's use of this authority may be difficult to anticipate.

Impact of the Bifurcated Minimum Leverage Capital Requirement Alternative

If the bifurcated minimum leverage capital requirement alternative had been in place at the end of the third quarter of 2017, the combined requirement for the Enterprises would have been $103 billion or 1.9 percent of assets. Of this, $72 billion would have been for trust assets and $32 billion would have been for non-trust assets. Fannie Mae's requirement would have been $60 billion based on total ending assets of $3.4 trillion, representing a 1.8 percent total minimum leverage requirement, with $44 billion of capital required for trust assets and $16 billion for non-trust assets. Freddie Mac's minimum leverage capital requirement would have been

[44] ''An underlying cause of the global financial crisis was the build-up of excessive on- and off-balance sheet leverage in the banking system. In many cases, banks built up excessive leverage while apparently maintaining strong risk-based capital ratios. At the height of the crisis, financial markets forced the banking sector to reduce its leverage in a manner that amplified downward pressures on asset prices. This deleveraging process exacerbated the feedback loop between losses, falling bank capital and shrinking credit availability.'' Basel Committee on Banking Supervision, ''Basel III leverage ratio framework and disclosure requirements'' (Jan. 2014), p. 1.

[45] This authority is discussed in greater detail in section II.F.

$43 billion based on total ending assets of $2.2 trillion representing a 1.9 percent total minimum leverage requirement, with $28 billion of capital required for trust assets and $16 billion for non-trust assets.

If implemented today, both Enterprises' risk-based capital requirements would, by significant margins, be the binding constraints. Fannie Mae's risk-based capital requirement would have been $115 billion or 3.4 percent as of September 30, 2017, while Freddie Mac's risk-based capital requirement would have been $66 billion or 3.0 percent as of September 30, 2017.

TABLE 36—BIFURCATED MINIMUM LEVERAGE CAPITAL REQUIREMENT ALTERNATIVE COMPARISON TO THE PROPOSED RISK-BASED CAPITAL REQUIREMENTS

	Fannie Mae	Freddie Mac	Enterprises combined
	Capital requirement ($billions)	Capital requirement ($billions)	Capital requirement ($billions)
Bifurcated Alternative	$60.4	$43.1	$103.5
Risk-Based Capital Requirement	$115.0	$65.9	$180.9
Bifurcated Alternative as % of Risk-based Capital Requirement	*53%*	*65%*	*57%*
Going-Concern Buffer	($24.0)	($15.9)	($39.9)
Risk-Based Capital Requirement Less Going-Concern Buffer	$91.0	$50.0	$141.0
Bifurcated Alternative as % of Risk-based Capital Requirement Less Going-Concern Buffer	*66%*	*86%*	*73%*
Net Credit Risk Capital Requirement *	$70.5	$41.5	$112.0
Bifurcated Alternative as % of Net Credit Risk Capital Requirement	*86%*	*104%*	*92%*
Credit Risk Transferred	($11.5)	($10.0)	($21.5)

* Risk-based capital requirement less going-concern buffer, market risk, operational risk, and DTA capital requirements.

Methodology for Developing the Bifurcated Minimum Leverage Capital Requirement Alternative

The bifurcated alternative considers the relative funding risks of the Enterprises' trust assets compared to the Enterprises' non-trust assets, and includes different requirements for each of these categories. In developing the bifurcated alternative, FHFA considered how to design the leverage requirement so it would serve as a backstop for the risk-based capital requirements proposed in this rulemaking without adversely impacting the Enterprises' marginal economic decision-making. For the non-trust asset component of the bifurcated alternative, FHFA further considered its comparability to the bank leverage requirement. For the trust asset component of the bifurcated alternative, FHFA considered its comparability to the credit risk capital requirements in the proposed rule.

Funding and Other Risks of the Enterprises' Business Model

As discussed earlier, the Enterprises' assets can be distinguished between non-trust assets funded by debt and derivatives, which could be subject to deleveraging pressures, and MBS and participation certificate trust assets, which are not funded by the Enterprises or subject to such pressure, and consequently would have a lower leverage requirement under the bifurcated alternative. That distinction is also consistent with the distinction made in the Safety and Soundness Act minimum leverage ratios between on-balance sheet assets (under then-applicable accounting treatment) and off-balance sheet assets, with the latter having a much lower leverage ratio. While FHFA believes that both of the statutory leverage minimums are much too low to be safe and sound, the concept of different ratios for different aspects of the Enterprises' business could be implemented at higher levels as proposed under the bifurcated alternative. The relative funding and other risks of the Enterprises' trust assets and non-trust assets are described below.

Trust Assets

For the Enterprises' credit guarantee business, the bifurcated minimum leverage capital requirement alternative would require less capital for mortgage assets held in trust accounts than for non-trust assets (including those held in the retained portfolio). This lower level reflects that both Fannie Mae and Freddie Mac purchase single-family and multifamily mortgages that they package into mortgage-backed securities and sell to investors, which substantially reduces the funding risk of purchasing these mortgage assets.

On the single-family side, the Enterprises operate nearly identical securitization models. Fannie Mae and Freddie Mac sell MBS to investors through either of two methods—first, where lenders provide loans to an Enterprise in exchange for mortgage-backed securities based on those same loans, or second where lenders sell loans to an Enterprise in exchange for cash. When purchasing loans through the second method, the Enterprise aggregates the loans, securitizes them, and then sells the resulting MBS to investors for cash. In both cases, the Enterprises guarantee the timely payment of principal and interest to MBS investors and charge a guarantee fee for doing so.

The single-family securitization process provides the Enterprises with a stable funding source that is match-funded with the mortgage assets they purchase. The securitizations are consolidated on the Enterprises' balance sheets, showing both the mortgage assets held in trust accounts as well as the payments owed to MBS investors. Investments in MBS cannot be withdrawn from existing securities during times of market stress, which differentiates them from the banking deposits and short-term debt relied upon by banks, which can leave banks in need of new funding at times when debt funding becomes harder and more expensive to obtain. In contrast, the Enterprises' stable funding reduces risk to the Enterprises during times of market stress and economic downturns.

In addition to transferring funding risk to investors, the Enterprises transfer other risks of single-family mortgages held in trust accounts in several ways. The securitization process itself results in transferring the interest rate and market risk of these mortgages to investors. In addition, because the securitization process does not transfer the credit risk of securitized single-family mortgages, the Enterprises have also developed credit risk transfer programs that transfer a substantial portion of the credit risk on these loans to private investors through separate CRT transactions. The credit risk of an individual loan is the same whether it is securitized or held as a whole loan in a retained portfolio, but the Enterprises' existing CRT programs currently focus on transferring credit risk on loans held in trust accounts.

The resulting risks the Enterprises must manage for single-family mortgage assets held in trust accounts differ substantially from the risks faced by the Enterprises and banks from the assets they hold in their retained portfolios—both when looking at the overall asset composition of banks and the relative risk of the mortgage assets held on bank balance sheets. Most of the Enterprises' assets are conforming residential mortgages, which have a 50 percent risk weight in the Basel standardized approach. When FHFA looked at the average risk weight for a group of large banks, as discussed earlier, it estimated an overall risk-weighted asset density of 72 percent for the banks compared to 50 percent for residential mortgages guaranteed by the Enterprises. In addition, banks hold a greater degree of risk for the whole residential mortgage loans on their balance sheets compared to Enterprise mortgage assets held in trust accounts. First, whole loans held on-balance sheet do not benefit from the match-funding securitization benefit of transferring interest rate and market risk to investors. Second, banks also do not have CRT programs comparable to the Enterprises to transfer the credit risk of these loans to other private actors.

With respect to the Enterprises' multifamily business lines, the Enterprises use different business models but both multifamily credit guarantee businesses involve securitizing the multifamily loans each company purchases and providing for credit risk sharing with the private sector. Fannie Mae primarily utilizes a loss-sharing model referred to as DUS (Delegated Underwriting and Servicing), and Freddie Mac predominately uses a structured mortgage-backed securities model referred to as K-deals.

Fannie Mae's DUS program delegates most underwriting of multifamily loans to a set of approved lenders. In general, the vast majority of multifamily loans purchased by Fannie Mae are individually securitized in a trust and sold to investors as MBS as opposed to held on Fannie Mae's balance sheet as whole loans. These lenders usually participate in loss-sharing agreements with Fannie Mae under which they agree to take on a pro rata share of losses. Nearly every multifamily loan purchased by Fannie Mae includes a loss-sharing agreement with the originating lender. The amount of loss borne by the lender varies based on their financial strength, but a majority of purchased loans include a significant portion of risk shared with the lender (between 25 and 33 percent of the unpaid principal balance). As with its single-family business line, Fannie Mae guarantees the timely payment of principal and interest on the multifamily MBS it issues.

Freddie Mac's principal multifamily model—referred to as K-deals—involves purchasing and aggregating multifamily loans and then securitizing those loans. Once the loans are aggregated, Freddie Mac sells a pool of them to a third party trust. The trust issues subordinated tranches of MBS, which are sold, without a guarantee, to investors. The subordinated tranches, in general, represent between 15 and 17 percent of underlying UPB of the mortgage pool and assume a first loss position in the securitization structure. The trust also issues senior tranches representing the balance of the mortgage pool, which are then purchased by Freddie Mac. Freddie Mac places the senior tranches of securities in a trust that issues pass-through certificates (K-certificates) that Freddie Mac guarantees and sells. This securitization structure transfers the vast majority of the underlying credit risk from these mortgages, as well as all the funding risk.

Despite the difference in executions, both Enterprises' multifamily models result in the same match-funding that exists for single-family securitizations, and, with the exception of Freddie Mac's K-deals, the senior tranches of which are reported as off-balance sheet guarantees, both the multifamily assets held in trust accounts and the liabilities owed to multifamily investors are reflected on the Enterprises' balance sheets. Like the Enterprises' single-family securitizations, the approach to securitizing and transferring credit risk on multifamily loans also distinguishes it from whole multifamily loans held on a bank's balance sheet.

Non-Trust Assets

The bifurcated minimum leverage capital requirement alternative would require more capital for the Enterprises' non-trust assets, including assets held in the Enterprises' retained portfolios, than for trust assets, which takes into consideration the higher risks the Enterprises must manage for these assets. Unlike their credit guarantee business, the Enterprises' retained portfolios expose the companies to leverage and funding risks for these assets, as well as interest rate, operational, and credit risk.

Prior to conservatorship, the Enterprises held large retained portfolios to generate investment returns. While in conservatorship, the Enterprises have substantially reduced their legacy asset levels but continue to hold assets in their retained portfolios for three purposes that support their credit guarantee business: (1) Purchasing loans to support single-family and multifamily loan aggregation for subsequent securitizations; (2) purchasing delinquent loans out of MBS and engaging in loss mitigation options with borrowers; and (3) supporting limited, approved affordable housing objectives where securitization is not yet a viable market option. Single-family loan aggregation may expose the Enterprises to credit, interest rate, and funding risk as Enterprises hold onto newly originated loans ahead of securitization. The Enterprises hold these loans on balance sheet for a limited period, generally no more than 90 days, in order to aggregate sufficient quantities before securitization. In addition, Freddie Mac's multifamily business includes a similar aggregation function, whereas Fannie Mae's multifamily MBS are primarily single loan securities and, thus, do not require significant portfolio capacity for loan aggregation.

The Enterprises have reduced their retained portfolios by a combined 60 percent since entering conservatorship, which has reduced their overall risk exposure but has not eliminated risk for the remaining assets held in their retained portfolios. These assets include some pre-conservatorship assets held on their books, such as PLS, although the Enterprises have disposed of the majority of these assets.

Both companies issue unsecured debt to fund their retained portfolios holdings, and this debt exposes the companies to funding risk for retained portfolio assets, which mortgage assets held in trust accounts do not have. In times of market stress or economic downturns, as debt matures the

Enterprises would need to issue new, unsecured debt in order to fund and support assets already held on their retained portfolios. Because this funding could be more expensive or harder to obtain in a stressed market, this could result in increased risk to the Enterprise.

The nature of the Enterprises' retained portfolios makes these assets more comparable to the risks banks have from assets held on their balance sheets. In addition to having more funding risk, the Enterprises must also manage interest rate, operational, and credit risk for the mortgage assets held in their retained portfolio, which is like the risks managed by banks for whole mortgage loans.

By specifying a higher leverage requirement for non-trust assets under the bifurcated alternative, the minimum leverage capital requirement would significantly increase in the event the Enterprises' grew their retained portfolio in the future, as could occur during a downturn if the Enterprises purchased significant numbers of newly delinquent loans out of mortgage-backed securities in order to mitigate losses and facilitate loss mitigation options for borrowers. Conversely, under the bifurcated alternative, the minimum leverage capital requirement for the Enterprises could decline in the future as the Enterprises continue to dispose of legacy retained portfolio assets and to sell or re-securitize seriously delinquent or re-performing loans.

Minimum Leverage Requirement as a Backstop to the Proposed Risk-Based Capital Requirements

The bifurcated alternative seeks to calibrate the minimum leverage requirement so that it provides a backstop to the proposed risk-based capital requirements, but with less likelihood that it becomes the binding capital constraint for the Enterprises. The bifurcated alternative identifies the proposed risk-based capital requirements as the primary or benchmark capital measure for the Enterprises. Such an approach would rely on the view that the proposed risk-based capital requirements included in this rulemaking are a detailed and robust assessment of risk to Fannie Mae and Freddie Mac and that the purpose of the minimum leverage capital requirement would be to serve as a backstop to guard against the potential that the risk-based requirements would underestimate the risk of an Enterprises' assets, due to model risk or pro-cyclicality for example.

As detailed earlier, the risk-based capital portion of the proposed rule provides a granular assessment of credit risk specific to different mortgage loan categories, as well as market risk and operational risk components. The proposed risk-based requirements are, in part, modeled on empirical losses experienced by the Enterprises as a result of the recent severe financial crisis over the full life of the loans. The capital required for the Enterprises would be required and in place at the date of loan acquisition and would not take into account any revenues from guarantee fees that they will earn. On top of these risk-based components, the proposed rule includes a risk-insensitive going-concern buffer as part of the risk-based capital requirements to ensure that an Enterprise could continue to write new business for what is projected to be a year or two following a period of market stress or a severe economic downturn.

The leverage requirements under the proposed bifurcated alternative also take into consideration the potential impacts that a binding minimum leverage requirement could have on an Enterprise's economic incentives to conduct—or not conduct—certain business transactions. This impact on business transactions could be felt across an Enterprises' business, including which mortgage loans to purchase for securitization, whether to buy or sell particular assets for their retained portfolios, whether to engage in CRT transactions and which transactions to engage in, and what liquidity positions to hold for periods of market stress. The economic incentives created by a binding leverage ratio could increase the overall risk profile of an Enterprises' book of business relative to its current operations. As a result, while a binding minimum leverage requirement would result in higher Enterprise capital levels, such a requirement would not necessarily make an Enterprise more safe and sound.

More specifically, under a binding minimum leverage requirement, an Enterprise could have reduced economic incentives to differentiate among the relative riskiness of different mortgage loans purchased for securitization. For example, under a scenario where the total risk-based capital requirement was 2.5 percent and the minimum leverage requirement was 4 percent, an Enterprise would have an economic incentive to increase the risk-level of its aggregate loan purchases up to the 4 percent level since the Enterprise would be required to hold 4 percent capital regardless of the riskiness of its assets. This could encourage an Enterprise to purchase loans with multiple risk layers—such as loans with higher LTVs, adjustable rates, and investor owned properties—in order to earn enough of a return to be commensurate with the capital requirement. Conversely, under this hypothetical, an Enterprise would have a disincentive to purchase lower-risk loans—such as loans with lower LTVs and 15-year terms—because they would make it more difficult to earn a sufficient return relative to the binding capital requirement. Taken together, these economic incentives could lead an Enterprise to purchase more loans with multiple risk-layering features that could, in turn, result in a higher risk composition of assets. By contrast, under the proposed risk-based capital rule, whenever the Enterprise purchases or guarantees a riskier asset, its required capital would automatically increase. If the minimum leverage requirement were the binding capital constraint and did not distinguish between retained portfolio and trust assets, an Enterprise would also have an economic incentive to increase the risk of assets held or reduce holding of low-risk assets in their retained portfolio until the risk-based capital requirement increases to the level of the minimum leverage requirement.

A binding minimum leverage ratio could also have an impact on the Enterprises' incentives to conduct credit risk transfer transactions. In this proposed rule, an Enterprise would receive capital relief for CRT transactions under the risk-based capital framework but not the minimum leverage requirement. As a result, a minimum leverage ratio that is set too high could lead to a capital requirement that exceeds the post-CRT risk-based capital requirement. An example helps illustrate this dynamic. If an Enterprise transferred credit risk to private investors through fully-funded STACR or CAS transactions with no counterparty exposure, an Enterprise's pre-CRT risk-based capital requirement would be reduced to account for the credit risk transferred for these loans. For example, a pre-CRT risk-based requirement of 4.5 percent could be reduced to a post-CRT risk-based requirement of 2 percent. However, a minimum leverage requirement that is set at 4 percent would become the binding capital requirement, because it would not be reduced by the equivalent amount of credit risk transferred through CRT transactions.

Under this example, a minimum leverage requirement of 4 percent would likely result in an Enterprise declining to conduct these CRT transactions because the Enterprise would need to pay for credit risk protection twice—

once through the cost of holding more capital than required under the risk-based capital requirement and a second time through the cost of paying private investors for the credit risk protection provided through CRT transactions.

As illustrated by this example, it is important to consider how a minimum leverage requirement and the proposed risk-based capital requirements would interact with one another, and what the resulting effect would be on the Enterprises' incentives to conduct CRT transactions or other risk reducing transactions. As conservator of the Enterprises, FHFA has required Fannie Mae and Freddie Mac to develop CRT programs that transfer a meaningful amount of credit risk to private investors in an economically sensible manner. FHFA believes that these programs are an effective way to reduce risk to the Enterprises and, therefore, to taxpayers. Enterprise CRT transactions effectively transfer credit risk to the private sector, and, for many transactions, do so in a way that is fully funded up-front, without counterparty risk. In other CRT transactions, the Enterprises require that the transactions be partially collateralized to mitigate counterparty risk. If capital requirements caused the Enterprises to reduce the amount of CRT transactions they conducted, this could result in a greater concentration of credit risk with the Enterprises and could be counter to FHFA's overall objective of reducing credit risk to the Enterprises and taxpayers.

Proposed Leverage Requirements Under the Bifurcated Alternative

The total leverage requirement under the proposed bifurcated alternative would be the result of blending the 4 percent requirement for non-trust assets and the 1.5 percent requirement for trust assets. While the bifurcated alternative would provide an overall minimum leverage capital requirement that would almost certainly be less than the 2.5 percent alternative, it could also provide a backstop to guard against Enterprise capital becoming too low. The requirements included in the bifurcated alternative are intended to limit the instances in which the minimum leverage capital requirement would serve as the Enterprises' binding capital constraint and, as a result, limit the negative impacts of a binding leverage requirement.

The proposed leverage requirements under the bifurcated alternative would produce a total leverage requirement that is calibrated to provide a significant backstop to the post-CRT credit risk capital component of the proposed risk-based capital requirements for both single-family and multifamily whole loans and guarantees currently on the Enterprises' balance sheets. For Fannie Mae, the bifurcated alternative would produce a 1.8 percent minimum leverage requirement as of September 30, 2017. The total leverage requirement of 1.8 percent compares to a total risk-based capital requirement of 3.4 percent as currently calculated under the proposed rule, which includes credit risk, operational risk, market risk, and the going-concern buffer, and 2.7 percent excluding the going-concern buffer. In making a comparison specifically with the credit risk component of the proposed risk-based capital framework, the 1.8 percent total leverage requirement compares to a 1.8 percent post-CRT net credit risk capital requirement. As a result, the 1.8 percent leverage level would reach 100 percent of Fannie Mae's proposed post-CRT net credit risk capital requirement for the third quarter of 2017.

For Freddie Mac, the proposed leverage requirements under the bifurcated alternative would produce a 1.9 percent minimum leverage requirement as of September 30, 2017. The total leverage requirement of 1.9 percent compares to a total risk-based capital requirement of 3.0 percent as currently calculated under the proposed rule, which includes credit risk, operational risk, market risk, and the going-concern buffer, and 2.3 percent excluding the going-concern buffer. In making a comparison specifically with the credit risk component of the proposed risk-based capital framework, the 1.9 percent total leverage requirement compares to a 1.4 percent post-CRT net credit risk capital requirement. As a result, the 1.9 percent leverage level would reach 135 percent of Freddie Mac's proposed post-CRT net credit risk capital requirement for the third quarter of 2017.

Non-Trust Assets

As noted earlier, under the bifurcated alternative the proposed 4 percent leverage requirement for the Enterprises' non-trust assets, which include the retained portfolios, would be comparable to the leverage requirement for depository institutions. This approach would align the riskiest part of the Enterprises' business, the part that is most comparable with the funding risk of depository institutions, with the leverage requirement established by other federal financial regulators.[46]

Because cash and cash equivalents are components of the retained portfolio, the bifurcated alternative would include cash and cash equivalents in the asset base for the 4 percent minimum leverage capital requirement. While cash and cash equivalents are highly liquid investment securities, they remain subject to funding risk in much the same way as other Enterprise portfolio assets, although because of their liquidity deleveraging with respect to them would not create the same downward pressure on asset values as for other types of assets.

Trust Assets

The bifurcated alternative includes a 1.5 percent leverage requirement for trust assets.[47] This proposed requirement seeks to balance the objectives of providing a sufficient backstop to the risk-based capital requirements and avoiding negative economic incentives that could reduce the usage of CRT transactions or otherwise increase Enterprise risk levels.

The 1.5 percent requirement for trust assets under the proposed bifurcated alternative could provide a significant backstop when compared to the credit risk capital requirements for Enterprise trust assets under the proposed risk-based capital requirements. In this comparison, FHFA has defined trust assets to include new single-family acquisitions, performing single-family seasoned loans, and all multifamily loans held in trust accounts. Trust assets exclude re-performing single-family loans and non-performing single-family loans that are now held by the Enterprises in their retained portfolios, and these assets would have a 4 percent minimum leverage requirement under the bifurcated alternative.

For Fannie Mae, the proposed 1.5 percent leverage requirement for trust assets would compare to a 1.3 percent

[46] Federal financial regulators have established a 4 percent leverage ratio for depository institutions and the asset base does not include off-balance sheet assets. In addition, regulators have established a 3 percent supplemental leverage ratio that applies to designated depository institutions and the asset base includes off-balance sheet assets. Similarly, the enhanced supplemental leverage ratio is set at 5 percent and applies to an even narrower subset of depository institutions and the asset base also includes off-balance sheet assets.

[47] The bifurcated alternative would also assign the 1.5 percent minimum leverage ratio to assets categorized under accounting standards as off-balance sheet assets. Both Enterprises have limited legacy off-balance sheet assets. In addition, Freddie Mac's guaranteed senior tranches of its multifamily securities, most commonly through its K-deal securitizations, are the only off-balance sheet assets either Enterprise currently acquires. These guarantees do constitute credit risk that Freddie Mac assumes, although the deep subordination provided by the junior tranches that are not guaranteed and are sold to private investors provide significant credit protection to these guarantees.

post-CRT net credit risk capital requirement. As a result, the 1.5 percent leverage requirement would reach 115 percent of Fannie Mae's proposed post-CRT net credit risk capital requirement for all trust assets. For Freddie Mac, the proposed 1.5 percent leverage requirement for trust assets would compare to a 1.1 percent post-CRT net credit risk capital requirement. As a result, the 1.5 percent leverage requirement would reach 136 percent of Freddie Mac's proposed post-CRT net credit risk capital requirement for all trust assets as of the third quarter of 2017.

While this bifurcated minimum leverage capital requirement alternative could provide a significant backstop for the capital necessary to withstand credit losses in a severe stress scenario, the proposed risk-based capital requirements would in most circumstances remain the binding capital constraint for the Enterprises even after accounting for CRT. This is because the post-CRT net credit risk capital requirement is only one component of the total risk-based capital framework proposed in this rulemaking, which also has components for market risk, operational risk, and a going-concern buffer.

Considering the Enterprises' current use of CRT, a 1.5 percent minimum leverage requirement for trust assets could provide additional protection during a period of rapid appreciation in home prices beyond the protection provided by the proposed credit risk capital requirements, and could be a sufficient backstop for potential shortcomings of the proposed credit risk capital requirements such as mis-estimations of stress losses. Should FHFA determine that the leverage requirement is insufficient to address rapid and unsustainable home price appreciation, FHFA could also use its authority, described above, to adjust by order or regulation either the risk-based capital requirement, the leverage requirement, or both.

Question 28: Should FHFA consider additional capital buffers, such as buffers to address pro-cyclical risks, in addition to the leverage ratio and FHFA's existing authority to temporarily increase Enterprise leverage requirements and why?

Question 29: FHFA is soliciting comments on the advantages and disadvantages of setting a single minimum leverage capital requirement under the 2.5 percent alternative. FHFA is seeking views both on this general approach and the minimum requirements proposed in the 2.5 percent alternative. FHFA is requesting data and supplementary analysis that would support consideration of alternative requirements for a single minimum capital requirement.

Question 30: FHFA is soliciting comments on the advantages and disadvantages of the bifurcated alternative and establishing minimum leverage capital requirements of 1.5 percent for mortgage assets held in trusts and 4 percent for retained portfolio assets. FHFA is seeking views both on this general approach and the minimum requirements proposed in the bifurcated alternative. FHFA is requesting data and supplementary analysis that would support consideration of alternative approaches or requirements.

Question 31: FHFA is soliciting comments that provide feedback on the relative advantages and disadvantages of the 2.5 percent alternative and the bifurcated alternative.

Question 32: Instead of adopting the 2.5 percent alternative or bifurcated alternative as proposed, should FHFA, instead, adopt another approach to the minimum leverage capital requirement that provides a separate leverage requirement specifically for assets that are part of credit risk transfer transactions? If so, why? FHFA is requesting data and supplementary analysis that would support consideration of alternative measures.

Question 33: Given the high quality and short duration of cash and cash equivalent assets, should FHFA consider a lower and separate leverage ratio for these assets so as to not discourage the Enterprises from holding cash and cash equivalent assets to support liquidity? For the bifurcated alternative, should cash and cash equivalent assets be subject to the 1.5 percent leverage requirement rather than the 4 percent requirement? FHFA is requesting data and supplementary analysis that would support consideration of alternative measures.

Question 34: FHFA is soliciting comments on the advantages and disadvantages of including off-balance sheet exposures in the 2.5 percent leverage ratio alternative, and whether off-balance sheet assets should be included in the non-trust assets (which includes the retained portfolio) or trust assets component of the bifurcated alternative. FHFA is requesting data and supplementary analysis that would support alternative perspectives.

E. Definition of Capital

This section corresponds to Proposed Rule § 1240.1(a).

The Safety and Soundness Act includes definitions of core capital and total capital. FHFA does not have the authority to change those definitions in the proposed rule, in contrast to the banking regulators who have greater definitional flexibility under their statutes. Therefore, the proposed rule uses the statutory definitions of core capital and total capital for the Enterprises.

Using the statutory definitions, core capital means the sum of the following (as determined in accordance with GAAP): (i) The par or stated value of outstanding common stock; (ii) the par or stated value of outstanding perpetual, noncumulative preferred stock; (iii) paid-in capital; and (iv) retained earnings.

The statutory definition of core capital for the Enterprises does not reflect any specific considerations for deferred tax assets (DTAs). DTAs are recognized based on the expected future tax consequences related to existing temporary differences between the financial reporting and tax reporting of existing assets and liabilities given established tax rates. In general, DTAs are considered a component of capital because these assets are capable of absorbing and offsetting losses through the reduction to taxes. However, DTAs may provide minimal to no loss-absorbing capability during a period of stress as recoverability (via taxable income) may become uncertain.

In 2008, during the financial crisis, both Enterprises concluded that the realization of existing DTAs was uncertain based on estimated future taxable income. Accordingly, both Enterprises established partial valuation allowances on DTAs. A valuation allowance on DTAs is typically established when all or a portion of DTAs is unlikely to be realized considering projections of future taxable income, resulting in a non-cash charge to income and a reduction to the retained earnings component of capital. Fannie Mae established a partial valuation allowance on DTAs of $30.8 billion in 2008, which was a major contributor to the overall capital reduction of $66.5 billion at Fannie Mae in 2008. Similarly, Freddie Mac established a partial valuation allowance on DTAs of $22.4 billion in 2008, which was also a major contributor to the overall capital reduction of $71.4 billion at Freddie Mac in 2008.

Other financial regulators recognize the limited loss absorbing capability of DTAs, and therefore limit the amount of DTAs that may be included in CET1 capital. Under Basel III guidance, federally regulated bank holding companies are subject to threshold deductions, up to and including full deductions, associated with DTAs related to temporary timing differences.

Basel III capital rules also include accumulated other comprehensive income (AOCI) in the determination of regulatory Tier 1 capital. For the Enterprises, the statutory definition of core capital does not include AOCI. Generally, AOCI primarily consists of unrealized gains and losses on available-for-sale securities, which are measured at fair value on the Enterprises' consolidated balance sheets. Consequently, AOCI can be positive or negative depending on the prevailing market conditions for the Enterprises' available-for-sale securities. For example, at the end of 2008, AOCI at Fannie Mae and Freddie Mac was negative $7.7 billion and negative $26.4 billion, respectively. As a result, by excluding AOCI from core capital, an Enterprise may be adequately capitalized for regulatory purposes, but insolvent under GAAP.

Total capital, using the statutory definition, means the sum of the following: (1) Core capital of an Enterprise; (2) a general allowance for foreclosure losses, which (i) shall include an allowance for portfolio mortgage losses, non-reimbursable foreclosure costs on government claims, and an allowance for liabilities reflected on the balance sheet for the Enterprise for estimated foreclosure losses on mortgage-backed securities; and (ii) shall not include any reserves of the Enterprise made or held against specific assets; and (3) any other amounts from sources of funds available to absorb losses incurred by the Enterprise, that the Director by regulation determines are appropriate to include in determining total capital.

Question 35: FHFA is soliciting comments on the capital treatment of DTAs and AOCI. How should FHFA incorporate the potential impact of DTAs and AOCI, given that FHFA cannot change the definition of core capital as provided in the statute? What additional modifications to the proposed capital requirement for DTAs should FHFA consider, and why? What additional modifications to the proposed capital requirement for AOCI should FHFA consider, and why? Is AOCI a suitable other source of loss-absorbing capacity for purposes of the statutory definition of total capital?

Question 36: FHFA is soliciting comments on the capital treatment of outstanding perpetual, noncumulative preferred stock. Given that FHFA cannot change the definition of core capital as provided in the statute, what modifications should FHFA consider and why?

Question 37: Given that loss reserves are for expected losses and capital is for unexpected losses, FHFA is soliciting comments on the appropriateness of including loss reserves in the definition of total capital. Should loss reserves be added to the proposed risk-based capital requirements in order to offset their inclusion in total capital?

F. Temporary Adjustments to Minimum Leverage and Risk-Based Capital Requirements

FHFA has additional existing regulatory flexibility so that capital requirements can be adjusted by order to address periods of heightened risk. While the proposed risk-based and leverage capital requirements may be amended by subsequent regulation, revising them would generally require soliciting and incorporating public input and would likely be time-intensive. This process would make it difficult for the capital requirements to quickly address new developments and anticipate rapidly emerging risks. The current provisions authorizing FHFA to adjust both risk-based and minimum leverage capital requirements allow FHFA to respond more quickly to market and business developments and require greater retention of capital when circumstances warrant it. This additional flexibility also mitigates the pro-cyclicality of risk-based capital standards.

Risk-based capital requirements may fail to adequately capture the risks facing an institution. For example, any capital framework that depends on models to assign risk-weights will be subject to model estimation error risk. In addition, such an approach may not adequately account for the risk related to a new asset or product. As discussed earlier, new or previously unassigned activities would be given an interim risk-weighting under the proposed risk-based capital requirements. The lack of historical performance data for new products increases the risk that an interim risk-weight assessment may prove inadequate and that this risk would be compounded by growth of the new product.

Risk-based capital requirements are sensitive to changes in house prices because risk weights are tied to LTV ratios. During periods of rapid house price appreciation, risk-based capital requirements for the Enterprises will fall as LTVs fall. As the experience from the most recent financial crisis reflects, housing downturns are often preceded by rapid house price appreciation. This means that the risk-based capital requirements, considered in isolation, can be pro-cyclical and can lead to the shedding of loss-absorbing capital ahead of a period of sustained credit losses.

HERA anticipated the need for flexibility in developing capital standards and granted FHFA discretion to make capital adjustments for both risk-based capital requirements and leverage requirements in order to maintain the safety and soundness of the Enterprises. In 2011, FHFA promulgated regulations describing how FHFA could implement a temporary increase through order in the leverage requirements under HERA.[48] Under the regulation, FHFA may consider different factors in making a determination to increase minimum leverage capital requirements, including the value of Enterprise assets; the Enterprises' ability to access liquidity as well as credit and market risk; initiatives that entail heightened risks; current and potential declines in Enterprise capital; housing finance market conditions; and other conditions as described by the Director.

This authority provides FHFA with the flexibility to adjust leverage requirements in an overheating mortgage market when risk-based capital requirements may otherwise lead to the shedding of loss-absorbing capital. This authority also provides FHFA with the flexibility, using the leverage ratio, to address the potential inadequacy of capital requirements for new products and it provides FHFA with a way to mitigate a latent modeling error on an interim basis while risk-based capital requirements are being corrected.

FHFA also possesses statutory flexibility with respect to the risk-based capital requirements themselves. While the authority to increase minimum leverage capital requirements can mitigate some of the pro-cyclicality and other issues inherent in a model-based set of standards, it can only do so indirectly by requiring more capital to be held across all asset classes to which the leverage requirement applies. For this reason, FHFA wishes to highlight its statutory authority to adjust the risk-based capital requirements for particular asset classes directly during periods of heightened risk, when the risk-based capital requirements might otherwise be inadequate. Elaborating on the earlier example, sustained single-family house

[48] 12 CFR part 1225. ''FHFA is responsible for ensuring the safe and sound operation of regulated entities. In furtherance of that responsibility, this part sets forth standards and procedures FHFA will employ to determine whether to require or rescind a temporary increase in the minimum capital levels for a regulated entity or entities pursuant to 12 U.S.C. 4612(d).''

price appreciation may suggest that the single-family housing sector is overheating ahead of a downturn. In this scenario, home prices may be artificially inflated and LTV ratios would fall, allowing the Enterprises to release capital. FHFA's ability to step in to adjust capital treatment for single-family loans, or to augment the single-family businesses' going-concern buffer, during this period would directly address the risk that risk-based capital treatment for these assets may become inadequate.

Authority to adjust the minimum leverage capital requirement can address this risk as well, but does so in a less targeted way. Relying on the minimal leverage capital adjustment exclusively may lead to raising Enterprise-wide capital requirements when a more narrow adjustment would suffice from a safety and soundness perspective. This overly-broad approach may lead to skewed Enterprise decision-making as the leverage requirement becomes greater and approaches becoming the binding capital allocation restraint. This concern is discussed in greater detail in the section II.D.

FHFA's existing authority to adjust risk-based capital requirements comes from the Safety and Soundness Act. Section 1362(e) provides FHFA with authority to implement additional capital requirements with respect to any product or activity by the Enterprises ''as the Director considers appropriate to ensure that the regulated entity operates in a safe and sound manner with sufficient capital and reserves to support the risks that arise in the operations and management of the regulated entity.''[49] This authority may be exercised through order, as opposed to regulation, and thus can be implemented swiftly should the need to do so arise.

Question 38: FHFA is soliciting comments on the advantages and disadvantages of the existing authority to temporarily increase minimum leverage requirements, in particular with respect to the view that use of this authority can serve a countercyclical role across economic cycles. FHFA is requesting data and supplementary analysis that would support alternative perspectives.

Question 39: Commenters are asked to discuss the advantages and disadvantages of adjusting risk-based capital requirements by order during periods of heightened risk.

Question 40: FHFA is soliciting views on how best to identify periods of heightened market and Enterprise risk. In particular, what economic indicators or other triggers should be considered in determining when to require an adjustment to capital requirements and how such adjustments might impact capital planning?

III. Paperwork Reduction Act

The Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*) requires that regulations involving the collection of information receive clearance from the Office of Management and Budget (OMB). The proposed rule contains no such collection of information requiring OMB approval under the PRA. Therefore, no information has been submitted to OMB for review.

IV. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires that a regulation that has a significant economic impact on a substantial number of small entities, small businesses, or small organizations must include an initial regulatory flexibility analysis describing the regulation's impact on small entities. FHFA need not undertake such an analysis if the agency has certified that the regulation will not have a significant economic impact on a substantial number of small entities. 5 U.S.C. 605(b). FHFA has considered the impact of the proposed rule under the Regulatory Flexibility Act. The General Counsel of FHFA certifies that the proposed rule, if adopted as a final rule, would not have a significant economic impact on a substantial number of small entities because the proposed rule is applicable only to the Enterprises, which are not small entities for purposes of the Regulatory Flexibility Act.

List of Subjects

12 CFR Part 1206

Federal home loan banks, Reporting and recordkeeping requirements.

12 CFR Part 1240

Capital, Credit, Enterprise, Investments, Reporting and recordkeeping requirements.

12 CFR Part 1750

Banks, banking, Capital classification, Mortgages, Organization and functions (Government agencies), Risk-based capital, Securities.

Authority and Issuance

For the reasons stated in the preamble, under the authority of 12 U.S.C. 4511, 4513, 4514, 4526 and 4612, FHFA proposes to amend chapters XII and XVII, of title 12 of the Code of Federal Regulations as follows:

CHAPTER XII—FEDERAL HOUSING FINANCE AGENCY

SUBCHAPTER A—ORGANIZATION AND OPERATIONS

PART 1206—ASSESSMENTS

■ 1. The authority citation for part 1206 continues to read as follows:

Authority: 12 U.S.C. 4516.

■ 2. Amend § 1206.2 by revising the definition of ''*Total exposure*'' to read as follows:

§ 1206.2 Definitions.

* * * * *

Total exposure means the sum of total assets as determined according to GAAP, and off-balance sheet guarantees related to securitization activities that are used to calculate the quarterly minimum leverage capital requirement of the Enterprise under 12 CFR part 1240.

* * * * *

SUBCHAPTER C—ENTERPRISES

■ 3. Add part 1240 to subchapter C to read as follows:

PART 1240—ENTERPRISE CAPITAL REQUIREMENTS

Sec.

1240.1 Definitions and abbreviations.
1240.2 Board oversight of capital adequacy.
1240.3 Reporting procedure and timing.
1240.4 Risk-based capital requirement components.
1240.5 Single-family whole loans, guarantees, and related securities risk-based capital requirement components.
1240.6 Single-family whole loans and guarantees credit risk capital requirement methodology.
1240.7 Loan segments for single-family whole loans and guarantees credit risk capital requirement.
1240.8 Base credit risk capital requirement for single-family whole loans and guarantees.
1240.9 Risk multipliers for single-family whole loans and guarantees.
1240.10 Gross credit risk capital requirement for single-family whole loans and guarantees.
1240.11 Loan-level credit enhancement impact on gross credit risk capital requirement.
1240.12 Counterparty Haircut for single-family whole loans and guarantees.
1240.13 Net credit risk capital requirement for single-family whole loans and guarantees.
1240.14 Single-family credit risk transfer capital relief for single-family whole loans and guarantees.
1240.15 Calculation of capital relief from a single-family CRT.
1240.16 Calculation of total capital relief for single-family whole loans and guarantees.
1240.17 Market risk capital requirement for single-family whole loans.

[49] 12 U.S.C. 4612(e).

1240.18 Market risk capital requirement for single-family securities.
1240.19 Operational risk capital requirement for single-family whole loans and guarantees.
1240.20 Operational risk capital requirement for single-family securities.
1240.21 Going-concern buffer requirement for single-family whole loans and guarantees.
1240.22 Going-concern buffer requirement for single-family securities.
1240.23 Aggregate risk-based capital requirement for single-family whole loans, guarantees, and related securities.
1240.24 Private-label securities risk-based capital requirement components.
1240.25 Credit risk capital requirement for a PLS.
1240.26 Market risk capital requirement for a PLS.
1240.27 Operational risk capital requirement for a PLS.
1240.28 Going-concern buffer requirement for a PLS.
1240.29 Aggregate risk-based capital requirement for PLS.
1240.30 Multifamily whole loans, guarantees, and related securities risk-based capital requirement components.
1240.31 Multifamily whole loans and guarantees credit risk capital requirement methodology.
1240.32 Loan segments for multifamily whole loans and guarantees credit risk capital requirement.
1240.33 Base credit risk capital requirement for multifamily whole loans and guarantees.
1240.34 Risk multipliers for multifamily whole loans and guarantees.
1240.35 Gross credit risk capital requirement for multifamily whole loans and guarantees.
1240.36 Net credit risk capital requirement for multifamily whole loans and guarantees.
1240.37 Multifamily credit risk transfer capital relief for multifamily whole loans and guarantees.
1240.38 Calculation of capital relief for a multifamily CRT.
1240.39 Multifamily whole loans market risk capital requirement.
1240.40 Multifamily securities market risk capital requirement.
1240.41 Operational risk capital requirement for multifamily whole loans and guarantees.
1240.42 Operational risk capital requirement for multifamily securities.
1240.43 Going-concern buffer requirement for multifamily whole loans and guarantees.
1240.44 Going-concern buffer requirement for multifamily securities.
1240.45 Aggregate risk-based capital requirement for multifamily whole loans, guarantees, and related securities.
1240.46 Non-Enterprise and non-Ginnie Mae commercial mortgage backed securities risk-based capital requirement.
1240.47 Other assets and exposures risk-based capital requirement.
1240.48 Unassigned Activities.
1240.49 Aggregate risk-based capital requirement calculation.
1240.50 Minimum leverage capital requirement: 2.5 percent alternative.
1240.51 Minimum leverage capital requirement: Bifurcated alternative.

Authority: 12 U.S.C. 4511, 4513, 4514, 4526, 4612.

§ 1240.1 Definitions and abbreviations.

(a) The definitions in this section are used to define terms for purposes of this part.

Amortization term refers to the time period over which the loan is contractually scheduled to amortize at origination.

Basis points (bps) means more than one basis point where a basis point equals one hundredth of one percent.

Charter Act(s) means the Federal National Mortgage Association Charter Act, 12 U.S.C. 1716, *et seq.,* and/or the Federal Home Loan Mortgage Corporation Act, 12 U.S.C. 1451 note, *et seq.*

Charter-level coverage means mortgage insurance coverage levels that meet the minimum requirements of the Enterprises' Charter Acts for loans with a loan-to-value ratio (LTV) greater than 80%.

CMBS means commercial mortgage backed securities.

CMOs means collateralized mortgage obligations held in portfolio that are collateralized by an Enterprise or Ginnie Mae MBS.

Core capital has the meaning provided at 12 U.S.C. 4502(7).

(i) Core capital is the sum of (as determined in accordance with generally accepted accounting principles (GAAP))

(A) The par or stated value of outstanding common stock;

(B) The par or stated value of outstanding perpetual, noncumulative preferred stock;

(C) Paid-in capital; and

(D) Retained earnings.

(ii) Core capital does not include any amounts the Enterprise could be required to pay, at the option of investors, to retire capital instruments.

Counterparty risk haircut (CPHaircut) means a reduction in the contractual payments from a counterparty due to the risk that the counterparty is unable to meet its obligations.

Coverage Percent or Coverage Percentage means the percentage provided as the benefit under a mortgage insurance policy of the sum of UPB, lost interest and foreclosure costs.

Credit risk means the risk of financial loss to an Enterprise from nonperformance by borrowers or other obligors on instruments in which an Enterprise has a financial interest.

Credit risk transfer (CRT) means the transfer of credit risk from an Enterprise to an unaffiliated third party or parties through capital markets and loss sharing transactions.

Days means calendar days.

Deferred tax assets (DTA) mean assets on the balance sheet that may be used to reduce taxable income.

Deferred tax liabilities (DTL) mean tax liabilities deferred to a future period.

Delinquent means one or more missed scheduled payments.

Enterprise guarantee means a credit guarantee from an Enterprise.

Ginnie Mae means the Government National Mortgage Association.

Government guarantee means a credit guarantee from the Federal Housing Administration (FHA), United States Department of Agriculture (USDA), or the Veterans Administration (VA).

Guide-level coverage means mortgage insurance coverage levels, specified by an Enterprise's Seller Guide, that provide higher levels of coverage than required by an Enterprise's Charter Act for loans with LTVs greater than 80%. Guide-level coverage is also referred to as standard coverage.

Loan-level credit enhancement means a credit guarantee on an individual single-family whole loan. An Enterprise primarily uses a loan-level credit enhancement to meet the requirements of its Charter Act for a conventional loan with LTV greater than 80%. A conventional loan, also known as a conventional mortgage, has the meaning provided in the Enterprises' Charter Acts at 12 U.S.C. 1717(b)(2) (Fannie Mae) and 12 U.S.C. 1451(i) (Freddie Mac).

Market risk means the risk that the market value, or estimated fair value if market value is not available, of an Enterprise's portfolio will decline as a result of changes in interest rates, spreads, foreign exchange rates, or equity or commodity prices.

MBS means a mortgage backed security issued by an Enterprise or Ginnie Mae.

Mortgage insurance (MI) means a loan-level credit enhancement provided by an insurance company.

Multifamily property means a property with five or more residential units.

Multifamily whole loan means a whole loan secured by a mortgage on a multifamily property.

Non-trust assets mean the total assets of an Enterprise as determined in accordance with GAAP plus off-balance sheet guarantees related to securitization activities minus Trust assets.

Off-balance sheet guarantees means guarantees of mortgage loan securitizations and resecuritizations transactions, and other guaranty commitments over which an Enterprises does not have control.

Operational risk means the risk of loss resulting from inadequate or failed internal processes, people, or systems, or from external events.

Original means at the origination of the loan.

Participation certificate means an MBS issued by Freddie Mac.

Private-label security (PLS) means a single-family residential mortgage-backed security issued by an entity other than Fannie Mae, Freddie Mac, or Ginnie Mae.

PLS wrap means a PLS resecuritized with an Enterprise guarantee.

Refi Plus means Fannie Mae's streamlined refinance program or other similar refinance programs that the Director determines should receive the same capital treatment.

Relief Refi means Freddie Mac's streamlined refinance program, or other similar refinance programs that the Director determines should receive the same capital treatment.

Reporting date means the date of the portfolio used for risk-based capital and minimum capital calculations.

Single-family property means a property with one-to-four-family residential units.

Single-family whole loan means a whole loan secured by a mortgage on a single-family property.

Spread duration means a measure of the sensitivity of an asset's expected price to changes in the asset's spread.

Spread risk means the risk of a loss in value of an asset relative to a risk free or funding benchmark due to changes in perceptions of performance or liquidity.

Supplemental loan means a multifamily loan made to a borrower for a property for which the borrower has previously received a loan. There can be more than one supplemental loan.

Total assets mean the total assets of an Enterprise as determined in accordance with GAAP.

Total capital has the meaning provided at 12 U.S.C. 4502(23). It is the sum of the following:

(i) The core capital of an Enterprise.

(ii) A general allowance for foreclosure losses, which:

(A) Shall include an allowance for portfolio mortgage losses, nonreimbursable foreclosure costs on government claims, and an allowance for liabilities reflected on the balance sheet for the Enterprise for estimated foreclosure losses on mortgage backed securities; and

(B) Shall not include any reserves of the Enterprise made or held against specific assets.

(iii) Any other amounts from sources of funds available to absorb losses incurred by the Enterprise, that the Director by regulation determines are appropriate to include in determining total capital.

Tranche means all securitization exposures associated with a CRT that have the same seniority.

Trust assets means Fannie Mae mortgage-backed securities or Freddie Mac participation certificates held by third parties, and off-balance sheet guarantees related to securitization activities.

Whole loan means a single loan that a lender has issued to a borrower or borrowers.

(b) The abbreviations in this paragraph are used as short forms for terms used in calculations in this part.

ATCH	Attachment point for a tranche.
$BaseCapital_{bps}$	Base credit risk capital requirement in basis points.
$CapRelief_{\$}$	Capital relief in dollars for an entire CRT.
CEMultiplier	Credit enhancement multiplier.
$CM_{\%}$	Capital markets risk relief percentage for single-family CRTs.
$CMTCRC_{bps}$	Tranche credit risk capital associated with the single-family CRT capital markets transaction, in basis points.
$CntptyCollat_{\$}$	Counterparty collateral in dollars.
$CntptyCreditRisk_{bps}$	Counterparty credit risk capital in basis points.
$CntptyCreditRisk_{\$}$	Counterparty credit risk capital in dollars.
$CntptyExposure_{bps}$	Counterparty exposure in basis points.
$CntptyExposure_{\$}$	Counterparty exposure in dollars.
$CntptyShare_{\%}$	Counterparty quota share in percent.
CombRiskMult	Combined risk multiplier.
$CreditAndMarketRiskCapReq_{\$}$	Credit and market risk capital requirement in dollars for a CMBS.
$CreditAndMarketRiskCapReq_{\$\_CMBS}$	Credit and market risk capital requirement in dollars in aggregate for all CMBSs.
$CreditRiskCapReq_{\$}$	Credit risk capital requirement in dollars.
$CreditRiskCapReq_{bps}$	Credit risk capital requirement in basis points.
$CRTLT_{\%}$	CRT loss timing factor in percent.
DTCH	Detachment point for a tranche.
$GCBufferReq_{\$}$	Going-concern buffer requirement in dollars.
$GCBufferReq_{\$\_CMBS}$	Going-concern buffer requirement in dollars in aggregate for all CMBS.
$GCBufferReq_{\$\_MD}$	Going-concern buffer requirement in dollars for all municipal debt.
$GCBufferReq_{\$\_MFMBS}$	Going-concern buffer requirement in dollars for all multifamily MBS.
$GCBufferReq_{\$\_MFWL}$	Going-concern buffer requirement in dollars for all multifamily family whole loans and guarantees.
$GCBufferReq_{\$\_SFREV}$	Going-concern buffer requirement in dollars for all reverse mortgage loans and securities.
$GCBufferReq_{\$\_SFWL}$	Going-concern buffer requirement in aggregate for all single-family whole loans and guarantees.
$GrossCreditRiskCapReq_{bps}$	Gross credit risk capital requirement in basis points.
K_G	The weighted-average total capital requirement of the underlying exposures in a PLS.
$LenderCapital_{\$}$	The portion of capital associated with the lender's exposure.
$LS_{\%}$	Contractual loss sharing risk relief percentage for single-family CRTs.
$LSTCRC_{bps}$	Tranche credit risk capital associated with the single-family CRT loss sharing transaction, in basis points.
$MarketRiskCapReq_{bps}$	Market risk capital requirement in basis points.
$MarketRiskCapReq_{\$}$	Market risk capital requirement in dollars.
$MarketRiskCapReq_{\$\_MD}$	Market risk capital requirement in dollars for all municipal debt.
$MarketRiskCapReq_{\$\_MFMBS}$	Market risk capital requirement in dollars for all multifamily MBS.
$MarketRiskCapReq_{\$\_MFWL}$	Market risk capital requirement in dollars for all multifamily whole loans and guarantees.
$MarketRiskCapReq_{\$\_SFREV}$	Market risk capital requirement in dollars for all reverse mortgage loans and securities.

$MarketRiskCapReq_{\$\_SFWL}$	Market risk capital requirement in dollars for all single-family whole loans and guarantees.
$MF\_LS_{\%}$	Lender loss sharing risk relief percentage for multifamily CRTs.
$MF\_MTLS_{\%}$	Multiple tranche loss sharing risk relief percentage for multifamily CRTs.
$MF\_S_{\%}$	Capital market risk relief percentage for multifamily CRTs.
$MTLSTCRC_{bps}$	Capital relief from multiple tranche loss sharing.
$NetCreditRiskCapReq_{bps}$	Net credit risk capital requirement in basis points.
$NetCreditRiskCapReq_{\$}$	Net credit risk capital requirement in dollars.
$NetCreditRiskCapReq_{\$\_MFWL}$	Net credit risk capital requirement in dollars for all multifamily whole loans and guarantees.
$NetCreditRiskCapReq_{\$\_SFWL}$	Net credit risk capital requirement in dollars for all single-family whole loans and guarantees.
$OperationalRiskCapReq_{bps}$	Operational risk capital requirement in basis points.
$OperationalRiskCapReq_{\$}$	Operational risk capital requirement in dollars.
$OperationalRiskCapReq_{\$\_MD}$	Operational risk capital requirement in dollars for all municipal debt.
$OperationalRiskCapReq_{\$\_MFMBS}$	Operational risk capital requirement in dollars for all multifamily MBS.
$OperationalRiskCapReq_{\$\_MFWL}$	Operational risk capital requirement in dollars for all multifamily whole loans and guarantees.
$OperationalRiskCapReq_{\$\_SFREV}$	Operational risk capital requirement in dollars for all reverse mortgage loans and securities.
$OperationalRiskCapReq_{\$\_SFWL}$	Operational risk capital requirement in dollars for all single-family whole loans and guarantees.
$PGCRC_{bps}$	Credit risk capital on a pool group of whole loans and guarantees underlying a CRT, in basis points.
$PGEL_{bps}$	Lifetime net expected losses on a pool group of whole loans and guarantees underlying the CRT, in basis points.
$PGCapRelief_{bps}$	Capital relief for a pool group in basis points.
$PGUPB_{\$}$	A pool group's aggregate unpaid principal balance.
$RiskBasedCapReq_{\$\_CMBS}$	Risk-based capital requirement in dollars in aggregate for all CMBS.
$RiskBasedCapReq_{\$\_DTA}$	Risk-based capital requirement in dollars in aggregate for all deferred tax assets.
$RiskBasedCapReq_{\$\_MD}$	Risk-based capital requirement in dollars for all municipal debt.
$RiskBasedCapReq_{\$\_MFWLGS}$	Risk-based capital requirement in dollars for all multifamily whole loans, guarantees, and related securities.
$RiskBasedCapReq_{\$\_PLS}$	Risk-based capital requirement in dollars for all single-family PLS.
$RiskBasedCapReq_{\$\_SFREV}$	Risk-based capital requirement in dollars for all reverse mortgage loans and securities.
$RiskBasedCapReq_{\$\_SFWLGS}$	Risk-based capital requirement in dollars for all single-family whole loans, guarantees, and related securities.
$RiskBasedCapReq_{\$\_TOTAL}$	Total risk-based capital requirement in dollars.
RW	Risk weight of a PLS.
$SpreadDuration$	Spread duration for a given loan or security.
$STCRC_{bps}$	Capital relief from securitization.
$TCRC_{bps}$	Tranche credit risk capital.
$TotalCapRelief_{\$\_MFWL}$	Total capital relief across all multifamily CRTs.
$TotalCapRelief_{\$\_SFWL}$	Total capital relief across all single-family CRTs.
$TotalCombRiskMult$	Total combined risk multiplier.
$UncapTotalCombRiskMult$	Uncapped total combined risk multiplier.
$UPB_{\$}$	Unpaid principal balance in dollars.

§ 1240.2 Board oversight of capital adequacy.

(a) The board of directors of each Enterprise is responsible for overseeing that the Enterprise maintains capital at a level that is sufficient to ensure the continued financial viability of the Enterprise and that equals or exceeds the capital requirements contained in this part.

(b) Nothing in this part permits or requires an Enterprise to engage in any activity that would otherwise be inconsistent with its Charter Act or the Safety and Soundness Act, 12 U.S.C. 4501 *et seq.*

§ 1240.3 Reporting procedure and timing.

(a) *Capital report.* Each Enterprise shall file a capital report with the Director every quarter. The capital report must be made using the format separately provided to the Enterprises by FHFA. The report shall include, but not be limited to, the following:

(1) The minimum capital requirement as calculated as of the end of each quarter.

(2) The risk-based capital requirement as calculated as of the end of each quarter.

(b) *Timing.* The capital report shall be submitted not later than sixty days after quarter end or at such other time as the Director requires.

(c) *Approval.* The capital report must be approved by the Chief Risk Officer and the Chief Financial Officer of an Enterprise prior to submission to FHFA.

(d) *Adjustment.* In the event an Enterprise makes an adjustment to its financial statements for a quarter or a date for which information was provided pursuant to this part, which would cause an adjustment to a capital report, an Enterprise shall file with the Director an amended capital report not later than 15 days after the date of such adjustment.

(e) *Additional reports.* The Director may request from an Enterprise additional reports, information, and data, as appropriate, from time to time.

§ 1240.4 Risk-based capital requirement components.

Each Enterprise shall maintain at all times total capital in an amount at least equal to the sum of the risk-based capital requirements for:

(a) Single-family whole loans, guarantees, and related securities as provided in §§ 1240.5 through 1240.23;

(b) Private-label securities (PLS) as provided in §§ 1240.24 through 1240.29;

(c) Multifamily loans, guarantees, and related securities as provided in §§ 1240.30 through 1240.45;

(d) Non-Enterprise and non-Ginnie Mae Commercial Mortgage Backed Securities (CMBS) as provided in § 1240.46;

(e) Other assets and exposures as provided in § 1240.47; and

(f) Unassigned activities as provided in § 1240.48.

§ 1240.5 Single-family whole loans, guarantees, and related securities risk-based capital requirement components.

The risk-based capital requirement for single-family whole loans, guarantees, and related securities is the cumulative total of the following capital requirements:

(a) A credit risk capital requirement as provided in §§ 1240.6 through 1240.16;

(b) A market risk capital requirement for single-family whole loans and securities having market exposure as provided in §§ 1240.17 through 1240.18;

(c) An operational risk capital requirement as provided in §§ 1240.19 through 1240.20; and

(d) A going-concern buffer requirement as provided in §§ 1240.21 through 1240.22.

§ 1240.6 Single-family whole loans and guarantees credit risk capital requirement methodology.

(a) The methodology for calculating the credit risk capital requirement for single-family whole loans and guarantees uses tables to determine the base credit risk capital requirement, risk factor multipliers to adjust the base credit risk capital requirement for risk factor variations not captured in the base credit risk requirement, credit enhancement multipliers to reduce the capital requirement due to the presence of loan-level credit enhancement, and reductions in credit enhancement benefits due to counterparty risk. The methodology also provides for a reduction in the credit risk capital requirement for single-family whole loans and guarantees subject to credit risk transfer (CRT) transactions.

(b) The steps for calculating the credit risk capital requirement for single-family whole loans and guarantees are as follows:

(1) Identify the loan data needed for the calculation of the single-family whole loans and guarantees credit risk capital requirement.

(2) Assign each loan to a single-family loan segment, as specified in § 1240.7.

(3) Determine the base credit risk capital requirement using the assigned single-family loan segment, as specified in § 1240.8.

(4) Determine the loan's total combined risk multiplier using the assigned single-family loan segment and risk factor multipliers, as specified in § 1240.9.

(5) Determine the loan's gross credit risk capital requirement using the total combined risk multiplier and the base capital, as specified in § 1240.10.

(6) Determine the reduction of capital from the gross credit risk capital requirement due to the presence of loan-level credit enhancement benefit, as specified in § 1240.11.

(7) Determine the reduction in loan-level credit enhancement benefit due to counterparty risk for the credit enhancement counterparty, as specified in § 1240.12.

(8) Determine the net credit risk capital requirement by reducing for the loan-level credit enhancement benefit due to counterparty risk for the credit enhancement counterparty, as specified in § 1240.13.

(9) Determine the aggregate net credit risk capital requirement for single-family whole loans and guarantees, as specified in § 1240.13.

(10) Determine the capital relief from single-family CRTs, as specified in §§ 1240.14 through 1240.16.

(c) The credit risk capital requirement applies to any Enterprise conventional single-family whole loan and guarantee with exposure to credit risk.

(d) Table 1 to part 1240 lists the data needed for the calculation of the single-family whole loans and guarantees credit risk capital requirement. Table 1 contains variable names, definitions, acceptable values, and treatments for missing or unacceptable values.

TABLE 1 TO PART 1240—SINGLE-FAMILY WHOLE LOANS AND GUARANTEES DATA INPUTS

Variable	Definition/logic	Acceptable values	Treatment of missing or unacceptable values
Back-end Debt-to-Income (DTI) Ratio.	DTI is calculated as the ratio of debt to income. Debt consists of the borrowers' monthly mortgage payments for principal and interest, mortgage-related obligations (property taxes, Home Owners Association (HOA) fees, condominium fees, cooperative fees, and insurance), current debt obligations, alimony, and child support. Income consists of the total pre-tax monthly income of all borrowers as determined at the time of origination. DTI at origination should be used for Home Affordable Modification Program (HAMP) and HAMP-like modifications.	0% < DTI < 100%	Set to 42%.
Loan-level Credit Enhancement Types.	Types of loan-level credit enhancement that provide credit protection to the Enterprises for conventional single-family whole loans. Loan-level credit enhancements are typically used to meet the Charter requirements for loans with LTVs greater than 80%.	Participation Agreements, Repurchase or replacement Agreements, Recourse and Indemnification Agreements, Mortgage Insurance, Not Applicable.	Not Applicable.
Streamlined Refi	Indicator for a loan that was refinanced through one of an Enterprise's streamlined refinance programs, including, for example Home Affordable Refinance Program (HARP), Relief Refi and Refi-Plus.	Yes, No	No.
Interest-Only (IO)	A loan that requires only payment of interest without any principal amortization during all or part of the loan term.	Yes, No	Yes.

TABLE 1 TO PART 1240—SINGLE-FAMILY WHOLE LOANS AND GUARANTEES DATA INPUTS—Continued

Variable	Definition/logic	Acceptable values	Treatment of missing or unacceptable values
Loan Age	Loan age is calculated as the difference in months between the origination month and the month of the reporting date.	0 months <= Loan Age <= 500 months.	If the difference in months between the origination month and the month of the reporting date is negative, set Loan Age to 0. If the difference is greater than 500, set Loan Age to 500.
Loan Documentation Level	The level of income documentation used to underwrite the loan.	No Documentation, Low Documentation, Full Documentation.	Set to No Documentation.
Loan Purpose	Purpose of the mortgage at origination	Purchase, Cashout Refinance, Rate/Term Refinance.	Set to Cashout Refinance.
Mark-to-Market Loan-to-Value (MTMLTV) Ratio.	MTMLTV is calculated as $UPB/((UPB_{Original}/OLTV) \times house\_price\_growth\_factor)$ Special instructions for determining house_price_growth_factor: • Use the FHFA Purchase Only State-Level House Price Index (HPI). • Use the USA HPI for Puerto Rico and the Virgin Islands. • Use the Hawaii HPI for Guam. • If a loan was originated before 1991, use an Enterprise's proprietary HPI. • If an HPI series ends before the reporting date, keep the HPI series constant (flat line). • Use geometric interpolation to convert quarterly HPI data to monthly HPI data. • house_price_growth_factor is equal to the ratio of HPI at the reporting date (or latest available HPI) to HPI at the loan's origination date.	0% < MTMLTV <= 300%	Set MTMLTV to 300% if any of the following conditions apply: • The calculated MTMLTV is less than or equal to 0. • The calculated MTMLTV is greater than 300%.
Market Value	The value of the loan used to inform an Enterprise's fair value disclosures.		Set to UPB.
Months since Last Delinquency.	For re-performing loans, months since last delinquency is calculated as the difference in months between the ending date of the last delinquency period and the reporting date.	Non-negative integer	Set to 0.
Months since Last Modification.	For modified loans, months since last modification is calculated as the difference in months between the effective date of the modification and the reporting date.	Non-negative integer	Set to 0.
Mortgage Insurance (MI) Cancellation Feature.	Mortgage insurance is cancellable if coverage can or will terminate before the maturity date of the mortgage (*e.g.*, due to the Homeowners Protection Act). Mortgage insurance is non-cancellable if the coverage extends to the maturity of the mortgage.	Cancellable, Non-Cancellable.	Set to Cancellable.
MI Coverage Percent	The percentage of the sum of UPB, lost interest and foreclosure costs used to determine the benefit under a mortgage insurance policy.	0% <= MI Coverage Percent <= 100%.	Set to 0%.
Number of Borrowers	The number of borrowers on the mortgage note	Multiple borrowers, One borrower.	Set to One borrower.
Number of Missed Payments.	For delinquent loans, the number of missed payments, measured in months, as of the reporting date.	Non-negative integer	Set to 7.
Occupancy Type	The borrowers' intended use of the property	Investment, Owner Occupied, Second Home.	Set to Investment.
Original Credit Score	The borrower's credit score as of the origination date If there are credit scores from multiple credit repositories for a borrower, use the following logic to determine a single Original Credit Score: • If there are credit scores from two repositories, take the lower credit score. • If there are credit scores from three repositories, use the middle credit score. • If there are credit scores from three repositories and two of the credit scores are identical, use the identical credit score. If there are multiple borrowers, use the following logic to determine a single Original Credit Score: • Using the logic above, determine a single credit score for each borrower.	300 <= Original Credit Score <= 850.	Set to 600.

TABLE 1 TO PART 1240—SINGLE-FAMILY WHOLE LOANS AND GUARANTEES DATA INPUTS—Continued

Variable	Definition/logic	Acceptable values	Treatment of missing or unacceptable values
	• Select the lowest single credit score across all borrowers.		
Original Loan-to-Value (OLTV).	OLTV is calculated as the ratio between the original loan amount and the lesser of appraised value or sale price.	0% < OLTV <= 300%	Set OLTV to 300% if any of the following conditions apply: • The calculated OLTV is less than or equal to 0. • The calculated OLTV is greater than 300%. • Both the sales price and appraised value are missing.
Origination Channel	Source of the loan	Retail, Third-Party Origination (TPO) (includes Broker and Correspondent).	Set to TPO.
Payment Change from Modification.	The change in the monthly payment resulting from a permanent loan modification. Payment Change from Modification is calculated as: 100% * (post-modification monthly payment/pre-modification monthly payment − 1). If the modified loan has an adjustable or step rate feature, the post-modification monthly payment is calculated using the initial modified rate. The Payment Change from Modification is not updated subsequent to any rate resets.	−80% < Payment Change from Modification < 50%.	Set to 0% if missing. If the change in the monthly payment resulting from a permanent loan modification is greater than or equal to 50%, set Payment Change from Modification to 49%. If the change in the monthly payment resulting from a permanent loan modification less than or equal to −80%, set Payment Change from Modification to −79%.
Previous Maximum Delinquency.	For re-performing loans, the maximum number of months delinquent at any point in the prior 36 months.	Non-negative integer	Set to 6 months.
Product Type	The mortgage product type as of the loan's origination date. Fixed rate loans are classified according to their original amortization terms: FRM30 = Fixed Rate with amortization term > 309 months and <= 429 months. FRM20 = Fixed Rate with amortization term > 189 months and <= 309 months. FRM15 = Fixed Rate with amortization term <= 189 months. The ARM 1/1 is an adjustable-rate mortgage (ARM) where the rate and the payment adjust annually. Product types other than FRM30, FRM20, FRM15 or ARM 1/1 should be assigned to FRM30. Use the post-modification product type for modified loans.	FRM 30, FRM 20, FRM 15, ARM 1/1.	Set to ARM 1/1.
Property Type	The physical structure of the property	Single-family 1-Unit, Single-family 2–4 Units, Condominium, Manufactured Home.	Set to Single-family 2–4 Units.
Refreshed Credit Score	The borrower's credit score as of the reporting date. If there are credit scores from multiple credit repositories for a borrower, use the following logic to determine a single Refreshed Credit Score: • If there are credit scores from two repositories, take the lower credit score. • If there are credit scores from three repositories, use the middle credit score. • If there are credit scores from three repositories and two of the credit scores are identical, use the identical credit score. If there are multiple borrowers, use the following logic to determine a single Refreshed Credit Score: • Using the logic above, determine a single credit score for each borrower. • Select the lowest single credit score across all borrowers.	300 <= Refreshed Credit Score <= 850.	If a refreshed credit score is not available, use the most recent score. If no credit score is available set the credit score to 600.

TABLE 1 TO PART 1240—SINGLE-FAMILY WHOLE LOANS AND GUARANTEES DATA INPUTS—Continued

Variable	Definition/logic	Acceptable values	Treatment of missing or unacceptable values
Subordination (Second lien Original LTV).	The ratio of the original loan amount of the second lien to the lesser of appraised value or sale price.	0% <= Subordination <= 80%.	Set to 80% if greater than 80%.
Unpaid Principal Balance (UPB).	The remaining unpaid principal balance on the loan as of the reporting date.	$0 < UPB < $2,000,000	Set to $45,000.

(e) Table 2 to part 1240 lists the data needed to determine the *CPHaircut* used in the calculation of the single-family whole loans and guarantees credit risk capital requirement. The table contains variable names, definitions, acceptable values, and treatments for missing or unacceptable values.

TABLE 2 TO PART 1240—DATA INPUTS FOR *CPHaircut* CALCULATION

Variable	Definition/logic	Acceptable values	Treatment of missing or unacceptable values
Counterparty Name	The name of the counterparty.		
Counterparty Rating	Counterparty rating as defined in Table 3. An Enterprise should assign the counterparty rating that most closely aligns to the assessment of the counterparty from the Enterprise's internal counterparty risk framework.	1 2. 3. 4. 5. 6. 7. 8.	Set to 8.
Mortgage Concentration Risk	An Enterprise's assessment of a counterparty's exposure to mortgage credit risk relative to the counterparty's exposure to other lines of business. This assessment may include both quantitative and qualitative factors.	High, Not High	Set to High.

(f) An Enterprise must have internally generated ratings for counterparties. The internally generated ratings must be converted into the counterparty ratings provided in Table 3 to part 1240. Table 3 provides the counterparty financial strength ratings and descriptions used in this part to determine *CPHaircuts*.

TABLE 3 TO PART 1240—COUNTERPARTY FINANCIAL STRENGTH RATINGS

Counterparty rating	Description
1	The counterparty is exceptionally strong financially. The counterparty is expected to meet its obligations under foreseeable adverse events.
2	The counterparty is very strong financially. There is negligible risk the counterparty may not be able to meet all of its obligations under foreseeable adverse events.
3	The counterparty is strong financially. There is a slight risk the counterparty may not be able to meet all of its obligations under foreseeable adverse events.
4	The counterparty is financially adequate Foreseeable adverse events will have a greater impact on '4' rated counterparties than higher rated counterparties.
5	The counterparty is financially questionable. The counterparty may not meet its obligations under foreseeable adverse events.
6	The counterparty is financially weak. The counterparty is not expected to meet its obligations under foreseeable adverse events.
7	The counterparty is financially extremely weak. The counterparty's ability to meet its obligations is questionable.
8	The counterparty is in default on an obligation or is under regulatory supervision.

(g) Table 4 to part 1240 provides the data inputs supplied by FHFA needed for the calculation of the single-family whole loans and guarantees credit risk capital requirement.

TABLE 4 TO PART 1240—DATA INPUTS PROVIDED BY FHFA

Item	Description
Cohort Burnout	A table containing historical origination dates and the number of opportunities, measured in months, a loan originated on a given origination date has had to refinance to a lower interest rate. For a given origination month/year cohort, an opportunity to refinance occurs when the Primary Mortgage Market Survey (PMMS) rate for the cohort exceeds the prevailing PMMS rate by more than 50 basis points.

TABLE 4 TO PART 1240—DATA INPUTS PROVIDED BY FHFA—Continued

Item	Description
	Cohort Burnout is designated as ''No Burnout'' if the cohort has not experienced a refinance opportunity. Cohort Burnout is ''Low'' if the cumulative occurrence of refinance opportunities is between 1 month and 12 months. Cohort Burnout is ''Medium'' if the cumulative occurrence of refinance opportunities is between 13 months and 24 months. Cohort Burnout is ''High'' if the cumulative occurrence of refinance opportunities exceeds 24 months.
House Price Index (HPI)	FHFA's seasonally adjusted purchase-only HPI by state.

§ 1240.7 Loan segments for single-family whole loans and guarantees credit risk capital requirement.

(a) An Enterprise must assign each single-family whole loan and guarantee with exposure to credit risk to a single-family loan segment. The single-family loan segments are: New Origination Loan; Performing Seasoned Loan; Non-Modified Re-Performing Loan (RPL); Modified RPL; Non-Performing Loan (NPL).

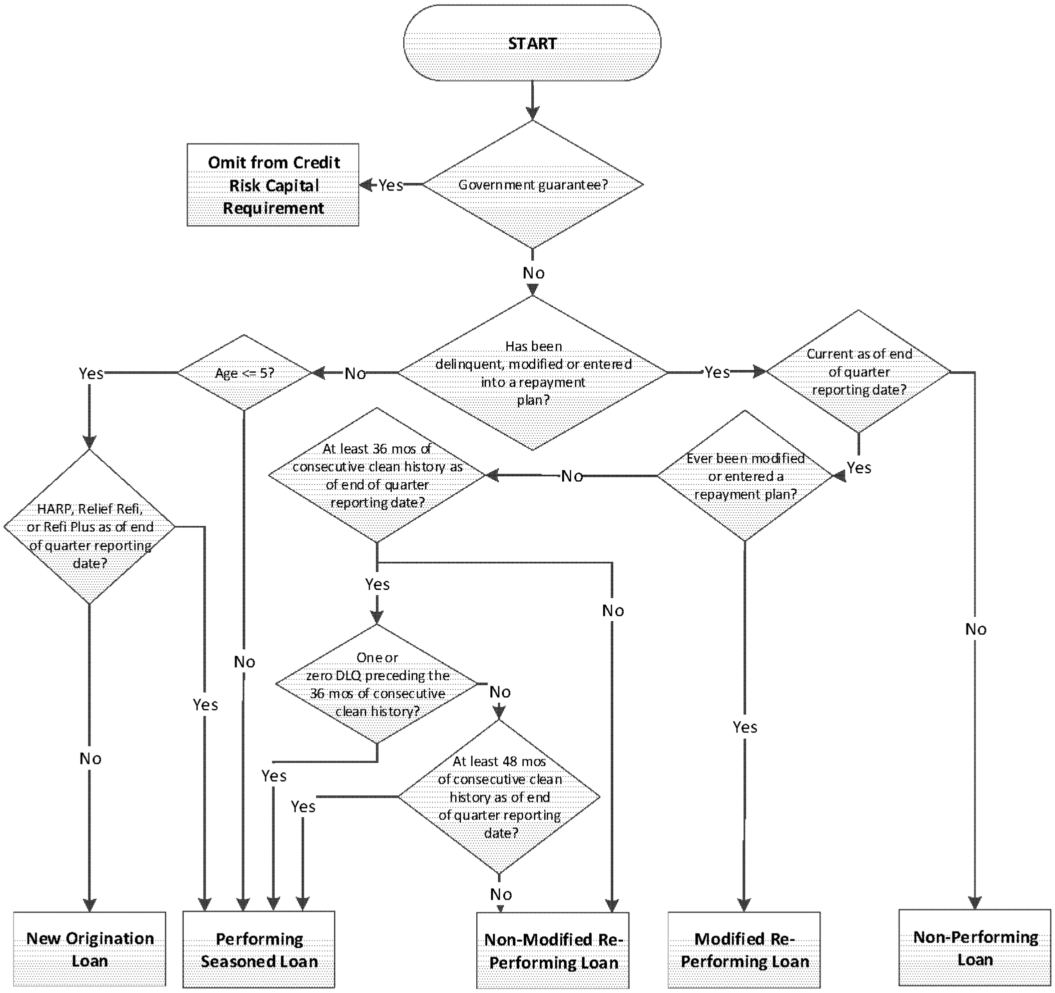
(b) The definitions for the single-family loan segments are provided in Table 5 to part 1240.

TABLE 5 TO PART 1240—DEFINITIONS FOR SINGLE-FAMILY LOAN SEGMENTS

Segment	Definition
New Origination Loan	• Loan age less than or equal to 5 months, and • Never delinquent. Excludes: • Streamlined Refi loans.
Performing Seasoned Loan	• Loan age greater than 5 months, and • Never delinquent. Also includes: • Newly funded Streamlined Refi loans. • Loans that were delinquent, were not modified or put on a repayment plan, and have made 48 consecutive payments as of the reporting date. • Loans that were delinquent, were not modified or put on a repayment plan, and have made 36 consecutive payments as of the reporting date and had no more than one missed payment in the 12 months preceding the 36 months.
Non-Modified RPL	• Performing, • Had a prior delinquency, and • Never modified or entered a repayment plan. Excludes: • Loans that have made 48 consecutive payments as of the reporting date. • Loans that have made 36 consecutive payments as of the reporting date and had no more than one missed payment in the 12 months preceding the 36 months.
Modified RPL	• Performing and • Modified or entered into a repayment plan.
NPL	• Delinquent.

(c) The process for assigning a loan to the appropriate single-family loan segment is presented in the decision tree shown in Figure 1 to part 1240.

Figure 1 to Part 1240: Single-family Loans Segments Decision Tree



START
Government guarantee?
Yes
Omit from Credit Risk Capital Requirement
No
Has been delinquent, modified or entered into a repayment plan?
No

§ 1240.8 Base credit risk capital requirement for single-family whole loans and guarantees.

An Enterprise must determine the base credit risk capital requirement in basis points ($BaseCapital_{bps}$) for a loan by using the Table that corresponds to a particular loan segment.

(a) Single-family New Origination Loan $BaseCapital_{bps}$ is shown in Table 6 to part 1240. For each loan classified as a New Origination Loan, $BaseCapital_{bps}$ is the value in the cell in Table 6 determined using the original credit score and OLTV of the loan.

BILLING CODE 8070–01–P

Table 6 to Part 1240: Single-family New Origination Loan *$BaseCapital_{bps}$*

	OLTV <= 30%	30% < OLTV <= 60%	60% < OLTV <= 70%	70% < OLTV <= 75%	75% < OLTV < 80%	OLTV = 80%	80% < OLTV <= 85%	85% < OLTV <= 90%	90% < OLTV <= 95%	95% < OLTV <= 97%	OLTV > 97%

BILLING CODE 8070–01–C

§ 1240.9 Risk multipliers for single-family whole loans and guarantees.

(a) Risk multiplier values increase or decrease the credit risk capital requirement for single-family whole loans and guarantees based on a loan's assigned loan segment and risk characteristics. The Single-family Risk Multipliers are presented in Table 11 to part 1240.

(b) The steps for calculating the total combined risk multiplier (*TotalCombRiskMult*) are as follows:

(1) Determine the appropriate risk multipliers values from Table 11 based on the loan's characteristics and assigned loan segment.

(2) Apply the appropriate formula as set forth in paragraph (c) of this section to calculate the uncapped total combined risk multiplier (*UncapTotalCombRiskMult*).

(3) For high LTV loans, the combined risk multiplier is subject to a cap. For those loans, apply the calculation set forth in paragraph (d) of this section, to determine *TotalCombRiskMult.*

(4) For loans not subject to the cap, *TotalCombRiskMult* will equal *UncapTotalCombRiskMult.*

TABLE 11 TO PART 1240—SINGLE-FAMILY RISK MULTIPLIERS

Risk factor	Value or range	Risk multipliers by single-family loan segment				
		New origination loan	Performing seasoned loan	Non-modified RPL	Modified RPL	NPL
Loan Purpose	Purchase	1.0	1.0	1.0	1.0	
	Cashout Refinance	1.4	1.4	1.4	1.4	
	Rate/Term Refinance	1.3	1.3	1.2	1.3

	Refreshed Credit Score >= 780.	....	....	....	....	0.5

(c) The following loan characteristics risk multiplier calculations are to be used for each respective loan segment to determine the *UncapTotalCombRiskMult:*

(1) For each loan classified as a Single-family New Origination Loan determine the risk multiplier values associated with the relevant risk factors from Table 11 and apply the following formula to calculate *UncapTotalCombRiskMult:*

UncapTotalCombRiskMult = Loan Purpose Multiplier × Occupancy Type Multiplier × Property Type Multiplier × Number of Borrowers Multiplier × Third-Party Origination Channel Multiplier × Back-End Debt-to-Income Multiplier × Product Type Multiplier × Loan Size Multiplier × Subordination Multiplier.

(2) For each loan classified as a Seasoned Performing Loan determine the risk multiplier values associated with the relevant risk factors from Table 11 and apply the following formula to calculate *UncapTotalCombRiskMult:*

UncapTotalCombRiskMult = Loan Purpose Multiplier × Occupancy Type Multiplier × Property Type Multiplier × Number of Borrowers Multiplier × Third-Party Origination Channel Multiplier × Back-End Debt-to-Income Multiplier × Product Type Multiplier × Loan Size Multiplier × Subordination Multiplier × Loan Age Multiplier × Cohort Burnout Multiplier × Interest-Only Multiplier × Loan Documentation Level Multiplier × Streamlined Refi Multiplier.

(3) For each loan classified as a Non-Modified RPL determine the risk multiplier values associated with the relevant risk factors from Table 11 and apply the following formula to calculate *UncapTotalCombRiskMult:*

UncapTotalCombRiskMult = Loan Purpose Multiplier × Occupancy Type Multiplier × Property Type Multiplier × Number of Borrowers Multiplier × Third-Party Origination Channel Multiplier × Back-End Debt-to-Income Multiplier × Product Type Multiplier × Loan Size Multiplier × Subordination Multiplier × Loan Age Multiplier × Interest-Only Multiplier × Loan Documentation Level Multiplier × Streamlined Refi Multiplier × Refreshed Credit Score for RPLs Multiplier × Previous Maximum Delinquency Multiplier.

(4) For each loan classified as a Modified RPL determine the risk multiplier values associated with the relevant risk factors from Table 11 and apply the following formula to calculate *UncapTotalCombRiskMult:*

UncapTotalCombRiskMult = Loan Purpose Multiplier × Occupancy Type Multiplier × Property Type Multiplier × Number of Borrowers Multiplier × Third-Party Origination Channel Multiplier × Back-End Debt-to-Income Multiplier × Product Type Multiplier × Loan Size Multiplier × Subordination Multiplier × Loan Age Multiplier × Interest-Only Multiplier × Loan Documentation Level Multiplier × Streamlined Refi Multiplier × Refreshed Credit Score for RPLs Multiplier × Payment change from modification Multiplier × Previous Maximum Delinquency Multiplier.

(5) For each loan classified as an NPL determine the risk multiplier values associated with the relevant risk factors from Table 11 and apply the following formula to calculate *UncapTotalCombRiskMult:*

UncapTotalCombRiskMult = Occupancy Type Multiplier × Property Type Multiplier × Number of Borrowers Multiplier × Product Type Multiplier × Loan Size Multiplier × Prior Maximum Delinquency Multiplier × Refreshed Credit Score for NPLs Multiplier.

(d) *TotalCombRiskMult* is calculated as described below:

(1) For high LTV loans, the combined risk multiplier is subject to a cap. If the OLTV for a loan classified as a New Origination Loan or the MTMLTV for a loan classified in any other loan segment is greater than 95%, *TotalCombRiskMult* is capped at 3.0 according to the following formula:

TotalCombRiskMult = MIN(*UncapTotalCombRiskMult,* 3.0)

(2) If the OLTV for a loan classified as a New Origination Loan or the MTMLTV for a loan classified in any other loan segment is less than or equal to 95%, then *TotalCombRiskMult* equals *UncapTotalCombRiskMult.*

§ 1240.10 Gross credit risk capital requirement for single-family whole loans and guarantees.

An Enterprise must determine the gross credit risk capital requirement in basis points ($GrossCreditRiskCapReq_{bps}$) for a loan by taking the product of $BaseCapital_{bps}$ and *TotalCombRiskMult,* where the product is subject to a limit of 3,000 basis points according to the following formula:

$GrossCreditRiskCapReq_{bps}$ = MIN($BaseCapital_{bps}$ × *TotalCombRiskMult,* 3,000)

§ 1240.11 Loan-level credit enhancement impact on gross credit risk capital requirement.

(a) Loan-level credit enhancement comprises participation agreements, repurchase or replacement agreements, recourse and indemnification agreements and mortgage insurance.

(b) Loan-level credit enhancement reduces an Enterprise's gross credit risk capital requirement. Only loans covered by a loan-level credit enhancement as of the reporting date receives a loan-level credit enhancement benefit.

(c) An Enterprise must determine the credit enhancement multiplier (*CEMultiplier*) using Tables 12, 13, 14, 15, and 16, and the special provisions in paragraphs (d) through (i) of this section.

(1) Table 12 to part 1240 shows *CEMultipliers* for New Origination Loan, Performing Seasoned Loan, and Non-Modified RPL loan segments where MI Cancellation Feature is set to Non-Cancellable.

TABLE 12 TO PART 1240—*CEMultipliers* FOR NEW ORIGINATION LOAN, PERFORMING SEASONED LOAN, AND NON-MODIFIED RPL LOAN SEGMENTS WHEN MI CANCELLATION FEATURE IS SET TO NON-CANCELLABLE

Amortization term/coverage type	Coverage category	*CEMultiplier*
15/20 Year Amortizing Loan with Guide-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.846
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.701
	90% < OLTV <= 95% and MI Coverage Percent = 25%	0.408
	95% < OLTV <= 97% and MI Coverage Percent = 35%	0.226
	OLTV > 97% and MI Coverage Percent = 35%	0.184
30 Year Amortizing Loan with Guide-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 12%	0.706
	85% < OLTV <= 90% and MI Coverage Percent = 25%	0.407
	90% < OLTV <= 95% and MI Coverage Percent = 30%	0.312
	95% < OLTV <= 97% and MI Coverage Percent = 35%	0.230
	OLTV > 97% and MI Coverage Percent = 35%	0.188
15/20 Year Amortizing Loan with Charter-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.846
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.701
	90% < OLTV <= 95% and MI Coverage Percent = 16%	0.612
	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.570
	OLTV > 97% and MI Coverage Percent = 20%	0.535
30 Year Amortizing Loan with Charter-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.850
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.713
	90% < OLTV <= 95% and MI Coverage Percent = 16%	0.627
	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.590
	OLTV > 97% and MI Coverage Percent = 20%	0.558

(2) Table 13 to part 1240 shows *CEMultipliers* for New Origination Loan, Performing Seasoned Loan, and Non-Modified RPL loan segments where MI Cancellation Feature is set to Cancellable.

BILLING CODE 8070–01–P

	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.678
	OLTV > 97% and MI Coverage Percent = 20%	0.663
30 Year Amortizing Loan with Charter-level Coverage	80% < OLTV <= 85% and MI Coverage Percent = 6%	0.902
	85% < OLTV <= 90% and MI Coverage Percent = 12%	0.835
	90% < OLTV <= 95% and MI Coverage Percent = 16%	0.787
	95% < OLTV <= 97% and MI Coverage Percent = 18%	0.765
	OLTV > 97% and MI Coverage Percent = 20%	0.760

(d) *CEMultipliers* calculated from Tables 12, 13, 14, 15 and 16 to part 1240 may be subject to special provisions depending on the characteristics of the single-family whole loan and guarantee.

(1) If a loan is covered by MI and its OLTV is less than or equal to 80 percent, use the *CEMultiplier* associated with the appropriate 80 to 85 percent OLTV cell.

(2) If a loan has an interest-only feature and its MI Cancellation Feature is set to Cancellable, treat the MI as non-cancellable when selecting the appropriate *CEMultiplier.*

(3) If a loan has an MI Coverage Percent between the MI Coverage Percentages for Charter-level Coverage and Guide-level Coverage, use linear interpolation to determine the *CEMultiplier.*

(4) If a loan has an MI Coverage Percent that is less than the MI Coverage Percent for Charter-Level Coverage, use linear interpolation between a hypothetical policy with zero coverage and a *CEMultiplier* of one, and the Charter-level Coverage to determine the *CEMultiplier.*

(5) If a loan has an MI Coverage Percent that is greater than the Guide-level Coverage, set the *CEMultiplier* equal to the *CEMultiplier* for the Guide-level Coverage.

(e) *CEMultiplier* for full repurchase or replacement agreements is set to 0.0.

(f) *CEMultiplier* for full recourse and indemnification agreements is set to 0.0.

(g) *CEMultiplier* for partial repurchase or replacement agreements shall be calculated using the methodology for calculating capital relief as provided in § 1240.14.

(h) *CEMultiplier* for partial recourse and indemnification agreements shall be calculated using the methodology for calculating capital relief as provided in § 1240.14.

(i) *CEMultiplier* for participation agreements is set to 1.0.

§ 1240.12 Counterparty Haircut for single-family whole loans and guarantees.

(a) The amount by which credit enhancement lowers the *GrossCreditRiskCapReq*$_{bps}$ for single-family whole loans and guarantees must be reduced to account for the risk that the counterparty is unable to pay claims.

(b) An Enterprise shall determine the *CPHaircut* using Table 17 to part 1240.

TABLE 17 TO PART 1240—*CPHaircut* BY RATING, MORTGAGE CONCENTRATION RISK, SEGMENT, AND PRODUCT

Counterparty rating	Mortgage concentration risk: Not high			Mortgage concentration risk: High		
	New originations, performing seasoned, and RPLs (%)		NPLs (%)	New originations, performing seasoned, and RPLs (%)		NPLs (%)
	30 Year product	20/15 Year product		30 Year product	20/15 Year product	
1	1.8	1.3	0.6	2.8	2.0	0.9
2	4.5	3.5	2.0	7.3	5.6	3.2
3	5.2	4.0	2.4	8.3	6.4	3.9
4	11.4	9.5	6.9	17.2	14.3	10.4
5	14.8	12.7	9.9	20.9	18.0	14.0
6	21.2	19.1	16.4	26.8	24.2	20.8
7	40.0	38.2	35.7	43.7	41.7	39.0
8	47.6	46.6	45.3	47.6	46.6	45.3

§ 1240.13 Net credit risk capital requirement for single-family whole loans and guarantees.

(a) The net credit risk capital requirement for a single-family whole loan and guarantee is the $GrossCreditRiskCapReq_{bps}$ adjusted for the loan-level credit enhancement benefit and *CPHaircut.*

(b) For a loan with loan-level credit enhancement, an Enterprise shall determine the net credit risk capital requirement in basis points ($NetCreditRiskCapReq_{bps}$) using the following equation:

$$NetCreditRiskCapReq_{bps} = GrossCreditRiskCapReq_{bps} \times (1 - (1 - CEMultiplier) \times (1 - CPHaircut))$$

(c) For a loan without loan-level credit enhancement, an Enterprise shall determine the net credit risk capital requirement in basis points ($NetCreditRiskCapReq_{bps}$) using the following equation:

$$NetCreditRiskCapReq_{bps} = GrossCreditRiskCapReq_{bps}$$

(d) An Enterprise shall determine the net credit risk capital requirement in dollars ($NetCreditRiskCapReq_{\$}$) using the following equation:

$$NetCreditRiskCapReq_{\$} = \text{UPB} \times NetCreditRiskCapReq_{bps}/10{,}000$$

(e) The aggregate net credit risk capital requirement for all single-family whole loans and guarantees ($NetCreditRiskCapReq_{\$\_SFWL}$) is the sum of each loan's $NetCreditRiskCapReq_{\$}$.

$$NetCreditRiskCapReq_{\$\_SFWL} = \sum_{\forall SFWL} NetCreditRiskCapReq_{\$}$$

§ 1240.14 Single-family credit risk transfer capital relief for single-family whole loans and guarantees.

(a) A single-family credit risk transfer (''single-family CRT'') is a credit risk transfer where the whole loans and guarantees underlying the CRT, or referenced by the CRT, are single-family whole loans and guarantees. Single-family CRTs may reduce $NetCreditRiskCapReq_{\$\_SFWL}$. The reduction is called capital relief. The methodology for calculating capital relief combines aggregate credit risk capital requirements and expected losses on the single-family whole loans and guarantees underlying or referenced by the single-family CRT, tranche structure, ownership, loss timing, and counterparty credit risk. The methodology is provided in § 1240.15.

(b) The steps for calculating capital relief from a single-family CRT are as follows:

(1) Identify the single-family whole loans and guarantees underlying or referenced by the CRT.

(2) Calculate the aggregate net credit risk capital requirements and expected losses on the single-family whole loans and guarantees underlying or referenced by the CRT.

(3) Distribute the aggregate net credit risk capital requirements and expected losses across the tranches of the CRT so that relatively higher capital requirements are allocated to the more risky junior tranches that are the first to absorb losses, and relatively lower requirements are allocated to the more senior tranches.

(4) Identify capital relief, adjusting for an Enterprise's retained tranche interests.

(5) Adjust capital relief for loss timing and counterparty credit risk.

(6) Calculate total capital relief by adding up capital relief for each tranche in the CRT.

§ 1240.15 Calculation of capital relief from a single-family CRT.

(a) To calculate capital relief from a single-family CRT, an Enterprise must have data that enables it to assign accurately the parameters described in paragraphs (b) and (c) of this section.

(1) Data used to assign the parameters must be the most currently available data. If the contracts governing the single-family CRT require payments on a monthly or quarterly basis, the data used to assign the parameters must be no more than 91 calendar days old.

(2) If an Enterprise does not have the data to assign the parameters described in paragraphs (b) and (c) of this section, then an Enterprise must treat the single-family CRT as if no capital relief had occurred.

(b) To calculate capital relief from a single-family CRT, an Enterprise must have accurate data on the following set of inputs:

(1) *CRT tranche attachment point.* An Enterprise must have accurate information on each tranche's attachment point (*ATCH*) in the single-family CRT. For a given tranche, ATCH represents the threshold at which credit losses of principal will first be allocated. For a given tranche, *ATCH* equals 10,000 multiplied by the ratio of the current dollar amount of underlying subordinated tranches relative to the current dollar amount of all tranches. *ATCH* is expressed in basis points or as a value between zero and 10,000.

(2) *CRT tranche detachment point.* An Enterprise must have accurate information on each tranche's detachment point (*DTCH*) in the single-family CRT. For a given tranche, DTCH represents the threshold at which credit losses of principal would result in total loss of principal. For a given tranche, *DTCH* equals the sum of the tranche's *ATCH* and 10,000 multiplied by the ratio of the current dollar amount of tranches that are *pari passu* with the tranche (that is, have equal seniority with respect to credit risk) to the current dollar amount of all tranches. *DTCH* is expressed in basis points or as a value between zero and 10,000.

(3) *Capital markets risk relief percentage by tranche.* An Enterprise must have accurate information on each tranche's capital markets risk relief percentage ($CM_{\%}$) in the single-family CRT. For a given tranche, $CM_{\%}$ is the percentage of the tranche sold in the capital markets. $CM_{\%}$ is expressed as a value between 0% and 100%.

(4) *Contractual loss sharing risk relief percentage by tranche.* An Enterprise must have accurate information on each tranche's contractual loss sharing risk relief percentage ($LS_{\%}$) in the single-family CRT. For a given tranche, $LS_{\%}$ is the percentage of the tranche that is either insured, reinsured, or afforded coverage through lender reimbursement of credit losses of principal. $LS_{\%}$ is expressed as a value between 0% and 100%.

(5) *Credit risk capital on the underlying reference pool.* The Enterprises must have accurate data on each pool group's credit risk capital ($PGCRC_{bps}$) in the single-family CRT. $PGCRC_{bps}$ is expressed in basis points or as a value between zero and 10,000. For each pool group of single-family whole loans and guarantees in the single-family CRT, $PGCRC_{bps}$ is calculated in one of the following ways:

(i) For single-family CRTs where the contractual terms of the single-family CRT indicate that the single-family CRT will not convey the counterparty credit risk associated with loan-level credit enhancement on the single-family whole loans and guarantees underlying the single-family CRT, then $PGCRC_{bps}$ is calculated using the aggregate net credit risk capital requirement for all single-family whole loans and guarantees underlying the given pool group assuming a 0% *CPHaircut* as follows:

$$PGCRC_{bps} = 10{,}000 * \frac{\sum_{\forall SFWL \in PoolGroup} \left(\left(UPB_{\$} * \ GrossCreditRiskCapReq_{bps} \text{ x } CE\ Multiplier\right) \Big/ {}_{10{,}000} \right)}{\sum_{\forall SFWL \in PoolGroup} UPB_{\$}}$$

(ii) For all other single-family CRTs, *PGCRC_{bps}* is calculated using the aggregate net credit risk capital requirement for all single-family whole loans and guarantees underlying the given pool group as follows:

$$PGCRC_{bps} = 10{,}000 * \frac{\sum_{\forall SFWL \in PoolGroup} NetCreditRiskCapReq_{\$}}{\sum_{\forall SFWL \in PoolGroup} UPB_{\$}}$$

(6) *CRT expected losses.* An Enterprise must have accurate data on total lifetime net expected credit risk losses ($PGEL_{bps}$) on the whole single-family loans and guarantees underlying each pool group in the single-family CRT. $PGEL_{bps}$ shall be calculated internally by an Enterprise. $PGEL_{bps}$ does not include the operational risk capital requirement or going-concern buffer. $PGEL_{bps}$ is expressed in basis points or as a value between zero and 10,000. For each pool group, $PGEL_{bps}$ is calculated in one of the following ways:

(i) For single-family CRTs where the contractual terms of the single-family CRT indicate that the single-family CRT will not convey the counterparty credit risk associated with MI on the single-family whole loans and guarantees underlying the single-family CRT, $PGEL_{bps}$ reflects an Enterprise's internal calculation of aggregate lifetime net expected credit risk losses on all single-family whole loans and guarantees underlying the given pool group while assuming no counterparty haircuts on MI.

(ii) For all other single-family CRTs, $PGEL_{bps}$ reflects an Enterprise's internal calculation of aggregate lifetime net expected credit risk losses on all single-family whole loans and guarantees underlying the given pool group.

(7) *Counterparty collateral on loss sharing transactions.* An Enterprise must have accurate data on the dollar amounts of counterparty collateral ($CntptyCollat_{\$}$) for each counterparty by tranche and pool group from a single-family CRT involving contractual loss sharing. For a given counterparty, tranche, and pool group, $CntptyCollat_{\$}$ is the dollar amount of collateral to fulfill the counterparty's trust funding obligation for loss sharing. $CntptyCollat_{\$}$ is expressed in dollar terms as a value greater than or equal to $0.

(8) *Counterparty quota shares on loss sharing transactions.* An Enterprise must have accurate information on counterparty quota shares on contractual loss sharing transactions for each counterparty by tranche and pool group. For a given counterparty, tranche, and pool group, the counterparty share is the percentage of $LS_{\%}$ that is insured, reinsured, or afforded coverage through lender reimbursement of credit losses of principal by the given counterparty ($CntptyShare_{\%}$). $CntptyShare_{\%}$ is expressed as a value between 0% and 100%.

(9) *Counterparty ratings on loss sharing transactions.* An Enterprise must have internally generated ratings for counterparties on contractual loss sharing transactions. The internally generated ratings must be converted into counterparty financial strength ratings consistent with Table 3: Counterparty Financial Strength Ratings, of this part.

(10) *Counterparty mortgage concentration risk on loss sharing transactions.* An Enterprise must have an internally generated indicator for mortgage concentration risk for the counterparties on contractual loss sharing transactions. The internally generated indicator for mortgage concentration risk must be converted into ratings that reflect the following categories: *High* and *Not High.* An Enterprise should designate counterparties with a significant concentration of mortgage credit as *High.* An Enterprise should designate all other counterparties as *Not High.*

(11) *CRT loss timing factor.* (i) Table 18 to part 1240 sets forth loss timing factors which account for maturity differences between the CRT and the CRT's underlying single-family whole loans and guarantees. Maturity differences arise when the CRT's maturity date arises before the maturity dates on the underlying single-family whole loans and guarantees. The loss timing factors reflect estimates of the cumulative percentages of lifetime losses by the number of months between the CRT's original closing date (or effective date) and the maturity date on the CRT such that CRTs with longer maturities cover more lifetime losses. The loss timing factors also vary by original amortization term and OLTVs on the underlying single-family whole loans and guarantees.

(ii) Using Table 18 to Part 1240, the Enterprises must calculate a single-family CRT loss timing factor ($CRTLT_{\%}$) for each pool group. $CRTLT_{\%}$ is expressed as a value between 0% and 100%. To calculate the $CRTLT_{\%}$, an Enterprise must have the following information by pool group at the time of deal issuance:

(A) CRT's original closing date (or effective date) and the maturity date on the CRT;

(B) UPB share of single-family whole loans and guarantees in the pool group that have original amortization terms of less than or equal to 189 months ($CRTF15_{\%}$); and

(C) UPB share of single-family whole loans and guarantees in the pool group that have original amortization terms greater than 189 months and OLTVs of less than or equal to 80 percent ($CRT80NotF15_{\%}$).

(iii) An Enterprise must use the following method to calculate $CRTLT_{\%}$ for each pool group:

(A) Calculate CRT months to maturity (*CRTMthstoMaturity*) using one of the following methods:

(*1*) For single-family CRTs with reimbursement based upon occurrence or resolution of delinquency, *CRTMthstoMaturity* is the difference between the CRT's maturity date and original closing date, except for the following:

(*i*) If the coverage based upon delinquency is between 1 and 3 months, add 24 months to the difference between the CRT's maturity date and original closing date.

(*ii*) If the coverage based upon delinquency is between 4 and 6 months, add 18 months to the difference between the CRT's maturity date and original closing date.

(*2*) For all other single-family CRTs, *CRTMthstoMaturity* is the difference between the CRT's maturity date and original closing date.

(B) If *CRTMthstoMaturity* is a multiple of 12, then an Enterprise must use the first column of Table 18 to identify the row matching *CRTMthstoMaturity* and take a weighted average of the three loss timing factors in columns 2, 3, and 4 as follows:

$CRTLT_{\%} = (CRTLT15 * CRTF15_{\%}) + (CRTLT80Not15 * CRT80NotF15_{\%}) + (CRTLTGT80Not15 * (1 - CRT80NotF15_{\%} - CRTF15_{\%}))$

(C) If *CRTMthstoMaturity* is not a multiple of 12, an Enterprise must use the first column of Table 18 to identify the two rows that are closest to *CRTMthstoMaturity* and take a weighted average between the two rows of loss timing factors using linear interpolation, where the weights reflect *CRTMthstoMaturity.*

TABLE 18 TO PART 1240—SINGLE-FAMILY CRT LOSS TIMING FACTORS

CRTMthstoMaturity: (#1) Number of months from the single-family CRT's original closing date (or effective date) to the maturity date on the CRT	CRT loss timing factors		
	*CRTLT*15: (#2) CRTLT for pool groups backed by single-family whole loans and guarantees with original amortization terms < = 189 months (%)	*CRTLT*80*Not*15: (#3) CRTLT for pool groups backed by single-family whole loans and guarantees with original amortization terms > 189 months and OLTVs < = 80 (%)	*CRTLTGT*80*Not*15: (#4) CRTLT for pool groups backed by single-family whole loans and guarantees with original amortization terms > 189 months and OLTVs > 80 (%)
0	0	0	0

(12) *Aggregate unpaid principal balance by pool group.* An Enterprise must have accurate information on each pool group's aggregate unpaid principal balance ($PGUPB_{\$}$).

(c) An Enterprise must use the parameters described in paragraph (b) of this section to calculate CRT capital relief, by single-family CRT pool group, using the following steps:

(1) An Enterprise must distribute $PGCRC_{bps}$, by pool group, to the tranches of the CRT, while controlling for $PGEL_{bps}$. For a given pool group and tranche, tranche credit risk capital ($TCRC_{bps}$) is as follows:

$$TCRC_{bps} = (DTCH - ATCH) * \left[\max\left(0, \min\left(\left[\frac{PGCRC_{bps} + PGEL_{bps} - ATCH}{DTCH - ATCH}\right], 1\right)\right) - \max\left(0, \min\left(\left[\frac{PGEL_{bps} - ATCH}{DTCH - ATCH}\right], 1\right)\right)\right]$$

$TCRC_{bps}$ takes values between 0 and 10,000. $TCRC_{bps}$ must be calculated for each tranche in the single-family CRT.

(2) For each pool group and tranche in a single-family CRT, an Enterprise must use the following formulae to identify the capital relief from the capital markets ($CMTCRC_{bps}$) and loss sharing ($LSTCRC_{bps}$) portions of the single-family CRT:

$CMTCRC_{bps} = CM_{\%} * TCRC_{bps} * CRTLT_{\%}$

$LSTCRC_{bps} = LS_{\%} * TCRC_{bps} * CRTLT_{\%}$

$CMTCRC_{bps}$ and $LSTCRC_{bps}$ are expressed in basis points and take values between 0 and 10,000.

(3) For loss sharing transactions, an Enterprise must determine the uncollateralized counterparty exposure

($CntptyExposure_{bps}$) and counterparty credit risk ($CntptyCreditRisk_{bps}$) by pool group and tranche.

(i) For each pool group, tranche and counterparty, an Enterprise must use the following formula to calculate $CntptyExposure_{bps}$:

$$CntptyExposure_{bps} = \max\left(\left[CntptyShare_{\%} * LSTCRC_{bps} - 10{,}000 * \frac{CntptyCollat_{\$}}{PGUPB_{\$}}\right], 0\right)$$

$CntptyExposure_{bps}$ takes values between 0 and 10,000.

(ii) For each pool group, tranche and counterparty, an Enterprise must determine $CntptyCreditRisk_{bps}$. An Enterprise must use its internally generated counterparty ratings converted into the counterparty ratings provided in Table 3: Counterparty Financial Strength Ratings, and its internally generated indicator for mortgage concentration risk converted into ratings that reflect *High* and *Not High* together with the *CPHaircuts* for New Origination Loan, Performing Seasoned Loan, and RPLs from Table 17: *CPHaircut* by Rating, Mortgage Concentration Risk, Segment, and Product, and the following formula to calculate $CntptyCreditRisk_{bps}$:

$$CntptyCreditRisk_{bps} = CntptyExposure_{bps} * CPHaircut$$

$CntptyCreditRisk_{bps}$ takes values between 0 and 10,000.

(4) For each pool group in the single-family CRT, an Enterprise must calculate aggregate capital relief ($PGCapRelief_{bps}$) across all tranches and counterparties associated with the given pool group using the following formula:

$$PGCapRelief_{bps} = \sum_{\forall Tranches \in P} \left(CMTCRC_{bps} + LSTCRC_{bps}\right) - \sum_{\forall Tranches\,\&\,Cntpty \in P} \left(CntptyCreditRisk_{bps}\right)$$

(5) An Enterprise must calculate total capital relief in dollars for the entire single-family CRT ($CapRelief_{\$}$) by adding up the capital relief in dollars from each pool group as follows:

$$CapRelief_{\$} = \sum\nolimits_{\forall PoolGroups} \frac{PGCapRelief_{bps}}{10{,}000} * \left(PGUPB_{\$}\right)$$

§ 1240.16 Calculation of total capital relief for single-family whole loans and guarantees.

To calculate total capital relief across all single-family CRTs ($TotalCapRelief_{\$\_SFWL}$), an Enterprise must aggregate capital relief using the following:

$$TotalCapRelief_{\$\_SFWL} = \sum_{\forall CRT} CapRelief_{\$\_CRT}$$

§ 1240.17 Market risk capital requirement for single-family whole loans.

(a) Each single-family whole loan with market risk exposure is subject to the single-family whole loan market risk capital requirement. There is no market risk exposure for single-family guarantees. The market risk capital requirement for a single-family whole loan is limited to spread risk.

(b) The single-family whole loan market risk capital requirement in dollars ($MarketRiskCapReq_{\$}$) utilizes different calculation methodologies based on the loan product type and performance status.

(1) The dollar amount of the $MarketRiskCapReq_{\$}$ for an RPL or NPL is calculated as follows:

$$MarketRiskCapReq_{\$} = Market\ Value \times 0.0475$$

(2) The dollar amount of the $MarketRiskCapReq_{\$}$ for a performing loan is determined by an Enterprise using its internal market risk model.

(c) The aggregate market risk capital requirement for all single-family whole loans ($MarketRiskCapReq_{\$\_SFWL}$) is the sum of each loan's $MarketRiskCapReq_{\$}$.

$$MarketRiskCapReq_{\$\_SFWL} = \sum_{\forall SFWL} MarketRiskCapReq_{\$}$$

§ 1240.18 Market risk capital requirement for single-family securities.

(a) Enterprise- and Ginnie Mae-guaranteed single-family mortgage backed securities (MBSs) and collateralized mortgage obligations (CMOs) (collectively "*SFMBS*") held in an Enterprise's portfolio, have market risk exposure and are subject to a market risk capital requirement.

(b) The dollar amount of the $MarketRiskCapReq_{\$}$ for *SFMBS* is determined by an Enterprise using its internal market risk model.

(c) The aggregate market risk capital requirement for *SFMBS* ($MarketRiskCapReq_{\$\_SFMBS}$) is the sum of each security's $MarketRiskCapReq_{\$}$:

$$MarketRiskCapReq_{\$\_SFMBS} = \sum_{\forall SFMBS} MarketRiskCapReq_{\$}$$

§ 1240.19 Operational risk capital requirement for single-family whole loans and guarantees.

(a) Each single-family whole loan and guarantee is subject to an 8 basis point operational risk capital requirement (*$OperationalRiskCapReq_{\$}$*).

(b) The dollar amount of the *$OperationalRiskCapReq_{\$}$* is calculated as follows:

(1) If the Enterprise holds only credit risk or both credit and market risk, the calculation is as follows:

$OperationalRiskCapReq_{\$} = UPB \times 0.0008$

(2) Otherwise, if the Enterprise holds only market risk the calculation is as follows:

$OperationalRiskCapReq_{\$} = Market\ Value \times 0.0008$

(c) The aggregate operational risk capital requirement for all single-family whole loans and guarantees (*$OperationalRiskCapReq_{\$\_SFWL}$*) is the sum of each loan's *$OperationalRiskCapReq_{\$}$*.

$$OperationalRiskCapReq_{\$\_SFWL} = \sum_{\forall SFWL} OperationalRiskCapReq_{\$}$$

§ 1240.20 Operational risk capital requirement for single-family securities.

(a) Each *SFMBS* is subject to an 8 basis point operational risk capital requirement.

(b) The operational risk capital requirement for *SFMBS* in dollar terms (*$OperationalRiskCapReq_{\$}$*) is calculated as follows:

$OperationalRiskCapReq_{\$} = SFMBS\ Market\ Value \times 0.0008$

(c) The aggregate operational risk capital requirement for all *SFMBS* (*$OperationalRiskCapReq_{\$\_SFMBS}$*) is the sum of each security's *$OperationalRiskCapReq_{\$}$*.

$$OperationalRiskCapReq_{\$\_SFMBS} = \textstyle\sum_{\forall SFMBS} OperationalRiskCapReq_{\$}$$

§ 1240.21 Going-concern buffer requirement for single-family whole loans and guarantees.

(a) Each single-family whole loan and guarantee is subject to a 75 basis point going-concern buffer requirement (*$GCBufferReq_{\$}$*).

(b) The dollar amount of the *$GCBufferReq_{\$}$* is calculated as follows:

(1) If the Enterprise holds only credit risk or both credit and market risk, the calculation is as follows:

$GCBufferReq_{\$} = UPB \times 0.0075$

(2) Otherwise, if the Enterprise holds only market risk the calculation is as follows:

$GCBufferReq_{\$} = Market\ Value \times 0.0075$

(c) The aggregate going-concern buffer requirement for all single-family whole loans and guarantees (*$GCBufferReq_{\$\_SFWL}$*) is the sum of each loan and guarantee's *$GCBufferReq_{\$}$*.

$$GCBufferReq_{\$\_SFWL} = \sum_{\forall SFWL} GCBufferReq_{\$}$$

§ 1240.22 Going-concern buffer requirement for single-family securities.

(a) Each *SFMBS* is subject to a 75 basis point going-concern buffer requirement.

(b) The going-concern buffer requirement for an *SFMBS* in dollar terms (*$GCBufferReq_{\$}$*) is calculated as follows:

$GCBufferReq_{\$} = SFMBS\ Market\ Value \times 0.0075$

(c) The aggregate going-concern buffer requirement for all *SFMBS* (*$GCBufferReq_{\$\_SFMBS}$*) is the sum of each security's *$GCBufferReq_{\$}$*.

$$GCBufferReq_{\$\_SFMBS} = \sum_{\forall SFMBS} GCBufferReq_{\$}$$

§ 1240.23 Aggregate risk-based capital requirement for single-family whole loans, guarantees, and related securities.

(a) As provided in § 1240.5, the aggregate risk-based capital requirement for single-family whole loans, guarantees, and related securities is the cumulative total of: The aggregate net credit risk capital requirement; the aggregate market risk capital requirement for single-family whole loans and securities with market exposure; the aggregate operational risk capital requirement, and the aggregate going-concern buffer requirement, net of the total capital relief from single-family CRTs.

(b) The aggregate risk-based capital requirement for all single-family whole loans, guarantees, and related securities (*$RiskBasedCapReq_{\$\_SFWLGS}$*) is calculated as follows:

$RiskBasedCapReq_{\$\_SFWLGS} =$
$NetCreditRiskCapReq_{\$\_SFWL} +$
$MarketRiskCapReq_{\$\_SFWL} +$
$MarketRiskCapReq_{\$\_SFMBS} +$
$OperationalRiskCapReq_{\$\_SFWL} +$
$OperationalRiskCapReq_{\$\_SFMBS} +$
$GCBufferReq_{\$\_SFWL} +$

$GCBufferReq_{\$\_SFMBS} - TotalCapRelief_{\$\_SFWL}$

§ 1240.24 Private-label securities risk-based capital requirement components.

The risk-based capital requirement for a private-label security (PLS), including PLS wraps, is the cumulative total of the following capital requirements:

(a) A credit risk capital requirement as provided in § 1240.25;

(b) A market risk capital requirement as provided in § 1240.26;

(c) An operational risk capital requirement as provided in § 1240.27; and

(d) A going-concern buffer requirement as provided in § 1240.28.

§ 1240.25 Credit risk capital requirement for a PLS.

(a) Each PLS to which an Enterprise has credit risk exposure is subject to a credit risk capital requirement.

(b) An Enterprise must calculate the credit risk capital requirement for a PLS by taking the following steps:

(1) Calculate the risk weight (*RW*) of a PLS; and

(2) Multiply the *RW* of a PLS by 8 percent.

(c) To determine the *RW* for a PLS, an Enterprise must use the Simplified Supervisory Formula Approach (SSFA) as modified and provided below in this section (*FHFA SSFA*). *FHFA SSFA* provided in this section follows the SSFA provided in § 217.43(a) through (d) of this title, as of the effective date of this part, with the following exceptions:

(1) Excludes § 217.43(b)(2)(v)(A) through (B) of this title:

(2) Assigns the weighted-average total capital requirement of the underlying exposures K_G;

(3) Assigns the supervisory calibration parameter p for a PLS wrap;

(4) Removes references to the nth to default credit derivatives; and

(5) Substitutes references to a bank with references to an Enterprise.

(d) To use *FHFA SSFA* to determine the risk weight for a PLS or PLS Wrap, also known as a securitization exposure, an Enterprise must have data that enables it to assign accurately the parameters described in paragraph (e) of this section. The data must be the most currently available data. If the contracts governing the underlying exposures of the securitization require payments on a monthly or quarterly basis, the data must be no more than 91 calendar days old. An Enterprise that does not have the appropriate data to assign the parameters described in paragraph (e) of this section must assign a risk weight of 1,250 percent to the exposure.

(e) To calculate the risk weight for a securitization exposure using *FHFA SSFA,* an Enterprise must have accurate data on the following five inputs to *FHFA SSFA* calculation:

(1) K_G is the weighted-average total capital requirement of the underlying exposures. K_G is 8 percent.

(2) Parameter W is expressed as a decimal value between zero and one. Parameter W is the ratio of the sum of the dollar amounts of any underlying exposures of the securitization to include collateral backing the PLS or PLS Wrap that meet any of the criteria as set forth in paragraphs (e)(2)(i) through (vi) of this section, to the balance, measured in dollars, of underlying exposures:

(i) Ninety days or more past due;

(ii) Subject to a bankruptcy or insolvency proceeding;

(iii) In the process of foreclosure;

(iv) Held as real estate owned;

(v) Has contractually deferred payments for 90 days or more; or

(vi) Is in default.

(3) Parameter *ATCH* is the attachment point for the exposure, which represents the threshold at which credit losses will first be allocated to the exposure. Parameter *ATCH* equals the ratio of the current dollar amount of underlying exposures that are subordinated to the exposure of an Enterprise to the current dollar amount of underlying exposures. Any reserve account funded by the accumulated cash flows from the underlying exposures that is subordinated to an Enterprise's securitization exposure may be included in the calculation of parameter *ATCH* to the extent that cash is present in the account. Parameter *ATCH* is expressed as a decimal value between zero and one.

(4) Parameter *DTCH* is the detachment point for the exposure, which represents the threshold at which credit losses of principal allocated to the exposure would result in a total loss of principal. Parameter *DTCH* equals parameter *ATCH* plus the ratio of the current dollar amount of the securitization exposures that are *pari passu* with the exposure (that is, have equal seniority with respect to credit risk) to the current dollar amount of the underlying exposures. Parameter *DTCH* is expressed as a decimal value between zero and one.

(5) A supervisory calibration parameter, p, is equal to 0.5 for securitization exposures that are not resecuritization exposures and equal to 1.5 for resecuritization exposures. A PLS Wrap has a supervisory calibration parameter equal to the supervisory calibration parameter of the underlying PLS.

(f) K_G and W are used to calculate K_A, the augmented value of K_G, which reflects the observed credit quality of the underlying exposures. K_A is defined in paragraph (g) of this section. The values of parameters *ATCH* and *DTCH*, relative to K_A, determine the risk weight assigned to a securitization exposure as described in paragraph (g) of this section. The risk weight assigned to a securitization exposure, or portion of a securitization exposure, as appropriate, is the larger of the risk weight determined in accordance with paragraphs (f) or (g) of this section, and a risk weight of 20 percent.

(1) When the detachment point, parameter DTCH, for a securitization exposure is less than or equal to K_A, the exposure must be assigned a risk weight of 1,250 percent.

(2) When the attachment point, parameter ATCH, for a securitization exposure is greater than or equal to K_A, the Enterprise must calculate the risk weight in accordance with paragraph (g) of this section.

(3) When ATCH is less than K_A and DTCH is greater than K_A, the risk weight is a weighted-average of 1,250 percent and 1,250 percent times $K_{FHFA\ SSFA}$ calculated in accordance with paragraph (g) of this section. For the purpose of this weighted-average calculation:

(i) The weight assigned to 1,250 percent equals

$$\frac{K_A - ATCH}{DTCH - ATCH}$$

(ii) The weight assigned to 1,250 percent times $K_{FHFA\ SSFA}$ equals

$$\frac{DTCH - K_A}{DTCH - ATCH}$$

(iii) The risk weight will be set equal to

$$RW = \left[\left(\frac{K_A - ATCH}{DTCH - ATCH}\right) * 1{,}250\ percent\right] + \left[\left(\frac{DTCH - K_A}{DTCH - ATCH}\right) * 1{,}250\ percent * K_{FHFA\ SSFA}\right]$$

(g) *FHFA SSFA* equation involves the following steps:

(1) An Enterprise must define the following parameters:

$$K_A = (1 - W) * K_G + (0.5 * W)$$

$$a = -\frac{1}{p * K_A}$$

$$u = DTCH - K_A$$

$$l = max(ATCH - K_A\,, 0)$$

$$e = 2.71828, the\ base\ of\ the\ natural\ logarithm$$

(2) An Enterprise must calculate $K_{FHFA\ SSFA}$ according to the following equation:

$$K_{FHFA\ SSFA} = \frac{e^{a*u} - e^{a*l}}{a * (u - l)}$$

(3) The risk weight for the exposure (expressed as a percent) is equal to:

$K_{FHFA\ SSFA}$ * 1,250

(h) Determine the credit risk capital requirement for a PLS in bps ($CreditRiskCapReq_{bps}$) as follows:

$CreditRiskCapReq_{bps} = RW \times 8\% \times 10{,}000$

(i) Determine the credit risk capital requirement for a PLS in dollar terms ($CreditRiskCapReq_{\$}$) as follows:

$CreditRiskCapReq_{\$} = Market\ Value \times CreditRiskCapReq_{bps}/10{,}000$

§ 1240.26 Market risk capital requirement for a PLS.

(a) Each PLS to which an Enterprise has market risk exposure is subject to a market risk capital requirement. The market risk capital requirement of a PLS wrap is zero as an Enterprise does not have market risk exposure to a PLS wrap.

(b) The $MarketRiskCapReq_{bps}$ is equal to the product of the PLS spread duration as estimated by the Enterprise and a shock in the spread of the PLS of 265 bps as follows:

$MarketRiskCapReq_{bps} = 265_{bps} \times SpreadDuration$

(c) The $MarketRiskCapReq_{\$}$ is calculated as follows:

$MarketRiskCapReq_{\$} = Market\ Value \times MarketRiskCapReq_{bps}/10{,}000$

§ 1240.27 Operational risk capital requirement for a PLS.

(a) Each Enterprise PLS exposure is subject to an operational risk capital requirement.

(b) The operational risk capital requirement for a PLS in dollar terms ($OperationalRiskCapReq_{\$}$) is calculated as follows:

$OperationalRiskCapReq_{\$} = Market\ Value \times 0.0008$

§ 1240.28 Going-concern buffer requirement for a PLS.

(a) Each Enterprise PLS exposure is subject to a going-concern buffer requirement (*GCBufferReq*).

(b) The *GCBufferReq* for a PLS in dollar terms ($GCBufferReq_{\$}$) is calculated as follows:

$GCBufferReq_{\$} = Market\ Value \times 0.0075$

§ 1240.29 Aggregate risk-based capital requirement for PLS.

(a) The $RiskBasedCapReq_{\$}$ for a PLS is calculated as follows:

$RiskBasedCapReq_{\$} = CreditRiskCapReq_{\$} + MarketRiskCapReq_{\$} + OperationalRiskCapReq_{\$} + GCBufferReq_{\$}$

(b) The $RiskBasedCapReq_{\$}$ for all Enterprise PLS ($RiskBasedCapReq_{\$\_PLS}$) is calculated by aggregating $RiskBasedCapReq_{\$}$ for each PLS.

$$RiskBasedCapReq_{\$\_PLS} = \sum_{\forall PLS} RiskBasedCapReq_{\$}$$

§ 1240.30 Multifamily whole loans, guarantees, and related securities risk-based capital requirement components.

The risk-based capital requirement for multifamily whole loans, guarantees, and related securities is the cumulative total of the following capital requirements:

(a) A credit risk capital requirement, as provided in §§ 1240.31 through 1240.38;

(b) A market risk capital requirement for multifamily whole loans and securities with market exposure, as provided in §§ 1240.39 through 1240.40;

(c) An operational risk capital requirement, as provided in §§ 1240.41 through 1240.42; and

(d) A going-concern buffer requirement, as provided in §§ 1240.43 through 1240.44.

§ 1240.31 Multifamily whole loans and guarantees credit risk capital requirement methodology.

(a) The methodology for calculating the credit risk capital requirement for a multifamily whole loan and guarantee uses tables to determine the base credit risk capital requirement and risk factor multipliers to adjust the base credit risk capital requirement for risk factor variations not captured in the base tables. The methodology also provides for a reduction in the credit risk capital requirement for multifamily whole loans and guarantees due to credit risk transfer transactions.

(b) The steps for calculating the credit risk capital requirement for multifamily whole loans and guarantees are as follows:

(1) Identify the loan data needed for the calculation of the multifamily whole loans and guarantees credit risk capital requirement.

(2) Assign each multifamily whole loan and guarantee into a multifamily loan segment, as specified in § 1240.32.

(3) Determine $BaseCapital_{bps}$ for each whole loan and guarantee using the loan's assigned multifamily loan segment and the appropriate segment-specific table, as specified in § 1240.33.

(4) Determine *TotalCombRiskMult* for each whole loan and guarantee based on the loan's assigned loan segment and risk characteristics, as specified in § 1240.34.

(5) Calculate $GrossCreditRiskCapReq_{bps}$ for each whole loan and guarantee by multiplying $BaseCapital_{bps}$ by *TotalCombRiskMult,* as specified in § 1240.35.

(6) Calculate $NetCreditRiskCapReq_{bps}$ as equal to $GrossCreditRiskCapReq_{bps}$ and determine the aggregate net credit risk capital requirement for multifamily whole loans and guarantees both as specified in § 1240.36. For multifamily whole loans and guarantees, there is no charter required credit enhancement and $NetCreditRiskCapReq_{bps}$ is equal to $GrossCreditRiskCapReq_{bps}$.

(7) Determine the capital relief from multifamily CRTs, as specified in §§ 1240.37 and 1240.38.

(c) The credit risk capital requirement applies to any Enterprise multifamily whole loan or guarantee with exposure to credit risk.

(d) Table 19 to part 1240 lists the loan data needed for the calculation of the multifamily whole loans and guarantees credit risk capital requirement. Table 19 contains variable names, definitions, acceptable values, and treatments for missing or unacceptable values.

TABLE 19 TO PART 1240—MULTIFAMILY WHOLE LOANS AND GUARANTEES DATA INPUTS

Variable	Definition/logic	Acceptable value	Treatment of missing or unacceptable value
Acquisition Debt-Service Coverage Ratio (DSCR).	The Debt-Service-Coverage Ratio is the ratio of Net Operating Income (NOI) to the scheduled mortgage payment. If NOI is unavailable, use Net Cash Flow (NCF). Acquisition DSCR is the DSCR reported at the time the loan is acquired. For interest-only loans, use fully amortizing acquisition DSCR when determining $BaseCapital_{bps}$.	Greater than or equal to 0.	In a case where the acquisition DSCR is not available, use DSCR at the time the loan was underwritten as a substitute. For a newly acquired loan, the origination DSCR can be used as a proxy for the acquisition DSCR if the loan is acquired within six months of acquisition and an acquisition DSCR record is not available. If missing, use origination DSCR. If origination DSCR is missing, use DSCR at the time the loan was underwritten. If the DSCR at the time the loan is underwritten is missing, use 1.00.
Acquisition LTV	Acquisition LTV is the LTV at the time a loan is acquired.	Greater than or equal to 0.	Where the acquisition LTV is not available, use the LTV at the time the loan is underwritten. If acquisition LTV is missing, use origination LTV. If origination LTV is missing, use LTV at the time the loan is underwritten. If LTV at the time the loan is underwritten is missing, use 100%.
Amortization Term	The amortization term is the period that would take a borrower to pay a loan completely if the borrower only makes the scheduled payments, for a given loan balance, at a specified interest rate, and without making any balloon payment.	Non-negative integer in years.	If missing, use 31 years.
Interest-Only (IO)	A loan that requires only payment of interest without any principal amortization during all or part of the loan term.	Yes, No	Yes.
Loan Term	The loan term is the period between origination and final loan payment (which may be a balloon payment) as stated in the loan origination documents.	Non-negative integer in years.	If missing, use 11 years.

TABLE 19 TO PART 1240—MULTIFAMILY WHOLE LOANS AND GUARANTEES DATA INPUTS—Continued

Variable	Definition/logic	Acceptable value	Treatment of missing or unacceptable value
Mark-to-Market DSCR (MTMDSCR).	MTMDSCR is the DSCR stated on the most recent property operating statement. For interest-only loans, use fully amortizing MTMDSCR when determining $BaseCapital_{bps}$.	Greater than or equal to 0.	In a case where MTMDSCR is not available, the last observed DSCR can be marked to market using a property NOI index or an NOI estimate based on rent and expense indices. If the index is not sufficiently granular, either because of its frequency or geography, or with respect to a certain multifamily property type, use a more geographically broad index or a recently estimated mark-to-market value.
Mark-To-Market Loan-to-Value (MTMLTV) ratio.	MTMLTV is an estimate of the current LTV, derived by marking to market the acquisition LTV using a multifamily property value index or property value estimate based on NOI and cap rate indices.	Greater than or equal to 0.	If missing, mark to market using an index. If the index is not sufficiently granular, either because of its frequency or geography or with respect to a certain multifamily property type, use more geographically broad index or a recently estimated mark-to-market value.
Market Value	The value of the loan reported in an Enterprise's fair value disclosures.		UPB.
Net Operating Income (NOI)/Net Cash Flow (NCF).	NOI is defined as the rental income generated by the property net of vacancy and property operating expenses. NCF is defined as NOI minus any below-the-line expenses, which usually include capital improvement reserves and leasing commissions.	Greater than or equal to 0.	Infer using origination LTV or origination DSCR. Alternatively, infer using actual MTMLTV or actual MTMDSCR.
Original Loan Size	The original loan size is the dollar amount of the loan at origination.	Non-negative dollar value.	$3,000,000.
Payment Performance	The payment status or history of a multifamily loan.	Performing, Delinquent, Re-performing (without Modification), Modified.	If missing, set to Modified.
Special Product	Multifamily loans that are Government-Subsidized, Student Housing, Rehab/Value-Add/Lease-Up, Supplemental.	Not a Special Product, Government-Subsidized, Student Housing, Rehab/Value-Add/Lease-Up, Supplemental.	If missing, set to Rehab/Value-Add/Lease-Up.
Unpaid Principal Balance (UPB$).	The remaining unpaid principal balance on the loan as of the reporting date.	UPB > $0	If missing, use $100,000,000.

§ 1240.32 Loan segments for multifamily whole loans and guarantees credit risk capital requirement.

(a) An Enterprise must assign each multifamily whole loan and guarantee in its portfolio with exposure to credit risk to a loan segment. Multifamily loan segments are determined based on the type of interest rate contract used in the whole loan or guarantee. The multifamily loan segments are: Multifamily Fixed Rate Mortgage (Multifamily FRM) and Multifamily Adjustable Rate Mortgage (Multifamily ARM).

(b) A multifamily whole loan and guarantee that has both a fixed rate period and an adjustable rate period, also known as a hybrid loan, should be classified and treated as a Multifamily FRM during the fixed rate period, and classified and treated as a Multifamily ARM during the adjustable rate period.

§ 1240.33 Base credit risk capital requirement for multifamily whole loans and guarantees.

An Enterprise must determine $BaseCapital_{bps}$ for a multifamily whole loan and guarantee by using the multifamily credit risk capital grid that corresponds to a particular loan segment, presented in Tables 20 and 21 to part 1240. A new acquisition is a multifamily whole loan or guarantee that was originated within five months or less.

(a) Multifamily FRM $BaseCapital_{bps}$ is shown in Table 20. For each whole loan and guarantee classified as Multifamily FRM, $BaseCapital_{bps}$ is the value in the cell in Table 20 determined using the whole loan or guarantee's acquisition DSCR and acquisition LTV in the case of a new acquisition, or using the whole loan or guarantee's MTMDSCR and MTMLTV in the case of a seasoned loan. For a multifamily IO whole loan and guarantee, an Enterprise must use the fully amortized payment to calculate acquisition DSCR and MTMDSCR.

(b) Multifamily ARM *BaseCapital*$_{bps}$ is shown in Table 21. For each whole loan or guarantee classified as a multifamily ARM loan, *BaseCapital*$_{bps}$ is the value in the cell in Table 21 determined using the whole loan and guarantee's acquisition DSCR and acquisition LTV in the case of a new acquisition, or using the whole loan or guarantee's MTMDSCR and MTMLTV in the case of a seasoned loan. For multifamily IO whole loans and guarantees, an Enterprise must use the fully amortized payment to calculate acquisition DSCR and MTMDSCR.

BILLING CODE 8070–01–C

§ 1240.34 Risk multipliers for multifamily whole loans and guarantees.

(a) Risk multipliers increase or decrease the credit risk capital requirement for multifamily whole loans and guarantees based on a multifamily loan's assigned loan segment and risk characteristics. The multifamily risk multipliers are presented in Table 22 to part 1240.

(b) The steps for calculating *TotalCombRiskMult* are as follows:

(1) Determine the appropriate multifamily risk multipliers values from Table 22 based on the loan's characteristics and assigned loan segment.

(2) Apply the appropriate formula to calculate the combined risk multiplier, *CombRiskMult*.

(3) Calculate the *TotalCombRiskMult* as the larger of *CombRiskMult* and a combined multiplier floor of 0.5.

TABLE 22 TO PART 1240—MULTIFAMILY RISK MULTIPLIERS

Risk factor	Value or range	Risk multiplier
Payment Performance	Performing	1.00.

TABLE 22 TO PART 1240—MULTIFAMILY RISK MULTIPLIERS—Continued

Risk factor	Value or range	Risk multiplier
	Delinquent	1.10.
	Re-Performing (without Modification)	1.10.
	Modified	1.20.
Interest-Only	No	1.00.
	Yes (during the interest-only period)	1.10.
Original/Remaining Loan Term in Years (Yr).	Loan Term <= 1Yr	0.70.
	1Yr < Loan Term <= 2Yr	0.75.
	2Yr < Loan Term <= 3Yr	0.80.
	3Yr < Loan Term <= 4Yr	0.85.
	4Yr < Loan Term <= 5Yr	0.90.
	5Yr < Loan Term <= 7Yr	0.95.
	7Yr < Loan Term <= 10Yr	1.00.
	Loan Term < 10Yr	1.15.
Original Amortization Term	Amort. Term <= 20Yr	0.70.
	20Yr < Amort. Term <= 25Yr	0.80.
	25Yr < Amort. Term <= 30Yr	1.00.
	Amort. Term < 30Yr	1.10.
Original Loan Size	Loan Size <= $3,000,000	1.45.
	$3,000,000 < Loan Size <= $5,000,000	1.15.
	$5,000,000 < Loan Size <= $10,000,000	1.00.
	$10,000,000 < Loan Size <= $25,000,000	0.80.
	Loan Size < $25,000,000	0.70.
Special Products	Government-Subsidized	0.60.
	Not a Special Product	1.00.
	Student Housing	1.15.
	Rehab/Value-Add/Lease-Up	1.25.
	Supplemental	Use FRM or ARM Capital Grid by adding supplemental UPB to the base loan and recalculating DSCR and LTV.

(c) The following risk multiplier calculations are to be used for each respective multifamily whole loan and guarantee with the described characteristics:

(1) For each multifamily whole loan and guarantee that is a new acquisition, determine the appropriate risk multiplier values from Table 22 and apply the following formula to calculate *TotalCombRiskMult:*

TotalCombRiskMult = Max(*CombRiskMult,* 0.5) = Max(Payment Performance Multiplier × Interest-Only Multiplier × Original Loan Term Multiplier × Original Amortization Term Multiplier × Original Loan Size Multiplier × Special Products Multiplier, 0.5)

(2) For each multifamily whole loan and guarantee classified as a seasoned loan, determine the appropriate risk multiplier values from Table 22 and apply the following formula to calculate *TotalCombRiskMult:*

TotalCombRiskMult = Max(*CombRiskMult,* 0.5) = Max(Payment Performance Multiplier × Interest-Only Multiplier × Remaining Loan Term Multiplier × Original Amortization Term Multiplier × Original Loan Size Multiplier × Special Products Multiplier, 0.5)

(3) For each multifamily whole loan and guarantee defined as a supplemental loan, an Enterprise must determine the additional capital required for that supplemental loan, or supplemental loans if there is more than one supplemental loan on a property. The steps for calculating the additional capital are as follows:

(i) An Enterprise must recalculate DSCRs and LTVs for the original and supplemental loans using combined loan balances and combined income/payment information.

(ii) Using the recalculated DSCR and LTV for each supplemental loan, use Table 20 for a multifamily FRM, or Table 21 for a multifamily ARM, to calculate the credit risk capital.

(iii) For each supplemental loan, using the combined loan balance of the original and the supplemental, apply the loan size risk multiplier specified in Table 22 for the factor Original Loan Size.

(iv) The capital for a supplemental loan must be calculated as the difference between the combined capital requirements for the original and all previous supplemental loans using the combined DSCR, LTV, and loan balance, and the capital requirement for the original loan plus other supplemental loans using the combined DSCR, LTV, and loan balance.

§ 1240.35 Gross credit risk capital requirement for multifamily whole loans and guarantees.

An Enterprise must determine $GrossCreditRiskCapReq_{bps}$ for each multifamily loan and guarantee as the product of $BaseCapital_{bps}$ and *TotalCombRiskMult* as follows:

$GrossCreditRiskCapReq_{bps} = BaseCapital_{bps} \times TotalCombRiskMult$

§ 1240.36 Net credit risk capital requirement for multifamily whole loans and guarantees.

(a) An Enterprise must determine the net credit risk capital requirement for a multifamily whole loan and guarantee ($NetCreditRiskCapReq_{bps}$). For a multifamily whole loan and guarantee, $NetCreditRiskCapReq_{bps}$ equals $GrossCreditRiskCapReq_{bps}$:

$NetCreditRiskCapReq_{bps} = GrossCreditRiskCapReq_{bps}$

(b) An Enterprise shall determine the net credit risk capital requirement in dollars ($NetCreditRiskCapReq_{\$}$) using the following equation:

$NetCreditRiskCapReq_{\$} = \text{UPB} \times NetCreditRiskCapReq_{bps}/10{,}000$

(c) The aggregate net credit risk capital requirement for all multifamily whole loans and guarantees ($NetCreditRiskCapReq_{\$\_MFWL}$) is the sum of each loan's $NetCreditRiskCapReq_{\$}$.

$$NetCreditRiskCapReq_{\$\_MFWL} = \sum_{\forall MFWL} NetCreditRiskCapReq_{\$}$$

§ 1240.37 Multifamily credit risk transfer capital relief for multifamily whole loans and guarantees.

A multifamily credit risk transfer (''multifamily CRT'') is a credit risk transfer where the underlying whole loans and guarantees backing the CRT, or referenced by the CRT, are multifamily whole loans and guarantees. A multifamily CRT may reduce required credit risk capital. The methodology for calculating the reduction, also known as capital relief, combines credit risk capital requirements and expected losses on the multifamily whole loans and guarantees underlying or referenced by the CRT, tranche structure, ownership, and counterparty credit risk. The methodology is provided in § 1240.38.

§ 1240.38 Calculation of capital relief for a multifamily CRT.

(a) To calculate capital relief for a multifamily CRT, an Enterprise must have data that enables it to assign accurately the parameters described in paragraphs (b) and (c) of this section.

(1) Data used to assign the parameters must be the most currently available data. If the contracts governing the multifamily CRT require payments on a monthly or quarterly basis, the data used to assign the relevant parameters must be no more than 91 calendar days old.

(2) If an Enterprise does not have the data to assign the parameters described in paragraphs (b) and (c) of this section, then an Enterprise must treat the multifamily CRT as if no capital relief had occurred.

(b) To calculate capital relief on a multifamily CRT, an Enterprise must have accurate data on the following parameters:

(1) *CRT tranche attachment point.* An Enterprise must have accurate information on each tranche's attachment point (*ATCH*) in the multifamily CRT. For a given tranche, ATCH represents the threshold at which credit losses of principal will first be allocated. For a given tranche, *ATCH* equals the ratio of the current dollar amount of underlying subordinated tranches relative to the current dollar amount of all tranches all multiplied by 10,000. *ATCH* is expressed in basis points or as a value between zero and 10,000.

(2) *CRT tranche detachment point.* An Enterprise must have accurate information on each tranche's detachment point (*DTCH*) in the multifamily CRT. For a given tranche, DTCH represents the threshold at which credit losses of principal would result in total loss of principal. For a given tranche, *DTCH* equals the sum of the tranche's *ATCH* and 10,000 multiplied by the ratio of the current dollar amount of tranches that are *pari passu* with the tranche (that is, have equal seniority with respect to credit risk) to the current dollar amount of all tranches. *DTCH* is expressed in basis points or as a value between zero and 10,000.

(3) *Multifamily lender loss sharing risk relief percentages.* An Enterprise must have accurate information on each tranche's multifamily lender loss sharing risk relief percentage ($MF\_LS_{\%}$) in the multifamily CRT. Lender loss sharing CRTs are multifamily CRTs where the lender and an Enterprise share all multifamily credit losses on a *pari passu* basis. For a given tranche, $MF\_LS_{\%}$ is the percentage of the tranche that is subject to lender loss sharing. $MF\_LS_{\%}$ is expressed as a value between zero and 100%.

(4) *Multiple tranche loss sharing percentage by tranche.* An Enterprise must have accurate information on each tranche's multiple tranche loss sharing risk relief percentage ($MF\_MTLS_{\%}$) for the multifamily CRT. For a given tranche, $MF\_MTLS_{\%}$ is the percentage of the tranche that is either insured, reinsured, or afforded coverage through lender reimbursement of credit losses of principal and is not part of lender loss sharing. $MF\_MTLS_{\%}$ is expressed as a value between zero and 100%.

(5) *Securitization risk relief percentage by tranche.* An Enterprise must have accurate information on each tranche's securitization risk relief percentage ($MF\_S_{\%}$) in the multifamily CRT. For a given tranche, $MF\_\mathrm{S}_{\%}$ is the percentage of the tranche sold in the capital markets. $MF\_S_{\%}$ is expressed as a value between zero and 100%.

(6) *Credit risk capital on the underlying multifamily whole loans and guarantees.* The Enterprises must have accurate data on $PGCRC_{bps}$ for the multifamily CRT. $PGCRC_{bps}$ is calculated using the aggregate $NetCreditRiskCapReq_{bps}$ for all multifamily whole loans and guarantees underlying the given multifamily CRT.

(7) *CRT expected losses.* An Enterprise must have accurate data on total lifetime net expected credit risk losses ($PGEL_{bps}$) on the whole loans and guarantees underlying the multifamily CRT. $PGEL_{bps}$ shall be calculated internally by an Enterprise. $PGEL_{bps}$ does not include the operational risk capital requirement or going-concern buffer requirement. $PGEL_{bps}$ is expressed in basis points or as a value between zero and 10,000.

(8) *Counterparty collateral on lender and multiple tranche loss sharing transactions.* An Enterprise must have accurate data on the dollar amounts of $CntptyCollat_{\$}$ for each counterparty and by tranche in a multifamily CRT involving lender and multiple tranche loss sharing. For a given counterparty and tranche, $CntptyCollat_{\$}$ is the dollar amount of collateral to fulfill the counterparty's trust funding obligation. $CntptyCollat_{\$}$ is expressed in dollar terms as a value greater than or equal to zero.

(9) *Counterparty quota shares on lender and multiple tranche loss sharing transactions.* An Enterprise must have accurate information on counterparty quota shares on lender and multiple tranche loss sharing transactions for each counterparty by tranche. For a given counterparty and tranche, $CntptyShare_{\%}$ is the percentage of $MF\_LS_{\%}$ or $MF\_MTLS_{\%}$ that the given counterparty covers. $CntptyShare_{\%}$ is expressed as a value between zero and 100%.

(10) *Counterparty ratings on lender and multiple tranche loss sharing transactions.* An Enterprise must have internally generated ratings for the counterparties on lender and multiple tranche loss sharing transactions. An Enterprise should use the data inputs consistent with Table 2 to part 1240 to identify the *CPHaircut.* The internally generated ratings must be converted into the counterparty ratings provided in Table 3 to part 1240. The *CPHaircut* percentages for each counterparty rating provided in Table 3, are shown in Table 23 to part 1240.

TABLE 23 TO PART 1240—*CPHaircut* FOR COUNTERPARTY RATING ON LENDER AND MULTIPLE TRANCHE LOSS SHARING TRANSACTIONS

Counterparty rating	*CPHaircut* for concentration risk: Not high (%)	*CPHaircut* for concentration risk: High (%)
1	2.1	3.4
2	5.3	8.5
3	6.0	9.6
4	12.7	19.2
5	16.2	22.9
6	22.5	28.5
7	41.2	45.1
8	48.2	48.2

(11) *Aggregate unpaid principal balance.* An Enterprise must have accurate information on each multifamily CRT's aggregate unpaid principal balance ($UPB_{\$}$).

(c) For each multifamily CRT, an Enterprise must use the parameters described in paragraph (b) of this section to calculate multifamily CRT capital relief using one of the three following methods:

(1) *Lender loss sharing.* The lender loss sharing capital relief formulae are as follows:

(i) An Enterprise must calculate the portion of capital associated with the lender's exposure ($LenderCapital_{\$}$) using the following formula:

$$LenderCapital_{\$} = (PGCRC_{bps}/10{,}000) * UPB_{\$} * MF\_LS_{\%}$$

(ii) An Enterprise must determine the uncollateralized counterparty exposure ($CntptyExposure_{\$}$), which is reduced by 50% if the Enterprise has the contractual right to receive future lender guarantee-fee revenue. $CntptyExposure_{\$}$ is calculated as follows:

$$CntptyExposure_{\$} = \max([LenderCapital_{\$} - CntptyCollat_{\$}],0)$$

(iii) An Enterprise must determine counterparty credit risk in dollars ($CntptyCreditRisk_{\$}$). An Enterprise must use the following formula to calculate $CntptyCreditRisk_{\$}$:

$$CntptyCreditRisk_{\$} = CntptyExposure_{\$} * (CPHaircut)$$

(iv) An Enterprise must calculate total $CapRelief_{\$}$ for the entire multifamily CRT by adding up the capital relief in dollars and subtracting counterparty credit risk.

$$CapRelief_{\$} = LenderCapital_{\$} - CntptyCreditRisk_{\$}$$

(2) *Securitization.* The securitization multifamily capital relief formulae are as follows:

(i) An Enterprise must distribute $PGCRC_{bps}$ to the tranches of the multifamily CRT, while controlling for $PGEL_{bps}$. For a given tranche, $TCRC_{bps}$ is as follows:

$$TCRC_{bps} = (DTCH - ATCH) * \left[\max\left(0, \min\left(\left[\frac{PGCRC_{bps} + PGEL_{bps} - ATCH}{DTCH - ATCH}\right], 1\right)\right) - \max\left(0, \min\left(\left[\frac{PGEL_{bps} - ATCH}{DTCH - ATCH}\right], 1\right)\right)\right]$$

$TCRC_{bps}$ takes values between 0 and 10,000. $TCRC_{bps}$ must be calculated for each tranche in the multifamily CRT.

(ii) For each tranche in a multifamily CRT, an Enterprise must use the following formula to identify the capital relief from securitization ($STCRC_{bps}$):

$$STCRC_{bps} = MF\_S_{\%} * TCRC_{bps}$$

$STCRC_{bps}$ is expressed in basis points and takes values between 0 and 10,000.

(iii) An Enterprise must calculate total $CapRelief_{\$}$ for the entire multifamily CRT by adding up the capital relief in dollars across each tranche.

$$CapRelief_{\$} = \sum_{\forall Tranches \in CRT} \frac{(STCRC_{bps})}{10{,}000} * UPB_{\$}$$

(3) *Multiple tranche loss sharing.* The multiple tranche loss sharing multifamily capital relief formulae are as follows:

(i) An Enterprise must distribute $PGCRC_{bps}$ to the tranches of the multifamily CRT, while controlling for $PGEL_{bps}$. For a given tranche, $TCRC_{bps}$ is as follows:

$$TCRC_{bps} = (DTCH - ATCH) * \left[\max\left(0, \min\left(\left[\frac{PGCRC_{bps} + PGEL_{bps} - ATCH}{DTCH - ATCH}\right], 1\right)\right) - \max\left(0, \min\left(\left[\frac{PGEL_{bps} - ATCH}{DTCH - ATCH}\right], 1\right)\right)\right]$$

$TCRC_{bps}$ takes values between 0 and 10,000. $TCRC_{bps}$ must be calculated for each tranche in the multifamily CRT.

(ii) For each tranche in a multifamily CRT, an Enterprise must use the following formulae to identify the capital relief from multiple tranche loss sharing ($MTLSTCRC_{bps}$):

$$MTLSTCRC_{bps} = MF\_MTLS_{\%} * TCRC_{bps}$$

$MTLSTCRC_{bps}$ is expressed in basis points and takes values between 0 and 10,000.

(iii) An Enterprise must determine the uncollateralized counterparty exposure ($CntptyExposure_{bps}$) as follows:

$$CntptyExposure_{bps} = \max\left(\left[CntptyShare_{\%} * MTLSTCRC_{bps} - 10{,}000 * \frac{CntptyCollat_{\$}}{UPB_{\$}}\right], 0\right)$$

$CntptyExposure_{bps}$ takes values between 0 and 10,000. *$CntptyExposure_{bps}$* is reduced by 50% if the Enterprise has the contractual right to receive future lender guarantee-fee revenue.

(iv) An Enterprise must determine counterparty credit risk (*$CntptyCreditRisk_{bps}$*), using the following formula to calculate *$CntptyCreditRisk_{bps}$*:

$CntptyCreditRisk_{bps} = CntptyExposure_{bps} * (CPHaircut)$

(v) An Enterprise must calculate total capital relief in dollars for the entire multiple tranche loss sharing multifamily CRT (*$CapRelief_{\$}$*) by adding up the capital relief in dollars across each tranche and subtracting counterparty credit risk.

$$CapRelief_{\$} = \sum_{\forall Tranches \in CRT} \frac{(MTLSTCRC_{bps})}{10{,}000} * UPB_{\$} - \sum_{\forall Tranches \in CRT} \frac{(CntptyCreditRisk_{bps})}{10{,}000} * UPB_{\$}$$

(d) *Total multifamily capital relief.* To calculate total capital relief across all multifamily CRTs (*$TotalCapRelief_{\$\_MFWL}$*), an Enterprise must aggregate capital relief using the following:

$$TotalCapRelief_{\$\_MFWL} = \sum_{\forall Multifamily\ CRTs} CapRelief_{\$\_CRT}$$

§ 1240.39 Multifamily whole loans market risk capital requirement.

(a) Each multifamily whole loan with market risk exposure is subject to the multifamily whole loan market risk capital requirement. There is no market risk exposure for multifamily guarantees. The market risk capital requirement for a multifamily whole loan is limited to spread risk.

(b) The multifamily whole loan market risk capital requirement is defined as the product of the market value, a defined spread shock of 15 bps and *SpreadDuration* derived from an Enterprise's internal models.

(c) The dollar amount of the *$MarketRiskCapReq_{\$}$* for a multifamily whole loan is calculated as follows:

$MarketRiskCapReq_{\$} = \text{Market Value} \times 0.0015 \times SpreadDuration$

(d) The aggregate market risk capital requirement for all multifamily whole loans and guarantees (*$MarketRiskCapReq_{\$\_MFWL}$*) is the sum of each loan's *$MarketRiskCapReq_{\$}$*:

$$MarketRiskCapReq_{\$\_MFWL} = \sum_{\forall MFWL} MarketRiskCapReq_{\$}$$

§ 1240.40 Multifamily securities market risk capital requirement.

(a) Each Enterprise and Ginnie Mae guaranteed multifamily MBS (*MFMBS*) in portfolio is subject to a market risk capital requirement. The market risk capital requirement for *MFMBS* is limited to spread risk.

(b) The *MFMBS* market risk capital requirement is defined as the product of the market value, a spread shock of 100 bps and the *SpreadDuration* derived from an Enterprise's internal models. The dollar amount of the *$MarketRiskCapReq_{\$}$* for an *MFMBS* is calculated as follows:

$MarketRiskCapReq_{\$} = MFMBS\ \text{Market Value} \times 0.0100 \times SpreadDuration$

(c) The aggregate market risk capital requirement for all *MFMBS* (*$MarketRiskCapReq_{\$\_MFMBS}$*) is the sum of each security's *$MarketRiskCapReq_{\$}$*:

$$MarketRiskCapReq_{\$\_MFMBS} = \sum_{\forall MFMBS} MarketRiskCapReq_{\$}$$

§ 1240.41 Operational risk capital requirement for multifamily whole loans and guarantees.

(a) Each multifamily whole loan and guarantee is subject to an 8 basis point operational risk capital requirement.

(b) The operational risk capital requirement in dollar terms (*$OperationalRiskCapReq_{\$}$*) is calculated as follows:

(1) If the Enterprise holds only credit risk or both credit and market risk, the calculation is as follows:

$OperationalRiskCapReq_{\$} = \text{UPB} \times 0.0008$

(2) Otherwise, if the Enterprise holds only market risk the calculation is as follows:

$OperationalRiskCapReq_{\$} = \text{Market Value} \times 0.0008$

(c) The aggregate operational risk capital requirement for all multifamily whole loans and guarantees (*$OperationalRiskCapReq_{\$\_MFWL}$*) is the sum of each loan's *$OperationalRiskCapReq_{\$}$*.

$$OperationalRiskCapReq_{\$\_MFWL} = \sum_{\forall MFWL} OperationalRiskCapReq_{\$}$$

§ 1240.42 Operational risk capital requirement for multifamily securities.

(a) Each MFMBS is subject to an 8 basis point operational risk capital requirement.

(b) The operational risk capital requirement for MFMBS in dollar terms ($OperationalRiskCapReq_{\$}$) is calculated as follows:

$OperationalRiskCapReq_{\$} = MFMBS\ Market\ Value \times 0.0008$

(c) The aggregate operational risk capital requirement for MFMBS ($OperationalRiskCapReq_{\$\_MFMBS}$) is the sum of each security's $OperationalRiskCapReq_{\$}$.

$$OperationalRiskCapReq_{\$\_MFMBS} = \sum\nolimits_{\forall MFMBS} OperationalRiskCapReq_{\$}$$

§ 1240.43 Going-concern buffer requirement for multifamily whole loans and guarantees.

(a) Each multifamily whole loan and guarantee is subject to a 75 basis point going-concern buffer requirement ($GCBufferReq_{\$}$).

(b) The dollar amount of the $GCBufferReq_{\$}$ is calculated as follows:

(1) If the Enterprise holds only credit risk or both credit and market risk, the calculation is as follows:

$GCBufferReq_{\$} = \text{UPB} \times 0.0075$

(2) Otherwise, if the Enterprise holds only market risk the calculation is as follows:

$GCBufferReq_{\$} = \text{Market Value} \times 0.0075$

(c) The aggregate going-concern buffer requirement for all multifamily whole loans and guarantees ($GCBufferReq_{\$\_MFWL}$) is the sum of each loan's $GCBufferReq_{\$}$.

$$GCBufferReq_{\$\_MFWL} = \sum_{\forall MFWL} GCBufferReq_{\$}$$

§ 1240.44 Going-concern buffer requirement for multifamily securities.

(a) Each MFMBS is subject to a 75 basis point going-concern buffer requirement.

(b) The going-concern buffer requirement for MFMBS in dollar terms ($GCBufferReq_{\$}$) is calculated as follows:

$GCBufferReq_{\$} = MFMBS\ Market\ Value \times 0.0075$

(c) The aggregate going-concern buffer requirement for all MFMBS ($GCBufferReq_{\$\_MFMBS}$) is the sum of each security's $GCBufferReq_{\$}$.

$$GCBufferReq_{\$\_MFMBS} = \sum_{\forall MFMBS} GCBufferReq_{\$}$$

§ 1240.45 Aggregate risk-based capital requirement for multifamily whole loans, guarantees, and related securities.

The aggregate capital requirement for multifamily whole loans, guarantees and related securities is the cumulative total of: The aggregate net credit risk capital requirement; the aggregate market risk capital requirement; the aggregate operational risk capital requirement; the aggregate going-concern buffer requirement; net of the total capital relief from multifamily CRTs. The aggregate risk-based capital requirement for multifamily whole loans and guarantees ($RiskBasedCapReq_{\$\_MFWLGS}$) is calculated as follows:

$$\begin{aligned} RiskBasedCapReq_{\$\_MFWLGS} = {} & NetCreditRiskCapReq_{\$\_MFWL} + MarketRiskCapReq_{\$\_MFWL} + MarketRiskCapReq_{\$\_MFMBS} + OperationalRiskCapReq_{\$\_MFWL} + OperationalRiskCapReq_{\$\_MFMBS} + GCBufferReq_{\$\_MFWL} + GCBufferReq_{\$\_MFMBS} \\ & - TotalCapRelief_{\$\_MFWL} \end{aligned}$$

§ 1240.46 Non-Enterprise and non-Ginnie Mae CMBS risk-based capital requirement.

(a) The risk-based capital requirement for a CMBS is the cumulative total of: A combined credit risk and market risk capital requirement, an operational risk capital requirement, and a going-concern buffer requirement.

(b) A CMBS is subject to 200 basis point combined credit and market risk capital requirement. The combined credit and market risk capital requirement for a CMBS in dollar terms ($CreditAndMarketRiskCapReq_{\$}$) is calculated as follows:

$CreditAndMarketRiskCapReq_{\$} = CMBS\ Market\ Value \times 0.0200$

(c) The aggregate combined credit and market risk capital requirement for CMBS ($CreditAndMarketRiskCapReq_{\$\_CMBS}$) is the sum of each security's $CreditAndMarketRiskCapReq_{\$}$ as follows:

$$CreditAndMarketRiskCapReq_{\$\_CMBS} = \sum\nolimits_{\forall CMBS} CreditAndMarketRiskCapReq\$$$

(d) A CMBS is subject to an 8 basis point operational risk capital requirement. The operational risk capital requirement for CMBS in dollar terms ($OperationalRiskCapReq_{\$}$) is calculated as follows:

$OperationalRiskCapReq_{\$} = CMBS\ Market\ Value \times 0.0008$

(e) The aggregate operational risk capital requirement for CMBS (*OperationalRiskCapReq$_{\$\_CMBS}$*) is the sum of each loan's *OperationalRiskCapReq$_{\$}$*.

$$OperationalRiskCapReq_{\$\_CMBS} = \sum\nolimits_{\forall CMBS} OperationalRiskCapReq_{\$}$$

(f) A CMBS is subject to a 75 basis point going-concern buffer requirement. The going-concern buffer requirement for CMBS in dollar terms (*GCBufferReq$_{\$}$*) is calculated as follows:

GCBufferReq$_{\$}$ = CMBS Market Value × 0.0075

(g) The aggregate going-concern buffer requirement for all CMBS (*GCBufferReq$_{\$\_CMBS}$*) is the sum of each security's *GCBufferReq$_{\$}$*.

$$GCBufferReq_{\$\_CMBS} = \sum_{\forall CMBS} GCBufferReq_{\$}$$

(h) The total risk-based capital requirement for CMBS in dollar terms (*RiskBasedCap$_{\$\_CMBS}$*) is calculated as follows:

RiskBasedCapReq$_{\$\_CMBS}$ = CapitalAndMarketRiskCapReq$_{\$\_CMBS}$ + OperationalRiskCapReq$_{\$\_CMBS}$ + GCBufferReq$_{\$\_CMBS}$

§ 1240.47 Other assets and exposures risk-based capital requirement.

(a) *Deferred Tax Assets (DTA).* DTA are assets on the balance sheet that may be used to reduce taxable income. For purpose of this section, adjusted core capital is core capital less DTA that arise from net operating losses and tax credit carryforwards, net of any related valuation allowances and net of deferred tax liabilities (DTL). The risk-based capital requirement for DTA is calculated as follows:

RiskBasedCapReq$_{\$\_DTA}$ =
100 percent of DTA that arise from net operating losses and tax credit carryforwards, net of any related valuation allowances and net DTL + 100 percent of DTA arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTL, that exceed 10 percent of adjusted core capital + 20 percent of DTA arising from temporary differences that could not be realized through net operating loss carrybacks, net of related valuation allowances and net of DTL, that do not exceed 10 percent of adjusted core capital + 8 percent of DTA arising from temporary differences that could be realized through net operating loss carrybacks, net of related valuation allowances and net of DTL.

(b) *Municipal Debt.* A Municipal Debt instrument is an obligation issued by a state, a local government, or a state agency such as a housing finance agency. The risk-based capital requirement for Municipal Debt is the cumulative total of a market risk capital requirement; an operational risk capital requirement; and a going-concern buffer requirement. There is no credit risk capital requirement for Municipal Debt.

(1)(i) A Municipal Debt instrument is subject to a 760 basis point market risk capital requirement. The market risk capital requirement for a Municipal Debt instrument in dollar terms (*MarketRiskCapReq$_{\$}$*) is calculated as follows:

MarketRiskCapReq$_{\$}$ = Municipal Debt Market Value × 0.076

(ii) The aggregate market risk capital requirement for all Municipal Debt (*MarketRiskCapReq$_{\$\_MD}$*) is the sum of each instrument's *MarketRiskCapReq$_{\$}$*.

$$MarketRiskCapReq_{\$\_MD} = \sum_{\forall MD} MarketRiskCapReq_{\$}$$

(2) Municipal debt is subject to an 8 basis point operational risk capital requirement. The operational risk capital requirement for municipal debt in dollar terms (*OperationalRiskCapReq$_{\$}$*) is calculated as follows:

OperationalRiskCapReq$_{\$}$ = Municipal Debt Market Value × 0.0008

The aggregate operational risk capital requirement for municipal debt (*OperationalRiskCapReq$_{\$\_MD}$*) is the sum of each instrument's *OperationalRiskCapReq$_{\$}$*.

$$OperationalRiskCapReq_{\$\_MD} = \sum\nolimits_{\forall MD} OperationalRiskCapReq_{\$}$$

(3)(i) Municipal debt is subject to a 75 basis point going-concern buffer requirement. The going-concern buffer requirement for municipal debt in dollar terms (*GCBufferReq$_{\$\_MD}$*) is calculated as follows:

GCBufferReq$_{\$}$ = Municipal Debt Market Value × 0.0075

(ii) The aggregate going-concern buffer requirement for all municipal debt (*GCBufferReq$_{\$\_MD}$*) is the sum of each security's *GCBufferReq$_{\$}$*.

$$GCBufferReq_{\$\_MD} = \sum_{\forall MD} GCBufferReq_{\$}$$

(4) The total risk-based capital requirement for municipal debt in dollar terms (*RiskBasedCap$_{\$\_MD}$*) is calculated as follows:

$RiskBasedCapReq_{\$\_MD} = MarketRiskCapReq_{\$\_MD} + OperationalRiskCapReq_{\$\_MD} + GCBufferReq_{\$\_MD}$

(c) *Cash and cash equivalents.* Cash and cash equivalents are highly liquid investment securities that have a maturity at the date of acquisition of three months or less and are readily convertible to known amounts of cash. Cash and cash equivalents are not subject to credit risk, market risk, or operational risk capital requirements, nor is there a going-concern buffer requirement for cash and cash equivalents. The total risk-based capital requirement for cash and cash equivalent assets is zero.

(d) *Reverse Mortgage Loans and Securities.* The capital requirement for Reverse Mortgage Loans and Securities is the cumulative total of: A market risk capital requirement, an operational risk capital requirement, and a going-concern buffer requirement.

(1) The dollar amount of the *MarketRiskCapReq$_{\$}$* for a reverse mortgage loan is calculated as follows:

$MarketRiskCapReq_{\$} = \text{Market Value} \times 0.05$

(2) The dollar amount of the *MarketRiskCapReq$_{\$}$* for a reverse mortgage security is calculated as follows:

$MarketRiskCapReq_{\$} = \text{Market Value} \times 0.0410$

(3) The aggregate market risk capital requirement for all reverse mortgage loans and securities (*MarketRiskCapReq$_{\$\_SFREV}$*) is the sum of each loan's and security's *MarketRiskCapReq$_{\$}$*:

$$MarketRiskCapReq_{\$\_SFREV} = \sum_{\forall SFREV} MarketRiskCapReq_{\$}$$

(4)(i) Reverse mortgage loans and securities are subject to an 8 basis point operational risk capital requirement. The operational risk capital requirement for reverse mortgage loans and securities in dollar terms (*OperationalRiskCapReq$_{\$}$*) is calculated as follows:

$OperationalRiskCapReq_{\$} = Market\ Value \times 0.0008$

(ii) The aggregate operational risk capital requirement for reverse mortgage loans and securities (*MarketRiskCapReq$_{\$\_SFREV}$*)is the sum of each loan's and security's *OperationalRiskCapReq$_{\$}$*.

$$OperationalRiskCapReq_{\$\_SFREV} = \sum\nolimits_{\forall SFREV} OperationalRiskCapReq_{\$}$$

(5)(i) Reverse mortgage loans and securities are subject to a 75 basis point going-concern buffer requirement. The going-concern buffer requirement for reverse mortgage loans and securities in dollar terms (*GCBufferReq$_{\$}$*) is calculated as follows:

$GCBufferReq_{\$} = Market\ Value \times 0.0075$

(ii) The aggregate going-concern buffer requirement for all reverse mortgage loans and securities (*GCBuffer Req$_{\$\_SFREV}$*) is the sum of each loan's and security's *GCBufferReq$_{\$}$*.

$$GCBufferReq_{\$\_SFREV} = \sum_{\forall SFREV} GCBufferReq_{\$}$$

(6) The total risk-based capital requirement for reverse mortgage loans and securities in dollar terms (*RiskBasedCap$_{\$\_SFREV}$*) is calculated as follows:

$RiskBasedCapReq_{\$\_SFREV} = CapitalAndMarketRiskCapReq_{\$\_SFREV} + OperationalRiskCapReq_{\$\_SFREV} + GCBufferReq_{\$\_SFREV}$

(e) *Single-family rentals.* Single-family rentals are multiple income-producing single-family units owned by an investor for the purpose of renting them and deriving a profit from their operation. Single-family Rentals shall be treated as multifamily whole loans and guarantees for the purposes of assigning risk-based capital.

§ 1240.48 Unassigned Activities.

(a) For purposes of this part, an Unassigned Activity means any asset, guarantee, off-balance sheet guarantee, or activity for which this part does not have an explicit risk-based capital treatment. An Unassigned Activity must be assigned a capital requirement.

(b) The Director has the authority under 12 U.S.C. 4612(e) to treat as an Unassigned Activity any asset, guarantee, off-balance sheet guarantee or activity that exists as of the effective date of this part, or is not in existence as of the effective date of this part, which has:

(1) Characteristics or unusual features that create risks for an Enterprise that are not adequately reflected in the specified treatments in this part; or

(2) For which the specified treatment in this part no longer adequately reflects the risks to an Enterprise, either because of increased volume or because new information concerning those risks has become available.

(c) The methodology for determining the capital requirement for an Unassigned Activity includes the following steps:

(1) An Enterprise must provide a notification to FHFA of a proposal related to an Unassigned Activity as soon as possible, but in no event later than thirty days after the date on which the transaction closes or is settled. This obligation applies with respect to any activity for which this part does not otherwise specifically prescribe a risk-based capital requirement, or that FHFA has notified the Enterprise is an Unassigned Activity. The notification must include:

(i) A proposal for an appropriate capital treatment that will capture the credit and market risk of the Unassigned Activity; and

(ii) Narrative and data to explain the Unassigned Activity sufficient for FHFA to understand the risk profile of the Unassigned Activity.

(2) FHFA will review the notification and determine whether an existing treatment specified in this part captures the risks of the Unassigned Activity. If FHFA determines there is no effective existing treatment, FHFA will determine an appropriate treatment. FHFA will provide an Enterprise with an order specifying the risk-based capital treatment for the Unassigned Activity. If FHFA does not provide an Enterprise with an order specifying the risk-based capital treatment for the Unassigned Activity in time for the Enterprise to prepare its capital report, an Enterprise shall use its own proposed capital treatment, reflecting its assessment of the capital required in light of the various risks the activity presents, including an operational risk capital requirement and a going-concern buffer requirement.

(d) This part may be amended from time to time to provide for a risk-based capital requirement treatment for a specified Unassigned Activity.

§ 1240.49 Aggregate risk-based capital requirement calculation.

(a) The calculation for the aggregate risk-based capital requirements for total capital (*RiskBasedCapReq$_TOTAL*), as described in § 1240.4, is as follows:

$$\begin{aligned}&RiskBasedCapReq_{\$\_TOTAL} = RiskBasedCapReq_{\$\_SFWLGS} + \\ &RiskBasedCapReq_{\$\_PLS} + RiskBasedCapReq_{\$\_MFWLGS} + \\ &RiskBasedCapReq_{\$\_CMBS} + RiskBasedCapReq_{\$\_DTA} + \\ &RiskBasedCapReq_{\$\_MD} + RiskBasedCapReq_{\$\_SFREV}\end{aligned}$$

(b) *RiskBasedCapReq$_TOTAL* shall also include any capital requirements for Unassigned Activities.

§ 1240.50 Minimum leverage capital requirement: 2.5 percent alternative.

Each Enterprise shall maintain at all times core capital in an amount at least equal to 2.5 percent of total assets and off-balance sheet guarantees related to securitization activities, or such higher amount as the Director may require pursuant to part 1225 of this chapter.

§ 1240.51 Minimum leverage capital requirement: Bifurcated alternative.

Each Enterprise shall maintain at all times core capital in an amount at least equal to 4% of non-trust assets and 1.5% of trust assets, or such higher amount as the Director may require pursuant to part 1225 of this chapter.

CHAPTER XVII—OFFICE OF FEDERAL HOUSING ENTERPRISE OVERSIGHT, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER C—SAFETY AND SOUNDNESS

PART 1750—[REMOVED]

■ 4. Remove part 1750.

Dated: June 27, 2018.

Melvin L. Watt,

Director, Federal Housing Finance Agency.

Proposed Revisions to Prohibitions and Restrictions on Proprietary Trading and Certain Interests in, and Relationships With, Hedge Funds and Private Equity Funds

AGENCY: Office of the Comptroller of the Currency, Treasury (''OCC''); Board of Governors of the Federal Reserve System (''Board''); Federal Deposit Insurance Corporation (''FDIC''); Securities and Exchange Commission (''SEC''); and Commodity Futures Trading Commission (''CFTC'').

ACTION: Notice of proposed rulemaking.

SUMMARY: The OCC, Board, FDIC, SEC, and CFTC (individually, an ''Agency,'' and collectively, the ''Agencies'') are requesting comment on a proposal that would amend the regulations implementing section 13 of the Bank Holding Company Act (BHC Act). Section 13 contains certain restrictions on the ability of a banking entity and nonbank financial company supervised by the Board to engage in proprietary trading and have certain interests in, or relationships with, a hedge fund or private equity fund. The proposed amendments are intended to provide banking entities with clarity about what activities are prohibited and to improve supervision and implementation of section 13.

DATES: Comments must be received on or before September 17, 2018.

ADDRESSES: Interested parties are encouraged to submit written comments jointly to all of the Agencies. Commenters are encouraged to use the title ''Restrictions on Proprietary Trading and Certain Interests in, and Relationships with, Hedge Funds and Private Equity Funds'' to facilitate the organization and distribution of comments among the Agencies. Commenters are also encouraged to identify the number of the specific question for comment to which they are responding. Comments should be directed to:

OCC: Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments through the Federal eRulemaking Portal or email, if possible. Please use the title ''Proposed Revisions to Prohibitions and Restrictions on Proprietary Trading and Certain Interests in, and Relationships with, Hedge Funds and Private Equity Funds'' to facilitate the organization and distribution of the comments. You may submit comments by any of the following methods:

- *Federal eRulemaking Portal—''regulations.gov'':* Go to *www.regulations.gov.* Enter ''Docket ID OCC–2018–0010'' in the Search Box and click ''Search.'' Click on ''Comment Now'' to submit public comments.
- Click on the ''Help'' tab on the *Regulations.gov* home page to get information on using *Regulations.gov,* including instructions for submitting public comments.
- *Email: VolckerReg.Comments@occ.treas.gov.*
- *Mail:* Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Hand Delivery/Courier:* 400 7th Street SW, Suite 3E–218, Washington, DC 20219.
- *Fax:* (571) 465–4326.

Instructions: You must include ''OCC'' as the agency name and ''Docket ID OCC–2018–0010'' in your comment. In general, the OCC will enter all comments received into the docket and publish the comments on the *Regulations.gov* website without change, including any business or personal information that you provide such as name and address information, email addresses, or phone numbers. Comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

You may review comments and other related materials that pertain to this rulemaking action by any of the following methods:

- *Viewing Comments Electronically:* Go to *www.regulations.gov.* Enter ''Docket ID OCC–2018–0010'' in the Search box and click ''Search.'' Click on ''Open Docket Folder'' on the right side of the screen and then ''Comments.'' Comments can be filtered by clicking on ''View All'' and then using the filtering tools on the left side of the screen.
- Click on the ''Help'' tab on the *Regulations.gov* home page to get information on using *Regulations.gov.* Supporting materials may be viewed by clicking on ''Open Docket Folder'' and then clicking on ''Supporting Documents.'' The docket may be viewed after the close of the comment period in the same manner as during the comment period.
- *Viewing Comments Personally:* You may personally inspect and photocopy comments at the OCC, 400 7th Street SW, Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hearing impaired, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

Board: You may submit comments, identified by Docket No. R–1608; RIN 7100–AF 06, by any of the following methods:

- *Agency Website: http://www.federalreserve.gov.* Follow the instructions for submitting comments at *http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm.*
- *Email: regs.comments@federalreserve.gov.* Include docket and RIN numbers in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551. All public comments are available from the Board's website at *http://www.federalreserve.gov/generalinfo/foia/ProposedRegs.cfm* as submitted, unless modified for technical

reasons or to remove sensitive personal information at the commenter's request. Public comments may also be viewed electronically or in paper form in Room 3515, 1801 K Street NW. (between 18th and 19th Streets NW) Washington, DC 20006 between 9:00 a.m. and 5:00 p.m. on weekdays.

FDIC: You may submit comments, identified by RIN 3064–AE67 by any of the following methods:

- *Agency Website: http://www.FDIC.gov/regulations/laws/federal/propose.html.* Follow instructions for submitting comments on the Agency website.
- *Mail:* Robert E. Feldman, Executive Secretary, Attention: Comments/Legal ESS, Federal Deposit Insurance Corporation, 550 17th Street NW, Washington, DC 20429.
- *Hand Delivered/Courier:* Comments may be hand-delivered to the guard station at the rear of the 550 17th Street Building (located on F Street) on business days between 7:00 a.m. and 5:00 p.m.
- *Email: comments@FDIC.gov.* Include the RIN 3064–AE67 on the subject line of the message.
- *Public Inspection:* All comments received must include the agency name and RIN 3064–AE67 for this rulemaking. All comments received will be posted without change to *http://www.fdic.gov/regulations/laws/federal/*, including any personal information provided. Paper copies of public comments may be ordered from the FDIC Public Information Center, 3501 North Fairfax Drive, Room E–1002, Arlington, VA 22226 or by telephone at (877) 275–3342 or (703) 562–2200.

SEC: You may submit comments by the following methods:

Electronic Comments

- Use the SEC's internet comment form (*http://www.sec.gov/rules/proposed.shtml*); or

Send an email to *rule-comments@sec.gov.* Please include File Number S7–14–18 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number S7–14–18. This file number should be included on the subject line if email is used. To help us process and review your comments more efficiently, please use only one method. The SEC will post all comments on the SEC's website (*http://www.sec.gov/rules/proposed.shtml*). Comments are also available for website viewing and printing in the SEC's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. All comments received will be posted without change. Persons submitting comments are cautioned that the SEC does not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

Studies, memoranda, or other substantive items may be added by the SEC or SEC staff to the comment file during this rulemaking. A notification of the inclusion in the comment file of any materials will be made available on the SEC's website. To ensure direct electronic receipt of such notifications, sign up through the ''Stay Connected'' option at *www.sec.gov* to receive notifications by email.

CFTC: You may submit comments, identified by RIN 3038–AE72 and ''Proposed Revisions to Prohibitions and Restrictions on Proprietary Trading and certain Interests in, and Relationships with, Hedge Funds and Private Equity Funds,'' by any of the following methods:

- *Agency Website: https://comments.cftc.gov.* Follow the instructions on the website for submitting comments.
- *Mail:* Send to Christopher Kirkpatrick, Secretary, Commodity Futures Trading Commission, 1155 21st Street NW, Washington, DC 20581.
- *Hand Delivery/Courier:* Same as Mail above.

Please submit your comments using only one method. All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to *www.cftc.gov* and the information you submit will be publicly available. If, however, you submit information that ordinarily is exempt from disclosure under the Freedom of Information Act, you may submit a petition for confidential treatment of the exempt information according to the procedures set forth in CFTC Regulation 145.9.1. The CFTC reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from *www.cftc.gov* that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the rulemaking will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

SUPPLEMENTARY INFORMATION:

I. Background

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the ‘‘Dodd-Frank Act’’) was enacted on July 21, 2010.[1] Section 619 of the Dodd-Frank Act added a new section 13 to the BHC Act (codified at 12 U.S.C. 1851), also known as the Volcker Rule, that generally prohibits any banking entity from engaging in proprietary trading or from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a hedge fund or private equity fund (‘‘covered fund’’), subject to certain exemptions.[2]

Section 13 of the BHC Act generally prohibits banking entities from engaging as principal in trading for the purpose of selling financial instruments in the near term or otherwise with the intent to resell in order to profit from short-term price movements.[3] Section 13(d)(1) expressly exempts from this prohibition, subject to conditions, certain activities, including:

- Trading in U.S. government, agency, and municipal obligations;
- Underwriting and market-making-related activities;
- Risk-mitigating hedging activities;
- Trading on behalf of customers;
- Trading for the general account of insurance companies; and
- Foreign trading by non-U.S. banking entities.[4]

Section 13 of the BHC Act also generally prohibits banking entities from acquiring or retaining an ownership interest in, or sponsoring, a hedge fund or private equity fund.[5] Section 13 contains several exemptions that permit banking entities to make limited investments in covered funds, subject to a number of restrictions designed to ensure that banking entities do not rescue investors in these funds from loss and are not themselves exposed to significant losses from investments or other relationships with these funds.[6]

Under the statute, authority for developing and adopting regulations to implement the prohibitions and restrictions of section 13 of the BHC Act is divided among the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the Office of the Comptroller of the Currency, the Securities and Exchange Commission, and the Commodity Futures Trading Commission (individually, an ‘‘Agency,’’ and collectively, the ‘‘Agencies’’).[7] The Agencies issued a final rule implementing these provisions in December 2013 (the ‘‘2013 final rule’’).[8]

The Agencies have now had several years of experience implementing the 2013 final rule and believe that supervision and implementation of the 2013 final rule can be substantially improved. The Agencies acknowledge concerns that some parts of the 2013 final rule may be unclear and potentially difficult to implement in practice. Based on experience since adoption of the 2013 final rule, the Agencies have identified opportunities, consistent with the statute, for improving the rule, including further tailoring its application based on the activities and risks of banking entities. Accordingly, the Agencies are issuing this proposal (the ‘‘proposal’’ or ‘‘proposed amendments’’) to amend the 2013 final rule, in order to provide banking entities with greater clarity and certainty about what activities are prohibited and seek to improve effective allocation of compliance resources where possible. The Agencies also believe that the modifications proposed herein would improve the ability of the Agencies to examine for, and make supervisory assessments regarding, compliance relative to the statute and the implementing rules.

While section 13 of the BHC Act addresses certain risks related to proprietary trading and covered fund activities of banking entities, the Agencies note that the nature and business of banking entities involves other inherent risks, such as credit risk and general market risk. To that end, the Agencies have various tools, such as the regulatory capital rules of the Federal banking agencies and the comprehensive capital analysis and review framework of the Board, to require banking entities to manage the risks associated with their activities. The Agencies believe that the proposed changes to the 2013 final rule would be consistent with safety and soundness and enable banking entities to implement appropriate risk management policies in light of the risks associated with the activities in which banking entities are permitted to engage under section 13.

The Agencies also note that the Economic Growth, Regulatory Relief, and Consumer Protection Act,[9] which was enacted on May 24, 2018, amends section 13 of the BHC Act by narrowing the definition of banking entity and revising the statutory provisions related to the naming of covered funds. The Agencies plan to address these statutory amendments through a separate rulemaking process; no changes have been proposed herein that would implement these amendments. The amendments took effect upon enactment, however, and in the interim between enactment and the adoption of implementing regulations, the Agencies will not enforce the 2013 final rule in a manner inconsistent with the amendments to section 13 of the BHC Act with respect to institutions excluded by the statute and with respect to the naming restrictions for covered funds. Additionally, the specific regulatory amendments proposed herein would not be inconsistent with the

[2] *See* 12 U.S.C. 1851. Section 13 of the BHC Act does not prohibit a nonbank financial company supervised by the Board from engaging in proprietary trading, or from having the types of ownership interests in or relationships with a covered fund that a banking entity is prohibited or restricted from having under section 13 of the BHC Act. However, section 13 of the BHC Act provides that a nonbank financial company supervised by the Board would be subject to additional capital requirements, quantitative limits, or other restrictions if the company engages in certain proprietary trading or covered fund activities. *See* 12 U.S.C. 1851(a)(2) and (f)(4).

recent statutory amendments to section 13 of the BHC Act.

A. Rulemaking Framework

Section 13 of the BHC Act requires that implementation of its provisions occur in several stages. The first stage in implementing section 13 of the BHC Act was a study by the Financial Stability Oversight Council (''FSOC'').[10] The FSOC study was issued on January 18, 2011, and included a detailed discussion of key issues and recommendations related to implementation of section 13 of the BHC Act.[11]

Following the FSOC study, and as required by section 13(b)(2) of the BHC Act, the Board, OCC, FDIC, and SEC in October 2011 invited the public to comment on a proposal implementing the requirements of section 13 of the BHC Act.[12] In February 2012, the CFTC issued a proposal that was substantially identical to the one proposed in October 2011 by the other four Agencies.[13] The Agencies received more than 600 unique comment letters, including from members of Congress; domestic and foreign banking entities and other financial services firms; trade groups representing banking, insurance, and the broader financial services industry; U.S. state and foreign governments; consumer and public interest groups; and individuals. The comments addressed all major sections of the 2011 proposal. To improve understanding of the issues raised by commenters, the staffs of the Agencies met with a number of these commenters to discuss issues relating to the 2011 proposal, and summaries of these meetings are available on each of the Agencies' public websites.[14] The CFTC staff also hosted a public roundtable on the 2011 proposal.[15] In formulating the 2013 final rule, the Agencies carefully reviewed all comments submitted in connection with the rulemaking and considered the suggestions and issues they raised in light of the statutory requirements as well as the FSOC study. In December 2013, the Agencies issued the 2013 final rule implementing section 13 of the BHC Act.

The Agencies are committed to revisiting and revising the rule as appropriate to improve its implementation. Since the adoption of the 2013 final rule, the Agencies have gained several years of experience implementing the 2013 final rule, and banking entities have had more than four years of experience implementing the 2013 final rule.[16]

In particular, the Agencies have received various communications from the public and other sources since adoption of the 2013 final rule and over the course of its implementation. These communications include written comments from members of Congress; domestic and foreign banking entities and other financial services firms; trade groups representing banking, insurance, and other firms within the broader financial services industry; U.S. state and foreign governments; consumer and public interest groups; and individuals. The U.S. Department of the Treasury also issued reports in June 2017 and October 2017, which contained recommendations regarding section 13 of the BHC Act and the implementing regulations.[17] In addition, the OCC issued a Request for Information (''OCC Notice for Comment'') in August 2017 and received 87 unique comment letters and over 8,400 standardized letters regarding section 13 of the BHC Act and the implementing regulations.[18] Moreover, staffs of the Agencies have held numerous meetings with market participants to discuss the 2013 final rule and its implementation. Collectively, these sources of public feedback have provided the Agencies with a better understanding of the concerns and challenges surrounding implementation of the 2013 final rule.

Furthermore, the Agencies have collected nearly four years of quantitative data required under Appendix A of the 2013 final rule. The data collected in connection with the 2013 final rule, compliance efforts by banking entities, and the Agencies' experience in reviewing trading and investment activity under the 2013 final rule, have provided valuable insights into the effectiveness of the 2013 final rule. These insights highlighted areas in which the 2013 final rule may have resulted in ambiguity, overbroad application, or unduly complex compliance routines. With this proposal, and based on experience gained over the past few years, the Agencies seek to simplify and tailor the implementing regulations, where possible, in order to increase efficiency, reduce excess demands on available compliance capacities at banking entities, and allow banking entities to more efficiently provide services to clients, consistent with the requirements of the statute.[19]

[16] The 2013 final rule was published in the **Federal Register** on January 31, 2014, and became effective on April 1, 2014. Banking entities were required to fully conform their proprietary trading activities and their new covered fund investments and activities to the requirements of the 2013 final rule by the end of the conformance period, which the Board extended to July 21, 2015. The Board extended the conformance period for certain legacy covered fund activities until July 21, 2017. Upon application, banking entities also have an additional period to conform certain illiquid funds to the requirements of section 13 and implementing regulations.

Continued

B. Agency Coordination

Section 13(b)(2)(B)(ii) of the BHC Act directs the Agencies to ''consult and coordinate'' in developing and issuing the implementing regulations ''for the purpose of assuring, to the extent possible, that such regulations are comparable and provide for consistent application and implementation of the applicable provisions of section 13 of the BHC Act to avoid providing advantages or imposing disadvantages to the companies affected . . . .'' [20] The Agencies recognize that coordinating with respect to regulatory interpretations, examinations, supervision, and sharing of information is important to maintain consistent oversight, promote compliance with section 13 of the BHC Act and implementing regulations, and foster a level playing field for affected market participants. The Agencies further recognize that coordinating these activities helps to avoid unnecessary duplication of oversight, reduces costs for banking entities, and provides for more efficient regulation.

The Agencies request comment on coordination generally and the following specific questions:

Question 1. Would it be helpful for the Agencies to hold joint information gathering sessions with a banking entity that is supervised or regulated by more than one Agency? If not, why not, and, if so, what should the Agencies consider in arranging these joint sessions?

Question 2. In what ways could the Agencies improve the transparency of their implementation of section 13 of the BHC Act? What specific steps with respect to Agency coordination would banking entities find helpful to make compliance with section 13 and the implementing rules more efficient? What steps would commenters recommend with respect to coordination to better promote and protect the safety and soundness of banking entities and U.S. financial stability?

II. Overview of Proposal

A. General Approach

The proposal would adopt a revised risk-based approach that would rely on a set of clearly articulated standards for both prohibited and permitted activities and investments, consistent with the requirements of section 13 of the BHC Act. In formulating the proposal, the Agencies have attempted to simplify and tailor the 2013 final rule, as described further below, to allow banking entities to more efficiently provide services to clients.

The Agencies seek to address a number of targeted areas for potential revision in this proposal. First, the Agencies are proposing to tailor the application of the rule based on the size and scope of a banking entity's trading activities. In particular, the Agencies aim to further reduce compliance obligations for small and mid-sized firms that do not have large trading operations and therefore reduce costs and uncertainty faced by small and mid-size firms in complying with the final rule, relative to their amount of trading activity.[21] In the experience of the Agencies since adoption of the 2013 final rule, the costs and uncertainty faced by small and mid-sized firms in complying with the 2013 final rule can be disproportionately high relative to the amount of trading activity typically undertaken by these firms.

In addition to tailoring the application of the rule, the Agencies also seek to streamline and clarify for all banking entities certain definitions and requirements related to the proprietary trading prohibition and limitations on covered fund activities and investments. In particular, this proposal seeks to codify or otherwise addresses matters currently addressed by staff responses to Frequently Asked Questions (''FAQs'').[22] Additionally, the Agencies are seeking in this proposal to reduce metrics reporting, recordkeeping, and compliance program requirements for all banking entities and expand tailoring to make the scale of compliance activity required by the rule commensurate with a banking entity's size and level of trading activity.

In tailoring these proposed changes to the 2013 final rule, the Agencies note the following statutory limitations to the permitted proprietary trading and covered fund activities,[23] which are incorporated in the 2013 final rule and have not been changed in the proposed rule. These statutory limitations provide that such permitted activities must not: (1) Involve or result in a material conflict of interest between the banking entity and its clients, customers, or counterparties; (2) result, directly or indirectly, in a material exposure by the banking entity to a high-risk asset or a high-risk trading strategy; or (3) pose a threat to the safety and soundness of the banking entity or to the financial stability of the United States.[24]

As a matter of structure, the proposed amendments would maintain the 2013 final rule's division into four subparts, and would maintain a metrics appendix while removing the 2013 final rule's second appendix regarding enhanced minimum standards for compliance programs, as follows:

- Subpart A of the 2013 final rule, as amended by the proposal, would describe the authority, scope, purpose, and relationship to other authorities of the rule and define terms used commonly throughout the rule;
- Subpart B of the 2013 final rule, as amended by the proposal, would prohibit proprietary trading, define terms relevant to covered trading activity, establish exemptions from the prohibition on proprietary trading and limitations on those exemptions, and require certain banking entities to report certain information with respect to their trading activities;
- Subpart C of the 2013 final rule, as amended by the proposal, would prohibit or restrict acquisition or retention of an ownership interest in, and certain relationships with, a covered fund; define terms relevant to covered fund activities and investments; and establish exemptions from the restrictions on covered fund activities and investments and limitations on those exemptions; and
- Subpart D of the 2013 final rule, as amended by the proposal, would generally require banking entities with significant trading assets and liabilities to establish a compliance program regarding section 13 of the BHC Act and the rule, including written policies and procedures, internal controls, a management framework, independent testing of the compliance program, training, and recordkeeping; establish metrics reporting requirements for banking entities with significant trading assets and liabilities, pursuant to the Appendix; provide tailored compliance program requirements for banking entities without significant trading assets and liabilities, including a presumption of compliance for banking entities with limited trading assets and liabilities; and require certain larger

[24] *See id.*

banking entities to submit a chief executive officer (''CEO'') attestation regarding the compliance program.

Given the complexities associated with the 2013 final rule, the Agencies request comment on the potential impact the proposal may have on banking entities and the activities in which they engage. The Agencies are interested in receiving comments regarding revisions described in the proposal relative to the 2013 final rule.[25] Additionally, the Agencies recognize that there are economic impacts that would potentially arise from the proposal and its implementation of section 13 of the BHC Act. The Agencies have provided an assessment of the expected impact of the proposed modifications contained in the proposal, and the Agencies request comment on all aspects of such impacts, including quantitative data, where possible. Specific requests for comment are included in the following sections.

B. Scope of Proposal

To better tailor the application of the rule, the proposal would establish three categories of banking entities based on their level of trading activity.[26] The first category would include banking entities with ''significant trading assets and liabilities,'' defined as those banking entities that, together with their affiliates and subsidiaries, have trading assets and liabilities (excluding obligations of or guaranteed by the United States or any agency of the United States) equal to or exceeding $10 billion. These banking entities, which generally have large trading operations, would be required to comply with the most extensive set of requirements under the proposal.

The second category would include banking entities with ''moderate trading assets and liabilities,'' defined as those banking entities that do not have significant trading assets and liabilities or limited trading assets and liabilities. Banking entities with moderate trading assets and liabilities are those entities that, together with their affiliates and subsidiaries, have trading assets and liabilities (excluding obligations of or guaranteed by the United States or any agency of the United States) less than $10 billion, but above the threshold described below for banking entities with limited trading assets and liabilities.[27] These banking entities would be subject to reduced compliance requirements and a more tailored approach in light of their smaller and less complex trading activities.

The third category includes banking entities with ''limited trading assets and liabilities,'' defined as those banking entities that have, together with their affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) less than $1 billion. This $1 billion threshold would be based on the worldwide trading assets and liabilities of a banking entity and all of its affiliates. With respect to a foreign banking organization (''FBO'') and its subsidiaries, the $1 billion threshold would be based on worldwide consolidated trading assets and liabilities, and would not be limited to its combined U.S. operations.

The proposal would establish a presumption of compliance for all banking entities with limited trading assets and liabilities. Banking entities operating pursuant to this proposed presumption of compliance would have no obligation to demonstrate compliance with subparts B and C of the proposal on an ongoing basis. If, however, upon examination or audit, the relevant Agency determines that the banking entity has engaged in proprietary trading or covered fund activities that are prohibited under subpart B or subpart C, such Agency may exercise its authority to rebut the presumption of compliance and require the banking entity to comply with the requirements of the rule applicable to banking entities that have moderate trading assets and liabilities. The purpose of this presumption of compliance would be to further reduce compliance costs for small and mid-size banks that either do not engage in the types of activities subject to section 13 of the BHC Act or engage in such activities only on a limited scale.

The proposal also includes a reservation of authority that would allow an Agency to require a banking entity with limited or moderate trading assets and liabilities to apply any of the more extensive requirements that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities, if the Agency determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion, warrants such treatment.

C. Proprietary Trading Restrictions

Subpart B of the 2013 final rule implements the statutory prohibition on proprietary trading and the various exemptions to this prohibition included in the statute. Section ____.3 of the 2013 final rule contains the core prohibition on proprietary trading and defines a number of related terms. The proposal would make several changes to § ____.3 of the 2013 final rule. Notably, the proposal would revise, in a manner consistent with the statute, the definition of ''trading account'' in order to increase clarity regarding the positions included in the definition.[28] The definition of ''trading account'' is a threshold definition that tells a banking entity whether the purchase or sale of a financial instrument is subject to the restrictions and requirements of section 13 of the BHC Act and the 2013 final rule in the first instance.

In the 2013 final rule, the Agencies defined the statutory term ''trading account'' to include three prongs. The first prong includes any account that is used by a banking entity to purchase or sell one or more financial instruments principally for the purpose of short-term resale, benefitting from short-term price movements, realizing short-term arbitrage profits, or hedging another trading account position (the ''short-term intent prong'').[29] For purposes of this part of the definition, the 2013 final rule also contains a rebuttable presumption that the purchase or sale of a financial instrument by a banking entity is for the trading account if the banking entity holds the financial instrument for fewer than 60 days or substantially transfers the risk of the financial instrument within 60 days of purchase (or sale).[30] The second prong covers trading positions that are both covered positions and trading positions for purposes of the Federal banking agencies' market risk capital rules, as well as hedges of covered positions (the ''market risk capital prong'').[31] The third prong covers any account used by a banking entity that is a securities dealer, swap dealer, or security-based swap dealer that is licensed or registered, or required to be licensed or registered, as a dealer, swap dealer, or

[25] This proposal contains certain proposed amendments to the 2013 final rule. The 2013 final rule would continue in effect where no change is made.

[26] The proposal would amend § ____.2 of the 2013 final rule to include a new defined term for each of these categories. The Agencies are proposing to republish § ____.2 in its entirety for clarity due to the renumbering of certain definitions. These proposed banking entity categories are discussed in further detail in Section II.G. of the **SUPPLEMENTARY INFORMATION**, below.

[27] This category would also include banking entities with trading assets and liabilities of less than $1 billion for which the presumption of compliance described below has been rebutted.

[28] Definitions used in the proposal would remain the same as in the 2013 final rule except as otherwise specified.

[29] *See* 2013 final rule § ____.3(b)(1)(i).

[30] *See* 2013 final rule § ____.3(b)(2).

[31] *See* 2013 final rule § ____.3(b)(1)(ii).

security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such (the ''dealer prong'').[32]

In the experience of the Agencies, determining whether or not positions fall into the short-term intent prong of the trading account definition has often proved unclear and subjective, and, consequently, may result in ambiguity or added costs and delays. For this reason, the proposal would remove the short-term intent prong from the 2013 final rule's definition of trading account and eliminate the associated rebuttable presumption, and would also modify the definition of trading account as described below to include other accounts described in the statutory definition of ''trading account.'' [33]

The remaining two prongs of the trading account definition in the 2013 final rule, the market risk capital prong and the dealer prong, generally would remain unchanged because, in the experience of the Agencies, interpretation of both prongs has been relatively straightforward and clear in practice for most banking entities. The proposal would, however, modify the market risk capital prong to cover the trading positions of FBOs subject to similar requirements in the applicable foreign jurisdiction. The Agencies are proposing this modification for FBOs to take into account the different frameworks and supervisors FBOs may have in their home countries. Specifically, the proposal would modify the market risk capital prong to apply to FBOs that are subject to capital requirements under a market risk framework established by their respective home country supervisors, provided the market risk framework is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended. The Agencies expect that this standard, similar to the current market risk capital prong referencing the U.S. market risk capital rules, would include trading account activities of FBOs consistent with the statutory trading account requirements. The Agencies believe the proposed approach would be an appropriate interpretation of the statutory trading account definition. The Agencies likewise believe that application of the market risk capital prong to FBOs as described herein would be relatively straightforward and clear in practice.

In addition, the Agencies are proposing two changes related to the trading account definition that are intended to replace the short-term intent prong. These changes include: (i) The addition of an accounting prong and (ii) a presumption of compliance with the prohibition on proprietary trading for trading desks that are not subject to the market risk capital prong or the dealer prong, based on a prescribed profit and loss threshold. Under the proposed accounting prong, a trading desk that buys or sells a financial instrument (as defined in the 2013 final rule and unchanged by the proposal) that is recorded at fair value on a recurring basis under applicable accounting standards would be doing so for the ''trading account'' of the banking entity.[34] Financial instruments that would be covered by the proposed accounting prong generally include, but are not limited to, derivatives, trading securities, and available-for-sale securities. For example, a security that is classified as ''trading'' under U.S. generally accepted accounting principles (''GAAP'') would be included in the proposal's definition of ''trading account'' under the proposed approach because it is recorded at fair value.

The proposed presumption of compliance, which would apply at the trading desk level, would provide that each trading desk that purchases or sells financial instruments for a trading account pursuant to the accounting prong may calculate the net gain or loss on the trading desk's portfolio of financial instruments each business day, reflecting realized and unrealized gains and losses since the previous business day, based on the banking entity's fair value for such financial instruments.

If the sum of the absolute values of the daily net gain and loss figures for the preceding 90-calendar-day period does not exceed $25 million, the activities of the trading desk would be presumed to be in compliance with the prohibition on proprietary trading, and the banking entity would have no obligation to demonstrate that such trading desk's activity complies with the rule on an ongoing basis. If this calculation exceeds the $25 million threshold, the banking entity would have to demonstrate compliance with section 13 of the BHC Act and the implementing regulations, as described in more detail below. The Agencies are also proposing to include a reservation of authority to address any positions that may be incorrectly scoped into or out of the definition.

Section ____.3 of the 2013 final rule also details various exclusions from the definition of proprietary trading for certain purchases and sales of financial instruments that generally do not involve the requisite short-term trading intent under the statute. The proposal would make several changes to these exclusions. First, the proposal would clarify and expand the scope of the financial instruments covered in the liquidity management exclusion. Second, it would add an exclusion from the definition of proprietary trading for transactions made to correct errors made in connection with customer-driven or other permissible transactions.

Section ____.4 of the 2013 final rule implements the statutory exemptions for underwriting and market making-related activities. The proposal would make several changes to this section intended to improve the practical application of these exemptions. In particular, the proposal would establish a presumption that trading within internally set risk limits satisfies the requirement that permitted underwriting and market making-related activities must be designed not to exceed the reasonably expected near-term demands of clients, customers, or counterparties (''RENTD''). The Agencies believe this presumption would allow for a clearer application of these exemptions, and would provide banking entities with more flexibility and certainty in conducting permissible underwriting and market making-related activities. In addition, the proposal would make the exemptions' compliance program requirements applicable only to banking entities with significant trading assets and liabilities.

The proposal would also modify the 2013 final rule's implementation of the statutory exemption for permitted risk-mitigating hedging activities in § ____.5, by reducing restrictions on the eligibility of an activity to qualify as a

[32] *See* 2013 final rule § ____.3(b)(1)(iii)(A). The dealer prong also includes positions entered into by a banking entity that is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business. *See* 2013 final rule § ____.3(b)(1)(iii)(B).

[33] 12 U.S.C. 1851(h)(6). As in the 2013 final rule, the Agencies note that the term ''trading account'' is a statutory concept and does not necessarily refer to an actual account. ''Trading account'' is simply nomenclature for the set of transactions that are subject to the prohibitions on proprietary trading under the 2013 final rule, including as it would be amended by the proposal.

[34] ''Applicable accounting standards'' is defined in the 2013 final rule, and the proposal would not make any change to this definition. ''Applicable accounting standards'' means U.S. generally accepted accounting principles or such other accounting standards applicable to a covered banking entity that the relevant Agency determines are appropriate, that the covered banking entity uses in the ordinary course of its business in preparing its consolidated financial statements. *See* 2013 final rule § ____.10(d)(1). The proposal would move this defined term to § ____.2, to accommodate its proposed usage outside of subpart C.

permitted risk-mitigating hedging activity. For banking entities with moderate or limited trading assets and liabilities, the proposal would remove all requirements under the 2013 final rule except the requirement that hedging activity be designed to reduce or otherwise mitigate one or more specific, identifiable risks arising in connection with and related to one or more identified positions, contracts, or other holdings and that the hedging activity be recalibrated to maintain compliance with the rule. For banking entities with significant trading assets and liabilities, the proposal would maintain many of the 2013 final rule's requirements, including the requirement that the hedging activity be designed to reduce or otherwise mitigate one or more specific, identifiable risks. The proposal would, however, eliminate the current requirement that the hedging activity ''demonstrably reduces'' or otherwise ''significantly mitigates'' risk, reduce documentation requirements associated with risk-mitigating hedging transactions that are conducted by one desk to hedge positions at another desk with pre-approved types of instruments within pre-set hedging limits, and eliminate the 2013 final rule's correlation analysis requirement. These foregoing changes are intended to reduce costs and uncertainty and improve the utility of the hedging exemption.

Section ____.6(e) of the proposal would remove certain requirements of the 2013 final rule implementing the statutory exemption for trading by a foreign banking entity that occurs solely outside of the United States. In particular, the proposal would modify the requirement that any personnel of the banking entity or any of its affiliates that arrange, negotiate, or execute such purchase or sale not be located in the United States. It also would (1) remove the requirement that no financing for the banking entity's purchase or sale be provided, directly or indirectly, by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any state, and (2) eliminate certain limitations on a foreign banking entity's ability to enter into transactions with a U.S. counterparty.

The proposal would retain the other requirements of § ____.6(e) of the 2013 final rule, including the requirement that the banking entity engaging as principal in the purchase or sale (including relevant personnel) not be located in the United States or organized under the laws of the United States or of any State, that the banking entity not book a transaction to a U.S. affiliate or branch, and that the banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State. Taken as a whole, the proposed amendments to this exemption seek to reduce the impact of the 2013 final rule on foreign banking entities' operations outside of the United States by focusing on where the trading of these banking entities as principal occurs, where the trading decision is made, and whether the risk of the transaction is borne outside the United States.

D. Covered Fund Activities and Investments

Subpart C of the 2013 final rule implements the statutory prohibition on directly or indirectly acquiring and retaining an ownership interest in, or having certain relationships with, a covered fund, as well as the various exemptions to this prohibition included in the statute. Section ____.10 of the 2013 final rule defines the scope of the prohibition on the acquisition and retention of ownership interests in, and certain relationships with, a covered fund, and provides the definition of ''covered fund.'' The Agencies request comment on a number of potential modifications to this section.

Section ____.11(c) of the 2013 final rule outlines the requirements that apply when a banking entity engages in underwriting or market making-related activities with respect to a covered fund. The proposal would modify these requirements with respect to covered fund ownership interests for third-party covered funds to generally allow for the same types of activities as are permitted for other financial instruments. The proposal would also make changes to § ____.13(a) of the 2013 final rule to expand a banking entity's ability to engage in hedging activities involving an ownership interest in a covered fund.

E. Compliance Program Requirements

Subpart D of the 2013 final rule requires a banking entity engaged in covered trading activities or covered fund activities to develop and implement a program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading activities and covered fund activities and investments set forth in section 13 of the BHC Act and the 2013 final rule.

As in the 2013 final rule, the proposal would provide that a banking entity that does not engage in proprietary trading activities (other than trading in U.S. government or agency obligations, obligations of specified government-sponsored entities, and state and municipal obligations) or covered fund activities and investments need only establish a compliance program prior to becoming engaged in such activities or making such investments. To further enhance compliance efficiencies, the proposal would reduce compliance requirements for most banking entities and expand tailoring of the requirements based on the banking entity categories previously described in this Supplementary Information section.

Under the proposal, a banking entity with significant trading assets and liabilities would be required to establish a six-pillar compliance programs commensurate with the size, scope, and complexity of its activities and business structure that meets six specific requirements already included in the 2013 final rule. These requirements include (1) written policies and procedures reasonably designed to document, describe, monitor and limit trading activities and covered fund activities and investments conducted by the banking entity; (2) a system of internal controls; (3) a management framework that, among other things, includes appropriate management review of trading limits, strategies, hedging activities, investments, incentive compensation and other matters identified in the rule or by management as requiring attention; (4) independent testing and audits; (5) training for certain personnel; and (6) recordkeeping requirements.[35] Certain additional documentation requirements for covered funds would also apply to banking entities with significant trading assets and liabilities. Because the proposal would eliminate Appendix B of the 2013 final rule, which requires large banking entities and banking entities engaged in significant trading activities to have a separate compliance program that complies with certain enhanced minimum standards, the proposed rule would essentially permit a banking entity with significant trading assets and liabilities to integrate compliance programs meeting these requirements into its existing compliance regime.

Under the proposal, a banking entity with moderate trading assets and liabilities would be required to include in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and the implementing rules as appropriate given the activities, size,

[35] *See infra* **SUPPLEMENTARY INFORMATION**, Part III.D.

scope, and complexity of the banking entity.

The proposal would also include in subpart D the specifications for the presumption of compliance noted above that would apply for banking entities with limited trading assets and liabilities.

The proposal would eliminate Appendix B of the 2013 final rule, which specifies enhanced minimum standards for compliance programs of large banking entities and banking entities engaged in significant trading activities. The proposal would, however, maintain the 2013 final rule's CEO attestation requirement, and would apply it to all banking entities with significant trading assets and liabilities and moderate trading assets and liabilities.

F. Metrics Reporting Requirement

As part of adopting the 2013 final rule, the Agencies committed to reviewing and assessing the quantitative measurements data (''metrics'') for their effectiveness in monitoring covered trading activities for compliance with section 13 of the BHC Act and the implementing regulations. Since that time and as part of implementing the 2013 final rule, the Agencies have reviewed the metrics submitted by the banking entities and considered whether all of the quantitative measurements are useful for all asset classes and markets, as well as for all of the trading activities subject to the metrics requirement, or whether modifications are appropriate.

In the proposal, the Agencies aim to better align the effectiveness of the metrics data with its associated value in monitoring compliance. To that end, the proposal would streamline the metrics reporting and recordkeeping requirements by tailoring the requirements based on a banking entity's size and level of trading activity, completely eliminating particular metrics based on experience working with the data, and adding a limited set of new metrics. The proposal also would provide certain firms with additional time to report metrics to the Agencies, beyond the current deadlines set forth in Appendix A of the 2013 final rule. The Agencies solicit comment regarding whether a single point of collection among the Agencies for metrics would be more effective.

G. Banking Entity Categorization and Tailoring

As noted, the proposal would define three different categories of banking entities based on thresholds of trading assets and liabilities, in order to improve compliance efficiencies for all banking entities generally and further reduce compliance costs for firms that have little or no activity subject to the prohibitions and restrictions of section 13 of the BHC Act.

The first category would include any banking entity with significant trading assets and liabilities, defined under the proposal to mean a banking entity that, together with its affiliates and subsidiaries, has trading assets and liabilities (excluding trading assets and liabilities involving obligations of, or guaranteed by, the United States or any agency of the United States) the average gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10 billion.[36] The Agencies believe that this threshold would capture a significant portion of the trading assets and liabilities in the U.S. banking system, but would reduce burdens for smaller, less complex banking entities. The Agencies estimate that approximately 95 percent of the trading assets and liabilities in the U.S. banking system are currently held by those banking entities that would have significant trading assets and liabilities under the proposal. Under the proposal, the most stringent compliance requirements would apply to these banking entities, which generally have large trading operations. For example, as described in the relevant sections of this Supplementary Information section below, the proposal would require banking entities with significant trading assets and liabilities to comply with a greater set of requirements than other banking entities to meet the conditions of the exemptions for permitted underwriting and market making-related activities and risk-mitigating hedging activities. In addition, the proposal would require these banking entities to maintain a six-pillar compliance program (*i.e.,* written policies and procedures, internal controls, management framework, independent testing, training, and records), commensurate with the size, scope, and complexity of their activities and business structure, which the banking entities could integrate into their existing compliance regime.

The second category would include any banking entity with moderate trading assets and liabilities, defined as a banking entity that does not have significant trading assets and liabilities or limited trading assets and liabilities (described below). These banking entities, together with their affiliates and subsidiaries, generally have trading assets and liabilities (excluding obligations of or guaranteed by the United States or any agency of the United States) of $1 billion or more but less than $10 billion. As with the threshold described above for firms with significant trading assets and liabilities, the Agencies believe that the proposed threshold for firms with moderate trading assets and liabilities would appropriately cover a significant percentage of trading activities in the United States. The Agencies estimate that approximately 98 percent of the trading assets and liabilities in the U.S. banking system are currently held by those firms that would have trading assets and liabilities of $1 billion or more, including firms with both significant and moderate trading assets and liabilities. Relative to banking entities with significant trading assets and liabilities, banking entities with moderate trading assets and liabilities would be subject to reduced requirements and a tailored approach in light of their smaller portfolio of trading activity. For example, the proposal would require banking entities with moderate trading assets and liabilities to comply with a more tailored set of requirements under the underwriting, market-making, and risk-mitigating hedging exemptions, as compared to the requirements applicable to banking entities with significant trading assets and liabilities. In addition, these firms would be subject to a simplified compliance program requirement, which would allow the banking entity to comply with the applicable requirements by updating existing policies and procedures. The Agencies believe these changes could substantially reduce the costs of compliance for banking entities that do not have significant trading assets and liabilities.

The third category would include any banking entity with limited trading assets and liabilities, defined under the proposal to mean a banking entity that, together with its affiliates and subsidiaries, has trading assets and liabilities (excluding trading assets and liabilities involving obligations of, or guaranteed by, the United States or any agency of the United States) the average

[36] *See* proposal § ____.2(ff). With respect to a banking entity that is an FBO or a subsidiary of an FBO, the threshold would apply based on the trading assets and liabilities of the FBO's combined U.S. operations, including all subsidiaries, affiliates, branches, and agencies. This threshold would align with the threshold currently used under the 2013 final rule to determine whether a banking entity is subject to the metrics reporting requirements of Appendix A of the 2013 final rule.

gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1 billion.[37] While entities with less than $1 billion in trading assets and liabilities engage in some activities covered by section 13 of the BHC Act and the implementing rules, as noted above, these activities constitute a relatively small percentage of the trading assets and liabilities in the U.S. banking system. In light of the relatively small scale of activities engaged in by such firms, the Agencies are proposing to provide significant tailoring of requirements for such firms. Under the proposal, a banking entity with limited trading assets and liabilities would be presumed to be in compliance with subpart B and subpart C of the implementing regulations and would have no affirmative obligation to demonstrate compliance with subpart B and subpart C on an ongoing basis. If, upon examination or audit, the relevant Agency determines that the banking entity has engaged in covered trading activities or covered fund activities that are otherwise prohibited under subpart B or subpart C, such Agency may exercise its authority to rebut the presumption of compliance and require the banking entity to demonstrate compliance with the requirements of the rule applicable to a banking entity with moderate trading assets and liabilities. Additionally, as noted below, the relevant Agency would retain its authority to require a banking entity to apply any compliance requirements that would otherwise apply if the banking entity had moderate or significant trading assets and liabilities if such Agency determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion, does not warrant a presumption of compliance.

The purpose of this proposed presumed compliance provision would be to significantly reduce compliance program obligations for small and mid-size banking entities that do not engage on a large scale in activities subject to the proposal. Based on data from the December 31, 2017, reporting period, all but approximately 40 top-tier banking entities would be eligible for presumed compliance.

The proposal would apply the 2013 final rule's CEO attestation requirement for all banking entities with significant or moderate trading assets and liabilities. Furthermore, all banking entities would remain subject to the covered fund provisions of the 2013 final rule, with some modifications described further below, including to the applicable compliance program requirements based on the trading assets and liabilities of the banking entity. As under the 2013 final rule, banking entities that do not engage in covered funds activities or proprietary trading would not be required to establish a compliance program unless or until prior to becoming engaged in such activities or making such investments.[38]

The proposal also includes a reservation of authority that would allow an Agency to require a banking entity with limited or moderate trading assets and liabilities to apply any of the more extensive requirements that would otherwise apply if the banking entity had moderate or significant trading assets and liabilities, if the Agency determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion, warrants such treatment.

The proposal seeks to tailor requirements based on a relatively simple, straightforward, and objective measure connected to the activities subject to section 13 of the BHC Act. Therefore, the Agencies are proposing thresholds that are based on the trading activities of a banking entity, and are considered on a consolidated basis with its affiliates and subsidiaries. In addition, many of the requirements that the proposal would apply on a tailored basis to banking entities based on these thresholds relate to the statutory prohibition on proprietary trading and the associated exemptions, such as for permitted underwriting, market making, and risk-mitigating hedging activities. In general, this approach would seek to apply requirements commensurate with the size and complexity of a banking entity's trading activities.

Under this approach, banking entities with the largest trading activity (banking entities with significant trading assets and liabilities) would be subject to the most extensive requirements. These firms are currently subject to reporting requirements under Appendix A of the 2013 final rule due to the fact that they engage in the most trading activity subject to section 13 of the BHC Act and the implementing regulations.[39] Banking entities with moderate trading activities and liabilities would be subject to more tailored requirements, commensurate with the smaller scale of their trading activities. These firms are generally subject to the Federal banking agencies' market risk capital rules (like banking entities with significant trading assets and liabilities) and engage in some level of trading activity that is subject to the requirements of section 13 of the BHC Act, but not to the same degree as firms with significant trading assets and liabilities. Banking entities with limited trading assets and liabilities would be subject to significantly reduced requirements in recognition of the relatively small scale of covered activities in which they engage, and in order to reduce compliance costs associated with activities that are less likely to be relevant for these firms.

The Agencies request comment regarding all aspects of the proposed approach to tailoring application of the rule. In particular, the Agencies request comment on the following questions:

Question 3. Would the general approach of the proposal to establish different requirements for banking entities based on thresholds of trading assets and liabilities be appropriate? Are the proposed thresholds appropriate or are there different thresholds that would be better suited and why? If so, what thresholds should be used and why? Would the proposed approach materially reduce compliance and other costs for banking entities that do not have significant trading activity? Would the proposed approach maintain sufficient measures to ensure compliance with the requirements of section 13 of the BHC Act? If not, what approach would work better? Would an approach based on the risk profile of the

[37] The Agencies are proposing to adopt a different measure of trading assets and liabilities in determining whether a banking entity has less than $1 billion in trading assets and liabilities for purposes of tailoring the requirements of the rule described herein. Specifically, the proposed test would look at worldwide trading assets and liabilities of all banking entities, including foreign banking entities. By contrast, the test for whether a foreign banking entity has significant trading assets and liabilities provides that the banking entity need only include the trading assets and liabilities of its consolidated U.S. operations in this calculation. Banking entities with limited trading assets and liabilities under the proposal would be eligible for a presumption of compliance, but such a presumption may not be appropriate for large foreign banking entities that have substantial worldwide trading assets and liabilities. Therefore, the Agencies have proposed to adopt one test that would apply to both domestic and foreign banking entities for purposes of the limited trading assets and liabilities threshold.

[38] *See* § ____.20(f) of the 2013 final rule.

[39] As noted above, with respect to foreign banking entities, the proposal would measure whether a banking entity has significant trading assets and liabilities by reference to the aggregate assets of the foreign banking entity's U.S. operations, including its U.S. branches and agencies, rather than worldwide operations. This approach is intended to be consistent with the statute's focus on the risks posed by trading activities within the United States and also to address concerns regarding the level of burden for foreign banking entities with respect to their foreign operations.

banking entity be more appropriate? Why or why not?

Question 4. The proposal seeks to establish a streamlined and comprehensive version of the rule for banking entities with significant trading assets and liabilities. Is the proposed definition of ''significant trading assets and liabilities'' appropriate? If not, what definition would be better and why? Would it be more appropriate to define a banking entity with significant trading assets and liabilities to include all banking entities subject to the Federal banking agencies' market risk capital rules? Why or why not?

Question 5. Are the proposed requirements for a banking entity with moderate trading assets and liabilities appropriate? Why or why not? If not, what requirements would be better and why? Should any requirements be added? Should any requirements be removed or modified? If so, please explain.

Question 6. The proposal contains a presumption of compliance for banking entities with limited trading assets and liabilities. Should the Agencies presume compliance for any other levels of activity? Why or why not? Are the proposed requirements for a banking entity with limited trading assets and liabilities appropriate? Should any requirements be added? If so, please explain which requirements should be added and why. Do commenters believe this approach would work in practice? Would it reduce costs and increase certainty for small firms? If not, what approach would work better or be more appropriate and why? Is the proposed scope of banking entities that would be eligible for the presumption of compliance appropriately defined? Why or why not? Please explain. If not, what scope would be more appropriate?

Question 7. The proposal would tailor application of the regulation by categorizing a banking entity, together with its subsidiaries and affiliates, based on trading assets and liabilities. Should the Agencies consider further tailoring the application of the regulation by categorizing certain banking entities separately from their subsidiaries and affiliates? For example, should the Agencies consider further tailoring for a banking entity, including an SEC registered broker-dealer, that is an affiliate of a banking entity with significant trading assets and liabilities, but which generally operates on a basis that the banking entity believes is separate and independent from its affiliates and parent company for purposes relevant for compliance with the implementing regulations. Why or why not?

Question 8. How might a banking entity within a corporate group demonstrate that it has separate and independent operations from that of the consolidated holding company group (*e.g.,* information barriers, separate corporate formalities and management; status as a registered securities dealer, investment adviser, or futures commission merchant; written policies and procedures designed to separate the activities of the affiliate from other banking entities)? Alternatively, could such entities be identified using certain quantitative measurements, such as by creating a specific dollar threshold of trading activity or by calculating a ratio comparing the entity's individual trading assets and liabilities to the gross trading assets and liabilities of the consolidated group? Why or why not? In addition, what standards could be applied to distinguish such arrangements from corporate structures established to evade compliance requirements that would otherwise apply under section 13 of the BHC Act and the proposal? Please discuss, identify, and describe any conditions, functional barriers, or business practices that may be relevant. Commenters that suggest additional tailoring of the regulation for certain affiliates of large bank holding companies should suggest specific and detailed parameters for such a category. Commenters should also describe why they believe such parameters are appropriate and are designed to prevent substantial risk to the holding company, its affiliates, and the financial system.

Question 9. For purposes of determining the appropriate standard for compliance, the proposal would establish a threshold of $10 billion in trading assets and liabilities; banking entities with moderate trading assets and liabilities would be subject to a streamlined set of requirements under the proposal. If the Agencies were to apply additional tailoring for certain affiliates of banking entities with significant trading assets and liabilities, should such banking entities be subject to the same set of standards for compliance as those that are being proposed for banking entities with moderate trading assets and liabilities? Why or why not? Are there requirements that are not currently contemplated for banking entities with moderate trading assets and liabilities that nevertheless should apply, consistent with the statute? Please explain.

Question 10. What are the potential consequences if certain banking entities were to be subject to a more streamlined set of standards for compliance than their parent company and affiliates? What are the potential costs and benefits? Please explain. Are there ways in which a more tailored compliance regime for these types of banking entities could be crafted to mitigate any potential negative consequences associated with this approach, if any, consistent with the statute? Please explain.

Question 11. Could one or more aspects of the proposed rule incentivize banking entities to restructure their business operations to achieve a specific result relative to the rule, such as to facilitate compliance under the rule in a particular way or to avoid some or all of its requirements? If so, how? Please be as specific as possible.

III. Section by Section Summary of Proposal

A. Subpart A—Authority and Definitions

1. Section ____.2: Definitions

a. Banking Entity

The 2013 final rule, consistent with section 13 of the BHC Act, defines the term ''banking entity'' to include: (i) Any insured depository institution; (ii) any company that controls an insured depository institution; (iii) any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978; and (iv) any affiliate or subsidiary of any entity described in clauses (i), (ii), or (iii).[40]

Under the BHC Act, an entity is generally considered an affiliate of an insured depository institution, and therefore a banking entity itself, if it controls, is controlled by, or is under common control with an insured depository institution. Under the BHC Act, a company controls another company if: (i) The company directly or indirectly or acting through one or more other persons owns, controls, or has power to vote 25 percent or more of any class of voting securities of the company; (ii) the company controls in any manner the election of a majority of the directors of trustees of the other company; or (iii) the Board determines, after notice and opportunity for hearing, that the company directly or indirectly exercises a controlling influence over the management or policies of the company.[41]

[40] *See* 2013 final rule § ____.2(c). Consistent with the statute, for purposes of this definition, the term ''insured depository institution'' does not include certain institutions that function solely in a trust or fiduciary capacity. *See* 2013 final rule § ____.2(r).

[41] *See* 12 U.S.C. 1841(a)(2); 12 CFR 225.2(e).

The 2013 final rule excludes covered funds and other types of entities from the definition of banking entity.[42] In the 2011 proposal, the Agencies reasoned that excluding covered funds from the definition of banking entity would ''avoid application of section 13 of the BHC Act in a way that appears unintended by the statute and would create internal inconsistencies in the statutory scheme.'' [43]

Since the adoption of the 2013 final rule, the Agencies have received a number of requests for guidance regarding instances in which certain funds that are excluded from the covered fund definition are considered banking entities. This situation may occur as a result of the sponsoring banking entity having control over the fund, as defined under the BHC Act. A banking entity sponsoring a U.S. registered investment company (''RIC''), a foreign public fund (''FPF''), or foreign excluded fund could be considered to control the fund by virtue of a 25 percent or greater investment in any class of voting securities during a seeding period or, for FPFs and foreign excluded funds, by virtue of corporate governance structures abroad such as where the fund's sponsor selects the majority of the fund's directors or trustees, or otherwise controls the fund for purposes of the BHC Act by contract or through a controlled corporate director.[44] Questions regarding these funds' potential status as banking entities arise, in part, because of the interaction between the statute's and the 2013 final rule's definitions of the terms ''banking entity'' and ''covered fund.''

In particular, following the adoption of the 2013 final rule, the staffs of the Agencies received numerous inquiries about this issue in connection with RICs and FPFs, which are excluded from the covered fund definition. The Agencies similarly received numerous inquiries regarding certain foreign funds offered and sold outside of the United States that are excluded from the covered fund definition with respect to a foreign banking entity (foreign excluded funds).

Sponsors of RICs, FPFs, and foreign excluded funds asserted that the treatment of these funds as banking entities would disrupt bona fide asset management activities involving funds that are not covered funds, which these sponsors argued would be inconsistent with section 13 of the BHC Act. These disruptions would arise because many funds' investment strategies involve proprietary trading prohibited by the 2013 final rule, and may also involve investments in covered funds. Sponsors of these funds further asserted that the permitted activities in the 2013 final rule also do not appear to be designed for funds, which by design invest in financial instruments for their own account. The 2013 final rule, for example, provides exemptions from the rule's proprietary trading restrictions for underwriting and market-making-related activities—exemptions for activities in which broker-dealers engage but that are not applicable to funds.

In addition, sponsors of RICs, FPFs, and foreign excluded funds asserted that restricting banking entities' bona fide investment management businesses in order to avoid treatment of their funds as banking entities would put bank-affiliated investment advisers at a competitive disadvantage relative to non-bank affiliated advisers engaged in the same activities without advancing the statutory purposes underlying section 13 of the BHC Act. Sponsors of FPFs and foreign excluded funds also have asserted that treating a foreign banking entity's foreign funds offered outside of the United States as banking entities themselves would be an inappropriate extraterritorial application of section 13 and the 2013 final rule and also unnecessary to reduce risks posed to banking entities and U.S. financial stability by proprietary trading activities and investments in or relationships with covered funds.

In response to these inquiries, the staffs of the Agencies issued responses to FAQs addressing the treatment of RICs and FPFs. The staffs observed in response to an FAQ that the preamble to the 2013 final rule recognized that a banking entity may own a significant portion of the shares of a RIC or FPF during a brief period during which the banking entity is testing the fund's investment strategy, establishing a track record of the fund's performance for marketing purposes, and attempting to distribute the fund's shares (the so-called ''seeding period'').[45] The staffs therefore stated that they would not advise the Agencies to treat a RIC or FPF as a banking entity under the 2013 final rule solely on the basis that the RIC or FPF is established with a limited seeding period, absent other evidence that the RIC or FPF was being used to evade section 13 and the 2013 final rule. The staffs stated their understanding that the seeding period for an entity that is a RIC or FPF may take some time. Recognizing that the length of a seeding period can vary, the staffs provided an example of three years, the maximum period of time expressly permitted for seeding a covered fund under the 2013 final rule, without setting any maximum prescribed period for a RIC or FPF seeding period. Accordingly, the staffs stated that they would neither advise the Agencies to treat a RIC or FPF as a banking entity solely on the basis of the level of ownership of the RIC or FPF by a banking entity during a seeding period, nor expect that a banking entity would submit an application to the Board to determine the length of the seeding period.[46]

The staffs also provided a response to an FAQ regarding FPFs.[47] In this response, staffs of the Agencies stated their understanding that, unlike in the case of RICs, sponsors of FPFs in some foreign jurisdictions select the majority of the fund's directors or trustees, or otherwise control the fund for purposes of the BHC Act by contract or through a controlled corporate director. These and other corporate governance structures abroad therefore had raised questions regarding whether FPFs that

[42] A covered fund is not excluded from the banking entity definition if it is itself an insured depository institution, a company that controls an insured depository institution, or a company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978. The 2013 final rule also excludes from the banking entity definition a portfolio company held under the authority contained in section 4(k)(4)(H) or (I) of the BHC Act, or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958, so long as the portfolio company or portfolio concern is not itself an insured depository institution, a company that controls an insured depository institution, or a company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978. The definition also excludes the FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Act.

[43] *See* 2011 proposal, 76 FR at 68885. The Agencies proposed the clarification ''because the definition of 'affiliate' and 'subsidiary' under the BHC Act is broad, and could include a covered fund that a banking entity has permissibly sponsored or made an investment in because, for example, the banking entity acts as general partner or managing member of the covered fund as part of its permitted sponsorship activities.'' *Id.* The Agencies observed that if ''such a covered fund were considered a 'banking entity' for purposes of the proposed rule, the fund itself would become subject to all of the restrictions and limitations of section 13 of the BHC Act and the proposed rule, which would be inconsistent with the purpose and intent of the statute.'' *Id.*

[44] Corporate governance structures for RICs have not raised similar questions because the Board's regulations and orders have long recognized that a bank holding company may organize, sponsor, and manage a RIC, including by serving as investment adviser to the RIC, without controlling the RIC for purposes of the BHC Act. *See* 79 FR at 5676.

[45] *See supra* note 22, FAQ 16.

[46] The staffs also made clear that this guidance was equally applicable to SEC-regulated business development companies.

[47] *See supra* note 22, FAQ 14.

are sponsored and distributed outside the United States and in accordance with foreign laws are banking entities by virtue of their relationships with a banking entity. The staffs further observed that, by referring to characteristics common to publicly distributed foreign funds rather than requiring that FPFs organize themselves identically to RICs, the 2013 final rule recognized that foreign jurisdictions have established their own frameworks governing the details for the operation and distribution of FPFs. The staffs also observed that § ___.12 of the 2013 final rule further provides that, for purposes of complying with the covered fund investment limits, a RIC, SEC-regulated business development company (''BDC''), or FPF will not be considered to be an affiliate of the banking entity so long as the banking entity meets the conditions set forth in that section.

Based on these considerations, the staffs stated that they would not advise that the activities and investments of an FPF that meet the requirements in § ___.10(c)(1) and § ___.12(b)(1) of the 2013 final rule be attributed to the banking entity for purposes of section 13 of the BHC Act or the 2013 final rule, where the banking entity, consistent with § ___.12(b)(1) of the 2013 final rule, (i) does not own, control, or hold with the power to vote 25 percent or more of any class of voting shares of the FPF (after the seeding period), and (ii) provides investment advisory, commodity trading, advisory, administrative, and other services to the fund in compliance with applicable limitations in the relevant foreign jurisdiction. The staffs further stated that they would not advise that the FPF be deemed a banking entity under the 2013 final rule solely by virtue of its relationship with the sponsoring banking entity, where these same conditions are met.

With respect to foreign excluded funds, the Federal banking agencies released a policy statement on July 21, 2017 (the ''policy statement''), in response to concerns expressed by a number of foreign banking entities, foreign government officials, and other market participants about the possible unintended consequences and extraterritorial impact of section 13 and the 2013 final rule for these funds, which are excluded from the definition of ''covered fund'' in the 2013 final rule.[48] The policy statement provided that the staffs of the Agencies are considering ways in which the 2013 final rule may be amended, or other appropriate action that may be taken, to address any unintended consequences of section 13 and the 2013 final rule for foreign excluded funds.

To provide additional time, the policy statement provides that the Federal banking agencies would not propose to take action during the one-year period ending July 21, 2018, against a foreign banking entity[49] based on attribution of the activities and investments of a qualifying foreign excluded fund (as defined below) to the foreign banking entity, or against a qualifying foreign excluded fund as a banking entity, in each case where the foreign banking entity's acquisition or retention of any ownership interest in, or sponsorship of, the qualifying foreign excluded fund would meet the requirements for permitted covered fund activities and investments solely outside the United States, as provided in section 13(d)(1)(I) of the BHC Act and § ___.13(b) of the 2013 final rule, as if the qualifying foreign excluded fund were a covered fund. For purposes of the policy statement, a ''qualifying foreign excluded fund'' means, with respect to a foreign banking entity, an entity that:

(1) Is organized or established outside the United States and the ownership interests of which are offered and sold solely outside the United States;

(2) Would be a covered fund were the entity organized or established in the United States, or is, or holds itself out as being, an entity or arrangement that raises money from investors primarily for the purpose of investing in financial instruments for resale or other disposition or otherwise trading in financial instruments;

(3) Would not otherwise be a banking entity except by virtue of the foreign banking entity's acquisition or retention of an ownership interest in, or sponsorship of, the entity;

(4) Is established and operated as part of a bona fide asset management business; and
