(5) Is not operated in a manner that enables the foreign banking entity to evade the requirements of section 13 or implementing regulations.

The Agencies are continuing to consider the issues raised by the interaction between the 2013 final rule's definitions of the terms ''banking entity'' and ''covered fund,'' including the issues addressed by the Agencies' staffs and the Federal banking agencies discussed above. Accordingly, nothing in the proposal would modify the application of the staff FAQs discussed above, and the Agencies will not treat RICs or FPFs that meet the conditions included in the applicable staff FAQs as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the FAQs. In addition, to accommodate the pendency of the proposal, for an additional period of one year until July 21, 2019, the Agencies will not treat qualifying foreign excluded funds that meet the conditions included in the policy statement discussed above as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the policy statement. This additional time will allow the Agencies to benefit from public feedback in response to the requests for comment that follow. Specifically, the Agencies request comment on the following:

Question 12. Have commenters experienced disruptions to bona fide asset management activities involving RICs, FPFs, and foreign excluded funds as a result of the interaction between the statute's and the 2013 final rule's definitions of the terms ''banking entity'' and ''covered fund?'' If so, what sorts of disruptions, and how have commenters addressed them?

Question 13. Has the guidance provided by the staffs of the Agencies' and the Federal banking agencies discussed above been effective in allowing banking entities to engage in asset management activities, consistent with the restrictions and requirements of section 13?

Question 14. Do commenters believe that there is uncertainty about the length of permissible seeding periods for RICs, FPFs, and SEC-regulated business development companies due to the Agencies' description of a seeding period with reference to the activities a banking entity undertakes while seeding a fund without specifying a maximum period of time? Would an approach that specified a particular period of time beyond which a seeding period cannot extend provide additional clarity? If so, what would be an appropriate time period? Should any specified time period be based on the period of time that typically is required for a RIC or FPF to develop a performance track record, recognizing that some additional time will also be needed to market the

[48] Statement regarding Treatment of Certain Foreign Funds under the Rules Implementing Section 13 of the Bank Holding Company Act (July 21, 2017), *available at https://www.federalreserve.gov/newsevents/pressreleases/files/bcreg20170721a1.pdf.*

[49] ''Foreign banking entity'' was defined for purposes of the policy statement to mean a banking entity that is not, and is not controlled directly or indirectly by, a banking entity that is located in or organized under the laws of the United States or any State.

fund after developing the track record? How much time is necessary to develop a performance track record for a RIC or FPF to effectively market the fund to third-party investors and how does this vary based on the fund's strategy or other factors? If the Agencies did specify a fixed amount of time for seeding generally, should the Agencies also provide relief that permits a fund's seeding period to exceed this period of time, without the fund being considered a banking entity, subject to additional conditions, such as documentation of the business need for the sponsor's continued investment? Should such additional relief include the lengthening of the seeding period for such investments? Conversely, would the current approach of not prescribing a fixed period of time for a seeding period be more effective in providing flexibility for funds that may need more time to develop a track record without having to specify a particular time period that will be appropriate for all funds?

Question 15. Are there other situations not addressed by the staffs' guidance for RICs and FPFs that may result in a banking entity sponsor's investment in the fund exceeding 25 percent, and that limit banking entities' ability to engage in asset management activities? For example, could a sponsor's investment exceed 25 percent as investors redeem in anticipation of a liquidation, causing the sponsor's investment to increase as a percentage of the fund's assets? Are there instances in which one or more large investors may redeem from a fund and, as a result, the sponsor may seek to temporarily invest in the fund for the benefit of remaining shareholders?

Question 16. Have foreign excluded funds been able to effectively rely on the policy statement to continue their asset management activities? Why or why not? Have foreign banking entities experienced any difficulties in complying with the condition in the policy statement that a foreign banking entity's acquisition or retention of any ownership interest in, or sponsorship of, the qualifying foreign excluded fund would need to meet the requirements for permitted covered fund activities and investments solely outside the United States, as provided in section 13(d)(1)(I) of the BHC Act and § ____.13(b) of the 2013 final rule? Would the proposed changes in this proposal to § ____.13(b) or any other provision of the 2013 final rule help foreign banking entities comply with the policy statement? Is the policy statement's definition of ''qualifying foreign excluded fund'' appropriate, or is it too narrow or too broad? Is further guidance needed with respect to any of the requirements in the definition of ''qualifying foreign excluded fund''? For example, is it clear what constitutes a bona fide asset management business? Has the policy statement posed any issues for foreign banking entities and their compliance programs?

Question 17. As stated above, the Agencies will not treat RICs or FPFs that meet the conditions included in the staff FAQs discussed above as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the FAQs. In addition, the Agencies are extending the application of the policy statement with respect to qualifying foreign excluded funds for an additional year to accommodate the pendency of the proposal. The Agencies are requesting comment on other approaches that the Agencies could take to address these issues, consistent with the requirements of section 13 of the BHC Act.

Question 18. Instead of, or in addition to, providing Agency guidance as discussed above, should the Agencies modify the 2013 final rule to address the issues raised by the interaction between the 2013 final rule's definitions of the terms ''banking entity'' and ''covered fund,'' consistent with section 13 of the BHC Act, and if so, how? For example, should the Agencies modify the 2013 final rule to provide that a banking entity may elect to treat certain entities, such as a qualifying foreign excluded fund that meets the conditions of the policy statement, as covered funds, which would result in exclusion of these entities from the term ''banking entity?'' Would allowing a banking entity to invest in, sponsor, or have certain relationships with, the fund subject to the covered fund limitations in the 2013 final rule be an effective way for banking entities to address the issues raised? For example, a banking entity could sponsor and retain a de minimis investment in such a fund, subject to §§ ____.11 and ____.12 of the 2013 final rule. A foreign bank could invest in or sponsor such a fund so long as these activities and investments occur solely outside the United States, subject to the limitations in § ____.13(b) of the 2013 final rule.

Question 19. If a banking entity is willing to subject its activities and investments with respect to a non-covered fund to the covered fund limitations in section 13 and the 2013 final rule, which are designed to prevent banking entities from being exposed to significant losses from investments in or other relationships with covered funds, is there any reason that the ability to make this election should be limited to particular types of non-covered funds? Conversely, should a banking entity only be permitted to elect to treat as a covered fund a ''qualifying foreign excluded fund,'' as defined in the policy statement issued by the Federal banking agencies? [50]

Question 20. If a banking entity elected to treat an entity as a covered fund, what potentially adverse effects could result and how should the Agencies address them? For example, if a foreign banking entity elected to treat a foreign excluded fund as a covered fund, would the application of the restrictions in § ____.14 and the compliance obligations under § ____.20 of the 2013 final rule involve the same or similar disruptions and extraterritorial application of section 13's restrictions that this approach would be designed to avoid? If so, what approach, consistent with the statute, should the Agencies take to address this issue? As discussed below in this Supplementary Information section, the Agencies are also requesting comment regarding potential changes in interpretation with respect to the 2013 final rule's implementation of section 13(f) of the BHC Act. How would any such modifications change any effects relating to an election to treat an entity as a covered fund?

Question 21. With respect to foreign excluded funds, to what extent would the proposed changes, and especially the proposed changes to §§ ____.6(e) and ____.13(b) of the 2013 final rule, adequately address the concerns raised regarding the treatment of foreign excluded funds as banking entities? If not, what additional modifications to these sections would enable such a fund to engage in proprietary trading or covered fund activity? Should the Agencies provide or modify exemptions under the 2013 final rule such that a qualifying foreign excluded fund could operate more effectively and efficiently, notwithstanding its status as a banking entity? If so, please explain how such an exemption would be consistent with the statute.

Question 22. Are there any other investment vehicles or entities that are treated as banking entities and for which commenters believe relief, consistent with the statute, would be appropriate? Which ones and why? What form of relief could be provided in a way consistent with the statute? For example, staffs of the Agencies have received inquiries regarding employees' securities companies (''ESCs''), which

[50] *See supra* note 48.

generally rely on an exemption from registration under the Investment Company Act provided by section 6(b) of that Act. These funds are controlled by their sponsors and, if those sponsors are banking entities, may themselves be treated as banking entities. Treating these ESCs as banking entities, however, may conflict with their stated investment objectives, which commonly are to invest in covered funds for the benefit of the employees of the sponsoring banking entity. Should an ESC be treated differently if its banking entity sponsor controls the ESC by virtue of corporate governance arrangements, which is a required condition of the exemptive relief under section 6(b) of the Investment Company Act that ESCs receive from the SEC, but does not acquire or retain any ownership interest in the ESC? If so, how should the Agencies consider residual or reversionary interests resulting from employees forfeiting their interests in the ESC? In pursuing their stated investment objectives on behalf of employees, do ESCs make these investment ''as principal,'' as contemplated by section 13? To what extent do banking entities invest directly in ESCs? Are there any other investment vehicles or entities, in pursuing their stated investment objectives on behalf of employees, that banking entities invest in ''as principal'' (*e.g.,* nonqualified deferred compensation plans such as trusts modeled under IRS Revenue Procedure 92–64, commonly referred to as ''rabbi trusts'')? How should the Agencies consider these investment vehicles or entities with respect to section 13? Please include an explanation of how the commenters' preferred treatment of any investment vehicle would be consistent with section 13 of the BHC Act, including the statutory definition of ''banking entity.''

b. Limited Trading Assets and Liabilities

The proposed rule would add a definition of limited trading assets and liabilities. As described in greater detail in Part II.G above, limited trading assets and liabilities would be defined under the proposal as trading assets and liabilities (excluding trading assets and liabilities involving obligations of, or guaranteed by, the United States or any agency of the United States) the average gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, does not exceed $1 billion.[51]

c. Moderate Trading Assets and Liabilities

The proposed rule would add a definition of moderate trading assets and liabilities. As described in greater detail in Part II.G above, moderate trading assets and liabilities would be defined under the proposal as trading assets and liabilities that are not significant trading assets and liabilities or limited trading assets and liabilities.

d. Significant Trading Assets and Liabilities

The proposed rule would add a definition of significant trading assets and liabilities. As described in greater detail in Part II.G above, significant trading assets and liabilities would be defined under the proposal as trading assets and liabilities (excluding trading assets and liabilities involving obligations of, or guaranteed by, the United States or any agency of the United States) the average gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10 billion.[52]

B. Subpart B—Proprietary Trading Restrictions

1. Section ____.3 Prohibition on Proprietary Trading

Section 13 of the BHC Act generally prohibits banking entities from engaging in proprietary trading.[53] The statute defines ''proprietary trading'' as engaging as principal for the trading account of the banking entity in any transaction to purchase or sell, or otherwise acquire or dispose of, any of a number of financial instruments.[54] The statute defines ''trading account'' as any account used for acquiring or taking positions in financial instruments ''principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements), and any such other accounts as the Agencies may, by rule, determine.'' [55]

a. Definition of Trading Account

The 2013 final rule, like the statute, defines proprietary trading as engaging as principal for the trading account of the banking entity in any purchase or sale of one or more financial instruments.[56] The 2013 final rule implements the statutory definition of trading account with a three-pronged definition. The first prong (the ''short-term intent prong'') includes within the definition of trading account any account used by a banking entity to purchase or sell one or more financial instruments principally for the purpose of (a) short-term resale, (b) benefitting from short-term price movements, (c) realizing short-term arbitrage profits, or (d) hedging any of the foregoing.[57] Banking entities and others have informed the Agencies that this prong of the definition imposes significant compliance costs and uncertainty because it requires determining the intent of each individual who purchases and sells a financial instrument.[58] In gaining experience implementing the 2013 final rule, the Agencies recognize that banking entities lack clarity about whether particular purchases and sales of a financial instrument are included under this prong of the trading account. The 2013 final rule includes a rebuttable presumption that the purchase or sale of a financial instrument is for the trading account under the short-term intent prong if the banking entity holds the financial instrument for fewer than 60 days or substantially transfers the risk of the position within 60 days (the ''60-day rebuttable presumption'').[59] If a banking entity sells or transfers the risk of a position within 60 days, it may rebut the presumption by demonstrating that it did not purchase or sell the financial instrument principally for short-term trading purposes. In the Agencies' experience, a broad range of transactions could trigger the 60-day rebuttable presumption. For example, the purchase of a security with a maturity (or remaining maturity) of fewer than 60 days to meet the regulatory requirements of a foreign government or to manage the banking entity's risks could trigger the 60-day rebuttable presumption because the banking entity holds the security for fewer than 60 days. In both cases, however, it is unlikely that the banking entity intended to purchase or sell the instrument principally for the purpose of short-term resale.

[51] *See supra* note 37.

[52] *See supra* note 36.

[53] 12 U.S.C. 1851(a)(1)(A).

[54] 12 U.S.C. 1851(h)(4). The statutory proprietary trading definition applies to the purchase or sale, or the acquisition or disposition of, any security, derivative, contract of sale of a commodity for future delivery, option on any such security, derivative, or contract, or any other security or financial instrument that the Agencies by rule determine.

[55] 12 U.S.C. 1851(h)(6) (defining ''trading account'').

[56] § ____.3(a) of the proposed rule.

[57] § ____.3(b)(1)(i) of the proposed rule.

[58] *See supra* note 18.

[59] § ____.3(b)(2) of the proposed rule.

The other two prongs of the 2013 final rule's definition of trading account are the ''market risk capital prong'' and the ''dealer prong.'' The ''market risk capital prong'' applies to the purchase or sale of financial instruments that are both market risk capital rule covered positions and trading positions.[60] The ''dealer prong'' applies to the purchase or sale of financial instruments by a banking entity that is licensed or registered, or required to be licensed or registered, as a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such.[61]

The Agencies are proposing to revise the regulatory trading account definition to address concerns that the 2013 final rule's short-term intent prong requires banking entities and the Agencies to make subjective determinations with respect to each trade a banking entity conducts, and that the 60-day rebuttable presumption may scope in activities that do not involve the types of risks or transactions the statutory definition of proprietary trading appears to have been intended to cover. Specifically, the Agencies propose to retain the existing dealer prong and a modified version of the market risk capital prong, and to replace the 2013 final rule's short-term intent prong with a new third prong based on the accounting treatment of a position, in each case to implement the requirements of the statutory definition. The new prong would provide that ''trading account'' means any account used by a banking entity to purchase or sell one or more financial instruments that is recorded at fair value on a recurring basis under applicable accounting standards (the ''accounting prong''). The Agencies also propose to eliminate the 60-day rebuttable presumption in the 2013 final rule.

The Agencies further propose to add a presumption of compliance with the prohibition on proprietary trading for trading desks that do not purchase or sell financial instruments subject to the market risk capital prong or the dealer prong and operate under a prescribed profit and loss threshold.[62] While still subject to the prohibition on proprietary trading under section 13 of the BHC Act and the applicable regulatory requirements, such eligible trading desks that remain under the threshold would not have to demonstrate their compliance with subpart B on an ongoing basis, as discussed below. Notwithstanding this regulatory presumption of compliance, the Agencies would reserve authority to determine on a case-by-case basis that a purchase or sale of one or more financial instruments by a banking entity either is or is not for the trading account, and, as a result, may require that a trading desk demonstrate compliance with subpart B on an ongoing basis with respect to a financial instrument.

Under the proposed approach, ''trading account'' would continue to include any account used by a banking entity to (1) purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule, or (2) purchase or sell one or more financial instruments for any purpose, if the banking entity is licensed or registered, or required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, if the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such[63] (or if the banking entity is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, if the instrument is purchased or sold in connection with the activities of such business).[64] The Agencies are proposing to retain these prongs because both prongs provide clear lines and well-understood standards for purposes of determining whether or not a purchase or sale of a financial instrument is in the trading account. The Agencies also propose to adapt the market risk capital prong to apply to the activities of FBOs in order to take into account the different regulatory frameworks and supervisors that FBOs may have in their home countries. Specifically, the Agencies propose to include within the market risk capital prong, with respect to a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, any account used by the banking entity to purchase or sell one or more financial instruments that are subject to capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended from time to time.

b. Trading Account—Accounting Prong

The proposal's definition of ''trading account'' for purposes of section 13 of the BHC Act would replace the short-term intent prong in the 2013 final rule with a new prong based on accounting treatment, by reference to whether a financial instrument (as defined in the 2013 final rule and unchanged by the proposal) is recorded at fair value on a recurring basis under applicable accounting standards. Such instruments generally include, but are not limited to, derivatives, trading securities, and available-for-sale securities. For example, for a banking entity that uses GAAP, a security that is classified as ''trading'' under GAAP would be included in the proposal's definition of ''trading account'' under this approach because it is recorded at fair value. ''Fair value'' refers to a measurement basis of accounting, and is defined under GAAP as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.[65]

The proposal's inclusion of this prong in the definition of ''trading account'' is intended to give greater certainty and clarity to banking entities about what financial instruments would be included in the trading account, because banking entities should know which instruments are recorded at fair value on

[60] § ____.3(b)(1)(ii) of the proposed rule.

[61] § ____.3(b)(1)(iii)(A) of the proposed rule. The dealer prong also includes positions entered into by a banking entity that is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business. *See* 2013 final rule § ____.3(b)(1)(iii)(B).

[62] In addition, the Agencies are proposing to adopt a presumption of compliance for banking entities with limited trading activities. *See* § ____.20(g) of the proposed rule.

[63] An insured depository institution may be registered as, among other things, a swap dealer and a security-based swap dealer, but only the swap and security-based dealing activities that require it to be so registered are included in the trading account by virtue of the dealer prong. If an insured depository institution purchases or sells a financial instrument in connection with activities of the insured depository institution that do not trigger registration as a swap dealer, such as lending, deposit-taking, the hedging of business risks, or other end-user activity, the financial instrument would be included in the trading account only if the purchase or sale of the financial instrument falls within the market risk capital trading account prong under § ____.3(b)(1) or the accounting prong under § ____.3(b)(3) of the proposed rule. *See* 79 FR at 5549, note 135.

[64] *See* § ____.3(b)(2) of the proposed rule.

[65] *See* Accounting Standards Codification (ASC) 820–10–20 and International Financial Reporting Standard (IFRS) 13.9.

their balance sheets. This modification of the rule's definition of trading account would include other accounts that may be used by banking entities for the purpose described in the statutory definition of ''trading account.'' [66] The proposal is intended to address concerns that the statutory definition of trading account may be read to contemplate an inquiry into the subjective intent underlying a trade.[67] The proposal would therefore adopt the accounting prong as an objective means of ensuring that such positions entered into by banking entities principally for the purpose of selling in the near term, or with the intent to resell in order to profit from short-term price movements, are incorporated in the definition of trading account. For entities that are not subject to the market-risk capital prong or the dealer prong, the accounting prong would therefore be the sole avenue by which such banking entities would become subject to the requirements in subpart B of the proposed rule.

Question 23. Should the Agencies adopt the proposed new accounting prong and remove the short-term intent prong? Why or why not? Does using such a prong provide sufficient clarity regarding which financial instruments are included in the trading account for purposes of the proposal? Are there differences in the application of IFRS and GAAP that the Agencies should consider? What are they and how would they impact the scope of the proposed accounting prong?

Question 24. Is using the accounting prong appropriate considering the fact that entities may have discretion over whether certain financial instruments are recorded at fair value (and therefore subject to the restrictions in section 13 of the BHC Act)? Could the proposed accounting prong incentivize banking entities to modify their accounting treatment with respect to certain financial instruments in order to evade the prohibition on proprietary trading? Why or why not? If so, could those effects have an impact on the banking entity's accounting practices?

Question 25. Should the Agencies include all financial instruments that are recorded at fair value on a banking entity's balance sheet as part of the proposed accounting prong? Why or why not? Would such a definition be overly broad? If so, why and how should the definition be narrowed, consistent with the statute? Would such a definition be too narrow and exclude financial instruments that should be included? If so, should the Agencies apply a different approach? Why or why not?

Question 26. Is the proposal's inclusion of available-for-sale securities under the proposed accounting prong appropriate? Why or why not?

Question 27. The proposed accounting prong would include all derivatives in the proposed accounting prong since derivatives are required to be recorded at fair value. Is this appropriate? Why or why not?

Question 28. Should the scope of the proposed accounting prong be further specified? In particular, should practical expedients to fair value measurements permitted under applicable accounting standards be included in the ''trading account'' definition (*e.g.,* equity securities without readily determinable fair value under ASC 321 or investments using the net asset value (''NAV'') practical expedient under ASC 820)? Why or why not? Are there other relevant examples that cause concern?

Question 29. Is there a better approach to defining ''trading account'' for purposes of section 13 of the BHC Act, consistent with the statute? If so, please explain.

Question 30. Would the short-term intent prong in the 2013 final rule be preferable to the proposed accounting prong? Why or why not? Should the Agencies rely on a potentially objective measure, such as the accounting treatment of a financial instrument, to implement the definition of ''trading account'' in section 13(h)(6), which includes any account used for acquiring or taking positions in certain securities and instruments ''principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements''? [68]

Question 31. Would references to accounting treatment be better formulated as safe harbors or presumptions within the short-term intent prong under the 2013 final rule? Why or why not?

Question 32. What impact, if any, would the proposed accounting prong have on the liquidity of corporate bonds or other securities? Please explain.

Question 33. For purposes of determining whether certain trading activity is within the definition of proprietary trading, is the proposed accounting prong over- or under-inclusive? If over- or under-inclusive, is there another alternative that would be a more appropriate replacement for the short-term prong? Please explain. If over-inclusive, what types of transactions or positions could potentially be included in the definition of proprietary trading that should not be? Please explain, and provide specific examples of the particular transactions or positions. If under-inclusive, what types of transactions or positions could potentially be omitted from the definition of proprietary trading that should be included in light of the language and purpose of the statute? Please explain and provide specific examples of the particular transactions or positions.

Question 34. The dealer prong of the trading account definition includes accounts used for purchases or sales of one or more financial instruments for any purpose, if the banking entity is, among other things, licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such. In adopting the 2013 final rule, the Agencies recognized that banking entities that are registered dealers may not have previously engaged in such an analysis, thereby resulting in a new regulatory requirement for these entities. The Agencies did, however, note that if the regulatory analysis otherwise engaged in by banking entities was substantially similar to the dealer prong analysis, then any increased compliance burden could be small or insubstantial. Have any banking entities incurred increased compliance costs resulting from the requirement to analyze whether particular activities would require dealer registration? If so, how substantial are those additional costs and have those costs changed over time, including as a result of the banking entity becoming more accustomed to engaging in the required analysis?

Question 35. In the case of banking entities that are registered dealers, how often does the analysis of whether particular activities would require dealer registration result in identifying transactions or positions that would not be included under the dealer prong? How does the volume of those transactions or positions compare to the volume of transactions or positions that are included under the dealer prong? What types of transactions or positions would not be included under the dealer prong and how often are those transactions included by a different part of the definition of ''trading account,'' namely the short-term prong?

Question 36. For transactions or positions not covered by the dealer

[66] 12 U.S.C. 1851(h)(6).

[67] *See id.*

[68] 12 U.S.C. 1851(h)(6).

prong, would those transactions or positions be covered by the proposed accounting treatment prong? Why or why not?

Question 37. As compared to the 2013 final rule's dealer and short-term intent prongs taken together, would the proposed accounting prong result in a greater or lesser amount of trading activity being included in the definition of ''trading account''? What are the resulting costs and benefits? In responding to this question, commenters are encouraged to be as specific as possible in describing the transactions or positions used to support their analysis.

Question 38. Would banking entities regulated by Agencies that are market regulators incur additional (or lesser) compliance costs or burdens in the course of complying with the proposal as compared to the costs and burdens of other banking entities? How would the costs and burdens incurred by these banking entities compare as a whole to those of other banking entities? Please explain.

c. Presumption of Compliance With the Prohibition on Proprietary Trading

The Agencies propose to include a presumption of compliance with the proposed rule's proprietary trading prohibition based on an objective, quantitative measure of a trading desk's activities. This presumption of compliance would apply to a banking entity's individual trading desks rather than to the banking entity as a whole. As described below, a trading desk operating pursuant to the proposed presumption would not be obligated to demonstrate that the activities of the trading desk comply with subpart B on an ongoing basis. The proposed presumption would only be available for a trading desk's activities that may be within the trading account under the proposed accounting prong, for a trading desk that is not subject to the market risk capital prong or the dealer prong of the trading account definition. The replacement of the short-term intent prong with the accounting prong would represent a significant change from the 2013 final rule and could potentially apply to certain activities that were previously not within the regulatory definition of trading account. However, the presumption of compliance would limit the expansion of the definition of ''trading account'' to include—unless the presumption is rebutted—only the activities of a trading desk that engages in a greater than de minimis amount of activity (unless the presumption is rebutted).

The proposed presumption would not be available for trading desks that purchase or sell positions that are within the trading account under the market risk capital prong or the dealer prong. The Agencies are not proposing to extend the presumption of compliance with the prohibition on proprietary trading to activities of banking entities that are included under the market risk capital prong or the dealer prong because, based on their experience implementing the 2013 final rule, the Agencies believe that these two prongs are reasonably designed to include the appropriate trading activities. Banking entities subject to the market risk capital prong and the dealer prong have had several years of experience complying with the requirements of the 2013 final rule and experience with identifying these activities in other contexts. The Agencies believe that banking entities with activities that are covered by these prongs are able to conduct appropriate trading activities in an efficient manner pursuant to exclusions from the definition of proprietary trading or pursuant to the exemptions for permitted activities. The Agencies further note that the proposed revisions to the exemptions (described herein) are intended to facilitate the ability of banking entities subject to the market risk capital prong and the dealer prong to better engage in otherwise permitted activities such as market-making. Additionally, the Agencies note that the presumption of compliance with the prohibition on proprietary trading is optional for a banking entity. Accordingly, if a banking entity prefers to demonstrate ongoing compliance for activity captured by the accounting prong rather than calculating the threshold for presumed compliance described below, it may do so at its discretion.

Under the proposed compliance presumption, the activities of a trading desk of a banking entity that are not covered by the market risk capital prong or the dealer prong would be presumed to comply with the proposed rule's prohibition on proprietary trading if the activities do not exceed a specified quantitative threshold. The trading desk would remain subject to the prohibition, but unless the desk engages in a material level of trading activity (or the presumption of compliance is rebutted as described below), the desk would not be required to comply with the more extensive requirements that would otherwise apply under the proposal in order to demonstrate compliance. As described further below, the Agencies propose to use the absolute value of the trading desk's profit and loss (''absolute P&L'') on a 90-calendar-day rolling basis as the relevant quantitative measure for this threshold.

The proposed rule includes a threshold for the presumption of compliance based on absolute P&L because this measure tends to correlate with the scale and nature of a trading desk's trading activities.[69] In addition, if the positions of a trading desk have recently significantly contributed to the financial position of the banking entity, such that the absolute P&L-based threshold is exceeded, the proposed trading-desk-level presumption would become unavailable and the banking entity would be required to comply with more extensive requirements of the rule to ensure compliance. Using absolute P&L as the relevant measure of trading desk risk would provide an additional advantage as an objective measure that most banking entities are already equipped to calculate.[70] This measure would also indicate the realized outcomes of the risks of a trading desk's positions, rather than modeled estimates.

In general, the proposed presumption of compliance would take the approach that a trading desk that consistently does not generate more than a threshold amount of absolute P&L does not engage in trading activities of a sufficient scale to warrant the costs associated with more extensive requirements of the rule to otherwise demonstrate compliance with the prohibition on proprietary trading. Such an approach is intended to reflect a view that the lesser activity of these trading desks does not justify the costs of an extensive ongoing compliance regime for those trading desks in order to ensure compliance with section 13 of the BHC Act and the implementing regulations.

Under the proposal, each trading desk that operates under the presumption of compliance with the prohibition on proprietary trading would be required to determine on a daily basis the absolute value of its net realized and unrealized

[69] For example, trading desks that contemporaneously and effectively offset or hedge the assets and liabilities that they acquire through trades with customers as a result of engagement in customer-driven activities could be expected under most conditions to generally experience lower amounts of daily profit or loss attributable to daily fluctuations in the value of the desk's positions than desks engaged in speculative activities.

[70] Some banking entities without meaningful trading activities may not currently calculate P&L as described in this proposal, but the Agencies believe that many, if not most, of those banking entities would be banking entities with limited trading assets and liabilities that would be presumed to comply with the proposed rule under proposed § ____.20(g).

gains or losses on its portfolio of financial instruments based on the fair value of the financial instruments. The sum of the absolute values of gains or losses for each trading date in any 90-calendar-day period is the trading desk's 90-calendar-day absolute P&L. If this value exceeds $25 million at any point, then the banking entity would be required to notify the appropriate Agency that it has exceeded the threshold in accordance with the Agency's notification policies and procedures.

The Agencies propose to use the absolute value of a trading desk's daily P&L because absolute value would ensure that losses would be counted toward the measurement to the same extent as gains. Thus, a trading desk could not avoid triggering compliance by offsetting significant net gains on one day with significant net losses on another day. Measuring absolute P&L on a rolling basis would mean that the threshold could be triggered in any 90-calendar-day period.

This proposed trading-desk-level presumption of compliance with the prohibition on proprietary trading would be intended to allow banking entities to conduct ordinary banking activities without having to assess every individual trade for compliance with subpart B of the implementing regulations and, in particular, the proposed accounting prong.[71]

As noted above, one advantage of using absolute P&L as the relevant measure of trading desk risk is that it would provide a relatively simple and objective measure that most banking entities are already equipped to calculate. For example, banking entities subject to the current metrics reporting requirements should already be equipped to calculate P&L on a daily basis. Other banking entities with significant trading activities likely currently calculate P&L on a daily basis for the purpose of monitoring their positions and risks. Moreover, a banking entity's methodology for calculating P&L is generally subject to internal and external audit requirements, managerial monitoring, and applicable public reporting requirements under the U.S. securities laws. Under the proposed approach, the Agencies would review banking entities' methodologies for calculating absolute P&L for purposes of the presumption of compliance with the prohibition on proprietary trading.

The specific threshold chosen aims to characterize trading desks not engaged in prohibited proprietary trading. Based on the metrics collected by the Agencies since issuance of the 2013 final rule, 90-calendar-day absolute P&L values below $25 million dollars are typically indicative of trading desks not engaged in prohibited proprietary trading. Under the proposal, the activities of a trading desk that exceeds the $25 million threshold would not presumptively comply with the prohibition on proprietary trading. If a trading desk operating pursuant to the proposed presumption of compliance with the prohibition on proprietary trading exceeded the $25 million threshold, the banking entity would be required to notify the appropriate Agency, demonstrate that the trading desk's purchases and sales of financial instruments comply with subpart B (*e.g.,* the desk's purchases and sales are not included in the rule's definition of trading account or meet the terms of an exclusion from the definition of proprietary trading or a permitted activity exemption), and demonstrate how the trading desk that exceeded the threshold will maintain compliance with subpart B on an ongoing basis. The proposed presumption of compliance is intended to apply to the desks of banking entities that are not engaged in prohibited proprietary trading and is not intended as a safe harbor. The Agencies therefore propose to include within the presumption of compliance a process by which an Agency may rebut this regulatory presumption of compliance. Under the proposal, the Agency would be able to rebut the presumption of compliance with the prohibition on proprietary trading for the activities of a trading desk that does not exceed the $25 million threshold by providing the banking entity written notification of the Agency's determination that one or more of the trading desk's activities violates the prohibition on proprietary trading under subpart B.

In addition, the proposed rule includes a reservation of authority (described further below) that would allow an Agency to designate any activity as a proprietary trading activity if the Agency determines on a case-by-case basis that the banking entity has engaged as principal for the trading account of the banking entity in any purchase or sale of one or more financial instruments under 12 U.S.C. 1851(h)(6).

Question 39. Should the Agencies consider any objective measures other than accounting treatment to replace the 2013 final rule's short-term intent prong? For example, should the Agencies consider including an objective quantitative threshold (such as the absolute P&L threshold described in the proposed presumption of compliance with the proprietary trading prohibition) as an element of the trading account definition? Why or why not, and how would such a measure be consistent with the requirements of section 13 of the BHC Act?

Question 40. Is the proposed desk-level threshold for presumed compliance with the prohibition on proprietary trading ($25 million absolute P&L) an appropriate measure for indicating that the scale of a trading desk's activities may not warrant the cost of more extensive compliance requirements? Why or why not? If not, what other measure would be more appropriate? If absolute P&L is an appropriate measure, is $25 million an appropriate threshold? Why or why not? Should this threshold be periodically indexed for inflation?

Question 41. What issues do commenters expect would arise if the $25 million threshold is applied to each trading desk at a banking entity? Would variations in levels and types of activity of the different trading desks raise challenges in the application of the threshold?

Question 42. What factors, if any, should the Agencies keep in mind as they consider how the $25 million threshold should be applied over time, as trading desks' activities change and banking entities may reorganize their trading desks? Would the $25 million threshold require any adjustment if a banking entity consolidated more than one trading desk into one, or split the activities of a trading desk among multiple trading desks?

Question 43. As described further below, the Agencies are requesting comment regarding a potential change to the definition of ''trading desk'' that would allow a banking entity greater discretion to define the business units that constitute trading desks for purposes of the 2013 final rule. If the Agencies were to adopt both this change to the definition of ''trading desk'' and the trading desk-level presumption of compliance described above, would such a combination create opportunities for evasion? If so, how could such concerns be mitigated?

Question 44. Recognizing that the Agencies that are market regulators operate under an examination and enforcement model that differs from a bank supervisory model, from a practical perspective would the proposal to replace the current short-

[71] Provided that a trading desk's absolute P&L does not exceed the $25 million threshold, a banking entity would not have to assess the accounting treatment of each transaction of a trading desk that operates pursuant to the presumption of compliance with the prohibition on proprietary trading.

term intent prong with an accounting prong, including the presumption of compliance, apply differently to banking entities regulated by market regulators as compared to other banking entities? Please explain.

Question 45. Is the process by which the Agencies may rebut the presumption of compliance sufficiently clear? If not, how should the process be changed?

Question 46. Under the proposed presumption of compliance, banking entities would be required to notify the appropriate Agency whenever the activities of a trading desk with the relevant activities crosses the $25 million P&L threshold. Should the Agencies consider an alternative methodology in which a banking entity regulated by the SEC or CFTC, as appropriate, makes and keeps a detailed record of each instance and provides such records to SEC or CFTC staff promptly upon request or during an examination? Why or why not?

Question 47. Would an alternative methodology to the notification requirement, applicable solely to banking entities regulated by Agencies that are market regulators, whereby these firms would be required to escalate notices of instances when the P&L threshold has been exceeded internally for further inquiry and determination as to whether notice should be given to the applicable regulator, using objective factors provided by the rule? Why or why not? If such an approach would be more appropriate, what objective factors should be used to determine when notice should be given to the applicable regulator? Please be as specific as possible.

Question 48. Should the Agencies specify notice and response procedures in connection with an Agency determination that the presumption is rebutted pursuant to § ____.3(c)(2) of the proposal? Why or why not? If not, what other approach would be appropriate?

d. Excluded Activities.

As previously discussed, § ____.3 of the 2013 final rule generally prohibits a banking entity from engaging in proprietary trading.[72] In addition to defining the scope of trading activity subject to the prohibition on proprietary trading, the 2013 final rule also provides several exclusions from the definition of proprietary trading.[73] Based on their experience implementing the 2013 final rule, the Agencies are proposing to modify the exclusion for liquidity management and to adopt new exclusions for transactions made to correct errors and for certain offsetting swap transactions. In addition, the Agencies request comment regarding whether any additional exclusions should be added, for example, to address certain derivatives entered into in connection with a customer lending transaction.

1. Liquidity Management Exclusion

The 2013 final rule excludes from the definition of proprietary trading the purchase or sale of securities for the purpose of liquidity management in accordance with a documented liquidity management plan.[74] This exclusion is subject to several requirements. First, the liquidity management exclusion is limited by its terms to securities and requires that transactions be pursuant to a liquidity management plan that specifically contemplates and authorizes the particular securities to be used for liquidity management purposes; describes the amounts, types, and risks of securities that are consistent with the entity's liquidity management; and the liquidity circumstances in which the particular securities may or must be used. Second, any purchase or sale of securities contemplated and authorized by the plan must be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes. Third, the plan must require that any securities purchased or sold for liquidity management purposes be highly liquid and limited to instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements. Fourth, the plan must limit any securities purchased or sold for liquidity management purposes to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan. Fifth, the banking entity must incorporate into its compliance program internal controls, analysis, and independent testing designed to ensure that activities undertaken for liquidity management purposes are conducted in accordance with the requirements of the final rule and the entity's liquidity management plan. Finally, the plan must be consistent with the supervisory requirements, guidance, and expectations regarding liquidity management of the Agency responsible for regulating the banking entity. These requirements are designed to ensure that the liquidity management exclusion is not misused for the purpose of impermissible proprietary trading.[75]

The Agencies propose to amend the exclusion for liquidity management activities to allow banking entities to use foreign exchange forwards and foreign exchange swaps, each as defined in the Commodity Exchange Act,[76] and physically settled cross-currency swaps (*i.e.,* cross-currency swaps that involve an actual exchange of the underlying currencies) as part of their liquidity management activities. Currently, the liquidity management exclusion is limited to the ''purchase or sale of a security . . . for the purpose of liquidity management . . .'' if several specified requirements are met.[77] As a result, banking entities may not currently rely on the liquidity management exclusion for foreign exchange derivative transactions used for liquidity management because the exclusion is limited to securities. However, the Agencies understand that banking entities often use foreign exchange forwards, foreign exchange swaps, and cross-currency swaps for liquidity management purposes. In particular, foreign exchange forwards, foreign exchange swaps, and cross-currency swaps are often used by trading desks to manage liquidity both in the United States and in foreign jurisdictions. For example, foreign branches and subsidiaries of U.S. banking entities often have liquidity requirements mandated by foreign jurisdictions, and foreign exchange products can be used to address currency risk arising from holding this liquidity in foreign currencies. As a particular example, a U.S. banking entity may have U.S. dollars to fund its operations but require Japanese yen for its branch in Japan. The banking entity could use a foreign exchange swap to convert its U.S. dollars to Japanese yen to fund the operations of its Japanese branch.

To streamline compliance for banking entities operating in foreign jurisdictions and using foreign exchange forwards, foreign exchange swaps, and cross-currency swaps for liquidity management purposes, the Agencies propose to expand the liquidity management exclusion to permit the

[72] *See* 2013 final rule § ____.3(a).

[73] *See* 2013 final rule § ____.3(d).

[74] *See* 2013 final rule § ____.3(d)(3).

[75] *See* 79 FR at 5555.

[76] *See* 7 U.S.C. 1a(24) and 1a(25).

[77] § ____.3(d)(3) of the proposed rule (emphasis added).

purchase or sale of foreign exchange forwards (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swaps (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), and physically-settled cross-currency swaps[78] entered into by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan. The proposed rule would permit a banking entity to purchase or sell foreign exchange forwards, foreign exchange swaps, and physically-settled cross-currency swaps to the same extent that a banking entity may purchase or sell securities under the existing exclusion, and the existing conditions that apply for securities transactions would also apply to transactions in foreign exchange forwards, foreign exchange swaps, and physically-settled cross-currency swaps.[79]

The inclusion of cross-currency swaps would be limited to swaps for which all payments are made in the currencies being exchanged, as opposed to cash-settled swaps, to limit the potential for these instruments to be used for proprietary trading that is not for liquidity management purposes. While foreign exchange forwards and foreign exchange swaps, as defined in the Commodity Exchange Act, are by definition limited to an exchange of the designated currencies, no similarly limited definition of the term ''cross-currency swap'' is available for this purpose. Cross-currency swaps generally are more flexible in their terms, may have longer durations, and may be used to achieve a greater variety of potential outcomes. Accordingly, out of concern that cross-currency swaps could be used for prohibited proprietary trading, the Agencies propose to limit the use of cross-currency swaps for purposes of the liquidity management exclusion to only those swaps for which the payments are made in the two currencies being exchanged.

Question 49. In addition to the example noted above, are there additional scenarios under which commenters would envision foreign exchange forwards, foreign exchange swaps, or physically-settled cross-currency swaps to be used for liquidity management? Are the existing conditions of the liquidity management exclusion appropriate for these types of derivatives activities, or should additional conditions be added to account for the particular characteristics of the financial instruments that the Agencies are proposing to be added? Should any existing restrictions be removed to account for the proposed addition of these transactions?

Question 50. Do the requirements of the existing liquidity management exclusion, as proposed to be modified by expanding the exclusion to include foreign exchange forwards, foreign exchange swaps, or physically-settled cross-currency swaps, sufficiently protect against the possibility of banking entities using the exclusion to conduct impermissible speculative trading, while also permitting bona fide liquidity management? Should the proposal be further modified to protect against the possibility of firms using the liquidity management exclusion to evade the requirements of section 13 of the BHC Act and implementing regulations?

Question 51. Should banking entities be permitted to purchase and sell physically-settled cross-currency swaps under the liquidity management exclusion? Should banking entities be permitted to purchase and sell any other financial instruments under the liquidity management exclusion?

2. Transactions to Correct Bona Fide Trade Errors

The Agencies understand that, from time to time, a banking entity may erroneously execute a purchase or sale of a financial instrument in the course of conducting a permitted or excluded activity. For example, a trading error may occur when a banking entity is acting solely in its capacity as an agent, broker, or custodian pursuant to § ____ .3(d)(7) of the 2013 final rule, such as by trading the wrong financial instrument, buying or selling an incorrect amount of a financial instrument, or purchasing rather than selling a financial instrument (or vice versa). To correct such errors, a banking entity may need to engage in a subsequent transaction as principal to fulfill its obligation to deliver the customer's desired financial instrument position and to eliminate any principal exposure that the banking entity acquired in the course of its effort to deliver on the customer's original request. Under the 2013 final rule, banking entities have expressed concern that the initial trading error and any corrective transactions could, depending on the facts and circumstances involved, fall within the proprietary trading definition if the transaction is covered by any of the prongs of the trading account definition and is not otherwise excluded pursuant to a different provision of the rule.

Accordingly, the Agencies are proposing a new exclusion from the definition of proprietary trading for trading errors and subsequent correcting transactions because such transactions do not appear to be the type of transaction the statutory definition of ''proprietary trading'' was intended to cover. In particular, these transactions generally lack the intent described in the statutory definition of ''trading account'' to profit from short-term price movements. The proposed exclusion would be available for certain purchases or sales of one or more financial instruments by a banking entity if the purchase (or sale) is made in error in the course of conducting a permitted or excluded activity or is a subsequent transaction to correct such an error. The Agencies note that the availability of the proposed exclusion will depend on the facts and circumstances of the transactions. For example, the failure of a banking entity to make reasonable efforts to prevent errors from occurring—as indicated, for example, by the magnitude or frequency of errors, taking into account the size, activities, and risk profile of the banking entity—or to identify and correct trading errors in a timely and appropriate manner may indicate trading activity that is not truly an error and therefore inconsistent with the exclusion.

As an additional condition, once the banking entity identifies purchases made in error, it would be required to transfer the financial instrument to a separately-managed trade error account for disposition, as a further indication that the transaction reflects a bona fide error. The Agencies believe that this separately-managed trade error account should be monitored and managed by personnel independent from the traders who made the error and that banking entities should monitor and manage trade error corrections and trade error accounts. Doing so would help prevent personnel from using these accounts to evade the prohibition on proprietary trading, such as by retaining positions in error accounts to benefit from short-term price movements or by intentionally and incorrectly classifying transactions as error trades or as corrections of error trades in order to realize short term profits.

[78] The Agencies propose to define a cross-currency swap as a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into. This definition is consistent with regulations pertaining to margin and capital requirements for covered swap entities, swap dealers, and major swap participants. *See* 12 CFR 45.2; 12 CFR 237.2; 12 CFR 349.2; 17 CFR 23.151.

[79] *See* § ____.3(e)(3)(i)–(vi) of the proposed rule.

Question 52. Does the proposed exclusion align with existing policies and procedures that banking entities use to correct trading errors? Why or why not?

Question 53. Is the proposed exclusion for bona fide errors sufficiently narrow so as to prevent banking entities from evading other requirements of the rule? Conversely, would it be too narrow to be workable? Why or why not?

Question 54. Do commenters believe that the proposed exclusion for bona fide trade errors is sufficiently clear? If not, why not, and how should the Agencies clarify it?

Question 55. Does the proposed exclusion conflict with any of the requirements of a self-regulatory organization's rules for correcting trading errors? If it does, should the Agencies give banking entities the option of complying with those rules instead of the requirements of the proposed exclusion? When answering this question, commenters should explain why the rules of self-regulatory organizations are sufficient to prevent personnel from evading the prohibition on proprietary trading.

Question 56. Should the Agencies provide specific criteria or factors to help banking entities determine what constitutes a separately managed trade error account? Why or why not? How would these factors or criteria help banking entities identify activities that are covered by the proposed exclusion for trading errors?

3. Definition of Other Terms Related to Proprietary Trading

The Agencies are requesting comment on alternatives to the 2013 final rule's definition of ''trading desk.'' The trading desk definition is significant because compliance with the underwriting and market-making provisions is determined at the trading-desk level.[80] For example, the ''reasonably expected near-term customer demand,'' or RENTD, requirements for both underwriting and market-making activities must be calculated for each trading desk.[81] Additionally, under the 2013 final rule, banking entities must furnish metrics at the trading-desk level.[82] Further, the proposed presumption of compliance with the prohibition on proprietary trading would require trading desks operating pursuant to the presumption to calculate absolute P&L at the trading desk level and would apply to all the activities of the trading desk.

Under the 2013 final rule, ''trading desk'' is defined as ''the smallest discrete unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof.''[83] Some banking entities have indicated that, in practice, this definition has led to uncertainty regarding the meaning of ''smallest discrete unit.'' Some banking entities have also communicated that this definition has caused confusion and duplicative compliance and reporting efforts for banking entities that also define trading desks for purposes not related to the 2013 final rule, including for internal risk management and reporting and calculating regulatory capital requirements.

Accordingly, the Agencies are requesting comment on whether to revise the trading desk definition to align with the trading desk concept used for other purposes. The Agencies are seeking comment on a potential multi-factor trading desk definition based on the same criteria typically used to establish trading desks for other operational, management, and compliance purposes. For example, the Agencies could define a trading desk as a unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof that is:

- Structured by the banking entity to establish efficient trading for a market sector;
- Organized to ensure appropriate setting, monitoring, and management review of the desk's trading and hedging limits, current and potential future loss exposures, strategies, and compensation incentives; and
- Characterized by a clearly-defined unit of personnel that typically:
  - ○ Engages in coordinated trading activity with a unified approach to its key elements;
  - ○ Operates subject to a common and calibrated set of risk metrics, risk levels, and joint trading limits;
  - ○ Submits compliance reports and other information as a unit for monitoring by management; and
  - ○ Books its trades together.

The Agencies believe that this potential approach to the definition of trading desk could be easier to monitor and for banking entities to apply. At the same time, however, any revised definition should not be so broad as to hinder the ability of the Agencies or the banking entities to detect prohibited proprietary trading.

Under the alternative approach on which the Agencies are requesting comment, a banking entity's trading desk designations would be subject to Agency review, as appropriate, through the examination process or otherwise. Such a definition would be intended to reduce the burdens on banking entities by aligning the regulation's trading desk concept with the organizational structure that firms already have in place for purposes of carrying out their ordinary course business activities. Specifically, to the extent the trading desk definition in the 2013 final rule has been interpreted to apply at too granular a level, the Agencies request comment as to whether such a definition would reduce compliance costs by clarifying that banking entities are not required to maintain policies and procedures and to collect and report information at a level of the organization identified solely for purposes of section 13 of the BHC Act and implementing regulations.

Question 57. Should the Agencies revise the trading desk definition to align with the level of organization established by banking entities for other purposes, such as for other operational, management, and compliance purposes? Which of the proposed factors would be appropriate to include in the trading desk definition? Do these factors reflect the same principles banking entities typically use to define trading desks in the ordinary course of business? Are there any other factors that the Agencies should consider such as, for example, how a banking entity would monitor and aggregate P&L for purposes other than compliance with section 13 of the BHC Act and the implementing regulation?

Question 58. How would the adoption of a different trading desk definition affect the ability of banking entities and the Agencies to detect impermissible proprietary trading? Please explain. Would a different definition of ''trading desk'' make it easier or harder for banking entities and supervisors to monitor their trading activities for consistency with section 13 of the BHC Act and implementing regulations? Would allowing banking entities to define ''trading desk'' for purposes of compliance with section 13 of the BHC Act and the implementing regulations create opportunities for evasion, and if so, how could such concerns be mitigated?

Question 59. Please discuss any positive or negative consequences or costs and benefits that could result if a ''trading desk'' is not defined as ''the

[80] *See* 2013 final rule § ____.4(a)(2); § ____.4(b)(2).

[81] *See* 2013 final rule § ____.4(b)(2)(ii).

[82] *See* 2013 final rule Appendix A.

[83] 2013 final rule § ____.3(e)(13).

smallest discrete unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking entity or an affiliate thereof.'' Please include in your discussion any positive or negative impact with respect to (i) the ability to record the quantitative measurements required in the Appendix and (ii) the usefulness of such quantitative measurements.

e. Reservation of Authority

The Agencies propose to include a reservation of authority allowing an Agency to determine, on a case-by-case basis, that any purchase or sale of one or more financial instruments by a banking entity for which it is the primary financial regulatory agency either is or is not for the trading account as defined in section 13(h)(6) of the BHC Act.[84] In evaluating whether the Agency should designate a purchase or sale as for the trading account, the Agency will consider consistency with the statutory definition, and, to the extent appropriate and consistent with the statute, may consider the impact of the activity on the safety and soundness of the financial institution or the financial stability of the United States, the risk characteristics of the particular activity, or any other relevant factor.

The Agencies request comment as to whether such a reservation of authority would be necessary in connection with the proposed definition of trading account, which would focus on objective factors rather than on subjective intent.[85] While the Agencies recognize that the use of objective factors to define proprietary trading is intended to simplify compliance, the Agencies also recognize that this approach may, in some circumstances, produce results that are either under-inclusive or over-inclusive with respect to the definition of proprietary trading. The Agencies further recognize that the underlying statute sets forth elements of proprietary trading that are inherently subjective, for example, ''intent to resell in order to profit from short-term price movements.'' [86] In order to provide appropriate balance and to recognize the subjective elements of the statute, the Agencies request comment as to whether a reservation of authority is appropriate.

The Agencies propose to administer this reservation of authority with appropriate notice and response procedures. In those circumstances where the primary financial regulatory agency of a banking entity determines that the purchase or sale of one or more financial instruments is for the trading account, the Agency would be required to provide written notice to the banking entity explaining why the purchase or sale is for the trading account. The Agency would also be required to provide the banking entity with a reasonable opportunity to provide a written response before the Agency reaches a final decision. Specifically, a banking entity would have 30 days to respond to the notice with any objections to the determination and any factors that the banking entity would have the Agency consider in reaching its final determination. The Agency could, in its discretion, extend the response period beyond 30 days for good cause. The Agency could also shorten the response period if the banking entity consents to a shorter response period or, if, in the opinion of the Agency, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new response period. Failure to respond within the time period would amount to a waiver of any objections to the Agency's determination that a purchase or sale is for the trading account. After the close of banking entity's response period, the Agency would decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the Agency's determination that the purchase or sale is for the trading account. The banking entity would be notified of the decision in writing. The notice would include an explanation of the decision.[87]

Question 60. Is the reservation of authority to allow the appropriate Agency to determine whether a particular activity is proprietary trading appropriate? Why or why not?

Question 61. Would the proposed reservation of authority further the goals of transparency and consistency in interpretation of section 13 of the BHC Act and the implementing regulations? Would it be more appropriate to have these type of determinations made jointly by the Agencies? Is the standard by which an Agency would make a determination under the proposed reservation of authority sufficiently clear? If determinations are not made jointly by the Agencies, what concerns could be presented if two banking entity affiliates receive different or conflicting determinations from different Agencies?

Question 62. Should Agencies' determinations pursuant to the reservation of authority be made public? Would publication of such determinations further the goals of consistency and transparency? Please explain. Should the Agencies follow consistent practices with respect to publishing notices of determinations pursuant to the reservation of authority?

Question 63. Are the notice and response procedures adequate? Why or why not? Recognizing that market regulators operate under a different regulatory structure as compared to the Federal banking agencies, should the proposed notice and response procedures be modified to account for such differences (including by creating separate procedures that would be applicable solely in the case of reporting to market regulators)? Why or why not?

2. Section ____.4: Permitted Underwriting and Market-Making Activities

a. Permitted Underwriting Activities

Section 13(d)(1)(B) of the BHC Act contains an exemption from the prohibition on proprietary trading for the purchase, sale, acquisition, or disposition of securities, derivatives, contracts of sale of a commodity for future delivery, and options on any of the foregoing in connection with underwriting activities, to the extent that such activities are designed not to exceed RENTD.[88] Section ____.4(a) of the 2013 final rule implements the statutory exemption for underwriting and sets forth the requirements that banking entities must meet in order to rely on the exemption. Among other things, the 2013 final rule requires that:

- The banking entity act as an ''underwriter'' for a ''distribution'' of securities and the trading desk's underwriting position be related to such distribution;
- The amount and types of securities in the trading desk's underwriting position be designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, and reasonable efforts be made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;
- The banking entity has established and implements, maintains, and enforces an internal compliance program that is reasonably designed to

[84] 12 U.S.C. 1851(h)(6).

[85] *See* § ____.3(b) of the proposed rule.

[86] *See* 12 U.S.C. 1851(h)(6).

[87] These notice and response procedures would be consistent with procedures that apply to many banking entities in other contexts. *See* 12 CFR 3.404.

[88] 12 U.S.C. 1851(d)(1)(B).

ensure the banking entity's compliance with the requirements of the underwriting exemption, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:

○ The products, instruments, or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

○ Limits for each trading desk, based on the nature and amount of the trading desk's underwriting activities, including the reasonably expected near term demands of clients, customers, or counterparties, on the amount, types, and risk of the trading desk's underwriting position, level of exposures to relevant risk factors arising from the trading desk's underwriting position, and period of time a security may be held;

○ Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

○ Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

- The compensation arrangements of persons performing the banking entity's underwriting activities are designed not to reward or incentivize prohibited proprietary trading; and
- The banking entity is licensed or registered to engage in the activity described in the underwriting exemption in accordance with applicable law.

As the Agencies explained in the 2013 final rule, underwriters play an important role in facilitating issuers' access to funding, and thus underwriters are important to the capital formation process and economic growth.[89] Obtaining new financing can be expensive for an issuer because of the natural information advantage that less well-known issuers have over investors about the quality of their future investment opportunities.[90] An underwriter can help reduce these costs by mitigating the information asymmetry between an issuer and its potential investors.[91] The underwriter does this based in part on its familiarity with the issuer and other similar issuers as well as by collecting information about the issuer. This allows investors to look to the reputation and experience of the underwriter as well as its ability to provide information about the issuer and the underwriting.[92]

In recognition of how the underwriting market functions, the Agencies adopted a comprehensive, multi-faceted approach in the 2013 final rule. In the several years since the adoption of the 2013 final rule, however, public commenters have observed that the significant compliance requirements in the regulation may unnecessarily constrain underwriting without a corresponding reduction in the type of trading activities that the rule was designed to prohibit.[93]

As described in further detail below, the Agencies are proposing to tailor, streamline, and clarify the requirements that a banking entity must satisfy to avail itself of the underwriting exemption. In that regard, the Agencies are proposing to modify the underwriting exemption to clarify how a banking entity may measure and satisfy the statutory requirement that underwriting activity be designed not to exceed the reasonably expected near term demand of clients, customers, or counterparties. Specifically, the proposal would establish a presumption, available to banking entities both with and without significant trading assets and liabilities, that trading within internally set risk limits satisfies the statutory requirement that permitted underwriting activities must be designed not to exceed RENTD.

The Agencies also are proposing to tailor the underwriting exemption's compliance program requirements to the size, complexity, and type of activity conducted by the banking entity by making those requirements applicable only to banking entities with significant trading assets and liabilities. Based on feedback the Agencies have received, banking entities that do not have significant trading assets and liabilities can incur costs to establish, implement, maintain, and enforce the compliance program requirements in the 2013 final rule, notwithstanding the lower level of such banking entities' trading activities.[94] Accordingly, the Agencies believe that the proposed revisions to the underwriting exemption would provide banking entities that do not have significant trading assets and liabilities with more flexibility to meet client and customer demands and facilitate the capital formation process, while, consistent with the statute, continuing to safeguard against trading activity that could threaten the safety and soundness of banking entities and the financial stability of the United States, by more appropriately aligning the associated compliance obligations with the size of banking entities' trading activities.

b. RENTD Limits and Presumption of Compliance

As described above, the statutory exemption for underwriting in section 13(d)(1)(B) of the BHC Act requires that such activities be designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.[95] Consistent with the statute, § ____.4(a)(2)(ii) of the 2013 final rule's underwriting exemption requires that the amount and type of the securities in the trading desk's underwriting position be designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, and reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security.[96]

The Agencies' experience implementing the 2013 final rule has indicated that the approach the Agencies have taken to give effect to the statutory standard of reasonably expected near term demands of clients, customers, or counterparties may be overly broad and complex, and also may inhibit otherwise permissible underwriting activity. The Agencies have received feedback as part of implementing the rule that compliance with the factors in the rule can be complex and costly.[97]

Instead of the approach for the underwriting exemption in the 2013 final rule, the Agencies are proposing to establish the articulation and use of internal risk limits as a key mechanism for conducting trading activity in accordance with the rule's underwriting exemption.[98] In particular, the proposal would provide that the purchase or sale of a financial instrument by a banking entity shall be presumed to be designed not to exceed, on an ongoing basis, the reasonably expected near term demands

[95] 12 U.S.C. 1851(d)(1)(B).

[96] *See* 2013 final rule § ____.4(a)(2)(ii).

[97] *See supra* Part I.A. of this SUPPLEMENTARY INFORMATION section.

[98] As a consequence of these proposed changes to focus on risk limits, many of the requirements of the 2013 final rule relating to risk limits associated with underwriting would be incorporated into this requirement and modified or removed as appropriate in this section of the proposal.

of clients, customers, or counterparties if the banking entity establishes internal risk limits for each trading desk, subject to certain conditions, and implements, maintains, and enforces those limits, such that the risk of the financial instruments held by the trading desk does not exceed such limits. The Agencies believe that this approach would provide firms with more flexibility and certainty in conducting permissible underwriting.

Under the proposal, all banking entities, regardless of their volume of trading assets and liabilities, would be able to voluntarily avail themselves of the presumption of compliance with the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act by establishing and complying with these internal risk limits. Specifically, the proposal would provide that a banking entity would establish internal risk limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(1) Amount, types, and risk of its underwriting position;

(2) Level of exposures to relevant risk factors arising from its underwriting position; and

(3) Period of time a security may be held.

Banking entities utilizing this presumption would be required to maintain internal policies and procedures for setting and reviewing desk-level risk limits in a manner consistent with the statute.[99] The proposed approach would not require that a banking entity's risk limits be based on any specific or mandated analysis, as required under the 2013 final rule. Rather, a banking entity would establish the risk limits according to its own internal analyses and processes around conducting its underwriting activities in accordance with section 13(d)(1)(B).[100]

The proposal would require a banking entity to promptly report to the appropriate Agency when a trading desk exceeds or increases its internal risk limits. A banking entity would also be required to report to the appropriate Agency any temporary or permanent increase in an internal risk limit. In the case of both reporting requirements (*i.e.,* notice of an internal risk limit being exceeded and notice of an increase to the limit), the notice would be submitted in the form and manner as directed by the applicable Agency.

As noted, a banking entity would not be required to adhere to any specific, pre-defined requirements for the limit-setting process beyond the banking entity's own ongoing and internal assessment of the amount of activity that is required to conduct underwriting, including to reflect the banking entity's ongoing and internal assessment of the reasonably expected near term demands of clients, customers, or counterparties. The proposal would, however, provide that internal risk limits established by a banking entity shall be subject to review and oversight by the appropriate Agency on an ongoing basis. Any review of such limits would assess whether or not those limits are established based on the statutory standard—*i.e.,* the trading desk's reasonably expected near term demands of clients, customers, or counterparties on an ongoing basis, based on the nature and amount of the trading desk's underwriting activities. So long as a banking entity has established and implements, maintains, and enforces such limits, the proposal would presume that all trading activity conducted within the limits meets the requirements that the underwriting activity be based on the reasonably expected near term demands of clients, customers, or counterparties. The Agencies would expect to closely monitor and review any instances of a banking entity exceeding a risk limit as well as any temporary or permanent increase to a trading desk limit.

Under the proposal, the presumption of compliance for permissible underwriting activities may be rebutted by the Agency if the Agency determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the trading desk's reasonably expected near term demands of clients, customers, or counterparties on an ongoing basis. The Agency would provide notice of any such determination to the banking entity in writing.

The Agencies request comment on the proposed addition of a presumption that conducting underwriting activities within internally set risk limits satisfies the requirement that permitted underwriting activities be designed not to exceed the reasonably expected near-term demands of clients, customers, or counterparties. In particular, the Agencies request comment on the following questions:

Question 64. Is the proposed presumption of compliance for underwriting activity within internally set risk limits sufficiently clear? If not, what changes should the Agencies make to further clarify the rule?

Question 65. How would the proposed approach, as it relates to the establishment and reliance on internal trading limits, impact the capital formation process and the liquidity of particular markets?

Question 66. How would the proposed approach, as it relates to the establishment and reliance on internal trading limits, impact the underlying objectives of section 13 of the BHC Act and the 2013 final rule? For example, how should the Agencies assess internal trading limits and any changes in them?

Question 67. By proposing an approach that permits banking entities to rely on internally set limits to comply with the statutory RENTD requirement, the rule would no longer expressly require firms to, among other things, conduct a demonstrable analysis of historical customer demand, current inventory of financial instruments, and market and other factors regarding the amount, types, and risks of or associated with positions in financial instruments in which the trading desk makes a market, including through block trades. Do commenters agree with the revised approach? What are the costs and benefits of eliminating these requirements?

Question 68. Would the proposal's approach to permissible underwriting activities effectively implement the statutory exemption? Why or why not? Would this approach improve the ability of banking entities to engage in underwriting relative to the 2013 final rule? If not, what approach would be better? Please explain.

Question 69. Does the proposed reliance on using a trading desk's internal risk limits to comply with the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act present opportunities to evade the overall

[99] Under the proposal, banking entities with significant trading assets and liabilities would continue to be required to establish internal risk limits for each trading desk as part of the underwriting compliance program requirement in § ____.4(a)(2)(iii)(B), the elements of which would cross-reference directly to the requirement in proposed § ____.4(a)(8)(i). Banking entities that do not have significant trading assets and liabilities would no longer be required to establish a compliance program that is specific for the purposes of complying with the exemption for underwriting, but would need to do so if they chose to utilize the proposed presumption of compliance with respect to the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act.

[100] The Agencies expect that the risk and position limits metric that is already required for certain banking entities under the 2013 final rule (and would continue to be required under the Appendix to the proposal) would help banking entities and the Agencies to manage and monitor the underwriting activities of banking entities subject to the metrics reporting and recordkeeping requirements of the Appendix. *See infra* Part III.E.2.*i*.i.

prohibition on proprietary trading? If so, how? Please be as specific as possible. Additionally, please provide any changes to the proposal that might address such potential circumvention. Alternatively, please explain why the proposal to rely on a trading desk's internal risk limits to comply with the statutory RENTD requirement should not present opportunities to evade the prohibition on proprietary trading.

Question 70. Do banking entities need greater clarity about how to set the proposed internal risk limits for permissible underwriting activity? If so, what additional information would be useful? Please explain.

Question 71. Are the proposed changes to the exemption for underwriting appropriately tailored to the operation and structure of the underwriting market, particularly firm commitment offerings? Could the proposal be modified in order to better align with the operation and structure of the underwriting market? Recognizing that the proposal would not require banking entities to use their internal risk limits to establish a rebuttable presumption of compliance with the requirements of section 13(d)(1)(B) of the BHC Act, would the proposal be workable in the context of underwritten offerings, including firm commitment underwritings? How would an Agency rebut the presumption of compliance in the context of underwritten offerings, including firm commitment underwritings? Could the proposal, if adopted, affect a banking entity's willingness to participate in a firm commitment underwriting? Please explain, being as specific as possible.

Question 72. Should any additional guidance or information be provided to explain the process and standard by which the Agencies could rebut the presumption of permissible underwriting? If so, please explain. Please include specific subject areas that could be addressed in such guidance (*e.g.,* criteria used as the basis for a rebuttal, the rebuttal process, etc.).

Question 73. Are there other modifications to the 2013 final rule's requirements for permitted underwriting that would improve the efficiency of the rule's underwriting requirements while adhering to the statutory requirement that such activity be designed not to exceed the reasonably expected near term demands of clients, customers, and counterparties? If so, please describe these modifications as well as how they would improve the efficiency of the underwriting exemption and meet the statutory standard.

Question 74. Under the proposed presumption of compliance for permissible underwriting activities, banking entities would be required to notify the appropriate Agency when a trading limit is exceeded or increased (either on a temporary or permanent basis), in each case in the form and manner as directed by each Agency. Is this requirement sufficiently clear? Should the Agencies provide greater clarity about the form and manner for providing this notice? Should those notices be required to be provided ''promptly'' or should an alternative time frame apply? Alternatively, should each Agency establish its own deadline for when these notices should be provided? Please explain.

Question 75. Should the Agencies instead establish a uniform method of reporting when a trading desk exceeds or increases an internal risk limit (*e.g.,* a standardized form)? Why or why not? If so, please provide as much detail as possible. If not, please describe any impediments or costs to implementing a uniform notification process and explain why such a system may not be efficient or might undermine the effectiveness of the proposed notification requirement.

Question 76: Should the Agencies implement an alternative reporting methodology for notifying the appropriate Agency when a trading limit is exceeded or increased that would apply solely in the case of a banking entity's obligation to report such occurrences to a market regulator? For example, instead of an affirmative notice requirement, should such banking entities be required to make and keep a detailed record of each instance as part of its books and records, and to provide such records to SEC or CFTC staff promptly upon request or during an examination? Why or why not? As an additional alternative, should banking entities be required to escalate notices of limit exceedances or changes internally for further inquiry and determination as to whether notice should be given to the applicable market regulator, using objective factors provided by the rule, be a more appropriate process for these banking entities? Why or why not? If such an approach would be more appropriate, what objective factors should be used to determine when notice should be given to the applicable regulator? Please be as specific as possible.

Question 77. Should the Agencies specify notice and response procedures in connection with an Agency determination that the presumption pursuant to § ____.4(a)(8)(iv) is rebutted? Why or why not? If so, what type of procedures should they specify? For example, should the notice and response procedures be similar to those in § ____.3(g)(2)? If not, what other approach would be appropriate?

c. Compliance Program and Other Requirements

The underwriting exemption in the 2013 final rule requires that a banking entity establishes and implements, maintains, and enforces a compliance program, as required by subpart D, that is reasonably designed to ensure compliance with the requirements of the exemption. Such compliance program is required to include reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing: (i) The products, instruments, or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities; (ii) limits for each trading desk, based on the nature and amount of the trading desk's underwriting activities, including the reasonably expected near term demands of clients, customers, or counterparties, based on certain factors; (iii) internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and (iv) authorization procedures, including escalation procedures that require review and approval of any trade that would exceed one or more of a trading desk's limits, demonstrable analysis of the basis for any temporary or permanent increase to one or more of a trading desk's limits, and independent review (*i.e.,* by risk managers and compliance officers at the appropriate level independent of the trading desk) of such demonstrable analysis and approval.

Banking entities and others have stated that the compliance program requirements of the underwriting exemption are overly complex and burdensome. The Agencies generally believe the compliance program requirements play an important role in facilitating and monitoring a banking entity's compliance with the exemption. However, with the benefit of experience, the Agencies also believe those requirements can be appropriately tailored to the scope of the underwriting activities conducted by each banking entity.

Specifically, the Agencies are proposing a tiered approach to the underwriting exemption's compliance program requirements so as to make them commensurate with the size, scope, and complexity of the relevant banking entity's trading activities and business structure. Consistent with the

2013 final rule, a banking entity with significant trading assets and liabilities would continue to be required to establish, implement, maintain, and enforce a comprehensive internal compliance program as a condition for relying on the underwriting exemption. However, the Agencies propose to eliminate the exemption's compliance program requirements for banking entities that have moderate or limited trading assets and liabilities.[101]

The proposed removal of the exemption's compliance program requirements for banking entities that do not have significant trading assets and liabilities would not relieve those banking entities of the obligation to comply with the prohibitions on proprietary trading, and the other requirements of the exemption for underwriting activities, as set forth in section 13 of the BHC Act and the 2013 final rule, both as currently written and as proposed to be amended. However, eliminating the compliance program requirements as a condition to being able to rely on the underwriting exemption should provide these banking entities that do not have significant trading assets and liabilities an appropriate amount of flexibility to tailor the means by which they seek to ensure compliance with the underlying requirements of the exemption for underwriting activities, and to allow them to structure their internal compliance measures in a way that takes into account the risk profile and underwriting activity of the particular trading desk. This proposed change would also be consistent with the proposed modifications to the general compliance program requirements for these banking entities under § ____.20 of the 2013 final rule, discussed further below in this **SUPPLEMENTARY INFORMATION** section.

The Agencies understand that banking entities that do not have significant trading assets and liabilities can incur significant costs to establish, implement, maintain, and enforce the compliance program requirements contained in the 2013 final rule. In some instances, those costs may be disproportionate to the banking entity's trading activity and risk. Accordingly, eliminating the compliance program requirements for banking entities that do not have significant trading assets and liabilities may reduce costs that are passed on to investors and increase capital formation without materially impacting the rule's ability to ensure that the objectives set forth in section 13 of the BHC Act are satisfied.[102]

The Agencies request comment on the proposed revisions to the exemption for the underwriting activities compliance program requirement. In particular, the Agencies request comment on the following questions:

Question 78. Would the proposed tiered compliance approach based on a banking entity's trading assets and liabilities appropriately balance the costs and benefits for banking entities that do not have significant trading assets and liabilities? Why or why not? If so, how? If not, what other approach would be more appropriate?

Question 79. Should the Agencies simplify and streamline the exemption for underwriting activities compliance requirements for banking entities with significant trading assets and liabilities? If so, please explain.

Question 80. Do commenters agree with the proposal to have the underwriting exemption specific compliance program requirements apply only to banking entities with significant trading assets and liabilities? Why or why not?

Question 81. In addition to the proposed changes to the underwriting exemption, are there any technical corrections the Agencies should make to § ____.4(a), such as to eliminate redundant or duplicative language or to correct or refine certain cross-references? If so, please explain.

d. Market-Making Activities

Section 13(d)(1)(B) of the BHC Act contains an exemption from the prohibition on proprietary trading for the purchase, sale, acquisition, or disposition of securities, derivatives, contracts of sale of a commodity for future delivery, and options on any of the foregoing in connection with market making-related activities, to the extent that such activities are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.[103] Section____.4(b) of the 2013 final rule implements the statutory exemption for market making-related activities and sets forth the requirements that all banking entities must meet in order to rely on the exemption. Among other things, the 2013 final rule requires that:

- The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;
- The amount, types, and risks of the financial instruments in the trading desk's market maker inventory are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, as required by the statute and based on certain factors and analysis specified in the rule;
- The banking entity has established and implements, maintains, and enforces an internal compliance program that is reasonably designed to ensure its compliance with the market making exemption, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and assessing certain specified factors;[104]
- To the extent that any required limit[105] established by the trading desk is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;
- The compensation arrangements of persons performing market making-related activities are designed not to reward or incentivize prohibited proprietary trading; and
- The banking entity is licensed or registered to engage in market making-related activities in accordance with applicable law.

When adopting the 2013 final rule, the Agencies endeavored to balance two goals of section 13 of the BHC Act: To allow market making to take place, which is important to well-functioning and liquid markets as well as the economy, and simultaneously to prohibit proprietary trading unrelated to market making or other permitted activities, consistent with the statute.[106]

[101] Under the 2013 final rule, the compliance program requirement in § ____.4(a)(2)(iii) is part of the compliance program required by subpart D, but is specifically used for purposes of complying with the exemption for underwriting activity.

[102] Under the proposal, the compliance program requirements that are specific for the purposes of complying with the exemption for underwriting activities in § ____.4(a) would remain unchanged for banking entities with significant trading assets and liabilities, although the requirements related to limits for each trading desk would be moved (but not modified) into new § ____.4(a)(8)(i) as part of the proposed presumption of compliance.

[103] 12 U.S.C. 1851(d)(1)(B).

[104] *See* 79 FR at 5612.

[105] *See id.* at 5615.

[106] *See id.* at 5576. In addition, staffs from some of the Agencies have analyzed the liquidity of the corporate bond market in the time since the 2013 final rule was adopted. For example, Federal Reserve Board staff have prepared quarterly reports

To accomplish these goals the Agencies adopted a comprehensive, multi-faceted approach. In the several years since the adoption of the 2013 final rule, however, the Agencies have observed that the significant compliance requirements and lack of clear bright lines in the regulation may unnecessarily constrain market making,[107] and the Agencies believe some of the requirements are unnecessary to prevent the type of trading activities that the rule was designed to prohibit.

As described in further detail below, the Agencies are proposing to tailor, streamline, and clarify the requirements that a banking entity must satisfy to avail itself of the market making exemption. Similar to the proposed underwriting exemption,[108] the Agencies are proposing to modify the market making exemption by providing a clearer way to measure and satisfy the statutory requirement that market making-related activity be designed not to exceed the reasonably expected near term demand of clients, customers, or counterparties. Specifically, the proposal would establish a presumption, available to banking entities both with and without significant trading assets and liabilities, that trading within internally set risk limits satisfies the statutory requirement that permitted market making-related activities must be designed not to exceed RENTD. In addition, the Agencies also are proposing to tailor the market making exemption's compliance program requirements to the size, complexity, and type of activity conducted by the banking entity by making those requirements applicable only to banking entities with significant trading assets and liabilities.

Based on feedback the Agencies have received, banking entities that do not have significant trading assets and liabilities can incur substantial costs to establish, implement, maintain, and enforce the compliance program requirements in the 2013 final rule, notwithstanding the lower level of such banking entities' trading activities.[109] Accordingly, the Agencies believe that the proposed revisions to the market making exemption would provide banking entities that do not have significant trading assets and liabilities with more flexibility to meet customer demands and facilitate robust trading markets, while continuing to safeguard against trading activity that could threaten the safety and soundness of banking entities and the financial stability of the United States by more appropriately aligning the associated compliance obligations with the size of banking entities' trading activities.

e. RENTD Limits and Presumption of Compliance

As described above, the statutory exemption for market making-related activities in section 13(d)(1)(B) of the BHC Act requires that such activities be designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.[110] Consistent with the statute, § ____.4(b)(2)(ii) of the 2013 final rule's market making exemption requires that the amount, types, and risks of the financial instruments in the trading desk's market maker inventory be designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on certain market factors and analysis.[111]

The 2013 final rule provides two factors for assessing whether the amount, types, and risks of the financial instruments in the trading desk's market maker inventory are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties. Specifically, these factors are: (i) The liquidity, maturity, and depth of the market for the relevant type of financial instrument(s), and (ii) demonstrable analysis of historical customer demand, current inventory of financial instruments, and market and other factors regarding the amount, types, and risks of or associated with positions in financial instruments in which the trading desk makes a market, including through block trades. Under § ____.4(b)(2)(iii)(C) of the 2013 final rule, a banking entity must account for these considerations when establishing risk and inventory limits for each trading desk.

The Agencies' experience implementing the 2013 final rule has indicated that the approach the Agencies have taken to give effect to the statutory standard of reasonably expected near term demands of clients, customers, or counterparties may be overly broad and complex, and also may inhibit otherwise permissible market making-related activity. In particular, the Agencies have received feedback as part of implementing the rule that compliance with the factors in the rule can be complex and costly.[112] For example, banking entities have communicated that they must engage in a number of complex and intensive analyses to meet the "demonstrable analysis" requirement under § ____.4(b)(2)(ii)(B) and may still be unable to gain comfort that their bona fide market making-related activity meets these factors. Finally, the Agencies' experience implementing the rule also indicates that the requirements of the 2013 final rule do not provide bright line conditions under which trading can clearly be classified as permissible market making.

Accordingly, the Agencies are seeking comment on a proposal to implement this key statutory factor in a manner designed to provide banking entities and the Agencies with greater certainty and clarity about what activity constitutes permissible market making pursuant to the exemption. The Agencies are proposing to establish the articulation and use of internal risk limits as a key mechanism for conducting trading activity in accordance with the rule's market making exemption.[113] In particular, the proposal would provide that the purchase or sale of a financial instrument by a banking entity shall be presumed to be designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on the liquidity, maturity, and depth of the market for the relevant types of financial instrument, if the banking entity establishes internal risk limits for each trading desk, subject to certain conditions, and implements, maintains, and enforces those limits, such that the risk of the financial instruments held by the trading desk does not exceed such limits. The Agencies believe that this approach would allow for a clearer application of these exemptions, and would provide firms with more flexibility and certainty in conducting market making-related activities.

Under the proposal, all banking entities, regardless of their volume of

to monitor market-level liquidity in corporate bond markets since 2014. *See https://www.federalreserve.gov/foia/corporate-bond-liquidity-reports.htm. See also* Report to Congress: Access to Capital and Market Liquidity, SEC Division of Economic and Risk Analysis staff, *https://www.sec.gov/files/access-to-capital-and-market-liquidity-study-dera-2017.pdf* ("Access to Capital and Market Liquidity").

[109] *Id.*

[110] 12 U.S.C. 1851(d)(1)(B).

[111] *See* 2013 final rule § ____.4(b)(2)(iii).

[112] *See supra* Part I.A.

[113] As a consequence of these changes to focus on risk limits, many of the requirements of the 2013 final rule relating to risk limits associated with market making-related activity have been incorporated into this requirement and modified or deleted as appropriate in this section of the proposal.

trading assets and liabilities, would be able to voluntarily avail themselves of the presumption of compliance with the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act by establishing and complying with internal risk limits. Specifically, the proposal would provide that a banking entity would establish internal risk limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market making-related activities, on the:

(1) Amount, types, and risks of its market maker positions;

(2) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(3) Level of exposures to relevant risk factors arising from its financial exposure; and

(4) Period of time a financial instrument may be held.

Banking entities utilizing this presumption would be required to maintain internal policies and procedures for setting and reviewing desk-level risk limits in a manner consistent with the statute.[114] The proposed approach would not require that a banking entity's risk limits be based on any specific or mandated analysis, as required under the 2013 final rule. Rather, a banking entity would establish the risk limits according to its own internal analyses and processes around conducting its market making activities in accordance with section 13(d)(1)(B).[115]

The proposal would require a banking entity to promptly report to the appropriate Agency when a trading desk exceeds or increases its internal risk limits. A banking entity would also be required to report to the appropriate Agency any temporary or permanent increase in an internal risk limit. In the case of both reporting requirements (*i.e.,* notice of an internal risk limit being exceeded and notice of an increase to the limit), the notice would be submitted in the form and manner as directed by the applicable Agency.

As noted, a banking entity would not be required to adhere to any specific, pre-defined requirements for the limit-setting process beyond the banking entity's own ongoing and internal assessment of the amount of activity that is required to conduct market making activity, including to reflect the banking entity's ongoing and internal assessment of the reasonably expected near term demands of clients, customers, or counterparties. The proposal would, however, provide that internal risk limits established by a banking entity shall be subject to review and oversight by the appropriate Agency on an ongoing basis. Any review of such limits would assess whether or not those limits are established based on the statutory standard—*i.e.,* the trading desk's reasonably expected near term demands of clients, customers, or counterparties on an ongoing basis, based on the nature and amount of the trading desk's market making-related activities. So long as a banking entity has established and implements, maintains, and enforces such limits, the proposal would presume that all trading activity conducted within the limits meets the requirements that the market making activity be based on the reasonably expected near term demands of clients, customers, or counterparties. The Agencies would expect to closely monitor and review any instances of a banking entity exceeding a risk limit as well as any temporary or permanent increase to a trading desk limit.

Under the proposal, the presumption of compliance for permissible market making-related activities may be rebutted by the Agency if the Agency determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the trading desk's reasonably expected near term demands of clients, customers, or counterparties on an ongoing basis. The Agency would provide notice of any such determination to the banking entity in writing.

The following is an example of the presumption of compliance for permissible market making-related activities. A transport company customer may seek to hedge its long-term exposure to price fluctuations in fuel by asking a banking entity to create a structured ten-year fuel swap with a notional amount of $1 billion because there is no liquid market for this type of swap. A trading desk at the banking entity that makes a market in energy swaps may respond to this customer's hedging needs by executing a custom fuel swap with the customer. If the risk resulting from activities related to the transaction does not exceed the internal risk limits for the trading desk that makes a market in energy swaps, the banking entity shall be presumed to be engaged in permissible market making-related activity that is designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties. Moreover, if assuming the position would result in an exposure exceeding the trading desk's limits, the banking entity could increase the risk limit in accordance with its internal policies and procedures for reviewing and increasing risk limits so long as the increase was consistent with meeting the reasonably expected near term demands of clients, customers, and counterparties.

The Agencies request comment on the proposed addition of a presumption that trading within internally set risk limits satisfies the statutory requirement that permitted market making-related activities be designed not to exceed the reasonably expected near-term demands of clients, customers, or counterparties. In particular, the Agencies request comment on the following questions:

Question 82. Is the proposed presumption of compliance for transactions that are within internally set risk limits sufficiently clear? If not, what changes would further clarify the rule? Is there another approach that would be more appropriate?

Question 83. Would the proposed approach—namely the reliance on internally set limits based on RENTD—adequately eliminate the need for a definition for ''market maker inventory?'' Why or why not?

Question 84. How would the proposed approach, as it relates to the establishment and reliance on internal trading limits, impact the liquidity of particular markets?

Question 85. How would the proposed approach, as it relates to the establishment and reliance on internal trading limits, impact the underlying objectives of section 13 of the BHC Act and the 2013 final rule? For example, how should the Agencies assess internal trading limits and any changes in them?

Question 86. By proposing an approach that permits banking entities to rely on internally set limits to comply

[114] Under the proposal, banking entities with significant trading assets and liabilities would continue to be required to establish internal risk limits for each trading desk as part of the market making compliance program requirement in § ____.4(b)(2)(iii)(C), the elements of which would cross-reference directly to the requirement in proposed § ____.4(b)(6)(i). Banking entities without significant trading assets and liabilities would no longer be required to establish a compliance program that is specific for the purposes of complying with the exemption for market making-related activity, but would need to establish and implement, maintain, and enforce these limits if they chose to utilize the proposed presumption of compliance with respect to the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act.

[115] The Agencies expect that the risk and position limits metric that is already required for certain banking entities under the 2013 final rule (and would continue to be required under the Appendix to the proposal) would help banking entities and the Agencies to manage and monitor the market making activities of banking entities subject to the metrics reporting and recordkeeping requirements of the Appendix. *See infra* Part III.E.2.*i*.i.

with the statutory RENTD requirement, the rule would no longer expressly require firms to, among other things, conduct a demonstrable analysis of historical customer demand, current inventory of financial instruments, and market and other factors regarding the amount, types, and risks of or associated with positions in financial instruments in which the trading desk makes a market, including through block trades. Do commenters agree with the revised approach? What are the costs and benefits of eliminating these requirements?

Question 87. Would the market making exemption, as proposed, present any problems for a trading desk that makes a market in derivatives? Are there any changes the Agencies could make to the proposal to clarify how the market making exemption applies to trading desks that make a market in derivatives?

Question 88. Would the proposal's approach to permissible market making-related activities effectively implement the statutory exemption? Why or why not? Would this approach improve the ability of banking entities to engage in market making relative to the 2013 final rule? If not, what approach would be better? Please explain.

Question 89. Does the proposed reliance on using a trading desk's internal risk limits to comply with the statutory RENTD requirement in section 13(d)(1)(B) of the BHC Act present opportunities to evade the overall prohibition on proprietary trading? If so, how? Please be as specific as possible. Additionally, please provide any changes to the proposal that might address such potential circumvention. Alternatively, please explain whether the proposal to rely on a trading desk's internal risk limits to comply with the statutory RENTD requirement would present opportunities to evade the prohibition on proprietary trading.

Question 90. Do banking entities require greater clarity about how to set their internal risk limits for permissible market making-related activity? If so, what additional information would be useful? Please explain.

Question 91. Should any additional guidance or information be provided to explain the process and standard by which the Agencies could rebut the presumption of permissible market making, including specific subject areas that could be addressed in such guidance (*e.g.,* criteria used as the basis for a rebuttal, the rebuttal process, etc.)? If so, please explain.

Question 92. Are there other modifications to the 2013 final rule's requirements for permitted market making that would improve the efficiency of the rule's requirements while adhering to the statutory requirement that such activity be designed not to exceed the reasonably expected near term demands of clients, customers, and counterparties? If so, please describe these modifications as well as how they would improve the efficiency of the rule and meet the statutory standard.

Question 93. Under the proposed presumption of compliance for permissible market making-related activities, banking entities would be required to notify the appropriate Agency when a trading limit is exceeded or increased (either on a temporary or permanent basis), in each case in the form and manner as directed by each Agency. Is this requirement sufficiently clear? Should the Agencies provide greater clarity about the form and manner for providing this notice? Should those notices be required to be provided ''promptly'' or should an alternative timeframe apply? Alternatively, should each Agency establish its own deadline for when these notices should be provided? Please explain.

Question 94. Should the Agencies instead establish a uniform method of reporting when a trading desk exceeds or increases an internal risk limit (*e.g.,* a standardized form)? Why or why not? If yes, please provide as much detail as possible. If not, please describe any impediments or costs to implementing a uniform notification process and explain why such a system may not be efficient or might undermine the effectiveness of the proposed notification requirement.

Question 95: Should the Agencies implement an alternative reporting methodology for notifying the appropriate Agency when a trading limit is exceeded or increased that would apply solely in the case of a banking entity's obligation to report such occurrences to a market regulator? For example, instead of an affirmative notice requirement, should such banking entity instead be required to make and keep a detailed record of each instance as part of its books and records, and to provide such records to SEC or CFTC staff promptly upon request or during an examination? Why or why not? As an additional alternative, should banking entities be required to escalate notices of limit exceedances or changes internally for further inquiry and determination as to whether notice should be given to the applicable market regulator, using objective factors provided by the rule? Why or why not? If such an approach would be more appropriate, what objective factors should be used to determine when notice should be given to the applicable regulator? Please be as specific as possible.

Question 96. Should the Agencies specify notice and response procedures in connection with an Agency determination that the presumption pursuant to § ____.4(b)(6)(iv) is rebutted? Why or why not? If so, what type of procedures should they specify? For example, should the notice and response procedures be similar to those in § ____.3(g)(2)? If not, what other approach would be appropriate?

f. Compliance Program and Other Requirements

The market making exemption in the 2013 final rule requires that a banking entity establish and implement, maintain, and enforce a compliance program, as required by subpart D, that is reasonably designed to ensure compliance with the requirements of the exemption. Such a compliance program is required to include reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing: (i) The financial instruments each trading desk stands ready to purchase and sell in accordance with the exemption for market making-related activities; (ii) the actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C), the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and inventory; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective; (iii) limits for each trading desk, based on the nature and amount of the trading desk's market making activities, including the reasonably expected near term demands of clients, customers, or counterparties; (iv) internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and (v) authorization procedures, including escalation procedures that require review and approval of any trade that would exceed one or more of a trading desk's limits, demonstrable analysis of the basis for any temporary or permanent increase to one or more of a trading desk's limits, and independent review (*i.e.,* by risk managers and compliance officers at the appropriate level independent of the trading desk) of such demonstrable analysis and approval.

Banking entities and others have stated that the compliance program requirements of the market making exemption can be overly complex and burdensome. The Agencies generally believe the compliance program requirements play an important role in facilitating and monitoring a banking entity's compliance with the exemption. However, with the benefit of time and experience, the Agencies believe it is appropriate to tailor those requirements to the scope of the market making-related activities conducted by each banking entity.

Specifically, the Agencies are proposing a tiered approach to the market making exemption's compliance program requirements so as to make them commensurate with the size, scope, and complexity of the relevant banking entity's activities and business structure. Consistent with the 2013 final rule, a banking entity with significant trading assets and liabilities would continue to be required to establish, implement, maintain, and enforce a comprehensive internal compliance program as a condition for relying on the market making exemption. However, the Agencies propose to eliminate the exemption's compliance program requirements for banking entities that have moderate or limited trading assets and liabilities.[116]

The proposed removal of the exemption's compliance program requirements for banking entities that do not have significant trading assets and liabilities would not relieve those banking entities of the obligation to comply with the prohibitions on proprietary trading, and the other requirements of the exemption for market making-related activities, as set forth in section 13 of the BHC Act and the 2013 final rule, both as currently written and as proposed to be amended. However, eliminating the compliance program requirements as a condition to being able to rely on the market making exemption should provide these banking entities that do not have significant trading assets and liabilities an appropriate amount of flexibility to tailor the means by which they seek to ensure compliance with the underlying requirements of the exemption for market making-related activities, and to allow them to structure their internal compliance measures in a way that takes into account the risk profile and market making activity of the particular trading desk.

As noted in the discussion pertaining to the underwriting exemption,[117] banking entities that do not have significant trading assets and liabilities can incur significant costs to establish, implement, maintain, and enforce the compliance program requirements contained in the 2013 final rule. In some instances, those costs may be disproportionate to the banking entity's trading activity and risk. Accordingly, eliminating the compliance program requirements for banking entities that do not have significant trading assets and liabilities may reduce costs that are passed on to investors and increase liquidity without materially impacting the rule's ability to ensure that the objectives set forth in section 13 of the BHC Act are satisfied.[118]

The Agencies request comment on the proposed revisions to the exemption for market making-related activities compliance program requirement. In particular, the Agencies request comment on the following questions:

Question 97. Would the proposed tiered compliance approach based on a banking entity's trading assets and liabilities appropriately balance the costs and benefits for banking entities that do not have significant trading assets and liabilities? Why or why not?

Question 98. Should the Agencies make specific changes to simplify and streamline the compliance requirements of the exemption for market making-related activities for banking entities with significant trading assets and liabilities? If so, how?

Question 99. Do commenters agree with the proposal to have the market making exemption specific compliance program requirements apply only to banking entities with significant trading assets and liabilities? Why or why not?

Question 100. In addition to the proposed changes to the market making exemption, are there any technical corrections the Agencies should make to § ____.4(b), such as to eliminate redundant or duplicative language or to correct or refine certain cross-references? If so, please explain.

g. Loan-Related Swaps

The Agencies have received inquiries—typically from smaller banking entities that are not subject to the market risk capital rule and are not required to register as dealers—as to the treatment of certain swaps entered into with a customer in connection with a loan (''loan-related swap'').[119] These loan-related swaps are financial instruments under the 2013 final rule and would also be financial instruments under the proposal. In addition, if the proposed accounting prong of the trading account definition is adopted, any derivative transaction would constitute proprietary trading pursuant to the definition of ''trading account'' if it were recorded at fair value on a recurring basis under applicable accounting standards. The Agencies believe it is likely that loan-related swaps would be considered proprietary trading on this basis. Accordingly, for the transaction to be permissible, a banking entity would need to rely on an applicable exclusion from the definition of proprietary trading or exemption in the implementing regulations.

In a loan-related swap transaction, a banking entity enters into a swap with a customer in connection with a customer's loan and contemporaneously offsets the swap with a third party. The swap with the loan customer is directly related to the terms of the customer's loan, such as a term loan, revolving credit facility, or other extension of credit. A common example of a loan-related swap begins with a banking entity offering a loan to a customer. The banking entity seeks to make a floating-rate loan to reduce interest rate risk, but the customer would prefer a fixed-rate loan. To achieve the desired result, the banking entity makes a floating-rate loan to the customer and contemporaneously or nearly contemporaneously enters into an interest rate swap with the same customer and an offsetting swap with another counterparty. As a result, the customer receives economics similar to a fixed-rate loan. The banking entity has offset its market risk associated with the customer-facing swap but retains counterparty risk from both swaps.

The inquiries received by the Agencies have asked whether the loan-related swap and the offsetting hedging swap would be permissible under the

[116] Under the 2013 final rule, the compliance program requirement in § ____.4(b)(2)(iii) is part of the compliance program required by subpart D, but is specifically used for purposes of complying with the exemption for market making-related activity.

[117] *See supra* Part III.B.2 of this **SUPPLEMENTARY INFORMATION** section.

[118] Under the proposal, the compliance program requirements that are specific for the purposes of complying with the exemption for market making-related activities in § ____.4(b) would remain unchanged for banking entities with significant trading assets and liabilities, although the requirements related to limits for each trading desk would be moved (but not modified) into new § ____.4(b)(6)(i) as part of the proposed presumption of compliance.

[119] In the case of national banks, a loan-related swap is considered to be a customer-driven derivatives transaction. *See* 12 U.S.C 24 (Seventh). *See also* OCC, Activities Permissible for National Banks and Federal Savings Associations, Cumulative (Oct. 2017), *available at https://www.occ.gov/publications/publications-by-type/other-publications-reports/pub-other-activities-permissible-october-2017.pdf.*

exemption for market making related activities.[120] In particular, some banking entities enter into these swaps relatively infrequently and, as a result, have asked whether such activity could satisfy the requirement of the exemption in the 2013 final rule that the trading desk using the exemption routinely stands ready to purchase and sell the relevant type of financial instrument, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the type of financial instrument.[121]

The Agencies understand that a banking entity's decision to enter into loan-related swaps tends to be situational and dependent on changes in market conditions, as well as the interaction of a number of factors specific to the banking entity, such as the nature of the customer relationship. Under certain market conditions and with certain types of customers, the frequency and use of loan-related swaps may be infrequent, or the frequency may change over time as conditions change. It also may be the case that a banking entity, particularly smaller banking entities, may enter into a limited number of loan-related swaps in one quarter and then not execute another such swap for a year or more. Accordingly, for these swaps it may be appropriate to apply the market making exemption by focusing on the characteristics of the relevant market. For purposes of the exemption, the relevant market may be a market with minimal demand, such as a market with a customer base that demands, for example, only a few loan-related swaps in a year.[122] The Agencies therefore request comment as to whether it is appropriate to permit loan-related swaps to be conducted pursuant to the exemption for market making-related activities where the frequency with which a banking entity executes such swaps is minimal, but the banking entity remains prepared to execute such swaps when a customer makes an appropriate request.[123] For example, a banking entity could meet the requirement to routinely stand ready to make a market in loan-related swaps in the context of its customer base and the relevant market if it is willing and available to engage in loan-related swap transactions with its loan customers to meet the customers' needs in respect of one or more loans entered into with such banking entity throughout market cycles and as such customers' needs change.

In addition, the Agencies note that a banking entity may also infrequently enter into loan-related swaps in both directions because of how those swaps are commonly used by market participants. For example, providing a floating to fixed swap is common in connection with a floating rate loan (as described in the example above), but the reverse (*i.e.,* seeking to convert from a fixed rate to a floating rate) is much less common. Accordingly, the Agencies request comment on whether loan-related swaps should be permitted under the market-making exemption if the banking entity stands ready to make a market in both directions whenever a customer makes an appropriate request, but in practice primarily makes a market in the swaps in one direction because of how the swaps are used.[124]

The Agencies are also considering whether it would be appropriate to exclude loan-related swaps from the definition of proprietary trading for some banking entities or to permit the activity pursuant to an exemption from the prohibition on proprietary trading other than market making. For example, possible additions or alternatives could include a new exclusion in § ____.3(d) or a new exemption in § ____.6 pursuant to the Agencies' exemptive authority under section 13(d)(1)(J) of the BHC Act. In particular, the Agencies request comment regarding a specific option that would add an exclusion in § ____.3(d), which would specify that ''proprietary trading'' under § ____3 does not include the purchase or sale of related swaps by a banking entity in a transaction in which the banking entity purchases (or sells) a swap with a customer and contemporaneously sells (or purchases) an offsetting derivative in connection with a loan or open credit facility between the banking entity and the customer, if the rate, asset, liability or other notional item underlying the swap with the customer is, or is directly related to, a financial term of the loan or open credit facility with the customer (including, without limitation, the loan or open credit facility's duration, rate of interest, currency or currencies, or principal amount) and the offsetting swap is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks of the swap(s) with the customer.

In considering any of these alternatives, the Agencies request comment on what parameters would be appropriate for the exclusion or exemption and what conditions should be considered to address any concerns about whether such an exclusion or exemption could be too broad.

Question 101. Is it appropriate to treat loan-related swaps as permissible under the market making exemption if a banking entity stands ready to enter into such swaps upon request by a customer, but enters into such swaps on an infrequent basis due to the nature of the demand for such swaps? Why or why not?

Question 102. Should a banking entity standing ready to transact in either direction on behalf of customers in such swaps be eligible for the market making exemption if, as a practical matter, it more frequently encounters demand on one side of the market and less frequently encounters demand on the other side for such products? Why or why not?

Question 103. Is the scenario described above for the treatment of loan-related swaps workable? If not, why not? Are there alternative approaches that would be more effective and consistent with the statute?

Question 104. Should the Agencies exclude loan-related swaps from the definition of proprietary trading under § ____.3? Would including loan-related swaps within the definition of the ''trading account'' or ''proprietary trading'' be consistent with the statutory definition of trading account? Why or why not?

Question 105. In the alternative, should the Agencies provide an exclusion for such loan-related swaps under § ____.6? What would be the benefits or drawbacks of each approach? How would permitting such loan-related swaps pursuant to the Agencies' authority under section 13(d)(1)(J) of the BHC Act promote and protect the safety and soundness of banking entities and

[120] The Agencies note that ''market making'' for purposes of the 2013 final rule, including for this proposal, is limited to the context of the 2013 final rule and is not applicable to any other rule, the federal securities laws, or in any other context outside of the 2013 final rule.

[121] *See* 2013 final rule § ____.4(b)(2)(i); 79 FR at 5595–5597.

[122] *See, e.g.,* 79 FR at 5596 (''. . . the Agencies continue to recognize that market makers in highly illiquid markets may trade only intermittently *or at the request of particular customers,* which is sometimes referred to as trading by appointment.'') (emphasis added).

[123] The Agencies understand that, for the reasons described in this section, loan-related swaps present a particular challenge for smaller banking entities that are neither subject to the market risk rule nor registered as dealers. On the other hand, such swaps typically do not present the same challenges for banking entities that are subject to the market risk rule or are registered as dealers because the availability of the market-making exemption is apparent.

[124] This section's focus on market making is provided solely for purpose of the proposal's implementation of section 13 of the BHC Act and does not affect a banking entity's obligation to comply with additional or different requirements under applicable securities, derivatives, banking, or other laws.

the financial stability of the United States? If an exclusion or permitted activity is adopted, should the Agencies limit which banking entities may use the exclusion or permitted activity, and what conditions, if any, should be placed on the types, volume, or other characteristics of the loan-related swaps and the related activity?

Question 106. How should loan-related swaps be defined? What parameters should be used to assess which swaps meet the definition?

Question 107. Should other types of swaps also be addressed in the same manner? For example, should the Agencies provide further guidance, or include in any exclusion or exemption other end-user customer driven swaps used by the customer to hedge commercial risk?

h. Market Making Hedging

During implementation of the 2013 final rule, the Agencies received a number of inquiries regarding the circumstances under which banking entities could elect to comply with market making risk management provisions permitted in § ____.4(b) or alternatively the risk-mitigating hedging requirements under § ____.5. These inquiries generally related to whether a trading desk could treat an affiliated trading desk as a client, customer, or counterparty for purposes of the market making exemption's RENTD requirement; and whether, and under what circumstances, one trading desk could undertake market making risk management activities for one or more other trading desks.

Each trading desk engaging in a transaction with an affiliated trading desk that meets the definition of proprietary trading must rely on one of the exemptions of section 13 of the BHC Act and the 2013 final rule in order for the transaction to be permissible. In one example presented to the Agencies, one trading desk of a banking entity may make a market in a certain financial instrument (*e.g.,* interest rate swaps), and then transfer some of the risk of that instrument (*e.g.,* foreign exchange (''FX'') risk) to a second trading desk (*e.g.,* an FX swaps desk) that may or may not separately engage in market making-related activity. The Agencies request comment as to whether, in such a scenario, the desk taking the risk (in the preceding example, the FX swaps desk) and the market making desk (in the preceding example, the interest rate desk) should be permitted to treat each other as a client, customer, or counterparty for purposes of establishing risk limits or reasonably expected near-term demand levels under the market making exemption.

The Agencies also request comment as to whether each desk should be permitted to treat swaps executed between the desks as permitted market making-related activities of one or both desks if the swap does not cause the relevant desk to exceed its applicable limits and if the swap is entered into and maintained in accordance with the compliance requirements applicable to the desk, without treating the affiliated desk as a client, customer, or counterparty for purposes of establishing or increasing its limits. This approach would be intended to maintain appropriate limits on proprietary trading by not permitting an expansion of a trading desk's market making limits based on internal transactions. At the same time, this approach would be intended to permit efficient internal risk management strategies within the limits established for each desk. The Agencies are also requesting comment on the circumstances in which an organizational unit of an affiliate (''affiliated unit'') of a trading desk engaged in market making-related activities in compliance with § ____.4(b) (''market making desk'') would be permitted to enter into a transaction with the market making desk in reliance on the market making risk management exemption available to the market making desk. In this scenario, to effect such reliance the market making desk would direct the affiliated unit to execute a risk-mitigating transaction on the market making desk's behalf. If the affiliated unit does not independently satisfy the requirements of the market making exemption with respect to the transaction, it would be permitted to rely on the market making exemption available to the market making desk for the transaction if: (i) The affiliated unit acts in accordance with the market making desk's risk management policies and procedures established in accordance with § ____.4(b)(2)(iii); and (ii) the resulting risk mitigating position is attributed to the market making desk's financial exposure (and not the affiliated unit's financial exposure) and is included in the market making desk's daily profit and loss calculation. If the affiliated unit establishes a risk-mitigating position for the market making desk on its own accord (*i.e.,* not at the direction of the market making desk) or if the risk-mitigating position is included in the affiliated unit's financial exposure or daily profit and loss calculation, then the affiliated unit may still be able to comply with the requirements of the risk-mitigating hedging exemption pursuant to § ____.5 for such activity.

The Agencies request comment on the issues identified above. In particular, the Agencies request comment on the following questions:

Question 108. Should the Agencies clarify the ability of banking entities to engage in hedging transactions directly related to market making positions, including multi-desk market making hedging, regardless of which desk undertakes the hedging trades?

Question 109. Have banking entities found that certain restrictions on market making hedging activities under the final rule impede the ability of banking entities to effectively and efficiently engage in such hedging transactions? If so, what specific requirements have proved to be the most problematic?

Question 110. How effective are the existing restrictions on market making hedging activities at reducing risks within a banking entity's investment portfolio? Please explain.

Question 111. Should the Agencies permit banking entities to include affiliate hedging transactions in determining the reasonably expected near-term demand of customers, clients, and counterparties, and in establishing internal risk limits? Why or why not?

Question 112. Would the changes separately proposed to § ____.5 of the 2013 final rule, or other changes to § ____.5, eliminate the need for the additional interpretations described above, for example, because a banking entity could more easily conduct these activities in accordance with the requirements of § ____.5?

3. Section ____.5: Permitted Risk-Mitigating Hedging Activities

a. Section ____.5 of the 2013 Final Rule

Section 13(d)(1)(C) provides an exemption for risk-mitigating hedging activities that are designed to reduce the specific risks to a banking entity in connection with and related to individual or aggregated positions, contracts, or other holdings. Section __.5 of the 2013 final rule implements section 13(d)(1)(C) of the BHC Act.

Section ____.5 of the 2013 final rule provides a multi-faceted approach to implementing the hedging exemption to ensure that hedging activity is designed to be risk-reducing and does not mask prohibited proprietary trading. Risk-mitigating hedging activities must comply with certain conditions for those activities to qualify for the exemption. Generally, a banking entity relying on the hedging exemption must have in place an appropriate internal compliance program that meets specific requirements to support its compliance with the terms of the exemption, and the compensation arrangements of persons performing risk-mitigating hedging activities must be designed not to reward or incentivize prohibited proprietary trading.[125] In addition, the hedging activity itself must meet specified conditions; for example, at inception, it must be designed to reduce or otherwise significantly mitigate and must demonstrably reduce or otherwise significantly mitigate one or more specific, identifiable risks arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, and the activity must not give rise to any significant new or additional risk that is not itself contemporaneously hedged.[126] Finally, § ____.5 establishes certain documentation requirements with respect to the purchase or sale of financial instruments made in reliance of the risk-mitigating exemption under certain circumstances.[127]

b. Proposed Amendments to Section ____.5

i. Correlation Analysis for Section ____.5(b)(1)(iii)

Section ____.5(b)(1)(iii) of the 2013 final rule requires a correlation analysis as part of the broader analysis of whether a hedging position, technique, or strategy (1) may reasonably be expected to reduce or otherwise significantly mitigate the specific risks being hedged, and (2) demonstrably reduces or otherwise significantly mitigates the specific risks being hedged.

In adopting the 2013 final rule, the Agencies indicated that they expected the banking entity to undertake a correlation analysis that will provide a strong indication of whether a potential hedging position, strategy, or technique will or will not demonstrably reduce the risk it is designed to reduce. The nature and extent of the correlation analysis undertaken would be dependent on the facts and circumstances of the hedge and the underlying risks targeted. If sufficient correlation cannot be demonstrated, then the Agencies expected that such analysis would explain why not and also how the proposed hedging position, technique, or strategy was designed to reduce or significantly mitigate risk and how that reduction or mitigation can be demonstrated.

In the course of implementing § ____.5 of the 2013 final rule, the Agencies have become aware of practical difficulties with the correlation analysis requirement. In particular, banking entities have communicated that the correlation analysis requirement can add delays, costs, and uncertainty, and have questioned the extent to which the required correlation analysis helps to ensure the accuracy of hedging activity or compliance with the requirements of section 13 of the BHC Act.

During implementation, the Agencies have observed that a banking entity may sometimes develop or modify its hedging activities as the risks it seeks to hedge are occurring, and the banking entity may not have enough time to undertake a complete correlation analysis before it needs to put the hedging transaction in place to fully hedge against the risks as they arise. In other cases, the hedging activity, while designed to reduce risk as required by the statute, may not be practical if delays or compliance costs resulting from undertaking a correlation analysis outweigh the benefits of performing the analysis. In addition, the extent to which two activities are correlated and will remain correlated into the future can vary significantly from one position, strategy, or technique to another. Assessing whether a particular hedge is sufficiently correlated to satisfy the correlation requirement of § ____.5(b)(1)(iii) may be difficult, especially if that assessment must be justified after the hedge is entered into (when information that may not have been available earlier may become relevant). Given this uncertainty, banking entities may be hesitant to undertake a risk-mitigating hedge out of concern of inadvertently violating the regulation because the hedge did not satisfy one of the requirements.

Based on the implementation experience of the Agencies and public feedback, the Agencies are proposing to remove the correlation analysis requirement for risk-mitigating hedging activities. The Agencies anticipate that removing this correlation analysis requirement would avoid the uncertainties described above without significantly impacting the conditions that risk-mitigating hedging activities must meet in order to qualify for the exemption. The Agencies also note that section 13 of the BHC Act does not specifically require this correlation analysis. Instead, the statute only provides that a hedging position, technique, or strategy is permitted so long as it is ''. . . designed to reduce the specific risks to the banking entity . . .'' [128] The 2013 final rule added the correlation analysis requirement as a measure intended to ensure compliance with this exemption.

ii. Hedge Demonstrably Reduces or Otherwise Significantly Mitigates Specific Risks for Section ____.5(b)(2)(iv)(B)

Similarly, the requirement in § ____.5(b)(2)(iv)(B) that a risk-mitigating hedging activity demonstrably reduces or otherwise significantly mitigates specific risks is not directly required by section 13(d)(1)(C) of the BHC Act. As noted above, the statute instead requires that the hedge be designed to reduce or otherwise significantly mitigate specific risks. The Agencies believe that this is effective for addressing the relevant risks.

In practice, it appears that the requirement to show that hedging activity demonstrably reduces or otherwise significantly mitigates a specific, identifiable risk that develops over time can be complex and could potentially reduce bona fide risk-mitigating hedging activity. The Agencies recognize that in some circumstances, it may be difficult for banking entities to know with sufficient certainty that a potential hedging activity being considered will continuously demonstrably reduce or significantly mitigate an identifiable risk after it is implemented. For example, unforeseeable changes in market conditions, event risk, sovereign risk, and other factors that cannot be known in advance could reduce or eliminate the otherwise intended hedging benefits. In these events, it would be very difficult, if not impossible, for a banking entity to comply with the continuous requirement to demonstrably reduce or significantly mitigate the identifiable risks. In such cases, a banking entity may determine not to enter into what would otherwise be an effective hedge of foreseeable risks out of concern that the banking entity may not be able to effectively comply with the continuing hedging or mitigation requirement if unforeseen risks occur. Therefore, the proposal would remove the ''demonstrably reduces or otherwise significantly mitigates'' specific risk requirement from § ____.5(b)(1)(iv)(B).[129]

[125] *See* 2013 final rule § ____.5(b)(1) and (3).

[126] *See* 2013 final rule § ____.5(b)(2).

[127] *See* 2013 final rule § ____.5(c).

[128] 12 U.S.C. 1851(d)(1)(C).

[129] For the same reasons, the Agencies are proposing to revise § ____.13(a) of the 2013 final rule (relating to permitted risk-mitigating hedging activities involving acquisition or retention of an ownership interest in a covered fund) to remove the references to covered fund ownership interests

Continued

iii. Reduced Compliance Requirements for Banking Entities that do not have Significant Trading Assets and Liabilities for Section ____.5(b) and (c)

Consistent with the proposed changes relating to the scope of the requirements for banking entities that do not have significant trading assets and liabilities, the Agencies have reassessed the requirements in § ____.5(b) and § ____.5(c) for banking entities that do not have significant trading assets and liabilities. For these firms, the Agencies are proposing to eliminate the requirements for a separate internal compliance program for risk-mitigating hedging under § ____.5(b)(1); certain of the specific requirements of § ____.5(b)(2); the limits on compensation arrangements for persons performing risk-mitigating activities in § ____.5(b)(3); and the documentation requirements for those activities in § ____.5(c). These requirements are overly burdensome and complex for banking entities with moderate trading assets and liabilities. In general, the Agencies expect that banking entities without significant trading assets and liabilities are less likely to engage in the types of trading activities and hedging strategies that would necessitate these additional compliance requirements.

Given these considerations, it appears that removing the requirements for banking entities that do not have significant trading assets and liabilities to comply with the requirements of § ____.5(b) and § ____.5(c) is unlikely to materially increase risks to the safety and soundness of the banking entity or U.S. financial stability. Therefore, the Agencies are proposing to eliminate and modify these requirements for banking entities that do not have significant trading assets and liabilities. In place of those requirements, new § ____.5(b)(2) of the proposal would require that risk-mitigating hedging activities for those banking entities be: (i) At the inception of the hedging activity (including any adjustments), designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including the risks specifically enumerated in the proposal; and (ii) subject to ongoing recalibration, as appropriate, to ensure that the hedge remains designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks. The Agencies anticipate that these tailored requirements for banking entities without significant trading assets and liabilities would effectively implement the statutory requirement that the hedging transactions be designed to reduce specific risks the banking entity incurs. In connection with these proposed changes, the proposal also includes conforming changes to § ____.5(b)(1) and § ____.5(c) of the final 2013 rule to make the requirements of those sections applicable only to banking entities that have significant trading assets and liabilities.

iv. Reduced Documentation Requirements for Banking Entities That Have Significant Trading Assets and Liabilities for Section ____.5(c)

Section ____.5(c) of the 2013 final rule requires enhanced documentation for hedging activity conducted under the risk-mitigating hedging exemption if the hedging is not conducted by the specific trading desk establishing or responsible for the underlying positions, contracts, or other holdings, the risks of which the hedging activity is designed to reduce.[130] The 2013 final rule also requires enhanced documentation for hedges established to hedge aggregated positions across two or more desks. The 2013 final rule recognizes that a trading desk may be responsible for hedging aggregated positions of that desk and other desks, business units, or affiliates. In that case, the trading desk putting on the hedge is at least one step removed from some of the positions being hedged. Accordingly, the 2013 final rule provides that the documentation requirements in § ____.5(c) apply if a trading desk is hedging aggregated positions that include positions from more than one trading desk.[131]

The 2013 final rule also requires enhanced documentation for hedges established by the specific trading desk establishing or directly responsible for the underlying positions, contracts, or other holdings, the risks of which the hedge is designed to reduce, if the hedge is effected through a financial instrument, technique, or strategy that is not specifically identified in the trading desk's written policies and procedures as a product, instrument, exposure, technique, or strategy that the trading desk may use for hedging.[132] The Agencies note that this documentation requirement does not apply to hedging activity conducted by a trading desk in connection with the market making-related activities of that desk or by a trading desk that conducts hedging activities related to the other permissible trading activities of that desk so long as the hedging activity is conducted in accordance with the compliance program for that trading desk.

For banking entities that have significant trading assets and liabilities, the proposal would retain the enhanced documentation requirements for the hedging transactions identified in § ____.5(c)(1) to permit evaluation of the activity. While this documentation requirement results in certain more extensive compliance efforts (as acknowledged by the Agencies when the 2013 final rule was adopted),[133] the Agencies continue to believe this requirement serves an important role to prevent evasion of the requirements of section 13 of the BHC Act and the 2013 final rule.

However, based on the Agencies' experience during the first several years of implementation of the 2013 final rule, it appears that many hedges established by one trading desk for other affiliated desks are often part of common hedging strategies that are used repetitively. In those instances, the regulatory purpose for the documentation requirements of § ____.5(c) of the 2013 final rule, to permit subsequent evaluation of the hedging activity and prevent evasion, is much less relevant. In weighing the significantly reduced regulatory and supervisory relevance of additional documentation of common hedging trades against the complexity of complying with the enhanced documentation requirements, it appears that the documentation requirements are not necessary in those instances. Reducing the documentation requirement for common hedging activity undertaken in the normal course of business for the benefit of one or more other trading desks would also make beneficial risk-mitigating activity more efficient and potentially improve the timeliness of important risk-mitigating hedging activity, the effectiveness of which can be time sensitive.

Accordingly, the Agencies are proposing a new paragraph (c)(4) in § ____.5 that would eliminate the enhanced documentation requirement for hedging activities that meets certain conditions. In excluding a trading desk's common hedging instruments from the enhanced documentation requirements in § ____.5(c), the Agencies seek to distinguish those financial instruments that are commonly used for hedging activities and require the banking entity to have in place appropriate limits so that less common or unusual levels of hedging activity would still be subject to

acquired or retained by the banking entity "demonstrably" reducing or otherwise significantly mitigating the specific, identifiable risks to the banking entity described in that section.

[130] *See* 2013 final rule § ____.5(c)(1)(i).

[131] *See* 2013 final rule § ____.5(c)(1)(iii)

[132] *See* 2013 final rule § ____.5(c)(1)(ii)

[133] 79 FR at 5638–39.

the enhanced documentation requirements. Accordingly, the proposal would provide that compliance with the enhanced documentation requirement would not apply to purchases and sales of financial instruments for hedging activities that are identified on a written list of financial instruments pre-approved by the banking entity that are commonly used by the trading desk for the specific types of hedging activity for which the financial instrument is being purchased or sold. In addition, under the proposal, at the time of the purchase or sale of the financial instruments, the related hedging activity would need to comply with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument, which would be required to be appropriate for the size, types, and risks of the hedging activities commonly undertaken by the trading desk; the financial instruments purchased and sold by the trading desk for hedging activities; and the levels and duration of the risk exposures being hedged. These conditions on the pre-approved limits are intended to provide clarity as to the types and characteristics of the limits needed to comply with the proposal. The Agencies would expect that a banking entity's pre-approved limits should be reasonable and set to correspond to the type of hedging activity commonly undertaken and at levels consistent with the hedging activity undertaken by the trading desk in the normal course.

The Agencies request comment on the proposed revisions to § ____.5 regarding permitted risk-mitigating hedging activities. In particular, the Agencies request comment on the following questions:

Question 113. What factors, if any, should the Agencies consider in determining whether to remove the requirement that a correlation analysis must be used to determine whether a hedging position, technique, or strategy reduces or otherwise significantly mitigates the specific risk being hedged?

Question 114. Is the Agencies' assessment of the complexities of the correlation analysis requirement across the spectrum of hedging activities accurate? Why or why not?

Question 115. How does the requirement to undertake a correlation analysis impact a banking entity's decision on whether to enter into different types of hedges?

Question 116. How does the correlation analysis requirement affect the timing of hedging activities?

Question 117. Does the current requirement that a hedge must demonstrably reduce or otherwise significantly mitigate specific risks lead banking entities to decline to enter into hedging transactions that would otherwise be designed to reduce or otherwise significantly mitigate specific risks arising in connection with identified positions, contracts, or other holdings of the banking entity? If so, under what circumstances?

Question 118. Would reducing the compliance requirements of § ____.5(b) and § ____.5(c) for banking entities that do not have significant trading assets and liabilities reduce compliance costs and increase certainty for these banking entities?

Question 119. Would the proposed reductions in the compliance requirements for risk-mitigating hedging activities by banking entities that do not have significant trading assets and liabilities increase materially the risks to the safety and soundness of the banking entity or U.S. financial stability? Why or why not?

Question 120. Would the proposed exclusion from the enhanced documentation requirements for trading desks that hedge risk of other desks under the circumstances described make risk-mitigating hedging activities more efficient and timely? Why or why not? Should any of the existing documentation requirements be retained for firms without significant trading assets and liabilities? Are there any hedging documentation requirements applicable in other contexts (*e.g.,* accounting) that could be leveraged for the purposes of this requirement? How would the proposed exclusion from the enhanced documentation requirements impact both internal and external compliance and oversight of a banking entity?

Question 121. With respect to the proposed exclusion from enhanced documentation for trading desks that hedge risk of other desks under certain circumstances, are the requirements for a pre-approved list of financial instruments and pre-approved hedging limits reasonable? Should those requirements be modified, expanded, or reduced? If so, how? Should the Agencies provide greater clarity for determining which financial instruments are ''commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold'' for inclusion on the pre-approved list? Similarly, should the Agencies provide greater clarity for determining pre-approved hedging limits?

Question 122: The Agencies have proposed using accounting principles as part of the definition of trading account. Should the Agencies similarly use accounting principles to refer to risk-mitigated hedging activity? For example, should the Agencies provide an exemption for hedging activity that is accounted for under the provisions of ASC 815 (Derivatives and Hedging)? Why or why not? Should the Agencies require entities that engage in risk-mitigating hedging activity measure hedge effectiveness? Why or why not?

4. Section ____.6(e): Permitted Trading Activities of a Foreign Banking Entity

Section 13(d)(1)(H) of the BHC Act [134] permits certain foreign banking entities to engage in proprietary trading that occurs solely outside of the United States (the foreign trading exemption).[135] The statute does not define when a foreign banking entity's trading occurs ''solely outside of the United States.''

a. Permitted Trading Activities of a Foreign Banking Entity

The 2013 final rule includes several conditions on the availability of the foreign trading exemption. Specifically, in addition to limiting the exemption to foreign banking entities where the purchase or sale is made pursuant to paragraph (9) or (13) of section 4(c) of the BHC Act,[136] the 2013 final rule provides that the foreign trading exemption is available only if:

(i) The banking entity engaging as principal in the purchase or sale (including any personnel of the banking entity or its affiliate that arrange, negotiate, or execute such purchase or sale) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal

[134] Section 13(d)(1)(H) of the BHC Act permits trading conducted by a foreign banking entity pursuant to paragraph (9) or (13) of section 4(c) of the BHC Act (12 U.S.C. 1843(c)), if the trading occurs solely outside of the United States, and the banking entity is not directly or indirectly controlled by a banking entity that is organized under the laws of the United States or of one or more States. *See* 12 U.S.C. 1851(d)(1)(H).

[135] This section's discussion of the concept of ''solely outside of the United States'' is provided solely for purposes of the proposal's implementation of section 13(d)(1)(H) of the BHC Act, and does not affect a banking entity's obligation to comply with additional or different requirements under applicable securities, banking, or other laws. Among other differences, section 13 of the BHC Act does not necessarily include the customer protection, transparency, anti-fraud, anti-manipulation, and market orderliness goals of other statutes administered by the Agencies. These other goals or other aspects of those statutory provisions may require different approaches to the concept of ''solely outside of the United States'' in other contexts.

[136] 12 U.S.C. 1843(c)(9), (13). *See* 2013 final rule § ____.6(e)(1)(i) and (ii).

is not located in the United States or organized under the laws of the United States or of any State;

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State;

(iv) No financing for the banking entity's purchase or sale is provided, directly or indirectly, by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State;

(v) The purchase or sale is not conducted with or through any U.S. entity,[137] other than:

(A) A purchase or sale with the foreign operations of a U.S. entity, if no personnel of such U.S. entity that are located in the United States are involved in the arrangement, negotiation or execution of such purchase or sale.

The Agencies also exercised their authority under section 13(d)(1)(J) [138] to allow the following types of purchases or sales to be conducted with a U.S. entity:

(B) A purchase or sale with an unaffiliated market intermediary acting as principal, provided the purchase or sale is promptly cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty; or

(C) A purchase or sale through an unaffiliated market intermediary, provided the purchase or sale is conducted anonymously (*i.e.,* each party to the purchase or sale is unaware of the identity of the other party(ies) to the purchase or sale) on an exchange or similar trading facility and promptly cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty.

The proposal would modify the requirements of the 2013 final rule relating to the foreign trading exemption in a number of ways. Specifically, the proposal would retain the first three requirements of the 2013 final rule, with a modification to the first requirement, and would remove the last two requirements of § ____.6(e)(3). As a result, § ____.6(e)(3), as modified by the proposal, would require that for a foreign banking entity to be eligible for this exemption:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

The proposal would maintain these three requirements in order to ensure that the banking entity (including any relevant personnel) that engages in the purchase or sale as principal or makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or any State. Furthermore, the proposal would retain the 2013 final rule's requirement that the purchase or sale, including any transaction arising from a related risk-mitigating hedging transaction, is not accounted for as principal at the U.S. operations of the foreign banking entity. The proposal would, however, modify the first requirement relative to the 2013 final rule, to replace the requirement that any personnel of the banking entity that arrange, negotiate, or execute such purchase or sale are not located in the United States with one that would restrict only the relevant personnel engaged in the banking entity's decision in the purchase or sale not located in the United States. Under the proposed approach, for purposes of section 13 of the BHC Act and the implementing regulations, the focus of the requirement would be on whether the banking entity that engages in the purchase or sale as principal (including any relevant personnel) is located in the United States. The purpose of this modification is to make clear that some limited involvement by U.S. personnel (*e.g.,* arranging or negotiating) would be consistent with this exemption so long as the principal bearing the risk of a purchase or sale is outside the United States. The proposed modifications would permit a foreign banking entity to engage in a purchase or sale under this exemption so long as the principal risk and actions of the purchase or sale do not take place in the United States for purposes of section 13 and the implementing regulations. The proposal would also eliminate the following two requirements from § ____.6(e), which are referred to as the ''financing prong'' and the ''counterparty prong,'' respectively, in the discussion that follows:

No financing for the banking entity's purchase or sale is provided, directly or indirectly, by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State;

The purchase or sale is not conducted with or through any U.S. entity, other than:

A purchase or sale with the foreign operations of a U.S. entity, if no personnel of such U.S. entity that are located in the United States are involved in the arrangement, negotiation or execution of such purchase or sale.

A purchase or sale with an unaffiliated market intermediary acting as principal, provided the purchase or sale is promptly cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty; or

A purchase or sale through an unaffiliated market intermediary, provided the purchase or sale is conducted anonymously (*i.e.* each party to the purchase or sale is unaware of the identity of the other party(ies) to the purchase or sale) on an exchange or similar trading facility and promptly cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty.

Since the adoption of the 2013 final rule, foreign banking entities have communicated to the Agencies that these requirements have unduly limited their ability to make use of the statutory exemption for proprietary trading and have resulted in an impact on foreign banking entities' operations outside of the United States that these banking entities believe is broader than necessary to achieve compliance with the requirements of section 13 of the BHC Act. In response to these concerns, the Agencies are proposing to remove the financing prong and the counterparty prong, which would focus the key requirements of this exemption on the principal actions and risk of the transaction. In addition, the proposal would remove the financing prong to address concerns that the fungibility of financing has made this requirement difficult to apply in practice in certain circumstances to determine whether particular financing is tied to a

[137] ''U.S. entity'' is defined for purposes of this provision as any entity that is, or is controlled by, or is acting on behalf of, or at the direction of, any other entity that is, located in the United States or organized under the laws of the United States or of any State. *See* 2013 final rule § ____.6(e)(4).

[138] 12 U.S.C. 1851(d)(1)(J).

particular trade. Market participants have raised a number of questions about the financing prong and have indicated that identifying whether financing has been provided by a U.S. affiliate or branch can be exceedingly complex, in particular with respect to demonstrating that financing has not been provided by a U.S. affiliate or branch with respect to a particular transaction. To address the concerns raised by foreign banking entities and other market participants, the proposal would amend the foreign trading exemption to focus on the principal risk of a transaction and the location of the actions as principal and trading decisions, so that a foreign banking entity would be able to make use of the exemption so long as the risk of the transaction is booked outside of the United States. While the Agencies recognize that a U.S. branch or affiliate that extends financing could bear some risks, the Agencies note that the proposed modifications to the foreign trading exemption are designed to require that the principal risks of the transaction occur and remain solely outside of the United States. For example, the exemption would continue to provide that the purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, may not be accounted for as principal directly or indirectly on a consolidated basis by any U.S. branch or affiliate.

Similarly, foreign banking entities have communicated to the Agencies that the counterparty prong has been overly difficult and costly for banking entities to monitor, track, and comply with in practice. As a result, the Agencies are proposing to remove the requirement that any transaction with a U.S. counterparty be executed solely with the foreign operations of the U.S. counterparty (including the requirement that no personnel of the counterparty involved in the arrangement, negotiation, or execution may be located in the United States) or through an unaffiliated intermediary and an anonymous exchange in order to materially reduce the reported inefficiencies associated with rule compliance. In addition, market participants have indicated that this requirement has in practice led foreign banking entities to overly restrict the range of counterparties with which transactions can be conducted, as well as disproportionately burdened compliance resources associated with those transactions, including with respect to counterparties seeking to do business with the foreign banking entity in foreign jurisdictions.

As a result, the Agencies propose to remove the counterparty prong. The proposal would focus the requirements of the foreign trading exemption on the location of a foreign banking entity's decision to trade, action as principal, and principal risk of the purchase or sale. This proposed focus on the location of actions and risk as principal is intended to align with the statute's definition of ''proprietary trading'' as ''engaging as principal for the trading account of the banking entity.''[139] Consistent with that approach, the focus of the proposed approach would be on the activities of a foreign banking entity as principal in the United States. The statute exempts the trading of foreign banking entities that is conducted ''solely'' outside the United States. Under the proposal, the relevant inquiry would focus on whether the principal risk of the transaction is located or held outside of the United States and the location of the trading decision and banking entity acting as principal. The proposal would remove the requirements of § ____.6(e)(3) that are less directly relevant to these considerations.

Information provided by foreign banking entities has demonstrated that few trading desks of foreign banking entities have utilized the foreign trading exemption in practice. This information has raised concerns that the current requirements for the exemption may be overly restrictive of permitted activities. Accordingly, the proposal would modify the exemption under the 2013 final rule to make the requirements more workable, so that it may be available to foreign banking entities trading solely outside the United States.

The Agencies request comment as to whether the proposed modifications to the foreign trading exemption would result in disadvantages for U.S. banking entities competing with foreign banking entities. The statute contains an exemption to allow foreign banking entities to engage in trading activity that is solely outside the United States. The statute also contains a prohibition on proprietary trading for U.S. banking entities regardless of where their activity is conducted. The statute generally prohibits U.S. banking entities from engaging in proprietary trading because of the perceived risks of those activities to U.S. banking entities and the U.S. economy. The Agencies believe that this means that the prohibition on proprietary trading is intended make U.S. banking entities safer and stronger, and reduce risks to U.S. financial stability, and that the foreign operations of foreign banking entities should not be subject to the prohibition on proprietary trading for their activities overseas. The proposal would implement this distinction with respect to transactions that occur outside of the United States where the principal risk is booked outside of the United States and the actions and decisions as principal occur outside of the United States by foreign operations of foreign banking entities. Under the statute and the rulemaking framework, U.S. banking entities would be able to continue trading activities that are consistent with the statute and regulation, including permissible market-making, underwriting, and risk-mitigating hedging activities as well as other types of trading activities such as trading on behalf of customers. U.S. banking entities are permitted to engage in these trading activities as exemptions from the general prohibition on proprietary trading under the statute. Moreover, and consistent with the statute, the proposal seeks to streamline and reduce the requirements of several of these key exemptions to make them more workable and available in practice to all banking entities subject to section 13 of the BHC Act and the implementing regulations.[140]

Consistent with the 2013 final rule, the exemption under the proposal would not exempt the U.S. or foreign operations of U.S. banking entities from having to comply with the restrictions and limitations of section 13 of the BHC Act. Thus, the U.S. and foreign operations of a U.S. banking entity that is engaged in permissible market making-related activities or other permitted activities may engage in those transactions with a foreign banking entity that is engaged in proprietary trading in accordance with the exemption under § ____.6(e) of the 2013 final rule, so long as the U.S. banking entity complies with the requirements of § ____.4(b), in the case of market making-related activities, or other relevant exemption applicable to the U.S. banking entity. The proposal, like the 2013 final rule, would not impose a duty on the foreign banking entity or the U.S. banking entity to ensure that its counterparty is conducting its activity in conformance with section 13 and the implementing regulations. Rather, that

[139] *See* 12 U.S.C. 1851(h)(4) (emphasis added).

[140] At the same time, however, the Agencies recognize the possibility that there may also be risks to U.S. banking entities and the U.S. economy as a result of allowing foreign banking entities to conduct a broader range of activities within the United States. For example, and as discussed above, the Agencies are requesting comment on whether the proposal would give foreign banking entities a competitive advantage over U.S. banking entities with respect to identical trading activity in the United States.

obligation would be on each party subject to section 13 to ensure that it is conducting its activities in accordance with section 13 and the implementing regulations.

The proposal's exemption for trading of foreign banking entities outside the United States could potentially give foreign banking entities a competitive advantage over U.S. banking entities with respect to permitted activities of U.S. banking entities because foreign banking entities could trade directly with U.S. counterparties without being subject to the limitations associated with the market-making or other exemptions under the rule. This competitive disparity in turn could create a significant potential for regulatory arbitrage. In this respect, the Agencies seek to mitigate this concern through other changes in the proposal; for example, U.S. banking entities would continue to be able to engage in all of the activities permitted under the 2013 final rule and the proposal, including the simplified and streamlined requirements for market-making and risk-mitigating hedging and other types of trading activities. The proposal's modifications therefore in general seek to balance concerns regarding competitive impact while mitigating the concern that an overly narrow approach to the foreign trading exemption may cause market bifurcations, reduce the efficiency and liquidity of markets, make the exemption overly restrictive to foreign banking entities, and harm U.S. market participants.

The Agencies request comment on the proposal's revised approach to implementing the foreign trading exemption. In particular, the Agencies request comment on the following questions:

Question 123. Is the proposal's implementation of the foreign trading exemption appropriate and effectively delineated? If not, what alternative would be more appropriate and effective?

Question 124. Are the proposal's provisions regarding when an activity will be considered to have occurred solely outside the United States for purposes of the foreign trading exemption effective and sufficiently clear? If not, what alternative would be clearer and more effective? Should any requirements be modified or removed? If so, which requirements and why? Should additional requirements be added? If so, what requirements and why? For example, should the financing prong or the counterparty prong be retained or modified rather than eliminated? Why or why not? Do the proposed modifications effectively focus the foreign trading exemption on the principal actions and risk of the transaction and ensure that the principal risk remains solely outside the United States? Are there any other conditions the Agencies should include in the foreign trading and foreign fund exemptions to address the possibility that risks associated with foreign trading or covered fund activities could flow into the U.S. financial system through financing for those activities coming from U.S. branches of affiliates, without raising the same compliance difficulties banking entities have experienced with the current financing prong?

Question 125. What effects do commenters believe the proposed modifications to the foreign trading exemption, particularly with respect to trading with U.S. entities, would have with respect to the safety and soundness of banking entities and U.S. financial stability? Would the proposed modifications allow for risks to aggregate in the United States based on activity of foreign banking entities? For example, what effects would removal of the counterparty prong have for U.S. financial market liquidity, and what consequences could such effects have for the safety and soundness of banking entities and U.S. financial stability? Could the proposal be further modified, consistent with statutory requirements, to better promote and protect the safety and soundness of banking entities and U.S. financial stability? Please explain.

Question 126. What impact could the proposal have on a foreign banking entity's ability to trade in the United States? Should any additional requirements of the 2013 final rule be removed? Why or why not? If so, which requirements and why? Should any of the requirements of the 2013 final rule that the Agencies are proposing to eliminate be retained? Why or why not? If so, which requirements and why?

Question 127. Does the proposal's approach raise competitive equity concerns for U.S. banking entities? If so, in what ways? Would the proposed modifications allow for foreign entities to access the U.S. markets without commensurate regulation? How would this impact competition? Would this disadvantage U.S. entities? Would the proposed revisions to the 2013 final rule's exemptions for market making, underwriting, and risk-mitigating hedging and new exclusions contained in this proposal help to mitigate these concerns? How could such concerns be addressed while effectively implementing this statutory exemption?

Question 128. The proposed approach would eliminate the requirement in the 2013 final rule that trading performed pursuant to the foreign trading exemption not be conducted with or through any U.S. entity, subject to certain exceptions.[141] Would eliminating this requirement give foreign banking entities a competitive advantage over U.S. banking entities with respect to identical trading activity in the United States? For example, would eliminating this requirement give foreign banking entities a competitive advantage over U.S. banking entities with respect to permitted market-making or underwriting activities? Why or why not? Are there ways that any such competitive disparities could potentially be mitigated or eliminated in a manner consistent with the statute? If so, please explain. Would the proposed approach create opportunities for certain banking entities to avoid the operation of the rule in ways that would frustrate the purposes of the statute? If so, how?

Question 129. The proposed approach would eliminate the requirement in the 2013 final rule that personnel of the banking entity who arrange, negotiate, or execute a purchase or sale under the foreign trading exemption be located outside the United States.[142] Should this requirement be removed? Why or why not? Would eliminating this restriction, thereby allowing foreign banking entities to perform certain core market-facing activities in the United States and with U.S. customers, create competitive disparities between foreign banking entities and U.S. banking entities? Please explain. Are there ways that any such competitive disparities could potentially be mitigated or eliminated in a manner consistent with the statute? If so, please explain. Would the proposed approach create opportunities for banking entities to avoid the operation of the rule in ways that would frustrate the purposes of the statute? If so, how?

Question 130. Instead of removing the requirement that any personnel of the banking entity that arrange, negotiate, or execute a purchase or sale be located outside of the United States, should the Agencies provide definitions or guidance on these terms, for example, similar to definitions and guidance adopted or issued by the SEC and CFTC under Title VII of the Dodd-Frank Act and implementing regulations? Are there any other modifications that would be more appropriate?

[141] *See* § ____.6(e)(3).

C. Subpart C—Covered Fund Activities and Investments

1. Section ____.10: Prohibition on Acquisition or Retention of Ownership Interests in, and Certain Relationships With, a Covered Fund

a. Prohibition Regarding Covered Fund Activities and Investments

As noted above and except as otherwise permitted, section 13(a)(1)(B) of the BHC Act generally prohibits a banking entity from acquiring or retaining any ownership interest in, or sponsoring, a covered fund.[143] Section 13(d) of the BHC Act contains certain exemptions to this prohibition. Subpart C of the 2013 final rule implements these and other provisions of section 13 related to covered funds. Specifically, § ____.10(a) of the 2013 final rule establishes the scope of the covered fund prohibitions and § ____.10(b) of the 2013 final rule defines a number of key terms, including ''covered fund.'' Section ____.10(c) of the 2013 final rule tailors the definition of ''covered fund'' by providing particular exclusions. The covered fund definition, taking into account the particular exclusions, is central to the operation of subpart C of the 2013 final rule because it specifies the types of entities to which the prohibition contained in § ____.10(a) of the 2013 final rule applies, unless the relevant activity is specifically permitted under an available exemption contained elsewhere in subpart C of the final rule.

In the 2013 final rule, the Agencies adopted a tailored definition of ''covered fund'' that covers issuers of the type that would be investment companies but for section 3(c)(1) or 3(c)(7) of the Investment Company Act[144] with exclusions for certain specific types of issuers. The Agencies designed the exclusions to focus the covered fund definition on vehicles used for the investment purposes that the Agencies believed were the target of section 13 of the BHC Act.[145] The definition of ''covered fund'' under the 2013 final rule also includes certain funds organized and offered outside of the United States to address the potential for circumvention of the restrictions in section 13 through foreign fund structures and certain types of commodity pools for which a registered commodity pool operator has elected to claim the exemption provided by section 4.7 of the CFTC's regulations or investor limitations apply.[146] In the preamble to the 2013 final rule, the Agencies stated their belief that the definition was consistent with the words, structure, purpose, and legislative history of section 13 of the BHC Act.[147] In particular, the Agencies stated that the purpose of section 13 appears to be to limit the involvement of banking entities in high-risk proprietary trading, as well as their investment in, sponsorship of, and other connections with, entities that engage in investment activities for the benefit of banking entities, institutional investors, and high-net worth individuals.[148] Further, the Agencies indicated that section 13 permitted them to tailor the scope of the definition to funds that engage in the investment activities contemplated by section 13 (as opposed, for example, to vehicles that merely serve to facilitate corporate structures).[149] Tailoring the scope of the definition was intended to allow the Agencies to avoid any unintended results that might follow from a definition that was inappropriately imprecise.[150]

The Agencies request comment on whether the 2013 final rule's covered fund definition effectively implements the statute and is appropriately tailored to identify funds that engage in the investment activities contemplated by section 13. The Agencies also request comment on whether the definition has been inappropriately imprecise and, if so, whether that has led to any unintended results.

i. Covered Fund ''Base Definition''—Section ____.10(b)

In considering whether to further tailor the covered fund definition, the Agencies seek comment in this section on the 2013 final rule's general approach to defining the term ''covered fund'' and the 2013 final rule's ''base definition'' of covered fund, that is, the definition as provided in § ____.10(b) before applying the exclusions found in § ____.10(c), as well as alternatives to this base definition.[151] In the sections that follow the Agencies request comment on exclusions from the covered fund definition that relate to specific areas of concern expressed to the Agencies.

Question 131. The Agencies adopted in the 2013 final rule a unified definition of ''covered fund'' rather than having separate definitions for ''hedge fund'' and ''private equity fund'' because the statute defines ''hedge fund'' and ''private equity fund'' without differentiation. Instead of retaining a unified definition of ''covered fund,'' should the Agencies separately define ''hedge fund'' and ''private equity fund'' or define ''covered fund'' as a ''hedge fund'' or ''private equity fund''? Would such an approach more effectively implement the statute? If so, how should the Agencies define these terms and why? Alternatively, the Agencies request comment below as to whether the Agencies should provide exclusions from the covered fund base definition for an issuer that does not share certain characteristics commonly associated with a hedge fund or private equity fund. If the Agencies were to define the terms ''hedge fund'' and ''private equity fund,'' would it be more effective to do so with an exclusion from the covered fund definition for issuers that do not resemble ''hedge funds'' and ''private equity funds''?

Question 132. In the 2013 final rule, the Agencies tailored the scope of the definition to funds that engage in the investment activities contemplated by section 13. Does the 2013 final rule's definition of ''covered fund'' effectively include funds that engage in those

[143] *See* 12 U.S.C. 1851(a)(1)(B).

[144] Sections 3(c)(1) and 3(c)(7) of the Investment Company Act are exclusions commonly relied on by a wide variety of entities that would otherwise be covered by the broad definition of ''investment company'' contained in that Act. 12 U.S.C. 1851(h)(2). Sections 3(c)(1) and 3(c)(7) of the Investment Company Act, in relevant part, provide two exclusions from the definition of ''investment company'' for: (1) Any issuer whose outstanding securities are beneficially owned by not more than one hundred persons and which is not making and does not presently propose to make a public offering of its securities (other than short-term paper); or (2) any issuer, the outstanding securities of which are owned exclusively by persons who, at the time of acquisition of such securities, are ''qualified purchasers'' as defined by section 2(a)(51) of the Investment Company Act, and which is not making and does not at that time propose to make a public offering of such securities. *See* 15 U.S.C. 80a–3(c)(1) and (c)(7).

[145] *See* 79 FR at 5671.

[146] *Id.* In the preamble to the 2013 final rule, the Agencies also expressed their intent to exercise the statutory anti-evasion authority provided in section 13(e) of the BHC Act and other prudential authorities in order to address instances of evasion. The 2013 final rule permits the Agencies to jointly determine to include within the definition of ''covered fund'' any fund excluded from that definition, and this authority may be exercised to address instances of evasion. *See* 2013 final rule § ____.10(c).

[147] *See* 79 FR at 5670. Section 13(h)(2) provides that: ''the terms 'hedge fund' and 'private equity fund' mean an issuer that would be an investment company as defined in the [Investment Company Act] (15 U.S.C. 80a–1 *et seq.*), but for section 3(c)(1) or 3(c)(7) of that Act, *or* such similar funds as the [Agencies] may, by rule, as provided in subsection (b)(2), determine.'' *See* 12 U.S.C. 1851(h)(2) (emphasis added).

[148] *See* 79 FR at 5670.

[149] *See id.* at 5666.

[150] In adopting the 2013 final rule, the Agencies referred to legislative history that suggested that Congress may have foreseen that its base definition could lead to unintended results and might be overly broad, too narrow, or otherwise off the mark. *See id.* at 5670–71.

[151] *See* 2013 final rule § ____.10(b)(1)(i), (ii), and (iii).

investment activities? Are there funds that are included in the definition of ''covered fund'' that do not engage in those investment activities? If so, what types of funds, and should the Agencies modify the definition to exclude them? Are there funds that engage in those investment activities but are not included in the definition of ''covered fund''? If so, what types of funds and should the Agencies modify the definition to include them? If the Agencies should modify the definition, how should it be modified?

Question 133. In the preamble to the 2013 final rule, the Agencies stated that tailoring the scope of the definition of ''covered fund'' would allow the Agencies to avoid unintended results that might follow from a definition that is ''inappropriately imprecise.''[152] Has the final definition been ''inappropriately imprecise'' in practice? If so, how? Should the Agencies modify the base definition to be more precise? If so, how? Alternatively or in addition to modifying the base definition, could the Agencies modify or add any exclusions to make the definition more precise, as discussed below?

Question 134. The 2013 final rule's definition of ''covered fund'' includes certain funds organized and offered outside of the United States with respect to a U.S. banking entity that sponsors or invests in the fund in order to address structures that might otherwise allow circumvention of the restrictions of section 13. Does this ''foreign covered fund'' provision effectively address those circumvention concerns? If not, should the Agencies modify this provision to address those circumvention concerns more directly or in some other way? If so, how?

Question 135. The 2013 final rule's definition of ''covered fund'' includes certain commodity pools in order to address structures that might otherwise allow circumvention of the restrictions in section 13. In adopting this ''covered commodity pool'' provision, the Agencies sought to take a tailored approach that is designed to accurately identify those commodity pools that are similar to issuers that would be investment companies as defined in the Investment Company Act but for section 3(c)(1) or 3(c)(7) of that Act, consistent with section 13(h)(2) of the BHC Act. Does this ''covered commodity pool'' provision effectively address those circumvention concerns? If not, should the Agencies modify this provision to address those circumvention concerns more directly or in some other way? If so, how? Has the covered commodity pool provision been effective in including in the covered fund base definition those commodity pools that are similar to issuers that would be investment companies but for section 3(c)(1) or 3(c)(7)? Has it been under- or over-inclusive? What kinds of commodity pools have been included in or excluded from the covered fund base definition and are these inclusions or exclusions appropriate? If the covered commodity pool provision is under- or over-inclusive, what changes should the Agencies make and how would those changes be more effective?

Question 136. What kinds of compliance and other costs have banking entities incurred in analyzing whether particular issuers are covered funds and implementing compliance programs for covered fund activities? Has the breadth of the base definition raised particular compliance challenges? Have the 2013 final rule's exclusions from the covered fund definition helped to reduce compliance costs or provided greater certainty as to the scope of the covered fund definition?

Question 137. If the Agencies modify the covered fund base definition in whole or in part, would banking entities expect to incur significant costs or burdens in order to become compliant? That is, after having established compliance, trading, risk management, and other systems predicated on the 2013 final rule's covered fund definition, what are the kinds of costs and any other burdens and their magnitude that banking entities would experience if the Agencies were to modify the covered fund base definition?

Question 138. The Agencies understand that banking entities have already expended resources in reviewing a wide range of issuers to determine if they are covered funds, as defined in the 2013 final rule. What kinds of costs and burdens would banking entities and others expect to incur if the Agencies were to modify the covered fund base definition to the extent any modifications were to require banking entities to reevaluate issuers to determine if they meet any revised covered fund definition? To what extent would modifying the covered fund base definition require banking entities to reevaluate issuers that a banking entity previously had determined are not covered funds? Would any costs and burdens be justified to the extent the Agencies more effectively tailor the covered fund definition to focus on the concerns underlying section 13? Could any costs and burdens be mitigated if the Agencies further tailored or added exclusions from the covered fund definition or developed new exclusions, as opposed to changing the covered fund base definition?

Question 139. To what extent do the proposed modifications to other provisions of the 2013 final rule affect the impact of the scope of the covered fund definition? For example, as described below, the Agencies are proposing to eliminate some of the additional, covered-fund specific limitations that apply under the 2013 final rule to a banking entity's underwriting, market making, and risk-mitigating hedging activities. As another example, the Agencies are requesting comment below about whether to incorporate into § ____.14's limitations on covered transactions the exemptions provided in section 23A of the Federal Reserve Act (''FR Act'') and the Board's Regulation W. To the extent commenters have concerns regarding the breadth of the covered fund definition, would these concerns be addressed or mitigated by the changes the Agencies are proposing to the other covered fund provisions or on which the Agencies are seeking comment?

ii. Particular Exclusions From the Covered Fund Definition

As discussed above, the 2013 final rule contains exclusions from the base definition of ''covered fund'' that tailor the covered fund definition. The Agencies designed these exclusions to avoid any unintended results that might follow from a definition of ''covered fund'' that was inappropriately imprecise. In this section, the Agencies request comment on whether to modify certain existing exclusions from the covered fund definition. The Agencies also request comment on whether to provide new exclusions in order to more effectively tailor the definition. Finally, with respect to all of the potential modifications the Agencies discuss in this section, the Agencies seek comment as to the potential effect of the other changes the Agencies are proposing today to the covered fund provisions and on additional changes on which the Agencies seek comment. That is, would these proposed changes address in whole or in part any concerns about the breadth of the covered fund definition?

iii. Foreign Public Funds

The 2013 final rule generally excludes from the definition of ''covered fund'' any issuer that is organized or established outside of the United States and the ownership interests of which are (i) authorized to be offered and sold to retail investors in the issuer's home jurisdiction and (ii) sold predominantly

[152] *See* 79 FR at 5670–71.

through one or more public offerings outside of the United States.[153] The Agencies stated in the preamble to the 2013 final rule that they generally expect that an offering is made predominantly outside of the United States if 85 percent or more of the fund's interests are sold to investors that are not residents of the United States.[154]

The 2013 final rule places an additional condition on a U.S. banking entity's ability to rely on the FPF exclusion with respect to any FPF it sponsors.[155] The FPF exclusion is only available to a U.S. banking entity with respect to a foreign fund sponsored by the U.S. banking entity if, in addition to the requirements discussed above, the fund's ownership interests are sold predominantly to persons other than the sponsoring banking entity, affiliates of the issuer and the sponsoring banking entity, and employees and directors of such entities.[156] The Agencies stated in the preamble to the 2013 final rule that, consistent with the Agencies' view concerning whether an FPF has been sold predominantly outside of the United States, the Agencies generally expect that an FPF will satisfy this additional condition if 85 percent or more of the fund's interests are sold to persons other than the sponsoring U.S. banking entity and the specified persons connected to that banking entity.[157]

In adopting the FPF exclusion, the Agencies' view was that it is appropriate to exclude these funds from the ''covered fund'' definition because they are sufficiently similar to U.S. RICs.[158] The Agencies also expressed the view that the additional condition applicable to U.S. banking entities is designed to treat FPFs consistently with similar U.S. funds and to limit the extraterritorial application of section 13 of the BHC Act, including by permitting U.S. banking entities and their foreign affiliates to carry on traditional asset management businesses outside of the United States, while also seeking to limit the possibility for evasion through foreign public funds.[159]

The Agencies request comment on all aspects of the FPF exclusion, including whether the exclusion is effective in identifying foreign funds that may be sufficiently similar to RICs and permitting U.S. banking entities and their foreign affiliates to carry on traditional asset management businesses outside of the United States, as the Agencies contemplated in adopting this exclusion. As reflected in the detailed questions that follow, the Agencies seek comment on a range of possible ways to modify this exclusion, including: (i) Whether the Agencies could simplify or omit certain of the exclusion's conditions—including those not applicable to excluded RICs—while still identifying funds that should be excluded and addressing the possibility for evasion through the Agencies' broad anti-evasion authority; (ii) whether the exclusion's conditions requiring a fund to be authorized for sale to retail investors in the issuer's home jurisdiction and sold predominantly in public offerings outside of the United States should be retained and, if so, whether the Agencies should modify or clarify these conditions; and (iii) whether the additional conditions for U.S. banking entities with respect to the FPFs they sponsor are appropriate. Specifically, in considering whether to further tailor the FPF exclusion, the Agencies seek comment below on the following:

Question 140. Are foreign funds that satisfy the current conditions in the FPF exclusion sufficiently similar to RICs such that it is appropriate to exclude these foreign funds from the covered fund definition? Why or why not? Are there foreign funds that cannot satisfy the exclusion's conditions but that are nonetheless sufficiently similar to RICs such that it is appropriate to exclude these foreign funds from the covered fund definition? If so, how should the Agencies modify the exclusion's conditions to permit these funds to rely on it? Conversely, are there foreign funds that satisfy the exclusion's conditions but are not sufficiently similar to RICs such that it is not appropriate to exclude these funds from the covered fund definition? If so, how should the Agencies modify the exclusion's conditions to prohibit these funds from relying on it? Conversely, are changes to the FPF exclusion necessary given the other changes the Agencies are proposing today and on which the Agencies seek comment?

Question 141. RICs are excluded from the covered fund definition regardless of whether their ownership interests are sold in public offerings or whether their ownership interests are sold predominantly to persons other than the sponsoring banking entity, affiliates of the issuer and the sponsoring banking entity, and employees and directors of such entities. Is such an exclusion appropriate? Why or why not?

Question 142: As discussed above, the Agencies designed the FPF exclusion to identify foreign funds that are sufficiently similar to RICs such that it is appropriate to exclude these foreign funds from the covered fund definition, but included additional conditions not applicable to RICs in part to limit the possibility for evasion of the 2013 final rule. Do FPFs present a heightened risk of evasion that justifies these additional conditions, as they currently exist or with any of the modifications on which the Agencies request comment below? Why or why not?

Question 143: As an alternative, should the Agencies address concerns about evasion through other means, such as the anti-evasion provisions in § ____.21 of the 2013 final rule?[160] The

[153] *See* 2013 final rule § ____.10(c)(1); *See also* 79 FR at 5678 (''For purposes of this exclusion, the Agencies note that the reference to retail investors, while not defined, should be construed to refer to members of the general public who do not possess the level of sophistication and investment experience typically found among institutional investors, professional investors or high net worth investors who may be permitted to invest in complex investments or private placements in various jurisdictions. Retail investors would therefore be expected to be entitled to the full protection of securities laws in the home jurisdiction of the fund, and the Agencies would expect a fund authorized to sell ownership interests to such retail investors to be of a type that is more similar to a [RIC] rather than to a U.S. covered fund.''); 2013 final rule § ____.10(c)(1)(iii) (defining the term ''public offering'' for purposes of this exclusion to mean a ''distribution,'' as defined in § ____.4(a)(3) of subpart B, of securities in any jurisdiction outside the United States to investors, including retail investors, provided that, the distribution complies with all applicable requirements in the jurisdiction in which such distribution is being made; the distribution does not restrict availability to investors having a minimum level of net worth or net investment assets; and the issuer has filed or submitted, with the appropriate regulatory authority in such jurisdiction, offering disclosure documents that are publicly available).

[154] 79 FR at 5678.

[155] Although the discussion of this condition generally refers to U.S. banking entities for ease of reading, the condition also applies to foreign affiliates of a U.S. banking entity. *See* 2013 final rule § ____.10(c)(1)(ii) (applying this limitation ''[w]ith respect to a banking entity that is, or is controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or of any State and any issuer for which such banking entity acts as sponsor'').

[156] *See* 2013 final rule § ____.10(c)(1)(ii).

[157] 79 FR at 5678.

[158] *Id.* (''The requirements that a foreign public fund both be authorized for sale to retail investors and sold predominantly in public offerings outside of the United States are based in part on the Agencies' view that foreign funds that meet these requirements generally will be sufficiently similar to [RICs] such that it is appropriate to exclude these foreign funds from the covered fund definition.'')

[159] *Id.* (''This additional condition reflects the Agencies' view that the foreign public fund exclusion is designed to treat foreign public funds consistently with similar U.S. funds and to limit the extraterritorial application of section 13 of the BHC Act, including by permitting U.S. banking entities and their foreign affiliates to carry on traditional asset management businesses outside of the United States. The exclusion is not intended to permit a U.S. banking entity to establish a foreign fund for the purpose of investing in the fund as a means of avoiding the restrictions imposed by section 13.'').

[160] Section ____.21 of the 2013 final rule provides in part that whenever an Agency finds reasonable cause to believe any banking entity has engaged in

Continued

2013 final rule includes recordkeeping requirements designed to facilitate the Agencies' ability to monitor banking entities' investments in FPFs to ensure that banking entities do not use the exclusion for FPFs in a manner that functions as an evasion of section 13. Specifically, under the 2013 final rule, a U.S. banking entity with more than $10 billion in total consolidated assets is required to document its investments in foreign public funds, broken out by each FPF and each foreign jurisdiction in which any FPF is organized, if the U.S. banking entity and its affiliates' ownership interests in FPFs exceed $50 million at the end of two or more consecutive calendar quarters.[161] The Agencies are proposing to retain these and other covered fund recordkeeping requirements with respect to banking entities with significant trading assets and liabilities.

Alternatively, would retaining specific provisions designed to address anti-evasion concerns, whether as they currently exist or modified, provide greater clarity as to the scope of foreign funds excluded from the definition and avoid uncertainty that could result from a less prescriptive exclusion?

Question 144. One condition of the FPF exclusion is that the fund must be ''authorized to offer and sell ownership interests to retail investors in the issuer's home jurisdiction.'' The Agencies understand that banking entities generally interpret the 2013 final rule's reference to the issuer's ''home jurisdiction'' to mean the jurisdiction in which the issuer is organized. Is this condition helpful in identifying FPFs that should be excluded from the covered fund definition? Why or why not? The Agencies provided guidance regarding the 2013 final rule's current reference to ''retail investors.'' [162] Has this provided sufficient clarity? Additionally, as discussed below, the 2013 final rule contains an additional condition requiring that to meet the exclusion, a fund must sell ownership interests predominantly through one or more public offerings outside the United States. As an alternative to requiring that the fund be authorized to sell interests to retail investors, should the Agencies instead require that the fund be authorized to sell interests in a ''public offering''?

Question 145. The Agencies understand that some funds may be formed under the laws of one non-U.S. jurisdiction, but offered to retail investors in another. For example, Undertakings for Collective Investment in Transferable Securities (''UCITS'') funds and investment companies with variable capital, or SICAVs, may be domiciled in one jurisdiction in the European Union, such as Ireland or Luxembourg, but may be offered and sold in one or more other E.U. member states. In this case a foreign fund could be authorized for sale to retail investors, as contemplated by the FPF exclusion, but fail to satisfy this condition. Should the Agencies modify this condition to address this situation? If so, how?

Question 146. Should the Agencies, for example, modify the condition to omit any reference to the fund's ''home jurisdiction'' and instead provide, for example, that the fund must be authorized to offer and sell ownership interests to retail investors in ''the primary jurisdiction'' in which the issuer's ownership interests are offered and sold? Would that or a similar approach effectively identify funds that are sufficiently similar to RICs, including funds that are formed under the laws of one jurisdiction and offered and sold in another? For purposes of determining the primary jurisdiction, would the Agencies need to define the term ''primary'' or a similar term to provide sufficient clarity? If so, how should the Agencies define this or a similar term? Are there funds for which it could be difficult to identify a ''primary'' jurisdiction? Does the condition need to refer to a ''primary jurisdiction,'' or would it be sufficient to require that the fund be authorized to offer and sell ownership interests to retail investors in ''any jurisdiction'' in which the issuer's ownership interests are offered and sold? Should the exclusion focus on whether the fund is authorized to make a public offering in the primary, or any, jurisdiction in which it is offered and sold as a proxy for whether it is authorized for sale to retail investors?

If the Agencies were to make a modification like the one described immediately above, should the exclusion retain the reference to the issuer's ''home'' jurisdiction? For example, should the Agencies modify this condition to require that the fund be ''authorized to offer and sell ownership interests to retail investors in the primary jurisdiction in which the issuer's ownership interests are offered and sold,'' without any reference to the home jurisdiction? Would this modification be effective, or does the exclusion need to retain a reference to an issuer the ownership interests of which are authorized for sale to retail investors in the home jurisdiction, as well as the primary jurisdiction in which the issuer's ownership interests are offered and sold? Why? If the rule retained a reference to authorization in the fund's home jurisdiction, would this raise concerns if a fund were authorized to be sold to retail investors in the fund's home jurisdiction, but was not sold in that jurisdiction and instead was sold to institutions or other non-retail investors in a different jurisdiction in which the fund was not authorized to sell interests to retail investors or to make a public offering? Are there other formulations the Agencies should make to identify foreign funds that are authorized to offer and sell their ownership interests to retail investors? Which formulations and why?

Question 147. Under the 2013 final rule, a foreign public fund's ownership interests must be sold predominantly through one or more ''public offerings'' outside of the United States, in addition to the condition discussed above that the fund must be authorized for sale to retail investors. One result of this ''public offerings'' condition is that a fund that is authorized for sale to retail investors—including a fund authorized to make a public offering—cannot rely on the exclusion if the fund does not in fact offer and sell ownership interests in public offerings. Some foreign funds, like some RICs, may be authorized for sale to retail investors but may choose to offer ownership interests to high-net worth individuals or institutions in non-public offerings. Do commenters believe it is appropriate that these foreign funds cannot rely on the FPF exclusion? Should the Agencies further tailor the FPF exclusion to focus on whether the fund's ownership interests are authorized for sale to retail investors or the fund is authorized to conduct a public offering, as discussed above, rather than whether the fund interests were actually sold in a public offering? Would the investor protection and other regulatory requirements that would tend to make foreign funds similar to a U.S. registered fund generally be a consequence of a fund's authorization for sale to retail investors or authorization to make a public offering?

If a fund is authorized to conduct a public offering in a non-U.S. jurisdiction, would the fund be subject to all of the regulatory requirements that apply in that jurisdiction for funds

an activity or made an investment in violation of section 13 of the BHC Act or the 2013 final rule, or engaged in any activity or made any investment that functions as an evasion of the requirements of section 13 of the BHC Act or the 2013 final rule, the Agency may take any action permitted by law to enforce compliance with section 13 of the BHC Act and the 2013 final rule, including directing the banking entity to restrict, limit, or terminate any or all activities under the 2013 final rule and dispose of any investment.

[161] *See* 2013 final rule § ___.20(e).

[162] *See supra* note 153.

intended for broad distribution, including to retail investors, even if the fund is not in fact sold in a public offering to retail investors?

Question 148. The 2013 final rule defines the term ''public offering'' for purposes of this exclusion to mean a ''distribution'' (as defined in § ____.4(a)(3) of the 2013 final rule) of securities in any jurisdiction outside the United States to investors, including retail investors, provided that (i) the distribution complies with all applicable requirements in the jurisdiction in which such distribution is being made; (ii) the distribution does not restrict availability to investors having a minimum level of net worth or net investment assets; and (iii) the issuer has filed or submitted, with the appropriate regulatory authority in such jurisdiction, offering disclosure documents that are publicly available.[163] If the Agencies were to modify the FPF exclusion to focus on whether the fund's ownership interests are authorized for sale to retail investors or the fund is authorized to conduct a public offering—rather than whether the fund's interests were actually sold in a public offering—should the Agencies retain some or all of the conditions included in the 2013 final rule's definition of the term ''public offering''? For example, should the Agencies retain the requirement that a public offering is one that does not restrict availability to investors having a minimum level of net worth or net investment assets; and/or the requirement that an FPF file or submit, with the appropriate regulatory authority in such jurisdiction, offering disclosure documents that are publicly available? Would either of these two conditions, either alone or together, help to identify foreign funds that are sufficiently similar to RICs? Why or why not? Is the reference to a ''distribution'' (as defined in § ____.4(a)(3) of the 2013 final rule) effective? Should the Agencies modify the reference to a ''distribution'' to address instances in which a fund's ownership interests generally are sold to retail investors in secondary market transactions, as with exchange-traded funds, for example? Should the definition of ''public offering'' also take into account whether a fund's interests are listed on an exchange?

Question 149. The public offering definition provides in part that the distribution does not restrict availability to investors having a minimum level of net worth or net investment assets. Are there jurisdictions that permit offerings that would otherwise meet the definition of a public offering but that restrict availability to investors having a minimum level of net worth or net investment assets or that otherwise restrict the types of investors who can participate?

Conversely, should the Agencies retain the requirement that an FPF actually conduct a public offering outside of the United States? Would a foreign fund that actually sells ownership interests in public offerings outside of the United States tend to provide greater information to the public or be subject to additional regulatory requirements than a fund that is authorized to conduct a public offering but offers and sells its ownership interests in non-public offerings?

Question 150. If the Agencies retain the requirement that an FPF actually conduct a public offering outside of the United States, should the Agencies retain the requirement that the fund's ownership interests must be sold ''predominantly'' through one or more such offerings? Why or why not? As mentioned above, the Agencies stated in the preamble to the 2013 final rule that they generally expect a fund's offering would satisfy this requirement if 85 percent or more of the fund's interests are sold to investors that are not residents of the United States. Has this guidance been helpful in identifying FPFs that should be excluded, if the Agencies retain the requirement that an FPF actually conduct a public offering outside of the United States?

Question 151. The Agencies understand that some banking entities have faced compliance challenges in determining whether 85 percent or more of the fund's interests are sold to investors that are not residents of the United States. Where foreign funds are listed on a foreign exchange, for example, it may not be feasible to obtain sufficient information about a fund's owners to make these determinations. The Agencies understand that banking entities also have experienced difficulties in obtaining sufficient information about a fund's owners in some cases where the foreign fund is sold through intermediaries. What sorts of compliance and other costs have banking entities incurred in developing and maintaining compliance systems to track foreign public funds' compliance with this condition? To the extent that commenters have experienced these or other compliance challenges, how have commenters addressed them? Have funds failed to qualify for the FPF exclusion because of this condition? Which kinds of funds and why? Do commenters believe that these funds should nonetheless be treated as FPFs? Why? If the Agencies retain this condition, should they reduce the required percentage of a fund's ownership interests that must be sold to investors that are not residents of the United States? Which percentage would be appropriate? Should the percentage be more than 50 percent, for example? Would a lower percentage mitigate the compliance challenges discussed above? If the Agencies do not retain the condition that an FPF must be sold predominantly through one or more public offerings outside of the United States, should the Agencies impose any limitations on the extent to which the fund can be offered in private offerings in the United States?

Question 152. The 2013 final rule places an additional condition on a U.S. banking entity's ability to rely on the FPF exclusion with respect to any FPF it sponsors: The fund's ownership interests must be sold predominantly to persons other than the sponsoring banking entity and certain persons connected to that banking entity. Has this additional condition been effective in identifying FPFs that should be excluded from the covered fund definition? Has it been effective in permitting U.S. banking entities to continue their asset management businesses outside of the United States while also limiting the opportunity for evasion of section 13? Conversely, has this additional condition resulted in the compliance challenges discussed above in connection with the Agencies' view that a fund generally is sold ''predominantly'' in public offerings outside of the United States if 85 percent or more of the fund's interests are sold to investors that are not residents of the United States? The Agencies understand that determining whether the employees and directors of a banking entity and its affiliates have invested in a foreign fund has been particularly challenging for banking entities because the 2013 final rule defines the term ''employee'' to include a member of the immediate family of the employee.[164] Is there a more direct way to define the term ''employee'' to mitigate the compliance challenges but still be effective in limiting the opportunity for evasion of section 13? If so, how? Should a revised definition specify who is included in an employee's immediate family for this purpose? Should a revised definition exclude immediate family members? If so, why?

Question 153. What other aspects of the conditions for FPFs have resulted in

[163] *See* 2013 final rule § ____.10(c)(1)(iii).

[164] *See* 2013 final rule § ____.2(j).

compliance challenges? Has the condition that FPFs be sold predominantly through public offerings outside of the United States resulted in U.S. banking entities, including their foreign affiliates and subsidiaries, determining not to sponsor new FPFs because of concerns about compliance challenges and costs? If the Agencies retain this additional condition, should they reduce the required percentage of a fund's ownership interests sold to persons other than the sponsoring U.S. banking entity and certain persons connected to that banking entity? Which percentage would be appropriate? Would a lower percentage mitigate the compliance challenges discussed above? Are there other conditions that might better serve the same purpose but reduce the challenges presented by this condition? One effect of this condition is that a U.S. banking entity can own up to 15 percent of an FPF that it sponsors, but can own up to 25 percent of a RIC after the seeding period.[165] Is this disparate treatment appropriate? Another effect of this condition is that a U.S. banking entity can own up to 15 percent of an FPF that it sponsors, but a foreign banking entity can own up to 25 percent of an FPF that it sponsors. Is this disparate treatment appropriate?

Question 154. Following the adoption of the 2013 final rule, staffs of the Agencies provided responses to certain FAQs, including whether an entity that is formed and operated pursuant to a written plan to become an FPF would receive the same treatment as an entity formed and operated pursuant to a written plan to become a RIC or BDC.[166]

The staffs observed that the 2013 final rule explicitly excludes from the covered fund definition an issuer that is formed and operated pursuant to a written plan to become a RIC or BDC in accordance with the banking entity's compliance program as described in § ____.20(e)(3) of the 2013 final rule and that complies with the requirements of section 18 of the Investment Company Act. The staffs observed that the 2013 final rule does not include a parallel provision for an issuer that will become a foreign public fund. The staffs stated that they do not intend to advise the Agencies to treat as a covered fund under the 2013 final rule an issuer that is formed and operated pursuant to a written plan to become a qualifying foreign public fund. The staffs observed that any written plan would be expected to document the banking entity's determination that the seeding vehicle will become a foreign public fund, the period of time during which the seeding vehicle will operate as a seeding vehicle, the banking entity's plan to market the seeding vehicle to third-party investors and convert it into an FPF within the time period specified in § ____.12(a)(2)(i)(B) of the 2013 final rule, and the banking entity's plan to operate the seeding vehicle in a manner consistent with the investment strategy, including leverage, of the seeding vehicle upon becoming a foreign public fund. Has the staffs' position facilitated consistent treatment for seeding vehicles that operate pursuant to a plan to become an FPF as that provided for seeding vehicles that operate pursuant to plans to become RICs or BDCs? Why or why not? Should the Agencies amend the 2013 final rule to implement this or a different approach for seeding vehicles that will become foreign public funds? What other approaches should the Agencies take and why? Should the Agencies amend the 2013 final rule to require seeding vehicles that operate pursuant to a written plan to become an FPF to include in such written plan the same or different types of documentation as the documentation required of seeding vehicles that operate pursuant to plans to become RICs or BDCs? If different types of documentation should be required of seeding vehicles that will become foreign public funds, why would those different types of documentation be appropriate? Would requiring those different types of documentation impose costs or burdens on the issuers that are greater or less than the costs and burdens imposed on issuers that will become RICs or BDCs?

iv. Family Wealth Management Vehicles

Some families manage their wealth by establishing and acquiring ownership interests in ''family wealth management vehicles.'' Family wealth management vehicles take a variety of legal forms, including limited liability companies, limited partnerships, other pooled investment vehicles, and trusts. The structures in which these vehicles operate vary in complexity, ranging from simple standalone arrangements covering a single beneficiary to complex multi-tier structures intended to benefit multiple generations of family members. In some cases, these vehicles have been in existence for more than 100 years while in other cases, they are nascent entities with little to no operating history. The Agencies are aware of no set of consistent standards that govern the characteristics of family wealth management vehicles or the manner in which they operate.

Because family wealth management vehicles might hold assets that meet the definition of ''investment securities'' [167] in the Investment Company Act, they may be investment companies that either need to register as such or otherwise rely on an exclusion from the definition of investment company. Many family wealth management vehicles rely on the exclusions provided by sections 3(c)(1) or 3(c)(7) of the Investment Company Act. Family wealth management vehicles that would be investment companies but for sections 3(c)(1) or 3(c)(7) will therefore be covered funds unless they satisfy the conditions for one of the 2013 final rule's exclusions from the covered fund definition. Concerns regarding family wealth management vehicles were raised to the Agencies following the adoption of the 2013 final rule, which does not provide an exclusion from the covered fund definition specifically designed to address these vehicles.

Family wealth management vehicles also often maintain accounts and advisory arrangements with banking entities. These banking entities may provide a range of services to family wealth management vehicles, including investment advice, brokerage execution, financing, and clearance and settlement services. Family wealth management vehicles structured as trusts for the benefit of family members also often

[165] The limitation on a banking entity's investment in a U.S. registered fund under the 2013 final rule results from the definition of ''banking entity.'' If a banking entity owns, controls, or has power to vote 25 percent or more of any class of voting securities of another company, including a U.S. registered fund after a seeding period, that other company will itself be a banking entity under the 2013 final rule.

[166] All the Agencies have published all FAQs on each of their public websites. *See* Frequently Asked Question number 5, *available at https://www.federalreserve.gov/bankinforeg/volcker-rule/faq.htm#5*; Covered Fund Definition, *available at https://www.sec.gov/divisions/marketreg/faq-volcker-rule-section13.htm*; Foreign Public Fund Seeding Vehicles, *available at https://www.fdic.gov/regulations/reform/volcker/faq/foreign.html*; Foreign Public Fund Seeding Vehicles, *available at https://occ.gov/topics/capital-markets/financial-markets/trading-volcker-rule/volcker-rule-implementation-faqs.html#foreign*; Foreign Public Fund Seeding Vehicles, *available at https://www.cftc.gov/sites/default/files/idc/groups/public/@externalaffairs/documents/file/volckerrule_faq060914.pdf.*

[167] Section 3(a)(2) of the Investment Company Act defines ''investment securities'' to include all securities except Government securities, securities issued by employees' securities companies, and majority-owned subsidiaries of the owner which are not investment companies, and are not relying on the exception from the definition of investment company in section 3(c)(1) or 3(c)(7). Section 3(a)(1)(C) defines an investment company, in part, as any issuer that is engaged or proposes to engage in the business of investing, reinvesting, owning, holding, or trading in securities, and owns or proposes to acquire investment securities having a value exceeding 40 per centum of the value of each such issuer's total assets (exclusive of Government securities and cash items) on an unconsolidated basis.

appoint banking entities, acting in a fiduciary capacity, as trustees for the trusts.

Section ____.14 of the 2013 final rule provides, in part, that no banking entity that serves, directly or indirectly, as the investment manager, investment adviser, commodity trading advisor, or sponsor to a covered fund, or that organizes and offers the fund under § ____.11 of the 2013 final rule, may enter into a transaction with the covered fund that would be a ''covered transaction,'' as defined in section 23A of the FR Act.[168] To the extent that a family wealth management vehicle is a covered fund, then § ____.14 would apply. Specifically, if a banking entity provides services, such as advisory services, that trigger application of § ____.14, the banking entity would be prohibited from providing the family wealth management vehicle a range of customer-facing banking services that involve ''covered transactions.'' Examples of these prohibited covered transactions include intraday or short-term extensions of credit in connection with the clearance and settlement of securities transactions executed by the banking entity for the family wealth management vehicle.

The Agencies are not proposing changes in the status of family wealth management vehicles in the proposal, but are seeking comment on their reliance on exclusions in the Investment Company Act, whether or not they should be excluded from the definition of covered fund, the role of banking entities with respect to family wealth management vehicles, and the potential implications of changes in their status under the 2013 final rule. In considering whether to address the status of family wealth management vehicles, the Agencies seek comment on the following:

Question 155. Do family wealth management vehicles typically rely on the exclusions in sections 3(c)(1) or 3(c)(7) under the Investment Company Act? Are there other exclusions from the definition of ''investment company'' in the Investment Company Act upon which family wealth management vehicles can rely? What have been the additional challenges for family wealth management vehicles and the banking entities that service them when considering whether these vehicles rely on the exclusions in sections 3(c)(1) or 3(c)(7)?

Question 156. Should the Agencies exclude family wealth management vehicles from the definition of ''covered fund''? If so, how should the Agencies define ''family wealth management vehicle,'' and is this the appropriate terminology? What factors should the Agencies consider to distinguish a family wealth management vehicle from a hedge fund or private equity fund, as contemplated by the statute, given that these vehicles may utilize identical structures and pursue comparable investment strategies? Would any of the definitions in rule 202(a)(11)(G)–1 under the Investment Advisers Act of 1940 effectively define family wealth management vehicle? Should the Agencies, for example, define a family wealth management vehicle to mean an issuer that would be a ''family client,'' as defined in rule 202(a)(11)(G)–1(d)(4)? What modifications to that definition would be appropriate for purposes of any exclusion from the covered fund definition? For example, that definition defines a ''family client,'' in part, to include any company wholly owned (directly or indirectly) exclusively by, and operated for the sole benefit of, one or more other family clients, which include any family member or former family member. That rule defines a ''family member'' to mean ''all lineal descendants (including by adoption, stepchildren, foster children, and individuals that were a minor when another family member became a legal guardian of that individual) of a common ancestor (who may be living or deceased), and such lineal descendants' spouses or spousal equivalents; provided that the common ancestor is no more than 10 generations removed from the youngest generation of family members.'' Would this approach to defining a ''family member'' be appropriate in the context of an exclusion from the covered fund definition? Why or why not and, if not, what other approaches should the Agencies take? Are there any family wealth management vehicles organized or managed outside of the United States that raise similar concerns? If so, should the Agencies define these family wealth management vehicles differently?

Question 157. Would an exclusion for family wealth management vehicles create any opportunities for evasion, for example, by allowing a banking entity to structure investment vehicles in a manner to evade the restrictions of section 13 on covered fund activities? Why or why not? If so, how could such concerns be addressed? Please explain.

Question 158. What services do banking entities provide to family wealth management vehicles? Below, the Agencies seek comment on whether section 14 of the implementing regulation should incorporate the exemptions within section 23A of the FR Act and the Board's Regulation W. Would this approach permit banking entities to provide these services to family wealth management vehicles? Are there other ways in which the Agencies should address the issue of banking entities being prohibited from providing services to family wealth vehicles that would be covered transactions?

Question 159. Are there any similar vehicles outside of the family wealth management context that pose similar issues?

v. Fund Characteristics

As the Agencies stated in the preamble to the 2013 final rule, an alternative to the 2013 final rule's approach of defining a covered fund would be to reference fund characteristics. In the preamble to the 2013 final rule, the Agencies stated that a characteristics-based definition could be less effective than the approach taken in the 2013 final rule as a means to prohibit banking entities, either directly or indirectly, from engaging in the covered fund activities limited or proscribed by section 13.[169] The Agencies also stated that a characteristics-based approach could require more analysis by banking entities to apply those characteristics to every potential covered fund on a case-by-case basis and could create greater opportunity for evasion. Finally, the Agencies stated that although a characteristics-based approach could mitigate the costs associated with an investment company analysis, depending on the characteristics, such an approach could result in additional compliance costs in some cases to the extent banking entities would be required to implement policies and procedures to prevent issuers from having characteristics that would bring them within the covered fund definition.

As the Agencies consider whether to further tailor the covered fund definition, the Agencies invite commenters' views and request comment on whether it may be appropriate to exclude from the definition of ''covered fund'' entities that lack certain characteristics commonly associated with being a hedge fund or a private equity fund:

Question 160. Should the Agencies exclude from the definition of ''covered fund'' entities that lack certain enumerated traits or factors of a hedge fund or private equity fund? If so, what traits or factors should be incorporated and why? For instance, the SEC's Form

[168] *See* 2013 final rule § ____.14(a).

[169] *See* 79 FR at 5671.

PF defines the terms “hedge fund” and “private equity fund,” as described below.[170] Would it be appropriate to exclude from the definition of “covered fund” an entity that does not meet either of the Form PF definitions of “hedge fund” and “private equity fund”? If the Agencies were to take this approach, should we, for example, modify the 2013 final rule to provide that an issuer is excluded from the covered fund definition if that issuer is neither a “hedge fund” nor a “private equity fund,” as defined in Form PF, or should the Agencies incorporate some or all of the substance of the definitions in Form PF into the 2013 final rule?

Question 161. If the Agencies were to incorporate the substance of the definitions of hedge fund and private equity fund in Form PF, should the Agencies make any modifications to these definitions for purposes of the 2013 final rule? Also, Form PF is designed for reporting by funds advised by SEC-registered advisers. Would any modifications be needed to have the characteristics-based exclusion apply to funds not advised by SEC-registered advisers, in particular foreign funds with non-U.S. advisers not registered with the SEC?

Question 162. Form PF defines “hedge fund” to mean any private fund (other than a securitized asset fund): (a) With respect to which one or more investment advisers (or related persons of investment advisers) may be paid a performance fee or allocation calculated by taking into account unrealized gains (other than a fee or allocation the calculation of which may take into account unrealized gains solely for the purpose of reducing such fee or allocation to reflect net unrealized losses); (b) that may borrow an amount in excess of one-half of its net asset value (including any committed capital) or may have gross notional exposure in excess of twice its net asset value (including any committed capital); or (c) that may sell securities or other assets short or enter into similar transactions (other than for the purpose of hedging currency exposure or managing duration). If the Agencies were to incorporate these provisions as part of a characteristics-based exclusion, should any of these provisions be modified? If so, how? Additionally, Form PF's definition of the term “hedge fund” provides that, solely for purposes of Form PF, any commodity pool is categorized as a hedge fund.[171] If the Agencies were to define the term “hedge fund” based on the definition in Form PF, should the term include only those commodity pools that come within the “hedge fund” definition without regard to this clause in the Form PF definition that treats every commodity pool as a hedge fund for purposes of Form PF? Why or why not?

Question 163. By contrast, Form PF primarily defines “private equity fund” not by affirmative characteristics, but as any private fund that is not a hedge fund, liquidity fund, real estate fund, securitized asset fund or venture capital fund, as those terms are defined in Form PF,[172] and that does not provide investors with redemption rights in the ordinary course. If the Agencies were to provide a characteristics-based exclusion, should the Agencies do so by incorporating the definitions of these other private funds? If so, should the Agencies modify such definitions, and if so, how? Alternatively, rather than referencing the definition of private equity fund in Form PF in a characteristics-based exclusion, the Agencies could design their own definition of a private equity fund based on traits and factors commonly associated with a private equity fund. For example, the Agencies understand that private equity funds commonly (i) have restricted or limited investor redemption rights; (ii) invest in public and non-public companies through privately negotiated transactions resulting in private ownership of the business; (iii) acquire the unregistered equity or equity-like securities of such companies that are illiquid as there is no public market and third party valuations are not readily available; (iv) require holding investments long-term; (v) have a limited duration of ten years or less; and (vi) realize returns on investments and distribute the proceeds to investors before the anticipated expiration of the fund's duration. Are there other traits or factors the Agencies should incorporate if the Agencies were to provide a characteristics-based exclusion? Should any of these traits or factors be omitted?

Question 164. A venture capital fund, as defined in rule 203(l)–1 under the Advisers Act, is not a “private equity fund” or “hedge fund,” as those terms are defined in Form PF. In the preamble to the 2013 final rule, the Agencies explained why they believed that the statutory language of section 13 did not support providing an exclusion for venture capital funds from the definition of “covered fund.” [173] If the Agencies were to adopt a characteristics-based exclusion based on the definition of private equity fund in Form PF, should the Agencies specify that venture capital funds are private equity funds for purposes of this rule so that venture capital funds would not be excluded from the covered fund definition? Do commenters believe that this approach would be consistent with the statutory language of section 13?

Question 165. The Agencies request that commenters advocating for a characteristics-based exclusion explain why particular characteristics are appropriate, what kinds of funds and what kinds of investment strategies or portfolio holdings might be excluded by the commenters' suggested approach, and why that would be appropriate.

Question 166. If the Agencies were to provide a characteristics-based exclusion, should it exclude only funds that have none of the enumerated

[170] *See* Form PF, Glossary of Terms. Form PF uses a characteristics-based approach to define different types of private funds. A “private fund” for purposes of Form PF is any issuer that would be an investment company, as defined in section 3 of the Investment Company Act, but for section 3(c)(1) or 3(c)(7) of that Act. Form PF defines the following types of private funds: Hedge funds, private equity funds, liquidity funds, real estate funds, securitized asset funds, venture capital funds, and other private funds. *See infra* at note 167.

[171] Form PF defines “commodity pool” by reference to the definition in section 1a(10) of the Commodity Exchange Act. *See* 7 U.S.C. 1a(10).

[172] Form PF defines “liquidity fund” to mean any private fund that seeks to generate income by investing in a portfolio of short term obligations in order to maintain a stable net asset value per unit or minimize principal volatility for investors; “real estate fund” to mean any private fund that is not a hedge fund, that does not provide investors with redemption rights in the ordinary course and that invests primarily in real estate and real estate related assets; “securitized asset fund” to mean any private fund whose primary purpose is to issue asset backed securities and whose investors are primarily debt-holders; and “venture capital fund” to mean any private fund meeting the definition of venture capital fund in rule 203(l)–1 under the Investment Advisers Act of 1940.

[173] *See* 79 FR at 5704 (“The final rule does not provide an exclusion for venture capital funds. The Agencies believe that the statutory language of section 13 does not support providing an exclusion for venture capital funds from the definition of covered fund. Congress explicitly recognized and treated venture capital funds as a subset of private equity funds in various parts of the Dodd-Frank Act and accorded distinct treatment for venture capital fund advisers by exempting them from registration requirements under the Investment Advisers Act. This indicates that Congress knew how to distinguish venture capital funds from other types of private equity funds when it desired to do so. No such distinction appears in section 13 of the BHC Act. Because Congress chose to distinguish between private equity and venture capital in one part of the Dodd-Frank Act, but chose not to do so for purposes of section 13, the Agencies believe it is appropriate to follow this Congressional determination.”) (footnotes omitted). Section 13 also provides an extended transition period for “illiquid funds,” which section 13 defines, in part, as a hedge fund or private equity fund that, as of May 1, 2010, was principally invested in, or was invested and contractually committed to principally invest in, illiquid assets, such as portfolio companies, real estate investments, and venture capital investments. Congress appears to have contemplated that covered funds would include funds principally invested in venture capital investments.

characteristics? Alternatively, are there any circumstances where a fund should be able to rely on a characteristics-based exclusion if it had some, but not most, of the characteristics?

Question 167. Would a characteristics-based exclusion present opportunities for evasion? Should the Agencies address any concerns about evasion through other means, such as the anti-evasion provisions in § ____.21 of the 2013 final rule, rather than by including a broader range of funds in the covered fund definition?

Question 168. If the Agencies were to provide a characteristics-based exclusion, would any existing exclusions from the definition of ''covered fund'' be unnecessary? If so, which ones and why?

Question 169. If the Agencies were to provide a characteristics-based exclusion, to what extent and how should the Agencies consider section 13's limitations both on proprietary trading and on covered fund activities? For example, section 13 limits a banking entity's ability to engage in proprietary trading, which section 13 defines as engaging as a principal for the trading account, and defines the term ''trading account'' generally as any account used for acquiring or taking positions in the securities and the instruments specified in the proprietary trading definition principally for the purpose of selling in the near term (or otherwise with the intent to resell in order to profit from short-term price movements).[174] This suggests that a fund engaged in selling financial instruments in the near term, or otherwise with the intent to resell in order to profit from short-term price movements, should be included in the covered fund definition in order to prevent a banking entity from evading the limitations in section 13 through investments in funds. The statute also, however, contemplates that the covered fund definition would include funds that make longer-term investments and specifically references private equity funds. For example, the statute provides for an extended conformance period for ''illiquid funds,'' which section 13 defines, in part, as hedge funds or private equity funds that, as of May 1, 2010, were principally invested in, or were invested and contractually committed to principally invest in, illiquid assets, such as portfolio companies, real estate investments, and venture capital investments.[175] Trading strategies involving these and other types of illiquid assets generally do not involve selling financial instruments in the near term, or otherwise with the intent to resell in order to profit from short-term price movements.

Question 170. Should the Agencies therefore provide an exclusion from the covered fund definition for a fund that (i) is not engaged in selling financial instruments in the near term, or otherwise with the intent to resell in order to profit from short-term price movements; and (ii) does not invest, or principally invest, in illiquid assets, such as portfolio companies, real estate investments, and venture capital investments? Would this or a similar approach help to exclude from the covered fund definition issuers that do not engage in the investment activities contemplated by section 13? Would such an approach be sufficiently clear? Would it be clear when a fund is and is not engaged in selling financial instruments in the near term, or otherwise with the intent to resell in order to profit from short-term price movements? Would this approach result in funds being excluded from the definition that commenters believe should be covered funds under the rule? The Agencies similarly request comment as to whether a reference to illiquid assets, with the examples drawn from section 13, would be sufficiently clear and, if not, how the Agencies could provide greater clarity.

Question 171. Rather than providing a characteristics-based exclusion, should the Agencies instead revise the base definition of ''covered fund'' using a characteristics-based approach? [176] That is, should the Agencies provide that none of the types of funds currently included in the base definition—investment companies but for section 3(c)(1) or 3(c)(7) and certain commodity pools and foreign funds—will be covered funds in the first instance unless they have characteristics of a hedge fund or private equity fund?

vi. Joint Ventures

The Agencies, in tailoring the covered fund definition, noted that many joint ventures rely on section 3(c)(1) or 3(c)(7). Under the 2013 final rule, a joint venture is excluded from the covered fund definition if the joint venture (i) is between the banking entity or any of its affiliates and no more than 10 unaffiliated co-venturers; (ii) is in the business of engaging in activities that are permissible for the banking entity other than investing in securities for resale or other disposition; and (iii) is not, and does not hold itself out as being, an entity or arrangement that raises money from investors primarily for the purpose of investing in securities for resale or other disposition or otherwise trading in securities.[177] The Agencies observed in the preamble to the 2013 final rule that, with this exclusion, banking entities ''will continue to be able to share the risk and cost of financing their banking activities through these types of entities which . . . may allow banking entities to more efficiently manage the risk of their operations.'' [178]

In 2015, the staffs of the Agencies provided a response to FAQs regarding the extent to which an excluded joint venture could invest in securities, consistent with the condition in the 2013 final rule that an excluded joint venture may not be an entity or arrangement that raises money from investors primarily for the purpose of investing in securities for resale or other disposition or otherwise trading in securities.[179] The Agencies observed in the preamble to the 2013 final rule that this condition ''prevents a banking entity from relying on this exclusion to evade section 13 of the BHC Act by owning or sponsoring what is or will become a covered fund.'' [180] The staffs expressed the view in their response to a FAQ that this condition generally could not be met by, and the exclusion would therefore not be available to, an issuer that:

○ ''[R]aise[s] money from investors primarily for the purpose of investing in securities for the benefit of one or more investors and sharing the income, gain or losses on securities acquired by that entity,'' observing that ''[t]he limitations in the joint venture exclusion are meant to ensure that the joint venture is not an investment vehicle and that the joint venture exclusion is not used as a means to evade the limitations in the BHC Act on investing in covered funds'';

○ ''[R]aises money from a small number of investors primarily for the purpose of investing in securities, whether the securities are intended to be traded frequently, held for a longer duration, held to maturity, or held until the dissolution of the entity''; or

○ ''[R]aises funds from investors primarily for the purpose of sharing in

[174] *See* 12 U.S.C. 1851(h)(4) (defining ''proprietary trading''); 12 U.S.C. 1851(h)(6) (defining ''trading account'').

[175] 12 U.S.C. 1851(c)(3).

[176] *See supra* Part III.C.1.a.i.

[177] *See* 2013 final rule § ____.10(c)(3).

[178] 79 FR at 5681.

[179] *See supra* note. 21.

[180] 79 FR at 5681. The Agencies also observed that, ''[c]onsistent with this restriction and to prevent evasion of section 13, a banking entity may not use a joint venture to engage in merchant banking activities because that involves acquiring or retaining shares, assets, or ownership interests for the purpose of ultimate resale or disposition of the investment.'' *Id.*

the benefits, income, gains or losses from ownership of securities—as opposed to conducting a business or engaging in operations or other non-investment activities,'' reasoning that such an issuer ''would be raising money from investors primarily for the purpose of 'investing in securities,' even if the vehicle may have other purposes,'' and that the exclusion ''also is not met by an entity that raises money from investors primarily for the purpose of investing in securities for resale or other disposition or otherwise trading in securities merely because one of the purposes for establishing the vehicle may be to provide financing to an entity to obtain and hold securities.''

The staffs also observed that, in addition to the conditions in the joint venture exclusion, as an initial matter, an entity seeking to rely on the exclusion must be a joint venture. The staffs observed that the basic elements of a joint venture are well recognized, including under state law, although the term is not defined in the 2013 final rule. The staffs also observed that although any determination of whether an arrangement is a joint venture will depend on the facts and circumstances, the staffs generally would not expect that a person that does not have some degree of control over the business of an entity would be considered to be participating in ''a joint venture between a banking entity or any of its affiliates and one or more unaffiliated persons,'' as specified in the 2013 final rule's joint venture exclusion.

The Agencies request comment on all aspects of the 2013 final rule's exclusion for joint ventures, including the extent to which the Agencies should modify the joint venture exclusion:

Question 172. Has the 2013 final rule's exclusion for joint ventures allowed banking entities to continue to be able to share the risk and cost of financing their banking activities through joint ventures, and therefore allowed banking entities to more efficiently manage the risk of their operations, as contemplated by the Agencies in adopting this exclusion? If not, what modifications should the Agencies make to the joint venture exclusion?

Question 173. Should the Agencies make any changes to the joint venture exclusion to clarify the condition that a joint venture may not be an entity or arrangement that raises money from investors primarily for the purpose of investing in securities for resale or other disposition or otherwise trading in securities? Should the Agencies incorporate some or all of the views expressed by the staffs in their FAQ response? If so, which views and why? Should the Agencies, for example, modify the conditions to clarify that an excluded joint venture may not be, or hold itself out as being, an entity or arrangement that raises money from investors primarily for the purpose of investing in securities, whether the securities are intended to be traded frequently, held for a longer duration, held to maturity, or held until the dissolution of the entity? Conversely, do the views expressed by the staffs in their FAQ response, or similar conditions the Agencies might add to the joint venture exclusion, affect the utility of the joint venture exclusion? If so, how could the Agencies increase or preserve the utility of the joint venture exclusion as a means of structuring business arrangements without allowing an excluded joint venture to be used by a banking entity to invest in or sponsor what is in effect a covered fund that merely has no more than ten unaffiliated investors?

Question 174. Are there other conditions the Agencies should include, or modifications to the exclusion's current conditions that the Agencies should make, to clarify that the joint venture exclusion is designed to allow banking entities to structure business ventures, as opposed to an entity that may be labelled a joint venture but that is in reality a hedge fund or private equity fund established for investment purposes?

Question 175. The 2013 final rule does not define the term ''joint venture.'' Should the Agencies define that term? If so, how should the Agencies define the term? Should the Agencies, for example, modify the 2013 final rule to reflect the view expressed by the staffs that a person that does not have some degree of control over the business of an entity would generally not be considered to be participating in ''a joint venture between a banking entity or any of its affiliates and one or more unaffiliated persons''? Would this modification serve to differentiate a participant in a joint venture from an investor in what would otherwise be a covered fund? Has state law been useful in determining whether a structure is a joint venture for purposes of the 2013 final rule? Are there other changes to the joint venture exclusion the Agencies should make on this point?

vii. Securitizations

The 2013 final rule contains several provisions designed to address securitizations and to implement the rule of construction in section 13(g)(2) of the BHC Act, which provides that nothing in section 13 shall be construed to limit or restrict the ability of a banking entity to sell or securitize loans in a manner that is otherwise permitted by law. These provisions include the 2013 final rule's exclusions from the covered fund definition for loan securitizations, qualifying asset-backed commercial paper conduits, and qualifying covered bonds. The Agencies request comment on all aspects of the 2013 final rule's application to securitizations, including:

Question 176. Are there any concerns about how the 2013 final rule's exclusions from the covered fund definition for loan securitizations, qualifying asset-backed commercial paper conduits, and qualifying covered bonds work in practice? If commenters believe the Agencies can make these provisions more effective, what modifications should the Agencies make and why?

Question 177. The 2013 final rule's loan securitization exclusion excludes an issuing entity for asset-backed securities that, among other things, has assets or holdings consisting solely of certain types of permissible assets enumerated in the 2013 final rule. These permissible assets generally are loans, certain servicing assets, and special units of beneficial interest and collateral certificates. Are there particular issues with complying with the terms of this exclusion for vehicles that are holding loans? Are there any modifications the Agencies should make and if so, why and what are they? How would such modifications be consistent with the statutory provisions? For example, debt securities generally are not permissible assets for an excluded loan securitization.[181] What effect does this limitation have on loan securitization vehicles? Should the Agencies consider permitting a loan securitization vehicle to hold 5 percent or 10 percent of assets that are considered debt securities rather than ''loans,'' as defined in the 2013 final rule? Are there other types of similar assets that are not ''loans,'' as defined in the 2013 final rule, but that have similar financial characteristics that an excluded loan securitization vehicle should be permitted to own as 5 percent or 10 percent of the vehicle's assets? Conversely, would this additional flexibility be necessary or appropriate now that banking entities have restructured loan securitizations as necessary to comply with the 2013 final

[181] The 2013 final rule does, however, permit an excluded loan securitization to hold cash equivalents for purposes of the rights and assets in paragraph (c)(8)(i)(B) of the final rule, and securities received in lieu of debts previously contracted with respect to the loans supporting the asset-backed securities. *See* 2013 final rule § ____.10(c)(8)(iii).

rule and structured loan securitizations formed after the 2013 final rule was adopted in order to comply with the 2013 final rule? After banking entities have undertaken these efforts, would allowing an excluded loan securitization to hold additional types of assets allow a banking entity indirectly to engage in investment activities that may implicate section 13 rather than as an alternative way for a banking entity either to securitize or own loans through a securitization, as contemplated by the rule of construction in section 13(g)(2) of the BHC Act?

Question 178. Should the Agencies modify the loan securitization exclusion to reflect the views expressed by the Agencies' staffs in response to a FAQ[182] that the servicing assets described in paragraph 10(c)(8)(i)(B) of the 2013 final rule may be any type of asset, provided that any servicing asset that is a security must be a permitted security under paragraph 10(c)(8)(iii) of the 2013 final rule? Should the Agencies, for example, modify paragraph 10(c)(8)(i)(B) of the 2013 final rule to add the underlined text: ''Rights or other assets designed to assure the servicing or timely distribution of proceeds to holders of such securities and rights or other assets that are related or incidental to purchasing or otherwise acquiring and holding the loans, provided that each asset that is a security meets the requirements of paragraph (c)(8)(iii) of this section.'' Should the 2013 final rule be amended to include this language? Are there other clarifying modifications that would better address the expressed concern?

Question 179. Are there modifications the Agencies should make to the 2013 final rule's definition of the term ''ownership interest'' in the context of securitizations? If so, what modifications should the Agencies make and how would they be consistent with the ownership interest restrictions? Banking entities have raised questions regarding the scope of the provision of the 2013 final rule that provides that an ownership interest includes an interest that has, among other characteristics, ''the right to participate in the selection or removal of a general partner, managing member, member of the board of directors or trustees, investment manager, investment adviser, or commodity trading advisor of the covered fund (excluding the rights of a creditor to exercise remedies upon the occurrence of an event of default or an acceleration event)'' in the context of creditor rights. Should the Agencies modify this parenthetical to provide greater clarity to banking entities regarding this parenthetical? For example, should the Agencies modify the parenthetical to provide that the ''rights of a creditor to exercise remedies upon the occurrence of an event of default or an acceleration event'' include the right to participate in the removal of an investment manager for cause, or to nominate or vote on a nominated replacement manager upon an investment manager's resignation or removal? Would the ability to participate in the removal or replacement of an investment manager under these limited circumstances more closely resemble a creditor's rights upon default to protect its interest, as opposed to the right to vote on matters affecting the management of an issuer that may be more typically associated with equity or partnership interests? Why or why not? What actions do holders of interests in loan securitizations today take with respect to investment managers and under what circumstances? Are such rights limited to certain classes of holders?

Question 180. The Agencies understand that in many securitization transactions, there are multiple tranches of interests that are sold. The Agencies also understand that some of these interests may have characteristics that are the same as debt securities with fixed maturities and fixed rates of interest, and with no other residual interest or payment. In the context of the definition of ownership interest for securitization vehicles, should the Agencies consider whether securitization interests that have only these types of characteristics be considered ''other similar interests'' for purposes of the ownership interest definition? If so, why or why not? If so, why should a distribution of profits from a passive investment such as a securitization be treated differently than a distribution of profits from any other type of passive investment? Please explain why securitization vehicles should be treated differently than other covered funds, some of which also could have tranched investment interests.

viii. Selected Other Issuers

In this section the Agencies request comment on the 2013 final rule's application to certain types of issuers for which banking entities and others have expressed concern to one or more of the Agencies:

Question 181. The 2013 final rule excludes from the covered fund definition an issuer that is a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958, or that has received from the Small Business Administration notice to proceed to qualify for a license as a small business investment company, which notice or license has not been revoked. A small business investment company that relinquishes its license as the company liquidates its holdings, however, will no longer be a ''small business investment company,'' as defined in section 103(3) of the Small Business Investment Act of 1958, and will therefore no longer be excluded from the covered fund definition. Should the Agencies modify the exclusion to provide that the exclusion will remain available under these circumstances when a small business investment company relinquishes or voluntarily surrenders its license? If so, how should the Agencies specify the circumstances under which the company may operate after relinquishing or voluntarily surrendering its license while still relying on the exclusion? Does the absence of a license from the Small Business Administration under these circumstances affect whether the company is engaged in the investment activities contemplated by section 13? Why or why not? Are there other examples of an entity that is excluded from the covered fund definition and that could no longer satisfy the relevant exclusion as the entity is liquidated? Which kinds of entities, what causes them to no longer satisfy the exclusion, and what modifications to the 2013 final rule do commenters believe would be appropriate to address them? For example, have banking entities encountered any difficulties with respect to RICs that use liquidating trusts?

Question 182. The 2013 final rule does not provide a specific exclusion from the definition of ''covered fund'' for an issuer that is a municipal securities tender option bond vehicle.[183]

[182] *See supra* note 22.

[183] In the preamble to the 2013 final rule, the Agencies noted commenters' description of a ''typical tender option bond transaction'' as consisting of ''the deposit of a single issue of highly-rated, long-term municipal bonds in a trust and the issuance by the trust of two classes of securities: a floating rate, puttable security (the ''floaters''), and an inverse floating rate security (the ''residual'') with no tranching involved. According to commenters, the holders of the floaters have the right, generally on a daily or weekly basis, to put the floaters for purchase at par. The put right is supported by a liquidity facility delivered by a highly-rated provider (in many cases, the banking entity sponsoring the trust) and allows the floaters to be treated as a short-term security. The floaters are in large part purchased and held by money market mutual funds. The residual is held by a longer-term investor (in many cases the banking entity sponsoring the trust, or an insurance

Continued

The 2013 final rule ''does not prevent a banking entity from owning or otherwise participating in a tender option bond vehicle; it requires that these activities be conducted in the same manner as with other covered funds.'' [184] To the extent that a tender option bond vehicle is a covered fund, then, § ____.14 would apply. If a banking entity organizes and offers or sponsors a tender option bond vehicle, for example, § ____.14 of the 2013 final rule prohibits the banking entity from engaging in any ''covered transaction'' with the vehicle. Such a ''covered transaction'' could include the sponsoring banking entity providing a liquidity facility to support the put right that is a key feature of the ''floater'' security issued by a tender option bond vehicle. The Agencies understand that after adoption of the 2013 final rule, banking entities restructured tender option bond vehicles, or structured new tender option bond vehicles formed after adoption, in order to comply with the 2013 final rule. What role do banking entities play in creating the tender option bond trust and how have the restrictions on ''covered transactions'' affected the continuing use of this financing structure? Why should tender option bond vehicles sponsored by banking entities be viewed differently than other types of covered funds sponsored by banking entities? As discussed above, the Agencies are requesting comment about whether to incorporate into § ____.14's limitations on covered transactions the exemptions provided in section 23A of the FR Act and the Board's Regulation W. Would incorporating some or all of these exemptions address any challenges banking entities that sponsor tender option bond trusts have faced with respect to subsequent and ongoing covered transactions with such tender option bond vehicles?

2. Section ____.11: Activities Permitted in Connection With Organizing and Offering a Covered Fund

a. Underwriting and Market Making for a Covered Fund

Section 13(d)(1)(B) of the BHC Act permits a banking entity to purchase and sell securities and other instruments described in 13(h)(4) in connection with certain underwriting or market making-related activities.[185] The 2013 final rule addressed how this exemption applied in the context of underwriting or market making of ownership interests in covered funds. In particular, § ____.11(c) of the 2013 final rule provides that the prohibition in § ____.10(a) on ownership or sponsorship of a covered fund does not apply to a banking entity's underwriting and market making-related activities involving a covered fund so long as:

The banking entity conducts the activities in accordance with the requirements of the underwriting exemption in § ____.4(a) of the 2013 final rule or market-making exemption in § ____.4(b) of the 2013 final rule, respectively;

The banking entity includes the aggregate value of all ownership interests of the covered fund acquired or retained by the banking entity and its affiliates for purposes of the limitation on aggregate investments in covered funds (the ''aggregate-fund limit'') [186] and capital deduction requirement; [187] and

The banking entity includes any ownership interests that it acquires or retains for purposes of the limitation on investments in a single covered fund (the ''per-fund limit'') if the banking entity (or an affiliate): (i) Acts as a sponsor, investment adviser, or commodity trading advisor to the covered fund; (ii) otherwise acquires and retains an ownership interest in the covered fund in reliance on the exemption for organizing and offering a covered fund in § ____.11(a) of the 2013 final rule; (iii) acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act, or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act and the implementing regulations issued thereunder, each as permitted by § ____.11(b) of the 2013 final rule; or (iv) directly or indirectly, guarantees, assumes, or otherwise insures the obligations or performance of the covered fund or of any covered fund in which such fund invests.[188]

The Agencies continue to believe that providing a separate provision relating to permitted underwriting and market making-related activities for ownership interests in covered funds is supported by section 13(d)(1)(B) of the BHC Act. The exemption for underwriting and market making-related activities under section 13(d)(1)(B), by its terms, is a statutorily permitted activity and exemption from the prohibitions in section 13(a), whether on proprietary trading or on covered fund activities. Applying the statutory exemption in this manner accommodates the capital raising activities of covered funds and other issuers in accordance with the underwriting and market making provisions under the statute.

The proposed amendments to § ____.11(c) are intended to better achieve these objectives, consistent with the requirements of the statute and based on the experience of the Agencies following implementation of the 2013 final rule. Specifically, for a covered fund that the banking entity does not organize or offer pursuant to § ____.11(a) or (b) of the 2013 final rule, the proposal would remove the requirement that the banking entity include for purposes of the aggregate fund limit and capital deduction the value of any ownership interests of the covered fund acquired or retained in accordance with the underwriting or market-making exemption. Under the proposed amendments, these limits, as well as the per fund limit, would only apply to a covered fund that the banking entity organizes or offers and in which the banking entity retains an ownership interest pursuant to § ____.11(a) or (b) of the 2013 final rule. The Agencies seek with this change to more closely align the requirements for engaging in underwriting or market-making-related activities with respect to ownership interests in a covered fund with the requirements for engaging in these activities with respect to other financial instruments. The Agencies expect this change would reduce compliance costs for banking entities that engage in these activities without exposing banking entities to additional risks beyond those inherent in underwriting and market making-related activities involving otherwise similar financial instruments as permitted by the statute. This is because banking entities that engage in underwriting or market making-related activities with respect to covered funds would remain subject to the

company, mutual fund, or hedge fund). According to commenters, the residual investors take all of the market and structural risk related to the tender option bonds structure, with the investors in floaters taking only limited, well-defined insolvency and default risks associated with the underlying municipal bonds generally equivalent to the risks associated with investing in the municipal bonds directly. According to commenters, the structure of tender option bond transactions is governed by certain provisions of the Internal Revenue Code in order to preserve the tax-exempt treatment of the underlying municipal securities.'' *See* 79 FR at 5702.

[184] *See* 79 FR at 5703.

[185] 12 U.S.C. 1851(d)(1)(B).

[186] *See* 2013 final rule § ____.12(a)(iii).

[187] *See* 2013 final rule § ____.12(d).

[188] *See* 2013 final rule § ____.11(c).

requirements of those exemptions in subpart B, as modified by the proposal, including requirements relating to risk management and limitations based on the reasonably expected near term demand of clients, customers, or counterparties.

The proposal would retain the requirements of the 2013 final rule associated with the per-fund limit, aggregate fund limit, and capital deduction where the banking entity engages in activity in reliance on § ____.11(a) or (b) with respect to a covered fund, consistent with the limitations of section 13(d)(1)(G)(iii) of the BHC Act that restrict a banking entity that relies on this exemption from acquiring or retaining an ownership interest in a covered fund beyond a de minimis investment amount.

In addition, the proposal would maintain the requirement that the underwriting or market-making-related activities be conducted in accordance with the requirements of § ____.4(a) or § ____4(b) of the 2013 final rule (as modified by the proposal), respectively. These requirements are designed specifically to address a banking entity's underwriting and market making-related activities and to permit holding exposures consistent with the reasonably expected near term demand of clients, customers and counterparties.

Question 183. What effects do commenters believe the proposed changes to the requirements for engaging in underwriting or market-making-related activities with respect to ownership interests in covered funds would have on the capital raising activities of covered funds and other issuers? What other changes should the Agencies consider, if any, to more closely align the requirements for engaging in underwriting or market-making-related activities with respect to ownership interests in a covered fund with the requirements for engaging in these activities with respect to other financial instruments? For example, because the exemption for underwriting and market making-related activities under section 13(d)(1)(B), by its terms, is a statutorily permitted activity and an exemption from the prohibitions in section 13(a), is it necessary to continue to retain the per-fund limit, aggregate fund limit, and capital deduction where the banking entity engages in activity in reliance on § ____.11(a) or (b)? Should these limitations apply only with respect to covered fund interests acquired or retained by the banking entity in reliance on section 13(d)(1)(G)(iii) of the BHC Act, and not to interests held in reliance on the separate exemption provided for underwriting and market making activities, where the banking entity seeks to rely on separate exemptions for permitted activities related to the same covered fund? That is, should we remove the requirement that the banking entity include for purposes of the per fund limit, aggregate fund limit, and capital deduction the value of any ownership interests of the covered fund acquired or retained in accordance with the underwriting or market-making exemption, regardless of whether the banking entity engages in activity in reliance on § ____.11(a) or (b) with respect to the fund? Why or why not? Conversely, should the Agencies retain the requirement that all covered fund ownership interests acquired or retained in connection with underwriting or market-making-related activities be included for purposes of the aggregate fund limit and capital deduction as a means to effectuate the limitations on permitted activities in section (d)(2)(A) of the BHC Act?

Question 184. Please describe whether the restrictions on underwriting or market making of ownership interests in covered funds are appropriate. Why or why not?

Question 185. Please describe any potential restrictions that commenters believe should be included or indicate any restrictions that should be removed, along with the commenter's rationale for such changes, and how such changes would be consistent with the statute.

3. Section ____.13: Other Permitted Covered Fund Activities

a. Permitted Risk-Mitigating Hedging Activities

Section 13(d)(1)(C) of the BHC Act provides an exemption for certain risk-mitigating hedging activities.[189] In the context of covered fund activities, the 2013 final rule implemented this authority narrowly, permitting only limited risk-mitigating hedging activities involving ownership interests in covered funds for hedging employee compensation arrangements. In particular, § ____.13(a) of the 2013 final rule permits a banking entity to acquire or retain an ownership interest in a covered fund provided that the ownership interest is designed to demonstrably reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with a compensation arrangement with an employee who directly provides investment advisory or other services to the covered fund.

In the 2011 proposal, the Agencies considered permitting a banking entity to acquire or retain an ownership interest in a covered fund as a hedge in a second context, in addition to hedging employee compensation arrangements. Specifically, the 2011 proposal included a provision that would have allowed a banking entity to acquire or retain an ownership interest in a covered fund as a risk-mitigating hedge when acting as an intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.[190] After receiving comments on the 2011 proposal, the Agencies determined not to include this second provision in the 2013 final rule. At the time, the Agencies determined based on information available and comments received, that transactions by a banking entity to act as principal in providing exposure to the profits and losses of a covered fund for a customer, even if hedged by the entity with ownership interests of the covered fund, constituted a high-risk strategy that could threaten the safety and soundness of the banking entity. The Agencies were concerned that these transactions could expose the banking entity to the risk that the customer will fail to perform, thereby effectively exposing the banking entity to the risks of the covered fund, and that a customer's failure to perform may be concurrent with a decline in value of the covered fund, which could expose the banking entity to additional losses. The Agencies therefore concluded that these transactions could pose a significant potential to expose banking entities to the same or similar economic risks that section 13 of the BHC Act sought to eliminate.[191]

Since the Agencies' adoption of the 2013 final rule, some market participants have argued that the 2013 final rule should be modified to permit a banking entity to acquire or retain an ownership interest in a covered fund as a risk-mitigating hedge when acting as an intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund. These market participants have urged that allowing banking entities to facilitate customer activity would be consistent with the intent of the statute. In the view of these market participants, permitting such activity would not be inconsistent with safety and soundness because it would be conducted consistent with the requirements of the 2013 final rule, as modified by the proposal, including the requirements

[189] *See* 12 U.S.C. 1851(d)(1)(C).

[190] *See* 2011 proposal.

[191] *See* 79 FR at 5737.

with respect to risk-mitigating hedging transactions. For example, such exposures would be subject to required risk limits and policies and procedures and must be appropriately monitored and risk managed. Although a banking entity could be exposed to the risk of the covered fund if the customer fails to perform, this counterparty default risk would be present whenever a banking entity facilitates the exposure by the customer to the profits and losses of a financial instrument and seeks to hedge its own exposure by investing in the financial instrument.

Accordingly, the Agencies are including this provision in the proposal and requesting comment below as to whether the 2013 final rule should be modified to permit this additional category of risk-mitigating hedging transactions.

As in the 2011 proposal, this proposal would allow a banking entity to acquire a covered fund interest as a hedge when acting as an intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund. The hedging of employee compensation arrangements involving covered fund interests would remain unchanged from the 2013 final rule. Moreover, a banking entity that seeks to use a covered fund interest to hedge on behalf of a customer would need to comply with all of the requirements of § ____.13(a), which generally track the requirements of § ____.5, as modified by this proposal.[192] The Agencies believe that to effectively implement the statute, banking entities should have a broader ability to acquire or retain a covered fund interest as a permissible hedging activity.

In addition to those questions raised in connection with the proposed implementation of the risk-mitigating hedging exemption under § ____.5 of the proposal, the Agencies request comment on the proposed implementation of that same exemption with respect to covered fund activities. In particular, the Agencies request comment on the following questions:

Question 186. Should a banking entity be permitted to acquire or retain an ownership interest in a covered fund as a hedge when acting as an intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund? If so, what kinds of transactions would banking entities enter into to facilitate the exposure by the customer to the profits and losses of the covered fund, what types of covered funds would be used to hedge, how would they be used to hedge, and what kinds of customers would be involved? Should the Agencies place additional limitations on these arrangements, such as a requirement for a banking entity to take prompt action to hedge or eliminate its covered fund exposure if the customer fails to perform?

Question 187. At the time the Agencies adopted the 2013 final rule, they determined that transactions by a banking entity to act as principal in providing exposure to the profits and losses of a covered fund for a customer, even if hedged by the entity with ownership interests of the covered fund, constituted a high-risk strategy that could threaten the safety and soundness of the banking entity. Do these arrangements constitute a high-risk strategy, threaten the safety and soundness of a banking entity, and pose significant potential to expose banking entities to the same or similar economic risks that section 13 of the BHC Act sought to eliminate? Why or why not? Commenters are encouraged to provide specific information that would help the Agencies' analysis of this question.

Question 188. Are there other circumstances on which a banking entity should be permitted to acquire or retain an ownership interest in a covered fund? If so, please explain. For example, should the Agencies amend the 2013 final rule to provide that, in addition to the proposed amendment, banking entities be permitted to acquire or retain ownership interests in covered funds where the acquisition or retention meets the requirements of § ____.5 of the 2013 final rule, as modified by the proposal?

b. Permitted Covered Fund Activities and Investments Outside of the United States

Section 13(d)(1)(I) of the BHC Act[193] permits foreign banking entities to acquire or retain an ownership interest in, or act as sponsor to, a covered fund, so long as those activities and investments occur solely outside the United States and certain other conditions are met (the foreign fund exemption).[194] The purpose of this statutory exemption appears to be to limit the extraterritorial application of the statutory restrictions on covered fund activities and investments, while preserving national treatment and competitive equity among U.S. and foreign banking entities within the United States.[195] The statute does not explicitly define what is meant by ''solely outside of the United States.''

i. Activities or Investments Solely Outside of the United States

The 2013 final rule establishes several conditions on the availability of the foreign fund exemption. Specifically, the 2013 final rule provides that an activity or investment occurs solely outside the United States for purposes of the foreign fund exemption only if:

- The banking entity acting as sponsor, or engaging as principal in the acquisition or retention of an ownership interest in the covered fund, is not itself, and is not controlled directly or indirectly by, a banking entity that is located in the United States or established under the laws of the United States or of any State;
- The banking entity (including relevant personnel) that makes the decision to acquire or retain the ownership interest or act as sponsor to the covered fund is not located in the

[192] The proposal would also amend § ____.13(a) to align with the proposed modifications to § ____5. In particular, the proposal would require that a risk-mitigating hedging transaction pursuant to § ____.13(a) be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks to the banking entity. It would also remove the requirement that the hedging transaction ''demonstrably reduces or otherwise significantly mitigates'' the relevant risks, consistent with the proposed modifications to § ____.5. *See supra* Part III.B.3 of this Supplementary Information section.

[193] Section 13(d)(1)(I) of the BHC Act permits a banking entity to acquire or retain an ownership interest in or have certain relationships with, a covered fund notwithstanding the restrictions on investments in, and relationships with, a covered fund, if: (i) Such activity or investment is conducted by a banking entity pursuant to paragraph (9) or (13) of section 4(c) of the BHC Act; (ii) the activity occurs solely outside of the United States; (iii) no ownership interest in such fund is offered for sale or sold to a resident of the United States; and (iv) the banking entity is not directly or indirectly controlled by a banking entity that is organized under the laws of the United States or of one or more States. *See* 12 U.S.C. 1851(d)(1)(I).

[194] This section's discussion of the concept ''solely outside of the United States'' is provided solely for purposes of the proposal's implementation of section 13(d)(1)(I) of the BHC Act, and does not affect a banking entity's obligation to comply with additional or different requirements under applicable securities, banking, or other laws.

[195] *See* 156 Cong. Rec. S5897 (daily ed. July 15, 2010) (statement of Sen. Merkley). (''Subparagraphs (H) and (I) recognize rules of international regulatory comity by permitting foreign banks, regulated and backed by foreign taxpayers, in the course of operating outside of the United States to engage in activities permitted under relevant foreign law. However, these subparagraphs are not intended to permit a U.S. banking entity to avoid the restrictions on proprietary trading simply by setting up an offshore subsidiary or reincorporating offshore, and regulators should enforce them accordingly. In addition, the subparagraphs seek to maintain a level playing field by prohibiting a foreign bank from improperly offering its hedge fund and private equity fund services to U.S. persons when such offering could not be made in the United States.'').

United States or organized under the laws of the United States or of any State;

- The investment or sponsorship, including any transaction arising from risk-mitigating hedging related to an ownership interest, is not accounted for as principal directly or indirectly on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State; and
- No financing for the banking entity's ownership or sponsorship is provided, directly or indirectly, by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State (the ''financing prong'').[196]

Much like the similar requirement under the exemption for permitted trading activities of a foreign banking entity, experience since adoption of the 2013 final rule has indicated that the financing prong has been difficult to comply with in practice. As a result, the proposal would remove the financing prong of the foreign fund exemption for the same reasons as described above for the trading outside of the United States exemption. This modification would streamline the requirements of this exemption with the intention of improving implementation of the statutory exemption. Although a U.S. branch or affiliate that extends financing for a covered fund investment solely outside of the United States could bear some risks—for example, if the U.S. branch of an affiliate provides a loan secured by a covered fund interest that then declines in value—the conditions to the foreign fund exemption, as modified by the proposal, are designed to require that the principal risks of covered fund investments and sponsorship by foreign banking entities permitted under the foreign fund exemption occur and remain solely outside of the United States. For example, the foreign fund exemption would continue to provide that the investment or sponsorship, including any transaction arising from risk-mitigating hedging related to an ownership interest, may not be accounted for as principal directly or indirectly on a consolidated basis by any U.S. branch or affiliate. One of the principal purposes of section 13 of the BHC Act appears to be to limit the risks that covered fund investments and activities may pose to the safety and soundness of U.S. banking entities and the U.S. financial system. A purpose of the foreign fund exemption appears to be to limit the extraterritorial application of section 13 as it applies to foreign banking entities subject to section 13. The modifications to these requirements under the proposal are intended to ensure that any foreign banking entity engaging in activity under the foreign fund exemption does so in a manner that ensures the risk and sponsorship of the activity or investment occurs and resides solely outside of the United States.

ii. Offered for Sale or Sold to a Resident of the United States

One of the restrictions of the exemption for covered fund activities conducted by foreign banking entities outside the United States is the restriction that no ownership interest in the covered fund may be offered for sale or sold to a resident of the United States.[197] To implement this restriction, § ____.13(b) of the 2013 final rule requires, as one condition of the foreign fund exemption, that ''no ownership interest in such hedge fund or private equity fund is offered for sale or sold to a resident of the United States'' (the ''marketing restriction''). Section ____.13(b)(3) of the 2013 final rule further specifies that an ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of the marketing restriction if it is sold or has been sold pursuant to an offering that does not target residents of the United States.[198]

After issuance of the 2013 final rule, foreign banking entities requested clarification from the Agencies regarding whether the marketing restriction applied only to the activities of a foreign banking entity that is seeking to rely on the foreign fund exemption or whether it applied more generally to the activities of any person offering for sale or selling ownership interests in the covered fund. Specifically, sponsors of covered funds and foreign banking entities asked how this condition would apply to a foreign banking entity that has made, or intends to make, an investment in a covered fund where the foreign banking entity (including its affiliates) does not sponsor, or serve, directly or indirectly, as the investment manager, investment adviser, commodity pool operator, or commodity trading advisor to the covered fund (a third-party covered fund).

After issuance of the 2013 final rule, the staffs of the Agencies issued guidance to address these issues, and the proposal would amend the 2013 final rule to clearly incorporate this guidance.[199] The proposal therefore provides that an ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of the marketing restriction only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator, or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of the marketing restriction to participate in any offer or sale by the covered fund of ownership interests in the covered fund.[200]

The purpose of this provision is to make clear that the marketing restriction applies to the activity of the foreign banking entity that is seeking to rely on the exemption (including its affiliates). The marketing restriction constrains the foreign banking entity in connection with its own activities with respect to covered funds rather than the activities of unaffiliated third parties, thereby requiring that the foreign banking entity seeking to rely on this exemption does not engage in an offering of ownership interests that targets residents of the United States. This view is consistent with limiting the extraterritorial application of section 13 to foreign banking entities while seeking to ensure that the risks of covered fund investments by foreign banking entities occur and remain solely outside of the United States. If the marketing restriction were applied to the activities of third parties, such as the sponsor of a third-party covered fund (rather than the foreign banking entity investing in a third-party covered fund), this exemption may not be available in certain circumstances where the risks and activities of a foreign banking entity with respect to its investment in the covered fund are solely outside the United States.[201] In describing the

[196] *See* final rule § ____.13(b)(4).

[198] 2013 final rule § ____.13(b)(3).

[199] *https://www.federalreserve.gov/bankinforeg/volcker-rule/faq.htm#13.*

[200] *See* proposal § ____.13(b)(3).

[201] The Agencies note that foreign funds that sell securities to residents of the United States in an offering that targets residents of the United States will be covered funds under § ____.10(b)(i) of the 2013 final rule if such funds are unable to rely on an exclusion or exemption under the Investment Company Act other than section 3(c)(1) or 3(c)(7) of that Act. If the marketing restriction were to apply more generally to the activities of any person (including the covered fund itself), the applicability of the foreign fund exemption would be significantly limited because a third-party foreign fund's offering that targets residents of the United

Continued

marketing restriction in the preamble to the 2013 final rule, the Agencies stated that the marketing restriction serves to limit the foreign fund exemption so that it ''does not advantage foreign banking entities relative to U.S. banking entities with respect to providing *their* covered fund services in the United States by prohibiting the offer or sale of ownership interests in *related* covered funds to residents of the United States.'' [202]

A foreign banking entity (including its affiliates) that seeks to rely on the foreign fund exemption must comply with all of the conditions to that exemption, including the marketing restriction. A foreign banking entity that participates in an offer or sale of covered fund interests to a resident of the United States thus cannot rely on the foreign fund exemption with respect to that covered fund. Further, where a banking entity sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator, or commodity trading advisor to a covered fund, that banking entity will be viewed as participating in an offer or sale by the covered fund of ownership interests in the covered fund, and therefore such foreign banking entity would not qualify for the foreign fund exemption for that covered fund if that covered fund offers or sells covered fund ownership interests to a resident of the United States. The Agencies request comment on the proposal's approach to implementing the foreign fund exemption. In particular, the Agencies request comment on the following questions:

Question 189. Is the proposal's implementation of the foreign fund exemption effective? If not, what alternative would be more effective and/or clearer?

Question 190. Are the proposal's provisions effective and sufficiently clear regarding when a transaction or activity will be considered to have occurred solely outside the United States? If not, what alternative would be more effective and/or clearer?

Question 191. Should the financing prong of the foreign fund exemption be retained? Why or why not? Should additional requirements be added to the foreign fund exemption? If so, what requirements and why? Should additional requirements be modified or removed? If so, what requirements and why and how? How would such changes be consistent with the statute?

Question 192. Is the proposed exemption consistent with limiting the extraterritorial reach of the rule with respect to FBOs? Does the proposed exemption create competitive advantages for foreign banking entities with respect to U.S. banking entities? Why or why not?

Question 193. Is the Agencies' proposal regarding the 2013 final rule's marketing restriction, which reflects the staff interpretations incorporated within previous FAQs, sufficiently clear? Should the marketing restriction apply more broadly to third-party funds that the foreign banking entity does not advise or sponsor? Why or why not?

4. Section ____.14: Limitations on Relationships With a Covered Fund

Section 13(f) of the BHC Act generally prohibits a banking entity that, directly or indirectly, serves as investment manager, investment adviser, or sponsor to a covered fund (or that organizes and offers a covered fund pursuant to section 13(d)(1)(G) of the BHC Act) from entering into a transaction with such covered fund that would be a covered transaction as defined in section 23A of the FR Act.[203] In the 2013 final rule, the Agencies noted that ''[s]ection 13(f) of the BHC Act does not incorporate or reference the exemptions contained in section 23A of the FR Act or the Board's Regulation W.'' [204] However, the Agencies also noted that notwithstanding the prohibition in section 13(f)(1) of the BHC Act, ''other specific portions of the statute permit a banking entity to engage in certain transactions or relationships'' with a related covered fund.[205] The Agencies addressed the apparent conflict between section 13(f)(1) and particular provisions in section 13(d)(1) of the BHC Act in the 2013 final rule by interpreting the statutory language to permit a banking entity ''to acquire or retain an ownership interest in a covered fund in accordance with the requirements of section 13.'' [206] In doing so, the Agencies noted that a contrary interpretation would make the ''specific transactions that permit covered transactions between a banking entity and a covered fund mere surplusage.'' [207] In light of the apparent conflict and ambiguity between particular provisions in sections 13(d)(1) and 13(f)(1) of the BHC Act, the Agencies solicit comment below on the approach adopted in the 2013 final rule and potential alternative approaches to interpreting these provisions and reconciling any apparent conflicts or redundancies between these provisions.

Section 13(f) also provides an exemption for prime brokerage transactions between a banking entity and a covered fund in which a covered fund managed, sponsored, or advised by that banking entity has taken an ownership interest. In addition, section 13(f) subjects any transaction permitted under section 13(f) of the BHC Act (including a permitted prime brokerage transaction) between a banking entity and covered fund to section 23B of the FR Act.[208]

In general, section 23B of the FR Act requires that the transaction be on market terms or on terms at least as favorable to the banking entity as a comparable transaction by the banking entity with an unaffiliated third party. Section ____.14 of the 2013 final rule implemented these provisions.[209]

a. Prime Brokerage Transactions

Section 13(f) of the BHC Act provides an exemption from the prohibition on covered transactions with a covered fund for any prime brokerage transaction with a covered fund in which a covered fund managed, sponsored, or advised by a banking entity has taken an ownership interest (a ''second-tier fund''). The statute by its terms permits a banking entity with a relationship to a covered fund described in section 13(f) of the BHC Act to engage in prime brokerage transactions (that are covered transactions) only with second-tier funds and does not extend to covered funds more generally. Neither the statute nor the proposal limits covered transactions between a banking entity and a covered fund for which the banking entity does not serve as investment manager, investment adviser, or sponsor (as defined in section 13 of the BHC Act) or have an interest in reliance on section 13(d)(1)(G) of the BHC Act. Under the statute, the exemption for prime brokerage transactions is available only so long as certain enumerated conditions are satisfied.[210] The conditions are that (i) the banking entity is in compliance with each of the limitations set forth in § ____.11 of the 2013 final rule with respect to a covered

States would make the foreign fund exemption unavailable for all foreign banking entity investors in the fund.

fund organized and offered by the banking entity or any of its affiliates; (ii) the CEO (or equivalent officer) of the banking entity certifies in writing annually that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and (iii) the Board has not determined that such transaction is inconsistent with the safe and sound operation and condition of the banking entity. The proposal would retain each of these provisions, including that the required certification be made to the appropriate Agency for the banking entity.

The staffs of the Agencies previously issued guidance explaining when a banking entity was required to provide this certification during the conformance period.[211] To reflect this guidance, the Agencies are proposing a change to the rule that provides the timing for when a banking entity must submit such certification. In particular, the proposal provides a banking entity must provide the CEO certification annually no later than March 31 of the relevant year. As under the 2013 final rule, under the proposal, the CEO would have a duty to update the certification if the information in the certification materially changes at any time during the year when he or she becomes aware of the material change. This change is intended to provide banking entities with certainty about when the required certification must be provided to the appropriate Agency in order to comply with the prime brokerage exemption.

b. FCM Clearing Services

On March 29, 2017, the CFTC's Division of Swap Dealer and Intermediary Oversight (''DSIO'') issued a letter to a futures commission merchant (''FCM'') stating that the DSIO would not recommend that an enforcement action against the FCM be initiated in connection with § ____.14(a) of the 2013 final rule. The letter provides relief for futures, options, and swaps clearing services provided by a registered FCM to covered funds for which affiliates of the FCM are engaged in the services identified in § ____.14(a) including, for example, investment management services.[212]

The CFTC believes the relief provided to the FCM is warranted and would extend the relief from the requirements of § ____.14(a) of the 2013 final rule to all FCMs performing futures, options, and swaps clearing services. Providing such clearing services to customers of affiliates does not appear to be the type of relationship that was intended to be limited under section 13(f) of the BHCA. The provision of futures, options, and swaps clearing services by an FCM is a facilitation service that the CFTC believes would not give rise to a relationship that might evade the prohibition against acquiring or retaining an interest in or sponsoring a covered fund. An FCM earns clearing fees and is not in a position to profit from any gain or loss that the customer may have on its cleared futures, options, or swaps positions. The other Agencies do not object to the relief provided to the FCMs as described above.

Question 194. Are clearing services provided by an FCM to its customers a relationship that would give rise to the policy concerns addressed by § ____.14 of the 2013 final rule?

Question 195. Does the no-action relief provided by the CFTC staff together with the statement herein provide sufficient certainty for market participants regarding the application of § ____.14(a) of the 2013 final rule to FCM clearing services?

Question 196. If the exemptions in section 23A of the FR Act and the Board's Regulation W are made available under a modification to § ____.14 of the 2013 final rule, what would be the effect, if any, for FCM clearing services? Would incorporating those exemptions further support the relief provided by the CFTC? If so, how?

The Agencies request comment on all aspects of the proposal's approach to implementing the limitations on certain relationships with covered funds. In particular, the Agencies request comment on the following questions:

Question 197. Is the proposal's approach to implementing the limitations on certain transactions with a covered fund effective? If not, what alternative approach would be more effective and why?

Question 198. Should the Agencies adopt a different interpretation of section 13(f)(1) of the BHC Act than the interpretation adopted in the preamble to the 2013 final rule? For example, should the Agencies amend § ____.14 of the 2013 final rule to incorporate some or all of the exemptions in section 23A of the FR Act and the Board's Regulation W? Why or why not? Why should these transactions be permitted? For example, what would be the effect on banking entities' ability to meet the needs and demands of their clients and how would incorporating some or all of the exemptions that exist in section 23A of the FR Act and the Board's Regulation W facilitate a banking entity's ability to meet client needs and demands? If permitted, should these additional transactions be subject to any limitations?

Question 199. Should the Agencies amend § ____.14 of the 2013 final rule to incorporate the quantitative limits in section 23A of the Federal Reserve and the Board's Regulation W? Why or why not? Are there any other elements of section 23A and the Board's Regulation W that the Agencies should consider incorporating? Please explain.

Question 200. Are there other transactions between a banking entity and covered funds that should be prohibited or limited as part of this rulemaking?

Question 201. Is the definition of ''prime brokerage transaction'' under the proposal appropriate? If not, what definition would be appropriate? Are there any transactions that should be included in the definition of ''prime brokerage transaction'' that are not currently included?

Question 202. With respect to the CEO (or equivalent officer) certification required under section 13(f)(3)(A)(ii) and § ____.14(a)(2)(ii)(B) of this proposal, what would be the most useful, efficient method of certification (*e.g.,* a new stand-alone certification, a certification incorporated into an existing form or filing, website certification or certification filed directly with the relevant Agency?) Is it sufficiently clear by when a certification must be provided by a banking entity? If not, how could the Agencies provide additional clarity?

D. Subpart D—Compliance Program Requirements; Violations

1. Section ____.20: Program for Compliance; Reporting

Section ____.20 of the 2013 final rule contains compliance program and metrics collection and reporting requirements. These requirements are tailored based on banking entity size and complexity of activity. The 2013 final rule was intended to focus the most significant compliance obligations on the largest and most complex organizations, while minimizing the economic impact on small banking entities.[213] However, public feedback

[211] *https://www.federalreserve.gov/bankinforeg/volcker-rule/faq.htm#18.*

[212] CFTC Staff Letter 17–18 (Mar. 29, 2017).

[213] The OCC, Board and FDIC statement on the 2013 final rule's applicability to community banks recognized that ''[t]he vast majority of these community banks have little or no involvement in prohibited proprietary trading or investment activities in covered funds. Accordingly, community banks do not have any compliance obligations under the final rule if they do not engage in any covered activities other than trading

Continued

has indicated that even determining whether a banking entity is eligible for the simplified compliance program can require significant analysis for small banking entities. In addition, certain traditional banking activities of small banks have fallen within the scope of the proprietary trading and covered fund prohibitions and exemptions, making them ineligible for the simplified program available to banking entities with no covered activities. Public feedback has indicated that the compliance program requirements are also significant for larger banking entities that must implement the rule's enhanced compliance program, metrics, and CEO attestation requirements. The Agencies propose to revise the compliance program requirements to allow greater flexibility and focus the requirements on the banking entities with the most significant and complex activities.

Specifically, the Agencies propose to apply the compliance program requirement to banking entities as follows:

- Banking entities with significant trading assets and liabilities. Banking entities with significant trading assets and liabilities would be subject to the six-pillar compliance program requirement (currently set forth in § ____.20(b) of the 2013 final rule), the metrics reporting requirements (§ ____.20(d) of the 2013 final rule), the covered fund documentation requirements (§ ____.20(e) of the 2013 final rule), and the CEO attestation requirement (currently in Appendix B of the 2013 final rule).
- Banking entities with moderate trading assets and liabilities. Banking entities with moderate trading assets and liabilities would be required to establish the simplified compliance program (currently described in § ____.20(f)(2) of the 2013 final rule), and comply with the CEO attestation requirement (currently in Appendix B of the 2013 final rule).
- Banking entities with limited trading assets and liabilities. Banking entities with limited trading assets and liabilities would be presumed to be in compliance with the proposal and would have no obligation to demonstrate compliance with subpart B and subpart C of the implementing regulations on an ongoing basis. These banking entities would not be required to demonstrate compliance with the rule unless and until the appropriate Agency, based upon a review of the banking entity's activities, determines that the banking entity must establish the simplified compliance program (currently described in §§ ____.20(b) or ____.20(f)(2) of the 2013 final rule).

a. Compliance Program Requirements for Banking Entities With Significant Trading Assets and Liabilities

i. Section 20(b)—Six-Pillar Compliance Program

Section ____.20(b) of the 2013 final rule specifies six elements that each compliance program required under that section must at a minimum contain.

The six elements specified in § ____.20(b) are:

- Written policies and procedures reasonably designed to document, describe, monitor and limit trading activities and covered fund activities and investments conducted by the banking entity to ensure that all activities and investments that are subject to section 13 of the BHC Act and the rule comply with section 13 of the BHC Act and the 2013 final rule;
- A system of internal controls reasonably designed to monitor compliance with section 13 of the BHC Act and the rule and to prevent the occurrence of activities or investments that are prohibited by section 13 of the BHC Act and the 2013 final rule;
- A management framework that clearly delineates responsibility and accountability for compliance with section 13 of the BHC Act and the 2013 final rule and includes appropriate management review of trading limits, strategies, hedging activities, investments, incentive compensation and other matters identified in the rule or by management as requiring attention;
- Independent testing and audit of the effectiveness of the compliance program conducted periodically by qualified personnel of the banking entity or by a qualified outside party;
- Training for trading personnel and managers, as well as other appropriate personnel, to effectively implement and enforce the compliance program; and
- Records sufficient to demonstrate compliance with section 13 of the BHC Act and the 2013 final rule, which a banking entity must promptly provide to the relevant Agency upon request and retain for a period of no less than 5 years.

Under the 2013 final rule, these six elements must be part of the compliance program of each banking entity with total consolidated assets greater than $10 billion that engages in covered trading activities and investments subject to section 13 of the BHC Act and the implementing regulations.

The Agencies are proposing to apply the six-pillar compliance program requirements only to banking entities with significant trading assets and liabilities. The Agencies preliminarily believe these banking entities are engaged in activities at a scale that warrants the costs of establishing the compliance program elements described in §§ ____.20(b) and ____.20(e) of the 2013 final rule. Accordingly, the Agencies believe it is appropriate to require banking entities with significant trading assets and liabilities to maintain a six-pillar compliance program to ensure that banking entities' activities are conducted in compliance with section 13 of the BHC Act and the implementing regulations.

As described further in the ''Enhanced Minimum Standards for Compliance Programs'' below, the Agencies are proposing to eliminate the current enhanced compliance program requirements found in Appendix B of the 2013 final rule. The Agencies believe that the six-pillar compliance program requirements (currently in § ____.20(b) of the 2013 final rule) can be appropriately tailored to the size and activities of each banking entity that is subject to these requirements. The proposed approach would afford banking entities flexibility to integrate the § ____.20 compliance program requirements into other compliance programs of the banking entity, which may reduce complexity for banking entities currently subject to the enhanced compliance program requirements.

Question 203. Should the six-pillar compliance program requirements apply only to banking entities with significant trading assets and liabilities? Is the scope of the six-pillar compliance program appropriate? Why or why not? Are there particular aspects of this requirement that should be modified or eliminated? If so, which ones and why?

ii. CEO Attestation Requirement

The 2013 final rule includes a requirement, currently included in Appendix B, that a banking entity CEO must review and annually attest in writing to the appropriate Agency that the banking entity has in place processes to establish, maintain, enforce, review, test and modify the compliance program established pursuant to Appendix B and § ____.20 of the 2013 final rule in a manner reasonably designed to achieve compliance with section 13 of the BHC Act and the implementing regulations.

in certain government, agency, State or municipal obligations.'' Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation, and Office of the Comptroller of the Currency, The Volcker Rule: Community Bank Applicability (Dec. 10, 2013).

The Agencies are proposing to eliminate the current Appendix B (as described further below) but to apply a modified CEO attestation requirement for banking entities other than those with limited trading assets and liabilities. While the Agencies believe the revisions to the compliance program requirements under the proposal generally simplify the compliance program requirements, this simplification should be balanced against the requirement for all banking entities to maintain compliance with section 13 of the BHC Act and the implementing regulations. Accordingly, the Agencies believe that applying the CEO attestation requirement for banking entities with meaningful trading activities would ensure that the compliance programs established by these banking entities pursuant to § ____.20(b) or § ____.20(f)(2) of the proposal are reasonably designed to achieve compliance with section 13 of the BHC Act and the implementing regulations as proposed. The Agencies propose limiting the CEO attestation requirement to banking entities with significant trading assets and liabilities or moderate trading assets and liabilities because, if the Agencies' proposal is adopted, banking entities with limited trading assets and liabilities would be subject to a rebuttable presumption of compliance, as described below. The Agencies do not believe it is necessary to require a CEO attestation for banking entities with limited trading assets and liabilities as those banking entities would not be subject to the express requirement to maintain a compliance program pursuant to § ____.20 under the proposal.

Question 204. What are the costs associated with preparing the required CEO attestation? How significant are those costs relative to the potential benefits of requiring a CEO attestation? What are some of the specific operational or other burdens or expenses associated with the CEO attestation requirement? Please explain the circumstances under which those potential burdens or expenses may arise.

Question 205. Are there existing business practices and procedures that render the CEO attestation requirement redundant and/or unnecessary? If so, please identify and describe those existing business practices. Alternatively, are there other regulatory requirements that fulfill the same purpose as the CEO attestation with respect to a compliance program? Please explain.

Question 206. Is the scope of the CEO attestation requirements appropriate? Should banking entities with limited trading assets and liabilities, but with a large amount of consolidated assets, for example consolidated assets in excess of $50 billion be required to provide a CEO attestation with respect to the banking entity's compliance program notwithstanding that such institution may be entitled to the rebuttable presumption of compliance under the proposal?

Question 207. How costly are the existing CEO attestation requirements for banking entities, broken down based on whether they are categorized as having significant, moderate, and limited trading assets and liabilities under the proposal? How would those annual costs change if the modifications described in the proposal were adopted? Can the costs described above, both as the requirement is currently drafted and as proposed to be amended, be broken down based on the type of banking entity involved, such as for broker-dealers and registered investment advisers? Please be as specific as possible.

Question 208. Under the proposal, banking entities with limited trading assets and liabilities (for which the presumption of compliance has not been rebutted) would not be subject to the CEO attestation requirement? Do commenters agree with that approach? As an alternative, should a banking entity with limited trading assets and liabilities be subject to a similar requirement? For example, should these types of banking entities be required to conduct an annual review, to be performed by objective, qualified personnel, of its compliance with the rule and submit such annual review to its Board of Directors and the Agencies? Why or why not? What are the costs and benefits of such requirement?

iii. Covered Fund Documentation Requirements

Currently, § ____.20(e) of the 2013 final rule requires banking entities with greater than $10 billion in total consolidated assets to maintain additional documentation related to covered funds as part of their compliance program. The Agencies are proposing to apply the covered fund documentation requirements only to banking entities with significant trading assets and liabilities. The Agencies do not believe that these additional documentation requirements are necessary for banking entities without significant trading assets and liabilities because the Agencies expect that their covered funds activities may generally be smaller in scale and less complex than banking entities with significant trading assets and liabilities. Accordingly, the Agencies believe these banking entities' activities are unlikely to justify the costs associated with complying with these documentation requirements. Furthermore, the Agencies expect they would be able to examine and supervise these banking entities' compliance with the covered fund prohibition without requiring such additional documentation as part of the banking entities' compliance program.

b. Compliance Program Requirements for Banking Entities With Moderate Trading Assets and Liabilities

The 2013 final rule provides that a banking entity with total consolidated assets of $10 billion or less as measured on December 31 of the previous two years that engages in covered activities or investments pursuant to subpart B or subpart C of the 2013 final rule (other than trading activities permitted under § ____.6(a) of the 2013 final rule) may satisfy the compliance program requirements by including in its existing compliance policies and procedures references to the requirements of section 13 of the BHC Act and subpart D of the implementing regulations and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.[214]

The Agencies propose to extend availability of this simplified compliance program to all banking entities with moderate trading assets and liabilities. The Agencies believe that streamlining the compliance program requirements for banking entities with moderate trading assets and liabilities is appropriate. The scale and nature of the activities and investments in which these banking entities are engaged may not justify the additional costs associated with establishing the compliance program elements under §§ ____.20(b) and (e) of the 2013 final rule and may be appropriately examined and supervised through an appropriately tailored simplified compliance program. Consistent with the compliance program requirements for banking entities with significant trading assets and liabilities, the Agencies note that banking entities with moderate trading assets and liabilities would be able to incorporate their simplified compliance program as part of any existing compliance policies and procedures and tailor their compliance program to the size and nature of their activities.

[214] 12 CFR 44.20(f)(2).

c. Compliance Program Requirements for Banking Entities With Limited Trading Assets and Liabilities

The proposal would include a presumption of compliance for certain banking entities with limited trading assets and liabilities. Under the proposal, a banking entity that, together with its affiliates and subsidiaries on a worldwide basis, has trading assets and liabilities (excluding obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1 billion, would be presumed to be in compliance with the proposal. Banking entities meeting these conditions would have no obligation to demonstrate compliance with subpart B and subpart C of the implementing regulations on an ongoing basis. The Agencies believe, based on experience implementing and supervising compliance with the 2013 final rule, that these banking entities are generally engaged in traditional banking activities. The Agencies do not believe it is necessary to require banking entities with limited trading assets and liabilities to demonstrate compliance with the prohibitions of section 13 of the BHC Act by establishing a compliance program, given the limited scale of their trading operations. Further, the Agencies believe that the limited trading assets and liabilities of the banking entities qualifying for the presumption of compliance are unlikely to warrant the costs of establishing a compliance program under § ____.20.

A banking entity that meets the proposed criteria for the presumption of compliance would be subject to the statutory prohibitions of section 13 of the BHC Act and the implementing regulations on an ongoing basis. The Agencies would not expect a banking entity that meets the proposed criteria for the presumption of compliance to demonstrate compliance with the proposal in conjunction with the Agencies' normal supervisory and examination processes. However, the appropriate Agency may exercise its authority to treat the banking entity as if it does not have limited trading assets and liabilities if, upon review of the banking entity's activities, the relevant Agency determines that the banking entity has engaged in proprietary trading or covered fund activities that are otherwise prohibited under subpart B or subpart C. A banking entity would be expected to remediate any impermissible activity upon being notified of such determination by the Agency. A banking entity would be required to remediate the impermissible activity within a period of time deemed appropriate by the relevant Agency.

The Agencies believe this presumption of compliance for certain banking entities with limited trading assets and liabilities would allow flexibility for these banking entities to operate under their existing internal policies and procedures. The Agencies generally expect these banking entities, in the ordinary course of business, to develop and adhere to internal policies and procedures that promote prudent risk management practices.

Irrespective of whether a banking entity has engaged in activities in violation of subpart B or C of this proposal, the relevant Agency retains its authority to require a banking entity to apply the compliance program requirements that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the relevant Agency determines that the size or complexity of the banking entities trading or investment activities, or the risk of evasion, does not warrant a presumption of compliance.

Question 209. Should the Agencies specify the notice and response procedures in connection with an Agency determination that the presumption pursuant to ____.20(g)(2) is rebutted? Why or why not?

d. Enhanced Minimum Standards

i. Enhanced Minimum Standards for Compliance Programs

Section ____. 20(c) of the 2013 final rule requires certain banking entities to establish, maintain and enforce an enhanced compliance program that includes the requirements and standards. Appendix B of the 2013 final rule specifies the enhanced minimum standards applicable to the compliance programs of large banking entities and banking entities engaged in significant trading activities. Section I.a of Appendix B provides that the enhanced compliance program must:

- Be reasonably designed to identify, document, monitor, and report the covered trading and covered fund activities and investments of the banking entity; identify, monitor and promptly address the risks of these covered activities and investments and potential areas of noncompliance; and prevent activities or investments prohibited by, or that do not comply with, section 13 of the BHC Act and the 2013 final rule;
- Establish and enforce appropriate limits on the covered activities and investments of the banking entity, including limits on the size, scope, complexity, and risks of the individual activities or investments consistent with the requirements of section 13 of the BHC Act and the 2013 final rule;
- Subject the effectiveness of the compliance program to periodic independent review and testing, and ensure that the entity's internal audit, corporate compliance and internal control functions involved in review and testing are effective and independent;
- Make senior management, and others as appropriate, accountable for the effective implementation of the compliance program, and ensure that the board of directors and CEO (or equivalent) of the banking entity review the effectiveness of the compliance program; and
- Facilitate supervision and examination by the Agencies of the banking entity's covered trading and covered fund activities and investments.

The Agencies continue to believe that banking entities with significant trading assets and liabilities should have detailed and comprehensive programs for ensuring compliance with the requirements of section 13 of the BHC Act. The Agencies recognize, however, that many banking entities have found implementing certain aspects of the enhanced compliance program requirements of Appendix B to be inefficient, duplicative of, and in some instances inconsistent with, their existing compliance regimes and risk management programs.

While recognizing the need to establish and maintain an appropriate compliance program, the Agencies also believe that banking entities should be provided discretion to tailor their compliance programs to the structure and activities of their organizations. The flexibility to build on compliance regimes that already exist at banking entities, including risk limits, risk management systems, board-level governance protocols, and the level at which compliance is monitored, may reduce the costs and complexity of compliance while also enabling a robust compliance mechanism for section 13 of the BHC Act. After carefully considering the overall effects of the enhanced compliance program standards in the context of existing banking entity compliance frameworks, the Agencies are proposing certain modifications to limit the implementation, operational or other complexities associated with the compliance program requirements set forth in § ____.20.

The Agencies believe that many of the compliance requirements of the current enhanced compliance program could be implemented effectively if incorporated into a risk management framework already developed and designed to fit a banking entity's organizational and reporting structure. The prescribed six-pillar compliance requirements in § ____.20 are consistent with general standards of safety and soundness as well as diligent supervision, the implementation of which conforms with the traditional risk management processes of ensuring governance, controls, and records appropriately tailored to the risks and activities of each banking entity. Accordingly, the Agencies propose to eliminate the requirements of Appendix B (other than the CEO attestation) and permit banking entities with significant trading assets and liabilities to satisfy compliance program requirements by meeting the six elements currently specified in § ____.20(b) of the 2013 final rule, commensurate with the size, scope, and complexity of their activities and business structure, and subject to a CEO attestation requirement.

A banking entity that does not have significant trading assets and liabilities under the proposal, but which is currently subject to Appendix B under the 2013 final rule, would be permitted to satisfy its compliance requirements in the proposal by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act as appropriate given the activities, size, scope, and complexity of the banking entity.

ii. Proprietary Trading Activities

Section II.a of Appendix B of the 2013 final rule generally requires a banking entity subject to the Appendix, in addition to the requirements of § ____.20, to: (1) Have written policies and procedures governing each trading desk; (2) include a comprehensive description of the risk management program for the trading activity of the banking entity; (3) implement and enforce limits and internal controls for each trading desk that are reasonably designed to ensure that trading activity is conducted in conformance with section 13 of the BHC Act and subpart B and with the banking entity's policies and procedures; (4) establish, maintain and enforce policies and procedures regarding the use of risk-mitigating hedging instruments and strategies; (5) perform robust analysis and quantitative measurement of its trading activities that is reasonably designed to ensure that the trading activity of each trading desk is consistent with the banking entity's compliance program, monitor and assist in the identification of potential and actual prohibited proprietary trading activity, and prevent the occurrence of prohibited proprietary trading; (6) identify the activities of each trading desk that will be conducted in reliance on the exemptions contained in §§ ____.4 through ____.6; and (7) be reasonably designed and established to effectively monitor and identify for further analysis any proprietary trading activity that may indicate potential violations of section 13 of the BHC Act and subpart B and to prevent violations of section 13 of the BHC Act and subpart B.

These requirements of Appendix B in the 2013 final rule reflect the Agencies' expectation that banking organizations with significant trading activities adopt compliance regimes that, among other things, take into account the size and complexity of the banking entity's activities and structure of its business. However, the Agencies recognize that operationalizing the prescriptive requirements of Appendix B may limit the ability of banking entities to adapt their existing risk management frameworks for purposes of compliance with the 2013 final rule. Therefore, based on experience since the adoption of the 2013 final rule, the Agencies believe that a banking entity currently subject to Appendix B requirements under the 2013 final rule should be permitted to implement an appropriately robust compliance program by tailoring the requirements of § ____.20 to the type, size, scope, and complexity of its activities and business structure. The Agencies are therefore proposing to eliminate the requirements of section II.a of Appendix B in order to reduce the operational complexities associated with the compliance requirements of the 2013 final rule. As described above, the Agencies believe that the compliance program requirements in §§ ____.20 can be appropriately scaled (pursuant to § ____.20(a)) to the size, scope, and complexity of each banking entity and should afford banking entities flexibility to integrate their § ____.20 compliance program into their other compliance programs.

The Agencies believe that, under the proposal, compliance programs that satisfy § ____.20 and that are appropriately tailored to the size, scope, and complexity of the banking entity's activities, would be effective in meeting the objectives underlying the enhanced requirements set forth in Appendix B of the 2013 final rule with respect to proprietary trading activities. Furthermore, affording banking entities the flexibility to adapt their existing risk management frameworks to satisfy the requirements of § ____.20 would reduce the complexity of compliance with section 13 of the BHC Act and the implementing regulations.

Question 210. The Agencies are requesting comment on whether the requirements of § ____.20 of the proposal would be effective in ensuring that banking entities with significant trading assets and liabilities and banking entities with moderate trading assets and liabilities comply with the proprietary trading requirements and restrictions of section 13 of the BHC Act and the proposal. In addition to the CEO attestation requirement in proposed § ____.20(c), are there certain requirements included in Appendix B that should be incorporated into the requirements of § ____.20, particularly with respect to banking entities with significant trading assets and liabilities, in order to ensure compliance with the proprietary trading requirements and restrictions of section 13 of the BHC Act and the proposal? To what extent would the elimination of Appendix B reduce the complexity of compliance with section 13 of the BHC Act? What other options should the Agencies consider in order to reduce complexity while still ensuring robust compliance with the proprietary trading requirements and restrictions of section 13 of the BHC Act and the implementing regulations?

iii. Covered Fund Activities and Investments

The enhanced minimum standards in section II.b of Appendix B of the 2013 final rule prescribe the establishment, maintenance and enforcement of a compliance program that includes written policies and procedures that are appropriate for the type, size, complexity, and risks of the covered fund and related activities conducted and investments made, by a banking entity. In addition to the requirements of § ____.20, § II.b of Appendix B requires that compliance programs be designed to: (1) Include appropriate management review and independent testing for identifying and documenting covered funds in which the banking entity invests, or that each unit within the banking entity's organization sponsors or organizes and offers, and covered funds in which each such unit invests; (2) identify, document, and map each unit within the organization that is permitted to acquire or hold an interest in any covered fund or sponsor any covered fund; (3) explain the banking entity's strategy for monitoring, mitigating, or prohibiting conflicts of interest, transactions or covered fund activities and investments that may threaten safety and soundness, and exposure to high-risk assets and trading strategies presented by its covered fund activities and investments; (4) document the covered fund activities and investments that each organizational unit is authorized to conduct, the banking entity's plan for actively seeking unaffiliated investors to ensure that any investment by the banking entity conforms to the limits contained in section 12 or registered in compliance with the securities laws and is thereby exempt from those limits within the time periods allotted in section 12, and how it complies with the requirements of subpart C; (5) establish, maintain, and enforce internal controls that are reasonably designed to ensure that the banking entity's covered fund activities or investments are compliant and to detect potential compliance violations; and (6) identify, document, address, and remedy any compliance violations.

The 2013 final rule subjects certain banking entities to the enhanced minimum compliance standards of Appendix B to reflect the Agencies' expectation that banking entities with significant covered fund activities or investments adopt sophisticated compliance regimes. However, the Agencies recognize that operationalizing these requirements may restrict the flexibility of banking entities to adapt their existing risk management frameworks for purposes of compliance with the 2013 final rule. The Agencies believe that a banking entity with significant trading assets and liabilities or moderate trading assets and liabilities currently subject to Appendix B requirements could effectively implement an appropriately robust compliance program by tailoring the requirements of § ____.20 to the type, size, scope, and complexity of its covered fund activities and business structure. Accordingly, the Agencies propose to eliminate the requirements of § II.b of Appendix B to the 2013 final rule.

Under the proposal, a banking entity with significant trading assets and liabilities or with moderate trading assets and liabilities would satisfy the compliance program requirements by appropriately scaling the compliance program requirements in § ____.20. A banking entity with significant trading assets and liabilities would also be required to adopt the covered fund documentation requirements in § ____.20(e) of the proposal.

The Agencies believe that, under the proposal, compliance programs that satisfy the foregoing requirements and that are appropriately tailored to the size, scope, and complexity of the banking entity's activities, would be effective in meeting the objectives underlying the enhanced requirements set forth in Appendix B of the 2013 final rule with respect to covered fund investments and activities. Furthermore, affording banking entities the flexibility to adapt their existing risk management frameworks to satisfy the § ____.20 compliance program requirements would reduce the complexity of compliance with section 13 of the BHC Act.

Question 211. The Agencies are requesting comment on whether the requirements of § ____.20 of the proposal would, if appropriately tailored to the size, scope, and complexity of the banking entity's activities, be effective in ensuring that banking entities with significant trading assets and liabilities and banking entities with moderate trading assets and liabilities comply with the covered fund requirements and restrictions of section 13 of the BHC Act and the implementing regulations. In addition to CEO attestation requirement in proposed § ____.20(c), are there certain requirements included in Appendix B that should be incorporated into the requirements of § ____.20, particularly with respect to banking entities with significant trading assets and liabilities, in order to ensure compliance with the covered fund requirements and restrictions of section 13 of the BHC Act and the implementing regulations? To what extent would the elimination of Appendix B reduce the complexity of compliance with section 13 of the BHC Act? What other options should the Agencies consider in order to reduce complexity while still ensuring robust compliance with the covered fund requirements and restrictions of section 13 of the BHC Act and the implementing regulations?

Question 212. How do banking entities that are registered investment advisers currently meet their compliance program obligations? That is, to what extent are banking entities' compliance programs related to the covered fund prohibitions of the 2013 final rule implemented by the registered investment adviser as opposed to the other affiliates or subsidiaries that are part of the banking entity? How costly are the existing compliance program requirements for banking entities that are registered investment advisers, broken down based on whether they are categorized as having significant, moderate, and limited trading assets and liabilities under the proposal? How would those annual costs change if the modifications described in the proposal were adopted?

iv. Responsibility and Accountability

Appendix B of the 2013 final rule contains a CEO attestation requirement as part of the enhanced minimum standards for compliance programs as a means to ensure that a strong governance framework is implemented with respect to compliance with section 13 of the BHC Act. This provision requires a banking entity's CEO to review and annually attest in writing to the appropriate Agency that the banking entity has in place processes to establish, maintain, enforce, review, test and modify the compliance program established pursuant to Appendix B and § ____.20 of the 2013 final rule in a manner reasonably designed to achieve compliance with section 13 of the BHC Act and the 2013 final rule. Appendix B of the 2013 final rule also specifies that in the case of the U.S. operations of a foreign banking entity, including a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

Consistent with the Agencies' proposal to remove the specific, enhanced minimum standards included in Appendix B of the 2013 final rule, the Agencies propose to incorporate the CEO attestation requirement within § ____.20(c) so that it will to apply to banking entities with significant trading assets and liabilities and banking entities with moderate trading assets and liabilities. Further, the Agencies propose that the CEO attestation requirement in § ____.20(c) specify that in the case of the U.S. operations of a foreign banking entity, including a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

Preserving the CEO attestation requirement and incorporating it within the proposal underscores the importance of CEO engagement within the overall compliance framework for banking entities with significant trading assets and liabilities and for banking entities with moderate trading assets and liabilities. The Agencies believe that the CEO attestation requirement may reinforce the importance of creating and communicating an appropriate ''tone at the top,'' setting an appropriate culture of compliance, and establishing clear policies regarding the management of the firm's covered trading activities and its covered fund activities and investments.

The Agencies believe that incorporating the CEO attestation requirement into proposed § ____.20(c) could help to ensure that the compliance program established pursuant to that section is reasonably designed to achieve compliance with section 13 of the BHC Act and the implementing regulations, while the removal of the specific, enhanced minimum standards in Appendix B will afford a banking entity considerable flexibility to satisfy the elements of § ____.20 in a manner that it determines to be most appropriate given its existing compliance regimes, organizational structure, and activities.

Question 213. The Agencies are requesting comment on whether incorporating the CEO attestation requirement in proposed § ____.20(c) would ensure that a strong governance framework is implemented with respect to compliance with section 13 of the BHC Act and the proposal. What other options should the Agencies consider in order to encourage CEO engagement in ensuring robust compliance with section 13 of the BHC Act and the proposal?

v. Independent Testing

After careful consideration, the Agencies propose to eliminate the specific enhanced minimum standards for independent testing prescribed in Appendix B, section IV of the 2013 final rule and permit banking entities with significant trading assets and liabilities to satisfy the compliance program requirements by meeting the independent testing requirements outlined in § ____.20(b)(4) of the proposal. Section ____.20(b)(4) of the proposal specifies that the contents of the compliance program shall include independent testing and audit of the effectiveness of the compliance program conducted periodically by qualified personnel of the banking entity or by a qualified outside party. As with all elements of the required compliance program under proposed § ____.20(b), independent testing should be designed and implemented in a manner that is appropriate for the type, size, scope, and complexity of activities and business structure of the banking entity. Section ____.20(b)(4) allows for a tailored approach to ensure that the effectiveness of the compliance program is subject to an objective review with appropriate frequency and depth. Under the proposal, a banking entity with moderate trading assets and liabilities would be permitted to incorporate independent testing into its existing compliance programs as appropriate given the activities, size, scope, and complexity of the banking entity.

vi. Training

After careful consideration, the Agencies propose to eliminate the training element of the enhanced compliance program of Appendix B, section V of the 2013 final rule and permit banking entities to satisfy compliance program requirements by meeting the training requirements outlined in § ____.20(b)(5) of the proposal. Section ____.20(b)(5) specifies that the contents of the compliance program shall include training for trading personnel and managers, as well as other appropriate personnel, to effectively implement and enforce the compliance program. As with all elements of the required compliance program under § ____.20(b), the Agencies expect the training regimen to be designed and implemented in a manner that is appropriate for the type, size, scope, and complexity of activities and business structure of the banking entity. Under the proposal, a banking entity with moderate trading assets and liabilities would be permitted to incorporate training into its existing compliance programs as appropriate given the activities, size, scope and complexity of the banking entity.

vii. Recordkeeping

Appendix B, section VI of the 2013 final rule requires banking entities to create and retain records sufficient to demonstrate compliance and support the operations and effectiveness of the compliance program. After careful consideration, the Agencies believe that the enhanced minimum standards under Appendix B, section VI can be replaced by the requirements prescribed in § ____.20(b)(6) of the proposal. Section ____.20(b)(6) of the proposal specifies that the banking entity must establish records sufficient to demonstrate compliance with section 13 of the BHC Act and subpart D and promptly provide to the relevant Agency upon request and retain such records for no less than 5 years or for such longer period as required by the relevant Agency. As with all elements of the required compliance program under § ____.20(b), the Agencies expect the record keeping requirement to be designed and implemented in a manner that is appropriate for the type, size, scope, and complexity of activity and business structure of the banking entity. A banking entity with moderate trading assets and liabilities would be permitted to incorporate recordkeeping into its existing compliance programs as appropriate given the activities, size, scope, and complexity of the banking entity.

Question 214. The Agencies are requesting comment on whether the existing independent testing, training, and recordkeeping requirements of § ____.20(b) would, if appropriately tailored to the size, scope, and complexity of the banking entity's activities, be effective in ensuring that banking entities with significant trading assets and liabilities and moderate trading assets and liabilities comply with the requirements and restrictions of section 13 of the BHC Act and the implementing regulations. Are there certain requirements included in independent testing, training, and recordkeeping requirements of Appendix B that should be incorporated into the requirements of § ____.20, particularly with respect to banking entities with significant trading, in order to ensure compliance with the requirements and restrictions of section 13 of the BHC Act and the implementing regulations? To what extent would the elimination of the independent testing, training, and recordkeeping requirements of Appendix B reduce the complexity of complying with section 13 of the BHC Act? What other options should the Agencies consider with respect to independent testing, training, and recordkeeping in order to reduce complexity while still ensuring robust compliance with the requirements and restrictions of section 13 of the BHC Act and the implementing regulations?

e. Summary of Proposed Revisions to Compliance Program Requirements

The following table provides a summary of the proposed changes to the compliance program requirements:

SUMMARY OF PROPOSED CHANGES TO COMPLIANCE PROGRAM REQUIREMENTS

Requirement (citation to 2013 final rule)	Banking entities subject to requirement in 2013 final rule	Banking entities subject to requirement in proposal
6 Pillar Compliance Program (Section ____.20(b)).	Banking entities with more than $10 billion in total consolidated assets.	Banking entities with significant trading assets and liabilities.
Enhanced compliance program (Section ____.20(c), Appendix B).	Banking entities with: • $50 billion or more in total consolidated assets, or. • Trading assets and liabilities of $10 billion or greater over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters, if the banking entity engages in proprietary trading activity permitted under subpart B. • Additionally, any other banking entity notified in writing by the Agency.	Not applicable. Enhanced compliance program eliminated (but see CEO Attestation Requirement below).
CEO Attestation Requirement (Section ____.20(c), Appendix B).	Banking entities with: • $50 billion or more in total consolidated assets, or. • Trading assets and liabilities of $10 billion or greater over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters. • Additionally, any other banking entity notified in writing by the Agency.	• Banking entities with significant trading assets and liabilities. • Banking entities with moderate trading assets and liabilities. • Any other banking entity notified in writing by the Agencythe Agency.
Metrics Reporting Requirements (Section ____.20(d), Appendix A).	• Banking entities with trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters, is $10 billion or greater, if the banking entity engages in proprietary trading activity permitted under subpart B. • Any other banking entity notified in writing by the Agency.	• Banking entities with significant trading assets and liabilities.
Additional covered fund documentation requirements (Section ____.20(e)).	Banking entities with more than $10 billion in total consolidated assets as reported on December 31 of the previous two calendar years.	Banking entities with significant trading assets and liabilities.
Simplified program for banking entities with no covered activities (Section ____.20(f)(1)).	Banking entities that do not engage in activities or investments pursuant to subpart B or subpart C (other than trading activities permitted pursuant to § ____.6(a) of subpart B).	Banking entities that do not engage in activities or investments pursuant to subpart B or subpart C (other than trading activities permitted pursuant to § ____.6(a) of subpart B).
Simplified program for banking entities with modest activities (Section ____.20(f)(2)).	Banking entities with $10 billion or less in total consolidated assets as reported on December 31 of the previous two calendar years that engage in activities or investments pursuant to subpart B or subpart C (other than trading activities permitted pursuant to § ____.6(a) of subpart B).	Banking entities with moderate trading assets and liabilities.
No compliance program requirement unless Agency directs otherwise (N/A).	Not applicable	Banking entities with limited trading assets and liabilities subject to the presumption of compliance.

E. Appendix to Part [•]—Reporting and Recordkeeping Requirements

1. Overview of the Proposal and Significant Changes From the 2013 Final Rule

As provided in the preamble to the 2013 final rule, the Agencies have assessed the metrics data for its effectiveness in monitoring covered trading activities for compliance with section 13 of the BHC Act and for its costs.[215] The Agencies have also considered whether all of the quantitative measurements are useful for all asset classes and markets, as well as for all the trading activities subject to the metrics requirement, or whether modifications are appropriate.[216] As a result of this evaluation, and as described in detail below, the Agencies are proposing the following amendments to Appendix A of the 2013 final rule:[217]

- Limit the applicability of certain metrics only to market making and underwriting desks.
- Replace the Customer-Facing Trade Ratio with a new Transaction Volumes metric to more precisely cover types of trading desk transactions with counterparties.
- Replace Inventory Turnover with a new Positions metric, which measures the value of all securities and derivatives positions.

[215] *See* 79 FR at 5772.

[216] *Id.*

[217] In connection with the Appendix, the following documents have also been published and made available on each Agency's respective website: Instructions for Preparing and Submitting Quantitative Measurement Information (''Instructions''), Technical Specifications Guidance, and an eXtensible Markup Language Schema (''XML Schema'').

- Remove the requirement to separately report values that can be easily calculated from other quantitative measurements already reported.
- Streamline and make consistent value calculations for different product types, using both notional value and market value to facilitate better comparison of metrics across trading desks and banking entities.
- Eliminate inventory aging data for derivatives because aging, as applied to derivatives, does not appear to provide a meaningful indicator of potential impermissible trading activity or excessive risk-taking.
- Require banking entities to provide qualitative information specifying for each trading desk the types of financial instruments traded, the types of covered trading activity the desk conducts, and the legal entities into which the trading desk books trades.
- Require a Narrative Statement describing changes in calculation methods, trading desk structure, or trading desk strategies.
- Remove the paragraphs labeled ''General Calculation Guidance'' from the regulation. The Instructions generally would provide calculation guidance.[218]
- Remove the requirement that banking entities establish and report limits on Stressed Value-at-Risk at the trading desk-level because trading desks do not typically use such limits to manage and control risk-taking.
- Require banking entities to provide descriptive information about their reported metrics, including information uniquely identifying and describing certain risk measurements and information identifying the relationships of these measurements within a trading desk and across trading desks.
- Require electronic submission of the Trading Desk Information, Quantitative Measurements Identifying Information, and each applicable quantitative measurement in accordance with the XML Schema specified and published on each Agency's website.[219]

Taken together, these changes—particularly limiting the applicability of certain metrics requirements only to trading desks engaged in certain types of covered trading activity—are designed to reduce compliance-related inefficiencies relative to the 2013 final rule. The proposed amendments to Appendix A of the 2013 final rule should allow collection of data that permits the Agencies to better monitor compliance with section 13 of the BHC Act.[220]

2. Summary of the Proposal

a. Purpose

Paragraph I.c of Appendix A of the 2013 final rule provides that the quantitative measurements that are required to be reported under the rule are not intended to serve as a dispositive tool for identifying permissible or impermissible activities. The Agencies propose to expand paragraph I.c of Appendix A of the 2013 final rule to cover all information that must be furnished pursuant to the appendix, rather than only to the quantitative measurements themselves.[221]

The Agencies propose to remove paragraph I.d. in Appendix A of the 2013 final rule, which provides for an initial review by the Agencies of the metrics data and revision of the collection requirement as appropriate. The Agencies have conducted this preliminary evaluation of the effectiveness of the quantitative measurements collected to date and are proposing modifications to Appendix A of the 2013 final rule where appropriate. The Agencies are, however, requesting comment on whether the rule should provide for a subsequent Agency review within a fixed period of time after adoption to consider whether further changes are warranted. The Agencies further note that they continue to monitor and review the effectiveness of the data as part of their ongoing oversight of the banking entities and will continue to do so should the proposed changes to Appendix A be adopted.

b. Definitions

The Agencies are proposing a clarifying change to the definition of ''covered trading activity.'' The Agencies are proposing to add the phrase ''in its covered trading activity'' to clarify that the term ''covered trading activity,'' as used in the proposed appendix, may include trading conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e) of the proposal. The proposed change would simply clarify that banking entities would have the discretion (but not the obligation) to report metrics with respect to a broader range of activities.

In addition, the proposal defines two additional terms for purposes of the appendix, ''applicability'' and ''trading day,'' that were not defined in the 2013 final rule. In particular, the proposal provides:

- *Applicability* identifies the trading desks for which a banking entity is required to calculate and report a particular quantitative measurement based on the type of covered trading activity conducted by the trading desk.
- *Trading day* means a calendar day on which a trading desk is open for trading.

''Applicability'' is defined in this proposal to clarify when certain metrics are required to be reported for specific trading desks. As described further below, this proposal would make several metrics applicable only to desks engaged in market making or underwriting.

The Agencies are proposing to create a definition of ''trading day'' to clarify the meaning of a term that is used throughout Appendix A of the 2013 final rule. Appendix A provides that the calculation period for each quantitative measurement is one trading day. The proposal would make clear that a banking entity would be required to calculate each metric for each calendar day on which a trading desk is open for trading.[222] If a trading desk books positions to a banking entity on a calendar day that is not a business day (*e.g.,* a day that falls on a weekend), then the desk is considered open for trading on that day. Even if a trading desk does not conduct any trades on a business day, the banking entity would be required to report metrics on the trading desk's existing positions for that calendar day because the trading desk is open to conduct trading. Similarly, if a trading desk spans a U.S. entity and a

[218] The Instructions are available on each Agency's respective website at the addresses specified in the Paperwork Reduction Act section of this **SUPPLEMENTARY INFORMATION**. For the SEC and CFTC, this document represents the views of SEC staff and CFTC staff, and neither Commission has approved nor disapproved the Staff Instructions for Preparing and Submitting Quantitative Measurement Information.

[219] The staff-level Technical Specifications Guidance describes the XML Schema. The Technical Specifications Guidance and the XML Schema are available on each Agency's respective website at the addresses specified in the Paperwork Reduction Act section of this Supplementary Information.

[220] As previously noted in the section entitled ''Enhanced Minimum Standards for Compliance Programs,'' the Agencies are proposing to eliminate Appendix B of the 2013 final rule. If that aspect of the proposal is adopted, current Appendix A, as modified by the proposal, would be re-designated as the ''Appendix.''

[221] The proposed amendment to paragraph I.c. of Appendix A would make clear that none of the information that a banking entity would be required to report under the proposal is intended to serve as a dispositive tool for identifying permissible or impermissible activities. Currently, that qualifying language only applies to the quantitative measurements. As proposed, that information would continue to be used to monitor patterns and identify activity that may warrant further review.

[222] As a general matter, a trading desk is not considered to be open for trading on a weekend.

foreign entity and a national holiday occurs on a business day in the United States but not in the foreign jurisdiction (or vice versa), the banking entity would be required to report metrics for the trading desk on that calendar day because the trading desk is open to conduct trading in at least one jurisdiction. The Agencies believe that the proposed definition of trading day is both objective and transparent, while also providing flexibility to banking entities by tying the definition directly to the schedule in which they operate their trading desks.

The Agencies request comments on the definitions in this proposal, including comments on the following questions:

Question 215. Is the proposed definition of ''Applicability'' effective and clear? If not, what alternative definition would be more effective and/or clearer?

Question 216. Is the proposed definition of ''Trading day'' effective and clear? If not, what alternative definition would be more effective and/or clearer?

Question 217. Is the proposed modification of ''Covered trading activity'' effective and clear? If not, what alternative definition would be more effective and/or clearer?

Question 218. Should any other terms be defined? If so, are there existing definitions in other rules or regulations that could be used in this context? Why would the use of such other definitions be appropriate?

c. Reporting and Recordkeeping

i. Scope of Required Reporting

The Agencies are proposing several modifications to paragraph III.a of Appendix A of the 2013 final rule. The Agencies are proposing to remove the Inventory Turnover and Customer-Facing Trade Ratio metrics and replace them with the Positions and Transaction Volumes quantitative measurements, respectively. In addition, as discussed below, the proposal provides that the Inventory Aging metric would only apply to securities, and would not apply to derivatives or securities that also meet the 2013 final rule's definition of a derivative.[223] As a result, the Agencies are proposing to change the name of the Inventory Aging quantitative measurement to the Securities Inventory Aging metric. Moreover, as described in more detail below, the Agencies are proposing amendments to Appendix A that would limit the application of certain quantitative measurements to trading desks that engage in specific covered trading activities.[224] As a result, the Agencies are proposing to add the phrase ''as applicable'' to paragraph III.a.[225] Finally, the Agencies are proposing to add references in paragraph III.a to the proposed Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement requirements.[226]

d. Trading Desk Information

The Agencies are proposing to add new paragraph III.b to Appendix A to require banking entities to report certain descriptive information regarding each trading desk engaged in covered trading activity:

i. Trading Desk Name and Trading Desk Identifier

Under paragraph III.b. of the proposed Appendix, the banking entity would be required to provide the trading desk name and trading desk identifier for each desk engaged in covered trading activities. While this proposed requirement may affect the banking entity's overall reporting obligations, this identifying information should enable the Agencies to track a banking entity's trading desk structure over time, which the Agencies believe will help identify situations when a significant data change is the result of a structural change and assist the Agencies' ability to monitor patterns in the quantitative measurements. The Agencies also believe that the proposed qualitative information, including the items identified in the sections below, potentially could provide the Agencies with enough contextual basis to facilitate the examination and supervisory processes. Such context also could potentially lessen the need for Agency follow-up in when a red flag is identified.

The trading desk name must be the name of the trading desk used internally by the banking entity. The trading desk identifier is a unique identification label that should be permanently assigned to a desk by the banking entity. A trading desk at a banking entity may not have the same trading desk identifier as another desk at that banking entity. The trading desk identifier that is assigned to each desk should remain the same for each submission of quantitative measurements. In the event a banking entity restructures its operations and merges two or more trading desks, the banking entity should assign a new trading desk identifier to the merged desk (*i.e.,* the merged desk's identifier should not replicate a trading desk identifier assigned to a previously unmerged trading desk) and permanently retire the unmerged desks' identifiers. Similarly, if a banking entity eliminates a trading desk, the trading desk identifier assigned to the eliminated desk should be permanently retired (*i.e.,* the eliminated desk's identifier should not be reassigned to a current or future trading desk).

Question 219. Should the Agencies require banking entities to report changes in desk structure in the XML reporting format in addition to a description of the changes in the Narrative Statement? For example, a ''change event'' element could be added to the proposal that would link the trading desk identifiers of predecessor and successor desks before and after trading desk mergers and splits. Would the modifications improve the banking entities' and the Agencies' ability to track changes in trading desk structure and strategy across reporting periods? How significant are any potential costs relative to the potential benefits in facilitating the tracking of trading desk changes? Please quantify your answers, to the extent feasible.

ii. Type of Covered Trading Activity

Proposed paragraph III.b. would require a banking entity to identify each type of covered trading activity that the trading desk conducts. As previously discussed, the proposal defines ''covered trading activity,'' in part, as trading conducted by a trading desk under §§ ____.4, ____.5, ____.6(a), or ____.6(b).[227] To the extent a trading desk relies on one or more of these permitted activity exemptions, the banking entity would be required to identify the type(s)

[223] *See infra* Part III.E.2.*i*.v (discussing the Securities Inventory Aging quantitative measurement). The definition of ''security'' and ''derivative'' are set forth in § ____.2 of the 2013 final rule. *See* 2013 final rule §§ ____.2 (h), (y).

[224] As discussed below, the proposed Positions, Transaction Volumes, and Securities Inventory Aging quantitative measurements generally apply only to trading desks that rely on § ____.4(a) or § ____.4(b) to conduct underwriting activity or market making-related activity, respectively. *See infra* Part III.E.2.*i*.iii (discussing the Positions, Transaction Volumes, and Securities Inventory Aging quantitative measurements).

[225] *See* 79 FR at 5616.

[226] In addition, the Agencies propose to add to paragraph III.a. a requirement that banking entities include file identifying information in each submission to the relevant Agency pursuant to Appendix A of the 2013 final rule. File identifying information reflects administrative information needed to identify the reporting requirement that is being met and distinguish between files submitted pursuant to Appendix A. File identifying information must include the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, the reporting period, and the creation date and time.

[227] *See supra* Part III.E.2.b (discussing the covered trading activity definition).

of covered trading activity (*e.g.,* underwriting, market making, risk-mitigating hedging, etc.) in which the trading desk is engaged.

The proposed definition of ''covered trading activity'' also provides that a banking entity may include in its covered trading activity trading conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e). If a trading desk relies on any of the exclusions discussed in § ____.3(e) or the permitted activity exemptions discussed in §§ ____.6(c) through ____.6(e) and the banking entity includes such activity as ''covered trading activity'' for the desk under the proposed Appendix, the banking entity would need to identify these activity types (*e.g.,* securities lending, liquidity management, fiduciary transactions, etc.) for the trading desk.

While this proposed requirement may impact a firm's overall reporting obligations, the Agencies believe the identification of each desk's covered trading activity will help the relevant Agency establish the appropriate scope of examination of such activity and assist with identifying the relevant exemptions or exclusions for a particular trading desk, which in turn enables an evaluation of a desk's reported data in the context of those exemptions or exclusions.

iii. Trading Desk Description

Proposed paragraph III.b. would require a banking entity to provide a description of each trading desk engaged in covered trading activities. Specifically, the banking entity would be required to provide a brief description of the trading desk's general strategy (*i.e.,* the method for conducting authorized trading activities). The Agencies believe this descriptive information would improve the Agencies ability to assess the risks associated with a given covered trading activity and would further assist the relevant Agency in determining the appropriate frequency and scope of examination of such activity.

iv. Types of Financial Instruments and Other Products

Proposed paragraph III.b. would require a banking entity to provide descriptive information regarding the financial instruments and other products traded by each desk engaged in covered trading activities. Under the proposal, a banking entity would be required to prepare a list identifying all the types of financial instruments purchased and sold by the trading desk.[228] The banking entity may include other products that are not defined as financial instruments under § ____.3(c)(1) of the 2013 final rule in this list. In addition, the proposal requires a banking entity to indicate which of these financial instruments and other products (if applicable) are the main instruments and products purchased and sold by the trading desk. If the trading desk relies on the permitted activity exemption for market making-related activities, the banking entity would be required to specify whether each type of financial instrument included in the listing of all financial instruments is or is not included in the trading desk's market-making positions.[229]

The proposal also addresses ''excluded products'' traded by desks engaged in covered trading activities. The definition of the term ''financial instrument'' in the 2013 final rule does not include loans, spot commodities, and spot foreign exchange or currency (collectively, ''excluded products'').[230] While positions in excluded products are not subject to the 2013 final rule's restrictions on proprietary trading, a banking entity may decide to include exposures in excluded products that are related to a trading desk's covered trading activities in its quantitative measurements.[231] A banking entity generally should use a consistent approach for including or excluding positions in products that are not financial instruments when calculating metrics for a trading desk.[232]

In recognition that a banking entity may include excluded products in its quantitative measurements, proposed paragraph III.b. would require a banking entity to indicate whether each trading desk engaged in covered trading activities is including excluded products in its quantitative measurements. If excluded products are included in a trading desk's metrics, the banking entity would have to identify the specific products that are included.

This information should enable the Agencies to better understand the scope of covered trading activities, and thus help in identifying the profile of particular covered trading activities of a banking entity and its individual trading desks. Such identification is necessary to establish the appropriate frequency and scope of examination by the relevant Agency of such activity, evaluate whether a banking entity's covered trading activity is consistent with the 2013 final rule, and assess the risks associated with the activity.

v. Legal Entities the Trading Desk Uses

As discussed in the preamble to the 2013 final rule, the Agencies recognize that a trading desk may book positions into a single legal entity or into multiple affiliated legal entities.[233] To assist in establishing the appropriate scope of examination by the relevant Agency of a banking entity's covered trading activities, the Agencies are proposing to require each banking entity to identify each legal entity that serves as a booking entity for each trading desk engaged in covered trading activities, and to indicate which of these legal entities are the main booking entities for covered trading activities of each desk. The banking entity would have to provide the complete name for each legal entity (*i.e.,* the banking entity could not use abbreviations or acronyms), and the banking entity would have to provide any applicable entity identifiers.[234]

vi. Legal Entity Type Identification

The Agencies are proposing to require each banking entity to specify any applicable entity type for each legal entity that serves as a booking entity for

[228] For example, a banking entity may specify that its high grade credit trading desk purchases and sells the following types of financial instruments: U.S. corporate debt, convertible bonds, credit default swaps, and credit default swap indices.

[229] The term ''market-maker positions'' means all of the positions in the financial instruments for which the trading desk stands ready to make a market in accordance with paragraph § ____.4(b)(2)(i) of the proposal, that are managed by the trading desk, including the trading desk's open positions or exposures arising from open transactions. *See* proposal § ____.4(b)(5).

[230] *See* 2013 final rule § ____.3(c)(2).

[231] The Agencies note that banking entities are not required to calculate quantitative measurements based on positions in products that are not ''financial instruments,'' as defined under § ____.3(c)(2) of the 2013 final rule, or positions that do not represent ''covered trading activity.'' However, a banking entity may decide to include exposures in products that are not financial instruments in a trading desk's calculations where doing so provides a more accurate picture of the risks associated with the trading desk. For example, a market maker in foreign exchange forwards or swaps that mitigates the risks of its market-maker inventory with spot foreign exchange may include spot foreign exchange positions in its metrics calculations.

[232] A banking entity generally should not incorporate excluded products in the quantitative measurements of a trading desk one month, and omit these products from the trading desk's measurements the following month. Excluded products generally should be reported consistently from period to period. Any change in reporting practice for excluded products must be identified in the banking entity's Narrative Statement for the relevant trading desk(s). *See infra* Part III.E.2.f (discussing the Narrative Statement).

[233] 79 FR at 5591.

[234] The Agencies are not proposing to require each legal entity that serves as a booking entity to obtain an entity identifier to comply with the proposed appendix. If a legal entity does not have an applicable entity identifier, it should report ''None'' in the appropriate field.

trading desks engaged in covered trading activities. The proposal provides a list of key entity types for this purpose. For example, if a trading desk books trades into a legal entity that is a U.S.-registered broker-dealer, the banking entity would indicate ''U.S.-registered broker-dealer'' in the entity type identification field for that particular trading desk. If more than one entity type applies to a particular legal entity that serves as a booking entity, the banking entity must specify any applicable entity type for that legal entity. For example, if a trading desk books trades into a legal entity that is a U.S.-registered broker-dealer and a registered futures commission merchant, the banking entity would indicate ''U.S.-registered broker-dealer'' and ''futures commission merchant'' in the entity type identification field for that particular trading desk.

The proposal also requires that a banking entity identify entity types that are not otherwise enumerated in the proposed Appendix, including a subsidiary of a legal entity that is listed where the subsidiary itself is not included in the list. For example, the Agencies understand that a trading desk may book some or all of its positions into a legal entity that is incorporated under foreign law. In this situation, the banking entity should provide a brief description of the entity (*e.g.,* foreign-registered securities dealer) in the entity type identification field for that trading desk. The Agencies believe that the information collected under this section would assist banking entities and the Agencies in monitoring and understanding the scope of covered trading activities. In particular, the proposed entity type information, in conjunction with the identification of legal entities used by the trading desk (discussed above), would facilitate the Agencies' ability to coordinate with each other, as appropriate.[235]

vii. Trading Day Indicator

In order to facilitate metrics reporting, paragraph III.b. of the proposed Appendix requires a banking entity to indicate whether each calendar date is a trading day or not a trading day for each trading desk engaged in covered trading activities. The Agencies believe that this information would assist banking entities and the Agencies in monitoring covered trading activities. Specifically, the identification of trading days and non-trading days will allow the Agencies to understand why metrics may not be reported on a particular day for a particular trading desk. In addition, the Agencies expect that this information would improve consistency in metrics reports by requiring banking entities to determine whether metrics are, or are not, required to be reported for each calendar day.

viii. Currency Reported and Currency Conversion Rate

In recognition that a banking entity may report quantitative measurements for a trading desk engaged in covered trading activities in a currency other than U.S. dollars, paragraph III.b. of the proposed Appendix requires a banking entity to specify the currency used by that trading desk as well as the conversion rate to U.S. dollars. Under the proposal, the banking entity would be required to provide the currency reported on a monthly basis and the currency conversion rate for each trading day. The Agencies believe this information would assist banking entities and the Agencies in monitoring covered trading activities by facilitating the identification of quantitative measurements reported in a currency other than U.S. dollars and the conversion of such measurements to U.S. dollars. The ability to convert a banking entity's reported quantitative measurements into one consistent currency enhances the ability of the Agencies to evaluate the metrics and facilitates cross-desk comparisons.

Question 220. Is the description of the proposal's Trading Desk Information requirement effective and sufficiently clear? If not, what alternative would be more effective or clearer? Is more or less specific guidance necessary? If so, what level of specificity is needed to prepare the proposed Trading Desk Information? If the proposed Trading Desk Information is not sufficiently specific, how should it be modified to reach the appropriate level of specificity? If the proposed Trading Desk Information is overly specific, why is it too specific and how should it be modified to reach the appropriate level of specificity?

Question 221. Is the proposed Trading Desk Information helpful to understanding the scope, type, and profile of a trading desk's covered trading activities and associated risks? Why or why not? Does the proposed Trading Desk Information appropriately highlight relevant changes in a banking entity's trading desk structure and covered trading activities over time? Why or why not? Do banking entities expect that the proposed Trading Desk Information would reduce, increase, or have no effect on the number of information requests from the Agencies regarding the quantitative measurements? Please explain.

Question 222. Is any of the information required by the proposed Trading Desk Information already available to banking entities? Please explain.

Question 223. Does the proposed Trading Desk Information strike the appropriate balance between the potential benefits of the reporting requirements for monitoring and assuring compliance and the potential costs of those reporting requirements? If not, how could that balance be improved?

Question 224. Are there burdens or costs associated with preparing the proposed Trading Desk Information, and if so, how burdensome or costly would it be to prepare such information? What are the additional burdens or costs associated with preparing this information for particular trading desks? How significant are those potential costs relative to the potential benefits of the information in understanding the scope, type, and profile of a trading desk's covered trading activities and associated risks? Are there potential modifications that could be made to the proposed Trading Desk Information that would reduce the burden or cost while achieving the purpose of the proposal? If so, what are those modifications? Please quantify your answers, to the extent feasible.

Question 225. In light of the size, scope, complexity, and risk of covered trading activities, do commenters anticipate the need to hire new staff with particular expertise in order to prepare the proposed Trading Desk Information (*e.g.,* collect data and map legal entities)? Do commenters anticipate the need to develop additional infrastructure to obtain and retain data necessary to prepare this schedule? Please explain and quantify your answers, to the extent feasible.

Question 226. What operational or logistical challenges might be associated with preparing the proposed Trading Desk Information and obtaining any necessary informational inputs?

Question 227. How might the proposed Trading Desk Information affect the behavior of banking entities? To what extent and in what ways might uncertainty as to how the Agencies will review and evaluate the proposed Trading Desk Information affect the behavior of banking entities?

Question 228. Is the meaning of the term ''main,'' as that term is used in the proposed Trading Desk Information (*e.g.,* main financial instruments or

[235] *See* 79 FR at 5758. The Agencies expect to continue to coordinate their efforts related to section 13 of the BHC Act and to share information as appropriate in order to effectively implement the requirements of that section and the 2013 final rule. *See id.*

products, main booking entities), effective and sufficiently clear? If not, how should the Agencies define this term such that it is more effective and/or clearer? Should the meaning of the term ''main'' be the same with respect to: (i) Main financial instruments or other products; and (ii) main booking entities? Why or why not?

Question 229. In addition to reporting ''main'' financial instruments or products and ''main'' booking entities, should banking entities be required to report the amount of profit and loss attributable to each ''main'' financial instrument or product and/or ''main'' booking entity utilized by the trading desk in the Trading Desk Information? Why or why not?

Question 230. Is the proposal's requirement that a banking entity identify all financial instruments or other products traded on a desk effective and clear? Why or why not? Should the Agencies provide a specific list of financial instruments or other product types from which to choose when identifying financial instruments or other products traded on a desk? If so, please provide examples.

Question 231. Should banking entities be required to report at least one valid unique entity identifier (*e.g.,* LEI, CRD, RSSD, or CIK) for each legal entity identified as a booking entity for covered trading activities of a desk? How burdensome and costly would it be for a banking entity to obtain an entity identifier for each legal entity serving as a booking entity that does not already have an identifier? What are the additional burdens or costs associated with obtaining an entity identifier for particular legal entities? How significant are those potential costs relative to the potential benefits in facilitating the identification of legal entities? Please quantify your answers, to the extent feasible.

Question 232. Is more guidance needed on what a banking entity should report in response to the proposed requirement to specify the applicable entity type(s) for each legal entity that serves as a booking entity for covered trading activities of a trading desk? If so, please explain.

Question 233. How burdensome and costly would it be for banking entities to report which Agencies receive reported quantitative measurements for each specific trading desk?

e. Quantitative Measurements Identifying Information

The Agencies are proposing to add new paragraph III.c. to the proposed Appendix to require banking entities to prepare and report descriptive information regarding their quantitative measurements. This information would have to be reported collectively for all relevant trading desks. For example, a banking entity would report one Risk and Position Limits Information Schedule, rather than separate Risk and Position Limits Information Schedules for each of those trading desks.

i. Risk and Position Limits Information Schedule

The proposed Risk and Position Limits Information Schedule requires banking entities to provide detailed information regarding each limit reported in the Risk and Position Limits and Usage quantitative measurement, including the unique identification label for the limit, the limit name, limit description, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit. The unique identification label for the limit should be a character string identifier that remains consistent across all trading desks and reporting periods. When reporting the type of limit, the banking entity would identify which of the following categories best describes the limit: Value-at-Risk, position limit, sensitivity limit, stress scenario, or other. If ''other'' is reported, the banking entity would provide a brief description of the type of limit. The Agencies believe this more detailed limit information would enable the Agencies to better understand how banking entities assess and address risks associated with their covered trading activities.

ii. Risk Factor Sensitivities Information Schedule

The proposed Risk Factor Sensitivities Information Schedule requires banking entities to provide detailed information regarding each risk factor sensitivity reported in the Risk Factor Sensitivities quantitative measurement, including the unique identification label for the risk factor sensitivity, the name of the risk factor sensitivity, a description of the risk factor sensitivity, and the risk factor sensitivity's risk factor change unit. The unique identification label for the risk factor sensitivity should be a character string identifier that remains consistent across all trading desks and reporting periods. The risk factor change unit is the measurement unit of the risk factor change that impacts the trading desk's portfolio value.[236] This proposed schedule should enable the Agencies to better understand the exposure of a banking entity's trading desks to individual risk factors.

iii. Risk Factor Attribution Information Schedule

The proposed Risk Factor Attribution Information Schedule requires banking entities to provide detailed information regarding each attribution of existing position profit and loss to risk factor reported in the Comprehensive Profit and Loss Attribution quantitative measurement, including the unique identification label for each risk factor or other factor attribution, the name of the risk factor or other factor, a description of the risk factor or other factor, and the risk factor or other factor's change unit. The unique identification label for the risk factor or other factor attribution should be a character string identifier that remains consistent across all trading desks and reporting periods. The factor change unit is the measurement unit of the risk factor or other factor change that impacts the trading desk's portfolio value.[237] This proposed schedule should improve the Agencies' understanding of the individual risk factors and other factors that contribute to the daily profit and loss of trading desks engaged in covered trading activities.

iv. Limit/Sensitivity Cross-Reference Schedule

The Agencies recognize that risk factor sensitivities that are reported in the Risk Factor Sensitivities quantitative measurement frequently relate to, or are associated with, risk and position limits that are reported in the Risk and Position Limits and Usage metric. In recognition of the relationship between risk and position limits and associated risk factor sensitivities, the Agencies propose an amendment to Appendix A of the 2013 final rule that would require banking entities to prepare a Limit/Sensitivity Cross-Reference Schedule. Specifically, banking entities would be required to cross-reference, by unique identification label, a limit reported in the Risk and Position Limits Information Schedule to any associated risk factor sensitivity reported in the Risk Factor Sensitivities Information Schedule.

Highlighting the relationship between limits and risk factor sensitivities should provide a broader picture of a

[236] For example, the risk factor change unit for the dollar value of a one-basis point change (DV01) could be reported as ''basis point.'' Similarly, the risk factor change unit for equity delta could be reported as ''dollar change in equity prices'' or ''percentage change in equity prices.''

[237] *See supra* note 236.

trading desk's covered trading activities and improve the Agencies' understanding of the quantitative measurements. For example, the proposed Limit/Sensitivity Cross-Reference Schedule should help the Agencies better evaluate a reported limit on a risk factor sensitivity by allowing the Agencies to efficiently identify additional contextual information about the risk factor sensitivity in the banking entity's metrics submission.

v. Risk Factor Sensitivity/Attribution Cross-Reference Schedule

The Agencies note that the specific risk factors and other factors that are reported in the Comprehensive Profit and Loss Attribution quantitative measurement may relate to the risk factor sensitivities reported in the Risk Factor Sensitivities metric. As a result, the Agencies are proposing an amendment to Appendix A of the 2013 final rule that would require banking entities to prepare a Risk Factor Sensitivity/Attribution Cross-Reference Schedule. Specifically, banking entities would be required to cross-reference, by unique identification label, a risk factor sensitivity reported in the Risk Factor Sensitivities Information Schedule to any associated risk factor attribution reported in the Risk Factor Attribution Information Schedule. This proposed cross-reference schedule is intended to clarify the relationship between risk factors that serve as sensitivities and the profit and loss that is attributed to those risk factors. In conjunction with the Limit/Sensitivity Cross-Reference Schedule, the Risk Factor Sensitivity/Attribution Cross-Reference Schedule should assist the Agencies in understanding the broader scope, type, and profile of a banking entity's covered trading activities and assessing associated risks, and facilitate the relevant Agency's efforts in monitoring those covered trading activities. For example, the proposed Risk Factor Sensitivity/Attribution Cross-Reference Schedule should help the Agencies compare the variables that a banking entity has identified as significant sources of its trading desks' profitability and risk for purposes of the Risk Factor Sensitivities metric to the factor(s) that account for actual changes in the banking entity's trading desk-level profit and loss, as reported in the Comprehensive Profit and Loss Attribution metric. This comparison will allow the Agencies to evaluate whether a banking entity has identified risk factors in the Risk Factor Sensitivities metric of a trading desk that help explain the trading desk's profit and loss.

Question 234. Is the information required by the proposed Quantitative Measurements Identifying Information effective and sufficiently clear? If not, what alternative would be more effective or clearer? Is more or less specific guidance necessary? If so, what level of specificity is needed to prepare the relevant schedule? If the proposed Quantitative Measurements Identifying Information is not sufficiently specific, how should it be modified to reach the appropriate level of specificity? If the proposed Quantitative Measurements Identifying Information is overly specific, why is it too specific and how should it be modified to reach the appropriate level of specificity?

Question 235. Is the information required by the proposed Quantitative Measurements Identifying Information helpful or not helpful to understanding a banking entity's covered trading activities and associated risks? Identify which specific pieces of information are helpful or not helpful and explain why. Does the information provide necessary clarity about a banking entity's risk measures and how such risk measures relate to one another over time and within and across trading desks? Do banking entities expect that the schedules will reduce, increase, or have no effect on the number of information requests from the Agencies regarding the quantitative measurements? Please explain.

Question 236. Is the information required by the proposed Quantitative Measurements Identifying Information already available to banking entities? Please explain.

Question 237. Does the proposed Quantitative Measurements Identifying Information strike the appropriate balance between the potential benefits of the reporting requirements for monitoring and assuring compliance and the potential costs of those reporting requirements? If not, how could that balance be improved?

Question 238. How burdensome and costly would it be to prepare each schedule within the proposed Quantitative Measurements Identifying Information? What are the additional burdens costs associated with preparing these schedules for particular trading desks? How significant are those potential costs relative to the potential benefits of the schedules in monitoring covered trading activities and assessing risks associated with those activities? Are there potential modifications that could be made to these schedules that would reduce the burden or cost? If so, what are those modifications? Please quantify your answers, to the extent feasible.

Question 239. In light of the size, scope, complexity, and risk of covered trading activities, do commenters anticipate the need to hire new staff with particular expertise in order to prepare the information required by the proposed Quantitative Measurements Identifying Information (*e.g.,* to program information systems and collect data)? Do commenters anticipate the need to develop additional infrastructure to obtain and retain data necessary to prepare these schedules? Please explain and quantify your answers, to the extent feasible.

Question 240. What operational or logistical challenges might be associated with preparing the information required by the proposed Quantitative Measurements Identifying Information and obtaining any necessary informational inputs?

Question 241. How might the proposed Quantitative Measurements Identifying Information affect the behavior of banking entities? To what extent and in what ways might uncertainty as to how the Agencies will review and evaluate the proposed Quantitative Measurements Identifying Information affect the behavior of banking entities?

f. Narrative Statement

The proposed paragraph III.d. requires a banking entity to submit a Narrative Statement in a separate electronic document to the relevant Agency that describes any changes in calculation methods used for its quantitative measurements and to indicate when this change occurred. In addition, a banking entity would have to prepare and submit a Narrative Statement when there are any changes in the banking entity's trading desk structure (*e.g.,* adding, terminating, or merging pre-existing desks) or trading desk strategies. Under these circumstances, the Narrative Statement would have to describe the change, document the reasons for the change, and specify when the change occurred.

Under the proposal, the banking entity would have to report in a Narrative Statement any other information the banking entity views as relevant for assessing the information schedules or quantitative measurements, such as a further description of calculation methods that the banking entity is using. In addition, a banking entity would have to explain its inability to report a particular quantitative measurement in the Narrative Statement. A banking entity also would have to provide notice in its Narrative Statement if a trading desk changes its approach to including or excluding products that are not financial instruments in its metrics.

If a banking entity does not have any information to report in a Narrative Statement, the banking entity would have to submit an electronic document stating that it does not have any information to report in a Narrative Statement.

Question 242. Should the Narrative Statement be required? If so, why? Should the proposed requirement apply to all changes in the calculation methods a banking entity uses for its quantitative measurements or should the proposed rule text be revised to apply only to changes that rise to a certain level of significance? Please explain.

Question 243. Is the proposed Narrative Statement requirement effective and sufficiently clear? If not, what alternative would be more effective or clearer? Are there other circumstances in which a Narrative Statement should be required? If so, what are those circumstances?

Question 244. How burdensome or costly is the proposed Narrative Statement to prepare? Are there potential benefits of the Narrative Statement to banking entities, particularly as it relates to the ability of banking entities and the Agencies to monitor a firm's covered trading activities?

g. Frequency and Method of Required Calculation and Reporting

The 2013 final rule established a reporting schedule in § ____.20 that required banking entities with $50 billion or more in trading assets and liabilities to report the information required by Appendix A of the 2013 final rule within 10 days of the end of each calendar month. The Agencies are proposing to adjust this reporting schedule to extend the time to be within 20 days of the end of each calendar month.[238] Experience with implementing the 2013 final rule has shown that the information submitted within ten days is often incomplete or contains errors. Banking entities must regularly provide resubmissions to correct or complete their initial information submission. This extension of the time for reporting is expected to reduce compliance costs as the additional time would allow the required workflow to be conducted under less time pressure and with greater efficiency and fewer resubmissions should be necessary. The schedule for banking entities with less than $50 billion in trading assets and liabilities would remain unchanged.

Question 245. Is the proposed frequency of reporting the Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement appropriate and effective? If not, what frequency would be more effective? Should the information be required to be reported quarterly, annually, or upon the request of the applicable Agency and, if so, why?

Question 246. Would providing banking entities with additional time to report quantitative measurements meaningfully reduce resubmissions? If so, would the additional time reduce burdens on banking entities? Please provide quantitative data to the extent feasible.

Question 247. Is there a calculation period other than daily that would provide more meaningful data for certain metrics? For example, would weekly inventory aging instead of daily inventory aging be more effective? Why or why not?

Appendix A of the 2013 final rule did not specify a format in which metrics should be reported. As a technical matter, banking entities may currently report quantitative measurements to the relevant Agency using various formats and conventions. After consultation with staffs of the Agencies, the reporting banking entities submitted their quantitative measurement data electronically in a pipe-delimited flat file format. However, this flat file format has proved to be unwieldy and its syntactical requirements have been unclear. There has been no easy way for banking entities to validate that their data files are in the correct format before submitting them, and so banking entities have often needed to resubmit their quantitative measurements to address formatting issues.

To make the formatting requirements for the data submissions clearer, and to help ensure the quality and consistency of data submissions across banking entities, the Agencies are proposing to require that the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement be reported in accordance with an XML Schema to be specified and published on the relevant Agency's website.[239] By requiring the XML Schema, the Agencies look to establish a structured model through which reported data can be recognized and processed by standard computer code or software (*i.e.,* made machine-readable). The proposed reporting format should promote complete and intelligible records of covered trading activities and facilitate the reporting of key identifying and descriptive information. Submissions structured according to the XML Schema should enhance the Agencies' ability to normalize, aggregate, and analyze reported metrics. In turn, the proposed reporting format should facilitate monitoring of covered trading activities and enable the relevant Agency to more efficiently interpret and evaluate reported metrics. For example, the proposed reporting format should enhance the Agencies' ability to compare data across trading desks and analyze data over different time horizons.

Question 248. How burdensome and costly would it be to develop new systems, or modify existing systems, to implement the proposed Appendix's electronic reporting requirement and XML Schema? How significant are those potential costs relative to the potential benefits of electronic reporting and the XML Schema in facilitating review and analysis of a banking entity's covered trading activities? Are there potential modifications that could be made to the proposal's electronic reporting requirement or XML Schema that would reduce the burden or cost? If so, what are those modifications? Please quantify your answers, to the extent feasible.

Question 249. Is the proposed XML reporting format for submission of the Trading Desk Information, applicable quantitative measurements, and the Quantitative Measurements Identifying Information appropriate and effective? Why or why not?

Question 250. Is there a reporting format other than the XML Schema that the Agencies should consider as acceptable? Should the Agencies allow banking entities to develop their own reporting formats? If so, are there any general reporting standards that should be included in the rule to facilitate the Agencies' ability to normalize, aggregate, and analyze data that is reported pursuant to different electronic formats or schemas? Please explain in detail.

Question 251. What would be the costs to a banking entity to provide quantitative measurements data according to the proposed XML reporting format? Please quantify your answers, to the extent feasible.

Question 252. For a banking entity currently reporting quantitative

[238] *See* § ____.20(d) of the proposal.

[239] To the extent the XML Schema is updated, the version of the XML Schema that must be used by banking entities would be specified on the relevant Agency's website. A banking entity must not use an outdated version of the XML Schema to report the Trading Desk Information, Quantitative Measurements Identifying Information, and applicable quantitative measurements to the relevant Agency.

measurements in some other electronic format, what would be the costs (such as equipment, systems, training, or ongoing staffing or maintenance) to convert current systems to use the proposed XML reporting format? Please quantify your answers, to the extent feasible.

Question 253. Is there a more effective way to distribute the XML Schema than the current proposal of having each Agency host a copy of the XML Schema on its respective website? For example, would it be more effective for all Agencies to point to only one location where the XML Schema will be hosted? If so, please identify how the alternative would improve data quality and accessibility. How long should the implementation period be?

Question 254. Currently banking entities are reporting quantitative measurements separately to each Agency using tailored data files containing only the measurements for the trading desks that book into legal entities for which an Agency is the primary supervisor. Would it be more effective for all Agencies to use a single point of collection for the quantitative measurements? If so, would there be any impact on Agencies ability to review and analyze a banking entity's covered trading activities? How significant are the costs of reporting separately to each Agency? Please quantify your answers, to the extent feasible. Are there any other ways to make the metrics requirements more efficient? For example, are any banking entities subject to any separate or related data reporting requirements that could be leveraged to make the proposal more efficient?

h. Recordkeeping

Under paragraph III.c. of Appendix A of the 2013 final rule, a banking entity's reported quantitative measurements are subject to the record retention requirements provided in the appendix. Under the proposal, this provision would be in paragraph III.f. of the appendix. The Agencies propose to expand this provision to include the Narrative Statement, the Trading Desk Information, and the Quantitative Measurements Identifying Information in the appendix's record retention requirements.

Question 255. Is the proposed application of Appendix A's record retention requirement to the Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement appropriate? If not, what alternatives would be more appropriate? What costs would be associated with retaining the Narrative Statements and information schedules on that basis, and how could those costs be reduced or eliminated? Please quantify your answers, to the extent feasible.

Question 256. Should the proposed Trading Desk Information, Quantitative Measurements Identifying Information, and Narrative Statement be subject to the same five-year retention requirement that applies to the quantitative measurements? Why or why not? If not, how long should the information schedules and Narrative Statements be retained, and why?

i. Quantitative Measurements

Section IV of Appendix A of the 2013 final rule sets forth the individual quantitative measurements required by the appendix. The Agencies are proposing to add an ''Applicability'' paragraph to each quantitative measurement that identifies the trading desks for which a banking entity would be required to calculate and report a particular metric based on the type of covered trading activity conducted by the desk. In addition, the Agencies are proposing to remove the ''General Calculation Guidance'' paragraphs that appear in section IV of Appendix A of the 2013 final rule for each quantitative measurement. Content of these General Calculation Guidance paragraphs would instead generally be addressed in the Instructions.

i. Risk-Management Measurements

A. Risk and Position Limits and Usage

The Agencies are proposing to remove references to Stressed Value-at-Risk (Stressed VaR) in the Risk and Position Limits and Usage metric. Eliminating the requirement to report desk-level limits for Stressed VaR should reduce reporting obligations for banking entities without reducing the Agencies' ability to monitor proprietary trading.

The proposal clarifies in new ''Applicability'' paragraph IV.a.1.iv. that, as in the 2013 final rule, the Risk and Position Limits and Usage metric applies to all trading desks engaged in covered trading activities. For each trading desk, the proposal requires that a banking entity report the unique identification label for each limit as listed in the Risk and Position Limits Information Schedule, the limit size (distinguishing between the upper bound and lower bound of the limit, where applicable), and the value of usage of the limit.[240] The unique identification label should allow the Agencies to efficiently obtain the descriptive information regarding the limit that is separately reported in the Risk and Position Limits Information Schedule.[241] The proposal requires a banking entity to report this descriptive information in the Risk and Position Limits Information Schedule for the entire banking entity's covered trading activity, rather than multiple times in the Risk and Position Limits and Usage metric for different trading desks, to help alleviate inefficiencies associated with reporting redundant information and reduce electronic file submission sizes.

Unlike the 2013 final rule, the proposal requires a banking entity to report the limit size of both the upper bound and the lower bound of a limit if a trading desk has both an upper and lower limit. The Agencies understand that, based on a review of the collected data and discussions with banking entities, trading desks may have upper and lower limits. An upper limit means the value of risk cannot go above the limit, while a lower limit means the value of risk cannot go below the limit. This proposed amendment is intended to help identify when a trading desk has both an upper limit and a lower limit and avoid incomplete or unclear reporting under these circumstances. In addition, receipt of information about upper and lower limits, where applicable, should allow the Agencies to better evaluate the constraints that a banking entity places on the risks of a trading desk. For example, if a trading desk has both upper and lower limits but only one such limit is reported, the Agencies would not have complete information about the desk's limits or the usage of such limits, including potential limit breaches that may warrant further review.

The proposal also clarifies the 2013 final rule's requirement to separately report a trading desk's usage of its limit. As noted above, usage is the value of the trading desk's risk or positions that are accounted for by the current activity of the desk. The value of the usage generally should be reported as of the end of the day for limits that are accounted for at the end of the day; conversely, banking entities generally should report the maximum value of the usage for limits accounted for intraday.

[240] If a limit is introduced or discontinued during a calendar month, the banking entity must report this information for each trading day that the trading desk used the limit during the calendar month.

[241] Such information includes the name of the limit, a description of the limit, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit.

Question 257. Should Stressed VaR limits be removed as a reporting requirement for desks engaged in permitted market making-related activity or risk-mitigating hedging activity? Are VaR limits without accompanying Stressed VaR limits adequate for these desks? Should another type of limit be required to replace Stressed VaR, such as expected shortfall? Should Stressed VaR limits instead be required for other types of covered trading activities besides market making-related activity or risk-mitigating hedging activity?

Question 258. Should VaR limits be removed as a reporting requirement for trading desks engaged in permitted market making-related activity or risk-mitigating hedging activity? Why or why not?

Question 259. The proposal requires a banking entity to report the limit size of both the upper bound and the lower bound of a limit if a trading desk has both an upper and lower limit. Should banking entities be required to report both the upper bound and the lower bound of a limit (if applicable) or should the requirement only apply to the upper limit? Please discuss the anticipated costs and other burdens of this new requirement and how they compare to the benefits.

B. Risk Factor Sensitivities

The proposed ''Applicability'' paragraph IV.a.2.iv. provides that, as in the 2013 final rule, the Risk Factor Sensitivities metric applies to all trading desks engaged in covered trading activities. Under the proposal, a banking entity would have to report for each trading desk the unique identification label associated with each risk factor sensitivity of the desk, the magnitude of the change in the risk factor, and the aggregate change in value across all positions of the desk given the change in risk factor.[242]

The proposed unique identification label should allow the Agencies to efficiently obtain the descriptive information for the Risk Factor Sensitivity that is separately reported in the Risk Factor Sensitivities Information Schedule.[243] The proposal requires a banking entity to report this descriptive information in the Risk Factor Sensitivities Information Schedule for the entire banking entity's covered trading activity, rather than multiple times in the Risk Factor Sensitivities metric for different trading desks, to help alleviate inefficiencies associated with reporting redundant information and reduce electronic file submission sizes.

C. Value-at-Risk and Stressed Value-at-Risk

The proposal modifies the description of Stressed VaR to align its calculation with that of Value-at-Risk and removes the General Calculation Guidance. A new ''Applicability'' paragraph IV.a.3.iv. provides that Stressed VaR is not required to be reported for trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of financial instrument in § ____.3(d)(2) of the proposal. The Agencies believe that limiting the applicability of the Stressed VaR metric in this manner may reduce burden without impacting the ability of the Agencies to monitor for prohibited proprietary trading. In particular, the Agencies believe that applying Stressed VaR to trading desks whose covered trading activity is conducted exclusively to hedge excluded products does not provide meaningful information about whether the trading desk is engaged in proprietary trading. For example, when Stressed VaR is applied to hedges of loans held-to-maturity on a trading desk, Stressed VaR is unlikely to provide an accurate indication of the risk taken on that desk. Thus, the Agencies are providing that Stressed VaR need not be reported under these circumstances.

Question 260. Is Stressed VaR a useful metric for monitoring covered trading activity for trading desks engaged in permitted market making-related activity or underwriting activity? Why or why not? Are there other covered trading activities for which Stressed VaR is useful or not useful?

ii. Source-of-Revenue Measurements

A. Comprehensive Profit and Loss Attribution

It is unnecessary for banking entities to calculate and report volatility of comprehensive profit and loss because the measurement can be calculated from the profit and loss amounts reported under the Comprehensive Profit and Loss Attribution metric. Thus, the proposed Appendix would remove this requirement.

With respect to the profit and loss attribution to individual risk factors and other factors, the Agencies are proposing to add to the proposed Appendix a new paragraph IV.b.1.B. Under the proposal, a banking entity would be required to provide, for one or more factors that explain the preponderance of the profit or loss changes due to risk factor changes, a unique identification label for the factor and the profit or loss due to the factor change. The proposal requires a banking entity to report a unique identification label for the factor so the Agencies can efficiently obtain the descriptive information regarding the factor that is separately reported in the Risk Factor Attribution Information Schedule.[244] The proposal requires a banking entity to report this descriptive information in the Risk Factor Attribution Information Schedule for the entire banking entity's covered trading activity, rather than multiple times in the Comprehensive Profit and Loss Attribution metric for different trading desks, to help alleviate inefficiencies associated with reporting redundant information and reduce electronic file submission sizes.

A new ''Applicability'' paragraph IV.b.1.iv provides that, as in the 2013 final rule, the Comprehensive Profit and Loss Attribution metric applies to all trading desks engaged in covered trading activities.

Question 261. Appendix A of the 2013 final rule specified under Source-of-Revenue Measurements that Comprehensive Profit and Loss be divided into three categories: (i) Profit and loss attributable to existing positions; (ii) profit and loss attributable to new positions; and (iii) residual profit and loss that cannot be specifically attributed to existing positions or new positions. The sum of (i), (ii), and (iii) must equal the trading desk's comprehensive profit and loss at each point in time. Appendix A of the 2013 final rule further required that the portion of comprehensive profit and loss that cannot be specifically attributed to known sources must be allocated to a residual category identified as an unexplained portion of the comprehensive profit and loss. The proposed Appendix does not change these specifications. However, the Agencies' experience implementing the 2013 final rule has shown that the two statements about residual profit and loss can give rise to conflicting interpretations. The Agencies see value in monitoring any profit and loss that cannot be attributed to existing or new positions. The Agencies also see value in monitoring the profit and loss

[242] If a risk factor sensitivity is introduced or discontinued during a calendar month, the banking entity must report this information for each trading day that the trading desk used the sensitivity during the calendar month.

[243] Such information includes the name of the sensitivity, a description of the sensitivity, and the sensitivity's risk factor change unit.

[244] Such information includes the name of the risk factor or other factor, a description of the risk factor or other factor, and the change unit of the risk factor or other factor.

attribution to risk factors, and the Agencies' experience is that many reporters of quantitative measurements include the remainder from profit and loss attribution in the item for Residual Profit and Loss. In practice, however, profit and loss attribution is performed on existing position profit and loss, so this interpretation breaks the additivity of (i), (ii), and (iii) above. A potential resolution of this conflict would be to clarify in the Instructions for Preparing and Submitting Quantitative Measurements Information that Residual Profit and Loss is only profit and loss that cannot be attributed to existing or new positions, and to add a separate reporting item for Unexplained Profit and Loss from Existing Positions. The Agencies are seeking comment on how beneficial for institutions and regulators this additional item would be to show and assess banking entities' profit and loss attribution analysis. How much would adding this item consume additional compliance resources of reporters?

Question 262. Appendix A of the 2013 final rule specified that profit and loss from existing positions be further attributed to (i) the specific risk factors and other factors that are monitored and managed as part of the trading desk's overall risk management policies and procedures; and (ii) any other applicable elements, such as cash flows, carry, changes in reserves, and the correction, cancellation, or exercise of a trade. The metrics reporting instructions further specified that the preponderance of profit and loss due to risk factor changes should be reported as profit and loss attributions to individual factors. The proposed Appendix and metrics instructions do not change these requirements. However, experience implementing the 2013 final rule has shown that the definition of Profit and Loss Due to Changes in Risk Factors is vague and open to multiple interpretations. The Agencies see value in monitoring the total profit and loss attribution to risk factors that banking entities use to monitor their sources of revenue, which may go beyond the preponderance of profit and loss that is reported as attributions to individual factors. Moreover, in practice profit and loss attribution is often sensitivity-based and an approximation. Banking entities also routinely calculate ''hypothetical'' or ''clean'' profit and loss, which is the full revaluation of existing positions under all risk factor changes, and is used in banking entities' risk management to compare to VaR. The Agencies are seeking comment on how best to specify the calculation for Profit and Loss Due to Risk Factor Changes. Do commenters expect that ''hypothetical'' profit and loss can be derived from other items already reported? If not, what are the costs and benefits of clarifying the definition of Profit and Loss Due to Risk Factor Changes to make it align with ''hypothetical'' or ''Clean P&L'' as prescribed by market risk capital rules? Alternatively, what are the costs and benefits of clarifying the definition to be the sum of all profit and loss attributions regardless of whether they are reported individually? What would be the additional compliance costs of requiring that both ''hypothetical'' profit and loss and the sum of all profit and loss attributions be reported as separate items in the quantitative measurements?

iii. Positions, Transaction Volumes, and Securities Inventory Aging Measurements

A. Positions and Inventory Turnover

Paragraph IV.c.1. of Appendix A of the 2013 final rule requires banking entities to calculate and report Inventory Turnover. This metric is required to be calculated on a daily basis for 30-day, 60-day, and 90-day calculation periods. The Agencies are proposing to replace the Inventory Turnover metric with the daily data underlying that metric, rather than proposing specific calculation periods, because the Agencies may choose to use different inventory turnover calculation periods depending on the particular trading desk or covered trading activity under review. The proposal replaces Inventory Turnover with the daily Positions quantitative measurement. In conjunction with the proposed Transaction Volumes metric (discussed below), the proposed Positions metric would provide the Agencies with flexibility to calculate inventory turnover ratios over any period of time, including a single trading day.

Based on an evaluation of the information collected pursuant to the Inventory Turnover quantitative measurement, the Agencies are proposing to limit the scope of applicability of the Positions metric to trading desks that rely on § ____.4(a) or § ____.4(b) to conduct underwriting activity or market making-related activity, respectively. As a result, a trading desk that does not rely on § ____.4(a) or § ____.4(b) would not be subject to the proposed Positions metric.[245] The proposed Positions metric would require a banking entity to report the value of securities and derivatives positions managed by an applicable trading desk. Thus, if a trading desk relies on § ____.4(a) or § ____.4(b) and engages in other covered trading activity, the reported Positions metric would have to reflect all of the covered trading activities conducted by the desk.[246]

The proposal provides that banking entities subject to the appendix would have to separately report the market value of all long securities positions, the market value of all short securities positions, the market value of all derivatives receivables, the market value of all derivatives payables, the notional value of all derivatives receivables, and the notional value of all derivatives payables.[247]

Finally, the proposal addresses the classification of securities and derivatives for purposes of the proposed Positions quantitative measurement. The Agencies recognize that the 2013 final rule's definition of ''security'' and ''derivative'' overlap.[248] For example, under the 2013 final rule a security-based swap is both a ''security'' and a ''derivative.''[249] The proposed Positions quantitative measurement would require banking entities to separately report the value of all securities and derivatives positions managed by a

[245] For example, a trading desk that relies solely on § ____.5 to conduct risk-mitigating hedging activity is not subject to the proposed Positions metric.

[246] For example, if a trading desk relies on § ____.4(b) and § ____.5 to conduct market making-related activity and risk-mitigating hedging activity, respectively, the reported Positions metric for the desk would be required to reflect its risk-mitigating hedging activity in addition to its market making-related activity. The Agencies note, however, that a trading desk would not be required to include trading activity conducted under §§ ____.3(e), ____6(c), ____.6(d), or ____.6(e) in the proposed Positions metric, unless the banking entity includes such activity as ''covered trading activity'' for the desk under the appendix. This is consistent with the proposed definition of ''covered trading activity,'' which provides that a banking entity may include in its covered trading activity trading conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e).

[247] The Agencies note that banking entities must report the effective notional value of derivatives receivables and derivatives payables for those derivatives whose stated notional amount is leveraged. For example, if an exchange of payments associated with a $2 million notional equity swap is based on three times the return associated with the underlying equity, the effective notional amount of the equity swap would be $6 million.

[248] *See* 2013 final rule §§ ____.2(h), (y).

[249] The term ''security'' is defined in the 2013 final rule by reference to section 3(a)(10) of the Securities Exchange Act of 1934 (the ''Exchange Act''). *See* 2013 final rule § ____.2(y). Under the Exchange Act, the term ''security'' means, in part, any security-based swap. *See* 15 U.S.C. 78c(a)(10). The term ''security-based swap'' is defined in section 3(a)(68) of the Exchange Act. *See* 15 U.S.C. 78c(a)(68). Under the 2013 final rule, the term ''derivative'' means, in part, any security-based swap as that term is defined in section 3(a)(68) of the Exchange Act. *See* 2013 final rule § ____.2(h).

trading desk. To avoid double-counting financial instruments, the proposed Positions metric would require banking entities subject to the appendix to not include in the Positions calculation for ‘‘securities’’ those securities that are also ‘‘derivatives,’’ as those terms are defined under the final rule. Instead, securities that are also derivatives under the final rule are required to be reported as ‘‘derivatives’’ for purposes of the proposed Positions metric.

Question 263. Should the Agencies eliminate the Inventory Turnover quantitative measurement? Why or why not? Should the Agencies replace Inventory Turnover with the proposed Positions metric in the proposed Appendix? Why or why not? Should the Agencies modify the Inventory Turnover metric rather than remove it from the proposed Appendix? If so, what modifications should the Agencies make to the Inventory Turnover metric, and why?

Question 264. What are the current benefits and costs associated with calculating the Inventory Turnover metric? To what extent would the removal of this metric reduce the costs of compliance with the proposed Appendix? Please quantify your answers, to the extent feasible.

Question 265. Is the use of the proposed Positions metric to help distinguish between permitted and prohibited trading activities effective? If not, what alternative would be more effective? What factors should be considered in order to further refine the proposed Positions metric to better distinguish prohibited proprietary trading from permitted trading activity? Does the proposed Positions metric provide any additional information of value relative to other quantitative measurements?

Question 266. Is the use of the proposed Positions metric to help determine whether an otherwise-permitted trading strategy is consistent with the requirement that such activity not result, directly or indirectly, in a material exposure by the banking entity to high-risk assets and high-risk trading strategies effective? If not, what alternative would be more effective?

Question 267. Is the proposed Positions metric substantially likely to frequently produce false negatives or false positives that suggest that prohibited proprietary trading is occurring when it is not, or vice versa? If so, why? If so, how should the Agencies modify this quantitative measurement, and why? If so, what alternative quantitative measurement would better help identify prohibited proprietary trading?

Question 268. How beneficial is the information that the proposed Positions metric provides for evaluating underwriting activity or market making-related activity? Does the proposed Positions metric, alone or coupled with other required metrics, provide information that is useful in evaluating the customer-facing activity of a trading desk? Do any of the other quantitative measurements provide the same level of beneficial information for underwriting activity or market making-related activity? Would the proposed Positions metric be useful to evaluate other types of covered trading activity?

Question 269. How burdensome and costly would it be to calculate the proposed Positions metric at the specified calculation frequency and calculation period? What are the additional burdens or costs associated with calculating the measurement for particular trading desks? How significant are those potential costs relative to the potential benefits of the measurement in monitoring for impermissible proprietary trading? Are there potential modifications that could be made to the measurement that would reduce the burden or cost? If so, what are those modifications? Please quantify your answers, to the extent feasible.

Question 270. How will the proposed Positions and Inventory Turnover requirements impact burdens as compared to benefits? Would the proposed changes affect a firm’s confidential business information?

iv. Transaction Volumes and the Customer-Facing Trade Ratio

Paragraph IV.c.3. of Appendix A of the 2013 final rule requires banking entities to calculate and report a Customer-Facing Trade Ratio comparing transactions involving a counterparty that is a customer of the trading desk to transactions with a counterparty that is not a customer of the desk. Appendix A of the 2013 final rule requires the Customer-Facing Trade Ratio to be computed by measuring trades on both a trade count basis and value basis. In addition, Appendix A of the 2013 final rule provides that the term ‘‘customer’’ for purposes of the Customer-Facing Trade Ratio is defined in the same manner as the terms ‘‘client, customer, and counterparty’’ used in § ____.4(b) of the 2013 final rule describing the permitted activity exemption for market making-related activities. This metric is required to be calculated on a daily basis for 30-day, 60-day, and 90-day calculation periods.

While the Customer-Facing Trade Ratio may provide directionally useful information in some circumstances regarding the extent to which trades are conducted with customers, the Agencies are proposing to replace this metric with the daily Transaction Volumes quantitative measurement, set out in paragraph IV.c.2. of the proposed Appendix, for two reasons. First, the information provided by the Customer-Facing Trade Ratio metric has not been sufficiently granular to permit the Agencies to effectively assess the extent to which a trading desk’s covered trading activities are focused on servicing customer demand. Reviewing and analyzing data representing trading activity that occurs over a single trading day should be more effective. The proposed Transaction Volumes metric will provide the Agencies with flexibility to calculate customer-facing trade ratios over any period of time, including a single trading day. This will assist banking entities and the Agencies in monitoring covered trading activities. The Agencies are proposing to replace the Customer-Facing Trade Ratio with the daily data underlying that metric rather than proposing a daily calculation period for the Customer-Facing Trade Ratio because the Agencies may choose to use different customer-facing trade ratio calculation periods depending on the particular trading desk or covered trading activity under review.

Second, based on a review of the collected data, the Agencies recognize that the current Customer-Facing Trade Ratio metric does not provide meaningful information when a trading desk only conducts customer-facing trading activity. The numerator of the ratio represents transactions with counterparties that are customers, while the denominator represents transactions with counterparties that are not customers. If a trading desk only trades with customers, it will not be able to calculate this ratio because the denominator will be zero. The proposed Transaction Volumes metric enables the analysis of customer-facing activity using more meaningful and appropriate calculations.

The proposed Transaction Volumes metric measures the number and value[250] of all securities and derivatives transactions conducted by a trading desk engaged in permitted underwriting activity or market making-related activity under the 2013 final rule with

[250] For purposes of the proposed Transaction Volumes metric, value means gross market value with respect to securities. For commodity derivatives, value means the gross notional value (*i.e.,* the current dollar market value of the quantity of the commodity underlying the derivative). For all other derivatives, value means the gross notional value.

four categories of counterparties: (i) Customers (excluding internal transactions); (ii) non-customers (excluding internal transactions); (iii) trading desks and other organizational units where the transaction is booked into the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity. To avoid double-counting transactions, these four categories are exclusive of each other (*i.e.,* a transaction must only be reported in one category). The proposal requires this quantitative measurement to be calculated each trading day.

As described above, the Agencies have evaluated the data collected under Appendix A of the 2013 final rule to determine whether certain quantitative measurements should be tailored to specific covered trading activities. The Customer-Facing Trade Ratio metric has primarily been used to assist in the evaluation of a trading desk's customer-facing activity, which is a relevant consideration for desks engaged in underwriting or market making-related activity under § ____.4 of the 2013 final rule. Such analysis is less relevant to, for example, desks that use only the risk-mitigating hedging exemption under § ____.5 of the 2013 final rule. Based on an evaluation of the information collected under the Customer-Facing Trade Ratio, the Agencies are proposing to limit the applicability of the proposed Transaction Volumes metric.

Specifically, the proposal provides that a banking entity would be required to calculate and report the proposed Transaction Volumes metric for all trading desks that rely on § ____.4(a) or § ____.4(b) to conduct underwriting activity or market making-related activity, respectively. This means that a trading desk that does not rely on § ____.4(a) or § ____.4(b) would not be subject to the proposed Transaction Volumes metric.[251] The proposed Transaction Volumes metric measures covered trading activity conducted by an applicable trading desk with specific categories of counterparties. Thus, if a trading desk relies on § ____.4(a) or § ____.4(b) and engages in other covered trading activity, the reported Transaction Volumes metric would have to reflect all of the covered trading activities conducted by the desk.[252] Limiting the scope of the Transaction Volumes metric to only those trading desks engaged in market-making activity or underwriting activity may reduce reporting inefficiencies for banking entities.

This metric should provide meaningful information regarding the extent to which a trading desk facilitates demand for each category of counterparty. While the Agencies recognize that the requirement to provide additional granularity may require banking entities to expend additional compliance resources, the Agencies believe the information would enhance compliance efficiencies. In particular, by requiring transactions to be separated into these four categories, the information collected under this metric will facilitate better classification of internal trades, and thus, will assist banking entities and the Agencies in evaluating whether the covered trading activities of desks engaged in underwriting or market making-related activities are consistent with the final rule's requirements governing those activities. For example, the Agencies believe that this metric could be helpful in evaluating the extent to which a market making desk routinely stands ready to purchase and sell financial instruments related to its financial exposure, as well as the extent to which a trading desk engaged in underwriting or market making-related activity facilitates customer demand in accordance with the reasonably expected near term demand requirements under the relevant exemption.[253]

The definition of the term ''customer'' that is used for purposes of this quantitative measurement depends on the type of covered trading activity a desk conducts. For a trading desk engaged in market making-related activity pursuant to § ____.4(b) of the 2013 final rule, the desk must construe the term ''customer'' in the same manner as the terms ''client, customer, and counterparty'' used for purposes of the market-making exemption under the 2013 final rule. For a trading desk engaged in underwriting activity pursuant to § ____.4(a) of the 2013 final rule, the desk must construe the term ''customer'' in the same manner as the terms ''client, customer, and counterparty'' used for purposes of the underwriting exemption under the final rule.[254]

Similar to the proposed Positions metric, the proposed Transaction Volumes metric addresses the classification of securities and derivatives for purposes of the proposed Transaction Volumes quantitative measurement. The proposed Transaction Volumes metric requires banking entities to separately report the value and number of securities and derivatives transactions conducted by a trading desk with the four categories of counterparties described above. To avoid double-counting financial instruments, the proposed Transaction Volumes metric would require banking entities subject to the appendix to not include in the Transaction Volumes calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under the 2013 final rule.[255] Instead, securities that are also derivatives under the final rule would be required to be reported as ''derivatives'' for purposes of the proposed Transaction Volumes metric.

Question 271. Should the Agencies eliminate the Customer-Facing Trade Ratio? Why or why not? Should the Agencies replace the Customer-Facing Trade Ratio with the proposed Transaction Volumes metric in the proposed Appendix? Why or why not? Should the Agencies modify the Customer-Facing Trade Ratio rather than remove it from the proposed Appendix? If so, what modifications should the Agencies make to the Customer-Facing Trade Ratio, and why?

Question 272. What are the current benefits and costs associated with

[251] For example, a trading desk that relies solely on § ____.5 to conduct risk-mitigating hedging activity would not be subject to the proposed Transaction Volumes metric.

[252] For example, if a trading desk relies on § ____.4(b) and § ____.5 to conduct market making-related activity and risk-mitigating hedging activity, respectively, the reported Transaction Volumes metric for the desk would have to reflect its risk-mitigating hedging activity in addition to its market making-related activity. The Agencies note, however, that a trading desk would not be required to include trading activity conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e) in the proposed Transaction Volumes metric, unless the banking entity includes such activity as ''covered trading activity'' for the desk under the proposed Appendix. The Agencies note that this is consistent with the definition of ''covered trading activity,'' which provides that a banking entity may include in its covered trading activity trading conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e).

[253] *See* 2013 final rule §§ ____.4(a)(2)(ii) and ____.4(b)(2)(ii).

[254] Under the proposal, the calculation guidance regarding reporting of transactions with another banking entity with trading assets and liabilities of $50 billion or more would be moved from Appendix A of the 2013 final rule into the reporting instructions. The proposed instructions for the Transaction Volumes quantitative measurement would clarify that any transaction with another banking entity with trading assets and liabilities of $50 billion or more would be included in one of the four categories noted above, including: (i) Customers (excluding internal transactions); (ii) non-customers (excluding internal transactions); (iii) trading desks and other organizational units where the transaction is booked into the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity.

[255] *See* 2013 final rule §§ ____.2(h), (y). *See also supra* Part III.E.2.i (discussing the classification of securities and derivatives for purposes of the proposed Positions quantitative measurement).

calculating the Customer-Facing Trade Ratio? To what extent would the removal of this metric reduce the costs of compliance with the proposed Appendix? Please quantify your answers, to the extent feasible.

Question 273. Would the use of the proposed Transaction Volumes metric to help distinguish between permitted and prohibited trading activities be effective? If not, what alternative would be more effective? What factors should be considered in order to further refine the proposed Transaction Volumes metric to better distinguish prohibited proprietary trading from permitted trading activity? Does the proposed Transaction Volumes metric provide any additional information of value relative to other quantitative measurements?

Question 274. Is the scope of the four categories of counterparties set forth in the proposed Transaction Volumes metric appropriate and effective? Why or why not?

Question 275. Is the proposed Transaction Volumes metric substantially likely to frequently produce false negatives or false positives that suggest that prohibited proprietary trading is occurring when it is not, or vice versa? If so, why? If so, how should the Agencies modify this quantitative measurement, and why? If so, what alternative quantitative measurement would better help identify prohibited proprietary trading?

Question 276. How beneficial is the information that the proposed Transaction Volumes metric provides for evaluating underwriting activity or market making-related activity? Could these changes affect legitimate underwriting activity or market making-related activity? If so, how? Do any of the other quantitative measurements provide the same level of beneficial information for underwriting activity or market making-related activity? Would this metric be useful to evaluate other types of covered trading activity?

Question 277. What operational or logistical challenges might be associated with performing the calculation of the proposed Transaction Volumes metric and obtaining any necessary informational inputs? Please explain.

Question 278. How burdensome and costly would it be to calculate the proposed Transaction Volumes metric at the specified calculation frequency and calculation period? What are the additional burdens or costs associated with calculating the measurement for particular trading desks? How significant are those potential costs relative to the potential benefits of the measurement in monitoring for impermissible proprietary trading? Are there potential modifications that could be made to the measurement that would reduce the burden or cost? If so, what are those modifications? Please quantify your answers, to the extent feasible.

Question 279. Should the Agencies develop and publish more detailed instructions for how different transaction life cycle events such as amendments, novations, compressions, maturations, allocations, unwinds, terminations, option exercises, option expirations, and partial amendments affect the calculation of Transaction Volumes and the Comprehensive Profit and Loss Attribution? Please explain.

v. Securities Inventory Aging

The Agencies have evaluated whether the Inventory Aging metric is useful for all financial instruments, as well as for all covered trading activities. Based on this evaluation and a review of the data collected under this quantitative measurement, the Agencies understand that, with respect to derivatives, Inventory Aging is not easily calculated and does not provide useful risk or customer-facing activity information. Thus, the Agencies are proposing several modifications to the Inventory Aging metric.

First, the scope of the proposed Securities Inventory Aging metric, set forth in proposed paragraph IV.c.3., would be limited to a trading desk's securities positions. Under the proposal, banking entities subject to the Appendix would be required to measure and report the age profile of a trading desk's securities positions through a security-asset aging schedule and a security liability-aging schedule. The proposed Securities Inventory Aging metric would not require banking entities to prepare an aging schedule for derivatives or include in its securities aging schedules those ''securities'' that are also ''derivatives,'' as those terms are defined under the 2013 final rule.[256]

Second, the Agencies are proposing to limit the applicability of the Securities Inventory Aging metric to trading desks that engage in specific covered trading activities. Consistent with the proposed Positions and Transaction Volumes metrics, the proposal provides that a banking entity would be required to calculate and report the Securities Inventory Aging metric for all trading desks that rely on § ____.4(a) or § ____.4(b) to conduct underwriting activity or market making-related activity, respectively. This means that a trading desk that does not rely on § ____.4(a) or § ____.4(b) would not be subject to the proposed Securities Inventory Aging metric.[257] The proposal would require that the Securities Inventory Aging metric measure the age profile of an applicable trading desk's securities positions. Thus, if a trading desk relies on § ____.4(a) or § ____.4(b) and engages in other covered trading activity, the reported Securities Inventory Aging metric would have to reflect all of the covered trading activities in securities [258] conducted by the desk.[259] Narrowing the scope of the Inventory Aging metric to securities inventory and to desks that engage in market-making and underwriting activities should reduce reporting inefficiencies for banking entities without reducing the usefulness of the metric, as it has proved to be of limited utility for derivative positions or trading desks that engage in other types of covered trading activity.

Finally, the proposal would require a banking entity to calculate and report the Securities Inventory Aging metric according to a specific set of age ranges. Specifically, banking entities would have to calculate and report the market value of security assets and security liabilities over the following holding periods: 0–30 calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days.

Question 280. How beneficial is the information that the proposed Securities Inventory Aging metric provides for evaluating underwriting activity or

[256] *See* 2013 final rule §§ ____.2(h), (y). *See also supra* Part III.E.2.i (discussing the classification of securities and derivatives for purposes of the proposed Positions quantitative measurement).

[257] For example, a trading desk that relies solely on § ____.5 to conduct risk-mitigating hedging activity would not be subject to the proposed Securities Inventory Aging metric.

[258] The Agencies note that a banking entity would not be required to prepare an Inventory Aging schedule for any derivatives traded by a trading desk, including ''securities'' that are also ''derivatives'' as those terms are defined under the 2013 final rule, in the event the trading desk relies on § ____.4(a) or § ____.4(b) and another permitted activity exemption.

[259] For example, if a trading desk relies on § ____.4(b) and § ____.5 to conduct market making-related activity and risk-mitigating hedging activity, respectively, the reported Securities Inventory Aging metric for the desk would have to reflect the risk-mitigating hedging activity and market making-related activity associated with the desk's securities positions. The Agencies note, however, that a trading desk would not be required to include trading activity conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e) in the proposed Securities Inventory Aging metric, unless the banking entity includes such activity as ''covered trading activity'' for the desk under the proposed Appendix. The Agencies note that this is consistent with the definition of ''covered trading activity,'' which provides that a banking entity may include in its covered trading activity trading conducted under §§ ____.3(e), ____.6(c), ____.6(d), or ____.6(e).

market making-related activity? Do any of the other quantitative measurements provide the same level of beneficial information for underwriting activity or market making-related activity?

Question 281. Is inventory aging of derivatives a useful metric for monitoring covered trading activity at trading desks? Why or why not?

Question 282. Is inventory aging of futures a useful metric for monitoring covered trading activity at trading desks? Why or why not?

Question 283. Would it reduce the calculation burden on banking entities to limit the scope of the Inventory Aging metric to securities inventory and to trading desks engaged in market-making and underwriting activities? Why or why not?

Question 284. Should the Agencies require banking entities to report the Securities Inventory Aging metric according to a specific set of age ranges? Why or why not? If so, taken together, are the proposed age ranges appropriate and effective, or should the proposed Securities Inventory Aging metric require different age ranges? Do banking entities already routinely measure their securities positions using the same, or similar, age ranges?

j. Request for Comment

The Agencies request comment on the costs and benefits of the proposal's revised approach under revisions to Appendix A of the 2013 final rule. In particular, the Agencies request comment on the following questions:

Question 285. Are the quantitative measurements, both as currently existing and as proposed to be modified, appropriate in general? If not, is there an alternative(s) approach that the banking entities and the Agencies could use to more effectively and efficiently identify potentially prohibited proprietary trading? If so, being as specific as possible, please describe that alternative. Should certain proposed quantitative measurements be eliminated? If so, which requirements, and why? Should additional quantitative measurements be added? If so, which measurements, and why? How would those additional measurements be described and calculated?

Question 286. What are the current annual compliance costs for banking entities to comply with the requirements in Appendix A of the 2013 final rule to calculate and report certain quantitative measurements to the Agencies? Please discuss the benefits of the proposal, including but not limited to the benefits derived from qualitative information, such as narratives and trading desk information, as compared to the costs and burdens of preparing such information. How would those annual compliance costs change if the modifications described in the proposal were adopted? Please be as specific as possible and, where feasible, provide quantitative data broken out by requirement. Would this proposal affect certain types of banking entities, such as broker-dealers and registered investment advisers, differently as compared to other banking entities in terms of annual compliance costs?

Question 287. In addition to the proposed changes to the requirement to calculate and report quantitative measurements to the Agencies, the proposed Appendix contains new qualitative requirements that are not currently required in Appendix A of the 2013 final rule, including, but not limited to, trading desk information, quantitative measurements identifying information, and a narrative statement. Please discuss the benefits and costs associated with such proposed requirements. How would the overall burden change, in terms of both costs and benefits, as a result of the proposal, taken as a whole, as compared to the existing requirements under Appendix A? Please provide quantitative data to the extent feasible.

Question 288. Which of the proposed quantitative measurements do banking entities currently use? What are the current benefits, and would the proposed revisions result in increased compliance costs associated with calculating such quantitative measurements? Would the reporting and recordkeeping requirements in the proposed Appendix for such quantitative measurements generate any significant, additional benefits or costs? Please quantify your answers, to the extent feasible.

Question 289. How are the ongoing costs of compliance associated with the requirements of Appendix A of the 2013 final rule allocated among the different steps in the process (*e.g.,* calculating quantitative measurements, preparing reports, delivering reports to the relevant Agencies, etc.)?

Question 290. Which requirements of Appendix A of the 2013 final rule are costliest to comply with, and what are those burdens? Please be as specific as possible. Does the proposal meaningfully reduce these aspects? Why or why not? Please quantify your answers, to the extent feasible.

Question 291. Which of the proposed quantitative measurements do banking entities currently not use? What are the potential benefits and costs of calculating these quantitative measurements and complying with the proposed reporting and recordkeeping requirements? Please quantify your answers, to the extent feasible.

Question 292. For each individual quantitative measurement that is proposed, is the description sufficiently clear? Is there an alternative that would be more appropriate or clearer? Is the description of the quantitative measurement appropriate, or is it overly broad or narrow? If it is overly broad, what additional clarification is needed? If the description is overly narrow, how should it be modified to appropriately describe the quantitative measurement, and why? Should the Agencies provide any additional clarification to the Appendix's description of the quantitative measurement, and why?

Question 293. For each individual quantitative measurement that is proposed, is the calculation guidance provided in the proposal effective and sufficiently clear? If not, what alternative would be more effective or clearer? Is more or less specific calculation guidance necessary? If so, what level of specificity is needed to calculate the quantitative measurement? If the proposed calculation guidance is not sufficiently specific, how should the calculation guidance be modified to reach the appropriate level of specificity? If the proposed calculation guidance is overly specific, why is it too specific and how should it be modified to reach the appropriate level of specificity?

Question 294. Does the use of the proposed Appendix as part of the multi-faceted approach to implementing the prohibition on proprietary trading continue to be appropriate? Why or why not?

Question 295. Should a trading desk be permitted not to furnish a quantitative measurement otherwise required under the proposed Appendix if it can demonstrate that the measurement is not, as applied to that desk, calculable or useful in achieving the purposes of the Appendix with respect to the trading desk's covered trading activities? How might a banking entity make such a demonstration?

Question 296. Where a trading desk engages in more than one type of covered trading activity, such as activity conducted under the underwriting and risk-mitigating hedging exemptions, should the quantitative measurements be calculated, reported, and recorded separately for trading activity conducted under each exemption relied on by the trading desk? What are the costs and benefits of such an approach? Please explain.

Question 297. How much time do banking entities need to develop new systems and processes, or modify existing systems and processes, to implement for banking entities that are subject to the proposed Appendix's reporting and recordkeeping requirements, and why? Does the amount of time needed to develop or modify information systems to comply with proposed Appendix, including the electronic reporting and XML Schema requirements, vary based on the size of a banking entity's trading assets and liabilities? Why or why not? What are the costs associated with such requirements?

Question 298. Under both the 2013 final rule and the proposal, banking entities that, together with their affiliates and subsidiaries, have significant trading assets and liabilities are required to calculate, maintain, and report a number of quantitative measurements. Should the Agencies eliminate this metrics reporting requirement and instead require banking entities to: (1) Calculate the required quantitative measurements data, in the same form, manner, and timeframes as they would otherwise be required to under the rule; (2) maintain the required quantitative measurements data; and (3) provide the relevant Agency or Agencies with the data upon request for examination and review?

Question 299. Should the requirement to calculate and report quantitative metrics be eliminated and replaced by a different method for assisting banking entities and the Agencies in monitoring covered trading activities for compliance with section 13 of the BHC Act and the 2013 final rule? If so, what alternative approaches should the Agencies consider?

Question 300. Should some or all reported quantitative measurements be made publicly available? Why or why not? If so, which quantitative measurements should be made publicly available, and what are the benefits and costs of making such measurements publicly available? If so, how should quantitative measurements be made publicly available? Should quantitative measurements be made publicly available in the same form they are furnished to the Agencies, or should information be aggregated before it is made publicly available? If information should be aggregated, how should it be aggregated, and what are the benefits and costs associated with aggregate data being available to the public? Should quantitative measurements be made publicly available at-or-near the same time such measurements are reported to the Agencies, or should information be made publicly available on a delayed basis? If information should be made public on a delayed basis, how much time should pass before information is publicly available, and what are the benefits and costs associated with non-current metrics information being available to the public? Are there other approaches the Agencies should consider to make the quantitative measurements publicly available, and if so, what are the benefits and costs associated with each approach? What are the costs and benefits of such an approach? Please discuss and provide detailed examples of any costs or benefits identified.

Question 301. Do commenters have concerns about the potential for the inadvertent exposure of confidential business information, either as part of the reporting process or to the extent that any of the quantitative measurements (or related information) are made publicly available? If so, what are the risks involved and how might they be mitigated? Are certain quantitative measurements more likely to contain confidential information? If so, which ones and why?

IV. The Economic Impact of the Proposal Under Section 13 of the BHC Act—Request for Comment

The Agencies are proposing a number of changes to the 2013 final rule that are intended to reduce the costs of compliance while continuing the rule's effectiveness in limiting prohibited activities. In what follows, the key proposed changes to the regulation that are expected to have a material impact on the costs of implementing the regulation are discussed as is the rationale for expecting a material reduction in the costs associated with compliance. The Agencies seek broad comment from the public on any and all aspects of the proposed changes to the regulation and the extent to which these changes will reduce compliance costs and improve the effectiveness of the implementing regulations. The Agencies also seek comment on whether there are any additional ways to reduce compliance costs while effectively implementing the statute. Finally, commenters are encouraged to provide the Agencies with any specific data or information that could be useful for quantifying the reductions or increases in costs associated with the proposed changes.

A key proposed change to the rule relates to the treatment of banking entities with limited trading activities, which under the 2013 final rule can face compliance costs that are disproportionately high relative to the amount of trading activity typically undertaken and the amount of risk the activities of these firms that are subject to section 13 pose to financial stability. More specifically, the Agencies are proposing to identify those banking entities with total consolidated trading assets and liabilities (excluding trading assets and liabilities involving obligations of, or guaranteed by, the United States or any agency of the United States) the average gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1 billion. These banking entities with limited trading assets and liabilities would be subject to a presumption of compliance under the proposal, while remaining subject to the rule's prohibitions in subparts B and C. The relevant Agency may rebut the presumption of compliance by providing written notice to the banking entity that it has determined that one or more of the banking entity's activities violates the prohibitions under subparts B or C.

The Agencies expect that this presumption would materially reduce the costs associated with complying with the rule for two reasons. First, as a result of presumed compliance, these banking entities would not be required to demonstrate compliance with many of the rule's specific requirements on an ongoing basis. As a specific example, entities with limited trading assets and liabilities would not be required to comply with the documentation requirements associated with the hedging exemption. Additionally, these entities would not be required to specify and maintain trading risk limits to comply with the rule's market making exemption. As a result, this proposed change is expected to meaningfully reduce the costs associated with rule compliance for smaller banking entities that do not engage in the types of trading the rule seeks to address.

Second, these banking entities would not be subject to the express requirement to maintain a compliance program pursuant to § ___.20 under the proposal to demonstrate compliance with the rule. The presumption would be rebuttable, so firms may need to maintain a certain level of resources to respond to supervisory requests for information in the event that the Agencies exercise their authority to rebut the presumption of compliance for any activity that they determine to violate prohibitions under subparts B and C. The amount of resources required for such purposes is expected to be significantly smaller than the amount of resources that would be required to maintain and execute an ongoing compliance program.

Question 302. Do commenters agree that the proposed establishment of a presumption of compliance for certain banking entities would meaningfully reduce the compliance costs associated with the rule relative to the requirements of the 2013 final rule?

Question 303. Have commenters quantified the extent to which such costs are reduced? If so, could this information be provided to the Agencies during the notice and comment period?

Question 304. Do commenters believe that any aspect of the proposed establishment of a presumption of compliance would increase the costs associated with rule compliance? If so, which aspects of the presumption would raise costs, why, and to what extent? How could these compliance costs be addressed or reduced?

Question 305. What costs do commenters anticipate a banking entity subject to presumed compliance would bear to respond to possible questions from the Agencies about the banking entity's compliance with the statute and the sections of the regulation that remain applicable to it? In general, how and to what extent does a shifting of the burden from banking entity to Agencies affect compliance costs? What steps could the Agencies take to appropriately reduce compliance burdens in this regard—especially for banking entities that engage in less trading activity?

The Agencies are also proposing two changes related to the 2013 final rule's definition of ''trading account'' that are expected to simplify the analysis associated with determining whether or not a banking entity's purchase or sale of a financial instrument is for the trading account, and thereby are expected to reduce the costs associated with complying with the rule. Specifically, the Agencies are proposing to add an accounting prong to the definition of ''trading account'' and to remove the short-term intent prong and the 60-day rebuttable presumption. The Agencies expect that the removal of the short-term intent prong will substantially reduce the costs of complying with the rule.

In the case of the short-term intent prong and the 60-day rebuttable presumption, the Agencies' experience with implementing the 2013 final rule strongly suggests that application of the short-term intent prong resulted in a variety of analyses to determine if a financial position was taken with the ''intent'' of generating short-term profits, or benefitting from short-term price movements. Assessing intent is qualitative and can be subject to significant interpretation. Accordingly, experience suggests that banking entities engage in a number of lengthy analyses to determine whether or not a financial position needs to be included in the trading account, and that these analyses may not always result in a clear indication.

In the case of the 60-day rebuttable presumption, the Agencies' experience suggests that the 60-day rebuttable presumption may be an overly inclusive instrument to determine whether a financial instrument is in the trading account. Many financial positions are scoped into the trading account automatically due to the 60-day presumption, and banking entities routinely conduct detailed and lengthy assessments of transactions to document that these positions should not be included in the trading account. However, experience indicates that there is no clear set of analyses that may be conducted to rebut the presumption and a clear standard for successfully rebutting the presumption has been difficult to establish in practice. Accordingly, the Agencies expect that removing the 60-day rebuttable presumption would materially reduce the costs associated with complying with the rule and determining whether a financial instrument is in the trading account.

The Agencies expect that this proposal would reduce the costs of rule compliance since banking entities are already familiar with accounting standards and use these standards to classify financial instruments on a regular basis to satisfy reporting and related requirements. The Agencies would expect that no new compliance costs would result from using accounting concepts that are already familiar to banking entities for purposes of identifying activity in the trading account.

The Agencies are also proposing to include a presumption of compliance for trading desks, the positions of which are included in the trading account due to the accounting prong, so long as the profit and loss of the desk does not exceed a certain threshold. Specifically, the trading activity conducted by a trading desk is presumed to be in compliance with the prohibition on proprietary trading if (i) none of the financial instruments of the desk are included in the trading account pursuant to the market risk capital prong, (ii) none of the financial instruments of the desk are booked in a dealer, swap dealer, or security-based swap dealer, and (iii) the sum over the preceding 90-calendar-day period of the absolute values of the daily net realized and unrealized gains and losses of the desk's portfolio of financial instruments does not exceed $25 million. Banking entities and supervisors will only need to consider cases in which the size of trading activity exceeds the $25 million threshold for these desks. Moreover, this analysis draws on profit and loss metrics that banking entities already regularly maintain and consequently would not be expected to contribute to any increased regulatory costs.

The Agencies recognize that implementing the new definition of ''trading account'' and the presumption of compliance would result in some amount of compliance costs. However, the Agencies expect that the compliance costs associated with this new definition and presumption of compliance would be significantly less than the compliance costs of either the short-term intent prong or the 60-day rebuttable presumption. As noted above, the new trading account definition ties to accounting concepts that are already familiar to banking entities. Similarly, the new presumption of compliance ties to profit and loss metrics that banking entities already maintain. As such, the Agencies expect that the new trading account definition and the presumption of compliance would materially reduce the costs of rule compliance relative to the 2013 final rule's existing requirements.

Question 306. Do commenters believe that the proposed changes to the trading account definition would materially reduce costs associated with rule compliance relative to the final rule? Why or why not?

Question 307. Do commenters have any specific data or information that could be used to quantify the extent to which such costs would be reduced under the proposal?

Question 308. Do commenters believe that any aspect of the proposed changes to the trading account definition increase the costs associated with rule compliance? If so, which aspects of the proposed changes raise costs, why, and to what extent?

As described in section 1(d)(3) of this Supplementary Information, the Agencies are proposing a specific alternative to allow banking entities to define trading desks in a manner consistent with their own internal business unit organization. The Agencies request comment regarding the relative costs and benefits of this possible alternative.

Question 309. Do commenters believe that the relative benefits of the definition of ''trading desk'' in the current 2013 final rule outweigh any potential cost reductions for banking entities under the alternative?

Question 310. Do commenters have any specific data or information that could be used to quantify the extent to which such costs would be reduced?

Question 311. Do commenters think that any aspect of the proposed changes to the trading desk definition increases the regulatory burden associated with rule compliance? If so which aspects of the proposed changes raise the regulatory burden, why, and to what extent?

A key statutory exemption from the prohibition on proprietary trading is the exemption for underwriting. The 2013 final rule contains a number of complex requirements that are intended to ensure that banking entities comply with the underwriting exemption and that proprietary trading activity is not conducted under the guise of underwriting. Since adoption of the 2013 final rule, banking entities have communicated to the Agencies that complying with all of the 2013 final rule's underwriting requirements can be difficult and costly relative to the underlying activities. In particular, banking entities have communicated that they believe they must engage in a number of complex and intensive analyses to gain comfort that their underwriting activities meets all of the 2013 final rule's requirements. Moreover, banking entities have communicated that they find the requirements of the 2013 final rule ambiguous to apply in practice and do not provide sufficiently bright-line conditions under which trading activity can clearly be classified as permissible underwriting.

The Agencies are proposing to establish the articulation and use of internal risk limits as a key mechanism for conducting trading activity in accordance with the underwriting exemption. These risk limits would be established by the banking entity at the trading desk level and designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties. The proposed risk limits would not be required to be based on any specific or mandated analysis. Rather, a banking entity would be permitted to establish the risk limits according to its own internal analyses and processes around conducting its underwriting activities. Banking entities would be expected to maintain internal policies and procedures for setting and reviewing desk-level risk limits in a manner consistent with the applicable statutory factor. A banking entity's risk limits would be subject to general supervisory review and oversight, but the limit-setting process would not be required to adhere to specific, pre-defined requirements beyond adherence to the banking entity's own ongoing and internal assessment of the reasonably expected near-term demands of clients, customers, or counterparties. So long as a banking entity maintains an ongoing and consistent process for setting such limits in accordance with the proposal, then the Agencies anticipate that trading activity conducted within the limits would generally be presumed to be underwriting.

The Agencies expect that the proposed reliance on risk limits to satisfy the underwriting exemption will materially reduce the costs of complying with the final rule's underwriting exemption. In particular, the limit-setting process is intended to leverage a banking entity's existing internal risk management and capital allocation processes, and would not be required to conform to any specific or pre-defined requirements other than being set in accordance with RENTD. The Agencies expect that reliance on risk limits would therefore align with the firm's internal policies and procedures for conducting underwriting in a manner consistent with the requirements of section 13 of the BHC Act. Accordingly, the Agencies expect that this proposed approach would generally be more efficient and less costly than the practices required by the 2013 final rule as they rely to a greater extent on the banking entity's own internal policies, procedures, and processes.

Question 312. The Agencies are also proposing to further tailor the requirements for banking entities with moderate trading activities and liabilities. In particular, the compliance program requirements that are part of the underwriting exemption would not apply to these firms. Do commenters believe that the proposed changes related to the use of risk limits in satisfying the underwriting exemption would materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 313. Do commenters believe there are any benefits of the approach in the 2013 final rule that would be forgone with the proposed changes related to the use of risk limits in satisfying the underwriting exemption?

Question 314. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 315. Do commenters believe that any aspect of the proposed changes related to the use of risk limits in satisfying the underwriting exemption increases the costs associated with rule compliance? If so which aspects of the proposed changes raise compliance costs, why, and to what extent?

Question 316. Do commenters believe that the proposed changes related to the reduced compliance program requirements for banking entities with moderate trading assets and liabilities to satisfy the underwriting exemption would materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 317. Do commenters believe there are any benefits to the approach in the 2013 final rule that would be forgone with the proposed changes related to the compliance requirements in satisfying the underwriting exemption?

Question 318. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 319. Do commenters think that any aspect of the proposed changes related to the use of compliance program requirements in satisfying the underwriting exemption would increase the costs associated with rule compliance? If so, which aspects of the proposed changes would increase compliance costs, why, and to what extent?

Another key statutory exemption from the prohibition on proprietary trading is the exemption for market making. The 2013 final rule contains a number of complex requirements that are intended to ensure that proprietary trading activity is not conducted under the guise of market making. Since adoption of the 2013 final rule, banking entities have communicated that complying with all of the 2013 final rule's market making requirements can be difficult and costly. In particular, banking entities have communicated that they believe they must engage in a number of complex and intensive analyses to gain comfort that their bona fide market making activity meets all of the 2013 final rule's requirements. Moreover, banking entities have communicated that they view the requirements of the 2013 final rule as ambiguous and not providing sufficiently bright-line conditions under which trading activity can clearly be classified as permissible market making.

The Agencies are proposing to establish the articulation and use of internal risk limits as the key mechanism for conducting trading activity in accordance with the rule's exemption for market making-related activities. These risk limits would be established by the banking entity at the trading desk level and be designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties. Banking entities would be expected to maintain internal policies and procedures for setting and reviewing desk-level risk limits in a manner consistent with the applicable statutory factor. Moreover, the proposed risk limits would not be required to be based on any specific or mandated analysis. Rather, a banking entity would be permitted to establish the risk limits according to its own internal analyses and processes around conducting its market making activities as market making is defined by the applicable statutory factor. A banking entity's risk limits would be subject to supervisory review and oversight, but the limit-setting process would not be required to adhere to any specific, pre-defined requirements beyond adherence to the banking entity's own ongoing and internal assessment of the reasonably expected near-term demand of clients, customers, or counterparties. So long as a banking entity maintains an ongoing and consistent process for setting such limits in accordance with the proposal, then the Agencies anticipate that trading activity conducted within the limits would generally be presumed to be market making.

The Agencies expect that the proposed reliance on internal risk limits to satisfy the statutory requirement that market making-related activities be designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties would materially reduce the costs of complying with the 2013 final rule's market making exemption. In particular, the limit-setting process would be intended to leverage a banking entity's existing internal risk management and capital allocation processes and would not be required to conform to specific or pre-defined requirements. The Agencies expect that reliance on risk limits would therefore align with the firm's internal policies and procedures for conducting market making in a manner consistent with the requirements of section 13 of the BHC Act. Accordingly, the agencies expect that this proposed approach would generally be more efficient and less costly than the practices required by the 2013 final rule as they rely to a greater extent on the banking entity's own internal policies, procedures, and processes.

The Agencies are also proposing to further tailor the requirements for banking entities with moderate trading activities and liabilities. In particular, the compliance program requirements that are part of the market making exemption would not apply to these firms.

Question 320. Do commenters believe that the proposed changes related to the use of risk limits in satisfying the market making exemption would materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 321. Do commenters believe there are any benefits of the approach in the 2013 final rule that would be forgone with the proposed changes related to the use of risk limits in satisfying the market making exemption?

Question 322. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 323. Do commenters believe that any aspect of the proposed changes related to the use of risk limits in satisfying the market making exemption increases the costs associated with rule compliance? If so, which aspects of the proposed changes raise compliance costs, why, and to what extent?

Question 324. Do commenters agree that the proposed changes related to the reduced compliance program requirements for banking entities with moderate trading assets and liabilities to satisfy the market making exemption materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 325. Do commenters believe there are any benefits of the approach in the 2013 final rule that would be forgone with the proposed changes related to the compliance requirements in satisfying the market making exemption?

Question 326. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 327. Do commenters believe that any aspect of the proposed changes related to the use of risk limits in satisfying the market making exemption increases the costs associated with rule compliance? If so, which aspects of the proposed changes raise compliance costs, why, and to what extent?

The agencies are proposing a number of changes to the requirements of the 2013 final rule's exemption for risk-mitigating hedging activities that are expected to reduce the costs associated with complying with the final rule's requirements.

First, for banking entities with significant trading assets and liabilities, the 2013 final rule's requirement in the risk mitigating hedging exemption to conduct a correlation analysis would be removed. Since adoption of the 2013 final rule, banking entities have communicated that this requirement has in practice been unclear and often not useful in determining whether or not a given transaction provides meaningful hedging benefits. The Agencies expect that the proposed removal of this requirement from the final rule would materially reduce the costs of rule compliance since larger banking entities would not be required to conduct a specific analysis that is currently required under the 2013 final rule.

Second, for these banking entities with significant trading assets and liabilities, the Agencies are proposing that the requirement that the hedging transaction ''demonstrably reduce (or otherwise significantly mitigate)'' risk be removed. Banking entities have communicated that these requirements can be unclear and these banking entities must often engage in a number of complex and time-intensive analyses to assess whether these standards have been met. Moreover, the above hedging standards have not aligned well with banking entities' internal processes for assessing the economic value of a hedging transaction. Accordingly, the Agencies expect that eliminating these requirements would materially reduce the costs associated with complying with the requirements of the rule's hedging exemption.

Third, for banking entities with moderate trading assets and liabilities, the Agencies are proposing to remove all of the hedging requirements under the 2013 final rule except for the requirement that the transaction be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks in connection with and related to one or more identified positions and that the hedging activity be recalibrated to maintain compliance with the rule. The Agencies expect this proposed change to materially reduce the costs of rule compliance since no additional documentation or prescribed analyses would be required beyond a banking entity's already existing practices and whatever analyses are required to ascertain that the remaining factors are satisfied, consistent with the statute. In light of Agency experience with the hedging requirements of the 2013 final rule, the Agencies expect that this proposed change would result in a material reduction in the costs associated with complying with the rule's hedging requirements.

Question 328. Do commenters believe that the proposed changes that streamline the hedging requirements of the rule materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 329. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 330. Do commenters believe that any aspect of the proposed changes to streamline the hedging requirements of the rule increases the costs associated with rule compliance? If so, which aspects of the proposed changes raise costs, why, and to what extent?

The Agencies are proposing to eliminate a number of requirements related to the foreign trading exemption. These proposed changes are intended to respond to concerns raised by FBOs subject to the 2013 final rule that they find its foreign trading exemption to be difficult to comply with in practice.

The Agencies are proposing to modify the requirement of this exemption that personnel of the banking entity who arrange, negotiate, or execute a purchase or sale must be outside the United States and to eliminate the requirements that: (1) No financing be provided by a U.S. affiliate or branch, and (2) a transaction with a U.S. counterparty must be executed through an unaffiliated intermediary and an anonymous exchange.

The Agencies expect that the modification and removal of these requirements would materially reduce the compliance costs associated with the foreign trading exemption.

In addition, banking entities have communicated that the requirement that any transaction with a U.S. counterparty be executed without involvement of U.S. personnel of the counterparty or through an unaffiliated intermediary and an anonymous exchange may in some cases significantly reduce the range of counterparties with which transactions can be conducted as well as increase the cost of those transactions, including with respect to counterparties seeking to do business with a foreign banking entity in foreign jurisdictions. Therefore, the Agencies also expect that removing this requirement would materially reduce the costs associated with rule compliance.

Question 331. Do commenters believe that the proposed changes to modify and eliminate certain requirements from the foreign trading exemption would materially reduce the regulatory burden associated with rule compliance relative to the 2013 final rule?

Question 332. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 333. Do commenters believe that any aspect of the proposed changes to eliminate certain requirements from the foreign trading exemption increases the costs associated with rule compliance? If so which aspects of the proposed changes raise costs, why, and to what extent?

The Agencies are proposing to make a number of changes to the metrics reporting requirements that are intended to improve the effectiveness of the metrics. On the whole, these changes are also expected to reduce the compliance costs associated with the metrics reporting requirements. In particular, the Agencies are proposing to add qualitative information schedules that would improve the Agencies' ability to understand and analyze the quantitative measurements. The Agencies are also proposing to remove certain metrics, such as inventory aging for derivatives and stressed value-at-risk for risk mitigating hedging desks, that based on experience with implementing the 2013 final rule, are not effective for identifying whether a banking entity's trading activity is consistent with the requirements of the 2013 final rule. In addition, the Agencies are proposing to switch to a standard XML format for the metrics data file. The Agencies expect this to improve consistency and data quality by both clarifying the format specification and making it possible to check the validity of data files against a published template using generally available software. Finally, the Agencies are proposing to make a number of changes to the technical calculation guidance for a number of metrics that should make the required calculations clearer and less complicated.

The Agencies are also proposing to provide certain banking entities that must report metrics with additional time to report metrics. Specifically, the firms with $50 billion in trading assets and liabilities would have 20 days instead of 10 days to report metrics to the Agencies. This change is expected to reduce compliance costs as the additional time would allow the required workflow to be conducted under less time pressure and with greater efficiency and accuracy.

Question 334. Do commenters believe that the proposed changes to the metrics reporting requirements would materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 335. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 336. Do commenters believe that any aspect of the proposed changes to the metrics reporting requirements would increase the costs associated with rule compliance? If so, which aspects of the proposed changes increase costs, why, and to what extent?

The Agencies are proposing to modify certain requirements regarding the ability of banking entities to engage in underwriting and market-making of third-party covered funds that would remove some of the restrictions on activities with respect to covered fund interests. The Agencies expect that this proposed change would reduce the costs of compliance with the 2013 final rule's requirements. In particular, the 2013 final rule places a number of restrictions on underwriting and market-making of covered fund interests that banking entities have indicated are costly to comply with and view as unduly limiting activity that is otherwise consistent with bona fide underwriting and market-making activity that would be allowed with respect to any other type of financial instrument, consistent with the statutory factors defining these activities.

Question 337. Do commenters believe that the proposed changes to certain restrictions on covered fund related activities would materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 338. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 339. Do commenters believe that any aspect of the proposed changes to certain restrictions on covered fund related activities would increase the costs associated with rule compliance? If so, which aspects of the proposed changes would raise costs, why, and to what extent?

The Agencies are proposing several changes to the required compliance program requirements that are expected to materially reduce the costs associated with complying with the rule's requirements. Specifically, banking entities with significant trading assets and liabilities would only need to maintain a standard six-pillar compliance program (*i.e.,* written policies and procedures, internal controls, management framework, independent testing, training, and records) and would not be required to maintain most aspects of the enhanced compliance program that is required by the 2013 final rule for such large banking entities. Agency experience with implementing the 2013 final rule indicates that the operation of the 2013 final rule's enhanced compliance program can be costly and unrelated to other compliance efforts that these banking entities routinely conduct. Accordingly, eliminating this requirement would be expected to materially reduce the costs of complying with the rule.

In the case of banking entities with moderate trading assets and liabilities, these banking entities would only be required to maintain the simplified compliance program that is described in the 2013 final rule. Namely, these entities would only be required to update their existing compliance policies and procedures and would not be required to maintain a standard six-pillar compliance program as is required under the 2013 final rule. Since the simplified compliance program is much less intensive and costly to implement than the standard six-pillar compliance program, the Agencies expect that this proposed change would materially reduce the costs associated with complying with the 2013 final rule's compliance program requirements for these smaller banking entities.

Question 340. Do commenters agree that the proposed changes to the compliance program requirements would materially reduce the costs associated with rule compliance relative to the 2013 final rule?

Question 341. Do commenters have any specific data or information that could be used to quantify the extent to which such costs are reduced?

Question 342. Do commenters believe that any aspect of the proposed changes to the compliance program requirements increases the costs associated with rule compliance? If so which aspects of the proposed changes would raise costs, why, and to what extent?

The above discussion outlines the Agencies' views on the most significant sources of cost reduction that arise from this proposal. At the same time, the Agencies are aware that there may be other aspects of the proposal that commenters view as either decreasing or increasing costs associated with the 2013 final rule. Accordingly, the Agencies seek broad comment on any other aspects of the proposal that would either increase or decrease the costs associated with the rule. Commenters are encouraged to be specific and to provide any data or information that would help demonstrate their views as well as potential ways to mitigate costs.

V. Administrative Law Matters

A. Solicitation of Comments on Use of Plain Language

Section 722 of the Gramm-Leach-Bliley Act (Pub. L. 106–102, 113 Stat. 1338, 1471, 12 U.S.C. 4809), requires the Federal banking agencies to use plain language in all proposed and final rules published after January 1, 2000. The Federal banking agencies have sought to present the proposal in a simple and straightforward manner, and invite your comments on how to make this proposal easier to understand.

For example:

- *Have the agencies organized the material to suit your needs? If not, how could this material be better organized?*
- *Are the requirements in the proposal clearly stated? If not, how could the proposal be more clearly stated?*
- *Does the proposal contain language or jargon that is not clear? If so, which language requires clarification?*
- *Would a different format (e.g., grouping and order of sections, use of headings, paragraphing) make the proposal easier to understand? If so, what changes to the format would make the proposal easier to understand?*
- *Would more, but shorter, sections be better? If so, which sections should be changed?*
- *What else could the agencies do to make the regulation easier to understand?*

B. Paperwork Reduction Act Analysis Request for Comment on Proposed Information Collection

Certain provisions of the proposed rule contain ''collection of information'' requirements within the meaning of the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3521). In accordance with the requirements of the PRA, the agencies may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number. The agencies reviewed the proposed rule and determined that the proposed rule revises certain reporting and recordkeeping requirements that have been previously cleared under various OMB control numbers. The agencies are proposing to extend for three years, with revision, these information collections. The information collection requirements contained in this joint notice of proposed rulemaking have been submitted by the OCC and FDIC to OMB for review and approval under section 3507(d) of the PRA (44 U.S.C. 3507(d)) and section 1320.11 of the OMB's implementing regulations (5 CFR 1320). The Board reviewed the proposed rule under the authority delegated to the Board by OMB. The Board will submit information collection burden estimates to OMB and the submission will include burden for Federal Reserve-supervised institutions, as well as burden for OCC-, FDIC-, SEC-, and CFTC-supervised institutions under a holding company. The OCC and the FDIC will take burden for banking entities that are not under a holding company.

Comments are invited on:

a. Whether the collections of information are necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

b. The accuracy of the estimates of the burden of the information collections, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

All comments will become a matter of public record. Comments on aspects of this notice that may affect reporting, recordkeeping, or disclosure requirements and burden estimates should be sent to the addresses listed in the **ADDRESSES** section. A copy of the comments may also be submitted to the OMB desk officer for the Agencies by mail to U.S. Office of Management and Budget, 725 17th Street NW, #10235, Washington, DC 20503, by facsimile to 202–395–5806, or by email to *oira_submission@omb.eop.gov*, Attention, Commission and Federal Banking Agency Desk Officer.

Abstract

Section 619 of the Dodd-Frank Act added section 13 to the BHC Act, which generally prohibits any banking entity from engaging in proprietary trading or from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a covered fund, subject to certain exemptions. The exemptions allow certain types of permissible trading activities such as underwriting, market making, and risk-mitigating hedging, among others. Each agency issued a common final rule implementing section 619 that became effective on April 1, 2014. Section ____.20(d) and Appendix A of the final rule require certain of the largest banking entities to report to the appropriate agency certain quantitative measurements.

Current Actions

The proposed rule contains requirements subject to the PRA and the changes relative to the current final rule are discussed herein. The new and modified reporting requirements are found in sections ____.3(c), ____.3(g), ____.4(a)(8)(iii), ____.4(a)(8)(iv), ____.4(b)(6)(iii), ____.4(b)(6)(iv), ____.20(d), and ____.20(g)(3). The modified recordkeeping requirements are found in sections ____.5(c), ____.20(b), ____.20(c), ____.20 (d), ____.20(e), and ____.20(f)(2). The modified information collection requirements[260] would implement section 619 of the Dodd-Frank Act. The respondents are for-profit financial institutions, including small businesses. A covered entity must retain these records for a period that is no less than 5 years in a form that allows it to promptly produce such records to the relevant Agency on request.

Reporting Requirements

Section ____.3(c) would require that under the revised short-term prong, certain banking entities to report to the appropriate agency when a trading desk exceeds $25 million in absolute values of the daily net realized and unrealized gain and loss over the preceding 90 day period if the banking entity chooses to perform this calculation for a trading desk in order to meet the presumption of compliance. The agencies estimate that the new reporting requirement would be collected twice a year with an average hour per response of 1 hour.

Section ____.3(g) would require that notice and response procedures be followed under the reservation of authority provision. The agencies estimate that the new reporting requirement would be collected once a year with an average hours per response of 2 hours.

Sections ____.4(a)(8)(iii) and ____.4(b)(6)(iii) would require that banking entities report to the appropriate agency when their internal risk limits under the RENTD framework for market-making and underwriting have been exceeded. These reporting requirements would be included in the section ____.20(d) reporting requirements.

Section ____.20(d) would be modified by extending the reporting period for banking entities with $50 billion or more in trading assets and liabilities from within 10 days of the end of each calendar month to 20 days of the end of each calendar month. The agencies estimate that the current average hours per response would decrease by 14 hours (decrease 40 hours for initial set-up).

Sections ____.3(c)(2), ____.3(g)(2), ____.4(a)(8)(iv), ____.4(b)(6)(iv), and ____.20(g)(3) would set forth proposed notice and response procedures that an agency would follow when exercising its reservation of authority to modify what is in or out of the trading account. These reporting requirements would be included in the section ____.3(c) reporting requirements for section ____.3(c)(2); the section ____.3(g) reporting requirements for section ____.3(g)(2); and the section ____.20(d) reporting requirements for section ____.4(a)(8)(iv), ____.4(b)(6)(iv), and ____.20(g)(3).

Recordkeeping Requirements

Section ____.5(c) would be modified by reducing the requirements for banking entities that do not have significant trading assets and liabilities and eliminating documentation requirements for certain hedging activities. The agencies estimate that the current average hours per response would decrease by 20 hours (decrease 10 hours for initial set-up).

Section ____.20(b) would be modified by limiting the requirement only to banking entities with significant trading assets and liabilities. The agencies estimate that the current average hour per response would not change.

Section ____.20(c) would be modified by limiting the CEO attestation requirement to a banking entity that has significant trading assets and liabilities or moderate trading assets and liabilities. The agencies estimate that the current average hours per response would decrease by 1,100 hours (decrease 3,300 hours for initial set-up).

Section ____.20(d) would be modified by extending the time period for reporting for banking entities with $50 billion or more in trading assets and liabilities from within 10 days of the end of each calendar month to 20 days of the end of each calendar month. The agencies estimate that the current average hours per response would decrease by 3 hours.

Section ____.20(e) would be modified by limiting the requirement to banking entities with significant trading assets and liabilities. The agencies estimate that the current average hours per response would not change.

Section ____.20(f)(2) would be modified by limiting the requirement to banking entities with moderate trading assets and liabilities. The agencies estimate that the current average hours per response would not change.

The Instructions for Preparing and Submitting Quantitative Measurement Information, Technical Specifications Guidance, and XML Schema are available for review on each agency's public website:

- *OCC: http://www.occ.treas.gov/topics/capital-markets/financial-markets/trading/volcker-rule-implementation/index-volcker-rule-implementation.html*;

- *SEC: https://www.sec.gov/structureddata/dera_taxonomies*.

Proposed Revision, With Extension, of the Following Information Collections

Estimated average hours per response:

Reporting

Section ____.3(c)—1 hour for an average of 2 times per year.

Section ____.3(g)—2 hours.

Section ____.12(e)—20 hours (Initial set-up 50 hours) for an average of 10 times per year.

Section ____.20(d)—41 hours (Initial set-up 125 hours) for quarterly and monthly filers.

Recordkeeping

Section ____.3(e)(3)—1 hour (Initial set-up 3 hours).

Section ____.4(b)(3)(i)(A)—2 hours for quarterly filers.

Section ____.5(c)—80 hours (Initial setup 40 hours).

Section ____.11(a)(2)—10 hours.

Section ____.20(b)—265 hours (Initial set-up 795 hours).

Section ____.20(c)—100 hours (Initial set-up 300 hours).

Section ____.20(d) (entities with $50 billion or more in trading assets and liabilities)—13 hours.

Section ____.20(d) (entities with at least $10 billion and less than $50 billion in trading assets and liabilities)—10 hours.

Section ____.20(e)—200 hours.

Section ____.20(f)(1)—8 hours.

Section ____.20(f)(2)—40 hours (Initial set-up 100 hours).

Disclosure

Section ____.11(a)(8)(i)—0.1 hours for an average of 26 times per year.

OCC

Title of Information Collection: Reporting, Recordkeeping, and Disclosure Requirements Associated with Restrictions on Proprietary Trading and Certain Relationships with Hedge Funds and Private Equity Funds.

Frequency: Annual, monthly, quarterly, and on occasion.

[260] In an effort to provide transparency, the total cumulative burden for each agency is shown. In addition to the changes resulting from the proposed rule, the agencies are also applying a conforming methodology for calculating the burden estimates in order to be consistent across the agencies.

Affected Public: Businesses or other for-profit.

Respondents: National banks, state member banks, state nonmember banks, and state and federal savings associations.

OMB control number: 1557–0309.

Estimated number of respondents: 38.

Proposed revisions estimated annual burden: −469 hours.

Estimated annual burden hours: 20,712 hours (1,784 hour for initial set-up and 18,928 hours for ongoing).

Board

Title of Information Collection: Reporting, Recordkeeping, and Disclosure Requirements Associated with Regulation VV.

Frequency: Annual, monthly, quarterly, and on occasion.

Affected Public: Businesses or other for-profit.

Respondents: State member banks, bank holding companies, savings and loan holding companies, foreign banking organizations, U.S. State branches or agencies of foreign banks, and other holding companies that control an insured depository institution and any subsidiary of the foregoing other than a subsidiary for which the OCC, FDIC, CFTC, or SEC is the primary financial regulatory agency. The Board will take burden for all institutions under a holding company including:

- OCC-supervised institutions,
- FDIC-supervised institutions,
- Banking entities for which the CFTC is the primary financial regulatory agency, as defined in section 2(12)(C) of the Dodd-Frank Act, and
- Banking entities for which the SEC is the primary financial regulatory agency, as defined in section 2(12)(B) of the Dodd-Frank Act.

Legal authorization and confidentiality: This information collection is authorized by section 13 of the Bank Holding Company Act (BHC Act) (12 U.S.C. 1851(b)(2) and 12 U.S.C. 1851(e)(1)). The information collection is required in order for covered entities to obtain the benefit of engaging in certain types of proprietary trading or investing in, sponsoring, or having certain relationships with a hedge fund or private equity fund, under the restrictions set forth in section 13 and the final rule. If a respondent considers the information to be trade secrets and/or privileged such information could be withheld from the public under the authority of the Freedom of Information Act (5 U.S.C. 552(b)(4)). Additionally, to the extent that such information may be contained in an examination report such information could also be withheld from the public (5 U.S.C. 552 (b)(8)).

Agency form number: FR VV.

OMB control number: 7100–0360.

Estimated number of respondents: 41.

Proposed revisions estimated annual burden: −51,219 hours.

Estimated annual burden hours: 45,558 hours (1,784 hour for initial set-up and 43,774 hours for ongoing).

FDIC

Title of Information Collection: Volcker Rule Restrictions on Proprietary Trading and Relationships with Hedge Funds and Private Equity Funds.

Frequency: Annual, monthly, quarterly, and on occasion.

Affected Public: Businesses or other for-profit.

Respondents: State nonmember banks, state savings associations, and certain subsidiaries of those entities.

OMB control number: 3064–0184.

Estimated number of respondents: 53.

Proposed revisions estimated annual burden: −10,305 hours.

Estimated annual burden hours: 10,632 hours (1,784 hours for initial set-up and 8,848 hours for ongoing).

C. Initial Regulatory Flexibility Act Analysis

The Regulatory Flexibility Act (''RFA'') [261] requires an agency to either provide an initial regulatory flexibility analysis with a proposal or certify that the proposal will not have a significant economic impact on a substantial number of small entities. The U.S. Small Business Administration (''SBA'') establishes size standards that define which entities are small businesses for purposes of the RFA.[262] Except as otherwise specified below, the size standard to be considered a small business for banking entities subject to the proposal is $550 million or less in consolidated assets.[263] The Agencies are separately publishing initial regulatory flexibility analyses for the proposals as set forth in this NPR.

Board

The Board has considered the potential impact of the proposed rule on small entities in accordance with the RFA. Based on the Board's analysis, and for the reasons stated below, the Board believes that this proposed rule will not have a significant economic impact on a substantial of number of small entities. Nevertheless, the Board is publishing and inviting comment on this initial regulatory flexibility analysis. A final regulatory flexibility analysis will be conducted after comments received during the public comment period have been considered.

The Board welcomes comment on all aspects of its analysis. In particular, the Board requests that commenters describe the nature of any impact on small entities and provide empirical data to illustrate and support the extent of the impact.

1. Reasons for the Proposal

As discussed in the **SUPPLEMENTARY INFORMATION**, the Agencies are proposing to revise the 2013 final rule in order to provide clarity to banking entities about what activities are prohibited, reduce compliance costs, and improve the ability of the Agencies to make supervisory assessments regarding compliance relative to the 2013 final rule. To minimize the costs associated with the 2013 final rule in a manner consistent with section 13 of the BHC Act, the Agencies are proposing to simplify and tailor the rule in a manner that would substantially reduce compliance costs for all banking entities and, in particular, small banking entities and banking entities without significant trading operations.

2. Statement of Objectives and Legal Basis

As discussed above, the Agencies' objective in proposing this rule is to reduce the compliance costs for all banking entities and, in particular, to tailor the rule based on the size of the banking entity and the complexity of its trading operations. The Agencies are explicitly authorized under section 13(b)(2) of the BHC Act to adopt rules implementing section 13.[264]

3. Description of Small Entities to Which the Regulation Applies

The Board's proposal would apply to state-chartered banks that are members of the Federal Reserve System (state member banks), bank holding companies, foreign banking organizations, and nonbank financial companies supervised by the Board (collectively, ''Board-regulated banking entities''). However, the Board notes that the Economic Growth, Regulatory Relief, and Consumer Protection Act,[265] which was enacted on May 24, 2018,

[261] 5 U.S.C. 601 *et seq.*

[262] U.S. SBA, Table of Small Business Size Standards Matched to North American Industry Classification System Codes, *available at https://www.sba.gov/sites/default/files/files/Size_Standards_Table.pdf.*

[263] *See id.* Pursuant to SBA regulations, the asset size of a concern includes the assets of the concern whose size is at issue and all of its domestic and foreign affiliates. 13 CFR 121.103(6).

[264] 12 U.S.C. 1851(b)(2).

[265] Public Law 115–174, 132 Stat. 1296–1368 (2018).

amends section 13 of the BHC Act by narrowing the definition of banking entity. Accordingly, no small top-tier bank holding company would meet the threshold criteria for application of the provisions provided in this proposal and, therefore, the proposed amendments to the 2013 final rule would not have a significant economic impact on a substantial number of small entities.

4. Projected Reporting, Recordkeeping, and Other Compliance Requirements

The proposal would reduce reporting, recordkeeping, and other compliance requirements for small entities. First, banking entities with consolidated gross trading assets and liabilities below $10 billion would be subject to reduced requirements and a tailored approach in light of their significantly smaller and less complex trading activities. Second, in order to further reduce compliance requirements for small and mid-sized banking entities, the Agencies have proposed a rebuttable presumption of compliance for firms that do not have consolidated gross trading assets and liabilities in excess of $1 billion. All Board-regulated banking entities that meet the SBA definition of small entities (*i.e.,* those with consolidated assets of $550 million or less) have consolidated gross trading assets and liabilities below $1 billion and thus would be subject to the presumption of compliance.

As discussed in the **SUPPLEMENTARY INFORMATION**, the Agencies expect that this rebuttable presumption of compliance would materially reduce the costs associated with complying with the rule. As a result of this presumed compliance, these banking entities would not be required to comply with many of the rule's specific requirements to demonstrate compliance, such as the documentation requirements associated with the hedging exemption. Additionally, these entities would not be required to specify and maintain trading risk limits to comply with the rule's market making exemption. Accordingly, these smaller entities would generally not be required to devote resources to demonstrate compliance with any of the rule's requirements.

Without this presumption of compliance, these banking entities would generally be required to comply with the rule's applicable substantive requirements to demonstrate compliance with the rule. As a result, this proposed change is expected to meaningfully reduce the costs associated with rule compliance for small banking entities. The presumption would be rebuttable, so a banking entity would need to maintain a certain level of resources to respond to supervisory requests for information in the event that the presumption of compliance is rebutted; however, the Agencies would not expect these banking entities to maintain anything other than what they would normally maintain in the ordinary course. The amount of resources required for such purposes is expected to be significantly smaller than the amount of resources that would be required to maintain and execute ongoing compliance with the 2013 final rule's requirements.

5. Identification of Duplicative, Overlapping, or Conflicting Federal Regulations

The Board has not identified any federal statutes or regulations that would duplicate, overlap, or conflict with the proposed revisions.

6. Discussion of Significant Alternatives

The Board believes the proposed amendments to the 2013 final rule will not have a significant economic impact on small banking entities supervised by the Board and therefore believes that there are no significant alternatives to the proposal that would reduce the economic impact on small banking entities supervised by the Board.

OCC

The RFA, requires an agency, in connection with a proposed rule, to prepare an Initial Regulatory Flexibility Analysis describing the impact of the proposed rule on small entities, or to certify that the proposed rule would not have a significant economic impact on a substantial number of small entities. For purposes of the RFA, the SBA defines small entities as those with $550 million or less in assets for commercial banks and savings institutions, and $38.5 million or less in assets for trust companies.

The OCC currently supervises approximately 886 small entities.[266] Pursuant to section 203 of the Economic Growth, Regulatory Relief, and Consumer Protection Act (May 24, 2018), OCC-supervised institutions with total consolidated assets of $10 billion or less are not ''banking entities'' within the scope of Section 13 of the BHCA, if their trading assets and trading liabilities do not exceed 5 percent of their total consolidated assets, and they are not controlled by a company that has total consolidated assets over $10 billion or total trading assets and trading liabilities that exceed 5 percent of total consolidated assets. The proposal may impact two OCC-supervised small entities, which is not a substantial number. Therefore, the OCC certifies that the proposal would not have a significant economic impact on a substantial number of small entities.

FDIC

a. Regulatory Flexibility Act

The RFA, generally requires an agency, in connection with a proposed rule, to prepare and make available for public comment an initial regulatory flexibility analysis that describes the impact of a proposed rule on small entities.[267] However, a regulatory flexibility analysis is not required if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. The SBA has defined ''small entities'' to include banking organizations with total assets of less than or equal to $550 million.[268] As discussed further below, the FDIC certifies that this proposed rule would not have a significant economic impact on a substantial number of FDIC-supervised small entities.

b. Reasons for and Policy Objectives of the Proposed Rule

The Agencies are issuing this proposal to amend the 2013 final rule in order to provide banking entities with additional certainty and reduce compliance obligations and costs where possible. The Agencies acknowledge that many small banking entities have found certain aspects of the 2013 final rule to be complex or difficult to apply in practice.[269] The proposed rule amends existing requirements in order the make them more efficient. However, the proposed amendments do not alter the Volcker Rule's existing restrictions on the ability of banking entities to engage in proprietary trading and have

[266] The number of small entities supervised by the OCC is determined using the SBA's size thresholds for commercial banks and savings institutions, and trust companies, which are $550 million and $38.5 million, respectively. Consistent with the General Principles of Affiliation 13 CFR 121.103(a), the OCC counts the assets of affiliated financial institutions when determining if we should classify an OCC-supervised institution as a small entity. The OCC used December 31, 2017, to determine size because a ''financial institution's assets are determined by averaging the assets reported on its four quarterly financial statements for the preceding year.'' See footnote 8 of the U.S. Small Business Administration's *Table of Size Standards.*

[267] 5 U.S.C. 601 *et seq.*

[268] 13 CFR 121.201 (as amended, effective December 2, 2014).

[269] The FDIC has issued twenty-one FAQs since inception of the 2013 rule.

certain interests in, and relationships with, covered funds.

c. Description of the Rule

The Agencies are proposing to tailor the application of the 2013 final rule based on a banking entity's risk profile and the size and scope of its trading activities. Second, the Agencies aim to further streamline compliance obligations, particularly for entities without large trading operations. Third, the agencies seek to streamline and refine certain definitions and requirements related to the proprietary trading prohibition and limitations on covered fund activities and investments. Please refer to Section II: Overview of Proposal, for further information.

d. Other Statutes and Federal Rules

The FDIC has not identified any likely duplication, overlap, and/or potential conflict between the proposed rule and any other federal rule.

On May 24, 2018, the Economic Growth, Regulatory Relief, and Consumer Protection Act was enacted, which, among other things, amends section 13 of the BHC Act. As a result, section 13 excludes from the definition of banking entity any institution that, together with their affiliates and subsidiaries, has: (1) Total assets of $10 billion or less, and (2) trading assets and liabilities that comprise 5 percent or less of total assets. This excludes every FDIC-supervised small entity from the statutory definition of banking entity, except those that are controlled by a company that is not excluded. The SBA has defined ''small entities'' to include banking organizations with total assets less than or equal to $550 million.[270]

e. Small Entities Affected

The FDIC supervises 3,597 depository institutions,[271] of which, 2,885 are defined as small entity.[272] There are no FDIC-supervised small entities that engage in significant or moderate trading of assets and liabilities at the depository institution level.[273] There are only five FDIC-supervised small entities, which are controlled by companies not excluded by section 13, as amended, that would be required to implement compliance elements prescribed by the proposed rule and would have compliance obligations under the proposed rule, of which one is categorized as having ''significant'' trading, one is categorized as having ''moderate'' trading and three are categorized as having ''limited'' trading activity.[274]

f. Expected Effects of the Proposed Rule

The potential benefits of this proposed rule consist of any reduction in the regulatory costs borne by covered entities. The potential costs of this rule consist of any reduction in the efficacy of the objectives in the existing regulatory framework. As explained in the following sections, certain of these potential costs and benefits are difficult to quantify.

1. Expected Costs

By reducing the reporting requirements of the 2013 final rule, there is a chance that the Agencies would fail to recognize prohibited proprietary trading, resulting in additional risk of loss to an institution, the Deposit Insurance Fund (DIF), the financial sector, and the economy. The FDIC believes the potential costs associated with these risks are minimal. First, the reporting metrics that would be removed or replaced by the proposed rule have contributed little as indicators of risk, and there would be no cost associated with replacing them. Second, the banking entities that would be relieved from compliance requirements under section ____.20 of the proposed rule are primarily small entities that conduct limited to no trading activity, and which are therefore excluded from Section 13 by the Economic Growth, Regulatory Relief, and Consumer Protection Act. The FDIC would maintain its ability to recognize and respond to potential risks of prohibited activity by these small entities through off-site monitoring of Call Reports as well as periodic on-site examinations. The proposed rule has no additional or transition costs because the new reporting metrics in the proposed rule consist of data that covered entities already collect in the course of business and for regulatory compliance.

2. Expected Benefits

The potential benefits of the proposed rule can be expressed in terms of the potential reduction in the costs of compliance incurred by small, FDIC-supervised affected banking entities under the proposed rule. These benefits cannot be quantified because covered institutions do not collect data and report to the FDIC the precise burden relating to parts of the 2013 final rule. Nevertheless, supervisory experience and feedback received from FDIC-supervised banking entities have demonstrated that these burdens exist. The proposed rule clarifies many requirements and definitions that are expected to enable banking entities to more efficiently and effectively comply with the rule, thus providing benefits to those entities.

g. Alternatives Considered

The primary alternative to the proposed rule is to maintain the status quo under the 2013 final rule. As discussed above, however, the proposed rule implements the statutory requirements, but is expected to provide more certainty and result in lower costs.

The proposed rule also seeks public comment on alternative regulatory approaches that would reduce the compliance burden of the 2013 final rule without reducing its effectiveness in eliminating the moral hazard of proprietary trading.

h. Certification Statement

Section 13, as amended, exempts almost all of the FDIC-supervised small institutions from compliance with the Volcker Rule. The proposed rule provides benefits to the remaining five FDIC-supervised small institutions with parent companies subject to the rule. Therefore, the FDIC certifies that this proposed rule will not have a significant economic impact on a substantial number of FDIC-supervised small entities.[275]

i. Request for Comments

The FDIC invites comments on all aspects of the supporting information provided in this RFA section. In particular, would this rule have any significant effect on small entities that the FDIC has not identified? If the proposed rule is implemented, how many hours of burden would small institutions save?

SEC

Pursuant to 5 U.S.C. 605(b), the SEC hereby certifies that the proposed amendments to the 2013 final rule would not, if adopted, have a significant economic impact on a substantial number of small entities.

As discussed in the **SUPPLEMENTARY INFORMATION**, the Agencies are proposing

[270] 13 CFR 121.201.

[271] FDIC-supervised institutions are set forth in 12 U.S.C. 1813(q)(2).

[272] FDIC Call Report, March 31, 2018.

[273] Based on data from the December 31, 2017 Call Reports and Y9C reports. Top tier institutions that have a four-quarter average trading assets and liabilities, excluding U.S. treasuries and obligations or guarantees of government agencies, exceeding $10 billion have ''significant'' trading activity while those between $1 billion and $10 billion have ''moderate'' trading activity and those below $1 billion have ''limited'' trading activity.

[274] *Id.*

[275] Notwithstanding S.2155, the rule does provide benefits to a substantial number of moderate sized banks above $550 million in total assets and below $1 billion in trading assets and liabilities as well as to large banks with very little trading activity.

to revise the 2013 final rule in order to provide clarity to banking entities about what activities are prohibited, reduce compliance costs, and improve the ability of the Agencies to make assessments regarding compliance relative to the 2013 final rule. To minimize the costs associated with the 2013 final rule in a manner consistent with section 13 of the BHC Act, the Agencies are proposing to simplify and tailor the rule in a manner that would substantially reduce compliance costs for all banking entities and, in particular, small banking entities and banking entities without significant trading operations.

The proposed revisions would generally apply to banking entities, including certain SEC-registered entities. These entities include bank-affiliated SEC-registered broker-dealers, investment advisers, and security-based swap dealers. Based on information in filings submitted by these entities, the SEC preliminarily believes that there are no banking entity registered investment advisers [276] or broker-dealers [277] that are small entities for purposes of the RFA.[278] For this reason, the SEC believes that the proposed amendments to the 2013 final rule would not, if adopted, have a significant economic impact on a substantial number of small entities.

The SEC encourages written comments regarding this certification. Specifically, the SEC solicits comment as to whether the proposed amendments could have an impact on small entities that has not been considered. Commenters should describe the nature of any impact on small entities and provide empirical data to support the extent of such impact.

CFTC

Pursuant to 5 U.S.C. 605(b), the CFTC hereby certifies that the proposed amendments to the 2013 final rule would not, if adopted, have a significant economic impact on a substantial number of small entities for which the CFTC is the primary financial regulatory agency.

As discussed in this **SUPPLEMENTARY INFORMATION**, the Agencies are proposing to revise the 2013 final rule in order to provide clarity to banking entities about what activities are prohibited, reduce compliance costs, and improve the ability of the Agencies to make assessments regarding compliance relative to the 2013 final rule. To minimize the costs associated with the 2013 final rule in a manner consistent with section 13 of the BHC Act, the Agencies are proposing to simplify and tailor the rule in a manner that would substantially reduce compliance costs for all banking entities and, in particular, small banking entities and banking entities without significant trading operations.

The proposed revisions would generally apply to banking entities, including certain CFTC-registered entities. These entities include bank-affiliated CFTC-registered swap dealers, FCMs, commodity trading advisors and commodity pool operators.[279] The CFTC has previously determined that swap dealers, futures commission merchants and commodity pool operators are not small entities for purposes of the RFA and, therefore, the requirements of the RFA do not apply to those entities.[280] As for commodity trading advisors, the CFTC has found it appropriate to consider whether such registrants should be deemed small entities for purposes of the RFA on a case-by-case basis, in the context of the particular regulation at issue.[281]

In the context of the proposed revisions to the 2013 final rule, the CFTC believes it is unlikely that a substantial number of the commodity trading advisors that are potentially affected are small entities for purposes of the RFA. In this regard, the CFTC notes that only commodity trading advisors that are registered with the CFTC are covered by the 2013 final rule, and generally those that are registered have larger businesses. Similarly, the 2013 final rule applies to only those commodity trading advisors that are affiliated with banks, which the CFTC expects are larger businesses. The CFTC requests that commenters address in particular whether any of these commodity trading advisors, or other CFTC registrants covered by the proposed revisions to the 2013 final rule, are small entities for purposes of the RFA.

Because the CFTC believes that there are not a substantial number of registered, banking entity-affiliated commodity trading advisors that are small entities for purposes of the RFA, and the other CFTC registrants that may be affected by the proposed revisions have been determined not to be small entities, the CFTC believes that the proposed revisions to the 2013 final rule would not, if adopted, have a significant economic impact on a substantial number of small entities for which the CFTC is the primary financial regulatory agency.

The CFTC encourages written comments regarding this certification. Specifically, the CFTC solicits comment as to whether the proposed amendments could have a direct impact on small entities that were not considered. Commenters should describe the nature of any impact on small entities and provide empirical data to support the extent of such impact.

A. OCC Unfunded Mandates Reform Act of 1995 Determination

The OCC analyzed the proposed rule under the factors set forth in the

[276] For the purposes of an SEC rulemaking in connection with the RFA, an investment adviser generally is a small entity if it: (1) Has assets under management having a total value of less than $25 million; (2) did not have total assets of $5 million or more on the last day of the most recent fiscal year; and (3) does not control, is not controlled by, and is not under common control with another investment adviser that has assets under management of $25 million or more, or any person (other than a natural person) that had total assets of $5 million or more on the last day of its most recent fiscal year. *See* 17 CFR 275.0–7.

[277] For the purposes of an SEC rulemaking in connection with the RFA, a broker-dealer will be deemed a small entity if it: (1) Had total capital (net worth plus subordinated liabilities) of less than $500,000 on the date in the prior fiscal year as of which its audited financial statements were prepared pursuant to 17 CFR 240.17a–5(d), or, if not required to file such statements, had total capital (net worth plus subordinated liabilities) of less than $500,000 on the last day of the preceding fiscal year (or in the time that it has been in business, if shorter); and (2) is not affiliated with any person (other than a natural person) that is not a small business or small organization. *See* 17 CFR 240.0–10(c). Under the standards adopted by the SBA, small entities also include entities engaged in financial investments and related activities with $38.5 million or less in annual receipts. *See* 13 CFR 121.201 (Subsector 523).

[278] Based on SEC analysis of Form ADV data, the SEC preliminarily believes that there are not a substantial number of registered investment advisers affected by the proposed amendments that would qualify as small entities under RFA. Based on SEC analysis of broker-dealer FOCUS filings and NIC relationship data, the SEC preliminarily believes that there are no SEC-registered broker-dealers affected by the proposed amendments that would qualify as small entities under RFA. With respect to security-based swap dealers, based on feedback from market participants and our information about the security-based swap markets, the Commission believes that the types of entities that would engage in more than a de minims amount of dealing activity involving security-based swaps—which generally would be large financial institutions—would not be ''small entities'' for purposes of the RFA.

[279] The proposed revisions may also apply to other types of CFTC registrants that are banking entities, such as introducing brokers, but the CFTC believes it is unlikely that such other registrants will have significant activities that would implicate the proposed revisions. *See* 79 FR 5808, 5813 (Jan. 31, 2014) (CFTC version of 2013 final rule).

[280] *See* Policy Statement and Establishment of Definitions of ''Small Entities'' for Purposes of the Regulatory Flexibility Act, 47 FR 18618 (Apr. 30, 1982) (futures commission merchants and commodity pool operators); Registration of Swap Dealers and Major Swap Participants, 77 FR 2613, 2620 (Jan. 19, 2012) (swap dealers and major swap participants).

[281] *See* Policy Statement and Establishment of Definitions of ''Small Entities'' for Purposes of the Regulatory Flexibility Act, 47 FR 18618, 18620 (Apr. 30, 1982).

Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1532). Under this analysis, the OCC considered whether the proposed rule includes a federal mandate that may result in the expenditure by state, local, and Tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year (adjusted annually for inflation).

The OCC has determined this proposed rule is likely to result in the expenditure by the private sector of approximately $11.6 million in the first year. Therefore, the OCC concludes that implementation of the proposed rule would not result in an expenditure of $100 million or more annually by state, local, and tribal governments, or by the private sector.

B. SEC: Small Business Regulatory Enforcement Fairness Act

For purposes of the Small Business Regulatory Enforcement Fairness Act of 1996, or ''SBREFA,'' [282] the SEC requests comment on the potential effect of the proposed amendments on the U.S. economy on an annual basis; any potential increase in costs or prices for consumers or individual industries; and any potential effect on competition, investment or innovation. Commenters are requested to provide empirical data and other factual support for their views to the extent possible.

D. SEC Economic Analysis

1. Broad Economic Considerations

Section 13 of the BHC Act generally prohibits banking entities from engaging in proprietary trading and from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with covered funds, subject to certain exemptions. Under the BHC Act, ''banking entities'' include insured depository institutions, any company that controls an insured depository institution or that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978, and their affiliates and subsidiaries.[283] Accordingly, certain SEC-regulated entities, such as broker-dealers, security-based swap dealers (''SBSDs''), and registered investment advisers (''RIAs'') affiliated with a banking entity, fall under the definition of ''banking entity'' and are subject to the prohibitions of section 13 of the BHC Act.[284] In addition, the Economic Growth, Regulatory Relief, and Consumer Protection Act, enacted on May 24, 2018, amends section 13 of the BHC Act to exclude from the scope of ''insured depository institution'' in the banking entity definition any entity that does not have and is not controlled by a company that has (1) more than $10 billion in total consolidated assets; and (2) total trading assets and trading liabilities, as reported on the most recent applicable regulatory filing filed by the institution, that are more than 5% of total consolidated assets.[285]

The Agencies issued final regulations implementing section 13 of the BHC Act in December 2013, with an initial effective date of April 1, 2014.[286] The 2013 final rule prohibits banking entities (*e.g.,* bank-affiliated broker-dealers, SBSDs, and investment advisers) from engaging, as principal, in short-term trading of securities, derivatives, futures contracts, and options on these instruments, subject to certain exemptions. In addition, the 2013 final rule generally prohibits the same entities from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with a ''covered fund,'' subject to certain exemptions. The 2013 final rule defines the term ''covered fund'' to include any issuer that would be an investment company under the Investment Company Act of 1940 if it were not otherwise excluded by sections 3(c)(1) or 3(c)(7) of that act, as well as certain foreign funds and commodity pools.[287] However, the definition contains a number of exclusions for entities that would otherwise meet the covered fund definition but that the Agencies did not believe are engaged in investment activities contemplated by section 13 of the BHC Act.[288]

In implementing section 13 of the BHC Act, the Agencies sought to increase the safety and soundness of banking entities, promote financial stability, and reduce conflicts of interest between banking entities and their customers.[289] The regulatory regime created by the 2013 final rule may enhance regulatory oversight and compliance with the substantive prohibitions but could also impact capital formation and liquidity. The Agencies also recognized that client-oriented financial services, such as underwriting and market making, are critical to capital formation and can facilitate the provision of market liquidity, and that the ability to hedge is fundamental to prudent risk management as well as capital formation.[290]

[282] Public Law 104–121, Title II, 110 Stat. 857 (1996) (codified in various sections of 5 U.S.C., 15 U.S.C. and as a note to 5 U.S.C. 601).

[283] *See* 12 U.S.C. 1851(h)(1).

[284] Throughout this economic analysis, the term ''banking entity'' generally refers only to banking entities for which the SEC is the primary financial regulatory agency unless otherwise noted. While section 13 of the BHC Act and its associated rules apply to a broader set of banking entities, this economic analysis is limited to those banking entities for which the SEC is the primary financial regulatory agency as defined in section 2(12)(B) of the Dodd-Frank Act. *See* 12 U.S.C. 1851(b)(2); 12 U.S.C. 5301(12)(B).

We recognize that compliance with SBSD registration requirements is not yet required and that there are currently no registered SBSDs. However, the SEC has previously estimated that as many as 50 entities may potentially register as security-based swap dealers and that as many as 16 of these entities may already be SEC-registered broker-dealers. *See* Registration Process for Security-Based Swap Dealers and Major Security-Based Swap Participants, Exchange Act Release No. 75611 (Aug. 5, 2015), 80 FR 48963 (Aug. 14, 2015) (''SBSD and MSP Registration Release'').

For the purposes of this economic analysis, the term ''dealer'' generally refers to SEC-registered broker-dealers and SBSDs.

Throughout this economic analysis, ''we'' refers only to the SEC and not the other Agencies, except where otherwise indicated.

[285] The legislation also alters the name sharing provisions in section 13(d)(1)(G)(vi). This economic analysis assumes that the legislation's changes to section 13 of the BHC Act are in effect.

[286] *See* 79 FR at 5536. The 2013 final rule was published in the **Federal Register** on January 31, 2014, and became effective on April 1, 2014. Banking entities were required to fully conform their proprietary trading activities and their new covered fund investments and activities to the requirements of the final rule by the end of the conformance period, which the Board extended to July 21, 2015. The Board extended the conformance period for legacy-covered fund activities until July 21, 2017. Upon application, banking entities also have an additional period to conform certain illiquid funds to the requirements of section 13 and implementing regulations.

[287] *See* 2013 final rule § ____.10(b).

[288] *See* 2013 final rule § ____.10(c).

[289] *See, e.g.,* 79 FR at 5666, 5574, 5541, 5659. An extensive body of research has examined moral hazard arising out of federal deposit insurance, implicit bailout guarantees, and systemic risk issues. See, *e.g.,* Atkeson, d'Avernas, Eisfeldt, and Weill, 2018, ''Government Guarantees and the Valuation of American Banks,'' working paper. *See also* Bianchi, 2016, ''Efficient Bailouts?'' American Economic Review 106 (12), 3607–3659; Kelly, Lustig, and Van Nieuwerburgh, 2016, ''Too-Systematic-to-Fail: What Option Markets Imply about Sector-Wide Government Guarantees,'' American Economic Review 106(6), 1278–1319; Anginer, Demirguc-Kunt, and Zhu, 2014, ''How Does Deposit Insurance Affect Bank Risk? Evidence from the Recent Crisis,'' Journal of Banking and Finance 48, 312–321; Beltratti and Stulz, 2012, ''The Credit Crisis Around the Globe: Why Did Some Banks Perform Better?'' Journal of Financial Economics 105, 1–17; Veronesi and Zingales, 2010, ''Paulson's Gift,'' Journal of Financial Economics 97(3), 339–368. For a literature review, see, *e.g.,* Benoit, Colliard, Hurlin, and Perignon, 2017, ''Where the Risks Lie: A Survey on Systemic Risk,'' Review of Finance 21(1), 109–152.

See also, e.g., Avci, Schipani, and Seyhun, 2017, ''Eliminating Conflicts of Interests in Banks: The Significance of the Volcker Rule,'' Yale Journal on Regulation 35 (2).

[290] *See, e.g.,* 79 FR at 5541, 5546, 5561. In addition, a significant amount of research has focused on changes in liquidity provision following the financial crisis and regulatory reforms. *See, e.g.,* Bessembinder, Jacobsen, Maxwell, and Venkataraman 2017, ''Capital Commitment and Illiquidity in Corporate Bonds,'' Journal of Finance, forthcoming. *See also* Bao, O'Hara and Zhou, 2017, ''The Volcker Rule and Corporate Bond Market

Section 13 of the BHC Act also provides a number of statutory exemptions to the general prohibitions on proprietary trading and covered funds activities. For example, the statute exempts from the proprietary trading restrictions certain underwriting, market making, and risk-mitigating hedging activities, as well as certain trading activities outside of the United States.[291] Similarly, section 13 provides exemptions for certain covered funds activities, such as exemptions for organizing and offering covered funds.[292] The 2013 final rule implemented these exemptions.[293] In addition, some banking entities engaged in proprietary trading are required to furnish periodic reports that include a variety of quantitative measurements of their covered trading activities, and banking entities engaged in activities covered by section 13 of the BHC Act and the 2013 final rule are required to establish a compliance program reasonably designed to ensure and monitor compliance with the 2013 final rule.[294]

Certain aspects of the rule may have resulted in a complex and costly compliance regime that is unduly restrictive and burdensome on some affected banking entities, particularly smaller firms that do not qualify for the simplified compliance and reporting regime. The Agencies also recognize that distinguishing between permissible and prohibited activities may be complex and costly for some firms. Moreover, the 2013 final rule may have included in its scope some groups of market participants that do not necessarily engage in the activities or pose the risks that section 13 of the BHC Act intended to address. For example, the 2013 final rule's definition of the term ''covered fund'' is broad and, as a result, may include funds that do not engage in the investment activities contemplated by section 13 of the BHC Act. As another example, foreign banking entities' ability to trade financial instruments in the United States may have been significantly limited despite the foreign trading exemption in the 2013 final rule.

The amendments to the 2013 final rule proposed in this release include those that influence the scope of permitted activities for all or a subset of banking entities and covered funds, and those that simplify, tailor, or eliminate the application of certain aspects of the rule to reduce compliance and reporting burdens.

Some of the proposed amendments affect the scope of permitted activities (*e.g.,* foreign trading, underwriting, market making, and risk-mitigating hedging). These changes would expand the scope of permitted activities, which may benefit the parties to those transactions and broader capital markets, for example, if reduced compliance costs translate into increased willingness of banking entities to underwrite securities or make markets. These changes also, however, could facilitate risk-taking or create conflicts of interest among certain groups of market participants. Moreover, amendments that redefine the scope of entities subject to certain provisions of the rule may impact competition, allocative efficiency, and capital formation. Broadly, to the extent that the proposed amendments and changes on which the Agencies are requesting comment increase or decrease the scope of permissible activities, they may magnify or attenuate the economic tradeoffs above. As we discuss below, to the extent that the proposed amendments or changes on which the Agencies are requesting comments reduce burdens on some groups of market participants (*e.g.,* on entities without significant trading assets and liabilities, foreign banking entities, certain types of covered funds), the proposed amendments may increase competition and trading activity in various market segments.

Other proposed amendments reduce compliance program, reporting, and documentation requirements for some entities. While these amendments are designed to reduce the compliance burdens of regulated entities, they may also reduce the efficacy of regulatory oversight, internal compliance, and supervision. Amendments and changes on which the Agencies are requesting comment that decrease (or increase) compliance program and reporting requirements tip the balance of economic tradeoffs toward (or away from) competition, trading activity, and capital formation on the one hand, and against (or in favor of) regulatory and internal oversight on the other. However, as discussed below, some of the changes need not reduce the efficacy of the Agencies' regulatory oversight. Further, under the proposal, banking entities (other than banking entities with limited trading assets and liabilities for which the proposed presumption of compliance has not been rebutted) would still be required to develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions set forth in section 13 of the BHC Act and the 2013 final rule, as it is proposed to be amended.

Where possible, we have attempted to quantify the costs and benefits expected to result from the proposed amendments. In many cases, however, the SEC is unable to quantify these potential economic effects. Some of the primary economic effects, such as the effect on incentives that may give rise to conflicts of interest in various regulated entities and the efficacy of regulatory oversight under various compliance regimes, are inherently difficult to quantify. Moreover, some of the benefits of the 2013 final rule's definitions and prohibitions that are being amended here, for example potential benefits for resilience during a crisis, are less readily observable under strong economic conditions. Lastly, because of overlapping implementation periods of various post-crisis regulations affecting the same group of SEC registrants, the long implementation timeline of the 2013 final rule, and the fact that many market participants changed their behavior in anticipation of future changes in regulation, it is difficult to quantify the net economic effects of the individual amendments to rule provisions proposed here.

In some instances, we lack the information or data necessary to provide reasonable estimates for the economic effects of the proposed amendments. For example, we lack information and data on the volume of trading activity that does not occur because of uncertainty about how to demonstrate that underwriting or market-making activities satisfy the RENTD requirement; the extent to which internally-set risk limits capture expected customer demand; how accurately correlation analysis reflects underlying exposures of banking entities with, and without, significant trading assets and liabilities in normal times and in times of market stress; the feasibility and costs of reorganization that may enable some U.S. banking entities to become foreign banking entities for the purposes of relying on the foreign trading exemption; how market participants may choose to

Making in Times of Stress,'' Journal of Financial Economics, forthcoming. Bao et al. (2017) shows that dealers not subject to the Volcker rule increased their market-making activities, partially offsetting the reduction market making by dealers affected by the Volcker Rule. *See also,* Anderson and Stulz, 2017, ''Is Post-Crisis Bond Liquidity Lower?'' working paper; Goldstein and Hotchkiss, 2017, ''Providing Liquidity in an Illiquid Market: Dealer Behavior in U.S. Corporate Bonds,'' working paper.

[291] *See* 12 U.S.C. 1851(d).

[292] *See* section 13(d)(1)(G) of the BHC Act.

[293] *See* 2013 final rule §§ ____.4, ____.5, ____.6, ____.11, ____.13.

[294] *See* 2013 final rule § ____.20.

restructure their interests in various types of private funds in response to the proposed amendments or other changes on which the Agencies seek comment; the amount of capital formation in covered funds that does not occur because of current covered fund provisions, including those concerning underwriting, market making, or hedging with covered funds; or the volume of loans, guarantees, securities lending, and derivatives activity dealers may wish to engage in with the covered funds they advise; the extent of risk reduction associated with the 2013 final rule. Where we cannot quantify the relevant economic effects, we discuss them in qualitative terms.

In addition, the broader economic effects of the proposed amendments, such as those related to efficiency, competition, and capital formation, are difficult to quantify with any degree of certainty. The proposed amendments tailor, remove, or alter the scope of requirements in the 2013 final rule. Thus, some of the methodological challenges in analyzing market effects of these amendments are somewhat similar to those that arise when analyzing the effects of the 2013 final rule. As we have noted elsewhere, analysis of the effects of the implementation of the 2013 final rule is confounded by, among others, macroeconomic factors, other policy interventions, post-crisis changes to market participants' risk aversion and return expectations, and technological advancements unrelated to regulations. Because of the extended timeline of implementation of section 13 of the BHC Act and the overlap of the 2013 final rule period with other post-crisis changes affecting the same group of SEC registrants, typical quantitative methods that might otherwise enable causal attribution and quantification of the effects of section 13 of the BHC Act and the 2013 final rule on measures of capital formation, liquidity, and informational or allocative efficiency are not available. Where existing research has sought to test causal effects and to measure them quantitatively, the presence, direction, and magnitude of the effects are sensitive to econometric methodology, measurement, choice of market, and the time period studied.[295] Moreover, empirical measures of capital formation or liquidity do not reflect issuance and transaction activity that does not occur as a result of the implementing rules. Accordingly, it is difficult to quantify the primary issuance and market liquidity that would have been observed following the financial crisis absent the ensuing reforms. Finally, since section 13 of the BHC Act and the 2013 final rule combined a number of different requirements, it is difficult to attribute the observed effects to a specific provision or set of requirements.

In addition, the existing securities markets—including market participants, their business models, market structure, etc.—differ in significant ways from the securities markets that existed prior to the 2013 final rule's implementation. For example, the role of dealers in intermediating trading activity has changed in important ways, including: Bank-dealer capital commitment declined while non-bank dealer capital commitment increased; electronic trading in some securities markets became more prominent; the profitability of trading after the financial crisis may have decreased significantly; and the introduction of alternative credit markets may have contributed to liquidity fragmentation across markets.[296]

The SEC continues to recognize that post-crisis financial reforms in general, and the 2013 final rule in particular, impose costs on certain groups of market participants. Since the rule became effective, new estimates regarding compliance burdens and new information about the various effects of the final rule have become available. The passage of time has also enabled an assessment of the value of individual requirements that enable SEC oversight, such as the requirement to report certain quantitative metrics, relative to compliance burdens. This and other information and considerations inform the SEC's economic analysis.

From the outset, we note that this analysis is limited to areas within the scope of the SEC's function as the primary securities markets regulator in the United States. In particular, the SEC's economic analysis is focused on the potential effects of the proposed amendments on SEC registrants, the functioning and efficiency of the securities markets, and capital formation. Specifically, this economic analysis generally concerns entities subject to the 2013 final rule for which the SEC is the primary financial regulatory agency, including SEC-registered broker-dealers, SBSDs, and RIAs.[297] In addition, the analysis of the covered funds provisions discusses their economic effects on covered funds as well as the economic effects of the Agencies modifying the definition of covered funds. Thus, the below analysis does not consider broker-dealers, SBSDs, and investment advisers that are not banking entities, and banking entities that are not SEC registrants, beyond the potential spillover effects on these entities and effects on efficiency, competition, and capital formation in securities markets.

2. Overview of the Baseline

In the context of this economic analysis, the economic costs and benefits, and the impact of the proposed amendments on efficiency, competition, and capital formation, are considered relative to a baseline that includes the 2013 final rule and recent legislative amendments as applicable and current practices aimed at compliance with these regulations.

a. Regulation

To assess the economic impact of the proposed rule, we are using as our baseline the legal and regulatory framework as it exists at the time of this release. Thus, the regulatory baseline for our economic analysis includes section 13 of the BHC Act as amended by the Economic Growth, Regulatory Relief, and Consumer Protection Act and the 2013 final rule. Further, our baseline accounts for the fact that since the adoption of the 2013 final rule, the staffs of the Agencies have provided FAQ responses related to the regulatory obligations of banking entities, including SEC-regulated entities that are also banking entities under the 2013 final rule, which likely influenced these entities' means of compliance with the 2013 final rule.[298] In addition, the Federal banking agencies released a 2017 policy statement with respect to foreign excluded funds.[299]

Three major areas of the 2013 final rule—proprietary trading restrictions, covered fund restrictions, and compliance requirements—are relevant to establishing an economic baseline. First, with respect to proprietary trading restrictions, the features of the existing regulatory framework relevant to the baseline of this economic analysis

[297] *See* Responses to Frequently Asked Questions Regarding the Commission's Rule under Section 13 of the Bank Holding Company Act (the ''Volcker Rule''), June 10, 2014; Updated March 4, 2016, *available at https://www.sec.gov/divisions/marketreg/faq-volcker-rule-section13.htm* (providing background on the application of the Commission's rule).

[298] *See id.*

[299] *See* Statement regarding Treatment of Certain Foreign Funds under the Rules Implementing Section 13 of the Bank Holding Company Act *supra* note 48.

include definitions of ''trading account'' and ''trading desk;'' requirements for permissible underwriting, market making, and risk-mitigating hedging activities; the liquidity management exclusion; treatment of error-related trades; restrictions on transactions between foreign banking entities and their U.S.-dealer affiliates; and the compliance and metrics-reporting requirements for dealers affiliated with banking entities. The potential that a RIC or a BDC would be treated as a banking entity where the fund's sponsor is a banking entity and holds 25% of more of the RIC or BDC's voting securities after a seeding period also forms part of our baseline.

Second, with respect to the restrictions on covered funds, the features of the existing regulatory framework under the 2013 final rule relevant to the baseline include the definition of the term ''covered fund;'' restrictions on a banking entity's relationships with covered funds; and restrictions on underwriting, market making, and hedging with covered funds.

Third, with respect to compliance, relevant requirements include the 2013 final rule's compliance program requirements, including those under § ____.20 and Appendix B, as well as recordkeeping and reporting of metrics under Appendix A.

The 2013 final rule differentiates banking entities on the basis of certain monetary thresholds, including the size of consolidated trading assets and liabilities of their parent company. More specifically, U.S. banking entities that have, together with affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which (on a worldwide consolidated basis) over the previous consecutive four quarters, as measured as of the last day of each of the four prior calendar quarters, equals $10 billion or more are currently subject to reporting requirements of Appendix A of the 2013 final rule. Entities below this threshold do not need to comply with Appendix A. Additionally, banking entities with total consolidated assets of $10 billion or less as reported on December 31 of the previous 2 calendar years that engage in covered activities qualify for the simplified compliance regime, and banking entities that have $50 billion or more in total consolidated assets and banking entities with over $10 billion in consolidated trading assets and liabilities are currently subject to the requirement to adopt an enhanced compliance program pursuant to Appendix B.

In the sections that follow we discuss rule provisions currently in effect, how each proposed amendment changes regulatory requirements, and the anticipated costs and benefits of the proposed amendments.

b. Affected Participants

The SEC-regulated entities directly affected by the proposed amendments include broker-dealers, security-based swap dealers, and investment advisers.

i. Broker-Dealers [300]

Under the 2013 final rule, some of the largest SEC-regulated broker-dealers are banking entities. Table 1 reports the number, total assets, and holdings of broker-dealers by the broker-dealer's bank affiliation.

While the 3,658 domestic broker-dealers that are not affiliated with holding companies greatly outnumber the 138 banking entity broker-dealers subject to the 2013 final rule, these banking entity broker-dealers dominate non-banking entity broker-dealers in terms of total assets (74% of total broker-dealer assets) and aggregate holdings (72% of total broker-dealer holdings).

TABLE 1—BROKER-DEALER COUNT, ASSETS, AND HOLDINGS BY AFFILIATION

Broker-dealer affiliation	Number	Total assets, $mln [301]	Holdings, $mln [302]	Holdings (alternative), $mln [303]
Affected bank broker-dealers [304]	138	3,039,337	724,706	536,555
Other bank broker-dealers [305]	124	125,595	12,312	5,582
Non-bank broker-dealers	3,658	929,240	270,876	151,516
Total	3,920	4,094,172	1,007,894	693,653

Some of the changes being proposed to the 2013 final rule differentiate banking entities on the basis of their consolidated trading assets and liabilities.[306] Table 2 reports the distribution of broker-dealer banking entities' counts, assets, and holdings by consolidated trading assets and liabilities of the (top-level) parent firm. We estimate that 89 broker-dealer affiliates of firms with less than $10 billion in consolidated trading assets and liabilities account for 7% of bank-affiliated broker-dealer assets and 5% of holdings (or 3% using the alternative measure of holdings). These figures may overestimate or underestimate the number of affected broker-dealers as they may include broker-dealers that do not engage in various types of covered trading activity.

[300] Data sources included Reporting Form FR Y–9C data for domestic holding companies on a consolidated basis and Report of Condition and Income data for banks regulated by the Board, FDIC, and OCC as of Q3 2017. Broker-dealer bank affiliations were obtained from the Federal Financial Institutions Examination Council's (FFIEC) National Information Center (NIC). Broker-dealer assets and holdings were obtained from FOCUS Report data for Q3 2017.

[301] Broker-dealer total assets are based on FOCUS report data for ''Total Assets.''

[302] Broker-dealer holdings are based on FOCUS report data for securities and spot commodities owned at market value, including bankers' acceptances, certificates of deposit and commercial paper, state and municipal government obligations, corporate obligations, stocks and warrants, options, arbitrage, other securities, U.S. and Canadian government obligations, and spot commodities.

[303] This alternative measure excludes U.S. and Canadian government obligations and spot commodities.

[304] This category includes all banking entity broker-dealers except those affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, and those for which bank trading asset and liability data was not available.

[305] This category includes all banking entity broker-dealers affiliated with firms that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, as well as banking entity broker-dealers for which bank trading asset and liability data was not available.

[306] *See, e.g.,* 2013 final rule § ____.20(d)(1).

TABLE 2—BROKER-DEALER COUNTS, ASSETS, AND HOLDINGS BY CONSOLIDATED TRADING ASSETS AND LIABILITIES OF THE BANKING ENTITY [307]

Consolidated trading assets and liabilities [308]	Number	Percentage	Total assets, $mln	Percentage	Holdings, $mln	Percentage	Holdings (altern.), $mln	Percentage
≥50bln	29	21	2,215,295	73	554,125	76	492,017	92
25bln–50bln	8	6	417,099	14	76,865	11	21,083	4
10bln–25bln	12	9	184,591	6	58,232	8	7,494	1
5bln–10bln	24	17	145,151	5	23,321	3	10,527	2
1bln–5bln	23	17	9,756	0	3,628	1	1,795	0
≤1bln	42	30	67,446	2	8,534	1	3,638	1
Total	138	100	3,039,338	100	724,705	100	536,554	100

ii. Security-Based Swap Dealers

The proposed amendments may also affect bank-affiliated SBSDs. As compliance with SBSD registration requirements is not yet required, there are currently no registered SBSDs. However, the SEC has previously estimated that as many as 50 entities may potentially register as security-based swap dealers and that as many as 16 of these entities may already be SEC-registered broker-dealers.[309] Given our analysis of DTCC Derivatives Repository Limited Trade Information Warehouse (''TIW'') transaction and positions data on single-name credit-default swaps, we preliminarily believe that all entities that may register with the SEC as SBSDs are bank-affiliated firms, including those that are SEC-registered broker-dealers. Therefore, we preliminarily estimate that, in addition to the bank-affiliated SBSDs that are already registered as broker-dealers and included in the discussion above, as many as 34 other bank-affiliated SBSDs may be affected by the proposed amendments.

Importantly, capital and other substantive requirements for SBSDs under Title VII of the Dodd-Frank Act have not yet been adopted. We recognize that firms may choose to move security-based swap trading activity into (or out of) an affiliated bank or an affiliated broker-dealer instead of registering as a standalone SBSD, if bank or broker-dealer capital and other regulatory requirements are less (or more) costly than those that may be imposed on SBSDs under Title VII. As a result, the above figures may overestimate or underestimate the number of SBSDs that are not broker-dealers and that may become SEC-registered entities that would be affected by the proposed amendments. Quantitative cost estimates are provided separately for affected broker-dealers and potential SBSDs.

iii. Private Funds and Private Fund Advisers [310]

In this section, we focus on RIAs advising private funds. Using Form ADV data, Table 3 reports the number of RIAs advising private funds by fund type, as those types are defined in Form ADV. Table 4 reports the number and gross assets of private funds advised by RIAs and separately reports these statistics for banking entity RIAs. As can be seen from Table 3, the two largest categories of private funds advised by RIAs are hedge funds and private equity funds.

Banking entity RIAs advise a total of 4,250 private funds with approximately $2 trillion in gross assets. Using Form ADV data, we observe that banking entity RIAs' gross private fund assets under management is concentrated in hedge funds and private equity funds. We estimate on the basis of this data that banking entity RIAs advise 947 hedge funds with approximately $616 billion in gross assets and 1,282 private equity funds with approximately $350 billion in assets. While banking entity RIAs are subject to all of section 13's restrictions, because RIAs do not typically engage in proprietary trading, we preliminarily believe that they will not be impacted by the proposed amendments related to proprietary trading.

TABLE 3—SEC-REGISTERED INVESTMENT ADVISERS ADVISING PRIVATE FUNDS BY FUND TYPE [311]

Fund type	All RIA	Banking entity RIA
Hedge Funds	2,691	173
Private Equity Funds	1,538	90

[307] This analysis excludes SEC-registered broker-dealers affiliated with firms that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, as well as firms for which bank trading asset and liability data was not available.

[308] Consolidated trading assets and liabilities are estimated using information reported in form Y–9C data. These estimates exclude from the definition of consolidated trading assets and liabilities Treasury securities—we subtract from the sum of total trading assets and liabilities reported in items BHCK3545 and BHCK3547 trading assets that are U.S. Treasury securities as reported in item BHCK3531 and calculate average trading assets and liabilities using 2016Q4 through 2017Q3 data. However, our estimates do not exclude agency securities as such information is not otherwise available. Thus, these figures may overestimate or underestimate the number of affected bank affiliated broker-dealers. We also note that we do not have data on worldwide consolidated trading assets and liabilities of foreign banking entities with which some SEC registrants are affiliated, and consolidated trading assets and liabilities for such foreign banking entities are calculated based on their U.S. operations. Thus, the figures may overestimate or underestimate the number of affected bank affiliated broker-dealers.

[309] *See* SBSD and MSP Registration Release, *supra* note 284.

[310] These estimates are calculated from Form ADV data as of March 31, 2018. We define an investment adviser as a ''private fund adviser'' if it indicates that it is an adviser to any private fund on Form ADV Item 7.B. We define an investment adviser as a ''banking entity RIA'' if it indicates on Form ADV Item 6.A.(7) that it is actively engaged in business as a bank, or it indicates on Form ADV Item 7.A.(8) that it has a ''related person'' that is a banking or thrift institution. For purposes of Form ADV, a ''related person'' is any advisory affiliate and any person that is under common control with the adviser. We recognize that the definition of ''control'' for purposes of Form ADV, which is used in identifying related persons on the form, differs from the definition of ''control'' under the BHC Act. In addition, this analysis does not exclude SEC-registered investment advisers affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets. Thus, these figures may overestimate or underestimate the number of banking entity RIAs.

TABLE 3—SEC-REGISTERED INVESTMENT ADVISERS ADVISING PRIVATE FUNDS BY FUND TYPE[311]—Continued

Fund type	All RIA	Banking entity RIA
Real Estate Funds	486	56
Securitized Asset Funds	222	43
Venture Capital Funds	173	16
Liquidity Funds	46	7
Other Private Funds	1,043	148
Total Private Fund Advisers	4,660	308

TABLE 4—THE NUMBER AND GROSS ASSETS OF PRIVATE FUNDS ADVISED BY SEC-REGISTERED INVESTMENT ADVISERS[312]

Fund type	Number of private funds		Gross assets, $bln	
	All RIA	Banking entity RIA	All RIA	Banking entity RIA
Hedge Funds	10,329	947	7,081	616
Private Equity Funds	13,588	1,282	2,919	350
Real Estate Funds	3,252	323	564	84
Securitized Asset Funds	1,707	360	562	120
Liquidity Funds	1,073	29	109	190
Venture Capital Funds	76	42	291	2
Other Private Funds	4,337	1,268	1,568	689
Total Private Funds	34,359	4,250	13,093	2,052

Banking entity RIAs advise a total of 4,250 private funds with approximately $2 trillion in gross assets. Using Form ADV data, we observe that banking entity RIAs' gross private fund assets under management is concentrated in hedge funds and private equity funds. We estimate on the basis of this data that banking entity RIAs advise 947 hedge funds with approximately $616 billion in gross assets and 1,282 private equity funds with approximately $350 billion in assets. While banking entity RIAs are subject to all of section 13's restrictions, because RIAs do not typically engage in proprietary trading, we preliminarily believe that they will not be impacted by the proposed amendments related to proprietary trading.

iv. Registered Investment Companies

Based on SEC filings and public data, we estimate that, as of January 2018, there were approximately 15,500 RICs[313] and 100 BDCs. Although RICs and BDCs are generally not banking entities themselves subject to the 2013 final rule, they may be indirectly affected by the 2013 final rule and the proposed amendments to the extent that their advisers are banking entities. For instance, banking entity RIAs or their affiliates may reduce their level of investment in the funds they advise, or potentially close these funds, to avoid these funds becoming banking entities themselves. As discussed in more detail in section III.A, however, the Agencies have made clear that nothing in the proposal would modify the application of the staff FAQs discussed above, and the Agencies will not treat RICs (or FPFs) that meet the conditions included in the applicable staff FAQs as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the FAQs. In addition, and also as discussed in more detail in section III.A, to accommodate the pendency of the proposal, for an additional period of one year until July 21, 2019, the Agencies will not treat qualifying foreign excluded funds that meet the conditions included in the policy statement discussed above as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the policy statement.

3. Economic Effects

a. Treatment of Entities Based on the Size of Trading Assets and Liabilities

i. Costs and Benefits

The proposal categorizes banking entities into three groups on the basis of the size of their trading activity: (1) Banking entities with significant trading assets and liabilities, (2) banking entities with moderate trading assets and liabilities, and (3) banking entities with limited trading assets and liabilities. Banking entities with significant trading assets and liabilities are defined as those that have, together with affiliates and subsidiaries, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equaling or exceeding $10 billion.[314] Banking entities with limited trading assets and liabilities are defined as those that have, together with affiliates and subsidiaries on a worldwide consolidated basis, trading assets and liabilities (excluding

[311] This table includes only the advisers that list private funds on Section 7.B.(1) of Form ADV. The number of advisers in the ''Any Private Fund'' row is not the sum of the rows that follow since an adviser may advise multiple types of private funds. Each listed private fund type (*e.g.,* real estate fund, liquidity fund) is defined in Form ADV, and those definitions are the same for purposes of the SEC's Form PF.

[312] Gross assets include uncalled capital commitments on Form ADV.

[313] For the purposes of this analysis, the term RIC refers to the fund or series, not the legal entity.

[314] With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, this threshold for having significant trading assets and liabilities would apply based on the trading assets and liabilities of the combined U.S. operations, including all subsidiaries, affiliates, branches and agencies.

trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1 billion. Finally, banking entities with moderate trading assets and liabilities are defined as those that are neither banking entities with significant trading assets and liabilities nor banking entities with limited trading assets and liabilities.

We further refer to SEC-registered broker-dealer, investment adviser, and SBSD affiliates of banking entities with significant trading assets and liabilities as ''Group A'' entities, to affiliates of banking entities with moderate trading assets and liabilities as ''Group B'' entities, and to affiliates of banking entities with limited trading assets and liabilities as ''Group C'' entities.

Under the proposed amendments, Group A entities would be required to comply with a streamlined but comprehensive version of the 2013 final rule's compliance program requirements, as discussed below. Group B entities would be subject to reduced requirements and an even more tailored approach in light of their smaller and less complex trading activities. The burdens are further reduced for Group C entities, for which the proposed rule establishes presumed compliance, which can be rebutted by the Agencies. We discuss the economic effects of each of the substantive amendments on these groups of entities in the sections that follow.

This economic analysis is focused on the expected economic effects of the proposed amendments on SEC registrants. Table 2 in the economic baseline quantifies broker-dealer activity by gross trading assets and liabilities of banking entities they are affiliated with. We estimate that there are approximately 89 broker-dealers affiliated with firms that have less than $10 billion in consolidated trading assets and liabilities (Group B and Group C broker-dealers). Group B and Group C broker-dealers account for approximately 7% of assets and 5% (or 3% on the basis on the alternative measure of holdings) of total bank broker-dealer holdings.

The primary effects of the proposed amendments for SEC registrants are reduced compliance burdens for Group B and Group C entities, as discussed in more detail in later sections. To the extent that the compliance costs of Group B and Group C entities are currently passed along to customers and counterparties, some of the cost reductions for these entities associated with the proposed amendments may flow through to counterparties and clients in the form of reduced transaction costs or a greater willingness to engage in activity, including intermediation that facilitates risk-sharing.

The proposed $10 billion threshold would leave firms with moderate trading assets and liabilities with reduced compliance program requirements and more tailored supervision. The proposed $1 billion threshold would leave firms with limited trading assets and liabilities presumed compliant with all proprietary trading and covered fund activity prohibitions. We note that, from above, Group B and Group C broker-dealers currently account for only 3% to 5% of total bank broker-dealer holdings. To the extent that holdings reflect risk exposure resulting from trading activity, current trading activity by Group B and Group C entities may represent lower risks than the risks posed by covered trading of Group A entities.

We recognize that some Group B and Group C entities that currently exhibit low levels of trading activity because of the costs of compliance may respond to the proposed amendments by increasing their trading assets and liabilities while still remaining under the $10 billion and $1 billion thresholds at the holding company level. Increases in aggregate risk-taking by Group B and Group C entities may be magnified if trading activity becomes more highly correlated among such entities, or dampened if trading activity becomes less correlated among such entities. Since it is difficult to estimate the number of Group B and Group C entities that may increase their risk-taking and the degree to which their trading activity would be correlated, the implications of this effect for aggregate risk-taking and capital market activity are unclear.

Such shifts in risk-taking may have two competing effects. On the one hand, if Group B and Group C entities are able to bear risk at a lower cost than their customers, increased risk-taking could promote secondary market trading activity and capital formation in primary markets, and increase access to capital for issuers. On the other hand, depending on the risk-taking incentives of Group B and Group C firms, increased risk-taking may result in increased moral hazard and market fragility, could exacerbate conflicts of interest between banking entities and their customers, and could ultimately negatively impact issuers and investors. However, we note that the proposed amendments are focused on tailoring the compliance regime based on the amount of covered activity engaged in by each banking entity, and all banking entities would still be subject to the prohibitions related to such covered activities. Thus, the magnitude of increased moral hazard, market fragility, and the severity of conflicts of interest effects may be attenuated.

In response to the proposed amendments, trading activity that was once consolidated within a small number of unaffiliated banking entities may become fragmented among a larger number of unaffiliated banking entities that each ''manage down'' their trading books under the $10 billion and $1 billion trading asset and liability thresholds to enjoy reduced hedging compliance and documentation requirements and a less costly compliance and reporting regime described in sections V.D.3.c, V.D.3.d, and V.D.3.i. The extent to which banking entities may seek to manage down their trading books will likely depend on the size and complexity of each banking entity's trading activities and organizational structure, along with those of its affiliated entities, as well as forms of potential restructuring and the magnitude of expected compliance savings from such restructuring relative to the cost of restructuring. We anticipate that the incentives to manage the trading book under the $10 billion and $1 billion thresholds may be strongest for those holding companies that are just above the thresholds. Such management of the trading book may reduce the size of trading activity of some banking entities and reduce the number of banking entities subject to more stringent hedging, compliance, and reporting requirements. At the same time, to the degree that the proposed amendments incentivize banking entities to have smaller trading books, they may mitigate moral hazard and reduce market impacts from the failure of a given banking entity.

ii. Efficiency, Competition, and Capital Formation

The 2013 final rule currently imposes compliance burdens that may be particularly significant for smaller market participants. Moreover, such compliance burdens may be passed along to counterparties and customers in the form of higher costs, reduced capital formation, or a reduced willingness to transact. For example, one commenter estimated that the funding cost for an average non-financial firm may have increased by as much as $30 million after the 2013 final rule's implementation.[315] At the same time, and as discussed above in section V.D.1, the SEC continues to recognize that the 2013 final rule may have yielded important qualitative benefits, such as reducing moral hazard and potential incentive conflicts that could be posed by certain types of proprietary trading by dealers, and enhancing oversight and supervision.

On one hand, as a result of the proposed amendments, Group B and Group C entities might enjoy a competitive advantage relative to similarly situated Group A and Group B entities respectively. As noted, firms that are close to the $10 billion threshold may actively manage their trading book to avoid triggering stricter requirements, and some firms above the threshold may seek to manage down the trading activity to qualify for streamlined treatment under the proposed amendments. As a result, the proposed amendments may result in greater competition between Group B and Group A entities around the $10 billion threshold, and similarly, between Group B and Group C entities around the $1 billion threshold. On the other hand, to the extent that Group B and Group C entities increase risk-taking as they compete with Group A and Group B entities, respectively, investors may demand additional compensation for bearing financial risk. A higher required rate of return and higher cost of capital could therefore offset potential competitive advantages for Group B and Group C entities.

We recognize that cost savings to Group B and Group C entities related to the reduced hedging documentation requirements and compliance requirements described in sections V.D.3.d and V.D.3.i may be partially or fully passed along to clients and counterparties. To the extent that hedging documentation and compliance requirements for Group B and Group C entities are currently resulting in a reduced willingness to make markets or underwrite placements, the proposed amendments may facilitate trading activity and risk-sharing, as well as capital formation and reduced costs of access to capital. Crucially, the proposed amendments do not eliminate substantive prohibitions under the 2013 final rule but create a simplified compliance regime for entities affiliated with firms without significant trading assets and liabilities. Thus, the 2013 final rule's restrictions on proprietary trading and covered funds activities will continue to apply to all affected entities, including Group B and Group C entities.

iii. Alternatives

The Agencies could have taken alternative approaches. For example, the proposed rule could have used other values for thresholds for total consolidated trading assets and liabilities in the definition of entities with significant trading assets and liabilities. As noted in the discussion of the economic baseline, using different thresholds would affect the scope of application of the hedging documentation, compliance program and metrics-reporting requirements by changing the number and size of affected dealers. For instance, using a $1 billion or a $5 billion threshold in a definition of significant trading assets and liabilities would scope a larger number of entities into Group A, as compared to the proposed $10 billion threshold, thereby subjecting a larger share of the dealer and investment adviser industries to six-pillar compliance obligations. However, we continue to recognize that trading activity is heavily concentrated in the right tail of the distribution, and using a lower threshold would not significantly increase the volume of trading assets and liabilities scoped into the Group A regime. For example, Table 2 shows that 65 broker-dealers affiliated with banking entities that have less than $5 billion in consolidated trading assets and liabilities and are subject to section 13 of the BHC Act as amended by the Economic Growth, Regulatory Relief, and Consumer Protection Act account for only 2.5% of bank-affiliated broker-dealer assets and between 1.7% and 1% of holdings. Alternatively, 42 broker-dealer affiliates of firms that have less than $1 billion in consolidated trading assets and liabilities and are subject to section 13 of the BHC Act account for only 2% of bank-affiliated broker-dealer assets and 1% of holdings. At the same time, with a lower threshold, more banking entities would face higher compliance burdens and related costs.

The Agencies also could have proposed a percentage-based threshold for determining whether a banking entity has significant trading assets and liabilities. For example, the proposed amendment could have relied exclusively on threshold where banking entities are considered to be entities with significant trading assets and liabilities if the firm's total consolidated trading assets and liabilities are above a certain percentage (for example, 10% or 25%) of the firm's total consolidated assets. Under this alternative, a greater number of entities may benefit from lower compliance costs and a streamlined regime for Group B entities. However, under this approach, even firms in the extreme right tail of the trading asset distribution could be considered without significant trading assets and liabilities if they are also in the extreme right tail of the total assets distribution. Thus, without placing an additional limit on total assets within such regime, entities with the largest trading books may be scoped into the Group B regime if they also have a sufficiently large amount of total consolidated assets, while entities with significantly smaller trading books could be categorized as Group A entities if they have fewer assets overall.

Alternatively, the Agencies could have relied on a threshold based on total assets. However, a threshold based on total assets may not be as meaningful as a threshold based on trading assets and liabilities being proposed here when considered in the context of section 13 of the BHC Act. A threshold based on total assets would scope in entities based merely on their balance sheet size, even though they may have little or no trading activity, notwithstanding the fact that the moral hazard and conflicts of interest that section 13 of the BHC Act are intended to address are more likely to arise out of such trading activity (and not necessarily from the banking entity size, as measured by total consolidated assets). However, it is possible that losses on small trading portfolios can be amplified through their effect on non-trading assets held by a firm. To that extent, a threshold based on total assets may be useful in potentially capturing both direct and indirect losses that originate from trading activity of a holding company.

The Agencies also could have based the thresholds on the level of total revenues from permitted trading activities. To the extent that revenues could be a proxy for the structure of a banking entity's business and the focus of its operations, this alternative may apply more stringent compliance requirements to those entities profiting the most from covered activities. However, revenues from trading activity fluctuate over time, rising during economic booms and deteriorating during crises and liquidity freezes. As a result, under the alternative, a banking entity that is scoped in the regulatory regime during normal times may be scoped out during the time of market stress due to a decrease in the revenues from permitted activities. That is, under such alternative, the weakest compliance regime may be applied to banking entities with the largest trading books in times of acute market stress, when the performance of trading desks is deteriorating and the underlying

[315] *See supra* note 18.

requirements of the 2013 final rule may be the most valuable.

Finally, the Agencies could have excluded from the definition of entities with significant trading assets and liabilities those entities that may be affiliated with a firm with over $10 billion in consolidated trading assets and liabilities but that are operated separately and independently from its affiliates and that have total trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) under $10 billion. We do not have data on the number of dealers that are operated ''separately and independently'' from affiliated entities with significant trading assets and liabilities. However, as shown in Table 5, this alternative could decrease the scope of application of the Group A regime.

TABLE 5—BROKER-DEALER ASSETS AND HOLDINGS BY GROSS TRADING ASSET AND LIABILITY THRESHOLD OF AFFILIATED BANKING ENTITIES

Type of broker-dealer	Number	Total assets ($mln)	Holdings ($mln)	Holdings (altern.) ($mln)
Holdings ≥$10bln and affiliated with firms with gross trading assets and liabilities ≥$10bln	14	2,538,656	668,283	515,443
Holdings <$10bln and affiliated with firms with gross trading assets and liabilities ≥$10bln	35	278,329	20,940	5,152
Affiliated with firms with gross trading assets and liabilities <$10bln [316]	89	222,352	35,483	15,960
Total	138	3,039,337	724,706	536,555

This alternative would increase the number of entities able to avail themselves of the reduced compliance, documentation and metrics-reporting requirements, potentially resulting in cost reductions flowing through to customers and counterparties. At the same time, this alternative would permit greater risk-taking by entities affiliated with firms that have gross trading assets and liabilities in excess of $10 billion. In addition, it could encourage such firms to fragment their trading activity, for instance, across multiple dealers, and operate them ''separately and independently,'' thereby relieving such firms of the requirement to comply with the hedging, compliance, and reporting regime of the 2013 final rule. This alternative may, therefore, reduce the regulatory oversight and compliance benefits of the full hedging, documentation, reporting, and compliance requirements for Group A banking entities. The feasibility and costs of such fragmentation would depend, in part, on organizational complexity of a firm's trading activity, the architecture of trading systems, the location and skillsets of personnel across various dealers affiliated with such entities, and current inter-affiliate hedging and risk mitigation practices.

b. Proprietary Trading

i. Trading Account

A. Costs and Benefits

Under the 2013 final rule, proprietary trading is defined as engaging as principal for the ''trading account'' of a banking entity.[317] Thus, the definition of the trading account effectively determines the trading activity that falls within the scope of the 2013 final rule prohibitions and the compliance regime associated with such activity. The current definition of trading account has three prongs, including the registered dealer prong. As discussed elsewhere in this SUPPLEMENTARY INFORMATION, the proposed amendments introduce certain changes to the trading account test. However, the proposal does not remove or modify the registered dealer prong. As a result, the proposed definition of ''trading account'' would continue to automatically include transactions in financial instruments by a registered dealer, swap dealer, or security-based swap dealer, if the purchase or sale is made in connection with the activity that requires the entity to be registered as such.[318] Thus, most (if not substantially all) trading activity by SEC-registered dealers should continue to be captured by the ''trading account'' of a banking entity, notwithstanding any of the changes made to the definition.

We recognize the possibility that some market participants may engage in transaction activity that does not trigger a dealer registration requirement. Under the baseline, such activity would be scoped into the ''trading account'' definition by the short-term prong and the rebuttable presumption by virtue of the fact that most transactions by a dealer are likely to be indicative of short-term intent as noted in the 2013 final rule.[319] We preliminarily believe that, under the proposal, such trading would likely be included in the trading account definition under the new prong on the basis of accounting treatment in reference to whether a financial instrument (as defined in the 2013 final rule and unchanged by the proposal) is recorded at fair value on a recurring basis under applicable accounting standards. In addition, persons engaging in the type and volume of activity that would be scoped in under the proposed accounting prong are likely engaged in the business of buying and selling securities for their own account as part of regular business, which would trigger broker-dealer (depending on the volume of activity) or SBSD registration requirements.

To the extent that the proposed amendments increase (or decrease) the scope of trading activity that falls under the proprietary trading prohibitions of the 2013 final rule, the amendments would increase (or decrease) the economic costs, benefits, and tradeoffs outlined in section V.D.1. However, we preliminarily believe that the largest share of dealing activity subject to SEC oversight is already captured by the registered dealer prong and that the

[316] This category excludes SEC-registered broker-dealers affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, as well as firms for which bank trading asset and liability data was not available.

[317] *See* 2013 final rule § ___.3(b).

[318] *See* 2013 final rule § ___.3(b)(1)(iii).

[319] *See* 79 FR at 5549 (''The Agencies believe the scope of the dealer prong is appropriate because, as noted in the proposal, positions held by a registered dealer in connection with its dealing activity are generally held for sale to customers upon request or otherwise support the firm's trading activities (*e.g.,* by hedging its dealing positions), which is indicative of short term intent.'').

economic effects of the proposed amendments to the definition of the trading account on SEC-registered entities may be de minimis. Therefore, we do not estimate any additional reporting costs for SEC registrants.

The Agencies also propose to include a reservation of authority allowing for determination, on a case-by-case basis, with appropriate notice and response procedures, that any purchase or sale of one or more financial instruments by a banking entity for which it is the primary financial regulatory agency either ''is'' or ''is not'' for the trading account. While the Agencies recognize that the use of objective factors to define proprietary trading is intended to provide bright lines that simplify compliance, the Agencies also recognize that this approach may, in some circumstances, produce results that are either underinclusive or overinclusive with respect to the definition of proprietary trading. The proposed reservation of authority may add uncertainty for banking entities about whether a particular transaction could be deemed as a proprietary trade by the regulating agency, which may affect the banking entity's decision to engage in transactions that are currently not included in the definition of the trading account. As discussed in section V.B,[320] notice and response procedures related to the reservation of authority provision may cost as much as $20,319 for SEC-registered broker-dealers, and $5,006 for entities that may choose to register with the SEC as SBSDs.[321]

B. Alternatives

Specific Activities

The Agencies could have taken the approach of excluding specific trading activities from the scope of the proprietary trading prohibitions. For example, the Agencies could exclude transactions in derivatives on government securities, transactions in foreign sovereign debt and derivatives on foreign sovereign debt, and transactions executed by SEC-registered dealers on behalf of their asset management customers.

The 2013 final rule exempts all trading in domestic government obligations and trading in foreign government obligations under certain conditions; however, derivatives referencing such obligations–including derivatives portfolios that can replicate the payoffs and risks of such government obligations–are not exempted. Therefore, existing requirements reduce the flexibility of banking entities to engage in asset-liability management and treat two groups of financial instruments that have similar risks and payoffs differently. Excluding derivatives transactions on government obligations from the trading account definition could reduce costs to market participants and provide greater flexibility in their asset-liability management. This alternative could also result in increased volume of trading in markets for derivatives on government obligations, such as Treasury futures. We recognize, nonetheless, that derivatives portfolios that reference an obligation, including Treasuries, can be structured to magnify the economic exposure to fluctuations in the price of the reference obligation. Moreover, derivatives transactions involve counterparty credit risk not present in transactions in reference obligations themselves. Since the alternative would exclude all derivatives transactions on government obligations, and not just those that are intended to mitigate risk, this alternative could permit banking entities to increase their exposure to counterparty, interest rate, and liquidity risk.

Length of the Holding Period

In addition, the current registered dealer prong does not condition the trading account definition for registered dealers on the length of the holding period. This is because, as noted in the 2013 final rule, positions held by a registered dealer in connection with its dealing activity are generally held for sale to customers upon request or otherwise support the firm's trading activities (*e.g.,* by hedging its dealing positions), which is indicative of short term intent.[322] As an alternative, the Agencies could have modified the registered dealer prong of the trading account definition to include only ''near-term trading,'' *e.g.,* positions held for less than 60, 90, or 120 days. This alternative would likely narrow the scope of application of the substantive proprietary trading prohibitions to a smaller portion of a banking entity's activities.

Under this alternative, dealers affiliated with banking entities would be able to amass large trading positions at the ''near-term definition'' boundary (*e.g.,* for 61, 91, or 121 days) to take advantage of a directional market view, to profit from mispricing in an instrument, or to collect a liquidity premium in a particular instrument. This may significantly increase risk-taking and moral hazard in the activities of dealers affiliated with banking entities. However, as this alternative could stimulate an increase in potentially impermissible proprietary trading by these dealers, the volume of trading activity in certain instruments and liquidity in certain markets may increase.

We also note that the temporal thresholds necessary to implement such a ''short-term'' trading alternative would be difficult to quantify and may have to vary by product, asset class, and aggregate market conditions, among other factors. For instance, the markets for large cap equities and investment grade corporate bonds have different structures, types of participants, latency of trading, and liquidity levels. Therefore, an appropriate horizon for ''short-term'' positions will likely vary across these markets. Similarly, the ability to transact quickly differs under strong macroeconomic conditions and in times of stress. A meaningful implementation of this alternative would likely require calibrating and recalibrating complex thresholds to exempt non-near-term proprietary trading and so could introduce additional uncertainty and increase the compliance burdens on SEC-regulated banking entities.

''Trading Desk'' Definition

The definition of ''trading desk'' is an important component of the implementation of the 2013 final rule in that certain requirements, such as those applicable to the underwriting and market-making exemptions, and the metrics-reporting requirements apply at the level of the trading desk. Under the current requirements, a trading desk is defined as the smallest discrete unit of organization of a banking entity that purchases or sells financial instruments for the trading account of the banking

[320] For the purposes of the burden estimates in this release, we are assuming the cost of $409 per hour for an attorney, from SIFMA's ''Management & Professional Earnings in the Securities Industry 2013,'' modified to account for an 1800-hour work year and multiplied by 5.35 to account for bonuses, firm size, employee benefits, and overhead, and adjusted for inflation.

[321] We preliminarily believe that the burden reduction for SEC-regulated entities will be a fraction of the burden reduction for the holding company as a whole. We estimate the ratio on the basis of the fraction of total assets of broker-dealer affiliates of banking entities relative to the total consolidated assets of parent holding companies at approximately 0.18. To the extent that compliance burdens represent a fixed cost that does not scale with assets, or if the role and compliance burdens of entities that may register with the SEC as SBSDs may differ from those of broker-dealers, these figures may overestimate or underestimate compliance cost reductions for SEC-registered entities. Reporting burden for broker-dealers: 2 Hours per firm per year × 0.18 weight × (Attorney at $409 per hour) × 138 firms = $20,319. Reporting burden for entities that may register as SBSDs: 2 hours per firm per year × 0.18 weight × (Attorney at $409 per hour) × 34 firms = $5,006.

[322] 79 FR at 5549.

entity or an affiliate thereof. The 2013 final rule recognizes that underwriting and market-making activities are essential financial services that facilitate capital formation and promote liquidity, and that metrics reporting may facilitate the SEC oversight of banking entities. The application of these rules at the trading desk level may facilitate monitoring and review of compliance with the underwriting and market-making exemptions and allow for better identification of the aggregate trading volume that must be reviewed for consistency with the underwriting, market making, and metrics-reporting requirements.

At the same time, some market participants have noted that the trading desk designation under the 2013 final rule may be unduly burdensome and costly and may have engendered inefficient fragmentation of trading activity. For example, some market participants report an average of 95 trading desks engaged in permitted activities.[323] Since under the 2013 final rule metrics reporting is required at the trading desk level, such fragmentation may result in operational inefficiencies and decentralized compliance programs, with some participants currently reporting as many as 5,000,000 data points per entity per filing.[324]

The Agencies are requesting comment on whether the trading desk definition should be amended to refer to a less granular ''business unit'' or a ''unit designed to establish efficient trading for a market sector.'' This approach would allow a trading desk to be defined on the basis of the same criteria that are used to establish trading desks for other operational, management, and compliance purposes, which typically depend on the type of trading activity, asset class, product line offered, and individual banking entity structure and internal compliance policies and procedures. For example, the Agencies could define the trading desk as a unit of organization of a banking entity that engages in purchasing or selling of financial instruments for the trading account of the banking entity or an affiliate thereof that is structured by a banking entity to establish efficient trading for a market sector, organized to ensure appropriate setting, monitoring, and review of trading and hedging limits, and characterized by a clearly defined unit of personnel. This would provide banking entities greater flexibility in determining their own optimal organizational structure and allow banking entities organized with various degrees of complexity to reflect their organizational structure in the trading desk definition. This alternative could reduce operational costs from fragmentation of trading activity and compliance program requirements, as well as enable more streamlined metrics reporting.

On the other hand, under this alternative, a banking entity may be able to aggregate impermissible proprietary trading with permissible activity (*e.g.,* underwriting, market making, or hedging) into the same trading desk and consequently take speculative positions under the guise of permitted activities. To the extent that this alternative would allow banking entities to use a highly aggregated definition of a trading desk, it may increase moral hazard and the risks that the prohibitions of section 13 of the BHC Act aim to address. The SEC does not have data on operating and compliance costs because of the fragmentation incurred by SEC-regulated banking entities, or data on the organizational complexity of such dealers, and the extent of variation therein.

ii. Liquidity Management Exclusion

Liquidity management serves an important purpose in ensuring banking entities have sufficient resources to meet their short-term operational needs. Under the 2013 final rule, certain activities related to liquidity management are excluded from the scope of the proprietary trading prohibition under some conditions.[325] The current exclusion covers any purchase or sale of a security by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan that meets a number of requirements. Moreover, current rules require that the financial instruments purchased and sold as part of a liquidity management plan be highly liquid and not reasonably expected to give rise to appreciable profits or losses as a result of short-term price movements.

The Agencies recognize that the liquidity management exclusion may be narrow and that the trading account definition may scope in routine asset-liability management and commercial-banking related activities that trigger the rebuttable presumption or the market-risk capital prong. Accordingly, the Agencies are proposing to expand the liquidity management exclusion. Specifically, the proposed amendments would broaden the liquidity management exclusion such that it would apply not only to securities, but also to foreign exchange forwards and foreign exchange swaps (as defined in the Commodity Exchange Act), and to physically settled cross-currency swaps.

Under the proposed amendment, SEC-regulated banking entities would face lower burdens and enjoy greater flexibility in currency-risk management as part of their overall liquidity management plans. To the degree that the 2013 final rule may be restricting liquidity-risk management by banking entities, and to the extent that these effects impact their trading activity, the proposed amendment could facilitate more efficient risk management, greater secondary market activity, and more capital formation in primary markets. However, in the absence of other conditions governing reliance on the liquidity management exclusion, this flexibility may also lead to currency derivatives exposures, including potentially very large exposures, being scoped out of the trading account definition and the ensuing substantive prohibitions of the 2013 final rule. In addition, some entities may seek to rely on this exclusion while engaging in speculative currency trading, which may increase their risk-taking and moral hazard and reduce the effectiveness of regulatory oversight. While the proposed amendment broadens the set of instruments that banking entities may use to manage liquidity, the proposed reservation of authority would provide the Agencies with the ability to determine whether a particular purchase or sale of a financial instrument by a banking entity either is or is not for the trading account.

iii. Error Trades

The 2013 final rule excludes from the proprietary trading prohibition certain ''clearing activities'' by banking entities that are members of clearing agencies, derivatives clearing organizations, or designated financial market utilities. Specifically, such clearing activities are defined to include, among others, any purchase or sale necessary to correct error trades made by, or on behalf of, customers with respect to customer transactions that are cleared, provided the purchase or sale is conducted in accordance with certain regulations, rules, or procedures. However, the current exclusion for error trades is applicable only to clearing members with respect to cleared customer transactions.[326]

The proposed amendments would exclude trading errors and subsequent correcting transactions from the definition of proprietary trading. The

[323] *See supra* note 18.

[324] *See id.*

[325] *See* 2013 final rule § ____.3(d)(3).

[326] *See* 2013 final rule § ____.3(e)(7).

proposed amendments primarily impact SEC-registered dealers that are not clearing members with respect to all customer trades and dealers that are clearing members with respect to customer trades that are not cleared. Table 6 reports information about broker-dealer count, assets, and holdings, by affiliation and clearing type.

TABLE 6—BROKER-DEALER ASSETS AND HOLDINGS BY CLEARING STATUS [327]

Broker-dealers subject to section 13 of the BHC Act	Number	Total assets ($mln)	Holdings ($mln)	Holdings (altern.) ($mln)
Clear/carry	56	3,002,341	720,863	533,100
Other	82	36,996	3,843	3,455
Total	138	3,039,337	724,706	536,555

Since correcting error trades by or on behalf of customers is not conducted for the purpose of profiting from short-term price movements, this amendment is likely to facilitate valuable customer-facing activities. As discussed elsewhere in this Supplementary Information, the Agencies believe that banking entities should monitor and manage their error trade account because doing so would help prevent personnel from using these accounts for the purpose of evading the 2013 final rule. We preliminarily believe that existing requirements and SEC oversight would be sufficient to deter participants from using the error trade exclusion to obfuscate impermissible proprietary trades.

c. Permitted Underwriting and Market Making

i. Regulatory Baseline

Underwriting and market making are customer-oriented financial services that are essential to capital formation and market liquidity, and the risks and profit sources related to these activities are distinct from those related to impermissible proprietary trading. Therefore, the 2013 final rule contains exemptions for underwriting and market making-related activities.

Under the 2013 final rule, all banking entities with covered activities must satisfy five requirements with respect to their underwriting activities to qualify for the underwriting exemption.[328] First, the banking entity must act as an underwriter for a distribution of securities, and the trading desk's underwriting position must be related to such distribution.[329] Second, the amount and type of the securities in the trading desk's underwriting position must be designed not to exceed RENTD, and reasonable efforts must be made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security.[330] Third, the banking entity must establish and implement, maintain, and enforce an internal compliance system that is reasonably designed to ensure the banking entity's compliance with the requirements. The compliance program must include the list of the products, instruments, or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities, as well as the limits for each trading desk, based on the nature and amount of the trading desk's underwriting activities, including RENTD limits.[331] Fourth, the compensation arrangements of persons engaged in underwriting must be designed to not reward or incentivize prohibited proprietary trading.[332] Fifth, the banking entity must be appropriately licensed or registered to perform underwriting activities.[333]

Under the current baseline, all banking entities with covered activities must satisfy six requirements with respect to their market-making activities to qualify for the market-making exemption.[334] First, the trading desk responsible for the market-making activities must routinely stand ready to purchase and sell the financial instruments in which it is making markets and must be willing and available to quote, purchase, and sell, or otherwise enter into long and short positions in these types of financial instruments for its own account in commercially reasonable amounts and throughout market cycles.[335] Second, the trading desks' market-maker inventory must be designed not to exceed, on an ongoing basis, RENTD.[336] Third, the banking entity must establish, implement, and enforce an internal compliance program, reasonably designed to ensure compliance with the requirements. This compliance program must include, among other things, limits for each trading desk that address RENTD.[337] Fourth, the banking entity must ensure that any violations of risk limits are promptly corrected. Fifth, the compensation arrangements of persons engaged in market making must be designed so as to not reward or incentivize prohibited proprietary trading. Finally, the banking entity must be appropriately licensed or registered.

We also note that, under the baseline, an organizational unit or a trading desk of another banking entity that has consolidated trading assets and liabilities of $50 billion or more is generally not considered a client, customer, or counterparty for the purposes of the RENTD requirement.[338] Thus, such demand does not contribute to RENTD unless such demand is affected through an anonymous trading facility or unless the trading desk documents how and why the organizational unit of said large banking entity should be treated as a client, customer, or counterparty. To the extent that such documentation requirements increase the cost of intermediating interdealer transactions, this current requirement may impact the volume and cost of interdealer trading.

The Agencies understand that current compliance with the RENTD

[327] Broker-dealers clearing and/or carrying customer accounts are identified using FOCUS filings. Broadly, broker-dealers that are clearing or carrying firms directly carry customer accounts, maintain custody of the assets, and clear trades. Other broker-dealers may accept customer orders but do not maintain custody of assets. *See, e.g.,* Clearing Firms FAQ, FINRA, *https://www.finra.org/arbitration-and-mediation/faq-clearing-firms-faq.* This analysis excludes SEC-registered broker-dealers affiliated with banks that have consolidated total assets less than or equal to $10 billion and trading assets and liabilities less than or equal to 5% of total assets, as well as firms for which bank trading asset and liability data was not available.

[328] *See* 2013 final rule § ____.4 (a).

[329] *See* 2013 final rule § ____.4 (a)(2)(i).

[330] *See* 2013 final rule § ____.4 (a)(2)(ii).

[331] *See* 2013 final rule § ____.4 (a)(2)(iii).

[332] *See* 2013 final rule § ____.4 (a)(2)(iv).

[333] *See* 2013 final rule § ____.4 (a)(2)(v).

[334] *See* 2013 final rule § ____.4 (b).

[338] *See* 2013 final rule § ____.4 (b)(3)(i).

requirements under both the underwriting and market-making exemptions creates ambiguity for some market participants, is over-reliant on historical demand, and necessitates an accurate calibration of RENTD for different asset classes, time periods, and market conditions.[339] Since forecasting future customer demand involves uncertainty, particularly in less liquid and more volatile instruments and products, banking entity affiliated dealers may face uncertainty about the ability to rely on the underwriting and market-making exemptions. This uncertainty can reduce a banking entity's willingness to engage in principal transactions with customers,[340] which, along with reducing profits, can adversely impact the volume of transactions intermediated by banking entities. To the extent that non-banking entities do not step in to intermediate trades that do not occur as a result of the RENTD requirement,[341] and to the extent that technological advances do not allow customers to trade against other customers,[342] thereby shortening dealer intermediation chains, counterparties of affected banking entities may have difficulty transacting in some market segments.[343]

ii. Costs and Benefits

Under the proposal, Group A and Group B entities with covered activities would be presumed compliant with the RENTD requirements of the underwriting and market-making exemptions if the banking entity establishes and implements, maintains, and enforces internally set risk limits. These risk limits would be subject to regulatory review and oversight on an ongoing basis, which would include an assessment of whether the limits are designed not to exceed RENTD. For Group A entities, these limits are required to be established within the entity's compliance program. Under the proposed amendment, Group B entities would not be required to establish a separate compliance program for underwriting and market-making requirements, including the risk limits for RENTD. However, in order to be presumed compliant with the underwriting and market-making exemptions, Group B entities must establish and comply with the RENTD limits. We note that Group B entities seeking to rely on the presumption of compliance would still be required to comply with the RENTD requirements, even though they would not be required to design a specific underwriting or market-making compliance program. Under the proposed amendments, Group C banking entities would be presumed compliant with requirements of subpart B and subpart C of the rule, including with respect to the reliance on the underwriting and market-making exemptions, without reference to their internal RENTD limits. In addition, under the proposal, Group A entities relying on internal risk limits for market-making RENTD requirements must promptly reduce the risk exposure when the risk limit is exceeded.

The proposed amendments may provide SEC-registered banking entities with more flexibility and certainty in conducting permissible underwriting and market making-related activities. The proposed presumption allows the reliance on internally-set risk limits in accordance with a banking entity's risk management function that may already be used to meet other regulatory requirements, such as obligations under the SEC and FINRA capital and liquidity rules,[344] so long as these limits meet the requirements under the proposed amendment. Therefore, the proposed amendment may prevent unnecessary duplication of risk-management compliance procedures for the purposes of complying with multiple regulations and may reduce compliance costs for SEC-regulated banking entities. To the extent that the uncertainty and compliance burdens related to the RENTD requirements are currently impeding otherwise profitable permissible underwriting and market making by dealers, the proposed amendments may increase banking entities' profits and the volume of dealer intermediation.

The proposed regulatory oversight of the internally-set risk limits may result in new compliance burdens for SEC registrants, potentially offsetting the cost-reducing effects of other proposed amendments to the compliance with the underwriting and market-making exemptions. However, if banking entities are permitted to rely on internal risk limits to meet the RENTD requirement, Agency oversight of internal risk limits for the purposes of compliance with the proposed rule may help support the benefits and costs of the substantive prohibitions of section 13 of the BHC Act. Additionally, the costs of the prompt notice requirement for exceeding the risk limits will depend on a given entity's trading activity and on its design of internal risk limits, which are likely to reflect, among other factors, the entity's respective business model, organizational structure, profitability and volume of trading activity. As a result, we cannot estimate these costs with any degree of certainty.

The overall economic effect of these amendments will depend on the amount and profitability of economic activity that currently does not occur because of the uncertainty surrounding the RENTD requirement compared to the potential costs of establishing and maintaining internal risk limits, and uncertainty related to validation that these limits would meet the requirements under the proposed amendments. We do not have data on the volume of trading activity that does not occur because of uncertainty and costs surrounding the RENTD requirement, or data on the profitability of such trading activity for banking entities. To the best of our knowledge, no such data is publicly available.

To the extent that internal risk limits may be designed to exceed the actual RENTD, introducing the proposed presumption may also increase risk-taking by banking entity dealers. As a result, under the proposed amendments, some entities may be able to maintain positions that are larger than RENTD and, thus, increase their risk-taking. This type of activity could increase moral hazard and reduce the economic effects of section 13 of the BHC Act and the implementing rules. However, to

[339] *See supra* note 18.

[340] For instance, Bessembinder et al. (2017) shows that dealers have shrunk their intraday capital commitment, measured as the absolute difference between their daily accumulated buy volume and sell volume. Similarly, the FRB's ''Staff Q2 2017 Report on Corporate Bond Market Liquidity'' (available at *https://www.federalreserve.gov/foia/files/bond-market-liquidity-report-2017Q2.pdf*) shows a steep decline in broker-dealer holdings of corporate and foreign bonds between 2007 and 2009 and a gradual decline in 2012 onwards.

While some research suggests the decline in dealer inventories is attributable to the 2013 final rule (*e.g.,* Bessembinder et al. (2017)), other studies show that inventory declines in fixed income markets occurred in the immediate aftermath of the financial crisis and coincided with a drastic decline in profitability of trading desks during the crisis (*e.g.,* Access to Capital and Market Liquidity, *supra* note 106, Figure 34). It is difficult to clearly distinguish the causal effects of the various provisions of section 13 of the BHC Act from the influence of other confounding factors, such as crisis-related changes in dealer risk aversion and declines in profitability of trading, macroeconomic conditions, the evolution of market structure and new technology, and other factors.

[341] *See supra* note 290.

[342] *See, e.g.,* Access to Capital and Market Liquidity *supra* note 106, Part IV.C.4 (describing corporate bond activity on electronic venues).

[343] We are not aware of any data that allows us to quantify the impacts of individual provisions of section 13 of the BHC Act on dealer inventories or market liquidity. The evidence on the impacts of section 13 on various measures of corporate bond, credit default swap (CDS), and bond fund liquidity is sensitive to the choice of market, measure, time period, and empirical methodology. For a literature review, *see, e.g.,* Access to Capital and Market Liquidity *supra* note 106.

[344] *See, e.g.,* 17 CFR 240.15c3–1.

mitigate this effect, the Agencies are proposing that the internally set risk limits that would be used to establish the presumption of compliance would be subject to ongoing regulatory assessments as to whether they are designed not to exceed RENTD.

We note that the proposed amendments tailor regulatory relief for smaller banking entities for both the underwriting and market-making exemptions. More specifically, the threshold for the reduced requirements is based on trading assets and liabilities for both exemptions. We also recognize that the nature, profit sources, and risks of underwriting and market-making activities differ. For example, underwriting may involve pricing, book building, and placement of securities with investors, whereas market making centers on intermediation of trading activity.

In that regard, the Agencies could have proposed an approach, under which underwriting and market-making requirements are tailored to banking entities on the basis of different thresholds. For example, the Agencies could have instead relied on the trading assets and liabilities threshold for market-making compliance (as proposed), but applied a different threshold for underwriting compliance, on the basis of the volume or profitability of past underwriting activity. This alternative would have tailored the compliance requirements for SEC-regulated banking entities with respect to underwriting activities. However, the volume and profitability of underwriting activity is highly cyclical and is likely to decline in weak macroeconomic conditions. As a result, under the alternative, SEC-regulated banking entities would face lower compliance obligations with respect to underwriting activity during times of economic stress when covered trading activity related to underwriting may pose the highest risk of loss.

iii. Efficiency, Competition, and Capital Formation

As discussed above, these proposed amendments may reduce the costs of relying on the underwriting and market-making exemptions, which may facilitate the activities related to these exemptions. The evolution in market structure in some asset classes (*e.g.,* equities) has transformed the role of traditional dealers vis-à-vis other participants, particularly as it relates to high-frequency trading and electronic platforms. However, dealers continue to play a central role in less liquid markets, such as corporate bond and over-the-counter derivatives markets. While it is difficult to establish causality, corporate bond dealers, particularly bank-affiliated dealers, have, on aggregate, significantly reduced their capital commitment post-crisis—a finding that is consistent with a reduction in liquidity provision in corporate bonds due to the 2013 final rule.[345] In addition, corporate bond dealers may have shifted from trading in a principal capacity to agency trading.[346] To the extent that this change cannot be explained by enhanced ability of dealers to manage corporate bond inventory, electronic trading, post-crisis changes in dealer risk tolerance and macro factors (effects which themselves need not be fully independent of the effect of section 13 of the BHC Act and the 2013 final rule), such effects may point to a reduced supply of liquidity by dealers. Moreover, corporate bond dealers decrease liquidity provision in times of stress in general (*e.g.,* during a financial crisis) [347] and after the 2013 final rule in particular (under a few isolated stressed selling conditions, some evidence shows greater price impact from trading activity).[348] In dealer-centric single-name CDS markets, interdealer trade activity, trade sizes, quoting activity, and quoted spreads for illiquid underliers have deteriorated since 2010, but dealer-customer activity and various trading activity metrics have remained stable.[349]

Because of the methodological challenges described earlier in this analysis, we cannot quantify potential effects of the 2013 final rule in general, and the RENTD, underwriting, and market-making provisions of the 2013 final rule in particular, on capital formation and market liquidity. We also recognize that these provisions may not be currently affecting all securities markets, asset classes, and products uniformly. If, because of uncertainty and the costs of relying on market-making and hedging exemptions, dealers are limiting their market-making and hedging activity in certain products, the proposed amendments may facilitate market making. Because secondary market liquidity can influence the willingness to invest in primary markets, and access to these markets can enable market participants to mitigate undesirable risk exposures, the amendments may increase trading activity and capital formation in some segments of the market.

While the statute and the 2013 final rule, including as proposed to be amended, prohibit banking entities from engaging in proprietary trading, some trading desks may attempt to use certain elements of the proposed RENTD amendments to circumvent those restrictions. This may reduce the economic benefits and costs of the 2013 final rule outlined in section V.D.1. We continue to recognize that proprietary trading by banking entities may give rise to moral hazard, economic inefficiency because of implicitly subsidized risk-taking, and market fragility, and may increase conflicts of interest between banking entities and their customers. An analysis of the effects of the 2013 final rule in general, and the specific amendments being proposed here in particular, on moral hazard, risk-taking, systemic risk, and conflicts of interest described above, faces the same methodological challenges discussed in section V.D.1. and in this section. In addition, existing qualitative analysis and quantitative estimates of moral hazard, risk-taking incentives resulting from deposit insurance and implicit bailout guarantees, and systemic risk implications of proprietary trading, centers on banking entities that are not SEC registrants.[350] However, we

[350] For a literature review, *see, e.g.,* Benoit et al. (2017). Some examples include:

- A large proportion of the variation in bank market-to-book ratios over time may be due to changes in the value of government guarantees. *See* Atkeson et al. (2018).
- Moral hazard resulting from idiosyncratic and targeted bailouts may make the economy significantly more exposed to financial crises, while moral hazard effects may be limited if bailouts are systemic and broad based. *See* Bianchi (2016); *see also* Kelly et al. (2016).
- Deposit insurance and financial safety nets increased bank risk-taking and measures of systemic fragility in the run-up to the global financial crisis. However, during the crisis itself, deposit insurance reduced bank risk and systemic stability. *See* Anginer et al. (2014).
- Short-term capital market funding may increase bank fragility. *See* Beltratti and Stulz (2012).
- Implicit bailout guarantees for the financial sector as a whole are priced in spreads on index put

Continued

continue to recognize that the effects of the proposed amendments on bank entity risk-taking and conflicts of interest may flow through to SEC-registered dealers and investment advisers affiliated with banks and bank holding companies and may impact securities markets. As suggested by academic evidence, the presence and magnitude of spillovers across different types of financial institutions vary over time and may be more significant in times of stress.[351]

Where the proposed amendments increase the scope of permissible activities or decrease the risk of detection of proprietary trading, their impact on informational efficiency stems from a balance of two effects. On the one hand, where banking entities' proprietary trading strategies are based on superior analysis and prediction models, their reduced ability to trade on such information may make securities markets less informationally efficient. While such proprietary trading strategies can be executed by broker-dealers unaffiliated with banking entities and unaffected by the prohibitions on proprietary trading, their ability to do so may be constrained by their limited access to capital and a lack of scale needed to profit from such strategies. On the other hand, if superior information is obtained by an entity from its customer-facing activities and as a result of conflicts of interest, proprietary trading may make customers less willing to transact with banks or participate in securities markets.

iv. Loan-Related Swaps

The Agencies are requesting comment on the treatment of swaps entered into with a customer in connection with a loan provided to the customer. Specifically, loan-related swaps are transactions between a banking entity and a loan customer that are directly related to the terms of the customer's loan. The Agencies understand that such swaps may be considered financial instruments triggering proprietary trading prohibitions of the 2013 final rule. As a result, a banking entity would need to rely on an applicable exclusion from the definition of proprietary trading or an exemption in the implementing regulations in order for this activity to be permissible.

Accordingly, the Agencies are requesting comment on whether loan-related swaps should be permitted under the market-making exemption if the banking entity stands ready to make a market in both directions whenever a customer makes an appropriate request, but in practice primarily makes a market in the swaps only in one direction. The Agencies are also requesting comment on whether it would be appropriate to exclude loan-related swaps from the definition of proprietary trading for some banking entities or to permit the activity pursuant to an exemption from the prohibition on proprietary trading other than market making.

Addressing the treatment of loan-related swaps may benefit banking entities that are currently unsure as to their ability to engage in loan-related swaps pursuant to the existing market-making exemption. Legal certainty in this space may increase the willingness of banking entities to accommodate customer demand for such loans and increase certainty that such activity would not trigger the proprietary trading prohibition. To the degree that the back-to-back offsetting purchases and sales of derivatives are not immediate, and to the extent that such transactions are not cleared and involve counterparty risk, this may also increase risk-taking by banking entities. To the extent that the proposed guidance was to increase the scope of permissible proprietary trading activity, such activity would implicate the economic tradeoffs of the proprietary trading prohibitions of the 2013 final rule discussed in section V.D.1.

d. Permitted Risk-Mitigating Hedging

i. Regulatory Baseline

Under the baseline, certain risk-mitigating hedging activities may be exempt from the restriction on proprietary trading under the risk-mitigating hedging exemption. To make use of this exemption, the 2013 final rule requires all banking entities to comply with a comprehensive and multi-faceted set of requirements, including: (1) The establishment and implementation, and maintenance of an internal compliance program; (2) satisfaction of various criteria for hedging activities; and (3) the existence of compensation arrangements for persons performing risk-mitigating hedging activities that are designed not to reward or incentivize prohibited proprietary trading. In addition, certain activities under the hedging exemption are subject to documentation requirements.[352]

Specifically, 2013 final rule requires that a banking entity seeking to rely on the risk-mitigating hedging exemption must establish, implement, maintain, and enforce an internal compliance program that is reasonably designed to ensure compliance with the requirements of the rule. Such a compliance program must include reasonably designed written policies and procedures regarding the positions, techniques, and strategies that may be used for hedging, including documentation indicating what positions, contracts, or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts, or other holdings. The compliance program also must provide for internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures. In addition, the 2013 final rule requires that all banking entities, as part of their compliance program, must conduct analysis, including correlation analysis, and independent testing designed to ensure that the positions, techniques, and strategies that may be used for hedging are designed to reduce or otherwise significantly mitigate and demonstrably reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged.

The 2013 final rule does not require a banking entity to prove correlation mathematically—rather, the nature and extent of the correlation analysis should be dependent on the facts and circumstances of the hedge and the underlying risks targeted. Moreover, if correlation cannot be demonstrated, the analysis needs to state the reason and explain how the proposed hedging position, technique, or strategy is designed to reduce or significantly mitigate risk and how that reduction or mitigation can be demonstrated without correlation.[353] Some market participants have argued that the inability to perform correlation analysis, for instance, for non-trading assets such as mortgage servicing assets, can add as much as 2% of the asset value to the cost of hedging.[354]

options far more than those on put options of individual banks. *See, e.g.,* Kelly et al. (2016).

- Other research used CDS data to measure the value of government bailouts to bondholders and stockholders of large financial firms during the global financial crisis. *See* Veronesi and Zingales (2010).

[351] *See, e.g.,* Billio, Getmansky, Lo, and Pelizzon, 2012, Econometric Measures of Connectedness and Systemic Risk in the Finance and Insurance Sectors, Journal of Financial Economics 104(3), 535–559; *see also* Alam, Fuss, and Gropp, 2014, Spillover Effects Among Financial Institutions: A State-Dependent Sensitivity Value at Risk Approach (SDSVar). Journal of Financial and Quantitative Analysis 49(3), 575–598; Adrian and Brunnermeier, 2016, CoVar, American Economic Review 106(7), 1705–1741.

[352] *See* 2013 final rule § ____.5.

[353] *See* 79 FR at 5631.

[354] *See supra* note 18.

To qualify for the risk-mitigating hedging exemption, the hedging activity, both at inception and at the time of any adjustment to the hedging activity, must be designed to reduce or otherwise significantly mitigate and demonstrably reduce or significantly mitigate one or more specific identifiable risks.[355] Hedging activities also must not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously. Additionally, the hedging activity must be subject to continuing review, monitoring, and management by the banking entity, including ongoing recalibration of the hedging activity to ensure that the hedging activity satisfies the requirements for the exemption and does not constitute prohibited proprietary trading. Lastly, the compensation arrangements of persons performing risk-mitigating hedging activities must be designed so as to not reward or incentivize prohibited proprietary trading.

Finally, the 2013 final rule requires banking entities to document and retain information related to the purchase or sale of hedging instruments that are either (1) established by a trading desk that is different from the trading desk establishing or responsible for the risks being hedged; (2) established by the specific trading desk establishing or responsible for the risks being hedged but that are effected through means not specifically identified in the trading desks written policies and procedures; or (3) established to hedge aggregate positions across two or more trading desks. [356] The documentation must include the specific identifiable risks being hedged, the specific risk-mitigating strategy that is being implemented, and the trading desk that is establishing and responsible for the hedge. These records must be retained for a period of not less than 5 years in a form that allows them to be promptly produced if requested.[357]

As discussed elsewhere in this Supplementary Information, the Agencies recognize that, in some circumstances, it may be difficult to know with sufficient certainty whether a potential hedging activity will continue to demonstrably reduce or significantly mitigate an identifiable risk after it is implemented. Unforeseeable changes in market conditions and other factors could reduce or eliminate the intended risk-mitigating impact of the hedging activity, making it difficult for a banking entity to comply with the continuous requirement that the hedging activity demonstrably reduce or significantly mitigate specific, identifiable risks. In such cases, a banking entity may choose not to enter into a hedge out of concern that it may not be able to effectively comply with the continuing requirement to demonstrate risk mitigation.

We also recognize that SEC-regulated entities may engage in both static and dynamic hedging at the portfolio (and not at the transaction) level and monitor and reevaluate aggregate portfolio risk exposures on an ongoing basis, rather than the risk exposure of individual transactions. Dynamic hedging may be particularly common among dealers with large derivative portfolios, especially when the values of these portfolios are nonlinear functions of the prices of the underlying assets (*e.g.,* gamma hedging of options). The rules currently in effect permit dynamic hedging, but require the banking entity to document and support its decisions regarding individual hedging transactions, strategies, and techniques for ongoing activity in the same manner as for its initial activities, rather than the hedging decisions regarding a portfolio as a whole.

ii. Costs and Benefits

As discussed elsewhere in this Supplementary Information, the Agencies recognize that hedging is an essential tool for risk mitigation and can enhance a banking entity's provision of client-facing services, such as market making and underwriting, as well as facilitate financial stability. In recognition of the role that this activity plays as part of a banking entity's overall operations, the Agencies have proposed a number of changes that are intended to streamline and clarify the current exemption for risk-mitigating hedging activities.

The first proposed amendment concerns the ''demonstrability'' requirement of the risk-mitigating hedging exemption. Specifically, the Agencies propose to eliminate the requirement that the risk-mitigating hedging activity must demonstrably reduce or otherwise significantly mitigate one or more specific identifiable risks at the inception of the hedge. Additionally, the demonstrability requirement would also be removed from the requirement to continually review, monitor, and manage the banking entity's existing hedging activity. We also note that banking entities would continue to be subject to the requirement that the risk-mitigating hedging activity be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, as well as to the requirement that the hedging activity be subject to continuing review, monitoring and management by the banking entity to confirm that such activity is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging.

The removal of the demonstrability requirement is expected to benefit banking entity dealers, as it would decrease uncertainty about the ability to rely on the risk-mitigating hedging exemption and may reduce the compliance costs of engaging in permitted hedging activities. While this aspect of the proposal may alleviate compliance burdens related to risk management and potentially facilitate greater trading activity and liquidity provision by bank-affiliated dealers, it could also enable dealers to accumulate large proprietary positions through adjustments (or lack thereof) to otherwise permissible hedging portfolios. Therefore, we recognize that the proposed amendment could increase moral hazard risks related to proprietary trading by allowing dealers to take positions that are economically equivalent to positions they could have taken in the absence of the 2013 final rule.

The second proposed amendment to the risk-mitigating hedging exemption is the removal of the requirement to perform the correlation analysis. The Agencies recognize that a correlation analysis based on returns may be prohibitively complex for some asset classes, and that a correlation coefficient may not always serve as a meaningful or predictive risk metric. While we recognize that, in some instances, correlation analysis of past returns may be helpful in evaluating whether a hedging transaction was effective in offsetting the risks intended to be mitigated, correlation analysis may not be an effective tool for such evaluation in other instances. For example, correlation across assets and asset classes evolves over time and may exhibit jumps at times of idiosyncratic or systematic stress. Additionally, the hedging activity, even if properly designed to reduce risk, may not be practicable if costly delays or compliance complexities result from a requirement to undertake a correlation analysis. Thus, the removal of the correlation analysis requirement may provide dealers with greater flexibility in selecting and executing risk-

[355] *See* 2013 final rule § ____.5(b)(2)(ii).

[356] *See* 2013 final rule § ____.5(c)(1).

[357] *See* 2013 final rule § ____.5(c)(3); *see also* 2013 final rule § ____.20(b)(6).

mitigating hedging activities. However, we also recognize that the removal of the correlation analysis requirement may result in tradeoffs discussed above. To the extent that some banking entities may be able to engage in speculative proprietary trading activities while relying on the risk-mitigating hedging exemption, the proposed amendment may potentially increase moral hazard and conflicts of interest between banking entities and their customers, notwithstanding the fact that a potential increase in permitted risk-mitigating hedging may increase capital formation and trading activity by banking entities.

The third proposed amendment simplifies the requirements of the risk-mitigating hedging exemption for Group B banking entities (*i.e.,* those with moderate trading assets and liabilities). The proposed amendment would remove the requirement to have a specific risk-mitigating hedging compliance program, as well as the documentation requirements and certain hedging activity requirements for Group B entities.[358] As a result, these dealers would be subject to two key hedging activity requirements: (1) That a hedging transaction must be designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks; and (2) that a hedging transaction is subject, as appropriate, to ongoing review, monitoring, and management by the banking entity that requires recalibration of the hedging activity to ensure that the hedging activity satisfies the requirements on an ongoing basis and is not prohibited proprietary trading. Under the proposed amendments, Group C banking entities are presumed compliant with subpart B and subpart C of the proposed rule, including with respect to the reliance on the hedging exemption.

As discussed elsewhere in this Supplementary Information, the Agencies recognize that banking entities without significant trading assets and liabilities are less likely to engage in large and/or complicated trading activities and hedging strategies. We continue to recognize that compliance with the 2013 final rule may impose disproportionate costs on banking entities without significant trading assets and liabilities. Therefore, the proposed amendment would benefit Group B and Group C entities, as it would reduce the costs of relying on the hedging exemption and, thus, engaging in hedging activities. To the extent that the removal of these requirements may reduce the costs of risk-mitigating hedging activity, Group B and Group C entities may increase their intermediation activity while also growing their trading assets and liabilities.

The fourth proposed amendment reduces documentation requirements for Group A entities. In particular, the proposal removes the documentation requirements for some financial instruments used for hedging. More specifically, the instrument would not be subject to the documentation requirement if: (1) It is identified on a written list of pre-approved financial instruments commonly used by the trading desk for the specific type of hedging activity; and (2) at the time the financial instrument is purchased or sold the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The SEC lacks information or data that would allow us to quantify the magnitude of the expected cost reductions, as the prevalence of hedging activities depends on each registrant's organizational structure, business model, and complexity of risk exposures. However, the SEC preliminarily believes that the flexibility to choose between providing documentation regarding risk-mitigating hedging transactions and establishing hedging limits for pre-approved instruments may be beneficial for Group A entities, as it will allow these entities to tailor their compliance regime to their specific organizational structure and existing policies and procedures. Finally, in section V.B, the Agencies estimate burden reductions per firm from the proposed amendments. The proposed amendments to § ____.5(c) will result in ongoing cost savings estimated at $203,191 for SEC-registered broker-dealers.[359] Additionally, the proposed amendments will result in lower ongoing costs for potential SBSD registrants relative to the costs that they would incur under the current regime if they were to choose to register with the SEC—this cost reduction is estimated to reach up to $50,062.[360] However, we recognize that compliance with SBSD registration requirements is not yet required and that there are currently no registered SBSDs. Similarly, the proposed amendments may also reduce initial set-up costs related to § ____.5(c) by $101,596 for SEC-registered broker-dealers and up to $25,031 for entities that may choose to register with the SEC as SBSDs.[361]

The proposed hedging amendment eliminates all hedging-specific compliance program requirements including correlation analysis, documentation requirements, and some hedging activity requirements for Group B entities. The proposed amendments eliminate only some of the compliance program requirements for Group A entities and provide a documentation requirement exemption for some hedging activity of these entities. Since the fixed costs of relying on such exemptions may be more significant for entities with smaller trading books, the proposed hedging amendment may permit Group B entities just below the $10 billion threshold to more effectively compete with Group A entities just above the threshold.

The proposed hedging amendments may also impact the volume of hedging activity and capital formation. To the extent that some registrants currently experience significant compliance costs related to the hedging exemption, these costs may constrain the amount of risk-mitigating hedging they currently engage in. The ability to hedge underlying risks at a low cost can facilitate the willingness of SEC-regulated entities to commit capital and take on underlying risk exposures. Because the proposed amendments would reduce costs of relying on the hedging exemption, these entities may become more incentivized to engage in risk-mitigating hedging activity, which may in turn contribute to greater capital formation.

e. Trading Outside the United States

i. Baseline

Under the 2013 final rule, a foreign banking entity that has a branch, agency, or subsidiary located in the United States (and is not itself located in the United States) is subject to the

[358] Group C banking entities (*i.e.,* those with limited trading assets and liabilities) also would not be subject to these express requirements.

[359] Recordkeeping burden reduction for broker-dealers: 20 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 138 firms = $203,191. Recordkeeping burden reduction for entities that may register as SBSDs: 20 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 34 firms = $50,062.

[360] Recordkeeping burden reduction for entities that may register as SBSDs: 20 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 34 firms = $50,062.

[361] Initial set-up burden reduction for broker-dealers: 10 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 138 firms = $101,596. Initial set-up burden reduction for entities that may register as SBSDs: 10 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 34 firms = $25,031.

proprietary trading prohibitions and related compliance requirements unless it meets five criteria.[362] First, a branch, agency, or subsidiary of a foreign banking organization that is located in the United States or organized under the laws of the United States or of any state may not engage as principal in the purchase or sale of financial instruments (including any personnel that arrange, negotiate, or execute a purchase or sale). Second, the banking entity (including relevant personnel) that makes the decision to engage in the transaction must not be located in the United States or organized under the laws of the United States or of any state. Third, the transaction, including any transaction arising from risk-mitigating hedging related to the transaction, must not be accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any state. Fourth, no financing for the transaction can be provided by any branch or affiliate of a foreign banking entity that is located in the United States or organized under the laws of the United States or of any state (the ''financing prong''). Fifth, the transaction must generally not be conducted with or through any U.S. entity (the ''counterparty prong''), unless: (1) No personnel of a U.S. entity that are located in the United States are involved in the arrangement, negotiation, or execution of such transaction; (2) the transaction is with an unaffiliated U.S. market intermediary acting as principal and is promptly cleared and settled through a central counterparty; or (3) the transaction is executed through an unaffiliated U.S. market intermediary acting as agent, conducted anonymously through an exchange or similar trading facility, and is promptly cleared and settled through a central counterparty.[363]

As discussed elsewhere in this Supplementary Information, the Agencies recognize that foreign banking entities seeking to rely on the exemption for trading outside the United States face a complex set of compliance requirements that may result in implementation inefficiencies. In particular, the application of the financing prong may be challenging because of the fungibility of some forms of financing. In addition, the Agencies recognize that satisfying the counterparty prong is burdensome for foreign banking entities and may have led some foreign banking entities to reduce the range of counterparties with which they engage in trading activity.

ii. Costs and Benefits

The proposed amendments remove the financing and counterparty prongs.

Under the proposed rule, financing for the transaction relying on the foreign trading exemption can be provided by U.S. branches or affiliates of foreign banking entities, including SEC-registered dealers. Foreign banking entities may benefit from the proposed amendments and enjoy greater flexibility in financing their transaction activity. However, some of the economic exposure and risks of proprietary trading by foreign banking entities would flow not just to the foreign banking entities, but to U.S.-located entities financing the transactions, *e.g.,* through margin loans. While SEC-registered banking entity dealers financing the transactions of foreign entities are themselves subject to the substantive requirements of the 2013 final rule, SEC-registered dealers that are not banking entities under the BHC Act are not. The proposal retains the requirement that the transactions of a foreign banking entity, including any hedging trades, are not to be accounted for as principal directly or on a consolidated basis by any U.S. branch or affiliate.

In addition, the proposed amendment removes the counterparty prong and its corresponding clearing and anonymous exchange requirements. Currently, a foreign banking entity may transact with or through U.S. counterparties if the trades are conducted anonymously on an exchange (for trades executed by a counterparty acting as an agent) and cleared and settled through a clearing agency or derivatives clearing organization acting as a central counterparty (for trades executed by a counterparty acting as either an agent or principal). As a result, the proposed amendments would make it easier for foreign banking entities to transact with or through U.S. counterparties. To the extent that foreign banking entities are currently passing along compliance burdens to their U.S. counterparties, or are unwilling to intermediate or engage in certain transactions with or through U.S. counterparties, the proposed amendments may reduce transaction costs for U.S. counterparties and may increase the volume of trading activity between U.S. counterparties and foreign banking entities.

We note that, even when a foreign banking entity engages in proprietary trading through a U.S. dealer, the principal risk of the foreign banking entities' position is consolidated to the foreign banking entity. While such trades expose the counterparty to risks related to the transaction, such risks born by U.S. counterparties likely depend on both the identity of the counterparty and the nature of the instrument and terms of trading position. Moreover, concerns about moral hazard and the volume of risk-taking by U.S. banking entities may be less relevant for foreign banking entities. The current requirement that foreign banking entities transact with U.S. counterparties through unaffiliated dealers steers trading business to unaffiliated U.S. dealers but does not necessarily reduce moral hazard in the U.S. financial system.

iii. Efficiency, Competition, and Capital Formation

The proposed amendments would likely narrow the scope of transaction activity and banking entities to which the substantive prohibitions of the 2013 final rule apply. As a result, the amendments may reduce the effects on efficiency, competition, and capital formation of the implementing rules currently in place. The proposed amendments reflect consideration of the potentially inefficient restructuring undergone by foreign banking entities after the 2013 final rule came into effect and enhanced access to securities markets by U.S. market participants on the one hand,[364] and, advancing the objectives of the 2013 final rule as discussed above on the other.

Allowing foreign banking entities to be financed by U.S.-dealer affiliates and to transact with U.S. counterparties off exchange and without clearing the trades, may reduce costs of non-U.S. banking entities' activity in the United States and with U.S. counterparties. These costs may currently represent barriers to entry for foreign banking entities that contemplate engaging in trading and other transaction activity using a U.S. affiliate's financing and trading with U.S. counterparties off exchange. To that extent, the proposed amendments may provide incentives for foreign banking entities that currently receive financing from non-U.S. affiliates to move financing to U.S. dealer affiliates, and incentives for foreign banking entities that currently transact through or with U.S. counterparties via anonymous exchanges and clearing agencies to

[362] *See* 2013 final rule § ____.6(e).

[363] *See* 2013 final rule § ____.6(e)(3).

[364] For instance, a commenter has stated that at least seven international banks have terminated or transferred existing transactions with U.S. counterparties in order to comply with the foreign trading exemption and to avoid compliance costs of relying on alternative exemptions or exclusions. *See supra* note 18.

transact through or with U.S. counterparties outside of anonymous exchanges and clearing. As a result, the number of banking entities engaging in securities trading in U.S. markets may increase, which may enhance the incorporation of new information into prices. However, the amendments may result in a shift in securities trading activity away from U.S. banking entities to foreign banking entities that are not comparably regulated. Thus, the amendments may reduce the benefits and costs of the 2013 final rule discussed in section V.D.1.

The proposed amendments may increase market entry as they will decrease the need for foreign banking entities to rely only on a narrow set of unaffiliated market intermediaries for the purposes of avoiding the compliance costs associated with the 2013 final rule. Additionally, the proposed amendments may increase operational efficiency of trading activity by foreign banking entities in the United States, which may decrease costs to market participants and may increase the level of market participation by U.S-dealer affiliates of foreign banking entities.

The proposed amendments would also affect competition among banking entities. These amendments may introduce competitive disparities between U.S. and foreign banking entities. Under the proposed amendments, foreign banking entities would enjoy a greater degree of flexibility in financing proprietary trading and transacting through or with U.S. counterparties. At the same time, U.S. banking entities would not be able to engage in proprietary trading and would be subject to the substantive prohibitions of section 13 of the BHC Act. To the extent that banking entities at the holding company level may be able to reorganize and move their business to a foreign jurisdiction, some U.S. banking entity holding companies may exit from the U.S. regulatory regime. However, under sections 4(c)(9) and 4(c)(13) of the Banking Act, domestic entities would have to conduct the majority of their business outside the United States to become eligible for the exemption. In addition, certain changes in control of banks and bank holding companies require supervisory approval. Hence, the feasibility and magnitude of such regulatory arbitrage remain unclear.

To the extent that foreign banking entities currently engage in cleared and anonymous transactions through or with U.S. counterparties because of the existing counterparty prong but would have chosen not to do so otherwise, the proposed approach may reduce the amount of cleared transactions and the trading volume in anonymous markets. This may reduce opportunities for risk-sharing among market participants and increase idiosyncratic counterparty risk born by U.S. and foreign counterparties.

At the same time, the proposed amendments may increase the availability of liquidity and reduce transaction costs for market participants seeking to trade in U.S. securities markets. To the extent that non-U.S. banking entities will face lower costs of transacting with U.S. counterparties, it may become easier for U.S. banking entities or customers to find a transaction counterparty that would be willing to engage in, for instance, hedging transactions. To that extent, U.S. market participants accessing securities markets to hedge financial and commercial risks may increase their hedging activity and assume a more efficient amount of risk. The potential consequences of relocation of non-U.S. banking entity activity to the United States on liquidity and risk sharing would be most concentrated in those asset classes and market segments where activity is most constrained by current requirements.

f. Metrics Reporting

i. Regulatory Baseline

The regulatory baseline against which we are assessing proposed amendments includes requirements for banking entities with consolidated trading assets and liabilities above $10 billion to record and report certain quantitative measurements for each trading desk engaged in covered trading.[365] The metrics-reporting requirements currently in place were intended to facilitate monitoring of patterns in covered trading activities and to identify activities that may warrant further review for compliance with the restrictions on proprietary trading of section 13 of the BHC Act and the implementing rules.

Specifically, the quantitative measurements reported under the baseline were intended to assist banking entities and the SEC in achieving the following: A better understanding of the scope, type, and profile of covered trading activities; identification of covered trading activities that warrant further review or examination by the banking entity to verify compliance with the rule's proprietary trading restrictions; evaluation of whether the covered trading activities of trading desks engaged in permitted activities are consistent with the provisions of the permitted activity exemptions; evaluation of whether the covered trading activities of trading desks that are engaged in permitted trading activities (*i.e.,* underwriting and market making-related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies; identification of the profile of particular covered trading activities of the banking entity, and its individual trading desks, to help establish the appropriate frequency and scope of the SEC's examinations of such activity; and the assessment and addressing of the risks associated with the banking entity's covered trading activities.[366]

Under the regulatory baseline, dealers affiliated with banking entities that have less than $10 billion in consolidated trading assets and liabilities are not subject to the 2013 final rule's metrics reporting and recordkeeping requirements. Group A entities (*i.e.,* SEC registrants affiliated with banking entities that have more than $10 billion in consolidated trading assets and liabilities) are required to record and report the following quantitative measurements for each trading day and for each trading desk engaged in covered trading activities: (i) Risk and Position Limits and Usage; (ii) Risk Factor Sensitivities; (iii) Value-at-Risk and Stress Value-at-Risk; (iv) Comprehensive Profit and Loss Attribution; (v) Inventory Turnover; (vi) Inventory Aging; and (vii) Customer-Facing Trade Ratio.

Currently, Group A entities affiliated with banking entities that have less than $50 billion in consolidated trading assets and liabilities are required to report metrics for each quarter within 30 days of the end of that quarter. In contrast, Group A entities affiliated with banking entities with total trading assets and liabilities equal to or above $50 billion are required to report metrics more frequently—each month within 10 days of the end of that month.[367] Table 2 quantifies the number and trading book of SEC-registered broker-dealers affiliated with firms above and below the $10 billion and $50 billion thresholds.

ii. Costs and Benefits

We understand that the current metrics reporting and recordkeeping requirements may involve large compliance costs. For instance, the

[365] *See* 2013 final rule § ____.20(d) and Appendix A.

[366] *See* 2013 final rule § ____.20 and Appendix A.

[367] *See* 2013 final rule § ____.20(d)(3).

average cost of collecting and filing metrics subject to the reporting requirements may be as high as $2 million per year per participant, and market participants may submit an average of over 5 million data points in each filing.[368] One firm reported incurring approximately $3 million in costs associated with the build out of new IT infrastructure and system enhancements, and estimated that this IT infrastructure will require at least $250,000 in maintenance and operating costs year-to-year. [369] In addition, the same firm estimated costs related to compliance consultants assisting with the construction of a 2013 final rule compliance regime at $3 million.[370]

The proposed amendments streamline the metrics reporting and recordkeeping requirements, eliminating or adding particular metrics on the basis of regulatory experience with the data and providing some entities with additional reporting time. Broadly, metrics reporting provides information for regulatory oversight and supervision but presents compliance burdens for registrants. The balance of these effects turns on the value of different metrics in evaluating covered trading activity for compliance with the rule, as well as their usefulness for risk assessment and general supervision. We discuss these effects with respect to each proposed amendment in the sections that follow.

A. Reporting and Recordkeeping Burden for SEC-Regulated Banking Entities

In section V.B, the Agencies estimate that extending the reporting period for banking entities with $50 billion or more in trading assets and liabilities from10 days to 20 days after the end of each calendar month may decrease the initial setup cost by $85,399 and ongoing annual reporting cost by $358,677 for broker-dealers, as well as initial setup cost decrease of up to $100,123 and ongoing reporting costs decrease of up to $420,517 for SBSDs that choose to register with the SEC.[371] In addition, the change to the reporting period for banking entities with $50 billion or more in trading assets and liabilities may result in ongoing annual recordkeeping cost savings of $76,859 for broker-dealers and up to $90,111 for SBSDs.[372] These figures reflect the estimated burden reductions net of any new systems costs imposed by the proposed amendments and discussed in greater detail in the section that follows.

The proposed amendments generate both costs (from new reporting requirements) and savings (from limitations to the scope of certain metrics and reduced analytical burden). To the extent that the costs of compliance with the existing metrics requirements have a significant fixed cost component and may be sunk, the potential cost savings of the proposed amendments may be reduced. The SEC recognizes that while these amendments will reduce the aggregate metrics reporting and recordkeeping burden across all types of banking entities, the allocation of these costs and benefits may differ across banking entity types. For example, one of the proposed amendments replaces the Inventory Turnover and Customer-Facing Trade Ratio metrics with Positions and Transaction Volumes metrics, and limits the scope of these metrics to trading desks engaged in market-making and underwriting activities. Because SEC-registered dealers are routinely engaged in market-making and underwriting activities, we preliminarily expect that a greater share of the costs associated with the Positions and Transaction Volumes metrics, such as the costs associated with tagging intra-company and inter-affiliate transactions for purposes of the Transaction Volumes metric, may fall on SEC-regulated entities, while a greater share of the savings, such as the savings associated with the elimination of this reporting requirement for desks engaged solely in risk-mitigating hedging activities, may be allocated to non-SEC-regulated banking entities.

The SEC preliminarily believes reporters will need to modify existing systems to comply with the proposed amendments.[373] On the basis of its experience in similar rulemakings, the SEC believes that the costs necessary to modify existing systems used to comply with the proposed metrics reporting and recordkeeping amendments[374] would depend on the particular structure and activities of each SEC-regulated banking entity's trading desks.[375] In order to allocate the estimated aggregate costs across the various proposed amendments, we make several assumptions about the relative costs of the proposed amendments, as described below. These assumptions are based on the SEC's experience with reporters, as well as the SEC's preliminary belief that the most significant component of the estimated costs will be the initial implementation cost for the new reporting requirements.

The primary systems-related costs of approximately $120,000 to $130,000, estimated at the level of the reporter, will come from: (i) Personnel costs associated with preparing the written Narrative Statement for a single reporter that is not already providing this information ($11,000); (ii) costs related to providing data in relation to the Positions and Transaction Volumes metrics that is more granular than is

[368] *See supra* note 18.

[369] *Id.*

[370] To the extent that costs related to compliance consulting include both costs of metrics reporting and related systems, as well as costs related to other compliance requirements under the 2013 final rule, we cannot estimate the firm's all-in metrics reporting costs.

[371] Initial setup cost reduction for broker-dealers: 40 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 29 firms = $85,399. Initial setup cost reduction for entities that may register as SBSDs: 40 hours per firm × 0.18 weight × (Attorney at $409 per hour) × 34 firms= $100,123. Ongoing reporting cost reduction for broker-dealers: 14 hours per response × 12 responses per year × 0.18 weight × (Attorney at $409 per hour) × 29 firms= $358,677. Ongoing reporting cost reduction for SBSDs: 14 hours per response × 12 responses per year × 0.18 weight × (Attorney at $409 per hour) × 34 firms = $420,517. The estimate for SBSDs assumes that all 34 SBSDs have more than $50 billion in trading assets and liabilities.

[372] Ongoing recordkeeping cost reduction for broker-dealers: 3 hours per response × 12 responses per year × 0.18 weight × (Attorney at $409 per hour) × 29 firms = $76,859. Ongoing recordkeeping cost reduction for SBSDs: 3 hours per response × 12 responses per year × 0.18 weight × (Attorney at $409 per hour) × 34 firms = $90,111. The estimate for SBSDs assumes that all 34 have more than $50 billion in trading assets and liabilities.

[373] In addition, SEC-regulated banking entities may incur costs associated with reporting metrics in accordance with the XML Schema published on each Agency's website. We discuss these costs below.

[374] We believe that affiliated SEC-regulated banking entities will collaborate with one another to take advantage of efficiencies that may exist and have factored that assumption into our analysis.

[375] This estimate also includes personnel costs associated with preparing the proposed narrative statement. These cost estimates are based, in part, on staff experience, as well as consideration of recent estimates of the one-time and ongoing systems costs associated with other SEC rulemakings. *See, e.g.,* Regulation SBSR—Reporting and Dissemination of Security-Based Swap Information, Exchange Act Release No. 78321 (July 14, 2016), 81 FR 53546, 53629 (Aug. 12, 2016) (estimating the one-time costs for trade execution platforms and registered clearing agencies to develop transaction processing systems and report transaction-level information to swap data repositories); *see also* Trade Acknowledgment and Verification of Security-Based Swap Transactions, Exchange Act Release No. 78011 (June 8, 2016), 81 FR 39807, 39839 (June 17, 2016) (estimating the one-time costs for registered security-based swap dealers and major participants to develop internal order and trade management systems to electronically process transactions and send trade acknowledgments).

Although the substance and content of systems associated with reporting transaction-level information to swap data repositories and derivatives counterparties would be different from the substance and content of systems associated with reporting quantitative measurements of covered trading activity, the costs associated with the proposed amendments, like the costs associated with the referenced security-based swap rules, would entail gathering and maintaining transaction-level information, and planning, coding, testing, and installing relevant system modifications.

currently required for the Inventory Turnover and Customer Facing Trade Ratio metrics ($8,000); (iii) systems costs related to reporting intra-company and inter-affiliate transactions under the Positions and Transaction Volumes metrics ($7,000); (iv) initial implementation costs for the Quantitative Measurements Identifying Information metric ($26,000); (v) ongoing costs related to the Quantitative Measurements Identifying Information metric ($3,000); (vi) one-time costs of establishing and implementing systems in accordance with the XML Schema ($75,000). As discussed above, we preliminarily believe that the net burden savings estimated in section V.B and monetized in the previous section reflect these new systems costs, as well as gross cost savings from the proposed amendments. We discuss these costs, as well as potential benefits of the proposed amendments, in greater detail below.

The SEC further considered how to assess the costs of the proposed rule for SEC-regulated banking entities. The metrics costs are generally estimated at the holding company level for 17 reporters.[376] We then allocate these costs to the affiliated SEC-regulated banking entity.[377] We preliminarily believe that estimating the cost savings of the proposal at the individual registrant level would be inconsistent with our understanding of how these entities are complying with the current metrics reporting requirement. Specifically, we anticipate that SEC-regulated banking entities within the same corporate group will collaborate with one another to comply with the proposed amendments, to take advantage of efficiencies of scale. Further, we note that individual SEC-regulated banking entities may vary in the scope and type of activity they conduct and that not all entities within an organization subject to Appendix A engage in the types of covered trading activity for which metrics must be reported. Thus, to the extent that metrics compliance occurs at the holding company level, estimating costs at the registrant level may overstate the magnitude of the costs and cost savings for SEC-regulated entities from the proposed amendments.

We considered an alternative approach to estimating costs of the proposed metrics amendments—specifically, doing so at the trading desk level. We anticipate that individual trading desks and their personnel may not be directly involved in complying with the full scope of the proposed amendments. For example, the Quantitative Measurements Identifying Information and the Narrative Statement must be prepared and reported collectively for all relevant trading desks. We also expect that trading desks within the same holding company could share systems to implement many of the proposed amendments to the quantitative measurements. Thus, a cost estimate at the trading desk level may not be an accurate proxy of the costs of the proposed amendments to SEC-regulated banking entities. Hence, such an analytical approach is likely to overestimate the total cost savings of the proposed amendments to SEC-regulated entities.

B. Elimination, Replacement, and Streamlining of Certain Metrics

The proposed amendments replace the Inventory Aging metric with a Securities Inventory Aging metric and eliminate the Inventory Aging metric for derivatives. In addition, the proposed amendments remove the requirement to establish and report limits on Stressed Value-at-Risk (VaR) at the trading desk level, replace the Customer-Facing Trade Ratio metric with a new Transaction Volumes metric, replace Inventory Turnover with a new Positions metric (reflecting both securities and derivatives positions), streamline valuation of metrics calculations for comparability, limit certain metrics to market-making and underwriting desks, modify instructions for metrics reporting, including with respect to profit and loss attribution, and remove metrics that can be calculated from other reported measurements.

In general, the key economic tradeoff from metrics reporting is between compliance burdens, which may be particularly significant for smaller Group A entities, and the amount and usefulness of information provided for regulatory oversight of the 2013 final rule, as well as for general supervision and oversight. The proposed limitation of certain metrics to market-making and underwriting desks, elimination of the inventory aging metric, and removal of the Stressed VaR risk limit requirements may reduce burdens related to reporting and recordkeeping for Group A entities. As proprietary trading activity is inherently difficult to distinguish from permitted market making, risk-mitigating hedging, or underwriting activity, certain metrics may provide additional information that is useful for regulatory oversight. However, eliminating inventory turnover and Stressed VaR metrics should not reduce the benefits of metrics reporting, as, these metrics do not enable a clear identification of prohibited proprietary trading or exempt market-making, risk-mitigating hedging, or underwriting activities.

The proposed amendments replace the Inventory Turnover metric with the Positions quantitative measurement and replace the Customer-Facing Trade Ratio metric with the Transaction Volumes quantitative measurement. The Inventory Turnover and Customer-Facing Trade Ratio metrics are ratios that measure the turnover of a trading desk's inventory and compare the transactions involving customers and non-customers of the trading desk, respectively. The proposed Positions and Transaction Volumes metrics would provide information about risk exposure and trading activity at a more granular level. Specifically, the proposed rule requires that banking entities provide the relevant Agency with the underlying data used to calculate the ratios for each trading day, rather than providing more aggregated data over 30-, 60-, and 90-day calculation periods. By providing more granular data, the proposed Positions metric, in conjunction with the proposed Transaction Volumes metric, is expected to provide the SEC with the flexibility to calculate inventory turnover ratios and customer-facing trade ratios over any period of time, including a single trading day, allowing the use of the calculation method we find most effective for monitoring and understanding trading activity.

In addition, the new Positions and Transaction Volumes metrics will distinguish between securities and derivatives positions, unlike the Inventory Turnover and Customer-Facing Trade Ratio metrics. The proposed Positions and Transaction Volumes metrics would require a banking entity to separately report the value of securities positions and the value of derivatives positions. While the current Inventory Turnover and Customer-Facing Trade Ratio metrics require banking entities to use different methodologies for valuing securities positions and derivatives positions because of differences between these asset classes, these metrics currently require banking entities to aggregate

[376] The SEC currently receives metrics from 19 entities, including two reporters that are below $10 billion in trading assets and liabilities, and two reporters that belong to the same holding company. Since voluntary reporters are not constrained by the requirements of the proposed amendment, they are not reflected in our cost estimates. In addition, we believe that the additional systems costs estimated here will be incurred at the holding company level and scope in the trading activity of all SEC-registered banking entity affiliates.

[377] *See supra* note 321.

such values for reporting purposes. By combining separate and distinct valuation types (*e.g.,* market value and notional value), the Inventory Turnover and Customer-Facing Trade Ratio metrics are currently providing less meaningful information than was intended. Therefore, requiring banking entities to disaggregate the value of securities positions and the value of derivatives positions for reporting purposes may enhance the usability of this information.

In addition to requiring separate reporting of the value of securities positions and the value of derivatives positions, the proposed rule would also streamline valuation method requirements for different product types. We understand that certain valuation methodologies currently required by the Inventory Turnover and the Customer-Facing Trade Ratio metrics may not be otherwise used by banking entities (*e.g.,* for internal monitoring or external reporting purposes). Furthermore, current requirements result in information being aggregated and furnished to the SEC in non-comparable units. Therefore, the proposed requirement to report notional and market value for all derivatives positions may further enhance the usability of the information provided in the Positions and Transaction Volumes metrics.

Moreover, the valuation methods required under the proposed rule are intended to be more consistent with our understanding of how banking entities value securities and derivatives positions in other contexts, such as internal monitoring or external reporting purposes, which may allow them to leverage existing systems and reduce ongoing costs relatively to the costs of current reporting requirements. While a banking entity may incur one-time costs in modifying how it values certain positions for purposes of metrics reporting, we do not expect such systems costs to be significant, particularly if the banking entity is able to use the systems it currently has in place for purposes of metrics reporting to value positions consistent with the proposed rule.

Notably, the SEC does not anticipate that requiring banking entities to provide more granular data in the Positions and Transaction Volumes metrics will significantly alter the costs associated with the current Inventory Turnover and Customer-Facing Trade Ratio metrics. The Positions and Transaction Volumes metrics are based on the same underlying data regarding the trading activity of a trading desk as the Inventory Turnover and Customer-Facing Trade Ratio metrics, so we expect that banking entities already keep records of these data and have systems in place that collect these data. However, the SEC anticipates that reporting more granular information in the Positions and Transaction Volumes metrics may result in costs of $24,480.[378]

Similar to the Customer-Facing Trade Ratio, the proposed Transaction Volumes metric would require banking entities to identify the value and the number of transactions a trading desk conducts with customers and non-customers. However, the proposed Transaction Volumes metric would add two additional categories of counterparties to capture the value and number of internal transactions a trading desk conducts. These include transactions booked within the same banking entity (intra-company) and those booked with an affiliated banking entity (inter-affiliate). These additional categories of information should facilitate better classification of internal transactions, which may assist the SEC in evaluating whether the trading desk's activities are consistent with the requirements of the exemptions for underwriting or market making-related activity. The SEC estimates that modifying the current requirements of the Customer-Facing Trade Ratio to require SEC-regulated banking entities to further categorize trading desk transactions may impose additional systems costs related to tagging internal transactions and maintaining associated records valued at $21,420.[379]

In addition, we anticipate that the proposed Positions and Transaction Volumes metrics may reduce costs compared to the current reporting requirements by limiting the scope of trading desks that must provide the position- and trade-based data that is currently required by the Inventory Turnover and Customer-Facing Trade Ratio metrics. Under the 2013 final rule, banking entities are required to calculate and report the Inventory Turnover and the Customer-Facing Trade Ratio metrics for all trading desks engaged in covered trading activity. The proposal would limit the scope of trading desks for which a banking entity would be required to calculate and report the Positions and Transaction Volumes metrics to only those trading desks engaged in market making-related activity or underwriting activity. As noted above, we do not expect SEC-regulated banking entities to realize the same amount of cost savings as other banking entities would with respect to this aspect of the proposed rule, since SEC-regulated banking entities are the entities that typically engage in market making-related and underwriting activities.

C. New Qualitative Information: Trading Desk, Narrative Statement, and Descriptive Information

The proposed amendments require banking entities to provide additional information. Specifically, the proposal requires entities to provide: (1) Desk level qualitative information about the types of financial instruments the desk uses and covered trading activity the desk conducts, and about the legal entities into which the trading desk books trades; (2) a narrative describing changes in calculation methods, trading desk structure, or trading desk strategies; (3) descriptive information about reported metrics, including information uniquely identifying and describing risk measurements and identifying the relationships of these measurements within a trading desk and across trading desks.

D. Trading Desk Information and Narrative Statement

As recognized in Appendix A of the 2013 final rule, the effectiveness of particular quantitative measurements may differ depending on the profile of a particular trading desk, including the types of instruments traded and trading activities and strategies.[380] Thus, the additional qualitative information the Agencies propose to collect in the Trading Desk Information provision may facilitate SEC review and analysis of covered trading activities and reported metrics. For instance, the proposed trading desk description may help the SEC assess the risks associated with a given activity and establish the appropriate frequency and scope of examination of such activity.

The Agencies are also proposing to require banking entities to provide a Narrative Statement that describes any changes in calculation methods used, a description of and reasons for changes in the trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement must also include any information the banking entity views as

[378] The SEC anticipates that costs associated with the more granular reporting in the Positions and Transaction Volumes metrics will be $8,000 per affiliated group of SEC-regulated banking entities. ($8,000 × 17 reporters × 0.18 SEC-registered banking entity weight) = $24,480.

[379] The SEC estimates that the additional costs associated with categorizing transactions under the Transaction Volumes metric will be $7,000 per reporter. ($7,000 × 17 reporters × 0.18 SEC-registered banking entity weight) = $21,420.

[380] *See* 79 FR at 5798.

relevant for assessing the information reported, such as further description of calculation methods used. If a banking entity does not have any information to report in the Narrative Statement, it must submit an electronic document stating that it does not have any information to report. The Narrative Statement will provide banking entities with an opportunity to describe and explain unusual aspects of the data or modifications that may have occurred since the last submission, which may facilitate better evaluation of the reported data.

The SEC anticipates that the proposed Trading Desk Information and Narrative Statement may enhance the efficiency of data review by regulators. Having access to both quantitative data and qualitative information for trading desks in each submission may allow the SEC to consider the specifics of each trading desk's activities during the reporting period, which may facilitate our ability to monitor patterns in the quantitative measurements.

We note that all the SEC-regulated entities that currently report Appendix A metrics are also currently providing certain elements of the proposed Trading Desk Information to the SEC. Therefore, we preliminarily believe that the costs of gathering the relevant Trading Desk Information as well as the benefits of this requirement may be de minimis.

The costs associated with preparing the Narrative Statement will depend on the extent to which a banking entity modifies its calculation methods, makes changes to a trading desk's structure or trading strategies, or otherwise has additional information that it views as relevant for assessing the information reported. Preparation of a Narrative Statement is expected to be a more manual process involving a written description of pertinent issues. However, all but one SEC reporter already provides a narrative with every submission. Thus, the proposed Narrative Statement requirement is expected to result in ongoing personnel and monitoring costs of only $1,980.[381] Since only one SEC reporter is likely to be affected by this amendment, we believe the benefits of the requirement will be de minimis.

E. Quantitative Measurements Identifying Information

The Agencies are proposing to require banking entities to report a Risk and Position Limits Information Schedule, a Risk Factor Sensitivities Information Schedule, a Risk Factor Attribution Schedule, a Limit/Sensitivity Cross-Reference Schedule, and a Risk Factor Sensitivity/Attribution Cross-Reference Schedule. This additional information may improve our understanding of how reported limits and risk factors relate to each other for one or more trading desks, both within the same reporting period and across reporting periods. The SEC preliminarily believes that, while these new reporting elements may increase compliance costs for banking entities, the information contained in the reports may allow for more meaningful interpretation of quantitative metrics data.

Banking entities will incur certain initial implementation costs to develop these schedules of information, including costs associated with developing unique identifiers for all limits, risk factor sensitivities, and risk factor or other factor attributions used by the banking entity and brief descriptions of all such limits, sensitivities, and factors. This will include personnel costs to prepare the descriptions and systems costs to collect and maintain the relevant information for each schedule. The SEC estimates initial implementation costs associated with the proposed Quantitative Measurements Identifying Information at $79,560.[382] There will also likely be ongoing maintenance costs associated with updating and storing the information schedules and ongoing monitoring costs to ensure that the information schedules continue to accurately describe the banking entity's reported limits, sensitivities, and factors over time. However, since this information is not expected to change significantly from reporting period to reporting period, banking entities should be able to routinize the preparation of these information schedules to minimize or mitigate ongoing costs. We estimate the proposed Quantitative Measurements Identifying Information will result in $9,180 of ongoing costs.[383] To limit burdens associated with reporting the identifying and descriptive information covered by the Quantitative Measurements Identifying Information, the proposed rule requires a banking entity to report this information in the relevant information schedule for the entire banking entity rather than for each trading desk.

F. XML Format

The Agencies are proposing to require banking entities to submit the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement in accordance with the XML Schema specified and published on the relevant Agency's website.[384] The metrics are not currently required to be reported in a structured format, and banking entities are currently reporting quantitative measurement data electronically. On the basis of discussions with metrics reporters, most of these entities indicated a familiarity with XML, and further, several indicated that they use XML internally for other reporting purposes. In addition, we note that banks currently submit quarterly Reports of Condition and Income (''Call Reports'') to the Federal Financial Institutions Examination Council (''FFIEC'') Central Data Repository in eXtensible Business Reporting Language (''XBRL'') format, an XML-based reporting language, so they are generally familiar with the processes and technology for submitting regulatory reports in a structured data format. We believe that familiarity with these practices at the bank level will facilitate the implementation of these practices for affiliated SEC registrants. Furthermore, FINRA requires its member broker-dealers to file their FOCUS Reports in a structured format through its eFOCUS system.[385] The eFOCUS system permits broker-dealers to import the FOCUS Report data into a filing using an Excel, XML, or text file. Therefore, the SEC preliminarily believes that all SEC-registered dealers covered by the metrics reporting and recordkeeping requirements have experience applying the XML format to their data.

Reporting metrics and other information in XML allows data to be

[381] The SEC estimates that costs associated with the proposed Narrative Statement will be $11,000 per affiliated group of SEC-regulated banking entities. ($11,000 × 1 reporter × 0.18 entity) = $1,980.

[382] The SEC estimates that the costs associated with the initial implementation of the Quantitative Measurements Identifying Information will be $26,000 per affiliated group of SEC-regulated banking entities. ($26,000 × 17 reporters × 0.18 entity weight) = $79,560.

[383] The SEC estimates that the ongoing costs associated with the Quantitative Measurements Identifying Information will be $3,000 per affiliated group of SEC-regulated banking entities per year. ($3,000 × 17 reporters × 0.18 entity weight) = $9,180.

[384] XML is an open standard, meaning that it is a technological standard that is widely available to the public at no cost. XML is also widely used across the industry.

[385] For example, FINRA members commonly use FINRA's Web EFT system, which requires that all data be submitted in XML. *See* Web EFT Schema Documentation and Schema Files, FINRA, *http://www.finra.org/industry/web-crd/web-eft-schema-documentation-and-schema-files*; *see also* Disclosure of Order Handling Information, Exchange Act Release No. 78309 (July 13, 2016), 81 FR 49431, 49499 (July 27, 2016). Information about FINRA's eFOCUS system is available at *http://www.finra.org/industry/focus.*

tagged, which in turn identifies the content of the underlying information. The data then becomes instantly machine-readable through the use of standard software. Requiring banking entities to submit the metrics in accordance with the XML Schema would enhance the ability to process and analyze the data. Once the data is in a structured format, it can easily be organized for viewing, manipulation, and analysis through the use of commonly used software tools and applications. Structured data allows users to discern patterns from large quantities of information much more easily than unstructured data. Structured data also facilitates users' abilities to dynamically search, aggregate, and compare information across submissions, whether within a banking entity, across multiple banking entities, or across multiple date ranges. The data supplied in a structured format could help the SEC identify outliers or trends that could warrant further investigation.

The XML Schema would also incorporate certain validations to help ensure consistent formatting among all reports—in other words, it would help ensure data quality. The validations are restrictions placed on the formatting for each data element so that data is presented comparably. Requiring banking entities to report using the XML Schema may help ensure timely access to the data in a format that is already consistent and comparable for automated machine-processing and analysis. However, these validations are not designed to ensure the underlying accuracy of the data. Any reports provided by banking entities under the proposed requirement would have to comply with these validations that are incorporated within the XML Schema; otherwise the reports would not be considered to have been provided using the XML Schema specified and published on the SEC's website.

Specifying the format in which banking entities must report information may help the Agencies ensure that we receive consistently comparable information in an efficient manner across banking entities. The costs associated with providing XML data lie in the specialized software or services required to make the submission and the time required to map the required data elements to the requisite taxonomy. In addition to enhanced viewing, manipulation, and analysis, the benefits associated with providing XML data lie in the enhanced validation tools that minimize the likelihood that data are reported with errors. Therefore, subsequent reporting periods may require fewer resources, relative to both initial reporting periods and the current reporting process.

We expect that the requirement to submit the Narrative Statement electronically will result in minimal information systems costs, as banking entities already have systems in place to submit information to the SEC electronically. However, the SEC recognizes that, as a result of the proposed amendments, banking entities will be required to establish and implement systems in accordance with the XML Schema that will result in one-time costs [386] of approximately $75,000 per holding company banking entity, on average, for an expected aggregate one-time cost of approximately $229,500.[387] Because we expect that XML reporting will result in a more efficient submission process, including validation of submissions, we anticipate that some of the implementation costs may be partially offset, over time, by these greater efficiencies.

G. Extended Time To Report

The proposed changes also extend the time to report metrics for different groups of filers. Because processes enabling reporting under tight deadlines may generally be costlier, we anticipate that the amended reporting requirements may marginally reduce compliance costs, particularly for filers with less sophisticated data and trading infrastructure. In addition, the amendments may result in fewer resubmissions by filers. To a limited extent, the proposed amendment may reduce the timeliness of data received from dealers, making supervision less agile. However, the SEC will continue to have access to quantitative metrics and related information through the standard examination and review process and existing recordkeeping requirements.

iii. Competition, Efficiency, and Capital Formation

Under the proposed amendments, Group A entities would incur lower costs of compliance with metrics-reporting requirements. To the extent that these compliance burdens may be significant for some Group A entities, and since Group B entities are not subject to any metrics requirements, smaller Group A entities around the threshold may become more competitive with Group B entities. Since metrics are reported only to the Agencies and are not publicly disseminated, this amendment does not change the scope of information available to investors. As such, we do not anticipate effects on informational efficiency to be significant. To the extent that some Group A entities are currently experiencing significant metrics-reporting costs and partially or fully passing them along to customers in the form of reduced access to capital or higher cost of capital, the proposed amendments may reduce costs of and increase access to capital. However, as estimated cost savings from the proposed amendments are small, we do not anticipate a substantial increase in access to capital as a result of the proposed amendments to metrics reporting requirements.

iv. Alternatives

The Agencies could have taken alternative approaches. First, the Agencies could keep the metrics being reported unchanged but increase or decrease the trading activity thresholds used to determine metrics recordkeeping and reporting by filers and the frequency of such reporting. For instance, the $10 billion trading activity threshold for quarterly reporting could be replaced by the $25 billion threshold. As shown in Table 2, we estimate that this alternative would affect 12 bank-

[386] These cost estimates are based in part on the SEC's recent estimates of the one-time systems costs associated with the proposed requirement that security-based swap data repositories (''SDRs'') make transaction-level security-based swap data available to the SEC in Financial products Markup Language (''FpML'') and Financial Information eXchange Markup Language (''FIXML''). *See* Establishing the Form and Manner with which Security-Based Swap Data Repositories Must Make Security-Based Swap Data Available to the Commission, Exchange Act Release No. 76624 (Dec. 11, 2015), 80 FR 79757 (Dec. 23, 2015) (''SBS Taxonomy rule proposing release''). The SBS Taxonomy rule proposing release estimates a one-time cost per SDR of $127,000. Although the substance of reporting associated with the metrics is different from the information collected and made available by SDRs, the SEC expects similar costs to apply to the implementation of XML for the reporting metrics. In particular, on the basis of its experience with similar structured data reporting requirements in other contexts (*e.g.,* the SBS Taxonomy rule), the SEC expects that systems engineering fixed costs will represent the bulk of the costs related to the XML requirement. Among other things, the proposed SBS Taxonomy rule would require SDRs to make available to the SEC in a specific format (in this case, FpML or FIXML) transaction-level data that they are already required to provide. Similarly, the proposed metrics amendments would require banking entities to produce in XML metrics reports that they are already required (or will be required) to provide. However, our estimate is reduced to account for the fact that registered broker-dealers already provide eFOCUS reports to FINRA in XML and, therefore, must have the requisite systems in place. Our cost estimates include responsibilities for modifications of information technology systems to an attorney, a compliance Manager, a programmer analyst, and a senior business analyst and responsibilities for policies and procedures to an attorney, a compliance Manager, a senior systems analyst, and an operations specialist.

[387] The SEC computes total costs as follows: $75,000 × 17 reporters × 0.18 entity weight = $229,500.

affiliated SEC-registered broker-dealers. Under the alternative, these dealers would no longer be required to keep or report metrics, enjoying lower compliance burdens. However, the alternative reduces the amount and frequency of quantitative data available for regulatory oversight of banking entities. Similarly, lowering the recordkeeping and reporting thresholds would increase the scope of application of the metrics reporting requirement, increasing accompanying recordkeeping and reporting obligations as well as potential oversight and supervision benefits. However, we continue to recognize that while metrics being reported under the 2013 final rule do not allow a clear delineation of proprietary trading and market-making or hedging activities, they may be used to flag risks and enhance general supervision, as well as demonstrate prudent risk management.

In addition, the Agencies could have proposed eliminating the VaR requirement. Both VaR and Stressed VaR are based on firm-wide activity, and VaR limits may not be routinely used by banking entities to manage and control risk-taking activities at the desk level. The alternative would remove from Appendix A the requirement for VaR limits because such limits may not be meaningful at the trading desk level. This alternative may reduce the burden of reporting and compliance costs without necessarily reducing the effectiveness of regulatory oversight by the SEC.

The Agencies have also considered eliminating all quantitative metrics recordkeeping and reporting requirements under Appendix A of the 2013 final rule. This alternative would reduce the amount of data produced and transmitted to the Agencies. Appendix A metrics enable regulators to have a more complete picture of risk-taking and profit and loss attribution for supervised entities. However, the metric reporting regime is costly, and banking entities currently subject to the 2013 final rule and SEC oversight are also subject to other compliance and reporting requirements unrelated to the 2013 final rule, as well as the standard examination and review process. It is not clear that the Appendix A metrics are superior to internal quantitative risk measurements or other data (such as metrics in the FOCUS reports) reported by SEC registered broker-dealers in describing risk exposures and profitability of various activities by SEC registrants. Crucially, Appendix A metrics, such as VaR, dealer inventory, transaction volume, and profit and loss attribution, do not delineate a prohibited proprietary trade and a permitted market making, underwriting or hedging trade, particularly when executed in highly illiquid products and times of stress. Moreover, reporters' flexibility in defining the metrics may reduce their comparability. We recognize that while Appendix A metrics do not allow a clear identification of proprietary trading by SEC registrants, they may be used to flag risks and enhance general supervision, as well as demonstrate prudent risk management.

g. Covered Funds

Section 13 of the BHC Act generally prohibits banking entities from acquiring or retaining an ownership interest in, sponsoring, or having certain relationships with covered funds, subject to certain exemptions.[388] The SEC's economic analysis concerns the potential costs, benefits, and effects on efficiency, competition, and capital formation of the proposed covered fund amendments for four groups of market participants. First, the proposed amendments may impact SEC-registered investment advisers that are banking entities, including those that sponsor or advise covered funds and those that do not, as well as SEC-registered investment advisers that are not banking entities that sponsor or advise covered funds and compete with banking entity RIAs. Second, the proposed amendments affect the ability of bank-affiliated dealers to underwrite, make markets, or engage in risk-mitigating hedging transactions involving covered funds. Third, the proposed amendments impact private funds, including those funds scoped in or out of the covered fund provisions of the 2013 final rule, as well as private funds competing with such funds. Fourth, to the extent that the proposed amendments impact efficiency, competition, and capital formation in covered funds or underlying securities, investors in and sponsors of covered funds and underlying securities may be affected as well.

As discussed in greater detail below, the primary economic tradeoff posed by the proposed amendments to the covered fund provisions and other potential changes to these provisions on which the Agencies seek comment is the tradeoff between enhanced competition and capital formation in covered funds and the potential moral hazard and related financial risks posed by fund investments. To the extent that the current covered fund provisions limit fund formation, the proposed amendments and other amendments on which the Agencies seek comment could reduce long-term compliance costs and increase revenues for banking entities, and, as a result, increase capital formation. We are currently not aware of any information or data about the extent to which the covered fund provisions of the 2013 final rule are inhibiting capital formation in funds. Therefore, the bulk of the analysis below is necessarily qualitative.

i. Definition of ''Covered Fund''

Regulatory Baseline

The definition of ''covered fund'' impacts the scope of the substantive prohibitions on banking entities' acquiring or retaining an ownership interest in, sponsoring, and having certain relationships with covered funds. The covered fund provisions of the 2013 final rule may reduce the ability and incentives of banking entities to bail out affiliated funds to mitigate reputational risk; limit conflicts of interest with clients, customers, and counterparties; and reduce the ability of banking entities to engage in proprietary trading indirectly through funds. The 2013 final rule defines covered funds as issuers that would be investment companies but for section 3(c)(1) or 3(c)(7) of the Investment Company Act and then excludes specific types of entities from the definition. The definition also includes certain commodity pools as well as certain foreign funds, but only with respect to a U.S. banking entity that sponsors or invests in the foreign fund. Funds that rely on the exclusions in sections 3(c)(1) or 3(c)(7) of the Investment Company Act are covered funds unless an exemption from the covered fund definition is available; generally, funds that rely on other exclusions in the Investment Company Act, such as real estate and mortgage funds that rely on the exclusion in section 3(c)(5)(C), are not covered funds under the 2013 final rule.

The broad definition of covered funds above encompasses many different types of vehicles, and the 2013 final rule excludes some of them from the definition of a covered fund.[389] The excluded fund types relevant to the baseline are funds regulated under the Investment Company Act, that is, RICs and BDCs. Seeding vehicles for these funds are also excluded from the covered fund definition during their seeding period.[390]

[388] *See* 12 U.S.C. 1851.

[389] The exclusions from the covered fund definition are set forth in § ____.10(c) of the 2013 final rule.

[390] *See* 2013 final rule § ____.10(c)(12).

Scope of the Covered Fund Definition: Costs and Benefits

The Agencies are requesting comment on potential modifications to the covered fund definition. For instance, with respect to the foreign public funds exclusion, the Agencies are requesting comment as to whether to remove the condition that, for a foreign public fund sponsored by a U.S. banking entity, the fund's ownership interests are sold predominantly to persons other than the sponsoring banking entity, affiliates of the issuer and the sponsoring banking entity, and employees and directors of such entities. As another example, the Agencies are requesting comment as to whether to revise the exclusion to focus on the qualification of the fund in foreign jurisdictions and markets as eligible for retail sales, without including requirements related to the manner in which the fund's interests are sold, or to tailor the exclusion's use of the defined term ''distribution'' to address instances in which a fund's ownership interests generally are sold to retail investors in secondary market transactions, as with foreign exchange-traded funds. The Agencies are also requesting comment on excluding other funds, such as family wealth vehicles, from the scope of the covered fund definition. The Agencies are requesting comment on modifying the loan securitization exclusion to permit limited holdings of debt securities and synthetic instruments in addition to loans. As a final example, the Agencies are requesting comment on revising the covered fund definition to provide an exclusion focused on the characteristics of an entity rather than only whether it would be an investment company but for section 3(c)(1) or 3(c)(7) of the Investment Company Act or would otherwise come within the covered fund base definition.

Broadly, such modifications to the existing covered fund definition and additional exclusions would reduce the number and types of funds that are impacted by the 2013 final rule. Hence, these alternatives may decrease both the economic benefits and the economic costs of the 2013 final rule's covered fund provisions, as discussed further below.

Form ADV data is not always sufficiently granular to allow us to estimate the number of funds and fund advisers affected by the different modifications to the covered fund definition on which the Agencies are seeking comment. However, Table 3 and Table 4 in the economic baseline quantify the number and asset size of private funds advised by banking entity RIAs by the type of private fund they advise, as those fund types are defined in Form ADV. These fund types include hedge funds, private equity funds, real estate funds, securitized asset funds, venture capital funds, liquidity, and other private funds.

The Agencies are requesting comment on whether to tailor the covered funds definition by using a characteristics-based exclusion. For instance, the Agencies are requesting comment on whether the covered fund definition should exclude funds that are not hedge funds or private equity funds, as defined in Form PF. This would exclude other types of funds from the covered fund definition (such as venture capital, real estate, securitized asset, liquidity, and all other private funds, as those terms are defined in Form PF).

Using Form ADV data, we preliminarily estimate that approximately 173 banking entity RIAs advise hedge funds and 90 banking entity RIAs advise private equity funds.[391] As can be seen from Table 3 in the economic baseline, 43 banking entity RIAs advise securitized asset funds. Table 4 shows that banking entity RIAs advise 360 securitized asset funds with $120 billion in gross assets. Another 56 banking entity RIAs advise real estate funds, and banking entity RIAs advise 323 real estate funds with $84 billion in gross assets. Venture capital funds are advised by only 16 banking entity RIAs, and all 42 venture capital funds advised by RIAs have on aggregate approximately $2 billion in gross assets.

As noted elsewhere in this Supplementary Information, the covered fund provisions of the 2013 final rule may limit the ability of banking entities to engage in trading through covered funds in circumvention of the proprietary trading prohibition, reduce bank incentives to bailout their covered funds, and mitigate conflicts of interest between banking entities and its clients, customers, or counterparties. However, the covered fund definition in the implementing rules is broad, and some have argued that the rules currently in place may limit the ability of banking entities to conduct traditional asset management activities and to promote capital formation. The Agencies recognize that the covered fund provisions of the implementing rules, as currently in effect, may impose significant costs on some entities. The Agencies also understand that the breadth of the covered fund definition requires market participants to review hundreds of thousands of issuers, and potentially more, to determine if the issuers are covered funds as defined in the 2013 final rule. We understand that this has included a review of hundreds of thousands of CUSIPs issued by common types of securitizations for covered fund status.[392] The need to perform an in-depth analysis and make covered funds determinations across such a large scope of entities involves costs and may adversely affect the willingness of banking entities to own, sponsor, and have relationships with covered funds and financial instruments that may be covered funds. Moreover, the 2013 final rule's limitations on banking entities' investment in covered funds may be more significant for covered funds that are typically small in size, with potentially more negative spillover effects on capital formation in underlying securities.[393]

The potential modifications to the covered fund definition on which the Agencies are seeking comment would reduce further the scope of funds that need to be analyzed for covered fund status or would simplify this analysis and would enable banking entities to own, sponsor, and have relationships with certain groups of funds that are currently defined as a covered fund. Accordingly, these potential modifications may reduce costs of banking entity ownership, sponsorship, and transactions with certain private funds, may promote greater capital formation in, and competition among such funds, and may improve access to capital for issuers of underlying debt or equity. They may also benefit banking entity dealers through higher profits or more underwriting business. Reducing the covered fund restrictions by further tailoring the covered fund definition may encourage more launches of funds that are excluded from the definition, increasing capital formation and, possibly, competition in those types of funds. If competition increases the quality of funds available to investors or reduces the fees they are charged, investors in funds may benefit.

We do not observe the amount of capital formation in different types of covered funds or underlying equity and debt securities that does not occur because of the 2013 final rule. Because of the prolonged and overlapping implementation timeline of various

[391] As noted in the economic baseline, a single RIA may advise multiple types of funds.

[392] *See supra* note 18.

[393] We understand that, for instance, the median venture capital fund size in some locations is approximately $15 million. One fund may have lost as much as $50 million dollars in investment because of the prohibitions of section 13 of the BHC Act and implementing regulations. *See supra* note 18.

post-crisis reforms and because market participants restructured their trading and covered funds activities in anticipation of the implementing rules being effective, we cannot measure the counterfactual levels of capital formation and liquidity that would have been observed after the financial crisis, absent the covered fund provisions currently in place. Similarly, we cannot establish whether competition in covered funds is adversely affected by the covered fund definition currently in effect. We solicit any information, particularly quantitative data, that would allow us to estimate the magnitudes of the potential costs and benefits of the covered fund provisions on banking entity-affiliated broker-dealers and investment advisers advising the different types of funds discussed above and any effects on efficiency, competition, and capital formation in different types of funds and their underlying securities.

ii. Covered Funds: Underwriting, Market Making, and Risk-Mitigating Hedging Regulatory Baseline

Under the baseline, as described above, the 2013 final rule provides for market-making and hedging exemptions to the prohibition on proprietary trading. However, the 2013 final rule places tighter restrictions on the amount of underwriting, market making, and hedging a banking entity can engage in when those transactions involve covered funds. For underwriting and market-making transactions in covered funds, if the banking entity sponsors or advises a covered fund, or acts in any of the other capacities specified in § ____.11(c)(2) of the 2013 final rule, then any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making-related activities for that particular covered fund must be included in the per-fund and aggregate covered fund investment limits in § ____.12 of the 2013 final rule and subject to the capital deduction provided in § ____.12(d) of the 2013 final rule.[394] Additionally, a banking entity's aggregate investment in all covered funds is limited to 3 percent of a banking entity's tier 1 capital, and all banking entities must include ownership interests acquired or retained in connection with underwriting and market making-related activities for purposes of this calculation.[395] Moreover, hedging transactions in a covered fund are only permitted if the transaction mitigates risks associated with the compensation of a banking entity employee or an affiliate that provides advisory or other services to the covered fund.[396]

Costs and Benefits

The increased requirements imposed on SEC-registered dealers' transactions in covered funds relative to other securities mean that a dealer may not be able to make markets in a covered fund or may be limited in its ability to do so, even if the dealer may be able to make markets in the underlying securities owned by the covered fund or securities that are otherwise similar to the covered fund. The Agencies' proposed changes would provide banking entities greater flexibility in underwriting and market making in covered fund interests. Specifically, as discussed elsewhere in this Supplementary Information, for a covered fund that the banking entity does not organize or offer pursuant to § ____.11(a) or (b) of the 2013 final rule, the proposal would remove the requirement that the banking entity include, for purposes of the aggregate fund limits and capital deduction, the value of any ownership interests of the covered fund acquired or retained in connection with underwriting or market making-related activities. Under the proposed amendments, these limits, as well as the per fund limit, would only apply to a covered fund that the banking entity organizes or offers and in which the banking entity retains an ownership interest pursuant to § ____.11(a) or (b) of the 2013 final rule.

The proposed amendment aligns the requirements for underwriting and market making with respect to ownership interests in covered funds that the banking entity does not organize or offer, with requirements for engaging in these activities with respect to other financial instruments. We understand that the 2013 final rule's restrictions on underwriting and making-related activities involving covered funds impose costs on banking entities and may constrain their underwriting and market making in covered funds. Under the proposed amendments, banking entities would be able to engage in potentially profitable market making and underwriting in covered funds they do not organize or offer without the per-fund and aggregate limits and capital deductions. SEC-registered banking entities are expected to benefit from this amendment to the extent they profit from underwriting and market-making activities in such covered funds. In addition, these benefits may, at least partially, flow through to funds and fund investors. Specifically, banking entities may become more willing and able to underwrite and make markets in covered funds, and provide investors with more readily available economic exposure to the returns and risks of certain covered funds.

We recognize that ownership interests in covered funds expose owners to the risks related to covered funds. It is possible that covered fund ownership interests acquired or retained by a banking entity acting as an underwriter or engaged in market making-related activities may lead to losses for banking entities. However, we recognize that the risks of market making or underwriting of covered funds are substantively similar to the risks of market making or underwriting of otherwise comparable securities. Therefore, the same general tradeoffs discussed in section V.D.3.c of this Supplementary Information between potential benefits for capital formation and liquidity and potential costs related to moral hazard and market fragility apply to banking entities' underwriting and market-making activities involving covered funds and other types of securities.

Banking entities are also currently unable to retain ownership interests in covered funds as part of routine risk-mitigating hedging. These restrictions may currently be limiting banking entities' ability to hedge the risks of fund-linked derivatives through shares of covered funds referenced by fund-linked products. The Agencies recognized that, as a result of this approach, banking entities may no longer be able to participate in offering certain customer facilitating products relating to covered funds. The Agencies recognized that increased use of ownership interests in covered funds could result in exposure to greater risk.[397] Moreover, banking entities' transactions in fund-linked products that reference covered funds with customers can expose a banking entity to risk in cases where a customer fails to perform, transforming the banking entity's covered fund hedge of the customer trade into an unhedged, and potentially illiquid, position in the covered fund (unless and until the banking entity takes action to hedge this exposure and bears the corresponding costs).

The proposal expands the scope of permissible risk-mitigating hedging with covered funds. Specifically, under the proposal, in addition to being able to

[394] *See* 2013 final rule § ____.12(a)(2)(ii); *see also* § ____.11(c)(2).

[395] 2013 final rule § ____.12(a)(2)(iii); *see also* § ____.11(c)(3).

[396] 2013 final rule § ____.13(a).

[397] 79 FR at 5737.

acquire or retain an ownership interest in a covered fund as a risk-mitigating hedge with respect to certain compensation agreements as permitted under the 2013 final rule, the banking entity would also be able to acquire or retain an ownership interest in a covered fund when acting as an intermediary on behalf of a non-banking entity customer to facilitate exposure by the customer to the profits and losses of the covered fund.

The proposal is likely to benefit banking entities and their customers, as well as advisers of covered funds. The proposed amendments increase the ability of banking entities to facilitate customer-facing transactions while hedging their own risk exposure. As a result, this amendment may increase banking entity intermediation and provide customers with easier access to the risks and returns of covered funds. To the degree that banking entities' investments in covered funds to hedge customer-facing transactions may facilitate their engagement in customer-facing trades, customers of banking entities may benefit from greater availability of financial instruments providing exposure to covered funds and related intermediation. Access to covered funds may be particularly valuable when private capital plays an increasingly important role in U.S. capital markets and firm financing.

We also recognize that the proposed amendments may increase risks to banking entities. For instance, when a banking entity enters into a transaction with a customer that provides exposure to the profits and losses of a covered fund to a customer, even when such exposure is hedged, the banking entity may suffer losses if a customer fails to perform and fund investments are illiquid and decline in value. However, such counterparty default risk is present in any principal transaction in illiquid financial instruments, including when facilitating customer trades in the securities in which covered funds invest, as well as in market-making and underwriting activities. We note that, under the proposal, risk-mitigating hedging transactions involving covered funds would be conducted consistent with the requirements of the 2013 final rule, as modified by the proposal, including the requirements with respect to risk-mitigating hedging transactions. For example, such exposures would be subject to required risk limits and policies and procedures and would have to be appropriately monitored and risk managed. Therefore, it is not clear that hedging or customer facilitation in covered funds would pose a greater risk to banking entities than hedging or customer facilitation in similar securities that is permissible under the 2013 final rule.

Alternatives

An alternative would be to provide greater flexibility for underwriting, market making, and risk-mitigating hedging transactions involving covered fund interests. Specifically, the Agencies could consider eliminating the per-fund limit, aggregate fund limit, and capital deduction for a banking entity acting as an underwriter or engaged in market making-related activities with respect to a covered fund that the banking entity organizes and offers. The Agencies also could have proposed amending the 2013 final rule to provide that, in addition to the proposed amendment, banking entities should be permitted to acquire or retain ownership interests in covered funds as risk-mitigating hedging transactions where the acquisition or retention meets the requirements of § ____.5 of the 2013 final rule, as modified by the proposal. If the Agencies made all of these changes, this would provide dealers the same level of flexibility in underwriting, making markets in, or hedging with, covered funds as applied to these activities with respect to all other types of financial instruments, including the underlying financial instruments owned by the same covered funds.

Compliance with current rules for covered funds imposes costs on banking entities. To the extent that, under the baseline, such costs prevent dealer subsidiaries of banking entities from making markets in or underwriting certain financial instruments, the alternative would enable them to engage in potentially profitable market making in, underwriting, and hedging with, covered funds. Banking entity dealers could benefit from this alternative, to the extent they profit from underwriting and market-making activities in covered funds and to the extent that investing in covered funds to hedge a banking entity's exposure in transactions such as total return swaps reduce their risk profile.

The benefits of this alternative may also flow through to funds, investors, and customers. Under the alternative, banking entities would enjoy greater flexibility in transacting in covered funds with customers and in hedging banking entities' exposure with covered funds. As a result, banking entities may become more willing and able to underwrite and market products linked to covered funds and to provide customers with an economic interest in the profits and losses of covered funds. This may increase investor access to the returns and risks of private funds, which may be particularly valuable when issuers are increasingly relying on private capital and delaying public offerings. Finally, the increased ability of banking entities to transact in covered funds under the alternative may increase market quality for covered funds that are traded.

We continue to recognize that transactions in covered funds—including transactions with customers, and holdings of ownership interests in covered funds related to underwriting, market making, or hedging activities—necessarily involve the risk of losses. However, the risks of market making, underwriting, or hedging by banking entities of financial instruments underlying the covered fund, or financial instruments or securities that are otherwise similar to covered funds, are substantively similar. Therefore, the same tradeoffs discussed in section V.D.3.c in this **SUPPLEMENTARY INFORMATION** between potential benefits to capital formation and liquidity and potential costs related to moral hazard and market fragility apply to both banking entity interests from underwriting and market making in financial instruments and underwriting and market making in covered funds. It is not clear that the existence of a legal and management structure of a covered fund per se changes the economic risk exposure of banking entities, and, thus, the capital formation and other tradeoffs discussed above. We note that the alternative would simply involve a consistent treatment of financial instruments and funds as it pertains to underwriting, market making, and hedging activities. However, as discussed above in section V.D.1 of this **SUPPLEMENTARY INFORMATION**, some of the effects of the 2013 final rule's provisions are difficult to evaluate outside of economic downturns, and we are unable to measure the amount of capital formation or liquidity in covered funds or underlying products that does not occur because of the existing treatment of underwriting, market making, and hedging using covered funds.

iii. Restrictions on Relationships Between Banking Entities and Covered Funds Regulatory Baseline

Under the baseline, banking entities are limited in the types of transactions they are able to engage in with covered funds with which they have certain relationships. Banking entities that serve in certain capacities with respect to a covered fund, such as the fund's investment manager, adviser, or sponsor, are prohibited from engaging in a ''covered transaction,'' as defined in section 23A of the FR Act, with the covered fund.[398] This prohibits transactions such as loans, guarantees, securities lending, and derivatives transactions that cause the banking entity to have credit exposure to the affiliate. However, the 2013 final rule exempts from the prohibition any prime brokerage transaction with a covered fund in which a covered fund managed, sponsored, or advised by a banking entity has taken an ownership interest (a ''second-tier fund''). Therefore, banking entities with a relationship to a covered fund can engage in prime brokerage transactions (that are covered transactions) only with second-tier funds and not with all covered funds.[399]

Costs and Benefits

The Agencies request comments on whether the Agencies should amend § ____.14 of the 2013 final rule to incorporate the exemptions under section 23A of the FR Act and the Board's Regulation W, such as intraday extensions of credit that facilitate settlement.[400] As a result of the restrictions on covered transactions in the 2013 final rule, some banking entities may be outsourcing the provision of routine services to sponsored funds, such as custody and clearing services, to outside providers. We recognize that outsourcing such activities may adversely affect customer relationships, increase costs, and decrease operational efficiency for banking entities and covered funds. The changes on which the Agencies seek comment would provide banking entities greater flexibility to provide these and other services directly to covered funds. If being able to provide custody, clearing, and other services to sponsored funds reduces the costs of these services, fund advisers and, indirectly, fund investors, may benefit from incorporating the exemptions. We note that most direct benefits are likely to accrue to banking entity advisers to covered funds that are currently relying on third-party service providers as a result of the requirements of the 2013 final rule.

These changes would increase banking entities' ability to engage in custody, clearing, and other transactions with their covered funds and benefit banking entities that are currently unable to engage in otherwise profitable or efficient activities with covered funds they own or advise. Moreover, this could enhance operational efficiency and reduce costs incurred by covered funds, which are currently unable to rely on their affiliated banking entity for custody, clearing, and other transactions. Conversely, to the extent that this approach increases transactions between a banking entity and related covered funds, banking entities could incur any risks associated with these transactions, recognizing that the transactions would be subject to the limitations in section 23A of the FR Act and the Board's Regulation W, as well as § ____.14(b) of the 2013 final rule and other applicable laws.

iv. Covered Fund Activities and Investments Outside of the United States Regulatory Baseline

Under the 2013 final rule, foreign banking entities can acquire or retain an ownership interest in, or act as sponsor to, a covered fund, so long as those activities and investments occur solely outside the United States, no ownership interest in such fund is offered for sale or sold to a resident of the United States (the ''marketing restriction''), and certain other conditions are met. An activity or investment occurs solely outside of the United States if (1) the banking entity is not itself, and is not controlled directly or indirectly by, a banking entity that is located in the United States or established under the laws of the United States or of any state; (2) the banking entity (and relevant personnel) that makes the decision to acquire or retain the ownership interest or act as sponsor to the covered fund is not located in the United States or organized under the laws of the United States or of any state; (3) the investment or sponsorship, including any risk-mitigating hedging transaction related to an ownership interest, is not accounted for as principal by any U.S. branch or affiliate; and (4) no financing is provided, directly or indirectly, by any U.S. branch or affiliate. In addition, the staffs of the Agencies issued FAQs concerning the requirement that no ownership interest in such fund is offered for sale or sold to a resident of the United States.

Costs and Benefits

The proposed amendments remove the financing prong of the foreign funds exemption and codify the FAQs regarding marketing of foreign funds to U.S. residents.[401] Thus, under the proposed amendments, foreign banking entities would be able to acquire or retain ownership interests in and sponsor covered funds with financing provided directly or indirectly by U.S. branches and affiliates, including SEC-registered dealers. The costs, benefits, and effects on efficiency, competition, and capital formation of this amendment generally parallel those of the removal of the financing prong with respect to trading activity outside the United States in section V.D.3.e of this Supplementary Information.

Foreign banking entities may benefit from the proposed amendments and enjoy greater flexibility in financing their covered fund activity. Allowing foreign banking entities to obtain financing of covered fund transactions from U.S.-dealer affiliates may reduce costs of foreign banking entity activity in covered funds. The amendment may decrease the need for foreign banking entities to rely on foreign dealer affiliates solely for the purposes of avoiding the compliance costs and prohibitions of the 2013 final rule. This may increase operational efficiency of covered fund activity by foreign banking entities. To the extent that costs of compliance with the foreign fund exemption may currently represent barriers to entry for foreign banking entities' covered fund activities, the proposed amendment may increase foreign banking entities' sponsorship and financing of covered funds.

The economic exposure and risks of foreign banking entities' covered funds activities may be incurred not just by the foreign banking entities, but by U.S. entities financing the covered fund ownership interests, *e.g.,* through margin loans covering particular transactions. However, the proposal retains the requirement that the investment or sponsorship, including any related hedging, is not accounted for as principal by any U.S. branch or affiliate. We continue to note that moral hazard risks and concerns about the volume of U.S. banking entity risk-taking are less relevant when the covered fund activity is conducted by,

[398] *See* 2013 final rule § ____.14(a).

[399] *See* 2013 final rule § ____.14(c).

[400] The Agencies also are requesting comment as to whether the definition of ''prime brokerage transaction'' under the proposal is appropriate and, if not, what definition would be appropriate and which transactions should be included in the definition. The costs, benefits, and other implications of expansions to the definition of ''prime brokerage transaction'' would generally be similar to those associated with the potential changes to § ____.14 discussed in this section, except that they likely would be less significant because the statute permits prime brokerage transactions only with second-tier funds and does not extend to covered funds more generally.

[401] We understand that market participants have adjusted their activity in reliance on the FAQs regarding the marketing restriction. Hence, we preliminarily believe that the economic effects of the proposed amendment to reflect the position expressed in the staffs' FAQs are likely to be de minimis and we focus this discussion on the proposed removal of the financing prong.

and the risk consolidates to, foreign banking entities.

Competitive effects of this amendment may differ from the proposed amendment regarding trading activity outside of the United States. Under the proposed amendment to the foreign fund exemption, foreign banking entities will enjoy a greater degree of flexibility and potentially lower costs of financing covered fund transactions outside of the United States. Because the 2013 final rule's exemption for covered funds activities solely outside of the United States is available only to foreign banking entities, the proposed amendments may reduce costs for some foreign banking entities but need not affect the competitive standing of U.S. banking entities relative to foreign banking entities with respect to covered funds activities in the United States.

h. Definition of Banking Entity

As discussed elsewhere in this Supplementary Information, staffs of the Agencies have responded to questions raised regarding the potential treatment of RICs as banking entities as a result of a sponsor's seed investment, as well as issues related to FPFs and foreign excluded funds. The Agencies are continuing to consider the issues raised by the interaction between the 2013 final rule's definitions of the terms ''banking entity'' and ''covered fund,'' including the issues addressed by the Agencies' staffs and the Federal banking agencies discussed above. Accordingly, the Agencies have made clear that nothing in the proposal would modify the application of the staffs' FAQs discussed above, and the Agencies will not treat RICs or FPFs that meet the conditions included in the applicable staff FAQs as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the FAQs. In addition, to accommodate the pendency of the proposal, for an additional period of one year until July 21, 2019, the Agencies will not treat qualifying foreign excluded funds that meet the conditions included in the policy statement discussed above as banking entities or attribute their activities and investments to the banking entity that sponsors the fund or otherwise may control the fund under the circumstances set forth in the policy statement. This section focuses on the seeding of RICs, because they are registered with the SEC (and applies to BDCs as well, which are regulated by the SEC). To the extent that the same considerations generally apply to the seeding of FPFs, the analysis below may be relevant for the seeding of these funds as well.[402]

The FAQ issued by the staffs related to seeding RICs and FPFs observed that the preamble to the 2013 final rule recognized that a banking entity may own a significant portion of the shares of a RIC or FPF during a brief period during which the banking entity is testing the fund's investment strategy, establishing a track record of the fund's performance for marketing purposes, and attempting to distribute the fund's shares. The FAQ recognizes that the length of a seeding period can vary and therefore provides an example of 3 years, the maximum period of time that could be permitted under certain conditions for seeding a covered fund under the 2013 final rule, without setting any maximum prescribed period for a RIC or FPF seeding period. The Agencies are seeking comment on whether this guidance has been effective, including questions as to whether the Agencies should specify a maximum period of time for a seeding period or, conversely, whether the current approach of not prescribing a fixed period of time for a seeding period is more effective in providing flexibility for funds that may need more time to develop a track record without having to specify a particular time period that will be appropriate for all funds.

The SEC understands that RICs (and FPFs) commonly require some time to establish a performance track necessary to market the fund effectively to third-party investors. Some funds will need a 3-year performance track record, and sometimes longer, to be distributed through certain intermediaries or to attract sufficient investor interest. For example, the SEC understands that some funds might need a 5-year track record to be distributed effectively.

On the one hand, providing a fixed period of time beyond which a seeding period for a RIC cannot extend would provide banking entities with greater certainty, which may incentivize banking entities to form new funds. On the other hand, the current approach of not prescribing a fixed period of time for a seeding period for a RIC may provide flexibility for funds that need more time to develop a track record. This approach would recognize that banking entities may be able to quickly reduce a seed investment in some RICs but not in others. However, the lack of certainty about the length of permissible seeding period could disincentivize a banking entity from sponsoring a RIC.

Another potential approach, on which the Agencies seek comment, would be to specify a fixed period of time for a seeding period while also permitting a banking entity to hold an investment beyond this fixed period if the banking entity complies with additional conditions, such as documentation of the business need for the sponsor's continued investment. This may provide benefits by providing more certainty to banking entities, while providing for the ability to exceed a fixed seeding period in appropriate circumstances.

In addition, longer seeding periods for RICs and FPFs extend the period of time during which a banking entity may be subject to the risks associated with the seed investment. We note, however, that RICs are subject to all of the requirements under the Investment Company Act, and the exclusion for FPFs is designed to identify foreign funds that are sufficiently similar to RICs such that it is appropriate to exclude these foreign funds from the covered fund definition. Therefore, although section 13 and the 2013 final rule under certain conditions permit a seeding period of up to 3 years for covered funds (which are not subject to substantive SEC regulation and are the target of section 13's restrictions), longer seeding periods for RICs and FPFs may not raise the same concerns.

i. Compliance Program

i. Regulatory Baseline

The 2013 final rule emphasized the importance of a strong compliance program and sought to tailor the compliance program to the size of banking entities and the size of their trading activity. The Agencies believed it was necessary to balance compliance burdens posed on smaller banking entities with specificity and rigor necessary for large and complex banking organizations facing high compliance risks. As a result, the current compliance regime is progressively

[402] This section does not focus on foreign excluded funds. The information the SEC collects on Form ADV does not allow the SEC to estimate the number of SEC-registered investment advisers that advise foreign excluded funds. For example, Form ADV does not require advisers with a principal office and place of business outside the United States to provide information on Schedule D of Part 1A with respect to any private fund that, during the last fiscal year, was not a U.S. person, was not offered in the United States, and was not beneficially owned by any U.S. person. Because foreign excluded funds are organized and offered outside of the United States by foreign banking entities, however, many foreign excluded funds may be advised by foreign banks or other foreign affiliates or subsidiaries that are not SEC-registered investment advisers. Therefore, we preliminarily believe that the proposal and any further modifications to the 2013 final rule on which the Agencies seek comment would likely primarily impact foreign activities of foreign banking entities and funds outside of the SEC's regulatory oversight.

more stringent with the size of covered activities and/or balance sheet of banking entities.

Under the 2013 final rule, all banking entities with covered activities must develop and maintain a compliance program that is reasonably designed to ensure and monitor compliance with section 13 of the BHC Act and the implementing regulations. The terms, scope, and detail of the compliance program depend on the types, size, scope, and complexity of activities and business structure of the banking entity.[403] Under the 2013 final rule, banking entities with total consolidated assets of less than $10 billion as reported on December 31 of the 2 previous calendar years face a simplified compliance program: Such entities are able to incorporate compliance with the 2013 final rule into their regular compliance policies and procedures by reference, adjusting as appropriate given the entities' activities, size, scope, and complexity.[404]

All other banking entities with covered activities are, at a minimum, required to implement a six-pillar compliance program. The six pillars include: (1) Written policies and procedures reasonably designed to document, describe, monitor and limit proprietary trading and covered fund activities and investments for compliance; (2) a system of internal controls reasonably designed to monitor compliance; (3) a management framework that clearly delineates responsibility and accountability for compliance, including management review of trading limits, strategies, hedging activities, investments, and incentive compensation; (4) independent testing and audit of the effectiveness of the compliance program; (5) training for personnel to effectively implement and enforce the compliance program; and (6) recordkeeping sufficient to demonstrate compliance.[405]

In addition, under the 2013 final rule, banking entities with covered activities that do not qualify as those with modest activity (total consolidated assets in excess of $10 billion) and that either are subject to the reporting requirements of Appendix A or have more than $50 billion in gross consolidated total assets are required to comply with the enhanced minimum standards for compliance programs that are specified in Appendix B of the 2013 final rule.[406] That is, Appendix B scopes in (1) all banking entities with significant trading assets and liabilities; and (2) banking entities with covered activity that have more than $50 billion in gross consolidated total assets, regardless of whether or not these banking entities have significant trading assets and liabilities.

As described in greater detail elsewhere in the Supplementary Information, Appendix B requires the compliance program to (1) be reasonably designed to supervise the permitted trading and covered fund activities and investments, identify and monitor the risks of those activities and potential areas of noncompliance, and prevent prohibited activities and investments; (2) establish and enforce appropriate limits on the covered activities and investments, including limits on the size, scope, complexity, and risks of the individual activities or investments consistent with the requirements of section 13 of the BHC Act and the 2013 final rule; (3) subject the compliance program to periodic independent review and testing and ensure the entity's internal audit, compliance, and internal control functions are effective and independent; (4) make senior management and others accountable for the effective implementation of the compliance program, and ensure that the chief executive officer and board of directors review the program; and (5) facilitate supervision and examination by the Agencies.

Additionally, under the 2013 final rule, any banking entity that has more than $10 billion in total consolidated assets as reported in the previous 2 calendar years shall maintain additional records in relation to covered funds. In particular, a banking entity must document the exclusions or exemptions relied on by each fund sponsored by the banking entity (including all subsidiaries and affiliates) in determining that such fund is not a covered fund, including documentation that supports such determination; for each seeding vehicle that will become a registered investment company or SEC-regulated business development company, a written plan documenting the banking entity's determination that the seeding vehicle will become a registered investment company or SEC-regulated business development company, the period of time during which the vehicle will operate as a seeding vehicle, and the banking entity's plan to market the vehicle to third-party investors and convert it into a registered investment company or SEC-regulated business development company within the time period specified.[407]

The Agencies recognize that the scope and breadth of the compliance obligations impose significant costs on banking entities, which may be particularly impactful for smaller entities. For example, some commenters estimate that banking entities may have added as many as 2,500 pages of policies, procedures, mandates, and controls per institution for the purposes of compliance with the 2013 final rule, which need to be monitored and updated on an ongoing basis.[408] Moreover, some banking entities may spend, on average, more than 10,000 hours on training each year.[409] In terms of ongoing costs, some banking entities may have 15 regularly meeting committees and forums, with as many as 50 participants per institution dedicated to compliance with the 2013 final rule.

The current compliance regime and related burdens may reduce the profitability of covered activities by dealers and investment advisers affiliated with banking entities and may be passed along to customers or clients in the form of reduced provision of services or higher service costs. Moreover, the Agencies recognize that the extensive compliance program under the 2013 final rule may detract resources of banking entities and their compliance departments and supervisors from other routine compliance matters, risk management, and supervision. Finally, prescriptive compliance requirements may not optimally reflect the organizational structures, governance mechanisms, or risk management practices of complex, innovative, and global banking entities.

ii. Costs and Benefits

The proposed amendments are expected to lower compliance burdens in two ways. First, the proposed amendments increase flexibility in complying with the 2013 final rule for banking entities without significant trading assets and liabilities, which may reduce compliance costs for these entities. Second, the proposed amendments streamline the compliance program for large banking entities. To the extent that current requirements are duplicative and maintaining both an enhanced compliance program and regular compliance systems is

[403] *See* 2013 final rule § ____.20(a).

[404] *See* 2013 final rule § ____.20(f). Note that if an entity does not have any covered activities, it is not required to establish a compliance program until it begins to engage in covered activity.

[405] *See* 2013 final rule § ____.20(b).

[406] *See* 2013 final rule § ____.20(c) and Appendix B.

[407] *See* 2013 final rule § ____.20(e).

[408] *See supra* note 18.

[409] *Id.*

inefficient, large entities may benefit from the proposed amendments. Specifically, the proposed amendments introduce four main changes to the compliance program requirements of the 2013 final rule.

First, Group C entities would be subject to presumed compliance with proprietary trading and covered fund prohibitions. Specifically, the rebuttable presumption of compliance would apply to all holding companies with less than $1 billion in combined total of consolidated trading assets and trading liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States). We preliminarily estimate that approximately 42 broker-dealers would be able to avail themselves of the rebuttable presumption and would not have to apply the 2013 final rule's compliance program requirements. The presumed compliance standard proposed for Group C entities may benefit entities with very low levels of trading activity by providing additional compliance flexibility. While this may increase the risks of non-compliance, the proposed amendments do not waive the proprietary trading and covered fund prohibitions of the 2013 final rule for such entities.

Second, the threshold for a simplified compliance program would be based on a banking entity's consolidated trading assets and liabilities instead of its total assets. The Agencies recognize that existing compliance program requirements may burden entities that engage in little covered trading activity but have larger total assets. The proposed amendment may reduce costs for banking entities that have more than $10 billion in total assets but do not have significant trading activity. Since the volume of consolidated trading assets and liabilities is likely less than the size of the firm's balance sheet, this amendment would scope in more holding companies—and consequently SEC-registered dealers and investment advisers affiliated with them—into the simplified compliance program regime.

Third, under the proposed amendments covered fund recordkeeping requirements apply to banking entities with significant trading assets and liabilities, rather than to banking entities with over $10 billion in total assets. As discussed above, the Agencies expect that the covered funds activities of banking entities without significant trading assets and liabilities may generally be smaller in scale and less complex than those of banking entities with significant trading assets and liabilities. Thus, the value of additional documentation requirements for banking entities without significant trading assets and liabilities may be lower. The proposal reflects these considerations and may reduce the costs associated with these covered funds recordkeeping requirements by reducing the number of banking entities subject to these requirements.[410] We note that entities with moderate trading assets and liabilities would still be required to comply with all the covered fund provisions, and the proposal simply eliminates recordkeeping for the purposes of demonstrating compliance. While, in general, the removal of such recordkeeping requirements may reduce the effectiveness of regulatory oversight, we preliminarily believe that SEC oversight of registered dealers and investment advisers of covered funds may not be adversely affected.

Fourth, with an exception for the CEO attestation, the requirements in Appendix B of the 2013 final rule would be removed. The Agencies understand that compliance with Appendix B required entities to develop and administer an enhanced compliance program that may not be tailored to the business model or risks of specific institutions. Further, some banking entities have established as many as 500 controls related to Appendix B obligations, some of which may be duplicating existing policies and procedures designed as part of prudential safety and soundness.[411] The removal of Appendix B requirements will affect all Group A banking entities and Group B and Group C banking entities that have total consolidated assets of $50 billion or more. We estimate that there are 100 broker-dealers that may experience reduced compliance costs as a result of this amendment. The removal of the Appendix B requirements may significantly reduce the number and complexity of the compliance requirements such entities are subject to. Given the size of affected holding companies, a stringent compliance regime may reduce compliance risks related to the substantive prohibition of the 2013 final rule. However, Group A and Group B entities will continue to be required to establish and maintain a compliance program under § ____.20.

Finally, the proposed amendment would require all Group A and Group B entities to comply with the CEO attestation requirement. Under the 2013 final rule, banking entities with $50 billion or more in total consolidated assets, banking entities with over $10 billion in consolidated trading assets and liabilities, and those banking entities that an Agency has notified in writing are subject to the CEO attestation requirement.[412] We estimate that currently as many as 100 banking entity broker-dealers are required to comply with the CEO attestation requirement. Based on the counts in Table 2, we estimate that the proposed amendment will reduce this number to approximately 96 entities. However, we recognize that entities have flexibility to comply with the attestation requirement, including providing it at the SEC-registrant or at the holding-company level. For example, in 2017 the SEC received a total of 57 attestations, including those from registrants and holding companies. While the proposed amendment may slightly decrease the number of affected broker-dealers because of this flexibility in compliance, the effects on compliance burdens for SEC registrants, if any, are unclear.

As an alternative, the Agencies could have proposed amending the 2013 final rule by requiring CEO attestations for all Group A entities only if they have over $50 billion in total assets; removing the CEO attestation requirement; or allowing other senior officers, such as the chief compliance officer (CCO), to provide the requisite attestation for some or all affected banking entities. The Agencies recognize that the CEO attestation process is costly and that some banking entities may spend more than 1,700 hours on the CEO attestation process and that the elimination of this requirement may reduce time dedicated towards the compliance program by as much as 10%.[413] The Agencies also recognize that allowing other senior officers to provide the attestation would provide beneficial flexibility to banking entities with different business models, organizational structures, delegation of duties, and internal reporting and oversight lines. In addition, as the

[410] We do not have the information necessary to quantify the current costs of compliance programs specific to banking entity RIAs. Thus, we do not allocate cost savings from monetized PRA burdens to banking entity RIAs from the proposed Appendix B amendments. To the degree that some banking entity RIAs may be complying using compliance resources and systems independent of the affiliated holding company or affiliates and subsidiaries, we may be underestimating the cost savings from the proposed amendments.

[411] *See supra* note 18.

[412] As a baseline matter, the CEO is currently required to annually attest that the banking entity has in place processes to establish, maintain, enforce, review, test, and modify the compliance program established pursuant to Appendix B in a manner reasonably designed to achieve compliance with section 13 of the BHC Act and the 2013 final rule.

[413] *See supra* note 18.

Agencies have discussed in other contexts,[414] certification and attestation requirements may increase CEO liability when the CEO executes the required attestation. If CEOs of banking entities are risk averse, they may require additional liability insurance, higher compensation or lower incentive pay as a fraction of overall compensation. However, liability related to the attestation may also serve as a disciplining mechanism by incentivizing compliance and may reduce risk-taking by banking entities. We also note that the covered activities of larger and more complex banking entities with higher volumes of trading activity may involve more significant moral hazard and conflicts of interest.

The Agencies also recognize that CEO attestation may be costly for foreign banking entities. For example, one foreign firm reported that it organizes and manages a global controls sub-certification process that takes 6 months to complete and involves over 400 staff (including over 260 outside the United States) in order for the CEO to sign and deliver the annual attestation.[415] As an alternative, the Agencies could have proposed exempting foreign banking entities from the CEO attestation requirement. Currently, the requirement covers only the U.S. operations of a foreign banking entity and not its foreign operations. Similar to the analysis of the proposed amendment to trading outside the United States, this alternative may decrease compliance costs and increase trading activity by foreign banking entities in the United States, but result in losses in market share and profitability for U.S. banking entities that would remain subject to the attestation requirement and would be placed at a competitive disadvantage as a result.

As can be seen from section V.B, the Agencies do not estimate any recordkeeping or reporting burden reductions related to compliance requirements in § ____.20(b) of the final rule. The proposed removal of Appendix B requirements will result in ongoing annual cost savings estimated as $8,098,200 for registered broker-dealers and as up to $2,753,388 for entities that may choose to register as SBSDs.[416] In addition, the removal of Appendix B requirements may result in initial cost savings estimated as $24,294,600 for registered broker-dealers, and up to $8,260,164 for entities that may choose to register as SBSDs.[417] As can be seen from section V.B, the Agencies do not estimate any recordkeeping or reporting burden reductions related to proposed presumed compliance amendment in § ____.20(f)(2) of the final rule.

iii. Competition, Efficiency, and Capital Formation

Under the proposed amendments, both Group A and Group B entities will enjoy reduced compliance program requirements and Group C will be presumed compliant with prohibitions of sections B and C of the proposed rule. To the extent that compliance program requirements for Group B entities are less costly, Group A entities close to the threshold may choose to manage down their trading book such that they would qualify for the simplified compliance program, resulting in more competition among entities that are close to the threshold. Similarly, the proposed amendment may incentivize Group B entities close to the threshold to rebalance their trading book and qualify for the presumed compliance treatment of Group C entities. Such management of the trading book may reduce the risk of each individual banking entity and may decrease moral hazard addressed by the 2013 final rule. We note that entities are likely to weigh potential cost savings related to lighter compliance requirements for Group B and Group C entities against the costs of reducing trading activity below the $10 billion and $1 billion thresholds. Therefore, this competition effect may be particularly significant for Group A entities that are close to the $10 billion threshold and for Group B entities that are close to the $1 billion threshold.

Since the compliance requirements do not impact the scope of information available to investors, we do not anticipate effects on informational efficiency to be significant. To the extent that some dealers are experiencing large compliance costs and partially or fully passing them along to customers in the form of reduced access to capital or higher cost of capital, the amendment may reduce costs of and increase access to capital.

4. Request for Comment

The SEC is requesting comment regarding the economic analysis set forth here. To the extent possible, the SEC requests that market participants and other commenters provide supporting data and analysis with respect to the benefits, costs, and effects on competition, efficiency, and capital formation of adopting the proposed amendments or any reasonable alternatives. In addition, the SEC asks commenters to consider the following questions:

Question SEC–1. What additional qualitative or quantitative information should the SEC consider as part of the baseline for its economic analysis of the proposed amendments?

Question SEC–2. What additional considerations can the SEC use to estimate the costs and benefits of implementing the proposed amendments for SEC-regulated banking entities?

Question SEC–3. Is it likely that certain cost savings associated with the proposed rule will not be recognized by SEC-regulated banking entities because of the nature of their activities or because of new costs the proposal would impose on these activities? Why or why not? Are there other benefits or costs associated with the proposed rule that will impact SEC-regulated banking entities differently than other types of banking entities?

Question SEC–4. Has the SEC considered all relevant aspects of the proposed amendments? Are the estimated costs of the proposed rule for SEC-regulated banking entities reasonable? If not, please explain in detail why the cost estimates should be higher or lower than those provided. Have we accurately described the benefits of the proposed rule? Why or why not? Please identify any other benefits associated with the proposed rule in detail. Please identify any costs associated with the proposed rule that we have not identified.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

12 CFR Chapter I

Authority and Issuance

For the reasons stated in the Common Preamble, the Office of the Comptroller of the Currency proposes to amend chapter I of Title 12, Code of Federal Regulations as follows:

PART 44—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS

■ 1. The authority citation for part 44 continues to read as follows:

Authority: 7 U.S.C. 27 *et seq.,* 12 U.S.C. 1, 24, 92a, 93a, 161, 1461, 1462a, 1463, 1464, 1467a, 1813(q), 1818, 1851, 3101, 3102, 3108, 5412.

■ 2. Section 44.2 is revised to read as follows:

§ 44.2 Definitions.

Unless otherwise specified, for purposes of this part:

(a) *Affiliate* has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(k)).

(b) *Applicable accounting standards* means U.S. generally accepted accounting principles, or such other accounting standards applicable to a banking entity that the OCC determines are appropriate and that the banking entity uses in the ordinary course of its business in preparing its consolidated financial statements.

(c) *Bank holding company* has the same meaning as in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).

(d) *Banking entity.* (1) Except as provided in paragraph (d)(2) of this section, *banking entity* means:

(i) Any insured depository institution;

(ii) Any company that controls an insured depository institution;

(iii) Any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and

(iv) Any affiliate or subsidiary of any entity described in paragraphs (d)(1)(i), (ii), or (iii) of this section.

(2) Banking entity does not include:

(i) A covered fund that is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section;

(ii) A portfolio company held under the authority contained in section 4(k)(4)(H) or (I) of the BHC Act (12 U.S.C. 1843(k)(4)(H), (I)), or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958 (15 U.S.C. 662), so long as the portfolio company or portfolio concern is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section; or

(iii) The FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(e) *Board* means the Board of Governors of the Federal Reserve System.

(f) *CFTC* means the Commodity Futures Trading Commission.

(g) *Dealer* has the same meaning as in section 3(a)(5) of the Exchange Act (15 U.S.C. 78c(a)(5)).

(h) *Depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)).

(i) *Derivative.* (1) Except as provided in paragraph (i)(2) of this section, *derivative* means:

(i) Any swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68));

(ii) Any purchase or sale of a commodity, that is not an excluded commodity, for deferred shipment or delivery that is intended to be physically settled;

(iii) Any foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)) or foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25));

(iv) Any agreement, contract, or transaction in foreign currency described in section 2(c)(2)(C)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(C)(i));

(v) Any agreement, contract, or transaction in a commodity other than foreign currency described in section 2(c)(2)(D)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(D)(i)); and

(vi) Any transaction authorized under section 19 of the Commodity Exchange Act (7 U.S.C. 23(a) or (b));

(2) A derivative does not include:

(i) Any consumer, commercial, or other agreement, contract, or transaction that the CFTC and SEC have further defined by joint regulation, interpretation, guidance, or other action as not within the definition of swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68)); or

(ii) Any identified banking product, as defined in section 402(b) of the Legal Certainty for Bank Products Act of 2000 (7 U.S.C. 27(b)), that is subject to section 403(a) of that Act (7 U.S.C. 27a(a)).

(j) *Employee* includes a member of the immediate family of the employee.

(k) *Exchange Act* means the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(l) *Excluded commodity* has the same meaning as in section 1a(19) of the Commodity Exchange Act (7 U.S.C. 1a(19)).

(m) *FDIC* means the Federal Deposit Insurance Corporation.

(n) *Federal banking agencies* means the Board, the Office of the Comptroller of the Currency, and the FDIC.

(o) *Foreign banking organization* has the same meaning as in section 211.21(o) of the Board's Regulation K (12 CFR 211.21(o)), but does not include a foreign bank, as defined in section 1(b)(7) of the International Banking Act of 1978 (12 U.S.C. 3101(7)), that is organized under the laws of the Commonwealth of Puerto Rico, Guam, American Samoa, the United States

Virgin Islands, or the Commonwealth of the Northern Mariana Islands.

(p) *Foreign insurance regulator* means the insurance commissioner, or a similar official or agency, of any country other than the United States that is engaged in the supervision of insurance companies under foreign insurance law.

(q) *General account* means all of the assets of an insurance company except those allocated to one or more separate accounts.

(r) *Insurance company* means a company that is organized as an insurance company, primarily and predominantly engaged in writing insurance or reinsuring risks underwritten by insurance companies, subject to supervision as such by a state insurance regulator or a foreign insurance regulator, and not operated for the purpose of evading the provisions of section 13 of the BHC Act (12 U.S.C. 1851).

(s) *Insured depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)), but does not include an insured depository institution that is described in section 2(c)(2)(D) of the BHC Act (12 U.S.C. 1841(c)(2)(D)).

(t) *Limited trading assets and liabilities* means, with respect to a banking entity, that:

(1) The banking entity has, together with its affiliates and subsidiaries on a worldwide consolidated basis, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1,000,000,000; and

(2) The OCC has not determined pursuant to § 44.20(g) or (h) of this part that the banking entity should not be treated as having limited trading assets and liabilities.

(u) *Loan* means any loan, lease, extension of credit, or secured or unsecured receivable that is not a security or derivative.

(v) *Moderate trading assets and liabilities* means, with respect to a banking entity, that the banking entity does not have significant trading assets and liabilities or limited trading assets and liabilities.

(w) *Primary financial regulatory agency* has the same meaning as in section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)).

(x) *Purchase* includes any contract to buy, purchase, or otherwise acquire. For security futures products, purchase includes any contract, agreement, or transaction for future delivery. With respect to a commodity future, purchase includes any contract, agreement, or transaction for future delivery. With respect to a derivative, purchase includes the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(y) *Qualifying foreign banking organization* means a foreign banking organization that qualifies as such under section 211.23(a), (c) or (e) of the Board's Regulation K (12 CFR 211.23(a), (c), or (e)).

(z) *SEC* means the Securities and Exchange Commission.

(aa) *Sale* and *sell* each include any contract to sell or otherwise dispose of. For security futures products, such terms include any contract, agreement, or transaction for future delivery. With respect to a commodity future, such terms include any contract, agreement, or transaction for future delivery. With respect to a derivative, such terms include the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(bb) *Security* has the meaning specified in section 3(a)(10) of the Exchange Act (15 U.S.C. 78c(a)(10)).

(cc) *Security-based swap dealer* has the same meaning as in section 3(a)(71) of the Exchange Act (15 U.S.C. 78c(a)(71)).

(dd) *Security future* has the meaning specified in section 3(a)(55) of the Exchange Act (15 U.S.C. 78c(a)(55)).

(ee) *Separate account* means an account established and maintained by an insurance company in connection with one or more insurance contracts to hold assets that are legally segregated from the insurance company's other assets, under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.

(ff) *Significant trading assets and liabilities.*—(1) *Significant trading assets and liabilities* means, with respect to a banking entity, that:

(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10,000,000,000; or

(ii) The OCC has determined pursuant to § 44.20(h) of this part that the banking entity should be treated as having significant trading assets and liabilities.

(2) With respect to a banking entity other than a banking entity described in paragraph (3), trading assets and liabilities for purposes of this paragraph (ff) means trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (ff) means the trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

(ii) For purposes of paragraph (ff)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary.

(gg) *State* means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(hh) *Subsidiary* has the same meaning as in section 2(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(d)).

(ii) *State insurance regulator* means the insurance commissioner, or a similar official or agency, of a State that is engaged in the supervision of insurance companies under State insurance law.

(jj) *Swap dealer* has the same meaning as in section 1(a)(49) of the Commodity Exchange Act (7 U.S.C. 1a(49)).

■ 3. Section 44.3 is amended by:

■ a. Revising paragraph (b);

■ b. Redesignating paragraphs (c) through (e) as paragraphs (d) through (f);

■ c. Adding a new paragraph (c);

■ d. Revising paragraph (e)(3) and adding paragraph (e)(10);
■ e. Redesignating paragraphs (f)(5) through (f)(13) as paragraphs (f)(6) through (f)(14) and adding new paragraph (f)(5); and
■ f. Adding paragraph (g).

The revisions and additions read as follows:

§ 44.3 Prohibition on proprietary trading.

* * * * *

(b) *Definition of trading account. Trading account* means any account that is used by a banking entity to:

(1)(i) Purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule; or

(ii) With respect to a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, purchase or sell one or more financial instruments that are subject to capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended from time to time.

(2) Purchase or sell one or more financial instruments for any purpose, if the banking entity:

(i) Is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or

(ii) Is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business; or

(3) Purchase or sell one or more financial instruments, with respect to a financial instrument that is recorded at fair value on a recurring basis under applicable accounting standards.

(c) *Presumption of compliance.* (1)(i) Each trading desk that does not purchase or sell financial instruments for a trading account defined in paragraphs (b)(1) or (b)(2) of this section may calculate the net gain or net loss on the trading desk's portfolio of financial instruments each business day, reflecting realized and unrealized gains and losses since the previous business day, based on the banking entity's fair value for such financial instruments.

(ii) If the sum of the absolute values of the daily net gain and loss figures determined in accordance with paragraph (c)(1)(i) of this section for the preceding 90-calendar-day period does not exceed $25 million, the activities of the trading desk shall be presumed to be in compliance with the prohibition in paragraph (a) of this section.

(2) The OCC may rebut the presumption of compliance in paragraph (c)(1)(ii) of this section by providing written notice to the banking entity that the OCC has determined that one or more of the banking entity's activities violates the prohibitions under subpart B.

(3) If a trading desk operating pursuant to paragraph (c)(1)(ii) of this section exceeds the $25 million threshold in that paragraph at any point, the banking entity shall, in accordance with any policies and procedures adopted by the OCC:

(i) Promptly notify the OCC;

(ii) Demonstrate that the trading desk's purchases and sales of financial instruments comply with subpart B; and

(iii) Demonstrate, with respect to the trading desk, how the banking entity will maintain compliance with subpart B on an ongoing basis.

* * * * *

(e) * * *

(3) Any purchase or sale of a security, foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or physically-settled cross-currency swap, by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that, with respect to such financial instruments:

(i) Specifically contemplates and authorizes the particular financial instruments to be used for liquidity management purposes, the amount, types, and risks of these financial instruments that are consistent with liquidity management, and the liquidity circumstances in which the particular financial instruments may or must be used;

(ii) Requires that any purchase or sale of financial instruments contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes;

(iii) Requires that any financial instruments purchased or sold for liquidity management purposes be highly liquid and limited to financial instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements;

(iv) Limits any financial instruments purchased or sold for liquidity management purposes, together with any other instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan;

(v) Includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of financial instruments that are not permitted under §§ 44.6(a) or (b) of this subpart are for the purpose of liquidity management and in accordance with the liquidity management plan described in paragraph (e)(3) of this section; and

(vi) Is consistent with the OCC's supervisory requirements, guidance, and expectations regarding liquidity management;

* * * * *

(10) Any purchase (or sale) of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or excluded activity or is a subsequent transaction to correct such an error, and the erroneously purchased (or sold) financial instrument is promptly transferred to a separately-managed trade error account for disposition.

(f) * * *

(5) *Cross-currency swap* means a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into.

* * * * *

(g) *Reservation of Authority:* (1) The OCC may determine, on a case-by-case basis, that a purchase or sale of one or more financial instruments by a banking entity either is or is not for the trading account as defined at 12 U.S.C. 1851(h)(6).

(2) *Notice and Response Procedures.*—(i) *Notice.* When the OCC determines that the purchase or sale of one or more financial instruments is for the trading account under paragraph (g)(1) of this section, the OCC will notify the banking entity in writing of the determination and provide an explanation of the determination.

(ii) *Response.* (A) The banking entity may respond to any or all items in the notice. The response should include any matters that the banking entity would have the OCC consider in deciding whether the purchase or sale is for the trading account. The response must be in writing and delivered to the designated OCC official within 30 days after the date on which the banking entity received the notice. The OCC may shorten the time period when, in the opinion of the OCC, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the OCC may extend the time period for good cause.

(B) Failure to respond within 30 days or such other time period as may be specified by the OCC shall constitute a waiver of any objections to the OCC's determination.

(iii) After the close of banking entity's response period, the OCC will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the OCC's determination that the purchase or sale of one or more financial instruments is for the trading account. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

■ 4. Section 44.4 is amended by:
■ a. Revising paragraph (a)(2);
■ b. Adding paragraph (a)(8);
■ c. Revising paragraph (b)(2);
■ d. Revising the introductory text of paragraph (b)(3)(i);
■ e. In paragraph (b)(5) removing "*inventory*" wherever it appears and adding "*positions*" in its place; and
■ f. Adding a new paragraph (b)(6).

The revisions and additions read as follows:

§ 44.4 Permitted underwriting and market making-related activities.

(a) * * *

(2) *Requirements.* The underwriting activities of a banking entity are permitted under paragraph (a)(1) of this section only if:

(i) The banking entity is acting as an underwriter for a distribution of securities and the trading desk's underwriting position is related to such distribution;

(ii) (A) The amount and type of the securities in the trading desk's underwriting position are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant type of security, and

(B) Reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (a) of this section, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with paragraph (a)(8)(i) of this section;

(C) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(D) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

(iv) The compensation arrangements of persons performing the activities described in this paragraph (a) are designed not to reward or incentivize prohibited proprietary trading; and

(v) The banking entity is licensed or registered to engage in the activity described in this paragraph (a) in accordance with applicable law.

* * * * *

(8) *Rebuttable presumption of compliance.*—(i) *Risk limits.* (A) A banking entity shall be presumed to meet the requirements of paragraph (a)(2)(ii)(A) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (a)(8)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (8)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(*1*) Amount, types, and risk of its underwriting position;

(*2*) Level of exposures to relevant risk factors arising from its underwriting position; and

(*3*) Period of time a security may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (a)(8)(i) of this section shall be subject to supervisory review and oversight by the OCC on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (a)(8)(i) of this section, a banking entity shall promptly report to the OCC (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the OCC.

(iv) *Rebutting the presumption.* The presumption in paragraph (a)(8)(i) of this section may be rebutted by the OCC if the OCC determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The OCC will provide notice of any such determination to the banking entity in writing.

(b) * * *

(2) *Requirements.* The market making-related activities of a banking entity are permitted under paragraph (b)(1) of this section only if:

(i) The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(ii) The trading desk's market-making related activities are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on the liquidity, maturity, and depth of the market for the relevant types of financial instrument(s).

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (b) of this section, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with paragraph (b)(2)(i) of this section;

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C) of this section; the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with paragraph (b)(6)(i) of this section;

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(E) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis that the basis for any temporary or permanent increase to a trading desk's limit(s) is consistent with the requirements of this paragraph (b), and independent review of such demonstrable analysis and approval;

(iv) In the case of a banking entity with significant trading assets and liabilities, to the extent that any limit identified pursuant to paragraph (b)(2)(iii)(C) of this section is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;

(v) The compensation arrangements of persons performing the activities described in this paragraph (b) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in activity described in this paragraph (b) in accordance with applicable law.

(3) * * *

(i) A trading desk or other organizational unit of another banking entity is not a client, customer, or counterparty of the trading desk if that other entity has trading assets and liabilities of $50 billion or more as measured in accordance with the methodology described in definition of ''significant trading assets and liabilities'' contained in § 44.2 of this part, unless:

* * * * *

(6) *Rebuttable presumption of compliance.*

(i) *Risk limits.*

(A) A banking entity shall be presumed to meet the requirements of paragraph (b)(2)(ii) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (b)(6)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (6)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market making-related activities, on the:

(*1*) Amount, types, and risks of its market-maker positions;

(*2*) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(*3*) Level of exposures to relevant risk factors arising from its financial exposure; and

(*4*) Period of time a financial instrument may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (b)(6)(i) of this section shall be subject to supervisory review and oversight by the OCC on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (b)(6)(i) of this section, a banking entity shall promptly report to the OCC (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the OCC.

(iv) *Rebutting the presumption.* The presumption in paragraph (b)(6)(i) of this section may be rebutted by the OCC if the OCC determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The OCC will provide notice of any such determination to the banking entity in writing.

■ 5. Section 44.5 is amended by revising paragraphs (b) and (c)(1) introductory text and adding paragraph (c)(4) to read as follows:

§ 44.5 Permitted risk-mitigating hedging activities.

* * * * *

(b) *Requirements.*

(1) The risk-mitigating hedging activities of a banking entity that has significant trading assets and liabilities are permitted under paragraph (a) of this section only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures regarding the positions, techniques and strategies that may be used for hedging, including documentation indicating what positions, contracts or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts or other holdings;

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(C) The conduct of analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged;

(ii) The risk-mitigating hedging activity:

(A) Is conducted in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section;

(D) Is subject to continuing review, monitoring and management by the banking entity that:

(*1*) Is consistent with the written hedging policies and procedures required under paragraph (b)(1)(i) of this section;

(*2*) Is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging activities undertaken under this section and the underlying positions, contracts, and other holdings of the banking entity, based upon the facts and circumstances of the underlying and hedging positions, contracts and other holdings of the banking entity and the risks and liquidity thereof; and

(*3*) Requires ongoing recalibration of the hedging activity by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(1)(ii) of this section and is not prohibited proprietary trading; and

(iii) The compensation arrangements of persons performing risk-mitigating hedging activities are designed not to reward or incentivize prohibited proprietary trading.

(2) The risk-mitigating hedging activities of a banking entity that does not have significant trading assets and liabilities are permitted under paragraph (a) of this section only if the risk-mitigating hedging activity:

(i) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and

(ii) Is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(2) of this section and is not prohibited proprietary trading.

(c) * * * (1) A banking entity that has significant trading assets and liabilities must comply with the requirements of paragraphs (c)(2) and (3) of this section, unless the requirements of paragraph (c)(4) of this section are met, with respect to any purchase or sale of financial instruments made in reliance on this section for risk-mitigating hedging purposes that is:

* * * * *

(4) The requirements of paragraphs (c)(2) and (3) of this section do not apply to the purchase or sale of a financial instrument described in paragraph (c)(1) of this section if:

(i) The financial instrument purchased or sold is identified on a written list of pre-approved financial instruments that are commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold; and

(ii) At the time the financial instrument is purchased or sold, the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The hedging limits shall be appropriate for the:

(A) Size, types, and risks of the hedging activities commonly undertaken by the trading desk;

(B) Financial instruments purchased and sold for hedging activities by the trading desk; and

(C) Levels and duration of the risk exposures being hedged.

■ 6. Section 44.6 is amended by revising paragraph (e)(3) and removing paragraph (e)(6) to read as follows:

§ 44.6 Other permitted proprietary trading activities.

* * * * *

(e) * * *

(3) A purchase or sale by a banking entity is permitted for purposes of this paragraph (e) if:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

§ 44.10 [Amended]

■ 7. Section 44.10 is amended by:

■ a. In paragraph (c)(8)(i)(A) removing ''§ 44.2(s)'' and adding ''§ 44.2(u)'' in its place;

■ b. Removing paragraph (d)(1);

■ c. Redesignating paragraphs (d)(2) through (d)(10) as paragraphs (d)(1) through (d)(9);

■ d. In paragraph (d)(5)(i)(G) revising the reference to ''(d)(6)(i)(A)'' to read ''(d)(5)(i)(A)''; and

■ e. In paragraph (d)(9) revising the reference to ''(d)(9)'' to read ''(d)(8)'' and the reference to ''(d)(10)(i)(A)'' to read ''(d)(9)(i)(A)'' and the reference to ''(d)(10)(i)'' to read ''(d)(9)(i)''.

■ 8. Section 44.11 is amended by revising paragraph (c) as follows:

§ 44.11 Permitted organizing and offering, underwriting, and market making with respect to a covered fund.

* * * * *

(c) *Underwriting and market making in ownership interests of a covered fund.* The prohibition contained in § 44.10(a) of this subpart does not apply to a banking entity's underwriting activities or market making-related activities involving a covered fund so long as:

(1) Those activities are conducted in accordance with the requirements of § 44.4(a) or § 44.4(b) of subpart B, respectively; and

(2) With respect to any banking entity (or any affiliate thereof) that: Acts as a sponsor, investment adviser or commodity trading advisor to a particular covered fund or otherwise acquires and retains an ownership interest in such covered fund in reliance on paragraph (a) of this section; or acquires and retains an ownership interest in such covered fund and is

either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act (15 U.S.C. 78*o*–11(a)(3)), or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act (15 U.S.C.78*o*–11) and the implementing regulations issued thereunder each as permitted by paragraph (b) of this section, then in each such case any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making related activities for that particular covered fund are included in the calculation of ownership interests permitted to be held by the banking entity and its affiliates under the limitations of § 44.12(a)(2)(ii); § 44.12(a)(2)(iii), and § 44.12(d) of this subpart.

§ 44.12 [Amended]

■ 9. Section 44.12 is amended by:

■ a. In paragraphs (c)(1) and (d) removing ''§ 44.10(d)(6)(ii)'' and adding ''§ 44.10(d)(5)(ii)'' in its place;

■ b. Removing paragraph (e)(2)(vii); and

■ c. Redesignating the second instance of paragraph (e)(2)(vi) as paragraph (e)(2)(vii).

■ 10. Section 44.13 is amended by revising paragraphs (a) and (b)(3) and removing paragraph (b)(4)(iv) to read as follows:

§ 44.13 Other permitted covered fund activities and investments.

(a) *Permitted risk-mitigating hedging activities.* (1) The prohibition contained in § 44.10(a) of this subpart does not apply with respect to an ownership interest in a covered fund acquired or retained by a banking entity that is designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with:

(i) A compensation arrangement with an employee of the banking entity or an affiliate thereof that directly provides investment advisory, commodity trading advisory or other services to the covered fund; or

(ii) A position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.

(2) *Requirements.* The risk-mitigating hedging activities of a banking entity are permitted under this paragraph (a) only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program in accordance with subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures; and

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(ii) The acquisition or retention of the ownership interest:

(A) Is made in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedge, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising:

(*1*) Out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund; or

(*2*) In connection with the compensation arrangement with the employee that directly provides investment advisory, commodity trading advisory, or other services to the covered fund;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section; and

(D) Is subject to continuing review, monitoring and management by the banking entity.

(iii) With respect to risk-mitigating hedging activity conducted pursuant to paragraph (a)(1)(i), the compensation arrangement relates solely to the covered fund in which the banking entity or any affiliate has acquired an ownership interest pursuant to paragraph (a)(1)(i) and such compensation arrangement provides that any losses incurred by the banking entity on such ownership interest will be offset by corresponding decreases in amounts payable under such compensation arrangement.

(b) * * *

(3) An ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of paragraph (b)(1)(iii) of this section only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of this paragraph (b)(3) to participate in any offer or sale by the covered fund of ownership interests in the covered fund.

* * * * *

■ 11. Section 44.14 is amended by revising paragraph (a)(2)(ii)(B) as follows:

§ 44.14 Limitations on relationships with a covered fund.

(a) * * *

(2) * * *

(ii) * * *

(B) The chief executive officer (or equivalent officer) of the banking entity certifies in writing annually no later than March 31 to the OCC (with a duty to update the certification if the information in the certification materially changes) that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and

* * * * *

■ 12. Section 44.20 is amended by:

■ a. Revising paragraph (a);

■ b. Revising the introductory text of paragraph (b);

■ c. Revising paragraph (c);

■ d. Revising paragraph (d);

■ e. Revising the introductory text of paragraph (e);

■ f. Revising paragraph (f)(2); and

■ g. Adding new paragraphs (g) and (h).

The revisions read as follows:

§ 44.20 Program for compliance; reporting.

(a) *Program requirement.* Each banking entity (other than a banking entity with limited trading assets and liabilities) shall develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and this part. The terms, scope, and detail of the compliance program shall be appropriate for the types, size, scope, and complexity of activities and business structure of the banking entity.

(b) *Banking entities with significant trading assets and liabilities.* With respect to a banking entity with significant trading assets and liabilities, the compliance program required by paragraph (a) of this section, at a minimum, shall include:

* * * * *

(c) *CEO attestation.*

(1) The CEO of a banking entity described in paragraph (2) must, based on a review by the CEO of the banking entity, attest in writing to the OCC, each year no later than March 31, that the banking entity has in place processes

reasonably designed to achieve compliance with section 13 of the BHC Act and this part. In the case of a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

(2) The requirements of paragraph (c)(1) apply to a banking entity if:

(i) The banking entity does not have limited trading assets and liabilities; or

(ii) The OCC notifies the banking entity in writing that it must satisfy the requirements contained in paragraph (c)(1).

(d) *Reporting requirements under the Appendix to this part.* (1) A banking entity engaged in proprietary trading activity permitted under subpart B shall comply with the reporting requirements described in the Appendix, if:

(i) The banking entity has significant trading assets and liabilities; or

(ii) The OCC notifies the banking entity in writing that it must satisfy the reporting requirements contained in the Appendix.

(2) Frequency of reporting: Unless the OCC notifies the banking entity in writing that it must report on a different basis, a banking entity with $50 billion or more in trading assets and liabilities (as calculated in accordance with the methodology described in the definition of ‘‘significant trading assets and liabilities’’ contained in § 44.2 of this part of this part) shall report the information required by the Appendix for each calendar month within 20 days of the end of each calendar month. Any other banking entity subject to the Appendix shall report the information required by the Appendix for each calendar quarter within 30 days of the end of that calendar quarter unless the OCC notifies the banking entity in writing that it must report on a different basis.

(e) *Additional documentation for covered funds.* A banking entity with significant trading assets and liabilities shall maintain records that include:

* * * * *

(f) * * *

(2) *Banking entities with moderate trading assets and liabilities.* A banking entity with moderate trading assets and liabilities may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and this part and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.

(g) *Rebuttable presumption of compliance for banking entities with limited trading assets and liabilities.*

(1) *Rebuttable presumption.* Except as otherwise provided in this paragraph, a banking entity with limited trading assets and liabilities shall be presumed to be compliant with subpart B and subpart C and shall have no obligation to demonstrate compliance with this part on an ongoing basis.

(2) *Rebuttal of presumption.* (i) If upon examination or audit, the OCC determines that the banking entity has engaged in proprietary trading or covered fund activities that are otherwise prohibited under subpart B or subpart C, the OCC may require the banking entity to be treated under this part as if it did not have limited trading assets and liabilities.

(ii) Notice and Response Procedures. (A) Notice. The OCC will notify the banking entity in writing of any determination pursuant to paragraph (g)(2)(i) of this section to rebut the presumption described in this paragraph (g) and will provide an explanation of the determination.

(B) Response. (*1*) The banking entity may respond to any or all items in the notice described in paragraph (g)(2)(ii)(A) of this section. The response should include any matters that the banking entity would have the OCC consider in deciding whether the banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The response must be in writing and delivered to the designated OCC official within 30 days after the date on which the banking entity received the notice. The OCC may shorten the time period when, in the opinion of the OCC, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the OCC may extend the time period for good cause.

(*2*) Failure to respond within 30 days or such other time period as may be specified by the OCC shall constitute a waiver of any objections to the OCC's determination.

(C) After the close of banking entity's response period, the OCC will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the OCC's determination that banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

(h) *Reservation of authority.* Notwithstanding any other provision of this part, the OCC retains its authority to require a banking entity without significant trading assets and liabilities to apply any requirements of this part that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the OCC determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion of subpart B or subpart C, does not warrant a presumption of compliance under paragraph (g) of this section or treatment as a banking entity with moderate trading assets and liabilities, as applicable.

■ 13. Remove Appendix A and Appendix B to Part 44 and add Appendix to Part 44—Reporting and Recordkeeping Requirements for Covered Trading Activities

Appendix to Part 44—Reporting and Recordkeeping Requirements for Covered Trading Activities

I. Purpose

a. This appendix sets forth reporting and recordkeeping requirements that certain banking entities must satisfy in connection with the restrictions on proprietary trading set forth in subpart B (‘‘proprietary trading restrictions’’). Pursuant to § 44.20(d), this appendix applies to a banking entity that, together with its affiliates and subsidiaries, has significant trading assets and liabilities. These entities are required to (i) furnish periodic reports to the OCC regarding a variety of quantitative measurements of their covered trading activities, which vary depending on the scope and size of covered trading activities, and (ii) create and maintain records documenting the preparation and content of these reports. The requirements of this appendix must be incorporated into the banking entity's internal compliance program under § 44.20.

b. The purpose of this appendix is to assist banking entities and the OCC in:

(i) Better understanding and evaluating the scope, type, and profile of the banking entity's covered trading activities;

(ii) Monitoring the banking entity's covered trading activities;

(iii) Identifying covered trading activities that warrant further review or examination by the banking entity to verify compliance with the proprietary trading restrictions;

(iv) Evaluating whether the covered trading activities of trading desks engaged in market making-related activities subject to § 44.4(b) are consistent with the requirements governing permitted market making-related activities;

(v) Evaluating whether the covered trading activities of trading desks that are engaged in permitted trading activity subject to §§ 44.4, 44.5, or 44.6(a)–(b) (*i.e.,* underwriting and market making-related related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies;

(vi) Identifying the profile of particular covered trading activities of the banking entity, and the individual trading desks of the banking entity, to help establish the appropriate frequency and scope of examination by the OCC of such activities; and

(vii) Assessing and addressing the risks associated with the banking entity's covered trading activities.

c. Information that must be furnished pursuant to this appendix is *not* intended to serve as a dispositive tool for the identification of permissible or impermissible activities.

d. In addition to the quantitative measurements required in this appendix, a banking entity may need to develop and implement other quantitative measurements in order to effectively monitor its covered trading activities for compliance with section 13 of the BHC Act and this part and to have an effective compliance program, as required by § 44.20. The effectiveness of particular quantitative measurements may differ based on the profile of the banking entity's businesses in general and, more specifically, of the particular trading desk, including types of instruments traded, trading activities and strategies, and history and experience (*e.g.,* whether the trading desk is an established, successful market maker or a new entrant to a competitive market). In all cases, banking entities must ensure that they have robust measures in place to identify and monitor the risks taken in their trading activities, to ensure that the activities are within risk tolerances established by the banking entity, and to monitor and examine for compliance with the proprietary trading restrictions in this part.

e. On an ongoing basis, banking entities must carefully monitor, review, and evaluate all furnished quantitative measurements, as well as any others that they choose to utilize in order to maintain compliance with section 13 of the BHC Act and this part. All measurement results that indicate a heightened risk of impermissible proprietary trading, including with respect to otherwise-permitted activities under §§ 44.4 through 44.6(a)–(b), or that result in a material exposure to high-risk assets or high-risk trading strategies, must be escalated within the banking entity for review, further analysis, explanation to the OCC, and remediation, where appropriate. The quantitative measurements discussed in this appendix should be helpful to banking entities in identifying and managing the risks related to their covered trading activities.

II. Definitions

The terms used in this appendix have the same meanings as set forth in §§ 44.2 and 44.3. In addition, for purposes of this appendix, the following definitions apply:

Applicability identifies the trading desks for which a banking entity is required to calculate and report a particular quantitative measurement based on the type of covered trading activity conducted by the trading desk.

Calculation period means the period of time for which a particular quantitative measurement must be calculated.

Comprehensive profit and loss means the net profit or loss of a trading desk's material sources of trading revenue over a specific period of time, including, for example, any increase or decrease in the market value of a trading desk's holdings, dividend income, and interest income and expense.

Covered trading activity means trading conducted by a trading desk under §§ 44.4, 44.5, 44.6(a), or 44.6(b). A banking entity may include in its covered trading activity trading conducted under §§ 44.3(e), 44.6(c), 44.6(d), or 44.6(e).

Measurement frequency means the frequency with which a particular quantitative metric must be calculated and recorded.

Trading day means a calendar day on which a trading desk is open for trading.

III. Reporting and Recordkeeping

a. Scope of Required Reporting

1. *Quantitative measurements.* Each banking entity made subject to this appendix by § 44.20 must furnish the following quantitative measurements, as applicable, for each trading desk of the banking entity engaged in covered trading activities and calculate these quantitative measurements in accordance with this appendix:

i. Risk and Position Limits and Usage;

ii. Risk Factor Sensitivities;

iii. Value-at-Risk and Stressed Value-at-Risk;

iv Comprehensive Profit and Loss Attribution;

v. Positions;

vi. Transaction Volumes; and

vii. Securities Inventory Aging.

2. *Trading desk information.* Each banking entity made subject to this appendix by § 44.20 must provide certain descriptive information, as further described in this appendix, regarding each trading desk engaged in covered trading activities.

3. *Quantitative measurements identifying information.* Each banking entity made subject to this appendix by § 44.20 must provide certain identifying and descriptive information, as further described in this appendix, regarding its quantitative measurements.

4. *Narrative statement.* Each banking entity made subject to this appendix by § 44.20 must provide a separate narrative statement, as further described in this appendix.

5. *File identifying information.* Each banking entity made subject to this appendix by § 44.20 must provide file identifying information in each submission to the OCC pursuant to this appendix, including the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, and identification of the reporting period and creation date and time.

b. Trading Desk Information

1. Each banking entity must provide descriptive information regarding each trading desk engaged in covered trading activities, including:

i. Name of the trading desk used internally by the banking entity and a unique identification label for the trading desk;

ii. Identification of each type of covered trading activity in which the trading desk is engaged;

iii. Brief description of the general strategy of the trading desk;

iv. A list of the types of financial instruments and other products purchased and sold by the trading desk; an indication of which of these are the main financial instruments or products purchased and sold by the trading desk; and, for trading desks engaged in market making-related activities under § 44.4(b), specification of whether each type of financial instrument is included in market-maker positions or not included in market-maker positions. In addition, indicate whether the trading desk is including in its quantitative measurements products excluded from the definition of ‘‘financial instrument’’ under § 44.3(d)(2) and, if so, identify such products;

v. Identification by complete name of each legal entity that serves as a booking entity for covered trading activities conducted by the trading desk; and indication of which of the identified legal entities are the main booking entities for covered trading activities of the trading desk;

vi. For each legal entity that serves as a booking entity for covered trading activities, specification of any of the following applicable entity types for that legal entity:

A. National bank, Federal branch or Federal agency of a foreign bank, Federal savings association, Federal savings bank;

B. State nonmember bank, foreign bank having an insured branch, State savings association;

C. U.S.-registered broker-dealer, U.S.-registered security-based swap dealer, U.S.-registered major security-based swap participant;

D. Swap dealer, major swap participant, derivatives clearing organization, futures commission merchant, commodity pool operator, commodity trading advisor, introducing broker, floor trader, retail foreign exchange dealer;

E. State member bank;

F. Bank holding company, savings and loan holding company;

G. Foreign banking organization as defined in 12 CFR 211.21(o);

H. Uninsured State-licensed branch or agency of a foreign bank; or

I. Other entity type not listed above, including a subsidiary of a legal entity described above where the subsidiary itself is not an entity type listed above;

vii. Indication of whether each calendar date is a trading day or not a trading day for the trading desk; and

viii. Currency reported and daily currency conversion rate.

c. Quantitative Measurements Identifying Information

1. Each banking entity must provide the following information regarding the quantitative measurements:

i. A Risk and Position Limits Information Schedule that provides identifying and descriptive information for each limit reported pursuant to the Risk and Position Limits and Usage quantitative measurement, including the name of the limit, a unique identification label for the limit, a description of the limit, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit;

ii. A Risk Factor Sensitivities Information Schedule that provides identifying and descriptive information for each risk factor sensitivity reported pursuant to the Risk Factor Sensitivities quantitative measurement, including the name of the sensitivity, a unique identification label for the sensitivity, a description of the sensitivity, and the sensitivity's risk factor change unit;

iii. A Risk Factor Attribution Information Schedule that provides identifying and descriptive information for each risk factor attribution reported pursuant to the Comprehensive Profit and Loss Attribution quantitative measurement, including the name of the risk factor or other factor, a unique identification label for the risk factor or other factor, a description of the risk factor or other factor, and the risk factor or other factor's change unit;

iv. A Limit/Sensitivity Cross-Reference Schedule that cross-references, by unique identification label, limits identified in the Risk and Position Limits Information Schedule to associated risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule; and

v. A Risk Factor Sensitivity/Attribution Cross-Reference Schedule that cross-references, by unique identification label, risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule to associated risk factor attributions identified in the Risk Factor Attribution Information Schedule.

d. Narrative Statement

1. Each banking entity made subject to this appendix by § 44.20 must submit in a separate electronic document a Narrative Statement to the OCC describing any changes in calculation methods used, a description of and reasons for changes in the banking entity's trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement must include any information the banking entity views as relevant for assessing the information reported, such as further description of calculation methods used.

2. If a banking entity does not have any information to report in a Narrative Statement, the banking entity must submit an electronic document stating that it does not have any information to report in a Narrative Statement.

e. Frequency and Method of Required Calculation and Reporting

A banking entity must calculate any applicable quantitative measurement for each trading day. A banking entity must report the Narrative Statement, the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement electronically to the OCC on the reporting schedule established in § 44.20 unless otherwise requested by the OCC. A banking entity must report the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement to the OCC in accordance with the XML Schema specified and published on the OCC's website.

f. Recordkeeping

A banking entity must, for any quantitative measurement furnished to the OCC pursuant to this appendix and § 44.20(d), create and maintain records documenting the preparation and content of these reports, as well as such information as is necessary to permit the OCC to verify the accuracy of such reports, for a period of five years from the end of the calendar year for which the measurement was taken. A banking entity must retain the Narrative Statement, the Trading Desk Information, and the Quantitative Measurements Identifying Information for a period of five years from the end of the calendar year for which the information was reported to the OCC.

IV. Quantitative Measurements

a. Risk-Management Measurements

1. Risk and Position Limits and Usage

i. *Description:* For purposes of this appendix, Risk and Position Limits are the constraints that define the amount of risk that a trading desk is permitted to take at a point in time, as defined by the banking entity for a specific trading desk. Usage represents the value of the trading desk's risk or positions that are accounted for by the current activity of the desk. Risk and position limits and their usage are key risk management tools used to control and monitor risk taking and include, but are not limited to, the limits set out in § 44.4 and § 44.5. A number of the metrics that are described below, including ''Risk Factor Sensitivities'' and ''Value-at-Risk,'' relate to a trading desk's risk and position limits and are useful in evaluating and setting these limits in the broader context of the trading desk's overall activities, particularly for the market making activities under § 44.4(b) and hedging activity under § 44.5. Accordingly, the limits required under § 44.4(b)(2)(iii) and § 44.5(b)(1)(i)(A) must meet the applicable requirements under § 44.4(b)(2)(iii) and § 44.5(b)(1)(i)(A) and also must include appropriate metrics for the trading desk limits including, at a minimum, the ''Risk Factor Sensitivities'' and ''Value-at-Risk'' metrics except to the extent any of the ''Risk Factor Sensitivities'' or ''Value-at-Risk'' metrics are demonstrably ineffective for measuring and monitoring the risks of a trading desk based on the types of positions traded by, and risk exposures of, that desk.

A. A banking entity must provide the following information for each limit reported pursuant to this quantitative measurement: The unique identification label for the limit reported in the Risk and Position Limits Information Schedule, the limit size (distinguishing between an upper and a lower limit), and the value of usage of the limit.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

2. Risk Factor Sensitivities

i. *Description:* For purposes of this appendix, Risk Factor Sensitivities are changes in a trading desk's Comprehensive Profit and Loss that are expected to occur in the event of a change in one or more underlying variables that are significant sources of the trading desk's profitability and risk. A banking entity must report the risk factor sensitivities that are monitored and managed as part of the trading desk's overall risk management policy. Reported risk factor sensitivities must be sufficiently granular to account for a preponderance of the expected price variation in the trading desk's holdings. A banking entity must provide the following information for each sensitivity that is reported pursuant to this quantitative measurement: The unique identification label for the risk factor sensitivity listed in the Risk Factor Sensitivities Information Schedule, the change in risk factor used to determine the risk factor sensitivity, and the aggregate change in value across all positions of the desk given the change in risk factor.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

3. Value-at-Risk and Stressed Value-at-Risk

i. *Description:* For purposes of this appendix, Value-at-Risk (''VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on current market conditions. For purposes of this appendix, Stressed Value-at-Risk (''Stressed VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on market conditions during a period of significant financial stress.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* For VaR, all trading desks engaged in covered trading activities. For Stressed VaR, all trading desks engaged in covered trading activities, except trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of ''financial instrument'' under § 44.3(d)(2).

b. Source-of-Revenue Measurements

1. Comprehensive Profit and Loss Attribution

i. *Description:* For purposes of this appendix, Comprehensive Profit and Loss Attribution is an analysis that attributes the daily fluctuation in the value of a trading desk's positions to various sources. First, the daily profit and loss of the aggregated positions is divided into three categories: (i) Profit and loss attributable to a trading desk's existing positions that were also positions held by the trading desk as of the end of the prior day (''existing positions''); (ii) profit and loss attributable to new positions resulting from the current day's trading activity (''new positions''); and (iii) residual profit and loss that cannot be specifically attributed to existing positions or new positions. The sum of (i), (ii), and (iii) must equal the trading desk's comprehensive profit and loss at each point in time.

A. The comprehensive profit and loss associated with existing positions must reflect changes in the value of these positions on the applicable day.

The comprehensive profit and loss from existing positions must be further attributed, as applicable, to changes in (i) the specific risk factors and other factors that are monitored and managed as part of the trading desk's overall risk management policies and procedures; and (ii) any other applicable elements, such as cash flows, carry, changes in reserves, and the correction, cancellation, or exercise of a trade.

B. For the attribution of comprehensive profit and loss from existing positions to specific risk factors and other factors, a banking entity must provide the following information for the factors that explain the preponderance of the profit or loss changes due to risk factor changes: The unique identification label for the risk factor or other factor listed in the Risk Factor Attribution Information Schedule, and the profit or loss due to the risk factor or other factor change.

C. The comprehensive profit and loss attributed to new positions must reflect commissions and fee income or expense and market gains or losses associated with transactions executed on the applicable day. New positions include purchases and sales of financial instruments and other assets/liabilities and negotiated amendments to existing positions. The comprehensive profit and loss from new positions may be reported in the aggregate and does not need to be further attributed to specific sources.

D. The portion of comprehensive profit and loss that cannot be specifically attributed to known sources must be allocated to a residual category identified as an unexplained portion of the comprehensive profit and loss. Significant unexplained profit and loss must be escalated for further investigation and analysis.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

c. Positions, Transaction Volumes, and Securities Inventory Aging Measurements

1. Positions

i. *Description:* For purposes of this appendix, Positions is the value of securities and derivatives positions managed by the trading desk. For purposes of the Positions quantitative measurement, do not include in the Positions calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.''[418] A banking entity must separately report the trading desk's market value of long securities positions, market value of short securities positions, market value of derivatives receivables, market value of derivatives payables, notional value of derivatives receivables, and notional value of derivatives payables.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 44.4(a) or § 44.4(b) to conduct underwriting activity or market-making-related activity, respectively.

2. Transaction Volumes

i. *Description:* For purposes of this appendix, Transaction Volumes measures four exclusive categories of covered trading activity conducted by a trading desk. A banking entity is required to report the value and number of security and derivative transactions conducted by the trading desk with: (i) Customers, excluding internal transactions; (ii) non-customers, excluding internal transactions; (iii) trading desks and other organizational units where the transaction is booked in the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity. For securities, value means gross market value. For derivatives, value means gross notional value. For purposes of calculating the Transaction Volumes quantitative measurement, do not include in the Transaction Volumes calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.''[419] Further, for purposes of the Transaction Volumes quantitative measurement, a customer of a trading desk that relies on § 44.4(a) to conduct underwriting activity is a market participant identified in § 44.4(a)(7), and a customer of a trading desk that relies on § 44.4(b) to conduct market making-related activity is a market participant identified in § 44.4(b)(3).

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 44.4(a) or § 44.4(b) to conduct underwriting activity or market-making-related activity, respectively.

3. Securities Inventory Aging

i. *Description:* For purposes of this appendix, Securities Inventory Aging generally describes a schedule of the market value of the trading desk's securities positions and the amount of time that those securities positions have been held. Securities Inventory Aging must measure the age profile of a trading desk's securities positions for the following periods: 0–30 calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days. Securities Inventory Aging includes two schedules, a security asset-aging schedule, and a security liability-aging schedule. For purposes of the Securities Inventory Aging quantitative measurement, do not include securities that are also ''derivatives,'' as those terms are defined under subpart A.[420]

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 44.4(a) or § 44.4(b) to conduct underwriting activity or market-making related activity, respectively.

BOARD OF GOVERNORS OF THE FEDERAL RESERVE

12 CFR Chapter II

Authority and Issuance

For the reasons set forth in the Common Preamble the Board proposes to amend chapter II of title 12 of the Code of Federal Regulations as follows:

PART 248—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS (REGULATION VV)

■ 14. The authority citation for part 248 continues to read as follows:

Authority: 12 U.S.C. 1851, 12 U.S.C. 221 *et seq.,* 12 U.S.C. 1818, 12 U.S.C. 1841 *et seq.,* and 12 U.S.C. 3103 *et seq.*

Subpart A—Authority and Definitions

■ 15. Section 248.2 is revised as follows:

§ 248.2 Definitions.

Unless otherwise specified, for purposes of this part:

(a) *Affiliate* has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(k)).

(b) *Applicable accounting standards* means U.S. generally accepted accounting principles, or such other accounting standards applicable to a banking entity that the [Agency] determines are appropriate and that the banking entity uses in the ordinary course of its business in preparing its consolidated financial statements.

(c) *Bank holding company* has the same meaning as in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).

(d) *Banking entity.* (1) Except as provided in paragraph (d)(2) of this section, *banking entity* means:

(i) Any insured depository institution;

(ii) Any company that controls an insured depository institution;

(iii) Any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and

(iv) Any affiliate or subsidiary of any entity described in paragraphs (d)(1)(i), (ii), or (iii) of this section.

(2) Banking entity does not include:

(i) A covered fund that is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section;

(ii) A portfolio company held under the authority contained in section

[418] *See* §§ 44.2(i), (bb). For example, under this part, a security-based swap is both a ''security'' and a ''derivative.'' For purposes of the Positions quantitative measurement, security-based swaps are reported as derivatives rather than securities.

[419] *See* §§ 44.2(i), (bb).

[420] *See* §§ 44.2(i), (bb).

4(k)(4)(H) or (I) of the BHC Act (12 U.S.C. 1843(k)(4)(H), (I)), or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958 (15 U.S.C. 662), so long as the portfolio company or portfolio concern is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section; or

(iii) The FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(e) *Board* means the Board of Governors of the Federal Reserve System.

(f) *CFTC* means the Commodity Futures Trading Commission.

(g) *Dealer* has the same meaning as in section 3(a)(5) of the Exchange Act (15 U.S.C. 78c(a)(5)).

(h) *Depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)).

(i) *Derivative.* (1) Except as provided in paragraph (i)(2) of this section, *derivative* means:

(i) Any swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68));

(ii) Any purchase or sale of a commodity, that is not an excluded commodity, for deferred shipment or delivery that is intended to be physically settled;

(iii) Any foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)) or foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25));

(iv) Any agreement, contract, or transaction in foreign currency described in section 2(c)(2)(C)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(C)(i));

(v) Any agreement, contract, or transaction in a commodity other than foreign currency described in section 2(c)(2)(D)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(D)(i)); and

(vi) Any transaction authorized under section 19 of the Commodity Exchange Act (7 U.S.C. 23(a) or (b));

(2) A derivative does not include:

(i) Any consumer, commercial, or other agreement, contract, or transaction that the CFTC and SEC have further defined by joint regulation, interpretation, guidance, or other action as not within the definition of swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68)); or

(ii) Any identified banking product, as defined in section 402(b) of the Legal Certainty for Bank Products Act of 2000 (7 U.S.C. 27(b)), that is subject to section 403(a) of that Act (7 U.S.C. 27a(a)).

(j) *Employee* includes a member of the immediate family of the employee.

(k) *Exchange Act* means the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(l) *Excluded commodity* has the same meaning as in section 1a(19) of the Commodity Exchange Act (7 U.S.C. 1a(19)).

(m) *FDIC* means the Federal Deposit Insurance Corporation.

(n) *Federal banking agencies* means the Board, the Office of the Comptroller of the Currency, and the FDIC.

(o) *Foreign banking organization* has the same meaning as in section 211.21(o) of the Board's Regulation K (12 CFR 211.21(o)), but does not include a foreign bank, as defined in section 1(b)(7) of the International Banking Act of 1978 (12 U.S.C. 3101(7)), that is organized under the laws of the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, or the Commonwealth of the Northern Mariana Islands.

(p) *Foreign insurance regulator* means the insurance commissioner, or a similar official or agency, of any country other than the United States that is engaged in the supervision of insurance companies under foreign insurance law.

(q) *General account* means all of the assets of an insurance company except those allocated to one or more separate accounts.

(r) *Insurance company* means a company that is organized as an insurance company, primarily and predominantly engaged in writing insurance or reinsuring risks underwritten by insurance companies, subject to supervision as such by a state insurance regulator or a foreign insurance regulator, and not operated for the purpose of evading the provisions of section 13 of the BHC Act (12 U.S.C. 1851).

(s) *Insured depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)), but does not include an insured depository institution that is described in section 2(c)(2)(D) of the BHC Act (12 U.S.C. 1841(c)(2)(D)).

(t) *Limited trading assets and liabilities* means, with respect to a banking entity, that:

(1) The banking entity has, together with its affiliates and subsidiaries on a worldwide consolidated basis, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1,000,000,000; and

(2) The Board has not determined pursuant to § 248.20(g) or (h) of this part that the banking entity should not be treated as having limited trading assets and liabilities.

(u) *Loan* means any loan, lease, extension of credit, or secured or unsecured receivable that is not a security or derivative.

(v) *Moderate trading assets and liabilities* means, with respect to a banking entity, that the banking entity does not have significant trading assets and liabilities or limited trading assets and liabilities.

(w) *Primary financial regulatory agency* has the same meaning as in section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)).

(x) *Purchase* includes any contract to buy, purchase, or otherwise acquire. For security futures products, purchase includes any contract, agreement, or transaction for future delivery. With respect to a commodity future, purchase includes any contract, agreement, or transaction for future delivery. With respect to a derivative, purchase includes the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(y) *Qualifying foreign banking organization* means a foreign banking organization that qualifies as such under section 211.23(a), (c) or (e) of the Board's Regulation K (12 CFR 211.23(a), (c), or (e)).

(z) *SEC* means the Securities and Exchange Commission.

(aa) *Sale* and *sell* each include any contract to sell or otherwise dispose of. For security futures products, such terms include any contract, agreement, or transaction for future delivery. With respect to a commodity future, such terms include any contract, agreement, or transaction for future delivery. With respect to a derivative, such terms include the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(bb) *Security* has the meaning specified in section 3(a)(10) of the Exchange Act (15 U.S.C. 78c(a)(10)).

(cc) *Security-based swap dealer* has the same meaning as in section 3(a)(71) of the Exchange Act (15 U.S.C. 78c(a)(71)).

(dd) *Security future* has the meaning specified in section 3(a)(55) of the Exchange Act (15 U.S.C. 78c(a)(55)).

(ee) *Separate account* means an account established and maintained by an insurance company in connection with one or more insurance contracts to hold assets that are legally segregated from the insurance company's other assets, under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.

(ff) *Significant trading assets and liabilities.*

(1) *Significant trading assets and liabilities* means, with respect to a banking entity, that:

(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10,000,000,000; or

(ii) The Board has determined pursuant to § 248.20(h) of this part that the banking entity should be treated as having significant trading assets and liabilities.

(2) With respect to a banking entity other than a banking entity described in paragraph (3), trading assets and liabilities for purposes of this paragraph (ff) means trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (ff) means the trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

(ii) For purposes of paragraph (ff)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary.

(gg) *State* means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(hh) *Subsidiary* has the same meaning as in section 2(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(d)).

(ii) *State insurance regulator* means the insurance commissioner, or a similar official or agency, of a State that is engaged in the supervision of insurance companies under State insurance law.

(jj) *Swap dealer* has the same meaning as in section 1(a)(49) of the Commodity Exchange Act (7 U.S.C. 1a(49)).

Subpart B—Proprietary Trading

■ 16. Amend § 248.3 by:

■ a. Revising paragraph (b);

■ b. Redesignating paragraphs (c) through (e) as paragraphs (d) through (f);

■ c. Adding a new paragraph (c);

■ d. Revising paragraph (e)(3);

■ e. Adding paragraph (e)(10);

■ f. Redesignating paragraphs (f)(5) through (f)(13) as paragraphs (f)(6) through (f)(14);

■ g. Adding a new paragraph (f)(5); and

■ h. Adding a new paragraph (g).

The revisions and additions read as follows:

§ 248.3 Prohibition on proprietary trading.

* * * * *

(b) *Definition of trading account. Trading account* means any account that is used by a banking entity to:

(1)(i) Purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule; or

(ii) With respect to a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, purchase or sell one or more financial instruments that are subject to capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended from time to time.

(2) Purchase or sell one or more financial instruments for any purpose, if the banking entity:

(i) Is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or

(ii) Is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business; or

(3) Purchase or sell one or more financial instruments, with respect to a financial instrument that is recorded at fair value on a recurring basis under applicable accounting standards.

(c) *Presumption of compliance.* (1)(i) Each trading desk that does not purchase or sell financial instruments for a trading account defined in paragraphs (b)(1) or (b)(2) of this section may calculate the net gain or net loss on the trading desk's portfolio of financial instruments each business day, reflecting realized and unrealized gains and losses since the previous business day, based on the banking entity's fair value for such financial instruments.

(ii) If the sum of the absolute values of the daily net gain and loss figures determined in accordance with paragraph (c)(1)(i) of this section for the preceding 90-calendar-day period does not exceed $25 million, the activities of the trading desk shall be presumed to be in compliance with the prohibition in paragraph (a) of this section.

(2) The Board may rebut the presumption of compliance in paragraph (c)(1)(ii) of this section by providing written notice to the banking entity that the Board has determined that one or more of the banking entity's activities violates the prohibitions under subpart B.

(3) If a trading desk operating pursuant to paragraph (c)(1)(ii) of this section exceeds the $25 million threshold in that paragraph at any point, the banking entity shall, in accordance

with any policies and procedures adopted by the Board:

(i) Promptly notify the Board;

(ii) Demonstrate that the trading desk's purchases and sales of financial instruments comply with subpart B; and

(iii) Demonstrate, with respect to the trading desk, how the banking entity will maintain compliance with subpart B on an ongoing basis.

* * * * *

(e) * * *

(3) Any purchase or sale of a security, foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or physically-settled cross-currency swap, by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that, with respect to such financial instruments:

(i) Specifically contemplates and authorizes the particular financial instruments to be used for liquidity management purposes, the amount, types, and risks of these financial instruments that are consistent with liquidity management, and the liquidity circumstances in which the particular financial instruments may or must be used;

(ii) Requires that any purchase or sale of financial instruments contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes;

(iii) Requires that any financial instruments purchased or sold for liquidity management purposes be highly liquid and limited to financial instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements;

(iv) Limits any financial instruments purchased or sold for liquidity management purposes, together with any other instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan;

(v) Includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of financial instruments that are not permitted under §§ 248.6(a) or (b) of this subpart are for the purpose of liquidity management and in accordance with the liquidity management plan described in paragraph (e)(3) of this section; and

(vi) Is consistent with the Board's supervisory requirements, guidance, and expectations regarding liquidity management;

* * * * *

(10) Any purchase (or sale) of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or excluded activity or is a subsequent transaction to correct such an error, and the erroneously purchased (or sold) financial instrument is promptly transferred to a separately-managed trade error account for disposition.

(f) * * *

(5) *Cross-currency swap* means a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into.

* * * * *

(g) *Reservation of Authority:* (1) The Board may determine, on a case-by-case basis, that a purchase or sale of one or more financial instruments by a banking entity either is or is not for the trading account as defined at 12 U.S.C. 1851(h)(6).

(2) Notice and Response Procedures.

(i) Notice. When the Board determines that the purchase or sale of one or more financial instruments is for the trading account under paragraph (g)(1) of this section, the Board will notify the banking entity in writing of the determination and provide an explanation of the determination.

(ii) Response.

(A) The banking entity may respond to any or all items in the notice. The response should include any matters that the banking entity would have the Boardconsider in deciding whether the purchase or sale is for the trading account. The response must be in writing and delivered to the designated Board official within 30 days after the date on which the banking entity received the notice. The Board may shorten the time period when, in the opinion of the Board, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the Board may extend the time period for good cause.

(B) Failure to respond within 30 days or such other time period as may be specified by the Board shall constitute a waiver of any objections to the Board's determination.

(iii) After the close of banking entity's response period, the Board will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the Board's determination that the purchase or sale of one or more financial instruments is for the trading account. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

■ 17. Section 248.4 is amended by:

■ a. Revising paragraph (a)(2);

■ b. Adding paragraph (a)(8);

■ c. Revising paragraph (b)(2);

■ d. Revising the introductory language of paragraph (b)(3)(i);

■ e. In paragraph (b)(5) revising the references to ''*inventory*'' to read ''*positions*''*;* and

■ f. Adding a new paragraph (b)(6).

The revisions and additions read as follows:

§ 248.4 Permitted underwriting and market making-related activities.

(a) * * *

(2) *Requirements.* The underwriting activities of a banking entity are permitted under paragraph (a)(1) of this section only if:

(i) The banking entity is acting as an underwriter for a distribution of securities and the trading desk's underwriting position is related to such distribution;

(ii)(A) The amount and type of the securities in the trading desk's underwriting position are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant type of security, and (B) reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (a) of this section, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with paragraph (a)(8)(i) of this section;

(C) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(D) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

(iv) The compensation arrangements of persons performing the activities described in this paragraph (a) are designed not to reward or incentivize prohibited proprietary trading; and

(v) The banking entity is licensed or registered to engage in the activity described in this paragraph (a) in accordance with applicable law.

* * * * *

(8) *Rebuttable presumption of compliance.*—(i) *Risk limits.* (A) A banking entity shall be presumed to meet the requirements of paragraph (a)(2)(ii)(A) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (a)(8)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (8)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(*1*) Amount, types, and risk of its underwriting position;

(*2*) Level of exposures to relevant risk factors arising from its underwriting position; and

(*3*) Period of time a security may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (a)(8)(i) of this section shall be subject to supervisory review and oversight by the Board on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (a)(8)(i) of this section, a banking entity shall promptly report to the Board (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the Board.

(iv) *Rebutting the presumption.* The presumption in paragraph (a)(8)(i) of this section may be rebutted by the Board if the Board determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The Board will provide notice of any such determination to the banking entity in writing.

(b) * * *

(2) *Requirements.* The market making-related activities of a banking entity are permitted under paragraph (b)(1) of this section only if:

(i) The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(ii) The trading desk's market-making related activities are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on the liquidity, maturity, and depth of the market for the relevant types of financial instrument(s).

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (b) of this section, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with paragraph (b)(2)(i) of this section;

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C) of this section; the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with paragraph (b)(6)(i) of this section;

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(E) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis that the basis for any temporary or permanent increase to a trading desk's limit(s) is consistent with the requirements of this paragraph (b), and independent review of such demonstrable analysis and approval;

(iv) In the case of a banking entity with significant trading assets and liabilities, to the extent that any limit identified pursuant to paragraph (b)(2)(iii)(C) of this section is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;

(v) The compensation arrangements of persons performing the activities described in this paragraph (b) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in activity described in this paragraph (b) in accordance with applicable law.

(3) * * *

(i) A trading desk or other organizational unit of another banking entity is not a client, customer, or counterparty of the trading desk if that other entity has trading assets and liabilities of $50 billion or more as measured in accordance with the methodology described in definition of ''significant trading assets and liabilities'' contained in § 248.2 of this part, unless:

* * * * *

(6) *Rebuttable presumption of compliance.*

(i) *Risk limits.*

(A) A banking entity shall be presumed to meet the requirements of paragraph (b)(2)(ii) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (b)(6)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (6)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market making-related activities, on the:

(*1*) Amount, types, and risks of its market-maker positions;

(*2*) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(*3*) Level of exposures to relevant risk factors arising from its financial exposure; and

(*4*) Period of time a financial instrument may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (b)(6)(i) of this section shall be subject to supervisory review and oversight by the Board on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (b)(6)(i) of this section, a banking entity shall promptly report to the Board (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the Board.

(iv) *Rebutting the presumption.* The presumption in paragraph (b)(6)(i) of this section may be rebutted by the Board if the Board determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The Board will provide notice of any such determination to the banking entity in writing.

■ 18. Amend § 248.5 by revising paragraph (b), the introductory text of paragraph (c)(1); and adding paragraph (c)(4) to read as follows:

§ 248.5 Permitted risk-mitigating hedging activities.

* * * * *

(b) *Requirements.*

(1) The risk-mitigating hedging activities of a banking entity that has significant trading assets and liabilities are permitted under paragraph (a) of this section only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures regarding the positions, techniques and strategies that may be used for hedging, including documentation indicating what positions, contracts or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts or other holdings;

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(C) The conduct of analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged;

(ii) The risk-mitigating hedging activity:

(A) Is conducted in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section;

(D) Is subject to continuing review, monitoring and management by the banking entity that:

(*1*) Is consistent with the written hedging policies and procedures required under paragraph (b)(1)(i) of this section;

(*2*) Is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging activities undertaken under this section and the underlying positions, contracts, and other holdings of the banking entity, based upon the facts and circumstances of the underlying and hedging positions, contracts and other holdings of the banking entity and the risks and liquidity thereof; and

(*3*) Requires ongoing recalibration of the hedging activity by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(1)(ii) of this section and is not prohibited proprietary trading; and

(iii) The compensation arrangements of persons performing risk-mitigating hedging activities are designed not to reward or incentivize prohibited proprietary trading.

(2) The risk-mitigating hedging activities of a banking entity that does not have significant trading assets and liabilities are permitted under paragraph (a) of this section only if the risk-mitigating hedging activity:

(i) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and

(ii) Is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(2) of this section and is not prohibited proprietary trading.

(c) * * * (1) A banking entity that has significant trading assets and liabilities must comply with the requirements of paragraphs (c)(2) and (3) of this section, unless the requirements of paragraph (c)(4) of this section are met, with respect to any purchase or sale of financial instruments made in reliance on this section for risk-mitigating hedging purposes that is:

* * * * *

(4) The requirements of paragraphs (c)(2) and (3) of this section do not apply to the purchase or sale of a financial instrument described in paragraph (c)(1) of this section if:

(i) The financial instrument purchased or sold is identified on a written list of pre-approved financial instruments that are commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold; and

(ii) At the time the financial instrument is purchased or sold, the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The hedging limits shall be appropriate for the:

(A) Size, types, and risks of the hedging activities commonly undertaken by the trading desk;

(B) Financial instruments purchased and sold for hedging activities by the trading desk; and

(C) Levels and duration of the risk exposures being hedged.

■ 19. Amend § 248.6 by revising paragraph (e)(3) and removing paragraph (e)(6) to read as follows:

§ 248.6 Other permitted proprietary trading activities.

* * * * *

(e) * * *

(3) A purchase or sale by a banking entity is permitted for purposes of this paragraph (e) if:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

Subpart C—Covered Funds Activities and Investments

§ 248.10 [Amended]

■ 20. Section 248.10 is amended by:

■ a. In paragraph (c)(8)(i)(A) revising the reference to ''§ 248.2(s)'' to read ''§ 248.2(u)'';

■ b. Removing paragraph (d)(1);

■ c. Redesignating paragraphs (d)(2) through (d)(10) as paragraphs (d)(1) through (d)(9);

■ d. In paragraph (d)(5)(i)(G) revising the reference to ''(d)(6)(i)(A)'' to read ''(d)(5)(i)(A)''; and

■ e. In paragraph (d)(9) revising the reference to ''(d)(9)'' to read ''(d)(8)'' and the reference to ''(d)(10)(i)(A)'' to read ''(d)(9)(i)(A)'' and the reference to ''(d)(10)(i)'' to read ''(d)(9)(i)''

■ 21. Section 248.11 is amended by revising paragraph (c) as follows:

§ 248.11 Permitted organizing and offering, underwriting, and market making with respect to a covered fund.

* * * * *

(c) Underwriting and market making in ownership interests of a covered fund. The prohibition contained in § 248.10(a) of this subpart does not apply to a banking entity's underwriting activities or market making-related activities involving a covered fund so long as:

(1) Those activities are conducted in accordance with the requirements of § 248.4(a) or § 248.4(b) of subpart B, respectively; and

(2) With respect to any banking entity (or any affiliate thereof) that: Acts as a sponsor, investment adviser or commodity trading advisor to a particular covered fund or otherwise acquires and retains an ownership interest in such covered fund in reliance on paragraph (a) of this section; or acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act (15 U.S.C. 78o–11(a)(3)), or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act (15 U.S.C. 78o–11) and the implementing regulations issued thereunder each as permitted by paragraph (b) of this section, then in each such case any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making related activities for that particular covered fund are included in the calculation of ownership interests permitted to be held by the banking entity and its affiliates under the limitations of § 248.12(a)(2)(ii); § 248.12(a)(2)(iii), and § 248.12(d) of this subpart.

§ 248.12 (Amended)

■ 22. Section 248.12 is amended by

■ a. In paragraphs (c)(1) and (d) removing the references to ''§ 248.10(d)(6)(ii)'' and replacing with ''§ 248.10(d)(5)(ii)'';

■ b. Removing paragraph (e)(2)(vii); and

■ c. Redesignating the second instance of paragraph (e)(2)(vi) as paragraph (e)(2)(vii).

■ 23. Section 248.13 is amended by revising paragraphs (a) and (b)(3) and removing paragraph (b)(4)(iv) to read as follows:

§ 248.13 Other permitted covered fund activities and investments.

(a) Permitted risk-mitigating hedging activities. (1) The prohibition contained in § 248.10(a) of this subpart does not apply with respect to an ownership interest in a covered fund acquired or retained by a banking entity that is designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with:

(i) A compensation arrangement with an employee of the banking entity or an affiliate thereof that directly provides investment advisory, commodity trading advisory or other services to the covered fund; or

(ii) A position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.

(2) Requirements. The risk-mitigating hedging activities of a banking entity are permitted under this paragraph (a) only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program in accordance with subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures; and

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(ii) The acquisition or retention of the ownership interest:

(A) Is made in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedge, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising (1) out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund or (2) in connection with the compensation arrangement with the employee that directly provides investment advisory, commodity trading advisory, or other services to the covered fund;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section; and

(D) Is subject to continuing review, monitoring and management by the banking entity.

(iii) With respect to risk-mitigating hedging activity conducted pursuant to paragraph (a)(1)(i), the compensation arrangement relates solely to the covered fund in which the banking entity or any affiliate has acquired an ownership interest pursuant to paragraph (a)(1)(i) and such compensation arrangement provides that any losses incurred by the banking entity on such ownership interest will be offset by corresponding decreases in amounts payable under such compensation arrangement.

* * * * *

(b) * * *

(3) An ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of paragraph (b)(1)(iii) of this section only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of this paragraph (b)(3) to participate in any offer or sale by the covered fund of ownership interests in the covered fund.

* * * * *

■ 24. Section 248.14 is amended by revising paragraph (a)(2)(ii)(B) as follows:

§ 248.14 Limitations on relationships with a covered fund.

* * * * *

(a) * * *

(2) * * *

(ii) * * *

(B) The chief executive officer (or equivalent officer) of the banking entity certifies in writing annually no later than March 31 to the Board (with a duty to update the certification if the information in the certification materially changes) that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and

* * * * *

Subpart D—Compliance Program Requirement; Violations

■ 25. Section 248.20 is amended by:

■ a. Revising paragraph (a);

■ b. Revising the introductory language of paragraph (b);

■ c. Revising paragraph (c);

■ d. Revising paragraph (d);

■ e. Revising the introductory language of paragraph (e);

■ f. Revising paragraph (f)(2); and

■ g. Adding new paragraphs (g) and (h).

The revisions are as follows:

§ 248.20 Program for compliance; reporting.

(a) Program requirement. Each banking entity (other than a banking entity with limited trading assets and liabilities) shall develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and this part. The terms, scope, and detail of the compliance program shall be appropriate for the types, size, scope, and complexity of activities and business structure of the banking entity.

(b) Banking entities with significant trading assets and liabilities. With respect to a banking entity with significant trading assets and liabilities, the compliance program required by paragraph (a) of this section, at a minimum, shall include:

* * * * *

(c) *CEO attestation.* (1) The CEO of a banking entity described in paragraph (2) must, based on a review by the CEO of the banking entity, attest in writing to the Board, each year no later than March 31, that the banking entity has in place processes reasonably designed to achieve compliance with section 13 of the BHC Act and this part. In the case of a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

(2) The requirements of paragraph (c)(1) of this section apply to a banking entity if:

(i) The banking entity does not have limited trading assets and liabilities; or

(ii) The Board notifies the banking entity in writing that it must satisfy the requirements contained in paragraph (c)(1) of this section.

(d) *Reporting requirements under the Appendix to this part.* (1) A banking entity engaged in proprietary trading activity permitted under subpart B shall comply with the reporting requirements described in the Appendix, if:

(i) The banking entity has significant trading assets and liabilities; or

(ii) The Board notifies the banking entity in writing that it must satisfy the reporting requirements contained in the Appendix.

(2) *Frequency of reporting.* Unless the Board notifies the banking entity in writing that it must report on a different basis, a banking entity with $50 billion or more in trading assets and liabilities (as calculated in accordance with the methodology described in the definition of ''significant trading assets and liabilities'' contained in § 248.2 of this part of this part) shall report the information required by the Appendix for each calendar month within 20 days of the end of each calendar month. Any other banking entity subject to the Appendix shall report the information required by the Appendix for each calendar quarter within 30 days of the end of that calendar quarter unless the Board notifies the banking entity in writing that it must report on a different basis.

(e) Additional documentation for covered funds. A banking entity with significant trading assets and liabilities shall maintain records that include:

* * * * *

(f) * * *

(2) Banking entities with moderate trading assets and liabilities. A banking entity with moderate trading assets and liabilities may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and this part and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.

(g) Rebuttable presumption of compliance for banking entities with limited trading assets and liabilities.

(1) Rebuttable presumption. Except as otherwise provided in this paragraph, a banking entity with limited trading assets and liabilities shall be presumed to be compliant with subpart B and subpart C and shall have no obligation to demonstrate compliance with this part on an ongoing basis.

(2) *Rebuttal of presumption.* (i) If upon examination or audit, the Board determines that the banking entity has engaged in proprietary trading or

covered fund activities that are otherwise prohibited under subpart B or subpart C, the Board may require the banking entity to be treated under this part as if it did not have limited trading assets and liabilities.

(ii) Notice and Response Procedures.

(A) *Notice.* The Board will notify the banking entity in writing of any determination pursuant to paragraph (g)(2)(i) of this section to rebut the presumption described in this paragraph (g) and will provide an explanation of the determination.

(B) *Response.* (*1*) The banking entity may respond to any or all items in the notice described in paragraph (g)(2)(ii)(A) of this section. The response should include any matters that the banking entity would have the Board consider in deciding whether the banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The response must be in writing and delivered to the designated Board official within 30 days after the date on which the banking entity received the notice. The Board may shorten the time period when, in the opinion of the Board, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the Board may extend the time period for good cause.

(*2*) Failure to respond within 30 days or such other time period as may be specified by the Board shall constitute a waiver of any objections to the Board's determination.

(C) After the close of banking entity's response period, the Board will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the Board's determination that banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

(h) Reservation of authority. Notwithstanding any other provision of this part, the Board retains its authority to require a banking entity without significant trading assets and liabilities to apply any requirements of this part that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the Board determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion of subpart B or subpart C, does not warrant a presumption of compliance under paragraph (g) of this section or treatment as a banking entity with moderate trading assets and liabilities, as applicable.

■ 26. Remove Appendix A and Appendix B to Part 248 and add Appendix to Part 248—Reporting and Recordkeeping Requirements for Covered Trading Activities to read as follows:

Appendix to Part 248—Reporting and Recordkeeping Requirements for Covered Trading Activities

I. Purpose

a. This appendix sets forth reporting and recordkeeping requirements that certain banking entities must satisfy in connection with the restrictions on proprietary trading set forth in subpart B (''proprietary trading restrictions''). Pursuant to § 248.20(d), this appendix applies to a banking entity that, together with its affiliates and subsidiaries, has significant trading assets and liabilities. These entities are required to (i) furnish periodic reports to the Board regarding a variety of quantitative measurements of their covered trading activities, which vary depending on the scope and size of covered trading activities, and (ii) create and maintain records documenting the preparation and content of these reports. The requirements of this appendix must be incorporated into the banking entity's internal compliance program under § 248.20.

b. The purpose of this appendix is to assist banking entities and the Board in:

(i) Better understanding and evaluating the scope, type, and profile of the banking entity's covered trading activities;

(ii) Monitoring the banking entity's covered trading activities;

(iii) Identifying covered trading activities that warrant further review or examination by the banking entity to verify compliance with the proprietary trading restrictions;

(iv) Evaluating whether the covered trading activities of trading desks engaged in market making-related activities subject to § 248.4(b) are consistent with the requirements governing permitted market making-related activities;

(v) Evaluating whether the covered trading activities of trading desks that are engaged in permitted trading activity subject to §§ 248.4; 248.5, or 248.6(a)–(b) (*i.e.,* underwriting and market making-related related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies;

(vi) Identifying the profile of particular covered trading activities of the banking entity, and the individual trading desks of the banking entity, to help establish the appropriate frequency and scope of examination by the Board of such activities; and

(vii) Assessing and addressing the risks associated with the banking entity's covered trading activities.

c. Information that must be furnished pursuant to this appendix is *not* intended to serve as a dispositive tool for the identification of permissible or impermissible activities.

d. In addition to the quantitative measurements required in this appendix, a banking entity may need to develop and implement other quantitative measurements in order to effectively monitor its covered trading activities for compliance with section 13 of the BHC Act and this part and to have an effective compliance program, as required by § 248.20. The effectiveness of particular quantitative measurements may differ based on the profile of the banking entity's businesses in general and, more specifically, of the particular trading desk, including types of instruments traded, trading activities and strategies, and history and experience (*e.g.,* whether the trading desk is an established, successful market maker or a new entrant to a competitive market). In all cases, banking entities must ensure that they have robust measures in place to identify and monitor the risks taken in their trading activities, to ensure that the activities are within risk tolerances established by the banking entity, and to monitor and examine for compliance with the proprietary trading restrictions in this part.

e. On an ongoing basis, banking entities must carefully monitor, review, and evaluate all furnished quantitative measurements, as well as any others that they choose to utilize in order to maintain compliance with section 13 of the BHC Act and this part. All measurement results that indicate a heightened risk of impermissible proprietary trading, including with respect to otherwise-permitted activities under §§ 248.4 through 248.6(a)–(b), or that result in a material exposure to high-risk assets or high-risk trading strategies, must be escalated within the banking entity for review, further analysis, explanation to the Board, and remediation, where appropriate. The quantitative measurements discussed in this appendix should be helpful to banking entities in identifying and managing the risks related to their covered trading activities.

II. Definitions

The terms used in this appendix have the same meanings as set forth in §§ 248.2 and 248.3. In addition, for purposes of this appendix, the following definitions apply:

Applicability identifies the trading desks for which a banking entity is required to calculate and report a particular quantitative measurement based on the type of covered trading activity conducted by the trading desk.

Calculation period means the period of time for which a particular quantitative measurement must be calculated.

Comprehensive profit and loss means the net profit or loss of a trading desk's material sources of trading revenue over a specific period of time, including, for example, any increase or decrease in the market value of a trading desk's holdings, dividend income, and interest income and expense.

Covered trading activity means trading conducted by a trading desk under §§ 248.4, 248.5, 248.6(a), or 248.6(b). A banking entity may include in its covered trading activity trading conducted under §§ 248.3(e), 248.6(c), 248.6(d), or 248.6(e).

Measurement frequency means the frequency with which a particular quantitative metric must be calculated and recorded.

Trading day means a calendar day on which a trading desk is open for trading.

III. Reporting and Recordkeeping

a. Scope of Required Reporting

1. *Quantitative measurements.* Each banking entity made subject to this appendix by § 248.20 must furnish the following quantitative measurements, as applicable, for each trading desk of the banking entity engaged in covered trading activities and calculate these quantitative measurements in accordance with this appendix:

i. Risk and Position Limits and Usage;

ii. Risk Factor Sensitivities;

iii. Value-at-Risk and Stressed Value-at-Risk;

iv. Comprehensive Profit and Loss Attribution;

v. Positions;

vi. Transaction Volumes; and

vii. Securities Inventory Aging.

2. *Trading desk information.* Each banking entity made subject to this appendix by § ____.20 must provide certain descriptive information, as further described in this appendix, regarding each trading desk engaged in covered trading activities. *Quantitative measurements identifying information.* Each banking entity made subject to this appendix by § 248.20 must provide certain identifying and descriptive information, as further described in this appendix, regarding its quantitative measurements.

4. *Narrative statement.* Each banking entity made subject to this appendix by § 248.20 must provide a separate narrative statement, as further described in this appendix.

5. *File identifying information.* Each banking entity made subject to this appendix by § 248.20 must provide file identifying information in each submission to the Board pursuant to this appendix, including the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, and identification of the reporting period and creation date and time.

b. Trading Desk Information

1. Each banking entity must provide descriptive information regarding each trading desk engaged in covered trading activities, including:

i. Name of the trading desk used internally by the banking entity and a unique identification label for the trading desk;

ii. Identification of each type of covered trading activity in which the trading desk is engaged;

iii. Brief description of the general strategy of the trading desk;

iv. A list of the types of financial instruments and other products purchased and sold by the trading desk; an indication of which of these are the main financial instruments or products purchased and sold by the trading desk; and, for trading desks engaged in market making-related activities under § 248.4(b), specification of whether each type of financial instrument is included in market-maker positions or not included in market-maker positions. In addition, indicate whether the trading desk is including in its quantitative measurements products excluded from the definition of ''financial instrument'' under § 248.3(d)(2) and, if so, identify such products;

v. Identification by complete name of each legal entity that serves as a booking entity for covered trading activities conducted by the trading desk; and indication of which of the identified legal entities are the main booking entities for covered trading activities of the trading desk;

vi. For each legal entity that serves as a booking entity for covered trading activities, specification of any of the following applicable entity types for that legal entity:

A. National bank, Federal branch or Federal agency of a foreign bank, Federal savings association, Federal savings bank;

B. State nonmember bank, foreign bank having an insured branch, State savings association;

C. U.S.-registered broker-dealer, U.S.-registered security-based swap dealer, U.S.-registered major security-based swap participant;

D. Swap dealer, major swap participant, derivatives clearing organization, futures commission merchant, commodity pool operator, commodity trading advisor, introducing broker, floor trader, retail foreign exchange dealer;

E. State member bank;

F. Bank holding company, savings and loan holding company;

G. Foreign banking organization as defined in 12 CFR 211.21(o);

H. Uninsured State-licensed branch or agency of a foreign bank; or

I. Other entity type not listed above, including a subsidiary of a legal entity described above where the subsidiary itself is not an entity type listed above;

2. Indication of whether each calendar date is a trading day or not a trading day for the trading desk; and

3. Currency reported and daily currency conversion rate.

c. Quantitative Measurements Identifying Information

1. Each banking entity must provide the following information regarding the quantitative measurements:

i. A Risk and Position Limits Information Schedule that provides identifying and descriptive information for each limit reported pursuant to the Risk and Position Limits and Usage quantitative measurement, including the name of the limit, a unique identification label for the limit, a description of the limit, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit;

ii. A Risk Factor Sensitivities Information Schedule that provides identifying and descriptive information for each risk factor sensitivity reported pursuant to the Risk Factor Sensitivities quantitative measurement, including the name of the sensitivity, a unique identification label for the sensitivity, a description of the sensitivity, and the sensitivity's risk factor change unit;

iii. A Risk Factor Attribution Information Schedule that provides identifying and descriptive information for each risk factor attribution reported pursuant to the Comprehensive Profit and Loss Attribution quantitative measurement, including the name of the risk factor or other factor, a unique identification label for the risk factor or other factor, a description of the risk factor or other factor, and the risk factor or other factor's change unit;

iv. A Limit/Sensitivity Cross-Reference Schedule that cross-references, by unique identification label, limits identified in the Risk and Position Limits Information Schedule to associated risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule; and

v. A Risk Factor Sensitivity/Attribution Cross-Reference Schedule that cross-references, by unique identification label, risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule to associated risk factor attributions identified in the Risk Factor Attribution Information Schedule.

d. Narrative Statement

Each banking entity made subject to this appendix by § 248.20 must submit in a separate electronic document a Narrative Statement to the Board describing any changes in calculation methods used, a description of and reasons for changes in the banking entity's trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement must include any information the banking entity views as relevant for assessing the information reported, such as further description of calculation methods used.

If a banking entity does not have any information to report in a Narrative Statement, the banking entity must submit an electronic document stating that it does not have any information to report in a Narrative Statement.

e. Frequency and Method of Required Calculation and Reporting

A banking entity must calculate any applicable quantitative measurement for each trading day. A banking entity must report the Narrative Statement, the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement electronically to the Board on the reporting schedule established in § ____.20 unless otherwise requested by the Board. A banking entity must report the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement to the Board in accordance with the XML Schema specified and published on the Board's website.

f. Recordkeeping

A banking entity must, for any quantitative measurement furnished to the Board pursuant to this appendix and § 248.20(d), create and maintain records documenting the preparation and content of these reports, as well as such information as is necessary to permit the Board to verify the accuracy of such reports, for a period of five years from the end of the calendar year for which the measurement was taken. A banking entity must retain the Narrative Statement, the Trading Desk Information, and the Quantitative Measurements Identifying Information for a period of five years from the end of the calendar year for which the information was reported to the Board.

IV. Quantitative Measurements

a. Risk-Management Measurements

1. Risk and Position Limits and Usage

i. *Description:* For purposes of this appendix, Risk and Position Limits are the constraints that define the amount of risk that a trading desk is permitted to take at a point in time, as defined by the banking entity for a specific trading desk. Usage represents the value of the trading desk's risk or positions that are accounted for by the current activity of the desk. Risk and position limits and their usage are key risk management tools used to control and monitor risk taking and include, but are not limited to, the limits set out in § 248.4 and § 248.5. A number of the metrics that are described below, including ''Risk Factor Sensitivities'' and ''Value-at-Risk,'' relate to a trading desk's risk and position limits and are useful in evaluating and setting these limits in the broader context of the trading desk's overall activities, particularly for the market making activities under § 248.4(b) and hedging activity under § 248.5. Accordingly, the limits required under § 248.4(b)(2)(iii) and § 248.5(b)(1)(i)(A) must meet the applicable requirements under § 248.4(b)(2)(iii) and § 248.5(b)(1)(i)(A) and also must include appropriate metrics for the trading desk limits including, at a minimum, the ''Risk Factor Sensitivities'' and ''Value-at-Risk'' metrics except to the extent any of the ''Risk Factor Sensitivities'' or ''Value-at-Risk'' metrics are demonstrably ineffective for measuring and monitoring the risks of a trading desk based on the types of positions traded by, and risk exposures of, that desk.

A. A banking entity must provide the following information for each limit reported pursuant to this quantitative measurement: The unique identification label for the limit reported in the Risk and Position Limits Information Schedule, the limit size (distinguishing between an upper and a lower limit), and the value of usage of the limit.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

2. Risk Factor Sensitivities

i. *Description:* For purposes of this appendix, Risk Factor Sensitivities are changes in a trading desk's Comprehensive Profit and Loss that are expected to occur in the event of a change in one or more underlying variables that are significant sources of the trading desk's profitability and risk. A banking entity must report the risk factor sensitivities that are monitored and managed as part of the trading desk's overall risk management policy. Reported risk factor sensitivities must be sufficiently granular to account for a preponderance of the expected price variation in the trading desk's holdings. A banking entity must provide the following information for each sensitivity that is reported pursuant to this quantitative measurement: The unique identification label for the risk factor sensitivity listed in the Risk Factor Sensitivities Information Schedule, the change in risk factor used to determine the risk factor sensitivity, and the aggregate change in value across all positions of the desk given the change in risk factor.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

3. Value-at-Risk and Stressed Value-at-Risk

i. *Description:* For purposes of this appendix, Value-at-Risk (''VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on current market conditions. For purposes of this appendix, Stressed Value-at-Risk (''Stressed VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on market conditions during a period of significant financial stress.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* For VaR, all trading desks engaged in covered trading activities. For Stressed VaR, all trading desks engaged in covered trading activities, except trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of ''financial instrument'' under § 248.3(d)(2).

b. Source-of-Revenue Measurements

1. Comprehensive Profit and Loss Attribution

i. *Description:* For purposes of this appendix, Comprehensive Profit and Loss Attribution is an analysis that attributes the daily fluctuation in the value of a trading desk's positions to various sources. First, the daily profit and loss of the aggregated positions is divided into three categories: (i) Profit and loss attributable to a trading desk's existing positions that were also positions held by the trading desk as of the end of the prior day (''existing positions''); (ii) profit and loss attributable to new positions resulting from the current day's trading activity (''new positions''); and (iii) residual profit and loss that cannot be specifically attributed to existing positions or new positions. The sum of (i), (ii), and (iii) must equal the trading desk's comprehensive profit and loss at each point in time.

A. The comprehensive profit and loss associated with existing positions must reflect changes in the value of these positions on the applicable day.

The comprehensive profit and loss from existing positions must be further attributed, as applicable, to changes in (i) the specific risk factors and other factors that are monitored and managed as part of the trading desk's overall risk management policies and procedures; and (ii) any other applicable elements, such as cash flows, carry, changes in reserves, and the correction, cancellation, or exercise of a trade.

B. For the attribution of comprehensive profit and loss from existing positions to specific risk factors and other factors, a banking entity must provide the following information for the factors that explain the preponderance of the profit or loss changes due to risk factor changes: The unique identification label for the risk factor or other factor listed in the Risk Factor Attribution Information Schedule, and the profit or loss due to the risk factor or other factor change.

C. The comprehensive profit and loss attributed to new positions must reflect commissions and fee income or expense and market gains or losses associated with transactions executed on the applicable day. New positions include purchases and sales of financial instruments and other assets/liabilities and negotiated amendments to existing positions. The comprehensive profit and loss from new positions may be reported in the aggregate and does not need to be further attributed to specific sources.

D. The portion of comprehensive profit and loss that cannot be specifically attributed to known sources must be allocated to a residual category identified as an unexplained portion of the comprehensive profit and loss. Significant unexplained profit and loss must be escalated for further investigation and analysis.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

c. Positions, Transaction Volumes, and Securities Inventory Aging Measurements

1. Positions

i. *Description:* For purposes of this appendix, Positions is the value of securities and derivatives positions managed by the trading desk. For purposes of the Positions quantitative measurement, do not include in the Positions calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.''[421] A banking entity must separately report the trading desk's market value of long securities positions, market value of short securities positions, market value of derivatives receivables, market value of derivatives payables, notional value of derivatives receivables, and notional value of derivatives payables.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 248.4(a) or § 248.4(b) to conduct underwriting activity or market-making-related activity, respectively.

2. Transaction Volumes

i. *Description:* For purposes of this appendix, Transaction Volumes measures four exclusive categories of covered trading

[421] *See* §§ 248.2(i), (bb). For example, under this part, a security-based swap is both a ''security'' and a ''derivative.'' For purposes of the Positions quantitative measurement, security-based swaps are reported as derivatives rather than securities.

activity conducted by a trading desk. A banking entity is required to report the value and number of security and derivative transactions conducted by the trading desk with: (i) Customers, excluding internal transactions; (ii) non-customers, excluding internal transactions; (iii) trading desks and other organizational units where the transaction is booked in the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity. For securities, value means gross market value. For derivatives, value means gross notional value. For purposes of calculating the Transaction Volumes quantitative measurement, do not include in the Transaction Volumes calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.''[422] Further, for purposes of the Transaction Volumes quantitative measurement, a customer of a trading desk that relies on § 248.4(a) to conduct underwriting activity is a market participant identified in § 248.4(a)(7), and a customer of a trading desk that relies on § 248.4(b) to conduct market making-related activity is a market participant identified in § 248.4(b)(3).

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 248.4(a) or § 248.4(b) to conduct underwriting activity or market-making-related activity, respectively.

3. Securities Inventory Aging

i. *Description:* For purposes of this appendix, Securities Inventory Aging generally describes a schedule of the market value of the trading desk's securities positions and the amount of time that those securities positions have been held. Securities Inventory Aging must measure the age profile of a trading desk's securities positions for the following periods: 0–30 Calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days. Securities Inventory Aging includes two schedules, a security asset-aging schedule, and a security liability-aging schedule. For purposes of the Securities Inventory Aging quantitative measurement, do not include securities that are also ''derivatives,'' as those terms are defined under subpart A.[423]

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 248.4(a) or § 248.4(b) to conduct underwriting activity or market-making related activity, respectively.

FEDERAL DEPOSIT INSURANCE CORPORATION

12 CFR Chapter III

Authority and Issuance

For the reasons set forth in the Common Preamble, the Federal Deposit Insurance Corporation proposes to amend chapter III of Title 12, Code of Federal Regulations as follows:

PART 351—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS

■ 27. The authority citation for Part 351 continues to read as follows:

Authority: 12 U.S.C. 1851; 1811 *et seq.;* 3101 *et seq.;* and 5412.

■ 28. Revise § 351.2 to read as follows:

§ 351.2 Definitions.

Unless otherwise specified, for purposes of this part:

(a) *Affiliate* has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(k)).

(b) *Applicable accounting standards* means U.S. generally accepted accounting principles, or such other accounting standards applicable to a banking entity that the [Agency] determines are appropriate and that the banking entity uses in the ordinary course of its business in preparing its consolidated financial statements.

(c) *Bank holding company* has the same meaning as in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).

(d) *Banking entity.* (1) Except as provided in paragraph (d)(2) of this section, *banking entity* means:

(i) Any insured depository institution;

(ii) Any company that controls an insured depository institution;

(iii) Any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and

(iv) Any affiliate or subsidiary of any entity described in paragraphs (d)(1)(i), (ii), or (iii) of this section.

(2) Banking entity does not include:

(i) A covered fund that is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section;

(ii) A portfolio company held under the authority contained in section 4(k)(4)(H) or (I) of the BHC Act (12 U.S.C. 1843(k)(4)(H), (I)), or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958 (15 U.S.C. 662), so long as the portfolio company or portfolio concern is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section; or

(iii) The FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(e) *Board* means the Board of Governors of the Federal Reserve System.

(f) *CFTC* means the Commodity Futures Trading Commission.

(g) *Dealer* has the same meaning as in section 3(a)(5) of the Exchange Act (15 U.S.C. 78c(a)(5)).

(h) *Depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)).

(i) *Derivative.* (1) Except as provided in paragraph (i)(2) of this section, *derivative* means:

(i) Any swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68));

(ii) Any purchase or sale of a commodity, that is not an excluded commodity, for deferred shipment or delivery that is intended to be physically settled;

(iii) Any foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)) or foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25));

(iv) Any agreement, contract, or transaction in foreign currency described in section 2(c)(2)(C)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(C)(i));

(v) Any agreement, contract, or transaction in a commodity other than foreign currency described in section 2(c)(2)(D)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(D)(i)); and

(vi) Any transaction authorized under section 19 of the Commodity Exchange Act (7 U.S.C. 23(a) or (b));

(2) A derivative does not include:

(i) Any consumer, commercial, or other agreement, contract, or transaction that the CFTC and SEC have further defined by joint regulation, interpretation, guidance, or other action as not within the definition of swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68)); or

(ii) Any identified banking product, as defined in section 402(b) of the Legal Certainty for Bank Products Act of 2000 (7 U.S.C. 27(b)), that is subject to section 403(a) of that Act (7 U.S.C. 27a(a)).

(j) *Employee* includes a member of the immediate family of the employee.

(k) *Exchange Act* means the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(l) *Excluded commodity* has the same meaning as in section 1a(19) of the

[422] *See* §§ 248.2(i), (bb).

[423] *See* §§ 248.2(i), (bb).

Commodity Exchange Act (7 U.S.C. 1a(19)).

(m) *FDIC* means the Federal Deposit Insurance Corporation.

(n) *Federal banking agencies* means the Board, the Office of the Comptroller of the Currency, and the FDIC.

(o) *Foreign banking organization* has the same meaning as in section 211.21(o) of the Board's Regulation K (12 CFR 211.21(o)), but does not include a foreign bank, as defined in section 1(b)(7) of the International Banking Act of 1978 (12 U.S.C. 3101(7)), that is organized under the laws of the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, or the Commonwealth of the Northern Mariana Islands.

(p) *Foreign insurance regulator* means the insurance commissioner, or a similar official or agency, of any country other than the United States that is engaged in the supervision of insurance companies under foreign insurance law.

(q) *General account* means all of the assets of an insurance company except those allocated to one or more separate accounts.

(r) *Insurance company* means a company that is organized as an insurance company, primarily and predominantly engaged in writing insurance or reinsuring risks underwritten by insurance companies, subject to supervision as such by a state insurance regulator or a foreign insurance regulator, and not operated for the purpose of evading the provisions of section 13 of the BHC Act (12 U.S.C. 1851).

(s) *Insured depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)), but does not include an insured depository institution that is described in section 2(c)(2)(D) of the BHC Act (12 U.S.C. 1841(c)(2)(D)).

(t) *Limited trading assets and liabilities* means, with respect to a banking entity, that:

(1) The banking entity has, together with its affiliates and subsidiaries on a worldwide consolidated basis, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1,000,000,000; and

(2) The FDIC has not determined pursuant to § 351.20(g) or (h) of this part that the banking entity should not be treated as having limited trading assets and liabilities.

(u) *Loan* means any loan, lease, extension of credit, or secured or unsecured receivable that is not a security or derivative.

(v) *Moderate trading assets and liabilities* means, with respect to a banking entity, that the banking entity does not have significant trading assets and liabilities or limited trading assets and liabilities.

(w) *Primary financial regulatory agency* has the same meaning as in section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)).

(x) *Purchase* includes any contract to buy, purchase, or otherwise acquire. For security futures products, purchase includes any contract, agreement, or transaction for future delivery. With respect to a commodity future, purchase includes any contract, agreement, or transaction for future delivery. With respect to a derivative, purchase includes the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(y) *Qualifying foreign banking organization* means a foreign banking organization that qualifies as such under section 211.23(a), (c) or (e) of the Board's Regulation K (12 CFR 211.23(a), (c), or (e)).

(z) *SEC* means the Securities and Exchange Commission.

(aa) *Sale* and *sell* each include any contract to sell or otherwise dispose of. For security futures products, such terms include any contract, agreement, or transaction for future delivery. With respect to a commodity future, such terms include any contract, agreement, or transaction for future delivery. With respect to a derivative, such terms include the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(bb) *Security* has the meaning specified in section 3(a)(10) of the Exchange Act (15 U.S.C. 78c(a)(10)).

(cc) *Security-based swap dealer* has the same meaning as in section 3(a)(71) of the Exchange Act (15 U.S.C. 78c(a)(71)).

(dd) *Security future* has the meaning specified in section 3(a)(55) of the Exchange Act (15 U.S.C. 78c(a)(55)).

(ee) *Separate account* means an account established and maintained by an insurance company in connection with one or more insurance contracts to hold assets that are legally segregated from the insurance company's other assets, under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.

(ff) *Significant trading assets and liabilities.*

(1) *Significant trading assets and liabilities* means, with respect to a banking entity, that:

(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10,000,000,000; or

(ii) The FDIC has determined pursuant to § 351.20(h) of this part that the banking entity should be treated as having significant trading assets and liabilities.

(2) With respect to a banking entity other than a banking entity described in paragraph (3), trading assets and liabilities for purposes of this paragraph (ff) means trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (ff) means the trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

(ii) For purposes of paragraph (ff)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary.

(gg) *State* means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, and the

Commonwealth of the Northern Mariana Islands.

(hh) *Subsidiary* has the same meaning as in section 2(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(d)).

(ii) *State insurance regulator* means the insurance commissioner, or a similar official or agency, of a State that is engaged in the supervision of insurance companies under State insurance law.

(jj) *Swap dealer* has the same meaning as in section 1(a)(49) of the Commodity Exchange Act (7 U.S.C. 1a(49)).

■ 29. Amend § 351.3 by:

■ a. Revising paragraph (b);

■ b. Redesignating paragraphs (c) through (e) as paragraphs (d) through (f);

■ c. Adding a new paragraph (c);

■ d. Revising paragraph (e)(3);

■ e. Adding paragraph (e)(10);

■ f. Redesignating paragraphs (f)(5) through (f)(13) as paragraphs (f)(6) through (f)(14);

■ g. Adding a new paragraph (f)(5); and

■ h. Adding paragraph (g).

The revisions and additions read as follows:

§ 351.3 Prohibition on proprietary trading.

* * * * *

(b) *Definition of trading account. Trading account* means any account that is used by a banking entity to:

(1)(i) Purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule; or

(ii) With respect to a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, purchase or sell one or more financial instruments that are subject to capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended from time to time.

(2) Purchase or sell one or more financial instruments for any purpose, if the banking entity:

(i) Is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or

(ii) Is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business; or

(3) Purchase or sell one or more financial instruments, with respect to a financial instrument that is recorded at fair value on a recurring basis under applicable accounting standards.

(c) *Presumption of compliance.* (1)(i) Each trading desk that does not purchase or sell financial instruments for a trading account defined in paragraphs (b)(1) or (b)(2) of this section may calculate the net gain or net loss on the trading desk's portfolio of financial instruments each business day, reflecting realized and unrealized gains and losses since the previous business day, based on the banking entity's fair value for such financial instruments.

(ii) If the sum of the absolute values of the daily net gain and loss figures determined in accordance with paragraph (c)(1)(i) of this section for the preceding 90-calendar-day period does not exceed $25 million, the activities of the trading desk shall be presumed to be in compliance with the prohibition in paragraph (a) of this section.

(2) The FDIC may rebut the presumption of compliance in paragraph (c)(1)(ii) of this section by providing written notice to the banking entity that the FDIC has determined that one or more of the banking entity's activities violates the prohibitions under subpart B.

(3) If a trading desk operating pursuant to paragraph (c)(1)(ii) of this section exceeds the $25 million threshold in that paragraph at any point, the banking entity shall, in accordance with any policies and procedures adopted by the FDIC:

(i) Promptly notify the FDIC;

(ii) Demonstrate that the trading desk's purchases and sales of financial instruments comply with subpart B; and

(iii) Demonstrate, with respect to the trading desk, how the banking entity will maintain compliance with subpart B on an ongoing basis.

* * * * *

(e) * * *

(3) Any purchase or sale of a security, foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or physically-settled cross-currency swap, by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that, with respect to such financial instruments:

(i) Specifically contemplates and authorizes the particular financial instruments to be used for liquidity management purposes, the amount, types, and risks of these financial instruments that are consistent with liquidity management, and the liquidity circumstances in which the particular financial instruments may or must be used;

(ii) Requires that any purchase or sale of financial instruments contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes;

(iii) Requires that any financial instruments purchased or sold for liquidity management purposes be highly liquid and limited to financial instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements;

(iv) Limits any financial instruments purchased or sold for liquidity management purposes, together with any other instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan;

(v) Includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of financial instruments that are not permitted under §§ 351.6(a) or (b) of this subpart are for the purpose of liquidity management and in accordance with the liquidity management plan described in paragraph (e)(3) of this section; and

(vi) Is consistent with the FDIC's supervisory requirements, guidance, and expectations regarding liquidity management;

* * * * *

(10) Any purchase (or sale) of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or excluded activity or is a subsequent

transaction to correct such an error, and the erroneously purchased (or sold) financial instrument is promptly transferred to a separately-managed trade error account for disposition.

(f) * * *

(5) Cross-currency swap means a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into.

* * * * *

(g) *Reservation of Authority:* (1) The FDIC may determine, on a case-by-case basis, that a purchase or sale of one or more financial instruments by a banking entity either is or is not for the trading account as defined at 12 U.S.C. 1851(h)(6).

(2) Notice and Response Procedures.

(i) Notice. When the FDIC determines that the purchase or sale of one or more financial instruments is for the trading account under paragraph (g)(1) of this section, the [Agency] will notify the banking entity in writing of the determination and provide an explanation of the determination.

(ii) Response.

(A) The banking entity may respond to any or all items in the notice. The response should include any matters that the banking entity would have the FDIC consider in deciding whether the purchase or sale is for the trading account. The response must be in writing and delivered to the designated FDIC official within 30 days after the date on which the banking entity received the notice. The FDIC may shorten the time period when, in the opinion of the FDIC, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the FDIC may extend the time period for good cause.

(B) Failure to respond within 30 days or such other time period as may be specified by the FDIC shall constitute a waiver of any objections to the FDIC's determination.

(iii) After the close of banking entity's response period, the FDIC will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the FDIC's determination that the purchase or sale of one or more financial instruments is for the trading account. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

■ 30. Amend § 351.4 is amended by:
■ a. Revising paragraph (a)(2);
■ b. Adding paragraph (a)(8);
■ c. Revising paragraph (b)(2);
■ d. Revising the introductory text of paragraph (b)(3)(i);
■ e. In paragraph (b)(5) removing ''*inventory*'' wherever it appears and adding ''*positions*'' in its place; and
■ f. Adding paragraph (b)(6).

The revisions and additions read as follows:

§ 351.4 Permitted underwriting and market making-related activities.

(a) * * *

(2) *Requirements.* The underwriting activities of a banking entity are permitted under paragraph (a)(1) of this section only if:

(i) The banking entity is acting as an underwriter for a distribution of securities and the trading desk's underwriting position is related to such distribution;

(ii)(A) The amount and type of the securities in the trading desk's underwriting position are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant type of security, and

(B) reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (a) of this section, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with paragraph (a)(8)(i) of this section;

(C) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(D) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

(iv) The compensation arrangements of persons performing the activities described in this paragraph (a) are designed not to reward or incentivize prohibited proprietary trading; and

(v) The banking entity is licensed or registered to engage in the activity described in this paragraph (a) in accordance with applicable law.

* * * * *

(8) *Rebuttable presumption of compliance.*

(i) *Risk limits.*

(A) A banking entity shall be presumed to meet the requirements of paragraph (a)(2)(ii)(A) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (a)(8)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (8)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(*1*) Amount, types, and risk of its underwriting position;

(*2*) Level of exposures to relevant risk factors arising from its underwriting position; and

(*3*) Period of time a security may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (a)(8)(i) of this section shall be subject to supervisory review and oversight by the FDIC on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (a)(8)(i) of this section, a banking entity shall promptly report to the FDIC (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the FDIC.

(iv) *Rebutting the presumption.* The presumption in paragraph (a)(8)(i) of this section may be rebutted by the FDIC if the FDIC determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The FDIC will provide notice of any such determination to the banking entity in writing.

(b) * * *

(2) *Requirements.* The market making-related activities of a banking entity are permitted under paragraph (b)(1) of this section only if:

(i) The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(ii) The trading desk's market-making related activities are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on the liquidity, maturity, and depth of the market for the relevant types of financial instrument(s).

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (b) of this section, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with paragraph (b)(2)(i) of this section;

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C) of this section; the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with paragraph (b)(6)(i) of this section;

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(E) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis that the basis for any temporary or permanent increase to a trading desk's limit(s) is consistent with the requirements of this paragraph (b), and independent review of such demonstrable analysis and approval;

(iv) In the case of a banking entity with significant trading assets and liabilities, to the extent that any limit identified pursuant to paragraph (b)(2)(iii)(C) of this section is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;

(v) The compensation arrangements of persons performing the activities described in this paragraph (b) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in activity described in paragraph (b) of this section in accordance with applicable law.

(3) * * *

(i) A trading desk or other organizational unit of another banking entity is not a client, customer, or counterparty of the trading desk if that other entity has trading assets and liabilities of $50 billion or more as measured in accordance with the methodology described in definition of ''*significant trading assets and liabilities*'' contained in § 351.2 of this part, unless:

* * * * *

(6) *Rebuttable presumption of compliance.*—(i) *Risk limits.* (A) A banking entity shall be presumed to meet the requirements of paragraph (b)(2)(ii) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (b)(6)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (6)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market making-related activities, on the:

(*1*) Amount, types, and risks of its market-maker positions;

(*2*) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(*3*) Level of exposures to relevant risk factors arising from its financial exposure; and

(*4*) Period of time a financial instrument may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (b)(6)(i) of this section shall be subject to supervisory review and oversight by the FDIC on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (b)(6)(i) of this section, a banking entity shall promptly report to the FDIC (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the FDIC.

(iv) *Rebutting the presumption.* The presumption in paragraph (b)(6)(i) of this section may be rebutted by the FDIC if the FDIC determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The FDIC will provide notice of any such determination to the banking entity in writing.

■ 31. Amend § 351.5 by revising paragraph (b), the introductory text of paragraph (c)(1), and adding paragraph (c)(4) to read as follows:

§ 351.5 Permitted risk-mitigating hedging activities.

* * * * *

(b) *Requirements.* (1) The risk-mitigating hedging activities of a banking entity that has significant trading assets and liabilities are permitted under paragraph (a) of this section only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures regarding the positions, techniques and strategies that may be used for hedging, including documentation indicating what positions, contracts or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts or other holdings;

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(C) The conduct of analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged;

(ii) The risk-mitigating hedging activity:

(A) Is conducted in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section;

(D) Is subject to continuing review, monitoring and management by the banking entity that:

(*1*) Is consistent with the written hedging policies and procedures required under paragraph (b)(1)(i) of this section;

(*2*) Is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging activities undertaken under this section and the underlying positions, contracts, and other holdings of the banking entity, based upon the facts and circumstances of the underlying and hedging positions, contracts and other holdings of the banking entity and the risks and liquidity thereof; and

(*3*) Requires ongoing recalibration of the hedging activity by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(1)(ii) of this section and is not prohibited proprietary trading; and

(iii) The compensation arrangements of persons performing risk-mitigating hedging activities are designed not to reward or incentivize prohibited proprietary trading.

(2) The risk-mitigating hedging activities of a banking entity that does not have significant trading assets and liabilities are permitted under paragraph (a) of this section only if the risk-mitigating hedging activity:

(i) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and

(ii) Is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(2) of this section and is not prohibited proprietary trading.

(c) * * * (1) A banking entity that has significant trading assets and liabilities must comply with the requirements of paragraphs (c)(2) and (3) of this section, unless the requirements of paragraph (c)(4) of this section are met, with respect to any purchase or sale of financial instruments made in reliance on this section for risk-mitigating hedging purposes that is:

* * * * *

(4) The requirements of paragraphs (c)(2) and (3) of this section do not apply to the purchase or sale of a financial instrument described in paragraph (c)(1) of this section if:

(i) The financial instrument purchased or sold is identified on a written list of pre-approved financial instruments that are commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold; and

(ii) At the time the financial instrument is purchased or sold, the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The hedging limits shall be appropriate for the:

(A) Size, types, and risks of the hedging activities commonly undertaken by the trading desk;

(B) Financial instruments purchased and sold for hedging activities by the trading desk; and

(C) Levels and duration of the risk exposures being hedged.

■ 32. Amend § 351.6 by revising paragraph (e)(3), and removing paragraph (e)(6) to read as follows:

§ 351.6 Other permitted proprietary trading activities.

* * * * *

(e) * * *

(3) A purchase or sale by a banking entity is permitted for purposes of this paragraph (e) if:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

§ 351.10 [Amended]

■ 33. Amend § 351.10 by:

■ a. In paragraph (c)(8)(i)(A) removing § 351.2(s)'' and adding § 351.2(u)'' in its place;

■ b. Removing paragraph (d)(1);

■ c. Redesignating paragraphs (d)(2) through (d)(10) as paragraphs (d)(1) through (d)(9);

■ d. In paragraph (d)(5)(i)(G) revising the reference to ''(d)(6)(i)(A)'' to read ''(d)(5)(i)(A)''; and

■ e. In paragraph (d)(9) revising the reference to ''(d)(9)'' to read ''(d)(8)'' and the reference to ''(d)(10)(i)(A)'' to read ''(d)(9)(i)(A)'' and the reference to ''(d)(10)(i)'' to read ''(d)(9)(i)''.

■ 34. Amend § 351. by revising paragraph (c) to read as follows:

§ 351.11 Permitted organizing and offering, underwriting, and market making with respect to a covered fund.

* * * * *

(c) *Underwriting and market making in ownership interests of a covered fund.* The prohibition contained in § 351.10(a) of this subpart does not apply to a banking entity's underwriting activities or market making-related activities involving a covered fund so long as:

(1) Those activities are conducted in accordance with the requirements of § 351.4(a) or § 351.4(b) of subpart B, respectively; and

(2) With respect to any banking entity (or any affiliate thereof) that: Acts as a sponsor, investment adviser or commodity trading advisor to a particular covered fund or otherwise acquires and retains an ownership interest in such covered fund in reliance on paragraph (a) of this section; or acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act (15 U.S.C. 78o–11(a)(3)), or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act (15 U.S.C. 78o–11) and the implementing regulations issued thereunder each as permitted by paragraph (b) of this section, then in each such case any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making related activities for that particular covered fund are included in the calculation of ownership interests permitted to be held by the banking entity and its affiliates under the limitations of § 351.12(a)(2)(ii); § 351.12(a)(2)(iii), and § 351.12(d) of this subpart.

§ 351.12 [Amended]

■ 35. Amend § 351.12 by:

■ a. In paragraphs (c)(1) and (d) removing ''§ 351.10(d)(6)(ii)'' to adding ''§ 351.10(d)(5)(ii)'' in its place;

■ b. Removing paragraph (e)(2)(vii); and

■ c. Redesignating the second instance of paragraph (e)(2)(vi) as paragraph (e)(2)(vii).

§ 351.13 [Amended]

■ 36. Amend § 351.13 by revising paragraphs (a) and (b)(3) and removing paragraph (b)(4)(iv) to read as follows:

§ 351.13 Other permitted covered fund activities and investments.

(a) *Permitted risk-mitigating hedging activities.* (1) The prohibition contained in § 351.10(a) of this subpart does not apply with respect to an ownership interest in a covered fund acquired or retained by a banking entity that is designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with:

(i) A compensation arrangement with an employee of the banking entity or an affiliate thereof that directly provides investment advisory, commodity trading advisory or other services to the covered fund; or

(ii) A position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.

(2) *Requirements.* The risk-mitigating hedging activities of a banking entity are permitted under this paragraph (a) only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program in accordance with subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures; and

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(ii) The acquisition or retention of the ownership interest:

(A) Is made in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedge, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising:

(*1*) out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund; or

(*2*) in connection with the compensation arrangement with the employee that directly provides investment advisory, commodity trading advisory, or other services to the covered fund;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section; and

(D) Is subject to continuing review, monitoring and management by the banking entity.

(iii) With respect to risk-mitigating hedging activity conducted pursuant to paragraph (a)(1)(i), the compensation arrangement relates solely to the covered fund in which the banking entity or any affiliate has acquired an ownership interest pursuant to paragraph (a)(1)(i) and such compensation arrangement provides that any losses incurred by the banking entity on such ownership interest will be offset by corresponding decreases in amounts payable under such compensation arrangement.

* * * * *

(b) * * *

(3) An ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of paragraph (b)(1)(iii) of this section only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of this paragraph (b)(3) to participate in any offer or sale by the covered fund of ownership interests in the covered fund.

* * * * *

■ 37. Section 351.14 is amended by revising paragraph (a)(2)(ii)(B) as follows:

§ 351.14 Limitations on relationships with a covered fund.

(a) * * *

(2) * * *

(ii) * * *

(B) The chief executive officer (or equivalent officer) of the banking entity certifies in writing annually no later than March 31 to the FDIC (with a duty to update the certification if the information in the certification materially changes) that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and

* * * * *

■ 38. Section 351.20 is amended by:

■ a. Revising paragraph (a);

■ b. Revising the introductory language of paragraph (b);

■ c. Revising paragraph (c);

■ d. Revising paragraph (d);

■ e. Revising the introductory language of paragraph (e);

■ f. Revising paragraph (f)(2); and

■ g. Adding new paragraphs (g) and (h).

The revisions read as follows:

§ 351.20 Program for compliance; reporting.

(a) *Program requirement.* Each banking entity (other than a banking entity with limited trading assets and liabilities) shall develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and this part. The terms, scope, and detail of the compliance program shall be appropriate for the types, size, scope, and complexity of activities and business structure of the banking entity.

(b) *Banking entities with significant trading assets and liabilities.* With respect to a banking entity with significant trading assets and liabilities, the compliance program required by paragraph (a) of this section, at a minimum, shall include:

* * * * *

(c) *CEO attestation.*

(1) The CEO of a banking entity described in paragraph (2) must, based on a review by the CEO of the banking entity, attest in writing to the FDIC, each year no later than March 31, that the banking entity has in place processes reasonably designed to achieve compliance with section 13 of the BHC Act and this part. In the case of a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

(2) The requirements of paragraph (c)(1) apply to a banking entity if:

(i) The banking entity does not have limited trading assets and liabilities; or

(ii) The FDIC notifies the banking entity in writing that it must satisfy the requirements contained in paragraph (c)(1).

(d) *Reporting requirements under the Appendix to this part.* (1) A banking entity engaged in proprietary trading activity permitted under subpart B shall comply with the reporting requirements described in the Appendix, if:

(i) The banking entity has significant trading assets and liabilities; or

(ii) The FDIC notifies the banking entity in writing that it must satisfy the reporting requirements contained in the Appendix.

(2) Frequency of reporting: Unless the FDIC notifies the banking entity in writing that it must report on a different basis, a banking entity with $50 billion or more in trading assets and liabilities (as calculated in accordance with the methodology described in the definition of ‘‘significant trading assets and liabilities’’ contained in § 351.2 of this part of this part) shall report the information required by the Appendix for each calendar month within 20 days of the end of each calendar month. Any other banking entity subject to the Appendix shall report the information required by the Appendix for each calendar quarter within 30 days of the end of that calendar quarter unless the FDIC notifies the banking entity in writing that it must report on a different basis.

(e) *Additional documentation for covered funds.* A banking entity with significant trading assets and liabilities shall maintain records that include:

* * * * *

(f) * * *

(2) *Banking entities with moderate trading assets and liabilities.* A banking entity with moderate trading assets and liabilities may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and this part and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.

(g) *Rebuttable presumption of compliance for banking entities with limited trading assets and liabilities.*

(1) *Rebuttable presumption.* Except as otherwise provided in this paragraph, a banking entity with limited trading assets and liabilities shall be presumed to be compliant with subpart B and subpart C and shall have no obligation to demonstrate compliance with this part on an ongoing basis.

(2) *Rebuttal of presumption.*

(i) If upon examination or audit, the FDIC determines that the banking entity has engaged in proprietary trading or covered fund activities that are otherwise prohibited under subpart B or subpart C, the FDIC may require the banking entity to be treated under this part as if it did not have limited trading assets and liabilities.

(ii) Notice and Response Procedures.

(A) Notice. The FDIC will notify the banking entity in writing of any determination pursuant to paragraph (g)(2)(i) of this section to rebut the presumption described in this paragraph (g) and will provide an explanation of the determination.

(B) Response.

(*1*) The banking entity may respond to any or all items in the notice described in paragraph (g)(2)(ii)(A) of this section. The response should include any matters that the banking entity would have the FDIC consider in deciding whether the banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The response must be in writing and delivered to the designated FDIC official within 30 days after the date on which the banking entity received the notice. The FDIC may shorten the time period when, in the opinion of the FDIC, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the FDIC may extend the time period for good cause.

(*2*) Failure to respond within 30 days or such other time period as may be specified by the FDIC shall constitute a waiver of any objections to the FDIC’s determination.

(C) After the close of banking entity’s response period, the FDIC will decide, based on a review of the banking entity’s response and other information concerning the banking entity, whether to maintain the FDIC’s determination that banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

(h) *Reservation of authority.* Notwithstanding any other provision of this part, the FDIC retains its authority to require a banking entity without significant trading assets and liabilities to apply any requirements of this part that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the FDIC determines that the size or complexity of the banking entity’s trading or investment activities, or the risk of evasion of subpart B or subpart C, does not warrant a presumption of compliance under paragraph (g) of this section or treatment as a banking entity with moderate trading assets and liabilities, as applicable.

■ 39. Remove Appendix A and Appendix B to Part 351 and add Appendix to Part 351—Reporting and Recordkeeping Requirements for Covered Trading Activities to read as follows:

Appendix to Part 351—Reporting and Recordkeeping Requirements for Covered Trading Activities

I. Purpose

a. This appendix sets forth reporting and recordkeeping requirements that certain banking entities must satisfy in connection with the restrictions on proprietary trading set forth in subpart B (‘‘proprietary trading restrictions’’). Pursuant to § 351.20(d), this appendix applies to a banking entity that, together with its affiliates and subsidiaries, has significant trading assets and liabilities. These entities are required to (i) furnish periodic reports to the FDIC regarding a variety of quantitative measurements of their covered trading activities, which vary depending on the scope and size of covered trading activities, and (ii) create and maintain records documenting the preparation and content of these reports. The requirements of this appendix must be incorporated into the banking entity's internal compliance program under § 351.20.

b. The purpose of this appendix is to assist banking entities and the FDIC in:

(i) Better understanding and evaluating the scope, type, and profile of the banking entity's covered trading activities;

(ii) Monitoring the banking entity's covered trading activities;

(iii) Identifying covered trading activities that warrant further review or examination by the banking entity to verify compliance with the proprietary trading restrictions;

(iv) Evaluating whether the covered trading activities of trading desks engaged in market making-related activities subject to § 351.4(b) are consistent with the requirements governing permitted market making-related activities;

(v) Evaluating whether the covered trading activities of trading desks that are engaged in permitted trading activity subject to §§ 351.4, 351.5, or 351.6(a)–(b) (*i.e.,* underwriting and market making-related related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies;

(vi) Identifying the profile of particular covered trading activities of the banking entity, and the individual trading desks of the banking entity, to help establish the appropriate frequency and scope of examination by the FDIC of such activities; and

(vii) Assessing and addressing the risks associated with the banking entity's covered trading activities.

c. Information that must be furnished pursuant to this appendix is not intended to serve as a dispositive tool for the identification of permissible or impermissible activities.

d. In addition to the quantitative measurements required in this appendix, a banking entity may need to develop and implement other quantitative measurements in order to effectively monitor its covered trading activities for compliance with section 13 of the BHC Act and this part and to have an effective compliance program, as required by § 351.20. The effectiveness of particular quantitative measurements may differ based on the profile of the banking entity's businesses in general and, more specifically, of the particular trading desk, including types of instruments traded, trading activities and strategies, and history and experience (*e.g.,* whether the trading desk is an established, successful market maker or a new entrant to a competitive market). In all cases, banking entities must ensure that they have robust measures in place to identify and monitor the risks taken in their trading activities, to ensure that the activities are within risk tolerances established by the banking entity, and to monitor and examine for compliance with the proprietary trading restrictions in this part.

e. On an ongoing basis, banking entities must carefully monitor, review, and evaluate all furnished quantitative measurements, as well as any others that they choose to utilize in order to maintain compliance with section 13 of the BHC Act and this part. All measurement results that indicate a heightened risk of impermissible proprietary trading, including with respect to otherwise-permitted activities under §§ 351.4 through 351.6(a)–(b), or that result in a material exposure to high-risk assets or high-risk trading strategies, must be escalated within the banking entity for review, further analysis, explanation to the FDIC, and remediation, where appropriate. The quantitative measurements discussed in this appendix should be helpful to banking entities in identifying and managing the risks related to their covered trading activities.

II. Definitions

The terms used in this appendix have the same meanings as set forth in §§ 351.2 and 351.3. In addition, for purposes of this appendix, the following definitions apply:

Applicability identifies the trading desks for which a banking entity is required to calculate and report a particular quantitative measurement based on the type of covered trading activity conducted by the trading desk.

Calculation period means the period of time for which a particular quantitative measurement must be calculated.

Comprehensive profit and loss means the net profit or loss of a trading desk's material sources of trading revenue over a specific period of time, including, for example, any increase or decrease in the market value of a trading desk's holdings, dividend income, and interest income and expense.

Covered trading activity means trading conducted by a trading desk under §§ 351.4, 351.5, 351.6(a), or 351.6(b). A banking entity may include in its covered trading activity trading conducted under §§ 351.3(e), 351.6(c), 351.6(d), or 351.6(e).

Measurement frequency means the frequency with which a particular quantitative metric must be calculated and recorded.

Trading day means a calendar day on which a trading desk is open for trading.

III. Reporting and Recordkeeping

a. Scope of Required Reporting

1. *Quantitative measurements.* Each banking entity made subject to this appendix by § 351.20 must furnish the following quantitative measurements, as applicable, for each trading desk of the banking entity engaged in covered trading activities and calculate these quantitative measurements in accordance with this appendix:

i. Risk and Position Limits and Usage;

ii. Risk Factor Sensitivities;

iii. Value-at-Risk and Stressed Value-at-Risk;

iv. Comprehensive Profit and Loss Attribution;

v. Positions;

vi. Transaction Volumes; and

vii. Securities Inventory Aging.

2. *Trading desk information.* Each banking entity made subject to this appendix by § 351.20 must provide certain descriptive information, as further described in this appendix, regarding each trading desk engaged in covered trading activities.

3. *Quantitative measurements identifying information.* Each banking entity made subject to this appendix by § 351.20 must provide certain identifying and descriptive information, as further described in this appendix, regarding its quantitative measurements.

4. *Narrative statement.* Each banking entity made subject to this appendix by § 351.20 must provide a separate narrative statement, as further described in this appendix.

5. *File identifying information.* Each banking entity made subject to this appendix by § 351.20 must provide file identifying information in each submission to the FDIC pursuant to this appendix, including the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, and identification of the reporting period and creation date and time.

b. Trading Desk Information

Each banking entity must provide descriptive information regarding each trading desk engaged in covered trading activities, including:

1. Name of the trading desk used internally by the banking entity and a unique identification label for the trading desk;

2. Identification of each type of covered trading activity in which the trading desk is engaged;

3. Brief description of the general strategy of the trading desk;

4. A list of the types of financial instruments and other products purchased and sold by the trading desk; an indication of which of these are the main financial instruments or products purchased and sold by the trading desk; and, for trading desks engaged in market making-related activities under § 351.4(b), specification of whether each type of financial instrument is included in market-maker positions or not included in market-maker positions. In addition, indicate whether the trading desk is including in its quantitative measurements products excluded from the definition of ''financial instrument'' under § 351.3(d)(2) and, if so, identify such products;

5. Identification by complete name of each legal entity that serves as a booking entity for covered trading activities conducted by the trading desk; and indication of which of the identified legal entities are the main booking entities for covered trading activities of the trading desk;

6. For each legal entity that serves as a booking entity for covered trading activities, specification of any of the following applicable entity types for that legal entity:

i. National bank, Federal branch or Federal agency of a foreign bank, Federal savings association, Federal savings bank;

ii. State nonmember bank, foreign bank having an insured branch, State savings association;

iii. U.S.-registered broker-dealer, U.S.-registered security-based swap dealer, U.S.-registered major security-based swap participant;

iv. Swap dealer, major swap participant, derivatives clearing organization, futures commission merchant, commodity pool operator, commodity trading advisor, introducing broker, floor trader, retail foreign exchange dealer;

v. State member bank;

vi. Bank holding company, savings and loan holding company;

vii. Foreign banking organization as defined in 12 CFR 211.21(o);

viii. Uninsured State-licensed branch or agency of a foreign bank; or

ix. Other entity type not listed above, including a subsidiary of a legal entity described above where the subsidiary itself is not an entity type listed above;

7. Indication of whether each calendar date is a trading day or not a trading day for the trading desk; and

8. Currency reported and daily currency conversion rate.

c. Quantitative Measurements Identifying Information

Each banking entity must provide the following information regarding the quantitative measurements:

1. A Risk and Position Limits Information Schedule that provides identifying and descriptive information for each limit reported pursuant to the Risk and Position Limits and Usage quantitative measurement, including the name of the limit, a unique identification label for the limit, a description of the limit, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit;

2. A Risk Factor Sensitivities Information Schedule that provides identifying and descriptive information for each risk factor sensitivity reported pursuant to the Risk Factor Sensitivities quantitative measurement, including the name of the sensitivity, a unique identification label for the sensitivity, a description of the sensitivity, and the sensitivity's risk factor change unit;

3. A Risk Factor Attribution Information Schedule that provides identifying and descriptive information for each risk factor attribution reported pursuant to the Comprehensive Profit and Loss Attribution quantitative measurement, including the name of the risk factor or other factor, a unique identification label for the risk factor or other factor, a description of the risk factor or other factor, and the risk factor or other factor's change unit;

4. A Limit/Sensitivity Cross-Reference Schedule that cross-references, by unique identification label, limits identified in the Risk and Position Limits Information Schedule to associated risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule; and

5. A Risk Factor Sensitivity/Attribution Cross-Reference Schedule that cross-references, by unique identification label, risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule to associated risk factor attributions identified in the Risk Factor Attribution Information Schedule.

d. Narrative Statement

Each banking entity made subject to this appendix by § 351.20 must submit in a separate electronic document a Narrative Statement to the FDIC describing any changes in calculation methods used, a description of and reasons for changes in the banking entity's trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement must include any information the banking entity views as relevant for assessing the information reported, such as further description of calculation methods used.

If a banking entity does not have any information to report in a Narrative Statement, the banking entity must submit an electronic document stating that it does not have any information to report in a Narrative Statement.

e. Frequency and Method of Required Calculation and Reporting

A banking entity must calculate any applicable quantitative measurement for each trading day. A banking entity must report the Narrative Statement, the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement electronically to the FDIC on the reporting schedule established in § 351.20 unless otherwise requested by the FDIC. A banking entity must report the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement to the FDIC in accordance with the XML Schema specified and published on the FDIC's website.

f. Recordkeeping

A banking entity must, for any quantitative measurement furnished to the FDIC pursuant to this appendix and § 351.20(d), create and maintain records documenting the preparation and content of these reports, as well as such information as is necessary to permit the FDIC to verify the accuracy of such reports, for a period of five years from the end of the calendar year for which the measurement was taken. A banking entity must retain the Narrative Statement, the Trading Desk Information, and the Quantitative Measurements Identifying Information for a period of five years from the end of the calendar year for which the information was reported to the FDIC.

IV. Quantitative Measurements

a. Risk-Management Measurements

1. Risk and Position Limits and Usage

i. *Description:* For purposes of this appendix, Risk and Position Limits are the constraints that define the amount of risk that a trading desk is permitted to take at a point in time, as defined by the banking entity for a specific trading desk. Usage represents the value of the trading desk's risk or positions that are accounted for by the current activity of the desk. Risk and position limits and their usage are key risk management tools used to control and monitor risk taking and include, but are not limited to, the limits set out in § 351.4 and § 351.5. A number of the metrics that are described below, including ''Risk Factor Sensitivities'' and ''Value-at-Risk,'' relate to a trading desk's risk and position limits and are useful in evaluating and setting these limits in the broader context of the trading desk's overall activities, particularly for the market making activities under § 351.4(b) and hedging activity under § 351.5. Accordingly, the limits required under § 351.4(b)(2)(iii) and § 351.5(b)(1)(i)(A) must meet the applicable requirements under § 351.4(b)(2)(iii) and § 351.5(b)(1)(i)(A) and also must include appropriate metrics for the trading desk limits including, at a minimum, the ''Risk Factor Sensitivities'' and ''Value-at-Risk'' metrics except to the extent any of the ''Risk Factor Sensitivities'' or ''Value-at-Risk'' metrics are demonstrably ineffective for measuring and monitoring the risks of a trading desk based on the types of positions traded by, and risk exposures of, that desk.

A. A banking entity must provide the following information for each limit reported pursuant to this quantitative measurement: The unique identification label for the limit reported in the Risk and Position Limits Information Schedule, the limit size (distinguishing between an upper and a lower limit), and the value of usage of the limit.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

2. Risk Factor Sensitivities

i. *Description:* For purposes of this appendix, Risk Factor Sensitivities are changes in a trading desk's Comprehensive Profit and Loss that are expected to occur in the event of a change in one or more underlying variables that are significant sources of the trading desk's profitability and risk. A banking entity must report the risk factor sensitivities that are monitored and managed as part of the trading desk's overall risk management policy. Reported risk factor sensitivities must be sufficiently granular to account for a preponderance of the expected price variation in the trading desk's holdings. A banking entity must provide the following information for each sensitivity that is reported pursuant to this quantitative measurement: The unique identification label for the risk factor sensitivity listed in the Risk Factor Sensitivities Information Schedule, the change in risk factor used to determine the risk factor sensitivity, and the aggregate change in value across all positions of the desk given the change in risk factor.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

3. Value-at-Risk and Stressed Value-at-Risk

i. *Description:* For purposes of this appendix, Value-at-Risk (''VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on current market conditions. For purposes of this appendix, Stressed

Value-at-Risk (''Stressed VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on market conditions during a period of significant financial stress.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* For VaR, all trading desks engaged in covered trading activities. For Stressed VaR, all trading desks engaged in covered trading activities, except trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of ''financial instrument'' under § ____.3(d)(2).

b. Source-of-Revenue Measurements

1. Comprehensive Profit and Loss Attribution

i. *Description:* For purposes of this appendix, Comprehensive Profit and Loss Attribution is an analysis that attributes the daily fluctuation in the value of a trading desk's positions to various sources. First, the daily profit and loss of the aggregated positions is divided into three categories: (i) Profit and loss attributable to a trading desk's existing positions that were also positions held by the trading desk as of the end of the prior day (''existing positions''); (ii) profit and loss attributable to new positions resulting from the current day's trading activity (''new positions''); and (iii) residual profit and loss that cannot be specifically attributed to existing positions or new positions. The sum of (i), (ii), and (iii) must equal the trading desk's comprehensive profit and loss at each point in time.

A. The comprehensive profit and loss associated with existing positions must reflect changes in the value of these positions on the applicable day.

The comprehensive profit and loss from existing positions must be further attributed, as applicable, to changes in (i) the specific risk factors and other factors that are monitored and managed as part of the trading desk's overall risk management policies and procedures; and (ii) any other applicable elements, such as cash flows, carry, changes in reserves, and the correction, cancellation, or exercise of a trade.

B. For the attribution of comprehensive profit and loss from existing positions to specific risk factors and other factors, a banking entity must provide the following information for the factors that explain the preponderance of the profit or loss changes due to risk factor changes: The unique identification label for the risk factor or other factor listed in the Risk Factor Attribution Information Schedule, and the profit or loss due to the risk factor or other factor change.

C. The comprehensive profit and loss attributed to new positions must reflect commissions and fee income or expense and market gains or losses associated with transactions executed on the applicable day. New positions include purchases and sales of financial instruments and other assets/liabilities and negotiated amendments to existing positions. The comprehensive profit and loss from new positions may be reported in the aggregate and does not need to be further attributed to specific sources.

D. The portion of comprehensive profit and loss that cannot be specifically attributed to known sources must be allocated to a residual category identified as an unexplained portion of the comprehensive profit and loss. Significant unexplained profit and loss must be escalated for further investigation and analysis.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

c. Positions, Transaction Volumes, and Securities Inventory Aging Measurements

1. Positions

i. *Description:* For purposes of this appendix, Positions is the value of securities and derivatives positions managed by the trading desk. For purposes of the Positions quantitative measurement, do not include in the Positions calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.'' [1] A banking entity must separately report the trading desk's market value of long securities positions, market value of short securities positions, market value of derivatives receivables, market value of derivatives payables, notional value of derivatives receivables, and notional value of derivatives payables.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 351.4(a) or § 351.4(b) to conduct underwriting activity or market-making-related activity, respectively.

2. Transaction Volumes

i. *Description:* For purposes of this appendix, Transaction Volumes measures four exclusive categories of covered trading activity conducted by a trading desk. A banking entity is required to report the value and number of security and derivative transactions conducted by the trading desk with: (i) Customers, excluding internal transactions; (ii) non-customers, excluding internal transactions; (iii) trading desks and other organizational units where the transaction is booked in the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity. For securities, value means gross market value. For derivatives, value means gross notional value. For purposes of calculating the Transaction Volumes quantitative measurement, do not include in the Transaction Volumes calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.'' [2] Further, for purposes of the Transaction Volumes quantitative measurement, a customer of a trading desk that relies on § 351.4(a) to conduct underwriting activity is a market participant identified in § 351.4(a)(7), and a customer of a trading desk that relies on § 351.4(b) to conduct market making-related activity is a market participant identified in § 351.4(b)(3).

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 351.4(a) or § 351.4(b) to conduct underwriting activity or market-making-related activity, respectively.

3. Securities Inventory Aging

i. *Description:* For purposes of this appendix, Securities Inventory Aging generally describes a schedule of the market value of the trading desk's securities positions and the amount of time that those securities positions have been held. Securities Inventory Aging must measure the age profile of a trading desk's securities positions for the following periods: 0–30 calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days. Securities Inventory Aging includes two schedules, a security asset-aging schedule, and a security liability-aging schedule. For purposes of the Securities Inventory Aging quantitative measurement, do not include securities that are also ''derivatives,'' as those terms are defined under subpart A.[3]

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 351.4(a) or § 351.4(b) to conduct underwriting activity or market-making related activity, respectively.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Chapter II

Authority and Issuance

For the reasons set forth in the Common Preamble, the Securities and Exchange Commission proposes to amend Part 255 to chapter II of Title 17 of the Code of Federal Regulations as follows:

PART 255—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS

■ 40. The authority for part 255 continues to read as follows:

Authority: 12 U.S.C. 1851

■ 41. Revise § 255.2 to read as follows:

§ 255.2 Definitions.

Unless otherwise specified, for purposes of this part:

(a) *Affiliate* has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(k)).

(b) *Applicable accounting standards* means U.S. generally accepted

[1] *See* §§ 351.2(i), (bb). For example, under this part, a security-based swap is both a ''security'' and a ''derivative.'' For purposes of the Positions quantitative measurement, security-based swaps are reported as derivatives rather than securities.

[2] *See* §§ 351.2(i), (bb).

[3] *See* §§ 351.2(i), (bb).

accounting principles, or such other accounting standards applicable to a banking entity that the SEC determines are appropriate and that the banking entity uses in the ordinary course of its business in preparing its consolidated financial statements.

(c) *Bank holding company* has the same meaning as in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).

(d) *Banking entity.* (1) Except as provided in paragraph (d)(2) of this section, *banking entity* means:

(i) Any insured depository institution;

(ii) Any company that controls an insured depository institution;

(iii) Any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and

(iv) Any affiliate or subsidiary of any entity described in paragraphs (d)(1)(i), (ii), or (iii) of this section.

(2) Banking entity does not include:

(i) A covered fund that is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section;

(ii) A portfolio company held under the authority contained in section 4(k)(4)(H) or (I) of the BHC Act (12 U.S.C. 1843(k)(4)(H), (I)), or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958 (15 U.S.C. 662), so long as the portfolio company or portfolio concern is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section; or

(iii) The FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(e) *Board* means the Board of Governors of the Federal Reserve System.

(f) *CFTC* means the Commodity Futures Trading Commission.

(g) *Dealer* has the same meaning as in section 3(a)(5) of the Exchange Act (15 U.S.C. 78c(a)(5)).

(h) *Depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)).

(i) *Derivative.* (1) Except as provided in paragraph (i)(2) of this section, *derivative* means:

(i) Any swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68));

(ii) Any purchase or sale of a commodity, that is not an excluded commodity, for deferred shipment or delivery that is intended to be physically settled;

(iii) Any foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)) or foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25));

(iv) Any agreement, contract, or transaction in foreign currency described in section 2(c)(2)(C)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(C)(i));

(v) Any agreement, contract, or transaction in a commodity other than foreign currency described in section 2(c)(2)(D)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(D)(i)); and

(vi) Any transaction authorized under section 19 of the Commodity Exchange Act (7 U.S.C. 23(a) or (b));

(2) A derivative does not include:

(i) Any consumer, commercial, or other agreement, contract, or transaction that the CFTC and SEC have further defined by joint regulation, interpretation, guidance, or other action as not within the definition of swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68)); or

(ii) Any identified banking product, as defined in section 402(b) of the Legal Certainty for Bank Products Act of 2000 (7 U.S.C. 27(b)), that is subject to section 403(a) of that Act (7 U.S.C. 27a(a)).

(j) *Employee* includes a member of the immediate family of the employee.

(k) *Exchange Act* means the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(l) *Excluded commodity* has the same meaning as in section 1a(19) of the Commodity Exchange Act (7 U.S.C. 1a(19)).

(m) *FDIC* means the Federal Deposit Insurance Corporation.

(n) *Federal banking agencies* means the Board, the Office of the Comptroller of the Currency, and the FDIC.

(o) *Foreign banking organization* has the same meaning as in section 211.21(o) of the Board's Regulation K (12 CFR 211.21(o)), but does not include a foreign bank, as defined in section 1(b)(7) of the International Banking Act of 1978 (12 U.S.C. 3101(7)), that is organized under the laws of the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, or the Commonwealth of the Northern Mariana Islands.

(p) *Foreign insurance regulator* means the insurance commissioner, or a similar official or agency, of any country other than the United States that is engaged in the supervision of insurance companies under foreign insurance law.

(q) *General account* means all of the assets of an insurance company except those allocated to one or more separate accounts.

(r) *Insurance company* means a company that is organized as an insurance company, primarily and predominantly engaged in writing insurance or reinsuring risks underwritten by insurance companies, subject to supervision as such by a state insurance regulator or a foreign insurance regulator, and not operated for the purpose of evading the provisions of section 13 of the BHC Act (12 U.S.C. 1851).

(s) *Insured depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)), but does not include an insured depository institution that is described in section 2(c)(2)(D) of the BHC Act (12 U.S.C. 1841(c)(2)(D)).

(t) *Limited trading assets and liabilities* means, with respect to a banking entity, that:

(1) The banking entity has, together with its affiliates and subsidiaries on a worldwide consolidated basis, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1,000,000,000; and

(2) The SEC has not determined pursuant to § 255.20(g) or (h) of this part that the banking entity should not be treated as having limited trading assets and liabilities.

(u) *Loan* means any loan, lease, extension of credit, or secured or unsecured receivable that is not a security or derivative.

(v) *Moderate trading assets and liabilities* means, with respect to a banking entity, that the banking entity does not have significant trading assets and liabilities or limited trading assets and liabilities.

(w) *Primary financial regulatory agency* has the same meaning as in section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)).

(x) *Purchase* includes any contract to buy, purchase, or otherwise acquire. For security futures products, purchase includes any contract, agreement, or transaction for future delivery. With respect to a commodity future, purchase includes any contract, agreement, or transaction for future delivery. With respect to a derivative, purchase includes the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(y) *Qualifying foreign banking organization* means a foreign banking organization that qualifies as such under section 211.23(a), (c) or (e) of the Board's Regulation K (12 CFR 211.23(a), (c), or (e)).

(z) *SEC* means the Securities and Exchange Commission.

(aa) *Sale* and *sell* each include any contract to sell or otherwise dispose of. For security futures products, such terms include any contract, agreement, or transaction for future delivery. With respect to a commodity future, such terms include any contract, agreement, or transaction for future delivery. With respect to a derivative, such terms include the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(bb) *Security* has the meaning specified in section 3(a)(10) of the Exchange Act (15 U.S.C. 78c(a)(10)).

(cc) *Security-based swap dealer* has the same meaning as in section 3(a)(71) of the Exchange Act (15 U.S.C. 78c(a)(71)).

(dd) *Security future* has the meaning specified in section 3(a)(55) of the Exchange Act (15 U.S.C. 78c(a)(55)).

(ee) *Separate account* means an account established and maintained by an insurance company in connection with one or more insurance contracts to hold assets that are legally segregated from the insurance company's other assets, under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.

(ff) *Significant trading assets and liabilities.*

(1) *Significant trading assets and liabilities* means, with respect to a banking entity, that:

(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10,000,000,000; or

(ii) The SEC has determined pursuant to § 255.20(h) of this part that the banking entity should be treated as having significant trading assets and liabilities.

(2) With respect to a banking entity other than a banking entity described in paragraph (3), trading assets and liabilities for purposes of this paragraph (ff) means trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (ff) means the trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

(ii) For purposes of paragraph (ff)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary.

(gg) *State* means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(hh) *Subsidiary* has the same meaning as in section 2(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(d)).

(ii) *State insurance regulator* means the insurance commissioner, or a similar official or agency, of a State that is engaged in the supervision of insurance companies under State insurance law.

(jj) *Swap dealer* has the same meaning as in section 1(a)(49) of the Commodity Exchange Act (7 U.S.C. 1a(49)).

■ 42. Amend § 255.3 is amended by:
■ a. Revising paragraph (b);
■ b. Redesignating paragraphs (c) through (e) as paragraphs (d) through (f);
■ c. Adding a new paragraph (c);
■ d. Revising paragraph (e)(3);
■ e. Adding paragraph (e)(10);
■ f. Redesignating paragraphs (f)(5) through (f)(13) as paragraphs (f)(6) through (f)(14);
■ g. Adding a new paragraph (f)(5); and
■ h. Adding paragraph (g).

The revisions and additions read as follows:

§ 255.3 Prohibition on proprietary trading.

* * * * *

(b) *Definition of trading account. Trading account* means any account that is used by a banking entity to:

(1)(i) Purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule; or

(ii) With respect to a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, purchase or sell one or more financial instruments that are subject to capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended from time to time.

(2) Purchase or sell one or more financial instruments for any purpose, if the banking entity:

(i) Is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or

(ii) Is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business; or

(3) Purchase or sell one or more financial instruments, with respect to a financial instrument that is recorded at fair value on a recurring basis under applicable accounting standards.

(c) *Presumption of compliance.* (1)(i) Each trading desk that does not purchase or sell financial instruments for a trading account defined in paragraphs (b)(1) or (b)(2) of this section may calculate the net gain or net loss on the trading desk's portfolio of financial instruments each business day, reflecting realized and unrealized gains and losses since the previous business day, based on the banking entity's fair value for such financial instruments.

(ii) If the sum of the absolute values of the daily net gain and loss figures determined in accordance with paragraph (c)(1)(i) of this section for the preceding 90-calendar-day period does not exceed $25 million, the activities of the trading desk shall be presumed to be in compliance with the prohibition in paragraph (a) of this section.

(2) The SEC may rebut the presumption of compliance in paragraph (c)(1)(ii) of this section by providing written notice to the banking entity that the SEC has determined that one or more of the banking entity's activities violates the prohibitions under subpart B.

(3) If a trading desk operating pursuant to paragraph (c)(1)(ii) of this section exceeds the $25 million threshold in that paragraph at any point, the banking entity shall, in accordance with any policies and procedures adopted by the SEC:

(i) Promptly notify the SEC;

(ii) Demonstrate that the trading desk's purchases and sales of financial instruments comply with subpart B; and

(iii) Demonstrate, with respect to the trading desk, how the banking entity will maintain compliance with subpart B on an ongoing basis.

* * * * *

(e) * * *

(3) Any purchase or sale of a security, foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or physically-settled cross-currency swap, by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that, with respect to such financial instruments:

(i) Specifically contemplates and authorizes the particular financial instruments to be used for liquidity management purposes, the amount, types, and risks of these financial instruments that are consistent with liquidity management, and the liquidity circumstances in which the particular financial instruments may or must be used;

(ii) Requires that any purchase or sale of financial instruments contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes;

(iii) Requires that any financial instruments purchased or sold for liquidity management purposes be highly liquid and limited to financial instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements;

(iv) Limits any financial instruments purchased or sold for liquidity management purposes, together with any other instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan;

(v) Includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of financial instruments that are not permitted under §§ 255.6(a) or (b) of this subpart are for the purpose of liquidity management and in accordance with the liquidity management plan described in paragraph (e)(3) of this section; and

(vi) Is consistent with the SEC's supervisory requirements, guidance, and expectations regarding liquidity management;

* * * * *

(10) Any purchase (or sale) of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or excluded activity or is a subsequent transaction to correct such an error, and the erroneously purchased (or sold) financial instrument is promptly transferred to a separately-managed trade error account for disposition.

(f) * * *

(5) *Cross-currency swa*p means a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into.

* * * * *

(g) *Reservation of Authority:* (1) The SEC may determine, on a case-by-case basis, that a purchase or sale of one or more financial instruments by a banking entity either is or is not for the trading account as defined at 12 U.S.C. 1851(h)(6).

(2) *Notice and Response Procedures.* (i) Notice. When the SEC determines that the purchase or sale of one or more financial instruments is for the trading account under paragraph (g)(1) of this section, the SEC will notify the banking entity in writing of the determination and provide an explanation of the determination.

(ii) *Response.* (A) The banking entity may respond to any or all items in the notice. The response should include any matters that the banking entity would have the SEC consider in deciding whether the purchase or sale is for the trading account. The response must be in writing and delivered to the designated SEC official within 30 days after the date on which the banking entity received the notice. The SEC may shorten the time period when, in the opinion of the SEC, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the SEC may extend the time period for good cause.

(B) Failure to respond within 30 days or such other time period as may be specified by the SEC shall constitute a waiver of any objections to the SEC's determination.

(iii) After the close of banking entity's response period, the SEC will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the SEC's determination that the purchase or sale of one or more financial instruments is for the trading account. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

■ 43. Amend § 255.4 by:

■ a. Revising paragraph (a)(2);

■ b. Adding paragraph (a)(8);

■ c. Revising paragraph (b)(2);

■ d. Revising the introductory text of paragraph (b)(3)(i);

■ e. In paragraph (b)(5) removing the references to ''*inventory*'' and replacing them with ''*positions*''*;* and

■ f. Adding paragraph (b)(6).

The revisions and additions read as follows:

§ 255.4 Permitted underwriting and market making-related activities.

(a) * * *

(2) *Requirements.* The underwriting activities of a banking entity are permitted under paragraph (a)(1) of this section only if:

(i) The banking entity is acting as an underwriter for a distribution of securities and the trading desk's underwriting position is related to such distribution;

(ii) (A) The amount and type of the securities in the trading desk's underwriting position are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant type of security, and (B) reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (a) of this section, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with paragraph (a)(8)(i) of this section;

(C) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(D) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

(iv) The compensation arrangements of persons performing the activities described in this paragraph (a) are designed not to reward or incentivize prohibited proprietary trading; and

(v) The banking entity is licensed or registered to engage in the activity described in this paragraph (a) in accordance with applicable law.

* * * * *

(8) *Rebuttable presumption of compliance.*

(i) *Risk limits.*

(A) A banking entity shall be presumed to meet the requirements of paragraph (a)(2)(ii)(A) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (a)(8)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (8)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(*1*) Amount, types, and risk of its underwriting position;

(*2*) Level of exposures to relevant risk factors arising from its underwriting position; and

(*3*) Period of time a security may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (a)(8)(i) of this section shall be subject to supervisory review and oversight by the SEC on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (a)(8)(i) of this section, a banking entity shall promptly report to the SEC (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the SEC.

(iv) *Rebutting the presumption.* The presumption in paragraph (a)(8)(i) of this section may be rebutted by the SEC if the SEC determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The SEC will provide notice of any such determination to the banking entity in writing.

(b) * * *

(2) *Requirements.* The market making-related activities of a banking entity are permitted under paragraph (b)(1) of this section only if:

(i) The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(ii) The trading desk's market-making related activities are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on the liquidity, maturity, and depth of the market for the relevant types of financial instrument(s).

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (b) of this section, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with paragraph (b)(2)(i) of this section;

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C) of this section; the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with paragraph (b)(6)(i) of this section;

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(E) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis that the basis for any temporary or permanent increase to a trading desk's limit(s) is consistent with the requirements of this paragraph (b), and independent review of such demonstrable analysis and approval;

(iv) In the case of a banking entity with significant trading assets and liabilities, to the extent that any limit identified pursuant to paragraph (b)(2)(iii)(C) of this section is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;

(v) The compensation arrangements of persons performing the activities described in this paragraph (b) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in activity described in this paragraph (b) in accordance with applicable law.

(3) * * *

(i) A trading desk or other organizational unit of another banking entity is not a client, customer, or counterparty of the trading desk if that other entity has trading assets and liabilities of $50 billion or more as measured in accordance with the methodology described in definition of ''significant trading assets and liabilities'' contained in § 255.2 of this part, unless:

* * * * *

(6) *Rebuttable presumption of compliance.*

(i) *Risk limits.*

(A) A banking entity shall be presumed to meet the requirements of paragraph (b)(2)(ii) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (b)(6)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (6)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market making-related activities, on the:

(*1*) Amount, types, and risks of its market-maker positions;

(*2*) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(*3*) Level of exposures to relevant risk factors arising from its financial exposure; and

(*4*) Period of time a financial instrument may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (b)(6)(i) of this section shall be subject to supervisory review and oversight by the SEC on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (b)(6)(i) of this section, a banking entity shall promptly report to the SEC (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the SEC.

(iv) *Rebutting the presumption.* The presumption in paragraph (b)(6)(i) of this section may be rebutted by the SEC if the SEC determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The SEC will provide notice of any such determination to the banking entity in writing.

■ 45. Amend § 255.5 by revising paragraph (b), the introductory text of paragraph (c)(1), and adding paragraph (c)(4) to read as follows:

§ 255.5 Permitted risk-mitigating hedging activities.

* * * * *

(b) *Requirements.*

(1) The risk-mitigating hedging activities of a banking entity that has significant trading assets and liabilities are permitted under paragraph (a) of this section only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures regarding the positions, techniques and strategies that may be used for hedging, including documentation indicating what positions, contracts or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts or other holdings;

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(C) The conduct of analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged;

(ii) The risk-mitigating hedging activity:

(A) Is conducted in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section;

(D) Is subject to continuing review, monitoring and management by the banking entity that:

(*1*) Is consistent with the written hedging policies and procedures required under paragraph (b)(1)(i) of this section;

(*2*) Is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging activities undertaken under this section and the underlying positions, contracts, and other holdings of the banking entity, based upon the facts and circumstances of the underlying and hedging positions, contracts and other holdings of the banking entity and the risks and liquidity thereof; and

(*3*) Requires ongoing recalibration of the hedging activity by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(1)(ii) of this section and is not prohibited proprietary trading; and

(iii) The compensation arrangements of persons performing risk-mitigating hedging activities are designed not to reward or incentivize prohibited proprietary trading.

(2) The risk-mitigating hedging activities of a banking entity that does not have significant trading assets and liabilities are permitted under paragraph (a) of this section only if the risk-mitigating hedging activity:

(i) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and

(ii) Is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(2) of this section and is not prohibited proprietary trading.

(c) * * * (1) A banking entity that has significant trading assets and liabilities must comply with the requirements of paragraphs (c)(2) and (3) of this section, unless the requirements of paragraph (c)(4) of this section are met, with respect to any purchase or sale of financial instruments made in reliance on this section for risk-mitigating hedging purposes that is:

* * * * *

(4) The requirements of paragraphs (c)(2) and (3) of this section do not apply to the purchase or sale of a financial instrument described in paragraph (c)(1) of this section if:

(i) The financial instrument purchased or sold is identified on a written list of pre-approved financial instruments that are commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold; and

(ii) At the time the financial instrument is purchased or sold, the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The hedging limits shall be appropriate for the:

(A) Size, types, and risks of the hedging activities commonly undertaken by the trading desk;

(B) Financial instruments purchased and sold for hedging activities by the trading desk; and

(C) Levels and duration of the risk exposures being hedged.

■ 46. Amend § 255.6 by revising paragraph (e)(3), and removing paragraph (e)(6) to read as follows:

§ 255.6 Other permitted proprietary trading activities.

* * * * *

(e) * * *

(3) A purchase or sale by a banking entity is permitted for purposes of this paragraph (e) if:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

§ 255.10 [Amended]

■ 47. Amend § 255.10 by:

■ a. In paragraph (c)(8)(i)(A) revising the reference to ''§ 255.2(s)'' to read ''§ 255.2(u)'';

■ b. Removing paragraph (d)(1);

■ c. Redesignating paragraphs (d)(2) through (d)(10) as paragraphs (d)(1) through (d)(9);

■ d. In paragraph (d)(5)(i)(G) revising the reference to ''(d)(6)(i)(A)'' to read ''(d)(5)(i)(A)''; and

■ e. In paragraph (d)(9) revising the reference to ''(d)(9)'' to read ''(d)(8)'' and the reference to ''(d)(10)(i)(A)'' to read ''(d)(9)(i)(A)'' and the reference to ''(d)(10)(i)'' to read ''(d)(9)(i)''.

■ 48. Amend § 255.11 by revising paragraph (c) to read as follows:

§ 255.11 Permitted organizing and offering, underwriting, and market making with respect to a covered fund.

* * * * *

(c) *Underwriting and market making in ownership interests of a covered fund.* The prohibition contained in § 255.10(a) of this subpart does not apply to a banking entity's underwriting activities or market making-related activities involving a covered fund so long as:

(1) Those activities are conducted in accordance with the requirements of § 255.4(a) or § 255.4(b) of subpart B, respectively; and

(2) With respect to any banking entity (or any affiliate thereof) that: Acts as a sponsor, investment adviser or commodity trading advisor to a particular covered fund or otherwise acquires and retains an ownership interest in such covered fund in reliance on paragraph (a) of this section; or acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act (15 U.S.C. 78*o*–11(a)(3)), or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act (15 U.S.C.78*o*–11) and the implementing regulations issued thereunder each as permitted by paragraph (b) of this section, then in each such case any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making related activities for that particular covered fund are included in the calculation of ownership interests permitted to be held by the banking entity and its affiliates under the limitations of § 255.12(a)(2)(ii); § 255.12(a)(2)(iii), and § 255.12(d) of this subpart.4

§ 255.12 [Amended]

■ 49. Amend § 255.12 by:

■ a. In paragraphs (c)(1) and (d) revising the references to ''§ 255.10(d)(6)(ii)'' to read ''§ 255.10(d)(5)(ii)'';

■ b. Removing paragraph (e)(2)(vii); and

■ c. Redesignating the second instance of paragraph (e)(2)(vi) as paragraph (e)(2)(vii).

■ 50. Amend § 255.13 by revising paragraphs (a) and (b)(3), and removing paragraph (b)(4)(iv) to read as follows:

§ 255.13 Other permitted covered fund activities and investments.

(a) *Permitted risk-mitigating hedging activities.* (1) The prohibition contained in § 255.10(a) of this subpart does not apply with respect to an ownership interest in a covered fund acquired or retained by a banking entity that is designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with:

(i) A compensation arrangement with an employee of the banking entity or an affiliate thereof that directly provides investment advisory, commodity trading advisory or other services to the covered fund; or

(ii) A position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.

(2) *Requirements.* The risk-mitigating hedging activities of a banking entity are permitted under this paragraph (a) only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program in accordance with subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures; and

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(ii) The acquisition or retention of the ownership interest:

(A) Is made in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedge, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising (1) out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund or (2) in connection with the compensation arrangement with the employee that directly provides investment advisory, commodity trading advisory, or other services to the covered fund;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section; and

(D) Is subject to continuing review, monitoring and management by the banking entity.

(iii) With respect to risk-mitigating hedging activity conducted pursuant to paragraph (a)(1)(i), the compensation arrangement relates solely to the covered fund in which the banking entity or any affiliate has acquired an ownership interest pursuant to paragraph (a)(1)(i) and such compensation arrangement provides that any losses incurred by the banking entity on such ownership interest will be offset by corresponding decreases in amounts payable under such compensation arrangement.

* * * * *

(b) * * *

(3) An ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of paragraph (b)(1)(iii) of this section only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of this paragraph (b)(3) to participate in any offer or sale by the covered fund of ownership interests in the covered fund.

* * * * *

■ 51. Amend § 255.14 by revising paragraph (a)(2)(ii)(B) as follows:

§ 255.14 Limitations on relationships with a covered fund.

(a) * * *

(2) * * *

(ii) * * *

(B) The chief executive officer (or equivalent officer) of the banking entity certifies in writing annually no later than March 31 to the SEC (with a duty to update the certification if the information in the certification materially changes) that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and

* * * * *

■ 52. Amend § 255.20 by:

■ a. Revising paragraphs (a), (c), (d), and (f)(2);

■ b. Revising the introductory text of paragraphs (b) and (e);

■ c. Adding new paragraphs (g) and (h).

The revisions read as follows:

§ 255.20 Program for compliance; reporting.

* * * * *

(a) *Program requirement.* Each banking entity (other than a banking entity with limited trading assets and liabilities) shall develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and this part. The terms, scope, and detail of the compliance program shall be appropriate for the types, size, scope, and complexity of activities and business structure of the banking entity.

(b) *Banking entities with significant trading assets and liabilities.* With respect to a banking entity with significant trading assets and liabilities, the compliance program required by paragraph (a) of this section, at a minimum, shall include:

* * * * *

(c) *CEO attestation.*

(1) The CEO of a banking entity described in paragraph (2) must, based on a review by the CEO of the banking entity, attest in writing to the SEC, each year no later than March 31, that the banking entity has in place processes reasonably designed to achieve compliance with section 13 of the BHC Act and this part. In the case of a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

(2) The requirements of paragraph (c)(1) apply to a banking entity if:

(i) The banking entity does not have limited trading assets and liabilities; or

(ii) The SEC notifies the banking entity in writing that it must satisfy the requirements contained in paragraph (c)(1).

(d) *Reporting requirements under the Appendix to this part.* (1) A banking entity engaged in proprietary trading activity permitted under subpart B shall comply with the reporting requirements described in the Appendix, if:

(i) The banking entity has significant trading assets and liabilities; or

(ii) The SEC notifies the banking entity in writing that it must satisfy the reporting requirements contained in the Appendix.

(2) Frequency of reporting: Unless the SEC notifies the banking entity in writing that it must report on a different basis, a banking entity with $50 billion or more in trading assets and liabilities (as calculated in accordance with the methodology described in the definition of ‘‘significant trading assets and liabilities’’ contained in § 255.2 of this part) shall report the information required by the Appendix for each calendar month within 20 days of the end of each calendar month. Any other banking entity subject to the Appendix shall report the information required by the Appendix for each calendar quarter within 30 days of the end of that calendar quarter unless the SEC notifies the banking entity in writing that it must report on a different basis.

(e) *Additional documentation for covered funds.* A banking entity with significant trading assets and liabilities shall maintain records that include:

* * * * *

(f) * * *

(2) *Banking entities with moderate trading assets and liabilities.* A banking entity with moderate trading assets and liabilities may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and this part and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.

(g) *Rebuttable presumption of compliance for banking entities with limited trading assets and liabilities.*

(1) *Rebuttable presumption.* Except as otherwise provided in this paragraph, a banking entity with limited trading assets and liabilities shall be presumed to be compliant with subpart B and

subpart C and shall have no obligation to demonstrate compliance with this part on an ongoing basis.

(2) *Rebuttal of presumption.*

(i) If upon examination or audit, the SEC determines that the banking entity has engaged in proprietary trading or covered fund activities that are otherwise prohibited under subpart B or subpart C, the SEC may require the banking entity to be treated under this part as if it did not have limited trading assets and liabilities.

(ii) Notice and Response Procedures.

(A) Notice. The SEC will notify the banking entity in writing of any determination pursuant to paragraph (g)(2)(i) of this section to rebut the presumption described in this paragraph (g) and will provide an explanation of the determination.

(B) Response.

(I) The banking entity may respond to any or all items in the notice described in paragraph (g)(2)(ii)(A) of this section. The response should include any matters that the banking entity would have the SEC consider in deciding whether the banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The response must be in writing and delivered to the designated SEC official within 30 days after the date on which the banking entity received the notice. The SEC may shorten the time period when, in the opinion of the SEC, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the SEC may extend the time period for good cause.

(II) Failure to respond within 30 days or such other time period as may be specified by the SEC shall constitute a waiver of any objections to the SEC's determination.

(C) After the close of banking entity's response period, the SEC will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the SEC's determination that banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

(h) *Reservation of authority.* Notwithstanding any other provision of this part, the SEC retains its authority to require a banking entity without significant trading assets and liabilities to apply any requirements of this part that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the SEC determines that the size or complexity of the banking entity's trading or investment activities, or the risk of evasion of subpart B or subpart C, does not warrant a presumption of compliance under paragraph (g) of this section or treatment as a banking entity with moderate trading assets and liabilities, as applicable.

■ 53. Remove Appendix A and Appendix B to part 255 and add Appendix to Part 255—Reporting and Recordkeeping Requirements for Covered Trading Activities to read as follows:

Appendix to Part 255—Reporting and Recordkeeping Requirements for Covered Trading Activities

I. Purpose

a. This appendix sets forth reporting and recordkeeping requirements that certain banking entities must satisfy in connection with the restrictions on proprietary trading set forth in subpart B (''proprietary trading restrictions''). Pursuant to § 255.20(d), this appendix applies to a banking entity that, together with its affiliates and subsidiaries, has significant trading assets and liabilities. These entities are required to (i) furnish periodic reports to the SEC regarding a variety of quantitative measurements of their covered trading activities, which vary depending on the scope and size of covered trading activities, and (ii) create and maintain records documenting the preparation and content of these reports. The requirements of this appendix must be incorporated into the banking entity's internal compliance program under § 255.20.

b. The purpose of this appendix is to assist banking entities and the SEC in:

(i) Better understanding and evaluating the scope, type, and profile of the banking entity's covered trading activities;

(ii) Monitoring the banking entity's covered trading activities;

(iii) Identifying covered trading activities that warrant further review or examination by the banking entity to verify compliance with the proprietary trading restrictions;

(iv) Evaluating whether the covered trading activities of trading desks engaged in market making-related activities subject to § 255.4(b) are consistent with the requirements governing permitted market making-related activities;

(v) Evaluating whether the covered trading activities of trading desks that are engaged in permitted trading activity subject to §§ 255.4, 255.5, or 255.6(a)–(b) (*i.e.,* underwriting and market making-related related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies;

(vi) Identifying the profile of particular covered trading activities of the banking entity, and the individual trading desks of the banking entity, to help establish the appropriate frequency and scope of examination by the SEC of such activities; and

(vii) Assessing and addressing the risks associated with the banking entity's covered trading activities.

c. Information that must be furnished pursuant to this appendix is *not* intended to serve as a dispositive tool for the identification of permissible or impermissible activities.

d. In addition to the quantitative measurements required in this appendix, a banking entity may need to develop and implement other quantitative measurements in order to effectively monitor its covered trading activities for compliance with section 13 of the BHC Act and this part and to have an effective compliance program, as required by § 255.20. The effectiveness of particular quantitative measurements may differ based on the profile of the banking entity's businesses in general and, more specifically, of the particular trading desk, including types of instruments traded, trading activities and strategies, and history and experience (*e.g.,* whether the trading desk is an established, successful market maker or a new entrant to a competitive market). In all cases, banking entities must ensure that they have robust measures in place to identify and monitor the risks taken in their trading activities, to ensure that the activities are within risk tolerances established by the banking entity, and to monitor and examine for compliance with the proprietary trading restrictions in this part.

e. On an ongoing basis, banking entities must carefully monitor, review, and evaluate all furnished quantitative measurements, as well as any others that they choose to utilize in order to maintain compliance with section 13 of the BHC Act and this part. All measurement results that indicate a heightened risk of impermissible proprietary trading, including with respect to otherwise-permitted activities under §§ 255.4 through 255.6(a)–(b), or that result in a material exposure to high-risk assets or high-risk trading strategies, must be escalated within the banking entity for review, further analysis, explanation to the SEC, and remediation, where appropriate. The quantitative measurements discussed in this appendix should be helpful to banking entities in identifying and managing the risks related to their covered trading activities.

II. Definitions

The terms used in this appendix have the same meanings as set forth in §§ 255.2 and 255.3. In addition, for purposes of this appendix, the following definitions apply:

Applicability identifies the trading desks for which a banking entity is required to calculate and report a particular quantitative measurement based on the type of covered trading activity conducted by the trading desk.

Calculation period means the period of time for which a particular quantitative measurement must be calculated.

Comprehensive profit and loss means the net profit or loss of a trading desk's material sources of trading revenue over a specific period of time, including, for example, any increase or decrease in the market value of a trading desk's holdings, dividend income, and interest income and expense.

Covered trading activity means trading conducted by a trading desk under §§ 255.4, 255.5, 255.6(a), or 255.6(b). A banking entity may include in its covered trading activity trading conducted under §§ 255.3(e), 255.6(c), 255.6(d), or 255.6(e).

Measurement frequency means the frequency with which a particular quantitative metric must be calculated and recorded.

Trading day means a calendar day on which a trading desk is open for trading.

III. Reporting and Recordkeeping

a. Scope of Required Reporting

1. *Quantitative measurements.* Each banking entity made subject to this appendix by § 255.20 must furnish the following quantitative measurements, as applicable, for each trading desk of the banking entity engaged in covered trading activities and calculate these quantitative measurements in accordance with this appendix:

i. Risk and Position Limits and Usage;

ii. Risk Factor Sensitivities;

iii. Value-at-Risk and Stressed Value-at-Risk;

iv. Comprehensive Profit and Loss Attribution;

v. Positions;

vi. Transaction Volumes; and

vii. Securities Inventory Aging.

2. *Trading desk information.* Each banking entity made subject to this appendix by § 255.20 must provide certain descriptive information, as further described in this appendix, regarding each trading desk engaged in covered trading activities.

3. *Quantitative measurements identifying information.* Each banking entity made subject to this appendix by § 255.20 must provide certain identifying and descriptive information, as further described in this appendix, regarding its quantitative measurements.

4. *Narrative statement.* Each banking entity made subject to this appendix by § 255.20 must provide a separate narrative statement, as further described in this appendix.

5. *File identifying information.* Each banking entity made subject to this appendix by § 255.20 must provide file identifying information in each submission to the SEC pursuant to this appendix, including the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, and identification of the reporting period and creation date and time.

b. Trading Desk Information

Each banking entity must provide descriptive information regarding each trading desk engaged in covered trading activities, including:

1. Name of the trading desk used internally by the banking entity and a unique identification label for the trading desk;

2. Identification of each type of covered trading activity in which the trading desk is engaged;

3. Brief description of the general strategy of the trading desk;

4. A list of the types of financial instruments and other products purchased and sold by the trading desk; an indication of which of these are the main financial instruments or products purchased and sold by the trading desk; and, for trading desks engaged in market making-related activities under § 255.4(b), specification of whether each type of financial instrument is included in market-maker positions or not included in market-maker positions. In addition, indicate whether the trading desk is including in its quantitative measurements products excluded from the definition of ''financial instrument'' under § 255.3(d)(2) and, if so, identify such products;

5. Identification by complete name of each legal entity that serves as a booking entity for covered trading activities conducted by the trading desk; and indication of which of the identified legal entities are the main booking entities for covered trading activities of the trading desk;

6. For each legal entity that serves as a booking entity for covered trading activities, specification of any of the following applicable entity types for that legal entity:

i. National bank, Federal branch or Federal agency of a foreign bank, Federal savings association, Federal savings bank;

ii. State nonmember bank, foreign bank having an insured branch, State savings association;

iii. U.S.-registered broker-dealer, U.S.-registered security-based swap dealer, U.S.-registered major security-based swap participant;

iv. Swap dealer, major swap participant, derivatives clearing organization, futures commission merchant, commodity pool operator, commodity trading advisor, introducing broker, floor trader, retail foreign exchange dealer;

v. State member bank;

vi. Bank holding company, savings and loan holding company;

vii. Foreign banking organization as defined in 12 CFR 211.21(o);

viii. Uninsured State-licensed branch or agency of a foreign bank; or

ix. Other entity type not listed above, including a subsidiary of a legal entity described above where the subsidiary itself is not an entity type listed above;

7. Indication of whether each calendar date is a trading day or not a trading day for the trading desk; and

8. Currency reported and daily currency conversion rate.

c. Quantitative Measurements Identifying Information

Each banking entity must provide the following information regarding the quantitative measurements:

1. A Risk and Position Limits Information Schedule that provides identifying and descriptive information for each limit reported pursuant to the Risk and Position Limits and Usage quantitative measurement, including the name of the limit, a unique identification label for the limit, a description of the limit, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit;

2. A Risk Factor Sensitivities Information Schedule that provides identifying and descriptive information for each risk factor sensitivity reported pursuant to the Risk Factor Sensitivities quantitative measurement, including the name of the sensitivity, a unique identification label for the sensitivity, a description of the sensitivity, and the sensitivity's risk factor change unit;

3. A Risk Factor Attribution Information Schedule that provides identifying and descriptive information for each risk factor attribution reported pursuant to the Comprehensive Profit and Loss Attribution quantitative measurement, including the name of the risk factor or other factor, a unique identification label for the risk factor or other factor, a description of the risk factor or other factor, and the risk factor or other factor's change unit;

4. A Limit/Sensitivity Cross-Reference Schedule that cross-references, by unique identification label, limits identified in the Risk and Position Limits Information Schedule to associated risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule; and

5. A Risk Factor Sensitivity/Attribution Cross-Reference Schedule that cross-references, by unique identification label, risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule to associated risk factor attributions identified in the Risk Factor Attribution Information Schedule.

d. Narrative Statement

Each banking entity made subject to this appendix by § 255.20 must submit in a separate electronic document a Narrative Statement to the SEC describing any changes in calculation methods used, a description of and reasons for changes in the banking entity's trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement must include any information the banking entity views as relevant for assessing the information reported, such as further description of calculation methods used.

If a banking entity does not have any information to report in a Narrative Statement, the banking entity must submit an electronic document stating that it does not have any information to report in a Narrative Statement.

e. Frequency and Method of Required Calculation and Reporting

A banking entity must calculate any applicable quantitative measurement for each trading day. A banking entity must report the Narrative Statement, the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement electronically to the SEC on the reporting schedule established in § 255.20 unless otherwise requested by the SEC. A banking entity must report the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement to the SEC in accordance with the XML Schema specified and published on the SEC's website.

f. Recordkeeping

A banking entity must, for any quantitative measurement furnished to the SEC pursuant to this appendix and § 255.20(d), create and maintain records documenting the preparation and content of these reports, as well as such information as is necessary to permit the SEC to verify the accuracy of such reports, for a period of five years from the end of the calendar year for which the measurement was taken. A banking entity must retain the Narrative Statement, the Trading Desk Information, and the Quantitative Measurements Identifying Information for a period of five years from the end of the calendar year for which the information was reported to the SEC.

IV. Quantitative Measurements

a. Risk-Management Measurements

1. Risk and Position Limits and Usage

i. *Description:* For purposes of this appendix, Risk and Position Limits are the constraints that define the amount of risk that a trading desk is permitted to take at a point in time, as defined by the banking entity for a specific trading desk. Usage represents the value of the trading desk's risk or positions that are accounted for by the current activity of the desk. Risk and position limits and their usage are key risk management tools used to control and monitor risk taking and include, but are not limited to, the limits set out in § 255.4 and § 255.5. A number of the metrics that are described below, including ''Risk Factor Sensitivities'' and ''Value-at-Risk,'' relate to a trading desk's risk and position limits and are useful in evaluating and setting these limits in the broader context of the trading desk's overall activities, particularly for the market making activities under § 255.4(b) and hedging activity under § 255.5. Accordingly, the limits required under § 255.4(b)(2)(iii) and § 255.5(b)(1)(i)(A) must meet the applicable requirements under § 255.4(b)(2)(iii) and § 255.5(b)(1)(i)(A) and also must include appropriate metrics for the trading desk limits including, at a minimum, the ''Risk Factor Sensitivities'' and ''Value-at-Risk'' metrics except to the extent any of the ''Risk Factor Sensitivities'' or ''Value-at-Risk'' metrics are demonstrably ineffective for measuring and monitoring the risks of a trading desk based on the types of positions traded by, and risk exposures of, that desk.

A. A banking entity must provide the following information for each limit reported pursuant to this quantitative measurement: The unique identification label for the limit reported in the Risk and Position Limits Information Schedule, the limit size (distinguishing between an upper and a lower limit), and the value of usage of the limit.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

2. Risk Factor Sensitivities

i. *Description:* For purposes of this appendix, Risk Factor Sensitivities are changes in a trading desk's Comprehensive Profit and Loss that are expected to occur in the event of a change in one or more underlying variables that are significant sources of the trading desk's profitability and risk. A banking entity must report the risk factor sensitivities that are monitored and managed as part of the trading desk's overall risk management policy. Reported risk factor sensitivities must be sufficiently granular to account for a preponderance of the expected price variation in the trading desk's holdings. A banking entity must provide the following information for each sensitivity that is reported pursuant to this quantitative measurement: The unique identification label for the risk factor sensitivity listed in the Risk Factor Sensitivities Information Schedule, the change in risk factor used to determine the risk factor sensitivity, and the aggregate change in value across all positions of the desk given the change in risk factor.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

3. Value-at-Risk and Stressed Value-at-Risk

i. *Description:* For purposes of this appendix, Value-at-Risk (''VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on current market conditions. For purposes of this appendix, Stressed Value-at-Risk (''Stressed VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on market conditions during a period of significant financial stress.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* For VaR, all trading desks engaged in covered trading activities. For Stressed VaR, all trading desks engaged in covered trading activities, except trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of ''financial instrument'' under § 255.3(d)(2).

b. Source-of-Revenue Measurements

1. Comprehensive Profit and Loss Attribution

i. *Description:* For purposes of this appendix, Comprehensive Profit and Loss Attribution is an analysis that attributes the daily fluctuation in the value of a trading desk's positions to various sources. First, the daily profit and loss of the aggregated positions is divided into three categories: (i) Profit and loss attributable to a trading desk's existing positions that were also positions held by the trading desk as of the end of the prior day (''existing positions''); (ii) profit and loss attributable to new positions resulting from the current day's trading activity (''new positions''); and (iii) residual profit and loss that cannot be specifically attributed to existing positions or new positions. The sum of (i), (ii), and (iii) must equal the trading desk's comprehensive profit and loss at each point in time.

A. The comprehensive profit and loss associated with existing positions must reflect changes in the value of these positions on the applicable day.

The comprehensive profit and loss from existing positions must be further attributed, as applicable, to changes in (i) the specific risk factors and other factors that are monitored and managed as part of the trading desk's overall risk management policies and procedures; and (ii) any other applicable elements, such as cash flows, carry, changes in reserves, and the correction, cancellation, or exercise of a trade.

B. For the attribution of comprehensive profit and loss from existing positions to specific risk factors and other factors, a banking entity must provide the following information for the factors that explain the preponderance of the profit or loss changes due to risk factor changes: The unique identification label for the risk factor or other factor listed in the Risk Factor Attribution Information Schedule, and the profit or loss due to the risk factor or other factor change.

C. The comprehensive profit and loss attributed to new positions must reflect commissions and fee income or expense and market gains or losses associated with transactions executed on the applicable day. New positions include purchases and sales of financial instruments and other assets/liabilities and negotiated amendments to existing positions. The comprehensive profit and loss from new positions may be reported in the aggregate and does not need to be further attributed to specific sources.

D. The portion of comprehensive profit and loss that cannot be specifically attributed to known sources must be allocated to a residual category identified as an unexplained portion of the comprehensive profit and loss. Significant unexplained profit and loss must be escalated for further investigation and analysis.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

c. Positions, Transaction Volumes, and Securities Inventory Aging Measurements

1. Positions

i. *Description:* For purposes of this appendix, Positions is the value of securities and derivatives positions managed by the trading desk. For purposes of the Positions quantitative measurement, do not include in the Positions calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.'' [1] A banking entity must separately report the trading desk's market value of long securities positions, market value of short securities positions, market value of derivatives receivables, market value of derivatives payables, notional value of derivatives receivables, and notional value of derivatives payables.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 255.4(a) or § 255.4(b) to conduct

[1] *See* §§ 255.2(i), (bb). For example, under this part, a security-based swap is both a ''security'' and a ''derivative.'' For purposes of the Positions quantitative measurement, security-based swaps are reported as derivatives rather than securities.

underwriting activity or market-making-related activity, respectively.

2. Transaction Volumes

i. *Description:* For purposes of this appendix, Transaction Volumes measures four exclusive categories of covered trading activity conducted by a trading desk. A banking entity is required to report the value and number of security and derivative transactions conducted by the trading desk with: (i) Customers, excluding internal transactions; (ii) non-customers, excluding internal transactions; (iii) trading desks and other organizational units where the transaction is booked in the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity. For securities, value means gross market value. For derivatives, value means gross notional value. For purposes of calculating the Transaction Volumes quantitative measurement, do not include in the Transaction Volumes calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.''[2] Further, for purposes of the Transaction Volumes quantitative measurement, a customer of a trading desk that relies on § 255.4(a) to conduct underwriting activity is a market participant identified in § 255.4(a)(7), and a customer of a trading desk that relies on § 255.4(b) to conduct market making-related activity is a market participant identified in § 255.4(b)(3).

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 255.4(a) or § 255.4(b) to conduct underwriting activity or market-making-related activity, respectively.

3. Securities Inventory Aging

i. *Description:* For purposes of this appendix, Securities Inventory Aging generally describes a schedule of the market value of the trading desk's securities positions and the amount of time that those securities positions have been held. Securities Inventory Aging must measure the age profile of a trading desk's securities positions for the following periods: 0–30 Calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days. Securities Inventory Aging includes two schedules, a security asset-aging schedule, and a security liability-aging schedule. For purposes of the Securities Inventory Aging quantitative measurement, do not include securities that are also ''derivatives,'' as those terms are defined under subpart A.[3]

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 255.4(a) or § 255.4(b) to conduct underwriting activity or market-making related activity, respectively.

COMMODITY FUTURES TRADING COMMISSION

17 CFR Chapter I

Authority and Issuance

For the reasons set forth in the Common Preamble, the Commodity Futures Trading Commission proposes to amend Part 75 to chapter I of Title 17 of the Code of Federal Regulations as follows:

PART 75—PROPRIETARY TRADING AND CERTAIN INTERESTS IN AND RELATIONSHIPS WITH COVERED FUNDS

■ 54. The authority for part 75 continues to read as follows:

Authority: 12 U.S.C. 1851.

■ 55. Revise § 75.2 to read as follows:

§ 75.2 Definitions.

Unless otherwise specified, for purposes of this part:

(a) *Affiliate* has the same meaning as in section 2(k) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(k)).

(b) *Applicable accounting standards* means U.S. generally accepted accounting principles, or such other accounting standards applicable to a banking entity that the Commission determines are appropriate and that the banking entity uses in the ordinary course of its business in preparing its consolidated financial statements.

(c) *Bank holding company* has the same meaning as in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841).

(d) *Banking entity.* (1) Except as provided in paragraph (d)(2) of this section, *banking entity* means:

(i) Any insured depository institution;

(ii) Any company that controls an insured depository institution;

(iii) Any company that is treated as a bank holding company for purposes of section 8 of the International Banking Act of 1978 (12 U.S.C. 3106); and

(iv) Any affiliate or subsidiary of any entity described in paragraphs (d)(1)(i), (ii), or (iii) of this section.

(2) Banking entity does not include:

(i) A covered fund that is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section;

(ii) A portfolio company held under the authority contained in section 4(k)(4)(H) or (I) of the BHC Act (12 U.S.C. 1843(k)(4)(H), (I)), or any portfolio concern, as defined under 13 CFR 107.50, that is controlled by a small business investment company, as defined in section 103(3) of the Small Business Investment Act of 1958 (15 U.S.C. 662), so long as the portfolio company or portfolio concern is not itself a banking entity under paragraphs (d)(1)(i), (ii), or (iii) of this section; or

(iii) The FDIC acting in its corporate capacity or as conservator or receiver under the Federal Deposit Insurance Act or Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

(e) *Board* means the Board of Governors of the Federal Reserve System.

(f) *CFTC* means the Commodity Futures Trading Commission.

(g) *Dealer* has the same meaning as in section 3(a)(5) of the Exchange Act (15 U.S.C. 78c(a)(5)).

(h) *Depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)).

(i) *Derivative.* (1) Except as provided in paragraph (i)(2) of this section, *derivative* means:

(i) Any swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68));

(ii) Any purchase or sale of a commodity, that is not an excluded commodity, for deferred shipment or delivery that is intended to be physically settled;

(iii) Any foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)) or foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25));

(iv) Any agreement, contract, or transaction in foreign currency described in section 2(c)(2)(C)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(C)(i));

(v) Any agreement, contract, or transaction in a commodity other than foreign currency described in section 2(c)(2)(D)(i) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(D)(i)); and

(vi) Any transaction authorized under section 19 of the Commodity Exchange Act (7 U.S.C. 23(a) or (b));

(2) A derivative does not include:

(i) Any consumer, commercial, or other agreement, contract, or transaction that the CFTC and SEC have further defined by joint regulation, interpretation, guidance, or other action as not within the definition of swap, as that term is defined in section 1a(47) of the Commodity Exchange Act (7 U.S.C. 1a(47)), or security-based swap, as that term is defined in section 3(a)(68) of the Exchange Act (15 U.S.C. 78c(a)(68)); or

(ii) Any identified banking product, as defined in section 402(b) of the Legal Certainty for Bank Products Act of 2000

[2] *See* §§ 255.2(i), (bb).

[3] *See* §§ 255.2(i), (bb).

(7 U.S.C. 27(b)), that is subject to section 403(a) of that Act (7 U.S.C. 27a(a)).

(j) *Employee* includes a member of the immediate family of the employee.

(k) *Exchange Act* means the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(l) *Excluded commodity* has the same meaning as in section 1a(19) of the Commodity Exchange Act (7 U.S.C. 1a(19)).

(m) *FDIC* means the Federal Deposit Insurance Corporation.

(n) *Federal banking agencies* means the Board, the Office of the Comptroller of the Currency, and the FDIC.

(o) *Foreign banking organization* has the same meaning as in section 211.21(o) of the Board's Regulation K (12 CFR 211.21(o)), but does not include a foreign bank, as defined in section 1(b)(7) of the International Banking Act of 1978 (12 U.S.C. 3101(7)), that is organized under the laws of the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, or the Commonwealth of the Northern Mariana Islands.

(p) *Foreign insurance regulator* means the insurance commissioner, or a similar official or agency, of any country other than the United States that is engaged in the supervision of insurance companies under foreign insurance law.

(q) *General account* means all of the assets of an insurance company except those allocated to one or more separate accounts.

(r) *Insurance company* means a company that is organized as an insurance company, primarily and predominantly engaged in writing insurance or reinsuring risks underwritten by insurance companies, subject to supervision as such by a state insurance regulator or a foreign insurance regulator, and not operated for the purpose of evading the provisions of section 13 of the BHC Act (12 U.S.C. 1851).

(s) *Insured depository institution* has the same meaning as in section 3(c) of the Federal Deposit Insurance Act (12 U.S.C. 1813(c)), but does not include an insured depository institution that is described in section 2(c)(2)(D) of the BHC Act (12 U.S.C. 1841(c)(2)(D)).

(t) *Limited trading assets and liabilities* means, with respect to a banking entity, that:

(1) The banking entity has, together with its affiliates and subsidiaries on a worldwide consolidated basis, trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, is less than $1,000,000,000; and

(2) The Commission has not determined pursuant to § 75.20(g) or (h) of this part that the banking entity should not be treated as having limited trading assets and liabilities.

(u) *Loan* means any loan, lease, extension of credit, or secured or unsecured receivable that is not a security or derivative.

(v) *Moderate trading assets and liabilities* means, with respect to a banking entity, that the banking entity does not have significant trading assets and liabilities or limited trading assets and liabilities.

(w) *Primary financial regulatory agency* has the same meaning as in section 2(12) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5301(12)).

(x) *Purchase* includes any contract to buy, purchase, or otherwise acquire. For security futures products, purchase includes any contract, agreement, or transaction for future delivery. With respect to a commodity future, purchase includes any contract, agreement, or transaction for future delivery. With respect to a derivative, purchase includes the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(y) *Qualifying foreign banking organization* means a foreign banking organization that qualifies as such under section 211.23(a), (c) or (e) of the Board's Regulation K (12 CFR 211.23(a), (c), or (e)).

(z) *SEC* means the Securities and Exchange Commission.

(aa) *Sale* and *sell* each include any contract to sell or otherwise dispose of. For security futures products, such terms include any contract, agreement, or transaction for future delivery. With respect to a commodity future, such terms include any contract, agreement, or transaction for future delivery. With respect to a derivative, such terms include the execution, termination (prior to its scheduled maturity date), assignment, exchange, or similar transfer or conveyance of, or extinguishing of rights or obligations under, a derivative, as the context may require.

(bb) *Security* has the meaning specified in section 3(a)(10) of the Exchange Act (15 U.S.C. 78c(a)(10)).

(cc) *Security-based swap dealer* has the same meaning as in section 3(a)(71) of the Exchange Act (15 U.S.C. 78c(a)(71)).

(dd) *Security future* has the meaning specified in section 3(a)(55) of the Exchange Act (15 U.S.C. 78c(a)(55)).

(ee) *Separate account* means an account established and maintained by an insurance company in connection with one or more insurance contracts to hold assets that are legally segregated from the insurance company's other assets, under which income, gains, and losses, whether or not realized, from assets allocated to such account, are, in accordance with the applicable contract, credited to or charged against such account without regard to other income, gains, or losses of the insurance company.

(ff) *Significant trading assets and liabilities.*

(1) *Significant trading assets and liabilities* means, with respect to a banking entity, that:

(i) The banking entity has, together with its affiliates and subsidiaries, trading assets and liabilities the average gross sum of which over the previous consecutive four quarters, as measured as of the last day of each of the four previous calendar quarters, equals or exceeds $10,000,000,000; or

(ii) The Commission has determined pursuant to § 75.20(h) of this part that the banking entity should be treated as having significant trading assets and liabilities.

(2) With respect to a banking entity other than a banking entity described in paragraph (3), trading assets and liabilities for purposes of this paragraph (ff) means trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) on a worldwide consolidated basis.

(3)(i) With respect to a banking entity that is a foreign banking organization or a subsidiary of a foreign banking organization, trading assets and liabilities for purposes of this paragraph (ff) means the trading assets and liabilities (excluding trading assets and liabilities involving obligations of or guaranteed by the United States or any agency of the United States) of the combined U.S. operations of the top-tier foreign banking organization (including all subsidiaries, affiliates, branches, and agencies of the foreign banking organization operating, located, or organized in the United States).

(ii) For purposes of paragraph (ff)(3)(i) of this section, a U.S. branch, agency, or subsidiary of a banking entity is located in the United States; however, the foreign bank that operates or controls that branch, agency, or subsidiary is not considered to be located in the United States solely by virtue of operating or controlling the U.S. branch, agency, or subsidiary.

(gg) *State* means any State, the District of Columbia, the Commonwealth of Puerto Rico, Guam, American Samoa, the United States Virgin Islands, and the Commonwealth of the Northern Mariana Islands.

(hh) *Subsidiary* has the same meaning as in section 2(d) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(d)).

(ii) *State insurance regulator* means the insurance commissioner, or a similar official or agency, of a State that is engaged in the supervision of insurance companies under State insurance law.

(jj) *Swap dealer* has the same meaning as in section 1(a)(49) of the Commodity Exchange Act (7 U.S.C. 1a(49)).

■ 56. Amend § 75.3 by:

■ a. Revising paragraph (b);

■ b. Redesignating paragraphs (c) through (e) as paragraphs (d) through (f);

■ c. Adding a new paragraph (c);

■ d. Revising paragraph (e)(3);

■ e. Adding paragraph (e)(10);

■ f. Redesignating paragraphs (f)(5) through (f)(13) as paragraphs (f)(6) through (f)(14);

■ g. Adding a new paragraph (f)(5); and

■ h. Adding paragraph (g).

The revisions and additions read as follows:

§ 75.3 Prohibition on proprietary trading.

* * * * *

(b) *Definition of trading account. Trading account* means any account that is used by a banking entity to:

(1)(i) Purchase or sell one or more financial instruments that are both market risk capital rule covered positions and trading positions (or hedges of other market risk capital rule covered positions), if the banking entity, or any affiliate of the banking entity, is an insured depository institution, bank holding company, or savings and loan holding company, and calculates risk-based capital ratios under the market risk capital rule; or

(ii) With respect to a banking entity that is not, and is not controlled directly or indirectly by a banking entity that is, located in or organized under the laws of the United States or any State, purchase or sell one or more financial instruments that are subject to capital requirements under a market risk framework established by the home-country supervisor that is consistent with the market risk framework published by the Basel Committee on Banking Supervision, as amended from time to time.

(2) Purchase or sell one or more financial instruments for any purpose, if the banking entity:

(i) Is licensed or registered, or is required to be licensed or registered, to engage in the business of a dealer, swap dealer, or security-based swap dealer, to the extent the instrument is purchased or sold in connection with the activities that require the banking entity to be licensed or registered as such; or

(ii) Is engaged in the business of a dealer, swap dealer, or security-based swap dealer outside of the United States, to the extent the instrument is purchased or sold in connection with the activities of such business; or

(3) Purchase or sell one or more financial instruments, with respect to a financial instrument that is recorded at fair value on a recurring basis under applicable accounting standards.

(c) *Presumption of compliance.* (1)(i) Each trading desk that does not purchase or sell financial instruments for a trading account defined in paragraphs (b)(1) or (b)(2) of this section may calculate the net gain or net loss on the trading desk's portfolio of financial instruments each business day, reflecting realized and unrealized gains and losses since the previous business day, based on the banking entity's fair value for such financial instruments.

(ii) If the sum of the absolute values of the daily net gain and loss figures determined in accordance with paragraph (c)(1)(i) of this section for the preceding 90-calendar-day period does not exceed $25 million, the activities of the trading desk shall be presumed to be in compliance with the prohibition in paragraph (a) of this section.

(2) The Commission may rebut the presumption of compliance in paragraph (c)(1)(ii) of this section by providing written notice to the banking entity that the Commission has determined that one or more of the banking entity's activities violates the prohibitions under subpart B.

(3) If a trading desk operating pursuant to paragraph (c)(1)(ii) of this section exceeds the $25 million threshold in that paragraph at any point, the banking entity shall, in accordance with any policies and procedures adopted by the Commission:

(i) Promptly notify the Commission;

(ii) Demonstrate that the trading desk's purchases and sales of financial instruments comply with subpart B; and

(iii) Demonstrate, with respect to the trading desk, how the banking entity will maintain compliance with subpart B on an ongoing basis.

* * * * *

(e) * * *

(3) Any purchase or sale of a security, foreign exchange forward (as that term is defined in section 1a(24) of the Commodity Exchange Act (7 U.S.C. 1a(24)), foreign exchange swap (as that term is defined in section 1a(25) of the Commodity Exchange Act (7 U.S.C. 1a(25)), or physically-settled cross-currency swap, by a banking entity for the purpose of liquidity management in accordance with a documented liquidity management plan of the banking entity that, with respect to such financial instruments:

(i) Specifically contemplates and authorizes the particular financial instruments to be used for liquidity management purposes, the amount, types, and risks of these financial instruments that are consistent with liquidity management, and the liquidity circumstances in which the particular financial instruments may or must be used;

(ii) Requires that any purchase or sale of financial instruments contemplated and authorized by the plan be principally for the purpose of managing the liquidity of the banking entity, and not for the purpose of short-term resale, benefitting from actual or expected short-term price movements, realizing short-term arbitrage profits, or hedging a position taken for such short-term purposes;

(iii) Requires that any financial instruments purchased or sold for liquidity management purposes be highly liquid and limited to financial instruments the market, credit, and other risks of which the banking entity does not reasonably expect to give rise to appreciable profits or losses as a result of short-term price movements;

(iv) Limits any financial instruments purchased or sold for liquidity management purposes, together with any other instruments purchased or sold for such purposes, to an amount that is consistent with the banking entity's near-term funding needs, including deviations from normal operations of the banking entity or any affiliate thereof, as estimated and documented pursuant to methods specified in the plan;

(v) Includes written policies and procedures, internal controls, analysis, and independent testing to ensure that the purchase and sale of financial instruments that are not permitted under §§ 75.6(a) or (b) of this subpart are for the purpose of liquidity management and in accordance with the liquidity management plan described in paragraph (e)(3) of this section; and

(vi) Is consistent with the Commission's supervisory requirements, guidance, and expectations regarding liquidity management;

* * * * *

(10) Any purchase (or sale) of one or more financial instruments that was made in error by a banking entity in the course of conducting a permitted or excluded activity or is a subsequent transaction to correct such an error, and the erroneously purchased (or sold) financial instrument is promptly transferred to a separately-managed trade error account for disposition.

(f) * * *

(5) *Cross-currency swap* means a swap in which one party exchanges with another party principal and interest rate payments in one currency for principal and interest rate payments in another currency, and the exchange of principal occurs on the date the swap is entered into, with a reversal of the exchange of principal at a later date that is agreed upon when the swap is entered into.

* * * * *

(g) *Reservation of Authority:* (1) The Commission may determine, on a case-by-case basis, that a purchase or sale of one or more financial instruments by a banking entity either is or is not for the trading account as defined at 12 U.S.C. 1851(h)(6).

(2) *Notice and Response Procedures.*—(i) *Notice.* When the Commission determines that the purchase or sale of one or more financial instruments is for the trading account under paragraph (g)(1) of this section, the Commission will notify the banking entity in writing of the determination and provide an explanation of the determination.

(ii) *Response.* (A) The banking entity may respond to any or all items in the notice. The response should include any matters that the banking entity would have the Commission consider in deciding whether the purchase or sale is for the trading account. The response must be in writing and delivered to the designated Commission official within 30 days after the date on which the banking entity received the notice. The Commission may shorten the time period when, in the opinion of the Commission, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the Commission may extend the time period for good cause.

(B) Failure to respond within 30 days or such other time period as may be specified by the Commission shall constitute a waiver of any objections to the Commission's determination.

(iii) After the close of banking entity's response period, the Commission will decide, based on a review of the banking entity's response and other information concerning the banking entity, whether to maintain the Commission's determination that the purchase or sale of one or more financial instruments is for the trading account. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

■ 57. Amend § 75.4 by:

■ a. Revising paragraph (a)(2);

■ b. Adding paragraph (a)(8);

■ c. Revising paragraph (b)(2);

■ d. Revising the introductory text of paragraph (b)(3)(i);

■ e. In paragraph (b)(5) revising the references to ''*inventory*'' to read ''*positions*''*;* and

■ f. Adding paragraph (b)(6).

The revisions and additions to read as follows:

§ 75.4 Permitted underwriting and market making-related activities.

(a) * * *

(2) *Requirements.* The underwriting activities of a banking entity are permitted under paragraph (a)(1) of this section only if:

(i) The banking entity is acting as an underwriter for a distribution of securities and the trading desk's underwriting position is related to such distribution;

(ii)(A) The amount and type of the securities in the trading desk's underwriting position are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, taking into account the liquidity, maturity, and depth of the market for the relevant type of security, and (B) reasonable efforts are made to sell or otherwise reduce the underwriting position within a reasonable period, taking into account the liquidity, maturity, and depth of the market for the relevant type of security;

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (a) of this section, including reasonably designed written policies and procedures, internal controls, analysis, and independent testing identifying and addressing:

(A) The products, instruments or exposures each trading desk may purchase, sell, or manage as part of its underwriting activities;

(B) Limits for each trading desk, in accordance with paragraph (a)(8)(i) of this section;

(C) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(D) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis of the basis for any temporary or permanent increase to a trading desk's limit(s), and independent review of such demonstrable analysis and approval;

(iv) The compensation arrangements of persons performing the activities described in this paragraph (a) are designed not to reward or incentivize prohibited proprietary trading; and

(v) The banking entity is licensed or registered to engage in the activity described in this paragraph (a) in accordance with applicable law.

* * * * *

(8) *Rebuttable presumption of compliance.*

(i) *Risk limits.*

(A) A banking entity shall be presumed to meet the requirements of paragraph (a)(2)(ii)(A) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (a)(8)(i)(B) and does not exceed such limits.

(B) The presumption described in paragraph (8)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's underwriting activities, on the:

(*1*) Amount, types, and risk of its underwriting position;

(*2*) Level of exposures to relevant risk factors arising from its underwriting position; and

(*3*) Period of time a security may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (a)(8)(i) of this section shall be subject to supervisory review and oversight by the Commission on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (a)(8)(i) of this section, a banking entity shall promptly report to the Commission (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the Commission.

(iv) *Rebutting the presumption.* The presumption in paragraph (a)(8)(i) of this section may be rebutted by the Commission if the Commission determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The Commission will provide notice of any such determination to the banking entity in writing.

(b) * * *

(2) *Requirements.* The market making-related activities of a banking entity are permitted under paragraph (b)(1) of this section only if:

(i) The trading desk that establishes and manages the financial exposure routinely stands ready to purchase and sell one or more types of financial instruments related to its financial exposure and is willing and available to quote, purchase and sell, or otherwise enter into long and short positions in those types of financial instruments for its own account, in commercially reasonable amounts and throughout market cycles on a basis appropriate for the liquidity, maturity, and depth of the market for the relevant types of financial instruments;

(ii) The trading desk's market-making related activities are designed not to exceed, on an ongoing basis, the reasonably expected near term demands of clients, customers, or counterparties, based on the liquidity, maturity, and depth of the market for the relevant types of financial instrument(s).

(iii) In the case of a banking entity with significant trading assets and liabilities, the banking entity has established and implements, maintains, and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of paragraph (b) of this section, including reasonably designed written policies and procedures, internal controls, analysis and independent testing identifying and addressing:

(A) The financial instruments each trading desk stands ready to purchase and sell in accordance with paragraph (b)(2)(i) of this section;

(B) The actions the trading desk will take to demonstrably reduce or otherwise significantly mitigate promptly the risks of its financial exposure consistent with the limits required under paragraph (b)(2)(iii)(C) of this section; the products, instruments, and exposures each trading desk may use for risk management purposes; the techniques and strategies each trading desk may use to manage the risks of its market making-related activities and positions; and the process, strategies, and personnel responsible for ensuring that the actions taken by the trading desk to mitigate these risks are and continue to be effective;

(C) Limits for each trading desk, in accordance with paragraph (b)(6)(i) of this section;

(D) Internal controls and ongoing monitoring and analysis of each trading desk's compliance with its limits; and

(E) Authorization procedures, including escalation procedures that require review and approval of any trade that would exceed a trading desk's limit(s), demonstrable analysis that the basis for any temporary or permanent increase to a trading desk's limit(s) is consistent with the requirements of this paragraph (b), and independent review of such demonstrable analysis and approval;

(iv) In the case of a banking entity with significant trading assets and liabilities, to the extent that any limit identified pursuant to paragraph (b)(2)(iii)(C) of this section is exceeded, the trading desk takes action to bring the trading desk into compliance with the limits as promptly as possible after the limit is exceeded;

(v) The compensation arrangements of persons performing the activities described in this paragraph (b) are designed not to reward or incentivize prohibited proprietary trading; and

(vi) The banking entity is licensed or registered to engage in activity described in this paragraph (b) in accordance with applicable law.

(3) * * *

(i) A trading desk or other organizational unit of another banking entity is not a client, customer, or counterparty of the trading desk if that other entity has trading assets and liabilities of $50 billion or more as measured in accordance with the methodology described in definition of ''significant trading assets and liabilities'' contained in § 75.2 of this part, unless:

* * * * *

(6) *Rebuttable presumption of compliance.*—(i) *Risk limits.* (A) A banking entity shall be presumed to meet the requirements of paragraph (b)(2)(ii) of this section with respect to the purchase or sale of a financial instrument if the banking entity has established and implements, maintains, and enforces the limits described in paragraph (b)(6)(i)(B) of this section and does not exceed such limits.

(B) The presumption described in paragraph (6)(i)(A) of this section shall be available with respect to limits for each trading desk that are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties, based on the nature and amount of the trading desk's market making-related activities, on the:

(*1*) Amount, types, and risks of its market-maker positions;

(*2*) Amount, types, and risks of the products, instruments, and exposures the trading desk may use for risk management purposes;

(*3*) Level of exposures to relevant risk factors arising from its financial exposure; and

(*4*) Period of time a financial instrument may be held.

(ii) *Supervisory review and oversight.* The limits described in paragraph (b)(6)(i) of this section shall be subject to supervisory review and oversight by the Commission on an ongoing basis. Any review of such limits will include assessment of whether the limits are designed not to exceed the reasonably expected near term demands of clients, customers, or counterparties.

(iii) *Reporting.* With respect to any limit identified pursuant to paragraph (b)(6)(i) of this section, a banking entity shall promptly report to the Commission (A) to the extent that any limit is exceeded and (B) any temporary or permanent increase to any limit(s), in each case in the form and manner as directed by the Commission.

(iv) *Rebutting the presumption.* The presumption in paragraph (b)(6)(i) of this section may be rebutted by the Commission if the Commission determines, based on all relevant facts and circumstances, that a trading desk is engaging in activity that is not based on the reasonably expected near term demands of clients, customers, or counterparties. The Commission will provide notice of any such determination to the banking entity in writing.

■ 58. Amend § 75.5 by revising paragraph (b), the introductory text of paragraph (c)(1), and adding paragraph (c)(4) to read as follows:

§ 75.5 Permitted risk-mitigating hedging activities.

* * * * *

(b) *Requirements.* (1) The risk-mitigating hedging activities of a banking entity that has significant trading assets and liabilities are permitted under paragraph (a) of this section only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program required by subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures regarding the positions, techniques and strategies that may be used for hedging, including documentation indicating what positions, contracts or other holdings a particular trading desk may use in its risk-mitigating hedging activities, as well as position and aging limits with respect to such positions, contracts or other holdings;

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(C) The conduct of analysis and independent testing designed to ensure that the positions, techniques and strategies that may be used for hedging may reasonably be expected to reduce or otherwise significantly mitigate the specific, identifiable risk(s) being hedged;

(ii) The risk-mitigating hedging activity:

(A) Is conducted in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section;

(D) Is subject to continuing review, monitoring and management by the banking entity that:

(*1*) Is consistent with the written hedging policies and procedures required under paragraph (b)(1)(i) of this section;

(*2*) Is designed to reduce or otherwise significantly mitigate the specific, identifiable risks that develop over time from the risk-mitigating hedging activities undertaken under this section and the underlying positions, contracts, and other holdings of the banking entity, based upon the facts and circumstances of the underlying and hedging positions, contracts and other holdings of the banking entity and the risks and liquidity thereof; and

(*3*) Requires ongoing recalibration of the hedging activity by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(1)(ii) of this section and is not prohibited proprietary trading; and

(iii) The compensation arrangements of persons performing risk-mitigating hedging activities are designed not to reward or incentivize prohibited proprietary trading.

(2) The risk-mitigating hedging activities of a banking entity that does not have significant trading assets and liabilities are permitted under paragraph (a) of this section only if the risk-mitigating hedging activity:

(i) At the inception of the hedging activity, including, without limitation, any adjustments to the hedging activity, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks, including market risk, counterparty or other credit risk, currency or foreign exchange risk, interest rate risk, commodity price risk, basis risk, or similar risks, arising in connection with and related to identified positions, contracts, or other holdings of the banking entity, based upon the facts and circumstances of the identified underlying and hedging positions, contracts or other holdings and the risks and liquidity thereof; and

(ii) Is subject, as appropriate, to ongoing recalibration by the banking entity to ensure that the hedging activity satisfies the requirements set out in paragraph (b)(2) of this section and is not prohibited proprietary trading.

(c) * * * (1) A banking entity that has significant trading assets and liabilities must comply with the requirements of paragraphs (c)(2) and (3) of this section, unless the requirements of paragraph (c)(4) of this section are met, with respect to any purchase or sale of financial instruments made in reliance on this section for risk-mitigating hedging purposes that is:

* * * * *

(4) The requirements of paragraphs (c)(2) and (3) of this section do not apply to the purchase or sale of a financial instrument described in paragraph (c)(1) of this section if:

(i) The financial instrument purchased or sold is identified on a written list of pre-approved financial instruments that are commonly used by the trading desk for the specific type of hedging activity for which the financial instrument is being purchased or sold; and

(ii) At the time the financial instrument is purchased or sold, the hedging activity (including the purchase or sale of the financial instrument) complies with written, pre-approved hedging limits for the trading desk purchasing or selling the financial instrument for hedging activities undertaken for one or more other trading desks. The hedging limits shall be appropriate for the:

(A) Size, types, and risks of the hedging activities commonly undertaken by the trading desk;

(B) Financial instruments purchased and sold for hedging activities by the trading desk; and

(C) Levels and duration of the risk exposures being hedged.

■ 59. Amend § 75.6 by revising paragraph (e)(3) and removing paragraph (e)(6) to read as follows:

§ 75.6 Other permitted proprietary trading activities.

* * * * *

(e) * * *

(3) A purchase or sale by a banking entity is permitted for purposes of this paragraph (e) if:

(i) The banking entity engaging as principal in the purchase or sale (including relevant personnel) is not located in the United States or organized under the laws of the United States or of any State;

(ii) The banking entity (including relevant personnel) that makes the decision to purchase or sell as principal is not located in the United States or organized under the laws of the United States or of any State; and

(iii) The purchase or sale, including any transaction arising from risk-mitigating hedging related to the instruments purchased or sold, is not accounted for as principal directly or on a consolidated basis by any branch or affiliate that is located in the United States or organized under the laws of the United States or of any State.

* * * * *

§ 75.10 [Amended]

■ 60. Amend § 75.10 by:

■ a. In paragraph (c)(8)(i)(A) revising the reference to ''§ 75.2(s)'' to read ''§ 75.2(u)'';

■ b. Removing paragraph (d)(1);

■ c. Redesignating paragraphs (d)(2) through (d)(10) as paragraphs (d)(1) through (d)(9);

■ d. In paragraph (d)(5)(i)(G) revising the reference to ''(d)(6)(i)(A)'' to read ''(d)(5)(i)(A)''; and

■ e. In paragraph (d)(9) revising the reference to ''(d)(9)'' to read ''(d)(8)'' and the reference to ''(d)(10)(i)(A)'' to read ''(d)(9)(i)(A)'' and the reference to ''(d)(10)(i)'' to read ''(d)(9)(i)''.

■ 61. Amend § 75.11 by revising paragraph (c) to read as follows:

§ 75.11 Permitted organizing and offering, underwriting, and market making with respect to a covered fund.

* * * * *

(c) *Underwriting and market making in ownership interests of a covered fund.* The prohibition contained in § 75.10(a) of this subpart does not apply to a banking entity's underwriting activities or market making-related activities involving a covered fund so long as:

(1) Those activities are conducted in accordance with the requirements of § 75.4(a) or § 75.4(b) of subpart B, respectively; and

(2) With respect to any banking entity (or any affiliate thereof) that: Acts as a sponsor, investment adviser or commodity trading advisor to a particular covered fund or otherwise acquires and retains an ownership interest in such covered fund in reliance on paragraph (a) of this section; or acquires and retains an ownership interest in such covered fund and is either a securitizer, as that term is used in section 15G(a)(3) of the Exchange Act (15 U.S.C. 78*o*–11(a)(3)), or is acquiring and retaining an ownership interest in such covered fund in compliance with section 15G of that Act (15 U.S.C. 78*o*–11) and the implementing regulations issued thereunder each as permitted by paragraph (b) of this section, then in each such case any ownership interests acquired or retained by the banking entity and its affiliates in connection with underwriting and market making related activities for that particular covered fund are included in the calculation of ownership interests permitted to be held by the banking entity and its affiliates under the limitations of § 75.12(a)(2)(ii); § 75.12(a)(2)(iii), and § 75.12(d) of this subpart.

§ 75.12 [Amended]

■ 62. In subpart C, section 75.12 is amended by:

■ a. In paragraphs (c)(1) and (d) revising the references to ''§ 75.10(d)(6)(ii)'' to read ''§ 75.10(d)(5)(ii)'';

■ b. Removing paragraph (e)(2)(vii); and

■ c. Redesignating the second instance of paragraph (e)(2)(vi) as paragraph (e)(2)(vii).

■ 63. Amend § 75.13 by revising paragraphs (a) and (b)(3) and removing (b)(4)(iv) to read as follows:

§ 75.13 Other permitted covered fund activities and investments.

(a) *Permitted risk-mitigating hedging activities.* (1) The prohibition contained in § 75.10(a) of this subpart does not apply with respect to an ownership interest in a covered fund acquired or retained by a banking entity that is designed to reduce or otherwise significantly mitigate the specific, identifiable risks to the banking entity in connection with:

(i) A compensation arrangement with an employee of the banking entity or an affiliate thereof that directly provides investment advisory, commodity trading advisory or other services to the covered fund; or

(ii) A position taken by the banking entity when acting as intermediary on behalf of a customer that is not itself a banking entity to facilitate the exposure by the customer to the profits and losses of the covered fund.

(2) *Requirements.* The risk-mitigating hedging activities of a banking entity are permitted under this paragraph (a) only if:

(i) The banking entity has established and implements, maintains and enforces an internal compliance program in accordance with subpart D of this part that is reasonably designed to ensure the banking entity's compliance with the requirements of this section, including:

(A) Reasonably designed written policies and procedures; and

(B) Internal controls and ongoing monitoring, management, and authorization procedures, including relevant escalation procedures; and

(ii) The acquisition or retention of the ownership interest:

(A) Is made in accordance with the written policies, procedures, and internal controls required under this section;

(B) At the inception of the hedge, is designed to reduce or otherwise significantly mitigate one or more specific, identifiable risks arising (1) out of a transaction conducted solely to accommodate a specific customer request with respect to the covered fund or (2) in connection with the compensation arrangement with the employee that directly provides investment advisory, commodity trading advisory, or other services to the covered fund;

(C) Does not give rise, at the inception of the hedge, to any significant new or additional risk that is not itself hedged contemporaneously in accordance with this section; and

(D) Is subject to continuing review, monitoring and management by the banking entity.

(iii) With respect to risk-mitigating hedging activity conducted pursuant to paragraph (a)(1)(i), the compensation arrangement relates solely to the covered fund in which the banking entity or any affiliate has acquired an ownership interest pursuant to paragraph (a)(1)(i) and such compensation arrangement provides that any losses incurred by the banking entity on such ownership interest will be offset by corresponding decreases in amounts payable under such compensation arrangement.

* * * * *

(b) * * *

(3) An ownership interest in a covered fund is not offered for sale or sold to a resident of the United States for purposes of paragraph (b)(1)(iii) of this section only if it is not sold and has not been sold pursuant to an offering that targets residents of the United States in which the banking entity or any affiliate of the banking entity participates. If the banking entity or an affiliate sponsors or serves, directly or indirectly, as the investment manager, investment adviser, commodity pool operator or commodity trading advisor to a covered fund, then the banking entity or affiliate will be deemed for purposes of this paragraph (b)(3) to participate in any offer or sale by the covered fund of ownership interests in the covered fund.

* * * * *

■ 64. Amend § 75.14 by revising paragraph (a)(2)(ii)(B) as follows:

§ 75.14 Limitations on relationships with a covered fund.

(a) * * *

(2) * * *

(ii) * * *

(B) The chief executive officer (or equivalent officer) of the banking entity certifies in writing annually no later than March 31 to the Commission (with a duty to update the certification if the information in the certification materially changes) that the banking entity does not, directly or indirectly, guarantee, assume, or otherwise insure the obligations or performance of the covered fund or of any covered fund in which such covered fund invests; and

* * * * *

■ 65. Amend § 75.20 by:

■ a. Revising paragraphs (a), (c), (d), and (f)(2);

■ b. Revising the introductory text of paragraphs (b) and (e)

■ c. Adding paragraphs (g) and (h).

The revisions amd additions to read as follows:

§ 75.20 Program for compliance; reporting.

(a) *Program requirement.* Each banking entity (other than a banking entity with limited trading assets and liabilities) shall develop and provide for the continued administration of a compliance program reasonably designed to ensure and monitor compliance with the prohibitions and restrictions on proprietary trading and covered fund activities and investments set forth in section 13 of the BHC Act and this part. The terms, scope, and detail of the compliance program shall be appropriate for the types, size, scope, and complexity of activities and business structure of the banking entity.

(b) *Banking entities with significant trading assets and liabilities.* With respect to a banking entity with significant trading assets and liabilities, the compliance program required by paragraph (a) of this section, at a minimum, shall include:

* * * * *

(c) *CEO attestation.*

(1) The CEO of a banking entity described in paragraph (2) must, based on a review by the CEO of the banking entity, attest in writing to the Commission, each year no later than March 31, that the banking entity has in place processes reasonably designed to achieve compliance with section 13 of the BHC Act and this part. In the case of a U.S. branch or agency of a foreign banking entity, the attestation may be provided for the entire U.S. operations of the foreign banking entity by the senior management officer of the U.S. operations of the foreign banking entity who is located in the United States.

(2) The requirements of paragraph (c)(1) apply to a banking entity if:

(i) The banking entity does not have limited trading assets and liabilities; or

(ii) The Commission notifies the banking entity in writing that it must satisfy the requirements contained in paragraph (c)(1).

(d) *Reporting requirements under the Appendix to this part.* (1) A banking entity engaged in proprietary trading activity permitted under subpart B shall comply with the reporting requirements described in the Appendix, if:

(i) The banking entity has significant trading assets and liabilities; or

(ii) The Commission notifies the banking entity in writing that it must satisfy the reporting requirements contained in the Appendix.

(2) Frequency of reporting: Unless the Commission notifies the banking entity in writing that it must report on a different basis, a banking entity with $50 billion or more in trading assets and liabilities (as calculated in accordance with the methodology described in the definition of ‘‘significant trading assets and liabilities’’ contained in § 75.2 of this part of this part) shall report the information required by the Appendix for each calendar month within 20 days of the end of each calendar month. Any other banking entity subject to the Appendix shall report the information required by the Appendix for each calendar quarter within 30 days of the end of that calendar quarter unless the Commission notifies the banking entity in writing that it must report on a different basis.

(e) *Additional documentation for covered funds.* A banking entity with significant trading assets and liabilities shall maintain records that include:

* * * * *

(f) * * *

(2) *Banking entities with moderate trading assets and liabilities.* A banking entity with moderate trading assets and liabilities may satisfy the requirements of this section by including in its existing compliance policies and procedures appropriate references to the requirements of section 13 of the BHC Act and this part and adjustments as appropriate given the activities, size, scope, and complexity of the banking entity.

(g) *Rebuttable presumption of compliance for banking entities with limited trading assets and liabilities.*

(1) *Rebuttable presumption.* Except as otherwise provided in this paragraph, a banking entity with limited trading assets and liabilities shall be presumed to be compliant with subpart B and subpart C and shall have no obligation to demonstrate compliance with this part on an ongoing basis.

(2) *Rebuttal of presumption.*

(i) If upon examination or audit, the Commission determines that the banking entity has engaged in proprietary trading or covered fund activities that are otherwise prohibited under subpart B or subpart C, the Commission may require the banking entity to be treated under this part as if it did not have limited trading assets and liabilities.

(ii) Notice and Response Procedures.

(A) Notice. The Commission will notify the banking entity in writing of any determination pursuant to paragraph (g)(2)(i) of this section to rebut the presumption described in this paragraph (g) and will provide an explanation of the determination.

(B) Response.

(I) The banking entity may respond to any or all items in the notice described in paragraph (g)(2)(ii)(A) of this section. The response should include any matters that the banking entity would have the Commission consider in deciding whether the banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The response must be in writing and delivered to the designated Commission official within 30 days after the date on which the banking entity received the notice. The Commission may shorten the time period when, in the opinion of the Commission, the activities or condition of the banking entity so requires, provided that the banking entity is informed promptly of the new time period, or with the consent of the banking entity. In its discretion, the Commission may extend the time period for good cause.

(II) Failure to respond within 30 days or such other time period as may be specified by the Commission shall constitute a waiver of any objections to the Commission’s determination.

(C) After the close of banking entity’s response period, the Commission will decide, based on a review of the banking entity’s response and other information concerning the banking entity, whether to maintain the Commission’s determination that banking entity has engaged in proprietary trading or covered fund activities prohibited under subpart B or subpart C. The banking entity will be notified of the decision in writing. The notice will include an explanation of the decision.

(h) *Reservation of authority.* Notwithstanding any other provision of this part, the Commission retains its authority to require a banking entity without significant trading assets and liabilities to apply any requirements of this part that would otherwise apply if the banking entity had significant or moderate trading assets and liabilities if the Commission determines that the size or complexity of the banking entity’s trading or investment activities, or the risk of evasion of subpart B or subpart C, does not warrant a presumption of compliance under paragraph (g) of this section or treatment as a banking entity with moderate trading assets and liabilities, as applicable.

■ 66. Revise the Appendix to Part 75 to read as follows:

Appendix to Part 75—Reporting and Recordkeeping Requirements for Covered Trading Activities

I. Purpose

a. This appendix sets forth reporting and recordkeeping requirements that certain banking entities must satisfy in connection with the restrictions on proprietary trading set forth in subpart B (‘‘proprietary trading restrictions’’). Pursuant to § 75.20(d), this appendix applies to a banking entity that, together with its affiliates and subsidiaries, has significant trading assets and liabilities.

These entities are required to (i) furnish periodic reports to the Commission regarding a variety of quantitative measurements of their covered trading activities, which vary depending on the scope and size of covered trading activities, and (ii) create and maintain records documenting the preparation and content of these reports. The requirements of this appendix must be incorporated into the banking entity's internal compliance program under § 75.20.

b. The purpose of this appendix is to assist banking entities and the Commission in:

(i) Better understanding and evaluating the scope, type, and profile of the banking entity's covered trading activities;

(ii) Monitoring the banking entity's covered trading activities;

(iii) Identifying covered trading activities that warrant further review or examination by the banking entity to verify compliance with the proprietary trading restrictions;

(iv) Evaluating whether the covered trading activities of trading desks engaged in market making-related activities subject to § 75.4(b) are consistent with the requirements governing permitted market making-related activities;

(v) Evaluating whether the covered trading activities of trading desks that are engaged in permitted trading activity subject to §§ 75.4, 75.5, or 75.6(a)–(b) (*i.e.,* underwriting and market making-related related activity, risk-mitigating hedging, or trading in certain government obligations) are consistent with the requirement that such activity not result, directly or indirectly, in a material exposure to high-risk assets or high-risk trading strategies;

(vi) Identifying the profile of particular covered trading activities of the banking entity, and the individual trading desks of the banking entity, to help establish the appropriate frequency and scope of examination by the Commission of such activities; and

(vii) Assessing and addressing the risks associated with the banking entity's covered trading activities.

c. Information that must be furnished pursuant to this appendix is *not* intended to serve as a dispositive tool for the identification of permissible or impermissible activities.

d. In addition to the quantitative measurements required in this appendix, a banking entity may need to develop and implement other quantitative measurements in order to effectively monitor its covered trading activities for compliance with section 13 of the BHC Act and this part and to have an effective compliance program, as required by § 75.20. The effectiveness of particular quantitative measurements may differ based on the profile of the banking entity's businesses in general and, more specifically, of the particular trading desk, including types of instruments traded, trading activities and strategies, and history and experience (*e.g.,* whether the trading desk is an established, successful market maker or a new entrant to a competitive market). In all cases, banking entities must ensure that they have robust measures in place to identify and monitor the risks taken in their trading activities, to ensure that the activities are within risk tolerances established by the banking entity, and to monitor and examine for compliance with the proprietary trading restrictions in this part.

e. On an ongoing basis, banking entities must carefully monitor, review, and evaluate all furnished quantitative measurements, as well as any others that they choose to utilize in order to maintain compliance with section 13 of the BHC Act and this part. All measurement results that indicate a heightened risk of impermissible proprietary trading, including with respect to otherwise-permitted activities under §§ 75.4 through 75.6(a)–(b), or that result in a material exposure to high-risk assets or high-risk trading strategies, must be escalated within the banking entity for review, further analysis, explanation to the Commission, and remediation, where appropriate. The quantitative measurements discussed in this appendix should be helpful to banking entities in identifying and managing the risks related to their covered trading activities.

II. Definitions

The terms used in this appendix have the same meanings as set forth in §§ 75.2 and 75.3. In addition, for purposes of this appendix, the following definitions apply:

Applicability identifies the trading desks for which a banking entity is required to calculate and report a particular quantitative measurement based on the type of covered trading activity conducted by the trading desk.

Calculation period means the period of time for which a particular quantitative measurement must be calculated.

Comprehensive profit and loss means the net profit or loss of a trading desk's material sources of trading revenue over a specific period of time, including, for example, any increase or decrease in the market value of a trading desk's holdings, dividend income, and interest income and expense.

Covered trading activity means trading conducted by a trading desk under §§ 75.4, 75.5, 75.6(a), or 75.6(b). A banking entity may include in its covered trading activity trading conducted under §§ 75.3(e), 75.6(c), 75.6(d), or 75.6(e).

Measurement frequency means the frequency with which a particular quantitative metric must be calculated and recorded.

Trading day means a calendar day on which a trading desk is open for trading.

III. Reporting and Recordkeeping

a. Scope of Required Reporting

1. *Quantitative measurements.* Each banking entity made subject to this appendix by § 75.20 must furnish the following quantitative measurements, as applicable, for each trading desk of the banking entity engaged in covered trading activities and calculate these quantitative measurements in accordance with this appendix:

i. Risk and Position Limits and Usage;

ii. Risk Factor Sensitivities;

iii. Value-at-Risk and Stressed Value-at-Risk;

iv. Comprehensive Profit and Loss Attribution;

v. Positions;

vi. Transaction Volumes; and

vii. Securities Inventory Aging.

2. *Trading desk information.* Each banking entity made subject to this appendix by § 75.20 must provide certain descriptive information, as further described in this appendix, regarding each trading desk engaged in covered trading activities.

3. *Quantitative measurements identifying information.* Each banking entity made subject to this appendix by § 75.20 must provide certain identifying and descriptive information, as further described in this appendix, regarding its quantitative measurements.

4. *Narrative statement.* Each banking entity made subject to this appendix by § 75.20 must provide a separate narrative statement, as further described in this appendix.

5. *File identifying information.* Each banking entity made subject to this appendix by § 75.20 must provide file identifying information in each submission to the Commission pursuant to this appendix, including the name of the banking entity, the RSSD ID assigned to the top-tier banking entity by the Board, and identification of the reporting period and creation date and time.

b. Trading Desk Information

1. Each banking entity must provide descriptive information regarding each trading desk engaged in covered trading activities, including:

i. Name of the trading desk used internally by the banking entity and a unique identification label for the trading desk;

ii. Identification of each type of covered trading activity in which the trading desk is engaged;

iii. Brief description of the general strategy of the trading desk;

iv. A list of the types of financial instruments and other products purchased and sold by the trading desk; an indication of which of these are the main financial instruments or products purchased and sold by the trading desk; and, for trading desks engaged in market making-related activities under § 75.4(b), specification of whether each type of financial instrument is included in market-maker positions or not included in market-maker positions. In addition, indicate whether the trading desk is including in its quantitative measurements products excluded from the definition of ''financial instrument'' under § 75.3(d)(2) and, if so, identify such products;

v. Identification by complete name of each legal entity that serves as a booking entity for covered trading activities conducted by the trading desk; and indication of which of the identified legal entities are the main booking entities for covered trading activities of the trading desk;

vii. For each legal entity that serves as a booking entity for covered trading activities, specification of any of the following applicable entity types for that legal entity:

A. National bank, Federal branch or Federal agency of a foreign bank, Federal savings association, Federal savings bank;

B. State nonmember bank, foreign bank having an insured branch, State savings association;

C. U.S.-registered broker-dealer, U.S.-registered security-based swap dealer, U.S.-

registered major security-based swap participant;

D. Swap dealer, major swap participant, derivatives clearing organization, futures commission merchant, commodity pool operator, commodity trading advisor, introducing broker, floor trader, retail foreign exchange dealer;

E. State member bank;

F. Bank holding company, savings and loan holding company;

G. Foreign banking organization as defined in 12 CFR 211.21(o);

H. Uninsured State-licensed branch or agency of a foreign bank; or

I. Other entity type not listed above, including a subsidiary of a legal entity described above where the subsidiary itself is not an entity type listed above;

2. Indication of whether each calendar date is a trading day or not a trading day for the trading desk; and

3. Currency reported and daily currency conversion rate.

c. Quantitative Measurements Identifying Information

Each banking entity must provide the following information regarding the quantitative measurements:

1. A Risk and Position Limits Information Schedule that provides identifying and descriptive information for each limit reported pursuant to the Risk and Position Limits and Usage quantitative measurement, including the name of the limit, a unique identification label for the limit, a description of the limit, whether the limit is intraday or end-of-day, the unit of measurement for the limit, whether the limit measures risk on a net or gross basis, and the type of limit;

2. A Risk Factor Sensitivities Information Schedule that provides identifying and descriptive information for each risk factor sensitivity reported pursuant to the Risk Factor Sensitivities quantitative measurement, including the name of the sensitivity, a unique identification label for the sensitivity, a description of the sensitivity, and the sensitivity's risk factor change unit;

3. A Risk Factor Attribution Information Schedule that provides identifying and descriptive information for each risk factor attribution reported pursuant to the Comprehensive Profit and Loss Attribution quantitative measurement, including the name of the risk factor or other factor, a unique identification label for the risk factor or other factor, a description of the risk factor or other factor, and the risk factor or other factor's change unit;

4. A Limit/Sensitivity Cross-Reference Schedule that cross-references, by unique identification label, limits identified in the Risk and Position Limits Information Schedule to associated risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule; and

5. A Risk Factor Sensitivity/Attribution Cross-Reference Schedule that cross-references, by unique identification label, risk factor sensitivities identified in the Risk Factor Sensitivities Information Schedule to associated risk factor attributions identified in the Risk Factor Attribution Information Schedule.

d. Narrative Statement

Each banking entity made subject to this appendix by § 75.20 must submit in a separate electronic document a Narrative Statement to the Commission describing any changes in calculation methods used, a description of and reasons for changes in the banking entity's trading desk structure or trading desk strategies, and when any such change occurred. The Narrative Statement must include any information the banking entity views as relevant for assessing the information reported, such as further description of calculation methods used. If a banking entity does not have any information to report in a Narrative Statement, the banking entity must submit an electronic document stating that it does not have any information to report in a Narrative Statement.

e. Frequency and Method of Required Calculation and Reporting

A banking entity must calculate any applicable quantitative measurement for each trading day. A banking entity must report the Narrative Statement, the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement electronically to the Commission on the reporting schedule established in § 75.20 unless otherwise requested by the Commission. A banking entity must report the Trading Desk Information, the Quantitative Measurements Identifying Information, and each applicable quantitative measurement to the Commission in accordance with the XML Schema specified and published on the Commission's website.

f. Recordkeeping

A banking entity must, for any quantitative measurement furnished to the Commission pursuant to this appendix and § 75.20(d), create and maintain records documenting the preparation and content of these reports, as well as such information as is necessary to permit the Commission to verify the accuracy of such reports, for a period of five years from the end of the calendar year for which the measurement was taken. A banking entity must retain the Narrative Statement, the Trading Desk Information, and the Quantitative Measurements Identifying Information for a period of five years from the end of the calendar year for which the information was reported to the Commission.

IV. Quantitative Measurements

a. Risk-Management Measurements

1. Risk and Position Limits and Usage

i. *Description:* For purposes of this appendix, Risk and Position Limits are the constraints that define the amount of risk that a trading desk is permitted to take at a point in time, as defined by the banking entity for a specific trading desk. Usage represents the value of the trading desk's risk or positions that are accounted for by the current activity of the desk. Risk and position limits and their usage are key risk management tools used to control and monitor risk taking and include, but are not limited to, the limits set out in § 75.4 and § 75.5. A number of the metrics that are described below, including ''Risk Factor Sensitivities'' and ''Value-at-Risk,'' relate to a trading desk's risk and position limits and are useful in evaluating and setting these limits in the broader context of the trading desk's overall activities, particularly for the market making activities under § 75.4(b) and hedging activity under § 75.5. Accordingly, the limits required under § 75.4(b)(2)(iii) and § 75.5(b)(1)(i)(A) must meet the applicable requirements under § 75.4(b)(2)(iii) and § 75.5(b)(1)(i)(A) and also must include appropriate metrics for the trading desk limits including, at a minimum, the ''Risk Factor Sensitivities'' and ''Value-at-Risk'' metrics except to the extent any of the ''Risk Factor Sensitivities'' or ''Value-at-Risk'' metrics are demonstrably ineffective for measuring and monitoring the risks of a trading desk based on the types of positions traded by, and risk exposures of, that desk.

A. A banking entity must provide the following information for each limit reported pursuant to this quantitative measurement: the unique identification label for the limit reported in the Risk and Position Limits Information Schedule, the limit size (distinguishing between an upper and a lower limit), and the value of usage of the limit.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

2. Risk Factor Sensitivities

i. *Description:* For purposes of this appendix, Risk Factor Sensitivities are changes in a trading desk's Comprehensive Profit and Loss that are expected to occur in the event of a change in one or more underlying variables that are significant sources of the trading desk's profitability and risk. A banking entity must report the risk factor sensitivities that are monitored and managed as part of the trading desk's overall risk management policy. Reported risk factor sensitivities must be sufficiently granular to account for a preponderance of the expected price variation in the trading desk's holdings. A banking entity must provide the following information for each sensitivity that is reported pursuant to this quantitative measurement: The unique identification label for the risk factor sensitivity listed in the Risk Factor Sensitivities Information Schedule, the change in risk factor used to determine the risk factor sensitivity, and the aggregate change in value across all positions of the desk given the change in risk factor.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

3. Value-at-Risk and Stressed Value-at-Risk

i. *Description:* For purposes of this appendix, Value-at-Risk (''VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on current market conditions. For purposes of this appendix, Stressed Value-at-Risk (''Stressed VaR'') is the measurement of the risk of future financial loss in the value of a trading desk's aggregated positions at the ninety-nine percent confidence level over a one-day period, based on market conditions during a period of significant financial stress.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* For VaR, all trading desks engaged in covered trading activities. For Stressed VaR, all trading desks engaged in covered trading activities, except trading desks whose covered trading activity is conducted exclusively to hedge products excluded from the definition of ''financial instrument'' under § 75.3(d)(2).

b. Source-of-Revenue Measurements

1. Comprehensive Profit and Loss Attribution

i. *Description:* For purposes of this appendix, Comprehensive Profit and Loss Attribution is an analysis that attributes the daily fluctuation in the value of a trading desk's positions to various sources. First, the daily profit and loss of the aggregated positions is divided into three categories: (i) Profit and loss attributable to a trading desk's existing positions that were also positions held by the trading desk as of the end of the prior day (''existing positions''); (ii) profit and loss attributable to new positions resulting from the current day's trading activity (''new positions''); and (iii) residual profit and loss that cannot be specifically attributed to existing positions or new positions. The sum of (i), (ii), and (iii) must equal the trading desk's comprehensive profit and loss at each point in time.

A. The comprehensive profit and loss associated with existing positions must reflect changes in the value of these positions on the applicable day. The comprehensive profit and loss from existing positions must be further attributed, as applicable, to changes in (i) the specific risk factors and other factors that are monitored and managed as part of the trading desk's overall risk management policies and procedures; and (ii) any other applicable elements, such as cash flows, carry, changes in reserves, and the correction, cancellation, or exercise of a trade.

B. For the attribution of comprehensive profit and loss from existing positions to specific risk factors and other factors, a banking entity must provide the following information for the factors that explain the preponderance of the profit or loss changes due to risk factor changes: the unique identification label for the risk factor or other factor listed in the Risk Factor Attribution Information Schedule, and the profit or loss due to the risk factor or other factor change.

C. The comprehensive profit and loss attributed to new positions must reflect commissions and fee income or expense and market gains or losses associated with transactions executed on the applicable day. New positions include purchases and sales of financial instruments and other assets/liabilities and negotiated amendments to existing positions. The comprehensive profit and loss from new positions may be reported in the aggregate and does not need to be further attributed to specific sources.

D. The portion of comprehensive profit and loss that cannot be specifically attributed to known sources must be allocated to a residual category identified as an unexplained portion of the comprehensive profit and loss. Significant unexplained profit and loss must be escalated for further investigation and analysis.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks engaged in covered trading activities.

c. Positions, Transaction Volumes, and Securities Inventory Aging Measurements

1. Positions

i. *Description:* For purposes of this appendix, Positions is the value of securities and derivatives positions managed by the trading desk. For purposes of the Positions quantitative measurement, do not include in the Positions calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.'' [1] A banking entity must separately report the trading desk's market value of long securities positions, market value of short securities positions, market value of derivatives receivables, market value of derivatives payables, notional value of derivatives receivables, and notional value of derivatives payables.

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 75.4(a) or § 75.4(b) to conduct underwriting activity or market-making-related activity, respectively.

2. Transaction Volumes

i. *Description:* For purposes of this appendix, Transaction Volumes measures four exclusive categories of covered trading activity conducted by a trading desk. A banking entity is required to report the value and number of security and derivative transactions conducted by the trading desk with: (i) Customers, excluding internal transactions; (ii) non-customers, excluding internal transactions; (iii) trading desks and other organizational units where the transaction is booked in the same banking entity; and (iv) trading desks and other organizational units where the transaction is booked into an affiliated banking entity. For securities, value means gross market value. For derivatives, value means gross notional value. For purposes of calculating the Transaction Volumes quantitative measurement, do not include in the Transaction Volumes calculation for ''securities'' those securities that are also ''derivatives,'' as those terms are defined under subpart A; instead, report those securities that are also derivatives as ''derivatives.'' [2] Further, for purposes of the Transaction Volumes quantitative measurement, a customer of a trading desk that relies on § 75.4(a) to conduct underwriting activity is a market participant identified in § 75.4(a)(7), and a customer of a trading desk that relies on § 75.4(b) to conduct market making-related activity is a market participant identified in § 75.4(b)(3).

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 75.4(a) or § 75.4(b) to conduct underwriting activity or market-making-related activity, respectively.

3. Securities Inventory Aging

i. *Description:* For purposes of this appendix, Securities Inventory Aging generally describes a schedule of the market value of the trading desk's securities positions and the amount of time that those securities positions have been held. Securities Inventory Aging must measure the age profile of a trading desk's securities positions for the following periods: 0–30 calendar days; 31–60 calendar days; 61–90 calendar days; 91–180 calendar days; 181–360 calendar days; and greater than 360 calendar days. Securities Inventory Aging includes two schedules, a security asset-aging schedule, and a security liability-aging schedule. For purposes of the Securities Inventory Aging quantitative measurement, do not include securities that are also ''derivatives,'' as those terms are defined under subpart A.[3]

ii. *Calculation Period:* One trading day.

iii. *Measurement Frequency:* Daily.

iv. *Applicability:* All trading desks that rely on § 75.4(a) or § 75.4(b) to conduct underwriting activity or market-making related activity, respectively.

Dated: May 31, 2018.

No. 137 July 17, 2018

Part IV

Office of the United States Trade Representative

Request for Comments Concerning Proposed Modification of Action Pursuant to Section 301: China's Acts, Policies, and Practices Related to Technology Transfer, Intellectual Property, and Innovation; Notice

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

[Docket Number USTR–2018–0026]

Request for Comments Concerning Proposed Modification of Action Pursuant to Section 301: China's Acts, Policies, and Practices Related to Technology Transfer, Intellectual Property, and Innovation

AGENCY: Office of the United States Trade Representative.

ACTION: Request for comments and notice of public hearing.

SUMMARY: On June 20, 2018 (83 FR 28710), the U.S. Trade Representative (Trade Representative) provided notice of an initial action in the Section 301 investigation of the acts, policies, and practices of the Government of China related to technology transfer, intellectual property, and innovation. The initial action was the imposition of an additional 25 percent *ad valorem* duty on products of China with an annual trade value of approximately $34 billion, effective July 6, 2018. The June 20 notice also sought public comment on another proposed action, in the form of an additional 25 percent *ad valorem* duty on products of China with an annual trade value of approximately $16 billion. The public comment process in connection with the proposed additional action is ongoing. On July 6, 2018, China responded to the initial action by imposing increased duties on goods of the United States. In light of China's decision to respond to the investigation by imposing duties on U.S. goods, the Trade Representative proposes a modification of the action taken in this investigation. The proposed modification is to maintain the original $34 billion action and the proposed $16 billion action, and to take further action in the form of an additional 10 percent *ad valorem* duty on products of China with an annual trade value of approximately $200 billion. The products subject to this proposed supplemental action are classified in the HTSUS subheadings set out in the Annex to this notice. The Office of the U.S. Trade Representative (USTR) is seeking public comment and will hold a public hearing regarding this proposed modification of the action in the investigation.

DATES: To be assured of consideration, you must submit comments and responses in accordance with the following schedule:

July 27, 2018: Due date for filing requests to appear and a summary of expected testimony at the public hearing, and for filing pre-hearing submissions.

August 17, 2018: Due date for submission of written comments.

August 20–23, 2018: The Section 301 Committee will convene a public hearing in the main hearing room of the U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436 beginning at 9:30 a.m.

August 30, 2018: Due date for submission of post-hearing rebuttal comments.

ADDRESSES: USTR strongly prefers electronic submissions made through the Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the instructions for submitting comments in sections D and F below. The docket number is USTR–2018–0026.

FOR FURTHER INFORMATION CONTACT: For questions about the ongoing investigation or proposed action, contact Arthur Tsao, Assistant General Counsel, or Justin Hoffmann, Director of Industrial Goods, at (202) 395–5725. For questions on customs classification of products identified in the Annex to this notice, contact *Traderemedy@cbp.dhs.gov.*

SUPPLEMENTARY INFORMATION:

A. Background

On August 18, 2017, USTR initiated an investigation into certain acts, policies, and practices of the Government of China related to technology transfer, intellectual property, and innovation (82 FR 40213).

In a notice published on April 6, 2018 (83 FR 14906), the Trade Representative announced a determination that the acts, policies, and practices of the Government of China covered in the investigation are unreasonable or discriminatory and burden or restrict U.S. commerce. The April 6 notice also invited public comment on a proposed action in the investigation, in the form of an additional 25 percent *ad valorem* duty on products from China classified in a list of 1,333 tariff subheadings, with an annual trade value of approximately $50 billion. As explained in the notice, the level was appropriate both in light of the estimated harm to the U.S. economy, and to obtain elimination of China's harmful acts, policies, and practices.

The public comment process included two opportunities for the submission of written comments, and the opportunity to participate in a public hearing. USTR received thousands of submissions, and held a 3 day public hearing with more than 100 witnesses. The public versions of submissions and a transcript of the hearing are available on *www.regulations.gov* in docket number USTR–2018–0005.

USTR and the interagency Section 301 Committee carefully reviewed the public comments and the testimony from the public hearing. USTR and the Section 301 Committee also carefully reviewed the extent to which the tariff subheadings in the April 6, 2018 notice include products containing industrially significant technology, including technologies and products related to China's ''Made in China 2025'' industrial policy program.

Based on this review process, the Trade Representative determined to take an initial action in the investigation, and to consider an additional proposed action. The Trade Representative announced the determination on June 15, 2018, and published a notice on June 20, 2018 (83 FR 28710). The Trade Representative narrowed the proposed list in the April 6 notice to 818 tariff subheadings, with an approximate annual trade value of $34 billion. This initial action became effective on July 6, 2018. The additional proposed action is an additional *ad valorem* duty of 25 percent on products of China classified in 284 tariff subheadings, with an annual trade value of approximately $16 billion. The June 20 notice explained that including these tariff subheadings in the Section 301 action would maintain the effectiveness of a $50 billion trade action. The public comment process in connection with the proposed additional action is ongoing.

B. China's Response to the Action in the Investigation

The Government of China has chosen to respond to the initial U.S. action in the investigation by imposing retaliatory tariffs on U.S. goods, instead of addressing U.S. concerns with the unfair practices found in the investigation. On Friday, June 15, 2018, the day that the Trade Representative announced the initial action in the investigation, China issued a statement saying that it was imposing equivalent tariff measures on U.S. goods.

On Saturday, June 16, 2018, the Government of China specified that it would impose an additional 25 percent tariff on U.S. goods with a value of $50 billion (State Council Customs Tariff Commission 2018 Public Notice No. 5). China's announcement sets out two lists. The first list contains 545 tariff subheadings that supposedly corresponds to the initial U.S. $34 billion action, and had an effective date of July 6, 2018. The second list contains 114 tariff subheadings that supposedly corresponds to the additional proposed

$16 billion U.S. action, and will be effective on a date to be determined.

On Monday, June 18, 2018, the President issued a statement in response to China's announcement that it was imposing retaliatory tariffs on U.S. goods. *See https://www.whitehouse.gov/briefings-statements/statement-president-regarding-trade-china-2/.* The statement ''directed the United States Trade Representative to identify $200 billion worth of Chinese goods for additional tariffs at a rate of 10 percent. After the legal process is complete, these tariffs will go into effect if China refuses to change its practices, and also if it insists on going forward with the new tariffs that it has recently announced.''

On July 6, 2018, the day the initial $34 billion action in the investigation became effective, the Government of China confirmed that it is going forward with the new tariffs it announced on June 16. China also has not changed the acts, policies, and practices identified in the investigation.

C. Proposed Supplemental Action

Section 301(b) of the Trade Act of 1974, as amended (Trade Act) provides that ''the Trade Representative shall take all appropriate and feasible action authorized under [Section 301(c)], subject to the specific direction, if any, of the President regarding any such action . . . to obtain the elimination of [the] act, policy, or practice'' covered in the investigation. Section 307 of the Trade Act provides that ''The Trade Representative may modify or terminate any action, subject to the specific direction, if any, of the President with respect to such action, that is being taken under [Section 301] if . . . such action is being taken under section 301(b) of this title and is no longer appropriate.'' In light of China's response to the $50 billion action announced in the investigation and its refusal to change its acts, policies, and practices, it has become apparent that U.S. action at this level is not sufficient to obtain the elimination of China's acts, policies, and practices covered in the investigation. Accordingly, the Trade Representative is proposing to modify the action in this investigation by maintaining the original $34 billion action and the proposed $16 billion action, and by taking a further, supplemental action. The Trade Representative proposes an additional 10 percent *ad valorem* duty on products of China covered in the attached list of 6,031 tariff subheadings. The attached list has an annual trade value of approximately $200 billion.

Modification of the action in this investigation by taking a supplemental $200 billion action is appropriate in light of the statutory goal of obtaining the elimination of the acts, policies, and practices covered in the investigation. China has shown that it will not respond to action at a $50 billion level by addressing U.S. concerns with China's acts, policies, and practices involving technology transfer, intellectual property, and innovation. Rather, China is responding to action at a $50 billion level by imposing retaliatory duties.

Supplemental action at a $200 billion level is in accord with the President's direction. In addition, action at this level is appropriate in light of the level of China's announced retaliatory action ($50 billion) and the level of Chinese goods imported into the United States ($505 billion in 2017). China's retaliatory action covers a substantial percentage of U.S. goods exported to China ($130 billion in 2017). In order to enhance effectiveness, the level of the U.S. supplemental action must cover a substantial percentage of Chinese imports.

In developing the list of tariff subheadings included in this proposed supplemental action, trade analysts considered products from across all sectors of the Chinese economy. The tariff subheadings considered by the analysts included subheadings that commenters suggested for inclusion in response to the April 6 notice. The selection process took account of likely impacts on U.S. consumers, and involved the removal of subheadings identified by analysts as likely to cause disruptions to the U.S. economy, as well as tariff lines subject to legal or administrative constraints.

To ensure the effectiveness of the action, any merchandise subject to the increased tariffs admitted into a U.S. foreign trade zone on or after the effective date of the increased tariffs, except those eligible for admission under ''domestic status'' as defined in 19 CFR 146.43, would have to be admitted as ''privileged foreign status'' as defined in 19 CFR 146.41, and would be subject upon entry for consumption to the additional duty.

D. Request for Public Comments

In accordance with section 304(b) of the Trade Act (19 U.S.C. 2414(b)), USTR invites comments from interested persons with respect to the proposed supplemental action to be taken in the investigation. To be assured of consideration, you must submit written comments by August 17, 2018, and post-hearing rebuttal comments by August 30, 2018.

USTR requests comments with respect to any aspect of the proposed supplemental action, including:

- The specific tariff subheadings to be subject to increased duties, including whether the subheadings listed in the Annex should be retained or removed, or whether subheadings not currently on the list should be added.
- The level of the increase, if any, in the rate of duty.
- The appropriate aggregate level of trade to be covered by additional duties.

In commenting on the inclusion or removal of particular tariff subheadings listed in the Annex, USTR requests that commenters address specifically whether imposing increased duties on a particular product would be practicable or effective to obtain the elimination of China's acts, policies, and practices, and whether maintaining or imposing additional duties on a particular product would cause disproportionate economic harm to U.S. interests, including small- or medium-size businesses and consumers.

E. Hearing Participation

The Section 301 Committee will convene a public hearing in the main hearing room of the U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, beginning at 9:30 a.m. on August 20, 2018. You must submit requests to appear at the hearing by July 27, 2018. The request to appear must include a summary of testimony, and may be accompanied by a pre-hearing submission. Remarks at the hearing may be no longer than five minutes to allow for possible questions from the Section 301 Committee.

All requests to appear at the hearing must be in English and sent electronically via *www.regulations.gov.* To submit a request to appear at the hearing via *www.regulations.gov,* enter docket number USTR–2018–0026 on the home page and click ''search''. The site will provide a search-results page listing all documents associated with this docket. Find a reference to this notice and click on the link titled ''comment now!''. In the ''comment'' field, include the name, address, email address, and telephone number of the person presenting the testimony. Attach a summary of the proposed testimony, and a pre-hearing submission if provided, by using the ''upload file'' field. The file name should include both the name of the person who will be presenting testimony and the entity they represent. In addition, please submit a request to appear and a PDF of the summary of proposed testimony by email to *301investigation@ustr.eop.gov.* In the subject line of the email, please include the name of the person who will be presenting testimony, followed by ''request to appear''. Please also include the name, address, email address, and telephone number of the person presenting testimony in the body of the email message.

F. Procedures for Written Submissions

All submissions must be in English and sent electronically via *www.regulations.gov.* To submit comments via *www.regulations.gov,* enter docket number USTR–2018–0026 on the home page and click ''search.'' The site will provide a search-results page listing all documents associated with this docket. Find a reference to this notice and click on the link entitled ''comment now!'' For further information on using the *www.regulations.gov* website, please consult the resources provided on the website by clicking on ''How to Use Regulations.gov'' on the bottom of the home page. We will not accept hand-delivered submissions.

The *www.regulations.gov* website allows users to submit comments by filling in a ''comment'' field or by attaching a document using an ''upload file'' field. USTR prefers that you submit comments in an attached document. If you attach a document, it is sufficient to type ''see attached'' in the ''comment'' field. USTR prefers submissions in Microsoft Word (.doc) or searchable Adobe Acrobat (.pdf). If you use an application other than those two, please indicate the name of the application in the ''comment'' field.

File names should reflect the name of the person or entity submitting the comments. Please do not attach separate cover letters to electronic submissions; rather, include any information that might appear in a cover letter in the comments themselves. Similarly, to the extent possible, please include any exhibits, annexes, or other attachments in the same file as the comment itself, rather than submitting them as separate files.

For any comments submitted electronically that contain business confidential information, the file name of the business confidential version should begin with the characters ''BC''. Any page containing business confidential information must be clearly marked ''BUSINESS CONFIDENTIAL'' on the top of that page and the submission should clearly indicate, via brackets, highlighting, or other means, the specific information that is business confidential. If you request business confidential treatment, you must certify in writing that disclosure of the information would endanger trade secrets or profitability, and that the information would not customarily be released to the public. Filers of submissions containing business confidential information also must submit a public version of their comments. The file name of the public version should begin with the character ''P''. The ''BC'' and ''P'' should be followed by the name of the person or entity submitting the comments or rebuttal comments. If these procedures are not sufficient to protect business confidential information or otherwise protect business interests, please contact the USTR Tech Transfer Section 301 line at (202) 395–5725 to discuss whether alternative arrangements are possible.

USTR will post submissions in the docket for public inspection, except business confidential information. You can view submissions on the *https://www.regulations.gov* website by entering docket number USTR–2018–0026 in the search field on the home page.

Robert E. Lighthizer,

United States Trade Representative.

ANNEX

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
0203.29.20	Frozen retail cuts of meat of swine, nesoi.
0203.29.40	Frozen meat of swine, other than retail cuts, nesoi.
0206.10.00	Edible offal of bovine animals, fresh or chilled.
0208.10.00	Meat and edible meat offal of rabbits or hares, fresh, chilled or frozen.
0208.90.20	Meat and edible offal of deer, fresh, chilled or frozen.
0208.90.25	Frog legs, fresh, chilled or frozen.
0210.19.00	Meat of swine other than hams, shoulders, bellies (streaky) and cuts thereof, salted, in brine, dried or smoked.
0301.11.00	Live ornamental freshwater fish.
0301.19.00	Live ornamental fish, other than freshwater.
0301.91.00	Live trout.
0301.92.00	Live eels.
0301.93.02	Live carp.
0301.94.01	Other live Fish, Atlantic & Pacific Bluefin Tunas.
0301.95.00	Other live Fish, Southern Bluefin Tunas.
0301.99.03	Live Tench (Tinca Tinca), sheatfish (Silurus Glanis), bighead carp (Aristichthys Nobilis) and other fish, nesoi.
0302.11.00	Trout, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.13.00	Pacific salmon, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.14.00	Atlantic and Danube salmon, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.19.00	Salmonidae other than trout or Pacific, Atlantic & Danube salmon, fresh or chilled, excluding fillets, other meat portions, livers & roes.
0302.21.00	Halibut and Greenland turbot, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.22.00	Plaice, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.23.00	Sole, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.24.00	Turbots.
0302.29.01	Flat fish, nesoi, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.31.00	Albacore or longfinned tunas, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.32.00	Yellowfin tunas, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.33.00	Skipjack or stripe-bellied bonito, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.34.00	Bigeye tunas (Thunnas obesus), fresh or chilled, excluding fillets, other meat portions, livers and roes.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
0302.35.01	Atlantic & Pacific bluefin tunas, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.36.00	Southern bluefin tunas (Thunnas maccoyii), fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.39.02	Tunas not elsewhere specified or included, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.41.00	Herrings, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.42.00	Anchovies, excl. fillets, livers & roes, fresh or chilled, scaled, in immediate containers weighing with their contents <6.8 kg.
0302.43.00	Sardines, sardinella, brisling or sprats, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.44.00	Mackerel, excl. fillets, livers & roes, fresh or chilled.
0302.45.11	Jack & horse mackerel, excl. fillets, livers & roes, fresh or chilled, scaled, in immediate containers weighing with their contents <6.8 kg.
0302.45.50	Jack & horse mackerel excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers >6.8 kg.
0302.46.11	Cobia, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.46.50	Cobia, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.47.00	Swordfish, fresh or chilled, excluding livers and roes.
0302.49.00	Herrings, anchovies, sardines, nesoi.
0302.51.00	Cod, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.52.00	Haddock, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.53.00	Coalfish, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.54.11	Hake, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.54.50	Hake, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.55.11	Alaska pollack, excl. fillets, livers, roes, fresh or chilled, scaled, in immediate containers weighing with their contents <6.8 kg.
0302.55.50	Alaska pollack excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.56.11	Blue whitings, excl. fillets, livers & roes, fresh or chilled, scaled, in immediate containers weighing with their contents <6.8 kg.
0302.56.50	Blue whitings, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.59.11	Bregmacerotidae et al. fish, nesoi, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing <6.8 kg.
0302.59.50	Bregmacerotidae fish, etc. excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers >6.8 kg.
0302.71.11	Tilapias, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents <6.8 kg.
0302.71.50	Tilapias, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.72.11	Catfish, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.72.50	Catfish excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.73.11	Carp, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.73.50	Carp excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.74.00	Eels, fresh or chilled, excluding fillets, other meat portions, livers and roes.
0302.79.11	Fish beginning 0302.7, nesoi, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers <6.8 kg.
0302.79.50	Fish beginning 0302.7, nesoi, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in containers >6.8 kg.
0302.81.00	Dogfish and other sharks, fresh or chilled, excluding fillets, livers, roes and fish meat of 0304.
0302.82.00	Rays & skates, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.83.00	Toothfish excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.84.11	Seabass, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.84.50	Seabass, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.85.11	Seabream, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.85.50	Seabream, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.89.11	Fish, nesoi, excl. fillets, livers and roes, fresh or chilled, scaled, in immediate containers weighing with their contents 6.8 kg or less.
0302.89.50	Fish, nesoi, excl. fillets, livers & roes, fresh or chilled, not scaled, or scaled in immediate containers over 6.8 kg.
0302.91.20	Sturgeon Roe, fresh or chilled.
0302.91.40	Mullet and other fish liver and roes, fresh or chilled.
0302.92.00	Shark fins, fresh or chilled, excluding fillet.
0302.99.00	Other fish, fresh or chilled, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ‘‘nesoi’’ means ‘‘not elsewhere specified or included’’.

HTSUS subheading	Product description
0303.11.00	Sockeye salmon (red salmon) (Orncorhynchus nerka), frozen, excluding fillets, other meat portions, livers and roes.
0303.12.00	Pacific salmon, other than sockeye, frozen, excluding fillets, other meat portions, livers and roes.
0303.13.00	Atlantic salmon and Danube salmon, frozen, excluding livers and roes.
0303.14.00	Trout, frozen, excluding fillets, other meat portions, livers and roes.
0303.19.01	Salmonidae, other than trout or Atlantic and Danube salmon, nesoi, frozen, excluding fillets, other meat portions, livers and roes.
0303.23.00	Tilapias, frozen, excluding fillets, other meat portions, livers and roes.
0303.24.00	Catfish, frozen, excluding fillets, other meat portions, livers and roes.
0303.25.01	Carp, frozen excluding fillets, livers and roes.
0303.26.00	Eels, frozen, excluding fillets, other meat portions, livers and roes.
0303.29.01	Other fish in 0303.2 grouping nesoi, frozen, excluding fillets, other meat portions, livers and roes.
0303.31.00	Halibut and Greenland turbot, frozen, excluding fillets, other meat portions & livers and roes.
0303.32.00	Plaice, frozen, excluding fillets, other meat portions, livers and roes.
0303.33.00	Sole, frozen, excluding fillets, other meat portions, livers and roes.
0303.34.00	Turbots, frozen, excluding fillets, other meat portions, livers and roes.
0303.39.01	Flat fish, other than halibut, Greenland turbot, plaice and sole, frozen, excluding fillets, other meat portions, livers and roes.
0303.41.00	Albacore or longfinned tunas, frozen, excluding fillets, other meat portions, livers and roes.
0303.42.00	Yellowfin tunas, frozen, excluding fillets, other meat portions, livers and roes.
0303.43.00	Skipjack or stripe-bellied bonito, frozen, excluding fillets, other meat portions, livers and roes.
0303.44.00	Bigeye tunas (Thunnas obesus), frozen, excluding fillets, other meat portions, livers and roes.
0303.45.01	Atlantic and Pacific bluefin tunas, frozen, excluding fillets, other meat portions, livers and roes.
0303.46.00	Southern bluefin tunas (Thunnas maccoyii), frozen, excluding fillets, other meat portions, livers and roes.
0303.49.02	Tunas, not elsewhere specified or included, frozen, excluding fillets, other meat portions, livers and roes.
0303.51.00	Herrings, frozen, excluding fillets, other meat portions, livers and roes.
0303.53.00	Sardines, sardinella, brisling or sprats, frozen, excluding fillets, other meat portions, livers and roes.
0303.54.00	Mackerel, frozen, excluding fillets, livers and roes.
0303.55.00	Jack & horse mackerel, frozen, excluding fillets, other meat portions, livers and roes.
0303.56.00	Cobia, frozen, excluding fillets, other meat portions, livers and roes.
0303.57.00	Swordfish steaks, other swordfish, excluding fillets, other meat portions, livers and roes.
0303.59.00	Other fish, frozen, excluding fillets, livers, roes and herrings.
0303.63.00	Cod, frozen, excluding fillets, other meat portions, livers and roes.
0303.64.00	Haddock, frozen, excluding fillets, other meat portions, livers and roes.
0303.65.00	Coalfish, frozen, excluding fillets, other meat portions, livers and roes.
0303.66.00	Hake, frozen, excluding fillets, other meat portions, livers and roes.
0303.67.00	Alaska pollack, frozen, excluding fillets, other meat portions, livers and roes.
0303.68.00	Blue whitings, frozen, excluding fillets, other meat portions, livers and roes.
0303.69.00	Other fish in Bregmacerotidae et al, etc. frozen, excluding fillets, other meat portions, livers and roes.
0303.81.00	Dogfish and other sharks, frozen, excluding fillets, livers, roes and fish meat of 0304.
0303.82.00	Rays & skates, frozen, excluding fillets, other meat portions, livers and roes.
0303.83.00	Toothfish excluding fillets, other meat portions, livers and roes.
0303.84.00	Sea bass, frozen, excluding fillets, other meat portions, livers and roes.
0303.89.00	Smelts, cusk, pollock, shad, sturgeon, atkafish, fresh-water fish, etc. frozen, excluding fillets, other meat portions, livers and roes.
0303.91.20	Sturgeon roe, frozen.
0303.91.40	Herring, salmon, alaskan pollock, mullet, other fist liver and roes, frozen.
0303.92.00	Shark fins excluding fillets, frozen.
0303.99.00	Other fish, frozen, nesoi.
0304.31.00	Tilapias, fillets, fresh or chilled.
0304.32.00	Catfish, fillets, fresh or chilled.
0304.33.00	Nile perch, fillets, fresh or chilled.
0304.39.00	Eels or snakeheads, fillets, fresh or chilled.
0304.41.00	Salmon fillets, fresh or chilled.
0304.42.00	Trout, fillets, fresh or chilled.
0304.43.00	‘‘Flat fish’’, sole, plaice, etc. fillets, fresh or chilled.
0304.44.00	Bregamacerotidae & like fish, fillets, fresh or chilled.
0304.45.00	Fresh or chilled swordfish fillets.
0304.46.00	Fresh or chilled toothfish fillets.
0304.47.00	Dogfish and other shark fillets, frozen or chilled.
0304.48.00	Ray and skate fillets, fresh or chilled.
0304.49.01	Pike, pickerel, whitefish, tilapia, perch, cusk, other fish fillets, fresh or chilled.
0304.51.01	Tilapias, catfish, carp, eels, nile perch, snakeheads, other than fillets, fresh or chilled.
0304.52.00	Salmonidae, other than fillets, fresh or chilled.
0304.53.00	Bregmacerotidae and other fish, nesoi, other than fillets, fresh or chilled.
0304.54.00	Fresh or chilled swordfish other than fillets.
0304.55.00	Fresh or chilled toothfish other than fillets.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
0304.56.00	Dogfish and other sharks, fresh or chilled.
0304.57.00	Rays and skates, fresh or chilled.
0304.59.00	Other fish, nesoi, other than fillets, fresh or chilled.
0304.61.00	Frozen tilapia fillets.
0304.62.00	Frozen catfish fillets.
0304.63.00	Frozen Nile perch fillets.
0304.69.00	Frozen eel & snakehead fillets.
0304.71.10	Frozen cod fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.71.50	Fillets, frozen, of cod, other than above.
0304.72.10	Frozen haddock fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.72.50	Fillets, frozen, of haddock, other than above.
0304.73.10	Frozen coalfish fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.73.50	Other coalfish fillets.
0304.74.10	Frozen hake fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.74.50	Fillets, frozen, of hake.
0304.75.10	Frozen Alaska pollack fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut.
0304.75.50	Fillets, frozen, of Alaska pollock, other than above.
0304.79.10	Frozen Bregmacerotidae et al. fish fillets, nesoi, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces.
0304.79.50	Frozen fillets of other fresh-water fish, flat fish, etc., nesoi, other than above.
0304.81.10	Frozen salmon fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight.
0304.81.50	Other frozen salmon fillets.
0304.82.10	Frozen trout fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.82.50	Frozen trout fillets, other than above.
0304.83.10	Frozen "flat fish" fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.83.50	Frozen "other flat fish" fillets, other than above.
0304.84.00	Frozen swordfish fillets.
0304.85.00	Frozen toothfish fillets.
0304.86.00	Frozen herring fillets.
0304.87.00	Frozen tuna fillets.
0304.88.00	Dogfish, other shark, ray and skate fillets, frozen.
0304.89.10	Other frozen fish fillets, skinned, in blocks weighing over 4.5 kg, to be minced, ground or cut into pieces of uniform weight and dimension.
0304.89.50	Other frozen fish fillets, other than above.
0304.91.10	Chilled or Frozen Swordfish fillets, in bulk or in immediate containers weighing with their contents over 6.8 kg each.
0304.91.90	Chilled or Frozen Swordfish Fillets, nesoi.
0304.92.10	Chilled or Frozen Toothfish fillets, in bulk or in immediate containers weighing with their contents over 6.8 kg each.
0304.92.90	Chilled or Frozen Toothfish Fillets, nesoi.
0304.93.10	Chilled or Frozen tilapia & like fillets, nesoi, in bulk or in immediate containers weighing >6.8 kg each.
0304.93.90	Tilapias, catfish, carp, eels, nile perch & snakehead chilled or frozen fillets, nesoi.
0304.94.10	Alaska pollack chilled or frozen fillets, in bulk or in immediate containers weighing with their contents over 6.8 kg each.
0304.94.90	Alaska pollack, chilled or frozen fillets, nesoi.
0304.95.10	Chilled or Frozen fillets, Bregmacerotidae & like, nesoi, in bulk or in immediate containers >6.8 kg each.
0304.95.90	Bregamacerotidae other fish, other than Alaska pollack, nesoi, chilled or frozen fillets, nesoi.
0304.96.00	Dogfish and other sharks, frozen, nesoi.
0304.97.00	Ray and skates, frozen, nesoi.
0304.99.11	Chilled or Frozen fillets, nesoi, in bulk or in immediate containers weighing with their contents over 6.8 kg each.
0304.99.91	Chilled or Frozen fillets, nesoi.
0305.10.20	Flours, meals and pellets of fish, fit for human consumption, in bulk or in immediate containers weighing with contents over 6.8 kg each.
0305.10.40	Flours, meals and pellets of fish, fit for human consumption, other than in bulk or immediate containers weighing contents over 6.8 kg each.
0305.20.20	Sturgeon roe, dried, smoked, salted or in brine.
0305.20.40	Fish livers and roes, other than sturgeon roe, dried, smoked, salted or in brine.
0305.31.01	Tilapia, catfish, carp, eel, nile perch, snakehead fillets, dried or salted in brine, but not smoked.
0305.32.00	"Flat fish" fillets, nesoi, dried, salted or in brine, but not smoked.

HTSUS subheading	Product description
0305.39.20	Fillets of herrings, dried, salted or in brine, but not smoked, in immediate containers weighing with their contents 6.8 kg or less each.
0305.39.40	Fillets of mackerel, dried, salted or in brine, but not smoked, in immediate containers weighing with their contents 6.8 kg or less each.
0305.39.61	Herring and other fist fillets, dried, salted or in brine, but not smoked.
0305.41.00	Smoked Pacific, Atlantic and Danube salmon, including fillets.
0305.42.00	Smoked herrings, including fillets.
0305.43.00	Smoked trout, including fillets.
0305.44.01	Tilapia, catfish, carp, eel, nile perch, snakehead including fillets, smoked.
0305.49.20	Smoked mackerel, including fillets.
0305.49.40	Smoked fish, including fillets, nesoi.
0305.51.00	Dried cod, whether or not salted but not smoked.
0305.52.00	Tilapia, catfish, carp, eel, nile perch, snakehead, not smoked, dried, whether or not salted.
0305.53.00	Fish of families Bregmacerotidae, Euclichthyidae, Gadidae, Macrouridae,Melanonidae, Merlucciidae, Moridae and Muraenolepididae, dried but not smoked.
0305.54.00	Herrings, anchovies, sardines, sardinella, brisling or sprat, mackerel, Indian mackeral, seerfish, dried, whether or not salted, but not smoked.
0305.59.00	Dried fish, other than cod or shark fins, whether or not salted but not smoked.
0305.61.20	Herrings, in brine or salted but not dried or smoked, in immediate containers weighing with their contents 6.8 kg or less each.
0305.61.40	Herrings, in brine or salted but not dried or smoked, other than in immediate containers weighing with their contents 6.8 kg or less each.
0305.62.00	Cod, in brine or salted but not dried or smoked.
0305.63.20	Anchovies, in brine or salted but not dried or smoked, in immediate airtight containers weighing with their contents 6.8 kg or less each.
0305.63.40	Anchovies, in brine or salted but not dried or smoked, in immediate containers, nesoi, weighing with their contents 6.8 kg or less each.
0305.63.60	Anchovies, in brine or salted but not dried or smoked, other than in immediate containers weighing with their contents 6.8 kg or less each.
0305.64.10	Tilapias, catfish, carp, eel, Nile perch, or snakehead, in brine or salted but not dried or smoked, in immediate containers <6.8 kg.
0305.64.50	Tilapias, catfish, carp, eel, Nile perch, or snakehead, in brine or salted but not dried or smoked, other than in containers <6.8 kg.
0305.69.10	Cusk, haddock, hake, and pollock, in brine or salted but not dried or smoked.
0305.69.20	Mackerel, in brine or salted but not dried or smoked, in immediate containers weighing with their contents 6.8 kg or less each.
0305.69.30	Mackerel, in brine or salted but not dried or smoked, other than in immediate containers weighing with their contents 6.8 kg or less each.
0305.69.40	Salmon, in brine or salted but not dried or smoked.
0305.69.50	Fish, nesoi, in brine or salted but not dried or smoked, in immediate containers weighing with their contents 6.8 kg or less each.
0305.69.60	Fish, nesoi, in brine or salted but not dried or smoked, other than in immediate containers weighing with their contents 6.8 kg or less each.
0305.71.00	Dried shark fins, whether or not salted but not smoked.
0305.72.00	Fish heads, tails, and maws, whether or not salted but not smoked.
0305.79.00	Edible fish offal, other fish heads tails and maws or shark fins, whether or not salted but not smoked.
0306.11.00	Rock lobster and other sea crawfish, cooked in shell or uncooked, dried, salted or in brine, frozen.
0306.12.00	Lobsters excluding rock lobster, cooked in shell or uncooked, dried, salted or in brine, frozen.
0306.14.20	Crabmeat, frozen.
0306.14.40	Crabs, cooked in shell or uncooked (whether in shell or not), dried, salted or in brine, frozen.
0306.15.00	Norway lobsters, cooked in shell or uncooked, dried, salted or in brine, frozen.
0306.16.00	Cold-water shrimps and prawns, cooked in shell or uncooked, dried, salted or in brine, frozen.
0306.17.00	Other shrimps and prawns, cooked in shell or uncooked, dried, salted or in brine, frozen.
0306.19.00	Crustateans, nesoi (including flours, meals and pellets of crustaceans fit for human consumption), cooked in shell or uncooked, etc., frozen.
0306.31.00	Live rock lobster and other sea crawfish, frozen or chilled.
0306.32.00	Live lobsters (Homarus spp.), frozen or chilled, except rock lobster.
0306.33.20	Crabmeat, fresh or chilled.
0306.33.40	Live crabs, fresh or chilled, other than crabmeat.
0306.34.00	Live Norway lobsters, frozen or chilled.
0306.35.00	Cold water shrimps and prawns, shell-on or peeled, live, frozen, or chilled.
0306.36.00	Shrimps and prawns, other than cold water shrimp, shell-on or peeled, live, frozen or chilled.
0306.39.00	Flours, meals and pellets of crustaceans, fress or chilled, fit for human consumption, or other crustaceans, live, fresh or chilled.
0306.91.00	Rock lobster and other sea crawfish nesoi.
0306.92.00	Lobsters (Homarus SPP.), except rock lobster nesoi.
0306.93.20	Crabmeat, nesoi.

HTSUS subheading	Product description
0306.93.40	Crabs, other than crabmeat, nesoi.
0306.94.00	Norway lobsters (Nephrops Norvegicus), nesoi.
0306.95.00	Other shrimps and prawns, shell-on or peeled.
0306.99.00	Flours, meals and pellets of crustaceans, fit for human consumption or crustraceans nesoi.
0307.11.00	Oysters, whether in shell or not, live, fresh, or chilled.
0307.12.00	Oysters, frozen.
0307.19.01	Oysters, fresh or chilled.
0307.21.00	Scallops, including queen scallops, whether in shell or not, live, fresh or chilled.
0307.22.00	Scallops, including queen scallops, of the genera Pecten, Chlamys or Placopecten, frozen.
0307.29.01	Scallops, including queen scallops, of the genera Pecten, Chlamys or Placopecten, dried, salted or in brine.
0307.31.00	Mussels, whether in shell or not, live, fresh or chilled.
0307.32.00	Mussels (Mytilus Spp., Perna Spp.), frozen.
0307.39.01	Mussels (Mytilus Spp., Perna Spp.), dried, salted or in brine.
0307.42.00	Squid or cuttle fish, live, fresh or chilled.
0307.43.00	Squid or cuttle fish, frozen.
0307.49.01	Squid or cuttle fish, dried, salted or in brine.
0307.51.00	Octopus, live, fresh or chilled.
0307.52.00	Octopus, frozen.
0307.59.01	Octopus, dried, salted or in brine.
0307.60.00	Snails, other than sea snails, whether in shell or not, live, fresh, chilled, frozen, dried, salted or in brine.
0307.71.00	Clams, cockles and ark shells, whether in shell or not, live, fresh or chilled.
0307.72.00	Clams, cockles and ark shells, frozen.
0307.79.01	Clams, cockles and ark shells, dried salted or in brine.
0307.81.00	Abalone, whether in shell or not, live, fresh or chilled.
0307.82.00	Live stromboid conch, fresh or chilled.
0307.83.00	Abalone, including flours, meals and pellets fit for human consumption, frozen.
0307.84.00	Stromboid conchs (Strombus Spp.), frozen.
0307.87.00	Abalone, including edible flours, meals and pellets, nesoi.
0307.88.00	Stromboid conchs, nesoi.
0307.91.02	Conch and other molluscs nesoi, including flours, meals and pellets, fit for human consumption, live, fresh or chilled.
0307.92.00	Conch and other molluscs nesoi, including flours, meals and pellets, fit for human consumption, frozen.
0307.99.02	Molluscs, including flours, meals and pellets fit for human consumption, nesoi.
0308.11.00	Sea cucumbers, live, fresh or chilled.
0308.12.00	Frozen sea cucumbers.
0308.19.01	Sea cucumbers, not frozen.
0308.21.00	Sea urchins, live, fresh or chilled.
0308.22.00	Frozen sea urchins.
0308.29.01	Sea urchins, not frozen.
0308.30.00	Jellly fish, live, fresh, chilled, frozen, dried, salted smoked, or in brine.
0308.90.00	Other aquatic invertebrates, oth than molluscs & crustaceans, nesoi, live, fresh or chilled, dried, salted, smoked or in brine.
0404.10.05	Whey protein concentrates.
0404.10.08	Modified whey (except protein conc.), subject to gen. note 15 of the HTS.
0404.10.11	Modified whey (except protein conc.), wheth/not conc. or sweetened, subject to add U.S. note 10 to Ch. 4.
0404.10.15	Modified whey (except protein conc.), wheth/not conc. or sweetened, not subject to gen. note 15 or.
0404.10.20	Fluid whey, whether or not concentrated or containing added sweeteners.
0404.10.48	Whey (except modified whey), dried, whether or not conc. or sweetened, subject to gen. note 15 of the HTS.
0404.10.50	Whey (except modified whey), dried, whether or not conc. or sweetened, subject to add. U.S. note 12 to Ch. 4.
0404.10.90	Whey (except modified whey), dried, whether or not conc. or sweetened, not subject to gen. note 15 or add U.S. nte 12 to Ch. 4.
0405.10.05	Butter subject to general note 15 (outside quota).
0405.10.10	Butter subject to quota pursuant to chapter 4 additional U.S. note 6.
0405.10.20	Butter not subject to general note 15 and in excess of quota in chapter 4 additional U.S. note 6.
0407.19.00	Birds' eggs, in shell, fertilized eggs for incubation, other than Gallus domesticus.
0407.21.00	Birds' eggs, in shell, other fresh, not fertilized eggs for incubation, of species Gallus domesticus.
0407.29.00	Birds' eggs, in shell, other fresh, not fertilized eggs for incubation, other than species Gallus domesticus.
0407.90.00	Birds' eggs, in shell, fresh, preserved or cooked.
0408.11.00	Egg yolks, dried, whether or not containing added sweeteners.
0408.19.00	Egg yolks, other than dried, whether or not containing added sweeteners.
0408.99.00	Birds' eggs, not in shell, other than dried, whether or not containing added sweeteners.
0409.00.00	Natural honey.
0410.00.00	Edible products of animal origin, nesoi.
0501.00.00	Human hair, unworked, whether or not washed and scoured; waste of human hair.
0502.10.00	Pigs', hogs' or boars' bristles and hair and waste thereof.
0502.90.00	Badger hair and other brushmaking hair, nesoi, and waste thereof.
0504.00.00	Guts, bladders and stomachs of animals (other than fish), whole and pieces thereof.

HTSUS subheading	Product description
0505.10.00	Feathers of a kind used for stuffing, and down.
0505.90.20	Feather meal and waste.
0505.90.60	Skins and parts of birds with their feathers or down (except meal and waste) nesoi.
0506.10.00	Ossein and bones treated with acid.
0506.90.00	Bones & horn-cores, unworked, defatted, simply prepared (but not cut to shape) or degelatinized; powder & waste of these products.
0507.90.00	Tortoise shell, whalebone and whalebone hair, horns, antlers, hooves, nails, claws and beaks, unworked or simply prepared; waste and powder.
0508.00.00	Coral, shells, cuttlebone and similar materials, unworked or simply prepared, but not cut to shape; powder and waste thereof.
0510.00.40	Cantharides; bile; glands and other animal products nesoi, used in pharmaceutical products.
0511.10.00	Bovine semen.
0511.91.00	Products of fish, crustaceans, molluscs or other aquatic invertebrates nesoi; dead animals of chapter 3, unfit for human consumption.
0511.99.20	Parings and similar waste of raw hides or skins; glue stock nesoi.
0511.99.30	Animal products chiefly used as food for animals or as ingredients in such food, nesoi.
0511.99.33	Horsehair and horsehair waste, whether or not put up as a layer with or without supporting material.
0511.99.36	Natural sponges of animal origin.
0511.99.40	Animal products nesoi; dead animals of chapter 1, unfit for human consumption.
0703.10.20	Onion sets, fresh or chilled.
0703.10.30	Pearl onions not over 16 mm in diameter, fresh or chilled.
0703.10.40	Onions, other than onion sets or pearl onions not over 16 mm in diameter, and shallots, fresh or chilled.
0703.20.00	Garlic, fresh or chilled.
0703.90.00	Leeks and other alliaceous vegetables nesoi, fresh or chilled.
0704.10.20	Cauliflower and headed broccoli, fresh or chilled, if entered June 5 to October 15, inclusive, in any year.
0704.10.40	Cauliflower and headed broccoli, fresh or chilled, not reduced in size, if entered Oct. 16 through June 4, inclusive.
0704.10.60	Cauliflower and headed broccoli, fresh or chilled, reduced in size, if entered Oct. 16 through June 4, inclusive.
0704.90.20	Cabbage, fresh or chilled.
0704.90.40	Kohlrabi, kale and similar edible brassicas nesoi, including sprouting broccoli, fresh or chilled.
0706.10.05	Carrots, fresh or chilled, reduced in size.
0706.10.10	Carrots, fresh or chilled, not reduced in size, under 10 cm in length.
0706.10.20	Carrots, fresh or chilled, not reduced in size, 10 cm or over in length.
0706.10.40	Turnips, fresh or chilled.
0706.90.20	Radishes, fresh or chilled.
0706.90.30	Beets and horseradish, fresh or chilled.
0706.90.40	Salsify, celeriac, radishes and similar edible roots nesoi, fresh or chilled.
0707.00.50	Cucumbers, including gherkins, fresh or chilled, if entered May 1 to June 30, inclusive, or Sept. 1 to Nov. 30, inclusive, in any year.
0708.10.20	Peas, fresh or chilled, shelled or unshelled, if entered July 1 to Sept. 30, inclusive, in any year.
0708.10.40	Peas, fresh or chilled, shelled or unshelled, if entered Nov. 1 through the following June 30, inclusive.
0708.20.20	Cowpeas (other than black-eye peas), fresh or chilled, shelled or unshelled.
0708.20.90	Beans nesoi, fresh or chilled, shelled or unshelled.
0708.90.15	Lentils, fresh or chilled, shelled or unshelled.
0708.90.40	Leguminous vegetables nesoi, fresh or chilled, shelled or unshelled.
0709.40.20	Celery, other than celeriac, fresh or chilled, reduced in size.
0709.40.40	Celery, other than celeriac, fresh or chilled, not reduced in size, if entered April 15 to July 31, inclusive, in any year.
0709.40.60	Celery, other than celeriac, fresh or chilled, not reduced in size, if entered August 1 through the following April 14, inclusive.
0709.51.01	Mushrooms of the genus Agaricus, fresh or chilled.
0709.59.10	Truffles, fresh or chilled.
0709.59.90	Mushrooms, other than of the genus Agaricus, fresh or chilled.
0709.60.20	Chili peppers, fresh or chilled.
0709.60.40	Fruits of the genus capsicum (peppers) (ex. chili peppers) or of the genus pimenta (*e.g.,* Allspice), fresh or chilled.
0709.93.20	Squash, fresh or chilled.
0709.99.05	Jicamas and breadfruit, fresh or chilled.
0709.99.10	Chayote (Sechium edule), fresh or chilled.
0709.99.14	Okra, fresh or chilled.
0709.99.30	Fiddlehead greens, fresh or chilled.
0709.99.45	Sweet corn, fresh or chilled.
0709.99.90	Vegetables, not elsewhere specified or included, fresh or chilled.
0710.10.00	Potatoes, uncooked or cooked by steaming or boiling in water, frozen.
0710.21.20	Peas, uncooked or cooked by steaming or boiling in water, frozen, if entered July 1 through September 30, inclusive, in any year.
0710.21.40	Peas, uncooked or cooked by steaming or boiling in water, frozen, if entered Jan. 1 through June 30, or Oct. 1 through Dec. 31, inclusive.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
0710.22.10	Lima beans, uncooked or cooked by steaming or boiling in water, frozen, not reduced in size, entered Nov. 1 through the following May 31.
0710.22.15	Lima beans, frozen, entered June 1–October 31.
0710.22.20	Cowpeas (other than black-eye peas), uncooked or cooked by steaming or boiling in water, frozen, not reduced in size.
0710.22.25	Frozen string beans (snap beans), not reduced in size.
0710.22.37	Frozen beans nesoi, not reduced in size.
0710.22.40	Beans nesoi, uncooked or cooked by steaming or boiling in water, frozen, reduced in size.
0710.29.05	Chickpeas (garbanzos), uncooked or cooked by steaming or boiling in water, frozen.
0710.29.25	Pigeon peas, uncooked or cooked by steaming or boiling in water, frozen, if entered July 1 through September 30, inclusive, in any year.
0710.29.30	Pigeon peas, uncooked or cooked by steaming or boiling in water, frozen, if entered Oct. 1 through the following June 30, inclusive.
0710.29.40	Leguminous vegetables nesoi, uncooked or cooked by steaming or boiling in water, frozen.
0710.30.00	Spinach, New Zealand spinach and orache spinach (garden spinach), uncooked or cooked by steaming or boiling in water, frozen.
0710.40.00	Sweet corn, uncooked or cooked by steaming or boiling in water, frozen.
0710.80.15	Bamboo shoots and water chestnuts (other than Chinese water chestnuts), uncooked or cooked by steaming or boiling in water, frozen.
0710.80.20	Mushrooms, uncooked or cooked by steaming or boiling in water, frozen.
0710.80.40	Tomatoes, uncooked or cooked by steaming or boiling in water, frozen, if entered Mar. 1 thru July 14, incl. or Sept. 1 thru Nov. 14, incl.
0710.80.45	Tomatoes, uncooked or cooked by steaming or boiling in water, frozen, if entered July 15 through August 31, inclusive, in any year.
0710.80.50	Tomatoes, uncooked or cooked by steaming or boiling in water, frozen, if entered Nov. 15 through the following February, incl.
0710.80.65	Brussels sprouts, uncooked or cooked by steaming or boiling in water, frozen, not reduced in size.
0710.80.70	Vegetables nesoi, uncooked or cooked by steaming or boiling in water, frozen, not reduced in size.
0710.80.93	Okra, reduced in size, frozen.
0710.80.97	Vegetables nesoi, uncooked or cooked by steaming or boiling in water, frozen, reduced in size.
0710.90.11	Mixtures of pea pods and water chestnuts (other than Chinese water chestnuts), uncooked or cooked by steaming or boiling in water, frozen.
0710.90.91	Mixtures of vegetables not elsewhere specified or included, uncooked or cooked by steaming or boiling in water, frozen.
0711.40.00	Cucumbers including gherkins, provisionally preserved but unsuitable in that state for immediate consumption.
0711.51.00	Mushrooms of the genus Agaricus, provisionally preserved but unsuitable in that state for immediate consumption.
0711.59.10	Mushrooms, other than of the genus Agaricus, provisionally preserved but unsuitable in that state for immediate consumption.
0711.90.20	Leguminous vegetables, provisionally preserved but unsuitable in that state for immediate consumption.
0711.90.50	Onions, provisionally preserved but unsuitable in that state for immediate consumption.
0711.90.65	Vegetables nesoi, and mixtures of vegetables, provisionally preserved but unsuitable in that state for immediate consumption.
0712.20.20	Dried onion powder or flour.
0712.20.40	Dried onions whole, cut, sliced or broken, but not further prepared.
0712.31.10	Air dried or sun dried mushrooms of the genus Agaricus, whole, cut, sliced, broken or in powder, but not further prepared.
0712.31.20	Dried (not air or sun dried) mushrooms of the genus Agaricus, whole, cut, sliced, broken or in powder, but not further prepared.
0712.32.00	Dried wood ears (Auricularia spp.), whole, cut, sliced, broken or in powder, but not further prepared.
0712.33.00	Dried jelly fungi (Tremella spp), whole, cut, sliced, broken or in powder, but not further prepared.
0712.39.10	Air dried or sun dried mushrooms (other than of the genus Agaricus), whole, cut, sliced, broken or in powder, but not further prepared.
0712.39.20	Dried (not air or sun dried) mushrooms (other than of the genus Agaricus), whole, cut, sliced, broken or in powder, but not further prepared.
0712.39.40	Dried truffles, whole, cut, sliced, broken or in powder, but not further prepared.
0712.90.10	Dried carrots, whole, cut, sliced, broken or in powder, but not further prepared.
0712.90.15	Dried olives, not ripe.
0712.90.20	Dried olives, ripe.
0712.90.30	Dried potatoes, whether or not cut or sliced but not further prepared.
0712.90.40	Dried garlic, whole, cut, sliced, broken or in powder, but not further prepared.
0712.90.60	Dried fennel, marjoram, parsley, savory and tarragon, crude or not manufactured.
0712.90.65	Dried parsley nesoi, whole, cut, sliced, broken or in powder, but not further prepared.
0712.90.70	Dried fennel, marjoram, savory and tarragon nesoi, whole, cut, sliced, broken or in powder, but not further prepared.
0712.90.74	Tomatoes, dried in powder.
0712.90.78	Tomatoes, dried, whole, other.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. HTSUS subheading	Product description
0712.90.85	Dried vegetables nesoi, and mixtures of dried vegetables, whole, cut, sliced, broken or in powder, but not further prepared.
0713.10.10	Seeds of peas of a kind used for sowing.
0713.10.20	Dried split peas, shelled.
0713.10.40	Dried peas, nesoi, shelled.
0713.20.10	Seeds of chickpeas (garbanzos) of a kind used for sowing.
0713.20.20	Dried chickpeas (garbanzos), shelled.
0713.31.10	Seeds of beans of a kind used for sowing.
0713.31.20	Dried beans, shelled, if entered May 1 through August 31, inclusive, in any year.
0713.31.40	Dried beans, shelled, if entered September 1 through the following April 30, or withdrawn for consumption at any time.
0713.32.10	Seeds of small red (adzuki) beans of a kind used for sowing.
0713.32.20	Dried small red (adzuki) beans, shelled.
0713.33.10	Seeds of kidney beans, including white pea beans of a kind used for sowing.
0713.33.20	Dried kidney beans, including white pea beans, shelled, if entered May 1 through August 31, inclusive, in any year.
0713.33.40	Dried kidney beans, including white pea beans, shelled, if entered Sept. 1 through April 30, or withdrawn for consumption at any time.
0713.34.20	Dried Bambara beans, shelled, if entered for consumption from May 1 through August 31, inclusive, in any year.
0713.34.40	Dried Bambara beans, shelled, if entered for consumption other than above period, or withdrawn for consumption.
0713.35.00	Dried cowpeas, shelled.
0713.39.11	Seeds of beans nesoi, of a kind used for sowing.
0713.39.21	Dried beans nesoi, shelled, if entered for consumption from May 1 through August 31, inclusive, in any year.
0713.39.41	Dried beans nesoi, shelled, if entered for consumption September 1 through April 30, or withdrawn for consumption at any time.
0713.40.10	Lentil seeds of a kind used for sowing.
0713.40.20	Dried lentils, shelled.
0713.50.10	Seeds of broad beans and horse beans of a kind used for sowing.
0713.50.20	Dried broad beans and horse beans, shelled.
0713.60.60	Dried pigeon pea seeds, shelled, if entered for consumption during the period from May 1 through August 31, inclusive, in any year.
0713.60.80	Dried pigeon pea seeds, shelled, if entered Sept. 1 through the following April 30, or withdrawn for consumption at any time.
0713.90.11	Seeds of leguminous vegetables nesoi, of a kind used for sowing.
0713.90.50	Dried guar seeds, shelled.
0713.90.61	Dried leguminous vegetables nesoi, shelled, if entered for consumption during the period from May 1 through August 31, inclusive, in any year.
0713.90.81	Dried leguminous vegetales, nesoi, shelled, if entered Sept. 1 through the following April 30, or withdrawn for consumption at any time.
0714.10.20	Cassava (manioc), fresh, chilled or dried, whether or not sliced or in the form of pellets.
0714.20.10	Sweet potatoes, frozen, whether or not sliced or in the form of pellets.
0714.20.20	Sweet potatoes, fresh, chilled or dried, whether or not sliced or in the form of pellets.
0714.30.10	Fresh or chilled yams (Dioscorea spp.), whether or not sliced or in the form of pellets.
0714.30.20	Frozen yams (Dioscorea spp.).
0714.30.60	Dried yams (Dioscorea spp.), whether or not sliced but not in pellets.
0714.40.10	Fresh or chilled taro (Colocasia spp.), whether or not sliced or in the form of pellets.
0714.40.20	Frozen taro (Colocasia spp.).
0714.40.50	Dried taro (Colocasia spp.), in the form of pellets.
0714.40.60	Dried taro (Colocasia spp.), whether or not sliced but not in pellets.
0714.50.10	Fresh or chilled yautia (Xanthosoma spp.), whether or not sliced or in the form of pellets.
0714.50.20	Frozen yautia (Xanthosoma spp.).
0714.50.50	Dried yautia (Xanthosoma spp.), in the form of pellets.
0714.50.60	Dried yautia (Xanthosoma spp.), whether or not sliced but not in pellets.
0714.90.05	Chinese water chestnuts, fresh or chilled.
0714.90.39	Fresh or chilled arrowroot/salep/Jerusalem artichokes/similar roots & tubers, nesoi.
0714.90.41	Mixtures of pea pods and Chineses water chestnuts, frozen.
0714.90.42	Other mixtures of Chinese water chestnuts, frozen.
0714.90.44	Chinese water chestnuts, not mixed, frozen.
0714.90.46	Frozen dasheens/arrowroot/salep/Jerusalem artichokes/similar roots & tubers, nesoi.
0714.90.48	Chinese water chestnuts, dried.
0714.90.51	Dried dasheens, arrowroot, salep, Jerusalem artichokes and similar roots and tubers nesoi, in the form of pellets.
0714.90.61	Dried dasheens, arrowroot, salep, Jerusalem artichokes, and similar roots and tubers nesoi, whether or not sliced but not in pellets.
0801.11.00	Coconuts, desiccated.
0801.19.01	Coconuts, fresh, not in the inner shell (endocarp).
0801.31.00	Cashew nuts, fresh or dried, in shell.

HTSUS subheading	Product description
0801.32.00	Cashew nuts, fresh or dried, shelled.
0802.11.00	Almonds, fresh or dried, in shell.
0802.12.00	Almonds, fresh or dried, shelled.
0802.22.00	Hazelnuts or filberts, fresh or dried, shelled.
0802.31.00	Walnuts, fresh or dried, in shell.
0802.32.00	Walnuts, fresh or dried, shelled.
0802.41.00	Chestnuts, fresh or dried, in shell.
0802.42.00	Chestnuts, fresh or dried, shelled.
0802.51.00	Pistachios, fresh or dried, in shell.
0802.52.00	Pistachios, fresh or dried, shelled.
0802.62.00	Macadamia nuts, shelled.
0802.80.20	Areca nuts, fresh or dried, shelled.
0802.90.10	Pecans, fresh or dried, in shell.
0802.90.15	Pecans, fresh or dried, shelled.
0802.90.20	Pignolias, fresh or dried, in shell.
0802.90.25	Pignolias, fresh or dried, shelled.
0802.90.82	Nuts, nesoi, fresh or dried, in shell.
0802.90.98	Nuts, nesoi, fresh or dried, shelled.
0803.10.20	Plantains, dried.
0803.90.00	Bananas, fresh or dried.
0804.10.20	Dates, fresh or dried, whole, with or without pits, packed in units weighing (with immediate container, if any) not over 4.6 kg.
0804.10.40	Dates, fresh or dried, whole, with pits, packed in units weighing over 4.6 kg.
0804.10.60	Dates, fresh or dried, whole, without pits, packed in units weighing over 4.6 kg.
0804.10.80	Dates, fresh or dried, other than whole.
0804.20.40	Figs, fresh or dried, whole, in units weighing more than 0.5 kg each.
0804.20.60	Figs, fresh or dried, whole, in immediate containers weighing with their contents 0.5 kg or less.
0804.20.80	Figs, fresh or dried, other than whole (including fig paste).
0804.30.20	Pineapples, fresh or dried, not reduced in size, in bulk.
0804.30.40	Pineapples, fresh or dried, not reduced in size, in crates or other packages.
0804.30.60	Pineapples, fresh or dried, reduced in size.
0804.50.40	Guavas, mangoes, and mangosteens, fresh, if entered during the period September 1 through May 31, inclusive.
0804.50.60	Guavas, mangoes, and mangosteens, fresh, if entered during the period June 1 through August 31, inclusive.
0804.50.80	Guavas, mangoes, and mangosteens, dried.
0805.10.00	Oranges, fresh or dried.
0805.21.00	Mandarins and other similar citrus hybrids including tangerines, satsumas, clementines, wilkings, fresh or dried.
0805.22.00	Clementines, fresh or dried, other.
0805.29.00	Wilkings and similar citrus hybrids, fresh or dried, other.
0806.20.10	Raisins, made from dried seedless grapes.
0806.20.20	Raisins, made from other than seedless grapes.
0806.20.90	Grapes, dried, other than raisins.
0808.10.00	Apples, fresh.
0808.30.20	Pears, fresh, if entered during the period from April 1 through June 30, inclusive.
0808.30.40	Pears, fresh, if entered during the period from July 1 through the following March 31, inclusive.
0808.40.20	Quinces, fresh, if entered during the period from April 1 through June 30, inclusive.
0808.40.40	Quinces, fresh, if entered during the period from July 1 through the following March 31, inclusive.
0809.29.00	Other cherries, fresh.
0809.30.20	Peaches, including nectarines, fresh, if entered during the period from June 1 through November 30, inclusive.
0809.30.40	Peaches, including nectarines, fresh, if entered during the period from December 1 through the following May 31, inclusive.
0810.10.20	Strawberries, fresh, if entered during the period from June 15 through September 15, inclusive.
0810.10.40	Strawberries, fresh, if entered during the period from September 16 through the following June 14, inclusive.
0810.20.10	Raspberries and loganberries, fresh, if entered during the period from September 1 through the following June 30, inclusive.
0810.30.00	Black, white or red currants and gooseberries (other than kiwifruit), fresh.
0810.40.00	Cranberries, blueberries and other fruits of the genus Vaccinium, fresh.
0810.70.00	Persimmons, fresh.
0810.90.27	Other berries and tamarinds, fresh.
0810.90.46	Fruit, not elsewhere specified or included, fresh.
0811.10.00	Strawberries, frozen, in water or containing added sweetening.
0811.20.20	Raspberries, loganberries, black currants and gooseberries, frozen, in water or containing added sweetening.
0811.20.40	Blackberries, mulberries and white or red currants, frozen, in water or containing added sweetening.
0811.90.10	Bananas and plantains, frozen, in water or containing added sweetening.

HTSUS subheading	Product description
0811.90.30	Coconut meat, frozen, in water or containing added sweetening.
0811.90.35	Cranberries, frozen, in water or containing added sweetening.
0811.90.40	Papayas, frozen, in water or containing added sweetening.
0811.90.50	Pineapples, frozen, in water or containing added sweetening.
0811.90.52	Mangoes, frozen, whether or not previously steamed or boiled.
0811.90.55	Melons, frozen, in water or containing added sweetening.
0811.90.80	Fruit, nesoi, frozen, whether or not previously steamed or boiled.
0812.90.10	Mixtures of two or more fruits, provisionally preserved, but unsuitable in that state for consumption.
0812.90.20	Citrus fruit, provisionally preserved, but unsuitable in that state for immediate consumption.
0812.90.30	Figs, provisionally preserved, but unsuitable in that state for immediate consumption.
0812.90.40	Pineapples, provisionally preserved, but unsuitable in that state for immediate consumption.
0812.90.50	Strawberries, provisionally preserved, but unsuitable in that state for immediate consumption.
0812.90.90	Fruit and nuts nesoi, including mixtures containing nuts, provisionally preserved, but not for immediate consumption.
0813.10.00	Apricots, dried.
0813.20.10	Prunes and plums, soaked in brine and dried.
0813.20.20	Prunes and plums, dried, (except if presoaked in brine).
0813.30.00	Apples, dried.
0813.40.10	Papayas, dried.
0813.40.15	Barberries, dried.
0813.40.20	Berries except barberries, dried.
0813.40.30	Cherries, dried.
0813.40.40	Peaches, dried.
0813.40.80	Tamarinds, dried.
0813.40.90	Fruit nesoi, dried, other than that of headings 0801 to 0806, and excluding mixtures.
0813.50.00	Mixtures of nuts or dried fruits of Chapter 8.
0814.00.10	Peel of orange or citron, fresh, frozen, dried or provisionally preserved in brine, in sulfur water or other preservative solutions.
0814.00.40	Lime peel, fresh, frozen or in brine.
0814.00.80	Peel of citrus fruit, excl. orange or citron and peel, nesoi, of melon, fresh, frozen, dried or provisionally preserved.
1001.11.00	Durum wheat, seed.
1001.99.00	Wheat & meslin other than durum or seed wheat.
1003.10.00	Barley, seed.
1003.90.20	Barley, other than seed, for malting purposes.
1003.90.40	Barley, not seed, other than for malting purposes.
1004.10.00	Oats, seed.
1004.90.00	Oats, other than seed.
1005.90.20	Yellow dent corn.
1005.90.40	Corn (maize), other than seed and yellow dent corn.
1006.20.20	Basmati rice, husked.
1006.20.40	Husked (brown) rice, other than Basmati.
1006.30.10	Rice semi-milled or wholly milled, whether or not polished or glazed, parboiled.
1006.30.90	Rice semi-milled or wholly milled, whether or not polished or glazed, other than parboiled.
1006.40.00	Broken rice.
1007.10.00	Grain sorghum, seed.
1007.90.00	Grain sorghum, other than seed.
1008.10.00	Buckwheat.
1008.21.00	Millet, seed.
1008.29.00	Millet, other than seed.
1008.30.00	Canary seed.
1008.50.00	Quinoa (Chenopodium quinoa).
1008.90.01	Cereals nesoi (including wild rice).
1101.00.00	Wheat or meslin flour.
1102.20.00	Corn (maize) flour.
1102.90.20	Buckwheat flour.
1102.90.25	Rice flour.
1102.90.27	Rye flour.
1102.90.30	Cereal flours nesoi, mixed together.
1102.90.60	Cereal flours, other than of wheat or meslin, rye, corn, rice or buckwheat.
1103.11.00	Groats and meal of wheat.
1103.13.00	Groats and meal of corn (maize).
1103.19.12	Groats and meal of oats.
1103.19.14	Groats and meal of rice.
1103.19.90	Groats and meal of cereals other than wheat, oats, corn (maize) or rice.
1103.20.00	Pellets of cereals.
1104.12.00	Rolled or flaked grains of oats.
1104.19.10	Rolled or flaked grains of barley.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
1104.19.90	Rolled or flaked grains of cereals, other than of barley or oats.
1104.22.00	Grains of oats, hulled, pearled, clipped, sliced, kibbled or otherwise worked, but not rolled or flaked.
1104.23.00	Grains of corn (maize), hulled, pearled, clipped, sliced, kibbled or otherwise worked, but not rolled or flaked.
1104.29.10	Grains of barley, hulled, pearled, clipped, sliced, kibbled or otherwise worked, but not rolled or flaked.
1104.29.90	Grains of cereals other than barley, oats or corn, hulled, pearled, clipped, sliced, kibbled or otherwise worked, but not rolled or flaked.
1104.30.00	Germ of cereals, whole, rolled, flaked or ground.
1105.10.00	Flour, meal and powder of potatoes.
1105.20.00	Flakes, granules and pellets, of potatoes.
1106.10.00	Flour, meal and powder of the dried leguminous vegetables of heading 0713.
1106.20.10	Flour, meal and powder of Chinese water chestnuts.
1106.20.90	Flour, meal and powder of sago, or of roots or tubers of heading 0714 (excluding Chinese water chestnuts).
1106.30.20	Flour, meal and powder of banana and plantain.
1106.30.40	Fruit and nut flour, meal and powder of the products of chapter 8, other than of banana and plantain.
1107.10.00	Malt, not roasted.
1107.20.00	Malt, roasted.
1108.11.00	Wheat starch.
1108.12.00	Corn (maize) starch.
1108.13.00	Potato starch.
1108.14.00	Cassava (manioc) starch.
1108.19.00	Starches other than wheat, corn (maize), potato or cassava (manioc) starches.
1108.20.00	Inulin.
1109.00.10	Wheat gluten, whether or not dried, to be used as animal feed.
1109.00.90	Wheat gluten, whether or not dried, to be used for other than animal feed.
1201.10.00	Soybeans, whether or not broken, seed.
1201.90.00	Soybeans, whether or not broken, other than seed.
1202.30.40	Peanuts (ground-nuts), seed, not roasted or cooked, shelled, subject to add. U.S. note 2 to Ch.12.
1204.00.00	Flaxseed (linseed), whether or not broken.
1205.10.00	Low erucic acid rape or colza seeds, whether or not broken.
1205.90.00	Rape or colza seeds (other than of low erucic acid), whether or not broken.
1206.00.00	Sunflower seeds, whether or not broken.
1207.40.00	Sesame seeds, whether or not broken.
1207.50.00	Mustard seeds, whether or not broken.
1207.60.00	Safflower (Carthamus tintorius) seeds.
1207.70.00	Melon seeds.
1207.91.00	Poppy seeds, whether or not broken.
1207.99.03	Other oil seeds and oleaginous fruits whether or not broken, incl niger seeds, hemp seeds and seeds nesoi.
1208.10.00	Flours and meals of soybeans.
1208.90.00	Flours and meals of oil seeds or oleaginous fruits other than those of mustard or soybeans.
1209.10.00	Sugar beet seeds of a kind used for sowing.
1209.21.00	Alfalfa (lucerne) seed of a kind used for sowing.
1209.25.00	Rye grass seeds of a kind used for sowing.
1209.29.10	Beet seed, other than sugar beet seed, of a kind used for sowing.
1209.29.91	Seeds of forage plants of a kind used for sowing, not elsewhere specified or included.
1209.30.00	Seeds of herbaceous plants cultivated principally for their flowers.
1209.91.10	Cauliflower seeds of a kind used for sowing.
1209.91.20	Celery seeds of a kind used for sowing.
1209.91.40	Onion seeds of a kind used for sowing.
1209.91.50	Parsley seeds of a kind used for sowing.
1209.91.60	Pepper seeds of a kind used for sowing.
1209.91.80	Vegetable seeds, nesoi, of a kind used for sowing.
1209.99.20	Tree and shrub seeds of a kind used for sowing.
1209.99.41	Seeds, fruits and spores, of a kind used for sowing, nesoi.
1210.10.00	Hop cones, fresh or dried, neither ground, powdered nor in the form of pellets.
1211.20.10	Ginseng roots, fresh or dried, whether or not cut, crushed or powdered.
1211.20.15	Ginseng roots, frozen or chilled.
1211.30.00	Coca leaf, of a kind used in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes.
1211.40.00	Poppy straw, of a kind used in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes.
1211.50.00	Ephedra.
1211.90.20	Mint leaves, crude or not manufactured, of a kind used in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes.
1211.90.40	Mint leaves nesoi, of a kind used in perfumery, in pharmacy or for insecticidal, fungicidal or similar purposes.
1211.90.92	Plants, parts of plants (including seeds and fruits), used in perfumery, pharmacy, insecticidal, fungicidal or similar puproses, other, fresh or dried.
1211.90.93	Plants, parts of plants (including seeds and fruits), used in perfumery, pharmacy, insecticidal, fungicidal or similar purposes, chilled or frozen.
1212.21.00	Seaweeds and other algae, fresh, chilled, frozen or dried, whether or not ground, fit for human consumption.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. HTSUS subheading	Product description
1212.29.00	Seaweeds and other algae, fresh, chilled, frozen or dried, whether or not ground, other than for human consumption.
1212.92.00	Locust beans (carob).
1212.99.20	Nectarine stones and kernels of a kind used primarily for human consumption, not elsewhere specified or included.
1212.99.30	Apricot, peach (other than nectarine) or plum stones and kernels used primarily for human consumption, not elsewhere specified or included.
1212.99.92	Fruit stone & kernel (not apricot/peach/plum) & other vegetable products used primary human consumption, nesoi.
1213.00.00	Cereal straw and husks, unprepared, whether or not chopped, ground, pressed or in the form of pellets.
1214.10.00	Alfalfa (lucerne) meal and pellets.
1214.90.00	Rutabagas, mangolds, fodder roots, hay, clover, sainfoin, kale, lupines, vetches & forage products nesoi.
1401.10.00	Bamboos, of a kind used primarily for plaiting.
1401.20.20	Rattans, in the rough or cut transversely into sections, of a kind used primarily for plaiting.
1401.20.40	Rattans, other than those in the rough or cut transversely into sections, of a kind used primarily for plaiting.
1401.90.20	Willow (osier), of a kind used primarily for plaiting.
1401.90.40	Lime bark, raffia, reeds, rushes, cleaned, bleached or dyed cereal straw, other vegetable materials nesoi, used primarily for plaiting.
1404.20.00	Cotton linters.
1404.90.10	Vegetable hair not elsewere specified or included.
1404.90.30	Istle of a kind used primarily in brooms or brushes.
1404.90.40	Piassava, couch-grass and other vegetable materials nesoi, of a kind used primarily in brooms or brushes.
1404.90.90	Other vegetable materials nesoi.
1504.10.20	Cod-liver oil and its fractions.
1504.10.40	Fish-liver oils and their fractions, other than cod-liver oil and its fractions.
1504.20.20	Cod oil and its fractions, other than liver oil.
1504.20.40	Herring oil and its fractions, other than liver oil.
1504.20.60	Fats and oils and their fractions, of fish other than cod and herring, excluding liver oil.
1505.00.10	Wool grease, crude.
1505.00.90	Fatty substances derived from wool grease (including lanolin).
1506.00.00	Animal fats and oils and their fractions nesoi, whether or not refined, but not chemically modified.
1602.32.00	Prepared or preserved meat or meat offal of chickens, nesoi.
1603.00.10	Clam juice.
1603.00.90	Extracts and juices of meat, fish, crustaceans, molluscs or other aquatic invertebrates, other than clam juice.
1604.11.20	Prepared or preserved salmon, whole or in pieces, but not minced, in oil, in airtight containers.
1604.11.40	Prepared or preserved salmon, whole or in pieces, but not minced, other than in oil and in airtight containers.
1604.12.20	Prepared or preserved herrings, whole or in pieces, but not minced, in oil, in airtight containers.
1604.12.40	Herrings, whole or in pieces, but not minced, in tomato sauce, smoked or kippered, in immediate containers over 0.45 kg each.
1604.12.60	Herrings prepared or preserved, whole or in pieces, but not minced, nesoi.
1604.13.10	Smoked sardines, in oil, not skinned nor boned, $1/kg or more in tin-plate containers, or $1.10/kg or more in other airtight containers.
1604.13.20	Sardines, not smoked, sardinella, brisling or sprats, neither skinned nor boned, in oil, in airtight containers.
1604.13.30	Sardines, sardinella, brisling or sprats, skinned or boned, in oil, in airtight containers.
1604.13.40	Sardines, sardinella, brisling, sprats in containers with their contents under 225 g each, except those in oil and in airtight containers.
1604.13.90	Sardines, sardinella and brisling or sprats (not in oil and airtight cont.), prepared or preserved, not minced, cont. 225 g or more.
1604.14.10	Tunas and skipjack, whole or in pieces, but not minced, in oil, in airtight containers.
1604.14.22	Tunas and skipjack, not in oil, in airtight cont., n/o 7 kg, not of U.S. possessions, product within quota.
1604.14.30	Tunas and skipjack, not in oil, in airtight containers, n/o 7 kg, not of U.S. possessions, over quota.
1604.14.40	Tunas and skipjack, not in airtight containers, not in oil, in bulk or in immediate containers weighing with contents over 6.8 kg each.
1604.14.50	Tunas and skipjack, not in airtight containers, not in bulk or in immediate containers weighing with contents over 6.8 kg each.
1604.14.70	Bonito (Sarda spp.), in oil.
1604.14.80	Bonito (Sarda spp.), not in oil.
1604.15.00	Prepared or preserved mackerel, whole or in pieces, but not minced.
1604.16.20	Anchovies, whole or in pieces but not minced, in oil, in airtight containers.
1604.16.40	Prepared or preserved anchovies, whole or in pieces, not minced, not in oil, in immediate containers with their contents 6.8 kg or less ea.
1604.16.60	Prepared or preserved anchovies, whole or in pieces, but not minced, not in oil, nesoi.
1604.17.10	Prepared or preserved eels, whole or in pieces, but not minced, in airtight containers, not in oil.
1604.17.40	Eel portions similar to fish sticks and like products of any size or shape, breaded, coated with batter, not cooked nor in oil.
1604.17.50	Eel similar to fish sticks and like products of any size or shape, if breaded, coated with batter, cooked or in oil.
1604.17.60	Prepared or preserved eel, in oil and in bulk or in immediate containers weighing over 7 kg each.

HTSUS subheading	Product description
1604.17.80	Prepared or preserved eel, whole or in pieces, but not minced, nesoi.
1604.18.10	Shark fins, not in oil, in airtight containters.
1604.18.90	Shark fins, not in airtight containers.
1604.19.10	Bonito, yellowtail and pollock, whole or in pieces, but not minced, in airtight containers, not in oil.
1604.19.22	Other fish, excluding bonito, yellowtail and pollock, in airtight containers, not in oil.
1604.19.25	Bonito, yellowtail and pollock, whole or in pieces, but not minced, in airtight containers, in oil.
1604.19.32	Other fish, excluding bonito, yellowtail and pollock, in airtight containers, in oil.
1604.19.41	Fish sticks and like products of any size or shape, fillets or other portions of fish, breaded, coated with batter, not cooked nor in oil.
1604.19.51	Fish sticks and like products of any size or shape, fillets or other portions of fish, if breaded, coated with batter, cooked or in oil.
1604.19.61	Prepared or preserved fish nesoi, in oil and in bulk or in immediate containers weighing over 7 kg each.
1604.19.82	Fish, whole or in pieces, but not minced, prepared or preserved, nesoi.
1604.20.05	Products containing meat of crustaceans, molluscs or other aquatic invertebrates, prepared meals.
1604.20.10	Fish pastes.
1604.20.15	Fish balls, cakes and puddings, in oil.
1604.20.20	Fish balls, cakes and puddings, not in oil, in immediate airtight containers, weighing with their contents not over 6.8 kg each.
1604.20.25	Fish balls, cakes and puddings, not in oil, and in immediate nonairtight containers weighing with their contents not over 6.8 kg each.
1604.20.30	Fish balls, cakes and puddings, not in oil, not in immediate containers, weighing with their contents not over 6.8 kg each.
1604.20.40	Fish sticks and similar products of any size or shape, if breaded, coated with batter or similarly prepared, not cooked nor in oil.
1604.20.50	Fish sticks and similar products of any size or shape, if breaded, coated with batter or similarly prepared, cooked or in oil.
1604.20.60	Prepared or preserved fish, other than whole or in pieces, nesoi.
1604.31.00	Caviar.
1604.32.30	Caviar substitutes prepared from fish eggs, boiled and in airtight containers.
1604.32.40	Caviar substitutes prepared from fish eggs, nesoi.
1605.10.05	Crab products containing fish meat; prepared meals of crab.
1605.10.20	Crabmeat, prepared or preserved, in airtight containers.
1605.10.40	Crabmeat, prepared or preserved, other than in airtight containers.
1605.10.60	Crabs, other than crabmeat, prepared or preserved.
1605.21.05	Shrimp & prawns not in airtight containers: fish meat and prepared meals.
1605.21.10	Shrimp & prawns not in airtight containers: other than fish meat and prepared meals.
1605.29.05	Shrimp & prawns in airtight containers: fish meat and prepared meals.
1605.29.10	Shrimp & prawns in airtight containers: other than fish meat and prepared meals.
1605.30.05	Lobster products containing fish meat; prepared meals of lobster.
1605.30.10	Lobster, prepared or preserved, not containing fish meat, nesoi.
1605.40.05	Crustacean products nesoi, containing fish meat; prepared meals of crustaceans, nesoi.
1605.40.10	Crustaceans nesoi, prepared or preserved, not containing fish meat, nesoi.
1605.51.05	Oysters, fish meat or prepared meals.
1605.51.40	Smoked oysters.
1605.51.50	Oysters, prepared or preserved, but not smoked.
1605.52.05	Scallops, including queen scallops as containing fish meat; prepared meals.
1605.52.60	Scallops, including queen scallops, prepared or preserved.
1605.53.05	Mussels, containing fish meats or in prepared meals.
1605.53.60	Mussels, prepared or preserved.
1605.54.05	Cuttle fish and squid, as containing fish meat; prepared meals.
1605.54.60	Cuttle fish and squid, prepared or preserved.
1605.55.05	Octopus, as containing fish meat or prepared meals.
1605.55.60	Octopus, prepared or preserved.
1605.56.05	Products of clams, cockles, and arkshells containing fish meat; prepared meals.
1605.56.10	Razor clams, in airtight containers, prepared or preserved, nesoi.
1605.56.15	Boiled clams in immediate airtight containers, the contents of which do not exceed 680 g gross weight.
1605.56.20	Clams, prepared or preserved, excluding boiled clams, in immediate airtight containers, nesoi.
1605.56.30	Clams, prepared or preserved, other than in airtight containers.
1605.56.60	Cockles and arkshells, prepared or preserved.
1605.57.05	Products of abalone containing fish meat; prepared meals of abalone.
1605.57.60	Abalone, prepared or preserved.
1605.58.05	Products of snails, other than sea snails, containing fish meat; prepared meals of snails other than sea snails.
1605.58.55	Prepared or preserved snails, other than sea snails.
1605.59.05	Products of molluscs nesoi containing fish meat; prepared meals of molluscs nesoi.
1605.59.60	Molluscs nesoi, prepared or preserved.
1605.61.00	Sea cucumbers, prepared or preserved.
1605.62.00	Sea urchins, prepared or preserved.

HTSUS subheading	Product description
1605.63.00	Jelly fish, prepared or preserved.
1605.69.00	Other aquatic invertebrates, nesoi, prepared or preserved.
1701.99.10	Cane/beet sugar & pure sucrose, refined, solid, w/o added coloring or flavoring, subject to add. U.S. 5 to Ch. 17.
1701.99.50	Cane/beet sugar & pure sucrose, refined, solid, w/o added coloring or flavoring, not subject to gen. note 15 or add. U.S. 5 to Ch. 17.
1702.90.90	Sugars and sugar syrups, and articles containing sugar, nesoi.
1704.90.35	Sugar confections or sweetmeats ready for consumption, not containing cocoa, other than candied nuts or cough drops.
1704.90.90	Sugar confectionery, w/o cocoa, nesoi.
1901.90.91	Flour-, meal-, starch-, malt extract- or dairy-based food preps not containing cocoa and not containing specific amounts of dairy, nesoi.
1902.19.20	Uncooked pasta, not stuffed or otherwise prepared, not containing eggs, exclusively pasta.
1902.19.40	Uncooked pasta, not stuffed or otherwise prepared, not containing eggs, nesoi, including pasta packaged with sauce preparations.
1902.20.00	Stuffed pasta, whether or not cooked or otherwise prepared.
1902.30.00	Pasta nesoi.
1905.90.10	Bread, pastry, cake, biscuit and similar baked products nesoi, and puddings whether or not containing chocolate, fruit, nuts or confectionery.
2001.10.00	Cucumbers including gherkins, prepared or preserved by vinegar or acetic acid.
2001.90.20	Capers, prepared or preserved by vinegar or acetic acid, nesoi.
2001.90.25	Artichokes, prepared or preserved by vinegar or acetic acid.
2001.90.30	Beans, prepared or preserved by vinegar or acetic acid.
2001.90.34	Onions, prepared or preserved by vinegar or acetic acid.
2001.90.35	Pimientos, prepared or preserved by vinegar or acetic acid.
2001.90.38	Vegetables (including olives) nesoi, prepared or preserved by vinegar or acetic acid.
2001.90.42	Chestnuts, prepared or preserved by vinegar or acetic acid.
2001.90.48	Chinese water chestnuts, prepared or preserved by vinegar or acetic acid.
2001.90.50	Walnuts, prepared or preserved by vinegar or acetic acid.
2001.90.60	Fruits, nuts, and other edible parts of plants, nesoi, prepared or preserved by vinegar or acetic acid.
2002.10.00	Tomatoes, whole or in pieces, prepared or preserved otherwise than by vinegar or acetic acid.
2002.90.40	Tomato prep/pres ex by vinegar/acetic acid, powder.
2002.90.80	Tomatoes prepared or preserved otherwise than by vinegar or acetic acid, nesoi.
2003.10.01	Mushrooms of the genus Agaricus, prepared or preserved otherwise than by vinegar or acetic acid.
2003.90.10	Truffles.
2003.90.80	Mushrooms other than of the genus Agaricus or truffles, prepared or preserved otherwise than by vinegar or acetic acid.
2004.10.80	Potatoes (not Solano), prepared or preserved otherwise than by vinegar or acetic acid, frozen.
2004.90.80	Beans, prepared or preserved otherwise than by vinegar or acetic acid, frozen.
2004.90.85	Vegetables and mixtures of vegetables, nesoi, prepared or preserved other than by vinegar or acetic acid, frozen, not preserved by sugar.
2005.20.00	Potato preparations, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.40.00	Peas, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.51.20	Black-eye cowpeas, shelled, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.51.40	Beans other than black-eye cowpeas, shelled, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.59.00	Beans, not shelled, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.60.00	Asparagus, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.70.25	Olives, green, in a saline solution, pitted or stuffed, not place packed.
2005.70.60	Olives (not green), in a saline solution, canned, pitted.
2005.70.70	Olives (not green), in a saline solution, in airtight containers of glass or metal but not canned.
2005.70.75	Olives (not green), in a saline solution, not canned, nesoi.
2005.70.97	Olives, prepared or preserved otherwise than by vinegar, acetic acid or saline soln, not frozen, nesoi.
2005.80.00	Sweet corn, prepared or preserved otherwise than by vinegar, acetic acid or sugar, not frozen.
2005.91.60	Bamboo shoots in airtight containers, prepared or preserved otherwise than by vinegar or acetic acid, not frozen, not preserved by sugar.
2005.91.97	Bamboo shoots, not in airtight containers, prepared or preserved otherwise than by vinegar or acetic acid, not frozen, not preserved by sugar.
2005.99.10	Carrots in airtight containers, prepared or preserved otherwise than by vinegar, acetic acid or sugar, not frozen.
2005.99.20	Onions, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.99.30	Sauerkraut, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.99.41	Whole or Sliced water chestnuts, other than Chinese water chestnuts, prepared or preserved otherwise than by vinegar or acetic acid or sugar.
2005.99.50	Pimientos, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.99.55	Fruits of the genus Capsicum or Pimenta, not pimientos, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.99.80	Artichokes, prepared or preserved otherwise than by vinegar or acetic acid, not frozen.
2005.99.85	Chickpeas (garbanzos), prepared or preserved otherwise than by vinegar or acetic acid, not frozen.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
2005.99.97	Vegetables nesoi, & mixtures of vegetables, prepared or preserved otherwise than by vinegar or acetic acid, not frozen, not preserved by sugar.
2006.00.20	Cherries, preserved by sugar (drained, glace or crystallized).
2006.00.30	Ginger root, preserved by sugar (drained, glace or crystallized).
2006.00.40	Pineapples, preserved by sugar (drained, glace or crystallized).
2006.00.50	Mixtures of vegetables, fruit, nuts, fruit-peel or other parts of plants, preserved by sugar (drained, glace or crystallized).
2006.00.60	Citrus fruit or peel of citrus or other fruit, except mixtures, preserved by sugar (drained, glace or crystallized).
2006.00.70	Fruit nesoi, and nuts, except mixtures, preserved by sugar (drained, glace or crystallized).
2006.00.90	Vegetables and parts of plants, nesoi, preserved by sugar (drained, glace or crystallized), except mixtures,.
2007.10.00	Homogenized cooked preparations of fruit put up for retail sale as infant food or for dietetic purposes, in cont. not over 250 grams, net.
2007.91.10	Citrus fruit pastes and purees, being cooked preparations.
2007.91.40	Orange marmalade.
2007.99.05	Lingonberry and raspberry jams.
2007.99.10	Strawberry jam.
2007.99.15	Currant and other berry jams, nesoi.
2007.99.20	Apricot jam.
2007.99.25	Cherry jam.
2007.99.35	Peach jam.
2007.99.40	Pineapple jam.
2007.99.45	Jams, nesoi.
2007.99.48	Apple, quince and pear pastes and purees, being cooked preparations.
2007.99.50	Guava and mango pastes and purees, being cooked preparations.
2007.99.60	Strawberry pastes and purees, being cooked preparations.
2007.99.65	Fruit pastes and purees, nesoi, and nut pastes and purees, being cooked preparations.
2007.99.70	Currant and berry fruit jellies.
2007.99.75	Fruit jellies, other than currant and berry.
2008.11.02	Peanut butter and paste, subject to gen. note 15 of the HTS.
2008.11.05	Peanut butter and paste, subject to add. U.S. note 5 to Ch. 20, not GN15.
2008.11.15	Peanut butter and paste, nesoi, not subject to gen note 15 or add U.S. note 5 to Ch. 20.
2008.11.22	Blanched peanuts, subject to gen. note 15 of the HTS.
2008.11.25	Blanched peanuts, subject to add. U.S. note 2 to Ch. 12, not GN15.
2008.11.42	Peanuts, otherwise prepared or preserved, nesoi, subject to gen. note 15 of the HTS.
2008.11.45	Peanuts, otherwise prepared or preserved, nesoi, subject to add. U.S. note 2 to Ch. 12, not GN15.
2008.19.10	Brazil nuts and cashew nuts, otherwise prepared or preserved, nesoi.
2008.19.15	Coconuts, otherwise prepared or preserved, nesoi.
2008.19.20	Filberts, otherwise prepared or preserved, nesoi.
2008.19.25	Pecans, otherwise prepared or preserved, nesoi.
2008.19.30	Pignolia and pistachio nuts, otherwise prepared or preserved, nesoi.
2008.19.40	Almonds, otherwise prepared or preserved, nesoi.
2008.19.50	Watermelon seeds, otherwise prepared or preserved, nesoi.
2008.19.85	Mixtures of nuts or other seeds otherwise prepared or preserved, nesoi.
2008.19.90	Other nuts and seeds nesoi, excluding mixtures, otherwise prepared or preserved, nesoi.
2008.20.00	Pineapples, otherwise prepared or preserved, nesoi.
2008.30.10	Peel of oranges, mandarins, clementines, wilkings and similar citrus hybrids, otherwise prepared or preserved, nesoi.
2008.30.20	Peel of lemons, otherwise prepared or preserved, nesoi.
2008.30.30	Peel of citrus fruit, nesoi, otherwise prepared or preserved, nesoi.
2008.30.40	Oranges (other than peel or pulp), otherwise prepared or preserved, nesoi.
2008.30.42	Satsumas, prepared or preserved, in airtight containers, aggregate quantity n/o 40,000 metric tons/calandar yr.
2008.30.46	Satsumas, prepared or preserved, in airtight containers, aggregate quantity n/o 40,000 metric tons/calandar yr.
2008.30.48	Mandarins (other than satsuma), prepared or preserved, nesoi.
2008.30.55	Clementines, wilkings and similar citrus hybrids (other than peel or pulp), otherwise prepared or preserved, nesoi.
2008.30.70	Grapefruit (other than peel or pulp), otherwise prepared or preserved, nesoi.
2008.30.80	Kumquats (other than peel or pulp), otherwise prepared or preserved, nesoi.
2008.30.96	Citrus fruit nesoi (including bergamots), other than peel or pulp, otherwise prepared or preserved, nesoi.
2008.40.00	Pears, otherwise prepared or preserved, nesoi.
2008.50.20	Apricot pulp, otherwise prepared or preserved, nesoi.
2008.50.40	Apricots, other than pulp, otherwise prepared or preserved, nesoi.
2008.60.00	Cherries, otherwise prepared or preserved, nesoi.
2008.70.10	Nectarines, otherwise prepared or preserved, not elsewhere specified or included.
2008.70.20	Peaches (excluding nectarines), otherwise prepared or preserved, not elsewhere specified or included.
2008.80.00	Strawberries, otherwise prepared or preserved, nesoi.
2008.93.00	Cranberries.
2008.97.10	Mixtures of fruit or edible parts of plants, in airtight cont. excl. apricots, citrus, peaches or pears (incl. canned tropical fruit salad).

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
2008.97.90	Mixtures of fruit or other edible parts of plants, otherwise prepared or preserved, nesoi (excluding tropical fruit salad).
2008.99.05	Apples, otherwise prepared or preserved, nesoi.
2008.99.15	Bananas, other than pulp, otherwise prepared or preserved, nesoi.
2008.99.18	Blueberries, otherwise prepared or preserved, nesoi.
2008.99.21	Berries, other than cranberries, blueberries and strawberries, otherwise prepared or preserved, nesoi.
2008.99.23	Cashew apples, mameyes colorados, sapodillas, soursops and sweetsops, otherwise prepared or preserved, nesoi.
2008.99.25	Dates, otherwise prepared or preserved, nesoi.
2008.99.28	Figs, otherwise prepared or preserved, nesoi.
2008.99.29	Grapes, otherwise prepared or preserved, nesoi.
2008.99.30	Guavas, otherwise prepared or preserved, nesoi.
2008.99.35	Lychees and longans, otherwise prepared or preserved, nesoi.
2008.99.40	Mangoes, otherwise prepared or preserved, nesoi.
2008.99.50	Papayas, other than pulp, otherwise prepared or preserved, nesoi.
2008.99.60	Plums (including prune plums and sloes), otherwise prepared or preserved, nesoi.
2008.99.61	Soybeans, otherwise prepared or preserved, nesoi.
2008.99.63	Sweet ginger, otherwise prepared or preserved, nesoi.
2008.99.70	Chinese water chestnuts, otherwise prepared or preserved, frozen, not elsewhere specified or included.
2008.99.71	Chinese water chestnuts, otherwise prepared or preserved, not frozen, not elsewhere specified or included.
2008.99.80	Pulp of fruit nesoi, and other edible parts of plants nesoi, excluding mixtures, otherwise prepared or preserved, nesoi.
2008.99.91	Bean cake, bean stick, miso, other fruit, nuts and other edible parts of plans, prepared or preserved.
2009.11.00	Orange juice, frozen, unfermented and not containing added spirit.
2009.29.00	Grapefruit juice, of a Brix value exceeding 20, unfermented.
2009.31.20	Lime juice, of a Brix value not exceeding 20, fit for beverage purposes, unfermented.
2009.31.40	Citrus juice of any single citrus fruit (other than orange, grapefruit or lime), Brix value not exceeding 20, not concentrated, unfermented.
2009.31.60	Citrus juice of any single citrus fruit (other than orange, grapefruit or lime), of a Brix value not exceeding 20, concentrated, unfermented.
2009.39.60	Citrus juice of any single citrus fruit (other than orange, grapefruit or lime), of a Brix value exceeding 20, unfermented.
2009.41.40	Pineapple juice, of a Brix value not exceeding 20, concentrated (in degree of concentration greater than 3.5), unfermented.
2009.49.40	Pineapple juice, of a Brix value exceeding 20, concentrated (in degree of concentration greater than 3.5).
2009.50.00	Tomato juice, concentrated or not concentrated.
2009.69.00	Grape juice (including grape must), of a Brix value exceeding 30, unfermented.
2009.71.00	Apple juice, of a Brix value not exceeding 20, unfermented.
2009.79.00	Apple juice, of a Brix value exceeding 20, unfermented.
2009.89.20	Pear juice, concentrated or not concentrated.
2009.89.60	Juice of any other single fruit, nesoi, (including cherries and berries), concentrated or not concentrated.
2009.89.80	Juice of any single vegetable, other than tomato, concentrated or not concentrated.
2009.90.40	Mixtures of fruit juices, or mixtures of vegetable and fruit juices, concentrated or not concentrated.
2103.10.00	Soy sauce.
2103.90.80	Mixed condiments and mixed seasonings, not described in add U.S. note 3 to Ch. 21.
2106.10.00	Protein concentrates and textured protein substances.
2201.10.00	Mineral waters and aerated waters, not containing added sugar or other sweetening matter nor flavored.
2201.90.00	Waters (incl. ice, snow and steam), ot/than mineral waters or aerated waters, not cont. added sugar or other sweetening matter nor flavored.
2202.10.00	Waters, including mineral waters and aerated waters, containing added sugar or other sweetening matter or flavored.
2202.99.30	Orange juice, fortified with vitamins or minerals not made from a juice having a degree of concentration of >=1.5.
2202.99.35	Orange juice fortified with vitamins or minerals, nesoi.
2202.99.36	Juice of any single fruit or vegetable (except orange juice) fortified with vitamins or minerals, in nonconcentrated form.
2202.99.37	Fruit or vegetable juices, fortified with vitamins or minerals, mixtures of juices in non-concentrated form.
2202.99.90	Nonalcoholic beverages, nesoi, excluding fruit or vegetable juices of heading 2009.
2203.00.00	Beer made from malt.
2204.10.00	Sparkling wine, made from grapes.
2204.21.20	Effervescent grape wine, in containers holding 2 liters or less.
2204.21.30	Tokay wine (not carbonated) not over 14% alcohol, in containers not over 2 liters.
2204.21.50	Wine other than Tokay (not carbonated), not over 14% alcohol, in containers not over 2 liters.
2204.21.60	''Marsala'' wine, over 14% vol. alcohol, in containers holding 2 liters or less.
2204.21.80	Grape wine, other than ''Marsala'', not sparkling or effervescent, over 14% vol. alcohol, in containers holding 2 liters or less.
2206.00.45	Rice wine or sake.

Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2206.00.90	Fermented beverages (other than grape wine, beer, cider, prune wine, sake, vermouth, or other effervescent wines).
2207.10.30	Undenatured ethyl alcohol of 80 percent vol. alcohol or higher, for beverage purposes.
2207.10.60	Undenatured ethyl alcohol of 80 percent vol. alcohol or higher, for nonbeverage purposes.
2209.00.00	Vinegar and substitutes for vinegar obtained from acetic acid.
2301.10.00	Flours, meals, and pellets, of meat or meat offal unfit for human consumption; greaves (cracklings).
2301.20.00	Flours, meals, and pellets, of fish or of crustaceans, molluscs or other aquatic invertebrates, unfit for human consumption.
2302.30.00	Bran, sharps (middlings) and other residues, derived from the sifting, milling or other working of wheat.
2302.40.01	Bran, sharps (middlings) and other residues, derived from the sifting, milling or other working of cereals, excluding corn, rice and wheat.
2302.50.00	Bran, sharps (middlings) and other residues, derived from the sifting, milling or other working of leguminous plants.
2303.10.00	Residues of starch manufacture and similar residues.
2303.20.00	Beet-pulp, bagasse and other waste of sugar manufacture.
2303.30.00	Brewing or distilling dregs and waste.
2304.00.00	Oilcake and other solid residues, resulting from the extraction of soybean oil.
2305.00.00	Oilcake and other solid residues, resulting from the extraction of peanut (ground-nut) oil.
2306.20.00	Oilcake and other solid residues, resulting from the extraction of vegetable fats or oils, of linseed.
2306.30.00	Oilcake and other solid residues, resulting from the extraction of vegetable fats or oils, of sunflower seeds.
2306.41.00	Oilcake and other solid residues, resulting from the extraction of vegetable fats or oils, of low erucic acid rape or colza seeds.
2306.49.00	Oilcake and other solid residues, resulting from the extraction of vegetable fats/oils, of rape or colza seeds (other than low erucic acid).
2306.90.01	Oilcake and other solid residues, resulting from the extraction of vegetable fats or oils, nesoi.
2308.00.95	Dehydrated marigolds, of a kind used in animal feeding, not elsewhere specified or included.
2308.00.98	Vegetable materials and vegetable waste, vegetable residues and byproducts, of a kind used in animal feeding, nesoi.
2309.10.00	Dog or cat food, put up for retail sale.
2309.90.10	Mixed feed or mixed feed ingredients used in animal feeding.
2309.90.70	Other preps nes with a basis of vitamin B12, for supplementing animal in animal feeding, not cont milk or egg prods.
2309.90.95	Other preps nes of a kind used in animal feeding, not cont milk or egg prods.
2401.10.44	Tobacco, not stemmed or stripped, not or not over 35% wrapper tobacco, oriental or turkish type, cigarette leaf.
2401.20.05	Leaf tobacco, the product of two or more countries or dependencies, when mixed or packed together, partly or wholly stemmed, not threshed.
2401.20.14	Wrapper tobacco, partly or wholly stemmed (stripped), not threshed or similarly processed.
2401.20.18	Tobacco containing over 35% wrapper tobacco, partly or wholly stemmed (stripped), not threshed or similarly processed.
2401.20.23	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly processed, not or n/over 35% wrapper, oriental or turkish, cigarette lea.
2401.20.26	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly processed, not or n/over 35% wrapper, not cigarette leaf.
2401.20.29	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly processed, not or n/over 35% wrapper, cigar binder and filler.
2401.20.31	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly proc., not or n/over 35% wrapper, flue-cured burley etc, not for cigaret.
2401.20.33	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly proc., not or n/over 35% wrapper, des. in addl U.S. note 5 to ch. 24.
2401.20.35	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly proc., not or n/over 35% wrapper, flue-cured burley etc, other nesoi.
2401.20.57	Tobacco, partly or wholly stemmed/stripped, n/threshed or similarly proc., not or n/over 35% wrapper, not flue-cured burley etc., other nesoi.
2401.20.60	Tobacco, partly or wholly stemmed (stripped), threshed or similarly processed, from cigar leaf.
2401.20.75	Tobacco, partly or wholly stemmed/stripped, threshed or similarly processed, not from cigar leaf, oriental or turkish.
2401.20.83	Tobacco, partly or wholly stemmed/stripped, threshed or similarly processed, not from cigar leaf, not oriental or turkish, not for cigarett.
2401.20.85	Tobacco, partly or wholly stemmed/stripped, threshed or similarly processed, not from cigar leaf, described in addl U.S. note 5 to chap 24.
2401.20.87	Tobacco, partly or wholly stemmed/stripped, threshed or similarly processed, not from cigar leaf, not oriental or turkish, other nesoi.
2401.30.03	Tobacco refuse, tobacco stems, not cut, ground or pulverized.
2401.30.06	Tobacco refuse, from cigar leaf, tobacco stems, cut, ground or pulverized.
2401.30.09	Tobacco refuse, from cigar leaf, other than tobacco stems.
2401.30.13	Tobacco refuse, from oriental or turkish type, tobacco stems, not cut, ground or pulverized.
2401.30.16	Tobacco refuse, from oriental or turkish type, tobacco stems, cut, ground or pulverized.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. HTSUS subheading	Product description
2401.30.19	Tobacco refuse, from oriental or turkish type, other than tobacco stems.
2401.30.23	Tobacco refuse, from other tobacco, other than for cigarettes, tobacco stems, not cut, ground or pulverized.
2401.30.25	Tobacco refuse, from other tobacco, other than for cigarettes, tobacco stems, cut, ground or pulverized.
2401.30.27	Tobacco refuse, from other tobacco, other than for cigarettes,tother than tobacco stems.
2401.30.33	Tobacco refuse, from other tobacco, for cigarettes, described in addl U.S. note 5 to chap 24, tobacco stems, not cut, ground or pulverized.
2401.30.35	Tobacco refuse, from other tobacco, for cigarettes, described in addl U.S. note 5 to chap 24, tobacco stems, cut, ground or pulverized.
2401.30.37	Tobacco refuse, from other tobacco, for cigarettes, described in addl U.S. note 5 to chap 24, not tobacco stems.
2401.30.70	Tobacco refuse, from other tobacco, for cigarettes, other nesoi.
2402.10.30	Cigars, cheroots and cigarillos containing tobacco, each valued less than 15 cents.
2402.10.60	Cigars, cheroots and cigarillos containing tobacco, each valued 15 cents or over but less than 23 cents.
2402.10.80	Cigars, cheroots and cigarillos containing tobacco, each valued 23 cents or over.
2402.20.10	Cigarettes containing tobacco and clove.
2402.20.80	Cigarettes containing tobacco but not containing clove, paper-wrapped.
2402.20.90	Cigarettes containing tobacco, nesoi.
2402.90.00	Cigars, cheroots and cigarillos and cigarettes of tobacco substitutes.
2403.11.00	Water pipe tobacco, whether or not containing tobacco substitutes.
2403.19.20	Smoking tobacco, whether or not containing tobacco substitutes, prepared for marketing directly to consumer as packaged.
2403.19.30	Smoking tobacco, other than for water pipes, whether or not containing tobacco subst, other, to be used in products other than cigarettes.
2403.19.60	Smoking tobacco, not water pipe, whether or not containing substitutes, other, to be used in cigarettes, in addl U.S. note 5 to chapter.
2403.19.90	Smoking tobacco, not water pipe, whether or not containing substitutes, other, to be used in cigarettes, other nesoi.
2403.91.43	"Homogenized" or "reconstituted" tobacco, not suitable for use as wrapper tobacco, to be used in products other than cigarettes.
2403.99.20	Other manufactured tobacco, tobacco substitutes, tobacco extracts or essences, prepared for marketing directly to consumer as packaged.
2403.99.30	Other manufactured tobacco, tobacco substitutes, tobacco extracts or essences, other, to be used in products other than cigarettes.
2403.99.60	Other manufactured tobacco, tobacco substitutes, tobacco extracts or essences, to be used in cigarettes, described in addl U.S. note 5 to chap.
2403.99.90	Other manufactured tobacco, tobacco substitutes, tobacco extracts or essences, other, to be used in cigarettes, other nesoi.
2501.00.00	Salt & pure sodium chloride, whether or not in aqueous solution or cont. added anticaking or free-flowing agents; sea water.
2502.00.00	Iron pyrites, unroasted.
2503.00.00	Sulfur of all kinds, other than sublimed, precipitated and colloidal sulfur.
2504.10.10	Natural graphite, crystalline flake (not including flake dust).
2504.10.50	Natural graphite in powder or flakes (other than crystalline flake).
2504.90.00	Natural graphite, other than in powder or in flakes.
2505.10.10	Natural silica and quartz sands, containing by weight 95% or more of silica and not more than 0.6% of oxide of iron.
2505.10.50	Natural silica and quartz sands, nesoi.
2505.90.00	Natural sands, other than silica or quartz sands and other than metal-bearing sands of chapter 26.
2506.10.00	Quartz (other than natural sands).
2506.20.00	Quartzite.
2507.00.00	Kaolin and other kaolinic clays, whether or not calcined.
2508.10.00	Bentonite clay, whether or not calcined.
2508.30.00	Fire-clay, whether or not calcined.
2508.40.01	Clays, (not including expanded clays of heading 6806), nesoi, whether or not calcined.
2508.50.00	Andalusite, kyanite and sillimanite, whether or not calcined.
2508.60.00	Mullite.
2508.70.00	Chamotte or dinas earths.
2509.00.10	Chalk, crude.
2509.00.20	Chalk, other than crude.
2510.10.00	Natural calcium phosphates, natural aluminum calcium phosphates and phosphatic chalk, unground.
2510.20.00	Natural calcium phosphates, natural aluminum calcium phosphates and phosphatic chalk, ground.
2511.10.10	Natural barium sulfate (barytes), ground.
2511.10.50	Natural barium sulfate (barytes), not ground.
2511.20.00	Natural barium carbonate (witherite), whether or not calcined.
2512.00.00	Siliceous fossil meals and similar siliceous earths, whether or not calcined, of an apparent specific gravity of 1 or less.
2513.10.00	Pumice.

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2513.20.10	Emery; natural corundum, nat. garnet and other nat. abrasives, whether or not heat-treated, all the foregoing crude or in irregular pieces.
2513.20.90	Emery; natural corundum, nat. garnet and other nat. abrasives, whether or not heat-treated, all the foregoin not crude or irregular pieces.
2514.00.00	Slate, whether or not roughly trimmed or merely cut into blocks or slabs of a rectangular (including square) shape.
2515.11.00	Marble and travertine, crude or roughly trimmed.
2515.12.10	Marble, merely cut into blocks or slabs of a rectangular (including square) shape.
2515.12.20	Travertine, merely cut into blocks or slabs of a rectangular (including square) shape.
2515.20.00	Calcareous monument.or build.stone (o/than marble/traver.) of spec. gravity >=2.5 & alabaster, crude, rough, trimmed or cut blocks or slabs.
2516.11.00	Granite, crude or roughly trimmed.
2516.12.00	Granite, merely cut into blocks or slabs of a rectangular (including square) shape.
2516.20.10	Sandstone, crude or roughly trimmed.
2516.20.20	Sandstone, merely cut into blocks or slabs of a rectangular (including square) shape.
2516.90.00	Porphyry, basalt and other monument. or build. stone (except granite/sandstone), crude or roughly trimmed or cut into rect. blocks/slabs.
2517.10.00	Pebbles, gravel, broken or crushed stones, for concrete aggregates, road metalling, ballast, shingle or flint, whether o/not heat-treated.
2517.20.00	Macadam of slag, dross or similar industrial waste, whether or not incorporating pebbles, gravel, etc.
2517.30.00	Tarred macadam.
2517.41.00	Granules, chippings and powder of marble, whether or not heat-treated.
2517.49.00	Granules, chippings and powder, of travertine/calcareous monument. or build.stone (except marble)/granite/porphyry/basalt/sandstone etc.
2518.10.00	Dolomite, not calcined, whether or not or roughly trimmed or merely cut into blocks or slabs of a rectangular (including square) shape.
2518.20.00	Dolomite, calcined, whether or not roughly trimmed or merely cut into blocks or slabs of a rectangular (including square) shape.
2518.30.00	Agglomerated dolomite (including tarred dolomite).
2519.10.00	Natural magnesoium carbonate (magnesoite).
2519.90.10	Fused magnesoia; dead-burned (sintered) magnesoia, whether or not cont. small quant. of other oxides added before sintering.
2519.90.20	Caustic calcined magnesoite.
2519.90.50	Magnesoium oxide, nesoi, whether or not pure.
2520.10.00	Gypsum; anhydrite.
2520.20.00	Plasters (of calcined gypsum or calcium sulfate), whether or not colored, with or without small quantities of accelerators or retarders.
2521.00.00	Limestone flux; limestone and other calcareous stone, of a kind used for the manufacture of lime or cement.
2522.10.00	Quicklime (other than calcium oxide and hydroxide of heading 2825).
2522.20.00	Slaked lime (other than calcium oxide and hydroxide of heading 2825).
2522.30.00	Hydraulic lime (other than calcium oxide and hydroxide of heading 2825).
2523.10.00	Clinkers of portland, aluminous, slag, supersulfate and similar hydraulic cements.
2523.21.00	Portland cement (white cement), whether or not artificially colored.
2523.29.00	Portland cement (other than white cement), whether or not colored.
2523.30.00	Aluminous cement, whether or not colored.
2523.90.00	Slag cement, supersulfate cement and other hydraulic cements, nesoi, whether or not colored.
2524.10.00	Crocidolite.
2524.90.00	Asbestos other than crocidolite.
2525.10.00	Mica, crude or rifted into sheets or splittings.
2525.20.00	Mica, powder.
2525.30.00	Mica, waste.
2526.10.00	Steatite, natural n/crushed or powdered, whether or not roughly trimmed or cut into rect. blocks or slabs; talc n/crushed or powdered.
2526.20.00	Steatite, natural; talc; the foregoing crushed or powdered.
2528.00.00	Borates, natural and conc., but n/incl. borates from nat. brine; nat. boric acid w/not over 85% H3B03 by dry weight.
2529.10.00	Feldspar.
2529.21.00	Fluorspar, containing by weight 97 percent or less of calcium fluoride.
2529.22.00	Fluorspar, containing by weight more than 97 percent of calcium fluoride.
2529.30.00	Leucite; nepheline and nepheline syenite.
2530.10.00	Vermiculite, perlite and chlorites, unexpanded.
2530.20.10	Kieserite.
2530.20.20	Epsom salts (natural magnesoium sulfates).
2530.90.10	Natural cryolite; natural chiolite.
2530.90.20	Natural micaceous iron oxides.
2530.90.80	Other mineral substances, not elsewhere specified or included.
2601.11.00	Iron ores and concentrates (other than roasted iron pyrites), not agglomerated.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
2601.12.00	Iron ores and concentrates (other than roasted iron pyrites), agglomerated.
2601.20.00	Roasted iron pyrites.
2602.00.00	Manganese ores and concentrates including ferruginous manganese ores & concentrates with manganese content over 20% calculated on dry weight.
2603.00.00	Copper ores and concentrates.
2604.00.00	Nickel ores and concentrates.
2605.00.00	Cobalt ores and concentrates.
2606.00.00	Aluminum ores and concentrates.
2607.00.00	Lead ores and concentrates.
2608.00.00	Zinc ores and concentrates.
2609.00.00	Tin ores and concentrates.
2610.00.00	Chromium ores and concentrates.
2611.00.30	Tungsten ores.
2611.00.60	Tungsten concentrates.
2612.10.00	Uranium ores and concentrates.
2612.20.00	Thorium ores and concentrates.
2613.10.00	Molybdenum ores and concentrates, roasted.
2613.90.00	Molybdenum ores and concentrates, not roasted.
2614.00.30	Synthetic rutile.
2614.00.60	Titanium ores and concentrates, other than synthetic rutile.
2615.10.00	Zirconium ores and concentrates.
2615.90.30	Synthetic tantalum-niobium concentrates.
2615.90.60	Niobium, tantalum or vanadium ores and concentrates, nesoi.
2616.10.00	Silver ores and concentrates.
2616.90.00	Precious metal (other than silver) ores and concentrates.
2617.10.00	Antimony ores and concentrates.
2617.90.00	Metal ores and concentrates, nesoi.
2618.00.00	Granulated slag (slag sand) from the manufacture of iron or steel.
2619.00.30	Ferrous scale.
2619.00.90	Slag, dross and other waste (except ferrous scale) from the manufacture of iron or steel.
2620.11.00	Hard zinc spelter.
2620.19.30	Zinc dross and skimmings (not from from the mfr. of iron or steel).
2620.19.60	Ash and residues (not from the mfr. of iron or steel), containing mainly zinc, other than hard zinc spelter/zinc dross & skimmings.
2620.21.00	Leaded gasoline sludges and leaded anti-knock compound sludges, containing mainly lead.
2620.29.00	Ash and residues (other than from the manufacture of iron or steel), containing mainly lead, nesoi.
2620.30.00	Ash and residues (not from the mfr. of iron or steel), containing mainly copper.
2620.40.00	Ash and residues (not from the mfr. of iron or steel), containing mainly aluminum.
2620.60.10	Ash/residues contain arsenic, mercury, thallium or their mixtures, kind used only for extraction of arsenic or manufacture of its compounds.
2620.60.90	Ash/residue contain arsenic, mercury, thallium/their mixtures, kind used only for extraction of those metals or manufacture of their compounds.
2620.91.00	Ash and residues (other than from the manufacture of iron or steel), containing antimony, beryllium, cadmium, chromium or their mixtures.
2620.99.10	Ash and residues (other than from the manufacture of iron or steel), containing mainly vanadium.
2620.99.20	Ash and residues (other than from the manufacture of iron or steel), containing mainly tungsten.
2620.99.30	Materials (ash and residues) not provided for elsewhere in heading 2620 containing by weight over 10 percent nickel.
2620.99.50	Slag (other than from the manufacture of iron or steel) contains over 40% titanium & if has over 2% Cu/Pb/Zn is not for recovery thereof.
2620.99.75	Residues (not from mfr. of iron or steel) cont. metals/metal compounds nesoi, and n/adv. in value or cond. & if >2% Cu/Pb/Zn n/for recovery.
2620.99.85	Other ash and residues (other than from the manufacture of iron or steel), containing metals or metal compounds, nesoi.
2621.90.00	Other slag and ash, including seaweed ash (kelp), not elsewhere specified or included.
2701.11.00	Coal, anthracite, whether or not pulverized, but not agglomerated.
2701.12.00	Coal, bituminous, whether or not pulverized, but not agglomerated.
2701.19.00	Coal, other than anthracite or bituminous, whether or not pulverized, but not agglomerated.
2701.20.00	Coal, briquettes, ovoids and similar solid fuels manufactured from coal.
2702.10.00	Lignite (excluding jet), whether or not pulverized, but not agglomerated.
2702.20.00	Lignite (excluding jet), agglomerated.
2703.00.00	Peat (including peat litter), whether or not agglomerated.
2704.00.00	Coke and semicoke of coal, lignite or peat, whether or not agglomerated; retort carbon.
2705.00.00	Coal gas, water gas, producer gas and similar gases, other than petroleum gases or other gaseous hydrocarbons.
2706.00.00	Tars (including reconstituted tars), distill. from coal, lignite or peat, and other mineral tars, whether dehydrated or partially distilled.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2707.10.00	Benzene, from distillation of hi-temp coal tar or in which wt. of aromatic components o/wt. of nonaromatic components.
2707.20.00	Toluene, from distillation of hi-temp coal tar or in which wt. of aromatic components o/wt. of nonaromatic components.
2707.30.00	Xylenes, from distillation of hi-temp coal tar or in which wt. of aromatic components o/wt. of nonaromatic components.
2707.40.00	Naphthalene, from distillation of hi-temp coal tar or in which wt. of aromatic components o/wt. of nonaromatic components.
2707.50.00	Aromatichydrocarbon mix. (from dist. of hi-temp coaltar or wt. of aromatic >nonaromatic), 65%+ by vol. (incl. losses) dist. at 250 C/ASTM D 86.
2707.91.00	Creosote oils, from dist. of hi-temp coal tar or wt. of aromatic exceeds nonaromatic.
2707.99.10	Light oil, from dist. of hi-temp coal tar or wt. of aromatic exceeds nonaromatic.
2707.99.20	Picolines, from dist. of hi-temp coal tar or wt. of aromatic exceeds nonaromatic.
2707.99.40	Carbazole, from dist. of hi-temp coal tar or wt. of aromatic exceeds nonaromatic, w/purity of 65% or more by wt.
2707.99.51	Phenols >50% by wt hydroxybenzene.
2707.99.55	Metacresol/orthocresol/paracresol/metaparacresol (from dist. of hi-temp coal tar or wt. of aromatic >nonaromatic), w/purity of 75%+ by wt.
2707.99.59	Phenols, nesoi.
2707.99.90	Other products of hi-temp coal tar distillation and like products in which aromatic constituents exceed non-aromatic constituents, nesoi.
2708.10.00	Pitch, obtained from coal tar or other mineral tars.
2708.20.00	Pitch coke, obtained from coal tar or other mineral tars.
2709.00.10	Petroleum oils and oils from bituminous minerals, crude, testing under 25 degrees A.P.I.
2709.00.20	Petroleum oils and oils from bituminous minerals, crude, testing 25 degrees A.P.I. or more.
2710.12.15	Light oil motor fuel from petroleum oils and bituminous minerals (o/than crude) or preps. 70%+ by wt. from petroleum oils.
2710.12.18	Light oil motor fuel blending stock from petroleum oils & bituminous minerals (o/than crude) or prep 70%+ by wt. from petroleum oils.
2710.12.25	Naphthas (exc. motor fuel/mtr fuel blend. stock) fr petroleum oils & bitumin minerals (o/than crude) or preps 70%+ by wt. fr petroleum oils.
2710.12.45	Light oil mixt. of hydrocarbons fr petro oils & bitum min (o/than crude) or prep 70%+ wt. fr petro oils, nesoi, n/o 50% any single hydrocarbon.
2710.12.90	Light oils and preparations from petroleum oils & oils from bituminous min. or preps 70%+ by wt. from petro. oils or bitum. min., nesoi.
2710.19.06	Distillate and residual fuel oil (including blends) derived from petroleum or oils from bituminous minerals, testing <25 degrees A.P.I.
2710.19.11	Distillate and residual fuel oil (including blends) derived from petroleum oils or oil of bituminous minerals, testing 25 degree A.P.I. or >.
2710.19.16	Kerosene-type jet fuel from petroleum oils and oils of bitumin minerals (o/than crude) or preps. 70%+ by wt. from petroleum oils.
2710.19.24	Kerosene motor fuel (not jet) from petro oils and bitumin minerals (o/than crude) or preps. 70%+ by wt. from petroleum oils.
2710.19.25	Kerosene motor fuel blending stock (not jet), from petro oils and bitumin. minerals (o/than crude) or preps. 70%+ by wt. from petro oils.
2710.19.26	Kerosene (ex. motor fuel/mtr fuel blend stock/xc jet), fr petro oils and bitumin minerals (o/than crude) or preps 70%+ by wt fr petro oils.
2710.19.45	Mixture of hydrocarbons from petro oils & bitum. min. or preps. 70%+ by wt. fr. petro. oils, nesoi, n/o 50% any single hydrocarbon.
2710.19.90	Petroleum oils & oils from bituminous minerals or preps nesoi 70%+ by wt. from petroleum oils or bitum. min., not waste, nesoi.
2710.20.05	Dist and resid fuel oil (including blends) derived from petro or oils fr bitum min, testing under 25 degrees A.P.I., contng biodiesel.
2710.20.10	Dist and resid fuel oil (including blends) derived from petro or oils fr bitum min testing 25 degree A.P.I. or >, contng biodiesel.
2710.20.15	Kerosene-type jet fuel/mtr ful/mtr ful blend stck fr pet oils & bitumin min (o/th crude), or preps. 70%+ by w fr pet oils, ctg biodiesel.
2710.20.25	Kerosene (ex jet fuel,mtr ful/mtr ful blend stck/jet), fr pet oils and bitumin. min (o/th crude) or preps 70%+ by wt fr pet oils, ctg biodie.
2711.11.00	Natural gas, liquefied.
2711.12.00	Propane, liquefied.
2711.13.00	Butanes, liquefied.
2711.14.00	Ethylene, propylene, butylene and butadiene, liquefied.
2711.19.00	Liquefied petroleum gases and other gaseous hydrocarbons, nesoi.
2711.21.00	Natural gas, in gaseous state.
2711.29.00	Petroleum gases and other gaseous hydrocarbons, except natural gas.
2712.10.00	Petroleum jelly.
2712.20.00	Paraffin wax (whether or not colored), obtained by synthesis or other process and less than 0.75% oil by wt.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2712.90.10	Montan wax (whether or not colored), obtained by synthesis or other process.
2712.90.20	Mineral waxes (*i.e.,* paraffin w/0.75%+ oil, microcrystall. wax, slack lignite & peat waxes, ozokerite), obtained by synthesis.
2713.11.00	Coke, petroleum, not calcined.
2713.12.00	Coke, petroleum coke, calcined.
2713.20.00	Petroleum bitumen.
2713.90.00	Residues (except petroleum coke or petroleum bitumen) of petroleum oils or of oils obtained from bituminous materials.
2714.10.00	Bituminous or oil shale and tar sands.
2714.90.00	Bitumen and asphalt, natural; asphaltites and asphaltic rocks.
2715.00.00	Bituminous mixtures based on natural asphalt, natural bitumen, petroleum bitumen, mineral tar or mineral tar pitch.
2716.00.00	Electrical energy.
2801.10.00	Chlorine.
2801.20.00	Iodine.
2801.30.10	Fluorine.
2801.30.20	Bromine.
2802.00.00	Sulfur, sublimed or precipitated; colloidal sulfur.
2803.00.00	Carbon (carbon blacks and other forms of carbon not elsewhere specified or included).
2804.10.00	Hydrogen.
2804.21.00	Argon.
2804.29.00	Rare gases, other than argon.
2804.30.00	Nitrogen.
2804.40.00	Oxygen.
2804.50.00	Boron; tellurium.
2804.61.00	Silicon containing by weight not less than 99.99 percent of silicon.
2804.69.10	Silicon, containing by weight less than 99.99 percent but not less than 99 percent of silicon.
2804.69.50	Silicon, containing by weight less than 99 percent of silicon.
2804.70.00	Phosphorus.
2804.80.00	Arsenic.
2804.90.00	Selenium.
2805.11.00	Sodium.
2805.12.00	Calcium.
2805.19.10	Strontium.
2805.19.20	Barium.
2805.19.90	Alkali metals, other than sodium.
2805.30.00	Rare-earth metals, scandium and yttrium, whether or not intermixed or interalloyed.
2805.40.00	Mercury.
2806.10.00	Hydrogen chloride (Hydrochloric acid).
2806.20.00	Chlorosulfuric acid.
2807.00.00	Sulfuric acid; oleum.
2808.00.00	Nitric acid; sulfonitric acids.
2809.10.00	Diphosphorus pentoxide.
2809.20.00	Phosphoric acid and polyphosphoric acids.
2810.00.00	Oxides of boron; boric acids.
2811.11.00	Hydrogen fluoride (Hydrofluoric acid).
2811.12.00	Hydrogen cyanide.
2811.19.10	Arsenic acid.
2811.19.30	Hydrobromic acid.
2811.19.61	Sulfamic acid and other inorganic acids nesoi.
2811.21.00	Carbon dioxide.
2811.22.10	Synthetic silica gel.
2811.22.50	Silicon dioxide, other than synthetic silica gel.
2811.29.10	Arsenic trioxide.
2811.29.20	Selenium dioxide.
2811.29.30	Sulfur dioxide.
2811.29.50	Other inorganic oxygen compounds of nonmetals, nesoi.
2812.11.00	Carbonyl dichloride (Phosgene).
2812.12.00	Phosphorus oxychloride.
2812.13.00	Phosphorus trichloride.
2812.14.00	Phosphorus pentachloride.
2812.15.00	Sulfur monochloride.
2812.16.00	Sulfur dichloride.
2812.17.00	Thionyl chloride.
2812.19.00	Other chlorides and chloride oxides.
2812.90.00	Halides and halide oxides of nonmetals, excluding chlorides and chloride oxides.
2813.10.00	Carbon disulfide.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2813.90.10	Arsenic sulfides.
2813.90.20	Phosphorus sulfides.
2813.90.50	Sulfides of nonmetals, excluding carbon disulfide and sulfides of arsenic or phosphorus.
2814.10.00	Anhydrous ammonia.
2814.20.00	Ammonia in aqueous solution.
2815.11.00	Sodium hydroxide (Caustic soda), solid.
2815.12.00	Sodium hydroxide (Caustic soda), in aqueous solution (Soda lye or liquid soda).
2815.20.00	Potassium hydroxide (Caustic potash).
2815.30.00	Peroxides of sodium or potassium.
2816.10.00	Hydroxide and peroxide of magnesoium.
2816.40.10	Oxides, hydroxides and peroxides of strontium.
2816.40.20	Oxides, hydroxides and peroxides of barium.
2817.00.00	Zinc oxide; zinc peroxide.
2818.10.10	Artificial corundum, crude.
2818.10.20	Artificial corundum, in grains, or ground, pulverized or refined.
2818.20.00	Aluminum oxide, other than artificial corundum.
2818.30.00	Aluminum hydroxide.
2819.10.00	Chromium trioxide.
2819.90.00	Chromium oxides and hydroxides, other than chromium trioxide.
2820.10.00	Manganese dioxide.
2820.90.00	Manganese oxides, other than manganese dioxide.
2821.10.00	Iron oxides and hydroxides.
2821.20.00	Earth colors containing 70 percent or more by weight of combined iron evaluated as Fe2O3.
2822.00.00	Cobalt oxides and hydroxides; commercial cobalt oxides.
2823.00.00	Titanium oxides.
2824.10.00	Lead monoxide (Litharge, massicot).
2824.90.10	Lead suboxide (Leady litharge).
2824.90.20	Red lead and orange lead.
2824.90.50	Lead oxides, nesoi.
2825.10.00	Hydrazine and hydroxylamine and their inorganic salts.
2825.20.00	Lithium oxide and hydroxide.
2825.30.00	Vanadium oxides and hydroxides.
2825.40.00	Nickel oxides and hydroxides.
2825.50.10	Cupric oxide.
2825.50.20	Cuprous oxide.
2825.50.30	Copper hydroxides.
2825.60.00	Germanium oxides and zirconium dioxide.
2825.70.00	Molybdenum oxides and hydroxides.
2825.80.00	Antimony oxides.
2825.90.10	Beryllium oxide and hydroxide.
2825.90.15	Niobium oxide.
2825.90.20	Tin oxides.
2825.90.30	Tungsten oxides.
2825.90.75	Cadmium oxide.
2825.90.90	Other inorganic bases; other metal oxides, hydroxides and peroxides, nesoi.
2826.12.00	Fluorides of aluminum.
2826.19.10	Ammonium fluoride.
2826.19.20	Sodium fluoride.
2826.19.90	Fluorides, other than of ammonium, sodium or aluminum.
2826.30.00	Sodium hexafluoroaluminate (Synthetic cryolite).
2826.90.10	Fluorosilicates of sodium or of potassium.
2826.90.90	Other complex fluorine salts, nesoi.
2827.10.00	Ammonium chloride.
2827.20.00	Calcium chloride.
2827.31.00	Magnesoium chloride.
2827.32.00	Aluminum chloride.
2827.35.00	Nickel chloride.
2827.39.10	Vanadium chlorides.
2827.39.25	Tin chlorides.
2827.39.30	Titanium chlorides.
2827.39.40	Tungsten hexachloride.
2827.39.45	Barium chloride.
2827.39.55	Iron chlorides.
2827.39.60	Cobalt chlorides.
2827.39.65	Zinc chloride.
2827.39.90	Chlorides, nesoi.
2827.41.00	Chloride oxides and chloride hydroxides of copper.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2827.49.10	Chloride oxides and chloride hydroxides of vanadium.
2827.49.50	Chloride oxides and chloride hydroxides other than of copper or of vanadium.
2827.51.00	Bromides of sodium or potassium.
2827.59.25	Bromides or bromide oxides of ammonium, calcium, or zinc.
2827.59.51	Other bromides and bromide oxides, other than ammonium, calcium or zinc.
2827.60.10	Iodide and iodide oxide of calcium or copper.
2827.60.20	Iodide and iodide oxide of potassium.
2827.60.51	Iodides and iodide oxides, other than of calcium, copper or potassium.
2828.10.00	Commercial calcium hypochlorite and other calcium hypochlorites.
2828.90.00	Hypochlorites, except of calcium; hypobromites; chlorites.
2829.11.00	Sodium chlorate.
2829.19.01	Other chlorates and perchlorates, other than sodium.
2829.90.05	Potassium bromate.
2829.90.25	Sodium bromate.
2829.90.40	Perchlorates, perbromates, iodates, periodates; of potassium.
2829.90.61	Other perbromates, iodates and periodates other than potassium.
2830.10.00	Sodium sulfides.
2830.90.10	Zinc sulfide, luminescent grade, purity ≤=99.99% By wt.
2830.90.15	Zinc sulfide excluding luminescent grade.
2830.90.20	Cadmium sulfide.
2830.90.90	Polysulfides; sulfides, other than those of zinc and cadmium.
2831.10.10	Sodium formaldehyde sulfoxylate.
2831.10.50	Dithionites and sulfoxylates of sodium.
2831.90.00	Dithionites and sulfoxylates, other than those of sodium.
2832.10.00	Sodium sulfites.
2832.20.00	Sulfites, except sodium sulfites.
2832.30.10	Sodium thiosulfate.
2832.30.50	Thiosulfates, except sodium thiosulfate.
2833.11.10	Disodium sulfate, crude (Salt cake).
2833.11.50	Disodium sulfate, other than crude.
2833.19.00	Sodium sulfates, other than disodium sulfate.
2833.21.00	Magnesoium sulfate.
2833.22.00	Aluminum sulfate.
2833.24.00	Nickel sulfate.
2833.25.00	Copper sulfate.
2833.27.00	Barium sulfate.
2833.29.10	Cobalt sulfate.
2833.29.20	Iron sulfate.
2833.29.30	Vanadium sulfate.
2833.29.40	Chromium sulfate.
2833.29.45	Zinc sulfate.
2833.29.51	Other sulfates nesoi.
2833.30.00	Alums.
2833.40.20	Sodium peroxosulfates (sodium persulfates).
2833.40.60	Peroxosulfates (persulfates), nesoi.
2834.10.10	Sodium nitrite.
2834.10.50	Nitrites, other than of sodium.
2834.21.00	Potassium nitrate.
2834.29.05	Bismuth nitrate.
2834.29.10	Calcium nitrate.
2834.29.20	Strontium nitrate.
2834.29.51	Nitrates, nesoi.
2835.10.00	Phosphinates (hypophosphites) and phosphonates (phosphites).
2835.22.00	Mono- or disodium phosphates.
2835.24.00	Potassium phosphate.
2835.25.00	Calcium hydrogenorthophosphate ("Dicalcium phosphate").
2835.26.00	Other phosphates of calcium, nesoi.
2835.29.10	Aluminum phosphate.
2835.29.20	Triammonium phosphate.
2835.29.30	Trisodium phosphate.
2835.29.51	Other phosphates nesoi.
2835.31.00	Sodium triphosphate (Sodium tripolyphosphate).
2835.39.10	Potassium polyphosphate.
2835.39.50	Polyphosphates, other than sodium triphosphate and potassium polyphosphate.
2836.20.00	Disodium carbonate.
2836.30.00	Sodium hydrogencarbonate (Sodium bicarbonate).
2836.40.10	Dipotassium carbonate.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2836.40.20	Potassium hydrogencarbonate (Potassium bicarbonate).
2836.50.00	Calcium carbonate.
2836.60.00	Barium carbonate.
2836.91.00	Lithium carbonates.
2836.92.00	Strontium carbonate.
2836.99.10	Cobalt carbonates.
2836.99.20	Bismuth carbonate.
2836.99.30	Commercial ammonium carbonate, containing ammonium carbamate, and other ammonium carbonates.
2836.99.40	Lead carbonate.
2836.99.50	Carbonates nesoi, and peroxocarbonates (percarbonates).
2837.11.00	Sodium cyanide.
2837.19.01	Cyanides and cyanide oxides, except those of sodium.
2837.20.10	Potassium ferricyanide.
2837.20.51	Complex cyanides, excluding potassium ferricyanide.
2839.11.00	Sodium metasilicates.
2839.19.00	Sodium silicates except sodium metasilicates.
2839.90.10	Potassium silicate.
2839.90.50	Other alkali metal silicates nesoi.
2840.11.00	Anhydrous disodium tetraborate (refined borax).
2840.19.00	Disodium tetraborate (refined borax) except anhydrous.
2840.20.00	Borates, other than disodium tetraborate (refined borax).
2840.30.00	Peroxoborates (perborates).
2841.30.00	Sodium dichromate.
2841.50.10	Potassium dichromate.
2841.50.91	Chromates except of zinc or lead and dichromates except of sodium or potassium; peroxochromates.
2841.61.00	Potassium permanganate.
2841.69.00	Manganites, manganates and permanganates (except potassium permanganate).
2841.70.10	Ammonium molybdate.
2841.70.50	Molybdates, other than of ammonium.
2841.80.00	Tungstates (wolframates).
2841.90.10	Vanadates.
2841.90.20	Ammonium perrhenate.
2841.90.30	Potassium stannate.
2841.90.40	Aluminates.
2841.90.45	Chromates of zinc or of lead.
2841.90.50	Salts of oxometallic or peroxometallic acids nesoi.
2842.10.00	Double or complex silicates.
2842.90.10	Fulminates, cyanates and thiocyanates.
2842.90.90	Salts of inorganic acids or peroxoacids nesoi, excluding azides.
2843.10.00	Colloidal precious metals.
2843.21.00	Silver nitrate.
2843.29.01	Silver compounds, other than silver nitrate.
2843.30.00	Gold compounds.
2843.90.00	Inorganic or organic compounds of precious metals, excluding those of silver and gold; amalgams of precious metals.
2844.10.10	Natural uranium metal.
2844.10.20	Natural uranium compounds.
2844.10.50	Alloys, dispersions (including cermets), ceramic products and mixtures containing natural uranium or natural uranium compounds.
2845.10.00	Heavy water (Deuterium oxide).
2846.10.00	Cerium compounds.
2846.90.20	Mixtures of rare-earth oxides or of rare-earth chlorides.
2846.90.40	Yttrium materials and compounds containing by wt. >19% But <85% yttrium oxide equivalent.
2846.90.80	Compounds, inorganic or organic, of rare-earth metals, of yttrium or of scandium, or of mixtures of these metals, nesoi.
2847.00.00	Hydrogen peroxide, whether or not solidified with urea.
2849.10.00	Calcium carbide.
2849.20.10	Silicon carbide, crude.
2849.20.20	Silicon carbide, in grains, or ground, pulverized or refined.
2849.90.10	Boron carbide.
2849.90.20	Chromium carbide.
2849.90.30	Tungsten carbide.
2849.90.50	Carbides, nesoi.
2850.00.05	Hydride, nitride, azide, silicide and boride of calcium.
2850.00.07	Hydride, nitride, azide, silicide and boride of titanium.
2850.00.10	Hydride, nitride, azide, silicide and boride of tungsten.
2850.00.20	Hydride, nitride, azide, silicide and boride of vanadium.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2850.00.50	Hydrides, nitrides, azides, silicides and borides other than of calcium, titanium, tungsten or vanadium.
2852.10.10	Mercuric oxide, mercuric cyanide, mercuric oxycyanide and mercuric potassium cyanide.
2852.10.90	Other chemically defined compounds of mercury excluding amalgams.
2852.90.05	Albuminates, tannates, and phosphides of mercury.
2852.90.90	Inorganic or organic compounds of mercury, not chemically defined, not albuminates, tannates, or phosphides, excluding amalgams.
2853.10.00	Cyanogen chloride (Chlorocyan).
2853.90.10	Phosphor copper containing more than 15% by weight of phosphorus, excluding ferrosphosphorus.
2853.90.50	Phosphides, whether or not chemically defined, excluding ferrophosphorus, of other metals or of nonmetals.
2853.90.90	Other phosphides, excl ferrophosphorous, nesoi.
2901.10.10	Ethane and butane.
2901.10.30	n-Pentane and isopentane.
2901.10.40	Saturated acyclic hydrocarbon (not ethane, butane, n-pentane or isopentane), derived in whole or part from petroleum, shale oil or natural gas.
2901.10.50	Saturated acyclic hydrocarbon (not ethane, butane, n-pentane or isopentane), not derived in whole or part petroleum, shale oil or natural gas.
2901.21.00	Ethylene.
2901.22.00	Propene (Propylene).
2901.23.00	Butene (Butylene) and isomers thereof.
2901.24.10	Buta-l,3-diene.
2901.24.20	Isoprene, having a purity of 95 percent or more by weight.
2901.24.50	Isoprene less than 95 percent pure.
2901.29.10	Unsaturated acyclic hydrocarbons, nesoi, derived in whole or in part from petroleum, shale oil or natural gas.
2901.29.50	Unsaturated acyclic hydrocarbons, nesoi, not derived in whole or in part from petroleum, shale oil or natural gas.
2902.11.00	Cyclohexane.
2902.19.00	Cyclanic hydrocarbons (except cyclohexane), cyclenic hydrocarbons and cycloterpenes.
2902.20.00	Benzene.
2902.30.00	Toluene.
2902.41.00	o-Xylene.
2902.42.00	m-Xylene.
2902.43.00	p-Xylene.
2902.44.00	Mixed xylene isomers.
2902.50.00	Styrene.
2902.60.00	Ethylbenzene.
2902.70.00	Cumene.
2902.90.10	Pseudocumene.
2902.90.20	Acenaphthene, chrysene, cymene, dimethylnaphthalenes, fluoranthene, fluorene, indene, mesitylene, and other specified cyclic hydrocarbons.
2902.90.30	Alkylbenzenes and polyalkylbenzenes.
2902.90.40	Anthracene and 1,4-di-(2-methylstyryl)benzene.
2902.90.60	Biphenyl (diphenyl), in flakes.
2902.90.90	Cyclic hydrocarbons, nesoi.
2903.11.00	Chloromethane (Methyl chloride) & chloroethane (Ethyl chloride).
2903.12.00	Dichloromethane (Methylene chloride).
2903.13.00	Chloroform (Trichloromethane).
2903.14.00	Carbon tetrachloride.
2903.15.00	1,2-Dichloroethane (Ethylene dichloride).
2903.19.05	1,2-Dichloropropane (Propylene dichloride) and dichlorobutanes.
2903.19.10	Hexachloroethane and tetrachloroethane.
2903.19.30	sec-Butyl chloride.
2903.19.60	Saturated chlorinated derivatives of acyclic hydrocarbons, nesoi.
2903.21.00	Vinyl chloride (Chloroethylene).
2903.22.00	Trichloroethylene.
2903.23.00	Tetrachloroethylene (Perchloroethylene).
2903.29.00	Unsaturated chlorinated derivatives of acyclic hydrocarbons, nesoi.
2903.31.00	Ethylene dibromide.
2903.39.15	Acetylene tetrabromide; alkyl bromides; methylene dibromide; and vinyl bromide.
2903.39.20	Fluorinated, brominated or iodinated derivatives of acyclic hydrocarbons, nesoi.
2903.71.00	Chlorodifluoromethane.
2903.72.00	Dichlorotrifluoroethanes.
2903.73.00	Dichlorofluoroethanes.
2903.74.00	Chlorodifluoroethanes.
2903.75.00	Dichloropentafluoropropanes.
2903.76.00	Bromochlorodifluoromethane, bromotrifluoromethane and dibromotetrafluoroethanes.
2903.77.00	Other acyclic hydrocarbon derivatives, perhalogenated only with flourine and chlorine.
2903.78.00	Other perhalogenated acyclic hydrocarbon derivatives, nesoi.
2903.79.10	Bromochloromethane.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
2903.79.90	Other halogenated derivatives of acyclic hydrocarbons containing two or more different halogens, nesoi.
2903.81.00	1,2,3,4,5,6-Hexachlorocyclohexane (HCH (ISO)), including Lindane (ISO, INN).
2903.82.00	Aldrin (ISO), chlordane (ISO) and heptachlor (ISO).
2903.83.00	Halogenated derivatives of cyclanic cyclenic or cycloterpenic hydrocarbons: Mirex (ISO).
2903.89.05	Dibromoethyldibromocyclohexane.
2903.89.11	Halogenated pesticides derived in whole or in part from benzene or other aromatic hydrocarbon, nesoi.
2903.89.15	Halogenated products derived in whole or in part from benzene or other aromatic hydrocarbon, described in additional U.S. note 3 to sec. VI.
2903.89.20	Halogenated derivatives derived in whole or in part from benzene or other aromatic hydrocarbon, nesoi.
2903.89.31	Chlorinated, but not otherwise halogenated derivatives of cyclanic, cyclenic or cycloterpenic hydrocarbons.
2903.89.40	1,3,5,7,9,11-Hexabromocyclododecane.
2903.89.60	Tetrabromocyclooctane.
2903.89.70	Other halogenated derivatives of cyclanic etc hydrocarbons not deriv. from benzene or other aromatic hydrocarbons.
2903.91.10	Chlorobenzene.
2903.91.20	o-Dichlorobenzene.
2903.91.30	p-Dichlorobenzene.
2903.92.00	Hexachlorobenzene (ISO) and DDT (clofenatone (INN), (1,1,1-Trichloro-2,2-bis(p-chlorophenyl)ethane)).
2903.93.00	Halogenated derivatives of aromatic hydrocarbons, pentachlorobenzene.
2903.94.00	Halogenated derivatives of aromatic hydrocarbons, hexabromobiphenyls.
2903.99.05	3-Bromo-alpha,alpha,alpha-trifluorotoluene; and other specified halogenated derivatives of aromatic hydrocarbons.
2903.99.08	p-Chlorobenzotrifluoride; and 3,4-Dichlorobenzotrifluoride.
2903.99.10	m-Dichlorobenzene; 1,1-dichloro-2,2-bis(p-ethylphenyl)ethane; and trichlorobenzenes.
2903.99.15	Triphenylmethyl chloride.
2903.99.20	Benzyl chloride (alpha-Chlorotoluene); benzotrichloride (alpha,alpha,alpha-trichlorotoluene).
2903.99.23	Pentabromoethylbenzene.
2903.99.27	Tribromocumene.
2903.99.30	Pesticides derived from halogenated derivatives of aromatic hydrocarbons.
2903.99.80	Other halogenated derivatives of aromatic hydrocarbons, nesoi.
2904.10.04	2-Anthracenesulfonic acid.
2904.10.08	Benzenesulfonyl chloride.
2904.10.10	m-Benzenedisulfonic acid, sodium salt; 1,5-naphthalenedisulfonic acid; and p-toluenesulfonyl chloride.
2904.10.15	Mixtures of 1,3,6-naphthalenetrisulfonic acid and 1,3,7-naphthalenetrisulfonic acid.
2904.10.32	Aromatic derivatives of hydrocarbons containing only sulfo groups, their salts and ethyl esters, described in add. U.S. note 3 to sec. VI.
2904.10.37	Aromatic derivatives of hydrocarbons containing only sulfo groups, their salts and ethyl esters, nesoi.
2904.10.50	Nonaromatic derivatives of hydrocarbons containing only sulfo groups, their salts and ethyl esters, nesoi.
2904.20.10	p-Nitrotoluene.
2904.20.15	p-Nitro-o-xylene.
2904.20.20	Trinitrotoluene.
2904.20.30	5-tert-Butyl-2,4,6-trinitro-m-xylene (Musk xylol) and other artificial musks.
2904.20.35	Nitrated benzene, nitrated toluene (except p-nitrotoluene) or nitrated naphthalene.
2904.20.40	Aromatic derivatives of hydrocarbons containing only nitro or only nitroso groups, described in additional U.S. note 3 to section VI.
2904.20.45	Aromatic derivatives of hydrocarbons containing only nitro or only nitroso groups, nesoi.
2904.20.50	Nonaromatic derivatives of hydrocarbons containing only nitro or only nitroso groups, nesoi.
2904.31.00	Perfluorooctane sulfonic acid.
2904.32.00	Ammonium perfluorooctane sulfonate.
2904.33.00	Lithium perfluorooctane sulfonate.
2904.34.00	Potassium perfluorooctane sulfonate.
2904.35.00	Other salts of perfluorooctane sulfonic acid.
2904.36.00	Perfluorooctane sulfonyl fluoride.
2904.91.00	Trichloronitromethane (chloropicrin).
2904.99.04	Monochloromononitrobenzenes; o-nitrochlorobenzene; p-nitrochlorobenzene.
2904.99.08	Monochloromononitrobenzenes nesoi.
2904.99.15	4-Chloro-3-nitro-a,a,a-trifluorotoluene; 2-Chloro-5-nitro-a,a,a-trifluorotoluene; and 4-Chloro-3,5-dinitro-a,a,a-trifluorotoluene.
2904.99.20	Nitrotoluenesulfonic acids.
2904.99.30	1-Bromo-2-nitrobenzene; 1,2-Dichloro-4-nitrobenzene and o-Fluoronitrobenzene.
2904.99.35	4,4′-Dinitrostilbene-2,2′-disulfonic acid.
2904.99.40	Sulfonated, nitrated or nitrosated derivatives of aromatic products described in additional U.S. note 3 to section 6.
2904.99.47	Other sulfonated, nitrated or nitrosated derivatives of aromatic hydrocarbons excluding aromatic products described in add. U.S. note 3 to section 6.
2904.99.50	Nonaromatic sulfonated, nitrated or nitrosated derivatives of hydrocarbons, nesoi.
2905.11.10	Methanol (Methyl alcohol) imported only for use in producing synthetic natural gas (SNG) or for direct use as a fuel.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
2905.11.20	Methanol (Methyl alcohol), other than imported only for use in producing synthetic natural gas (SNG) or for direct use as fuel.
2905.12.00	Propan-1-ol (Propyl alcohol) and Propan-2-ol (isopropyl alcohol).
2905.13.00	Butan-1-ol (n-Butyl alcohol).
2905.14.10	tert-Butyl alcohol, having a purity of less than 99 percent by weight.
2905.14.50	Butanols other than butan-1-ol and tert-butyl alcohol having a purity of less than 99 percent by weight.
2905.16.00	Octanol (Octyl acohol) and isomers thereof.
2905.17.00	Dodecan-1-ol (Lauryl alcohol); hexadecan-1-ol (Cetyl alcohol); octadecan-1-ol (Stearyl alcohol).
2905.19.10	Pentanol (Amyl alcohol) and isomers thereof.
2905.19.90	Saturated monohydric alcohols, nesoi.
2905.22.10	Geraniol.
2905.22.20	Isophytol.
2905.22.50	Acyclic terpene alcohols, other than geraniol and isophytol.
2905.29.10	Allyl alcohol.
2905.29.90	Unsaturated monohydric alcohols, other than allyl alcohol or acyclic terpene alcohols.
2905.31.00	Ethylene glycol (Ethanediol).
2905.32.00	Propylene glycol (Propane-1,2-diol).
2905.39.10	Butylene glycol.
2905.39.20	Neopentyl glycol.
2905.39.60	Hexylene glycol.
2905.39.90	Dihydric alcohols (diols), nesoi.
2905.41.00	2-Ethyl-2-(hydroxymethyl)propane-1,3-diol (Trimethylolpropane).
2905.42.00	Pentaerythritol.
2905.49.10	Triols and tetrols.
2905.49.20	Esters of glycerol formed with the acids of heading 2904.
2905.49.30	Xylitol.
2905.49.40	Polyhydric alcohols derived from sugars, nesoi.
2905.49.50	Polyhydric alcohols, nesoi.
2905.59.10	Halogenated, sulfonated, nitrated or nitrosated derivatives of monohydric alcohols.
2905.59.30	Dibromoneopentylglycol.
2905.59.90	Halogenated, sulfonated, nitrated or nitrosated derivatives of acyclic alcohols, nesoi.
2906.11.00	Menthol.
2906.12.00	Cyclohexanol, methylcyclohexanols and dimethylcyclohexanols.
2906.13.10	Inositols.
2906.13.50	Sterols.
2906.19.10	4,4′-Isopropylidenedicyclohexanol; and mixt. w/not less 90% stereoisomers of 2-isopropyl-5-methylcyclohexanol but n/o 30% any 1 stereoisomer.
2906.19.30	Terpineols.
2906.19.50	Other cyclanic, cyclenic or cycloterpenic alcohols and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2906.21.00	Benzyl alcohol.
2906.29.10	Phenethyl alcohol.
2906.29.20	Odoriferous or flavoring compounds of aromatic alcohols and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2906.29.30	1,1-Bis(4-chlorophenyl)-2,2,2-trichloroethanol (Dicofol); and p-nitrobenzyl alcohol.
2906.29.60	Other aromatic alcohols and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2907.11.00	Phenol (Hydroxybenzene) and its salts.
2907.12.00	Cresols and their salts.
2907.13.00	Octylphenol, nonylphenol and their isomers; salts thereof.
2907.15.10	alpha-Naphthol.
2907.15.30	2-Naphthol.
2907.15.60	Naphthols and their salts, other than alpha-Naphthol and 2-Naphthol.
2907.19.10	Alkylcresols.
2907.19.20	Alkylphenols.
2907.19.40	Thymol.
2907.19.61	2-t-Butyl ethyl phenol; and 6-t-butyl-2,4-xylenol and ylenols and their salts.
2907.19.80	Other monophenols.
2907.21.00	Resorcinol and its salts.
2907.22.10	Hydroquinone (Quinol) and its salts, photographic grade.
2907.22.50	Hydroquinone (Quinol) and its salts, other than photographic grade.
2907.23.00	4,4′-Isopropylidenediphenol (Bisphenol A, Diphenylolpropane) and its salts.
2907.29.05	Phenol-alcohols.
2907.29.10	Pyrogallic acid.
2907.29.15	4,4′-Biphenol.
2907.29.25	tert-Butylhydroquinone.
2907.29.90	Other polyphenols, nesoi.
2908.11.00	Pentachlorophenol (ISO).

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2908.19.05	2,2-Bis(4-hydroxyphenyl)-1,1,1,3,3,3-hexafluoropropane.
2908.19.10	6-Chloro-m-cresol [OH=1]; m-chlorophenol; and chlorothymol.
2908.19.15	3-Hydroxy-alpha,alpha,alpha-trifluorotoluene.
2908.19.20	Pentachlorophenol and its salts; and 2,4,5-trichlorophenol and its salts.
2908.19.25	Tetrabromobisphenol A.
2908.19.35	Derivatives of phenols or phenol-alcohols containing only halogen substituents and their salts described in add. U.S. note 3 to sec. VI.
2908.19.60	Other halogenated, sulfonated, nitrated or nitrosated derivatives of phenol or phenol-alcohols.
2908.91.00	Dinoseb (ISO) and its salts.
2908.92.00	4,6-Dinitro-o-cresol (DNOC (ISO)) and its salts.
2908.99.03	Specified derivatives of phenols or phenol-alcohols containing only sulfo groups, their salts and esters.
2908.99.06	4-Hydroxy-1-naphthalenesulfonic acid.
2908.99.09	1,8-Dihydroxynaphthalene-3,6-disulfonic acid and its sodium salt.
2908.99.12	Derivatives nesoi, of phenols or phenol-alcohols cont. only sulfo groups, their salts and esters, described in add. U.S. note 3 to section VI.
2908.99.15	Derivatives of phenol or phenol-alcohols containing only sulfo groups, their salts and esters, nesoi.
2908.99.20	p-Nitrophenol.
2908.99.25	Nitrophenols, except p-nitrophenol.
2908.99.33	Dinitro-o-cresols (other than 4,6-dinitro-o-cresol) and 4-nitro-m-cresol.
2908.99.40	Dinitrobutylphenol and its salts.
2908.99.80	Halogenated, sulfonated, nitrated or nitrosated derivatives of phenols or phenol-alcohols described in additional U.S. note 3 to section VI.
2908.99.90	Halogenated, sulfonated, nitrated or nitrosated derivatives of phenols or phenol-alcohols, nesoi.
2909.11.00	Diethyl ether.
2909.19.14	Methyl tertiay-butyl ether (MTBE).
2909.19.18	Ethers of acyc monohydric alcohols & deriv., nesoi.
2909.19.30	Triethylene glycol dichloride.
2909.19.60	Ethers of polyhydric alcohols and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2909.20.00	Cyclanic, cyclenic or cycloterpenic ethers and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2909.30.05	5-Chloro-2-nitroanisole; 6-chloro-3-nitro-p-dimethoxybenzene; and dimethyl diphenyl ether.
2909.30.07	Decabromodiphenyl oxide; and octabromodiphenyl oxide.
2909.30.09	Bis-(tribromophenoxy)ethane; pentabromodiphenyl oxide; and tetradecabromodiphenoxy benzene.
2909.30.10	6-tert-Butyl-3-methyl-2,4-dinitroanisole (Musk ambrette) and other artificial musks.
2909.30.20	Odoriferous or flavoring compounds of aromatic ethers and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2909.30.30	Pesticides, of aromatic ethers and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2909.30.40	Aromatic ethers and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi, described in add. U.S. note 3 to section VI.
2909.30.60	Other aromatic ethers and their halogenated, sulfonated, nitrated, or nitrosated derivatives, nesoi.
2909.41.00	2,2′-Oxydiethanol (Diethylene glycol, Digol).
2909.43.00	Monobutyl ethers of ethylene glycol or of diethylene glycol.
2909.44.01	Monoalkyl ethers of ethylene glycol or of diethylene glycol.
2909.49.05	Guaifenesoin.
2909.49.10	Other aromatic ether-alcohols, their halogenated, sulfonated, nitrated or nitrosated derivatives described in add. U.S. note 3 to section VI.
2909.49.15	Aromatic ether-alcohols and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2909.49.20	Nonaromatic glycerol ethers.
2909.49.30	Di-pentaerythritol having a purity of 94% or more by weight.
2909.49.60	Other non-aromatic ether-alcohols and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2909.50.10	4-Ethylguaiacol.
2909.50.20	Guaiacol and its derivatives.
2909.50.40	Odoriferous or flavoring compounds of ether-phenols, ether-alcohol-phenols & their halogenated, sulfonated, nitrated, nitrosated derivatives.
2909.50.45	Ether-phenols, ether-alcohol-phenols & their halogenated, sulfonated, nitrated, nitrosated derivatives nesoi, in add. U.S. note 3 to sec. VI.
2909.50.50	Ether-phenols, ether-alcohol-phenols and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2909.60.10	Aromatic alcohol, ether and ketone peroxides and their halogenated, sulfonated, nitrated, nitrosated derivatives, in add. U.S. note 3 sec. VI.
2909.60.20	Aromatic alcohol peroxides, ether peroxides, ketone peroxides and their halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2909.60.50	Nonaromatic alcohol, ether and ketone peroxides and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2910.10.00	Oxirane (Ethylene oxide).
2910.20.00	Methyloxirane (Propylene oxide).
2910.30.00	1-Chloro-2,3-epoxypropane (Epichlorohydrin).
2910.40.00	Dieldrin.
2910.50.00	Endrin.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2910.90.10	Butylene oxide.
2910.90.20	Aromatic epoxides, epoxyalcohols, epoxyphenols and epoxyethers, with a three-membered ring, and their derivatives, nesoi.
2910.90.91	Other nonaromatic epoxides, epoxyalcohols and epoxyethers, with a three-membered ring and their halogenated, sulfonated, nitrated or nitrosated deriv.
2911.00.10	1,1-Bis-(1-methylethoxy)cyclohexane.
2911.00.50	Acetals and hemiacetals, whether or not with other oxygen function, and their halogenated, sulfonated, nitrated or nitrosated derivatives.
2912.11.00	Methanal (Formaldehyde).
2912.12.00	Ethanal (Acetaldehyde).
2912.19.10	Citral.
2912.19.20	Odoriferous or flavoring compounds of acyclic aldehydes without other oxygen function, nesoi.
2912.19.25	Butanal (Butyraldehyde, normal isomer).
2912.19.30	Glyoxal.
2912.19.40	Isobutanal.
2912.19.50	Acyclic aldehydes without other oxygen function, nesoi.
2912.21.00	Benzaldehyde.
2912.29.10	Phenylacetaldehyde.
2912.29.30	3,4-Dimethylbenzaldehyde; paraldehyde, USP grade; and p-tolualdehyde.
2912.29.60	Other cyclic aldehydes without other oxygen function.
2912.41.00	Vanillin (4-Hydroxy-3-methoxybenzaldehyde).
2912.42.00	Ethylvanillin (3-Ethoxy-4-hydroxy-benzaldehyde).
2912.49.10	p-Anisaldehyde.
2912.49.15	P-Hydroxybenzaldehyde.
2912.49.26	Other aromatic aldehyde-alcohols, aldehyde-ethers, aldehyde-phenols and aldehydes with other oxygen function.
2912.49.55	Hydroxycitronellal.
2912.49.60	Nonaromatic aldehyde-alcohols, other than hydroxycitronellal.
2912.49.90	Nonaromatic aldehyde-ethers, aldehyde-phenols and aldehydes with other oxygen function, nesoi.
2912.50.10	Metaldehyde from cyclic polymers of aldehydes.
2912.50.50	Cyclic polymers of aldehydes, other than Metaldehyde.
2912.60.00	Paraformaldehyde.
2913.00.20	4-Fluoro-3-phenoxybenzaldehyde.
2913.00.40	Aromatic halogenated, sulfonated, nitrated or nitrosated derivatives of product of heading 2912.
2913.00.50	Nonaromatic halogenated, sulfonated, nitrated or nitrosated derivatives of products of heading 2912.
2914.11.10	Acetone, derived in whole or in part from cumene.
2914.11.50	Acetone, not derived in whole or in part from cumene.
2914.12.00	Butanone (Methyl ethyl ketone).
2914.13.00	4-Methylpentan-2-one (Methyl isobutyl ketone).
2914.19.00	Acyclic ketones without other oxygen function, nesoi.
2914.22.10	Cyclohexanone.
2914.22.20	Methylcyclohexanone.
2914.23.00	Ionones and methylionones.
2914.29.10	Isophorone.
2914.29.30	Natural camphor.
2914.29.31	Synthetic camphor.
2914.29.50	Cyclanic, cyclenic or cycloterpenic ketones without other oxygen function, nesoi.
2914.31.00	Phenylacetone (Phenylpropan-2-one).
2914.39.10	7-Acetyl-1,1,3,4,4,6-hexamethyltetrahydronaphthalene; 1-(2-Naphthalenyl)ethanone; and 6-Acetyl-1,1,2,3,3,5-hexamethylindan.
2914.39.90	Aromatic ketones without other oxygen function, nesoi.
2914.40.10	4-Hydroxy-4-methylpentan-2-one (Diacetone alcohol).
2914.40.20	1,2,3-Indantrione monohydrate (Ninhydrin).
2914.40.40	Aromatic ketone-alcohols and ketone-aldehydes, nesoi.
2914.40.60	1,3-Dihydroxyacetone.
2914.40.90	Nonaromatic ketone-alcohols and ketone-aldehydes, nesoi.
2914.50.10	5-Benzoyl-4-hydroxy-2-methoxy-benzenesulfonic acid.
2914.50.30	Aromatic ketone-phenols and ketones with other oxygen function.
2914.50.50	Nonaromatic ketone-phenols and ketones with other oxygen function.
2914.61.00	Anthraquinone.
2914.69.10	Photographic chemicals of quinones.
2914.69.60	1,4-Dihydroxyanthraquinone; and 2-ethylanthraquinone.
2914.69.90	Quinones, nesoi.
2914.71.00	Halogenated, sulfonated, nitrated or nitrosated derivatives: chlordecone (ISO).
2914.79.10	2,3-dichloro-1,4-naphthoquinone and other artificial musks.
2914.79.30	Anthraquinone disulfonic acid, sodium salt; and 4-(3,4-Dichlorophenyl)-1-tetralone.
2914.79.40	Other halogenated, sulfonated, nitrated, etc derivatives of aromatic ketones and quinones whether or not with other oxygen function.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2914.79.60	1-Chloro-5-hexanone.
2914.79.90	Other halogenated, sulfonated, nitrated or nitrosated derivatives of nonaromatic ketones and quinones whether or not with other ogygen function.
2915.11.00	Formic acid.
2915.12.00	Salts of formic acid.
2915.13.10	Aromatic esters of formic acid.
2915.13.50	Nonaromatic esters of formic acid.
2915.21.00	Acetic acid.
2915.24.00	Acetic anhydride.
2915.29.10	Cupric acetate monohydrate.
2915.29.20	Sodium acetate.
2915.29.30	Cobalt acetates.
2915.29.50	Other salts of acetic acid.
2915.31.00	Ethyl acetate.
2915.32.00	Vinyl acetate.
2915.33.00	n-Butyl acetate.
2915.36.00	Dinoseb (ISO) acetate.
2915.39.10	Benzyl acetate.
2915.39.20	Odoriferous or flavoring compounds of aromatic esters of acetic acid, other than benzyl acetate.
2915.39.31	Aromatic esters of acetic acid described in additional U.S. note 3 to section VI.
2915.39.35	Aromatic esters of acetic acid, nesoi.
2915.39.40	Linalyl acetate.
2915.39.45	Odoriferous or flavoring compounds of nonaromatic esters of acetic acid, nesoi.
2915.39.47	Acetates of polyhydric alcohols or of polyhydric alcohol ethers.
2915.39.60	Bis(bromoacetoxy)butene.
2915.39.70	Isobutyl acetate.
2915.39.80	2-Ethoxyethyl acetate (Ethylene glycol, monoethyl ether acetate).
2915.39.90	Other non-aromatic esters of acetic acid.
2915.40.10	Chloroacetic acids.
2915.40.20	Aromatic salts and esters of chlorocetic acids, described in additional U.S. note 3 to section VI.
2915.40.30	Aromatic salts and esters of chlorocetic acids, nesoi.
2915.40.50	Nonaromatic salts and esters of chlorocetic acids, nesoi.
2915.50.10	Propionic acid.
2915.50.20	Aromatic salts and esters of propionic acid.
2915.50.50	Nonaromatic salts and esters of propionic acid.
2915.60.10	Aromatic salts and esters of butyric acids and valeric acids.
2915.60.50	Butyric acids, valeric acids, their nonaromatic salts and esters.
2915.70.01	Palmitic acid, stearic acid, their salts and esters.
2915.90.10	Fatty acids of animal or vegetable origin, nesoi.
2915.90.14	Valproic acid.
2915.90.18	Saturated acyclic monocarboxylic acids, nesoi.
2915.90.20	Aromatic anhydrides, halides, peroxides and peroxyacids, of saturated acyclic monocarboxylic acids, and their derivatives, nesoi.
2915.90.50	Nonaromatic anhydrides, halides, peroxides and peroxyacids, of saturated acyclic monocarboxylic acids, and their derivatives, nesoi.
2916.11.00	Acrylic acid and its salts.
2916.12.10	Aromatic esters of acrylic acid.
2916.12.50	Nonaromatic esters of acrylic acid.
2916.13.00	Methacrylic acid and its salts.
2916.14.10	Dicyclopentenyloxyethyl methacrylate.
2916.14.20	Other esters of methacrylic acid.
2916.15.10	Oleic, linoleic or linolenic acids.
2916.15.51	Salts and esters of oleic, linoleic or linolenic acids.
2916.16.00	Binapacryl (ISO).
2916.19.10	Potassium sorbate.
2916.19.20	Sorbic acid.
2916.19.30	Unsaturated acyclic monocarboxylic acids, nesoi.
2916.19.50	Unsaturated acyclic monocarboxylic acid anhydrides, halides, peroxides, peroxyacids and their derivatives, nesoi.
2916.20.10	Tefluthrin.
2916.20.50	Cyclanic, cyclenic or cycloterpenic monocarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and their derivatives.
2916.31.11	Benzoic acid and its salts.
2916.31.20	Odoriferous or flavoring compounds of benzoic acid esters.
2916.31.30	Benzoic acid esters, except odoriferous or flavoring compounds, described in additional U.S. note 3 to section VI.
2916.31.50	Benzoic acid esters, nesoi.
2916.32.10	Benzoyl peroxide.
2916.32.20	Benzoyl chloride.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2916.34.10	Phenylacetic acid (alpha-Toluic acid).
2916.34.15	Odoriferous or flavoring compounds of phenylacetic acid and its salts.
2916.34.25	Phenylacetic acid salts, nesoi, described in additional U.S. note 3 to section VI.
2916.34.55	Phenylacetic acid salts, nesoi.
2916.39.03	Benzoic anhydride; tert-butyl peroxybenzoate; p-nitrobenzoyl chloride; 2-nitro-m-toluic acid; and 3-nitro-o-toluic acid.
2916.39.04	Specified derivatives of benzoic and toluic acids.
2916.39.06	Cinnamic acid.
2916.39.08	4-Chloro-3-nitrobenzoic acid.
2916.39.12	4-Chloro-3,5-dinitrobenzoic acid and its esters.
2916.39.15	Ibuprofen.
2916.39.16	4-Chlorobenzoic acid.
2916.39.17	2,2-Dichlorophenylacetic acid ethyl ester and m-toluic acid.
2916.39.21	Odoriferous or flavoring compounds of aromatic monocarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and derivatives.
2916.39.46	Aromatic monocarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and derivatives described in add'l U.S. note 3 to section VI.
2916.39.77	Phenylacetic acid esters, nesoi.
2916.39.79	Other aromatic monocarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and their derivatives.
2917.11.00	Oxalic acid, its salts and esters.
2917.12.10	Adipic acid.
2917.12.20	Plasticizers of adipic acid salts and esters.
2917.12.50	Adipic acid salts and esters, nesoi.
2917.13.00	Azelaic acid, sebacic acid, their salts and esters.
2917.14.10	Maleic anhydride derived in whole or in part from benzene or other aromatic hydrocarbons.
2917.14.50	Maleic anhydride, except derived in whole or in part from benzene or other aromatic hydrocarbons.
2917.19.10	Ferrous fumarate.
2917.19.15	Fumaric acid, derived in whole or in part from aromatic hydrocarbons.
2917.19.17	Fumaric acid except derived in whole or in part from aromatic hydrocarbons.
2917.19.20	Specified acyclic polycarboxylic acids and their derivatives, described in additional U.S. note 3 to section VI.
2917.19.23	Maleic acid.
2917.19.27	Succinic acid, glutaric acid, and their derivatives, and derivatives of adipic, fumeric and maleic acids, nesoi.
2917.19.30	Ethylene brassylate.
2917.19.35	Malonic acid.
2917.19.40	Acyclic polycarboxylic acids, derived from aromatic hydrocarbons, and their derivatives, nesoi.
2917.19.70	Acyclic polycarboxylic acids and derivative (excluding plasticizers).
2917.20.00	Cyclanic, cyclenic or cycloterpenic polycarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and their derivatives.
2917.32.00	Dioctyl orthophthalates.
2917.33.00	Dinonyl or didecyl orthophthalates.
2917.34.01	Esters of orthophthalic acid, nesoi.
2917.35.00	Phthalic anhydride.
2917.36.00	Terephthalic acid and its salts.
2917.37.00	Dimethyl terephthalate.
2917.39.04	1,2,4-Benzenetricarboxylic acid,1,2-dianhydride(trimellitic anhydride); naphthalic anhydride; phthalic acid; & 4-sulfo-1,8-naphthalic anhydride.
2917.39.08	Naphthalic anhydride.
2917.39.12	4,4′-(Hexafluoroisopropyl-indene)bis(phthalic anhydride).
2917.39.15	Isophthalic acid.
2917.39.17	Tetrabromophthalic anhydride.
2917.39.20	Plasticizers of aromatic polycarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and their derivatives.
2917.39.30	Aromatic polycarboxylic acids, their anhydrides, halides, peroxides, peroxyacids and their derivatives nesoi, in add. U.S. note 3 to sec. VI.
2917.39.70	Other aromatic polycarboxylic acids and their derivatives (excluding those described in additional U.S. note 3 to section VI.
2918.11.10	Lactic acid.
2918.11.51	Salts and esters of lactic acid.
2918.12.00	Tartaric acid.
2918.13.10	Potassium antimony tartrate (Tartar emetic).
2918.13.20	Potassium bitartrate (Cream of tartar).
2918.13.30	Potassium sodium tartrate (Rochelle salts).
2918.13.50	Salts and esters of tartaric acid, nesoi.
2918.14.00	Citric acid.
2918.15.10	Sodium citrate.
2918.15.50	Salts and esters of citric acid, except sodium citrate.
2918.16.10	Gluconic acid.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2918.16.50	Salts and esters of gluconic acid.
2918.17.00	2,2-Diphenyl-2-hydroxyacetic acid (benzilic acid).
2918.18.00	Chlorobenzilate (ISO).
2918.19.11	Benzilic acid, methyl ester.
2918.19.12	Phenylglycolic acid (Mandelic acid).
2918.19.15	Phenylglycolic (Mandelic) acid salts and esters.
2918.19.20	Aromatic carboxylic acids with alcohol function, w/o other oxygen functions, and their derivatives, described in add. U.S. note 3 to sec. VI.
2918.19.31	Aromatic carboxylic acids with alcohol function, without other oxygen functions, and their derivatives, nesoi.
2918.19.60	Malic acid.
2918.19.90	Nonaromatic carboxylic acids with alcohol function, without other oxygen function, and their derivatives, nesoi.
2918.21.10	Salicylic acid and its salts, suitable for medicinal use.
2918.21.50	Salicylic acid and its salts, not suitable for medicinal use.
2918.23.10	Salol (Phenyl salicylate) suitable for medicinal use.
2918.23.20	Odoriferous or flavoring compounds of other esters of salicyclic acid and their salts, nesoi.
2918.23.30	Esters of salicylic acid and their salts, described in additional U.S. note 3 to section VI.
2918.23.50	Esters of salicylic acid and their salts, nesoi.
2918.29.04	2,3-Cresotic acid; m-hydroxybenzoic acid; 2-hydroxybenzoic acid, calcium salt; and other specified carboxylic acids w/phenol function.
2918.29.06	1,6-hexanediol-bis(3,5-dibutyl-4-hydroxyphenyl)propionate.
2918.29.08	m-Hydroxybenzoic acid.
2918.29.20	Gentisic acid; and hydroxycinnamic acid and its salts.
2918.29.22	p-Hydroxybenzoic acid.
2918.29.25	3-Hydroxy-2-naphthoic acid.
2918.29.30	Gallic acid.
2918.29.39	4,4-Bis(4-hydroxyphenyl)-pentanoic acid; and 3,5,6-triclorosalicylic acid.
2918.29.65	Carboxylic acids with phenol function but w/o other oxygen function, described in add'l. U.S. note 3 to section VI.
2918.29.75	Other carboxylic acids w/phenol function but w/o other oxygen function & their derivatives (excluding goods of add. U.S. note 3 to section VI).
2918.30.10	1-Formylphenylacetic acid, methyl ester.
2918.30.15	2-Chloro-4,5-difluoro-beta-oxobenzenepropanoic acid, ethyl ester; and ethyl 2-keto-4-phenylbutanoate.
2918.30.25	Aromatic carboxylic acids w/aldehyde or ketone function but w/o other oxygen function & their deriv desc. in add U.S. note 3 to sec VI, nesoi.
2918.30.30	Aromatic carboxylic acids with aldehyde or ketone function, but without other oxygen function, and derivatives, nesoi.
2918.30.70	Dimethyl acetyl succinate; oxalacetic acid diethyl ester sodium salt; 4,4,4-trifluoro-3-oxobutanoic acid, both ethyl & methyl ester versions.
2918.30.90	Non-aromatic carboxylic acids w/aldehyde or ketone function but w/o other oxygen func. their anhydrides, halides, peroxides, etc derivatives.
2918.91.00	2, 4, 5–T (ISO) (2, 4, 5-trichlorophenoxyacetic acid), its salts and esters.
2918.99.05	p-Anisic acid; clofibrate and 3-phenoxybenzoic acid.
2918.99.06	1-Hydroxy-6-octadecyloxy-2-naphthalenccarboxylic acid; and 1-hydroxy-6-docosyloxy-2-naphthalene carboxylic acid.
2918.99.18	4-(4-Chloro-2-methyl-phenoxy)butyric acid; p-chlorophenoxyacetic acid; and 2-(2,4-dichlorophenoxy)propionic acid.
2918.99.20	Aromatic pesticides, derived from carboxylic acids with additional oxygen function, and their derivatives, nesoi.
2918.99.35	Odoriferous or flavoring compounds of carboxylic acids with additional oxygen function, and their derivatives, nesoi.
2918.99.43	Aromatic carboxylic acids with add'l oxygen function and their anhydrides, halide, etc deriv described in add U.S. note 3 to sect VI, nesoi.
2918.99.47	Other aromatic carboxylic acids with add'l oxygen function and their anhydrides, halide, etc deriv (exclud goods in add U.S. note 3 to sec VI).
2918.99.50	Nonaromatic carboxylic acids with additional oxygen function, and their derivatives, nesoi.
2919.10.00	Tris (2,3-dibromopropyl phosphate).
2919.90.15	Triphenyl phosphate plasticizers.
2919.90.25	Other aromatic plasticizers.
2919.90.30	Aromatic phosphoric esters and their salts, including lactophosphates, and their derivatives, not used as plasticizers.
2919.90.50	Nonaromatic phosphoric esters and their salts, including lactophosphates, and their derivatives.
2920.11.00	Parathion (ISO) and parathion-methyl (ISO) (methyl-parathion).
2920.19.10	O,O-Dimethyl-O-(4-nitro-m-tolyl)-phosphorothioate (Fenitrothion).
2920.19.40	Other aromatic thiophosphoric esters (phosphorothioates) and their salts; their halogenated, sulfonated, nitrated or nitrosated derivatives.
2920.19.50	Nonaromatic phosphorothioates, their salts and halogenated, sulfonated, nitrated or nitrosated derivatives, nesoi.
2920.21.00	Dimethyl phosphite.
2920.22.00	Diethyl phosphite.
2920.23.00	Trimethyl phosphite.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2920.24.00	Triethyl phosphite.
2920.29.00	Other phosphite esters and their salts; their haolgenated, sulfonated, nitrated or nitrosated derivatives.
2920.30.00	Endosulfan (ISO).
2920.90.10	Aromatic pesticides of esters of other inorganic acids (excluding hydrogen halides), their salts and their derivatives.
2920.90.20	Aromatic esters of other inorganic acids (excluding hydrogen halides) their salts and their derivatives, nesoi.
2920.90.51	Nonaromatic esters of inorganic acids of nonmetals and their salts and derivatives, excluding esters of hydrogen halides, nesoi.
2921.11.00	Methylamine, di- or trimethylamine, and their salts.
2921.12.01	2-(N,N-Dimethylamino)ethyl chloride hydrochloride.
2921.13.00	2-(N,N-Diethylamino)ethyl chloride hydrochloride.
2921.14.00	2-(N,N,-Diisopropylamino)ethyl chloride hydrochloride.
2921.19.11	Mono- and triethylamines; mono-, di-, and tri(propyl- and butyl-) monoamines; salts of any of the foregoing.
2921.19.31	3-Amino-3-methyl-1-butyne; (Dimethylamino)isopropyl chloride hydrochloride.
2921.19.61	N,N-Dialkyl (methyl, ethyl, N-Propyl or Isopropyl)-2-Chloroethylamines and their protonated salts; Acylcic monoamines and their derivatives, nesoi.
2921.21.00	Ethylenediamine and its salts.
2921.22.05	Hexamethylenediamine adipate (Nylon salt).
2921.22.10	Hexamethylenediamine and its salts (except Nylon salt), derived in whole or in part from adipic acid.
2921.22.50	Hexamethylenediamine and its salts (except Nylon salt), not derived in whole or in part from adipic acid.
2921.29.00	Acyclic polyamines, their derivatives and salts, other than ethylenediamine or hexamethylenediamine and their salts.
2921.30.05	1,3-Bis(aminoethyl)cyclohexane.
2921.30.10	Cyclanic, cyclenic, cycloterpenic mono- or polyamines, derivatives and salts, from any aromatic compound desc in add U.S. note 3, sec. VI.
2921.30.30	Cyclanic, cyclenic, cycloterpenic mono- or polyamines and their derivative, deriv from any aromatic cmpd (excl goods in add U.S. note 3 sec VI.
2921.30.50	Cyclanic, cyclenic or cycloterpenic mono- or polyamines, and their derivatives and salts, from any nonaromatic compounds.
2921.41.10	Aniline.
2921.41.20	Aniline salts.
2921.42.10	N,N-Dimethylaniline.
2921.42.15	N-Ethylaniline and N,N-diethylaniline.
2921.42.16	2,4,5-Trichloroaniline.
2921.42.18	o-Aminobenzenesulfonic acid; 6-chlorometanilic acid; 2-chloro-5-nitroaniline; 4-chloro-3-nitroaniline; dichloroanilines; and other specified.
2921.42.21	Metanilic acid.
2921.42.22	Sulfanilic acid.
2921.42.23	3,4-Dichloroaniline.
2921.42.36	m-Chloroaniline; 2-chloro-4-nitroaniline; 2,5-dicholoraniline-4-sulfonic acid & its monosodium salt; & other specified aniline derivatives.
2921.42.55	Fast color bases of aniline derivatives and their salts.
2921.42.65	Aniline derivatives and their salts of products in additional U.S. note 3 to section VI.
2921.42.90	Other aniline derivatives and their salts.
2921.43.04	3-Chloro-o-toluidine; and 6-chloro-o-toluidine.
2921.43.08	4-Chloro-o-toluidine hydrochloride; 5-chloro-o-o-toluidine; 6-chloro-2-toluidine-sulfonic acid; 4-chloro-a,a,a-trifluoro-o-toluidine;& other.
2921.43.15	alpha,alpha,alpha-Trifluoro-2,6-dinitro-N,N-dipropyl-p-toluidine (Trifluralin).
2921.43.19	alpha,alpha,alpha-Trifluoro-o-toluidine; alpha,alpha,alpha-trifluoro-6-chloro-m-toluidine.
2921.43.22	N-Ethyl-N-(2-methyl-2-propenyl)-2,6-dinitro-4-(trifluoromethyl)benzenamine.
2921.43.24	2-Amino-5-chloro-4-ethyl-benzenesulfonic acid; 2-amino-5-chloro-p-toluenesulfonic acid; p-nitro-o-toluidine; and 3-(trifluoromethyl)aniline.
2921.43.40	Toluidines and their derivatives; salts thereof; described in additional U.S. note 3 to section VI.
2921.43.90	Other toluidines and their derivatives; and salts thereof, nesoi.
2921.44.05	4,4′-Bis(alpha,alpha-dimethlbenzyl)diphenylamine; and N-nitrosodiphenylamine.
2921.44.10	Nitrosodiphenylamine.
2921.44.20	Diphenylamine and its derivatives (except nitrodiphenylamine); salts thereof, described in additional U.S. note 3 to section VI.
2921.44.70	Diphenylamine and its derivatives; salts thereof; excluding goods in additional U.S. note 3 to section VI.
2921.45.10	7-Amino-1,3-naphthalenedisulfonic acid, specified naphthalenesulfonic acids and their salts; N-phenyl-2-napthylamine.
2921.45.20	Specified aromatic monoamines and their derivatives; salts thereof.
2921.45.25	Mixture of 5- & 8-amino-2-naphthalenesulfonic acid;2-naphthalamine-o-sulfonic acid;& o-naphthionic acid (1-amino-2-naphthalenesulfonic acid).
2921.45.60	Aromatic monoamines and their derivatives and salts described in additional U.S. note 3 to section VI, nesoi.
2921.45.90	Aromatic monoamines and their derivatives and salts thereof nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2921.49.10	4-Amino-2-stilbenesulfonic acid and its salts, p-ethylaniline; 2,4,6-trimethylaniline (Mesidine); and specified xylidines.
2921.49.15	m-Nitro-p-toluidine.
2921.49.45	Aromatic monoamines and their derivatives nesoi; salts thereof, described in additional U.S. note 3 to section VI.
2921.49.50	Aromatic monoamines and their derivatives and salts thereof, nesoi.
2921.51.10	4-Amino-2-(N,N-diethylamino)toluene hydrochloride; m- and o-phenylenediamine; toluene-2,4- and -2,5-diamine; and toluene-2,5-diamine sulfate.
2921.51.20	Photographic chemicals of o-, m-, p-phenylenediamine, diaminotoluenes, and their derivatives, and salts thereof.
2921.51.30	o-, m-, p-Phenylenediamine, diaminotoluenes, and their derivatives, and salts thereof, described in additional U.S. note 3 to section VI.
2921.51.50	o-, m-, p-Phenylenediamine, and diaminotoluenes and their derivatives, and salts thereof, nesoi.
2921.59.04	1,8-diaminonaphthalene (1,8-naphthalenediamino).
2921.59.08	5-Amino-2-(p-aminoanilino)benzenesulfonic acid; 4,4-diamino-3-biphenylsulfonic acid; 3,3-dimethylbenzidine (o-tolidine); & other specified.
2921.59.17	4,4′-Benzidine-2,2′-disulfonic acid; 1,4-diaminobenzene-2-sulfonic acid; 4,4′-methylenebis-(2,6-diethylaniline); m-xylenediamine; and 1 other.
2921.59.20	4,4′-Diamino-2,2′-stilbenedisulfonic acid.
2921.59.30	4,4′-Methylenedianiline.
2921.59.40	Aromatic polyamines and their derivatives and salts thereof, described in additional U.S. note 3 to section VI.
2921.59.80	Aromatic polyamines and their derivatives; salts thereof nesoi.
2922.11.00	Monoethanolamine and its salts.
2922.12.00	Diethanolamine and its salts.
2922.15.00	Triethanolamine.
2922.16.00	Diethylammonium perfluorooctane sulfonate.
2922.17.00	Methyldiethanolamine and ethyldiethanolamine.
2922.18.00	2-(N,N-Diisopropylamino)ethanol.
2922.21.10	1-Amino-8-hydroxy-3,6-naphthalenedisulfonic acid; and other specified aminohydroxynaphthalenesulfonic acids and their salts.
2922.21.25	1-Amino-8-hydroxy-4,6-naphthalenedisulfonic acid, monosodium salts.
2922.21.40	Aminohydroxynaphthalene sulfonic acids and their salts of products described in additional U.S. note 3 to section VI.
2922.21.50	Aminohydroxynaphthalene sulfonic acids and their salts, nesoi.
2922.29.03	o-Anisidine; p-anisidine; and p-phenetidine.
2922.29.06	m-Nitro-p-anisidine and m-nitro-o-anisidine as fast color bases.
2922.29.08	m-Nitro-p-anisidine and m-nitro-o-anisidine, nesoi.
2922.29.10	2-Amino-6-chloro-4-nitrophenol and other specified amino-naphthols and amino-phenols, their ethers and esters; salts thereof.
2922.29.13	o-Aminophenol; and 2,2-bis-[4-(4-aminophenoxy)phenyl]propane.
2922.29.15	m-Diethylaminophenol; m-dimethylaminophenol; 3-ethylamino-p-cresol; and 5-methoxy-m-phenylenediamine.
2922.29.20	4-Chloro-2,5-dimethoxyaniline; and 2,4-dimethoxyaniline.
2922.29.26	Amino-naphthols and other amino-phenols and their derivatives used as fast color bases.
2922.29.27	Drugs of amino-naphthols and -phenols, their ethers and esters, except those cont. more than one oxygen function; salts thereof, nesoi.
2922.29.29	Photographic chemicals of amino-naphthols and -phenols, their ethers/esters, except those cont. more than one oxygen function; salts, nesoi.
2922.29.61	Amino-naphthols and other amino-phenols and their derivatives of products described in add'l U.S. note 3 to section VI.
2922.29.81	Amino-naphthols and other amino-phenols; their ethers, esters & salts (not containing more than one oxygen function) thereof nesoi.
2922.39.05	1-Amino-2,4-dibromoanthraquinone; and 2-Amino-5-chlorobenzophenone.
2922.39.10	2′-Aminoacetophenone & other specified aromatic amino-aldehydes, -ketones and -quinones, other than those with more than one oxygen function.
2922.39.14	2-Aminoanthraquinone.
2922.39.17	1-Aminoanthraquinone.
2922.39.25	Aromatic amino-aldehydes, -ketones and -quinones, other than those with more than one oxygen function; salts; desc in add U.S. note 3 sec VI.
2922.39.45	Aromatic amino-aldehydes, -ketones and -quinones, other than those with more than one oxygen function; salts thereof; nesoi.
2922.39.50	Nonaromatic amino-aldehydes, -ketones and -quinones, other than those with more than one kind of oxygen function, salts thereof; nesoi.
2922.42.10	Monosodium glutamate.
2922.42.50	Glutamic acid and its salts, other than monosodium glutamate.
2922.43.10	Anthranilic acid and its salts, described in additional U.S. note 3 to section VI.
2922.43.50	Anthranilic acid and its salts, nesoi.
2922.49.05	(R)-alpha-Aminobenzeneacetic acid; and 2-amino-3-chlorobenzoic acid, methyl ester.
2922.49.10	m-Aminobenzoic acid, technical; and other specified aromatic amino-acids and their esters, except those with more than one oxygen function.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2922.49.26	Aromatic amino-acids drugs and their esters, not containing more than one kind of oxygen function, nesoi.
2922.49.30	Aromatic amino-acids and their esters, excl. those with more than one oxygen function; salts; described in add. U.S. note 3 to sect VI.
2922.49.37	Aromatic amino-acids and their esters, not contng more than 1 kind of oxygen function (excluding goods in add U.S. note 3 to sec VI), nesoi.
2922.49.43	Glycine (aminoacetic acid).
2922.49.49	Nonaromatic amino-acids, other than those containing more than one kind of oxygen function, other than glycine.
2922.49.60	3-Aminocrotonic acid, methyl ester; and (R)-alpha-amino-1,4-cyclohexadiene-1-acetic acid.
2922.49.80	Non-aromatic esters of amino-acids, other than those containing more than one kind of oxygen function; salts thereof.
2923.10.00	Choline and its salts.
2923.20.10	Purified egg phospholipids, pharmaceutical grade meeting requirements of the U.S. FDA for use in intravenous fat emulsion.
2923.20.20	Lecithins and other phosphoaminolipids, nesoi.
2923.30.00	Tetraethylammonium perfluorooctane sulfonate.
2923.40.00	Didecylmethylammonium perfluorooctane sulfonate.
2923.90.01	Quaternary ammonium salts and hydroxides, whether or not chemically defined, nesoi.
2924.12.00	Fluoroacetamide (ISO), monocrotophos (ISO) and phosphamidon (ISO).
2924.19.11	Acyclic amides (including acyclic carbamates).
2924.19.80	Acyclic amide derivatives; salts thereof; nesoi.
2924.21.04	3-(p-Chlorophenyl)-1,1-dimethylurea (Monuron).
2924.21.08	1,1-Diethyl-3-(alpha,alpha,alpah-trifluoro-m-tolyl)urea (Fluometuron).
2924.21.12	1-(2-Methylcyclohexyl)-3-phenylurea.
2924.21.16	Aromatic ureines and their derivatives pesticides, nesoi.
2924.21.18	sym-Diethyldiphenylurea.
2924.21.20	Aromatic ureines and their derivatives; salts thereof; described in additional U.S. note 3 to section VI.
2924.21.45	Aromatic ureines and their derivatives; salts thereof, nesoi.
2924.21.50	Nonaromatic ureines and their derivatives; and salts thereof.
2924.23.10	2-Acetamidobenzoic acid.
2924.23.70	2-Acetamidobenzoic acid salts described in additional U.S. note 3 to section VI.
2924.23.75	2-Acetamidobenzoic acid salts, nesoi.
2924.25.00	Alachlor (ISO).
2924.29.01	p-Acetanisidide; p-acetoacetatoluidide; 4′-amino-N-methylacetanilide; 2,5-dimethoxyacetanilide; and N-(7-hydroxy-1-naphthyl)acetamide.
2924.29.03	3,5-Dinitro-o-toluamide.
2924.29.10	Acetanilide; N-acetylsulfanilyl chloride; aspartame; and 2-methoxy-5-acetamino-N,N-bis(2-acetoxyethyl)aniline.
2924.29.20	2-Acetamido-3-chloroanthraquinone; o-acetoacetaidide; o-acetoacetotoluidide; 2,4-acetoacetoxylidide; and 1-amino-5-benzamidoanthraquinone.
2924.29.23	4-Aminoacetanilide; 2–2-oxamidobis[ethyl-3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate]; and other specified cyclic amide chemicals.
2924.29.26	3-Aminomethoxybenzanilide.
2924.29.28	N-[[(4-Chlorophenyl)amino]carbonyl]difluorobenzamide; and 3,5-dichloro-N-(1,1-dimethyl-2-propynyl)benzamide (pronamide).
2924.29.31	4-Acetamido-2-aminophenol; p-acetaminobenzaldehyde; acetoacetbenzylamide; p-acetoacetophenetidide; N-acetyl-2,6-xylidine; & other specified.
2924.29.33	3-Hydroxy-2-naphthanilide; 3-hydroxy-2-naphtho-o-toluidide; 3-hydroxy-2-naphtho-o-anisidine; 3-hydroxy-2-naphtho-o-phenetidide; & other.
2924.29.43	3-Ethoxycarbonylaminophenyl-N-phenylcarbamate (desmedipham); and Isopropyl-N-(3-chlorophenyl)carbamate (CIPC).
2924.29.47	Other cyclic amides used as pesticides.
2924.29.65	5-Bromoacetyl-2-salicylamide.
2924.29.71	Aromatic cyclic amides and their derivatives of products described in additional U.S. note 3 to section VI, nesoi.
2924.29.77	Aromatic cyclic amides (incl cyclic carbamates) and their derivatives and salts thereof, nesoi.
2924.29.80	2,2-Dimethylcyclopropylcarboxamide.
2924.29.95	Other nonaromatic cyclic amides and their derivatives; salts thereof; nesoi.
2925.11.00	Saccharin and its salts.
2925.19.10	Ethylenebistetrabromophthalimide.
2925.19.30	Bis(o-tolyl)carbodiimide; and 2,2,6,6-tetraisopropyldiphenylcarbodiimide.
2925.19.42	Other aromatic imides and their derivatives; salts thereof; nesoi.
2925.19.70	N-Chlorosuccinimide; and N,N-ethylenebis(5,6-dibromo-2,3-norbornanedicarbooximide.
2925.19.91	Other non-aromatic imides and their derivatives.
2925.21.00	Chlordimeform (ISO).
2925.29.10	N′-(4-Chloro-o-tolyl)-N,N-dimethylformamidine; bunamidine hydrochloride; and pentamidine.
2925.29.18	N,N′-diphenylguanidine; 3-dimethylaminomethyleneiminophenol hydrochloride; 1,3-di-o-tolyguandidine; and one other specified chemical.
2925.29.20	Aromatic drugs of imines and their derivatives, nesoi.
2925.29.60	Aromatic imines and their derivatives; salts thereof (excluding drugs); nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2925.29.70	Tetramethylguanidine.
2925.29.90	Non-aromatic imines and their derivatives; salts thereof.
2926.10.00	Acrylonitrile.
2926.20.00	1-Cyanoguanidine (Dicyandiamide).
2926.30.10	Fenproporex (INN) and its salts.
2926.30.20	4-Cyano-2-dimethylamino-4,4-diphenylbutane.
2926.90.01	2-Cyano-4-nitroaniline.
2926.90.05	2-Amino-4-chlorobenzonitrile (5-chloro-2-cyanoaniline); 2-amino-5-chlorobenzonitrile; 4-amino-2-chlorobenzonitrile; and others specified.
2926.90.08	Benzonitrile.
2926.90.11	2,6-Diclorobenzonitrile.
2926.90.12	Other dichlorobenzonitriles.
2926.90.14	p-Chlorobenzonitrile and verapamil hydrochloride.
2926.90.16	Specifically named derivative of dimethylcyclopropanecarboxylic acid.
2926.90.17	o-Chlorobenzonitrile.
2926.90.19	N,N-Bis(2-cyanoethyl)aniline; and 2,6-diflourobenzonitrile.
2926.90.21	Aromatic fungicides of nitrile-function compounds.
2926.90.23	3,5-Dibromo-4-hydroxybenzonitrile (Bromoxynil).
2926.90.25	Aromatic herbicides of nitrile-function compounds, nesoi.
2926.90.30	Other aromatic nitrile-function pesticides.
2926.90.43	Aromatic nitrile-function compounds, nesoi, described in additional U.S. note 3 to section VI.
2926.90.48	Aromatic nitrile-function compounds other than those products in additional U.S. note 3 to section VI, nesoi.
2926.90.50	Nonaromatic nitrile-function compounds, nesoi.
2927.00.03	4-Aminoazobenzenedisulfonic acid, monosodium salt.
2927.00.06	p-Aminoazobenzenedisulfonic acid; and diazoaminobenzene (1,3-diphenyltriazine).
2927.00.15	1,1′-Azobisformamide.
2927.00.18	1-Naphthalenesulfonic acid, 6-diazo-5,6-dihydro-5-oxo, ester with phenyl compound; and three other specified chemicals.
2927.00.25	Diazo-, azo- or azoxy-compounds used as photographic chemicals.
2927.00.30	Fast color bases and fast color salts, of diazo-, azo- or azoxy-compounds.
2927.00.40	Diazo-, azo- or azoxy-compounds, nesoi, described in additional U.S. note 3 to section VI.
2927.00.50	Other diazo-, azo- or azoxy-compounds, nesoi.
2928.00.15	Phenylhydrazine.
2928.00.25	Aromatic organic derivatives of hydrazine or of hydroxylamine.
2928.00.30	Nonaromatic drugs of organic derivatives of hydrazine or of hydroxylamine, other than Methyl ethyl ketoxime.
2928.00.50	Nonaromatic organic derivatives of hydrazine or of hydroxylamine, nesoi.
2929.10.10	Toluenediisocyanates (unmixed).
2929.10.15	Mixtures of 2,4- and 2,6-toluenediisocyanates.
2929.10.20	Bitolylene diisocyanate (TODI); o-Isocyanic acid, o-tolyl ester; and Xylene diisocyanate.
2929.10.27	N-Butylisocyanate; cyclohexyl isocyanate; 1-isocyanato-3-(trifluoromethyl)benzene; 1,5-naphthalene diisocyanate; and octadecyl isocyanate.
2929.10.30	3,4-Dichlorophenylisocyanate.
2929.10.35	1,6-Hexamethylene diisocyanate.
2929.10.55	Isocyanates of products described in additioonal U.S. note 3 to sect VI.
2929.10.80	Other isocyanates, nesoi.
2929.90.05	2,2-Bis(4-cyanatophenyl)-1,1,1,3,3,3,-hexafluoropropane; 2,2-bis(4-cyanatophenyl)propane; 1,1-ethylidenebis(phenyl-4-cyanate); and 2 others.
2929.90.15	Other aromatic compounds with other nitrogen function of products described in additional U.S. note 3 to section VI.
2929.90.20	Aromatic compounds with other nitrogen function, nesoi.
2929.90.50	Nonaromatic compounds with other nitrogen functions, except isocyanates.
2930.20.10	Aromatic pesticides of thiocarbamates and dithiocarbamates.
2930.20.20	Aromatic compounds of thiocarbamates and dithiocarbamates, excluding pesticides.
2930.20.70	S-(2,3,3-trichloroallyl)diisopropylthiocarbamate.
2930.20.90	Other non-aromatic thiocarbamates and dithiocarbamates.
2930.30.30	Tetramethylthiuram monosulfide.
2930.30.60	Thiuram mono-, di- or tetrasulfides, other than tetramethylthiuram monosulfide.
2930.40.00	Methionine.
2930.60.00	2-(N,N-Diethylamino)ethanethiol.
2930.70.00	Bis(2-hydroxyethyl)sulfide (thiodiglycol (INN)).
2930.80.00	Aldicarb (ISO), captafol (ISO) and methamidophos (ISO).
2930.90.10	Aromatic pesticides of organo-sulfur compounds, nesoi.
2930.90.24	N-Cyclohexylthiophthalimide.
2930.90.26	3-(4-Aminobenzamido)phenyl-beta-hydroxyethylsulfone; 2-[(4-aminophenyl)sulfonyl]ethanol, hydrogen sulfate ester; diphenylthiourea; & others.
2930.90.29	Other aromatic organo-sulfur compounds (excluding pesticides).
2930.90.30	Thiocyanates, thiurams and isothiocyanates.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2930.90.42	O,O-Dimethyl-S-methylcarbamoylmethyl phosphorodithioate; and malathion.
2930.90.43	Other non-aromatic organo-sulfur compounds used as pesticides.
2930.90.46	dl(underscored)-Hydroxy analog of dl(underscored)-methionine.
2930.90.49	Nonaromatic organo-sulfur acids, nesoi.
2930.90.71	Dibutylthiourea.
2930.90.91	Other non-aromatic organo-sulfur compounds.
2931.10.00	Tetramethyl lead & tetraethyl lead.
2931.20.00	Tributyltin compounds.
2931.31.00	Dimethyl methylphosphonate.
2931.32.00	Dimethyl propylphosphonate.
2931.33.00	Diethyl ethylphosphonate.
2931.34.00	Sodium 3-(trihydroxysilyl)propyl methylphosphonate.
2931.35.00	2,4,6-Tripropyl-1,3,5,2,4,6-trioxatriphosphinane-2,4,6-trioxide.
2931.36.00	(5-Ethyl-2-methyl-2-oxido-1,3,2-dioxaphosphinan-5-yl)methyl methylphosphonate.
2931.37.00	Bis[(5-ethyl-2-methyl-2-oxido-1,3,2-dioxaphosphinan-5-yl)methyl] methylphosphonate.
2931.38.00	Salt of methylphosphonic acid and (aminoiminiomethyl)urea (1:1).
2931.39.00	Other organo-phosphorous derivatives, nesoi.
2931.90.05	Diphenyldichlorosilane; and phenyltrichlorosilane.
2931.90.15	Sodium tetraphenylboron.
2931.90.22	Drugs of aromatic organo-inorganic (except organo-sulfur) compounds.
2931.90.26	Pesticides of aromatic organo-inorganic (except organo-sulfur) compounds.
2931.90.30	Aromatic organo-inorganic compounds, nesoi, described in additional U.S. note 3 to section VI.
2931.90.60	Other aromatic organo-inorganic compounds (excluding products described in additional U.S. note 3 to section VI).
2931.90.70	N,N′-Bis(trimethylsilyl)urea;2-Phosphonobutane-1,2,4-tricarboxylic acid and its salts; and one other specified chemical.
2931.90.90	Other non-aromatic organo-inorganic compounds.
2932.11.00	Tetrahydrofuran.
2932.12.00	2-Furaldehyde (Furfuraldehyde).
2932.13.00	Furfuryl alcohol and tetrahydrofurfuryl alcohol.
2932.14.00	Sucralose.
2932.19.10	Aromatic heterocyclic compounds with oxygen hetero-atom(s) only, containing an unfused furan ring, nesoi.
2932.19.51	Nonaromatic compounds containing an unfused furan ring (whether or not hydrogenated) in the ring.
2932.91.00	Isosafrole.
2932.92.00	1-(1,3-Benzodioxol-5-yl)propan-2-one.
2932.93.00	Piperonal (heliotropin).
2932.94.00	Safrole.
2932.95.00	Tetrahydrocannabinols (all isomers).
2932.99.04	2,2-Dimethyl-1,3-benzodioxol-4-yl methylcarbamate (Bendiocarb).
2932.99.08	2-Ethoxy-2,3-dihydro-3,3-dimethyl-5-benzofuranylmethanesulfonate.
2932.99.20	Aromatic pesticides of heterocyclic compounds with oxygen hetero-atom(s) only, nesoi.
2932.99.32	Benzofuran (Coumarone); and Dibenzofuran (Diphenylene oxide).
2932.99.35	2-Hydroxy-3-dibenzofurancarboxylic acid.
2932.99.39	Benzointetrahydropyranyl ester; and Xanthen-9-one.
2932.99.55	Bis-O-[(4-methylphenyl)methylene]-D-glucitol (Dimethylbenzylidene sorbitol); and Rhodamine 2C base.
2932.99.70	Aromatic heterocyclic compounds with oxygen hetero-atom(s) only, nesoi.
2932.99.90	Nonaromatic heterocyclic compounds with oxygen hetero-atom(s) only, nesoi.
2933.19.04	Aminoethylphenylpyrazole (phenylmethylaminopyrazole); 3-methyl-1-(p-tolyl)-2-pyrazolin-5-one (p-tolylmethylpyrazolone).
2933.19.08	3-(5-Amino-3-methyl-1H-pyrazol-1-yl)benzenesulfonic acid; amino-J-pyrazolone; and another 12 specified chemicals.
2933.19.15	1,2-Dimethyl-3,5-diphenyl-1H-pyrazolium methyl sulfate (difenzoquat methyl sulfate).
2933.19.18	2-Chloro-5-sulfophenylmethylpyrazolone; phenylcarbethyoxypyrazolone; and 3 other specified chemicals.
2933.19.23	Aromatic or modified aromatic pesticides containing an unfused pyrazole ring (whether or not hydrogenated) in the structure.
2933.19.30	Aromatic or modified aromatic photographic chemicals containing an unfused pyrazole ring (whether or n/hydrogenated) in the structure, nesoi.
2933.19.35	Aromatic or modified aromatic drugs of heterocyclic compounds with nitrogen hetero-atom(s) only containing an unfused pyrazole ring.
2933.19.37	Aromatic or mod. aromatic compound desc in add U.S. note 3 to section VI contain an unfused pyrazole ring (w/wo hydrogenated) in the structure.
2933.19.43	Aromatic or modified aromatic compounds (excluding products in add U.S. note 3 to sec VI) containing an unfused pyrazole ring in the structure.
2933.19.45	Nonaromatic drugs of heterocyclic compounds with nitrogen hetero-atom(s) only containing an unfused pyrazole ring.
2933.19.70	3-Methyl-5-pyrazolone.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
2933.19.90	Other compound (excluding aromatic, modified aromatic & drugs) containing unfused pyrazole ring (whether or n/hydrogenated) in the structure.
2933.21.00	Hydantoin and its derivatives.
2933.29.05	1-[1-((4-Chloro-2-(trifluoromethyl)phenyl)imino)-2-propoxyethyl]-1H-imidazole (triflumizole); and ethylene thiourea.
2933.29.10	2-Phenylimidazole.
2933.29.20	Aromatic or modified aromatic drugs of heterocyclic compounds with nitrogen hetero-atom(s) only cont. an unfused imidazole ring.
2933.29.35	Aromatic or mod. aromatic goods in add U.S. note 3 to sect VI containing an unfused imidazole ring (whether or n/hydrogenated) in structure.
2933.29.43	Aromatic or mod aromatic goods contng unfused imidazole ring (whether or n/hydrogenated) in the structure (exc prod in add U.S. note 3 sec VI).
2933.29.45	Nonaromatic drugs of heterocyclic compounds with nitrogen hetero-atom(s) only, containing an unfused imidazole ring, nesoi.
2933.29.60	Imidazole.
2933.29.90	Other compounds (excluding drugs, aromatic and modified aromatic compounds) containing an unfused imidazole ring (whether or n/hydrogenated).
2933.31.00	Pyridine and its salts.
2933.32.10	Piperidine.
2933.32.50	Piperidine salts.
2933.61.00	Melamine.
2933.69.20	2,4-Diamino-6-phenyl-1,3,5-triazine.
2933.69.50	Hexamethylenetetramine.
2933.69.60	Other compounds containing an unfused triazine ring (whether or not hydrogenated) in the structure.
2933.71.00	6-Hexanelactam (epsilon-Caprolactam).
2933.79.04	2,4-Dihydro-3,6-diphenylpyrrolo-(3,4–C)pyrrole-1,4-dione.
2933.79.08	Aromatic or modified aromatic lactams with nitrogen hetero-atoms only described in additional U.S. note 3 to section VI.
2933.79.15	Aromatic or modified aromatic lactams, nesoi.
2933.79.20	N-Methyl-2-pyrrolidone; and 2-pyrrolidone.
2933.79.30	N-Vinyl-2-pyrrolidone, monomer.
2933.79.40	12-Aminododecanoic acid lactam.
2933.79.85	Aromatic or modified aromatic lactams with nitrogen hetero-atoms only, nesoi.
2933.92.00	Azinphos-methyl.
2934.10.10	Aromatic or modified aromatic heterocyclic compounds cont. an unfused thiazole ring, described in add. U.S. note 3 to section VI.
2934.10.20	Aromatic or modified aromatic heterocyclic compounds, nesoi, containing an unfused thiazole ring.
2934.10.70	4,5-Dichloro-2-n-octyl-4-isothiazolin-3-one; thiothiamine hydrochloride; and 4 other specified chemicals.
2934.10.90	Other compounds (excluding aromatic or modified aromatic) containing an unfused thiazole ring (whether or not hydrogenated) in the structure.
2934.20.05	N-tert-Butyl-2-benzothiazolesulfenamide.
2934.20.10	2,2′-Dithiobisbenzothiazole.
2934.20.15	2-Mercaptobenzothiazole; and N-(Oxydiethylene)benzothiazole-2-sulfenamide.
2934.20.20	2-Mercaptobenzothiazole, sodium salt (2-Benzothiazolethiol, sodium salt).
2934.20.25	2-Amino-5,6-dichlorobenzothiazole; 2-amino-6-nitrobenzothiazole; and 2 other specified chemicals.
2934.20.30	2-Amino-6-methoxybenzothiazole and other specified heterocyclic compounds, cont. a benzothiazole ring-system, not further fused.
2934.20.35	Pesticides containing a benzothiazole ring-system, not further fused.
2934.20.40	Heterocyclic compounds containing a benzothiazole ring-system, not further fused, described in add. U.S. note 3 to section VI.
2934.20.80	Other compounds containing a benzothiazole ring system (whether or not hydrogenated), not further fused.
2939.80.00	Other alkaloids, natural or reproduced by synthesis and their salts, ethers, esters & other derivatives, nesoi.
2940.00.20	D-Arabinose.
2940.00.60	Other sugars, nesoi excluding d-arabinose.
2942.00.03	[2,2′-Thiobis(4-(1,1,3,3-tetramethyl-n-butyl)phenolato)(2,1)]-O,O′,S-s(1-butanamine), nickel II.
2942.00.05	Aromatic or modified aromatic drugs of other organic compounds, nesoi.
2942.00.10	Aromatic or modified aromatic organic compounds, nesoi, described in additional U.S. note 3 to section VI.
2942.00.35	Other aromatic or modified aromatic organic compounds (excluding products described in additional U.S. note 3 to section VI).
2942.00.50	Nonaromatic organic compounds, nesoi.
3101.00.00	Animal or vegetable fertilizers; fertilizers produced by the mixing or chemical treatment of animal or vegetable products.
3102.10.00	Urea, whether or not in aqueous solution.
3102.21.00	Ammonium sulfate.
3102.29.00	Double salts and mixtures of ammonium sulfate and ammonium nitrate.
3102.30.00	Ammonium nitrate, whether or not in aqueous solution.
3102.40.00	Mixtures of ammonium nitrate with calcium carbonate or other inorganic nonfertilizing substances.
3102.50.00	Sodium nitrate.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3102.60.00	Double salts and mixtures of calcium nitrate and ammonium nitrate.
3102.80.00	Mixtures of urea and ammonium nitrate in aqueous or ammoniacal solution.
3102.90.01	Mineral or chemical fertilizers, nitrogenous, nesoi, including mixtures not specified elsewhere in heading 3102.
3103.11.00	Superphosphates containing by weight 35% or more of diphosphorous pentaoxide (P2O5).
3103.19.00	Superphosphates nesoi.
3103.90.01	Mineral or chemical fertilizers, phosphatic.
3104.20.00	Potassium chloride.
3104.30.00	Potassium sulfate.
3104.90.01	Mineral or chemical fertilizers, potassic, nesoi.
3105.10.00	Fertilizers of chapter 31 in tablets or similar forms or in packages of a gross weight not exceeding 10 kg.
3105.20.00	Mineral or chemical fertilizers nesoi, containing the three fertilizing elements nitrogen, phosphorus and potassium.
3105.30.00	Diammonium hydrogenorthophosphate (Diammonium phosphate).
3105.40.00	Ammonium dihydrogenorthophosphate (Monoammonium phosphate), mixtures thereof with diammonium hydrogenorthophosphate (Diammonium phosphate).
3105.51.00	Mineral or chemical fertilizers nesoi, containing nitrates and phosphates.
3105.59.00	Mineral or chemical fertilizers nesoi, containing the two fertilizing elements nitrogen and phosphorus.
3105.60.00	Mineral or chemical fertilizers nesoi, containing the two fertilizing elements phosphorous and potassium.
3105.90.00	Mineral or chemical fertilizers cont. two or three of the fertilizing elements nitrogen, phosphorus and potassium fertilizers, nesoi.
3201.10.00	Quebracho tanning extract.
3201.20.00	Wattle tanning extract.
3201.90.10	Tannic acid, containing by weight 50 percent or more of tannic acid.
3201.90.25	Tanning extracts of canaigre, chestnut curupay, divi-divi, eucalyptus, gambier, hemlock, larch, mangrove, myrobalan, oak, sumac, tara, urunday, valonia.
3201.90.50	Tanning extracts of vegetable origin nesoi; tannins and their salts, ethers, esters and other derivatives.
3202.10.10	Aromatic or modified aromatic synthetic organic tanning substances.
3202.10.50	Synthetic organic tanning substances, nonaromatic.
3202.90.10	Tanning substances, tanning preparations and enzymatic preparations for pre-tanning consisting wholly of inorganic substances.
3202.90.50	Tanning substances, tanning preparations and enzymatic preparations for pre-tanning, nesoi.
3203.00.10	Coloring matter of annato, archil, cochineal, cudbear, litmus and marigold meal.
3203.00.30	Mixtures of 3,4-dihydroxyphenyl-2,4,6,-trihydroxypphenylmethanone and 2-(2,4-dihydroxyphenyl)-3,5,7-trihydroxy-4H–1-benzopyran-4-one.
3203.00.80	Coloring matter of vegetable or animal origin, nesoi.
3204.11.10	Disperse blue 19 and other specified dispersed dyes and preparations based thereon.
3204.11.15	Disperse blue 30 and preparations based thereon.
3204.11.18	N-[2-[2,6-Dicyano-4-methylphenylazo]-5-(diethylamino)phenyl]methanesulfonamide; and 1 other specified disperse dye.
3204.11.35	Disperse dyes described in add'l U.S. note 3 to section VI.
3204.11.50	Disperse dyes and preparations based thereon, nesoi.
3204.12.05	Acid black 210 powder and presscake.
3204.12.13	Acid violet 19.
3204.12.17	Acid dyes, whether or not premetallized, and preparations based thereon, acid black 31, and other specified acid or mordant dyes.
3204.12.20	Acid black 61 and other specified acid and mordant dyes and preparations based thereon.
3204.12.30	Mordant black 75, blue 1, brown 79, red 81, 84 and preparations based thereon.
3204.12.45	Acid dyes, whether or not premetallized, and preparations based thereon, described in add'l U.S. note 3 to section VI.
3204.12.50	Synthetic acid and mordant dyes and preparations based thereon, nesoi.
3204.13.10	Basic black 7 and other specified basic dyes and preparations based thereon.
3204.13.20	Basic orange 22, basic red 13 dyes, and preparations based thereon.
3204.13.25	Basic blue 3; basic red 14; and basic yellow 1, 11, 13; and preparations based thereon.
3204.13.45	3,7-Bis(dimethylamino)phenazathionium chloride (methylene blue); and basic blue 147.
3204.13.60	Basic dyes and preparations based thereon, described in add'l U.S note 3 to section VIvi.
3204.13.80	Basic dyes and preparations based thereon, nesoi.
3204.14.10	Direct black 62 and other specified basic dyes and preparations based thereon.
3204.14.20	Direct black 51 and other specified basic dyes and preparations based thereon.
3204.14.25	Direct blue 86; direct red 83; direct yellow 28 dyes; and preparations based thereon.
3204.14.30	Direct dyes nesoi, and preparations based thereon, described in additional U.S. note 3 to section VI.
3204.14.50	Direct dyes and preparations based thereon, nesoi.
3204.15.10	Vat blue 1 (synthetic indigo) dye, "Colour Index No. 73000" and preparations based thereon.
3204.15.20	Vat brown 3; vat orange 2, 7; and vat violet 9, 13 dyes and preparations based thereon.
3204.15.25	Vat red 1.
3204.15.30	Solubilized vat blue 5 and specified solubilized vat dyes and preparations based thereon.
3204.15.35	Solubilized vat orange 3, vat blue 2, vat red 44; and vat yellow 4, 20 and preparations based thereon.
3204.15.40	Vat dyes (incl. those usable as pigments) and preparations based thereon, described in add. U.S. note 3 to sec. VI.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3204.15.80	Vat dyes (including those usable in that state as pigments) and preparations based thereon, nesoi.
3204.16.10	Reactive black 1; blue 1, 2, 4; orange 1; red 1, 2, 3, 5, 6; and yellow 1; and preparations based thereon.
3204.16.20	Specified reactive dye mixtures and preparations based thereon.
3204.16.30	Reactive dyes and preparations based thereon nesoi, described in additional U.S. note 3 to section VI.
3204.16.50	Synthetic reactive dyes and preparations based thereon, nesoi.
3204.17.04	Pigments and preparations based thereon, pigment black 1, and other specified pigments, nesoi.
3204.17.08	Pigment red 178; pigment yellow 101, 138.
3204.17.20	Copper phthalocyanine ([Phthalocyanato(2-)]copper) not ready for use as a pigment.
3204.17.40	Pigments and preparations based thereon, isoindoline red pigment; pigment red 242, 245; pigment yellow 155, 183, nesoi.
3204.17.60	Pigments and preparations based thereon, products described in add'l U.S. note 3 to section VI, nesoi.
3204.17.90	Other pigments and preparations based thereon, nesoi.
3204.19.06	Solvent yellow 43, 44, 85, 172.
3204.19.11	Solvent black 2 and other specified solvent dyes and preparations based thereon.
3204.19.20	Solvent dyes and preparations based thereon, products described in add'l U.S. note 3 to section VI.
3204.19.25	Solvent dyes and preparations based thereon nesoi.
3204.19.30	Sulfur black, "Colour Index Nos. 53185, 53190 and 53195" and preparations based thereon.
3204.19.35	Beta-carotene and other carotenoid coloring matter.
3204.19.40	Synthetic organic coloring matter and preparations based thereon, nesoi, described in additional U.S. note 3 to section VI.
3204.19.50	Synthetic organic coloring matter and preparations based thereon nesoi, including mixtures of items from subheading 320411 to 320419.
3204.20.10	Fluorescent brightening agent 32.
3204.20.40	Benzoxazol.
3204.20.80	Synthetic organic products of a kind used as fluorescent brightening agents, nesoi.
3204.90.00	Synthetic organic coloring matter or preparations based thereon, nesoi; synthetic organic products used as luminophores.
3205.00.05	Carmine food coloring solutions, cont cochineal carmine lake and paprika oleoresins, not including any synthetic organic coloring matter.
3205.00.15	Carmine color lakes and preparations as specified in note 3 to this chapter, nesoi.
3205.00.40	Color lakes and preparations based thereon, described in additional U.S. note 3 to section VI.
3205.00.50	Color lakes and preparations based thereon, nesoi.
3206.11.00	Pigments & preparations based on titanium dioxide containing 80 percent or more by weight off titanium dioxide calculated on the dry weight.
3206.19.00	Pigments and preparations based on titanium dioxide, nesoi.
3206.20.00	Pigments and preparations based on chromium compounds.
3206.41.00	Ultramarine and preparations based thereon.
3206.42.00	Lithopone and other pigments and preparations based on zinc sulfide.
3206.49.10	Concentrated dispersions of pigments in plastics materials.
3206.49.20	Coloring preparations based on iron oxides, as specified in note 3 to this chapter 32.
3206.49.30	Coloring preparations based on zinc oxides, as specified in note 3 to this chapter 32.
3206.49.40	Coloring preparations based on carbon black, as specified in note 3 to this chapter 32.
3206.49.55	Pigments and preparations based on hexacyanoferrates (ferrocyanides and ferricyanides).
3206.49.60	Coloring matter and preparations, nesoi, as specified in note 3 to this chapter 32.
3206.50.00	Inorganic products of a kind used as luminophores.
3207.10.00	Prepared pigments, opacifiers, colors, and similar preparations, of a kind used in the ceramic, enamelling or glass industry.
3207.20.00	Vitrifiable enamels and glazes, engobes (slips), and similar preparations, of a kind used in the ceramic, enamelling or glass industry.
3207.30.00	Liquid lustres and similar preparations, of a kind used in the ceramic, enamelling or glass industry.
3207.40.10	Glass frit and other glass, ground or pulverized.
3207.40.50	Glass frit and other glass, in the form of granules or flakes.
3208.10.00	Paints and varnishes (including enamels and lacquers) based on polyesters in a nonaqueous medium.
3208.20.00	Paints and varnishes (including enamels and lacquers) based on acrylic or vinyl polymers in a nonaqueous medium.
3208.90.00	Paints and varnishes based on synthetic polymers or chemically modified natural polymers nesoi, in a nonaqueous medium.
3209.10.00	Paints and varnishes (including enamels and lacquers) based on acrylic or vinyl polymers in an aqueous medium.
3209.90.00	Paints and varnishes based on synthetic polymers or chemically modified natural polymers nesoi, in an aqueous medium.
3210.00.00	Other paints and varnishes (including enamels, lacquers and distempers) nesoi; prepared water pigments of a kind used for finishing leather.
3211.00.00	Prepared driers for paints and varnishes.
3212.10.00	Stamping foils.
3212.90.00	Pigments dispersed in nonaqueous media, in liquid or paste form, used in making paints; dyes & coloring matter packaged for retail sale.
3213.10.00	Artists', students' or signboard painters' colors, in tablets, tubes, jars, bottles, pans or in similar packings, in sets.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
3213.90.00	Artists', students' or signboard painters' colors, in tablets, tubes, jars, bottles, pans or in similar packings, not in sets.
3214.10.00	Glaziers' putty, grafting putty, resin cements, caulking compounds and other mastics; painters' fillings.
3214.90.10	Nonrefractory surfacing preparations for facades, indoor walls, floors, ceilings or the like, based on rubber.
3214.90.50	Nonrefractory surfacing preparations for facades, indoor walls, floors, ceilings or the like, not based on rubber.
3215.11.10	Printing ink, black, solid, in engineered shapes for apparatus in 8443.31, 32, 39.
3215.11.30	Printing ink, black, solid, other.
3215.11.90	Printing ink, black, not solid, other.
3215.19.10	Printing ink, not black, solid, in engineered shapes for apparatus in 8443.31, 32, 39.
3215.19.30	Printing ink, not black, solid, other.
3215.19.90	Printing ink, not black, not solid.
3215.90.10	Drawing ink.
3215.90.50	Inks, other than printing or drawing inks.
3301.13.00	Essential oils of lemon.
3302.90.10	Mixtures of or with a basis of odoriferous substances, used in other than the food or drink industries, zero to 10% alcohol by weight.
3302.90.20	Mixtures of or with a basis of odoriferous substances, used in other than the food or drink industries, over 10 percent alcohol by weight.
3303.00.10	Floral or flower waters, not containing alcohol.
3303.00.20	Perfumes and toilet waters, other than floral or flower waters, not containing alcohol.
3303.00.30	Perfumes and toilet waters, containing alcohol.
3304.10.00	Lip make-up preparations.
3304.20.00	Eye make-up preparations.
3304.30.00	Manicure or pedicure preparations.
3304.91.00	Beauty or make-up powders, whether or not compressed.
3304.99.10	Petroleum jelly put up for retail sale.
3304.99.50	Beauty or make-up preparations & preparations for the care of the skin, excl. medicaments but incl. sunscreen or sun tan preparations, nesoi.
3305.10.00	Shampoos.
3305.20.00	Preparations for permanent waving or straightening the hair.
3305.30.00	Hair lacquers.
3305.90.00	Preparations for use on the hair, nesoi.
3306.90.00	Preparations for oral or dental hygiene, including denture fixative pastes and powders, excluding dentifrices.
3307.10.10	Pre-shave, shaving or after-shave preparations, not containing alcohol.
3307.10.20	Pre-shave, shaving or after-shave preparations, containing alcohol.
3307.20.00	Personal deodorants and antiperspirants.
3307.30.10	Bath salts, whether or not perfumed.
3307.30.50	Bath preparations, other than bath salts.
3307.41.00	''Agarbatti'' and other odoriferous preparations which operate by burning, to perfume or deodorize rooms or used during religious rites.
3307.49.00	Preparations for perfuming or deodorizing rooms, including odoriferous preparations used during religious rites, nesoi.
3307.90.00	Depilatories and other perfumery, cosmetic or toilet preparations. nesoi.
3401.11.10	Castile soap in the form of bars, cakes or molded pieces or shapes.
3401.11.50	Soap, nesoi; organic surface-active products used as soap, in bars, cakes, pieces, soap-impregnated paper, wadding, felt, for toilet use.
3401.19.00	Soap; organic surface-active products used as soap, in bars, cakes, pieces; soap-impregnated paper, wadding, felt, not for toilet use.
3401.20.00	Soap, not in the form of bars, cakes, molded pieces or shapes.
3401.30.10	Organic surface-active products for wash skin, in liquid or cream, contain any aromatic/mod aromatic surface-active agent, put up for retail.
3401.30.50	Organic surface-active products and preparations for washing the skin, in liquid or cream form, put up for retail sale, nesoi.
3402.11.20	Linear alkylbenzene sulfonates.
3402.11.40	Anionic, aromatic or modified aromatic organic surface-active agents, whether or not put up for retail sale, nesoi.
3402.11.50	Nonaromatic anionic organic surface-active agents (other than soap).
3402.12.10	Aromatic or modified aromatic cationic organic surface-active agents (other than soap).
3402.12.50	Nonaromatic cationic organic surface-active agents (other than soap).
3402.13.10	Aromatic or modified aromatic nonionic organic surface-active agents (other than soap).
3402.13.20	Nonaromatic nonionic organic surface-active agents (other than soap) of fatty substances of animal or vegetable origin.
3402.13.50	Nonaromatic nonionic organic surface-active agents (other than soap), other than of fatty substances of animal or vegetable origin.
3402.19.10	Aromatic or modified aromatic organic surface-active agents (other than soap) other than anionic, cationic or nonionic.
3402.19.50	Nonaromatic organic surface-active agents (other than soap) nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3402.20.11	Surface-active/washing/cleaning preparations containing any aromatic or mod aromatic surface-active agent, put up for retail, not head 3401.
3402.20.51	Surface-active, washing, and cleaning preparations nesoi, put up for retail sale, not of heading 3401.
3402.90.10	Synthetic detergents put up for retail sale.
3402.90.30	Surface-active, washing, and cleaning preparations cont. any aromatic or modified aromatic surface-active agent, put up for retail sale.
3402.90.50	Surface-active, washing, and cleaning preparations nesoi, put up for retail sale.
3403.11.20	Preparations for the treatment of textile materials, containing 50 but not over 70 percent or more by weight of petroleum oils.
3403.11.40	Preparations for the treatment of textile materials, containing less than 50 percent by weight of petroleum oils.
3403.11.50	Preparations for the treatment of leather, furskins, other materials nesoi, containing less than 70% petroleum or bituminous mineral oils.
3403.91.10	Preparations for the treatment of textile materials, nesoi.
3403.91.50	Preparations nesoi, for the treatment of leather, furskins or other materials nesoi.
3404.20.00	Artificial waxes and prepared waxes of polyethylene glycol.
3404.90.10	Artificial waxes and prepared waxes containing bleached beeswax.
3404.90.51	Artificial waxes and prepared waxes.
3405.10.00	Polishes, creams and similar preparations for footwear or leather.
3405.20.00	Polishes, creams and similar preparations for the maintenance of wooden furniture, floors or other woodwork.
3405.30.00	Polishes and similar preparations for coachwork, other than metal polishes.
3405.40.00	Scouring pastes and powders and other scouring preparations.
3405.90.00	Polishes, creams and similar preparations for glass or metal.
3502.11.00	Egg albumin, dried.
3502.90.00	Albumins, albuminates and other albumin derivatives, nesoi.
3506.10.10	Animal glue, including casein glue but not including fish glue, not exceeding a net weight of 1 kg, put up for retail sale.
3506.10.50	Products suitable for use as glues or adhesives, nesoi, not exceeding 1 kg, put up for retail sale.
3506.91.10	Adhesive preparations based on rubber or plastics (including artificial resins), optically clear, for flat panel & touchscreen displays.
3506.91.50	Other adhesive preparations based on rubber or plastics (including artificial resins).
3506.99.00	Prepared glues and other prepared adhesives, excluding adhesives based on rubber or plastics, nesoi.
3507.10.00	Rennet and concentrates thereof.
3507.90.20	Penicillin G amidase.
3507.90.70	Enzymes and prepared enzymes, nesoi.
3606.10.00	Liquid or liquefied-gas fuels in containers used for filling cigarette or similar lighters of a capacity not exceeding 300 cubic cm.
3701.10.00	Photographic plates and film in the flat, sensitized, unexposed, of any material other than paper, paperboard or textiles, for X-ray use.
3701.20.00	Instant print film in the flat, sensitized, unexposed, whether or not in packs.
3701.30.00	Photographic plates and film nesoi, with any side 255 mm, in the flat, sensitized, unexposed, not of paper, paperboard, or textiles.
3701.91.00	Photographic plates, film, for color photography, nesoi, in the flat, sensitized, unexposed, not of paper, paperboard, textiles.
3701.99.30	Photographic dry plates, nesoi, sensitized, unexposed, of any material other than paper, paperboard or textiles.
3701.99.60	Photographic plates and film, nesoi, in the flat, sensitized, unexposed, of any material other than paper, paperboard or textiles.
3702.10.00	Photographic film in rolls, sensitized, unexposed, for X-ray use; of any material other than paper, paperboard or textiles.
3702.31.01	Film in rolls, for color photography, without sprocket holes, of a width not exceeding 105 mm, sensitized, unexposed.
3702.32.01	Film in rolls, with silver halide emulsion, without sprocket holes, of a width not exceeding 105 mm, sensitized, unexposed.
3702.39.01	Film in rolls without sprocket holes, width not exceeding 105 mm, other than color photography or silver halide emulsion film.
3702.41.01	Film in rolls, without sprocket holes, of a width exceeding 610 mm and of a length exceeding 200 m, for color photography.
3702.42.01	Film in rolls, without sprocket holes, of a width exceeding 610 mm and of a length exceeding 200 m, other than for color photography.
3702.43.01	Film in rolls, without sprocket holes, of a width exceeding 610 mm and of a length not exceeding 200 m.
3702.44.01	Film in rolls, without sprocket holes, of a width exceeding 105 mm but not exceeding 610 mm.
3702.52.01	Film for color photography, in rolls, of a width not exceeding 16 mm.
3702.53.00	Film for color photography, in rolls, exceeding 16 but not 35 mm in width and of a length not exceeding 30 m, for slides.
3702.54.00	Film for color photography, in rolls, exceeding 16 but not 35 mm in width, of a length not exceeding 30 m, other than for slides.
3702.55.00	Film for color photography, in rolls, exceeding 16 but not 35 mm in width and of a length exceeding 30 m.
3702.56.00	Film for color photography, in rolls, of a width exceeding 35 mm.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3702.96.00	Photographic film nesoi, in rolls, of a width not exceeding 35 mm and of a length not exceeding 30 m.
3702.97.00	Photographic film nesoi, in rolls, of a width not exceeding 35 mm and of a length exceeding 30 m.
3702.98.00	Photographic film nesoi, in rolls, of a width exceeding 35 mm.
3703.10.30	Silver halide photographic papers, sensitized, unexposed, in rolls of a width exceeding 610 mm.
3703.10.60	Photographic paper (other than silver halide), paperboard and textiles, sensitized, unexposed, in rolls of a width exceeding 610 mm.
3703.20.30	Silver halide papers, other than in rolls of a width exceeding 610 mm, for color photography, sensitized, unexposed.
3703.20.60	Photographic paper (not silver halide), paperbd & textiles for color photos, other than in rolls of a width >610 mm, sensitized, unexposed.
3703.90.30	Silver halide photographic papers, sensitized, unexposed, not for color photography, other than in rolls of a width exceeding 610 mm.
3703.90.60	Photographic paper (not silver halide), paperbd, tex., not for color photo, other than in rolls of a width >610 mm, sensitized, unexposed.
3704.00.00	Photographic plates, film, paper, paperboard and textiles, exposed but not developed.
3705.00.00	Photographic plates and film, exposed and developed, other than cinematographic film.
3706.10.30	Sound recordings on motion-picture film of a width of 35 mm or more, suitable for use with motion-picture exhibits.
3706.10.60	Motion-picture film of a width of 35 mm or more, exposed and developed, whether or not incorporating sound track, nesoi.
3706.90.00	Motion-picture film, exposed and developed, less than 35 mm wide.
3707.10.00	Sensitizing emulsions, for photographic uses, nesoi.
3707.90.31	Acid violet 19 for photographic uses.
3707.90.32	Chemical preparations for photographic uses, nesoi.
3707.90.60	Unmixed products for photographic uses, put up in measured portions or put up for retail sale in a form ready for use.
3801.10.10	Artificial graphite plates, rods, powder and other forms, for manufacture into brushes for electric generators, motors or appliances.
3801.10.50	Artificial graphite, nesoi.
3801.20.00	Colloidal or semi-colloidal graphite.
3801.30.00	Carbonaceous pastes for electrodes and similar pastes for furnace linings.
3801.90.00	Preparations based on graphite or other carbon in the form of pastes, blocks, plates or other semimanufactures, nesoi.
3802.10.00	Activated carbon.
3802.90.10	Bone black.
3802.90.20	Activated clays and activated earths.
3802.90.50	Activated natural mineral products, nesoi; animal black, including spent animal black.
3803.00.00	Tall oil, whether or not refined.
3804.00.10	Lignin sulfonic acid and its salts.
3804.00.50	Residual lyes from the manufacture of wood pulp, nesoi, excluding tall oil.
3805.10.00	Gum, wood or sulfate turpentine oils.
3805.90.10	Pine oil containing alpha-terpineol as the main constituent.
3805.90.50	Terpenic oils, nesoi, produced by treatment of coniferous woods; crude dipentene; sulfite turpentine and other crude para-cymene.
3806.10.00	Rosin and resin acids.
3806.20.00	Salts of rosin or of resin acids.
3806.30.00	Ester gums.
3806.90.00	Resin acids, derivatives of resin acids and rosin, rosin spirit and rosin oils, run gums, nesoi.
3807.00.00	Wood tar and its oils; wood creosote; wood naphtha; vegetable pitch; preparations based on rosin, resin acids or vegetable pitch.
3808.52.00	DDT (ISO) (clofenatone (INN)), in packings of a net weight content not exceeding 300 g.
3808.59.10	Pesticides containing any aromatic or modified aromatic specified in note 1 to chapter 38.
3808.59.40	Disinfectants specified in note 1 to chapter 38.
3808.59.50	Pesticides, nesoi specified in note 1 to chapter 38.
3808.61.10	Pesticides containing any aromatic or modified aromatic, not exceeding 300 g, specified in note 2 to chapter 38.
3808.61.50	Pesticides, nesoi, not exceeding 300 g, specified in note 2 to chapter 38.
3808.62.10	Pesticides containing any aromatic or modified aromatic, >300 g but <7.5 kg, specified in note 2 to chapter 38.
3808.62.50	Pesticides, nesoi, >300 g but <7.5 kg, specified in note 2 to chapter 38.
3808.69.10	Pesticides containing any aromatic or modified aromatic, >7.5 kg, specified in note 2 to chapter 38.
3808.69.50	Pesticides, nesoi, >7.5 kg, specified in note 2 to chapter 38.
3808.91.10	Fly ribbons (ribbon fly catchers), put up in packings for retail sale.
3808.91.15	Mixtures of N-[[(chlorophenyl)amino]carbonyl]-2,6-difluorobenzamide and inert substances.
3808.91.25	Insecticides containing any aromatic or modified aromatic insecticide, nesoi.
3808.91.30	Insecticides, nesoi, containing an inorganic substance, put up for retail sale.
3808.91.50	Insecticides, nesoi, for retail sale or as preparations or articles.
3808.92.05	Mixtures of dinocap and application adjuvants.
3808.92.15	Fungicides containing any aromatic or modified aromatic fungicide, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3808.92.24	Maneb; zinab; mancozeb; and metiram.
3808.92.28	Fungicides containing any fungicide which is a thioamide, thiocarbamate, dithio carbamate, thiuram or isothiocyanate, nesoi.
3808.92.30	Fungicides, nesoi, containing an inorganic substance, put up for retail sale.
3808.92.50	Fungicides nesoi, put up in forms or packing for retail sale or as preparations or articles.
3808.93.05	Herbicides, antisprouting products and plant-growth regulators, aromatic or modified aromatic, for retail sale.
3808.93.15	Herbicides containing any aromatic or modified aromatic herbicide, antisprouting agent or plant-growth regulator, nesoi.
3808.93.20	Herbicides, antisprouting products and plant-growth regulators, nesoi, containing an inorganic substance, for retail sale.
3808.93.50	Herbicides, antisprouting products and plant-growth regulators nesoi, put up for retail sale.
3808.94.10	Disinfectants, containing any aromatic or modified aromatic disinfectant.
3808.94.50	Disinfectants not subject to subheading note 1 of chapter 38, nesoi.
3808.99.04	Mixtures of 1,1-bis(4-chlorophenyl)-2,2,2-trichloroethanol (Dicofol) and application adjuvants.
3808.99.08	Rodenticides containing any aromatic or modified aromatic pesticide, nesoi.
3808.99.30	Formulated biocides based on 2-methyl-4-isothiazolin-3-one, or 2-n-octyl-4-isothiazolin-3-one, or on certain other chemicals; metaldehyde.
3808.99.70	Rodenticides containing an inorganic substance.
3808.99.95	Rodenticides, nesoi.
3809.91.00	Finishing agents, dye carriers and like products, nesoi, used in the textile or like industries.
3809.92.10	Finishing agents, dye carriers and other preparations used in paper or like industries, 5% or more by wt. aromatic (mod.) substance(s).
3809.92.50	Finishing agents, dye carriers and other preparations used in paper or like industries, <5% by weight of aromatic (mod.) substance(s).
3809.93.10	Finishing agents, dye carriers and other preparations used in leather and like industries, >5% by weight aromatic (mod.) substance(s).
3809.93.50	Finishing agents, dye carriers and other preparations used in leather and like industries, <5% by weight aromatic (mod.) substance(s).
3810.10.00	Pickling preparations for metal surfaces; soldering, brazing or welding powders and pastes consisting of metal and other materials.
3810.90.10	Preparations used for soldering or cores or coatings for welding electrodes or rods, 5% or more by weight aromatic (or mod.) substance(s).
3810.90.20	Preparations used for soldering or as cores or coatings for welding electrodes or rods, consisting wholly of inorganic substances.
3810.90.50	Preparations used for soldering or as cores or coatings for welding electrodes or rods, nesoi.
3811.11.10	Antiknock preparations based on tetraethyl lead or on a mixture of tetraethyl lead and tetramethyl lead.
3811.11.50	Antiknock preparations based on lead compounds, nesoi.
3811.19.00	Antiknock preparations based on other than lead compounds.
3811.90.00	Prepared additives for mineral oils (incl. gasoline) or other liquids used for the same purposes as mineral oils, nesoi.
3812.10.10	Prepared rubber accelerators containing any aromatic or modified aromatic rubber accelerator nesoi.
3812.10.50	Prepared rubber accelerators not containing any aromatic or modified aromatic rubber accelerator nesoi.
3812.20.10	Compound plasticizers for rubber or plastics containing any aromatic or modified aromatic plasticizer nesoi.
3812.20.50	Compound plasticizers for rubber or plastics not containing any aromatic or modified aromatic plasticizer nesoi.
3812.31.00	Mixtures of oligomers of 2,2,4-trimethyl-1,2-dihydroquinoline (TMQ).
3812.39.20	Mixtures of N,N′-diaryl-p-phenylenediamines.
3812.39.30	Master batches of poly[nitrilomethanetetraartlnitr.
3812.39.60	Compound plasticizers for rubber/plastics cont any aromatic or modified aromatic antioxidant or other stabilizer, nesoi.
3812.39.70	Bis(1,2,2,6,6-pentamethyl-4-piperidinyl) sebacate.
3812.39.90	Antioxiding prep & oth compound stabilizers for rubber or plastics, nesoi.
3813.00.10	Preparations and charges for fire extinguishers; charged fire-extinguishing grenades; consisting wholly of inorganic substances.
3813.00.50	Preparations and charges for fire extinguishers; charged fire-extinguishing grenades; nesoi.
3814.00.10	Organic composite solvents and thinners containing 5 to 25 percent, by weight of one or more aromatic substances.
3814.00.20	Organic composite solvents and thinners containing more than 25 percent by weight of one or more aromatic substances.
3814.00.50	Organic composite solvents and thinners, nesoi; prepared paint or varnish removers; nesoi.
3815.11.00	Supported catalysts with nickel or nickel compounds as the active substance.
3815.12.00	Supported catalysts with precious metal or precious metal compounds as the active substance.
3815.19.00	Supported catalysts other than with nickel or precious metal or their compounds as the active substance.
3815.90.10	Reaction initiators, reaction accelerators and catalytic preparations, nesoi, consisting wholly of bismuth, of tungsten or of vanadium.
3815.90.20	Reaction initiators, reaction accelerators and catalytic preparations, nesoi, consisting wholly of mercury or of molybdenum.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3815.90.30	Reaction initiators, reaction accelerators and catalytic preparations, nesoi, consisting wholly of inorganic substances nesoi.
3815.90.50	Reaction initiators, reaction accelerators and catalytic preparations, nesoi.
3816.00.00	Refractory cements, mortars, concretes and similar compositions, other than products of heading 3801.
3817.00.10	Mixed linear alkylbenzenes, other than those of heading 2707 or 2902.
3817.00.15	Mixed alkylbenzenes, other than linear or those of heading 2707 or 2902.
3817.00.20	Mixed alkylnaphthalenes, other than those of heading 2707 or 2902.
3818.00.00	Chemical elements doped for use in electronics, in the form of discs, wafers etc., chemical compounds doped for electronic use.
3819.00.00	Hydraulic brake fluids and transmission fluids cont. less than 70% by weight of petroleum oils, or bituminous mineral oils.
3824.10.00	Prepared binders for foundry molds or cores.
3824.30.00	Nonagglomerated metal carbides mixed together or with metallic binders.
3824.40.10	Prepared additives for cements, mortars or concretes containing 5% or more by weight of aromatic or modified aromatic substances.
3824.40.20	Prepared additives for cements, mortars or concretes consisting wholly of inorganic substances.
3824.40.50	Prepared additives for cements, mortars or concretes, nesoi.
3824.50.00	Non-refractory mortars and concretes.
3824.71.01	Mixtures containing chlorofluorocarbons.
3824.72.00	Containing bromochlorodiflourormethane, bromotrifluoromethane or dibromotetrafluroroethane.
3824.73.00	Mixtures containing hydrobromofluorocarbons.
3824.74.00	Mixtures containing hydrochlorofluorocarbons.
3824.75.00	Mixtures of halogenated hydrocarbons containing carbon tetrachloride.
3824.76.00	Containing 1,1,1,-trichloroethane.
3824.77.00	Containing bromomethane or bomochloromethane.
3824.78.00	Containing PFCs or HFCs but not CFCs or HCFCs.
3824.79.10	Mixtures containing halogenated derivatives of methane, ethane, or propane, nesoi, chlorinated but not otherwise halogenated.
3824.79.90	Mixtures containing halogenated derivatives of methane, ethane, or propane, nesoi, other than chlorinated but not halogenated.
3824.81.00	Chemical mixtures containing oxirane (ethylene oxide).
3824.82.10	Containing PCBs, PCTs or PBBs: mixtures of halogenated hydrocarbons, chlorinated but not otherwise halogenated, nesoi.
3824.82.90	Containing PCBs, PCTs or PBBs: mixtures of halogenated hydrocarbons other than chlorinated only, nesoi.
3824.83.00	Containing tris (2,3-dibromopropyl phosphate).
3824.84.00	Other mixtures cont aldrin, camphechlor(toxaphene), chlordane, chlordecone, DDT(clofenatone), 1,1,1-TRICHLORO-2,2-BIS(P-CHLOROPHENYL)ETHANE), ETC.
3824.85.00	Mixtures containing 1,2,3,4,5,6-hexachlorocyclohexane (HCH (ISO)), including lindane (ISO,INN).
3824.86.00	Mixtures containing pentachlorobenzene (ISO) or hexachlorobenzene (ISO).
3824.87.00	Mixtures containing perfluorooctane sulfonic acid, its salts, perfluorooctane sulfonamides, or perfluorooctane sulfonyl fluoride.
3824.88.00	Mixtures containing tetra-, penta-, hexa-, hepta-, or octabromodiphenyl ethers.
3824.91.00	Mixtures consisting mainly of methylphosphonate etc.
3824.99.11	Cultured crystals, weighing not less than 2.5g each, in the form of ingots.
3824.99.19	Cultured crystals, weighing not less than 2.5g each except in the form of ingots.
3824.99.21	Mixtures consisting wholly of substances found naturally in coal tar, whether obtained from coal tar or other source.
3824.99.25	Mixtures of triphenyl sulfonium chloride, diphenyl (4-phenylthio)phenyl sulfonium chloride & (thiodi-4,1-phenylene)bis(diphenyl sulfonium) dichloride.
3824.99.26	Benzene,2,4-Diisocyanate-1,3,5-tris-(1-methylethyl).
3824.99.28	Mixtures containing 5% or more by weight of one or more aromatic or modified aromatic substance, nesoi.
3824.99.31	Mixtures of bismuth.
3824.99.32	Mixtures of hydrosulfite compounds, of sulfoxylate compounds, or of both.
3824.99.33	Mixtures of mercury.
3824.99.34	Mixtures of molybdenum.
3824.99.35	Mixtures of tungsten.
3824.99.36	Mixture of vanadium.
3824.99.39	Mixtures of two or more inorganic compounds, nesoi.
3824.99.41	Mixtures of fatty substances of animal or vegetable origin and mixtures thereof.
3824.99.48	Mixtures that are in whole or in part of hydrocarbons derived in whole or in part from petroleum, shale oil or natural gas.
3824.99.50	Mixtures chlorinated but not otherwise halogenated.
3824.99.55	Mixtures of halogenated hydrocarbons, nesoi.
3824.99.70	Mixtures of dibromoneopentyl gylcol; polydibromophenylene oxide; tetrabromobisphenol-A-carbonate oligomers; electroplating chemical and electroless.
3824.99.75	Mixtures of naphthenic acids, their water-insoluble salts and their esthers.
3824.99.92	Chemical products and preparations and residual products of the chemical or allied industries, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
3825.41.00	Halogenated waste organic solvents.
3825.49.00	Waste organic solvents, other than halogenated.
3825.50.00	Wastes of metal-pickling liquors, hydraulic fluids, brake fluids and anti-freeze fluids.
3825.61.00	Other wastes from the chemical or allied industries mainly containing organic constituents.
3825.69.00	Other wastes from the chemical or allied industries, other than those mainly containing organic constituents.
3825.90.00	Residual products of the chemical or allied industries, nesoi; other wastes, nesoi, specified in note 6 to chapter 38.
3826.00.10	Biodiesel not containing petroleum or bituminous oil.
3826.00.30	Biodiesel containing <70% petroleum or bituminous oil.
3901.40.00	Ethylene-alpha-olefin copolymers, having a specific gravity of less than 0.94.
3905.99.30	Polyvinyl carbazole (including adjuvants).
3909.31.00	Poly(methylene phenyl isocyanate) (crude MDI, polymeric MDI).
3909.39.00	Amino-resins, nesoi.
3912.11.00	Cellulose acetates, nesoi, in primary forms, nonplasticized.
3912.31.00	Carboxymethylcellulose and its salts.
3913.90.20	Polysaccharides and their derivatives, nesoi, in primary forms.
3915.10.00	Waste, parings and scraps, of polymers of ethylene.
3915.20.00	Waste, parings and scrap, of polymers of styrene.
3915.30.00	Waste, parings and scrap, of polymers of vinyl chloride.
3915.90.00	Waste, parings and scrap, of plastics, nesoi.
3916.90.20	Monofilament racket strings of plastics of which any cross-sectional dimension exceeds 1 mm.
3917.10.10	Artificial guts (sausage casings) of cellulosic plastics materials.
3917.10.60	Artificial guts (sausage casings) of collagen.
3917.10.90	Artificial guts (sausage casings) of hardened protein, nesoi.
3917.33.00	Flexible plastic tubes, pipes and hoses, nesoi, with fittings, not reinforced or otherwise combined with other materials.
3917.39.00	Flexible plastic tubes, pipes and hoses, nesoi.
3918.10.10	Vinyl tile floor coverings.
3918.10.20	Vinyl flooring, excluding vinyl tile.
3918.10.31	Wall or ceiling coverings, with a backing of manmade fibers, greater than 70% by weight of PVC.
3918.10.32	Wall or ceiling coverings, with a backing of manmade fibers, less than or equal to 70% by weight of PVC.
3918.10.40	Wall or ceiling coverings of polymers of vinyl chloride with a backing of textile fibers other than of manmade fibers.
3918.10.50	Wall or ceiling coverings of polymers of vinyl chloride, without a backing of textile fibers.
3918.90.10	Floor coverings of plastics, other than of polymers of vinyl chloride, nesoi.
3918.90.20	Wall or ceiling coverings, with a backing of manmade fibers, of plastics other than polymers of vinyl chloride.
3918.90.30	Wall or ceiling coverings of plastics other than of polymers of vinyl chloride with a backing of textile fibers other than of manmade fiber.
3918.90.50	Wall or ceiling coverings of plastics other than vinyl chloride, without a backing of textile fibers.
3922.90.00	Bidets, lavatory pans, flushing cisterns and similar sanitary ware nesoi, of plastics.
3923.10.20	Boxes and similar articles for the conveyance or packing of semiconductor wafers, masks or reticules of subheadings 3923.10 or 8485.90.
3923.10.90	Other boxes, cases, crates and similar articles for the conveyance or packing of goods, of plastics.
3923.21.00	Sacks and bags (including cones) for the conveyance or packing of goods, of polymers of ethylene.
3923.29.00	Sacks and bags (including cones) for the conveyance or packing of goods, of plastics other than polymers of ethylene.
3923.30.00	Carboys, bottles, flasks and similar articles for the conveyance or packing of goods, of plastics.
3923.40.00	Spools, cops, bobbins and similar supports, of plastics.
3923.50.00	Stoppers, lids, caps and other closures, of plastics.
3923.90.00	Articles nesoi, for the conveyance or packing of goods, of plastics.
3925.10.00	Reservoirs, tanks, vats and similar containers, of a capacity exceeding 300 liters, of plastics.
3925.90.00	Builders' ware of plastics, nesoi.
3926.20.10	Gloves, seamless, of plastics.
3926.20.20	Baseball and softball gloves and mitts, of plastics.
3926.20.30	Gloves specially designed for use in sports, nesoi, of plastics.
3926.20.40	Gloves, nesoi, of plastics.
3926.20.60	Plastic rainwear, incl jackets, coats, ponchos, parkas & slickers, w/outer shell PVC and w/wo attached hoods, val not over $10 per unit.
3926.20.90	Articles of apparel & clothing accessories, of plastic, nesoi.
3926.90.30	Parts for yachts or pleasure boats of heading 8903 and watercraft not used with motors or sails, of plastics.
3926.90.45	Gaskets, washers and other seals, of plastics.
3926.90.55	V-belts of plastics, containing textile fibers.
3926.90.56	Belting and belts (except V-belts) for machinery, of plastics, containing predominately vegetable fibers.
3926.90.57	Belting and belts (except V-belts) for machinery, of plastics, containing predominately man-made fibers.
3926.90.59	Belting and belts (except V-belts) for machinery, of plastics, containing textile fibers nesoi.
3926.90.60	Belting and belts (except V-belts) for machinery, of plastics, not containing textile fibers.
3926.90.83	Empty cartridges and cassettes for typewriter and machine ribbons, of plastics.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
3926.90.87	Flexible document binders with tabs, rolled or flat, of plastics.
3926.90.94	Cards, not punched, suit. for jacquard cards; jacquard cards & jacquard heads for power-driven weaving mach, etc; & trans sheet plast 30% lead.
3926.90.96	Casing for bicycle derailleur cable; and casing for cable or inner wire for caliper and cantilever bake, whether or not cut length; of plastic.
4001.10.00	Natural rubber latex, whether or not prevulcanized.
4001.21.00	Natural rubber smoked sheets.
4001.22.00	Technically specified natural rubber (TSNR), in primary forms.
4001.29.00	Natural rubber in primary forms other than latex, smoked sheets or technically specified natural rubber (TSNR).
4001.30.00	Balata, gutta-percha, guayule, chicle and similar natural rubber gums, in primary forms.
4002.11.00	Styrene-butadiene rubber (SBR) or carboxylated styrene-butadiene rubber (XSBR), latex, in primary forms or in plates, sheets or strip.
4002.19.00	Styrene-butadiene rubber (SBR), carboxylated styrene-butadiene rubber (XSBR), except latex, in primary forms or in plates, sheets or strip.
4002.20.00	Butadiene rubber (BR), in primary forms or in plates, sheets or strip.
4002.31.00	Isobutene-isoprene (butyl) rubber (IIR), in primary forms or in plates, sheets or strip.
4002.39.00	Halo-isobutene-isoprene rubber (CIIR or BIIR), in primary forms or in plates, sheets or strip.
4002.41.00	Chloroprene (chlorobutadiene) rubber (CR), latex, in primary forms or in plates, sheets or strip.
4002.49.00	Chloroprene (chlorobutadiene) rubber (CR), other than latex, in primary forms or in plates, sheets or strip.
4002.51.00	Acrylonitrile-butadiene rubber (NBR), latex, in primary forms or in plates, sheets or strip.
4002.59.00	Acrylonitrile-butadiene rubber (NBR), other than latex, in primary forms or in plates, sheets or strip.
4002.60.00	Isoprene rubber (IR), in primary forms or in plates, sheets or strip.
4002.70.00	Ethylene-propylene-nonconjugated diene rubber (EPDM), in primary forms or in plates, sheets or strip.
4002.80.00	Mixtures of natural rubber gums with synthetic rubber, in primary forms or in plates, sheets or strip.
4002.91.00	Synthetic rubber and factice derived from oils, in latex form, in primary forms or in plates, sheets or strip, nesoi.
4002.99.00	Synthetic rubber and factice derived from oils, in primary forms or in plates, sheets or strip, nesoi.
4003.00.00	Reclaimed rubber in primary forms or in plates, sheets or strip.
4004.00.00	Waste, parings and scrap of rubber (other than hard rubber) and powders and granules obtained therefrom.
4005.10.00	Rubber, unvulcanized, compounded with carbon black or silica, in primary forms or in plates, sheets or strip.
4005.20.00	Solutions and dispersions of rubber, unvulcanized, compounded with other than carbon black or silica.
4005.91.00	Compounded rubber, unvulcanized, in plates, sheets and strip.
4005.99.00	Compounded rubber, unvulcanized, in primary forms, nesoi.
4006.90.10	Rods, tubes, profile shapes, discs, rings, and similar articles, of natural, unvulcanized rubber.
4006.90.50	Rods, tubes, profile shapes, discs, rings, and similar articles, of synthetic unvulcanized rubber.
4007.00.00	Vulcanized rubber thread and cord.
4008.11.10	Plates, sheets and strip of vulcanized natural cellular rubber, other than hard rubber.
4008.11.50	Plates, sheets and strip of vulcanized synthetic cellular rubber, other than hard rubber.
4008.19.20	Rods and profile shapes of vulcanized natural cellular rubber, other than hard rubber.
4008.19.40	Vulcanized natural cellular rubber, other than hard rubber, other than rods and profile shapes, nesoi.
4008.19.60	Rods and profile shapes of vulcanized, synthetic cellular rubber, other than hard rubber.
4008.19.80	Vulcanized, synthetic cellular rubber, other than hard rubber, other than rods and profile shapes.
4008.21.00	Plates, sheets and strip of vulcanized, noncellular rubber, other than hard rubber.
4008.29.20	Rods and profile shapes of vulcanized, noncellular rubber, other than hard rubber.
4008.29.40	Vulcanized, noncellular rubber, other than hard rubber, other than rods and profile shapes, nesoi.
4009.11.00	Tubes, pipes and hoses of vulcanized rubber other than hard rubber, not reinforced or combined w/other materials, without fittings.
4009.21.00	Tubes, pipes and hoses of vulcanized rubber other than hard rubber, reinforced or combined only with metal, without fittings.
4009.22.00	Tubes, pipes and hoses of vulcanized rubber other than hard rubber, reinforced or combined only with metal, with fittings.
4009.31.00	Tubes, pipes and hoses of vulcanized rubber other than hard rubber, reinforced or combined only with textile materials, without fittings.
4009.32.00	Tubes, pipes and hoses of vulcanized rubber other than hard rubber, reinforced or combined only with textile materials, with fittings.
4009.41.00	Tubes, pipes and hoses of vulcanized rubber other than hard rubber, reinforced or combined with other materials nesoi, without fittings.
4010.12.10	Conveyor belts or belting of vulcanized rubber reinforced only with textile materials, in which vegetable fibers predominate ov other fibers.
4010.12.50	Conveyor belts/belting of vulcanized rubber reinforced w/textile material, mostly man-made fiber, width exceeds 20 cm.
4010.12.55	Conveyor belts/belting of vulcanized rubber reinforced only w/textile material, mostly man-made fiber, width not over 20 cm.
4010.12.90	Conveyor belts or belting of vulcanized rubber reinforced only with textile materials, nesoi.
4010.19.10	Conveyor belts or belting of vulcanized rubber, nesoi, combined with textile materials in which vegetable fibers predominate ov other fibers.
4010.19.50	Conveyor belts/belting of vulcanized rubber, nesoi, combined w/textile components in which man-made fibers predominate, width exceed 20 cm.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
4010.19.55	Conveyor belts/belting of vulcanized rubber, nesoi, combined w/textile components in which man-made fibers predominate, width under 20 cm.
4010.19.80	Conveyor belts/belting of vulcanized rubber, nesoi, combined with textile materials nesoi.
4010.19.91	Conveyor belts/belting of vulcanized rubber, nesoi.
4010.31.30	Transmission V-belts of vulcanized rubber, V-ribbed, circumference exceed 60 cm but not exceed 180 cm, combined with textile materials.
4010.31.60	Transmission V-belt of vulcanized rubber, V-ribbed, circumference exceed 60 cm but not exceed 180 cm, other than combined w/textile material.
4010.32.30	Transmission V-belts of vulcanized rubber, not V-ribbed, circumference exceed 60 cm but not exceed 180 cm, combined with textile materials.
4010.32.60	Transmission V-belt of vulcanized rubber, not V-ribbed, circumference exceed 60 cm not exceed 180 cm, other than combined w/textile material.
4010.33.30	Transmission V-belts of vulcanized rubber, V-ribbed, circumference exceed 180 cm but not exceed 240 cm, combined with textile materials.
4010.33.60	Transmission V-belt of vulcanized rubber, V-ribbed, circumference exceed 180 cm not exceed 240 cm, other than combined w/textile material.
4010.34.30	Transmission V-belts of vulcanized rubber, not V-ribbed, circumference exceed 180 cm but not exceed 240 cm, combined with textile materials.
4010.34.60	Transmission V-belt of vulcanized rubber, not V-ribbed, circumference exceed 180 cm not exceed 240 cm,other than combined w/textile material.
4010.35.30	Endless synchronous transmission belt of vulcan. rubber, circum. 60–150 cm, combined w/textile mat. w/vegetable fiber more than other fibers.
4010.35.41	Endless synchronous transmission belt of vulcan. rubber, circum. 60–150 cm, combine w/textile mat.;manmade fiber predominant; width ov 20 cm.
4010.35.45	Endless synchronous transmission belt of vulcan. rubber, circum. 60–150 cm, combine w/text. mat.;manmade fiber predominant; width n/o 20 cm.
4010.35.50	Endless synchronous transmission belt of vulcanized rubber, circumference 60 to 150 cm, combined with textile materials nesoi.
4010.35.90	Endless synchronous transmission belt of vulcanized rubber, circumference 60 to 150 cm, other than combined with textile materials.
4010.36.30	Endless synchronous transmission belt of vulcan. rubber, circum. 150–198 cm, combined w/textile with vegetable fiber predom over other fiber.
4010.36.41	Endless synchronous transmission belt of vulcan. rubber, circum. 150–198cm, combined w/manmade fiber exceeding other fibers, width ov 20 cm.
4010.36.45	Endless synchronous transmission belt of vulcan. rubber, circum. 150–198cm, combined w/manmade fiber exceeding other fiber, width n/o 20 cm.
4010.36.50	Endless synchronous transmission belts of vulcanized rubber, circumference 150 to 198 cm, combined with textile materials nesoi.
4010.36.90	Endless synchronous transmission belts of vulcanized rubber, circumference 150 to 198 cm, other than combined with textile materials.
4010.39.10	Transmission V-belts and V-belting of vulcanized rubber, nesoi, combined with textile materials.
4010.39.20	Transmission V-belts and V-belting of vulcanized rubber, nesoi, other than combined with textile materials.
4010.39.30	Transmission belts or belting of vulcanized rubber, nesoi, combined with textile materials in which vegetable fiber predominate other fibers.
4010.39.41	Transmission belts or belting of vulcanized rubber, nesoi, combined w. textile materials with man-made fibers predominant, width over 20 cm.
4010.39.45	Transmission belts or belting of vulcanized rubber, nesoi, combined w. textile materials with man-made fibers predominant, width n/o 20 cm.
4010.39.50	Transmission belts or belting of vulcanized rubber, nesoi, combined with textile materials nesoi.
4010.39.90	Transmission belts or belting of vulcanized rubber, nesoi, other than combined with textile materials.
4011.10.10	New pneumatic radial tires, of rubber, of a kind used on motor cars (including station wagons and racing cars).
4011.10.50	New pneumatic tires excluding radials, of rubber, of a kind used on motor cars (including station wagons and racing cars).
4011.20.10	New pneumatic radial tires, of rubber, of a kind used on buses or trucks.
4011.20.50	New pneumatic tires excluding radials, of rubber, of a kind used on buses or trucks.
4011.40.00	New pneumatic tires, of rubber, of a kind used on motorcycles.
4011.50.00	New pneumatic tires, of rubber, of a kind used on bicycles.
4011.70.00	New pneumatic tires of a kind used on agricultural or forestry vehicles and machines.
4011.80.10	New pneumatic tires of a kind used on construction, mining or industrial handling vehicles and machines having a herring-bone or similar tread.
4011.80.20	New pneumatic tires of a kind used on construction, mining or industrial handling vehicles and machines having a radial tread.
4011.80.80	New pneumatic tires of a kind used on construction, mining or industrial handling vehicles and machines, other.
4011.90.10	New pneumatic tires, of a kind nesoi, have a herring-bone or similar tread.
4011.90.20	New pneumatic tires, of a kind nesoi, have a radial tread.
4011.90.80	New pneumatic tires, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4012.11.40	Retreaded radial pnuematic tires, of rubber, of a kind used on motor cars (including station wagons and racing cars).
4012.11.80	Retreaded pnuematic tires (nonradials), of rubber, of a kind used on motor cars (including station wagons and racing cars).
4012.12.40	Retreaded pnuematic radial tires, of rubber, of a kind used on buses or trucks.
4012.12.80	Retreaded pnuematic tires (nonradials), of rubber, of a kind used on buses or trucks.
4012.19.20	Retreaded pneumatic tires, of rubber, designed for certain agricultural or horticultural machinery.
4012.19.40	Retreaded pnuematic radial tires, of rubber, not elsewhere specified or included.
4012.20.10	Used pneumatic tires of rubber, for aircraft.
4012.20.15	Used pneumatic tires of rubber, designed for certain agricultural or horticultural machinery,for on-highway trasnport of passengers or goods.
4012.20.45	Used pneumatic tires of rubber, designed for certain agricultural or horticultural machinery, nesoi.
4012.20.60	Used pneumatic tires, of rubber, for vehicles for on-highway transport of passengers or goods nesoi, or vehicles of heading 8705.
4012.20.80	Used pneumatic tires, of rubber for machinery, nesoi.
4012.90.10	Solid or cushion tires of rubber.
4012.90.30	Bicycle rim strips of natural rubber.
4012.90.45	Interchangeable tire treads and tire flaps, of natural rubber, nesoi.
4012.90.70	Bicycle rim strips of rubber other than of natural rubber.
4012.90.90	Interchangeable tire treads and tire flaps, of rubber other than natural rubber, except bicycle rim strips, nesoi.
4013.10.00	Inner tubes of rubber, of a kind used on motor cars (including station wagons and racing cars), buses or trucks.
4013.20.00	Inner tubes of rubber, of a kind used on bicycles.
4013.90.10	Inner tubes of rubber designed for tires used on certain agricultural or horticultural machinery.
4013.90.50	Inner tubes of rubber for vehicles nesoi.
4015.19.05	Medical gloves of vulcanized rubber other than hard rubber.
4015.19.10	Seamless gloves of vulcanized rubber other than hard rubber, other than surgical or medical gloves.
4015.19.50	Nonseamless gloves of vulcanized rubber other than hard rubber, other than surgical or medical gloves.
4015.90.00	Articles of apparel and clothing accessories, excluding gloves, of vulcanized rubber other than hard rubber.
4016.10.00	Articles of vulcanized cellular rubber other than hard rubber.
4016.91.00	Floor covering and mats, of noncellular vulcanized rubber other than hard rubber.
4016.93.10	Gaskets, washers and other seals, of noncellular vulcanized rubber other than hard rubber, for use in automotive goods in C87.
4016.93.50	Gaskets, washers and other seals, of noncellular vulcanized rubber other than hard rubber, not for use in automotive goods in C87.
4016.94.00	Boat or dock fenders, whether or not inflatable, of noncellular vulcanized rubber other than hard rubber.
4016.99.03	Containers of noncellular vulcanized rubber, other than hard rubber, of a kind for packing, transport or marketing of merchandise.
4016.99.30	Articles made of noncellular vulcanized natural rubber, used as vibration control goods in vehicles of 8701 through 8705.
4016.99.35	Articles made of noncellular vulcanized natural rubber, not used as vibration control goods in vehicles of 8701 through 8705 nesoi.
4016.99.55	Articles nesoi, of noncellular vulcanized synthetic rubber other than hard rubber, used as vibration control goods in veh 8701/8705.
4016.99.60	Articles of noncellular vulcanized synthetic rubber other than hard rubber.
4017.00.00	Hard rubber (for example, ebonite) in all forms, including waste and scrap; articles of hard rubber.
4104.11.10	Tanned whole bovine skin and hide upper/lining leather, w/o hair on, unit surface area n/o 2.6 sq m, in the wet state.
4104.11.20	Tanned whole bovine skin and hide leather (not upper/lining), w/o hair on, unit surface area n/o 2.6 sq m, in the wet state.
4104.11.30	Full grain unsplit or grain split buffalo hide or skin, w/o hair on, tanned but not further prepared, surface ov 2.6 m2, in the wet state.
4104.11.40	Full grain unsplit/grain split bovine nesoi and equine upper & sole hides/skins, w/o hair, tanned but not further prepared, in the wet state.
4104.11.50	Full grain unsplit/grain split bovine (except buffalo) nesoi and equine hides/skins, w/o hair, tanned not further prepared, in the wet state.
4104.19.10	Whole bovine skin upper or lining leather, w/o hair on, unit surface n/o 2.6 sq m, tanned but not further prepared, in the wet state.
4104.19.20	Whole bovine skin leather (not upper or lining), w/o hair on, surface n/o 2.6 sq m, tanned but not further prepared, in the wet state.
4104.19.30	Buffalo hides and skins nesoi, w/o hair on, unit surface area ov 2.6 m2, tanned but not further prepared, in the wet state.
4104.19.40	Upper and sole bovine (except buffalo) and equine hides and skins, nesoi, w/o hair, tanned but not further prepared, in the wet state.
4104.19.50	Bovine (except buffalo) and equine hides and skins (not upper/sole) nesoi, w/o hair, tanned but not further prepared, in the wet state.
4104.41.10	Crust whole bovine hide and skin upper or lining leather, w/o hair on, unit surface n/o 2.6 sq m, tanned but not further prepared.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4104.41.20	Crust whole bovine hide and skin leather (not upper or lining), w/o hair on, surface n/o 2.6 sq m, tanned but not further prepared.
4104.41.30	Crust full grain unsplit or grain split buffalo hides and skins, surface area over 2.6 m2, without hair on, tanned but not further prepared.
4104.41.40	Crust full grain unsplit/grain split bovine (ex. buffalo) nesoi/equine hides/skins upper/sole leather, w/o hair, tanned not further prepared.
4104.41.50	Crust full grain unsplit/grain split bovine (except buffalo) nesoi and equine hides and skins, nesoi, w/o hair, tanned not further prepared.
4104.49.10	Crust whole bovine hide and skin upper or lining leather, w/o hair on, unit surface n/o 2.6 sq m, tanned but not further prepared, nesoi.
4104.49.20	Crust whole bovine hide and skin (not upper or lining leather), w/o hair on, surface n/o 2.6 sq m, tanned but not further prepared, nesoi.
4104.49.30	Crust buffalo hides and skins nesoi, without hair on, surface area over 2.6 m2, tanned but not further prepared.
4104.49.40	Crust upper and sole equine and bovine (except buffalo) nesoi hides and skins, nesoi, w/o hair, tanned but not further prepared.
4104.49.50	Crust bovine (except buffalo) nesoi and equine hides and skins, nesoi, w/o hair, tanned but not further prepared.
4105.10.10	Sheep or lamb skins, without wool on, tanned but not further prepared, wet blue.
4105.10.90	Sheep or lamb skins, without wool on, tanned but not further prepared, in the wet state other than wet blue.
4105.30.00	Sheep or lamb skins, without wool on, tanned but not further prepared, in the dry state (crust).
4106.21.10	Hides and skins of goats or kids, without hair on, tanned but not further prepared, wet blue.
4106.21.90	Hides and skins of goats or kids, without hair on, tanned but not further prepared, in the wet state other than wet blue.
4106.22.00	Hides and skins of goats or kids, without hair on, tanned but not further prepared, in the dry state (crust).
4106.31.10	Hides and skins of swine, without hair on, tanned but not further prepared, wet blue.
4106.31.90	Hides and skins of swine, without hair on, tanned but not further prepared, in the wet state other than wet blue.
4106.32.00	Hides and skins of swine, without hair on, tanned but not further prepared, in the dry state (crust).
4106.40.00	Tanned or cust hides and skins of reptiles, whether or not split, but not further prepared.
4106.91.00	Hides and skins of animals nesoi, without hair on, tanned but not further prepared, in the wet state (including wet-blue).
4106.92.00	Hides and skins of animals nesoi, without hair on, tanned but not further prepared, in the dry state (crust).
4107.11.10	Full grain unsplit whole bovine upper or lining leather, w/o hair on, surface n/o 2.6 m2, prepared after tanning or crusting, not head 4114.
4107.11.20	Full grain unsplit whole bovine leather (not upper/lining), w/o hair on, not fancy, n/o 2.6 m2, prepared after tanning or crust, not head 4114.
4107.11.30	Full grain unsplit whole bovine leather (not upper/lining), w/o hair on, fancy, n/o 2.6 m2, prepared after tanning or crusting, not head 4114.
4107.11.40	Full grain unsplit whole buffalo leather, without hair on, surface over 2.6 sq m, prepared after tanning or crusting, not heading 4114.
4107.11.50	Full grain unsplit upholstery leather of bovines (not buffalo) nesoi and equines, w/o hair on, prepared after tanning or crusting, not 4114.
4107.11.60	Full grain unsplit upper & sole leather of bovines (not buffalo) nesoi or equine, w/o hair on, prepared after tanning or crusting, not 4114.
4107.11.70	Full grain unsplit whole bovine (not buffalo) nesoi and equine leather nesoi, w/o hair, prepared after tanning/crusting, not fancy, not 4114.
4107.11.80	Full grain unsplit whole bovine (not buffalo) nesoi and equine leather nesoi, w/o hair, prepared after tanning or crusting, fancy, not 4114.
4107.12.10	Grain split whole bovine skin upper or lining leather, w/o hair on, unit surface n/o 2.6 sq m, prepared after tanning or crusting, not 4114.
4107.12.20	Grain split whole bovine skin leather (not upper or lining), w/o hair, not fancy, n/o 2.6 sq m, prepared after tanning or crusting, not 4114.
4107.12.30	Grain split whole bovine skin leather (not upper or lining), w/o hair on, fancy, n/o 2.6 sq m, prepared after tanning or crusting, not 4114.
4107.12.40	Grain split whole buffalo leather, without hair on, unit surface area over 2.6 sq m, prepared after tanning or crusting, not of heading 4114.
4107.12.50	Grain split whole upholstery leather of bovines (not buffalo) nesoi and equines, w/o hair on, prepared after tanning or crusting, not 4114.
4107.12.60	Grain split whole upper & sole leather of bovines (not buffalo) nesoi or equines, w/o hair on, prepared after tanning or crusting, not 4114.
4107.12.70	Grain split whole bovine (not buffalo) nesoi and equine nesoi leathers, w/o hair on, prepared after tanning or crusting, not fancy, not 4114.
4107.12.80	Grain split whole bovine (not buffalo) nesoi and equine nesoi leathers, without hair on, prepared after tanning or crusting, fancy, not 4114.
4107.19.10	Whole bovine skin upper or lining leather nesoi, w/o hair on, unit surface n/o 2.6 m2, prepared after tanning or crusting, not of head 4114.
4107.19.20	Whole bovine skin leather (not upper or lining) nesoi, w/o hair on, not fancy, n/or 2.6 sq m, prepared after tanning or crusting, not 4114.

HTSUS subheading	Product description
4107.19.30	Whole bovine skin leather (not upper or lining) nesoi, w/o hair on, fancy, surface n/o 2.6 m2, prepared after tanning or crusting, not 4114.
4107.19.40	Whole buffalo skin leather (not full grain unsplits/grain splits), w/o hair on, over 2.6 sq m, prepared after tanning or crusting, not 4114.
4107.19.50	Whole upholstery leather of bovines (not buffalo) nesoi and equines nesoi, without hair on, prepared after tanning or crusting, not 4114.
4107.19.60	Whole upper & sole leather of bovines (not buffalo) nesoi or equines nesoi, without hair on, prepared after tanning or crusting, not 4114.
4107.19.70	Whole bovine (not buffalo) and equine leather, nesoi, without hair on, not fancy, prepared after tanning or crusting, not of heading 4114.
4107.19.80	Whole bovine (not buffalo) and equine leather, nesoi, without hair on, fancy, prepared after tanning or crusting, not of heading 4114.
4107.91.40	Full grain unsplit buffalo leather (not whole), w/o hair on, prepared after tanning or crusting (including parchment-dressed), not head 4114.
4107.91.50	Full grain unsplit upholstery leather of bovines (not buffalo) & equines, not whole, w/o hair, prepared after tanning or crusting, not 4114.
4107.91.60	Full grain unsplit upper & sole leather of bovines (not buffalo) or equines, not whole, w/o hair, prep. after tanning or crusting, not 4114.
4107.91.70	Full grain unsplit bovine (not buffalo) & equine leather, not whole, w/o hair on, nesoi, not fancy, prep. after tanning/crusting, not 4114.
4107.91.80	Full grain unsplit bovine (not buffalo) & equine leather, not whole, w/o hair on, nesoi, fancy, prepared after tanning or crusting, not 4114.
4107.92.40	Grain splits buffalo leather (not whole), without hair on, prepared after tanning or crusting, other than of heading 4114.
4107.92.50	Grain splits upholstery leather of bovines (not buffalo) and equines, not whole, w/o hair on, prepared after tanning or crusting, not 4114.
4107.92.60	Grain splits upper & sole leather of bovines (not buffalo) or equines, not whole, w/o hair on, prepared after tanning or crusting, not 4114.
4107.92.70	Grain splits bovine (not buffalo) and equine leather, not whole, w/o hair on, nesoi, not fancy, prepared after tanning or crusting, not 4114.
4107.92.80	Grain splits bovine (not buffalo) and equine leather, not whole, without hair on, nesoi, fancy, prepared after tanning or crusting, not 4114.
4107.99.40	Buffalo leather other than full grains unsplit & grain splits, not whole, w/o hair on, prepared after tanning or crusting, not heading 4114.
4107.99.50	Upholstery leather of bovines (not buffalo) or equines, not whole, nesoi, without hair on, prepared after tanning or crusting, not 4114.
4107.99.60	Upper & sole leather of bovines (not buffalo) or equines, not whole, nesoi, w/o hair on, prepare after tanning or crusting, not 4114.
4107.99.70	Bovine (not buffalo) and equine leather, not whole, nesoi, without hair on, not fancy, prepared after tanning or crusting, not heading 4114.
4107.99.80	Bovine (not buffalo) and equine leather, not whole, nesoi, without hair on, fancy, prepared after tanning or crusting, not of heading 4114.
4112.00.30	Sheep or lamb skin leather, without wool on, not fancy, prepared after tanning or crusting, other than of heading 4114.
4112.00.60	Sheep or lamb skin leather, without wool on, fancy, further prepared after tanning or crusting, other than of heading 4114.
4113.10.30	Goat or kidskin leather, without hair on, not fancy, further prepared after tanning or crusting, other than of heading 4114.
4113.10.60	Goat or kidskin leather, without hair on, fancy, further prepared after tanning or crusting, other than of heading 4114.
4113.20.00	Leather of swine, without hair on, further prepared after tanning or crusting, other than leather of heading 4114.
4113.30.30	Reptile leather, not fancy, further prepared after tanning or crusting, other than leather of heading 4114.
4113.30.60	Reptile leather, fancy, further prepared after tanning or crusting, other than leather of heading 4114.
4113.90.30	Leather of animals nesoi, without hair on, not fancy, further prepared after tanning or crusting, other than leather of heading 4114.
4113.90.60	Leather of animals nesoi, without hair on, fancy, further prepared after tanning or crusting, other than leather of heading 4114.
4114.10.00	Chamois (including combination chamois) leather.
4114.20.30	Patent leather.
4114.20.40	Patent laminated leather or metallized leather, of calf or kip.
4114.20.70	Patent laminated leather or metallized leather, other than calf or kip.
4115.10.00	Composition leather with a basis of leather or leather fiber, in slabs, sheets or strip, whether or not in rolls.
4201.00.30	Dog leashes, collars, muzzles, harnesses and similar dog equipment, of any material.
4201.00.60	Saddlery and harnesses for animals nesoi, (incl. traces, leads, knee pads, muzzles, saddle cloths and bags and the like), of any material.
4202.11.00	Trunks, suitcases, vanity & all other cases, occupational luggage & like containers, surface of leather, composition or patent leather.

HTSUS subheading	Product description
4202.12.21	Trunks, suitcases, vanity and attache cases and similar containers, with outer surface of plastics.
4202.12.29	Occupational luggage and similar containers, with outer surface of plastics.
4202.12.40	Trunks, suitcases, vanity & attache cases, occupational luggage & like containers, surfaces of cotton, not of pile or tufted construction.
4202.12.60	Trunks, suitcases, vanity & attache cases, occupational luggage & like containers, w outer surface of veg. fibers, excl. cotton.
4202.12.81	Trunks, suitcases, vanity & attache cases, occupational luggage and similar containers, with outer surface of MMF materials.
4202.12.89	Trunks, suitcases, vanity & attache cases, occupational luggage and similar containers, with outer surface of textile materials nesoi.
4202.19.00	Trunks, suitcases, vanity cases, attache cases, occupational luggage & like containers surface of vulcanized fiber or paperboard nesoi.
4202.21.30	Handbags, with or without shoulder strap or without handle, with outer surface of reptile leather.
4202.21.60	Handbags, with or without shoulder strap or without handle, with outer surface of leather, composition or patent leather, nesoi, n/o $20 ea..
4202.21.90	Handbags, with or without shoulder strap or without handle, with outer surface of leather, composition or patent leather, nesoi, over $20 ea..
4202.22.15	Handbags, with or without shoulder straps or without handle, with outer surface of sheeting of plastics.
4202.22.35	Handbags with or without shoulder strap or without handle, with outer surface of textile materials, wholly or in part of braid, of abaca.
4202.22.40	Handbags with or without shoulder strap or without handle, with outer surface of textile materials, wholly or in part of braid, nesoi.
4202.22.45	Handbags with or without shoulder strap or without handle, with outer surface of cotton, not of pile or tufted construction or braid.
4202.22.60	Handbags with or w/o shoulder strap or w/o handle, outer surface of veg. fibers, exc. cotton, not of pile or tufted construction or braid.
4202.22.70	Handbags with or w/o shoulder strap or w/o handle, with outer surface containing 85% or more of silk, not braided.
4202.22.81	Handbags with or without shoulder strap or without handle, with outer surface of MMF materials.
4202.22.89	Handbags with or without shoulder strap or without handle, with outer surface of textile materials nesoi.
4202.29.10	Handbags w. or w/o shld. strap or w/o handle of mat. (o/t leather, shtng. of plas., tex. mat., vul. fib. or paperbd.), paper cov., of plas..
4202.29.20	Handbags w. or w/o shld. strap or w/o handle of mat. (o/t leather, shtng. of plas., tex. mat., vul. fib. or paperbd.), paper cov., of wood.
4202.29.50	Handbags w. or w/o shld. strap or w/o handle of mat. (o/t leather, shtng. of plas., tex. mat., vul. fib. or paperbd.), pap.cov.,of mat. nesoi.
4202.29.90	Handbags with or without shoulder straps or without handle, with outer surface of vulcanized fiber or of paperboard, not covered with paper.
4202.31.30	Articles of a kind normally carried in the pocket or handbag, with outer surface of reptile leather.
4202.31.60	Articles of a kind normally carried in the pocket or handbag, with outer surface of leather, composition or patent leather, nesoi.
4202.32.10	Articles of a kind normally carried in the pocket or handbag, with outer surface of reinforced or laminated plastics.
4202.32.20	Articles of a kind normally carried in the pocket or handbag, with outer surface of plastic sheeting, nesoi.
4202.32.40	Articles of a kind normally carried in the pocket or handbag, with outer surface of cotton, not of pile or tufted construction.
4202.32.80	Articles of a kind normally carried in the pocket or handbag, with outer surface of vegetable fibers, not of pile or tufted construction, nesoi.
4202.32.85	Articles of a kind normally carried in the pocket or handbag, with outer surface 85% or more silk or silk waste.
4202.32.91	Articles of a kind normally carried in the pocket or handbag, with outer surface of cotton.
4202.32.93	Articles of a kind normally carried in the pocket or handbag, with outer surface of MMF.
4202.32.99	Articles of a kind normally carried in the pocket or handbag, with outer surface of other textile materials.
4202.39.10	Articles of kind usually carried in pocket or handbag (o/t leather, shtng. of plas., tex. mat., vul. fib. or paperbd.), pap. cov., of plas.
4202.39.20	Articles of kind usually carried in pocket or handbag (o/t leather, shtng. of plas., tex. mat., vul. fib. or paperbd.), pap. cov., of wood.
4202.39.50	Articles of kind usu. carried in pocket or handbag (o/t lea., shtng. of plas., tex. mat., vul. fib. or paperbd.), pap. cov., of mat. nesoi.
4202.39.90	Articles of a kind normally carried in the pocket or handbag, with outer surface of vulcanized fiber or of paperboard.
4202.91.10	Golf bags, with outer surface of leather or composition leather.
4202.91.90	Cases, bags and containers nesoi, other than golf bags, with outer surface of leather, of composition leather.
4202.92.04	Insulated beverage bag w/outer surface textiles, interior only flexible plastic container storing/dispensing beverage thru flexible tubing.
4202.92.08	Insulated food or beverage bags with outer surface of textile materials, nesoi.
4202.92.10	Insulated food or beverage bags with outer surface of sheeting of plastic.
4202.92.15	Travel, sports and similar bags with outer surface of cotton, not of pile or tufted construction.
4202.92.20	Travel, sports and similar bags with outer surface of vegetable fibers, excl. cotton, not of pile construction.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4202.92.31	Travel, sports and similar bags with outer surface of MMF textile materials.
4202.92.33	Travel, sports and similar bags with outer surface of textile materials of paper yarn, silk or cotton.
4202.92.39	Travel, sports and similar bags with outer surface of textile materials other than MMF, paper yarn, silk, cotton.
4202.92.45	Travel, sports and similar bags with outer surface of plastic sheeting.
4202.92.50	Musical instrument cases, with outer surface of plastic sheeting or of textile materials.
4202.92.60	Bags, cases and similar containers, nesoi, with outer surface of cotton.
4202.92.91	Bags, cases and similar containers with outer surface of textile materials, of MMF except jewelry boxes.
4202.92.93	Bags, cases and similar containers with outer surface of textile materials, not of MMF.
4202.92.94	Cases for CDs, CD players, cassettes, or cassette players.
4202.92.97	Bags, cases & similar containers with outer surface of sheeting of plastic materials, not containers for CDs or cassettes, or CD or cassette players.
4202.99.10	Cases, bags and sim. containers, nesoi, of mat. (o/t leather, shtng. of plas., tex. mat., vul. fib., or paperbd.), pap. cov., of plastic.
4202.99.20	Cases & sim. cont., nesoi, of mat. (o/t lea., shtng. of plas., tex. mat., vul. fib. or paperbd.), pap. cov., of wood, not lined with tex.fab.
4202.99.30	Cases, bags & sim. cont., nesoi, of mat. (o/t lea., plas. shtng., tex. mat., vul. fib. or paperbd.), pap. cov., of wood, lined with tex. fab.
4202.99.50	Cases, bags & sim. cont., nesoi, of mat. (o/t lea., plas. shtng., tex. mat., vul. fib. or paperbd.), pap. cov., except of wood or plastic.
4202.99.90	Cases, bags and similar containers, nesoi, with outer surface of vulcanized fiber or of paperboard.
4203.10.20	Articles of apparel, of reptile leather.
4203.10.40	Articles of apparel, of leather or of composition leather, nesoi.
4203.21.20	Batting gloves, of leather or of composition leather.
4203.21.40	Baseball and softball gloves and mitts, excluding batting gloves, of leather or of composition leather.
4203.21.55	Cross-country ski gloves, mittens and mitts, of leather or of composition leather.
4203.21.60	Ski or snowmobile gloves, mittens and mitts, nesoi, of leather or of composition leather.
4203.21.70	Ice hockey gloves, of leather or of composition leather.
4203.21.80	Gloves, mittens and mitts specially designed for use in sports, nesoi, of leather or of composition leather.
4203.29.05	Gloves, wholly of horsehide or cowhide leather not specially designed for use in sports, with fourchettes or sidewalls.
4203.29.08	Gloves, wholly of horsehide or cowhide (except calfskin) leather, not specially designed for use in sports, nesoi.
4203.29.15	Gloves not wholly of horsehide or cowhide leather not specially designed for use in sports, with fourchettes or sidewalls.
4203.29.18	Gloves not wholly of horsehide or cowhide leather not specially designed for use in sports, nesoi.
4203.29.20	Gloves, mittens and mitts of leather or composition leather, nesoi, not seamed.
4203.29.30	Men's gloves, mittens and mitts of leather or composition leather, nesoi, seamed.
4203.29.40	Gloves, mittens and mitts of leather or composition leather, nesoi, not lined, for persons other than men.
4203.29.50	Gloves, mittens and mitts of leather or composition leather, nesoi, lined, for persons other than men.
4203.30.00	Belts and bandoliers with or without buckles, of leather or of composition leather.
4203.40.30	Clothing accessories nesoi, of reptile leather.
4203.40.60	Clothing accessories of leather or of composition leather, nesoi.
4205.00.05	Belting leather cut or wholly or partly manufactured into forms or shapes suit. for conversion into belting for machinery or appliances.
4205.00.10	Articles of leather or composition leather used in machinery or mechanical appliances or for other technical uses, except belting leathers.
4205.00.20	Shoelaces of leather or of composition leather.
4205.00.40	Straps and strops of leather or of composition leather.
4205.00.60	Articles of reptile leather, nesoi.
4205.00.80	Articles of leather or of composition leather, nesoi, excluding reptile leather.
4302.11.00	Tanned or dressed whole furskins of mink, with or without head, tail or paws, not assembled.
4302.19.13	Tanned/dressed whole skins of Astrakhan, Broadtail, Caracul, Persian, Indian, Mongolian, Chinese & Tibetan lamb, not assembled.
4302.19.15	Tanned or dressed whole furskins of silver, black or platinum fox (including mutations), with or without head, tail or paws, not assembled.
4302.19.30	Tanned or dressed whole furskins of beaver, chinchilla, ermine, lynx, raccoon, sable, other specified animals, not dyed, not assembled.
4302.19.45	Tanned or dressed whole furskins of beaver, chinchilla, ermine, lynx, raccoon, sable, wolf, other specified animals, dyed, not assembled.
4302.19.55	Tanned or dressed whole furskins of rabbit or hare, with or without head, tail or paws, not assembled.
4302.19.60	Tanned or dressed whole furskins, nesoi, with or without head, tail or paws, not assembled, not dyed.
4302.19.75	Tanned or dressed whole furskins, nesoi, with or without head, tail or paws, not assembled, dyed.
4302.20.30	Heads, tails, paws, other pieces or cuttings of dressed or tanned furskins, of beaver, ermine, wolf, other specified animals, nt assembled.
4302.20.60	Heads, tails, paws and other pieces or cuttings of dressed or tanned furskins, nesoi, not assembled, not dyed.
4302.20.90	Heads, tails, paws and other pieces or cuttings of dressed or tanned furskins, nesoi, not assembled, dyed.
4302.30.00	Whole furskins and pieces or cuttings thereof, tanned and dressed, assembled.
4303.10.00	Articles of apparel and clothing accessories, of furskins.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4303.90.00	Articles of furskin, nesoi.
4304.00.00	Artificial fur and articles thereof.
4401.10.00	Fuel wood, in logs, in billets, in twigs, in faggots or similar forms.
4401.21.00	Coniferous wood in chips or particles.
4401.22.00	Nonconiferous wood in chips or particles.
4401.31.00	Sawdust and wood waste and scrap, pellets.
4401.39.20	Artificial fire logs, composed of wax and sawdust, with or without added materials.
4401.39.40	Sawdust and wood waste and scrap, excluding pellets or artificial logs, nesoi.
4402.10.00	Wood charcoal (including shell or nut charcoal), whether or not agglomerated, of bamboo.
4402.90.00	Wood charcoal (including shell or nut charcoal), whether or not agglomerated, other than of bamboo.
4403.10.00	Wood in the rough whether or not stripped of bark or sapwood, or roughly squared, treated with paint, stain, creosote or other preservatives.
4403.20.00	Coniferous wood in the rough, whether or not stripped of bark or sapwood or roughly squared, not treated with preservatives.
4403.41.00	Wood in the rough/roughly squared, of Dark Red Meranti, Light Red Meranti and Meranti Bakau, not treated with paint/stain/cresote/other preserv.
4403.49.01	Wood in the rough/roughly squared, of other tropical wood, not treated with paint/stain/creosote/other preserv.
4403.91.00	Oak wood in the rough, whether or not stripped of bark or sapwood, or roughly squared, not treated with preservatives.
4403.92.00	Beech wood in the rough, not treated with preservatives.
4403.99.00	Wood in the rough, nesoi.
4404.10.00	Coniferous wood, roughly shaped into poles, pickets, stakes, sticks and other forms, to be finished into specific articles or products.
4404.20.00	Nonconiferous wood, roughly shaped into poles, pickets, stakes, sticks and other forms, to be finished into specific articles or products.
4405.00.00	Wood wool (excelsior); wood flour.
4406.10.00	Railway or tramway sleepers (cross-ties) of wood, not impregnated.
4406.90.00	Railway or tramway sleepers (cross-ties) of wood, impregnated.
4407.10.01	Coniferous wood sawn or chipped lengthwise, sliced or peeled, of a thickness exceeding 6 mm.
4407.21.00	Dark Red Meranti, Light Red Meranti and other specified tropical woods, sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.22.00	Okoume, Obeche, Sapelli and other specified tropical woods, sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.25.00	Dark Red Meranti, Light Red Meranti and Meranti Bakau wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.26.00	White Lauan, White Meranti, White Seraya, Yellow Meranta and Alan wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.27.00	Sapelli wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.28.00	Iroko wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.29.01	Tropical wood specified in chapter 44 subheading note 1, nesoi, sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.91.00	Oak wood, sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.92.00	Beech wood, sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.93.00	Maple wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.94.00	Cherry wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.95.00	Ash wood sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4407.99.01	Nonconiferous woods, nesoi, sawn or chipped lengthwise, sliced or peeled, over 6 mm thick.
4408.10.01	Coniferous veneer sheets and sheets for plywood & coniferous wood sawn/sliced/peeled not over 6 mm thick.
4408.31.01	Dark Red Meranti, Light Red Meranti and Meranti Bakau veneer sheets and sheets for plywood and other wood sawn/sliced/peeled, n/o 6 mm thick.
4408.39.02	Other tropical wood veneer sheets and sheets for plywood, and wood sawn/sliced/peeled n/o 6 mm thick.
4408.90.01	Nontropical nonconiferous veneer sheets and sheets for plywood and other wood sawn/sliced/peeled, not over 6 mm thick.
4409.10.05	Coniferous wood continuously shaped along any of its ends, whether or not also continuously shaped along any its edges or faces.
4409.10.10	Coniferous wood siding continuously shaped along any of its edges or faces but not on its ends.
4409.10.20	Coniferous wood flooring continuously shaped along any of its edges or faces but not on its ends.
4409.10.40	Standard wood moldings of pine (Pinus spp.) continuously shaped along any of its edges or faces but not on its ends.
4409.10.45	Standard coniferous wood moldings, other than of pine, continuously shaped along any of its edges or faces but not on its ends.
4409.10.50	Coniferous wood moldings, other than standard type, continuously shaped along any of its edges or faces but not on its ends.
4409.10.60	Coniferous wood dowel rods, plain, continuously shaped along any of its edges or faces but not on its ends.
4409.10.65	Coniferous wood dowel rod, sanded/grooved/otherwise advanced in condition, continuously shaped along any of edges or faces but not its ends.

HTSUS subheading	Product description
4409.10.90	Coniferous wood, other than siding, flooring, moldings or dowel rod, continuously shaped along any of its edges or faces but not on its ends.
4409.21.05	Nonconiferous wood (bamboo) continuously shaped along any of its ends, wether or not also continuously shaped along any its edges or faces.
4409.21.90	Bamboo, other than continuously shaped along any of its ends.
4409.22.05	Nonconiferous tropical wood continuously shaped along any ends, whether or not also continuously shaped along any edges or faces.
4409.22.10	Nonconiferous tropical wood siding, whether or not continuously shaped along its edges or faces but not its ends.
4409.22.25	Nonconiferous tropical wood flooring, whether or not continuously shaped along its edges or faces but not its ends.
4409.22.40	Nonconiferous tropical wood standard moldings, whether or not continuously shaped along its edges or faces but not its ends.
4409.22.50	Other nonconiferous tropical wood moldings, whether or not continuously shaped along its edges or faces but not its ends.
4409.22.60	Plain nonconiferous tropical wood dowel rods, whether or not continuously shaped along its edges or faces but not its ends.
4409.22.65	Nonconif. tropical wood dowel rods, sanded/grooved/otherwise advanced in condition, whether or not continuous. along edges or faces but not ends.
4409.22.90	Other nonconiferous tropical wood, whether or not continuously shaped along its edges or faces but not its ends.
4409.29.06	Other nonconiferous wood, continuously shaped along any ends, whether or not also continuously shaped along any edges or faces.
4409.29.11	Other nonconiferous wood siding, whether or not continuously shaped along its edges or faces but not its ends.
4409.29.26	Other nonconiferous wood flooring, whether or not continuously shaped along its edges or faces but not its ends.
4409.29.41	Other nonconiferous standard wood moldings, whether or not continuously shaped along its edges or faces but not its ends.
4409.29.51	Other nonconiferous wood moldings, whether or not continuously shaped along its edges or faces but not its ends.
4409.29.61	Plain other nonconif. wood dowel rods, whether or not continuously shaped along edges or faces but not ends.
4409.29.66	Other nonconif. wood dowel rods, sanded/grooved/otherwise advanced in condition, whether or not continuously shaped along edges or faces but not ends.
4409.29.91	Other nonconiferous wood, whether or not continuously shaped along its edges or faces but not its ends.
4410.11.00	Waferboard, including oriented strand board, of wood.
4410.12.00	Oriented strand board and waferboard, of wood, unworked or not further worked than sanded.
4410.19.00	Particle board and similar board of wood, other than waferboard.
4410.90.00	Particle board and similar board of ligneous materials other than wood.
4411.12.10	MDF, =5 mm thick, not mechanically worked or surface covered.
4411.12.20	MDF, <=5 mm thick, for construction, laminated.
4411.12.30	MDF, >=5 mm thick, for construction, not laminated, nesoi.
4411.12.60	Fiberboard of a density over 0.5 g/cm3 but not over 0.8 g/cm3, not mechanically worked surface covered (Except for oil treatment).
4411.12.90	MDF, <=5 mm thick, not for construction, nesoi.
4411.13.10	MDF, >5 mm but <=9 mm thick, not mechanically worked or surface covered.
4411.13.20	MDF, >5 mm but <=9 mm thick, for construction, laminated.
4411.13.30	MDF, >5 mm but <=9 mm thick, for construction, not laminated, nesoi.
4411.13.60	Fiberboard of a density over 0.5 g/cm3 but not over 0.8 g/cm3, not mechanically worked surface covered(except for oil treatment).
4411.13.90	MDF, >5 mm but <=9 mm thick, not for construction, nesoi.
4411.14.10	Fiberboard of a thickness exceeding 9 mm, not mechanically worked or surface covered.
4411.14.20	Fiberboard of a thickness exceeding 9 mm, edgeworked continuously, laminated, for construction uses.
4411.14.30	Fiberboard of a thickness exceeding 9 mm, tongued, grooved or rabbetted continuously, for construction uses, nesoi.
4411.14.60	Fiberboard of a thickness exceeding 9 mm, not mechanically worked surface covered (except for oil treatment).
4411.14.90	Fiberboard nesoi,of a thickness exceeding 9 mm.
4411.92.10	Fiberboard of a density exceeding 0.8 g/cm3, not mechanically worked or surface covered.
4411.92.20	Fiberboard, of a density exceeding 0.8 g/cm3, mechanically worked, not surface covered (except for oil treatment).
4411.92.30	Fiberboard, of a density exceeding 0.8 g/cm3, mechanically edged-worked, for construction uses.
4411.92.40	Fiberboard nesoi, density exceeding 0.8 g/cm3.
4411.93.10	Fiberboard, not MDF, of a density >0.5 but <=0.8 g/cm3, not mechanically worked or surface covered.
4411.93.20	Fiberboard, not MDF, of a density >0.5 but <=0.8 g/cm3, edgeworked continuously, laminated, for construction uses.
4411.93.30	Fiberboard, not MDF, of a density >0.5 but <=0.8 g/cm3, tongued, grooved or rabbetted continuously, for construction, nesoi.
4411.93.60	Fiberboard of a density over 0.5 g/cm3 but not over 0.8 g/cm3, not mechanically worked surface covered (Except for oil).
4411.93.90	Fiberboard, not MDF, of a density >0.5 but <=0.8 g/cm3, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4411.94.00	Fiberboard of a density exceeding 0.35 g/cm3 but not exceeding 0.5 g/cm3, not mechanically worked or surface covered.
4412.10.05	Plywood, veneered panels and similar laminated wood, of bamboo.
4412.10.90	Veneered panels and similar laminated wood, of bamboo, other than plywood.
4412.31.06	Plywood sheets n/o 6 mm thick, tropical wood outer ply, birch face ply, not surface covered beyond clear/transparent.
4412.31.26	Plywood sheets n/o 6 mm thick, tropical wood outer ply, Spanish cedar or walnut face ply, not surface covered beyond clear/transparent.
4412.31.41	Plywood sheets n/o 6 mm thick, with specified tropical wood outer ply, with face ply nesoi, not surface covered beyond clear/transparent.
4412.31.52	Plywood sheets n/o 6 mm thick, tropical wood nesoi at least one outer ply, with face ply nesoi, not surface covered beyond clear/transparent.
4412.31.61	Plywood sheets n/o 6 mm thick, with certain specified tropical wood outer ply, surface covered beyond clear or transparent.
4412.31.92	Plywood sheets n/o 6 mm thick, tropical wood nesoi at least one outer ply, surface covered beyond clear or transparent.
4412.32.06	Plywood sheets n/o 6 mm thick, outer ply of nonconiferous wood, birch face ply, not surface covered beyond clear/transparent.
4412.32.26	Plywood sheets n/o 6 mm thick, outer ply nonconiferous wood, face ply Spanish ceder or walnut, not surface covered beyond clear/transparent.
4412.32.32	Plywood sheets n/o 6 mm thick, outerply of nonconiferous wood nesoi, face ply nesoi, not surface covered beyond clear/transparent.
4412.32.57	Plywood sheets n/o 6 mm thick, outerply of nonconiferous wood nesoi, face ply nesoi, surface covered beyond clear/transparent.
4412.39.10	Plywood of wood sheets, n/o 6 mm thick each, with outer plies of coniferous wood, face ply of Parana pine, not or clear surface covered.
4412.39.30	Plywood of wood sheets, n/o 6 mm thick each, with outer plies of coniferous wood, European red pine face ply, not or clear surface covered.
4412.39.40	Plywood of wood sheets, n/o 6 mm thick each, with outer plies of coniferous wood, with face ply nesoi, not or clear surface covered.
4412.39.50	Plywood of wood sheets, n/o 6 mm thick each, with outer plies of coniferous wood, nesoi, surface covered, nesoi.
4412.94.10	Plywood nesoi, at least one nonconiferous outer ply, not surface-covered beyond clear/transparent, face ply of birch.
4412.94.31	Blockboard etc.: plywood nesoi, at least one nonconifer outer ply, not surface-covered beyond clear/transparent, not w/face ply of birch.
4412.94.41	Blockboard etc.: plywood nesoi, at least one nonconiferous outer ply, surface covered other than clear or transparent.
4412.94.51	Blockboard etc.: veneered panels and similar laminated wood w/at least one nonconiferous outer ply, nesoi.
4412.94.60	Blockboard etc.: plywood nesoi, other outer plies, not surf.-cov. Beyond clear/transp., face ply Parana pine.
4412.94.70	Blockboard etc.: plywood nesoi, other outer plies, not surf.-cov. Beyond clear/transp., face ply Europe red pine.
4412.94.80	Blockboard etc.: plywood nesoi, other outer plies, not surface-covered beyond clear/transparent, face ply nesoi.
4412.94.90	Blockboard etc.: plywood nesoi, other outer plies, surface covered other than clear or transparent.
4412.94.95	Blockboard etc.: veneered panels and similar laminated wood nesoi, other outer plies.
4412.99.06	Plywood nesoi, veneered panel & similar laminated wood w/nonconiferous outer ply, at least one layer of particle board.
4412.99.10	Not blockboard: plywood at least 1 outer ply of nonconif wood, nesoi, with a face ply of birch, not surface covered or clear/transparent.
4412.99.31	Not blockboard: plywood nesoi, at least 1 nonconiferous outer ply, not surface-covered beyond clear/transparent, not w/face ply of birch.
4412.99.41	Not blockboard: plywood nesoi, at least 1 nonconiferous outer ply, surface covered other than clear or transparent.
4412.99.51	Not blockboard: veneered panels and similar laminated wood w/at least 1 nonconiferous outer ply, nesoi.
4412.99.57	Not blockboard: plywood/veneered panel/sim. Laminated wood nesoi, at least 1 nonconiferous outer ply,at least 1 layer of particle board.
4412.99.60	Not blockboard: plywood nesoi, at least 1 nonconiferous outer ply, no particle board, not surf.-cov. Beyond clear/transp., face ply Parana pine.
4412.99.70	Not blockboard: plywood nesoi, at least 1 nonconif. outer ply, no particle board, not surf.-cov. Beyond clear/transp., face ply Europe red pine.
4412.99.80	Not blockboard: plywood nesoi, at least 1 nonconif. outer ply, no particle board, not surface-covered beyond clear/transparent, face ply nesoi.
4412.99.90	Not blockboard: plywood, veneer panels and similar laminated wood, at least 1 nonconiferous outer ply, nesoi.
4412.99.95	Not blockboard: veneered panels and similar laminated wood, nesoi, at least 1 nonconiferous outer ply, no particle board, nesoi.
4413.00.00	Densified wood, in blocks, plates, strips or profile shapes.
4415.10.30	Packing boxes and cases of wood with solid sides, lids and bottoms.
4415.10.60	Wooden containers designed for use in the harvesting of fruits and vegetables.
4415.10.90	Wood cases, boxes, crates, drums and similar packings nesoi; cable-drums of wood.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4415.20.40	Wooden pallets, box-pallets and other load boards designed for use in the harvesting of fruits and vegetables.
4415.20.80	Wooden pallets, box-pallets and other load boards, other than designed for use in the harvesting of fruits and vegetables.
4416.00.30	Wooden casks, barrels and hogsheads.
4416.00.60	Wooden staves and hoops; tight barrelheads of softwood.
4416.00.90	Wooden vats, tubs and other coopers' products and parts thereof.
4417.00.60	Wooden brush backs.
4417.00.80	Wooden tools, tool bodies, tool handles, broom or brush bodies and handles nesoi; wooden boot or shoe lasts and trees.
4418.10.00	Wooden windows, French-windows and their frames.
4418.20.40	French doors of wood.
4418.20.80	Doors of wood, other than French doors.
4418.40.00	Wooden formwork (shuttering) for concrete constructional work.
4418.50.00	Wooden shingles and shakes.
4418.60.00	Builders' joinery and carpentry of wood, Posts and Beams.
4418.73.10	Assembled flooring panels of bamboo, for mosaic floors, solid.
4418.73.20	Assembled flooring panels of bamboo, for mosaic floors other than solid, having a face ply more than 6mm in thickness.
4418.73.30	Assembled flooring panels of bamboo, for mosaic floors other than solid, having a face ply less than or equal to 6 mm in thickness.
4418.73.40	Assembled flooring panels of bamboo, other than for mosaic, multilayer, having a face ply more than 6mm in thickness.
4418.73.60	Assembled flooring panels of bamboo, other than mosaic, multilayer, having a face ply <= equal to 6mm in thickness, of unidirectional bamboo.
4418.73.70	Assembled flooring panels of bamboo, other than for mosaic, multilayer, having a face ply <=6mm in thickness, not of unidirectional bamboo.
4418.73.90	Assembled flooring panels of bamboo, other than for mosaic or multilayer, nesoi.
4418.74.10	Assembled wood flooring panels, other than of bamboo, for mosaic floors, solid.
4418.74.20	Assembled wood flooring panels, other than of bamboo, for mosaic floors other than solid, having a face ply more than 6 mm in thickness.
4418.74.90	Assembled wood flooring panels, other than of bamboo, for mosaic floors other than solid, having a face ply less than or equal to 6 mm in thickness.
4418.75.40	Assembled wood flooring panels, other than of bamboo, other than for mosaic, multilayer, having a face ply more than 6 mm in thickness.
4418.75.70	Assembled wood flooring panels, other than of bamboo, other than for mosaic, multilayer, having a face ply less than or equal to 6 mm in thickness.
4418.79.01	Assembled wood flooring panels, other than of bamboo, other than for mosaic or multilayer.
4418.91.10	Builders' joinery and carpentry of wood, of bamboo, drilled or notched lumber studs.
4418.91.90	Builders' joinery and carpentry of wood, of bamboo, other than drilled or notched lumber studs.
4418.99.10	Builders' joinery and carpentry of wood, of wood other than of bamboo, drilled or notched lumber studs.
4418.99.90	Builders' joinery and carpentry of wood, of wood other than of bamboo, other than drilled or notched lumber studs.
4420.90.45	Wooden jewelry boxes, silverware chests, microscope, tool or utensil cases, similar boxes, cases and chests, not lined with textile fabrics.
4420.90.65	Wooden jewelry boxes, silverware chests, microscope, tool or utensil cases, similar boxes, cases and chests, lined with textile fabrics.
4420.90.80	Wood marquetry and inlaid wood; wooden articles of furniture, nesoi.
4421.91.10	Plain wood dowel pins of bamboo.
4421.91.20	Wood dowel pins of bamboo, sanded, grooved or otherwise advanced in condition.
4421.91.70	Pickets, palings, posts and rails of bamboo, sawn; assembled fence sections of bamboo.
4421.91.93	Theatrical, ballet and operatic scenery and properties, including sets, of bamboo.
4421.91.94	Edge-glued lumber of bamboo.
4421.91.97	Other articles, nesoi, of bamboo, incl pencil slats, burial caskets, gates for confining children or pets.
4421.99.10	Plain coniferous wood dowel pins.
4421.99.15	Plain wood dowel pins, other than of coniferous wood or of bamboo.
4421.99.20	Wood dowel pins of wood other than of bamboo, the foregoing sanded, grooved or otherwise advanced in condition.
4421.99.70	Pickets, palings, posts and rails, sawn, of wood other than of bamboo; assembled fence sections of wood other than of bamboo.
4421.99.93	Theatrical, ballet and operatic scenery and properties, including sets, of wood other than of bamboo.
4421.99.94	Edge-glued lumber of wood other than of bamboo.
4421.99.97	Other articles, nesoi, of wood other than of bamboo, incl pencil slats, burial caskets, gates for confining children or pets.
4501.10.00	Natural cork, raw or simply prepared.
4501.90.20	Waste cork.
4501.90.40	Crushed, granulated or ground cork.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4502.00.00	Natural cork, debacked or roughly squared or in rectangular blocks, plates, sheets or strip (incl. sharp-edged blanks for corks or stoppers).
4503.10.20	Corks and stoppers of natural cork, tapered and of a thickness (or length) greater than the maximum diameter, n/o 19 mm maximum diameter.
4503.10.30	Corks and stoppers wholly of natural cork, tapered & of a thickness (or length) greater than the maximum diam., over 19 mm maximum diam.
4503.10.40	Corks and stoppers of natural cork, tapered & of a thickness (or length) greater than the maximum diam., over 19 mm maximum diam., nesoi.
4503.10.60	Corks and stoppers of natural cork, of a thickness (or length) not greater than the maximum diameter.
4503.90.20	Disks, wafers and washers of natural cork.
4503.90.40	Natural cork wallcoverings, backed with paper or otherwise reinforced.
4503.90.60	Articles of natural cork, other than corks and stoppers.
4504.10.10	Vulcanized sheets and slabs wholly of agglomerated ground or pulverized cork and rubber.
4504.10.20	Insulation of compressed agglomerated cork, coated or not coated.
4504.10.30	Floor coverings of agglomerated cork.
4504.10.40	Agglomerated cork wallcoverings, backed with paper or otherwise reinforced.
4504.10.45	Agglomerated cork stoppers, not tapered, wholly of cork, of a thickness (or length) greater than the maximum diameter.
4504.10.47	Corks, stoppers, disks, wafers and washers of agglomerated cork, nesoi.
4504.10.50	Blocks, plates, sheets and strip; tiles of any shape; solid cylinder; all the foregoing of cork; all the foregoing, nesoi.
4504.90.00	Agglomerated cork and articles of cork, nesoi.
4601.21.40	Woven or partly assembled materials of bamboo, for mats, matting and screens.
4601.21.80	Bamboo floor coverings.
4601.21.90	Mats, matting and screens of bamboo, nesoi.
4601.22.40	Woven or partly assembled materials of rattan for mats, matting and screens.
4601.22.80	Rattan floor coverings.
4601.22.90	Mats, matting and screens of rattan, nesoi.
4601.29.40	Woven or partly assembled materials of willow for mats, matting and screens.
4601.29.60	Woven or partly assembled vegetable materials other than bamboo, rattan or willow, for mats, matting and screens.
4601.29.80	Willow floor coverings.
4601.29.90	Mats, matting and screens of willow, nesoi.
4601.92.05	Plaits of bamboo and similar products of such plaiting materials, whether or not assembled into strips.
4601.92.20	Products of bamboo other than plaits and similar products such as plaiting materials.
4601.93.01	Rattan webbing for mats, matting and screens.
4601.93.05	Plaits of rattan and similar products of such plaiting materials, whether or not assembled into strips.
4601.93.20	Products of rattan other than plaits and similar products such as plaiting materials.
4601.94.05	Plaits of vegetable materials and similar products of such plaiting materials, whether or not assembled into strips.
4601.94.20	Products nesoi, of plaiting materials, bound together in parallel strands or woven, in sheet form, of willow or wood.
4601.94.40	Products nesoi, of plaiting vegetable materials nesoi, bound together in parallel strands or woven, in sheet form.
4601.99.05	Plaits and similar products of plaiting materials (not vegetable), whether or not assembled into strips.
4601.99.90	Products nesoi of plaiting materials (not vegetable), bound together in parallel strands or woven, in sheet form, nesoi.
4602.11.05	Fishing baskets or creels made from bamboo.
4602.11.07	Baskets and bags of bamboo wickerwork.
4602.11.09	Baskets and bags of bamboo other than wickerwork.
4602.11.21	Luggage, handbags and flat goods, whether or not lined, of bamboo.
4602.11.35	Articles of wickerwork, nesoi, of bamboo.
4602.11.45	Basketwork and other articles, nesoi, of one or more of bamboo.
4602.12.05	Fishing baskets or creels made from rattan.
4602.12.14	Baskets and bags of rattan wickerwork.
4602.12.16	Baskets and bags of rattan other than wickerwork.
4602.12.23	Articles of a kind normally carried in the pocket or in the handbag, of rattan.
4602.12.25	Luggage, handbags and flat goods, whether or not lined, of rattan, nesoi.
4602.12.35	Articles of wickerwork, nesoi, of rattan.
4602.12.45	Basketwork and other articles, nesoi, of rattan.
4602.19.05	Fishing baskets or creels made from vegetable materials.
4602.19.12	Baskets and bags, nesoi, whether or not lined, of willow.
4602.19.14	Baskets and bags of palm leaf wickerwork.
4602.19.16	Baskets and bags of palm leaf other than wickerwork.
4602.19.17	Baskets and bags of vegetable material wickerwork, nesoi.
4602.19.18	Baskets and bags of vegetable material, nesoi.
4602.19.22	Luggage, handbags and flat goods, whether or not lined, of willow.
4602.19.23	Articles of a kind normally carried in the pocket or in the handbag,of palm leaf.
4602.19.25	Luggage, handbags and flat goods, whether or not lined, of palm leaf, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4602.19.29	Luggage, handbags and flat goods, whether or not lined, made from plaiting materials nesoi.
4602.19.35	Articles of wickerwork, nesoi, of willow or wood.
4602.19.45	Basketwork and other articles, nesoi, of willow or wood.
4602.19.60	Articles of wickerwork, nesoi, of vegetable materials, nesoi.
4602.19.80	Basketwork and other articles, nesoi, of vegetables materials, nesoi.
4602.90.00	Basketwork, wickerwork and other articles made directly from plaiting materials or from articles of heading 4601, nesoi; loofah articles.
4701.00.00	Mechanical woodpulp.
4702.00.00	Chemical woodpulp, dissolving grades.
4703.11.00	Chemical woodpulp, soda or sulfate, other than dissolving grades, of unbleached coniferous wood.
4703.19.00	Chemical woodpulp, soda or sulfate, other than dissolving grades, of unbleached nonconiferous wood.
4703.21.00	Chemical woodpulp, soda or sulfate, other than dissolving grades, of semibleached or bleached coniferous wood.
4703.29.00	Chemical woodpulp, soda or sulfate, other than dissolving grades, of semibleached or bleached nonconiferous wood.
4704.11.00	Chemical woodpulp, sulfite, other than dissolving grades, of unbleached coniferous wood.
4704.19.00	Chemical woodpulp, sulfite, other than dissolving grades, of unbleached nonconiferous wood.
4704.21.00	Chemical woodpulp, sulfite, other than dissolving grades, of semibleached or bleached coniferous wood.
4704.29.00	Chemical woodpulp, sulfite, other than dissolving grades, of semibleached or bleached nonconiferous wood.
4705.00.00	Semichemical woodpulp.
4706.10.00	Cotton linters pulp.
4706.20.00	Pulps of fibers derived from recovered (waste and scrap) paper or paperboard.
4706.30.00	Pulps of fibrous cellulosic material, of bamboo.
4706.91.00	Pulps of fibrous cellulosic material, other than cotton linters pulp, mechanical.
4706.92.01	Pulps of fibrous cellulosic material, other than cotton linters pulp, chemical.
4706.93.01	Pulps of fibrous cellulosic material, other than cotton linters pulp, semichemical.
4707.10.00	Waste and scrap of unbleached kraft paper or paperboard or of corrugated paper or paperboard.
4707.20.00	Waste and scrap of other paper or paperboard, made mainly of bleached chemical pulp, not colored in the mass.
4707.30.00	Waste and scrap of paper or paperboard made mainly of mechanical pulp (for example, newspapers, journals, and similar printed matter).
4707.90.00	Waste and scrap of paper or paperboard nesoi, including unsorted waste and scrap.
4801.00.01	Newsprint, in rolls or sheets.
4802.10.00	Handmade paper and paperboard.
4802.20.10	Paper & paperboard use for photo-sensitive/heat-sensitive/electro-sensitive paper/paperboard, in strip/rolls ov 15 cm wide or certain sheets.
4802.20.20	Uncoated basic paper for photo-sensitive/heat-sensitve/eletro-sensitive paper/paperboard to be sensitized for photography, roll/sheets nesoi.
4802.20.40	Uncoated paper and paperboard of a kind used for photo-sensitive/heat-sensitve/eletro-sensitive paper/paperboard, in rolls or sheets nesoi.
4802.40.00	Wallpaper base (hanging paper), in rolls or sheets.
4802.54.10	Writing paper, weigh <40 g/m2, cont. n/o 10% total fiber content by a mechanical/chemi- process, in strip/roll ov 15 cm wide/certain sheets.
4802.54.20	India & bible paper, weigh <40 g/m2, n/o 10% total fiber content by a mechanical/chemi- process, in strip/roll ov 15 cm wide/certain sheets.
4802.54.31	Carbonizing base paper weighing n/ov 15 g/m2, in strip/roll over 15 cm wide or rectangular sheets w/side ov 36 cm and other ov 15 cm unfold.
4802.54.50	Other basic paper to be sensitized use in photography, wt <40g/m2, n/o 10% total fiber by mechanical/chem- process, in rolls/sheets nesoi.
4802.54.61	Carbonizing base paper of a kind used for writing, printing or other graphic purposes, in rolls or sheets nesoi.
4802.55.10	Writing/cover paper, wt 40 g/m2–150 g/m2, n/o 10% total fiber by mechanical/chemi- process, in rolls exceeding 15 cm in width.
4802.55.20	Drawing paper, wt 40 g/m2-150 g/m2, n/o 10% total fiber content by mechanical/chemi- process, in rolls exceeding 15 cm in width.
4802.55.30	India/bible paper, wt 40 g/m2–150 g/m2, n/o 10% total fiber content by mechanical/chemi- process, in rolls exceeding 15 cm in width.
4802.55.40	Paper & paperboard, nesoi, 40 g/m2–150 g/m2, n/o 10% total fiber by mechanical/chemi- process, in rolls exceeding 15 cm in width.
4802.55.60	Other basic paper be sensitized for use photography, 40g/m2–150g/m2, n/o 10% total fiber by mechanical/chemi- process, rolls n/o 15 cm wide.
4802.55.70	Other paper/paperboard for writing/printing/other graphic purpose, 40g/m2–150g/m2, n/o 10% fiber mechanical/chemi- process, roll n/o 15 cm wide.
4802.56.10	Writing & cover paper, wt 40 g/m2–150 g/m2, n/o 10% by weight total fiber content by mechanical/chemi- process, in certain size sheets.
4802.56.20	Drawing paper, wt 40 g/m2–150 g/m2, contain n/o 10% weight total fiber content obtained by mechanical/chemi- process, in certain size sheets.
4802.56.30	India & bible paper, wt 40 g/m2–150 g/m2, n/o 10% by wt. total fiber content obtained by mechanical/chemi- process, in certain size sheets.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4802.56.40	Paper & paperboard nesoi, 40 g/m2–150 g/m2, n/o 10% by wt. total fiber content obtained by mechanical/chemi- process, in certain size sheets.
4802.56.60	Other basic paper be sensitized use in photography, wt. 40g/m2–150g/m2, n/o 10% total fiber by mechanical/ chemi- process, other sized sheets.
4802.56.70	Paper/paperboard for writing/printing/other graphic purpose,wt 40g/m2–150g/m2, n/o 10% fiber by mechanical/ chemi- process,other sized sheets.
4802.57.10	Writing/cover paper, wt 40 g/m2–150 g/m2, cont. n/o 10% by weight total fiber content obtained by mechanical/ chemi- process, in sheets nesoi.
4802.57.20	Drawing paper, wt 40 g/m2 to 150 g/m2, cont. n/o 10% by weight total fiber content obtained by mechanical/ chemi- process, in sheets nesoi.
4802.57.30	India & bible paper, wt 40 g/m2 to 150 g/m2, cont. n/o 10% by wt. total fiber content obtained by mechanical/ chemi- process, in sheets nesoi.
4802.57.40	Paper & paperboard nesoi, 40 g/m2–150 g/m2, cont. n/o 10% by wt. total fiber content obtained by mechanical/ chemi- process, in sheets nesoi.
4802.58.10	Writing/cover paper, >150 g/m2, n/o 10% by wt total fiber content by mechanical process/chemi-, in strip/roll ov 15 cm wide or certain sheet.
4802.58.20	Paper & paperboard nesoi, >150 g/m2, n/o 10% total fiber content by mechanical/chemi- process, in strip/roll ov 15 cm wide or certain sheets.
4802.58.50	Basic paper be sensitized for photography, wt >150 g/m2, n/o 10% total fiber content by mechanical process/ chemi-, in rolls/sheets nesoi.
4802.58.60	Paper/paperboard for writing/printing/other graphic purpose, ≤150 g/m2, n/o 10% fiber content by mechanical process/chemi-, rolls/sheets nesoi.
4802.61.10	Writing & cover paper, over 10% by wt total fiber content consists of fiber obtained by mechanical/chemi- process, in rolls over 15 cm wide.
4802.61.20	Drawing paper, over 10% by weight total fiber content consists of fiber obtained by mechanical/chemi- process, in rolls over 15 cm wide.
4802.61.31	Paper and paperboard for graphic purpose nesoi, ov 10% total fiber content obtained by mechanical/chemi- process, in rolls over 15 cm wide.
4802.61.50	Basic paper to be sensitized for photography, ov 10% total fiber content obtained by mechanical/chemi- process, in rolls n/o 15 cm wide.
4802.61.60	Paper/paperboard for writing/printing/other graphic purposes nesoi, ov 10% total fiber by mechanical/chemi- process, in rolls n/o 15 cm wide.
4802.62.10	Writing & cover paper, over 10% by wt total fiber content consists of fiber obtained by mechanical/chemi- process, in certain size sheets.
4802.62.20	Drawing paper, which ov 10% by weight total fiber content consists of fiber obtained by mechanical/chemi- process, in certain size sheets.
4802.62.30	Paper and paperboard for graphic purposes nesoi, ov 10% by wt total fiber obtained by mechanical/chemi- process, in certain size sheets.
4802.62.50	Basic paper to be sensitized for use in photography, ov 10% by wt total fiber obtained by mechanical/chemi- process, other sized sheets.
4802.62.61	Paper/paperboard for graphic purposes nesoi, ov 10% by wt total fiber obtained by mechanical/chemi- process, other sized sheets.
4802.69.10	Writing & cover paper, of which over 10% by weight total fiber content consists of fiber obtained by mechanical process, sheets nesoi.
4802.69.20	Drawing paper, of which over 10% by weight total fiber content consists of fiber obtained by mechanical process, in sheets nesoi.
4802.69.30	Paper and paperboard for graphic purposes nesoi, ov 10% by wt total fiber obtained by mechanical/chemi- process, in sheets nesoi.
4803.00.20	Cellulose wadding in rolls over 36 cm wide or sheets with at least one side over 36 cm.
4803.00.40	Toilet, facial tissue, towel or napkin stock and paper for household/sanitary purposes, in rolls or sheets of specific measure.
4804.11.00	Uncoated, unbleached kraftliner, in rolls or sheets.
4804.19.00	Uncoated kraftliner, other than unbleached, in rolls or sheets.
4804.21.00	Uncoated, unbleached sack kraft paper, in rolls or sheets.
4804.29.00	Uncoated sack kraft paper, other than unbleached, in rolls or sheets.
4804.31.10	Uncoated, unbleached kraft condenser paper, in rolls or sheets, weighing more than 15 g/m 2 but not over 30 g/ m 2.
4804.31.20	Uncoated, unbleached kraft condenser paper, in rolls or sheets, weighing less than 15 g/m 2 or more than 30 g/ m 2 to 150 g/m 2.
4804.31.40	Uncoated, unbleached kraft wrapping paper in rolls or sheets, weighing 150 g/m2 or less.
4804.31.60	Uncoated, unbleached kraft paper nesoi, in rolls or sheets, weighing 150 g/m2 or less.
4804.39.20	Uncoated kraft condenser paper, other than unbleached, in rolls or sheets, weighing 150 g/m2 or less.
4804.39.40	Uncoated kraft wrapping paper, other than unbleached, in rolls or sheets, weighing 150 g/m2 or less.
4804.39.60	Uncoated kraft paper and paperboard, other than unbleached, in rolls or sheets, weighing 150 g/m2 or less, nesoi.
4804.41.20	Uncoated, unbleached kraft wrapping paper in rolls or sheets, weighing more than 150 but less than 225 g/m2.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4804.41.40	Uncoated, unbleached kraft paper and paperboard, nesoi, in rolls or sheets, weighing more than 150 but less than 225 g/m2.
4804.42.00	Uncoated, bleached kraft paper and paperboard, over 150 but n/o 225 g/m2, over 95% content of wood fibers by chemical process, rolls or sheets.
4804.49.00	Uncoated kraft paper and paperboard, nesoi, in rolls or sheets, weighing more than 150 but less than 225 g/m2, nesoi.
4804.51.00	Uncoated, unbleached kraft paper and paperboard, in rolls or sheets, weighing 225 g/m2 or more.
4804.52.00	Uncoated, bleached kraft paper & paperboard, over 225 g/m2, over 95% content of wood fibers obtained by chemical process, rolls or sheets.
4804.59.00	Uncoated kraft paper and paperboard in rolls or sheets, weighing 225 g/m2 or more, nesoi.
4805.11.00	Uncoated semichemical fluting paper, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.12.10	Uncoated straw fluting paper, weighing 150 g/m2 or less, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.12.20	Uncoated straw fluting pape, weighing over 150 g/m2, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.19.10	Uncoated fluting paper nesoi, weighing 150 g/m2 or less, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.19.20	Uncoated fluting paper nesoi, weighing over 150 g/m2, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.24.50	Uncoated testliner (recycled liner board), weighing n/o 15 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.24.70	Uncoated testliner, weighing over 15 g/m2 but not over 30 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.24.90	Uncoated testliner, weighing over 30 g/m2 but not over 150 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.25.00	Uncoated testliner, weighing more than 150 g/m2, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.30.00	Uncoated sulfite wrapping paper in rolls or sheets.
4805.40.00	Uncoated filter paper and paperboard in rolls or sheets.
4805.50.00	Uncoated felt paper and paperboard in rolls or sheets.
4805.91.10	Uncoated multi-ply paper & paperboard, bibulous & wrapping paper, weigh 150 g/m2 or less, in rolls/sheets, not further worked than in note 3.
4805.91.20	Uncoated condenser paper, weighing 150 g/m2 or less, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.91.50	Uncoated paper and paperboard nesoi, weighing not over 15 g/m2, in rolls or sheets, not further worked than as in note 3 to chapter 48.
4805.91.70	Uncoated paper and paperboard nesoi, weigh over 15 g/m2 but n/o 30 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.91.90	Uncoated paper and paperboard nesoi, weigh ov 30 g/m2 but n/o 150 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.92.20	Uncoated pressboard, weighing more than 150 g/m2 but less than 225 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.92.40	Uncoated paper & paperboard nesoi, weighing >150 g/m2 but <225 g/m2, in rolls or sheets, not further worked than in note 3 to chapter 48.
4805.93.20	Uncoated pressboard weighing 225 g/m2 or more, in rolls or sheets, not further worked than as specified in note 3 to chapter 48.
4805.93.40	Uncoated paper and paperboard nesoi, weighing 225 g/m2 or more, in rolls or sheets, not further worked than as in note 3 to chapter 48.
4806.10.00	Vegetable parchment in rolls or sheets.
4806.20.00	Greaseproof papers in rolls or sheets.
4806.30.00	Tracing papers in rolls or sheets.
4806.40.00	Glassine and other glazed transparent or translucent papers, in rolls or sheets.
4807.00.10	Composite paper and paperboard, laminated internally with bitumen, tar or asphalt, not surface-coated or impregnated, in rolls or sheets.
4807.00.91	Composite straw paper and paperboard, not surface-coated or impregnated, in rolls or sheets.
4807.00.92	Composite cloth-lined or reinforced paper, not surface-coated or impregnated, in rolls or sheets.
4807.00.94	Composite paper and paperboard nesoi, not surface-coated or impregnated, in rolls or sheets.
4808.10.00	Corrugated paper and paperboard, whether or not perforated, in rolls or sheets.
4808.40.00	Kraft paper, creped or crinkled, whether or not embossed or perforated.
4808.90.20	Paper and paperboard, creped or crinkled, in rolls or sheets, nesoi.
4808.90.40	Paper and paperboard, embossed, in rolls or sheets, nesoi.
4808.90.60	Paper and paperboard, in rolls or sheets, nesoi.
4809.20.20	Self-copy writing paper in rolls over 36 cm wide or rectangular sheets over 36 cm on side(s).
4809.20.40	Self-copy paper in rolls over 36 cm wide or rectangular sheets over 36 cm on side(s), other than writing paper.
4809.90.20	Stereotype-matrix board and mat in rolls over 36 cm wide or in rectangular sheets over 36 cm on side(s).
4809.90.40	Simplex decalcomania paper in rolls over 36 cm wide or in rectangular sheets over 36 cm on side(s).

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
4809.90.60	Duplex decalcomania paper in rolls over 36 cm wide or in rectangular sheets over 36 cm on side(s).
4809.90.71	Carbon paper, self-copy paper and other copying or transfer paper, Impregnated, coated or both, but otherwise not treated.
4809.90.80	Copying or transfer papers, nesoi, in rolls over 36 cm wide or rectangular sheets over 36 cm on side(s).
4810.13.11	Basic paper be sensitized for photography, coated w/inorganic, n/o 150 g/m2, n/o 10% fiber by mechanical/chemi- process, rolls ov 15 cm wide.
4810.13.13	India or bible paper, coated w/inorganic, n/o 150 g/m2, n/o 10% fiber content obtained by a mechanical/chemi-process, rolls ov 15 cm wide.
4810.13.19	Paper/paperboard for graphic use nesoi, coated w/inorganic, n/o 150g/m2, n/o 10% fiber by mechanical/chemi-process, rolls ov 15 cm wide.
4810.13.20	Paper and paperboard for graphic use, coated w/inorganic, ov 150g/m2, n/o 10% fiber by mechanical/chemi-process, in rolls over 15 cm wide.
4810.13.50	Printed/embossed/perforated paper & paperboard graphic use, coated w/inorganic, n/o 10% fiber by mech/chemi-process, rolls n/o 15 cm wide.
4810.13.60	Basic paper be sensitized for photography, coated w/kaolin/inorganic, n/o 10% fiber by mechanical/chemi- process, rolls n/o 15 cm wide.
4810.13.70	Paper & paperboard for graphic purposes nesoi, coated w/kaolin/inorganic, n/o 10% fiber by mechanical/chemi-process, rolls n/o 15 cm wide.
4810.14.11	Basic paper be sensitized for photography, coated w/inorganic, n/o 150g/m2, n/o 10% fiber by mechanical/chemi-process, certain size sheets.
4810.14.13	India or bible paper, coated w/inorganic, n/o 150 g/m2, of n/o 10% fiber content obtained by mechanical/chemi-process, certain size sheets.
4810.14.19	Paper and paperboard for graphic use nesoi, coated w/inorganic, n/o 150g/m2, n/o 10% fiber by mechanical/chemi- process, certain size sheets.
4810.14.20	Paper and paperboard for graphic use, coated w/inorganic, ov 150g/m2, n/o 10% fiber obtained mechanical/chemi- process, certain size sheets.
4810.14.50	Printed/embossed/perforated paper & paperboard, coated w/inorganic, n/o 10% fiber obtained mechanical/chemi-process, other sized sheets.
4810.14.60	Basic paper be sensitized use in photography, coated w/inorganic, n/o 10% fiber obtained mechanical/chemi-process, other sized sheets.
4810.14.70	Paper & paperboard for graphic purposes nesoi, coated w/inorganic, n/o 10% fiber obtained mechanical/chemi-process, other sized sheets.
4810.19.11	Basic paper be sensitized use in photography, coated w/inorganic, n/o 150g/m2, n/o 10% fiber by mechanical/chemi- process, sheets nesoi.
4810.19.13	India or bible paper, coated w/inorganic, n/o 150 g/m2, of n/o 10% fiber content obtained by a mechanical/chemi-process, sheets nesoi.
4810.19.19	Paper & paperboard for graphic use nesoi, coated w/inorganic, n/o 150g/m2, n/o 10% fiber obtained by mechanical/chemi- process, sheets nesoi.
4810.19.20	Paper and paperboard for graphic use, coated w/inorganic, ov 150g/m2, n/o 10% fiber obtained by a mechanical/chemi- process, sheets nesoi.
4810.22.10	Light-weight coated paper for graphic use, >10% fiber content obtained by mechanical/chemi- process, strip/roll ov 15 cm wide/sized sheets.
4810.22.50	Light-wt coated printed/embossed/perforated paper/paperboard for graphic, >10% fiber obtained mechanical/chemi- process, roll/sheet nesoi.
4810.22.60	Light-weight coated basic paper be sensitized use in photography, >10% fiber obtained mechanical/chemi- process, rolls/sheets nesoi.
4810.22.70	Light-wt coated paper & paperboard used for graphic purposes, >10% fiber obtained by a mechanical/chemi-process, roll/sheet nesoi.
4810.29.10	Paper/paperboard for graphic, coated w/inorganic, >10% fiber obtained by mechanical/chemi- process, strip/roll ov 15 cm wide & sized sheets.
4810.29.50	Printed/embossed/perforated paper/paperboard for graphic, coated w/inorganic, >10% fiber by mechanical/chemi-process, rolls/sheets nesoi.
4810.29.60	Basic paper to be sensitized for use in photography, coated w/inorganic, >10% fiber by mechanical/chemi- process, rolls/sheets nesoi.
4810.29.70	Paper/paperboard used for graphic purposes, coated w/inorganic, >10% fiber by mechanical/chemi- process, rolls/sheets nesoi.
4810.31.10	Nongraphic bleached coated kraft paper/paperboard, >95% wood fiber by chemical process, 150g/m2 or <, strip/roll ov 15 cm wide/certain sheet.
4810.31.30	Bleached coated kraft paper cards, not punched, for punchcard machine, >95% wood fiber by chemical process, 150g/m2 or <, rolls/sheets nesoi.
4810.31.65	Nongraphic bleached coated kraft paper/paperboard nesoi, of >95% wood fiber by chemical process, 150 g/m2 or less, in rolls or sheets nesoi.
4810.32.10	Nongraphic bleached coated kraft paper/paperboard, >95% wood fiber by chemical process, >150g/m2, strip/roll ov 15 cm wide/certain sheets.
4810.32.30	Bleached coated kraft paper card, not punched, for punchcard machine, >95% wood fiber by chemical process, >150g/m2, in strips/sheets nesoi.

ANNEX—Continued

HTSUS subheading	Product description
4810.32.65	Nongraphic bleached coated kraft paper/paperboard nesoi, of >95% wood fiber obtained chemical process, >150 g/m2, in rolls or sheets nesoi.
4810.39.12	Nongraphic nonbleach uniformly kraft paper/paperboard,coated w/inorganic,wheth impreg but not treated,strip/roll ov 15cm wide/certain sheet.
4810.39.14	Nongraphic nonbleached uniformly kraft paper and paperboard nesoi, coated w/kaolin/inorganic substances, strip/roll ov 15 cm/certain sheets.
4810.39.30	Nonbleached uniformly kraft paper cards, not punched, for punchcard machines, coated w/inorganic substances, strips/sheets nesoi.
4810.39.65	Nongraphic nonbleached uniformly kraft paper or paperboard nesoi, coated with kaolin or other inorganic substances, in rolls or sheets nesoi.
4810.92.12	Multi-ply paper & paperboard nesoi, coat w/kaolin/other inorganic substances, wt >150g/m2, strips/rolls ov 15 cm wide or certain sheets.
4810.92.14	Multi-ply paper/paperboard nesoi, coat w/kaolin/other inorganic substances, wt 150g/m2 or less, strips/rolls ov 15 cm wide or certain sheets.
4810.92.30	Multi-ply paper/paperboard cards, not punched, for punchcard machines, coated w/kaolin/other inorganic substances, in strips/sheets nesoi.
4810.92.65	Multi-ply paper or paperboard nesoi, coated with kaolin or other inorganic substances, in rolls n/o 15 cm wide and rectangular sheets nesoi.
4810.99.10	Paper & paperboard nesoi, coated with kaolin or other inorganic substances, in strips/rolls ov 15 cm wide or certain size rectangular sheets.
4810.99.30	Paper & paperboard cards nesoi, not punched, for punchcard machines, coated w/kaolin/inorganic substances, in strips or sheets nesoi.
4810.99.65	Paper and paperboard nesoi, coated with kaolin or other inorganic substances, in rolls n/o 15 cm wide and rectangular sheets nesoi.
4811.10.11	Tarred, bituminized or asphalted paper & paperboard, in strip/roll ov 15cm wide or rectangular sheet w/side ov 36cm & other ov 15cm unfolded.
4811.10.21	Tarred, bituminized or asphalted paper and paperboard, in strips or rolls not over 15 cm wide or in rectangular sheets nesoi.
4811.41.10	Self-adhesive paper & paperboard, in strips/rolls ov 15cm wide or rectangular sheets w/1 side ov 36cm & other side ov 15cm in unfolded.
4811.41.21	Self-adhesive paper and paperboard, in strips or rolls not over 15 cm wide.
4811.41.30	Self-adhesive paper and paperboard, in rectangular sheets nesoi.
4811.49.10	Gummed or adhesive paper and paperboard (other than self-adhesive), in strips or rolls over 15 cm wide or certain sized rectangular sheets.
4811.49.21	Gummed or adhesive paper and paperboard (other than self-adhesive), in strips or rolls not over 15 cm wide.
4811.49.30	Gummed or adhesive paper and paperboard (other than self-adhesive), in rectangular sheets nesoi.
4811.51.20	Bleached paper and paperboard, coated/impregnated/covered w/plastics, wt >150g/m2, 0.3mm or more thick, in certain size strips/rolls/sheets.
4811.51.40	Bleached paper and paperboard, coated/impregnated/covered w/plastics, wt >150 g/m2, <0.3 mm thick, in certain size strips/rolls/sheets.
4811.51.60	Bleached paper and paperboard, coated/impregnated/covered w/plastics, wt >150 g/m2, in rolls n/o 15 cm wide or rectangular sheets nesoi.
4811.59.20	Bleached nesoi/nonbleached printing paper, coated, impregnated or covered with plastics, in strips/rolls ov 15cm wide or certain size sheets.
4811.59.40	Bleached nesoi/nonbleached paper and paperboard nesoi, coated/impregnated/covered with plastics, in certain size strip/rolls/sheets.
4811.59.60	Bleached nesoi/nonbleached paper & paperboard, coated/impregnated/covered with plastics, in rolls n/o 15 cm wide or rectangular sheets nesoi.
4811.60.40	Paper and paperboard, coated/impregnated/covered with wax/paraffin/stearin/oil/glycerol, in strips/rolls ov 15cm wide or certain size sheets.
4811.60.60	Paper and paperboard, coated/impregnated/covered with wax/paraffin/stearin/oil/glycerol, in rolls n/o 15cm wide or rectangular sheets nesoi.
4811.90.10	Handmade paper of cellulose fibers, in strip or roll ov 15 cm wide or rectangular sheets w/1 side ov 36 cm and other ov 15 cm in unfolded.
4811.90.20	Paper/paperboard/cell wadding/webs of cell fibers, all/partly covered w/flock/gelatin/metal/metal solutions, in certain strip/rolls/sheets.
4811.90.30	Paper, paperboard, cellulose wadding and webs of cellulose fibers, impregnated with latex, in certain size strips/rolls/sheets.
4811.90.40	Paper, paperboard, cellulose wadding and webs of cellulose fibers, nesoi, weighing not over 15 g/m2, in certain size strips, rolls or sheets.
4811.90.60	Paper, paperboard, cellulose wadding and web of cellulose fibers, nesoi, wt ov 15g/m2 n/o 30g/m2, in certain size strips, rolls or sheets.
4811.90.80	Paper, paperboard, cellulose wadding and webs of cellulose fibers, nesoi, weighing over 30 g/m2, in certain size strips, rolls or sheets.
4811.90.90	Paper, paperboard, cellulose wadding and webs of cellulose fibers, nesoi, in rolls n/o 15 cm wide or rectangular sheets nesoi.
4812.00.00	Filter blocks, slabs and plates of paper pulp.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. HTSUS subheading	Product description
4813.10.00	Cigarette paper in the form of booklets or tubes.
4813.20.00	Cigarette paper in rolls of a width not exceeding 5 cm.
4813.90.00	Cigarette paper, whether or not cut to size, nesoi.
4816.20.00	Self-copy paper, nesoi.
4816.90.01	Carbon or similar copying papers, nesoi.
4817.10.00	Envelopes of paper or paperboard.
4817.20.20	Sheets of writing paper with border gummed or perforated, prepared for use as combination sheets and envelopes.
4817.20.40	Other letter cards, plain postcards and correspondence cards, nesoi.
4817.30.00	Boxes, pouches, wallets and writing compendiums, of paper or paperboard, containing an assortment of paper stationery.
4818.10.00	Toilet paper.
4818.20.00	Handkerchiefs, cleansing or facial tissues and towels of paper pulp, paper, cellulose wadding or webs of cellulose fiber.
4818.30.00	Tablecloths and table napkins of paper pulp, paper, cellulose wadding or webs of cellulose fiber.
4818.50.00	Articles of apparel and clothing accessories of paper pulp, paper, cellulose wadding or webs of cellulose fibers.
4818.90.00	Bedsheets and similar household, sanitary or hospital articles of paper, cellulose wadding or webs of cellulose fibers, nesoi.
4819.10.00	Cartons, boxes and cases of corrugated paper or paperboard.
4819.20.00	Folding cartons, boxes and cases of noncorrugated paper or paperboard.
4819.30.00	Sacks and bags, having a base of a width of 40 cm or more, of paper, paperboard, cellulose wadding or webs of cellulose fibers.
4819.40.00	Sacks and bags, nesoi, including cones, of paper, paperboard, cellulose wadding or webs of cellulose fibers.
4819.50.20	Sanitary food and beverage containers of paper, paperboard, cellulose wadding or webs of cellulose fibers, nesoi.
4819.50.30	Record sleeves of paper, paperboard, cellulose wadding or webs of cellulose fibers.
4819.50.40	Packing containers, nesoi, of paper, paperboard, cellulose wadding or webs of cellulose fibers.
4819.60.00	Box files, letter trays, storage & like articles, used in offices & shops, of paper, paperboard,cellulose wadding/webs of cellulose fibers.
4820.10.20	Diaries, notebooks and address books, bound; letter and memorandum pads and similar articles, of paper or paperboard.
4820.10.40	Registers, account, order and receipt books, and similar articles, of paper or paperboard, nesoi.
4820.20.00	Exercise books of paper or paperboard.
4820.30.00	Binders (other than book covers), folders and file covers of paper or paperboard.
4820.40.00	Manifold business forms and interleaved carbon sets of paper or paperboard.
4820.50.00	Albums for samples or for collections, of paper or paperboard.
4820.90.00	Blotting pads and other articles of stationery nesoi, and book covers, of paper or paperboard.
4821.10.20	Paper and paperboard labels, printed in whole or part by a lithographic process.
4821.10.40	Paper and paperboard labels, printed by other than a lithographic process.
4821.90.20	Pressure-sensitive paper and paperboard labels, not printed.
4821.90.40	Paper and paperboard labels, not printed, nesoi.
4822.10.00	Bobbins, spools, cops and similar supports of paper pulp, paper or paperboard of a kind used for winding textile yarn.
4822.90.00	Bobbins, spools, cops and similar supports of paper pulp, paper or paperboard, nesoi.
4823.20.10	Paint filters and strainers of paper or paperboard.
4823.20.90	Filter paper and paperboard, nesoi.
4823.40.00	Rolls, sheets and dials of paper or paperboard printed for self-recording apparatus.
4823.61.00	Trays, dishes, plates, cups and the like, of paper or paperboard: of bamboo.
4823.69.00	Trays, dishes, plates, cups and the like, of paper or paperboard.
4823.70.00	Molded or pressed articles of paper pulp.
4823.90.10	Articles of paper pulp, nesoi.
4823.90.20	Articles of papier-mache, nesoi.
4823.90.31	Cards of paper or paperboard, nesoi, not punched, for punchcard machines, whether or not in strips.
4823.90.40	Frames or mounts for photographic slides of paper or paperboard.
4823.90.50	Hand fans of paper or paperboard.
4823.90.60	Gaskets, washers and other seals of coated paper or paperboard.
4823.90.67	Coated paper or paperboard, nesoi.
4823.90.70	Articles of cellulose wadding, nesoi.
4823.90.80	Gaskets, washers and other seals of paper, paperboard and webs of cellulose fibers, nesoi.
4823.90.86	Articles of paper pulp, paper, paperboard, cellulose wadding or webs of cellulose fibers, nesoi.
5001.00.00	Silkworm cocoons suitable for reeling.
5002.00.00	Raw silk (not thrown).
5003.00.10	Silk waste (including cocoons unsuitable for reeling, yarn waste and garnetted stock) not carded or combed.
5003.00.90	Silk waste (including cocoons unsuitable for reeling, yarn waste and garnetted stock) carded or combed.
5004.00.00	Silk yarns (other than yarn spun from silk waste) not put up for retail sale.
5005.00.00	Yarn spun from silk waste, not put up for retail sale.
5006.00.10	Spun yarn, containing 85% or more by weight of silk, put up for retail sale; silkworm gut.
5006.00.90	Spun silk yarn, containing less than 85% by weight of silk, put up for retail sale.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5007.10.30	Woven fabrics of noil silk, containing 85 percent or more by weight of silk or silk waste.
5007.10.60	Woven fabrics of noil silk, containing less than 85 percent by weight of silk or silk waste.
5007.20.00	Woven fabrics containing 85 percent or more by weight of silk or of silk waste, other than noil silk.
5007.90.30	Woven silk fabrics, containing 85 percent or more by weight of silk or silk waste, nesoi.
5007.90.60	Other silk woven fabrics, containing less than 85 percent by weight of silk or silk waste, nesoi.
5101.11.10	Unimproved wool and other wool not finer than 46s, greasy, shorn, not carded or combed, for special uses.
5101.11.20	Unimproved wool and other wool not finer than 40s, greasy, shorn, not carded or combed, not for special uses.
5101.11.40	Wool, excluding unimproved, finer than 40s but not 44s, greasy, shorn, not carded or combed, not for special uses.
5101.11.50	Wool, excluding unimproved, finer than 44s but not 46s, greasy, shorn, not carded or combed, not for special uses.
5101.11.60	Wool, excluding unimproved, finer than 46s, greasy, shorn, not carded or combed.
5101.19.10	Unimproved wool and other wool not finer than 46s, greasy, not shorn, not carded or combed, for special uses.
5101.19.20	Unimproved wool and other wool not finer than 40s, greasy, not shorn, not carded or combed, not for special uses.
5101.19.40	Wool, excl. unimproved, finer than 40s, but not 44s, greasy, not shorn, not carded or combed, not for special uses.
5101.19.50	Wool, excluding unimproved, finer than 44s but not 46s, greasy, not shorn, not carded or combed, not for special uses.
5101.19.60	Wool, excluding unimproved, finer than 46s, greasy, incl. fleece-washed, not shorn, not carded or combed.
5101.21.10	Unimproved wool and other wool not finer than 46s, degreased, not further processed, shorn, not carded or combed, for special uses.
5101.21.15	Unimproved wool and other wool not finer than 40s, degreased, not further processed, shorn, not carded or combed, not for special uses.
5101.21.30	Wool, excl. unimproved, finer than 40s but not 44s, degreased, not further processed, shorn, not carded or combed, not for special uses.
5101.21.35	Wool, excl. unimproved, finer than 44s but not 46s, degreased, not further processed, shorn, not carded or combed, not for special uses.
5101.21.40	Wool, excl. unimproved, finer than 46s, degreased, not further processed, shorn, not carded or combed, not for special uses.
5101.21.65	Unimproved wool and other wool, not finer than 46s, degreased, shorn, not carbonized, not carded or combed.
5101.21.70	Unimproved wool and other wool, finer than 46s, degreased, shorn, not carbonized, not carded or combed.
5101.29.10	Unimproved wool and other wool not finer than 46s, degreased, not further processed, not shorn, not carded or combed, for special uses.
5101.29.15	Unimproved wool and other wool not finer than 40s, degreased, not further processed, not shorn, not carded or combed, not for special uses.
5101.29.30	Wool, excl. unimproved, finer than 40s but not 44s, degreased, not further processed, not shorn, not carded or combed, not for special uses.
5101.29.35	Wool, excl. unimproved, finer than 44s but not 46s, degreased, not further processed, not shorn, not carded or combed, not for special uses.
5101.29.40	Wool, excl. unimproved, finer than 46s, degreased, not further processed, not shorn, not carded or combed, not for special uses.
5101.29.65	Unimproved wool and other wool, not finer than 46s, not shorn, not carbonized, degreased and further processed, not carded or combed.
5101.29.70	Wool, finer than 46s, not carded or combed, not carbonized, not shorn, degreased and processed to remove grease.
5101.30.10	Unimproved wool and other wool, not finer than 40s, carbonized, not further processed, not carded or combed.
5101.30.15	Wool, excluding unimproved, finer than 40s but not finer than 44s, carbonized, not further processed, not carded or combed.
5101.30.30	Wool, excluding unimproved, finer than 44s but not finer than 46s, carbonized, not further processed, not carded or combed.
5101.30.40	Wool, excluding unimproved, finer than 46s, carbonized, not further processed, not carded or combed.
5101.30.65	Unimproved wool and other wool, not finer than 46s, carbonized and further processed, not carded or combed.
5101.30.70	Unimproved wool and other wool, finer than 46s, carbonized and further processed, not carded or combed.
5102.11.10	Fine hair of Kashmir (cashmere) goats, not processed in any manner beyond the degreased or carbonized condition, not carded or combed.
5102.11.90	Fine hair of Kashmir (cashmere) goats, processed beyond the degreased or carbonized condition, not carded or combed.
5102.19.20	Fine hair of the camel, not processed in any manner beyond the degreased or carbonized condition, not carded or combed.
5102.19.60	Fine animal hair (other than Kashmir or camel), not processed beyond the degreased or carbonized condition, not carded or combed.
5102.19.80	Fur, prepared for hatters' use, not carded or combed.
5102.19.90	Fine animal hair (other than Kashmir), processed beyond the degreased or carbonized condition, not carded or combed.
5102.20.00	Coarse animal hair, not carded or combed.
5103.10.00	Noils of wool or of fine animal hair.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ‘‘nesoi’’ means ‘‘not elsewhere specified or included’’.

HTSUS subheading	Product description
5103.20.00	Waste, other than noils, of wool or of fine animal hair, including yarn waste but excluding garnetted stock.
5103.30.00	Waste of coarse animal hair, including yarn waste but excluding garnetted stock.
5104.00.00	Garnetted stock of wool or of fine or coarse animal hair.
5105.10.00	Carded wool.
5105.21.00	Combed wool in fragments.
5105.29.00	Wool tops and other combed wool, except in fragments.
5105.31.00	Fine hair of Kashmir (cashmere) goats, carded or combed.
5105.39.00	Fine animal hair (other than Kashmir), carded or combed.
5105.40.00	Coarse animal hair, carded or combed.
5106.10.00	Yarn of carded wool, containing 85 percent or more by weight of wool, not put up for retail sale.
5106.20.00	Yarn of carded wool, containing less than 85 percent by weight of wool, not put up for retail sale.
5107.10.30	Yarn of combed wool, containing 85% or more by weight of wool, not put up for retail sale, of wool fiber avg diameter 18.5 micron or <.
5107.10.60	Yarn of combed wool, containing 85% or more by weight of wool, not put up for retail sale, nesoi.
5107.20.30	Yarn of combed wool, containing less than 85 percent by weight of wool, not put up retail sale, of wool fiber avg diameter 18.5 micron or <.
5107.20.60	Yarn of combed wool, containing less than 85 percent by weight of wool, not put up retail sale, nesoi.
5108.10.30	Yarn of Angora rabbit hair, carded, not put up for retail sale.
5108.10.40	Yarn of mohair, carded, not put up for retail sale.
5108.10.80	Yarn of fine animal hair other than Angora rabbit hair or mohair, carded, not put up for retail sale.
5108.20.30	Yarn of Angora rabbit hair, combed, not put up for retail sale.
5108.20.40	Yarn of mohair, combed, not put up for retail sale.
5108.20.80	Yarn of fine animal hair other than Angora rabbit hair or mohair, combed, not put up for retail sale.
5109.10.20	Yarn of wool, containing 85 percent or more by weight of wool, colored, cut into uniform lengths of not over 8 cm, put up for retail sale.
5109.10.40	Yarn of Angora rabbit hair, containing 85 percent or more by weight of the Angora hair, put up for retail sale.
5109.10.80	Yarn of wool nesoi, or fine animal hair nesoi, over 85% or > of that wool/hair, for retail sale, of wool fiber avg diamter 18.5 micron or <.
5109.10.90	Yarn of wool nesoi, or fine animal hair nesoi, over 85% or > of that wool/hair, put up for retail sale, nesoi.
5109.90.20	Yarn of wool, colored, and cut into uniform lengths of not over 8 cm, containing less than 85% by weight of wool, put up for retail sale.
5109.90.40	Yarn of Angora rabbit hair containing less than 85 percent by weight of the Angora hair, put up for retail sale.
5109.90.80	Yarn of wool nesoi, or fine animal hair nesoi, <85% of that wool/hair, for retail sale, of wool fiber avg diameter 18.5 micron or <.
5109.90.90	Yarn of wool nesoi, or fine animal hair nesoi, <85% of that wool/hair, put up for retail sale, nesoi.
5110.00.00	Yarn of coarse animal hair or horsehair (including gimped horsehair yarn) whether or not put up for retail sale.
5111.11.20	Tapestry and upholstery fabrics of carded wool/fine animal hair, over 85% wool or hair, weighing not over 140 g/m2.
5111.11.30	Hand-woven fabrics of carded wool/fine animal hair, 85% or more wool or hair, loom width less than 76 cm, weight not over 300 g/m2.
5111.11.70	Woven fabrics, 85% or more by weight of carded wool/fine animal hair, weight not over 300 g/m2, nesoi.
5111.19.10	Tapestry and upholstery fabrics, woven, 85% or more by weight of carded wool/fine animal hair, weight over 300 g/m2.
5111.19.20	Hand-woven fabrics, with 85 percent or more by weight of carded wool/fine animal hair, loom width of less than 76 cm, weight ov 300 g/m2.
5111.19.60	Woven fabrics, with 85 percent or more by weight of carded wool/fine animal hair nesoi, weight over 300 g/m2.
5111.20.05	Tapestry & upholstery fabrics of carded wool/fine animal hair, mixed mainly or solely with man-made filaments, weight exceeding 300 g/m2.
5111.20.10	Tapestry & upholstery fabrics of carded wool/fine animal hair, mixed mainly or solely with man-made filaments, weight not over 140 g/m2.
5111.20.90	Woven fabrics of carded wool/fine animal hair, mixed mainly or solely with man-made filaments, nesoi.
5111.30.05	Tapestry & upholstery fabrics of carded wool/fine animal hair, mixed mainly/solely with man-made staple fibers, weight exceeding 300 g/m2.
5111.30.10	Tapestry & upholstery fabrics of carded wool/fine animal hair, mixed mainly/solely with man-made staple fibers, weight not over 140 g/m2.
5111.30.90	Woven fabrics of carded wool/fine animal hair, mixed mainly or solely with man-made staple fibers, nesoi.
5111.90.30	Woven fabrics of carded wool/fine animal hair, containing 30 percent or more by weight of silk or silk waste, valued over $33/kg.
5111.90.40	Tapestry and upholstery fabrics of carded wool/fine animal hair, weight over 300 g/m2, containing less than 85% wool or hair, nesoi.
5111.90.50	Tapestry and upholstery fabrics of carded wool/fine animal hair, weight not over 140 g/m2, containing less than 85% wool or hair, nesoi.
5111.90.90	Woven fabrics of carded wool/fine animal hair, containing less than 85% wool or hair, nesoi.
5112.11.10	Tapestry and upholstery fabrics of combed wool/fine animal hair, containing 85% or more wool or hair, weight not over 140 g/m2.
5112.11.30	Woven fabrics of combed wool/fine animal hair, over 85% wool or hair, weight not over 200 g/m2, avg wool fiber diameter 18.5 micron or <.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. HTSUS subheading	Product description
5112.11.60	Woven fabrics of combed wool/fine animal hair, over 85% wool or hair, weight not over 200 g/m2, nesoi.
5112.19.20	Tapestry and upholstery fabrics of combed wool/fine animal hair, over 85% wool or hair, weight over 300 g/m2.
5112.19.60	Woven fabrics of combed wool/fine animal hair, over 85% wool or fine animal hair, ov 200 g/m2, avg wool fiber diameter 18.5 micron or <.
5112.19.95	Woven fabrics of combed wool/fine animal hair, over 85% wool or fine animal hair, weight over 200 g/m2, nesoi.
5112.20.10	Tapestry and upholstery fabrics of combed wool/fine animal hair, mixed mainly/solely with man-made filaments, weight over 300 g/m2.
5112.20.20	Tapestry and upholstery fabrics of combed wool/fine animal hair, mixed mainly/solely with man-made filaments, weight not over 140 g/m2.
5112.20.30	Woven fabrics of combed wool/fine animal hair, mixed mainly or solely with man-made filaments, nesoi.
5112.30.10	Tapestry and upholstery fabrics of combed wool/fine animal hair, mixed mainly/solely with man-made staple fibers, weight over 300 g/m2.
5112.30.20	Tapestry & upholstery fabrics of combed wool/fine animal hair, mixed mainly/solely with man-made staple fibers, weight not over 140 g/m2.
5112.30.30	Woven fabrics of combed wool/fine animal hair, mixed mainly or solely with man-made staple fibers, nesoi.
5112.90.30	Woven fabrics of combed wool/fine animal hair, nesoi, containing 30 percent or more by weight of silk or silk waste, valued over $33/kg.
5112.90.40	Woven tapestry/upholstery fabrics of combed wool/fine animal hair, con. by wt. under 85% wool/hair & under 30% silk, over 300 g/m2, nesoi.
5112.90.50	Woven tapestry/upholstery fabrics of combed wool/fine animal hair, con. by wt. under 85% wool/hair & under 30% silk, n/o 140 g/m2, nesoi.
5112.90.90	Woven fabrics of combed wool or combed fine animal hair, nesoi.
5113.00.00	Woven fabrics of coarse animal hair or of horsehair.
5201.00.05	Cotton, not carded or combed, having a staple length under 19.05 mm (¾ inch), harsh or rough.
5201.00.12	Cotton, n/carded or combed, having a staple length <28.575 mm (1⅛ inches), n/harsh or rough, described in gen. note 15.
5201.00.14	Cotton, n/carded or combed, having a staple length <28.575 mm (1⅛ inches), n/harsh or rough, quota described in ch 52 add'l U.S. note 5.
5201.00.18	Cotton, not carded or combed, having a staple length under 28.575 mm (1⅛ inches), n/harsh or rough, nesoi.
5201.00.22	Cotton, not carded or combed, staple length of 28.575 mm or more but under 34.925 mm, described in gen. note 15.
5201.00.24	Cotton, n/carded or combed, harsh or rough, staple length 29.36875 mm or more but n/o 34.925 mm, white in color, quota descrd ch 52 add U.S. note 6.
5201.00.28	Cotton, not carded or combed, harsh or rough, staple length of 29.36875 mm or more but under 34.925 mm & white in color, nesoi.
5201.00.34	Cotton, not carded or combed, staple length of 28.575 mm or more but under 34.925 mm, other, quota described in chapter 52 add'l U.S. note 7.
5201.00.38	Cotton, not carded or combed, staple length of 28.575 mm or more but under 34.925 mm, nesoi.
5201.00.55	Cotton, not carded or combed, having a staple length of 34.925 mm or more, described in the gen. note 15.
5201.00.60	Cotton, not carded or combed, having a staple length of 34.925 mm or more, quota described in chapter 52 add'l U.S. note 8.
5201.00.80	Cotton, not carded or combed, having a staple length of 34.925 mm or more, nesoi.
5202.10.00	Cotton yarn waste (including thread waste).
5202.91.00	Cotton garnetted stock.
5202.99.05	Cotton card strips made from cotton waste having staple length under 30.1625 mm & lap, sliver & roving waste described in gen. nte 15.
5202.99.10	Cotton card strips made from cotton waste w/staple length under 30.1625 mm & lap, sliver & roving waste, quota dscrbd in ch 52 add U.S. note 9.
5202.99.30	Cotton card strips made from cotton waste having staple length under 30.1625 mm & lap, sliver & roving waste, nesoi.
5202.99.50	Cotton waste, other than yarn waste and garnetted stock, nesoi.
5203.00.05	Cotton fibers, carded or combed, of cotton fiber processed but not spun, described in gen. note 15.
5203.00.10	Cotton fibers, carded or combed, of cotton fiber processed but not spun, quota described in chapter 52 add'l U.S. note 10.
5203.00.30	Cotton fibers, carded or combed, of cotton fiber processed, but not spun, nesoi.
5203.00.50	Cotton carded or combed, excluding fibers of cotton processed but not spun.
5204.11.00	Cotton sewing thread, containing 85 percent or more by weight of cotton, not put up for retail sale.
5204.19.00	Cotton sewing thread, containing less than 85 percent by weight of cotton, not put up for retail sale.
5204.20.00	Cotton sewing thread, put up for retail sale.
5205.11.10	Single cotton yarn, 85% or more cotton by weight, of uncombed fibers, not over 14 nm, unbleached, not mercerized, not put up for retail sale.
5205.11.20	Single cotton yarn, 85% or more cotton by weight, of uncombed fibers, n/o 14 nm, bleached or mercerized.
5205.12.10	Single cotton yarn, 85% or more cotton, of uncombed fibers, over 14 but n/o 43 nm, unbleached, not mercerized, not put up for retail sale.
5205.12.20	Single cotton yarn, 85% or more cotton by weight, of uncombed fibers, over 14 nm but n/o 43 nm, bleached or mercerized.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5205.13.10	Single cotton yarn, 85% or more cotton, of uncombed fibers, over 43 but n/o 52 nm, unbleached, not mercerized, not put up for retail sale.
5205.13.20	Single cotton yarn, 85% or more cotton, of uncombed fibers, over 43 nm but n/o 52 mm, bleached or mercerized.
5205.14.10	Single cotton yarn, 85% or more cotton, of uncombed fibers, over 52 but n/o 80 nm, unbleached, not mercerized, not put up for retail sale.
5205.14.20	Single cotton yarn, 85% or more cotton by weight, of uncombed fibers, over 52 but n/o 80 nm, bleached or mercerized.
5205.15.10	Single cotton yarn, 85% or more cotton, of uncombed fibers, over 80 nm, unbleached, not mercerized, not put up for retail sale.
5205.15.20	Single cotton yarn, 85% or more cotton, of uncombed fibers, over 80 nm, bleached or mercerized, not put up for retail sale, nesoi.
5205.21.00	Single cotton yarn, 85% or more cotton by weight, of combed fibers, not over 14 nm, not put up for retail sale.
5205.22.00	Single cotton yarn, 85% or more cotton by weight, of combed fibers, over 14 but n/o 43 nm, not put up for retail sale.
5205.23.00	Single cotton yarn, 85% or more cotton by weight, of combed fibers, over 43 but n/o 52 nm, not put up for retail sale.
5205.24.00	Single cotton yarn, 85% or more cotton by weight, of combed fibers, over 52 but n/o 80 nm, not put up for retail sale.
5205.26.00	Single cotton yarn, 85% or > cotton by wt, of combed fiber, meas. <125 but not <106.38 decitex, >80nm but not >94nm, not put up for retail sale.
5205.27.00	Single cotton yarn, 85% or > cotton by wt,of combed fiber,meas. <106.38 but not <83.33 decitex, >94nm but not >120nm, not put up for retail sale.
5205.28.00	Single cotton yarn, 85% or > cotton by wt, of combed fibers, meas. <83.33 decitex, >120 nm, not put up for retail sale.
5205.31.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of uncombed fibers, n/o 14 nm per single yarn, not put up for retail sale.
5205.32.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of uncombed fibers, yarn over 14 but n/o 43 nm, not put up for retail sale.
5205.33.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of uncombed fibers, yarn over 43 but n/o 52 nm, not put up for retail sale.
5205.34.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of uncombed fibers, yarn over 52 but n/o 80 nm, not put up for retail sale.
5205.35.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of uncombed fibers, over 80 nm per single yarn, not put up for retail sale.
5205.41.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of combed fibers, not over 14 nm per single yarn, not put up for retail sale.
5205.42.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of combed fibers, yarn over 14 but n/o 43 nm, not put up for retail sale.
5205.43.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of combed fibers, yarn over 43 but n/o 52 nm, not put up for retail sale.
5205.44.00	Multiple or cabled cotton yarn, 85% or more cotton by weight, of combed fibers, yarn over 52 but n/o 80 nm, not put up for retail sale.
5205.46.00	Multiple or cabled cotton yarn, 85% or > cotton by wt, of combed fibers, >80 nm but not >94 nm/single yarn, not put up for retail sale.
5205.47.00	Multiple or cabled cotton yarn, 85% or > cotton by wt, of combed fibers, >94 nm but not >120 nm/single yarn, not put up for retail sale.
5205.48.00	Multiple or cabled cotton yarn, 85% or > cotton by wt, of combed fibers, >120 nm per single yarn, not put up for retail sale.
5206.11.00	Single cotton yarn, less than 85 percent cotton by weight, of uncombed fibers, not over 14 nm, not put up for retail sale.
5206.12.00	Single cotton yarn, less than 85 percent cotton by weight, of uncombed fibers, over 14 but n/o 43 nm, not put up for retail sale.
5206.13.00	Single cotton yarn, less than 85 percent cotton by weight, of uncombed fibers, over 43 but n/o 52 nm, not put up for retail sale.
5206.14.00	Single cotton yarn, less than 85 percent cotton by weight, of uncombed fibers, over 52 but n/o 80 nm, not put up for retail sale.
5206.15.00	Single cotton yarn, less than 85 percent cotton by weight, of uncombed fibers, over 80 nm, not put up for retail sale.
5206.21.00	Single cotton yarn, less than 85 percent cotton by weight, of combed fibers, not over 14 nm, not put up for retail sale.
5206.22.00	Single cotton yarn, less than 85 percent cotton by weight, of combed fibers, over 14 but n/o 43 nm, not put up for retail sale.
5206.23.00	Single cotton yarn, less than 85 percent cotton by weight, of combed fibers, over 43 but n/o 52 nm, not put up for retail sale.
5206.24.00	Single cotton yarn, less than 85 percent cotton by weight, of combed fibers, over 52 but n/o 80 nm, not put up for retail sale.
5206.25.00	Single cotton yarn, less than 85 percent cotton by weight, of combed fibers, over 80 nm, not put up for retail sale.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
5206.31.00	Multiple or cabled cotton yarn, <85% cotton by weight, of uncombed fibers, not over 14 nm per single yarn, not put up for retail sale.
5206.32.00	Multiple or cabled cotton yarn, <85% cotton by weight, of uncombed fibers, over 14 but n/o 43 nm/single yarn, not put up for retail sale.
5206.33.00	Multiple or cabled cotton yarn, <85% cotton by weight, of uncombed fibers, over 43 but n/o 52 nm/single yarn, not put up for retail sale.
5206.34.00	Multiple or cabled cotton yarn, <85% cotton by weight, of uncombed fibers, over 52 but n/o 80 nm/single yarn, not put up for retail sale.
5206.35.00	Multiple or cabled cotton yarn, <85% cotton by weight, of uncombed fibers, over 80 nm per single yarn, not put up for retail sale.
5206.41.00	Multiple or cabled cotton yarn, <85% cotton by weight, of combed fibers, n/o 14 nm per single yarn, not put up for retail sale.
5206.42.00	Multiple or cabled cotton yarn, <85% cotton by weight, of combed fibers, over 14 but n/o 43 nm per single yarn, not put up for retail sale.
5206.43.00	Multiple or cabled cotton yarn, <85% cotton by weight, of combed fibers, over 43 but n/o 52 nm per single yarn, not put up for retail sale.
5206.44.00	Multiple or cabled cotton yarn, <85% cotton by weight, of combed fibers, over 52 but n/o 80 nm per single yarn, not put up for retail sale.
5206.45.00	Multiple or cabled cotton yarn, <85% cotton by weight, of combed fibers, over 80 nm per single yarn, not put up for retail sale.
5207.10.00	Cotton yarn, other than sewing thread, containing 85 percent or more cotton by weight, put up for retail sale.
5207.90.00	Cotton yarn, other than sewing thread, containing less than 85 percent cotton by weight, put up for retail sale.
5208.11.20	Woven cotton fabric, 85% or more cotton by weight, plain weave, weight not over 100 g/m2, unbleached, of number 42 or lower.
5208.11.40	Woven cotton fabric, 85% or more cotton by weight, plain weave, weight not over 100 g/m2, unbleached, of numbers 43–68.
5208.11.60	Woven cotton fabric, 85% or more cotton by weight, plain weave, wt n/o 100 g/m2, unbleached, of number 69 or over, for typewriter ribbon.
5208.11.80	Woven cotton fabric, 85% or more cotton by weight, plain weave, weight not over 100 g/m2, unbleached, of number 69 or over, nesoi.
5208.12.40	Woven cotton fabric, 85% or more cotton by weight, plain weave, weight over 100 but n/o 200 g/m2, unbleached, of numbers 42 or lower.
5208.12.60	Woven cotton fabric, 85% or more cotton by weight, plain weave, weight over 100 but n/o 200 g/m2, unbleached, of numbers 43–68.
5208.12.80	Woven cotton fabric, 85% or more cotton by weight, plain weave, weight over 100 but n/o 200 g/m2, unbleached, of number 69 or over.
5208.13.00	Unbleached 3- or 4-thread twill fabrics of cotton, incl. cross twill, containing 85% or more of cotton by weight, weighing not over 200 g/m2.
5208.19.20	Unbleached satin or twill weave fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 200 g/m2, nesoi.
5208.19.40	Unbleached woven fabrics of cotton, nesoi, 85% or more of cotton by weight, weighing not more than 200 g/m2, of number 42 or lower.
5208.19.60	Unbleached woven fabrics of cotton, nesoi, 85% or more of cotton by weight, weighing not more than 200 g/m2, of numbers 43–68.
5208.19.80	Unbleached woven fabrics of cotton, nesoi, 85% or more of cotton by weight, weighing not more than 200 g/m2, of number 69 or higher.
5208.21.20	Woven cotton fabric, 85 percent or more cotton by weight, plain weave, not over 100 g/m2, bleached, of number 42 or lower.
5208.21.40	Woven cotton fabric, 85% or more cotton by weight, plain weave, not over 100 g/m2, bleached, of numbers 43–68.
5208.21.60	Woven cotton fabric, 85% or more cotton by weight, plain weave, not over 100 g/m2, bleached, of number 69 or higher.
5208.22.40	Woven cotton fabric, 85% or more cotton by weight, plain weave, over 100 but n/o 200 g/m2, bleached, of number 42 or lower.
5208.22.60	Woven cotton fabric, 85% or more cotton by weight, plain weave, over 100 but n/o 200 g/m2, bleached, of numbers 43–68.
5208.22.80	Woven cotton fabric, 85% or more cotton by weight, plain weave, over 100 but n/o 200 g/m2, bleached, of number 69 or higher.
5208.23.00	Woven cotton fabric, >= 85% by wt. cotton, <= 200 g/m2, bleached, exc. plain weave, 3- or 4-thread twill.
5208.29.20	Bleached satin or twill weave fabrics, containing 85% or more cotton by weight, weighing not more than 200 g/m2, nesoi.
5208.29.40	Bleached woven fabrics of cotton, nesoi, 85% or more cotton by weight, weighing not more than 200 g/m2, of number 42 or lower.
5208.29.60	Bleached woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of numbers 43–68.
5208.29.80	Bleached woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of number 69 or higher.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5208.31.20	Dyed plain weave certified hand-loomed fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 100 g/m2.
5208.31.40	Dyed plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 100 g/m2, of number 42 or lower, nesoi.
5208.31.60	Dyed plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 100 g/m2, of numbers 43–68, nesoi.
5208.31.80	Dyed plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 100 g/m2, of number 69 or higher, nesoi.
5208.32.10	Dyed plain weave certified hand-loomed fabrics of cotton, cont. 85% or more cotton by weight, weighing over 100 g/m2 but not over 200 g/m2.
5208.32.30	Dyed plain weave fabrics of cotton, nesoi, 85% or more cotton by weight, over 100 g/m2 but not more than 200 g/m2, of number 42 or lower.
5208.32.40	Dyed plain weave fabrics of cotton, nesoi, 85% or more cotton by weight, over 100 g/m2 but not more than 200 g/m2, of numbers 43–68.
5208.32.50	Dyed plain weave fabrics of cotton, nesoi, 85% or more cotton by weight, over 100 g/m2 but not more than 200 g/m2, of number 69 or higher.
5208.33.00	Dyed 3- or 4-thread twill fabrics of cotton, including cross twill, 85% or more cotton by weight, weighing not more than 200 g/m2.
5208.39.20	Dyed satin or twill weave fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 200 g/m2, nesoi.
5208.39.40	Dyed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of number 42 or lower.
5208.39.60	Dyed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of numbers 43–68.
5208.39.80	Dyed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of number 69 or higher.
5208.41.20	Plain weave certified hand-loomed fabrics of cotton, 85% or more cotton by weight, weighing not over 100 g/m2, of yarns of different colors.
5208.41.40	Plain weave fabrics of cotton, 85% or more cotton by weight, weighing not over 100 g/m2, number 42 or lower, of yarns of different colors.
5208.41.60	Plain weave fabrics of cotton, 85% or more cotton by weight, weighing not over 100 g/m2, of numbers 43–68, of yarns of different colors.
5208.41.80	Plain weave fabrics of cotton, 85% or more cotton by weight, weighing not over 100 g/m2, of number 69 or higher, of yarn of different colors.
5208.42.10	Plain weave certified hand-loomed fabrics of cotton, 85% or more cotton by weight, over 100 but n/o 200 g/m2, of yarns of different colors.
5208.42.30	Plain weave fabrics of cotton, 85% or more cotton by weight, over 100 but n/o 200 g/m2, of numbers 42 or lower, of yarns of different colors.
5208.42.40	Plain weave fabrics of cotton, 85% or more cotton by weight, over 100 but n/o 200 g/m2, of numbers 43–68, of yarns of different colors.
5208.42.50	Plain weave fabrics of cotton, 85% or more cotton by weight, over 100 but n/o 200 g/m2, number 69 or higher, of yarns of different colors.
5208.43.00	3- or 4-thread twill fabrics of cotton, including cross twill, 85% or more cotton by weight, not over 200 g/m2, of yarns of different colors.
5208.49.20	Satin or twill weave fabrics of cotton, cont. 85% or more cotton by weight, weighing not over 200 g/m2, of yarns of different colors, nesoi.
5208.49.40	Woven fabrics of cotton, nesoi, 85% or more cotton by weight, wt. not more than 200 g/m2, of number 42 or lower, of yarns of different colors.
5208.49.60	Woven fabrics of cotton, nesoi, 85% or more cotton by weight, wt. not over 200 g/m2, of numbers 43–68, of yarns of different colors.
5208.49.80	Woven fabrics of cotton, nesoi, 85% or more cotton by weight, wt. not over 200 g/m2, of number 69 or higher, of yarns of different colors.
5208.51.20	Printed certified hand-loomed plain weave fabrics of cotton, 85% or more cotton by weight, weighing not over 100 g/m2.
5208.51.40	Printed plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing not over 100 g/m2, of number 42 or lower.
5208.51.60	Printed plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing not over 100 g/m2, of numbers 43–68.
5208.51.80	Printed plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing not over 100 g/m2, of number 69 or higher.
5208.52.10	Printed certified hand-loomed plain weave fabrics of cotton, 85% or more cotton by weight, wt. more than 100 g/m2 but not more than 200 g/m2.
5208.52.30	Printed plain weave fabrics of cotton, 85% or more cotton by weight, weighing over 100 g/m2 but not more than 200 g/m2, of number 42 or lower.
5208.52.40	Printed plain weave fabrics of cotton, 85% or more cotton by weight, weighing over 100 g/m2 but not more than 200 g/m2, of numbers 43–68.

HTSUS subheading	Product description
5208.52.50	Printed plain weave fabrics of cotton, 85% or more cotton by weight, weighing over 100 g/m2 but not more than 200 g/m2, of number 69 or higher.
5208.59.10	Printed 3- or 4-thread twill fabrics of cotton, including cross twill, 85% or more cotton by weight, weighing not more than 200 g/m2.
5208.59.20	Printed satin or twill weave fabrics of cotton, containing 85% or more cotton by weight, weighing not more than 200 g/m2, nesoi.
5208.59.40	Printed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of number 42 or lower.
5208.59.60	Printed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of numbers 43–68.
5208.59.80	Printed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing not more than 200 g/m2, of number 69 or higher.
5209.11.00	Unbleached plain weave fabrics of cotton, 85 percent or more cotton by weight, weight more than 200 g/m2.
5209.12.00	Unbleached 3- or 4-thread twill fabrics of cotton, including cross twill, 85 percent or more cotton by weight, weighing more than 200 g/m2.
5209.19.00	Unbleached woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200g/m2.
5209.21.00	Bleached plain weave fabrics of cotton, 85% or more cotton by weight, weighing more than 200 g/m2.
5209.22.00	Bleached 3- or 4-thread twill fabrics of cotton, including cross twill, 85 percent or more cotton by weight, weighing more than 200 g/m2.
5209.29.00	Bleached woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.31.30	Dyed, plain weave certified hand-loomed fabrics of cotton, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.31.60	Dyed, plain weave fabrics of cotton, containing 85% or more cotton by weight, weighing more than 200 g/m2, nesoi.
5209.32.00	Dyed 3- or 4-thread twill fabrics of cotton, including cross twill, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.39.00	Dyed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.41.30	Plain weave certified hand-loomed fabrics of cotton, cont. 85% or more cotton by weight, weighing over 200 g/m2, of yarns of different colors.
5209.41.60	Plain weave fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200 g/m2, of yarns of different colors.
5209.42.00	Denim containing 85% or more cotton by weight, weighing more than 200 g/m2, of yarns of different colors.
5209.43.00	3- or 4-thread twill fabrics of cotton, incl. cross twill, nesoi, 85% or more cotton by wt. weighing ov. 200 g/m2, of yarns of different colors.
5209.49.00	Woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200 g/m2, of yarns of different colors.
5209.51.30	Printed plain weave certified hand-loomed fabrics of cotton, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.51.60	Printed plain weave fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.52.00	Printed 3- or 4-thread twill fabrics of cotton, including cross twill, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5209.59.00	Printed woven fabrics of cotton, nesoi, containing 85% or more cotton by weight, weighing more than 200 g/m2.
5210.11.40	Unbleached plain weave fabrics of cotton, <85% cotton, mixed mainly/solely with man-made fibers, wt. <200 g/m2, of number 42 or lower.
5210.11.60	Unbleached plain weave fabrics of cotton, <85% cotton, mixed mainly/solely with man-made fibers, wt. <200 g/m2, of numbers 43–68.
5210.11.80	Unbleached plain weave fabrics of cotton, <85% cotton, mixed mainly/solely with man-made fibers, wt. <200 g/m2, of number 69 or higher.
5210.19.10	Unbleached 3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely with mm fibers, n/o 200 g/m2.
5210.19.20	Unbleached satin or twill weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, not more than 200 g/m2.
5210.19.40	Unbleached woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of number 42 or lower.
5210.19.60	Unbleached woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of numbers 43–68.
5210.19.80	Unbleached woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely w/man-made fibers, n/o 200 g/m2, of number 69 or higher.
5210.21.40	Bleached plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of number 42 or lower.
5210.21.60	Bleached plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, not over 200 g/m2, of numbers 43–68.
5210.21.80	Bleached plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of number 69 or higher.

HTSUS subheading	Product description
5210.29.10	Bleached 3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely w/man-made fibers, n/o 200 g/m2.
5210.29.20	Bleached satin or twill weave fabrics of cotton, <85% cotton by weight, mixed mainly/solely with man-made fibers, not more than 200 g/m2.
5210.29.40	Bleached woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely w/man-made fibers, n/o 200 g/m2, of number 42 or lower.
5210.29.60	Bleached woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely with man-made fibers, n/o 200 g/m2, of numbers 43–68.
5210.29.80	Bleached woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of number 69 or higher.
5210.31.40	Dyed plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, not over 200 g/m2, of number 42 or lower.
5210.31.60	Dyed plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, not over 200 g/m2, of numbers 43–68.
5210.31.80	Dyed plain weave cotton fabrics, <85% cotton by wt., mixed mainly/solely with man-made fibers, not over 200 g/m2, of number 69 or higher.
5210.32.00	Dyed 3 or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely with man-made fibers, wt. n/o 200 g/m2.
5210.39.20	Dyed satin or twill weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, weighing not more than 200 g/m2.
5210.39.40	Dyed woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely w/man-made fibers, not over 200 g/m2, of number 42 or lower.
5210.39.60	Dyed woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely w/man-made fibers, not over 200 g/m2, of numbers 43–68.
5210.39.80	Dyed woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely w/man-made fibers, not over 200 g/m2, of number 69 or higher.
5210.41.40	Plain weave cotton fabrics, <85% cotton by wt., mixed mainly/solely w/mm fibers, n/o 200 g/m2, of number 42 or lower, of yarn of diff colors.
5210.41.60	Plain weave cotton fabrics, <85% cotton by wt, mixed mainly/solely w/mm fibers, n/o 200 g/m2, of numbers 43–68, of yarn of different colors.
5210.41.80	Plain weave cotton fabrics, <85% cotton by wt, mixed mainly/solely w/mm fibers, n/o 200 g/m2, number 69 or higher, of yarn of diff colors.
5210.49.10	3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely w/mm fibers, n/o 200 g/m2, of yarn diff colors.
5210.49.20	Satin or twill weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely w/mm fibers, wt. n/o 200 g/m2, of yarn of different colors, nesoi.
5210.49.40	Woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely w/mm fibers, n/o 200 g/m2, of number 42 or lower, of yarn of diff colors.
5210.49.60	Woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely w/man-made fibers, n/o 200 g/m2, numbers 43–68, of yarn of diff colors.
5210.49.80	Woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly with m-m fibers, n/o 200 g/m2, number 69 or higher, of yarn of diff colors.
5210.51.40	Printed plain weave cotton fabrics, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of number 42 or lower.
5210.51.60	Printed plain weave cotton fabrics, <85% cotton by wt., mixed mainly/solely with man-made fibers, n/o 200 g/m2, of numbers 43–68.
5210.51.80	Printed plain weave cotton fabrics, <85% cotton by weight, mixed mainly/solely with man-made fibers, n/o 200 g/m2, of number 69 or higher.
5210.59.10	Printed 3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely w/man-made fibers, n/o 200 g/m2.
5210.59.20	Printed satin or twill weave cotton fabrics, nesoi, <85% cotton by wt., mixed mainly/solely with man-made fibers, weighing n/o 200 g/m2.
5210.59.40	Printed woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely with man-made fibers, wt. n/o 200 g/m2, of number 42 or lower.
5210.59.60	Printed woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely with man-made fibers, weighing n/o 200 g/m2, of numbers 43–68.
5210.59.80	Printed woven fabrics of cotton, nesoi, <85% cotton by wt., mixed mainly/solely w/man-made fibers, weighing n/o 200 g/m2, number 69 or higher.
5211.11.00	Unbleached plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, over 200 g/m2.
5211.12.00	Unbleached 3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely w/man-made fiber, ov. 200 g/m2.
5211.19.00	Unbleached woven fabrics of cotton, nesoi, containing <85% cotton by weight, mixed mainly/solely with man-made fibers, more than 200 g/m2.
5211.20.21	Bleached plain weave fabrics of cotton, <85% cotton by weight, mixed mainly/solely with man-made fibers, over 200 g/m2.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5211.20.22	Bleached 3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely w/man-made fibers, over 200 g/m2.
5211.20.29	Bleached woven fabrics of cotton, nesoi, containing <85% cotton by weight, mixed mainly/solely with man-made fibers, more than 200g/m2.
5211.31.00	Dyed plain weave fabrics of cotton, containing <85% cotton by weight, mixed mainly/solely with man-made fibers, more than 200 g/m2.
5211.32.00	Dyed 3- or 4-thread twill fabrics of cotton, incl. cross twill, <85% cotton by wt., mixed mainly/solely w/man-made fibers, more than 200 g/m2.
5211.39.00	Dyed woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely with man-made fibers, weighing more than 200 g/m2.
5211.41.00	Plain weave fabrics of cotton, <85% cotton by weight, mixed mainly/solely with man-made fibers, over 200g/m2, of yarns of different colors.
5211.42.00	Denim containing <85% cotton by wt., mixed mainly/solely w/man-made fibers, weighing >200 g/m2, of yarns of different colors.
5211.43.00	3- or 4-thread twill fab. of cotton, incl cross twill, nesoi, <85% cotton wt., mixed mainly/solely w/mm fibers, ov. 200 g/m2, of yarn of diff colors.
5211.49.00	Woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely w/man-made fibers, over 200 g/m2, of yarns of different colors.
5211.51.00	Printed plain weave fabrics of cotton, <85% cotton by wt., mixed mainly/solely with man-made fibers, weighing more than 200 g/m2.
5211.52.00	Printed 3- or 4-thread twill fabrics of cotton, incl cross twill, <85% cotton by wt., mixed mainly/solely with man-made fibers, over 200 g/m2.
5211.59.00	Printed woven fabrics of cotton, nesoi, <85% cotton by weight, mixed mainly/solely with man-made fibers, weighing more than 200 g/m2.
5212.11.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing not more than 200 g/m2, unbleached.
5212.11.60	Other woven fabrics of cotton, nesoi, weighing not more than 200 g/m2, unbleached.
5212.12.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing not more than 200 g/m2, bleached.
5212.12.60	Other woven fabrics of cotton, nesoi, weighing not more than 200 g/m2, bleached.
5212.13.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing not more than 200 g/m2, dyed.
5212.13.60	Other woven fabrics of cotton, nesoi, weighing not more than 200 g/m2, dyed.
5212.14.10	Other woven fabrics of cotton, containing 36% or more of wool or fine hair, weighing not more than 200 g/m2, of yarns of different colors.
5212.14.60	Other woven fabrics of cotton, nesoi, weighing not more than 200 g/m2, of yarns of different colors.
5212.15.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing not more than 200 g/m2, printed.
5212.15.60	Other woven fabrics of cotton, nesoi, weighing not more than 200 g/m2, printed.
5212.21.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing more than 200 g/m2, unbleached.
5212.21.60	Other woven fabrics of cotton, nesoi, weighing more than 200 g/m2, unbleached.
5212.22.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing more than 200 g/m2, bleached.
5212.22.60	Other woven fabrics of cotton, nesoi, weighing more than 200 g/m2, bleached.
5212.23.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing more than 200 g/m2, dyed.
5212.23.60	Other woven fabrics of cotton, nesoi, weighing more than 200 g/m2, dyed.
5212.24.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing more than 200 g/m2, of yarns of different colors.
5212.24.60	Other woven fabrics of cotton, nesoi, weighing more than 200 g/m2, of yarns of different colors.
5212.25.10	Other woven fabrics of cotton, containing 36% or more by weight of wool or fine hair, weighing more than 200 g/m2, printed.
5212.25.60	Other woven fabrics of cotton, nesoi, weighing more than 200 g/m2, printed.
5301.10.00	Flax, raw or retted.
5301.21.00	Flax, broken or scutched.
5301.29.00	Flax, hackled or otherwise processed, except broken or scutched but not spun.
5301.30.00	Flax tow and waste (including yarn waste and garnetted stock).
5302.10.00	True hemp, raw or retted.
5302.90.00	True hemp, processed but not spun; tow and waste of true hemp (including yarn waste and garnetted stock).
5303.10.00	Jute and other textile bast fibers (excluding flax, true hemp and ramie), raw or retted.
5303.90.00	Jute and other textile bast fibers (excluding flax, true hemp and ramie), processed but not spun; tow and waste of these fibers.
5305.00.00	Coconut, abaca, ramie, other veg. fibers, nesoi, raw or processed, not spun; tow noils and their wastes (incl. yarn waste and garnetted stock.
5306.10.00	Flax yarn, single.
5306.20.00	Flax yarn, multiple (folded) or cabled.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
5307.10.00	Yarn of jute or other textile bast fibers (excluding flax, true hemp, and ramie), single.
5307.20.00	Yarn of jute or other textile bast fibers (excluding flax, true hemp, and ramie), multiple (folded) or cabled.
5308.10.00	Coir yarn.
5308.20.00	True hemp yarn.
5308.90.10	Paper yarn.
5308.90.90	Yarn of other vegetable textile fibers, nesoi.
5309.11.00	Woven fabrics of flax, containing 85 percent or more by weight of flax, unbleached or bleached.
5309.19.00	Woven fabrics of flax, containing 85 percent or more by weight of flax, other than unbleached or bleached.
5309.21.20	Woven fabrics of flax, containing less than 85% by weight of flax, containing over 17% of wool or fine animal hair, unbleached or bleached.
5309.21.30	Woven fabrics of flax, <85% by wt of flax, unbleached or bleached, containing <17% by wt of wool and containing cotton and manmade fibers.
5309.21.40	Woven fabrics of flax, containing less than 85 percent by weight of flax, unbleached or bleached, nesoi.
5309.29.20	Woven fabrics of flax, containing <85% by wt of flax, contain over 17% by wt of wool or fine animal hair, other than unbleached or bleached.
5309.29.30	Woven fabrics of flax, less than 85% by wt of flax, containing less than 17% by wt of wool and containing cotton and manmade fibers, nesoi.
5309.29.40	Woven fabrics of flax, containing less than 85 percent by weight of flax, other than unbleached or bleached, nesoi.
5310.10.00	Unbleached woven fabrics of jute or of other textile bast fibers of heading 5303.
5310.90.00	Woven fabrics of jute or of other textile bast fibers of heading 5303, other than unbleached.
5311.00.20	Woven fabrics of other vegetable textile fibers, containing more than 17% by weight of wool or fine animal hair.
5311.00.30	Woven fabrics of other vegetable textile fibers, containing cotton and manmade fibers, nesoi.
5311.00.40	Woven fabrics of other vegetable textile fibers, nesoi.
5311.00.60	Woven fabrics of paper yarn.
5401.10.00	Sewing thread of synthetic filaments, whether or not put up for retail sale.
5401.20.00	Sewing thread of artificial filaments, whether or not put up for retail sale.
5402.11.30	Single high tenacity yarn of aramids, not put up for retail sale.
5402.11.60	Multiple (folded) or cabled high tenacity yarn (except sewing thread) of aramids, not put up for retail sale.
5402.19.30	Single high tenacity yarn of nylon or polyamides (except aramids), not put up for retail sale.
5402.19.60	Multiple (folded) or cabled high tenacity yarn (except sewing thread) of nylon or other polyamides (except aramids), not put up for retail sale.
5402.20.30	Single high tenacity yarn of polyesters, not put up for retail sale.
5402.20.60	Multiple (folded) or cabled high tenacity yarn (except sewing thread) of polyesters, not put up for retail sale.
5402.31.30	Single textured yarn, of nylon or other polyamides, measuring not more than 500 decitex, not put up for retail sale.
5402.31.60	Multiple or cabled textured yarn (except sewing thread), of polyamides, single yarn not more than 500 decitex, not put up for retail sale.
5402.32.30	Single textured yarn, of nylon or other polyamides, measuring more than 500 decitex, not put up for retail sale.
5402.32.60	Multiple or cabled textured yarn (except sewing thread), of polyamides, single yarn more than 500 decitex, not put up for retail sale.
5402.33.30	Single textured yarn of polyesters, not put up for retail sale.
5402.33.60	Multiple or cabled textured yarn (except sewing thread), of polyesters, not put up for retail sale.
5402.34.30	Single textured polypropylene yarn, not put up for retail sale.
5402.34.60	Multiple or cabled textured polypropylene yarn (except sewing thread), not put up for retail sale.
5402.39.31	Single textured yarn, nesoi, not put up for retail sale.
5402.39.61	Multiple or cabled textured yarn (except sewing thread), nesoi, not put up for retail sale.
5402.44.00	Single elastomeric yarns, monofil, untwisted or with a twist not exceeding 50 turns per meter, not for retail sale.
5402.45.10	Synth filament yarn, for doll wigs, of colored multifil, untwisted/with twist <5 turns/meter, of nylon or other polyamide, not retail sale.
5402.45.90	Syn filament yarn (not for doll wigs), of colored multifil, untwisted/with twist <5 turns/meter, of nylon or o/polyamides, not retail sale.
5402.46.00	Non-textured yarn of polyesters, partially oriented, single, untwisted or with a twist not exceeding 50 turns/m, not put up for retail sale.
5402.47.10	Single yarn, twist of 0–50 turns/m, wholly polyester, 75–80 decitex, 24 filaments, nesoi, not put up for retail sale.
5402.47.90	Single yarn, twist of 0–50 turns/m, other than wholly of polyester, nesoi, not put up for retail sale.
5402.48.00	Non-textured polypropylene yarns, monofil, untwisted or with a twist not exceeding 50 turns per meter, not for retail sale.
5402.49.11	Colored multifilament yarn to be used to make wigs for dolls, of modacrylic, untwisted or twisted, <5 turns per meter, not for retail sale.
5402.49.91	Other yarns, monofil; multifil, untwisted or twisted > or = to 5, not exceeding 50 turns per meter of other synthetic, not for retail sale.
5402.51.00	Nylon or other polyamide yarns, single, with a twist exceeding 50 turns/m, not put up for retail sale.
5402.52.10	Single yarn, twist exceeding 50 turns/m, wholly polyester, 75–80 decitex, 24 filaments, nesoi, not put up for retail sale.
5402.52.90	Single yarn, twist exceeding 50 turns/m, other than wholly of polyester, nesoi, not put up for retail sale.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ‘‘nesoi’’ means ‘‘not elsewhere specified or included’’.

HTSUS subheading	Product description
5402.53.00	Synthetic filament yarn of polypropylene: single other twisted yarns exc nylon/polyester, >50 turns/M, not put up for retail sale.
5402.59.01	Synthetic filament yarn nesoi: single other twisted yarns exc nylon/polyester, >50 turns/M, not put up for retail sale.
5402.61.00	Nylon or other polyamide yarn, multiple (folded) or cabled, (except sewing thread), not put up for retail sale.
5402.62.00	Polyester yarn, multiple (folded) or cabled, (except sewing thread), not put up for retail sale.
5402.63.00	Synthetic filament yarn exc sewing thread of polypropylene, not for retail sale inc monofilament <67 decitex: other yarn multiple (folded) or cabled.
5402.69.01	Synthetic filament yarn exc sewing thread nesoi, not for retail sale inc monofilament <67 decitex: other yarn multiple (folded) or cabled.
5403.10.30	Single high tenacity yarn of viscose rayon, not put up for retail sale.
5403.10.60	Multiple (folded) or cabled high tenacity yarn of viscose rayon (except sewing thread), not put up for retail sale.
5403.31.00	Single yarn of viscose rayon (not high ten. or sewing thread), untwisted or with a twist not over 120 turns/m, not put up for retail sale.
5403.32.00	Single yarn of viscose rayon (not high ten. or sewing thread), with twist exceeding 120 turns/m, not put up for retail sale.
5403.33.00	Single yarn of cellulose acetate (not high ten. or sewing thread), not put up for retail sale.
5403.39.10	Single textured artificial filament yarn (other than sewing thread), not put up for retail sale.
5403.39.90	Artificial filament yarn nesoi, single, not put up for retail sale.
5403.41.00	Viscose rayon yarn (except sewing thread), multiple (folded) or cabled, not put up for retail sale.
5403.42.00	Yarn of cellulose acetate (except sewing thread) multiple (folded) or cabled, not put up for retail sale.
5403.49.10	Multiple (folded) or cabled textured artificial filament yarn (other than sewing thread), not put up for retail sale.
5403.49.90	Multiple (folded) or cabled non-textured artificial filament yarn (other than sewing thread), not put up for retail sale.
5404.11.00	Synthetic monofilament (exc. polypropylene), elastomeric, of 67 decitex or more and with no cross-sectional dimension >1 mm, nesoi.
5404.12.10	Polypropylene monofilament of 67 decitex or more (not racket strings), and with no cross-sectional dim. >1 mm, not over 254 mm in length.
5404.12.90	Polypropylene monofilament of 67 decitex or more (not racket strings), and with no cross-sectional dim. >1 mm, over 254 mm in length.
5404.19.10	Racket strings of synthetic monofilament of 67 decitex or more and of which no cross-sectional dimension exceeds 1 mm.
5404.19.80	Synthetic monofilament (exc. polypropylene), of 67 decitex or more and with no cross-sectional dimension >1 mm, nesoi.
5404.90.00	Strip and the like of synthetic textile materials of an apparent width not exceeding 5 mm.
5405.00.30	Artificial monofilament of 67 decitex or more and of which no cross-sectional dimension exceeds 1 mm.
5405.00.60	Strip and the like of artificial textile materials of an apparent width not exceeding 5 mm.
5406.00.10	Synthetic filament yarn (except sewing thread), put up for retail sale.
5406.00.20	Artificial filament yarn (except sewing thread), put up for retail sale.
5407.10.00	Woven fabrics obtained from high tenacity yarn of nylon or other polyamides or of polyesters.
5407.20.00	Woven fabrics obtained from strip or the like of synthetic textile materials.
5407.30.10	Woven fabrics specified in note 9 to section XI, of synthetic filament yarn, over 60 percent by weight of plastics.
5407.30.90	Woven fabrics specified in note 9 to section XI, of synthetic filament yarn, nesoi.
5407.41.00	Woven fabrics, containing 85 percent or more by weight of filaments of nylon or other polyamides, unbleached or bleached.
5407.42.00	Woven fabrics, containing 85 percent or more by weight of filaments of nylon or other polyamides, dyed.
5407.43.10	Woven fabrics, over 85% by wt fil. of nylon/other polyamides, of diff colored yarns, thread count over 69–142/cm warp, over 31–71/cm filling.
5407.43.20	Woven fabrics, containing 85 percent or more by weight of filaments of nylon or other polyamides, of yarns of different colors, nesoi.
5407.44.00	Woven fabrics, containing 85 percent or more by weight of filaments of nylon or other polyamides, printed.
5407.51.00	Woven fabrics, containing 85 percent or more by weight of textured polyester filaments, unbleached or bleached.
5407.52.05	Woven fabrics, over 85 percent textured polyester filaments, dyed, less than 77 cm in width, thread count 69–142/cm warp, 31–71/cm filling.
5407.52.20	Woven fabrics, over 85 percent textured polyester filaments, dyed, nesoi.
5407.53.10	Woven fabrics, over 85% textured polyester filaments, of different colored yarns, thread count 69–142/cm warp and 31–71/cm filling.
5407.53.20	Woven fabrics, containing 85 percent or more by weight of textured polyester filaments, of yarns of different colors, nesoi.
5407.54.00	Woven fabrics, containing 85 percent or more by weight of textured polyester filaments, printed.
5407.61.11	Woven fab, dyed, 100% polyester, <77 cm wide, >69–142 warp >31–71 filling, of non-tex singles yarn, 75–80 dtx, 24 fil/yn, twist 900+ turns/m.
5407.61.19	Woven fab, dyed, 85%+ non-tex poly. fil., <77 cm wide, >69–142 warp >31–71 filling (not 100% poly. sin. yarn, 75–80 dtx, 24 fil/yn & 900+ turns/m).
5407.61.21	Woven fab, yn diff colors, <77 cm wide, >69–142 warp, >31–71 filling, 100% poly.non-tex sin. yarn of 75–80 dtx., 24 fil/yn & twist 900+ turns/m.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5407.61.29	Woven fab, 85%+ non-tex poly, yn diff colors, <77 cm wide, >69–142 warp, >31–71 filling (not 100% poly sin yarn, 75–80 dtx,24 fil/yn & 900+ turns/m).
5407.61.91	Woven fab, 85%+ non-tex poly fil, wholly of polyester, of single yarns 75–80 decitex, 24 fil/yarn & a twist of 900 or more turns/m.
5407.61.99	Woven fab, of 85%+ non-text. polyester filaments, nesoi (not wholly polyester single yarns, 75–80 dtx, 24 fil/yarn & twist 900+ turns/m).
5407.69.10	Woven fab, containing 85%+ by wt of polyester filaments nesoi, unbleached or bleached.
5407.69.20	Woven fab, containing 85%+ by wt of polyester filaments nesoi, dyed.
5407.69.30	Woven fab, cont. 85%+ by wt polyester filaments nesoi, thread count >69–142/cm in warp & >31–71/cm filling, of yarns of diff. colors.
5407.69.40	Woven fab, containing 85%+ by wt polyester filaments nesoi, of yarns of different colors, nesoi.
5407.69.90	Woven fab, containing 85%+ by wt polyester filaments nesoi, printed.
5407.71.00	Woven fabrics, containing 85 percent or more by weight of synthetic filaments, unbleached or bleached.
5407.72.00	Woven fabrics, containing 85 percent or more by weight of synthetic filaments, dyed.
5407.73.10	Woven fabrics, cont. 85% or more syn. filaments by weight, thread count >69–142/cm warp and >31–71/cm filling, of different colored yarns.
5407.73.20	Woven fabrics, containing 85% or more by weight of synthetic filaments, of yarns of different colors, nesoi.
5407.74.00	Woven fabrics, containing 85 percent or more by weight of synthetic filaments, printed.
5407.81.00	Woven fabrics, containing less than 85% by weight of synthetic filaments, mixed mainly or solely with cotton, unbleached or bleached.
5407.82.00	Woven fabrics, containing less than 85 percent by weight of synthetic filaments, mixed mainly or solely with cotton, dyed.
5407.83.00	Woven fabrics, less than 85 percent by weight of synthetic filaments, mixed mainly or solely with cotton, of yarns of different colors.
5407.84.00	Woven fabrics, containing less than 85 percent by weight of synthetic filaments, mixed mainly or solely with cotton, printed.
5407.91.05	Woven fabrics of synthetic filament yarn nesoi, containing 36 percent or more by weight of wool or fine animal hair, unbleached or bleached.
5407.91.10	Woven fabrics of synthetic filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, unbleached or bleached, nesoi.
5407.91.20	Woven fabrics of synthetic filament yarn nesoi, unbleached or bleached, nesoi.
5407.92.05	Woven fabrics of synthetic filament yarn nesoi, containing 36 percent or more by weight of wool or fine animal hair, dyed.
5407.92.10	Woven fabrics of synthetic filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, cont. <36% wool/fine animal hair, dyed.
5407.92.20	Woven fabrics of synthetic filament yarn nesoi, dyed, nesoi.
5407.93.05	Woven fabrics of synthetic filament yarn nesoi, containing 36% or more by weight of wool or fine animal hair, of yarns of different colors.
5407.93.10	Woven fabrics of synthetic filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, of yarns of different colors, nesoi.
5407.93.15	Woven fabrics, cont. 85% or more of man-made filaments, thread count >69–142/cm warp and >31–71/cm filling, of different colored yarns.
5407.93.20	Woven fabrics of synthetic filament yarn nesoi, of yarns of different colors, nesoi.
5407.94.05	Woven fabrics of synthetic filament yarn nesoi, containing 36 percent or more by weight of wool or fine animal hair, printed.
5407.94.10	Woven fabrics of synthetic filament yarn nesoi, mixed mainly/solely with wool/fine animal hair, contain <36% wool/fine animal hair, printed.
5407.94.20	Woven fabrics of synthetic filament yarn nesoi, printed, nesoi.
5408.10.00	Woven fabrics obtained from high tenacity yarn, of viscose rayon.
5408.21.00	Woven fabrics, containing 85 percent or more by weight of artificial filament or strip or the like, unbleached or bleached.
5408.22.10	Woven fabric, 85%+ artificial filament or strip or the like, dyed, of cuprammonium rayon.
5408.22.90	Woven fabric, 85%+ artificial filament or strip or the like, dyed, not of cuprammonium rayon, nesoi.
5408.23.11	Woven fabric, 85%+ artificial filament/strip, of yarns of different colors, >69–142 warp & >31–71 filling yarns, of cupra/rayon, nesoi.
5408.23.19	Woven fabric, 85%+ artificial filament/strip, of yarns of different colors, >69–142 warp & >31–71 filling yarns, not of cupra/rayon, nesoi.
5408.23.21	Woven fabric, 85%+ artificial filament/strip, of yarns of different colors, not 69–142 warp & 31–71 filling yarns, of cupra/rayon, nesoi.
5408.23.29	Woven fabric, 85%+ artificial filament/strip, of yarns of different colors, not 69–142 warp & 31–71 filling yarns, not of cupra/rayon, nesoi.
5408.24.10	Woven fabric, 85%+ artificial filament/strip, printed, of cuprammonium rayon, nesoi.
5408.24.90	Woven fabric, 85%+ artificial filament/strip, printed, not of cuprammonium rayon, nesoi.
5408.31.05	Woven fabrics of artificial filament yarn nesoi, containing 36 percent or more by wt of wool or fine animal hair, unbleached or bleached.
5408.31.10	Woven fabrics of artificial filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, unbleached or bleached, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5408.31.20	Woven fabrics of artificial filament yarn nesoi, unbleached or bleached, nesoi.
5408.32.05	Woven fabrics of artificial filament yarn nesoi, containing 36 percent or more by wt of wool or fine animal hair, dyed.
5408.32.10	Woven fabrics of artificial filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, dyed, nesoi.
5408.32.30	Woven fabrics of artificial filament yarn nesoi, dyed, 30 percent or more by wt of silk or silk waste, valued over $33/kg.
5408.32.90	Woven fabrics of artificial filament yarn nesoi, dyed, nesoi.
5408.33.05	Woven fabrics of artificial filament yarn nesoi, containing 36% or more by wt of wool or fine animal hair, of yarns of different colors.
5408.33.10	Woven fabrics of artificial filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, of yarns of different colors, nesoi.
5408.33.15	Woven fabrics cont. 85% or more mm filaments nesoi, thread count >69–142/cm warp and >31–71/cm filling, of different colored yarns.
5408.33.30	Woven fabrics of artificial filament yarn nesoi, of yarns of different colors, 30 percent or more of silk or silk waste, valued over $33/kg.
5408.33.90	Woven fabrics of artificial filament yarn nesoi, of yarns of different colors, nesoi.
5408.34.05	Woven fabrics of artificial filament yarn nesoi, containing 36 percent or more by weight of wool or fine animal hair, printed.
5408.34.10	Woven fabrics of artificial filament yarn nesoi, mixed mainly or solely with wool or fine animal hair, printed, nesoi.
5408.34.30	Woven fabrics of artificial filament yarn nesoi, printed, 30 percent or more by weight of silk or silk waste, valued over $33/kg.
5408.34.90	Woven fabrics of artificial filament yarn nesoi, printed, nesoi.
5501.10.00	Synthetic filament tow of nylon or other polyamides.
5501.20.00	Synthetic filament tow of polyesters.
5501.30.00	Synthetic filament tow of acrylic or modacrylic.
5501.40.00	Synthetic filament tow, of polypropylene.
5501.90.01	Synthetic filament tow, nesoi.
5502.10.00	Artificial filament tow of cellulose acetate.
5502.90.00	Artificial filament tow other than of cellulose acetate.
5503.11.00	Synthetic staple fibers, n/carded, combed or otherwise processed for spinning, of aramids.
5503.19.10	Synthetic staple fibers, n/carded, combed or otherwise processed for spinning, of nylon/other polyamides (except aramids), cont 10% or more.
5503.19.90	Synthetic staple fibers, n/carded, combed or otherwise processed for spinning, of nylon or other polyamides (except aramids), nesoi.
5503.20.00	Synthetic staple fibers, not carded, combed or otherwise processed for spinning, of polyesters.
5503.30.00	Synthetic (acrylic or modacrylic) staple fibers, not carded, combed or otherwise processed for spinning.
5503.40.00	Synthetic staple fibers, not carded, combed or otherwise processed for spinning, of polypropylene.
5503.90.10	Synthetic staple fibers, not carded, combed or otherwise processed for spinning, of vinyon.
5503.90.90	Synthetic staple fibers, not carded, combed or otherwise processed for spinning, nesoi.
5504.10.00	Artificial staple fibers, not carded, combed or otherwise processed for spinning, of viscose rayon.
5504.90.00	Artificial staple fibers, not carded, combed or otherwise processed for spinning, other than of viscose rayon.
5505.10.00	Waste (including noils, yarn waste and garnetted stock) of synthetic fibers.
5505.20.00	Waste (including noils, yarn waste and garnetted stock) of artificial fibers.
5506.10.00	Synthetic staple fibers, carded, combed or otherwise processed for spinning, of nylon or other polyamides.
5506.20.00	Synthetic staple fibers, carded, combed or otherwise processed for spinning, of polyesters.
5506.30.00	Synthetic (acrylic or modacrylic) staple fibers, carded, combed or otherwise processed for spinning.
5506.40.00	Synthetic staple fibers of polypropylene, carded, combed or otherwise processed for spinning.
5506.90.01	Other Synthetic staple fibers nesoi, carded, combed or otherwise processed for spinning.
5507.00.00	Artificial staple fibers, carded, combed or otherwise processed for spinning.
5508.10.00	Sewing thread of synthetic staple fibers, whether or not put up for retail sale.
5508.20.00	Sewing thread of artificial staple fibers, whether or not put up for retail sale.
5509.11.00	Yarn (other than sewing thread) containing 85% or more by weight of nylon/polyamide staple fibers, singles, not put up for retail sale.
5509.12.00	Yarn (other than sewing thread) cont. 85% or more by weight of nylon/polyamide staple fibers, multiple or cabled, not put up for retail sale.
5509.21.00	Yarn (other than sewing thread) containing 85% or more by weight of polyester staple fibers, singles, not put up for retail sale.
5509.22.00	Yarn (other than sewing thread) cont. 85% or more by weight of polyester staple fibers, multiple or cabled, not put up for retail sale.
5509.31.00	Yarn (not sewing thread) cont. 85% or more by weight of acrylic or modacrylic staple fibers, singles, not put up for retail sale.
5509.32.00	Yarn (not sewing thread) cont. 85% or more by wt. of acrylic or modacrylic staple fibers,multiple or cabled,not put up for retail sale.
5509.41.00	Yarn (other than sewing thread) containing 85% or more by weight of synthetic staple fibers nesoi, singles, not put up for retail sale.
5509.42.00	Yarn (other than sewing thread) cont. 85% or more by weight of synthetic staple fibers nesoi, multiple or cabled, not put up for retail sale.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5509.51.30	Yarn (not sewing thread) of polyester staple fibers mixed mainly/solely with artificial staple fibers, single, not put up for retail sale.
5509.51.60	Yarn (not sewing thread) of polyester staple fibers mixed mainly/solely with artificial staple fibers, multiple, not put up for retail sale.
5509.52.00	Yarn (other than sewing thread) of polyester staple fibers mixed mainly/solely with wool or fine animal hair, not put up for retail sale.
5509.53.00	Yarn (other than sewing thread) of polyester staple fibers mixed mainly or solely with cotton, not put up for retail sale.
5509.59.00	Yarn (other than sewing thread) of polyester staple fibers nesoi, not put up for retail sale.
5509.61.00	Yarn (other than sewing thread) of acrylic or modacrylic staple fibers mixed with wool or fine animal hair, not put up for retail sale.
5509.62.00	Yarn (other than sewing thread) of acrylic or modacrylic staple fibers mixed mainly or solely with cotton, not put up for retail sale.
5509.69.20	Yarn (not sew thread) of acrylic/modacrylic staple fibers mixed mainly/solely w/artificial staple fibers, singles, not for retail sale.
5509.69.40	Yarn (not sewing thread) of acrylic/modacrylic staple fiber mixed mainly/solely w/artificial staple fiber, multiple or cabled, not retail sale.
5509.69.60	Yarn (other than sewing thread) of acrylic or modacrylic staple fibers nesoi, not put up for retail sale.
5509.91.00	Yarn (other than sewing thread) of synthetic staple fibers mixed mainly or solely with wool or fine animal hair, not put up for retail sale.
5509.92.00	Yarn (other than sewing thread) of synthetic staple fibers mixed mainly or solely with cotton, not put up for retail sale.
5509.99.20	Yarn (not sewing thread) of synthetic staple fibers nesoi, mixed mainly/solely w/artificial staple fibers, singles, not for retail sale.
5509.99.40	Yarn (not sewing thread) of synthetic staple fibers nesoi, mixed mainly/solely w/artificial staple fibers, multiple, not for retail sale.
5509.99.60	Yarn (other than sewing thread) of synthetic staple fibers nesoi, not put up for retail sale.
5510.11.00	Yarn (other than sewing thread) containing 85% or more by weight of artificial staple fibers, singles, not put up for retail sale.
5510.12.00	Yarn (other than sewing thread) cont. 85% or more by weight of artificial staple fibers, multiple or cabled, not put up for retail sale.
5510.20.00	Yarn (other than sewing thread) of artificial staple fibers mixed mainly or solely with wool or fine animal hair, not put up for retail sale.
5510.30.00	Yarn (other than sewing thread) of artificial staple fibers mixed mainly or solely with cotton, not put up for retail sale.
5510.90.20	Yarn (other than sewing thread) of artificial staple fibers mixed mainly/solely with synthetic staple fibers, singles, not for retail sale.
5510.90.40	Yarn (other than sewing thread) of artificial staple fibers mixed mainly/solely with synthetic staple fibers, multiple, not for retail sale.
5510.90.60	Yarn (other than sewing thread) of artificial staple fibers nesoi, not put up for retail sale.
5511.10.00	Yarn (other than sewing thread) of synthetic staple fibers, containing 85% or more by weight of such fibers, put up for retail sale.
5511.20.00	Yarn (other than sewing thread) of synthetic staple fibers, containing less than 85% by weight of such fibers, put up for retail sale.
5511.30.00	Yarn (other than sewing thread) of artificial staple fibers, put up for retail sale.
5512.11.00	Woven fabrics containing 85% or more by weight of polyester staple fibers, unbleached or bleached.
5512.19.00	Woven fabrics containing 85% or more by weight of polyester staple fibers, other than unbleached or bleached.
5512.21.00	Woven fabrics containing 85% or more by weight of acrylic or modacrylic staple fibers, unbleached or bleached.
5512.29.00	Woven fabrics containing 85% or more by weight of acrylic or modacrylic staple fibers, other than unbleached or bleached.
5512.91.00	Woven fabrics, containing 85% or more by weight of synthetic fibers nesoi, unbleached or bleached.
5512.99.00	Woven fabrics, containing 85% or more by weight of synthetic fibers nesoi, other than unbleached or bleached.
5513.11.00	Woven fabric of poly staple fiber, <85% wt. poly staple fibers, mixed mainly/solely w/cotton, wt n/o 170 g/m2, plain weave, unbleached/bleached.
5513.12.00	Woven 3-or 4-thread twill fabric of poly staple fib, <85% poly staple fiber, mixed mainly/solely w/cotton, wt n/o 170 g/m2, unbleached/bleached.
5513.13.00	Woven fabrics of polyester staple fibers, <85% polyester staple fibers, mixed mainly/solely w/cotton, n/o 170 g/m2,unbleached/bleached, nesoi.
5513.19.00	Woven fabrics of synthetic staple fibers nesoi, <85% by weight of such fibers, mixed with cotton, n/o 170g/m2, unbleached or bleached.
5513.21.00	Woven fabrics of polyester staple fibers, <85% polyester staple fibers, mixed mainly/solely w/cotton, not over 170 g/m2, plain weave, dyed.
5513.23.01	Woven fabrics of polyester staple fibers, <85% by wt polyester staple fibers, mixed mainly/solely w/cotton, not over 170 g/m2, dyed, nesoi.
5513.29.00	Woven fabrics of synthetic staple fibers nesoi, <85% by wt of such fibers, mixed mainly/solely w/cotton, weighing n/o 170g/m2, dyed, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5513.31.00	Woven fabrics of poly staple fib, <85% polyester staple fibers, mixed mainly/solely w/cotton, n/o 170 g/m2, plain weave, of yarns of dif. colors.
5513.39.01	Woven fabrics of synthetic staple fibers nesoi, <85% by wt of such fibers, mixed mainly/solely w/cotton, n/o 170g/m2, of dif. colored yarns.
5513.41.00	Printed plain weave fabrics of poly staple fib, <85% by weight polyester staple fibers, mixed mainly/solely with cotton, n/o 170g/m2.
5513.49.10	Printed 3-or 4-thread twill fabric of poly staple fib, incl cross twill, <85% wt poly staple fibers, mixed mainly/solely w/cotton, n/o 170g/m2.
5513.49.20	Printed woven fabrics of polyester staple fibers, <85% by wt polyester staple fibers, mixed mainly/solely with cotton, weighing n/o 170g/m2.
5513.49.90	Printed woven fabrics of synthetic staple fibers nesoi, <85% by weight of such fibers, mixed mainly or solely with cotton, n/o 170g/m2.
5514.11.00	Plain weave fabrics of poly staple fiber, <85% wt polyester staple fibers, mixed mainly/solely w/cotton, wt ov 170 g/m2, unbleached/bleached.
5514.12.00	Wov 3-or 4-thread twill fabric of poly staple fib, <85% polyester staple fiber, mixed mainly/solely w/cotton, ov 170 g/m2, unbleached/bleached.
5514.19.10	Woven fabric of polyester staple fiber, <85% wt polyester, mixed mainly/solely w/cotton, over 170 g/m2, unbleached/bleached.
5514.19.90	Unbleached or bleached woven fabric of synthetic staple fibers nesoi, <85% by wt of such fibers, mixed mainly/solely w/cotton, over 170g/m2.
5514.21.00	Plain weave fabrics of polyester staple fiber, <85% by wt polyester staple fibers, mixed mainly/solely with cotton, over 170 g/m2, dyed.
5514.22.00	Wov 3-or 4-thread twill fabric of poly staple fib, incl cross twill, <85% poly staple fibers, mixed mainly/solely w/cotton, ov 170 g/m2, dyed.
5514.23.00	Woven fabrics of polyester staple fib, <85% by wt polyester staple fibers, mixed mainly/solely w/cotton, over 170 g/m2, dyed, nesoi.
5514.29.00	Dyed woven fabrics of synthetic staple fibers nesoi, <85% by weight of such fibers, mixed mainly or solely with cotton, over 170g/m2.
5514.30.31	Plain weave fabrics of poly staple fiber, <85% polyester staple fibers, mixed mainly/solely with cotton, ov 170 g/m2,of yarns of dif. colors.
5514.30.32	Woven 3-or 4-thread twill fabric of poly staple fib, <85% poly staple fibers, mixed mainly/solely w/cotton, ov 170 g/m2, of yarn of dif. colors.
5514.30.33	Woven fabrics of poly staple fiber, <85% polyester staple fibers, mixed mainly/solely w/cotton, ov 170 g/m2, of yarns of different colors, nesoi.
5514.30.39	Woven fabrics of synthetic staple fibers nesoi, <85% by wt of such fibers, mixed mainly/solely w/cotton, ov 170g/m2, of dif. colored yarns.
5514.41.00	Printed plain weave fabrics of polyester staple fiber, <85% by wt polyester staple fibers, mixed mainly or solely with cotton, over 170g/m2.
5514.42.00	Printed 3-or 4-thread twill fab of poly staple fib, incl cross twill, <85% by wt poly staple fibers, mixed mainly/solely w/cotton, ov 170g/m.
5514.43.00	Printed woven fabrics of polyester staple fiber, <85% by wt polyester staple fibers, mixed mainly/solely with cotton, over 170g/m2, nesoi.
5514.49.00	Printed woven fabrics of synthetic staple fibers nesoi, <85% by weight of such fibers, mixed mainly or solely with cotton, over 170g/m2.
5515.11.00	Woven fabrics of polyester staple fibers, mixed mainly or solely with viscose rayon staple fibers, nesoi.
5515.12.00	Woven fabrics of polyester staple fibers, mixed mainly or solely with man-made filaments, nesoi.
5515.13.05	Woven fabrics of polyester staple fibers, containing 36 percent or more by weight of wool or fine animal hair, nesoi.
5515.13.10	Woven fabrics of polyester staple fibers, mixed mainly or solely with wool or fine animal hair, nesoi.
5515.19.00	Woven fabrics of polyester staple fibers, nesoi.
5515.21.00	Woven fabrics of acrylic or modacrylic staple fibers, mixed mainly or solely with man-made filaments, nesoi.
5515.22.05	Woven fabrics of acrylic or modacrylic staple fibers, containing 36% or more by weight of wool or fine animal hair, nesoi.
5515.22.10	Woven fabrics of acrylic or modacrylic staple fibers, mixed mainly or solely with wool or fine animal hair, nesoi.
5515.29.00	Woven fabrics of acrylic or modacrylic staple fibers, nesoi.
5515.91.00	Woven fabrics of synthetic staple fibers (not polyester/acrylic or modacrylic staple fiber) mixed mainly/solely w/man-made filaments, nesoi.
5515.99.05	Woven fabrics of synthetic staple fibers (not polyester/acrylic or modacrylic staple fiber) contain 36% or more wool/fine animal hair, nesoi.
5515.99.10	Woven fabrics of synthetic staple fibers (not polyester/acrylic/modacrylic staple fiber) mixed mainly/solely w/wool/fine animal hair, nesoi.
5515.99.90	Woven fabrics of synthetic staple fibers (not of polyester, acrylic or modacrylic staple fibers), nesoi.
5516.11.00	Woven fabrics of artificial staple fibers, containing 85% or more by weight of such fibers, unbleached or bleached.
5516.12.00	Woven fabrics of artificial staple fibers, containing 85% or more by weight of such fibers, dyed.
5516.13.00	Woven fabrics of artificial staple fibers, containing 85% or more by weight of such fibers, of yarns of different colors.
5516.14.00	Woven fabrics of artificial staple fibers, containing 85% or more by weight of such fibers, printed.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. HTSUS subheading	Product description
5516.21.00	Woven fabrics of artificial staple fibers, <85% by weight of such fibers, mixed mainly/solely with man-made filaments, unbleached/bleached.
5516.22.00	Woven fabrics of artificial staple fibers, <85% by weight of such fibers, mixed mainly/solely with man-made filaments, dyed.
5516.23.00	Woven fabrics of artificial staple fibers, <85% by wt of such fibers, mixed mainly/solely w/man-made filaments, of different colored yarns.
5516.24.00	Woven fabrics of artificial staple fibers, <85% by weight of such fibers, mixed mainly or solely with man-made filaments, printed.
5516.31.05	Woven fabrics of artificial staple fibers, <85% of such fibers, containing 36% or more of wool or fine animal hair,unbleached or bleached.
5516.31.10	Woven fabrics of artificial staple fibers, <85% of such fibers, mixed mainly/solely w/wool or fine animal hair, unbleached/bleached, nesoi.
5516.32.05	Woven fabrics of artificial staple fibers, <85% of such fibers, containing 36% or more of wool or fine animal hair, dyed.
5516.32.10	Woven fabrics of artificial staple fibers, <85% by weight of such fibers, mixed mainly/solely with wool or fine animal hair, dyed, nesoi.
5516.33.05	Woven fabrics of artificial staple fibers, <85% such fibers, containing 36% or more of wool or fine animal hair, of different colored yarns.
5516.33.10	Woven fabrics of artificial staple fibers, <85% of such fiber, mixed mainly/solely w/wool or fine animal hair, of dif. colored yarns, nesoi.
5516.34.05	Woven fabrics of artificial staple fibers, <85% of such fibers, containing 36% or more of wool or fine animal hair, printed.
5516.34.10	Woven fabrics of artificial staple fibers, <85% of such fibers, mixed mainly or solely with wool or fine animal hair, printed, nesoi.
5516.41.00	Woven fabrics of artificial staple fibers, <85% by weight of such fibers, mixed mainly or solely with cotton, unbleached or bleached.
5516.42.00	Woven fabrics of artificial staple fibers, less than 85% by weight of such fibers, mixed mainly or solely with cotton, dyed.
5516.43.00	Woven fabrics of artificial staple fibers, <85% by wt. of such fibers, mixed mainly or solely with cotton, of yarns of different colors.
5516.44.00	Woven fabrics of artificial staple fibers, less than 85% by weight of such fibers, mixed mainly or solely with cotton, printed.
5516.91.00	Woven fabrics of artificial staple fibers nesoi, unbleached or bleached, nesoi.
5516.92.00	Woven fabrics of artificial staple fibers nesoi, dyed, nesoi.
5516.93.00	Woven fabrics of artificial staple fibers nesoi, of yarns of different colors, nesoi.
5516.94.00	Woven fabrics of artificial staple fibers nesoi, printed, nesoi.
5601.21.00	Wadding of cotton and other articles of cotton wadding nesoi.
5601.22.00	Wadding of man-made fibers and other articles of such wadding nesoi.
5601.29.00	Wadding of textile materials (excluding cotton and man-made fibers) and articles thereof, nesoi.
5601.30.00	Textile flock, not exceeding 5 mm in length, and textile dust and mill neps.
5602.10.10	Laminated fabrics of needleloom felt or stitch-bonded fiber fabrics.
5602.10.90	Needleloom felt and stitch-bonded fabrics, whether or not impregnated, coated or covered, nesoi.
5602.21.00	Felt, excluding needleloom felt and stitch-bonded fiber fabrics, not impregnated, coated, covered or laminated, of wool or fine animal hair.
5602.29.00	Felt, excluding needleloom felt and stitch-bonded fiber fabrics, not impregnated, coated, covered or laminated, of textile materials nesoi.
5602.90.30	Laminated fabrics of felt, nesoi.
5602.90.60	Felt, impregnated, coated or covered, of man-made fibers, nesoi.
5602.90.90	Felt, impregnated, coated or covered, nesoi.
5603.11.00	Nonwovens, of man-made filaments, weighing not >25 g/square m, whether or not impregnated, coated, covered or laminated.
5603.12.00	Nonwovens, of man-made filaments, weighing >25 but not >70 g/square m, whether or not impregnated, coated, covered or laminated.
5603.13.00	Nonwovens, of man-made filaments, weighing >70 but not >150 g/square m, whether or not impregnated, coated, covered or laminated.
5603.14.30	Laminated nonwoven fabs, of man-made filaments, weighing >150 g/square m.
5603.14.90	Nonwovens (except laminated), of man-made filaments, weighing >150 g/square m, whether or not impregnated, coated, or covered.
5603.91.00	Nonwovens (not of man-made filaments), weighing not >25 g/square m, whether or not impregnated, coated, covered or laminated.
5603.92.00	Nonwovens (not of man-made filaments), weighing >25 but not >70 g/square m, whether or not impregnated, coated, covered or laminated.
5603.93.00	Nonwovens (not of man-made filaments), weighing >70 but not >150 g/square m, whether or not impregnated, coated, covered or laminated.
5603.94.10	Nonwoven floor covering underlays (not of man-made filaments), weighing >150 g/square m, whether or not impreg, coated, cov or laminated.
5603.94.30	Laminated nonwovens nesoi (not of man-made filaments), weighing >150 g/square m.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5603.94.90	Nonwovens nesoi (not of man-made filaments), weighing >150 g/square m, whether or not impregnated, coated, covered but not laminated.
5604.10.00	Rubber thread and cord, textile covered.
5604.90.20	High tenacity yarn of polyesters, of nylon or other polyamides or of viscose rayon, impregnated or coated.
5604.90.90	Textile yarn and strip and the like of heading 5404 or 5405, impregnated, coated, covered or sheathed with rubber or plastics, nesoi.
5605.00.10	Metal coated or metal laminated man-made monofilament or strip or the like, ungimped & untwisted or w/twist of less than 5 turns per meter.
5605.00.90	Metalized textile yarn nesoi, of man-made monofilament or strip or the like, other than ungimped or w/twist of <5 turns per meter.
5606.00.00	Gimped yarn, and strip and the like of man-made monofilament; chenille yarn; loop wale-yarn.
5607.21.00	Binder or baler twine, of sisal or other textile fibers of genus Agave.
5607.29.00	Twine (except binder or baler twine), cordage, rope and cables of sisal or other textile fibers of genus Agave.
5607.41.10	Binder or baler twine of wide nonfibrillated strip, of polyethylene or polypropylene.
5607.41.30	Binder or baler twine, of polyethylene or polypropylene, nesoi.
5607.49.10	Twine (other than binder or baler twine), cordage, rope and cables of wide nonfibrillated strip, of polyethylene or polypropylene.
5607.49.15	Twine (ex binder/baler twine), cordage, rope and cables, of polyethylene or polypropylene, not braided or plaited, less than 4.8 mm in diam.
5607.49.25	Twine (except binder or baler twine), cordage, rope and cables, of polyethylene or polypropylene, not braided or plaited, nesoi.
5607.49.30	Twine (except binder or baler twine), cordage, rope and cables, of polyethylene or polypropylene, nesoi.
5607.50.25	3- or 4-ply multicolor twine of synthetic fibers nesoi at least 10% cotton, having "S" twist, <3.5 mm diameter, not braided or plaited.
5607.50.35	Twine nesoi, cordage, rope and cables of synthetic fibers, other than of polyethylene or polypropylene, not braided or plaited.
5607.50.40	Twine, cordage, rope and cables of synthetic fibers, other than of polyethylene or polypropylene, nesoi.
5607.90.10	Twine, cordage, rope and cables, of coir.
5607.90.15	Twine, cordage, rope and cables, of jute or other textile bast fibers (excluding flax, true hemp and ramie).
5607.90.25	Twine, cordage, rope and cables of abaca or other hard (leaf) fibers, of stranded construction measuring 1.88 cm or over in diameter.
5607.90.35	Twine, cordage, rope & cables of abaca or other hard (leaf) fibers, other than stranded construction or stranded n/o 1.88 cm in diameter.
5607.90.90	Twine, cordage, rope and cables, of materials nesoi.
5608.11.00	Made-up fishing nets, of man-made textile materials.
5608.19.10	Fish netting (other than made-up fishing nets) of man-made textile materials.
5608.19.20	Knotted netting of twine, cordage or rope (excluding fish netting or made-up fishing nets) of man-made textile materials.
5608.90.10	Fish netting and fishing nets, of textile materials other than man-made materials.
5608.90.23	Hammocks, of cotton.
5608.90.27	Netting or nets, of cotton, other than hammocks or netting or nets for fishing.
5608.90.30	Knotted netting of twine, cordage or rope or other made-up nets (not fish netting and nets) of textile materials (not cotton/man-made mat.).
5609.00.10	Articles of yarn, strip, twine, cordage, rope or cables nesoi, of cotton.
5609.00.20	Articles of yarn, strip, twine, cordage, rope or cables nesoi, of vegetable fibers except cotton.
5609.00.30	Articles of yarn, strip, twine, cordage, rope or cables nesoi, of man-made fibers.
5609.00.40	Articles of yarn, strip or the like of man-made monofilaments, twine, cordage, rope or cables, nesoi.
5701.10.13	Carpet & other textile floor covering, hand-knotted/hand-inserted, w/ov 50% wt pile of fine animal hair, foregoing cert. hand-loomed & folklore.
5701.10.16	Carpets & other textile floor coverings, hand-knotted or hand-inserted, w/ov 50% by weight of the pile of fine animal hair, nesoi.
5701.10.40	Carpets and other textile floor coverings, of wool or fine animal hair, hand-hooked (tufts were inserted and knotted by hand or hand tool).
5701.10.90	Carpets and other textile floor coverings, of wool or fine animal hair, not hand-hooked, not hand knotted during weaving.
5701.90.10	Carpet and oth textile floor covering, knotted,of text. materials (not wool/hair) nesoi, pile inserted & knotted during weaving or knitting.
5701.90.20	Carpet & oth textile floor covering, knotted, of text materials (not wool/hair) nesoi, not w/pile inserted & knotted during weaving/knitting.
5702.10.10	Certified hand-loomed and folklore products being "Kelem", "Schumacks", "Karamanie" and similar hand-woven rugs.
5702.10.90	"Kelem", "Schumacks", "Karamanie" and similar hand-woven rugs, other than certified hand-loomed and folklore products.
5702.20.10	Floor coverings of coconut fibers (coir), woven, not tufted or flocked, with pile.
5702.20.20	Floor coverings of coconut fibers (coir), woven, not tufted or flocked, other than with pile.
5702.31.10	Wilton, velvet and like floor coverings of pile construction, woven, not tufted or flocked, not made up, of wool or fine animal hair.

HTSUS subheading	Product description
5702.31.20	Carpets and other textile floor coverings of pile construction, woven, not tufted or flocked, not made up, of wool/fine animal hair, nesoi.
5702.32.10	Wilton, velvet and like floor coverings of pile construction, woven, not tufted or flocked, not made up, of man-made textile materials.
5702.32.20	Carpets & other textile floor coverings of pile construction, woven, not tufted or flocked, not made up, of man-made textile materials, nesoi.
5702.39.10	Carpets and other textile floor coverings of pile construction, woven, not tufted or flocked, not made up, of jute.
5702.39.20	Carpets and other textile floor coverings of pile construction, woven, not tufted or flocked, not made up, of other textile materials nesoi.
5702.41.10	Wilton, velvet and like floor coverings of pile construction, woven, not tufted or flocked, made up, of wool or fine animal hair.
5702.41.20	Carpets and other textile floor coverings of pile construction, woven, not tufted or flocked, made up, of wool or fine animal hair, nesoi.
5702.42.10	Wilton, velvet and like floor coverings of pile construction, woven, not tufted or flocked, made up, of man-made textile materials.
5702.42.20	Carpets and other textile floor coverings, of pile construction, woven, not tufted or flocked, made up, of man-made textile materials, nesoi.
5702.49.10	Carpets not other textile floor coverings of pile construction, woven, not tufted or flocked, made up, of cotton.
5702.49.15	Carpets and other textile floor coverings of pile construction, woven, not tufted or flocked, made up, of jute.
5702.49.20	Carpets & other textile floor coverings of pile construction, woven, not tufted or flocked, made up, of other textile materials nesoi.
5702.50.20	Carpets & other textile floor coverings, not of pile construction, woven but not on a power-driven loom, not made up, of wool/fine animal hair.
5702.50.40	Carpets & other textile floor coverings, not of pile construction, woven, not made up, of wool or fine animal hair, nesoi.
5702.50.52	Carpets & other textile floor coverings, not of pile construction, woven, not made up, of man-made textile materials.
5702.50.56	Carpets & other textile floor coverings, not of pile construction, woven, not made up, of cotton.
5702.50.59	Carpets & other textile floor coverings, not of pile construction, woven, not made up, of other textile materials nesoi.
5702.91.20	Certified hand-loomed & folklore floor covering, woven not on power-driven loom, not of pile construction, made up, of wool or fine animal hair.
5702.91.30	Floor coverings, not of pile construction, woven not on power-driven loom, made up, of wool or fine animal hair, nesoi.
5702.91.40	Carpets & other textile floor coverings, not of pile construction, woven nesoi, made up, of wool or fine animal hair, nesoi.
5702.92.10	Hand-loomed carpet & other textile floor coverings, not of pile construction, woven, made up, of man-made textile materials, nesoi.
5702.92.90	Carpet & other textile floor coverings, not of pile construction, woven, made up, of man-made textile materials, nesoi.
5702.99.05	Hand-loomed carpets and other textile floor coverings, not of pile construction, woven, made up, of cotton.
5702.99.15	Carpets and other textile floor coverings, not of pile construction, woven, made up, of cotton, nesoi.
5702.99.20	Carpets & other textile floor coverings, not of pile construction, woven, made up, of other textile materials nesoi.
5703.10.20	Hand-hooked carpets and other textile floor coverings, tufted, whether or not made up, of wool or fine animal hair.
5703.10.80	Carpets and other textile floor coverings, tufted, whether or not made up, of wool or fine animal hair, nesoi.
5703.20.10	Carpets and other textile floor coverings, tufted, whether or not made up, of nylon or other polyamides, hand-hooked.
5703.20.20	Carpets and other textile floor coverings, tufted, whether or not made up, of nylon or other polyamides, nesoi.
5703.30.20	Hand-hookded carpets & other textile floor coverings, tufted, whether or not made up, of man-made materials (not nylon/other polyamides).
5703.30.80	Carpets & other textile floor coverings, tufted, whether or not made up, of man-made textile materials (not nylon/other polyamides), nesoi.
5703.90.00	Carpets and other textile floor coverings, tufted, whether or not made up, of other textile materials nesoi.
5704.10.00	Carpet tiles of felt, not tufted or flocked, whether or not made up, having a maximum surface area of 0.3 m2.
5704.20.00	Carpet tiles of felt, not tufted or flocked, whether or not made up, having a maximum surface area exceeding 0.3 m2 but not exceeding 1 m2.
5704.90.01	Carpets and other textile floor coverings of felt, not tufted or flocked, whether or not made up, other surface area.
5705.00.10	Carpets and other textile floor coverings, whether or not made up, of coir, nesoi.
5705.00.20	Carpets and other textile floor coverings, whether or not made up, nesoi.
5801.10.00	Woven pile fabrics and chenille fabrics, other than fabrics of heading 5802 or 5806, of wool or fine animal hair.
5801.21.00	Uncut weft pile fabrics of cotton, other than fabrics of heading 5802 or 5806.
5801.22.10	Cut corduroy woven pile fabrics of cotton, greater than 7.5 wales per cm, other than fabrics of heading 5802 or 5806.
5801.22.90	Cut corduroy woven pile fabrics of cotton, less than 7.5 wales per cm, other than fabrics of heading 5802 or 5806.
5801.23.00	Weft pile fabrics, cut, of cotton, other than fabrics of heading 5802 or 5806, nesoi.

HTSUS subheading	Product description
5801.26.00	Chenille fabrics of cotton, other than fabrics of heading 5802 or 5806.
5801.27.10	Warp pile fabrics, epingle (uncut), of cotton, other than fabrics of heading 5802 or 5806.
5801.27.50	Warp pile fabrics, cut, of cotton, other than fabrics of heading 5802 or 5806.
5801.31.00	Uncut weft pile fabrics of man-made fibers, other than fabrics of heading 5802 or 5806.
5801.32.00	Cut corduroy of man-made fibers, other than fabrics of heading 5802 or 5806.
5801.33.00	Weft pile fabrics of man-made fibers, cut, other than fabrics of heading 5802 or 5806, nesoi.
5801.36.00	Chenille fabrics of man-made fibers, other than fabrics of heading 5802 or 5806.
5801.37.10	Warp pile fabrics, epingle (uncut), of man-made fibers, other than fabrics of heading 5802 or 5806.
5801.37.50	Warp pile fabrics, cut, of man-made fibers, other than fabrics of heading 5802 or 5806.
5801.90.10	Woven pile fabrics and chenille fabrics of vegetable fibers except cotton, other than fabrics of heading 5802 or 5806.
5801.90.20	Woven pile fabrics and chenille fabrics of textile materials nesoi, other than fabrics of heading 5802 or 5806.
5802.11.00	Terry toweling and similar woven terry fabrics (other than narrow fabrics of heading 5806) of cotton, unbleached.
5802.19.00	Terry toweling and similar woven terry fabrics (other than narrow fabrics of heading 5806) of cotton, other than unbleached.
5802.20.00	Terry toweling and similar woven terry fabrics (other than narrow fabrics of heading 5806) of textile materials other than cotton.
5802.30.00	Tufted textile fabrics, other than products of heading 5703.
5803.00.10	Gauze (other than narrow fabrics of heading 5806) of cotton.
5803.00.20	Gauze (other than narrow fabrics of heading 5806) tapestry and upholstery fabrics, of wool or fine animal hair, weighing not over 140 g/m2.
5803.00.30	Gauze (not narrow fabrics of heading 5806), except tapestry and upholstery fabrics, of wool or fine animal hair, weighing n/o 140 g/m2.
5803.00.40	Gauze (other than narrow fabrics of heading 5806) of vegetable fibers except cotton.
5803.00.50	Gauze (other than narrow fabrics of heading 5806) of man-made fibers.
5803.00.90	Gauze (other than narrow fabrics of heading 5806) of other textile materials nesoi.
5804.10.10	Tulles and other net fabrics (not including woven, knitted or crocheted fabrics) of cotton or man-made fibers.
5804.10.90	Tulles and other net fabrics (not including woven, knitted or crocheted fabrics) of textile fibers except cotton or man-made.
5804.21.00	Mechanically made lace, in the piece, in strips or in motifs (not fabric of heading 6002), of man-made fibers.
5804.29.10	Mechanically made lace, in the piece, in strips or in motifs (not fabric of heading 6002), of cotton.
5804.29.90	Mechanically made lace, in the piece, in strips or in motifs (not fabric of heading 6002), of textile materials (not cotton or mm fibers).
5804.30.00	Hand-made lace, in the piece, in strips or in motifs (other than fabrics of heading 6002).
5805.00.10	Hand-woven tapestries of the type Gobelins, Flanders, Aubusson, Beauvais and the like, used only as wall hangings, valued over $215/m2.
5805.00.20	Certified hand-loomed and folklore hand-woven tapestries nesoi and needle-worked tapestries, of wool or fine animal hair.
5805.00.25	Hand-woven tapestries nesoi and needle-worked tapestries, of wool or fine animal hair.
5805.00.30	Hand-woven tapestries nesoi and needle-worked tapestries, of cotton.
5805.00.40	Hand-woven tapestries nesoi and needle-worked tapestries, other than of cotton, wool or fine animal hair.
5806.10.10	Narrow woven pile fabrics (including terry toweling and the like) and chenille fabrics (other than goods of heading 5807) of cotton.
5806.10.24	Narrow woven pile fastener fabric tapes (other than goods of heading 5807) of man-made fibers.
5806.10.28	Narrow woven pile fabrics, incl terry toweling/chenille fabric (excl fastener fabric tape) (other than goods of heading 5807) of m-m fibers.
5806.10.30	Narrow woven pile fabrics (including terry toweling/the like) & chenille fabrics, except of cotton or of m-m fibers (not goods of head 5807).
5806.20.00	Narrow woven fabrics (not goods of heading 5807), not pile, containing by weight 5 percent or more of elastomeric yarn or rubber thread.
5806.31.00	Narrow woven fabrics (other than goods of heading 5807), not pile, not cont by wt 5% or more of elastomeric yarn or rubber, of cotton, nesoi.
5806.32.10	Woven ribbons of man-made fibers, not pile, not cont by wt 5% or more of elastomeric yarn or rubber.
5806.32.20	Narrow woven fabrics (other than ribbons), not pile, of man-made fibers, not cont by wt 5% or more of elastomeric yarn or rubber.
5806.39.10	Narrow woven fabrics (not goods of heading 5807), not pile, of wool/fine animal hair, not cont by wt 5% or more elastomeric yarn or rubber.
5806.39.20	Narrow woven fabric (not good of heading 5807), not pile, of vegetable fibers except cotton, not cont by wt 5% or more elastomer yarn/rubber.
5806.39.30	Narrow woven fabrics (not goods of heading 5807), not pile, of textile materials nesoi, not cont by wt 5% or more elastomeric yarn or rubber.
5806.40.00	Narrow fabrics consisting of warp without weft assembled by means of an adhesive (bolducs).
5807.10.05	Labels, in the piece, in strips or cut to shape or size, woven, not embroidered, of cotton or man-made fibers.
5807.10.15	Labels, in the piece, in strips or cut to shape or size, woven, not embroidered, of textile materials other than cotton or man-made fibers.
5807.10.20	Woven badges and similar articles of textile materials (except labels), in the piece, in strips or cut to shape or size, not embroidered.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5807.90.05	Labels, in the piece, in strips or cut to shape or size, nonwoven, not embroidered, of cotton or man-made fibers.
5807.90.15	Labels, in the piece, in strips or cut to shape or size, nonwoven, not embroidered, of textile materials other than cotton or man-made fiber.
5807.90.20	Badges & similar articles (except labels) of textile materials, not woven, not embroidered, in the piece, in strips or cut to shape or size.
5808.10.10	Braids, in the piece, of abaca or ramie, suitable for making or ornamenting headwear.
5808.10.40	Braids in the piece, suitable for making or ornamenting headwear, of cotton or man-made fibers.
5808.10.50	Braids in the piece, suitable for making or ornamenting headwear, of textile materials other than cotton or man-made fibers.
5808.10.70	Braids in the piece, not suitable for making or ornamenting headwear, of cotton or man-made fibers.
5808.10.90	Braids in the piece, not suitable for making or ornamenting headwear, of textile materials other than cotton or man-made fibers.
5808.90.00	Ornamental trimmings in the piece, without embroidery, other than knitted or crocheted; tassels, pompons and similar articles.
5809.00.00	Woven fabrics of metal thread & woven fabrics of metallized yarn of heading 5605, used in apparel, as furnishing fabrics or the like, nesoi.
5810.10.00	Embroidery in the piece, in strips or in motifs, without visible ground.
5810.91.00	Embroidery of cotton, in the piece, in strips or in motifs, other than without visible ground.
5810.92.10	Badges, emblems, and motifs of man-made fibers, embroidered, in the piece or in strips, other than without visible ground.
5810.92.90	Embroidery in the piece or in strips (excluding badges, emblems and motifs), of man-made fibers, other than without visible ground.
5810.99.10	Embroidery in the piece, in strips or in motifs, of wool or fine animal hair, other than without visible ground.
5810.99.90	Embroidery in piece/strips/motifs,of textile material except cotton, man-made fiber, wool or fine animal hair, other than w/o visible ground.
5811.00.10	Quilted textile products in the piece (excluding embroidery), of one or more layers assembled with padding, of wool or fine animal hair.
5811.00.20	Quilted textile products in the piece (excluding embroidery), of one or more layers assembled with padding, of cotton.
5811.00.30	Quilted textile products in the piece (excluding embroidery), of one or more layers assembled with padding, of man-made fibers.
5811.00.40	Quilted textile products in the piece (excluding embroidery), of one or more layers assembled with padding, of textile materials nesoi.
5901.10.10	Textile fabrics coated with gum or amylaceous substances, of a kind used for outer covers of books or the like, of man-made fibers.
5901.10.20	Textile fabrics coated with gum or amylaceous substances, of a kind used for outer covers of books or the like, other than man-made fibers.
5901.90.20	Tracing cloth, prepared painting canvas, buckram and similar stiffened textile fabrics used in hat foundations, of man-made fibers.
5901.90.40	Tracing cloth, prepared painting canvas, buckram and similar stiffened textile fabrics used in hat foundations, except of man-made fibers.
5902.10.00	Tire cord fabric of high tenacity yarn of nylon or other polyamides.
5902.20.00	Tire cord fabric of high tenacity yarn of polyesters.
5902.90.00	Tire cord fabric of high tenacity yarns of viscose rayon.
5903.10.10	Textile fabrics of cotton, impregnated, coated, covered or laminated with polyvinyl chloride.
5903.10.15	Textile fabric spec in note 9 to sect XI, of man-made fibers, impreg, coated, covered or laminated w/polyvinyl chloride, over 60% plastics.
5903.10.18	Textile fabrics spec in note 9 to section XI, of man-made fibers, impregnated, coated, covered or laminated with polyvinyl chloride, nesoi.
5903.10.20	Textile fabrics nesoi,of man-made fibers, impregnated, coated, covered or laminated with polyvinyl chloride, over 70% wt. rubber or plastics.
5903.10.25	Textile fabrics nesoi,of man-made fibers, impregnated, coated, covered or laminated with polyvinyl chloride, n/o 70% by wt. rubber or plastics.
5903.10.30	Textile fabrics nesoi, impregnated, coated, covered or laminated with polyvinyl chloride, other than those of heading 5902.
5903.20.10	Textile fabrics of cotton, impregnated, coated, covered or laminated with polyurethane.
5903.20.15	Textile fabrics spec in note 9 to section XI, of man-made fibers, impreg, coated, covered or laminated with polyurethane, over 60% plastics.
5903.20.18	Textile fabrics specified in note 9 to section XI, of man-made fibers, impregnated, coated, covered or laminated with polyurethane, nesoi.
5903.20.20	Textile fabrics of man-made fibers, impregnated, coated, covered or laminated with polyurethane, over 70% weight rubber or plastics.
5903.20.25	Textile fabrics of man-made fibers, impregnated, coated, covered or laminated with polyurethane, n/o 70% by weight rubber or plastics.
5903.20.30	Textile fabrics nesoi, impregnated, coated, covered or laminated with polyurethane.
5903.90.10	Textile fabrics of cotton, impregnated, coated, covered or laminated with plastics nesoi, other than those of heading 5902.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
5903.90.15	Textile fabrics spec in note 9 to section XI, of man-made fibers, impreg, coated, covered or laminated w/plastics, nesoi, over 60% plastics.
5903.90.18	Textile fabrics specified in note 9 to section XI, of man-made fabrics, impregnated, coated, covered or laminated with plastics, nesoi.
5903.90.20	Textile fabrics of man-made fibers, impregnated, coated, covered or laminated with plastics, nesoi, over 70% weight rubber or plastics.
5903.90.25	Textile fabrics of man-made fibers, impregnated, coated, covered or laminated with plastics, nesoi, n/o 70% by weight rubber or plastics.
5903.90.30	Textile fabrics nesoi, impreg, coated, covered or laminated w/plastics other than vinyl chloride or polyurethane, other than those head 5902.
5904.10.00	Linoleum, whether or not cut to shape.
5904.90.10	Floor coverings consisting of a coating or covering applied on a textile backing, with a base consisting of needleloom felt or nonwovens.
5904.90.90	Floor coverings consisting of a coating or covering applied on textile backing, with textile base other than of needleloom felt or nonwovens.
5905.00.10	Textile wall coverings backed with permanently affixed paper.
5905.00.90	Textile wall coverings, nesoi.
5906.10.00	Rubberized textile fabric adhesive tape of a width not exceeding 20 cm (other than fabric of heading 5902).
5906.91.10	Rubberized textile fabrics of cotton, knitted or crocheted (other than fabric of heading 5902.
5906.91.20	Rubberized textile fabrics (other than of heading 5902) nesoi, knitted or crocheted, of man-made fibers, ov 70% by wt of rubber or plastics.
5906.91.25	Rubberized textile fabrics (other than of head 5902), nesoi, knitted or crocheted, of man-made fibers, n/o 70% by wt of rubber or plastics.
5906.91.30	Rubberized textile fabrics (other than of heading 5902) nesoi, knitted or crocheted, other than of cotton or man-made fibers.
5906.99.10	Rubberized textile fabrics not knitted or crocheted, of cotton, other than fabrics of heading 5902.
5906.99.20	Rubberized textile fabrics (other than of head 5902), nesoi, not knitted or crocheted, of man-made fibers, ov 70% by wt of rubber/plastics.
5906.99.25	Rubberized textile fabrics (other than of head 5902), nesoi, not knitted or crocheted, of man-made fibers, n/o 70% by wt of rubber/plastics.
5906.99.30	Rubberized textile fabrics, not knitted or crocheted, other than those of heading 5902, nesoi.
5907.00.05	Laminated fabrics specified in note 9 to sect. XI of HTS, of m-m fiber, for theatrical, ballet, & operatic scenery & properties, incl sets.
5907.00.15	Laminated fabrics spec in note 9 to sect XI of HTS, of m-m fiber, other than theatrical, ballet, & operatic scenery & properties, incl sets.
5907.00.25	Lam fabs specified in nte 9 to sect. XI of HTS, of tx mats except m-m fiber, for theatrical, ballet, & opera scenery & properties, incl sets.
5907.00.35	Lam fabs specified in nte 9 to sect. XI of HTS, of tx mats except m-m fiber, other than theatrical, ballet, & oper scenery & prop, incl sets.
5907.00.60	Other fabric, impregnated, coated or covered, and painted canvas being theatrical scenery, back-cloths or the like, of man-made fibers.
5907.00.80	Other fabric, impregnated, coated or covered, & painted canvas being theatrical scenery, back-cloths or the like, other than man-made fibers.
5908.00.00	Textile wicks, woven, plaited or knitted, for lamps, stoves, candles and the like; gas mantles and tubular knitted gas mantle fabric.
5909.00.10	Textile hosepiping and similar textile tubing of vegetable fibers, with or without lining, armor or accessories of other materials.
5909.00.20	Textile hosepiping and similar textile tubing nesoi, with or without lining, armor or accessories of other materials.
5910.00.10	Transmission or conveyor belts or belting of man-made fibers.
5910.00.90	Transmission or conveyor belts or belting of textile materials, other than man-made fibers.
5911.10.10	Printers' rubberized blankets of textile fabrics.
5911.10.20	Textile fabrics, felt and felt-lined woven fabrics, combined with layer(s) of rubber, leather or other material, for technical uses, nesoi.
5911.20.10	Bolting cloth fabrics principally used for stenciling purposes in screen-process printing, whether or not made up.
5911.20.20	Bolting cloth nesoi, of silk, whether or not made up.
5911.20.30	Bolting cloth, whether or not made up, nesoi.
5911.31.00	Textile fabrics and felts, endless or fitted with linking devices, used for papermaking or similar machines, weighing less than 650 g/m2.
5911.32.00	Textile fabrics and felts, endless or fitted with linking devices, used for papermaking or similar machines, weighing 650 g/m2 or more.
5911.40.00	Straining cloth of a kind used in oil presses or the like, of textile material or of human hair.
5911.90.00	Textile products and articles, of a kind used in machinery or plants for technical uses, specified in note 7 to chapter 59, nesoi.
6001.10.20	Knitted or crocheted "long pile" fabrics of man-made fibers.
6001.10.60	Knitted or crocheted "long pile" fabrics, other than of man-made fibers.
6001.21.00	Knitted or crocheted looped pile fabrics of cotton.
6001.22.00	Knitted or crocheted looped pile fabrics of man-made fibers.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
6001.29.00	Knitted or crocheted looped pile fabrics of textile materials, other than of cotton or man-made fibers.
6001.91.00	Knitted or crocheted pile fabrics (other than "long pile" or looped pile) of cotton.
6001.92.00	Knitted or crocheted pile fabrics (other than "long pile" or looped pile) of man-made fibers.
6001.99.10	Knitted or crocheted pile fabrics (except long or looped pile), of tex mats other than cotton or mmf, containing 85% or more by wt of silk.
6001.99.90	Knitted or crocheted pile fabrics (except long or looped pile), of tex mats other than cotton or mmf, cont less than 85% by wt of silk,.
6002.40.40	Knitted or crocheted fabrics nesoi, width not exceeding 30 cm, containing 5% or more elastomeric yarn but no rubber thread, of cotton.
6002.40.80	Knitted or crocheted fabrics nesoi, width n/o 30 cm, containing 5% or more elastomeric yarn but no rubber thread, other than of cotton.
6002.90.40	Knitted or crocheted fabrics nesoi, width not exceeding 30 cm, containing 5% or more elastomeric yarn or rubber thread nesoi, of cotton.
6002.90.80	Knitted or crocheted fabrics nesoi, width n/o 30 cm, containing 5% or more elastomeric yarn or rubber thread nesoi, other than of cotton.
6003.10.10	Warp knit open-worked fabrics of wool or fine animal hair, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6003.10.90	Knitted or crocheted fabrics of wool or fine animal hair nesoi, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6003.20.10	Warp knit open-worked fabrics of cotton, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6003.20.30	Knitted or crocheted fabrics of cotton (other than warp knit open-worked), width not exceed 30 cm, other than those of heading 6001 or 6002.
6003.30.10	Warp knit open-worked fabrics of synthetic fibers, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6003.30.60	Knitted or crocheted fabrics of synthetic fibers nesoi, width not over 30 cm, other than those of heading 6001 or 6002.
6003.40.10	Warp knit open-worked fabrics of artificial fibers, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6003.40.60	Knitted or crocheted fabrics of artifical fibers nesoi, width not over 30 cm, other than those of heading 6001 or 6002.
6003.90.10	Warp knit open-worked fabrics nesoi, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6003.90.90	Knitted or crocheted fabrics nesoi, width not exceeding 30 cm, other than those of heading 6001 or 6002.
6004.10.00	Knitted or crocheted fabrics, width exceeding 30 cm, containing 5% or more of elastomeric yarn but no rubber thread, not of heading 6001.
6004.90.20	Knitted or crocheted fabrics, width exceeding 30 cm, containing 5% or more of elastomeric yarn and rubber thread, other than of heading 6001.
6004.90.90	Knitted or crocheted fabrics, width exceeding 30 cm, containing 5% or more of rubber thread, other than those of heading 6001.
6005.21.00	Unbleached or bleached warp knit fabrics (including those made on galloon knitting machines) of cotton, other than of headings 6001 to 6004.
6005.22.00	Dyed warp knit fabrics (including those made on galloon knitting machines) of cotton, other than those of headings 6001 to 6004.
6005.23.00	Warp knit fabrics of yarns of different colors (including made on galloon knitting machines) of cotton, other than headings 6001 to 6004.
6005.24.00	Printed warp knit fabrics (including those made on galloon knitting machines) of cotton, other than those of headings 6001 to 6004.
6005.35.00	Wrap knit fabrics of synthetic fibers, specified in subheading note 1 to this chapter excluding headings 6001 to 6004.
6005.36.00	Other wrap knit fabrics of synthetic fibers, bleached or unbleached, but not dyed and not specified in subheading note 1 to this chapter.
6005.37.00	Other wrap knit fabrics of synthetic fibers, dyed, not specified in subheading note 1 to this chapter.
6005.38.00	Other wrap knit fabrics of synthetic fibers, of yarns of different colors, not specified in subheading note 1 to this chapter.
6005.39.00	Other wrap knit fabrics of synthetic fibers, printed, not specified in subheading note 1 to this chapter.
6005.41.00	Unbleached or bleached warp knit fabrics (including made on galloon knitting machines) of artificial fiber, other than headings 6001 to 6004.
6005.42.00	Dyed warp knit fabrics (including those made on galloon knitting machines) of artificial fibers, other than those of headings 6001 to 6004.
6005.43.00	Warp knit fabrics of yarn of different color (including made on galloon knitting machine) of artificial fiber, other than headings 6001–6004.
6005.44.00	Printed warp knit fabrics (including those made on galloon knitting machine) of artificial fibers, other than those of headings 6001 to 6004.
6005.90.10	Warp knit fabrics (including those made on galloon knitting machines) of wool or fine animal hair, other than those of headings 6001 to 6004.
6005.90.90	Warp knit fabric (including made on galloon knit machine), not of wool/fine animal hair, cotton or manmade fiber, not of headings 6001–6004.
6006.10.00	Knitted or crocheted fabrics of wool or fine animal hair, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
6006.21.10	Unbleached or bleached circular knit fabric, wholly of cotton yarns over 100 metric number per single yarn, nesoi.
6006.21.90	Unbleached or bleached knitted or crocheted fabrics of cotton, nesoi.
6006.22.10	Dyed circular knit fabric, wholly of cotton yarns over 100 metric number per single yarn, nesoi.
6006.22.90	Dyed knitted or crocheted fabrics of cotton, nesoi.
6006.23.10	Circular knit fabric, of yarns of different colors, wholly of cotton yarns over 100 metric number per single yarn, nesoi.
6006.23.90	Knitted or crocheted fabrics of cotton, of yarns of different colors, nesoi.
6006.24.10	Printed circular knit fabric, wholly of cotton yarns over 100 metric number per single yarn, nesoi.
6006.24.90	Printed knitted or crocheted fabrics of cotton, nesoi.
6006.31.00	Unbleached or bleached knitted or crocheted fabrics of synthetic fibers, nesoi.
6006.32.00	Dyed knitted or crocheted fabrics of synthetic fibers, nesoi.
6006.33.00	Knitted or crocheted fabrics of synthetic fibers, of yarns of different colors, nesoi.
6006.34.00	Printed knitted or crocheted fabrics of synthetic fibers, nesoi.
6006.41.00	Unbleached or bleached knitted or crocheted fabrics of artificial fibers, nesoi.
6006.42.00	Dyed knitted or crocheted fabrics of artificial fibers, nesoi.
6006.43.00	Knitted or crocheted fabrics of artificial fibers, of yarns of different colors, nesoi.
6006.44.00	Printed knitted or crocheted fabrics of artificial fibers, nesoi.
6006.90.10	Other knitted or crocheted fabrics nesoi, containing 85 percent or more by weight of silk or silk waste.
6006.90.90	Other knitted or crocheted fabrics nesoi, other than of wool, cotton or manmade fibers & containing <85% by wt of silk/silk waste.
6501.00.30	Hat forms, hat bodies and hoods, not blocked to shape or with made brims; plateaux & manchons; all of fur felt, for men or boys.
6501.00.60	Hat forms, hat bodies and hoods, not blocked to shape or with made brims; plateaux & manchons; all of fur felt, not for men or boys.
6501.00.90	Hat forms, hat bodies and hoods, not blocked to shape or with made brims; plateaux & manchons; all of felt, other than fur felt.
6502.00.20	Hat shapes, plaited or assembled from strips, not blocked/lined/trimmed & w/o made brims, of veg. fibers or materls, or paper yarn, sewed.
6502.00.40	Hat shapes, plaited or asmbld from strips, n/blocked/lined/trimmed & w/o made brims, of veg. fibers or materls, not sewed/bleached/colored.
6502.00.60	Hat shapes, plaited or asmbld from strips, n/blocked/lined/trimmed & w/o made brims, of veg. fibers or materls, not sewed but bleachd/colord.
6502.00.90	Hat shapes, plaited or assembled from strips, not blocked/lined/trimmed & w/o made brims, not veg. fibers/veg. materials/paper yarn, nesoi.
6504.00.30	Hats and headgear, plaited or assembled from strips of veg. fibers or unspun fibrous veg. materials and/or paper yarn, sewed.
6504.00.60	Hats and headgear, plaited or assembled from strips of veg. fibers or unspun fibrous veg. materials and/or paper yarn, not sewed.
6504.00.90	Hats and headgear, plaited or assembled from strips of any material (o/than veg. fibers/unspun fibrous veg. materials and/or paper yarn).
6505.00.01	Hair-nets of any material, whether or not lined or trimmed.
6505.00.04	Hats and headgear of fur felt made from hat forms and hat bodies of 6501.
6505.00.08	Hats and headgear made from hat forms and hat bodies of 6501, except of fur felt.
6505.00.15	Hats and headgear, of cotton and/or flax, knitted.
6505.00.20	Headwear, of cotton, not knitted; certified hand-loomed and folklore hats & headgear, of cotton or flax, not knitted.
6505.00.25	Hats and headgear, of cotton or flax, not knitted, not certified hand-loomed folklore goods.
6505.00.30	Hats and headgear, of wool, knitted or crocheted or made up from knitted or crocheted fabric.
6505.00.40	Hats and headgear, of wool, made up from felt or of textile material, not knitted or crocheted or made up from knitted or crocheted fabric.
6505.00.50	Hats and headgear, of man-made fibers, knitted or crocheted or made up from knitted or crocheted fabric, wholly or in part of braid.
6505.00.60	Hats and headgear, of man-made fibers, knitted or crocheted or made up from knitted or crocheted fabrics, not in part of braid.
6505.00.70	Hats and headgear, of man-made fibers, made up from felt or of textile material, not knitted or crocheted, wholly or in part braid.
6505.00.80	Hats and headgear, of man-made fibers, made up from felt or of textile material, not knitted or crocheted, not in part of braid.
6505.00.90	Hats and headgear, of textile materials (other than of cotton, flax, wool or man-made fibers), nesoi.
6506.10.30	Safety headgear of reinforced or laminated plastics, whether or not lined or trimmed.
6506.10.60	Safety headgear, other than of reinforced or laminated plastics, whether or not lined or trimmed.
6506.91.00	Headgear (other than safety headgear), nesoi, of rubber or plastics, whether or not lined or trimmed.
6506.99.30	Headgear, nesoi, of furskin, whether or not lined or trimmed.
6506.99.60	Headgear (other than safety headgear), nesoi, of materials other than rubber, plastics, or furskins, whether or not lined or trimmed.
6507.00.00	Headbands, linings, covers, hat foundations, hat frames, peaks (visors) and chinstraps, for headgear.

HTSUS subheading	Product description
6701.00.30	Articles of feathers or down (other than articles & apparel filled or stuffed with feathers/down and worked quills & scapes).
6701.00.60	Skins and o/parts of birds w/their feathers or down, feathers, pts of feathers/down, nesoi.
6801.00.00	Setts, curbstones and flagstones, of natural stone (except slate).
6802.10.00	Tiles/cubes/similar arts. of natural stone, enclosable in a sq. w/a side less than 7 cm; artificially colored granules, chippings & powder.
6802.21.10	Monumental or building stone & arts. thereof, of travertine, simply cut/sawn, w/flat or even surface.
6802.21.50	Monumental or building stone & arts. thereof, of marble & alabaster, simply cut/sawn, w/flat or even surface.
6802.23.00	Monumental or building stone & arts. thereof, of granite, simply cut/sawn, w/flat or even surface.
6802.29.10	Monumental or building stone & arts. thereof, of calcareous stone, nesoi, simply cut/sawn, w/flat or even surface.
6802.29.90	Monumental or building stone & arts. thereof, of stone, nesoi, simply cut/sawn, w/flat or even surface.
6802.91.05	Marble slabs, further worked than simply cut/sawn.
6802.91.15	Monumental or building stone & arts. thereof (o/than slabs), of marble, further worked than simply cut/sawn, nesoi.
6802.91.20	Monumental or building stone & arts. thereof, of travertine, dressed or polished but not further worked, nesoi.
6802.91.25	Monumental or building stone & arts. thereof, of travertine, further worked than dressed or polished, nesoi.
6802.91.30	Monumental or building stone & arts. thereof, of alabaster, further worked than simply cut/sawn, nesoi.
6802.92.00	Monumental or building stone & arts. thereof, of calcareous stone, nesoi, further worked than simply cut/sawn, nesoi.
6802.93.00	Monumental or building stone & arts. thereof, of granite, further worked than simply cut/sawn, nesoi.
6802.99.00	Monumental or building stone & arts. thereof, nesoi, further worked than simply cut/sawn, nesoi.
6803.00.10	Roofing slate.
6803.00.50	Worked slate (other than roofing slate) and articles of slate or agglomerated slate.
6804.10.00	Millstones and grindstones for milling, grinding or pulping.
6804.21.00	Millstones, grindstones, grinding wheels and the like, nesoi, of agglomerated synthetic or natural diamond.
6804.22.10	Millstones, grindstones, grinding wheels and the like, nesoi, of agglomerated abrasives nesoi, or ceramics, bonded with synthetic resins.
6804.22.40	Abrasive wheels of agglomerated abrasives nesoi, or ceramics, not bonded with synthetic resins.
6804.22.60	Millstones, grindstones, grinding wheels and the like, nesoi, of agglomerated abrasives nesoi, or ceramics, not bonded w/synthetic resins.
6804.23.00	Millstones, grindstones, grinding wheels and the like, nesoi, of natural stone.
6804.30.00	Hand sharpening or polishing stones.
6805.10.00	Natural or artificial abrasive powder or grain on a base of woven textile fabric only.
6805.20.00	Natural or artificial abrasive powder or grain on a base of paper or paperboard only.
6805.30.10	Articles wholly or partly coated natural or artificial abrasive powder or grain, on a base of materials nesoi, in sheets, strips, disks,etc..
6805.30.50	Natural or artificial abrasive powder or grain on a base of materials nesoi, in forms nesoi.
6806.10.00	Slag wool, rock wool and similar mineral wools, in bulk, sheets or rolls.
6806.20.00	Exfoliated vermiculite, expanded clays, foamed slag and similar expanded mineral materials.
6806.90.00	Mixtures and articles of heat-insulating, sound-insulating or sound-absorbing mineral materials, nesoi.
6807.10.00	Articles of asphalt or of similar material, in rolls.
6807.90.00	Articles of asphalt or of similar material, not in rolls.
6808.00.00	Panels, boards, tiles and similar articles of vegetable fiber, straw or wood wastes, agglomerated with cement, plaster or o/mineral binders.
6809.11.00	Panels, boards, sheets, tiles and similar articles of plaster or comp. plaster, n/ornamented, faced or reinforced w/ paper or paperboard only.
6809.19.00	Panels, boards, sheets, tiles and similar articles of plaster or comp. plaster, not ornamented, nesoi.
6809.90.00	Articles (other than panels, boards, sheets, tiles, etc.) of plaster or of compositions based on plaster, nesoi.
6810.11.00	Building blocks and bricks, of cement, concrete or artificial stone, whether or not reinforced.
6810.19.12	Floor and wall tiles, of stone agglomerated with binders other than cement.
6810.19.14	Floor and wall tiles, of cement, concrete, or of artificial stone (except stone agglom. w/binders other than cement).
6810.19.50	Tiles, flagstones, and similar articles, nesoi, of cement, concrete or artificial stone, whether or not reinforced.
6810.91.00	Prefabricated structural components for building or civil engineering, of cement, concrete or artificial stone, nesoi.
6810.99.00	Articles of cement (other than tiles, flagstones, bricks and similar arts.), of concrete or artificial stone, nesoi.
6811.40.00	Articles of asbestos-cement.
6811.81.00	Corrugated sheets, of cellulose fiber-cement or the like (not containing asbestos).
6811.82.00	Sheets (other than corrugated), panels, tiles and similar articles of cellulose-fiber cement or the like (not containing asbestos).
6811.89.10	Tubes, pipes and tube or pipe fittings, of cellulose fiber-cement or the like (not containing asbestos).
6811.89.90	Articles of cellulose fiber-cement or the like (not containing asbestos), nesoi.
6812.80.10	Footwear of crocidolite.
6812.80.90	Articles or mixtures of crocidolite, nesoi.
6812.91.10	Footwear of asbestos other than crocidolite.
6812.91.90	Clothing, accessories, and headgear of asbestos other than crocidolite.
6812.92.00	Paper, millboard and felt of asbestos other than crocidolite.
6812.93.00	Compressed asbestos (other than crocidolite) fiber jointing, in sheets.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
6812.99.00	Articles nesoi, of asbestos other than crocidolite or mixtures with a basis of asbestos other than crocidolite.
6813.20.00	Friction material & articles thereof, containing asbestos.
6813.81.00	Brake linings and pads not containing asbestos.
6813.89.00	Friction material & articles thereof with a basis of mineral substances (other than asbestos) or of cellulose, nesoi.
6814.10.00	Agglomerated or reconstituted mica, in plates, sheets and strips, whether or not on a support.
6814.90.00	Worked mica and articles of mica, nesoi, whether or not on a support of paper, paperboard or other materials.
6815.10.01	Nonelectrical articles of graphite or other carbon.
6815.20.00	Articles of peat, nesoi.
6815.91.00	Articles containing magnesoite, dolomite or chromite, nesoi.
6815.99.20	Talc, steatite and soapstone, cut or sawn, or in blanks, crayons, cubes, disks or other forms.
6815.99.40	Articles of stone or of other mineral substances (including carbon fibers & articles thereof), nesoi.
6901.00.00	Siliceous fossil meal or earth bricks, blocks, tiles and other ceramic goods.
6902.10.10	Refractory bricks of magnesoite, containing by weight o/50% MgO.
6902.10.50	Refractory bricks, blocks, tiles and similar goods containing by weight o/50% MgO, CaO, or Cr2O3.
6902.20.10	Refractory bricks containing by weight o/50% alumina (Al2O2) or silica (SiO2) or mixtures or compounds thereof.
6902.20.50	Refractory blocks, tiles & similar goods (o/than bricks), cont. by wt. o/50% alumina (Al2O2) or silica (SiO2) or mixtures thereof.
6902.90.10	Refractory bricks, nesoi.
6902.90.50	Refractory blocks, tiles & similar goods (other than bricks), nesoi.
6903.10.00	Refractory ceramic goods (o/than of siliceous fossil meals or earths), nesoi, cont. by wt. o/50% graphite or o/forms or mix. of carbon.
6903.20.00	Refractory ceramic goods (o/than of siliceous fossil meals or earths), nesoi, cont. by wt. o/50% alumina or mix. or comp. of Al2O3 & SiO3.
6903.90.00	Refractory ceramic goods (o/than of siliceous fossil meals or earths), nesoi.
6904.10.00	Ceramic building bricks (o/than refractory bricks).
6904.90.00	Ceramic flooring blocks, support or filler tiles and the like (other than bricks).
6905.10.00	Ceramic roofing tiles.
6905.90.00	Ceramic chimney pots, cowls, chimney liners, architectural ornaments and other construction goods.
6906.00.00	Ceramic pipes, conduits, guttering and pipe fittings.
6907.21.10	Unglazed ceramic tiles, other than those of subheading 6907.30 and 6907.40, of H2O absorp coeff by wt <=0.5%.
6907.21.20	Glazed ceramic tiles having <=3229 tiles per m2, surf area in sq w/side <7cm, H2O absorp coeff by wt <=0.5%.
6907.21.30	Glazed ceramic tiles having surface area <38.7cm2, surf area in sq w/side <7cm, of H2O absorp coeff by wt <=0.5%.
6907.21.40	Glazed ceramic tiles having surface area >=38.7cm2, , surf area in sq w/side <7cm, of a H2O absorp coeff by wt <=0.5%.
6907.21.90	Glazed ceramic tiles nesoi, of a H2O absorp coeff by wt <=0.5%.
6907.22.10	Unglazed ceramic tiles, other than those of subheading 6907.30 and 6907.40, of H2O absorp coeff by wt exceeding 0.5% but not exceeding 10%.
6907.22.20	Glazed ceramic tiles having <=3229 tiles per m2, surf area in sq w/side <7 cm, H2O absorp coeff by wt exceeding 0.5% but not exceeding 10%.
6907.22.30	Glazed ceramic tiles having surface area <38.7 cm2, surf area in sq w/side <7 cm, of H2O absorp coeff by wt exceeding 0.5% but not exceeding 10%.
6907.22.40	Glazed ceramic tiles having surface area >=38.7 cm2, , surf area in sq w/side <7 cm, of a H2O absorp coeff by wt exceeding 0.5% but not exceeding 10%.
6907.22.90	Glazed ceramic tiles nesoi, of a H2O absorp coeff by wt exceeding 0.5% but not exceeding 10%.
6907.23.10	Unglazed ceramic tiles, other than those of subheading 6907.30 and 6907.40, of H2O absorp coeff by wt >10%.
6907.23.20	Glazed ceramic tiles having <=3229 tiles per m2, surf area in sq w/side <7 cm, H2O absorp coeff by wt >10%.
6907.23.30	Glazed ceramic tiles having surface area <38.7 cm2, surf area in sq w/side <7 cm, of H2O absorp coeff by wt >10%.
6907.23.40	Glazed ceramic tiles having surface area >=38.7 cm2, surf area in sq w/side <7 cm, of a H2O absorp coeff by wt >10%.
6907.23.90	Glazed ceramic tiles nesoi, of a H2O absorp coeff by wt >10%.
6907.30.10	Unglazed ceramic mosaic cubes, o/t subheading 6907.40.
6907.30.20	Glazed ceramic mosaic cubes having <=3229 tiles per m2, surf area in sq w/side <7 cm.
6907.30.30	Glazed ceramic mosaic cubes having surface area <38.7 cm2, surf area in sq w/side <7 cm.
6907.30.40	Glazed ceramic mosaic cubes having surface area >=38.7 cm2, surf area in sq w/side <7 cm.
6907.30.90	Glazed ceramic mosaic cubes nesoi, o/t subheading 6907.40.
6907.40.10	Unglazed finishing ceramics.
6907.40.20	Glazed finishing ceramics having <=3229 tiles per m2, surf area in sq w/side <7 cm.
6907.40.30	Glazed finishing ceramics having surface area <38.7 cm2, surf area in sq w/side <7 cm.
6907.40.40	Glazed finishing ceramics having surface area >=38.7 cm2, surf area in sq w/side <7 cm.
6907.40.90	Glazed finishing ceramics nesoi.
6909.11.20	Porcelain or china ceramic machinery parts.
6909.11.40	Porcelain or china ceramic wares for laboratory, chemical or other technical uses (other than machinery parts), nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
6909.12.00	Ceramic wares (o/than of porcelain or china) for laboratory, chemical or technical uses, w/hardness equivalent to 9 or more on Mohs scale.
6909.19.10	Ceramic ferrite core memories.
6909.19.50	Ceramic wares for laboratory, chemical or other technical uses (o/than of porcelain or china), nesoi.
6909.90.00	Ceramic troughs, tubes & siml. receptacles for agriculture; ceramic pots, jars, & siml. arts. for conveyance or packing of goods.
6914.10.40	Porcelain or china ceramic ferrules, n/o 3 mm diam or 25 mm long, w/fiber channel open. and/or ceramic mating sleeves of Al2O3 or zirconia.
6914.10.80	Porcelain or china arts. (o/than tableware/kitchenware/household & ornament. arts), nesoi.
6914.90.41	Ceramic (o/porcelain or china) ferrules, n/o 3 mm or 25 mm long, w/fiber channel open. and/or ceramic mating of sleeves of Al2O3 or zirconia.
6914.90.80	Ceramic (o/than porcelain or china) arts. (o/than tableware/kitchenware/household & ornament. arts), nesoi.
7001.00.10	Glass in the mass of fused quartz or other fused silica.
7001.00.20	Glass in the mass (other than of fused quartz or other fused silica).
7001.00.50	Cullet and other waste and scrap of glass.
7002.10.10	Glass in balls (o/than microspheres of heading 7018), unworked, n/o 6 mm in diameter.
7002.10.20	Glass in balls (o/than microspheres of heading 7018), unworked, over 6 mm in diameter.
7002.20.50	Glass rods (o/than of fused quartz or other fused silica), unworked.
7002.31.00	Glass tubes of fused quartz or other fused silica, unworked.
7002.32.00	Glass tubes (o/than fused quartz/silica), w/linear coefficient of expansion n/o 5x10–6 per Kelvin in range of 0–300 degrees C, unworked.
7002.39.00	Glass tubes (o/than fused quartz/silica), nesoi, unworked.
7003.12.00	Cast or rolled glass, in nonwired sheets, colored thru the mass, opacified, flashed or w/absorbent, reflect. or non-reflect.layer, not wkd.
7003.19.00	Cast or rolled glass, in nonwired sheets, n/colored thru the mass, opacified, flashed, etc. & not further worked.
7003.20.00	Cast or rolled glass, in wired sheets.
7003.30.00	Cast or rolled glass profiles.
7004.20.10	Drawn or blown glass, in sheets, w/absorbent, reflecting or non-reflecting layer, n/furth. wkd.
7004.20.20	Drawn or blown glass, in rect. sheets, colored thru the mass, etc., w/o absorbent, reflecting or non-reflect. layer, n/furth wkd.
7004.20.50	Drawn or blown glass, in sheets (o/than rect.), colored thru the mass, opacified, flashed, w/o absorbent, etc. layer, n/furth. wkd.
7004.90.05	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. n/o 1.5 mm & n/o 0.26 m2 in area, n/further wkd.
7004.90.10	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. n/o 1.5 mm & over 0.26 m2 in area, n/further wkd.
7004.90.15	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. over 1.5 but n/o 2 mm & n/o 0.26 m2 in area, n/further wkd.
7004.90.20	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. over 1.5 but n/o 2 mm & over 0.26 m2 in area, n/further wkd.
7004.90.25	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. over 2 but n/o 3.5 mm, not further wkd.
7004.90.30	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. over 3.5 mm & n/o 0.65 m2 in area, not further wkd.
7004.90.40	Drawn or blown glass, nesoi, in rectangular sheets, w/thick. over 3.5 mm & over 0.65 m2 in area, not further wkd.
7004.90.50	Drawn or blown glass, nesoi, in sheets (other than rectangular), nesoi.
7005.10.40	Surface ground or polished glass, w/absorb. or reflect. layer, n/o 1.2 mm thick & n/o 0.8 M2 in area, suitable for use in LCD's.
7005.10.80	Float glass & surface ground or polished glass, nonwired, in sheets, w/absorb. or reflect. layer, nesoi, not worked.
7005.21.10	Float glass & surface ground or polished glass, nonwired, in sheets, colored thru mass, opacified, flashed, under 10 mm thick, not worked.
7005.21.20	Float glass & surface ground or polished glass, nonwired, in sheets, colored thru mass, opacified, flashed, 10 mm or more thick, not worked.
7005.29.04	Float glass & surface ground or polished glass, in sheets, less than 10 mm thick, w/area n/o 0.65 M2 & for liquid crystal displays.
7005.29.08	Float glass & surface ground or polished glass, nonwired, in sheets, less than 10 mm thick, w/area n/o 0.65 M2 & not for LCD's.
7005.29.14	Float glass & surface ground or polished glass, in sheets, less than 10 mm thick, w/area o/0.65 M2 & for liquid crystal displays.
7005.29.18	Float glass & surface ground or polished glass, nonwired, in sheets, less than 10 mm thick, w/area over 0.65 M2 & not for LCD's.
7005.29.25	Float glass & surface ground or polished glass, nonwired, in sheets, 10 mm or more in thickness.
7005.30.00	Float glass & surface ground or polished glass, wired, in sheets.
7006.00.10	Glass of heading 7003–7005 in strips n/o 15.2 cm wide & o/2 mm thick, w/longitudinal edges ground or smoothed.
7006.00.20	Drawn or blown glass, not containing wire netting & not surface ground or polished, but bent, edged or otherwise worked but not framed.
7006.00.40	Glass of heading 7003–7005, bent, edgeworked, engraved, drilled, enameled or otherwise worked, but not framed or fitted, nesoi.
7007.11.00	Toughened (tempered) safety glass, of size and shape suitable for incorporation in vehicles, aircraft, spacecraft or vessels.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7007.19.00	Toughened (tempered) safety glass, not of size or shape suitable for incorporation in vehicles, aircraft, spacecraft or vessels.
7007.21.10	Laminated safety glass, windshields, of size and shape suitable for incorporation in vehicles, aircraft, spacecraft or vessels.
7007.21.50	Laminated safety glass (o/than windshields), of size and shape suitable for incorporation in vehicles, aircraft, spacecraft or vessels.
7007.29.00	Laminated safety glass, not of size or shape suitable for incorporation in vehicles, aircraft, spacecraft or vessels.
7008.00.00	Glass multiple-walled insulating units.
7009.10.00	Glass rearview mirrors for vehicles.
7009.91.10	Glass mirrors (o/than rearview mirrors), unframed, n/o 929 cm2 in reflecting area.
7009.91.50	Glass mirrors (o/than rearview mirrors), unframed, over 929 cm2 in reflecting area.
7009.92.10	Glass mirrors (o/than rearview mirrors), framed, n/o 929 cm2 in reflecting area.
7009.92.50	Glass mirrors (o/than rearview mirrors), framed, over 929 cm2 in reflecting area.
7010.10.00	Glass ampoules used for the conveyance or packing of goods.
7010.20.20	Glass stoppers, lids and other closures produced by automatic machine.
7010.20.30	Glass stoppers, lids and other closures not produced by automatic machine.
7010.90.05	Glass serum bottles, vials and other pharmaceutical containers.
7010.90.20	Glass containers for conveyance/packing perfume/toilet preps & containers with/designed for ground glass stopper, made by automatic machine.
7010.90.30	Glass containers for convey/pack perfume/toilet preps & containers with/designed for ground glass stopper, not made by automatic machine.
7010.90.50	Glass carboys, bottles, jars, pots, flasks, & other containers for conveyance/packing of goods (w/wo closures) & preserving jars, nesoi.
7011.10.10	Glass bulbs (w/o fittings) for electric incandescent lamps.
7011.10.50	Glass envelopes, open, & glass parts thereof, for electric lighting (other than bulbs for incandescent lamps), without fittings.
7011.20.10	Glass cones (w/o fittings) for cathode-ray tubes.
7011.20.45	Monochrome glass envelopes (open & w/o fittings), certified by importer for actual use in computer or graphic display CRTs.
7011.20.85	Glass envelopes (open & w/o fittings) & glass parts thereof, nesoi, for cathode-ray tubes.
7011.90.00	Glass envelopes (open & w/o fittings) & glass parts thereof (o/than for electric lighting or cathode-ray tubes.
7014.00.10	Glass lens blanks (other than for spectacles), not optically worked.
7014.00.20	Glass optical elements (other than lens blanks), not optically worked.
7014.00.30	Glass lenses and filters (other than optical elements) and parts thereof, for signaling purposes, not optically worked.
7014.00.50	Signaling glassware, nesoi, not optically worked.
7016.10.00	Glass cubes and other glass smallwares, whether or not on a backing, for mosaics or similar decorative purposes.
7016.90.10	Paving blocks, slabs, bricks, squares, tiles & other arts. of pressed or molded glass, for building or construction purposes.
7016.90.50	Leaded glass windows & the like; multicellular or foam glass in blocks, panels, plates, shells or similar forms.
7017.10.30	Fused quartz reactor tubes and holders designed for insertion into diffusion and oxidation furnaces for semiconductor wafer production.
7017.10.60	Laboratory, hygienic or pharmaceutical glassware, whether or not calibrated or graduated, of fused quartz or other fused silica, nesoi.
7017.20.00	Laboratory, hygienic or pharmaceutical glassware, whether or not calibrated or graduated, of glass w/low coefficient of heat expansion.
7017.90.10	Glass microscope slides and micro cover glasses.
7017.90.50	Laboratory, hygienic or pharmaceutical glassware, whether or not calibrated, nesoi, of glass, nesoi.
7018.10.10	Glass imitation pearls and pearl beads of all shapes and colors, whether or not drilled, not strung and not set.
7018.10.20	Glass imitation precious or semiprecious stones (except beads).
7018.10.50	Glass beads (o/than imitat. pearls) & similar glass smallwares, nesoi.
7018.20.00	Glass microspheres not exceeding 1 mm in diameter.
7018.90.50	Articles (o/than imitation jewellry) of glass beads, pearls and imitation stones and statuettes & ornaments of lamp-worked glass.
7019.11.00	Glass fiber chopped strands of a length not more than 50 mm.
7019.12.00	Glass fiber rovings.
7019.19.05	Fiberglass rubber reinforcing yarn, not color, of electrically nonconductive continuous filament 9 to 11 microns diam & impreg for adhesion to.
7019.19.15	Glass fiber yarns, not colored, other than fiberglass rubber reinforcing yarn.
7019.19.24	Fiberglass rubber reinforce yarn, color, of electrically nonconduct. continuous filament 9 to 11 microns diam & impreg for adhesion to polym.
7019.19.28	Glass fiber yarns, colored, other than fiberglass rubber reinforcing yarn.
7019.19.30	Glass fiber chopped strands of a length more than 50 mm.
7019.19.70	Fiberglass rubber reinforce cord, of electrically nonconduct. contin. filament 9 to 11 microns diam & impreg for adhesion to polymeric comp.
7019.19.90	Glass fiber slivers.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
7019.31.00	Nonwoven glass fiber mats.
7019.32.00	Nonwoven glass fiber in thin sheets (voiles).
7019.39.10	Nonwoven glass wool insulation products.
7019.39.50	Nonwoven glass fiber webs, mattresses, boards and similar articles of nonwoven glass fibers, nesoi.
7019.40.05	Woven fiberglass tire cord fabric of rovings, n/o 30 cm wide, of elect. nonconductive cont. filament 9–11 micron diam & impreg for adhesion.
7019.40.15	Woven glass fiber fabric of rovings, n/o 30 cm in width, other than fiberglass tire cord fabric.
7019.40.30	Woven fiberglass tire cord fabric of roving, o/30 cm wide, n/color, of elect. nonconduct. contin. fil. 9–11 micron diam & impreg for adhesion.
7019.40.40	Woven glass fiber fabric of rovings, o/30 cm wide, not colored, other than fiberglass tire cord fabric.
7019.40.70	Woven fiberglass tire cord fabric of roving, o/30 cm wide, color, of elect nonconduct. cont. filament 9–11 micron diam & impreg for adhesion.
7019.40.90	Woven glass fiber fabrics of rovings, o/30 cm wide, colored, other than fiberglass tire cord fabric.
7019.51.10	Woven fiberglass tire cord fabric, n/roving, n/o 30 cm wide, of electrical nonconduct. contin. filament 9–11 micron diam & impreg for adhesion.
7019.51.90	Woven glass fiber fabric, not of rovings, n/o 30 cm wide, other than fiberglass tire cord fabric.
7019.52.30	Woven fiberglass tire cord fabric, n/rov, pl. weave, o/30 cm wide & less than 250 g/m2, w/no single yarn o/136 tex, n/colrd, of elect nonconduct.
7019.52.40	Woven glass fiber woven fabric, not colored, not of rovings, plain weave, o/30 cm wide, less than 250 g/m2, w/no single yarn o/136 tex, nesoi.
7019.52.70	Woven fiberglass tire cord fabric, n/rov, color, pl. weave, o/30 cm wide & less thna 250 g/m2, w/no single yarn o/136 tex, of elect nonconduct.
7019.52.90	Woven glass fiber fabric, not colored, not rovings, plain weave, o/30 cm wide & less than 250 g/m2, w/no single yarn not more than 136 tex, nesoi.
7019.59.30	Woven fiberglass tire cord fabric, n/colored, nesoi, o/30 cm wide, of elect. noncond contin filament 9–11 micron diam and impreg for adhesion.
7019.59.40	Woven glass fiber woven fabrics, not colored, nesoi, o/30 cm wide, nesoi.
7019.59.70	Woven fiberglass tire cord fabric, colored, nesoi, o/30 cm wide, of elect. nonconduct contin filaments 9–11 micron diam & impreg for adhesion.
7019.59.90	Woven glass fiber woven fabrics, colored, nesoi, o/30 cm wide, nesoi.
7019.90.10	Woven glass fiber articles (other than fabrics), nesoi.
7019.90.50	Glass fibers (including glass wool), nesoi, and articles thereof, nesoi.
7020.00.30	Quartz reactor tubes and holders designed for insertion into diffusion and oxidation furnaces for semiconductor wafer production, nesoi.
7020.00.40	Glass inners for vacuum flasks or for other vacuum vessels.
7020.00.60	Articles of glass, not elsewhere specified or included.
7102.21.10	Miners' diamonds, unworked or simply sawn, cleaved or bruted.
7102.21.30	Industrial diamonds (other than miners' diamonds), simply sawn, cleaved or bruted.
7102.21.40	Industrial diamonds (other than miners' diamonds), unworked.
7102.29.00	Industrial diamonds, worked, but not mounted or set.
7105.10.00	Diamond dust and powder.
7105.90.00	Natural or synthetic precious (except diamond) or semiprecious stone dust and powder.
7106.10.00	Silver powder.
7106.91.10	Silver bullion and dore.
7106.91.50	Silver, unwrought (o/than bullion and dore).
7106.92.10	Silver (incl. silver plate w gold/platinum), semimanufacture, rectangular/near rectangular shape, 99.5% or > pure, marked only by wgt/identity.
7106.92.50	Silver (including silver plated with gold or platinum), in semimanufactured form, nesoi.
7107.00.00	Base metals clad with silver, not further worked than semimanufactured.
7108.11.00	Gold powder.
7108.12.10	Gold, nonmonetary, bullion and dore.
7108.12.50	Gold, nonmonetary, unwrought (o/than gold bullion and dore).
7108.13.10	Gold leaf.
7108.13.55	Gold (incl. gold plated w platinum), not money, semimanufacture, rectangle/near rectangular shape, 99.5% or > pure, marked only by wgt/identity.
7108.13.70	Gold (including gold plated with platinum), nonmonetary, in semimanufactured forms (except gold leaf), nesoi.
7108.20.00	Gold, monetary, in unwrought, semimanufactured or powder form.
7109.00.00	Base metals or silver clad with gold, but not further worked than semimanufactured.
7110.11.00	Platinum, unwrought or in powder form.
7110.19.00	Platinum, in semimanufactured forms.
7110.21.00	Palladium, unwrought or in powder form.
7110.29.00	Palladium, in semimanufactured forms.
7110.31.00	Rhodium, unwrought or in powder form.
7110.39.00	Rhodium, in semimanufactured forms.
7110.41.00	Iridium, osmium and ruthenium, unwrought or in powder form.
7110.49.00	Iridium, osmium and ruthenium, in semimanufactured forms.
7111.00.00	Base metals, silver or gold clad with platinum, not further worked than semimanufactured.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7112.30.00	Ash containing precious metals or precious metal compounds.
7112.91.00	Gold waste and scrap, including metal clad with gold but excluding sweepings containing other precious metals.
7112.92.00	Platinum waste and scrap, including metal clad with platinum but excluding sweepings containing other precious metals.
7112.99.00	Precious metal (other than of gold or platinum) waste and scrap, including metal clad with precious metals, nesoi.
7114.11.10	Knives with handles of silver, whether or not plated or clad with other precious metal.
7114.11.20	Forks with handles of silver, whether or not plated or clad with other precious metal.
7114.11.30	Spoons and ladles with handles of sterling silver.
7114.11.40	Spoons and ladles (o/than w/sterling silver handles) of silver, whether or not plated or clad w/other precious metal.
7114.11.45	Sets of two or more knives or forks w/silver handles or spoons and ladles of silver, whether or not clad or plated w/prec.metal.
7114.11.50	Tableware, nesoi, of sterling silver.
7114.11.60	Articles of silver nesoi, for household, table or kitchen use, toilet and sanitary wares, including parts thereof.
7114.11.70	Silversmiths' wares (other than for household/table/kitchen use & toilet and sanitary wares) of silver, nesoi.
7114.19.00	Precious metal (o/than silver) articles, nesoi, whether or not plated or clad with other precious metal, nesoi.
7114.20.00	Goldsmiths' or silversmiths' wares of base metal clad with precious metal.
7115.10.00	Platinum catalysts in the form of wire cloth or grill.
7115.90.05	Precious metal articles, incl. metal clad w/precious metal,rectangle/near rectangle shape,99.5%/or pure,marked only by wgt/identity.
7115.90.30	Gold (including metal clad with gold) articles (o/than jewellry or goldsmiths' wares), nesoi.
7115.90.40	Silver (including metal clad with silver) articles (o/than jewellry or silversmiths' wares), nesoi.
7115.90.60	Articles of precious metal (o/than gold or silver), including metal clad with precious metal, nesoi.
7201.10.00	Nonalloy pig iron containing by weight 0.5 percent or less of phosphorus.
7201.20.00	Nonalloy pig iron containing by weight more than 0.5 percent of phosphorus.
7201.50.30	Alloy pig iron in blocks or other primary forms.
7201.50.60	Spiegeleisen in blocks or other primary forms.
7202.11.10	Ferromanganese containing by weight more than 2 percent but not more than 4 percent of carbon.
7202.11.50	Ferromanganese containing by weight more than 4 percent of carbon.
7202.19.10	Ferromanganese containing by weight not more than 1 percent of carbon.
7202.19.50	Ferromanganese containing by weight more than 1 percent but not more than 2 percent of carbon.
7202.21.10	Ferrosilicon containing by weight more than 55% but not more than 80% of silicon and more than 3% of calcium.
7202.21.50	Ferrosilicon containing by weight more than 55% but not more than 80% of silicon, nesoi.
7202.21.75	Ferrosilicon containing by weight more than 80% but not more than 90% of silicon.
7202.21.90	Ferrosilicon containing by weight more than 90% of silicon.
7202.29.00	Ferrosilicon containing by weight 55% or less of silicon.
7202.30.00	Ferrosilicon manganese.
7202.41.00	Ferrochromium containing by weight more than 4 percent of carbon.
7202.49.10	Ferrochromium containing by weight more than 3 percent but not more than 4 percent of carbon.
7202.49.50	Ferrochromium containing by weight 3 percent or less of carbon.
7202.50.00	Ferrosilicon chromium.
7202.60.00	Ferronickel.
7202.70.00	Ferromolybdenum.
7202.80.00	Ferrotungsten and ferrosilicon tungsten.
7202.91.00	Ferrotitanium and ferrosilicon titanium.
7202.92.00	Ferrovanadium.
7202.93.40	Ferroniobium containing by weight less than 0.02 percent of phosphorus or sulfur or less than 0.4 percent of silicon.
7202.93.80	Ferroniobium, nesoi.
7202.99.10	Ferrozirconium.
7202.99.20	Calcium silicon ferroalloys.
7202.99.80	Ferroalloys nesoi.
7203.10.00	Ferrous products obtained by direct reduction of iron ore.
7203.90.00	Spongy ferrous products, in lumps, pellets or like forms; iron of a minimum purity by weight of 99.94% in lumps, pellets or like forms.
7204.10.00	Cast iron waste and scrap.
7204.21.00	Stainless steel waste and scrap.
7204.29.00	Alloy steel (o/than stainless) waste and scrap.
7204.30.00	Tinned iron or steel waste and scrap.
7204.41.00	Ferrous turnings, shavings, chips, milling wastes, sawdust, fillings, trimmings and stampings, whether or not in bundles.
7204.49.00	Ferrous waste and scrap nesoi.
7204.50.00	Iron or steel remelting scrap ingots.
7205.10.00	Pig iron, spiegeleisen, and iron or steel granules.
7205.21.00	Alloy steel powders.
7205.29.00	Pig iron, spiegeleisen, and iron or steel (o/than alloy steel) powders.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7216.61.00	Iron/nonalloy steel, angles, shapes & sections nesoi, not further worked than cold-formed or cold-finished, from flat-rolled products.
7216.69.00	Iron/nonalloy steel, angles, shapes & sections nesoi, not further worked than cold-formed or cold-finished, not from flat-rolled products.
7216.91.00	Iron/nonalloy steel, angle, shapes & sections nesoi, cold-formed/cold-finished from flat-rolled prod. & furth wkd th/cold-formed/cold-finish.
7301.20.10	Iron or nonalloy steel, angles, shapes and sections, welded.
7301.20.50	Alloy steel, angles, shapes and sections of alloy steel, welded.
7302.30.00	Iron or steel, switch blades, crossing frogs, point rods and other crossing pieces, for jointing or fixing rails.
7303.00.00	Cast iron, tubes, pipes and hollow profiles.
7307.11.00	Cast nonmalleable iron, fittings for tubes or pipes.
7307.19.30	Cast ductile iron or steel, fittings for tubes or pipes.
7307.19.90	Cast iron or steel, fittings for tubes or pipes, nesoi.
7307.21.10	Stainless steel, flanges for tubes/pipes, forged, not machined, not tooled and not otherwise processed after forging.
7307.21.50	Stainless steel, not cast, flanges for tubes/pipes, not forged or forged and machined, tooled and otherwise processed after forging.
7307.22.10	Stainless steel, not cast, threaded sleeves (couplings) for tubes/pipes.
7307.22.50	Stainless steel, not cast, threaded elbow and bends for tubes/pipes.
7307.23.00	Stainless steel, not cast, butt welding fittings for tubes/pipes.
7307.29.00	Stainless steel, not cast, fittings for tubes/pipes, nesoi.
7307.91.10	Iron or nonalloy steel, flanges for tubes/pipes, forged, not machined, not tooled and not otherwise processed after forging.
7307.91.30	Alloy steel (o/than stainless), not cast, flanges for tubes/pipes, forged, not machined/tooled and not otherwise processed after forging.
7307.91.50	Iron or steel (o/than stainless), not cast, flanges for tubes/pipes, not forged or forged and machined, tooled & processed after forging.
7307.92.30	Iron or steel (o/than stainless), not cast, threaded sleeves (couplings) for tubes/pipes.
7307.92.90	Iron or steel (o/than stainless), not cast, threaded elbow and bends for tubes/pipes.
7307.93.30	Iron or nonalloy steel, not cast, butt welding fittings for tubes/pipes, w/inside diam. less than 360 mm.
7307.93.60	Alloy steel (o/than stainless), not cast, butt welding fittings for tubes/pipes, w/inside diam. less than 360 mm.
7307.93.90	Iron or alloy steel (o/than stainless), not cast, butt welding fittings for tubes/pipes, w/inside diam. 360 mm or more.
7307.99.10	Iron or nonalloy steel, fittings for tubes/pipes, nesoi, forged, not machined, not tooled and not otherwise processed after forging.
7307.99.30	Alloy steel (o/than stainless), fittings for tubes/pipes, nesoi, forged, not machined/tooled and not otherwise processed after forging.
7307.99.50	Iron/steel (o/than stainless), n/cast, fittings for tubes/pipes, nesoi, not forged or forged and machined, tooled & processed after forging.
7308.30.10	Stainless steel, doors, windows and their frames, and thresholds for doors.
7308.30.50	Iron or steel (o/than stainless), doors, windows and their frames, and thresholds for doors.
7308.40.00	Iron or steel, props and similar equipment for scaffolding, shuttering or pit-propping.
7309.00.00	Iron/steel, reservoirs, tanks, vats, siml. contain., for any material (o/than compress./liq.gas), w/capacity o/300 l, n/fit. w/mech/thermal.
7310.10.00	Iron/steel, tanks, casks, drums, cans, boxes & siml. cont. for any material (o/than compress./liq.gas), w/cap. of 50+ l but n/o 300 l.
7310.21.00	Iron/steel, cans for any material (o/compressed/liq. gas), closed by soldering or crimping, w/cap. less than 50 l.
7310.29.00	Iron/steel, cans for any material (o/compressed/liq. gas), n/closed by soldering or crimping, w/cap. less than 50 l.
7311.00.00	Iron/steel, containers for compressed or liquefied gas.
7312.10.05	Stainless steel, stranded wire, not elect. insulated, fitted with fittings or made up into articles.
7312.10.10	Stainless steel, stranded wire, not elect. insulated, not fitted with fittings or made up into articles.
7312.10.20	Iron or steel (o/than stainless), stranded wire, not elect. insul., fitted with fittings or made up into articles.
7312.10.30	Iron or steel (o/than stainless), stranded wire, not elect. insul., not fitted with fittings or made up into articles.
7312.10.50	Stainless steel, ropes, cables and cordage (o/than stranded wire), not elect. insul., fitted with fittings or made up into articles.
7312.10.60	Stainless steel, ropes, cables and cordage (o/than stranded wire), not elect. insul., not fitted with fittings or made up into articles.
7312.10.70	Iron/steel (o/stainless), ropes, cables & cordage (o/than stranded wire), n/elect. insul., fitted with fittings or made up into articles.
7312.10.80	Iron/steel (o/stainless), ropes, cables & cordage, of brass plated wire (o/than stranded wire), n/elect. insul., w/o fittings or arts.
7312.10.90	Iron/steel (o/stainless), ropes, cables & cordage, o/th of brass plate wire (o/than stranded wire), n/elect. insul., w/o fittings etc.
7312.90.00	Iron/steel (o/stainless), plaited bands, slings and the like, not electrically insulated.
7313.00.00	Iron/steel, barbed wire; iron/steel, twisted hoop or single flat wire and loosely twisted double wire, of a kind used for fencing.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7314.12.10	Stainless steel, woven cloth endless bands for machinery, w/meshes not finer than 12 wires to the lineal cm in warp or filling.
7314.12.20	Stainless steel, woven cloth endless bands for machinery, w/meshes finer than 12 but n/finer than 36 wires to the lineal cm warp or filling.
7314.12.30	Stainless steel, Fourdrinier wires for papermaking machines w/94 or more wires to the lineal cm in warp or filling.
7314.12.60	Stainless steel, Fourdrinier wires for papermaking machines w/36 to 93 wires to the lineal cm in warp or filling.
7314.12.90	Stainless steel, woven cloth endless bands for machinery, nesoi, w/meshes finer than 36 wires to the lineal cm in warp or filling.
7314.14.10	Stainless steel, woven cloth (o/than endless bands for machinery), w/meshes not finer than 12 wires to the lineal cm in warp or filling.
7314.14.20	Stainless steel, woven cloth (o/than endless bands for machinery), w/meshes finer 12 but n/finer 36 wires to the lineal cm warp/filling.
7314.14.30	Stainless steel, Fourdrinier wires (o/than endless bands) for papermaking machines,w/meshes 94 or more wire to lineal cm warp/filling.
7314.14.60	Stainless steel, Fourdrinier wires (o/than endless bands) for papermaking machines, w/meshes 36 to 93 wires to the lineal cm warp/filling.
7314.14.90	Stainless steel woven cloth (other than endless band for machinery), nesoi, w/meshes finer than 36 wires to the lineal cm in warp or filling.
7314.19.01	Iron or steel (o/than stainless), woven cloth.
7314.20.00	Iron/steel, grill, netting & fencing, of wire w/maximum x-sect. dimension 3 mm or more, welded at intersection, w/ mesh size 100 cm2 or more.
7314.31.10	Iron/steel, fencing, of wire, welded at the intersection, plated or coated with zinc, whether or not covered w/plastic material.
7314.31.50	Iron/steel, grill and netting, of wire, welded at the intersection, plated or coated with zinc, nesoi.
7314.39.00	Iron/steel, grill, netting and fencing, of wire, welded at the intersection, not plated or coated with zinc.
7314.41.00	Iron/steel, grill, netting and fencing, of wire, not welded at the intersection, plated or coated with zinc.
7314.42.00	Iron/steel, grill, netting and fencing, of wire, not welded at the intersection, coated with plastics.
7314.49.30	Iron/steel, grill, netting and fencing, of wire, not welded at the intersection, not cut to shape.
7314.49.60	Iron/steel, grill, netting and fencing, of wire, not welded at the intersection, cut to shape.
7314.50.00	Iron or steel, expanded metal.
7315.11.00	Iron or steel, roller chain.
7315.12.00	Iron or steel, articulated link chain (other than roller chain).
7315.19.00	Iron or steel, parts of articulated link chain.
7315.20.10	Iron or steel, skid chain, not over 8 mm in diameter.
7315.20.50	Iron or steel, skid chain, over 8 mm in diameter.
7315.81.00	Iron or steel, stud link chain.
7315.82.10	Alloy steel, welded link chain, not over 10 mm in diameter.
7315.82.30	Alloy steel, welded link chain, over 10 mm in diameter.
7315.82.50	Iron or nonalloy steel, welded link chain, not over 10 mm in diameter.
7315.82.70	Iron or nonalloy steel, welded link chain, over 10 mm in diameter.
7315.89.10	Iron or steel, chain nesoi, with links of essentially round cross section, not over 8 mm in diameter.
7315.89.30	Iron or steel, chain nesoi, with links of essentially round cross sections, over 8 mm in diameter.
7315.89.50	Iron or steel, chain nesoi.
7315.90.00	Iron or steel, parts of chain (other than articulated link chain).
7316.00.00	Iron or steel, anchors, grapnels and parts thereof.
7317.00.20	Iron or steel, nails, tacks, corrugated nails, staples & similar arts., not threaded, suitable for use in powder-actuated hand tools.
7317.00.30	Iron or steel, nails, tacks, corrugated nails, staples & similar arts., threaded, suitable for use in powder-actuated hand tools.
7317.00.55	Iron or steel, nails, tacks, corrugated nails, staples & similar arts., of one piece construction, made of round wire, nesoi.
7317.00.65	Iron or steel, nails, tacks, corrugated nails, staples & similar arts., of one piece construction, not made of round wire, nesoi.
7317.00.75	Iron or steel, nails, tacks, corrugated nails, staples & similar arts., of two or more pieces, nesoi.
7318.11.00	Iron or steel, coach screws.
7318.12.00	Iron or steel, wood screws (o/than coach screws).
7318.13.00	Iron or steel, screw hooks and screw rings.
7318.14.10	Iron or steel, self-tapping screws, w/shanks or threads less than 6 mm in diameter.
7318.14.50	Iron or steel, self-tapping screws, w/shanks or threads 6 mm or more in diameter.
7318.15.20	Iron or steel, bolts and bolts & their nuts or washers, imported in the same shipment.
7318.15.40	Iron or steel, machine screws (o/than cap screws), 9.5 mm or more in length and 3.2 mm in diameter.
7318.15.50	Iron or steel, threaded studs.
7318.15.60	Iron or steel, screws and bolts, nesoi, having shanks or threads less than 6 mm in diameter.
7318.15.80	Iron or steel, screws and bolts, nesoi, having shanks or threads 6 mm or more in diameter.
7318.19.00	Iron or steel, threaded articles similar to screws, bolts, nuts, coach screws & screw hooks, nesoi.
7318.21.00	Iron or steel, spring washers and other lock washers.
7318.22.00	Iron or steel, washers (o/than spring washers and other lock washers).

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7318.23.00	Iron or steel, rivets.
7318.24.00	Iron or steel, cotters and cotter pins.
7318.29.00	Iron or steel, nonthreaded articles similar to rivets, cotters, cotter pins, washers and spring washers.
7320.10.30	Iron or steel, leaf springs & leaves therefore, to be used in motor vehicles having a G.V.W. not exceeding 4 metric tons.
7320.10.60	Iron or steel, leaf springs & leaves therefore, suitable for motor vehicle suspension (o/than for motor vehicles w/a G.V.W. o/4 metric tons).
7320.10.90	Iron or steel, leaf springs & leaves therefore, not suitable for motor vehicle suspension.
7320.90.10	Iron or steel, hairsprings.
7320.90.50	Iron or steel, springs (o/than leaf springs, helical springs or hairsprings).
7321.11.10	Iron or steel, portable non-electric domestic cooking appliances and plate warmers, for gas fuel or for both gas and other fuels.
7321.11.30	Iron or steel, nonportable non-electric domestic stoves or ranges, for gas fuel or for both gas and other fuels.
7321.11.60	Iron or steel, nonportable non-electric domestic cook. appl. (o/th stoves or ranges) & plate warmers, for gas fuel or both gas & other fuels.
7321.90.10	Iron/steel, cooking chambers for nonportable non-electric domestic stoves or ranges, for gas or for gas and other fuels.
7321.90.20	Iron/steel, top surface panels w/or w/o burners/controls for nonportable non-elect. domest. stoves or ranges, for gas or gas & other fuels.
7321.90.40	Iron/steel, door assmbly w/more than one of inner panel, out. panel, window, insul., for non-elect. stoves or ranges, for gas or gas & other.
7321.90.50	Iron/steel, parts of nonportable non-electric domestic stoves or ranges, nesoi, for gas fuel or for both gas and other fuels.
7321.90.60	Iron/steel, parts, of nonelectric domestic cooking and warming appliances, nesoi.
7322.11.00	Cast iron, non-electrically heated radiators and parts thereof, for central heating.
7322.19.00	Iron (o/than cast) or steel, non-electrically heated radiators and parts thereof, for central heating.
7322.90.00	Iron or steel, non-electrically heated air heaters and hot air distributors w/motor driven fan or blower and parts thereof.
7323.10.00	Iron or steel wool; iron or steel pot scourers and scouring or polishing pads, gloves and the like.
7323.99.90	Iron (o/th cast)/steel (o/th tinplate or stainless), table, kitchen (o/th cooking.) or o/household arts & part, n/coated/plated w/prec. metal.
7324.10.00	Stainless steel, sinks and wash basins.
7324.21.10	Cast iron, baths (whether or not enameled), coated or plated with precious metal.
7324.21.50	Cast iron, baths (whether or not enameled), not coated or plated with precious metal.
7324.90.00	Iron or steel, sanitary ware (o/than baths or stainless steel sinks and wash basins) and parts thereof.
7325.10.00	Nonmalleable cast iron, articles, nesoi.
7325.91.00	Iron or steel, cast grinding balls and similar articles for mills.
7325.99.10	Cast iron (o/than nonmalleable cast iron), articles nesoi.
7325.99.50	Steel, cast articles nesoi.
7326.11.00	Iron or steel, forged or stamped grinding balls and similar articles for mills.
7326.19.00	Iron or steel, articles forged or stamped but n/further worked, nesoi.
7326.20.00	Iron or steel, articles of wire, nesoi.
7326.90.10	Tinplate, articles nesoi.
7326.90.25	Iron or steel, cable or inner wire for caliper and cantilever brakes and casing therefore, whether or not cut to length.
7326.90.35	Iron or steel, containers of a kind normally carried on the person, in the pocket or in the handbag, nesoi.
7326.90.45	Iron or steel, horse and mule shoes.
7326.90.60	Iron or steel, articles nesoi, coated or plated with precious metal.
7326.90.86	Iron or steel, articles, nesoi.
7401.00.00	Copper mattes; cement copper (precipitated copper).
7402.00.00	Unrefined copper; copper anodes for electrolytic refining.
7403.11.00	Refined copper cathodes and sections of cathodes.
7403.12.00	Refined copper, wire bars.
7403.13.00	Refined copper, billets.
7403.19.00	Refined copper, unwrought articles nesoi.
7403.21.00	Copper-zinc base alloys (brass), unwrought nesoi.
7403.22.00	Copper-tin base alloys (bronze), unwrought nesoi.
7403.29.01	Copper alloys (o/than copper-zinc, copper-tin alloys), unwrought nesoi.
7404.00.30	Copper spent anodes; copper waste & scrap containing less than 94% by weight of copper.
7404.00.60	Copper, waste and scrap containing 94% or more by weight of copper.
7405.00.10	Copper master alloys, containing 5% or more but n/more than 15% by weight of phosphorus.
7405.00.60	Copper master alloys, not containing 5% or more but n/more than 15% by weight of phosphorus.
7406.10.00	Copper, powders of non-lamellar structure.
7406.20.00	Copper, powders of lamellar structure; copper flakes.
7407.10.15	Refined copper, hollow profiles.
7407.10.30	Refined copper, profiles (o/than hollow profiles).
7407.10.50	Refined copper, bars and rods.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7407.21.15	Copper-zinc base alloys (brass), hollow profiles.
7407.21.30	Copper-zinc base alloys (brass), profiles (o/than hollow profiles).
7407.21.50	Copper-zinc base alloys (brass), low fuming brazing rods.
7407.21.70	Copper-zinc base alloys (brass), bars & rods nesoi, having a rectangular cross section.
7407.21.90	Copper-zinc base alloys (brass), bars & rods nesoi, not having a rectangular cross section.
7407.29.16	Copper alloys , hollow profiles.
7407.29.34	Copper-nickel base alloys (cupro-nickel) or copper-nickel-zinc base alloys (nickel silver), profiles (o/than hollow profiles).
7407.29.38	Copper alloys (o/than cupro-nickel or nickel silver), profiles (o/than hollow profiles).
7407.29.40	Copper-nickel base alloys (cupro-nickel) or copper-nickel-zinc base alloys (nickel silver), bars & rods.
7407.29.50	Copper alloys (o/than brass, cupro-nickel or nickel silver), bars and rods.
7408.11.30	Refined copper, wire, w/maximum cross-sectional dimension over 9.5 mm.
7408.11.60	Refined copper, wire, w/maximum cross-sectional dimension over 6 mm but not over 9.5 mm.
7408.19.00	Refined copper, wire, w/maximum cross-sectional dimension of 6 mm or less.
7408.21.00	Copper-zinc base alloys (brass), wire.
7408.22.10	Copper-nickel base alloys (cupro-nickel) or copper-nickel-zinc base alloys (nickel silver), wire, coated or plated with metal.
7408.22.50	Copper-nickel base alloys (cupro-nickel) or copper-nickel-zinc base alloys (nickel silver), wire, not coated or plated w/metal.
7408.29.10	Copper alloys (o/than brass, cupro-nickel or nickel-silver), wire, coated or plated with metal.
7408.29.50	Copper alloys (o/than brass, cupro-nickel or nickel-silver), wire, not coated or plated with metal.
7409.11.10	Refined copper, plates, sheets and strip, in coils, with a thickness of 5 mm or more.
7409.11.50	Refined copper, plates, sheets and strip, in coils, with a thickness over 0.15mm but less than 5 mm.
7409.19.10	Refined copper, plates, sheets and strip, not in coils, with a thickness of 5 mm or more.
7409.19.50	Refined copper, plates, sheets and strip, not in coils, with a thickness o/0.15mm but less than 5 mm & a width of 500 mm or more.
7409.19.90	Refined copper, plates, sheets and strip, not in coils, with a thickness o/0.15mm but less than 5 mm & a width of less than 500 mm.
7409.21.00	Copper-zinc base alloys (brass), plates, sheets and strip, in coils.
7409.29.00	Copper-zinc base alloys (brass), plates, sheets and strip, not in coils.
7409.31.10	Copper-tin base alloys (bronze), plates, sheets and strip, in coils. with a thickness of 5 mm or more.
7409.31.50	Copper-tin base alloys (bronze), plates, sheets and strip, in coils, with a thickness o/0.15mm but less than 5mm & a width of 500mm or more.
7409.31.90	Copper-tin base alloys (bronze), plates, sheets and strip, in coils, w/thickness o/0.15mm but less than 5mm & a width of less than 500mm.
7409.39.10	Copper-tin base alloys (bronze), plates, sheets and strip, with a thickness of 5 mm or more.
7409.39.50	Copper-tin base alloys (bronze), plates, sheets and strip, with a thickness o/0.15 but less than 5 mm & of a width of 500 mm or more.
7409.39.90	Copper-tin base alloys (bronze), plates, sheets and strip, with a thickness o/0.15 but less than 5 mm & of a width of less than 500 mm.
7409.40.00	Copper-nickel base alloys (cupro-nickel) or copper-nickel-zinc base alloys (nickel silver), plates, sheets and strip, w/thickness o/0.15mm.
7409.90.10	Copper alloys (o/than brass/bronze/cupro-nickel/nickel silver), plates, sheets & strip, with thickness of 5 mm or more.
7409.90.50	Copper alloys (o/than brass/bronze/cupro-nickel/nickel silver), plates, sheets & strip, w/thick. o/0.15mm but less th/5mm & width 500mm+.
7409.90.90	Copper alloys (o/than brass/bronze/cupro-nickel/nickel silver), plates, sheets & strip, w/thick. o/0.15mm but less th/5mm & width less 500mm.
7410.11.00	Refined copper, foil, w/thickness of 0.15 mm or less, not backed.
7410.12.00	Copper alloys, foil, w/thickness of 0.15 mm or less, not backed.
7410.21.30	Refined copper, clad laminates, w/thickness of 0.15 mm or less, backed.
7410.21.60	Refined copper, foil, w/thickness of 0.15 mm or less, backed.
7410.22.00	Copper alloys, foil, w/thickness of 0.15 mm or less, backed.
7411.10.10	Refined copper, tubes and pipes, seamless.
7411.10.50	Refined copper, tubes and pipes, other than seamless.
7411.21.10	Copper-zinc base alloys (brass), tubes and pipes, seamless.
7411.21.50	Copper-zinc base alloys (brass), tubes and pipes, other than seamless.
7411.22.00	Copper-nickel base alloys (cupro-nickel) or copper-nickel-zinc base alloys (nickel-silver), tubes and pipes.
7411.29.10	Copper alloys (o/than brass/cupro-nickel/nickel-silver), pipes and tubes, seamless.
7411.29.50	Copper alloys (o/than brass/cupro-nickel/nickel-silver), pipes and tubes, other than seamless.
7412.10.00	Refined copper, fittings for tubes and pipes.
7412.20.00	Copper alloys, fittings for tubes and pipes.
7413.00.10	Copper, stranded wire, not electrically insulated, not fitted with fittings and not made up into articles.
7413.00.50	Copper, cables, plaited bands and the like, not fitted with fittings and not made up into articles.
7413.00.90	Copper, stranded wire, cables, plaited bands and the like, not electrically insulated, fitted with fittings or made up into articles.
7415.10.00	Copper or iron/steel w/heads of copper, nails and tacks, drawing pins, staples and similar articles.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7415.21.00	Copper, washers (including spring washers).
7415.29.00	Copper, rivets, cotters, cotter pins and similar non-threaded articles (o/than washers).
7415.33.05	Copper screws for wood.
7415.33.10	Muntz or yellow metal copper bolts.
7415.33.80	Screws (other than wood screws), bolts (other than Muntz or yellow metal) and nuts, of copper, threaded, nesoi.
7415.39.00	Copper, screw hooks and other threaded articles, nesoi.
7418.20.10	Copper-zinc base alloys (brass), sanitary ware and parts thereof.
7418.20.50	Copper (o/than brass), sanitary ware and parts thereof.
7419.10.00	Copper, chain and parts thereof.
7419.91.00	Copper, articles nesoi, cast, molded, stamped, or forged but not further worked.
7419.99.03	Copper, Fourdrinier wires, for use in papermaking machines, w/94 or more wires to the lineal cm.
7419.99.06	Copper cloth, nesoi.
7419.99.09	Copper, wire grill and netting; expanded metal of copper.
7419.99.15	Copper, containers a kind normally carried on the person, in the pocket or in the handbag.
7419.99.16	Copper, springs.
7419.99.30	Copper, articles nesoi, coated or plated with precious metal.
7419.99.50	Copper, articles nesoi, not coated or plated with precious metal.
7501.10.00	Nickel mattes.
7501.20.00	Nickel oxide sinters and other intermediate products of nickel metallurgy.
7502.10.00	Nickel (o/than alloy), unwrought.
7502.20.00	Nickel alloys, unwrought.
7503.00.00	Nickel, waste and scrap.
7504.00.00	Nickel, powders and flakes.
7505.11.10	Nickel (o/than alloy), bars and rods, cold formed.
7505.11.30	Nickel (o/than alloy), bars and rods, not cold formed.
7505.11.50	Nickel (o/than alloy), profiles.
7505.12.10	Nickel alloy, bars and rods, cold formed.
7505.12.30	Nickel alloy, bars and rods, not cold formed.
7505.12.50	Nickel alloy, profiles.
7505.21.10	Nickel (o/than alloy), wire, cold formed.
7505.21.50	Nickel (o/than alloy), wire, not cold formed.
7505.22.10	Nickel alloy, wire, cold formed.
7505.22.50	Nickel alloy, wire, not cold formed.
7506.10.05	Nickel, foil, w/thickness not over 0.15 mm.
7506.10.10	Nickel (o/than alloy), plates, sheets and strip, cold formed.
7506.10.30	Nickel (o/than alloy), plates, sheets and strip, not cold formed.
7506.20.05	Nickel alloy, foil, w/thickness not over 0.15 mm.
7506.20.10	Nickel alloy, plates, sheets and strip, cold formed.
7506.20.30	Nickel alloy, plates, sheets and strip, not cold formed.
7507.11.00	Nickel (o/than alloy), tubes and pipes.
7507.12.00	Nickel alloy, tubes and pipes.
7507.20.00	Nickel, fittings for tubes and pipes.
7508.10.00	Nickel, wire cloth, grill and netting.
7508.90.10	Nickel, stranded wire.
7508.90.50	Nickel, articles of nesoi.
7602.00.00	Aluminum, waste and scrap.
7603.10.00	Aluminum, powders of non-lamellar structure.
7603.20.00	Aluminum, powders of lamellar structure; aluminum flakes.
7610.90.00	Aluminum, structures and parts of structures, nesoi; aluminum plates, rods, profiles, tubes and the like prepared for use in structures.
7611.00.00	Aluminum, reservoirs, tanks, vats & like containers for any material (o/than compressed or liq. gas), w/capacity o/300 l, not fitted w/
7612.10.00	Aluminum, collapsible tubular containers, w/capacity of 300 l or less.
7612.90.10	Aluminum, casks, drums & like containers, for any material (o/than compressed or liq. gas), w/cap. n/o 20 l, n/fitted w/mech/thermal.
7612.90.50	Aluminum, casks, drums & like containers, for any material (o/thna compressed or liq. gas), w/cap. o/20 but n/o 300 l, n/fitted w/mech.
7613.00.00	Aluminum, containers for compressed or liquefied gas.
7614.10.50	Aluminum, stranded wire, cables & the like w/steel core, not electrically insulated, fitted with fittings or made up into articles.
7614.90.40	Aluminum, stranded wire, cables, & the like (o/than elect. conduct or w/steel core), n/elect. insulated, n/fitted w/fittings or articles.
7614.90.50	Aluminum, stranded wire, cables and the like (o/than w/steel core), not electrically insulated, fitted w/fittings or made up into articles.
7615.20.00	Aluminum, sanitary ware and parts thereof.
7616.10.10	Aluminum, nails, tacks and staples.
7616.10.30	Aluminum, rivets.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
7616.10.50	Aluminum, cotters and cotter pins.
7616.10.70	Aluminum, screws, bolts, nuts, screw hooks, washers and similar articles w/shanks, threads, or holes o/6 mm in diameter.
7616.10.90	Aluminum, screws, bolts, nuts, screw hooks, washers and similar articles w/shanks, threads or holes 6 mm or less in diameter.
7616.91.00	Aluminum, wire cloth, grill, netting and fencing.
7616.99.10	Aluminum, luggage frames.
7616.99.51	Aluminum, articles, nesoi.
7801.10.00	Refined lead, unwrought.
7801.91.00	Lead (o/than refined lead), containing by weight antimony as the principal other element, unwrought.
7801.99.30	Lead (o/than refined lead), bullion.
7801.99.90	Lead (o/than refined lead), unwrought nesoi.
7802.00.00	Lead, waste and scrap.
7804.11.00	Lead, sheets, strip and foil, w/thickness n/o 0.2 mm, excluding any backing.
7804.19.00	Lead, plates & sheets, strip and foil w/thickness o/0.2mm, nesoi.
7804.20.00	Lead, powders and flakes.
7806.00.03	Lead, bars, rods, profiles and wire.
7806.00.05	Lead, tubes or pipes and fittings for tubes or pipes.
7806.00.80	Lead, articles, nesoi.
7901.11.00	Zinc (o/than alloy), unwrought, containing o/99.99% by weight of zinc.
7901.12.10	Zinc (o/than alloy), unwrought, casting-grade zinc, containing at least 97.5% but less than 99.99% by weight of zinc.
7901.12.50	Zinc (o/than alloy), unwrought, o/than casting-grade zinc, containing at least 97.5% but less than 99.99% by wt. of zinc.
7901.20.00	Zinc alloy, unwrought.
7902.00.00	Zinc, waste and scrap.
7903.10.00	Zinc, dust.
7903.90.30	Zinc, powders.
7903.90.60	Zinc, flakes.
7904.00.00	Zinc, bars, rods, profiles and wire.
7905.00.00	Zinc, plates, sheets, strip and foil.
7907.00.10	Zinc, household, table or kitchen use articles; zinc toilet and sanitary wares; zinc parts of all the foregoing.
7907.00.20	Zinc, tubes or pipes and fittings for tubes or pipes.
7907.00.60	Zinc, articles (o/than for household, table or kitchen use), nesoi.
8001.10.00	Tin (o/than alloy), unwrought.
8001.20.00	Tin alloy, unwrought.
8002.00.00	Tin, waste and scrap.
8003.00.00	Tin, bars, rods, profiles and wire.
8007.00.10	Tin, household, table or kitchen use articles; tin toilet and sanitary wares; all the foregoing, n/coated or plated w/ prec. metal.
8007.00.20	Tin, plates, sheets and strip, of a thickness exceeding 0.20 mm.
8007.00.31	Tin. foil, w/thickness (excluding any backing) n/o 0.2 mm.
8007.00.32	Tin, powders and flakes.
8007.00.40	Tin, tubes or pipes and fittings for tubes or pipes.
8007.00.50	Tin, articles nesoi.
8101.10.00	Tungsten, powders.
8101.94.00	Tungsten, unwrought (including bars and rods obtained simply by sintering).
8101.96.00	Tungsten wire.
8101.97.00	Tungsten waste and scrap.
8101.99.10	Tungsten bars and rods (o/than those obtained simply by sintering), profiles, plates, sheets, strip and foil.
8101.99.80	Tungsten, articles nesoi.
8102.10.00	Molybdenum, powders.
8102.94.00	Molybdenum, unwrought (including bars and rods obtained simply by sintering).
8102.95.30	Molybdenum bars and rods (o/than those obtained simply by sintering).
8102.95.60	Molybdenum profiles, plates, sheets, strip and foil.
8102.96.00	Molybdenum wire.
8102.97.00	Molybdenum waste and scrap.
8102.99.00	Molybdenum, articles nesoi.
8103.20.00	Tantalum, unwrought (including bars and rods obtained simply by sintering); tantalum powders.
8103.30.00	Tantalum waste and scrap.
8103.90.00	Tantalum, articles nesoi.
8104.11.00	Magnesoium, unwrought, containing at least 99.8 percent by weight of magnesoium.
8104.19.00	Magnesoium, unwrought, nesoi.
8104.20.00	Magnesoium, waste and scrap.
8104.30.00	Magnesoium, raspings, turnings and granules graded according to size; magnesoium powders.
8104.90.00	Magnesoium, articles nesoi.
8105.20.30	Cobalt alloys, unwrought.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8105.20.60	Cobalt (other than alloys), unwrought.
8105.20.90	Cobalt, mattes and other intermediate products of cobalt metallurgy; cobalt powders.
8105.30.00	Cobalt waste and scrap.
8105.90.00	Cobalt, articles thereof nesoi.
8106.00.00	Bismuth (including waste & scrap) and articles thereof, nesoi.
8107.20.00	Cadmium, unwrought; cadmium powders.
8107.30.00	Cadmium waste and scrap.
8107.90.00	Cadmium, articles thereof nesoi.
8108.20.00	Titanium, unwrought; titanium powders.
8108.30.00	Titanium waste and scrap.
8108.90.30	Titanium, articles nesoi.
8108.90.60	Titanium, wrought nesoi.
8109.20.00	Zirconium, unwrought; zirconium powders.
8109.30.00	Zirconium waste and scrap.
8109.90.00	Zirconium, articles, nesoi.
8110.10.00	Antimony, unwrought; antimony powders.
8110.20.00	Antimony waste and scrap.
8110.90.00	Articles of antimony, nesoi.
8111.00.30	Manganese, waste and scrap.
8111.00.47	UNWROUGHT MANGANESE FLAKE CONTAINING AT LEAST 99.5 PERCENT BY WEIGHT MANGANESE.
8111.00.49	UNWROUGHT MANGANESE, nesoi.
8111.00.60	Manganese (o/than waste and scrap, unwrought) and articles thereof, nesoi.
8112.12.00	Beryllium, unwrought; beryllium powders.
8112.13.00	Beryllium waste and scrap.
8112.19.00	Beryllium, articles nesoi.
8112.21.00	Chromium, unwrought; chromium powders.
8112.22.00	Chromium waste and scrap.
8112.29.00	Articles of chromium, nesoi.
8112.51.00	Thallium, unwrought; thallium powders.
8112.52.00	Thallium waste and scrap.
8112.59.00	Articles of thallium, nesoi.
8112.92.06	Waste and scrap of gallium, germanium, hafnium, indium, niobium, rhenium, or vanadium.
8112.92.10	Gallium, unwrought; gallium powders.
8112.92.20	Hafnium, unwrought; hafnium powders.
8112.92.30	Indium, unwrought; indium powders.
8112.92.40	Niobium (columbium), unwrought; niobium powders.
8112.92.50	Rhenium, unwrought; rhenium powders.
8112.92.60	Germanium, unwrought.
8112.92.65	Germanium powder, wrought.
8112.92.70	Vanadium, unwrought and powders.
8112.99.10	Germanium nesoi and articles thereof.
8112.99.20	Vanadium, nesoi, and articles thereof.
8112.99.90	Articles of gallium, hafnium, indium, niobium or rhenium, nesoi.
8113.00.00	Cermets (including waste & scrap) and articles thereof.
8201.10.00	Spades and shovels and base metal parts thereof.
8201.30.00	Mattocks, picks, hoes and rakes and base metal parts thereof.
8201.40.30	Machetes, and base metal parts thereof.
8201.40.60	Axes, bill hooks and similar hewing tools (o/than machetes), and base metal parts thereof.
8201.50.00	One-handed secateurs, pruners and shears (including poultry shears), and base metal parts thereof.
8201.60.00	Hedge shears, two-handed pruning shears and similar two-handed shears, and base metal parts thereof.
8201.90.30	Grass shears, and base metal parts thereof.
8201.90.40	Forks (hand tools) and base metal parts thereof.
8201.90.60	Base metal hand tools of a kind used in agriculture, horticulture or forestry nesoi, and base metal parts thereof.
8202.10.00	Hand saws, and base metal parts thereof (except blades).
8202.20.00	Band saw blades.
8202.31.00	Circular saw blades (including slitting or slotting saw blades), w/working part of steel.
8202.39.00	Circular saw blades (including slitting or slotting saw blades), with working part of o/than steel, & base metal parts thereof.
8202.40.30	Chain saw blades & base metal parts thereof, w/cutting parts cont. o/0.2% of Cr, Mo or W, or o/0.1% of V.
8202.40.60	Chain saw blades and base metal parts thereof, nesoi.
8202.91.30	Hacksaw blades for working metal.
8202.91.60	Straight saw blades for working metal (o/than hacksaw blades), and base metal parts thereof.
8202.99.00	Saw blades nesoi, and base metal parts thereof.
8203.10.30	Files, rasps and similar tools, n/o 11 cm in length.
8203.10.60	Files, rasps and similar tools, o/11 cm but n/o 17 cm in length.
8203.10.90	Files, rasps and similar tools, o/17 cm in length.
8203.20.20	Base metal tweezers.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8203.20.40	Slip joint pliers.
8203.20.60	Pliers (including cutting pliers but not slip joint pliers), pincers and similar tools.
8203.20.80	Base metal parts of pliers (including cutting pliers), pincers, tweezers and similar tools.
8203.30.00	Metal cutting shears and similar tools, and base metal parts thereof.
8203.40.30	Pipe cutters, bolt cutters, perf. punches & similar tools, w/cutting parts o/0.2% Cr, Mo or W, or o/0.1% V & base metal pts.
8203.40.60	Pipe cutters, bolt cutters, perforating punches and similar tools, nesoi, and base metal parts thereof.
8204.11.00	Hand-operated non-adjustable spanners and wrenches, and base metal parts thereof.
8204.12.00	Hand-operated adjustable spanners and wrenches, and base metal parts thereof.
8204.20.00	Socket wrenches, with or without handles, drives and extensions, and base metal parts thereof.
8205.10.00	Drilling, threading or tapping tools, and base metal parts thereof.
8205.20.30	Hammers and sledge hammers, with heads not over 1.5 kg each, and base metal parts thereof.
8205.20.60	Hammers and sledge hammers, with heads over 1.5 kg each, and base metal parts thereof.
8205.30.30	Planes, chisels, gouges etc. for working wood, over 0.2% chromium, molybdenum or tungsten, or over 0.1% vanadium, base metal parts thereof.
8205.30.60	Planes, chisels, gouges and similar cutting tools for working wood, nesoi, and base metal parts thereof.
8205.40.00	Screwdrivers and base metal parts thereof.
8205.51.15	Carving and butcher steels, of iron or steel, with or without their handles.
8205.51.30	Iron or steel household handtools (o/than carving & butcher steels), and base metal parts thereof.
8205.51.45	Copper household handtools, and base metal parts thereof.
8205.51.60	Aluminum household handtools, and base metal parts thereof.
8205.51.75	Base metal, nesoi, household handtools, and base metal parts thereof.
8205.59.10	Pipe tools and base metal parts thereof.
8205.59.20	Powder-actuated hand tools and base metal parts thereof.
8205.59.30	Crowbars, track tools and wedges, and base metal parts thereof.
8205.59.45	Caulking guns of iron or steel, and base metal parts thereof.
8205.59.55	Iron or steel handtools (o/than household, o/than caulking guns) nesoi, and base metal parts thereof.
8205.59.60	Copper handtools (o/than household) nesoi, and base metal parts thereof.
8205.59.70	Aluminum handtools (o/than household) nesoi, and base metal parts thereof.
8205.59.80	Base metal, nesoi, handtools (o/than household), and base metal parts thereof.
8205.60.00	Blow torches and similar self-contained torches, and base metal parts thereof.
8205.70.00	Vises, clamps and the like, and base metal parts thereof.
8205.90.10	Anvils, portable forges, hand- or pedal-operated grinding wheels with frameworks and base metal parts thereof.
8205.90.60	Sets of articles (handtools and other specified tools) of two or more foregoing subheadings.
8206.00.00	Tools of two or more of headings 8202 to 8205 put up in sets for retail sale.
8207.13.00	Interchangeable tools for rock drilling or earth boring tools, w/working part of cermets.
8207.19.30	Interchangeable tools for rock drilling or earth boring tools, w/cutting part o/0.2% Cr, Mo or W, or o/0.1% V by wt., & base metal parts.
8207.19.60	Interchangeable tools for rock drilling or earth boring tools, w/working part nesoi, and base metal parts thereof.
8207.20.00	Interchangeable dies for drawing or extruding metal, and base metal parts thereof.
8207.30.30	Interchangeable tools for pressing, stamping or punching, suitable for cutting metal, and base metal parts thereof.
8207.30.60	Interchangeable tools for pressing, stamping or punching, not suitable for cutting metal, and base metal parts thereof.
8207.40.30	Interchangeable tools for tapping or threading, w/cutting pts ov 0.2% by wt of Cr, Mo, W, or ov 0.1% V, & base metal pts thereof.
8207.40.60	Interchangeable tools for tapping or threading, nesoi, and base metal parts thereof.
8207.50.20	Interchangeable tools for drilling (o/than rock drilling) w/cutting part ov 0.2% Cr, Mo or W, or ov 0.1% V & base metal parts thereof.
8207.50.40	Interchangeable tools for drilling (o/than rock drilling), nesoi, suitable for cutting metal, and base metal parts thereof.
8207.50.60	Interchangeable tools for handtools, for drilling (o/than rock drilling), nesoi, n/suitable for cutting metal, & base metal parts thereof.
8207.50.80	Interchangeable tools (o/than for handtools) for drilling (o/than rock drilling), nesoi, not suitable for cutting metal, & base metal parts.
8207.60.00	Interchangeable tools for boring or broaching, and base metal parts thereof.
8207.70.30	Interchangeable tools for milling, w/cutting part ov 0.2% by wt of Cr, Mo or W, or ov 0.1% by wt of V & base metal parts thereof.
8207.70.60	Interchangeable tools for milling, nesoi, and base metal parts thereof.
8207.80.30	Interchangeable tools for turning, w/cutting part ov 0.2% by wt of Cr, Mo or W, or ov 0.1% by wt of V & base metal parts thereof.
8207.80.60	Interchangeable tools for turning, nesoi, and base metal parts thereof.
8207.90.15	Interchangeable files and rasps, including rotary files and rasps, and base metal parts thereof.
8207.90.30	Interchangeable cutting tools, nesoi, w/cutting part ov 0.2% by wt of Cr, Mo or W, or ov 0.1% by wt of V, and base metal parts thereof.
8207.90.45	Interchangeable tools, nesoi, suitable for cutting metal, nesoi and base metal parts thereof.
8207.90.60	Interchangeable tools for handtools, nesoi, not suitable for cutting metal, nesoi and base metal parts thereof.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8207.90.75	Interchangeable tools (o/than for handtools) nesoi, not suitable for cutting metal, nesoi and base metal parts thereof.
8208.10.00	Knives and cutting blades for metal working machines or mechanical appliances, and base metal parts thereof.
8208.20.00	Knives and cutting blades for wood working machines or mechanical appliances, and base metal parts thereof.
8208.30.00	Knives and cutting blades for kitchen appliances or for machines used by the food industry, and base metal parts thereof.
8208.40.30	Lawnmower blades for agricultural, horticultural or forestry machines.
8208.40.60	Knives and cutting blades (o/than lawnmower blades) for agricultural, horticultural or forestry machines, and base metal parts thereof.
8208.90.30	Knives and cutting blades for shoe machinery, and base metal parts thereof.
8208.90.60	Knives and cutting blades, nesoi for machines or for mechanical appliances nesoi, and base metal parts thereof.
8209.00.00	Cermet plates, sticks, tips and the like for tools, unmounted.
8210.00.00	Hand-operated mechanical appliances weighing 10 kg or less, used in preparation, conditioning, serving food or drink & base metal pts.
8211.93.00	Knives having other than fixed blades.
8211.94.10	Base metal blades for knives having fixed blades.
8211.94.50	Base metal blades for knives having other than fixed blades.
8211.95.10	Base metal handles for table knives w/fixed blades.
8211.95.50	Base metal handles for knives (o/than table knivies) w/fixed blades.
8211.95.90	Base metal handles for knives having other than fixed blades.
8215.20.00	Sets of assted. base metal spoons, forks, ladles, etc. & similar kitchen or tableware, w/no articles plated with precious metal.
8215.99.05	Base metal forks, w/stainless steel handles cont. Ni or o/10% by wt of Mn, nesoi.
8301.20.00	Base metal locks, of a kind used on motor vehicles.
8302.10.60	Iron or steel, aluminum, or zinc hinges and base metal parts thereof, not designed for motor vehicles.
8302.10.90	Base metal (o/than iron/steel/aluminum/zinc) hinges and base metal parts thereof.
8302.20.00	Base metal castors and base metal parts thereof.
8302.30.30	Iron or steel, aluminum or zinc mountings, fittings and similar articles nesoi, suitable for motor vehicles, and base metal parts thereof.
8302.30.60	Base metal (o/than iron/steel/aluminum/zinc) mountings, fittings & similar articles, suitable for motor vehicles, & base metal pts thereof.
8302.41.30	Base metal door closers (except automatic door closers) suitable for buildings, and base metal parts thereof.
8302.41.60	Iron or steel, aluminum or zinc mountings, fittings & similar articles, nesoi, suitable for buildings, & base metal pts thereof.
8302.41.90	Base metal (o/than iron/steel/aluminum/zinc) mountings, fittings and similar arts, nesoi, suitable for buildings & base metal parts thereof.
8302.49.20	Base metal harness, saddlery or riding-bridle hardware coated or plated w/prec. metal, and base metal parts thereof.
8302.49.40	Base metal harness, saddlery or riding-bridle hardware, not coated or plated w/prec. metal, and base metal parts thereof.
8302.49.60	Iron or steel, aluminum, or zinc, mountings, fittings & similar articles nesoi, and base metal parts thereof.
8302.49.80	Base metal (o/than iron/steel/aluminum/zinc) mountings, fittings & similar articles nesoi, and base metal parts thereof.
8302.50.00	Base metal hat-racks, hat pegs, brackets and similar fixtures, and base metal parts thereof.
8302.60.30	Base metal automatic door closers.
8302.60.90	Base metal parts of automatic door closers.
8303.00.00	Base metal armored or reinforced safes/strong-boxes & doors & safe deposit lockers for strong rooms/cash & deed boxes etc., & base metal pts.
8306.30.00	Base metal photograph, picture or similar frames; base metal mirrors; base metal parts thereof.
8307.10.30	Iron or steel flexible tubing, with fittings.
8307.10.60	Iron or steel flexible tubing, without fittings.
8307.90.30	Base metal (o/than iron or steel) flexible tubing, with fittings.
8307.90.60	Base metal (o/than iron or steel) flexible tubing, without fittings.
8308.10.00	Base metal hooks, eyes, and eyelets, of a kind used for clothing, footwear, awnings, handbags, travel goods, or other made up articles.
8308.20.30	Iron or steel bifurcated rivets, not brightened, not lathed and not machined.
8308.20.60	Base metal tubular or bifurcated rivets (o/than of iron or steel).
8308.90.30	Base metal beads and spangles.
8308.90.60	Base metal buckles and buckle clasps, and base metal parts thereof.
8308.90.90	Base metal clasps, frames with clasps not incorporating a lock, and like articles, and base metal parts thereof.
8309.10.00	Base metal crown corks (including crown seals and caps), and base metal parts thereof.
8309.90.00	Base metal stoppers, caps and lids (o/than crown corks), threaded bungs, bung covers, seals, other packing accessories and parts.
8310.00.00	Base metal sign plates, name plates, address plates, numbers, letters and other symbols (o/than of 9405), and base metal parts thereof.
8311.10.00	Coated base metal electrodes for electric arc-welding.
8311.20.00	Base metal cored wire for electric arc-welding.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8311.30.30	Coated rod or cored wire lead-tin solders.
8311.30.60	Coated rods and cored wire of base metal (o/than lead-tin solders), for soldering, brazing or welding by flame.
8311.90.00	Wire & rods of agglom. base metal powder for metal spray; metal carbide wire, rods, tubes, electrodes, coated/cored w/flux, for welding etc.
8404.10.00	Auxiliary plant for use with boilers of heading 8402 or 8403.
8406.81.10	Steam turbines other than for marine propulsion, of an output exceeding 40 MW.
8406.90.20	Parts of steam turbines, rotors, finished for final assembly.
8406.90.30	Parts of steam turbines, rotors, not further worked than cleaned or machined for removal of fins, etc., or certain other working.
8406.90.40	Parts of steam turbines, blades, rotating or stationary.
8406.90.45	Parts of steam turbines, other.
8406.90.50	Parts of vapor turbines other than steam turbines, rotors, finished for final assembly.
8406.90.60	Parts of vapor turbines other than steam turbines, rotors, not further worked than cleaned or machined for removal of fins, etc., or other.
8406.90.70	Parts of vapor turbines other than steam turbines, blades, rotating or stationary.
8406.90.75	Parts of vapor turbines other than steam turbines, other.
8407.31.00	Spark-ignition reciprocating piston engines used for propulsion of vehicles of chapter 87, of a cylinder capacity not exceeding 50cc.
8407.32.10	Spark-ignition reciprocating piston engines used in tractors suitable for agricultural use, of a cylinder capacity over 50cc but n/o 250cc.
8407.32.20	Spark-ignition reciprocating piston engines used in vehicles of heading 8701.20, 8702–8704, cylinder capacity over 50cc but n/o 250cc.
8407.32.90	Spark-ignition reciprocating piston engines used for vehicles, of chap. 87 nesoi, of a cylinder capacity over 50 but not over 250cc.
8407.33.10	Spark-ignition reciprocating piston engines used in tractors for agricultural use, of a cylinder capacity over 250cc but not over 1000cc.
8407.33.30	Spark-ignition reciprocating piston engines, for certain spec. veh. of 8701.20, 8702, 8703 or 8704, cylinder cap. >250 cc > or = 1, 000 cc.
8407.33.60	Spark-ignition reciprocating piston engines, for other veh. of 8701.20, 8702, 8703 or 8704, cylinder cap. >250 cc > or = 1, 000 cc, nesoi.
8407.33.90	Spark-ignition reciprocating piston engines for vehicles of chap. 87 nesoi, of a cylinder capacity over 250cc but not over 1000cc.
8407.34.14	Spark-ignition reciprocating piston engines for vehicles of 8701.20 or 8702–8704, cylinder cap. over 1000 cc to 2000 cc, used or rebuilt.
8407.34.18	Spark-ignition reciprocating piston engines for vehicles of 8701.20 or 8702–8704, cylinder cap. over 1000 cc to 2000 cc, new.
8407.34.25	Spark-ignition reciprocating piston engines for other vehicles of chap. 87, of a cylinder capacity over 1000 cc to 2000 cc.
8407.34.44	Spark-ignition reciprocating piston engines for vehicles of 8701.20 or 8702–8704, cylinder capacity over 2000 cc, used or rebuilt.
8407.34.48	Spark-ignition reciprocating piston engines for vehicles of 8701.20 or 8702–8704, cylinder capacity over 2000 cc, new.
8407.34.55	Spark-ignition reciprocating piston engines for other vehicles of chap. 87 nesoi, of a cylinder capacity exceeding 2000 cc.
8408.20.20	Compression-ignition internal-combustion piston engines to be installed in vehicles of heading 8701.20, 8702, 8703, or 8704.
8408.20.90	Compression-ignition internal-combustion piston engines used for propulsion of vehicles of chapter 87, nesoi.
8409.91.10	Cast-iron parts used solely or principally with spark-ignition internal-combustion piston engines of heading 8407.
8409.91.30	Aluminum cylinder heads for spark-ignition internal combustion piston engines for vehicles of 8701.20 or 8702–8704.
8409.91.50	Parts nesoi, used solely or principally with spark-ignition internal-combustion piston engines for vehicles of head 8701.20, 8702–8704.
8409.91.92	Parts nesoi, used solely or principally with spark-ignition internal-combustion piston engines for marine propulsion.
8409.91.99	Parts nesoi, used solely or principally with spark-ignition internal-combustion piston engines of heading 8407, nesoi.
8409.99.10	Cast iron parts not advanced beyond cleaning & machined only for removal of fins, gates, etc. or to permit location in machinery.
8409.99.91	Parts nesoi, used solely or principally with the engines of heading 8408, for vehicles of heading 8701.20, 8702, 8703, 8704.
8409.99.92	Parts nesoi, used solely or principally with compression-ignition internal-combustion piston engines for marine propulsion.
8409.99.99	Parts nesoi, used solely or principally with compression-ignition internal-combustion piston engines of heading 8407 or 8408, nesoi.
8412.90.90	Parts for engines of heading 8412 other than hydrojet engines for marine propulsion.
8413.11.00	Pumps fitted or designed to be fitted with a measuring device, used for dispensing fuel or lubricants, of the type used in filling-stations.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8413.20.00	Hand pumps other than those of subheading 8413.11 or 8413.19, not fitted with a measuring device.
8413.30.10	Fuel-injection pumps for compression-ignition engines, not fitted with a measuring device.
8413.30.90	Fuel, lubricating or cooling medium pumps for internal-combustion piston engines, not fitted with a measuring device, nesoi.
8413.92.00	Parts of liquid elevators.
8414.10.00	Vacuum pumps.
8414.20.00	Hand-operated or foot-operated air pumps.
8414.40.00	Air compressors mounted on a wheeled chassis for towing.
8414.59.10	Blowers for pipe organs.
8414.59.15	Fans used for cooling microprocessors, telecommunications equipment, or computers.
8414.59.65	Other fans, nesoi.
8414.60.00	Ventilating or recycling hoods incorporating a fan, having a maximum horizontal side not exceeding 120 cm.
8414.80.16	Air compressors, nesoi.
8414.80.90	Air or gas pumps, compressors and fans, nesoi.
8414.90.10	Parts of fans (including blowers) and ventilating or recycling hoods.
8415.10.30	Window or wall type air conditioning machines, self-contained.
8415.10.60	Window or wall type air conditioning machines, "split-system", incorporating a refrigerating unit & valve for reversal of cooling/heat cycle.
8415.10.90	Window or wall type air conditioning machines, "split-system", nesoi.
8415.20.00	Air conditioning machines of a kind used for persons, in motor vehicles.
8415.81.01	Air conditioning machines incorporating a refrigerating unit and valve for reversal of cooling/heat cycle, nesoi.
8415.82.01	Air conditioning machines incorporating a refrigerating unit, nesoi.
8415.83.00	Air conditioning machines not incorporating a refrigerating unit.
8416.30.00	Mechanical stokers, including their mechanical grates, mechanical ash dischargers and similar appliances.
8418.10.00	Combined refrigerator-freezers, fitted with separate external doors, electric or other.
8418.21.00	Refrigerators, household compression-type, electric or other, other than those of subheading 8418.10.
8418.29.10	Refrigerators, household absorption-type, electrical, other than those of subheading 8418.10.
8418.29.20	Refrigerators, household type, electric or other, other than those of subheading 8418.10, nesoi.
8418.30.00	Freezers of the chest type, not exceeding 800 liters capacity, electric or other.
8418.40.00	Freezers of the upright type, not exceeding 900 liters capacity, electric or other.
8418.50.00	Refrigerating or freezing display counters, cabinets, showcases and similar refrigerating or freezing furniture.
8418.61.01	Heat pumps, other than the air-conditioning machines of heading 8415.
8418.91.00	Furniture designed to receive refrigerating or freezing equipment.
8418.99.40	Certain door assemblies for refrigerators, freezers and other refrigerating or freezing equipment.
8418.99.80	Parts for refrigerators, freezers and other refrigerating or freezing equipment, electric or other, nesoi; parts for heat pumps, nesoi.
8421.11.00	Cream separators.
8421.23.00	Oil or fuel filters for internal combustion engines.
8421.31.00	Intake air filters for internal combustion engines.
8422.90.04	Door assemblies for the dishwashing machines of subheading 8422.11.
8423.81.00	Weighing machinery having a maximum weighing capacity not exceeding 30 kg.
8424.20.10	Simple piston pump sprays and powder bellows.
8424.20.90	Spray guns and similar appliances other than simple piston pump sprays and powder bellows.
8424.30.10	Sand blasting machines.
8424.30.90	Steam blasting machines and similar jet projecting machines, other than sand blasting machines; nesoi.
8424.41.10	Portable sprayers excl self-contained sprayers having a capacity >=20 liters.
8424.41.90	Portable sprayers self-contained having a capacity >=20 liters.
8424.49.00	Sprayers, not portable, nesoi.
8424.90.90	Parts of mechanical appliances for projecting, dispersing or spraying liquids or powders, fire extinguishers and similar machines, nesoi.
8425.19.00	Pulley tackle and hoists other than skip hoists or hoists used for raising vehicles, not powered by electric motor.
8425.31.01	Winches nesoi, and capstans, powered by electric motor.
8425.41.00	Built-in jacking systems of a type used in garages.
8425.42.00	Hydraulic jacks and hoists, nesoi.
8425.49.00	Jacks and hoists of a kind used for raising vehicles, other than hydraulic, nesoi.
8426.19.00	Transporter cranes, gantry cranes and bridge cranes.
8426.30.00	Portal or pedestal jib cranes.
8426.91.00	Derricks, cranes and other lifting machinery nesoi, designed for mounting on road vehicles.
8427.90.00	Trucks, fitted with lifting or handling equipment, nesoi.
8428.40.00	Escalators and moving walkways.
8430.49.40	Offshore oil and natural gas drilling and production platforms.
8430.50.10	Self-propelled peat excavators.
8432.41.00	Manure spreaders.
8433.90.10	Parts of mowers for lawns, parks or sports grounds.
8441.10.00	Cutting machines of all kinds used for making up paper pulp, paper or paperboard.
8442.50.10	Printing plates.
8443.15.00	Letterpress printing machinery, excluding flexographic printing, other than reel-fed.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
8443.16.00	Flexographic printing machinery.
8443.39.20	Electrostatic photocopying apparatus, operating by reproducing the original image via an intermediate onto the copy (indirect process).
8443.39.30	Photocopying apparatus, other than electrostatic, incorporating an optical system.
8443.39.40	Photocopying apparatus, other than electrostatic, of the contact type.
8443.39.50	Thermocopying apparatus.
8443.99.10	Accessory & auxiliary machines intended for attachment to an electrostatic photocopier & which do not operate independent of such copier.
8443.99.30	Parts of facsimile machines specified in additional U.S. note 3 to this chapter.
8443.99.35	Parts and accessories of facsimile machines, nesoi.
8446.30.50	Shuttleless type weaving machines (looms), for weaving fabrics of a width exceeding 30 cm, nesoi.
8448.51.20	Spring-beard needles for knitting machines.
8451.10.00	Dry-cleaning machines.
8451.21.00	Drying machines, each of a dry linen capacity not exceeding 10 kg.
8451.29.00	Drying machines for yarns, fabrics or made up textile articles, each of a dry linen capacity exceeding 10 kg.
8451.30.00	Ironing machines and presses (including fusing presses) for textile fabrics or made up textile articles.
8451.40.00	Washing, bleaching or dyeing machines for textile yarns, fabrics or made up textile articles.
8451.50.00	Machines for reeling, unreeling, folding, cutting or pinking textile fabrics.
8451.80.00	Machinery for the handling of textile yarns, fabrics or made up textile articles, nesoi.
8451.90.30	Drying chambers for the drying machines of subheading 8451.21 or 8451.29, and other parts of drying machines incorporating drying chambers.
8451.90.60	Furniture designed to receive the drying machines of subheading 8451.21 or 8451.29.
8451.90.90	Parts of machines for the handling of textile yarns, fabrics or made up textile articles, nesoi.
8452.29.90	Sewing machines, other than automatic, nesoi.
8454.20.00	Ingot molds and ladles, of a kind used in metallurgy or in metal foundries.
8459.29.00	Drilling machines, other than numerically controlled, nesoi.
8459.59.00	Milling machines, knee type, other than numerically controlled, nesoi.
8460.39.00	Sharpening (tool or cutter grinding) machines for working metal or cermets, other than numerically controlled.
8461.50.80	Sawing or cutting-off machines for working by removing metal or cermets, other than numerically controlled.
8465.20.10	Machine centers for sawing, planing, milling, molding, grinding, sanding, polishing, drilling or mortising.
8465.20.50	Machine centers for bending or assembling.
8465.20.80	Machine centers, nesoi.
8465.91.00	Sawing machines for working wood, cork, bone, hard rubber, hard plastics or similar hard materials.
8466.91.10	Cast iron parts not advanced beyond cleaning and specifically machined, for machines of heading 8464.
8466.93.15	Certain specified cast-iron parts not advanced beyond cleaning and specifically machined, for metalworking machine tools for cutting, etc.
8467.19.50	Tools for working in the hand, pneumatic, other than rotary type, other than suitable for metal working.
8467.99.01	Parts of tools for working in the hand, hydraulic or with self-contained nonelectric or electric motor, other than chain saws.
8468.20.10	Gas-operated machinery, apparatus and appliances, hand-directed or -controlled, used for soldering, brazing, welding or tempering, nesoi.
8468.80.10	Machinery and apparatus, hand-directed or -controlled, used for soldering, brazing or welding, not gas-operated.
8468.90.10	Parts of hand-directed or -controlled machinery, apparatus and appliances used for soldering, brazing, welding or tempering.
8468.90.50	Parts for machinery, apparatus or appliances, not hand-directed or -controlled, used for soldering, brazing, welding or tempering.
8470.10.00	Electronic calculator operate w/o external electric power & pocket-size data recording/reproducing/displaying machine w/calculating function.
8470.21.00	Electronic calculating machines, incorporating a printing device, nesoi.
8470.29.00	Electronic calculating machines, not incorporating a printing device, nesoi.
8470.30.00	Calculating machines nesoi, other than electronic.
8470.90.01	Postage-franking, ticket-issuing and similar machines nesoi, incorporating a calculating device; accounting machines.
8471.50.01	Processing units other than those of subheading 8471.41 and 8471.49, nesoi.
8471.60.10	Combined input/output units for automatic data processing machines not entered with the rest of a system.
8471.60.70	Input or output units suitable for physical incorporation into ADP machine or unit thereof, nesoi, not entered with the rest of a system.
8471.60.90	Other input or output units of digital ADP machines, nesoi, not entered with the rest of a system.
8471.70.10	ADP magnetic disk drive storage units, disk dia. ov 21 cm, w/o read-write unit; read-write units; all not entered with the rest of a system.
8471.70.20	ADP magnetic disk drive storage units, disk dia. ov 21 cm: for incorp. into ADP machines or units, not entered with the rest of a system.
8471.70.50	ADP magnetic disk drive storage units, disk dia. n/ov 21 cm, nesoi, not entered with the rest of a system.
8471.80.10	Control or adapter units for automatic data processing machines not entered with rest of a system.
8471.80.40	Unit suitable for physical incorporation into automatic data processing machine or unit thereof, not entered with the rest of a system, nesoi.
8471.80.90	Other units of automatic data processing machines, not entered with the rest of a system, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8471.90.00	Magnetic or optical readers, nesoi; machines for transcribing data on data media in coded form and machines for processing such data, nesoi.
8472.10.00	Hectographic or stencil duplicating machines.
8472.30.00	Machines for sorting, folding, opening, closing or sealing mail, and postage stamp affixing or canceling machines.
8472.90.05	Addressing machines and address plate embossing machines.
8472.90.10	Automatic teller machines.
8472.90.60	Numbering, dating and check-writing machines.
8472.90.90	Other office machines, nesoi.
8473.21.00	Parts and accessories of the electronic calculating machines of subheading 8470.10, 8470.21 or 8470.29.
8473.29.00	Parts and accessories of machines of heading 8470, nesoi.
8473.30.11	Printed circuit assemblies, not incorporating a cathode ray tube, of the machines of 8471.
8473.30.51	Parts and accessories of the ADP machines of heading 8471, not incorporating a CRT, nesoi.
8473.30.91	Parts and accessories of the ADP machines of heading 8471, incorporating a CRT, nesoi.
8473.40.21	Printed circuit assemblies of word processing machines of 8472.90.50.
8473.40.41	Other parts and accessories of the machines of 8472.90.50.
8476.21.00	Automatic beverage-vending machines incorporating heating or refrigerating devices.
8476.29.00	Automatic beverage-vending machines other than machines that incorporate heating or refrigerating devices.
8476.81.00	Automatic goods-vending machines (other than beverage-vending) incorporating heating or refrigerating devices.
8476.90.00	Parts for automatic goods-vending and money-changing machines.
8477.59.01	Machinery for molding or otherwise forming rubber or plastics other than for molding or retreading pneumatic tires, nesoi.
8479.60.00	Evaporative air coolers.
8479.71.00	Passenger boarding bridges of a kind used in airports.
8479.89.10	Air humidifiers or dehumidifiers with self-contained electric motor, other than for domestic purposes.
8479.89.20	Floor polishers with self-contained electric motor, other than for domestic purposes.
8479.89.70	Carpet sweepers, not electromechanical having self-contained electric motor.
8479.89.94	Other machines and mechanical appliances having individual functions, not specified or included elsewhere in chapter 84, nesoi.
8480.10.00	Molding boxes for metal foundry.
8480.79.10	Molds for rubber or plastics, other than injection or compression types, for shoe machinery.
8480.79.90	Molds for rubber or plastics, other than injection or compression types, other than for shoe machinery.
8481.30.10	Check valves of copper for pipes, boiler shells, tanks, vats or the like.
8481.80.10	Taps, cocks, valves & similar appliances for pipes, boiler shells, tanks, vats or the like, hand operated, of copper, nesoi.
8481.80.30	Taps, cocks, valves & similar appliances for pipes, boiler shells, tanks, vats or the like, hand operated, of iron or steel, nesoi.
8481.80.50	Taps, cocks, valves & similar appliances for pipes, boiler shells, tanks, vats or the like, hand operated, not copper, iron or steel, nesoi.
8481.80.90	Taps, cocks, valves & similar appliances for pipes, boiler shells, tanks, vats or the like, other than hand operated, nesoi.
8481.90.10	Parts of hand operated and check appliances for pipes, boiler shells, tanks, vats or the like, of copper.
8481.90.30	Parts of hand operated and check appliances for pipes, boiler shells, tanks, vats or the like, of iron or steel.
8481.90.50	Parts of hand operated and check appliances for pipes, boiler shells, tanks, vats or the like, other than of copper or iron or steel.
8482.10.10	Ball bearings with integral shafts.
8483.10.10	Camshafts and crankshafts for use solely or principally with spark-ignition internal-combustion piston or rotary engines.
8483.10.30	Camshafts and crankshafts nesoi.
8483.10.50	Transmission shafts and cranks other than camshafts and crankshafts.
8483.20.40	Housed bearings of the flange, take-up, cartridge and hanger unit type (incorporating ball or roller bearings).
8483.20.80	Housed bearings (incorporating ball or roller bearings), nesoi.
8483.40.50	Fixed, multiple and variable ratio speed changers, not imported for use with machines for making cellulosic pulp, paper or paperboard.
8483.40.70	Speed changers other than fixed, multiple and variable ratio speed changers.
8483.50.40	Gray-iron awning or tackle pulleys, not over 6.4 cm in wheel diameter.
8483.60.80	Shaft couplings (other than universal joints).
8483.90.50	Parts of gearing, gear boxes and other speed changers.
8501.40.20	AC motors nesoi, single-phase, exceeding 37.5 W but not exceeding 74.6 W.
8501.40.40	AC motors, nesoi, single-phase, exceeding 74.6 W but not exceeding 735 W.
8501.40.50	AC motors, nesoi, single-phase, exceeding 735 W but under 746 W.
8501.40.60	AC motors nesoi, single-phase, of 746 W or more.
8501.61.00	AC generators (alternators) of an output not exceeding 75 kVA.
8502.20.00	Electric generating sets with spark-ignition internal-combustion piston engines.
8504.10.00	Ballasts for discharge lamps or tubes.
8504.31.20	Unrated electrical transformers other than liquid dielectric, having a power handling capacity not exceeding 1 kVA.
8504.31.40	Electrical transformers other than liquid dielectric, having a power handling capacity less than 1 kVA.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8504.31.60	Electrical transformers other than liquid dielectric, having a power handling capacity of l kVA.
8504.40.60	Power supplies suitable for physical incorporation into automatic data processing machines or units thereof of heading 8471.
8504.40.70	Power supplies for automatic data processing machines or units thereof of heading 8471, nesoi.
8504.40.85	Static converters (for example, rectifiers) for telecommunication apparatus.
8504.40.95	Static converters (for example, rectifiers), nesoi.
8504.50.40	Other inductors for power supplies for ADP machines and units of heading 8471 or for telecommunication apparatus.
8504.50.80	Other inductors, nesoi.
8504.90.20	Printed circuit assemblies of power supplies for automatic data processing machines or units thereof of heading 8471.
8505.11.00	Permanent magnets and articles intended to become permanent magnets after magnetization, of metal.
8505.19.20	Composite goods containing flexible permanent magnets, other than of metal.
8505.19.30	Permanent magnets and articles intended to become permanent magnets after magnetization, other than of metal, nesoi.
8506.10.00	Manganese dioxide primary cells and primary batteries.
8506.30.10	Mercuric oxide primary cells and primary batteries having an external volume not exceeding 300 cubic cm.
8506.30.50	Mercuric oxide primary cells and primary batteries having an external volume exceeding 300 cubic cm.
8506.80.00	Primary cells and primary batteries, nesoi.
8507.10.00	Lead-acid storage batteries of a kind used for starting piston engines.
8507.20.40	Lead-acid storage batteries of a kind used as the primary source of electrical power for electrically powered vehicles of 8703.90.
8507.20.80	Lead-acid storage batteries other than of a kind used for starting piston engines or as the primary source of power for electric vehicles.
8507.30.40	Nickel-cadmium storage batteries, of a kind used as the primary source of electrical power for electrically powered vehicles of 8703.90.
8507.40.40	Nickel-iron storage batteries, of a kind used as the primary source of electrical power for electrically powered vehicles of 8703.90.
8507.40.80	Nickel-iron storage batteries, other than of a kind used as the primary source of power for electric vehicles.
8507.50.00	Nickel-metal hydride batteries.
8508.11.00	Vacuum cleaners with self-contained electric motor, of a power not exceeding 1,500 W and having a dust bag or other receptacle capacity not.
8508.19.00	Vacuum cleaners with self-contained electric motor, other than of a power not exceeding 1,500 W and having a dust bag or other receptacle ca.
8508.60.00	Vacuum cleaners with other than a self-contained electric motor.
8508.70.00	Parts of vacuum cleaners.
8509.80.20	Electromechanical kitchen waste disposers (disposals), with self-contained electric motor, for domestic uses.
8509.90.25	Parts of electromechanical domestic floor polishers, housings.
8509.90.35	Parts of electromechanical domestic floor polishers, other than housings.
8509.90.45	Parts of electromechanical domestic appliances nesoi, housings.
8509.90.55	Parts of electromechanical domestic appliances nesoi, other than housings.
8510.20.10	Hair clippers to be used for agricultural or horticultual purposes, with self-contained electric motor.
8510.20.90	Hair clippers other than to be used for agricultural or horticultural purposes, with self-contained electric motor.
8510.90.10	Blades and cutting heads of shavers with self-contained electric motor.
8510.90.20	Parts of shavers with self-contained electric motor, other than blades and cutting heads.
8510.90.30	Parts of hair clippers with self-contained electric motor.
8510.90.40	Parts of hair clippers, nesoi, with self-contained electric motor.
8510.90.55	Parts of hair-removing appliances of subheading 8510.30.
8511.10.00	Spark plugs.
8511.20.00	Ignition magnetos, magneto-dynamos and magnetic flywheels.
8511.30.00	Distributors and ignition coils.
8511.40.00	Starter motors and dual purpose starter-generators.
8511.50.00	Generators nesoi, of a kind used in conjunction with spark-ignition or compression-ignition internal-combustion engines.
8511.80.60	Electrical ignition or starting equipment of a kind used for spark-ignition internal-combustion or compression-ignition engines, nesoi.
8511.90.60	Parts nesoi of electrical ignition or starting equipment or generators used for spark- or compression-ignition internal-combustion engines.
8512.10.20	Electrical lighting equipment of a kind used on bicycles.
8512.10.40	Electrical visual signaling equipment of a kind used on bicycles.
8512.20.20	Electrical lighting equipment of a kind used for motor vehicles or cycles other than bicycles.
8512.20.40	Electrical visual signaling equipment of a kind used for motor vehicles or cycles other than bicycles.
8512.30.00	Electrical sound signaling equipment of a kind used for cycles or motor vehicles.
8512.40.20	Defrosters and demisters of a kind used for cycles or motor vehicles.
8512.40.40	Windshield wipers of a kind used for cycles or motor vehicles.
8512.90.20	Parts of electrical signaling equipment of a kind used for cycles or motor vehicles.
8512.90.40	Parts of electrical lighting equipment of a kind used on bicycles.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
8512.90.60	Parts of electrical lighting equipment of a kind used for motor vehicles or cycles other than bicycles.
8512.90.70	Parts of defrosters and demisters of a kind used for cycles or motor vehicles.
8512.90.90	Parts of windshield wipers of a kind used for motor vehicles or cycles.
8513.90.20	Parts of flashlights.
8513.90.40	Parts of portable electric lamps designed to function by their own source of energy, other than flashlights.
8514.20.40	Industrial or laboratory microwave ovens for making hot drinks or for cooking or heating food.
8514.90.40	Parts of industrial or laboratory microwaves.
8516.21.00	Electric storage heating radiators.
8516.29.00	Electric space heating apparatus and electric soil heating apparatus, other than storage heating radiators.
8516.60.40	Electrothermic cooking stoves, ranges and ovens (excluding microwave ovens) of a kind used for domestic purposes.
8516.80.40	Electric heating resistors assembled only with simple insulated former and electrical connectors, used for anti-icing or de-icing.
8516.80.80	Electric heating resistors, nesoi.
8516.90.05	Parts of electric heaters or heating apparatus of subheading 8516.10, 8516.21 or 8516.29.
8516.90.15	Housings for hand-drying apparatus of subheading 8516.33.
8516.90.25	Housings and steel bases for electric flat irons of subheading 8516.40.
8516.90.35	Parts of domestic microwave ovens, assemblies, having more than one of: cooking chamber; structural supporting chassis; door; outer case.
8516.90.45	Parts of domestic microwave ovens, printed circuit assemblies.
8516.90.50	Parts of domestic microwave ovens, other nesoi.
8516.90.55	Parts of domestic electrothermic cooking stoves, ranges and ovens of subheading 8516.60.40, cooking chambers whether or not assembled.
8516.90.65	Parts of domestic electrothermic cooking stoves, ranges and ovens of subheading 8516.60.40, top surface panels w/orw/o elements or controls.
8516.90.75	Parts of domestic electrothermic cooking stoves, ranges and ovens of subheading 8516.60.40, door assemblies.
8516.90.80	Parts of domestic electrothermic cooking stoves, ranges and ovens of subheading 8516.60.40, other nesoi.
8516.90.85	Housings for domestic electrothermic toasters.
8516.90.90	Parts of electric instantaneous or storage water heaters and immersion heaters and other domestic electrothermic appliance, nesoi.
8517.62.00	Machines for the reception, conversion and transmission or regeneration of voice, images or other data, including switching and routing appa.
8517.69.00	Other apparatus for transmission or reception of voice, images or other data, including apparatus for communication in a wired or wireless n.
8518.10.40	Microphones having a frequency range of 300Hz–3.4kHz with diameter not over 10 mm and height not over 3 mm, for telecommunication.
8518.40.10	Audio-frequency electric amplifiers for use as repeaters in line telephony.
8518.40.20	Audio-frequency electric amplifiers, other than for use as repeaters in line telephony.
8518.50.00	Electric sound amplifier sets.
8518.90.20	Printed circuit assemblies of line telephone handsets; parts of repeaters.
8518.90.41	Other parts of telephone handsets other than printed circuit assemblies.
8518.90.60	Printed circuit assemblies of the microphones of subheading 8518.10.40 or the loudspeakers of subheading 8518.29.40.
8518.90.81	Other parts of microphones & stands, loudspeakers, headphones & earphones nesoi, electric amplifiers, & electric sound amplifier sets, nesoi.
8519.81.30	Sound reproducing apparatus nesoi, not incorporating a sound recording device.
8522.10.00	Pick-up cartridges for use with apparatus of heading 8519 to 8521.
8522.90.25	Assemblies & subassemblies of articles of 8520.90, consisting of 2 or more pieces fastened together, printed circuit assemblies.
8522.90.36	Other assemblies & subassemblies of articles of 8520.90, consisting of 2 or more pieces fastened together, other than printed circuit assemblies.
8522.90.45	Other parts of telephone answering machines, printed circuit assemblies.
8522.90.58	Other parts of telephone answering machines, other than printed circuit assemblies.
8522.90.65	Parts and accessories of apparatus of headings 8519 to 8521, nesoi, printed circuit assemblies.
8522.90.80	Parts and accessories of apparatus of headings 8519 to 8521, nesoi, other than printed circuit assemblies.
8523.21.00	Cards incorporating a magnetic stripe.
8523.49.40	Recorded optical media,for reproducing representations of instructions, data, sound, & image, recorded machine readable binary form, for ADP.
8523.52.00	Semiconductor media, ''smart cards''.
8523.59.00	Semiconductor media, nesoi.
8525.50.30	Transmission apparatus for television, nesoi.
8525.80.30	Television cameras, nesoi.
8525.80.50	Television cameras, digital cameras and video camera recorders, nesoi.
8527.21.15	Radio-tape player combinations capable of receiving & decoding digital radio signals.
8527.21.25	Other radio-tape player combinations.
8527.21.40	Radiobroadcast receivers not operable w/o external power source, for motor veh., combined with sound recording/reproducing apparatus, nesoi.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8527.29.40	Radiobroadcast receivers, not operating w/o external power, for motor vehicles, w/o sound recording or reproducing apparatus, FM or AM/FM.
8527.29.80	Radiobroadcast receivers, not operating w/o external power, for motor vehicles, w/o sound recording or reproducing apparatus, other.
8528.42.00	Cathode-ray tube monitors capable of directly connecting to and designed for use with an automatic data processing machine of heading 8471.
8528.49.15	Non-high definition color video monitors, nonprojection type, w/CRT, video display diagonal not over 34.29 cm, incorporating VCR or player.
8528.49.20	Non-high definition color video monitors, nonprojection, w/CRT, video display diag. ov 34.29 cm but n/ov 35.56 cm, incorp. VCR or player.
8528.49.35	Non-high definition color video monitors, nonprojection type, w/CRT, video display diagonal over 35.56 cm, incorporating VCR or player.
8528.49.45	Non-high definition color video monitors, projection type, with cathode-ray tube, incorporating VCR or player.
8528.49.60	High definition color video monitors, nonprojection type, with cathode-ray tube, incorporating VCR or player.
8528.49.80	Black and white or other monochrome video monitors, with cathode-ray tube.
8528.59.05	Incomplete or unfinished color video monitors, w/o cathode-ray tube, flat panel screen or similar display device, incorp. VCR or player.
8528.59.10	Incomplete or unfinished color video monitors, w/o cathode-ray tube, flat panel screen or similar display device, not incorp. VCR or player.
8528.69.05	Incomplete or unfinished color video projectors, w/o cathode-ray tube, flat panel screen or similar display device, incorp. VCR or player.
8528.69.10	Incomplete or unfinished color video projectors, w/o cathode-ray tube, flat panel screen or similar display, not incorp. VCR or player.
8528.69.20	Non-high definition color video projectors, with a cathode-ray tube, not incorporating VCR or player.
8528.69.30	High definition color video projectors, with a cathode-ray tube, not incorporating VCR or player.
8528.72.04	Incomplete or unfinished color tv reception apparatus, presented w/o a display device, incorp. VCR or player.
8528.72.12	Non-high definition color television reception apparatus, nonprojection, w/CRT, video display diag. not ov 34.29 cm, incorp. a VCR or player.
8528.72.20	Non-high def. color television reception app., nonprojection, w/CRT, video display diag. not ov 34.29 cm, not incorporating VCR or player.
8528.72.24	Non-high def. color television reception app., nonprojection, w/CRT, display diag. ov 34.29 cm but n/ov 35.56 cm, n/incorp. VCR or player.
8528.72.28	Non-high definition color television reception app., nonprojection, w/CRT, video display diag. ov 35.56 cm, incorporating a VCR or player.
8528.72.36	Non-high definition color television reception apparatus, projection type, with a cathode-ray tube, incorporating a VCR or player.
8528.72.40	Non-high definition color television reception apparatus, projection type, with a cathode-ray tube, not incorporating a VCR or player.
8528.72.44	High definition color television reception apparatus, nonprojection, with cathode-ray tube, incorporating a VCR or player.
8528.73.00	Black and white or other monochrome television reception apparatus.
8529.10.21	Television antennas and antenna reflectors, and parts suitable for use therewith.
8529.90.04	Tuners (printed circuit assemblies).
8529.90.13	Printed circuit assemblies for television apparatus, nesoi.
8529.90.36	Subassies w/2 or more PCBs or ceramic substrates, as spec'd in add. U.S. note 9 ch. 85, for color TV, not w/ components in add. U.S. note 4, ch. 85.
8529.90.39	Parts of television receivers specified in U.S. note 9 to chapter 85, other than printed circuit assemblies, nesoi.
8529.90.43	PCBs and ceramic substrates and subassemblies thereof for color TV, w/components listed in add. U.S. note 4, chap. 85.
8529.90.49	Combinations of parts of television receivers specified in U.S. note 10 to chapter 85, other than printed circuit assemblies, nesoi.
8529.90.54	Flat panel screen assemblies for TV reception apparatus, color video monitors and video projectors.
8529.90.75	Parts of printed circuit assemblies (including face plates and lock latches) for other apparatus of headings 8525 to 8528, nesoi.
8529.90.86	Parts suitable for use solely or principally with the apparatus of 8525 and 8527 (except television apparatus or cellular phones), nesoi.
8529.90.88	Subassies w/2 or more PCBs or ceramic substrates, exc. tuners or converg. ass'ies, for color TV, w/components in add. U.S. note 4, ch. 85.
8531.10.00	Electric burglar or fire alarms and similar apparatus.
8531.20.00	Indicator panels incorporating liquid crystal devices (LCD's) or light emitting diodes (LED's).
8531.90.15	Printed circuit assemblies of the panels of subheading 8531.20.
8531.90.30	Printed circuit assemblies of electric sound or visual signaling apparatus, nesoi.
8531.90.75	Parts of the panels of subheading 8531.20, other than printed circuit assemblies.
8531.90.90	Parts of electric sound or visual signaling apparatus, nesoi.
8533.39.00	Electrical wirewound variable resistors, including rheostats and potentiometers, for a power handling capacity exceeding 20 W.
8534.00.00	Printed circuits, without elements (other than connecting elements) fitted thereon.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8535.40.00	Lightning arrestors, voltage limiters and surge suppressors, for a voltage exceeding 1,000 V.
8536.61.00	Lampholders for a voltage not exceeding 1,000 V.
8536.69.80	Plugs and sockets for making connections to or in electrical circuits, for a voltage not exceeding 1,000 V, nesoi.
8537.10.91	Other boards, panels, consoles, desks, cabinets, etc., equipped with apparatus for electric control, for a voltage not exceeding 1,000, nesoi.
8538.90.10	Printed circuit assemblies of an article of heading 8537 for one of the articles described in additional U.S. note 12 to chapter 85.
8538.90.30	Printed circuit assemblies, suitable for use solely or principally with the apparatus of heading 8535, 8536 or 8537, nesoi.
8539.10.00	Sealed beam lamp units.
8539.21.20	Tungsten halogen electrical filament lamps, designed for a voltage not exceeding 100 V.
8539.21.40	Tungsten halogen electrical filament lamps, designed for a voltage exceeding 100 V.
8539.31.00	Fluorescent, hot cathode discharge lamps, other than untraviolet lamps.
8539.32.00	Mercury or sodium vapor discharge lamps or metal halide discharge lamps (other than ultraviolet lamps).
8539.39.10	CCFLS for backlighting of flat planel displays.
8539.39.90	Other electrical discharge lamps, other than fluorescent (hot cathode), mercury or sodium vapor, metal halide or ultraviolet lamps.
8539.49.00	Ultraviolet or infrared lamps.
8540.11.10	Cathode-ray television picture tubes incl. video monitor, color, non-high definition, non-projection, display >35.56 cm.
8540.11.24	Cathode-ray TV & video monitor tubes, color, non-high definition, non-projection, video display diagonal < or = 34.29 cm.
8540.11.28	Cathode-ray TV & video monitor tubes, color, non-high definition, non-projection, video display diagonal >34.29 cm & < or = 35.56 cm.
8540.11.30	Cathode-ray television picture tubes incl. video monitor, color, high definition, display diagonal >35.56 cm.
8540.11.44	Cathode-ray TV & video monitor tubes, color, high definition, having video display display diagonal < or = 34.29 cm.
8540.11.48	Cathode-ray TV & video monitor tubes, color, high definition, video display diagonal video display diagonal >34.29 cm & < or = 35.56 cm.
8540.11.50	Cathode-ray television picture tubes incl. video monitor, color, non-high definition, projection type.
8540.12.10	Cathode-ray television picture tubes incl. video monitor, monochrome, non-high definition, w/faceplate diagonal >29 cm and < or = 42 cm.
8540.12.20	Cathode-ray television picture tubes incl. video monitor, monochrome, high definition, w/faceplate diagonal >29 cm and < or = 42 cm.
8540.12.50	Cathode-ray television picture tubes incl. video monitor, monochrome, non-high definition, nesoi.
8540.12.70	Cathode-ray television picture tubes incl. video monitor, monochrome, high definition, nesoi.
8540.20.20	Cathode-ray television camera tubes.
8540.20.40	Television camera tubes, image converters and intensifiers, and other photocathode tubes, other than cathode-ray tubes.
8540.40.10	Data/grphic display tubes, monochrome; data/graphic display tubes, color, with a phosphor dot screen pitch smaller than 0.4 mm.
8540.60.00	Cathode-ray tubes nesoi.
8540.71.20	Magnetron tubes, modified for use as parts of microwave ovens.
8540.71.40	Magnetron tubes nesoi.
8540.81.00	Receiver or amplifier tubes.
8540.91.15	Front panel assemblies for cathode-ray tubes.
8540.91.20	Deflection coils for cathode-ray tubes.
8540.91.50	Parts of cathode-ray tubes other than deflection coils or front panel assemblies.
8540.99.40	Electron guns; radio frequency (RF) interaction structures for microwave tubes of subheadings 8540.71 through 8540.79, inclusive.
8540.99.80	Parts of thermionic, cold cathode or photocathode tubes, other than parts of cathode-ray tubes, electron guns, etc., nesoi.
8543.70.71	Electric luminescent lamps.
8543.70.85	Electrical machines and apparatus for electrical nerve stimulation.
8543.70.91	Digital signal processing apparatus capable of connecting to a wired or wireless network for sound mixing.
8543.90.85	Parts, nesoi, of flat panel displays other than for reception apparatus for television of heading 8528.
8543.90.88	Parts (other than printed circuit assemblies) of electrical machines and apparatus, having individual functions, nesoi.
8544.20.00	Insulated (including enameled or anodized) coaxial cable and other coaxial conductors.
8544.42.10	Insulated electric conductors nesoi, for a voltage not exceeding 1,000 V, fitted with modular telephone connectors.
8544.42.20	Insulated electric conductors nesoi, used for telecommuncations, for a voltage not exceeding 1,000 V, fitted with connectors.
8544.42.90	Insulated electric conductors nesoi, for a voltage not exceeding 1,000 V, fitted with connectors, nesoi.
8545.11.00	Carbon electrodes of a kind used for furnaces.
8545.19.20	Carbon electrodes of a kind used for electrolytic purposes.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8545.19.40	Carbon electrodes of a kind used for electrical purposes, other than those used for furnaces or for electrolytic purposes.
8545.20.00	Carbon brushes of a kind used for electrical purposes.
8545.90.20	Arc light carbons of a kind used for electrical purposes.
8545.90.40	Lamp carbons, battery carbons and articles of graphite or other carbon nesoi, of a kind used for electrical purposes.
8546.10.00	Electrical insulators of glass.
8546.20.00	Electrical insulators of ceramics.
8546.90.00	Electrical insulators of any material, other than glass or ceramics.
8547.10.40	Ceramic insulators to be used in the production of spark plugs for natural gas fueled, stationary, internal-combustion engines.
8547.10.80	Insulating fittings for electrical machines, appliances or equipment, of ceramics nesoi.
8547.20.00	Insulating fittings for electrical machines, appliances or equipment, of plastics.
8547.90.00	Electrical conduit tubing and joints therefor, of base metal lined with insulating material; insulating fittings for electrical goods nesoi.
8548.90.01	Electrical parts of machinery or apparatus not specified or included elsewhere in chapter 85.
8602.90.00	Rail locomotives (o/than diesel-electric), non-electric; locomotive tenders.
8706.00.03	Chassis fitted w/engines, for mtr. vehicles for transport of goods of 8704.21 or 8704.31.
8706.00.05	Chassis fitted w/engines, for mtr. vehicles of 8701.20, 8702, & 8704 (except 8704.21 or 8704.31).
8706.00.15	Chassis fitted w/engines, for mtr. vehicles for transport of persons of 8703.
8706.00.50	Chassis fitted w/engines, for tractors (o/than for agric. use) and other motor vehicles nesoi.
8707.10.00	Bodies (including cabs), for mtr. vehicles for transport of persons of heading 8703.
8707.90.10	Bodies (including cabs), for tractors suitable for agricultural use.
8707.90.50	Bodies (including cabs), for mtr. vehicles (o/than tract. for agri. use) of headings 8701–8705 (except 8703).
8708.10.30	Pts. & access. for mtr. vehicles of headings 8701 to 8705, bumpers.
8708.10.60	Pts. & access. of mtr. vehicles of headings 8701 to 8705, parts of bumpers.
8708.21.00	Pts. & access. of bodies for mtr. vehicles of headings 8701 to 8705, safety seat belts.
8708.29.15	Pts. & access. of bodies for mtr. vehicles of headings 8701 to 8705, door assemblies.
8708.29.21	Body stampings for tractors suitable for agriculture.
8708.29.25	Body stampings of motor vehicles, nesoi.
8708.29.50	Pts. & access. of bodies for mtr. vehicles of headings 8701 to 8705, nesoi.
8708.30.10	Pts. & access. of tractors suit. for agric. use, brakes and servo-brakes & pts thereof.
8708.30.50	Pts. & access. of mtr. vehicles of 8701, nesoi, and 8702–8705, brakes and servo-brakes & pts thereof.
8708.40.11	Pts. & access. of mtr. vehic. of 8701.20, 8702, 8703 or 8704, gear boxes.
8708.40.30	Pts. & access. of tractors suitable for agricultural use, gear boxes.
8708.40.50	Pts. & access. of mtr. vehic. of 8701, nesoi, and of 8705, gear boxes.
8708.40.60	Pts. & access. of tractors suitable for agricultural use, pts. for gear boxes.
8708.40.65	Pts. & access. of tractors (o/than road tractors or for agricultural use), pts. for gear boxes.
8708.40.70	Parts of gear boxes of the motor vehicles of 8701–8705, of cast iron.
8708.40.75	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, pts. for gear boxes, nesoi.
8708.50.11	Pts. & access. of tractors suitable for agricultural use, drive axles w/differential (whether or not w/other transm. components).
8708.50.31	Pts. & access. of tractors, other than road tractors or for agricultural use, drive axles w/differential (whether or not w/other transm. components).
8708.50.51	Pts. & access. of motor vehicles of 8703, drive axles w/differential (whether or not w/other transm. components).
8708.50.61	Pts. & access. of mtr. vehic. of 8701, nesoi, 8702, and 8704–8705, drive axles w/different. (wheth or not w/oth transm components).
8708.50.65	Pts. & access. of mtr. vehic. of 8701, nesoi, of 8702, and of 8704–8705, non-driving axles.
8708.50.70	Pts. & access. of tractors suitable for agricultural use, parts of drive axles w/different. (wheth or not w/oth transm components).
8708.50.75	Pts. & access. of tractors, other than road tractors or for agricultural use, parts of drive axles w/different. (wheth or not w/oth transm components).
8708.50.79	Pts. & access. of mtr. vehic. for transp. of persons of 8703, parts of non-driving axles.
8708.50.81	Pts. & access. of motor vehicles of 8703, of cast iron nesoi.
8708.50.85	Pts. & access. of motor vehicles of 8703, half-shafts.
8708.50.89	Pts. & access. of motor vehicles of 8703, parts, nesoi, of drive axles w/different. (wheth or not w/oth transm components).
8708.50.91	Pts. & access. of mtr. vehic. of 8701, nesoi, 8702 and 8704–8705, parts of non-driving axles.
8708.50.93	Pts. & access. of mtr. vehic. of 8701, nesoi, 8702 and 8704–8705, of cast iron nesoi.
8708.50.95	Pts. & access. of mtr. vehic. of 8701, nesoi, 8702 and 8704–8705, half-shafts.
8708.50.99	Pts. & access. of mtr. vehic. of 8701, nesoi, 8702 and 8704–8705, parts, nesoi, of drive axles w/different. (wheth or not w/oth transm components).
8708.70.05	Pts. & access. of tractors suitable for agricultural use, road wheels.
8708.70.15	Pts. & access. of tractors suitable for agricultural use, pts. & access. for road wheels.
8708.70.25	Pts. & access. of tractors (o/than road tractors or for agric. use), road wheels.
8708.70.35	Pts. & access. of tractors (o/than road tractors or for agric. use), pts. & access. for road wheels.
8708.70.45	Pts. & access. of mtr. vehic. of 8701, nesoi, and of 8702–8705, road wheels.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8708.70.60	Pts. & access. of mtr. vehic. of 8701, nesoi, and of 8702–8705, pts. & access. for road wheels.
8708.80.03	Pts. & access. of tractors suitable for agricultural use, McPherson struts.
8708.80.05	Pts. & access. of tractors suitable for agricultural use, suspension shock absorbers (o/than McPherson struts).
8708.80.13	Pts. & access. of mtr. vehic. of 8701, nesoi, and of 8702–8705, McPherson struts.
8708.80.16	Pts. & access. of mtr. vehic. of 8701, nesoi, and of 8702–8705, suspension shock absorbers (o/than McPherson struts).
8708.80.51	Pts. & access. of tractors suitable for agricultural use, pts. for suspension systems nesoi.
8708.80.55	Pts. & access. of tractors (o/than road tractors or for agricultural use), pts. for suspension systems nesoi.
8708.80.60	Parts of suspension systems of the motor vehicles of 8701–8705, of cast iron.
8708.80.65	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, pts. for suspension systems nesoi.
8708.91.10	Pts. & access. of tractors suitable for agricultural use, radiators.
8708.91.50	Pts. & access. of mtr. vehic. of 8701, nesoi, and 8702–8705, radiators.
8708.91.60	Pts. & access., nesoi, of tractors suitable for agricultural use, parts of radiators.
8708.91.65	Pts. & access., nesoi, of tractors (o/than road tractors or suitable for agricultural use), parts of radiators.
8708.91.70	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, parts of radiators, of cast iron nesoi.
8708.91.75	Pts. & access., nesoi, of motor vehicles of 8701, nesoi, and 8702–8705, parts of radiators, nesoi.
8708.92.10	Pts. & access. of tractors suitable for agricultural use, mufflers & exhaust pipes.
8708.92.50	Pts. & access. of mtr. vehic. of 8701, nesoi, and 8702–8705, mufflers & exhaust pipes.
8708.92.60	Pts. & access., nesoi, of tractors suitable for agricultural use, parts of mufflers.
8708.92.65	Pts. & access., nesoi, of tractors (o/than road tractors or suitable for agricultural use), parts of mufflers.
8708.92.70	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, parts of mufflers, of cast iron nesoi.
8708.92.75	Pts. & access., nesoi, of motor vehicles of 8701, nesoi, and 8702–8705, parts of mufflers, nesoi.
8708.93.15	Pts. & access. of tractors suitable for agricultural use, clutches.
8708.93.30	Pts. & access. of tractors suitable for agricultural use, pts. of clutches.
8708.93.60	Pts. & access. of mtr. vehic. of 8701, nesoi, and 8702–8705, clutches.
8708.93.75	Pts. & access. of mtr. vehic. of 8701, nesoi, and 8702–8705, pts. of clutches.
8708.94.10	Pts. & access. of tractors suitable for agricultural use, steering wheels, steering columns and steering boxes.
8708.94.50	Pts. & access. of mtr. vehic. of 8701, nesoi, and 8702–8705, steering wheels, steering columns and steering boxes.
8708.94.60	Pts. & access., nesoi, of tractors suitable for agricultural use, parts of steering wheels/columns/boxes.
8708.94.65	Pts. & access., nesoi, of tractors (o/than road tractors or suitable for agricultural use), parts of steering wheels/columns/boxes.
8708.94.70	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, parts of steering wheels/columns/boxes, of cast iron nesoi.
8708.94.75	Pts. & access., nesoi, of motor vehicles of 8701, nesoi, and 8702–8705, parts of steering wheels/columns/boxes, nesoi.
8708.95.05	Pts. & access. of bodies for mtr. vehicles of headings 8701 to 8705, inflators & modules for airbags.
8708.95.10	Pts. & access., nesoi, of tractors suitable for agricultural use, parts of safety airbags with inflater system.
8708.95.15	Pts. & access., nesoi, of tractors (o/than road tractors or suitable for agricultural use), parts of safety airbags with inflater system.
8708.95.20	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, parts of safety airbags with inflater system.
8708.99.03	Pts. & access. of tractors suitable for agricultural use, vibration control goods containing rubber.
8708.99.06	Pts. & access. of tractors suitable for agricultural use, double flanged wheel hub units w/ball bearings.
8708.99.16	Pts. & access. of tractors suitable for agricultural use, pts. for power trains nesoi.
8708.99.23	Pts. & access., nesoi, of tractors suitable for agricultural use.
8708.99.27	Pts. & access. of tractors (o/than road tractors or for agricultural use), vibration control goods containing rubber.
8708.99.31	Pts. & access. of tractors (o/than road tractors or for agricultural use), double flanged wheel hub units w/ball bearings.
8708.99.41	Pts. & access. of tractors (o/than road tractors or for agricultural use), pts. for power trains nesoi.
8708.99.48	Pts. & access., nesoi, of tractors (o/than road tractors or suitable for agricultural use).
8708.99.53	Parts & accessories of motor vehicles of 8701–8705, nesoi, of cast iron.
8708.99.55	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, vibration control goods containing rubber.
8708.99.58	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, double flanged wheel hub units w/ball bearings.
8708.99.68	Pts. & access. of motor vehicles of 8701, nesoi, and 8702–8705, pts. for power trains nesoi.
8708.99.81	Pts. & access., nesoi, of motor vehicles of 8701, nesoi, and 8702–8705.
8712.00.15	Bicycles, not motorized, w/both wheels not over 63.5 cm in diameter.
8712.00.25	Bicycles, not motorized, w/both wheels o/63.5 cm in diam., weighing under 16.3 kg & not design. for tires w/x-sect. diam. o/4.13 cm.
8712.00.35	Bicycles, not motorized, w/both wheels o/63.5 cm in diam., weighing 16.3 kg or more, and/or for use w/tires w/x-sect. diam. o/4.13 cm.
8712.00.44	Bicycles, n/motor., w/front wheel diam. o/55 cm but n/o 63.5 cm & rear wheel diam. o/63.5 cm in diam., & wt <16.3 kg w/o acces., value $200+.
8712.00.48	Bicycles, n/motor., w/front wheel w/diameter different than rear wheel diam., nesoi.
8712.00.50	Cycles (o/than bicycles) (including delivery tricycles), not motorized.
8714.91.20	Pts. & access. for bicycles & o/cycles, frames, valued over $600 each.
8714.91.30	Pts. & access. for bicycles & o/cycles, frames, valued at $600 or less each.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
8714.91.50	Pts. & access. for bicycles, sets of steel tubing cut to exact length for the assembly (w/other pts) into the frame & fork of one bicycle.
8714.91.90	Pts. & access. for bicycles & o/cycles, forks, nesoi and pts of frames, nesoi and pts. of forks.
8714.92.10	Pts. & access. for bicycles & o/cycles, wheel rims.
8714.92.50	Pts. & access. for bicycles & o/cycles, wheel spokes.
8714.93.05	Pts. & access. for bicycles & o/cycles, aluminum alloy hubs, w/hollow axle and lever-operated quick release mechanism.
8714.93.15	Pts. & access. for bicycles & o/cycles, 3-speed hubs nesoi.
8714.93.24	Pts. & access. for bicycles & o/cycles, 2-speed hubs, w/internal gear changing mechanisms, nesoi.
8714.93.28	Pts. & access. for bicycles & o/cycles, variable speed hubs, w/internal gear changing mechanisms, nesoi.
8714.93.35	Pts. & access. for bicycles & o/cycles, non-variable speed hubs, nesoi.
8714.93.70	Pts. & access. for bicycles & o/cycles, free-wheel sprocket-wheels.
8714.94.30	Pts. & access. for bicycles & o/cycles, brakes (o/than hub brakes) and parts thereof.
8714.94.90	Pts. & access. for bicycles & o/cycles, brakes and parts thereof, nesoi.
8714.95.00	Pts. & access. for bicycles & o/cycles, saddles.
8714.96.10	Pts. & access. for bicycles & o/cycles, pedals and parts thereof.
8714.96.50	Pts. & access. for bicycles & o/cycles, cotterless-type crank sets and parts thereof.
8714.96.90	Pts. & access. for bicycles & o/cycles, crank-gear nesoi and parts thereof.
8716.10.00	Trailers & semi-trailers, not mech. propelled, for housing or camping.
8716.20.00	Self-loading or self-unloading trailers and semi-trailers, not mech. propelled, for agricultural purposes.
8716.31.00	Tanker trailers and tanker semi-trailers, not mech. propelled, for the transport of goods.
8716.39.00	Trailers and semi-trailers, not mech. propelled, nesoi, for the transport of goods.
8716.40.00	Trailers and semi-trailers, not mechanically propelled, nesoi.
8716.80.10	Farm wagons and carts, not mechanically propelled.
8716.80.50	Vehicles, not mechanically propelled, nesoi.
8716.90.10	Parts of farm wagons and carts.
8716.90.30	Parts of vehicles, not mechanically propelled, castors (o/than castors of heading 8302).
8716.90.50	Parts of trailers and semi-trailers and vehicles, not mechanically propelled, nesoi.
8804.00.00	Parachutes (including dirigible parachutes) and rotochutes; parts & access. thereof.
8903.10.00	Vessels, inflatable, for pleasure or sports.
8903.91.00	Vessels, sailboats, with or without auxiliary motor, for pleasure or sports.
8903.92.00	Vessels, motorboats (o/than outboard motorboats), for pleasure or sports.
8903.99.05	Vessels, canoes, not of a type designed to be principally used with motor or sails.
8903.99.15	Vessels, row boats, not of a type to be principally used with motors or sails.
8903.99.20	Vessels, outboard motorboats, for pleasure or sports.
8903.99.90	Vessels, yachts and other vessels for pleasure or sports, nesoi.
8907.10.00	Inflatable rafts (o/than used for pleasure or sports of 8901.10).
9001.90.40	Lenses nesoi, unmounted.
9001.90.50	Prisms, unmounted.
9001.90.60	Mirrors, unmounted.
9001.90.80	Half-tone screens designed for use in engraving or photographic processes, unmounted.
9001.90.90	Optical elements nesoi, unmounted.
9002.11.40	Projection lenses, mounted, and parts and accessories therefor, for cameras, projectors or photographic enlargers or reducers.
9002.11.60	Mounted objective lenses for use in closed circuit television cameras, seperately imported, w/or w/o attached elec. connectors or motors.
9002.11.90	Objective lenses and parts & access. thereof, for cameras, projectors, or photographic enlargers or reducers, except projection, nesoi.
9002.19.00	Objective lenses, mounted, and parts and accessories therefor, other than for cameras, projectors or photographic enlargers or reducers.
9002.20.40	Photographic filters, mounted, and parts and accessories therefor.
9002.20.80	Filters, mounted, and parts and accessories therefor, for optical uses other than photographic.
9002.90.85	Mounted lenses, n/obj., for use in closed circuit television cameras, seperately imported, w/or w/o attached elec. connectors or motors.
9006.30.00	Photographic cameras for underwater, aerial, medical, surgical, forensic or criminological purposes, not cinematographic.
9007.10.00	Cinematographic cameras.
9007.20.20	Cinematographic projectors for film <16 mm, w/sound recording and reproducing systems and those for projecting only sound motion pictures.
9007.20.40	Cinematographic projectors for film of less than 16 mm, nesoi.
9007.20.60	Cinematographic projectors for film = or >16 mm, w/sound recording & reproducing systems & those for projecting only sound motion pictures.
9007.20.80	Cinematographic projectors for film of 16 mm or greater, nesoi.
9007.92.00	Parts and accessories for cinematographic projectors.
9008.50.50	Photographic (other than cinematographic) enlargers and reducers.
9008.90.40	Parts and accessories of image projectors, other than cinematographic.
9008.90.80	Parts and accessories of photographic (other than cinematographic) enlargers and reducers.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation ''nesoi'' means ''not elsewhere specified or included''.

HTSUS subheading	Product description
9010.10.00	Apparatus & equipment for auto. developing photographic film/paper in rolls or exposing developed film to rolls of photographic paper.
9010.50.10	Contact printers for photographic laboratories.
9010.50.20	Developing tanks for photographic laboratories.
9010.50.30	Editors and combination editor-splicers, for cinematographic film, containing an optical lens or designed to contain such a lens.
9010.50.40	Photographic film viewers, titlers, splicers and editors, and combinations thereof, containing or designed to contain an optical lens, nesoi.
9010.50.50	Photographic film viewers, titlers, splicers and editors, and combinations thereof, not containing or designed to contain an optical lens.
9010.50.60	Apparatus and equipment for photographic (including cinematographic) laboratories, nesoi; negatoscopes.
9010.60.00	Projection screens.
9010.90.85	Parts and accessories of articles of subheading 9010.50 & 9010.60.
9010.90.95	Other parts & accessories for apparatus & equipment for photographic (incl. cinematographic) labs, nesoi, negatoscopes, & projection screens.
9011.20.80	Microscopes for microphotography, microcinematography or microprojection, not provided with a means for photographing the image.
9011.80.00	Compound optical microscopes other than stereoscopic or those for microphotography, microcinematography or microprojection.
9013.10.30	Telescopic sights for rifles designed for use with infrared light.
9013.80.20	Hand magnifiers, magnifying glasses, loupes, thread counters and similar apparatus nesoi.
9013.80.40	Door viewers (door eyes).
9013.80.90	Liquid crystal devices nesoi, and optical appliances and instruments, nesoi.
9013.90.50	Parts and accessories of flat panel displays other than for articles of heading 8528.
9013.90.70	Parts and accessories other than for telescopic sights for fitting to arms or for periscopes.
9013.90.80	Parts and accessories of liquid crystal devices nesoi, and optical appliances and instruments, nesoi.
9014.10.10	Optical direction finding compasses.
9015.10.40	Electrical rangefinders.
9015.30.40	Electrical levels.
9015.30.80	Levels, other than electrical.
9015.90.01	Parts and accessories of 9015.
9016.00.20	Electrical balances of a sensitivity of 5 cg or better, with or without weights, and parts and accessories thereof.
9016.00.40	Jewelers' balances (nonelectrical) of a sensitivity of 5 cg or better, with or without weights, and parts and accessories thereof.
9016.00.60	Balances (nonelectrical) of a sensitivity of 5 cg or better, other than jewelers', balances, and parts and accessories thereof.
9017.10.40	Drafting plotters, whether or not automatic.
9017.10.80	Drafting tables and machines, whether or not automatic, nesoi.
9017.20.40	Disc calculators, slide rules and other mathematical calculating instruments.
9017.20.70	Other drawing, marking-out or mathematical plotters, nesoi.
9017.20.80	Other drawing, marking-out or mathematical calculating instruments, nesoi.
9017.30.40	Micrometers and calipers, for use in the hand.
9017.30.80	Gauges for measuring length, for use in the hand.
9017.80.00	Instruments for measuring length, for use in the hand, nesoi (for example, measuring rods and tapes).
9017.90.01	Parts and accessories for drawing, marking-out or mathematical calculating instruments, and for hand-held instruments for measuring length.
9023.00.00	Instruments, apparatus and models, designed for demonstrational purposes, unsuitable for other uses, and parts and accessories thereof.
9025.80.20	Hydrometers and similar floating instruments, whether or not incorporating a thermometer, non-recording, other than electrical.
9025.90.06	Other parts & accessories of hydrometers & like floating instruments, thermometers, pyrometers, barometers, hygrometers, psychrometers & combinations.
9026.80.40	Nonelectrical heat meters incorporating liquid supply meters, and anemometers.
9027.10.40	Nonelectrical optical instruments and apparatus for gas or smoke analysis.
9027.10.60	Nonelectrical gas or smoke analysis apparatus, other than optical instruments and apparatus.
9027.90.68	Parts and accessories of nonelectrical optical instruments and apparatus of heading 9027, nesoi.
9029.10.40	Taximeters.
9029.10.80	Revolution counters, production counters, odometers, pedometers and the like, other than taximeters.
9029.20.20	Bicycle speedometers.
9029.20.60	Stroboscopes.
9029.90.20	Parts and accessories of taximeters.
9029.90.40	Parts and accessories of bicycle speedometers.
9030.20.10	Oscilloscopes and oscillographs, nesoi.
9031.90.45	Bases and frames for the optical coordinate-measuring machines of subheading 9031.49.40.
9104.00.05	Instrument panel clocks for vehicles, air/spacecraft, vessels, clock movement over 50 mm wide, opto-electronic display only, n/o $10 each.

ANNEX—Continued

Note: All products that are classified in the 8-digit subheadings of the Harmonized Tariff Schedule of the United States (HTSUS) that are listed in this Annex are covered by the proposed supplemental action. The product descriptions that are contained in this Annex are provided for informational purposes only, and are not intended to delimit in any way the scope of the proposed action. Any questions regarding the scope of particular HTSUS subheadings should be referred to U.S. Customs and Border Protection. In the product descriptions, the abbreviation "nesoi" means "not elsewhere specified or included".

HTSUS subheading	Product description
9104.00.10	Instrument panel clocks for veh., air/spacecraft, vessels, clock mvmt over 50 mm wide, electric, nt optoelectronic display, n/o $10 each.
9104.00.20	Instrument panel clocks for vehicles, air/spacecraft, vessels, w/clock movement over 50 mm wide, valued n/o $10 each, nonelectric.
9104.00.25	Instrument panel clocks for vehicles, air/spacecraft, vessels, w/clock movement ov 50 mm wide, opto-electronic display only, ov $10 each.
9104.00.30	Instrument panel clocks for vehicles, air/spacecraft, vessels, w/clock mvmt ov 50 mm wide, electric, nt optoelectronic display, ov $10 each.
9104.00.40	Instrument panel clocks for vehicles, air/spacecraft, vessels, w/clock movement ov 50 mm wide, valued ov $10 each, non-electric.
9104.00.45	Instrument panel clocks for vehicles, air/spacecraft, vessels, w/watch or clock movement <50 mm wide, opto-electronic display only.
9104.00.50	Instrument panel clocks for vehicles, air/spacecraft, vessels, w/watch or clock movement <50 mm wide, electric, not opto-electronic display.
9106.10.00	Time registers; time recorders.
9106.90.20	Parking meters.
9106.90.40	Time locks valued over $10 each.
9106.90.55	Apparatus for meas., recording or indicating time intervals, w/watch or clock mvmt., battery powered, w/opto-electronic display only.
9106.90.65	Other apparatus for meas., recording or otherwise indicating time intervals, w/watch or clock mvmt., battery powered, nesoi.
9106.90.75	Apparatus for meas., recording or indicating time intervals, w/watch or clock mvmt., AC powered, w/opto-electronic display only.
9106.90.85	Time of day recording apparatus & apparatus for measuring, detecting, recording or otherwise indicating intervals of time nesoi.
9107.00.40	Time switches with clock or watch movements or with synchronous motor, valued not over $5 each.
9107.00.80	Time switches with clock or watch movements or with synchronous motor, valued over $5 each.
9401.20.00	Seats, of a kind used for motor vehicles.
9401.30.40	Seats nesoi, swivel w/variable height adjustment & w/wooden frame (o/than of heading 9402).
9401.30.80	Seats nesoi, swivel w/variable height adjustment & other than w/wooden frame (o/than of heading 9402).
9401.40.00	Seats nesoi, convertible into beds (o/than garden seats or camping equip.).
9401.52.00	Bamboo seats.
9401.53.00	Rattan seats.
9401.59.00	Seats nesoi, of cane, osier, similar materials o/than bamboo or rattan.
9401.61.20	Chairs nesoi, w/teak frames, upholstered.
9401.61.40	Chairs nesoi, w/wooden frames (o/than teak), upholstered.
9401.61.60	Seats (o/than chairs) nesoi, w/wooden frames, upholstered.
9401.69.20	Seats nesoi, of bent-wood.
9401.69.40	Chairs nesoi, w/teak frames, not upholstered.
9401.69.60	Chairs nesoi, w/wooden frames (o/than teak), not upholstered.
9401.69.80	Seats (o/than chairs) nesoi, w/wooden frames, not upholstered.
9401.71.00	Seats nesoi, w/metal frame (o/than of heading 9402), upholstered.
9401.79.00	Seats nesoi, w/metal frame (o/than of heading 9402), not upholstered.
9401.80.20	Seats nesoi, of reinforced or laminated plastics (o/than of heading 9402).
9401.80.40	Seats nesoi, of rubber or plastics (o/than of reinforced or laminated plastics & o/than of heading 9402).
9401.80.60	Seats nesoi, o/than of wood, or w/metal frame or of rubber or plastics (o/than of heading 9402).
9401.90.35	Parts of seats (o/than of 9402) nesoi, of rubber or plastics (o/than of heading 9402).
9401.90.40	Parts of seats (o/than of 9402) nesoi, of wood.
9401.90.50	Parts of seats (o/than of 9402) nesoi, o/than of cane etc, rubber or plastics or of wood.
9403.10.00	Furniture (o/than seats) of metal nesoi, of a kind used in offices.
9403.20.00	Furniture (o/than seats) of metal nesoi, o/than of a kind used in offices.
9403.30.40	Furniture (o/than seats) of bentwood nesoi, of a kind used in offices.
9403.30.80	Furniture (o/than seats) of wood (o/than bentwood) nesoi, of a kind used in offices.
9403.40.40	Furniture (o/than seats) of bent-wood nesoi, of a kind used in the kitchen.
9403.40.60	Furniture (o/than seats) of wood (o/than bentwood) nesoi, of a kind used in the kitchen & design. for motor vehicle use.
9403.40.90	Furniture (o/than seats) of wood (o/than bentwood) nesoi, of a kind used in the kitchen & not design. for motor vehicl. use.
9403.50.40	Furniture (o/than seats) of bentwood nesoi, of a kind used in the bedroom.
9403.50.60	Furniture (o/than seats) of wood (o/than bentwood), of a kind used in the bedroom & designed for motor vehicle use.
9403.50.90	Furniture (o/than seats) of wood (o/than bentwood), of a kind used in the bedroom & not designed for motor vehicle use.
9403.60.40	Furniture (o/than seats & o/than of 9402) of bentwood nesoi.
9403.60.80	Furniture (o/than seats & o/than of 9402) of wooden (o/than bentwood) nesoi.
9403.70.40	Furniture (o/than seats & o/than of 9402) of reinforced or laminated plastics nesoi.
9403.70.80	Furniture (o/than seats & o/than of 9402) of plastics (o/than reinforced or laminated) nesoi.

HTSUS subheading	Product description
9403.82.00	Bamboo furniture and parts.
9403.83.00	Rattan furniture and parts.
9403.89.30	Furniture (o/than seats) of cane, osier, or similar materials o/than bamboo or rattan.
9403.89.60	Furniture (o/than seats & o/than of 9402) of materials nesoi.
9403.90.10	Parts of furniture (o/than seats), for furniture of a kind used for motor vehicles.
9403.90.25	Parts of furniture (o/than seats), of cane, osier, bamboo or similar materials.
9403.90.40	Parts of furniture (o/than seats or o/than of 9402), of reinforced or laminated plastics.
9403.90.50	Parts of furniture (o/than seats or o/than of 9402), of rubber or plastics (o/than reinforced or laminated plastics).
9403.90.60	Parts of furniture (o/than seats or o/than of 9402), of textile material (o/than cotton).
9403.90.70	Parts of furniture (o/than seats or o/than of 9402), of wood.
9403.90.80	Parts of furniture (o/than seats or o/than of 9402) nesoi.
9404.10.00	Mattress supports.
9404.21.00	Mattresses, of cellular rubber or plastics, whether or not covered.
9404.29.10	Mattresses, of cotton.
9404.29.90	Mattresses (o/than of cellular rubber or plastics or of cotton).
9405.10.40	Chandeliers and other electric ceiling or wall lighting fittings (o/than used for public spaces), of brass.
9405.10.60	Chandeliers and other electric ceiling or wall lighting fixtures (o/than used for public spaces), of base metal (o/than brass).
9405.10.80	Chandeliers and other electric ceiling or wall lighting fixtures (o/than used for public spaces), not of base metal.
9405.20.40	Electric table, desk, bedside or floor-standing lamps, of brass.
9405.20.60	Electric table, desk, bedside or floor-standing lamps, of base metal (o/than brass).
9405.20.80	Electric table, desk, bedside or floor-standing lamps, not of base metal.
9405.30.00	Lighting sets of a kind used for Christmas trees.
9405.40.40	Electric lamps and lighting fixtures nesoi, of brass.
9405.40.60	Electric lamps and lighting fixtures nesoi, of base metal (o/than brass).
9405.40.82	LEDs for backlighting of LCDs.
9405.40.84	Electric lamps and lighting fixtures nesoi, not of base metal.
9405.50.20	Non-electrical incandescent lamps designed to be operated by propane or other gas, or by compressed air and kerosene or gasoline.
9405.50.30	Non-electrical lamps and lighting fixtures nesoi, of brass.
9405.50.40	Non-electrical lamps and lighting fixtures nesoi, not of brass.
9405.60.20	Illuminated signs, illuminated name plates and the like, of brass.
9405.60.40	Illuminated signs, illuminated name plates and the like, of base metal (o/than brass).
9405.60.60	Illuminated signs, illuminated name plates and the like, not of base metal.
9405.91.10	Parts of lamps, lighting fittings, illuminated signs & the like, globes and shades, of lead crystal glass.
9405.91.30	Parts of lamps, lighting fittings, illuminated signs & the like, globes and shades, of glass (o/than lead crystal).
9405.91.40	Parts of lamps, lighting fittings, illuminated signs & the like, chimneys, of glass.
9405.91.60	Parts of lamps, lighting fixtures, illuminated signs & the like, of glass nesoi.
9405.92.00	Parts of lamps, lighting fixtures, illuminated signs & the like, of plastics.
9405.99.20	Parts of lamps, lighting fixtures, illuminated signs & the like, of brass.
9405.99.40	Parts of lamps, lighting fixtures, illuminated signs & the like, not of glass, plastics or brass.
9406.10.00	Prefabricated buildings of wood.
9406.90.00	Prefabricated buildings not of wood.
9606.10.40	Press-fasteners, snap-fasteners and press-studs and pts thereof, valued n/o 20 cents/dozen pieces or parts.
9606.10.80	Press-fasteners, snap-fasteners and press-studs and pts thereof, valued o/20 cents/dozen pieces or parts.
9606.21.20	Buttons, of casein, not covered with textile material.
9606.21.40	Buttons, of acrylic resin or polyester resin, or both resins, not covered with textile material.
9606.21.60	Buttons, of plastics (o/than casein, acrylic or polyester resins), not covered with textile materials.
9606.22.00	Buttons, of base metal, not covered with textile material.
9606.29.20	Buttons, of acrylic resin or polyester resin, or both resins, covered with textile material.
9606.29.40	Buttons, of pearl or shell.
9606.29.60	Buttons, nesoi.
9606.30.40	Button blanks, of casein.
9606.30.80	Button molds & parts of buttons; button blanks (o/than casein).
9607.11.00	Slide fasteners, fitted with chain scoops of base metal.
9607.19.00	Slide fasteners, not fitted with chain scoops of base metal.
9607.20.00	Parts of slide fasteners.
9620.00.10	Monopods, bipods, tripods and similar articles, accessories of heading 8519 or 8521.
9620.00.15	Monopods, bipods, tripods and similar articles, accessories of heading 9005.
9620.00.20	Monopods, bipods, tripods and similar articles, accessories of heading 9006, other than cinematographic.
9620.00.25	Monopods, bipods, tripods and similar articles, accessories of heading 9007.
9620.00.30	Monopods, bipods, tripods and similar articles, accessories of heading 9015, including rangefinders.
9620.00.50	Monopods, bipods, tripods and similar articles of plastics, nesoi.
9620.00.55	Monopods, bipods, tripods and similar articles of wood, nesoi.
9620.00.60	Monopods, bipods, tripods and similar articles of graphite and other carbon, nesoi.
9620.00.65	Monopods, bipods, tripods and similar articles of iron and steel, nesoi.
9620.00.70	Monopods, bipods, tripods and similar articles of aluminum, nesoi.

HTSUS subheading	Product description
9701.10.00	Paintings, drawings (o/than of 4906) and pastels, executed entirely by hand, whether or not framed.
9701.90.00	Collages and similar decorative plaques, executed entirely by hand, whether or not framed.
9702.00.00	Original engravings, prints and lithographs, whether or not framed.
9703.00.00	Original sculptures and statuary, in any material.
9704.00.00	Postage or revenue stamps, stamp-postmarks, first-day covers, postal stationery, and the like, used or unused, other than heading 4907.
9705.00.00	Collections and collectors' pieces of zoological, botanical, mineralogical, anatomical, historical, archaeological etc. interest.
9706.00.00	Antiques of an age exceeding one hundred years.

40 CFR Part 52

Air Plan Approval; Kentucky; 2008 Ozone NAAQS Interstate Transport SIP Requirements; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R04–OAR–2018–0142; FRL–9980–57—Region 4]

Air Plan Approval; Kentucky; 2008 Ozone NAAQS Interstate Transport SIP Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revision to Kentucky's State Implementation Plan (SIP) pertaining to the "good neighbor" provision of the Clean Air Act (CAA or Act) for the 2008 8-hour ozone National Ambient Air Quality Standard (NAAQS). Kentucky submitted a draft version of this SIP revision for parallel processing by EPA on February 28, 2018, and submitted a final version that contained no substantive changes on May 10, 2018. The good neighbor provision requires each state's implementation plan to address the interstate transport of air pollution in amounts that contribute significantly to nonattainment, or interfere with maintenance, of a NAAQS in any other state. In this action, EPA is approving Kentucky's submission demonstrating that no additional emission reductions are necessary to address the good neighbor provision for the 2008 ozone NAAQS beyond those required by the Cross-State Air Pollution Rule Update (CSAPR Update) federal implementation plan (FIP). Accordingly, EPA is approving Kentucky's submission because it partially addresses the requirements of the good neighbor provision for the 2008 ozone NAAQS, and it resolves any obligation remaining under the good neighbor provision after promulgation of the CSAPR Update FIP. The approval of Kentucky's SIP submission and the CSAPR Update FIP, together, fully address the requirements of the good neighbor provision for the 2008 ozone NAAQS for Kentucky. EPA is approving this action because it is consistent with the CAA.

DATES: This rule is effective August 16, 2018.

ADDRESSES: EPA has established a docket for this action under Docket Identification No. EPA–R04–OAR–2018–0142. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information may not be publicly available, *i.e.*, Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. EPA requests that if at all possible, you contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to schedule your inspection. The Regional Office's official hours of business are Monday through Friday 8:30 a.m. to 4:30 p.m., excluding Federal holidays.

FOR FURTHER INFORMATION CONTACT: Ashten Bailey, Air Regulatory Management Section, Air Planning and Implementation Branch, Air, Pesticides and Toxics Management Division, Region 4, U.S. Environmental Protection Agency, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Ms. Bailey can be reached by telephone at (404) 562–9164 or via electronic mail at *bailey.ashten@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

On March 27, 2008 (73 FR 16436), EPA promulgated an ozone NAAQS that revised the levels of the primary and secondary 8-hour ozone standards from 0.08 parts per million (ppm) to 0.075 ppm or 75 parts per billion (ppb). Pursuant to CAA section 110(a)(1), within three years after promulgation of a new or revised NAAQS (or shorter, if EPA prescribes), states must submit SIPs that meet the applicable requirements of section 110(a)(2). EPA has historically referred to these SIP submissions made for the purpose of satisfying the requirements of sections 110(a)(1) and 110(a)(2) as "infrastructure SIP" submissions. One of the structural requirements of section 110(a)(2) is section 110(a)(2)(D)(i), also known as the "good neighbor" provision, which generally requires SIPs to contain adequate provisions to prohibit in-state emissions activities from having certain adverse air quality effects on downwind states due to interstate transport of air pollution. There are four sub-elements, or "prongs," within section 110(a)(2)(D)(i) of the CAA. CAA section 110(a)(2)(D)(i)(I), addressing two of these four prongs, requires SIPs to include provisions prohibiting any source or other type of emissions activity in one state from emitting any air pollutant in amounts that will contribute significantly to nonattainment, or interfere with maintenance, of the NAAQS in another state. The two provisions of this section are referred to as prong 1 (significant contribution to nonattainment) and prong 2 (interference with maintenance). This action addresses only prongs 1 and 2 of section 110(a)(2)(D)(i).[1]

On July 17, 2012, Kentucky submitted a SIP submission to EPA, addressing a number of the CAA requirements for the 2008 8-hour ozone NAAQS infrastructure SIPs. With respect to the interstate transport requirements of 110(a)(2)(D)(i)(I), EPA disapproved the submission (78 FR 14681 (March 7, 2013), effective April 8, 2013) because the SIP had relied on Kentucky's participation in the Clean Air Interstate Rule (CAIR), which did not address the 2008 ozone NAAQS and had been remanded by the D.C. Circuit. In October 2016, EPA promulgated the CSAPR Update to address the requirements of CAA section 110(a)(2)(D)(i)(I) concerning interstate transport of air pollution for the 2008 ozone NAAQS. *See* 81 FR 74504 (October 26, 2016). In the CSAPR Update rulemaking, EPA determined that air pollution transported from Kentucky would unlawfully affect other states' ability to attain or maintain the 2008 8-hour ozone NAAQS. EPA's analysis projected that in 2017, Kentucky would be linked to downwind nonattainment or maintenance problems at four monitors, or receptors. Accordingly, EPA established an ozone season nitrogen oxides (NO_X) budget for Kentucky's electricity generating units (EGUs) and promulgated a FIP requiring affected EGUs to participate in an allowance trading program to implement the budget.[2] At the time it finalized the CSAPR Update, EPA determined that, after implementation of the rule, many downwind air quality problems would persist in 2017, including at two of the four receptors to which Kentucky was linked. EPA therefore found that the CSAPR Update FIPs for Kentucky and 20 other states may not fully address the good neighbor requirements as to the 2008 8-hour ozone NAAQS. EPA explained that further analysis of air quality in a potential future compliance year and potential control strategies would be needed to determine whether any

[1] All other infrastructure SIP elements for Kentucky for the 2008 8-hour ozone NAAQS were addressed in separate rulemakings. *See* 78 FR 14681 (March 7, 2013) and 79 FR 65143 (November 3, 2014).

[2] CSAPR Update, 81 FR at 74507–08.

further emission reductions from these states would be necessary to fully address the good neighbor obligations.

On October 27, 2017, EPA issued a memorandum (October 2017 Transport Memo) [3] that provided technical information and related analyses to assist states with developing SIPs to address any remaining section 110(a)(2)(D)(i)(I) requirements for the 2008 8-hour ozone NAAQS. EPA's updated modeling data, released with the October 2017 Transport Memo, indicate that for the 2023 future base case emissions scenario there are no monitoring sites, outside of California, that are projected to have nonattainment or maintenance problems with respect to the 2008 ozone NAAQS in 2023.

II. This Action

On February 28, 2018, Kentucky submitted a draft SIP revision to EPA for parallel processing that reviewed air quality modeling and data files that EPA disseminated in the October 2017 Transport Memo. The draft SIP revision indicated that the air quality problems at monitors to which Kentucky remained linked after implementation of the CSAPR Update would be resolved by 2023. Kentucky's draft SIP submission agreed with the October 2017 Transport Memo's preliminary projections and provided information intended to demonstrate that reliance on the modeling to evaluate its remaining good neighbor obligation is appropriate. The draft submission also contained air quality modeling conducted by Alpine Geophysics, LLC (Alpine) that concluded that none of the nonattainment and maintenance receptors identified in the CSAPR Update are predicted to be in nonattainment or have issues with maintenance of the 2008 ozone NAAQS in 2023. Additionally, Kentucky cited information related to emissions trends—such as reductions in ozone precursor emissions and controls on Kentucky sources—as further evidence that, after implementation of all on-the-books measures, including those promulgated in the CSAPR Update FIPs, emissions from the Commonwealth will no longer contribute significantly to nonattainment or interfere with maintenance of the 2008 8-hour ozone NAAQS in any other state.

In a notice of proposed rulemaking (NPRM) published on April 18, 2018 (83 FR 17123), EPA proposed to approve Kentucky's February 28, 2018 draft SIP submission. In the NPRM, EPA explained that it was basing its proposal to approve Kentucky's February 28, 2018 draft SIP submission on a finding that 2023 is a reasonable analytic year for evaluating ozone transport problems with respect to the 2008 ozone NAAQS and that interstate ozone transport air quality modeling projections for 2023 indicate that Kentucky is not expected to significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in downwind states. As described in more detail in the NPRM, EPA based its evaluation on a four-step analytic framework by:

(1) Identifying downwind air quality problems relative to the 2008 ozone NAAQS considering air quality modeling projections to a future compliance year;

(2) Determining which upwind states are ''linked'' to these identified downwind air quality problems and thereby warrant further analysis to determine whether their emissions violate the good neighbor provision;

(3) For states linked to downwind air quality problems, identifying upwind emissions on a statewide basis that significantly contribute to nonattainment or interfere with maintenance of a standard; and

(4) For states that are found to have emissions that significantly contribute to nonattainment or interfere with maintenance of the NAAQS downwind, implementing the necessary emission reductions within the state.

EPA explained that its selection of 2023 was a reasonable analytic year for evaluating downwind air quality at step one of the framework, supported by an assessment of attainment dates for the 2008 ozone NAAQS and feasibility of implementing potential control strategies at both EGUs and non-EGUs to reduce NO_X in CSAPR Update states, including Kentucky. First, EPA considered the upcoming 2021 and 2027 attainment dates for the 2008 ozone NAAQS, consistent with the holding of the U.S. Court of Appeals for the District of Columbia Circuit (D.C. Circuit) in *North Carolina* v. *EPA,* 531 F.3d 896, 911–12 (2008). Next, EPA assessed the amount of time necessary to implement new NO_X controls at EGUs and non-EGUs across the CSAPR Update region, finding that, fleetwide, sources would require four years to implement additional, substantial NO_X emission reductions. EPA therefore proposed to find that 2023 is an appropriate future analytic year because it is the first ozone season for which significant new post-combustion controls to reduce NO_X could be feasibly installed across the CSAPR Update region, and thus represents the timeframe that is as expeditious as practicable for upwind states to implement additional emission reductions. EPA then described its modeling analysis at step one of the four-step framework for the 2023 analytic year, which indicates that there are no expected nonattainment or maintenance receptors for the 2008 ozone NAAQS in the eastern U.S. in this future year. Please refer to the April 18, 2018 NPRM for additional information on the basis for the proposed approval.

Based on these proposed findings and the information provided in Kentucky's February 28, 2018 SIP submittal, EPA proposed to determine that Kentucky's draft SIP submission demonstrates that emission activities from the Commonwealth will not contribute significantly to nonattainment or interfere with maintenance of the 2008 8-hour ozone NAAQS in any other state after implementation of all on-the-books measures, including the CSAPR Update. Comments on the NPRM were due on or before May 18, 2018. EPA received adverse comments on the proposed rulemaking, which are discussed below. Because Kentucky submitted the draft SIP revision for parallel processing, EPA's April 18, 2018 proposed rulemaking was contingent upon Kentucky providing a final SIP revision that was substantively the same as the draft SIP revision. *See* 83 FR 17123. Kentucky submitted the final version of its SIP revision on May 10, 2018.[4] The May 10, 2018 SIP submission had no substantive changes from the February 28, 2018 draft SIP submission.

After considering the comments received on the NPRM, for the reasons described in the NPRM and in this action,[5] EPA is now taking final action to approve Kentucky's May 10, 2018, final SIP submission and find that Kentucky is not required to make any further reductions, beyond those required by the CSAPR Update, to address its statutory obligation under CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. EPA's final approval of Kentucky's submission means that Kentucky's obligations under 110(a)(2)(D)(i)(I) are fully addressed through the combination of the 2016 CSAPR Update FIP and the 2018 SIP demonstration showing that no

[3] Memorandum, Stephen D. Page, Supplemental Information on the Interstate Transport State Implementation Plan Submissions for the 2008 Ozone National Ambient Air Quality Standards under Clean Air Action Section 110(a)(2)(D)(i)(I).

[4] Both the draft and final SIP revisions are provided in the docket for this action.

[5] EPA notes that to the extent there are any conflicts between the rationale provided in the NPRM for the proposed approval and the rationale provided in this action, statements made in this document should be treated as the controlling basis for EPA's final action approving Kentucky's SIP submission.

further reductions are necessary. As a result, EPA is also amending the regulatory text at 40 CFR 52.940(b)(2) to reflect that the CSAPR Update represents a full remedy with respect to Kentucky's transport obligation for the 2008 ozone NAAQS.

III. Response to Comments

The Regional Administrator signed the proposed rule on April 9, 2018, and on April 12, 2018, EPA made a prepublication version of the proposal available on its website. The 30-day public comment period on the proposed rulemaking began on April 18, 2018, the day of publication of the proposal in the **Federal Register**, and closed on May 18, 2018. EPA received 15 comments on the proposed action, 10 of which are relevant to the proposal. The relevant comments were submitted by the Connecticut Department of Energy and Environmental Protection, Delaware Department of Natural Resources & Environmental Control, Maryland Department of the Environment, Midwest Ozone Group, New Jersey Department of Environmental Protection, New York State Department of Environmental Conservation (NYDEC), New York State Office of the Attorney General, Sierra Club and Chesapeake Bay Foundation, and Utility Air Regulatory Group. The remaining comments were outside the scope of the proposed action. This section contains summaries of the relevant comments and EPA's responses to those comments.

Comment: One commenter states that existing measures, including volatile organic compounds (VOC) and NO_X requirements for EGUs, industrial sources, and mobile sources within Kentucky, have brought Kentucky into attainment of both the 2008 and 2015 ozone NAAQS. The commenter states that the issue being addressed in the proposed SIP is whether these existing measures also satisfy Kentucky's ''good neighbor'' requirements for the 2008 ozone NAAQS. The commenter states that 2023 is the appropriate analytic year for evaluation of ozone transport issues related to the 2008 ozone NAAQS. The commenter points to the October 2017 Transport Memo and its modeling results as demonstrating that there is no need to conduct any further analysis of EPA's four-step transport framework. The commenter states its support of both EPA and Alpine modeling showing no downwind air quality problems related to the 2008 ozone NAAQS and cites a report prepared for the commenter by Alpine indicating that all sites identified in the final CSAPR Update will have design values below the 2008 ozone NAAQS by 2023 and that therefore no states are required to estimate their contributions to these monitors. The commenter states in conclusion that recent modeling performed by EPA as well as by Alpine indicate that implementation of the CSAPR Update, in addition to other on-the-books controls, are all that are needed to satisfy requirements related to the 2008 ozone NAAQS, and indicates commenter's support for Kentucky's request that EPA approve its ''good neighbor'' SIP.

An additional commenter expresses support for EPA to finalize approval of Kentucky's section 110(a)(2)(D)(i)(I) SIP submission and further states its support for Kentucky's reliance on EPA's modeling analysis. The commenter states that the EPA analysis released in the October 2017 Transport Memo was consistent with the four-step framework, and that it was not necessary to complete all four steps because no receptor in the eastern United States is expected to have problems attaining or maintaining the 2008 ozone NAAQS in 2023. The commenter states that 2023 is the modeling year used in EPA's modeling because that is the earliest year by which it is feasible to install controls across the CSAPR Update region and states its support of EPA's decision to evaluate the feasibility of installing controls on a regional basis rather than on a state-by-state or unit-by-unit basis. The commenter further states that EPA properly considered upcoming attainment dates and the need to consider future effects of local, state, and federal emission reduction requirements in order to avoid unlawfully mandating over-control. The commenter concludes that EPA's modeling analysis is reasonable and that EPA's approval is proper even without additional information from Kentucky. In support of its assertion that EPA should finalize its approval, the commenter notes that Kentucky also provides state-specific information to further demonstrate that reliance on EPA's modeling is appropriate in the context of this SIP and modeling performed by Alpine that is consistent with EPA's results.

Response: EPA agrees with the commenters' assertions as to the appropriateness of 2023 as an analytic year and other specifics of EPA's analysis as documented in the October 2017 Transport Memo. EPA acknowledges receipt of the Alpine report and recognizes that it demonstrates similar 2023 design values to those projected by EPA's modeling.

Comment: One commenter states that, although it appreciates the emissions reductions made thus far by Kentucky, EPA must disapprove Kentucky's proposed SIP as it does not fulfill the CAA's good neighbor obligations. Another commenter states that, while New York will continue to control air pollution, it does not have the authority to control sources in upwind states and that EPA must disapprove the Kentucky submission. Additional commenters state opposition to EPA's proposed approval, and assert that EPA should disapprove Kentucky's SIP submission.

Response: EPA disagrees with the commenters' contentions that EPA should disapprove Kentucky's submittal because it does not fulfill the CAA's good neighbor obligations. As explained in the proposed rulemaking and further in this action, based on EPA's modeling and with implementation of the CSAPR Update and other measures, Kentucky is not expected to significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS in downwind states in 2023. Kentucky provided information showing that the use of the modeling is appropriate in this context, and also included additional modeling that showed results consistent with EPA's modeling. Thus, Kentucky's draft submission is approvable because it demonstrated that emission activity from the State will not contribute significantly to nonattainment or interfere with maintenance of the 2008 8-hour ozone NAAQS in any other state after implementation of all on-the-books measures, including the CSAPR Update.

To the extent that these comments are general statements stating opposition to EPA's action and are intended to incorporate other, specific comments made by commenters, EPA has addressed the specific concerns later in this preamble.

Comment: One commenter states that EPA's determination of significant contribution should be based upon current data, and to base the determination on 2023 modeling ignores New York's 2021 attainment deadline and adds too much uncertainty and speculation to the determination of whether Kentucky significantly contributes to nonattainment or interferes with maintenance in New York and other states.

Response: EPA does not agree that it is inappropriate to rely on modeled projections for a future year, rather than current data, to analyze ozone concentrations in downwind states. Consistent with historical practice, Kentucky and EPA have focused their analysis in this action on a future year in light of the forward-looking nature of the good neighbor obligation in section

110(a)(2)(D)(i)(I). Specifically, the statute requires that states prohibit emissions that ''will'' significantly contribute to nonattainment or interfere with maintenance of the NAAQS in any other state. EPA reasonably interprets this language as permitting states and EPA in implementing the good neighbor provision to evaluate downwind air quality problems, and the need for further upwind emission reductions, prospectively. In EPA's prior regional transport rulemakings, the Agency generally evaluated whether upwind states ''will'' significantly contribute to nonattainment or interfere with maintenance based on projections of air quality in the future year in which any emission reductions would be expected to go into effect. *See, e.g.,* NO_X SIP Call, 63 FR 57377 (using the anticipated 2007 compliance year for its analysis); CAIR, 70 FR 25241 (using the years 2009 and 2010, the anticipated compliance years for the ozone and fine particulate matter ($PM_{2.5}$) NAAQS, respectively); CSAPR, 76 FR 48211 (using the 2012 compliance year); CSAPR Update, 81 FR 74537 (using the 2017 compliance year). The D.C. Circuit affirmed EPA's interpretation of ''will,'' finding EPA's consideration of future projected air quality (in addition to current measured data) to be a reasonable interpretation of an ambiguous term. *North Carolina,* 531 F.3d at 913–14. Thus, consistent with this precedent, it is reasonable for EPA to analyze air quality in an appropriate future compliance year to evaluate any remaining obligation for the 2008 ozone NAAQS.

EPA also does not agree that the 2023 modeling is too uncertain or speculative as compared to current data. As discussed in more detail later, courts' rulings have deferred to EPA's reasonable reliance on modeling to inform its policy choices, notwithstanding that no model is perfect and there may be some level of discrepancy between modeled predictions what eventually occurs. Comments regarding the relationship between the future analytic year and the attainment date are also addressed later in this preamble.

Comment: One commenter states that the plain meaning of section 110(a)(2)(D) requires Kentucky to prohibit contributing emissions prior to the 2008 ozone attainment dates set for downwind states, *i.e.,* by 2018 for moderate nonattainment areas. The commenter contends that the D.C. Circuit adopted this plain reading, finding the statute unambiguously requires compliance with NAAQS attainment deadlines in *North Carolina,* 531 F.3d at 911–12. The court based its conclusion on the requirement that implementing provisions be consistent with Title I of the CAA, finding the plan must be consistent with both the substantive and procedural requirements of NAAQS compliance. *Id.* at 911. The commenter states that the court also held that compliance must be achieved in time for attainment determinations for downwind states expected to be close to the NAAQS so as not to ''interfere with maintenance.'' *Id.* at 908–09.

The commenter further states that the CAA establishes attainment dates for the 2008 ozone NAAQS ''as expeditiously as practicable'' but no later than 3, 6, 9, 15, or 20 years—depending on area classification—after the designation. The commenter contends that, in *NRDC* v. *EPA,* 777 F.3d 456 (D.C. Cir. 2014), the court rejected EPA's attempt to extend the 2008 ozone NAAQS compliance deadlines by several months, holding that the CAA requires attainment dates be set at the statutorily fixed term of time from the date of designations.

The commenter therefore asserts that section 110(a)(2)(D)(i)(I) does not allow Kentucky to wait until 2023 nor does it grant EPA discretion to extend compliance deadlines. The commenter contends that, by 2023, the harms the good neighbor provisions were intended to avoid will have already befallen downwind states. Accordingly, the commenter states that Kentucky must take immediate steps to offset past over-pollution. In a footnote, the commenter notes that prior legal precedent indicates that attainment dates are ''central to the regulatory scheme,'' *Sierra Club* v. *EPA,* 294 F.3d 155, 161 (D.C. Cir. 2002), and ''leave no room for claims of technological or economic feasibility,'' *NRDC,* 777 F.3d at 468.

Another commenter points to 2015–2017 design values at monitors in the NJ-NY-CT nonattainment area that are above the standard at 83 ppb (the Stratford monitor) and 82 ppb (the Westport monitor). The commenter states that design values indicate that the area can expect to be reclassified as ''serious'' with an attainment deadline of July 2021, based on a 2020 design value. The commenter contends that the Kentucky SIP is deficient because it relies on a future year that does not adequately reflect the appropriate attainment year of the impacted nonattainment area. Because the moderate attainment deadline has passed, the commenter states that modeling for the next attainment date of July 2021 (based on 2020 design values) should be conducted.

The commenter asserts that downwind states significantly impacted by ozone pollution will be unable to meet attainment deadlines if good neighbor SIPs are not done prior to the attainment deadline of the downwind nonattainment areas. The commenter asserts the CAA recognizes this since the good neighbor provision is required to be addressed ahead of the attainment demonstration requirements for nonattainment areas. The commenter notes that Kentucky's significant contributions for the 2008 ozone NAAQS therefore should have been addressed by March 2011. The commenter states that 2023 is an inappropriate future year for modeling because it falls after both the July 2018 moderate classification deadline and the July 2021 serious classification deadline.

One commenter states that the tri-state New York City metropolitan area struggles to attain the 2008 ozone NAAQS, with 2017 design values up to 83 ppb, due in significant part to interstate transport of ozone precursors from upwind states like Kentucky. The commenter notes that NYDEC requested a reclassification of the area to ''serious'' nonattainment due to the inevitability of missing the moderate area attainment deadline. The commenter therefore asserts that the 2023 modeling year relied upon by EPA and Kentucky is well beyond—and fails to take into account—the attainment deadline for ''serious'' nonattainment areas.

The commenter further states that had EPA met its 2015 FIP deadline for Kentucky, it could have mandated controls that would be installed and operating in time to benefit New York's ''serious'' nonattainment deadline.

One commenter contends that EPA's proposed approval fails to account for New York's upcoming attainment deadlines for the 2008 ozone NAAQS. The commenter asserts that the New York metropolitan area has struggled to attain the 2008 ozone NAAQS, with 2017 design values of up to 83 ppb. The commenter asserts that EPA admitted the CSAPR Update was only a partial remedy for downwind states such as New York, and that additional reductions may be required from upwind states, including Kentucky. CSAPR Update modeling projected that New York would remain in nonattainment past its July 20, 2018 statutory attainment deadline. On November 10, 2017, NYDEC requested a reclassification to ''serious'' nonattainment, due to the inevitability of missing the July 20, 2018 moderate area attainment deadline, which the state attributed in large part to transported emissions from upwind states such as Kentucky. The reclassification carries an attainment deadline of July 20, 2021, based on 2018–2020 monitoring data.

The commenter asserts that 2023 modeling analysis takes no account of New York's current and likely new attainment deadlines, in direct conflict with settled law under the Act. To be fully compliant, the commenter believes a good neighbor SIP must eliminate significant contribution to downwind nonattainment or interference with maintenance by the deadlines for downwind areas to attain the NAAQS. EPA's proposed approval only discusses this deadline in its conclusion that emission reductions will not be achieved in time to meet it. The commenter asserts that EPA cannot approve a SIP that delays eliminating emissions that presently contribute to downwind nonattainment past New York's attainment deadlines.

One commenter challenges the future year selection of 2023 and states that it perpetuates Connecticut citizens' health and economic burdens. The commenter states that Connecticut faces a reclassification to serious nonattainment, has previously been reclassified to moderate, and has not met attainment due to ''overwhelming'' transport from upwind areas, including Kentucky.

Response: EPA disagrees that it has failed to consider the appropriate attainment dates in relying on the 2023 modeling results to approve Kentucky's SIP submission.

First, to the extent the commenters suggest that the current measured design values may preclude EPA's reliance on modeled projections, EPA does not agree. As explained earlier in this action, EPA has reasonably interpreted the term ''will'' in the good neighbor provision as permitting states and EPA in implementing the good neighbor provision to evaluate downwind air quality problems, and the need for further upwind emission reductions, prospectively and coordinated with anticipated compliance timeframes. *See North Carolina,* 531 F.3d at 913–14.

EPA further disagrees that the D.C. Circuit's *North Carolina* decision constrains EPA to choosing the next relevant attainment date as its future analytic year. The *North Carolina* decision faulted EPA for not giving *any* consideration to upcoming attainment dates in downwind states when setting compliance deadlines for upwind emissions; there, EPA had evaluated *only* the feasibility of implementing upwind controls. *Id.* at 911–12. But the court did not hold that the CAA imposes strict deadlines for the implementation of good neighbor emission reductions. Nor did the court opine that EPA would never be justified in setting compliance dates that post-date downwind attainment dates or consider the feasibility of implementing upwind emission reductions. Indeed, in remanding the rule, the D.C. Circuit acknowledged that upwind compliance dates may, in some circumstances, follow attainment dates. *Id.* at 930 (instructing EPA to ''decide what date, whether 2015 or earlier, is as expeditious as practicable for states to eliminate their significant contributions to downwind nonattainment'').[6]

While the commenters suggest that the court's reference to the phrase ''consistent with the provisions of this subchapter''—*i.e.,* CAA Title I—imports downwind attainment dates from section 181 into the good neighbor provision, CAA section 181 itself does not impose inflexible deadlines for attainment. The general timeframes provided in the section 181(a)(1) table may be (and often are) modified pursuant to other provisions in section 181, considering factors such as measured ozone concentrations and the feasibility of implementing additional emission reductions. For example, the six-year timeframe for attainment of the 2008 ozone NAAQS in moderate areas could be extended by up to two years (to 2020), pursuant to section 181(a)(5). And pursuant to section 181(b)(2), when downwind areas are unable to implement sufficient reductions via feasible control technologies by one attainment date, those areas will be ''bumped up'' in classification and given a new attainment date with additional time to attain. With ''bump-ups'' like this, the date for an area to attain the 2008 ozone NAAQS could be extended to 2021, 2027, and 2032, and each of these deadlines could be subject to further extensions of up to two years pursuant to section 181(a)(5). *See also Whitman* v. *Am. Trucking Ass'ns, Inc.,* 531 U.S. 457, 493–94 (2001) (Breyer concurring) (considerations of costs and technological feasibility may affect deadlines selected by EPA). Thus, the commenters' premise that all upwind emission reductions must occur before the earliest downwind attainment date, feasible or not, is inconsistent with the framework of section 181 as it applies to downwind states.

Similarly, the D.C. Circuit's decision in *NRDC,* 777 F.3d at 468, does not stand for the proposition that EPA should ignore the feasibility of implementing emission reductions when addressing the good neighbor provision, or that such emission reductions are strictly required to be in place by a date certain. There, EPA had set 2008 ozone standard attainment dates in December 2015 so that downwind states could use data from the 2015 ozone season to demonstrate attainment. *Id.* at 465. The *NRDC* court simply held that section 181(a)(1) did not allow EPA this type of flexibility. The court's holding in *NRDC* did not speak to state planning or implementation requirements that apply for areas subject to those dates, or the various ways in which the date may be legally extended under the CAA. *NRDC* is therefore inapposite as to how the good neighbor provision should be harmonized with CAA statutory or regulatory dates for downwind states.

Here, EPA has considered the downwind attainment dates for the 2008 ozone NAAQS, consistent with the court's holding in *North Carolina.* As the commenters note, areas classified as moderate nonattainment areas currently have attainment dates of July 20, 2018, but the 2017 ozone season was the last full season from which data could be used to determine attainment of the NAAQS by that date. Given that the 2017 ozone season has now passed, it is not possible to achieve additional emission reductions by the moderate area attainment date. It is therefore necessary to consider what subsequent attainment dates should inform EPA's analysis. The next attainment dates for the 2008 ozone NAAQS will be July 20, 2021, for nonattainment areas classified as serious, and July 20, 2027, for nonattainment areas classified as severe.[7] Because the various attainment

[6] EPA also disagrees with the commenters' contention that the *North Carolina* decision explicitly requires emission reductions, 531 F.3d at 911–912, necessary to address the ''interfere with maintenance clause'' of the good neighbor provision to be aligned with downwind attainment dates. The commenters are conflating the court's holding that EPA should consider downwind attainment dates when setting compliance schedules for upwind state emission reductions with the court's separate holding that EPA must give independent significance to the ''interfere with maintenance'' clause when identifying downwind air quality problems. *id.* at 910–911. The court did not explicitly indicate whether EPA was required to align emission reductions associated with maintenance receptors with downwind attainment dates, indicating only that EPA must ''provide a sufficient level of protection to downwind states projected to be in *nonattainment* as of'' the future analytic year. *Id.* at 912 (emphasis added).

[7] While there are no areas (outside of California) that are currently designated as serious or severe for the 2008 ozone NAAQS, the CAA requires that EPA reclassify to serious any moderate nonattainment areas that fail to attain by their attainment date of July 20, 2018. Similarly, if any area fails to attain by the serious area attainment date, the CAA requires that EPA reclassify the area to severe.

deadlines are in July, which is in the middle of the ozone monitoring season for all states, data from the calendar year immediately prior to the attainment date (*e.g.,* data from 2020 for the 2021 attainment date and from 2026 for the 2027 attainment date) are the last data that can be used to demonstrate attainment with the NAAQS by the relevant attainment date.

As discussed in the NPRM and later in this action, EPA has also considered the timeframes that would likely be required for implementing further emissions reductions as expeditiously as practicable and concluded that additional control strategies at EGUs and non-EGUs could not be implemented by the July 2021 serious area attainment date, and certainly not by the 2020 ozone season immediately preceding that attainment date. This consideration of feasibility is consistent with the considerations affecting the statutory timeframes imposed on downwind nonattainment areas under section 181. Therefore, because new emissions controls for sources in upwind states cannot be implemented feasibly for several years, and at that later point in time air quality will likely be cleaner due to continued phase-in of existing regulatory programs, changing market conditions, and fleet turnover, it is reasonable for EPA to evaluate air quality (at step one of the four-step framework) in a future year that is aligned with feasible control installation timing in order to ensure that the upwind states continue to be linked to downwind air quality problems when any potential emissions reductions would be implemented and to ensure that such reductions do not over-control relative to the identified ozone problem.

Comment: One commenter notes that Delaware's Sussex County is a standalone nonattainment area and New Castle County is part of the Philadelphia-Wilmington-Atlantic City, PA-NJ-MD-DE nonattainment area (Philadelphia NAA), with an attainment date of July 20, 2015. The CAA requires states to attain the ozone standards as expeditiously as practicable, but states significantly impacted by ozone pollution from upwind states will be unable to do so if good neighbor SIPs are not submitted with adequate remedies implemented prior to downwind attainment dates. Such SIPs are required to be addressed prior to the submission of attainment demonstrations by nonattainment areas, such that Kentucky should have addressed its significant contribution for the 2008 ozone NAAQS by March 2011. The commenter notes that states, including Kentucky, failed to submit SIPs and EPA failed to issue FIPs until the CSAPR Update was issued on October 26, 2016, well after the attainment dates for many areas, including Delaware.

The commenter contends that EPA should have acted in a timely manner when states failed to adopt good neighbor provisions, and contends that Kentucky should have tied its analysis of significant contribution to the air quality at the time designations were made. The commenter asserts that EPA should have coupled its analysis and remedy with marginal attainment dates, as the first deadline for which nonattainment areas had to attain the standard. The commenter notes that EPA aligned its modeling analysis and implementation of the CSAPR Update with the moderate area attainment dates in 2018. While the commenter acknowledges that EPA could not have tied implementation of the CSAPR Update to the 2015 marginal area attainment date which had already passed, the commenter contends EPA should have addressed the need for good neighbor reductions relative to marginal nonattainment by aligning contribution modeling analysis for those states to some timeframe prior to the marginal attainment deadline. Instead, EPA's process takes place after the attainment dates, at which point EPA concludes that Delaware and all other areas outside of California do not need reductions to attain and maintain the NAAQS.

Response: As explained earlier in this action, EPA has reasonably interpreted the term ''will'' in the good neighbor provision as permitting states and EPA in implementing the good neighbor provision to evaluate downwind air quality problems, and the need for further upwind emission reductions, prospectively and coordinated with anticipated compliance timeframes. *See North Carolina,* 531 F.3d at 913–14. Accordingly, EPA does not agree that Kentucky should tie its analysis to either the date when designations were made or the marginal area attainment date, both of which have now passed. Were EPA to have evaluated good neighbor obligations based on a retrospective analysis of downwind air quality, the Agency could not have ensured that any emission reductions that may have been required would actually be necessary to address downwind air quality problems at the time they were implemented, which could result in impermissible over-control under the Supreme Court's holding in *EPA* v. *EME Homer City Generation, L.P.,* 134 S. Ct. 1584, 1608 (2014) (*EME Homer City*). Whether Kentucky or EPA acted in a timely manner to develop a SIP or promulgate a FIP, respectively, does not lessen the obligation to comply the Supreme Court's holding in the present action.

Comment: One commenter alleges that EPA's decision to untether its action from statutory nonattainment dates and instead focus on 2023 is arbitrary and capricious, as the ''agency has relied on factors which Congress has not intended it to consider'' and ''entirely failed to consider an important aspect of the problem.'' *Motor Vehicle Mfrs. Ass'n* v. *State Farm Mut. Auto. Ins. Co.,* 463 U.S. 29, 43 (1983). The commenter suggests that EPA takes a novel approach of selecting an analytic year five years in the future based on concerns that by the time any controls can be implemented, they may no longer be needed. The commenter cites both CSAPR and the CSAPR Update as examples of how EPA analyzed projected emissions in the upcoming year. The commenter states that EPA's logic is almost tantamount to urging upwind states to wait because downwind states will take care of the problem themselves.

The commenter states that technical feasibility has been specifically rejected as a basis for ignoring attainment deadlines in *North Carolina,* and over-control is at best a secondary factor which does not justify complete departure from the plain text and controlling precedent. The commenter states that EPA's emphasis on over-control is contrary to *EME Homer City,* stating that when the Supreme Court upheld the consideration of cost-effectiveness in CSAPR and upheld EPA's immediate issuance of a FIP after disapproving a SIP, the Court clearly indicated that the key statutory mandate of the good neighbor provision is to expeditiously ''maximize achievement of attainment downwind.'' 134 S. Ct. at 1590. The Court made concern about over-control secondary to that goal. *Id.* at 1609.

The commenter further asserts that reliance on feasibility of implementing controls to justify delaying action or analysis until 2023 is foreclosed by *North Carolina,* which specifically rejected the compliance deadlines in CAIR that were based on feasibility restraints but were not consistent with compliance deadlines for downwind states. When EPA has considered feasibility in analyzing ozone related good neighbor obligations since *North Carolina,* it has not been in the context of selecting an analytic year, but in allocating emission budgets. The commenter states that EPA's argument regarding feasibility also includes the need for additional time for planning and coordination between EPA and states, but asserts that the courts have rejected claims that additional time is necessary to improve the quality or soundness of regulations. *Sierra Club* v. *Johnson,* 444 F. Supp. 2d 46, 53 (D.D.C. 2006).

One commenter states that EPA should focus on achieving available emission reductions on or before the 2020 ozone season (the next applicable attainment date), rather than looking ahead to 2023. The commenter states that by focusing on the timeframes to install new controls, EPA has not conducted an analysis of reductions available in the near term to see if there are additional NO_X reduction strategies that are available prior to 2023. The commenter identified optimization of previously installed post-combustion controls as a potential NO_X reduction strategy with reductions available immediately and at low cost. The commenter stated that EPA's concern with over-control must be evaluated relative to the attainment deadlines for the standard. Therefore, relying on EPA's 2023 modeling is inconsistent with the intent of the CAA to achieve standards as expeditiously as practicable.

Another commenter states that EPA's rationale for use of a 2023 modeling year rests on a speculative guess of the time required for two categories of cost-effective controls to be installed, starting from the date of its approval. The commenter contends that EPA cannot rely on the cost-effectiveness of EGU controls as the exclusive consideration in justifying a further five-year delay when a full remedy for Kentucky has already been unlawfully delayed for years. Even if EPA has a general duty to avoid over-control of upwind emissions, it cannot point to this duty to justify a strategy that postpones necessary controls. Rather, EPA should require these controls now, and then reevaluate them in a few years at the point when the purported over-control may actually occur.

Response: EPA disagrees with the commenters' assertion that EPA has inappropriately weighted concerns about over-control of upwind state emissions. The Supreme Court and the D.C. Circuit have both held that EPA may not require emissions reductions (at step three of the framework) that are greater than necessary to achieve attainment and maintenance of the NAAQS in downwind areas. *EME Homer City,* 134 S. Ct. at 1608; *EME Homer City Generation, L.P.* v. *EPA,* 795 F.3d 118, 127 (D.C. Cir. 2012) (*EME Homer City II*). While the Supreme Court indicated that ''EPA must have leeway'' to balance the possibilities of under-control and over-control and that ''some amount of over-control . . . would not be surprising,'' the Court did not indicate that such over-control was required. 134 S. Ct. at 1609. Rather, the Court held, ''If EPA requires an upwind State to reduce emissions by more than the amount necessary to achieve attainment in every downwind State to which it is linked, the Agency will have overstepped its authority, under the Good Neighbor Provision.'' *Id.* at 1608. On remand in *EME Homer City II,* the D.C. Circuit gave that holding further meaning when it determined that the CSAPR phase 2 ozone season NO_X budgets for 10 states were invalid because EPA's modeling showed that the downwind air quality problems to which these states were linked when EPA evaluated air quality projections in 2012 would be entirely resolved by 2014, when the phase 2 budgets were scheduled to be implemented. 795 F.3d at 129–30. Thus, the Court did not find that over-control was a secondary consideration, but rather that it was a constraint on EPA's authority.

To the extent that the commenters note that EPA chose an earlier analytic year in prior rulemakings, EPA notes that it has not done so in all rulemakings. In the NO_X SIP Call, EPA evaluated air quality in 2007, nine years after the rule was promulgated. 63 FR 57377 (October 27, 1998). In CAIR, which was promulgated in 2005, EPA evaluated air quality in 2009 and 2010, for the ozone and $PM_{2.5}$ NAAQS, respectively. 70 FR 25241 (May 12, 2005). Thus, EPA's approach in this action is not inconsistent with these prior actions. Although EPA evaluated relatively more near-term air quality in CSAPR and CSAPR Update, EPA expected that certain cost-effective emission reductions could be implemented in the near-term in those actions. Here, EPA has already analyzed and implemented those cost-effective control strategies that could be implemented quickly (including the optimization of existing post-combustion controls) to address the 2008 ozone NAAQS through the CSAPR Update FIPs. Accordingly, any further emission reductions that may be required to address the 2008 ozone NAAQS would necessarily be implemented through control strategies that cannot be implemented in the near term and require a longer period for implementation. In addition, NO_X emissions levels are expected to decline in the future through the combination of the implementation of existing local, state, and federal emissions reduction programs and changing market conditions for generation technologies and fuels.[8] Therefore, were EPA to evaluate downwind ozone concentrations and upwind state linkages in a future year that precedes the date when actual compliance is anticipated (*i.e.,* the timeframe within which additional control strategies can feasibly be implemented), EPA could not ensure that the emission reductions will be ''*necessary* to achieve attainment'' in any downwind area by the time they were implemented. Such an approach would only replicate the circumstances the D.C. Circuit found impermissible in CSAPR.

The commenter's citation to *Sierra Club* v. *Johnson* is inapposite. In that case, EPA sought more time to promulgate regulations under the CAA after failing to perform the mandatory duties within the statutorily prescribed timeframe. 444 F. Supp. 2d at 52. Therefore, the court's reference to the Agency's need for ''additional time'' is in reference to the time required to conduct the rulemaking process. *Id.* at 53. The court was not interpreting the requirements of the good neighbor provision or any other provision regarding the time required for states or sources to implement controls under the CAA.

Finally, the commenters misunderstand EPA's evaluation to the extent they suggest that EPA relied on the cost-effectiveness of controls for this action. EPA evaluated the feasibility of implementing various control options, without regard to cost, that had not previously been included in EPA's analysis of cost-effective controls in the CSAPR Update. EPA concluded that additional controls on either EGUs or non-EGUs—when considering multiple projects across multiple states and allowing for planning and permitting—would generally require four years or more to implement, which would lead to an implementation timeframe associated with the 2023 ozone season. Because the air quality modeling results for 2023 showed that air quality problems in the eastern U.S. would be resolved by 2023, EPA did not further evaluate the cost-effectiveness of the control options considered for the feasibility analysis.

Comment: One commenter contends that EPA's insistence on fleetwide compliance is based on a circular argument wherein such a scheme would

[8] Annual Energy Outlook 2018. *Electricity Supply, Disposition, Prices, and Emissions.* Reference Case. Department of Energy, Energy Information Administration.

cause labor and material shortages that would, in turn, require four years to implement, at which point they will be unnecessary. The commenter points out that this means there will be no labor shortage. The commenter notes that this is contrary to EPA's prior approaches in CSAPR where the agency segregated controls based on feasibility, including multiple phases, and conducted emissions analyses for both phases.

One commenter states that EPA cannot rely on its analysis of alleged labor and materials shortages relating to installation of new controls at a ‘‘fleet’’ level. While EPA may prefer a regional approach, Congress did not establish a regional implementation plan requirement or mechanism, and EPA is not considering whether to approve a regional transport rule, nor a group of SIPs or FIPs. EPA is proposing to approve a single SIP from a single state and has not undertaken a study of the labor or materials market in Kentucky. Therefore, EPA's justification for allowing the delay of EGU controls for up to 48 months based on its speculative estimate of the time needed to install these controls on all sources within some unidentified region is arbitrary and capricious.

One commenter states EPA's approach to evaluating potential NO_X controls on a regional, rather than state-specific, basis ‘‘undermines the intent of the CAA’’ and causes Connecticut to be required to spend more to attempt to comply with the CAA than states that emit and contribute more to Connecticut's ozone problem.’’ The commenter states as an example that it recently promulgated a reasonably available control technology (RACT) rule with a minimum control cost of $13,000 per ton. The commenter states that EPA's under controlling of emissions has led to delays in attainment and added cost for Connecticut despite ozone exceedances being overwhelmingly due to transported emissions.

One commenter states that guidance provided in an informational memorandum issued by EPA in January 2015 [9] specifically references upwind state responsibilities in determining the states' good neighbor SIP transport obligations. EPA further states in its proposal that it believes the most appropriate approach to evaluating potential upwind obligations for Kentucky (where several other states are also linked to the Harford County receptor) is to evaluate potential NO_X control strategies on a regional, rather than state-specific basis. The commenter asserts that this is inconsistent with the scope of EPA's SIP approval authority under CAA section 110, which involves intra-state, rather than regional, plans to attain the NAAQS. The commenter also contends that EPA's position is contrary to its previous positions in denying Maryland's request for a super-regional nonattainment area under CAA section 107, and in denying Maryland's section 176A petition requesting expansion of the Ozone Transport Region (OTR). To the contrary, EPA stated in those actions that CAA sections 110 and 126 were more appropriate mechanisms for controlling interstate pollution transport.

Response: EPA disagrees with the commenters that it is inappropriate to evaluate the feasibility of implementing NO_X controls on a regional or fleetwide basis. EPA's analysis of the feasibility of NO_X control strategies reflects the time needed to plan for, install, test, and place into operation new EGU and non-EGU NO_X reduction strategies regionally—*i.e.,* across multiple states. This regional analytic approach is consistent with the regional nature of interstate ozone pollution transport. The Agency adopted this approach based on previous interstate ozone transport analyses showing that where eastern downwind ozone problems are identified, multiple upwind states typically are linked to these problems. *See* 81 FR at 74538 (October 26, 2016). Specifically of relevance to this action, EPA's assessment in the CSAPR Update found that 21 states would continue to contribute greater than or equal to 1 percent of the 2008 ozone NAAQS to identified downwind nonattainment or maintenance receptors in multiple downwind states in 2017, even after implementation of the CSAPR Update FIPs. Thus, to reasonably address these ozone transport problems, EPA must identify and apportion emission reduction responsibility across multiple upwind states. In other words, EPA's analysis should necessarily be regional, rather than focused on individual linkages. Where such an analysis is needed for multiple states, the inquiry into the availability and feasibility of control options is necessarily considerably more complicated than for a single state or sector.

EPA further disagrees that this approach is inconsistent with EPA's prior rulemakings, like CSAPR, where the Agency implemented controls in multiple phases. In CSAPR, EPA evaluated downwind air quality and upwind state linkages based on 2012 air quality and contribution modeling. The commenter is correct that EPA then implemented two phases of emission budgets, with a first phase of reductions implemented beginning in 2012 and a second phase of reductions implemented beginning in 2014. However, in subsequent litigation, a number of the phase 2 ozone season NO_X emission budgets were remanded because EPA's modeling showed that there would no longer be downwind air quality problems in many areas in 2014. *See EME Homer City II,* 795 F.3d at 129–30. Thus, EPA cannot require additional emission reductions in a future year if EPA's data show that there will no longer be downwind air quality problems in that year. Here, EPA implemented a first phase of post-CSAPR emission reductions in 2017 via the CSAPR Update. In this action, Kentucky and EPA have evaluated whether a second phase of post-CSAPR emission reductions is necessary and authorized by the good neighbor provision and determined that it is not because downwind air quality problems identified in 2017 with respect to the 2008 ozone NAAQS will be resolved by 2023.

EPA does not agree that this approach is inconsistent with the scope of EPA's authority under section 110. The fact that EPA is, in this action, acting on a single SIP does not alter the regional nature of ozone pollution transport. As the Supreme Court noted, the good neighbor provision presents a ‘‘thorny causation problem’’ with respect to ozone pollution transport in light of the ‘‘collective and interwoven contributions of multiple upwind States,’’ *EME Homer City,* 134 S. Ct. at 1604. The Court affirmed EPA's consideration of the problem on a regional rather than localized scale. *Id.* at 1606–07 (affirming EPA's use of cost to apportion upwind state emission reduction responsibility). The Court did not indicate that this endorsement of a regional assessment was appropriate only when EPA is taking a regional action. Rather, it is reasonable for EPA to interpret the implementation of the good neighbor provision for a particular NAAQS consistently regardless of the scope of the action. Consistent with this opinion, it is therefore also reasonable for EPA to view an individual state's implementation plan through a regional lens.

EPA also does not agree that the Agency's approach to evaluating interstate ozone transport under section

[9] Memorandum from Stephen D. Page to Regional Air Division Directors, ‘‘Information on the Interstate Transport ‘Good Neighbor’ Provision for the 2008 Ozone National Ambient Air Quality Standards (NAAQS) under Clean Air Act (CAA) Section 110(a)(2)(D)(i)(I)’’ (January 22, 2015) (January 2015 Transport Memo), *available at https://www.epa.gov/sites/production/files/2015-11/documents/goodneighborprovision2008naaqs.pdf.*

110 is inconsistent with its recent action on a section 176A petition to expand the OTR or EPA's designations under section 107. EPA denied the section 176A petition because it concluded that any remaining interstate transport problems could be better addressed via the good neighbor provision, which EPA and the states can use to make decisions regarding which precursor pollutants to address, which sources to regulate, and what amount of emission reductions to require, flexibilities that are not available with respect to control requirements applicable to sources in the OTR. *See* 82 FR 51244–46 (November 3, 2017). EPA did not deny the petition because it concluded that ozone transport was not regional; on the contrary, EPA explicitly acknowledged the regional nature of ozone transport in its action. *See* 82 FR 6511 (January 19, 2017).

With respect to the request for a super-regional nonattainment area under section 107, EPA has consistently explained that such an approach is not consistent with the statutory language.[10] CAA section 107(d)(1) provides that areas designated nonattainment should include any ''nearby'' area contributing to a violation of the NAAQS. EPA has repeatedly explained that the proposal for broad super-regional nonattainment areas go beyond this statutory definition by including areas that are not necessarily ''nearby'' but contribute to nonattainment through long-range transport, an issue that other sections of the CAA, like the good neighbor provision, are designed to address. Thus, rather than contradict EPA's analysis of ozone transport regionwide, EPA's prior actions regarding requests for a super-regional nonattainment area support EPA's view that such an approach is appropriately applied under the good neighbor provision.

Finally, EPA does not agree that its conclusion that no additional emission reductions would be required of upwind states undermines its fleetwide analysis of labor and material shortages. EPA's analysis was based on the assumption that *if* additional controls would be required of upwind states, they would be required on a region-wide basis. This was a reasonable assumption in light of the complex, regional nature of ozone pollution transport. Had EPA identified remaining downwind air quality problems in the future analytic year, it would have been reasonable to assume that multiple upwind states would contribute to any remaining air quality problem consistent with EPA's previous ozone transport analyses and thus multiple upwind states could be required to concurrently implement emission reductions. As explained earlier, while EPA has phased-in application of controls in some circumstances, those phases were implemented based on consistent, region-wide compliance deadlines. The commenters do not explain how EPA could set different compliance dates for different states in the CSAPR Update region to require additional emission reductions while also insuring that states' obligations were addressed in a consistent, non-arbitrary manner that did not lead to over- or under-control.

Comment: One commenter states that EPA's argument that extensive planning is required to install controls is uncompelling because EPA has had ample time to plan. The CSAPR Update repeatedly emphasizes that states, including Kentucky, were expected to have remaining obligations after the implementation of the CSAPR Update. Moreover, EPA has been on notice that it would be required to take action on Kentucky by June 2018 as required by court order.

Response: The commenter misunderstands EPA's reference to the planning required to implement additional controls. The individual sources, not EPA, must engage in appropriate planning anytime they install new control devices. As discussed in more detail later, installing new selective catalytic reduction (SCR) or selective non-catalytic reduction (SNCR) controls for EGUs or non-EGUs generally involves the following steps: Conducting an engineering review of the facility; advertising and awarding a procurement contract; obtaining a construction permit; installing the control technology; testing the control technology; and obtaining or modifying an operating permit.[11] Scheduled curtailment, or planned outage, for pollution control installation would be necessary to complete either SCR or SNCR projects. Given that peak demand for EGUs and rule compliance would both fall in the ozone season, such sources would likely try to schedule installation projects for the ''shoulder'' seasons (*i.e.,* the spring and/or fall seasons), when electricity demand is lower than in the summer, reserves are higher, and ozone season compliance requirements are not in effect. In addition to the coordination of scheduled curtailment, an appropriate compliance timeframe would need to accommodate the additional coordination of labor and material supply necessary for any fleet-wide mitigation efforts. More details regarding these considerations are outlined later in this preamble.

Many of these materials, installation, and labor concerns are also relevant for non-EGU control technologies. Thus, the implementation of new EGU and non-EGU NO_X reduction strategies, especially when implemented across a broad region of states, requires extensive time and planning by the affected sources.

Moreover, while EPA indicated that the CSAPR Update *may* not fully address states' good neighbor obligations, the Agency did not definitively conclude that more emission reductions would necessarily be required. Nor did the Agency indicate what sources would likely be controlled, in which states, or via what control strategies *if* additional emission reductions were in fact required. Thus, EPA does not agree with the commenter's suggestion that it was reasonable for any particular sources to begin planning for the implementation of new controls before EPA or the states completed further analysis and promulgated requirements actually requiring additional emission reductions.

Comment: One commenter states that EPA's finding that implementation of control strategies is not feasible until during or after the 2022 ozone season is false and contradicted by the evidence EPA presents. The commenter contends that EPA's conclusion that 48 months may be necessary to implement emission reductions is contrary to EPA's own experience of pollution control and belied by EPA's own finding that Kentucky will likely outperform its CSAPR Update obligations. Both CSAPR and CSAPR Update were implemented on much shorter timescales, with immediate reductions available in both cases in under one year, and post-combustion controls being required within three years under CSAPR.

Response: EPA has evaluated the feasibility of implementing controls on a region-wide basis, considering markets for labor and materials necessary for implementing controls across multiple sources in multiple states. Thus, examples where individual sources might have installed controls more

[10] *See, e.g.,* Responses to Significant Comments on the State and Tribal Designation Recommendations for the 2008 Ozone National Ambient Air Quality Standards (NAAQS), EPA–HQ–OAR–2008–0476–0675, Section 3.1.2 (April 2012); New York-Northern New Jersey, Long-Island, NY-NJ-CT Nonattainment Area, Final Area Designations for the 2015 Ozone National Ambient Air Quality Standards Technical Support Document, at 28–29.

[11] Final Report: Engineering and Economic Factors Affecting the Installation of Control Technologies for Multipollutant Strategies, EPA–600/R–02/073 (October 2002), *available at https://nepis.epa.gov/Adobe/PDF/P1001G0O.pdf.*

quickly do not speak to what is reasonable to require across a state or a region, and therefore do not contradict EPA's analysis.

Moreover, EPA's projections of EGU emission levels in Kentucky in 2023 also do not contradict EPA's conclusion that 48 months should be provided for the region-wide implementation of new NO_X post-combustion controls. Kentucky's CSAPR Update budget is not an emissions floor. It represents emission reductions reflecting control strategies determined to be cost-effective and feasible to implement by the first compliance year in 2017 (*e.g.,* SCR optimization). However, market conditions that did not influence quantification of the budgets can also drive further emission reductions in future years, including variables such as low natural gas prices and new, lower-cost competitor generation in downwind states, and can lead to utility decisions to retire aging assets. In addition, sources may install new controls after the 2017 ozone season that would not have been considered when EPA calculated the budgets.[12] These factors can and do lead to state-emission levels often being significantly lower than its emission budget in future compliance years. EPA's projected emissions level in 2023 captures these types of recently announced and known infrastructure changes and fleet turnover and it is therefore reasonable that the 2023 projected EGU emissions would be below Kentucky's CSAPR Update budget established for a first compliance year of 2017.

While CSAPR and CSAPR Update were implemented more quickly than the four years considered in this action, neither CSAPR nor CSAPR Update anticipated that sources would implement new post-combustion NO_X controls. *See* 76 FR 48302 (August 8, 2011); 81 FR 74541 (October 26, 2016). Rather, the ozone season emission budgets for both rules only considered the near-term emission reductions that could be achieved from implementation of control strategies other than new post-combustion controls, including the optimization of existing post-combustion controls and implementation of new combustion controls. *See* 76 FR 48256 (August 8, 2011); 81 FR 74541 (October 26, 2016). With respect to the 2008 ozone NAAQS, EPA already implemented the near-term emission reductions that were cost-effective in the CSAPR Update. Accordingly, EPA disagrees with the commenter's suggestion that there may be substantial immediate NO_X reductions available that could be implemented on a more immediate timeframe at this time.

EPA notes that it did evaluate post-combustion controls in CSAPR with respect to sulfur dioxide (SO_2) emission reductions necessary to address $PM_{2.5}$ and established emission budgets reflecting the possible implementation of scrubbers three years following rule promulgation. However, to the extent labor and supply markets were a consideration for installation timing requirements for scrubbers in CSAPR in 2011, those variables may have changed over the last seven years. Moreover, EPA established budgets for NO_X in CSAPR based on a cost threshold of $500 per ton, which was not anticipated to drive significant, labor- and resource-intensive SCR installation within that timeframe. *See* 76 FR 48302 (August 8, 2011).

Comment: One commenter asserts that EPA has not explained why it still lacks information on the potential for cost-effective emission reductions from non-EGUs, two years after the CSAPR Update was promulgated. EPA's analysis is lacking any analysis of actual cost-effectiveness numbers for non-EGU controls, relying instead on an ''implication'' from two-year old public comments that non-EGU controls would be relatively less cost-effective than EGU controls. EPA ignores its own framework, which calls for determining the availability and cost-effectiveness of non-EGU controls, despite identifying the need to do so in the CSAPR Update. In a footnote, the commenter notes that EPA represented to the court in a mandatory duty suit that it was taking steps to improve its data to evaluate NO_X reduction potential from non-EGUs, which it expected to complete by November 2017. EPA has not accounted for any of the stakeholder reviewed information on non-EGU emissions reductions and costs that it should have amassed in the last year and a half.

The commenter further contends that EPA has changed its regulatory position without reasonable explanation. In the CSAPR Update, EPA indicated that evaluating full interstate transport obligations is subject to an *evaluation* of the contribution to interstate transport from non-EGUs, but EPA has unexpectedly changed course and stated that no such evaluation is necessary. This is an unexplained, arbitrary and capricious change in policy.

One commenter states that with respect to non-EGU sources, EPA ''has documented multiple cost-effective controls that can be implemented within one year'' in the ''Assessment of Non-EGU NO_X Emissions Controls, Costs of Controls and Time for Compliance Final TSD'' dated August 2016 available in the docket for the final CSAPR Update Rule. The commenter notes that EPA has dismissed these potential benefits as ''uncertain'' and states that EPA ''cannot continue to invoke the prospect of an uncertain future to limit its responsibility to satisfy its statutory mandate.''

Response: EPA first notes that it is not relying on its lack of information with respect to the cost-effectiveness of non-EGUs to support this final action. EPA evaluated the feasibility of implementing various control options, without regard to cost, that had not previously been included in EPA's analysis of cost-effective controls in the CSAPR Update. EPA concluded that additional controls—on either EGUs or non-EGUs—would generally require four years to implement, which would lead to an implementation timeframe associated with the 2023 ozone season. Because the air quality modeling results for 2023 showed that air quality problems in the eastern U.S. would be resolved by 2023, EPA did not further evaluate the cost-effectiveness of the control options considered for the feasibility analysis. This approach is consistent with EPA's four-step framework, and does not rely on the relative cost-effectiveness of controls for non-EGUs.

Because EPA did not need to evaluate either the cost-effectiveness or NO_X reduction potential of either EGU or non-EGU sources, the commenter's concern with whether EPA has completed steps to improve its data on these issues is irrelevant. Nonetheless, EPA notes that the particular efforts outlined in the court filing referred to by the commenter were in support of EPA's request in a mandatory duty suit that the court permit the Agency several years to develop a rulemaking to address the good neighbor obligations with respect to the 2008 ozone NAAQS for Kentucky and 20 other states. In that filing, EPA outlined steps that the Agency believed would be necessary to promulgate a rulemaking *if* EPA's analysis demonstrated that additional emission reductions would be required from sources in upwind states, including what EPA viewed as necessary analysis regarding non-EGUs. EPA acknowledged in that same

[12] EPA notes that the only new post-combustion controls assumed in EPA's projection of 2023 EGU emissions in Kentucky were at Shawnee units 1 and 4. Both of these units were required to implement SCR as of December 31, 2017 pursuant to a compliance agreement with EPA finalized in 2011. *See* 76 FR 22095 (April 20, 2011) and *https://www.epa.gov/enforcement/tennessee-valley-authority-clean-air-act-settlement.*

declaration that one possible result of the litigation could be a determination that downwind air quality problems would be resolved, in which case a cost-effectiveness analysis would be unnecessary. *See* Decl. of Janet G. McCabe para. 98, *Sierra Club* v. *Pruitt,* No. 3:15–cv–04328–JD (N.D. Cal. Dec. 15, 2016). As EPA could not know the results of any future air quality modeling before it was performed, EPA's proposed timeline assumed that such an analysis could be required. *Id.* para. 170. Ultimately, the court disagreed with EPA's proposed timeline and provided only one year—until June 30, 2018—for promulgation of a rulemaking addressing Kentucky's good neighbor obligation, which was insufficient time to complete all of the steps outlined in EPA's declaration, thereby requiring EPA to prioritize certain steps and eliminate others, including the additional efforts intended to improve data regarding the cost-effectiveness of controls. Nonetheless, because the first step of EPA's analysis demonstrated that there would be no remaining air quality problems in 2023 in the eastern U.S., it was unnecessary for EPA to finalize the efforts to improve its data regarding the cost-effectiveness of controls before finalizing this action. Thus, the representations that EPA made to the court regarding the steps necessary to take this action no longer apply under the present circumstances.

Thus, EPA's analysis is not a change in policy. In the CSAPR Update, EPA only stated it could not conclude, at that time, that additional reductions from NO_X sources (including non-EGUs) would not be necessary to fully resolve these obligations. While EPA did indicate that it anticipated the need to evaluate non-EGUs to fully evaluate the full scope of upwind states' good neighbor obligations, the Agency has done so here. In selecting the appropriate future analytic year in which to evaluate air quality, contributions, and NO_X reduction potential, EPA considered the implementation timeframes for controls at EGUs as well as non-EGUs. As noted in the NPRM and explained further in this action, EPA's analysis showed that there would be no remaining air quality problems in 2023 in the eastern U.S., and thus EPA has concluded that no such additional reductions beyond those on-the-books or on-the-way are necessary, whether from non-EGUs or otherwise, to bring downwind areas into attainment of the 2008 ozone NAAQS.

Finally, the commenter is correct that EPA included preliminary estimates of installation times for some non-EGU NO_X control technologies in a technical support document for the CSAPR Update entitled Assessment of Non-EGU NO_X Emission Controls, Cost of Controls, and Time for Compliance Final Technical Support Document (Final Non-EGU TSD). These preliminary estimates were based on research from a variety of information sources, including:

- *Typical Installation Timelines for NO_X Emissions Control Technologies on Industrial Sources, Institute of Clean Air Companies,* December 2006 (all sources except cement kilns and reciprocating internal combustion engines (RICE)); [13]
- *Cement Kilns Technical Support Document for the NO_X FIP,* US EPA, January 2001; [14] and
- *Availability and Limitations of NO_X Emission Control Resources for Natural Gas-Fired Reciprocating Engine Prime Movers Used in the Interstate Natural Gas Transmission Industry,* Innovative Environmental Solutions Inc., July 2014 (prepared for the INGAA Foundation).[15]

EPA's analysis in the Final Non-EGU TSD focused on potential control technologies within the range of costs considered in the final CSAPR Update for EGUs, *i.e.,* those controls available at a marginal cost of $3,400 per ton (2011 dollars) of NO_X reduced or less. EPA's analysis did not evaluate implementation timeframes or potential emissions reductions available from controls at higher cost thresholds. *See* Final Non-EGU TSD at 18. This focus excluded some emissions source groups with emissions reduction potential at a marginal cost greater than $3,400 per ton, including: Industrial/commercial/institutional boilers using SCR and low-NO_X burners (LNB); and catalytic cracking units, process heaters, and coke ovens using LNB and flue gas recirculation. However, while the emissions reduction potential from these source groups is uncertain, the timeframe for these control technologies would be subject to similar considerations and limitations discussed in the following paragraphs.

Among the control technologies that were evaluated in the Final Non-EGU TSD, EPA identified six categories of common control technologies available for different non-EGU emissions source categories. *Id.* at 19. For four of the technology categories (SNCR, SCR, LNB, and mid-kiln firing), EPA preliminarily estimated that such controls could be installed in approximately one year or less in some unit-specific cases. Installation time estimates presented in the Final Non-EGU TSD begin with control technology bid evaluation (bids from vendors) and end with the startup of the control technology.[16] *See* Final Non-EGU TSD at 20. For the other two technology categories (biosolid injection technology (BSI) and OXY-firing) as well as one emissions source category (RICE), EPA had no installation time estimates or uncertain installation time estimates. For example, EPA found that the use of BSI is not widespread, and therefore EPA does not have reliable information regarding the time required to install the technology on cement kilns. The installation timing for OXY-firing is similarly uncertain because the control technology is installed only at the time of a furnace rebuild, and such rebuilds occur at infrequent intervals of a decade or more.

Moreover, for those categories for which preliminary estimates were available, as noted in the Final Non-EGU TSD, the single unit installation time estimates provided do not account for additional important considerations in assessing the full amount of time needed for installation of NO_X control measures at non-EGUs; those considerations include time, labor, and materials needed for programmatic adoption of measures and time required for installing controls on multiple sources in a few to several non-EGU sectors across the region. The preliminary estimates of installation time shown in the Final Non-EGU TSD are for installation at a single source and do not account for the time required for installing controls to achieve sector-wide compliance. When considering installation of control measures on sources regionally and across non-EGU sectors, the time for full sector-wide compliance is uncertain, but it is likely longer than the installation times shown

[13] Institute of Clean Air Companies, Typical Installation Timelines for NO_X Emissions Control Technologies on Industrial Sources, December 2006, *available at https://c.ymcdn.com/sites/icac.site-ym.com/resource/resmgr/ICAC_NO$_X$_Control_Installatio.pdf.*

[15] INGAA Foundation, Availability and Limitations of NO_X Emission Control Resources for Natural Gas-Fired Reciprocating Engine Prime Movers Used in the Interstate Natural Gas Transmission Industry, Innovative Environmental Solutions Inc., July 2014, *available at http://www.ingaa.org/Foundation/Foundation-Reports/NOX.aspx.*

[16] In the Final Non-EGU TSD, we present different installation time estimates for SCRs and non-EGUs than described in the NPRM and in this action for EGUs. These installation times are not inconsistent because: (i) The EGU time estimate of 39 months mentioned in the NPRM is based on multi-boiler installation and factors in a pre-vendor bid engineering study consideration, and (ii) the non-EGU SCR installation time estimates are based on single-unit installation and do not factor in pre-vendor bid evaluation.

for control measures as mentioned above for individual sources in the Final Non-EGU TSD. Regional, sector-wide compliance could be slowed down by limited vendor capacity, limited available skilled labor for manufacturers such as boilermakers (who produce steel fabrications, including those for pollution control equipment), availability of raw materials and equipment (*e.g.,* cranes) for control technology construction, and bottlenecks in delivery and installation of control technologies. Some of the difficulties with control technology installation as part of regional, sector-wide compliance at non-EGUs, such as availability of skilled labor and materials, could also have an impact on monitor installation at such sources. EPA currently has insufficient information on vendor capacity and limited experience with suppliers of control technologies and major engineering firms, which results in uncertainty in the installation time estimates for non-EGU sectors.

In summary, there is significant uncertainty regarding the implementation timeframes for various NO_X control technologies for non-EGUs. While EPA has developed preliminary estimates for some potential control technologies, these estimates do not account for additional considerations such as the impacts of sector- and region-wide compliance. For purposes of this analysis, EPA believes that it is reasonable to assume that it is likely that an expeditious timeframe for installing sector- or region-wide controls on non-EGU sources may collectively require four years or more.

Comment: One commenter adds that the CSAPR Update considered SCR to be optimized if the unit achieves a rate of 0.10 lbs/mmBtu, but EPA did not examine the particular rates that can be achieved by Kentucky's EGUs. The commenter states that EPA should require Kentucky's EGUs to achieve an optimized emissions rate at each EGU based on the past best demonstrated ozone season average rates at the unit. The commenter states that such optimized rates would be reflective of a unit's actual reported data and would be considered well controlled while still allowing for fluctuation in operating conditions, as it would encompass a whole ozone season's worth of reported emission data. The commenter states that its own analysis indicates that, even after CSAPR Update implementation, Kentucky's coal-fired EGUs could have reduced NO_X emissions by an additional 4,100 tons during the 2017 ozone season and could have reduced daily NO_X emissions by up to an additional 35 tons per day by optimizing existing controls at levels the EGUs had previously achieved. The commenter contends that optimization of existing controls is cost-effective and has already been shown to be achievable from past performance. The commenter further asserts that not requiring Kentucky's EGUs to optimize controls by this ozone season, at levels consistent with past best-demonstrated ozone season average rates at each EGU, goes against the intent of the CAA to reduce transported air pollution as expeditiously as practicable. The commenter provides suggested language that could be used to require specific coal-fired EGUs in Kentucky to optimize use of existing control technologies.

Another commenter states that EPA's argument regarding installation of control devices on uncontrolled EGUs being unworkable (based on potential for delays due to shortages in qualified labor and material) ignores the potential for immediate reductions that can be had by optimizing existing EGU controls.

Response: To the extent the commenters take issue with EPA's determination in the CSAPR Update that 0.10 lb/mmBtu was reasonable rate to reflect optimized existing SCR controls regionwide, EPA did not reopen that issue for comment in this rulemaking. EPA has already evaluated and implemented cost-effective NO_X emission reductions associated with the optimization of existing SCRs. In establishing the CSAPR Update EGU ozone season NO_X emissions budgets, the Agency quantified the emissions reductions achievable from all NO_X control strategies that were feasible to implement in less than one year and cost-effective at a marginal cost of $1,400 per ton of NO_X removed.[17] These EGU NO_X control strategies were: Optimizing NO_X removal by existing, operational SCR controls; turning on and optimizing existing idled SCR controls; installing state-of-the-art NO_X combustion controls; and shifting generation to existing units with lower-NO_X emissions rates within the same state. *See* 81 FR 74541 (October 26, 2016). Thus, for the purposes of this action, EPA considers the turning on and optimizing of existing SCR controls to be a NO_X control strategy that has already been evaluated and implemented in the final CSAPR Update. Any concerns regarding whether EPA appropriately considered these controls in the CSAPR Update are not within the scope of this action.

Moreover, the Agency believes that the resulting CSAPR Update emissions budgets are being appropriately implemented under the CSAPR NO_X Ozone Season Group 2 allowance trading program. Preliminary data for the 2017 ozone season, which is the first CSAPR Update compliance period, indicate that power plant ozone season NO_X emissions across the 22-state CSAPR Update region were reduced by 77,420 tons (or 21 percent) from 2016 to 2017.[18] As a result, total 2017 ozone season NO_X emissions from covered EGUs across the 22 CSAPR Update states were approximately 294,478 tons,[19] well below the sum of states' emissions budgets established in the CSAPR Update of 316,464 tons. At the state-level, preliminary 2017 ozone season data indicate power plant emissions within Kentucky were reduced 5,424 tons (also 21 percent) from 2016 to 2017. As a result, emissions were 19,978 tons, well below Kentucky's CSAPR Update budget of 21,115 tons. More specifically, emissions from non-optimized SCR-controlled units (*i.e.,* units with an emission rate greater than 0.10 lb/mmBtu) in the CSAPR Update region were 82,321 tons in 2016. EPA's 2023 emission estimate for these same units post-optimization was 40,590. Actual emissions in 2017 from these units was 41,706 tons, demonstrating that the CSAPR Update has successfully incentivized optimization of controls in Kentucky and across the CSAPR Update region.

To the extent that EPA's NPRM could be interpreted as having invited comment on this issue, EPA further notes that, in the CSAPR Update the Agency reviewed fleet-wide, SCR-controlled coal units from 2009 to 2015 and calculated an average ozone season NO_X emission rate across the fleet of coal-fired EGUs with SCR for each of these seven years, and used the third lowest average ozone season NO_X rate. As described in that rule, EPA determined that it was not prudent to use either the lowest or second-lowest ozone season NO_X rates to represent the optimization of controls because such a rate may reflect new SCR systems that have all new components (*e.g.,* new layers of catalyst). *See* 81 FR 74543 (October 26, 2016). EPA determined that data from these new systems are not representative of ongoing achievable NO_X rates considering broken-in

[17] The CSAPR Update was signed on September 7, 2016—approximately eight months before the beginning of the 2017 ozone season on May 1.

[18] *https://ampd.epa.gov/ampd/* (Data current as of March 1, 2018).

[19] *Id.*

components and routine maintenance schedules. Moreover, there are market conditions, maintenance, and outages (scheduled and unscheduled) that can impact the utilization rates. These factors can fluctuate yearly and provide another set of reasons to not universally assume that the lowest rate for a unit can repeat itself on a yearly basis going forward. EPA determined instead that the third lowest fleet-wide average coal-fired EGU NO_X rate for EGUs with SCR, or 0.10 lbs/mmBtu, would be representative of ongoing achievable emission rates. The commenter has not provided any information to contradict this conclusion.

EPA further notes that this rate was implemented as an upper limit, meaning that EPA did reflect units that had recently operated an a more efficient rate in the budget calculations. EPA considered the latest available data at the time of that rulemaking (*i.e.,* 2015) that captured each unit's operation and performance under the latest fleet and market conditions. EPA used 0.10 lb/mmBtu as a ceiling in its budget calculation to reflect optimization of existing controls that were not achieving that level in 2015. However, the Agency used a rate of less than 0.10 lb/mmBtu if the unit was operating at that level in 2015 and a rate of 0.075 lb/mmBtu for new SCRs. Thus, EPA's budget calculation and consequent emission reduction requirements did reflect the fact that some units can and do operate below 0.10 lb/mmBtu.

Comment: One commenter states that EPA's speculative examination of the timeline required to install and run new EGU controls based on a cost-effectiveness threshold of $1,400 is unreasonable where there are existing EGU controls that EPA admits could be run, only at a higher cost. EPA's focus on its estimated timeline for design and installation of new, cost-effective EGU controls such as SCRs and SNCRs puts cost-effectiveness above all else, and that EPA must take into account other statutory concerns and considerations (such as attainment deadlines for downwind states). The commenter contends that, while cost-effectiveness thresholds have been upheld as a reasonable consideration in prioritizing control of sources, these thresholds cannot conversely be used to justify unreasonable, protracted delay in requiring upwind emission reductions. If there are no EGU controls at a given cost threshold that can be installed in time to permit downwind states to meet their attainment deadlines, then EPA has set the cost-effectiveness threshold too low or has defined the type of controls too narrowly.

The commenter concludes that EPA's refusal to reconsider its cost-effectiveness threshold of $1,400 per ton of NO_X is arbitrary where EPA has concluded that idled SNCR controls are available for immediate emission reductions at a cost of $3,400 per ton. Moreover, EPA dismissed this control strategy without any analysis of whether SNCRs can be run at less than $3,400 per ton, which is arbitrary and capricious when downwind states such as New York are forced to reduce NO_X by implementing RACT controls at costs of more than $5,000 per ton.

One commenter states that the CSAPR Update failed to look at any short-term fixes, such as the operation of idled SNCR, that could now be benefiting downwind areas. The commenter notes that the CSAPR Update also ruled out restarting idled SNCR based on the conclusion that $3,400 per ton was not cost effective, despite the fact that New York and other downwind states commonly apply RACT at a cost threshold of $5,000 per ton and greater.

Another commenter states that the control costs of $1,400 per ton considered in the Kentucky SIP are too low and that EPA should require Kentucky to analyze all options available. The commenter states that Kentucky should not limit its control costs to those in the CSAPR Update since ''EPA considered this rule a partial remedy.'' The commenter provides as an example that ''EPA identified an additional measure that could be undertaken immediately'' in turning on existing idled SNCRs. The commenter states that EPA should also consider evaluating cost effectiveness of controls on an ozone season day rather than an annual basis, in order to address the need to lower emissions on high ozone days.

Response: EPA first notes that the commenters misunderstand EPA's evaluation in this action to the extent they suggest that Kentucky or EPA relied on the cost-effectiveness of controls in order to select an appropriate future analytic year. As explained earlier, EPA evaluated the feasibility of implementing, without regard to cost, various control options that had not previously been included in EPA's analysis of cost-effective controls in the CSAPR Update. EPA concluded that additional controls on either EGUs or non-EGUs would generally require four years to implement, which would lead to an implementation timeframe associated with the 2023 ozone season. Had EPA identified downwind air quality problems to which upwind states continued to be linked in 2023, EPA would have proceeded to the next steps in its four-step analytic framework and evaluated the cost-effectiveness of all available controls, considering the achievable emission reductions and anticipated improvements in downwind air quality at all cost thresholds. However, EPA did not further evaluate the cost-effectiveness of the control options considered for the feasibility analysis because EPA lacks authority to require additional emission reductions in 2023 in light of the modeling results showing that air quality problems in the eastern U.S. would be resolved by that time. *See EME Homer City II,* 795 F.3d at 129–30 (finding emissions budgets for 10 states were invalid because EPA's modeling showed that the downwind air quality problems to which these states were linked when EPA evaluated projected air quality in 2012 would be entirely resolved by 2014).

Similarly, to the extent the commenter suggests cost-effectiveness should be evaluated on particular days, rather than over the ozone season, this comment is not material to this action because EPA's analysis has concluded at step one of the four-step framework.

EPA did not reevaluate the feasibility of near-term control strategies in order to inform the selection of a future analytic year for this action because both the feasibility and cost-effectiveness of those control strategies were already fully evaluated in the CSAPR Update. Thus, EPA acknowledges that the operation of idled SNCR controls could physically be implemented more quickly than four years, but EPA already evaluated whether this control was cost-effective to implement relative to other near-term control strategies in the CSAPR Update and concluded that it was not.[20] In the CSAPR Update, EPA identified a marginal cost of $3,400 per ton as the level of uniform control stringency that represents turning on and fully

[20] EPA notes that this conclusion that the feasibility of implementing SNCR should not inform the potential compliance timeframe and analytic year would not have precluded EPA from considering whether the operation of SNCR would be cost-effective relative to the installation of post-combustion controls. Had EPA, at step one of the four-step framework, identified continued downwind air quality problems in 2023, EPA could have considered in subsequent steps whether to require emission reductions consistent with operation of existing SNCR in addition to considering whether to require emission reductions consistent with implementation of new post-combustion controls. However, because EPA has already concluded that operation of existing SNCR is not cost-effective in the near-term, it would not be reasonable for EPA to select an earlier analytic year that would only be consistent with the timeframe for implementing that non-cost-effective near-term compliance strategy.

operating idled SNCR controls.[21] Ultimately, the CSAPR Update finalized emissions budgets using $1,400 per ton control stringency, finding that this level of stringency represented the control level at which incremental EGU NO_X reductions and corresponding downwind ozone air quality improvements were maximized with respect to marginal cost. In finding that use of the $1,400 control cost level was appropriate, EPA established that the more stringent emissions budget level reflecting $3,400 per ton (representing turning on idled SNCR controls) yielded fewer additional emissions reductions and fewer air quality improvements relative to the increase in control costs. Specifically, EPA's analysis showed that the additional reductions from the operation of idling SNCRs in Kentucky would only result in a 0.5 percent decrease in the Commonwealth's emission budget (from 21,115 to 21,007 tons). *See* 81 FR 74548 (October 26, 2016). In other words, based on the CSAPR Update analysis, establishing emissions budgets at $3,400 per ton, and therefore developing budgets based on operation of idled SNCR controls, was determined not to be cost-effective for addressing downwind air quality problems under the good neighbor provision obligations for the 2008 ozone NAAQS. *See* 81 FR 74550 (October 26, 2016). EPA believes that the strategy of turning on and fully operating idled SNCR controls was appropriately evaluated in the CSAPR Update with respect to addressing interstate ozone pollution transport for the 2008 ozone NAAQS. Accordingly, EPA is not further assessing this control strategy for purposes of identifying an appropriate future analytic year. EPA did not reopen that issue for comment in this rulemaking, and the comments are therefore not within the scope of this action. To the extent that the commenter believes that EPA's analysis of SNCR controls in the CSAPR Update was flawed, the time to contest that analysis was during that rulemaking.

To the extent the commenters suggest that EPA must select a higher cost threshold in order to ''permit downwind states to meet their attainment deadlines,'' the commenters misconstrue the requirements of the good neighbor provision and the applicable legal precedent. The good neighbor provision does not require upwind states to bring that downwind areas into attainment with the NAAQS. Rather, states are required to reduce emissions that ''contribute significantly'' to nonattainment in downwind areas. Once a state has eliminated its significant contribution to downwind nonattainment, it has met the requirements of the good neighbor provision, regardless of whether the downwind area has actually attained. *See, e.g.,* 76 FR 48258–59 (August 8, 2011) (determining in CSAPR that SO_2 emission reductions available at $2,300 per ton represented good neighbor obligation even though some downwind air quality problems would persist). This is distinct from the obligations imposed on downwind states containing designated nonattainment areas, which are directly obligated to demonstrate attainment of the NAAQS. *See, e.g.,* CAA section 182(c)(2)(A) (requiring the state submit a demonstration that the plan will provided for attainment of the ozone NAAQS by the applicable attainment date). Because the statutory obligations imposed on upwind and downwind states with respect to attainment differs, it is also reasonable that the costs of controls implemented in upwind states may also differ from those implemented in downwind states. The Supreme Court has already affirmed EPA's approach to quantifying and apportioning upwind states' significant contribution on the basis of cost. *See EME Homer City,* 134 S. Ct. at 1607. While the Court stated that EPA was prohibited from requiring more emission reductions than necessary to bring downwind areas into attainment of the NAAQS, *id.* at 1608, the Court did not indicate that upwind states were specifically responsible for ensuring the downwind states achieve attainment in all instances. Thus, EPA does not agree that it must require additional emission reductions from upwind states, even if they are not cost-effective, simply because a downwind area has not yet attained the NAAQS.

Comment: One commenter states that EPA's contention that implementation of controls is not feasible until during or after the 2022 ozone season is unfounded for the following reasons:

- SCR installations are typically less time-consuming than 39 months, noting that one of the resources EPA cites indicates 21 months is reasonable.
- SNCR takes less time, 10–13 months, to implement.
- EPA tacitly admits some projects could be completed prior to 2022 when it claims that SCR and SNCR should be ''linked'' at the fleet-level.
- The original CSAPR allowed less than three years for compliance with SO_2 limits that were expected to require installation of flue gas desulfurization controls, which generally are expected to take longer than SCR to install.
- EPA's integrated planning model assumes SO_2 scrubbers can be installed in three years and SCR units in two years.
- Non-EGU controls are widely available on timeframes shorter than 48 months according to EPA's Final Non-EGU TSD. Although EPA insinuates this document questions the availability of non-EGU controls within 48 months, it lists many categories of non-EGU NO_X controls available in about 60 weeks that were also cost-effective.
- EPA did not exhaust readily available EGU control options. Kentucky could require 100 percent operation of already-installed control equipment or insist on optimized performance. Kentucky could discontinue use of ''banked allowances'' in the CSAPR Update. And CSAPR did not require any re-dispatch or shifting power generation from higher-emitting to lower-emitting plants, which is also feasible in the short term.
- EPA's arguments regarding the availability of steel and cranes are tenuous. EPA cites only two documents to support its assertion about crane shortages, only one of which even mentions a shortage. That article only indicates that developers need to book the cranes and operators several months in advance, which is not much of an obstacle.

Another commenter states that—based on its experience—EPA's estimated installation time frames for SCRs are too conservative (short), and provides a range of 28 to 60 months for installation of SCRs at one site.

Response: EPA first notes that responses to comments regarding the following issues are addressed earlier in this document: (1) Timeframes assumed for installation of post-combustion controls in CSAPR; (2) timeframes for installation of controls on non-EGUs; and (3) the optimization of existing post-combustion controls. EPA will address the remaining comments in the following paragraphs.

EPA disagrees that the timeframe for implementation of SNCR and SCR at an individual unit necessarily indicates that the feasibility analysis is flawed. As an initial matter, there are differences between these control technologies with respect to the potential viability of achieving cost-effective regional NO_X reductions from EGUs. SCR controls generally achieve greater EGU NO_X reduction efficiency (up to 90 percent) than SNCR controls (up to 25 percent). Resulting in part from this disparity in NO_X reduction efficiency, when

[21] *See* EGU NO_X Mitigation Strategies Final Rule TSD (docket ID EPA–HQ–OAR–2015–0500–0554, *available at www.regulations.gov* and *https://www.epa.gov/sites/production/files/2017-05/documents/egu_nox_mitigation_strategies_final_rule_tsd.pdf*) (NO_X Mitigation Strategies TSD).

considering both control costs and NO_X reduction potential in developing cost per ton analysis for the CSAPR Update, EPA found new SCR controls to be more cost-effective than SNCR at removing NO_X. Specifically, EPA found that new SCR controls could generally reduce EGU emissions for $5,000 per ton of NO_X removed whereas new SNCR controls could generally reduce EGU emissions at a higher cost of $6,400 per ton of NO_X removed.[22] In other words, the greater NO_X reduction efficiency for SCR controls translates into greater cost-effectiveness relative to SNCR controls. The general cost-effectiveness advantage is consistent with observed installation patterns where SCR controls (62 percent of coal-fired capacity) are more prevalent across the east relative to SNCR (12 percent of coal-fired capacity).[23] In light of the increased NO_X removal efficiency and the relative cost-effectiveness of SCR as compared to SNCR, EPA does not believe that is reasonable to focus its analysis on the implementation of the less-efficient control strategy (SNCR) at the expense of the greater emission reduction potential of SCR controls. Accordingly, EPA believes it is reasonable to select a potential compliance timeframe and therefore a future analytic year that would permit the region-wide installation of both new SCR and new SNCR.

Moreover, the estimated 39 months and 10 to 13 months for implementation of SCR and SNCR, respectively, at an individual unit do not account for factors that would influence this timeframe across the fleet. Installing new SCR or SNCR controls for EGUs generally involves the same steps: Conducting an engineering review of the facility; advertising and awarding a procurement contract; obtaining a construction permit; installing the control technology; testing the control technology; and obtaining or modifying an operating permit.[24]

Scheduled curtailment, or planned outage, for pollution control installation would be necessary to complete either SCR or SNCR projects. Given that peak demand and rule compliance would both fall in the ozone season, sources would likely try to schedule installation projects for the ‘‘shoulder’’ seasons (*i.e.,* the spring and/or fall seasons), when electricity demand is lower than in the summer, reserves are higher, and ozone-season compliance requirements are not in effect. If multiple units were under the same timeline to complete the retrofit projects as soon as feasible from an engineering perspective, this could lead to bottlenecks of scheduled outages as each unit attempts to start and finish its installation in roughly the same compressed time period. Thus, any compliance timeframe that would assume installation of new SCR or SNCR controls should encompass multiple shoulder seasons to accommodate scheduling of curtailment for control installation purposes and better accommodate the regional nature of the program.

In addition to the coordination of scheduled curtailment, an appropriate compliance timeframe should accommodate the additional coordination of labor and material supply necessary for any fleet-wide control installation efforts.[25] The total construction labor for an SCR system associated with a 500-megawatt (MW) EGU is in the range of 310,000 to 365,000 man-hours, with boilermakers accounting for approximately half of this time.[26] SNCR installations, while generally having shorter individual project timeframes of 10 to 13 months from bid solicitation to startup, share similar labor and material resources and the timing of SNCR installation planning is therefore linked to the timing of SCR installation planning. In recent industry surveys, one of the largest shortages of union craft workers was for boilermakers. This shortage of skilled boilermakers is expected to rise due to an anticipated nine percent increase in boilermaker labor demand growth by 2026, coupled with expected retirements and comparatively low numbers of apprentices joining the workforce.[27] The shortage of and demand for skilled labor, including other craft workers critical to pollution control installation, is pronounced in the manufacturing industry. The Association of Union Constructors conducted a survey of identified labor shortages and found that boilermakers were the second-most frequently reported skilled labor market with a labor shortage.[28] Moreover, recovery efforts from the natural disasters of Hurricanes Harvey and Irma and wildfires in 2017 are expected to further tighten the labor supply market in manufacturing in the near term.[29] EPA determined that these tight labor market conditions within the relevant manufacturing sectors, combined with fleet-level mitigation initiatives, would likely lead to some sequencing and staging of labor pool usage, rather than simultaneous construction across all efforts. This sector-wide trend supports SCR and SNCR installation timeframes for a fleet-wide program that exceed the demonstrated single-unit installation timeframe.

Moreover, NO_X post-combustion control projects also require materials and equipment such as steel and cranes. Sheet metal workers, necessary for steel production, are also reported as having well above an average supply-side shortage of labor.[30] This, coupled with growth in steel demand estimated at three percent in 2018, and simultaneous global economic growth, suggests that there may be a constricted supply of steel needed for installation of new post-combustion controls.[31] Similarly, cranes are critical for installation of SCRs, components of which must be lifted hundreds of feet in the air during construction. Cranes are also facing higher demand during this period of economic growth, with companies reporting a shortage in both equipment and manpower.[32] [33] The tightening markets in relevant skilled labor, materials, and equipment, combined with the large number of installations that could be required fleet-wide under a regional air pollution transport program, necessitate longer installation

time-tables relative to what has been historically demonstrated at the unit-level.

EPA disagrees with the commenter's assertion that these observations regarding crane and steel markets are tenuous and thus should not influence EPA's analysis. While this is not the sole reason for EPA's conclusion that 48 months would be necessary for region-wide control installation, EPA believes the market for labor and materials is a relevant factor to consider in light of reports from companies that supply the tower cranes that there is a shortage of both equipment and manpower. The crane index, along with quarterly construction costs reports, are metrics regularly used to evaluate construction activity by construction consultancies and can provide information useful to demonstrate the level of equipment demand.[34] Moreover, the commenter provides no evidence to contradict the EPA's finding that these equipment markets are facing periods of higher demand.

The time lag observed between the planning phase and in-service date of SCR and SNCR operations in certain cases also illustrates that site-specific conditions sometimes lead to installation times of four years or longer. For instance, SCR projects for units at Ottumwa Generating Station (Iowa), Columbia Energy Center (Wisconsin), and Oakley Generating Station (California) were all in the planning phase in 2014. However, these projects have estimated in-service dates ranging between 2018 and 2021.[35] Similarly, individual SNCR projects can exceed their estimated 10–13-month time frame. For example, projects such as SNCR installation at Jeffrey Energy Center (Kansas) were in the planning phase in 2013, but not in service until 2015.[36] Completed projects, when large in scale, also illustrate how timelines can extend beyond the bare minimum necessary for a single unit when the project is part of a larger air quality initiative involving more than one unit at a plant. For instance, the Big Bend Power Station in Florida completed a multi-faceted project that involved adding SCRs to all four units as well as converting furnaces, over-fire air changes, and making windbox modifications. The time from the initial planning stages to completion was a decade.[37]

While individual unit-level SCR and SNCR projects can average 39 and 10 months, respectively, from bid to startup, a comprehensive and regional emissions reduction effort also requires more time to accommodate the labor, materials, and outage coordination for these two types of control strategies. Because these post-combustion control strategies share similar resource inputs and are part of regional emissions reduction programs rather than unit-specific technology mandates, the timeframes for one type are inherently linked to the other type. This means that SNCR projects cannot be put on an early schedule in light of their reduced construction timing without impacting the availability of resources for the manufacture and installation of SCRs and thus the potential start dates of those projects.

In short, given the market and regulatory circumstances in which EPA evaluated this effort, we determined that four years would be an expeditious timeframe to coordinate the planning and completion of any mitigation efforts that might be necessary in this instance. In regard to the commenter who noted a range of 28 to 60 months for SCR installation, EPA notes that a period of 48 months falls reasonably within that range, and is consistent with the region-wide evaluation of control feasibility that EPA has conducted in this action.

EPA notes that the commenters' assertions about assumptions in IPM regarding control installation timeframes are unfounded. Post-combustion control installation times are an exogenous assumption in EPA's power sector modeling—*i.e.,* EPA determines the number of years for installation and provides that figure as an input to the model; the figure is not the product of a function that the model performs internally. EPA makes this installation determination independently for each model run. For instance, if EPA is using IPM to model a run year that is three years from a present date, it may choose to allow scrubber installation to occur in that first model run year if the volume of installations is expected to be small (consistent with the notion that some units may be able to install controls more quickly). However, if the volume of scrubber installations is expected to be larger, reflecting more region-wide resource coordination requirements and resource requirements, EPA may not allow the retrofit option in the model until after three years. Thus, the assumption can vary according to the policy context being considered.

Finally, EPA notes that the commenter is incorrect in asserting that the CSAPR Update failed to account for generation shifting. The CSAPR Update budgets accounted for generation shifting that was considered to be available at the $1,400 cost threshold and feasible to implement by the 2017 compliance timeframe. *See* 81 FR 74544–45 (October 26, 2016). The commenter does not otherwise explain whether or how any potential for additional generation shifting should influence EPA's analysis in this action.[38]

Comment: Several commenters advocate for the adoption of short-term NO_X emission rate limits for EGUs. The ozone NAAQS is based on an 8-hour standard and the allowance trading under the CSAPR Update is done over a multi-month ozone season. The commenters believe that the lack of federally enforceable short-term NO_X emission rates in Kentucky will facilitate the continued operation of EGUs with inadequate NO_X emission controls, to include units that have NO_X controls that are not always operated during the ozone season. While the CSAPR Update has encouraged improved utilization of SCR and SNCR controls during the 2017 ozone season, the commenter contends that there are additional cost-effective NO_X reductions that can be achieved by requiring optimization of these existing controls, every day of the ozone season, at coal-fired EGUs. The commenter therefore states that Kentucky should establish emission limits for its EGUs with appropriate magnitudes and averaging periods.

Another commenter also states that EPA should require Kentucky to adopt targeted strategies for reducing emissions on "high emitting days."

One commenter contends that compliance with a cap-and-trade program like the CSAPR Update is an

[38] Because EPA did not evaluate additional generation shifting possibilities in this action, it does not at this time need to revisit the question whether it is within the EPA's authority or otherwise proper to consider generation shifting in implementing the good neighbor provision. The EPA is aware that this has been an issue of contention in the past. *See, e.g.,* 81 FR at 74545 (October 26, 2016) (responding to comments); CSAPR Update Rule—Response to Comment, at 534–50 (EPA–HQ–OAR–2015–0500–0572) (summarizing and responding to comments). The EPA may revisit this question in addressing good neighbor requirements for other NAAQS but is not revisiting this issue with regard to the 2008 ozone NAAQS.

inadequate mechanism to ensure permanent NO_X reductions on high ozone days that determine attainment or nonattainment of the NAAQS. The commenter states that its analysis shows that many coal-fired EGUs in Kentucky were not optimizing their controls in 2017 and failed to operate at rates assumed in EPA's 2023 modeling analysis. The commenter states that a cap and trade program allows emissions to fluctuate above the state-wide budgets if the owners or operators (1) have adequate banked allowances, or (2) can purchase allowances to cover excess emissions. Ozone is an air pollutant to which prevention of short-term exposure to excessive levels over an eight-hour period is critical to protect public health, and compliance with the NAAQS can be negatively impacted by inconsistent day-to-day operation of pollution controls. Allowing a plant to cycle back the efficiency or altogether turn off control equipment is an inappropriate control measure for ozone because this can result in excessive rates on high ozone days, when it is most important to ensure low emission rates.

Response: EPA first notes that it is unnecessary to evaluate what strategy would be appropriate for the implementation of additional emission reductions because EPA has determined that they are unnecessary and unauthorized in light of the modeling data showing that downwind air quality problems will be resolved by 2023, when additional control strategies could be feasibly implemented.

To the extent the commenter is raising concerns with the use of an allowance trading program to implement the emission reductions required by the CSAPR Update to address the 2008 ozone NAAQS, EPA considers it untimely for the commenter to raise such a challenge in this action. Those emission reductions were finalized in a separate rulemaking, and the appropriate venues to raise concerns over the adequacy for reduction implementation of the CSAPR allowance trading program, as compared to other measures such as short-term emission limits, were that rulemaking process and subsequent petitions for judicial review of that final rule. Thus, this issue is outside the scope of the present rulemaking. Similarly, as discussed earlier in this action, to the extent the commenter also disagrees with EPA's determinations regarding the optimization of SCR controls or the cost-effectiveness of SCNR controls in the CSAPR Update, those comments are also outside the scope of this action.

Nonetheless, EPA has examined the hourly NO_X emissions data reported to EPA and observed very few instances of units selectively turning down or turning off their emissions control equipment during hours with high generation.[39] SCR-controlled units generally operated with lower emissions rates on high generation hours, suggesting SCRs generally were in better operating condition—not worse, let alone idling—on those days/hours. In other words, EPA compared NO_X rates on hours with high demand and compared them with seasonal average NO_X rates and found very little difference. The data do not support the notion that units are reducing SCR operation on high demand days (when ozone concentrations often peak). In fact, EPA noticed that SCR performance rates—on average—were better on high demand days. EPA, therefore, concludes that increases in total emissions on days with high generation are a result of additional units coming online and units increasing hourly utilization, rather than units decreasing the functioning of control equipment. Moreover, SCR performance is not purely a matter of operational decisions of the control. EPA's review of hourly 2017 data suggests that SCR performance often decreases as hourly load levels drop below a particular level (*e.g.,* 30 percent of maximum rated hourly heat input rate).[40] [41] A drop in SCR performance at a lower load level is consistent with engineering-based performance challenges associated with minimum operating temperatures (among other factors) for the SCR system.[42] In other words, SCR systems with typical catalyst formulations are not effective at removing NO_X during low-load operations when the unit might not achieve sufficient temperatures to promote the necessary chemical reactions. Decreases in SCR removal efficiency at low load levels appear to be consistent with known engineering limitations. The 2017 data do not provide any indication of broad regional patterns of scaling back SCR operations during particular hours of an ozone season for reasons other than engineering limitations. Thus, EPA does not have any basis, at this time, to believe that short-term emission rates are necessary to address regional SCR operation patterns on high demand days in the context of this action.

Moreover, even if it were appropriate to assess the merits of particular remedies as part of this action, EPA does not agree that an allowance trading program would be an inadequate means of implementing any additional statewide emission reductions that may have been necessary under a scenario where more reductions were required to fully address the good neighbor provision. Implementation mechanisms based on seasonal NO_X requirements have demonstrated success at reducing peak ozone concentrations. For example, over the past decade, there has been significant improvement in ozone across the eastern U.S., in part due to season-long allowance trading programs such as the NO_X Budget Trading Program and the CSAPR NO_X ozone season allowance trading program. As a result, areas are now attaining the 1997 ozone NAAQS. Further, EPA notes that the standard is a 3-year average value of three individual seasonal values. Thus, a seasonal program is harmonious with the form of the standard.

Comment: One commenter states that EPA should require Kentucky to ensure all ''minimum control strategies'' identified in a recent Ozone Transport Commission (OTC) statement regarding ''good neighbor'' SIPs are adopted, along with other points noted in the document.

Another commenter states that other measures should be undertaken to reduce Kentucky's impact on other states, including NO_X RACT on EGUs and other large NO_X sources at the same stringent levels used within the OTR, along with controls on mobile sources (inspection and maintenance, and anti-idling).

One commenter recommends that any full remedy of a state's good neighbor obligations must require, at minimum, RACT on all major NO_X and VOC sources, best available control technology (BACT) on all existing EGUs and large industrial boilers, BACT on all sources with high ozone-day emissions, and regional measures such as those recommended by the OTR.

Response: EPA lacks authority to require control measures or emission reductions unless the Agency first identifies a downwind air quality problem to which an upwind state is contributing. *See EME Homer City,* 134 S. Ct. at 1608 (''If EPA requires an upwind State to reduce emissions by more than the amount necessary to achieve attainment in every downwind State to which it is linked, the Agency will have overstepped its authority, under the Good Neighbor Provision.'');

[39] *See* Discussion of Short-term Emission Limits, available in the docket for this action.

[40] *Id.*

[41] Maximum rated hourly heat input rate is the higher of the manufacturer's maximum rated hourly heat input rate or the highest observed hourly heat input rate.

[42] Gray, Sterling; Jarvis, Jim; Donner Chad, and Estep John, SCR Performance, Power Engineering, March 9, 2017, *available at https://www.power-eng.com/articles/print/volume-121/issue-3/features/scr-performance.html.*

EME Homer City II, 795 F.3d at 129–30 (finding emissions budgets for 10 states were invalid because EPA's modeling showed that the downwind air quality problems to which these states were linked when EPA evaluated projected air quality in 2012 would be entirely resolved by 2014). With respect to the recommended control strategies, the commenters do not explain why they believe the control strategies applicable to the OTR, RACT, BACT, or other measures are necessary to achieve attainment or maintenance of the NAAQS in downwind states. While EPA determined that Kentucky would be linked to downwind air quality problems in 2017, EPA has also determined that those air quality problems would be resolved by 2023. Thus, EPA has no authority to require additional emission reductions—via the control strategies suggested by the commenters or otherwise—from Kentucky or other upwind states in 2023.

Comment: One commenter states that EPA's 2023 modeling is based on numerous flawed assumptions. EPA adjusted projected NO_X emissions for dozens of EGUs based on assumptions of new or optimized controls. However, the Kentucky SIP contains no enforceable mechanisms, schedules, or timetables for compliance to ensure the relied-upon assumptions are valid and will actually occur or remain in place in 2023. The commenter contends that EPA's demonstration or verification of enforceable commitments to support Kentucky's assumptions, as well as EPA's assumptions for all other states, are required by the CAA, citing section 110(a)(2)(A) and (C).

One commenter also contends that Kentucky's SIP fails to satisfy section 110(a)(2)(A) because, even if reliance on 2023 were valid, it lacks any proposed enforceable limitations or compliance timelines.

One commenter states that Kentucky has not shown that the EPA-modeled shutdowns of E.W. Brown Generating Station and Elmer Smith plant will occur in a federally enforceable manner, and that therefore, EPA should not approve Kentucky's SIP since the modeling includes such reductions.

One commenter states that although EPA and Alpine modeling indicate all areas outside California will achieve attainment with the 2008 ozone NAAQS by 2023, some Connecticut monitors will ''only barely'' comply. Commenter states that Kentucky's reliance on the 2023 modeling should be accompanied by enforceable regulations that ensure the lower, modeled 2023 emissions are achieved, including the decrease in EGU emissions.

One commenter includes a table summarizing adjusted projected NO_X emissions for Kentucky EGUs used in EPA's 2023 modeling based on assumptions of new or optimized controls. The commenter states that there are no enforceable commitments in Kentucky's SIP to support these assumptions, which the commenter asserts are required by EPA's own methodology, citing a March 2018 EPA memorandum. Without enforceable measures, the commenter asserts the modeling is not a proper basis for a good neighbor SIP.

One commenter contends that EPA's modeling relies on reductions that are not federally enforceable, and Kentucky failed to demonstrate that the emission reductions EPA relied on across the modeling domain are federally enforceable. The commenter contends that the upwind state good neighbor obligations cannot be deemed satisfied if large portions of their emissions inventory remain poorly controlled.

One commenter states that an approvable good neighbor SIP must include permanent and federally enforceable emissions reductions. The commenter contends that section 110 requires that a SIP (1) include enforceable emission limitations and other control measures, means, or techniques, (2) include a program to provide for the enforcement of the measures, and (3) provide adequate provisions prohibiting emissions activity within the state from emitting any air pollutant in amounts which will contribute significantly to nonattainment in or interfere with maintenance by any other state with respect to the NAAQS. EPA's four-step analysis also requires the adoption of ''permanent and enforceable measures.''

The commenter states that compliance with the rates reflected in the 2023 modeling are not permanent or federally enforceable under the CSAPR Update or any other federal rule, including the assumption that most units will emit at 2016 levels and that 25 units will take additional emission reduction actions, including unit retirement, increased use of post-combustion controls, or addition of new combustion controls. The commenter contends these actions are therefore speculative and cannot be properly considered when determining if a state met its good neighbor obligations. Downwind states cannot rely on speculative reduction, and without federally enforceable limits, there is no guarantee that Maryland will maintain the 2008 ozone NAAQS. The commenter notes that Maryland's section 126(b) petition proposed specific language and NO_X emission rates for EGUs with SCR and SNCR in Kentucky that EPA should consider making federally enforceable as a near-term NO_X reduction strategy. EPA should also modify operating permits for other units to require implementation of specific emission rates, fuel switches, and control installations for EGUs that are not equipped with controls, which were relied on in the modeling.

Response: EPA does not agree that Kentucky is required to adopt permanent and enforceable control measures to ensure that the projected emission levels used in the 2023 modeling will be maintained. Within EPA's four-step interstate transport framework, EPA only requires sources in upwind states to implement enforceable emission limitations if: (1) Downwind air quality problems are identified in at step one, (2) an upwind state is linked to a downwind air quality problem at step two, *and* (3) sources in the linked upwind state are identified at step three as having emissions that significantly contribute to nonattainment and interfere with maintenance of the NAAQS considering cost- and air-quality-based factors. If all three of these steps are not satisfied, then the state is not required to include provisions in its SIP prohibiting any level of reductions because the EPA has determined that the state will not significantly contribute to nonattainment or interfere with maintenance of the NAAQS downwind. For the reasons described in the following paragraphs, EPA believes this approach is a reasonable interpretation of the good neighbor provision.

The good neighbor provision instructs EPA and states to apply its requirements ''consistent with the provisions of'' title I of the CAA. EPA is therefore interpreting the requirements of the good neighbor provision, and the elements of its four-step interstate transport framework, to apply in a manner consistent with the designation and planning requirements in title I that apply in downwind states. *See North Carolina,* 531 F.3d at 912 (holding that the good neighbor provision's reference to title I requires consideration of both procedural and substantive provisions in title I). EPA notes that this consistency instruction follows the requirement that plans ''contain adequate provisions prohibiting'' certain emissions in the good neighbor provision. The following paragraphs will therefore explain how EPA's interpretation of the circumstances under which the good neighbor provision requires that plans ''prohibit'' emissions through enforceable measures is consistent with the circumstances under which downwind states are required to implement emissions control measures in nonattainment areas.

For purposes of this analysis, EPA notes specific aspects of the title I designations process and attainment planning requirements for the ozone NAAQS that provide particularly relevant context for evaluating the consistency of EPA's approach to the good neighbor provision in upwind states. EPA notes that this discussion is not intended to suggest that the specific requirements of designations and attainment planning apply to upwind states pursuant to the good neighbor provision, but rather to explain why EPA's approach to interpreting the good neighbor approach is reasonable in light of relevant, comparable provisions found elsewhere in title I. In particular, these provisions demonstrate that EPA's approach is consistent with other relevant provisions of title I with respect to what data is considered in EPA's analysis and when states are required to implement enforceable measures.

First, areas are initially designated attainment or nonattainment for the ozone NAAQS based on actual measured ozone concentrations. CAA section 107(d) (noting that an area shall be designated attainment where it ''meets'' the NAAQS and nonattainment where it ''does not meet'' the NAAQS). Therefore, a designation of nonattainment does not in the first instance depend on what specific factors have influenced the measured ozone concentrations or whether such levels are due to enforceable emissions limits. If an area measures a violation of the relevant ozone NAAQS, then the area is designated nonattainment. In cases where the nonattainment area is classified moderate or higher, the responsible state is required to develop an attainment plan, which generally includes the application of various enforceable control measures to sources of emissions located in the nonattainment area, consistent with the requirements in Part D of title I of the Act.[43] *See generally* CAA section 182, 42 U.S.C. 7511a. If, however, an area measures compliance with the ozone NAAQS, the area is designated attainment, and sources in that area generally are not subject to any new enforceable control measures under Part D.[44]

Similarly, in determining the boundaries of an ozone nonattainment area, the CAA requires EPA to consider whether ''nearby'' areas ''contribute'' to ambient air quality in the area that does not meet the NAAQS. *See* 42 U.S.C. 7407(d). For each monitor or group of monitors indicating a violation of the ozone NAAQS, EPA assesses information related to five factors, including current emissions and emissions-related data from the areas near the monitor(s), for the purpose of establishing the appropriate geographic boundaries for the designated ozone nonattainment areas. A nearby area may be included within the boundary of the ozone nonattainment area only after assessing area-specific information, including an assessment of whether current emissions from that area contribute to the air quality problem identified at the violating monitor.[45] If such a determination is made, sources in the nearby area are also subject to the applicable Part D control requirements. However, if EPA determines that the nearby area does not contribute to the measured nonattainment problem, then the nearby area is not part of the designated nonattainment area and sources in that area are not subject to such nonattainment control requirements.

EPA's historical approach to addressing the good neighbor provision via the four-step interstate transport framework, and the approach EPA continues to apply here, is consistent with these title I requirements. That is, in steps 1 and 2 of the framework, EPA evaluates whether there is a downwind air quality problem (either nonattainment or maintenance), and whether an upwind state impacts the downwind area such that it contributes to and is therefore ''linked'' to the area. EPA's determination at step one of the good neighbor analysis that it has not identified any downwind air quality problems to which an upwind state could contribute is analogous to EPA's determination in the designation analysis that an area should be designated attainment. Similarly, EPA's determination at step two of the good neighbor analysis that, while it has at step one identified downwind air quality problems, an upwind state does not sufficiently impact the downwind area such that the state is linked is analogous to EPA's determination in the designation analysis that a nearby area does not contribute to a NAAQS violation in another area. Thus, under the good neighbor provision, EPA determines at step one or two, as appropriate, that the upwind state will not significantly contribute to nonattainment or interfere with maintenance of the NAAQS in the downwind area. *See, e.g.,* 81 FR 74506 (October 26, 2016) (determining that emissions from 14 states whose contributions to downwind receptors are below the air quality threshold will not significantly contribute to nonattainment or interfere with maintenance of the 2008 ozone NAAQS); 76 FR 48236 (August 8, 2011) (finding that states whose contributions to downwind receptors are below the air quality threshold will not significantly contribute to nonattainment or interfere with maintenance of the relevant NAAQS). Under such circumstances, sources in the upwind state are not obligated to implement any control measures under the good neighbor provision, which is consistent with the fact that sources located in attainment areas generally are not required to implement the control measures found in Part D of the Act. *Cf. EME Homer City II,* 795 F.3d at 130 (determining that CSAPR ozone season NO_X budgets for 10 states were invalid based on determination that modeling showed no future air quality problems); 81 FR 74523–24 (October 26, 2016) (removing three states from CSAPR ozone season NO_X program based on determination that states are not linked to any remaining air quality problems for the 1997 ozone NAAQS).

EPA acknowledges that one distinction between the good neighbor and designation analyses: The good neighbor analysis relies on future year projections of emissions to calculate ozone concentrations and upwind state contributions, compared to the designation analysis's use of *current* measured data. As described in more detail earlier, this approach is a reasonable interpretation of the term ''will'' in the good neighbor provision, *see North Carolina,* 531 F.3d at 913–14, and interpreting language specific to that provision does not create an

[43] Nonattainment areas classified as marginal are required to submit emissions inventories and implement a nonattainment new source review permitting program, but are not generally required to implement controls at existing sources. *See* CAA section 182(a), 42 U.S.C. 7511a(a).

[44] CAA section 184 contains the exception to this general rule: States that are part of the OTR are required to provide SIPs that include specific enforceable control measures, similar to those for nonattainment areas, that apply to the whole state, even for areas designated attainment for the ozone NAAQS. *See generally* 42 U.S.C. 7511c.

[45] *See* Memorandum from Robert J. Meyers, Principal Deputy Assistant Administrator, US EPA to Regional Administrators, *Area Designations for the 2008 Ozone National Ambient Air Quality Standards,* at Attachment 2, December 4, 2008, *available at https://archive.epa.gov/ozonedesignations/web/pdf/area_designations_for_the_2008_revised_ozone_naaqs.pdf.*

impermissible inconsistency with other provisions of title I. Moreover, EPA's use of future-year modeling in the good neighbor analysis to identify downwind air quality problems and linked states is consistent with its use of current measured data in the designations process. EPA's future year air quality projections are influenced by a variety of factors, including current emissions data, anticipated future control measures, economic market influences, and meteorology. Many of these same factors, *e.g.,* current control measures, economic market influences, and meteorology, can affect the NO_X emissions levels and consequent measured ozone concentrations that inform the designations process. Like the factors that affect measured ozone concentrations used in the designations process, not all of the factors influencing EPA's modeling projections are or can be enforceable limitations on emissions or ozone concentrations. However, EPA believes that consideration of these factors contributes to a reasonable estimate of anticipated future ozone concentrations. *See EME Homer City II,* 795 F.3d at 135 (declining to invalidate EPA's modeling projections ''solely because there might be discrepancies between those predictions and the real world''); *Chemical Manufacturers Association* v. *EPA,* 28 F.3d 1259, 1264 (D.C. Cir. 1994) (''a model is meant to simplify reality in order to make it tractable''). Thus, EPA believes that consideration of these factors in its future-year modeling projections used at steps 1 and 2 of the good neighbor analysis is reasonable and consistent with the use of measured data in the designations analysis.[46]

EPA notes that there is a further distinction between the section 107(d) designations provision and the good neighbor provision in that the latter provision uses different terms to describe the threshold for determining whether emissions in an upwind state should be regulated (''contribute significantly'') as compared to the standard for evaluating the impact of nearby areas in the designations process (''contribute'').

Thus, at step three of the good neighbor analysis EPA evaluates additional factors, including cost and air-quality considerations, to determine whether emissions from a linked upwind state would violate the good neighbor provision (*i.e.,* cost-effectiveness*).* Only if EPA at step three determines that the upwind state's emissions would violate the good neighbor provision will it proceed to step four, at which point emissions in the upwind state must be controlled so as to address the identified violation, analogous to the trigger for the application of Part D requirements to sources located in designated nonattainment areas. EPA interprets the good neighbor provision to not require the Agency or the upwind state to proceed to step four and implement any enforceable measures to ''prohibit'' emissions unless it identifies a violation of the provision at step three. *See, e.g.,* 76 FR 48262 (August 8, 2011) (finding at step three that the District of Columbia will not violate the good neighbor provision, and therefore will not at step four be subject to any control requirements in CSAPR, because no cost-effective emissions reductions were identified).

For these reasons, EPA also does not agree that either section 110(a)(2)(A) or section 110(a)(2)(C) requires the state to include measures to make the projected emission limitations enforceable in order to address the good neighbor provision. Section 110(a)(2)(A) states that a SIP should ''include enforceable emission limitations and other control measures, means, or techniques . . . *as may be necessary or appropriate* to meet the applicable requirements'' of the CAA (emphasis added). As just described, a finding at step one that there is no air quality problem supports a conclusion that a state simply will not contribute significantly or interfere with maintenance of the NAAQS in another state, and thus that the state need not prohibit any particular level of emissions under the good neighbor provision. Thus, under section 110(a)(2)(A), no emission limitations would be necessary or appropriate to meet the good neighbor provision. Section 110(a)(2)(C) similarly indicates that SIPs should provide for the enforcement of measures cited to support the requirements of section 110(a)(2)(A), but it does not independently require the imposition of additional control measures.

Comment: One commenter states that Kentucky proposes to rely on projections of future emissions based on a current regulatory framework that EPA is actively attempting to dismantle. Actions that the commenter contends EPA has not accounted for in the modeling include EPA's proposed repeal of glider rules, which if finalized would permit vehicles that emit significant amounts of NO_X. In its original rule, EPA estimated that unregulated glider vehicles would increase emissions from heavy-duty highway vehicles by approximately 300,000 tons annually in 2025. Conversely, the CSAPR Update only reduces annual NO_X emissions by 75,000 tons, meaning the proposed regulatory action would swamp multiple times over the emission reductions from the CSAPR Update and undercut the assumptions in EPA's estimates.

The commenter also cites efforts to weaken the Corporate Average Fuel Economy standards, which were anticipated to reduce annual light-duty highway vehicle emissions of NO_X by 904 tons in 2020 and 6,509 tons in 2030, and emissions of VOCs, another ozone precursor, by 11,712 and 123,070 tons in 2020 and 2030, respectively. EPA is also considering rescinding 2016 Control Techniques Guidelines (CTG) for oil and natural gas industry, estimated to reduce emissions by 80,000 tons annually.

The commenter contends that these actions, if finalized, would ensure that the exceedingly narrow compliance margins assumed by its modeling in 2023 are not achieved. To the extent Kentucky stakes good neighbor compliance entirely on an unenforced and actively undercut prediction, the commenter claims its reliance is arbitrary and capricious.

Another commenter states that EPA's 2023 modeling fails to account for potential federal rule repeals and delays, such as those for: ''glider'' vehicles and engines (proposed November 2017); oil and gas CTG guidelines (March 2018); and the NSPS for the oil and gas sector. The commenter also states that relaxation or elimination of control requirements will result in increased ozone concentrations and that the 2023 design values are therefore an underestimate of actual levels that will occur. The commenter states that given EPA predicts a maximum design value of 75.9 ppb in 2023 at the Westport, Connecticut monitor, coupled with the fact that ''Kentucky significantly contributes to this monitor,'' the ''unenforceable commitments'' in Kentucky's SIP, and federal rule repeals and relaxations that EPA ignores, nonattainment can be expected to result at this monitor.

One commenter asserts that the 2023 modeling fails to account for the proposed weakening, repeal, and/or delay of numerous federal rules that directly impact ozone levels, including for glider vehicles, CTGs for oil and gas,

[46] EPA also notes that the consideration of projected *actual* emissions in the future analytic year—as opposed to allowable levels—is also consistent with the statute's instruction that states (or EPA in the states' stead) prohibit emissions that ''will'' impermissibly impact downwind air quality. This term is reasonably interpreted to mean that EPA should evaluate anticipated emissions (what sources *will* emit) rather than potential emissions (what sources *could* emit).

and reconsideration of new source performance standards (NSPS) for the oil and gas sector, which will increase ozone concentrations near and downwind of affected sources. The commenter contends that the Westport, Connecticut monitor (part of the New York metropolitan area (NYMA)) is projected to have design value of 75.9 ppb in 2023, only 0.1 ppb below the standard (and above the 2015 ozone NAAQS), and Kentucky significantly contributes to this monitor. The inevitable increase of ozone levels from EPA's deregulatory activities will drive the Westport monitor above the 2008 ozone NAAQS.

Response: EPA disagrees that its 2023 projections are unreliable because of potential changes to other regulations. EPA first notes any potential regulatory changes to the ''glider'' regulations and the oil and gas CTG have not been finalized, nor have any relevant changes to the NSPS for the oil and gas sector been finalized. EPA's normal practice is to only include changes in emissions from final regulatory actions in its modeling because, until such rules are finalized, any potential changes in NO_X or VOC emissions are speculative. In addition, even if emissions were to change as a result of any such final rules, commenters have not indicated how and whether these additional emissions would affect downwind ozone concentrations. If circumstances change such that EPA's projections may be affected, commenters are free to submit an administrative petition to the Agency.

Comment: One commenter contends that EPA's modeling over-predicts actions taken in compliance with CSAPR. The commenter notes that the 2023 modeling TSD reveals assumptions that facilities that retrofit between 2016 and 2023 to install SCR will achieve an emission rate of 0.075 lb NO_X/mmBtu. The commenter asserts this is unrealistic given the CSAPR Update itself relies on the idea that SCR-equipped units will only achieve 0.10 lb/mmBtu NO_X emission rates. EPA itself considered the 0.075 lb/mmBtu rate to be unachievable fleetwide in the CSAPR Update.

Response: The commenter conflates EPA's assumptions in the CSAPR Update regarding emission rates achievable by units with *existing* SCR controls (*i.e.,* 0.10 lb/mmBtu) that are idled or not being optimized with its assumptions regarding *new* SCR retrofits (*i.e.,* 0.075 lb/mmBtu). As explained in the CSAPR Update, EPA selected a different rate for existing SCRs that were viewed as likely to ''optimize'' than it did for new SCR installations. This difference reflects both differences in historical data values for the two populations sets, and also the increased technology performance expected from more recent technology vintages.[47]

EPA's assumption of 0.075 lb/mmBtu for SCR retrofits is supported by historical data on emission rates for new SCR controlled units, is consistent with its prior engineering and technology assumptions, and is a conservative estimate of new SCR performance.

New SCR controlled units often perform equal to or better than older SCRs reflecting advancements in both technology and installation practices. New SCRs have regularly operated at or below EPA's assumed emission rate of 0.075 lb/mmbtu. For 12 coal units where SCR was installed and operating between 2014 and 2016, the average ozone season NO_X emission rate for 2017 was 0.059 lb/mmBtu. When this time horizon is extended to the 25 SCRs that came online between 2012 and 2016, the 23 that operated in 2017 ozone season operated at a rate of 0.060 lb/mmBtu. Either measure demonstrates that 0.075 lb/mmBtu is not only possible for newly controlled units, but regularly achieved and surpassed. This historical data strongly contradicts the commenters assertion that EPA's assumption that new units would operate at an emission rate of 0.075 lb/mmBtu is unrealistically low, but rather supports EPA performance capability assumption as both reasonable and conservative.

Additionally, the 0.075 lb/mmBtu emission rate assumption for new SCRs is consistent with EPA's historical levels of assumed performance in its power sector modeling and consistent with the engineering assessment by Sargent and Lundy underpinning those performance assumptions.[48]

Comment: One commenter asserts that the modeling predicts that existing units will either install new controls or operate controls at higher efficiencies following the CSAPR Update, despite limited incentives to do so. The commenter cites as an example the Paradise unit 3 in Kentucky that EPA assumed will optimize its SCR (0.10 lb/mmBtu) and reduce its NO_X output to about 1,000 tons per ozone season, but in 2017, the unit emitted over twice that amount (about 2,400 tons or 0.22 lb/mmBtu). Moreover, the Additional Updates to Emissions Inventories for the Version 6.3, 2011 Emissions Modeling Platform for the Year 2023 TSD generally assumes that facilities that emitted at a rate higher than 0.10 lb/mmBtu in 2016 will come down to 0.10 lb/mmBtu in 2023, which ignores the reality of emission trading under CSAPR. The commenter contends that this effectively assumes that the market for emissions credits will price those credits so highly that no emitter will choose to buy credits rather than reduce emissions, which is belied by purpose and experience of the CSAPR trading scheme.

Response: EPA's assumption of 0.010 lb/mmBtu for optimized SCR performance at units with existing SCRs is both reasonable and consistent with recent historical data.

As explained in the CSAPR Update, EPA evaluated SCR emission rates at existing units from 2009–2015 and found that the third lowest *fleet-wide* yearly ozone season average was an appropriate metric to use for SCR performance. *See* 81 FR 74543 (October 26, 2016). These emission rates were used to calculate states' emissions budgets in the CSAPR Update. In order to project emission levels representing CSAPR Update implementation in 2023, it is reasonable to use the same assumptions regarding the average, fleet-wide emissions rate for affected units, even if individual unit operation may vary. Thus, consistent with that assumption, EPA used a 0.10 lb/mmBtu to represent operation of existing SCRs its 2023 projections as well. While unit-level performance will vary relative to this fleet-wide assumption (with some SCR controlled units operating below and some above), using a fleet-wide average for each unit-level estimate captures aggregate emission impacts to the air shed and minimizes the net residuals between unit-level estimates and the eventual observed unit-level performance.

Data from 2017, the first year of ozone season data that would be influenced by the CSAPR Update compliance requirements, is consistent with this assumption on a fleet-wide level. EPA began its engineering analysis to project 2023 EGU emissions with 2016 monitored and reported data. For the units with existing SCRs that were operating above 0.10 lb/mmBtu in 2016 (totaling 82,321 tons of emissions in that year), EPA assumed that SCRs would be optimized under a CSAPR Update scenario to 0.10 lb/mmBtu on average for 2023. This results in 2023 emissions estimates for these units being adjusted

[47] *See* NO_X Mitigation Strategy TSD *available at https://www.epa.gov/sites/production/files/2017-05/documents/egu_nox_mitigation_strategies_final_rule_tsd.pdf.*

[48] Sargent & Lundy, IPM Model—Updates to Cost and Performance for APC Technologies, SCR Cost Development Methodology, Final, Project 12847–002 (March 2013), *available at https://www.epa.gov/sites/production/files/2015-08/documents/attachment_5-3_scr_cost_methodology.pdf.*

down to 40,590 tons for these units. In 2017, the very first year of CSAPR Update, collective emissions from these units were 41,706 tons. This 2017 value is already very close to the 2023 estimated value, and supports the assumed behavior of optimized SCR performance to 0.10 lb/mmBtu on average. Some of these units operated above 0.10 lb/mmBtu in 2017 (as the commenter points out), but many operated below 0.10 lb/mmBtu, as well. Relying on the fleet-wide average estimate was very consistent with the fleet-wide observed behavior in 2017.

EPA disagrees with the notion that EGU emissions will increase, rather than decrease, in future years of the CSAPR Update implementation, or that the market for allowances would have to price allowances much higher in order for emission reductions to continue. This is not borne out by historical precedent or any economic models. There are a variety of policy and market forces at work beyond CSAPR allowance prices that are anticipated to continue to drive generation to shift from higher emitting to lower emitting sources. As evidenced in prior EPA allowance trading programs, emissions from covered sources generally trend downwards (regardless of allowance price) as time extends further from the initial compliance year.[49] Both the Acid Rain Program and CSAPR SO_2 allowance banks grew in 2017 from their 2016 levels, indicating that sources are collectively adding to the bank (by emitting below state budgets) rather than drawing down the bank because of the availability of low cost allowances. This illustrates that there are multiple drivers affecting emissions, and it is reasonable for EPA to consider those, in addition to CSAPR update incentives, in its projection of 2023 ozone season NO_X levels for EGUs.

Comment: One commenter states that EPA's 2023 modeling contains aspects that ''deviate from past guidance and have not undergone peer review,'' including a new approach to coastal grid cells. The commenter states that the affected community needs to be afforded the opportunity for review and public comment on such approaches.

Response: EPA released 2023 projected ozone design value data for individual monitoring sites in October 2017.[50] These data include ozone design value projections for each site based on the methodology recommended in EPA's photochemical modeling guidance.[51] In addition, EPA provided a companion set of 2023 design values based on an alternative approach for coastal monitoring sites. The commenter had an opportunity to review and analyze the alternative coastal grid cell approach during the public comment period for this action, as well as when the data were released in October 2017. The commenter did not provide any substantive feedback on the alternative approach including reasons why the approach would not be appropriate. EPA also notes that both methods result in the same outcome that all monitoring sites outside of California are not expected to have problems attaining or maintaining the 2008 NAAQS by 2023.

Comment: One commenter contends that reliance on modeling that predicts future compliance by 0.1 ppb when inherent uncertainties are much larger is arbitrary and capricious. The commenter states that the October 2017 Transport Memo speculatively suggests ozone NAAQS attainment without performance of any sensitivity analyses and through incorporation of a series of dubious assumptions, projecting attainment by only 0.1 ppb. Prediction of near-nationwide compliance by 2023 is the product of thousands of inputs, assumptions, and simplifications related to emissions inventories, future power consumption, meteorological conditions, and chemical reactions. The commenter notes natural gas prices as an example of the huge degree of uncertainty in this prediction. The modeling is based on predictions of 2023 emissions, which is based on predictions of power plant fuel utilization based on a guess of future fuel prices in 2023. If gas prices are higher than predicted, the modeling will predict greater dependence on coal-fired generation, predicting higher NO_X emissions, and ultimately under-predict ozone formation.

Response: EPA's modeling results that show the site the commenter refers to, site 090019003 in Fairfield County, Connecticut, is projected to be in compliance of the 2008 NAAQS by three ppb (*i.e.,* 2023 projected average design value is 73.0 ppb). When considering the effects of meteorological variability this site is still projected to be below the level of the NAAQS (*i.e.,* projected maximum design value is 75.9 ppb). Additionally, continuing ozone reductions are expected in future years at all sites due to an estimated 19 percent reduction in ozone season NO_X emissions expected to occur between 2017 and 2023 in the aggregate for the states covered by the CSAPR Update. The commenter provides no data to substantiate their claim that EPA's projected design values are not technically sound and appropriate for use in this rulemaking.

EPA recognizes that there are inherent uncertainties in modeling the future, but EPA believes that the model platform and inputs selected are well-supported and reasonable. The commenter did not provide information to suggest that there is an overall bias in the modeling-based projections. As it has for every air quality modeling exercise, EPA performed a model evaluation, as described in the Air Quality Modeling Technical Support Document for the final CSAPR Update, which compared ozone predictions for 2011 from the modeling platform to actual measured data from that year, in order to test how well the model characterized reality. The model evaluation indicates that the model's predictions corresponded closely to actual measured concentrations in terms of the magnitude, temporal fluctuations, and spatial differences for 8-hour daily maximum ozone.[52] The commenter is correct that EPA's modeling predictions are the result of thousands of inputs, assumptions, and simplifications; this is by definition the exercise of modeling. Moreover, because of the complexity of air quality modeling, courts are deferential to EPA's with respect to those inputs, assumptions, and simplifications. The D.C. Circuit has declined to ''invalidate EPA's predictions solely because there might be discrepancies between those predictions and the real world.'' *EME Homer City II,* 795 F.3d at 135–36. The fact that a ''model does not fit every application perfectly is not criticism; a model is meant to simplify reality in order to make it tractable.'' *Chemical Manufacturers Association* v *EPA,* 28 F.3d 1259, 1264, 307 U.S. App. DC 392 (D.C. Cir. 1994). The court has held that ''it is only when the model bears no rational relationship to the characteristics of the data to which it is applied that we will hold that the use of the model was arbitrary and capricious.'' *Appalachian Power Co.* v. *EPA,* 135 F.3d 791, 802 (D.C. Cir. 1998).

[52] Air Quality Modeling TSD, *available at https://www.epa.gov/airmarkets/air-quality-modeling-technical-support-document-final-cross-state-air-pollution-rule.*

As demonstrated by EPA's model performance evaluation, the modeling platform used in this rulemaking and EPA's choices as to inputs and assumptions provide reasonable projections of expected future year ozone concentrations and contributions, and is thus an appropriate basis on which to base the findings made in this action.

EPA further disagrees with the commenter's assertion that EGU projections are too uncertain because natural gas fuel prices may be different than those underlying EPA's projections, resulting in greater coal-fired generation and consequently higher emissions. First, EPA notes that power plant emissions are a small portion (approximately 15 percent) of the 2023 eastern states total NO_X emission inventory used to inform the air quality modeling.[53] Relative to mobile sources and other emission categories, EGU emissions projections are a smaller segment of the inventory and just a portion of the impact on the Connecticut modeled attainment status.

Moreover, EPA believes its EGU projections are reasonable and conservative. In developing the 2023 EGU emissions projections, EPA relied on 2016 monitored and reported data and only made emissions adjustments to account for (1) control optimization expected in response to the CSAPR Update implementation beginning in 2017, and (2) any known (*e.g.,* planned and under construction) power plant infrastructure changes, including new builds, retirements, coal-to-gas switching, and SCR retrofit project underway and reported by the owner or operators to the Department of Energy's (DOE) Energy Information Administration (EIA) in EIA Form 860.[54] No adjustments were made for projected, but unannounced, fleet changes estimated to occur by 2023 in response to market conditions and an aging fleet. Because these projected fleet wide changes would have resulted in lower 2023 EGU emission estimates, the EGU emission projections EPA actually used in the modeling were conservative.

EPA also does not agree with the commenter that gas prices are likely to be higher in future years. Average annual natural gas prices ranged from $2.52/mmBtu to $4.37/mmBtu between 2009 and 2016.[55] EPA and other independent analysts expect future natural gas prices to remain low and within this 2009 to 2016 range due both to supply and distribution pipeline build-out. For example, the EIA's 2018 Annual Energy Outlook (AEO) natural gas price projections for Henry Hub spot price range from $3.06/mmBtu in 2018 to $3.83/mmBtu in 2023.[56] Moreover, the AEO short-term energy outlook and New York Mercantile Exchange futures further support the estimates of a continued low-cost natural gas supply.[57] These independent analyses of fuel price data and projections lead to EPA's expectation that fuel-market economics will continue to support natural gas consumption during future ozone seasons through at least 2023 in a manner similar to recent historical levels. These lower natural gas price outlooks suggest, if anything, lower emissions projections, not higher. Consistent with this outlook, industry has announced significant new waves of coal retirements since 2016—which is also consistent with a less emissions-intensive outlook than that captured by EPA's use of 2016 EGU data as its starting point for emissions inventory purposes in this action. EPA agrees that there is some uncertainty in fuel prices that consequently casts uncertainty on future emissions projections. However, for the reasons discussed herein, EPA believes its assumptions are both reasonable and conservative. Moreover, EPA notes that many of the assumptions factored into its 2023 projections are firm (*e.g.,* retirements) and therefore not sensitive to future fuel price changes.

The reasonableness, conservativeness, and feasibility of EPA assumptions are illustrated by the first year of CSAPR compliance emission levels in 2017. Emissions in 2017 dropped (in just one year) by 21 percent from 2016 levels and were 7 percent below the CSAPR budget for the 22 affected states. EPA 2023 projections for the same set of states were 10 percent below the CSAPR budget, meaning in just one-year states have already achieved the majority of the EGU reduction anticipated by EPA and are well above pace to be at or below that level by 2023. For Kentucky specifically, ozone season NO_X EGU emissions dropped from 25,402 tons in 2016 to 19,978 tons in 2017 for EGUs greater than 25 MW. This reflects a 21 percent reduction in just one year of the total 33 percent reduction assumed for the state by 2023.[58]

Comment: One commenter provided 2017, 2020, and 2023 projected design values based on air quality modeling by the Ozone Transport Commissions (OTC) using the Community Multi-scale Air Quality Model (CMAQ) and design values for 2023 using the Comprehensive Air Quality Model with Extensions (CAMx) in conjunction with emissions inventory projections from the Mid-Atlantic Regional Air Management Association (MARAMA). The commenter also included the 2023 projected design values based on EPA's CAMx modeling. The commenter includes a sample of the results and points to predicted 2023 design values based on CMAQ that are above the NAAQS at the Westport, Connecticut and Susan Wagner, New York monitors. The commenter states that the CMAQ results are ''considerably different'' from EPA's CAMx modeling.

Another commenter states that EPA's modeling as well as modeling conducted by Alpine produce overly optimistic projection of future year ozone levels. The commenter includes a table that the commenter characterizes as indicating 2017 measured design values considerably higher than those projected at all Connecticut monitoring sites as well as indicating Kentucky contributions of greater than 1 percent at two Connecticut monitors after contributions are scaled relative to 2017 measured air quality levels. The commenter states that Kentucky's proposed SIP fails to address the underprediction of the modeling.

Response: EPA does not agree that the modeling provided by commenters should affect EPA's reliance on its own 2023 modeling. The first commenter provided projected design values at 41 monitoring sites along the Northeast Corridor for each model run. Of these 41 sites, all but two had base year design values that exceeded the 2008 NAAQS. The modeling results show that the EPA and OTC CAMx-based 2023 design value projections are consistent on an individual site basis for all 41 sites. Both sets of CAMx modeling indicate that the 41 sites will be below the 2008 NAAQS by 2023.

In addition, the CMAQ 2023 design values are consistent with both sets of CAMx-based 2023 projections at nearly

all sites. That is, CMAQ modeling indicates that all but two of the 41 sites will be below the 2008 NAAQS by 2023. The two sites projected to exceed the 2008 NAAQS in 2023 with CMAQ, but not the OTC and EPA CAMx modeling, are the Westport site in Connecticut and the Susan Wagner High School site in New York.

The CMAQ projections for these two sites are not only inconsistent with the CAMx modeling, but they are also inconsistent with the CMAQ modeling for other nearby sites in Connecticut, New York, and New Jersey. For example, based on the CMAQ modeling, ozone at the Susan Wagner site is projected to decline by only five percent between 2011 and 2023, whereas at a site in nearby Bayonne, New Jersey, ozone is projected to decline by 13 percent over this same period. Similarly, ozone at the Westport site is projected to decline by only three percent between 2011 and 2023 with CMAQ, but at other sites along the Connecticut coastline (*i.e.,* sites in Greenwich, Stratford, and Madison) ozone is projected to decline by 10 to 19 percent. In addition, the CMAQ results for these two sites are inconsistent with ozone reductions predicted by CMAQ at other sites in the New York City area which range from 11 to 18 percent. While it is possible ozone levels in 2023 at the Westport and/or Susan Wagner sites may be higher than at other sites in the New York City area, the commenter fails to provide any explanation regarding the large difference in the CMAQ-based model response to emissions reductions at these two sites compared to nearby sites and to other sites in the New York area. Based on the complicated photochemistry in the New York City area, it is possible that ozone monitoring sites closest to the New York City NO_X emissions plume may be less responsive to NO_X controls compared to sites further downwind. Due to non-linear chemistry, sites very close to the city may experience increases in ozone or less reduction than other nearby sites on some days in response to local emissions reductions in NO_X. Thus, we might expect that monitoring sites in Connecticut that are closer to New York City would show less reduction in ozone than sites in Connecticut that are further downwind. However, as noted above, in the OTC CMAQ modeling, the closest downwind Connecticut site (Greenwich) has a 10-percent modeled ozone reduction, while the Westport site, which is further downwind, has only a 3-percent modeled ozone reduction. The commenter did not provide any information to explain why the OTC CMAQ modeling results for the Westport, Connecticut and Susan Wagner, New York monitoring sites are dissimilar to other near-by sites or why the CMAQ modeling provides a more representative ozone projection for these two sites compared to the EPA and OTC CAMx-based modeling results.

The second commenter contends that modeling by EPA and Alpine for 2023 is overly optimistic because EPA's modeled ozone design values for 2017 are higher than the preliminary 2017 design values for certain monitoring sites in Connecticut. The results of the air quality modeling performed by the OTC show that the results of the CAMx modeling by EPA and Alpine are consistent with the OTC's 2023 CAMx modeling results. Specifically, the EPA, Alpine, and OTC CAMx modeling all project that all sites identified by the commenter as having preliminary 2017 measured design values exceeding the 2008 NAAQS will be in compliance with that NAAQS by 2023. These CAMx results are also consistent with the OTC CMAQ modeling, except for one site in Westport, Connecticut, that CMAQ predicts will still violate the 2008 NAAQS in 2023. However, the CMAQ modeling for this site is inconsistent with other available modeling from EPA, the OTC, and Alpine, as described in the paragraph above.

In addition, the commenter compared the preliminary 2017 measured design values to EPA's projected 2017 average design values, but did not demonstrate that the modeling was generally biased. In particular, the commenter ignored EPA's projected maximum design values. The projected maximum design values are intended to represent future ozone concentrations when meteorological conditions are more favorable to ozone formation than the average. Comparing both the 2017 modeled average design values and maximum projected design values to the preliminary 2017 measured design values indicates that the projected maximum design values are, in most cases, closer in magnitude to the 2017 preliminary measured design values than the 2017 model-projected average design values listed in the comments.

Further, while the modeling-based projections may have understated observed design values at certain monitoring sites in Connecticut, this was not the case for other 2017 receptor sites in the Northeast Corridor. For example, at other receptor sites in the New York area in Suffolk and Richmond counties, New York, the measured 2017 design values were within 0.2 ppb of the model-predicted average design values. At the site in Philadelphia County, Pennsylvania the modeled 2017 maximum design value was 1.1 ppb lower than the corresponding measured value and at the site in Harford County, Maryland, the modeled value was higher, not lower, than the measured 2017 design value. It is not unreasonable that there may be some differences between the modeling-based projections for a future year in part because the meteorology of the future year cannot be known in advance. While EPA recognizes that there are uncertainties in the modeling, the results for the 2017 receptor sites in the Northeast do not, on balance, show a consistent bias.

Even though the preliminary 2017 measured design values at the eight sites identified by the commenter are still measuring violations of the 2008 NAAQS, it is entirely reasonable to project that these sites will be in attainment by 2023 as a result of the roughly 19 percent reduction in aggregate ozone season NO_X emissions that is expected to occur between 2017 and 2023 for the states covered by the CSAPR Update. As mentioned earlier, because of the high NO_X emissions in the New York City area and the non-linear chemistry associated with ozone formation, the benefits of NO_X emissions reductions may not have been fully realized to date at downwind sites in Connecticut. More notable reductions in ozone at these sites are expected as NO_X emissions decline further, in response to existing control programs and other factors influencing emissions. A large short-term reduction in ozone is not unprecedented at historically high ozone sites in other parts of the Northeast Corridor. Specifically, the measured design values at the Edgewood monitoring site in Harford County, Maryland, which is downwind of the Baltimore/Washington, DC urban area, declined by nearly 20 percent between 2012 and 2014 and have been below the level of the 2008 NAAQS since 2014, as shown by the data in the table below. Thus, EPA disagrees that the monitored data cited by the commenter indicates that the modeling projections are unreliable.

DESIGN VALUES (PPB) AT EDGEWOOD SITE IN HARFORD COUNTY, MD, 2007 THROUGH 2017

Year	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	Preliminary 2017
Design Value	94	91	87	89	92	93	85	75	71	73	75

Comment: One commenter asserts that the 2023 modeling provided by EPA does not provide a ‘‘full remedy’’ because it shows that Kentucky still significantly contributes to ozone levels (which the commenter contends is defined by a contribution greater than 1 percent of the NAAQS, or 0.75 ppb) across Delaware between 1.10 and 2.53 ppb in 2023. Although the modeling shows attainment in Delaware in 2023, the commenter contends that Kentucky should not presume Delaware or any other state will be attaining the 2008 ozone NAAQS in 2023. The commenter notes that monitors in Delaware are currently meeting the 2008 ozone NAAQS, but that other monitors in the Philadelphia nonattainment area are exceeding the NAAQS (noting the Bristol, Pennsylvania monitor with a 2014–2016 design value of 77 ppb), despite the fact that EPA officially declared the nonattainment area had attained.

Another commenter states that the CSAPR Update ‘‘clearly established’’ Kentucky’s significant contribution to the Richmond County monitor, and disagrees with EPA’s proposed amendment to reflect that the CSAPR Update provides a full remedy to Kentucky’s transport obligation because in EPA’s 2023 modeling ‘‘Kentucky is still shown to be significantly contributing to monitors’’ in the New York City metropolitan area, the area currently exceeds the NAAQS ‘‘by a significant margin,’’ and the area will likely continue to exceed the NAAQS in 2023 ‘‘once the issues with EPA’s projection modeling are addressed.

Response: EPA disagrees with the commenters’ assertion that an impact in a downwind area above the 1 percent threshold necessarily indicates that an upwind state significantly contributes to nonattainment or interferes with maintenance of the NAAQS in a downwind state. The good neighbor provision first requires the identification of a downwind nonattainment or maintenance problem before emission reductions may be required, regardless of the upwind state impact on downwind ozone concentrations. *See EME Homer City II,* 795 F.3d at 129–30 (finding emission budgets invalid where air quality modeling showed downwind nonattainment and maintenance problems would be resolved). As the commenter notes, EPA’s modeling shows that no areas in the East will have downwind air quality problems with respect to the 2008 ozone NAAQS in 2023, and thus EPA’s analysis is complete at step one of the four-step framework. As discussed earlier, although monitors may currently measure exceedances of the NAAQS, EPA interprets the term ‘‘will’’ in the good neighbor provision to permit consideration of projected air quality in an appropriate future year. *See North Carolina,* 531 F.3d at 913–14.

Moreover, even if a downwind air quality problem had been identified, the fact that an upwind state would contribute at or above the 1 percent threshold to downwind nonattainment and maintenance receptors in step two of EPA’s framework does not by itself indicate that the state would be considered to ‘‘contribute significantly’’ or ‘‘interfere with maintenance’’ of the NAAQS. The finding that a state’s downwind impact would meet or exceed this threshold only indicates that further analysis is appropriate to determine whether any of the upwind state’s emissions meet the statutory criteria of significantly contributing to nonattainment or interfering with maintenance. This further analysis in step three of EPA’s four-step framework considers cost, technical feasibility and air quality factors to determine whether any emissions deemed to contribute to the downwind air quality problem must be controlled pursuant to the good neighbor provision.

Thus, the commenter is incorrect to assert that EPA’s 2023 modeling shows that Kentucky significantly contributes to ozone levels in Delaware.

Comment: One commenter points to the 2023 modeling performed by Alpine indicating greater than a 1 percent contribution by Kentucky to New Jersey. The commenter points specifically to the Ocean County and Colliers Mill monitoring sites in New Jersey as receiving 1.48 ppb of ozone from Kentucky.

Response: There is only one ozone monitoring site in Ocean County New Jersey and that site is located in Colliers Mills.[59] This site is currently monitoring attainment of the 2008 ozone NAAQS based on a 2014–2016 design value of 73 ppb, and preliminary data indicates that the 2015–2017 design value remains at 73 ppb. This site is also projected to be in attainment of the 2008 ozone NAAQS in 2023. That is, this site is not expected to have a problem attaining or maintaining the 2008 NAAQS in 2023 that would warrant consideration of further upwind reductions in Kentucky.

Comment: One commenter states that EPA’s 2023 contribution assessment methodology, which uses average exceedance day ozone contribution, does not capture what happens on a daily basis for ozone formation and is inconsistent with how the states are required to use ‘‘peak’’ ozone days when they demonstrate attainment of the ozone standard. Ozone episodes are dependent on variation in daily weather patterns and energy generation dispatch.

The commenter notes that Maryland has recently conducted modeling that shows that certain meteorological regimes will show very large contribution while other meteorological regimes show lower contribution. The commenter states that the days when Kentucky’s contribution in the model is very high are generally the same type of days that Maryland expects will drive the attainment process, where peak days are used to calculate design values using measured, not modeled data. The commenter states that this can be resolved by requiring the largest emitters of ozone precursors, coal-fired EGUs with SCR and SNCR, to optimize those controls every day of the ozone season.

Response: EPA does not believe the methodology used to evaluate upwind state contributions to downwind air quality problems is relevant to this action, because, as noted in the NPRM and earlier this action, EPA’s modeling shows that there are projected to be no remaining air quality problems identified in the East in 2023. Accordingly, EPA’s analysis concludes at step one of the four-step framework, and as discussed earlier in this action, the level of Kentucky’s contribution to any downwind monitoring cites in 2023, which would not be addressed until step two of the four-step

[59] *See* Figure 4–5 in the 2016 New Jersey Air Quality Report, New Jersey Department of Environmental Protection, Bureau of Air Monitoring, December 7, 2017, *available at http://www.njaqinow.net/.*

framework, is therefore irrelevant. Moreover, to the extent the commenter refers to Kentucky's contribution to downwind air quality problems in EPA's 2017 modeling conducted for the CSAPR Update, EPA has already acknowledged that Kentucky was linked to the ozone monitoring site in Harford County, Maryland. Thus, whether or not Kentucky's contribution would have been higher in 2017 based on examining impacts on ''peak'' ozone days is also irrelevant because EPA already quantified and implemented emission reductions for Kentucky in the CSAPR Update based on this linkage.

Nonetheless, EPA disagrees that its method for calculating contribution from upwind states to downwind receptors is inconsistent with how the states are required to demonstrate attainment of the ozone NAAQS. EPA's modeling guidance recommends that states calculate future year ozone projections based on 5-year weighted *average* design values and on the *average* base year and future year concentrations across the highest base year concentration days.[60] Similarly, EPA's method for calculating the *average* contribution metric in the CSAPR Update was based on the *average* contribution across the days with the highest future year concentrations.

Comment: One commenter states that the CSAPR Update, by its own terms, does not fully satisfy section 110(a)(2)(D) for the 2008 ozone NAAQS. Rather than rely on the CSAPR Update, Kentucky's SIP revision must evaluate the Commonwealth's expected contribution to downwind nonattainment and include provisions to prevent those contributions in a timely fashion. The commenter cites *North Carolina's* conclusion that ''a complete remedy to section 110(a)(2)(D)(i)(I) . . . must do more than achieve something measurable; it must actually require elimination of emissions from sources that contribute significantly and interfere with maintenance in downwind nonattainment areas.'' 531 F.3d at 908.

The commenter notes that, in the final CSAPR Update, EPA explained that downwind air quality problems would remain after implementation, and that the rule was limited by EPA's focus on ''immediately available reductions'' that could be implemented by the 2017 ozone season. The commenter further states that EPA's October 2017 Transport Memo conceded that the CSAPR update only partially addressed the requirements of the good neighbor provision, noting in a footnote that the memo indicates continued nonattainment in Philadelphia, which is linked to Kentucky in the CSAPR Update.

The commenter contends that Kentucky has undertaken no independent analysis of whether any emission reductions that have occurred as a result of its implementation of the CSAPR Update have actually eliminated the Commonwealth's significant contribution to nonattainment or maintenance monitors in linked downwind states. Given Kentucky's largest downwind contribution was 10.8 ppb to ozone concentrations at a maintenance monitor in Ohio in 2017, the commenter asserts that it is highly improbable that the modest reductions in NO_X emissions from Kentucky plants that have occurred since the implementation of the CSAPR Update have eliminated this significant linkage. The commenter notes in a footnote that Kentucky reduced NO_X emissions during the ozone season by about a third in implementing the CSAPR Update, and accordingly retained a similar majority of its downwind impacts, well above the 0.75 ppb threshold of ''significant contributions.''

Response: While EPA indicated that the CSAPR Update FIPs ''*may* not be sufficient to fully address these states' [including Kentucky's] good neighbor obligations'' for the 2008 ozone NAAQS (emphasis added), EPA did not definitely determine that additional reductions were required. 81 FR 74521. Rather, EPA acknowledged that additional analysis would be required to determine the full extent of the good neighbor obligation. Kentucky's SIP submission and EPA's review in this action conduct this additional assessment by analyzing downwind ozone concentrations relative to the 2008 ozone NAAQS in a future analytic year, considering downwind attainment dates and anticipated compliance timeframes for potential, additional emission reductions. The results of this analysis show that the downwind air quality problems to which Kentucky was linked in 2017 are resolved by 2023, and thus concludes that the emission reductions required by the CSAPR Update provide a complete remedy under the good neighbor provision for the 2008 ozone NAAQS. EPA therefore disagrees that EPA's approval of Kentucky's SIP is inconsistent with the court's holding in *North Carolina,* because EPA has in fact required meaningful emission reductions from sources in Kentucky via the CSAPR Update FIP.

Moreover, as explained earlier in this action, an impact in a downwind area above the 1 percent threshold does not necessarily indicate that an upwind state significantly contributes to nonattainment or interferes with maintenance of the NAAQS in a downwind state. The good neighbor provision first requires the identification of a downwind nonattainment or maintenance problem before emission reductions may be required, regardless of the upwind state impact on downwind ozone concentrations. *See EME Homer City II,* 795 F.3d at 129–30 (finding emission budgets invalid where air quality modeling showed downwind nonattainment and maintenance problems would be resolved). Thus, although emissions from Kentucky may continue to impact air quality in other states in 2023, this impact is not impermissible under the good neighbor provision given EPA has projected that there will be no air quality problems that could trigger upwind control obligations.

Comment: One commenter contends that EPA takes two contradictory positions regarding its application of the four-step framework designed to assist states in determining good neighbor SIP obligations under the CAA, citing the January 2015 Transport Memo. The commenter notes that, based on 2017 modeling conducted for the CSAPR Update, EPA acknowledged that Kentucky is linked to Maryland's Harford County monitor, which will continue to have maintenance problems in the near future. However, instead of completing the analysis at steps 3 and 4 using 2017 as a baseline, EPA returned to step one, performed new modeling for 2023, and used that modeling to determine that there will be no remaining air quality problems outside of California.

The commenter further contends that reliance on 2023 modeling is inappropriate because the attainment deadline for Harford County is July 2018, and Maryland must continue to maintain thereafter. The commenter states that EPA should have completed all steps of the four-step framework using a consistent base year since EPA's own modeling identified Kentucky as currently linked to the Harford County receptor. EPA should have identified the emissions reductions necessary to prevent Kentucky from significantly contributing to nonattainment or interfering with maintenance in Maryland, and required Kentucky to

[60] Modeling Guidance for Demonstrating Attainment of Air Quality Goals for Ozone, $PM_{2.5}$, and Regional Haze, U.S. Environmental Protection Agency, Research Triangle Park, NC, *available at http://www.epa.gov/ttn/scram/guidance/guide/Draft_O3-PM-RH_Modeling_Guidance-2014.pdf.*

adopt permanent and enforceable measures needed to achieve identified emission reductions as expeditiously as practicable. The commenter asserts that Kentucky's obligation to reduce its current contribution to Maryland's 2017 maintenance monitor cannot properly be offset based on projections about future air quality which may or may not occur in 2023.

Response: The commenter misunderstands EPA's analysis in this rule and the operation of the four-step framework. EPA agrees that Kentucky was linked to the Harford County receptor in step two of EPA's four-step framework based on the 2017 modeling conducted for the CSAPR Update. Based on that determination, EPA already evaluated and quantified, at step three, feasible and cost-effective emission reductions that were required to address Kentucky's good neighbor obligation with respect to that receptor in the CSAPR Update, and implemented those emission reductions at step four through the requirement that EGUs in Kentucky participate in the CSAPR NO_X Ozone Season Group 2 allowance trading program. Thus, EPA has completed steps 3 and 4 with respect to the 2017 modeling analysis.

However, as explained in the CSAPR Update, EPA could not conclude that the rule fully addressed CAA section 110(a)(2)(D)(i)(I) obligations for 21 of the 22 CSAPR Update states, including Kentucky. Specifically, EPA determined that downwind air quality problems would remain after implementation of the CSAPR Update, including at the Harford County monitor, and EPA could not conclude at that time whether additional EGU and non-EGU reductions implemented on a longer timeframe than 2017 would be feasible, necessary, and cost-effective to address states' good neighbor obligations for this NAAQS.

Given that any additional emission reductions, if necessary, would be implemented at some point after 2017, it is reasonable for Kentucky and EPA to evaluate air quality (at step one of the framework) in a future year that is aligned with feasible control installation timing in order to ensure that the upwind states continue to be linked to downwind air quality problems when any potential emissions reductions would be implemented and to ensure that such reductions do not over-control relative to the identified downwind ozone problem. *See EME Homer City,* 134 S. Ct. at 1608. Here, EPA has determined that the air quality problems identified at the Harford receptor with respect to the 2008 ozone NAAQS will be resolved by 2023. Accordingly, EPA does not have the authority to require additional emission reductions from sources in Kentucky in that year. *See EME Homer City II,* 795 F.3d at 130 (determining that CSAPR ozone season budgets for 10 states are invalid based on determination that modeling showed no future air quality problems).

Comment: One commenter asserts that the good neighbor provision does not permit a state to delay its elimination of significant downwind contribution indefinitely. EPA made nonattainment designations for areas where Kentucky is making a significant contribution and therefore EPA's proposal to delay enforcing Kentucky's good neighbor obligations for another five years violates the good neighbor provision. Kentucky's SIP fails to address Kentucky's present and ongoing significant contribution to nonattainment or interference with maintenance of the NAAQS in downwind areas including the New York-Northern New Jersey-Long Island, NY-NJ-CT nonattainment area in the NYMA.

The commenter states that the CSAPR Update established Kentucky's significant contribution to the Richmond County monitor in 2017, which is part of the NYMA that measured nonattainment for the 2008 ozone NAAQS during 2017. The commenter contends that EPA's proposed approval provides no modeling or monitoring data showing that Kentucky's significant contribution to NYMA nonattainment has presently ceased or that it will cease at any time prior to 2023. Therefore, the commenter opposes the modification of EPA regulations to reflect that the CSAPR Update fully addresses Kentucky's transport obligation.

The commenter states that Kentucky's significant contribution to nonattainment and/or maintenance problems for New York under the 2008 ozone NAAQS are present nearly 10 years after EPA promulgated the NAAQS, seven years after the SIP was due, and five years after EPA's FIP was due. Yet Kentucky's SIP looks out another five years before concluding it is feasible for Kentucky to comply with its good neighbor obligations. EPA's 2023 modeling is 15 years after promulgation of the NAAQS and delays compliance without statutory authority, effectively permitting Kentucky's continuing violation of the good neighbor provision.

Response: EPA disagrees that it has allowed Kentucky to delay addressing its good neighbor obligation indefinitely. Rather, EPA promulgated a FIP for the Kentucky in the CSAPR Update that has required EGUs in the Commonwealth to limit their collective emissions beginning 2017. As discussed earlier, EPA could not conclude whether or not the FIP was sufficient to address the state's good neighbor obligation for Kentucky without further analysis, and EPA therefore further disagrees with the commenter's assertion that Kentucky has continued to violate its obligation after implementation of the CSAPR Update. As discussed earlier, the fact that emissions from the Commonwealth may continue to impact air quality in other states does not conclude the question of whether that impact constitutes a significant contribution or interference with maintenance of the NAAQS under the good neighbor provision.

In order to determine whether Kentucky had any remaining emission reduction obligations with respect to the 2008 ozone NAAQS, additional analysis was necessary. EPA explained in the NPRM and earlier in this action why it was appropriate to evaluate air quality in a future analytic year to determine whether the Commonwealth would have any further emission reduction after implantation of the CSAPR Update and how the choice of a 2023 analytic year was consistent with legal precedent. Thus, EPA does not agree that its approval of Kentucky's SIP improperly delays compliance with the good neighbor provision for the 2008 ozone NAAQS.

Comment: One commenter states that EPA must issue a FIP for the Commonwealth of Kentucky consistent with the obligations of CAA section 110(a)(2)(D) as well as the court's order in *Sierra Club* v. *Pruitt,* No. 3:15–cv–04328–JD (N.D. Cal. May 23, 2017), directing EPA ''to promulgate the Kentucky FIP by June 30, 2018.''

Another commenter contends that EPA's proposed approval of the Kentucky SIP does not obviate its duty to issue a fully compliant FIP for Kentucky by the June 30, 2018 deadline in accordance with the court's order.

A further commenter states that states were required to submit SIPs addressing the good neighbor provision for the 2008 ozone NAAQS by March 2011, and that EPA disapproved Kentucky's SIP on March 4, 2013. This finding triggered EPA's mandatory duty under CAA section 110(c)(1) to promulgate a FIP for Kentucky within two years: By March 7, 2015. When EPA failed to act, Sierra Club and New York sued EPA in the United States District Court for the Northern District of California to require EPA to adopt a FIP addressing Kentucky's good neighbor obligations. The commenter notes that the Supreme

Court found that section 110(c)(1) ''impose[s] an absolute duty on EPA to issue [a] FIP within two years of Kentucky's failure to adopt an adequate state implementation plan,'' *EME Homer City,* 134 S. Ct. at 1600, and that EPA did not contest its liability to issue a FIP for Kentucky based on the SIP disapproval. The District Court ordered EPA ''to promulgate the Kentucky FIP by June 30, 2018.''

The commenter contends that the Kentucky SIP cannot be approved because it requires insufficient action to reduce Kentucky's significant contribution to nonattainment in the NY-NJ-CT multistate nonattainment area by the CAA's mandatory attainment deadlines of July 2018 (moderate areas) and July 2021 (serious areas). The commenter asserts that EPA's failure to propose a FIP by June 30, 2018, is another instance of EPA's failure to carry out its mandatory duty under section 110(c) with respect to Kentucky's transport obligations, and a clear violation of the District Court's order.

Response: EPA disagrees that this action fails to satisfy the requirements of the court's order in *Sierra Club* v. *Pruitt.* While the commenters are correct that section 110(c)(1)(B) requires the Administrator to promulgate a FIP within two years after the Administrator disapproves a SIP in whole or in part, the provision further qualifies this obligation. The Administrator is to promulgate a FIP ''*unless* the State corrects the deficiency, and the Administrator approves the plan or plan revision, before the Administrator promulgates such [FIP].'' Thus, once EPA has approved a SIP that EPA determines addresses the deficiency that was the subject of the prior SIP disapproval, the Administrator no longer has the authority (much less the obligation) to promulgate a FIP.

As to the requirements of the good neighbor provision for the 2008 ozone NAAQS, EPA has promulgated a FIP for Kentucky in the CSAPR Update. While EPA indicated that the CSAPR Update FIPs ''*may* not be sufficient to fully address these states' [including Kentucky's] good neighbor obligations'' for the 2008 ozone NAAQS (emphasis added), EPA did not definitely determine that additional reductions were required. *See* 81 FR 74521 (October 26, 2016). Rather, EPA acknowledged that additional analysis would be required to determine the full extent of the good neighbor obligation. Thus, the only remaining deficiency after promulgation of the CSAPR Update FIP was to determine what, if any remaining emission reduction obligation would apply to the states, including Kentucky. EPA has determined, in this SIP action, that no further emission reductions are required for the 2008 ozone NAAQS, and thus, that the CSAPR Update FIP fully addresses Kentucky's good neighbor obligation. Accordingly, EPA lacks authority to issue any further FIP since the CSAPR Update has fully addressed the deficiency identified in the initial SIP disapproval that triggered EPA's FIP obligation.

Moreover, to the extent the commenters contend that the court's citation to the Supreme Court's decision in *EME Homer City,* 134 S. Ct. at 1600, precludes EPA's use of a SIP approval to address the remaining deficiency, the commenters misrepresent the holding of the Court. Importantly, the Court was emphasizing the ''absolute'' nature of EPA's mandate in order to counter arguments from the respondents and the lower court that EPA's FIP authority was contingent on an obligation to take some action other than to find that the state has failed to submit an approvable SIP. While the Court did state that EPA has an absolute mandate to promulgate a FIP upon a SIP disapproval, the court also acknowledged, repeatedly, that the state could first ''correct the deficiency'' through submission of a SIP. *Id.* at 1600–01 (emphasizing twice that EPA's obligation to issue a FIP can be affected if the state ''correct[s] the deficiency'' on its own). That is precisely what has occurred here with respect to the portion of the good neighbor deficiency not already addressed by the CSAPR Update. Thus, EPA's action is consistent with section 110(c) and therefore consistent with the Northern District of California's order that EPA address its obligation under section 110(c) as it pertains to Kentucky's good neighbor obligation for the 2008 ozone NAAQS.

Comment: Several commenters contend that EPA is inappropriately parallel processing the Kentucky SIP in light of the ''significant number and scope'' of public comments raised during the state public comment process. The commenters state that Kentucky should have been required to address comments prior to EPA's proposed approval. One commenter contends that EPA's proposed approval of the Kentucky SIP on the condition that the final SIP contain no substantial changes removes any incentive for Kentucky to address the public comments by making necessary changes. The commenter further asserts that Kentucky's SIP is controversial and contested, and thus, parallel processing is inappropriate. To support this assertion, the commenter notes that EPA denied a petition brought under section 176A, which is currently subject to review in the D.C. Circuit, that involves claims of transported ozone pollution from Kentucky and other upwind states. The commenter further states that EPA's only apparent reason for parallel processing is the court-ordered deadline to promulgate a FIP by June 30, 2018, and that EPA's own inaction is no excuse for taking rushed, unreasonable, arbitrary and capricious action to approve a deficient SIP.

Response: EPA disagrees with the commenters' assertions that parallel processing is inappropriate in these circumstances. Parallel processing is a well-established procedure for acting on SIP submissions that is allowed under long-standing EPA regulations. Appendix V to 40 CFR part 51 (Appendix V) provides the criteria for determining the completeness of SIP submittals and the procedures for parallel processing. These procedures, set forth in paragraph 2.3 of Appendix V, allow a state to request parallel processing as the state is accepting comments and finalizing its SIP revision. Under parallel processing, the state submits a copy of a draft SIP submittal to EPA before conducting its public hearing. EPA reviews the draft submittal and, if EPA believes it is approvable, publishes an NPRM during the same timeframe that the state is holding its public hearing. The state and EPA then provide for concurrent public comment periods on both the state action and the federal action, respectively.

Although parallel processing expedites action on SIP submissions, it does not limit EPA's substantive review. EPA evaluates the draft submittal against the same approvability criteria as any other SIP submission, and the final submission must meet all of the necessary SIP completeness criteria, including the requirement that the submission contain a ''[c]ompilation of public comments and the State's response thereto.'' *See* Appendix V, paragraphs 2.1(h) and 2.3.2. Therefore, a state must respond to comments received during the state public comment period. Parallel processing does not remove the incentive for a state to revise its SIP submission in response to comments that raise valid approvability concerns because ultimately EPA cannot approve a submission that fails to meet all approvability criteria.

EPA is not taking a rushed, unreasonable, or arbitrary and capricious action by using parallel processing to act on Kentucky's SIP submission. Kentucky submitted a parallel processing request, as allowed under paragraph 2.3.1 of Appendix V, and EPA is following the criteria set forth in Appendix V to approve the Commonwealth's final submittal. These criteria do not exclude certain types of SIP submissions from parallel processing because all SIP submissions reviewed through this process must ultimately meet all completeness and approvability criteria regardless of the number of comments received or the degree of controversy. Furthermore, EPA provided the public with a full opportunity to comment on the draft submittal and has fully evaluated all of the submitted comments. If these comments had identified specific issues that would not allow EPA to approve the draft SIP submission, EPA could not have taken this final action.

Comment: One commenter suggests that a declaration filed in another pending lawsuit demonstrates that EPA has prejudged its approval of Kentucky's proposed SIP submission, by noting that the declaration states EPA has proposed an ''unconditional approval.'' This appears to be contrary to what was stated in EPA's proposed approval, wherein EPA stated that the approval is contingent on Kentucky addressing any comments in the state-level process. The declaration further states that ''EPA intends to finalize an appropriate action for Kentucky'' by the court-ordered deadline. The commenter contends that, because of the public notice and hearing requirements under CAA section 307(d), and because EPA has not yet proposed a FIP, the only action EPA has left itself is to approve Kentucky's deficient SIP regardless of any public comments it receives.

Response: The commenter misinterprets the reference to proposed ''unconditional approval'' of Kentucky's SIP made in the declaration of Reid Harvey filed in *New York* v. *Pruitt,* No. 18–cv–406 (S.D.N.Y.). Section 110(k)(4) permits the Administrator to issue a ''conditional'' approval of a SIP based on a commitment of a state to adopt specific measures within one year of the final action. If the state fails to meet this commitment, the conditional approval is treated as a disapproval. Mr. Harvey's declaration used the term ''unconditional approval'' to indicate that the proposed approval was *not* made pursuant to section 110(k)(4). The use of this term is unrelated to the contingencies associated with the parallel processing requirements, which are laid out in Appendix V to 40 CFR part 51 rather than in section 110.

Moreover, EPA does not agree that the Agency has been forced to approve a deficient SIP based on the court-ordered deadline and the procedural requirements for the promulgation of a FIP. For the reasons explained in the NRPM and in this action, EPA finds that Kentucky's SIP submission, together with the CSAPR Update, fully satisfies the requirements of the good neighbor provision with respect to the 2008 ozone NAAQS. However, had EPA determined that it could not finalize approval of Kentucky's SIP and would instead need to promulgate a FIP, EPA would have filed an appropriate motion with the district court requesting an extension of the court-ordered deadline.

Comment: One commenter contends that approving the Kentucky SIP and putting the October 2017 Transport Memo into effect will effectively foreclose any further good neighbor activities under the 2008 ozone NAAQS and EPA will have reversed its position in the CSAPR Update that more NO_X controls were necessary. EPA deferred action under section 176A of the CAA by indicating it would enforce good neighbor obligations through other mechanisms like the transport rule framework. The commenter asserts that EPA effectively shifts the burden onto downwind states to cope with upwind pollution sources while denying downwind state any means to enforce good neighbor obligations.

The commenter continues that EPA's failure is forcing downwind states to attempt to address Kentucky's and other upwind states' contributions to ozone concentrations via other, resource-intensive CAA mechanisms. The commenter cites a recent petition submitted by Maryland under CAA section 126 identifying three coal-fired units in Kentucky to which EPA has to date failed to respond. The commenter also cites a petition submitted pursuant to CAA section 176A to expand the OTR, which EPA denied. The commenter claims it is arbitrary and capricious for EPA to point to separate CAA provisions as an excuse for inaction on the ozone transport problem, and to reverse itself without confronting its prior position.

Another commenter states that New York's recent submittal of a section 126 petition to EPA buttresses Connecticut's claims and that notes that such petition names stationary sources in Kentucky as ''interfer[ing] with attainment'' of the New York-New Jersey-Connecticut nonattainment area. The commenter states that EPA has referred to section 126 petitions as one of the tools available to states seeking attainment with the ozone NAAQS, yet they would not be required if upwind states and EPA satisfied their obligations in a timely matter.

Response: EPA disagrees that it has changed its position in the CSAPR Update regarding the need for additional emission reductions. In that rulemaking, EPA only stated it could not conclude, without further analysis, whether additional reductions from NO_X sources would be necessary to fully resolve these obligations. This conclusion is not inconsistent with EPA's action on the section 176A petition seeking to expand the OTR. EPA denied the section 176A petition because it concluded that any remaining interstate transport problems could be better addressed via the good neighbor provision, which EPA and the states can use to make decisions regarding which precursor pollutants to address, which sources to regulate, and what amount of emission reductions to require, flexibilities that are not available with respect to control requirements applicable to sources in the OTR. *See* 82 FR 51244–46 (November 3, 2017). EPA has subsequently completed further analysis that shows that there will be no remaining air quality problems in 2023 in the eastern U.S., and thus EPA has concluded that no additional reductions from upwind states, beyond those required by the CSAPR Update and other on-the-books or on the way measures, are necessary to bring downwind areas into attainment of the 2008 ozone NAAQS. While downwind states may continue to have current planning obligations associated with designated nonattainment areas, EPA lacks the authority to require additional emissions reductions from upwind states under the good neighbor provision in a future year where EPA's analysis shows that current nonattainment problems will be resolved.

While EPA is concluding in this action that Kentucky has no remaining good neighbor obligation with respect to the 2008 ozone NAAQS after implementation of the CSAPR Update, EPA disagrees that this action necessarily forecloses all further good neighbor activities with respect to that NAAQS. This action does not address remaining good neighbor obligations for any other states, and EPA will address any such obligations in a separate rulemaking. Moreover, the commenters acknowledge and EPA agrees that section 126 provides a process for states to bring claims to the Agency if the petitioning state can present information demonstrating that sources in upwind states will have impacts on downwind air quality in violation of the good neighbor provision. However, the right to submit such petitions does not presuppose that any pending or future petitions will necessarily make the requisite demonstration. To the extent that the commenters invokes separate, pending section 126 petitions, EPA will address those claims in separate actions.

IV. Final Action

For the reasons discussed above, EPA is taking final action to approve Kentucky's May 10, 2018, SIP submission and find that Kentucky is not required to make any further reductions, beyond those required by the CSAPR Update, to address its statutory obligation under CAA section 110(a)(2)(D)(i)(I) for the 2008 ozone NAAQS. EPA's final approval of Kentucky's submission means that Kentucky's obligations under 110(a)(2)(D)(i)(I) are fully addressed through the combination of the CSAPR Update FIP and the SIP demonstration showing that no further reductions are necessary. EPA is also amending the regulatory text at 40 CFR 52.940(b)(2) to reflect that the CSAPR Update represents a full remedy with respect to Kentucky's transport obligation for the 2008 ozone NAAQS.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. *See* 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. This action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 17, 2018. Under section 307(b)(2) of the Act, the requirements of this final action may not be challenged later in civil or criminal proceedings for enforcement.

List of Subjects in 40 CFR Part 52

Environmental protection, Administrative practice and procedure, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: June 28, 2018.

Onis ''Trey'' Glenn, III,
Regional Administrator, Region 4.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42.U.S.C. 7401 *et seq.*

Subpart S—Kentucky

■ 2. Section 52.920(e) is amended by adding an entry for ''110(a)(2)(D)(i)(I) Infrastructure Requirement for the 2008 8-Hour Ozone National Ambient Air Quality Standards'' at the end of the table to read as follows:

§ 52.920 Identification of plan.

(e) * * *

EPA-APPROVED KENTUCKY NON-REGULATORY PROVISIONS

Name of non-regulatory SIP provision	Applicable geographic or nonattainment area	State submittal date/effective date	EPA approval date	Explanations
* *	*	*	*	* *
110(a)(2)(D)(i)(I) Infrastructure Requirement for the 2008 8-Hour Ozone National Ambient Air Quality Standards.	Commonwealth of Kentucky ..	05/10/2018	07/17/2018, [Insert **Federal Register** citation].	

■ 3. Section 52.940 is amended by revising paragraph (b)(2) to read as follows:

§ 52.940 Interstate pollutant transport provisions; What are the FIP requirements for decreases in emissions of nitrogen oxides?

* * * * *

(b) * * *

(2) The owner and operator of each source and each unit located in the State of Kentucky and for which requirements are set forth under the CSAPR NO_X Ozone Season Group 2 Trading Program in subpart EEEEE of part 97 of this chapter must comply with such requirements with regard to emissions occurring in 2017 and each subsequent year. The obligation to comply with such requirements will be eliminated by the promulgation of an approval by the Administrator of a revision to Kentucky's State Implementation Plan (SIP) as correcting the SIP's deficiency that is the basis for the CSAPR Federal Implementation Plan (FIP) under § 52.38(b), except to the extent the Administrator's approval is partial or conditional.

Adjusting Program Fees for the Student and Exchange Visitor Program; Proposed Rule

DEPARTMENT OF HOMELAND SECURITY

U.S. Immigration and Customs Enforcement

8 CFR Parts 103 and 214

[DHS No. ICEB–2017–0003]

RIN 1653–AA74

Adjusting Program Fees for the Student and Exchange Visitor Program

AGENCY: U.S. Immigration and Customs Enforcement (ICE), Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Homeland Security (DHS) proposes to adjust fees charged by the Student and Exchange Visitor Program (SEVP) to individuals and organizations. DHS proposes to raise the fee for Student and Exchange Visitor Information System (SEVIS) Form I–901, Fee Remittance for Certain F, J, and M Nonimmigrants, for nonimmigrants seeking to become academic (F visa) or vocational (M visa) students from $200 to $350. For most categories of individuals seeking to become exchange (J visa) visitors, DHS proposes to increase the fee from $180 to $220. For those seeking admission as J exchange visitors in the au pair, camp counselor, and summer work or travel program participant categories, DHS proposes to maintain the fee at $35. In addition to raising the student and exchange visitor fees, DHS proposes to increase the fee for submitting a school certification petition from $1,700 to $3,000. DHS proposes to maintain the fee for an initial school site visit at the current level of $655, but clarify that, with the effective date of the rule, DHS would exercise its current regulatory authority to charge the site visit fee not only when a certified school changes its physical location, but also when it adds a new physical location or campus. DHS proposes to establish and clarify two new fees: a $1,250 fee to submit a school recertification petition and a $675 fee to submit an appeal or motion following a denial or withdrawal of a school petition. Adjusting fees would ensure fee levels are sufficient to recover the full cost of activities of the program and would establish a fairer balance of the recovery of SEVP operational costs between beneficiary classes.

DATES: Send comments by September 17, 2018.

ADDRESSES: You may send comments, identified by Docket No. ICEB–2017–0003, to the Federal Docket Management System (FDMS), a government-wide, electronic docket management system, by any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for sending comments.
- *Mail:* Address all comments to Sharon Snyder, Unit Chief, Student and Exchange Visitor Program, U.S. Immigration and Customs Enforcement, Department of Homeland Security, 500 12th Street SW, Washington, DC 20536. DHS docket staff, who maintain and process ICE's official regulatory dockets, will scan the submission and post it to FDMS.

Collection of information. You must submit comments on the collection of information discussed in this notice of proposed rulemaking to both DHS's docket and the Office of Management and Budget's (OMB) Office of Information and Regulatory Affairs (OIRA). OIRA submissions can be sent using any of the following methods.

- *Email (preferred): OIRA_submission@omb.eop.gov* (include the docket number and ''Attention: Desk Officer for U.S. Immigration and Customs Enforcement, DHS'' in the subject line of the email).
- *Fax:* 202–395–6566.
- *Mail:* Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503; Attention: Desk Officer, U.S. Immigration and Customs Enforcement, DHS.

For additional instructions on sending comments, see the ''Public Participation'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Sharon Snyder, Unit Chief, Student and Exchange Visitor Program; U.S. Immigration and Customs Enforcement, Department of Homeland Security; 500 12th Street SW, Washington, DC 20536; 703–603–3400, *sevp@ice.dhs.gov.* This is not a toll-free number. Program information can be found at *http://www.ice.gov/sevis/.*

I. Executive Summary

A. Purpose of Regulatory Action

DHS proposes to adjust its fee schedule for students and exchange visitors as well as for petitioning and certified schools. These fees are associated with SEVP and SEVIS. They were last adjusted in 2008. *See* 73 FR 55683 (Sept. 26, 2008).

SEVP, an ICE component, is funded entirely by fees charged to individual applicants and organizational petitioners. Fees collected from individuals and organizations are deposited into the Immigration Examinations Fee Account (IEFA) and used to fund the operational costs associated with SEVP and its management of SEVIS. *See* Immigration and Nationality Act (INA) section 286(m), as amended, 8 U.S.C. 1356(m), and Illegal Immigration Reform and Immigrant Responsibility Act of 1996, as amended, (IIRIRA) section 641(e), (g), 8 U.S.C. 1372(e), (g).

In accordance with the requirements and principles of the Chief Financial Officers Act of 1990, 31 U.S.C. 901–03 (CFO Act), and OMB Circular A–25, SEVP reviews its associated fees that are deposited into the IEFA biennially and, if necessary, proposes adjustments to ensure recovery of costs necessary to meet national security, customer service, and adjudicative processing goals. SEVP completed a biennial fee review for fiscal year (FY) 2016 and FY 2017 in 2017. The projected results indicate that current fee levels are insufficient to recover the full cost of current and planned program activities. Section 286(m) of the INA, 8 U.S.C. 1356(m), provides that DHS may set fees for adjudication and naturalization services at a level that would ensure recovery of the full costs of providing such services, including the costs of providing similar services without charge to asylum applicants and certain other immigrants. Additionally, section 641 of IIRIRA, 8 U.S.C. 1372, authorizes DHS to periodically revise fees that cover the cost of carrying out SEVP and maintenance of SEVIS. Pursuant to these laws, DHS proposes the adjustments contained in this rule.

SEVP calculates the totality of its fees to recover the full cost of its overall operations. Following its biennial fee review, SEVP anticipates that if it continues to operate at current fee levels, it will experience a shortfall of approximately $68.9 million beginning in 2019. At current fee levels, SEVP's current expenditures exceed current revenues, without any service upgrades. The deficit is covered by surplus revenue that was previously accumulated from 2009 to 2015. This surplus will be exhausted in FY 2019 even without any service upgrades. This projected shortfall poses a risk of degrading operations and services funded by fee revenue. The proposed fee increases would allow SEVP to cover the current deficit between revenue and expenditures plus make the necessary service upgrades. The proposed fee levels thus eliminate the risk of degrading operations, while also ensuring full cost recovery by providing fees for each specific benefit that will more adequately recover the cost associated with administering the benefit.

B. Summary of Major Provisions

The proposed rule would adjust, institute, and clarify the application of fees pertaining to services SEVP provides to reflect existing and projected operating costs, program requirements, and continued planned program improvements, in the following manner:

- Increase the two types of individual student and exchange visitor application fees, specifically the F and M I–901 SEVIS fee from $200 to $350 and the full J–1 I–901 SEVIS fee from $180 to $220;
- Increase the SEVP school certification petition fee for initial certification from $1,700 to $3,000;
- Institute a stand-alone fee of $1,250 when a school files a petition for recertification of its existing SEVP certification;
- Revise regulations to ensure collection of a $675 fee to accompany the filing of a Form I–290B, Notice of Appeal or Motion, when a school appeals or files a motion to reconsider or reopen a denial or withdrawal of its SEVP certification; and
- Maintain the $655 fee for a site visit at its current level, but clarify that, with the effective date of the rule, SEVP would exercise its current regulatory authority to charge the site visit fee when a certified school changes its physical location or adds a new physical location or campus on its Form I–17, ''Petition for Approval of School for Attendance by Nonimmigrant Student.''

In making these changes, the proposed rule would allow SEVP to fully fund activities and institute critical near-term program and system enhancements in a more equitable manner through a fairer balance of the recovery of SEVP operational costs between beneficiary classes. A summary of the current and future fee structures is provided in Table 1 below.

C. Costs and Benefits

SEVP proposes to adjust fees to the amounts listed in Table 1.

TABLE 1—CURRENT AND PROPOSED FEE AMOUNTS

Fee type	Current fee	Proposed fee	Incremental fee adjustment
I–901 F/M	$200	$350	$150
I–901 J-Full	180	220	40
I–901 J-Partial	35	35	0
I–17 Initial Certification	1,700	3,000	1,300
I–17 Recertification	0	1,250	1,250
Site Visit—initial	655	655	0
Site Visit—new location	0	655	655
Appeal Fee	0	675	675

SEVP expects to have a total annual increase in fees of $75.2 million in FY 2019 transferred from individuals and entities for the services they receive. Table 2 shows the summary of the total annual number of payments, incremental fee amounts, and total fees transferred in FY 2019. This increase in fees would allow SEVP to not only maintain its current level of service but also enhance SEVP's capability to support national security and counter immigration fraud through the continued development and implementation of critical system and programmatic enhancements. Enhancements to SEVIS, including the establishment of a student portal, will assist designated school officials (DSOs) in their regulatory obligation to provide accurate and timely information and will also rebalance this reporting requirement by providing students an automated means to update their information. Increased numbers of adjudication personnel will assist in reducing the processing times for initial petitions, updates, and recertifications, while enhanced vetting protocols will ensure that only those nonimmigrant students who are eligible to enter and remain in the country do so.

TABLE 2—ANNUAL PROPOSED INCREMENTAL FEE AMOUNTS, FY 2019

	Projected number of payments	Proposed incremental fee amounts	Annual fees transfer to government
I–901 F and M	418,393	$150	$62,758,950
I–901 J-Full	157,550	40	6,302,000
I–17 Initial Certification	426	1,300	553,800
I–17 Recertification	4,373	1,250	3,279,750
Site Visits—initial	426	0	0
Site Visits—new location	174	655	113,970
Appeals	54	675	36,450
Total			75,231,420

III. Public Participation

We encourage you to participate in this rulemaking by submitting comments and related materials. All comments received will be posted without change to *http://www.regulations.gov* and will include any personal information you provide unless you request that your personally identifiable information be redacted. We also invite comments relating to the economic, environmental, energy, or federalism impacts that might result from this rulemaking action. See the **ADDRESSES** section for information on how to submit comments.

A. Submitting Comments

If you submit comments, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide reasons supporting each suggestion or recommendation. You may submit your comments and materials online or by mail, but please use only one of these means. We recommend that you include your name and a mailing address, an email address, or a phone number in the body of your document so that we can contact you if we have questions regarding your submission. ICE will file all comments sent to our docket address, as well as items sent to the address or email address listed in the **FOR FURTHER INFORMATION CONTACT** section, in the public docket, except for comments containing marked confidential information. If you submit a comment, it will be considered received by ICE when it is received at the Docket Management Facility.

To submit your comments online, go to *http://www.regulations.gov* and insert the complete docket number starting with ''ICEB'' in the ''Search'' box. Click on the ''Comment Now!'' box and enter your comment in the text box provided. Click the ''Continue'' box, and if you are satisfied with your comment, follow the prompts to submit it. If you submit your comments by mail, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic scanning and filing. Mailed submissions may be on paper or CD–ROM. If you would like ICE to acknowledge receipt of comments submitted by mail, include with your comments a self-addressed, stamped postcard or envelope on which the docket number appears. We will stamp the date of receipt on the postcard and mail it to you.

We will consider all comments and materials received during the comment period and may change this proposed rule based on your comments. The docket is available for public inspection before and after the comment closing date.

B. Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov* and insert the complete docket number starting with ''ICEB'' in the ''Search'' box. Click on the ''Open Docket Folder'' and then click on ''View Comment'' or ''View All'' under the ''Comments'' section of the page. Individuals without internet access can make alternate arrangements for viewing comments and documents related to this rulemaking by contacting ICE through the **FOR FURTHER INFORMATION CONTACT** section previously listed. Note: Because the software used in computing these fees proposed in this rule is a commercial product licensed to ICE, it may be accessed on-site by appointment by calling the SEVP Response Center at (800) 892–4829.

C. Privacy Act

Anyone can search the electronic form of comments received in any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may wish to consider limiting the amount of personal information that you provide in any voluntary public comment submission you make to DHS. DHS may withhold information from public viewing that it determines may affect the privacy of an individual or is offensive. For additional information, please read the Privacy and Security

Notice posted on *http://www.regulations.gov.*

IV. Program Background

A. SEVP Legal Authorities

IIRIRA (Pub. L. 104–208, div. C, 110 Stat. 3009–546 (1996)) established the requirement for the monitoring and reporting of the activities of foreign students and exchange visitors while they reside in the United States (U.S.). Section 641 of IIRIRA, 8 U.S.C. 1372, mandated that the Attorney General develop and conduct a program for the electronic collection of data by U.S.-approved (*i.e.,* certified) institutions of higher education, other approved educational institutions, and designated exchange visitor programs, to monitor nonimmigrants possessing or applying for F, M, and J class visas with a Certificate of Eligibility.[1]

In addition, President George W. Bush issued Homeland Security Presidential Directive 2 (HSPD–2) in October 2001, which requires DHS to conduct periodic, ongoing recertification of all schools certified to accept F or M students. Combating Terrorism Through Immigration Policies, Oct. 29, 2001, as amended by HSPD—5 (Management of Domestic Incidents, Feb. 28, 2003, Compilation of HSPDs (updated through Dec. 31, 2007), available at *http://www.gpo.gov/fdsys/pkg/CPRT-110HPRT39618/pdf/CPRT-110HPRT39618.pdf.*

The Homeland Security Act of 2002 created DHS, transferred a broad range of immigration authorities from the Attorney General and the Commissioner of Immigration and Naturalization to the Secretary of Homeland Security, and vested ICE with responsibility for administration of the electronic data collection system, also known as SEVIS. *See* Public Law 107–296, sec. 442(a)(4), 116 Stat. 2136, 2193–94 (codified at 6 U.S.C. 252(a)(4) (vesting SEVIS-related authority in ''Bureau of Border Security''); Reorganization Plan Modification for the Department of Homeland Security, H.R. Doc. No. 108–32, at 3–4 (2003) (set forth as a note to 6 U.S.C.A. 542 (West 2018)) (renaming ''Bureau of Border Security'' as ''Bureau of Immigration and Customs Enforcement''); DHS Delegation 7030.2(2)(Z) (2004) (affirming delegation of such authority from Secretary of Homeland Security to ICE). ICE assumed responsibility for SEVIS and established SEVP. DHS has issued regulations that address data collection requirements for SEVP certification, oversight, and recertification of schools authorized to enroll F or M students. 8 CFR 214.3, 214.4.

B. SEVP and Development of SEVIS

SEVP is responsible for developing, maintaining, and improving SEVIS, which is an internet-based application that facilitates timely electronic reporting and monitoring of nonimmigrant students, exchange visitors, and their dependents in the United States. SEVIS enables schools and program sponsors to transmit electronic information to DHS and the Department of State (DoS) throughout a student's or exchange visitor's program in the United States. SEVIS is intended to improve customer service by streamlining the application and adjudication processes. Through continuing modernization efforts, it addresses issues in student and school system processes by providing information technology (IT) solutions and modifying business processes.

Schools and exchange visitor programs have been required to enter F, M, and J nonimmigrant data into SEVIS since August 1, 2003. As of April 1, 2017, SEVIS contained 1.4 million active F, M, and J student and exchange visitor records. Approximately 8,700 schools are SEVP-certified and approximately 1,500 exchange visitor programs are DoS-designated.

SEVIS enables DHS and DoS to efficiently administer their approval (*i.e.,* certification and designation, respectively) and oversight processes of schools and programs that wish to benefit from enrolling nonimmigrants. SEVIS assists law enforcement agencies in tracking and monitoring F, M, and J nonimmigrant status and apprehending violators before they can potentially endanger the national security of the United States. SEVIS also assists other federal agencies such as DoS, and other DHS components such as U.S. Citizenship and Immigration Services (USCIS) and U.S. Customs and Border Protection (CBP) in better serving F, M, and J nonimmigrant applicants. Finally, SEVIS enables schools and exchange visitor programs to instantaneously transmit electronic information and changes in required information on F, M, and J nonimmigrants to ICE and DoS throughout their stays in the United States.[2] These include required notifications, reports, and updates to personal data. SEVIS allows schools to submit school certification applications, update certification information, submit updates to DHS that require adjudication, and also create and update F visa (academic) and M visa (vocational) student and dependent records. SEVP managers and adjudicators have the capability to adjudicate updates made to school records using SEVIS, and principal designated school officials (PDSOs) and designated school officials (DSOs) are notified through SEVIS of the adjudication results. SEVIS also allows program sponsors to submit designation forms for the J–1 visa program, create program designations, and update program designation information. DoS personnel have the capability to adjudicate information submitted by responsible officers (ROs) and alternate responsible officers (AROs). ROs and AROs are notified through SEVIS of any adjudication results.

SEVIS shares information with other agencies' and components' systems—DoS, USCIS, CBP, Transportation Security Administration (TSA), and others—to better monitor the status of student or exchange visitors throughout their stays in the United States. This allows DHS to meet the aims of the USA PATRIOT Act. *See* Public Law 107–56, sec. 416, 115 Stat. 272, 354–55 (2001). In addition, that Act mandates that the Secretary of Homeland Security,[3] in consultation with the Secretary of State, collect information on the date of entry and port of entry for each nonimmigrant for whom information is collected under IIRIRA section 641. *Id.* at sec. 416(b).

[1] Under INA section 101(a)(15)(F)(i), 8 U.S.C. 1101(a)(15)(F)(i), a foreign student may be admitted into the United States in nonimmigrant status to attend an academic or accredited language training school (F nonimmigrant students). Under INA section 101(a)(15)(M)(i), 8 U.S.C. 1101(a)(15)(M)(i), a foreign student may be admitted into the United States in nonimmigrant status to attend a vocational education school (M nonimmigrant students). An F or M nonimmigrant student may enroll in a particular school only if the Secretary of Homeland Security has certified the school for the attendance of such students. Under INA section 101(a)(15)(j), 8 U.S.C. 1101(a)(15)(j), a foreign citizen may be admitted into the United States in nonimmigrant status as an exchange visitor (J visa) in an exchange program sponsored by the Department of State (DoS).

[2] An individual seeking F or M nonimmigrant student status must apply to an SEVP-certified school and be accepted for enrollment. From the enrollment information provided by the nonimmigrant, the school enters student information into SEVIS and issues a Form I–20, ''Certificate of Eligibility for Nonimmigrant Student Status.'' The individual must submit a valid Form I–20 when applying for an F or M visa. Similarly, an individual seeking J–1 nonimmigrant status must apply to a DoS-designated exchange visitor program and be accepted for enrollment as a basis to apply for a J exchange visitor visa. From the information provided by the accepted individual, the exchange visitor program enters exchange visitor information into SEVIS and issues a Form DS–2019, ''Certificate of Eligibility for Exchange Visitor (J–1) Status.'' The applicant must submit a valid Form DS–2019 when applying for a J visa.

[3] The USA PATRIOT Act refers to the Attorney General, but the Homeland Security Act of 2002, as amended, transferred the functions of the Immigration and Naturalization Service (INS) to DHS. Public Law 107–296, tit. IV, subtits. D, E, F, 116 Stat. 2135, 2192 (Nov. 25, 2002), as amended.

C. Authority To Collect Fees

The Secretary is specifically authorized to collect fees for SEVP from prospective F and M students and J exchange visitors, subject to certain limits for certain J–1 nonimmigrants. 8 U.S.C. 1372(e)(1). The Secretary is authorized to periodically revise those fees, with certain exceptions, to take into account changes in the overall cost of carrying out the program. IIRIRA section 641(e)(4)(A), (g)(2), 8 U.S.C. 1372(e)(4)(A), (g)(2). Similarly, section 286(m) of the INA authorizes the Secretary to collect fees for adjudication and naturalization services at a level that would ensure recovery of the full costs of providing such services, including the costs of providing similar services without charge to asylum applicants and certain other immigrants. Additionally, pursuant to INA section 286(m), the level that is set may include recovery of any additional costs associated with the administration of the fees themselves. Under this authority, user fees are employed not only for the benefit of the payer of the fee and any collateral benefit resulting to the public, but also to provide a benefit to certain others.[4]

All fees collected under these authorities are deposited as offsetting receipts into the IEFA and are available to the Secretary until expended for authorized purposes. *See* IIRIRA section 641(e)(4)(B), 8 U.S.C. 1372(e)(4)(B); INA section 286(m), 8 U.S.C. 1356(m). DHS proposes the revised fee schedule contained in this rule in accordance with the above-referenced authorities.

As a general matter, in developing fees and fee rules, DHS looks to a range of governmental accounting provisions. OMB Circular A–25, *User Charges* (Revised), para. 6, 58 FR 38142 (July 15, 1993), defines ‘‘full cost’’ to include all direct and indirect costs to any part of the Federal government for providing a good, resource, or service. These costs include, but are not limited to, an appropriate share of the following: Direct and indirect personnel cost, physical overhead, consulting and other indirect cost, management and supervisory cost, enforcement, information collection and research, and establishment of standards and regulation, including any required environmental review.

Section 31.5 of OMB Circular A–11, Preparation, Submission and Execution of the Budget, July 1, 2016, directs agencies to develop user charge estimates based on the full cost recovery policy set forth in OMB Circular A–25, *User Charges* (budget formulation and execution policy regarding user fees).

The Federal Accounting Standards Advisory Board (FASAB) Statement of Federal Financial Accounting Standards (SFFAS) No. 4: Managerial Cost Accounting Concepts and Standards for the Federal Government, July 31, 1995, updated June 2017, provides the standards for managerial cost accounting and full cost. SFFAS No. 4 defines ‘‘full cost’’ to include ‘‘direct and indirect costs that contribute to the output, regardless of funding sources.’’[5] FASAB identifies various classifications of costs to be included and recommends various methods of cost assignment to identify full cost. Activity-based costing (ABC) is highlighted as a costing methodology useful to determine full cost within an agency.

The Chief Financial Officers Act of 1990, 31 U.S.C. 901–903, requires each agency’s Chief Financial Officer (CFO) to ‘‘review, on a biennial basis, the fees, royalties, rents and other charges imposed by the agency for services and things of value it provides, and make recommendations on revising those charges to reflect cost incurred by it in providing those services and things of value.’’ 31 U.S.C. 902(a)(8).

This proposed rule would eliminate the risk of a projected shortfall for SEVP operations and services funded by fee revenue. It proposes increased funding that supports continuing and new initiatives critical to improving the program and reflects the implementation of specific cost-allocation methods to segment program costs to the appropriate fee—F and M students, J exchange visitors, or schools.

D. Full Cost Recovery

Consistent with these authorities and sources, this proposed rule would ensure that SEVP recovers the full costs for the services it provides and maintains a projected level of service necessary to fulfill its mission. The proposed rule would do this in two ways. First, where possible, the proposed rule sets fees at levels sufficient to cover the full cost of the corresponding services and assigns these fees to those who are the primary beneficiaries. DHS works with OMB and generally follows OMB Circular A–25, which ‘‘establishes federal policy regarding fees assessed for Government services and for sale or use of Government goods or resources.’’ *See* OMB Circular A–25, *User Charges* (Revised), para. 6, 58 FR 38142 (July 15, 1993). A primary objective of OMB Circular A–25 is to ensure that federal agencies recover the full cost of providing specific services to users and associated costs.

This proposed rule would set fees at a level sufficient to fund the full cost of conducting the program and general operations for FY 2019. *See* INA sec. 286(m), 8 U.S.C. 1356(m). DHS has interpreted this statutory fee-setting authority, including the authorization for DHS to collect ‘‘full costs’’ for providing, in pertinent part, ‘‘adjudication . . . services,’’ as granting DHS broad discretion to charge fees at a level that will ensure recovery of all direct and indirect costs associated with providing pertinent immigration adjudication services. This approach is also consistent with the SEVP-specific fee authority referenced above, which authorizes DHS to set fees at a level that funds the full cost of conducting the program. *See* IIRIRA section 641(e), 8 U.S.C. 1372(e).

In following OMB Circular A–25 to the extent appropriate, including its direction that fees should be set to recover the costs of an agency’s services in their entirety and that full costs are determined based on the best available records of the agency, DHS accounts for the reality that costs of all SEVP operations cannot always be directly correlated to certain specific fees. DHS therefore applies the discretion provided in the above authorities, in taking the following actions: (1) Employing ABC to establish a model for assigning costs to specific benefit requests in a manner reasonably consistent with OMB Circular A–25; (2) distributing costs that are not attributed to or driven by specific adjudication services; and (3) making additional adjustments to effectuate specific policy objectives.

V. Proposed Adjustment of SEVP Fees

This proposed rule would amend the current fee structure governing the collection of fees from individuals by increasing the individual student and exchange visitor application fee (I–901 SEVIS fee). In addition, the rule proposes to amend the fee structure paid by schools by increasing the SEVP school certification petition costs for initial certification, instituting a fee to address school recertification costs for the ongoing recertification process, and

[4] The longstanding interpretation of DHS is that the ‘‘including’’ clause in section 286(m) does not constrain DHS’s fee authority under the statute. The ‘‘including’’’ clause offers only a non-exhaustive list of some of the costs that DHS may consider part of the full costs of providing adjudication and naturalization services. *See* 8 U.S.C. 1356(m); 81 FR 26903, 26906 n.10 (May 4, 2016).

[5] *See* FASAB, Statement of Federal Financial Accounting Standards 4: Managerial Cost Accounting Standards and Concepts 26 (June 2017), *available at http://files.fasab.gov/pdffiles/handbook_sffas_4.pdf* (last visited Feb. 20, 2018).

requiring a fee to accompany the filing of an appeal, a motion to reconsider, or a motion to reopen filed by a school organization. SEVP proposes no change to the current fee for site visits. The proposed fees for recertification petitions and appeals and motions would better recover a reasonable portion of related existing and projected operating costs, program requirements, and planned program improvements.

Fees were last adjusted in 2008. 73 FR 55683. Refined and expanded SEVP operations, SEVIS modifications, as well as inflation, have increased SEVP operating costs and are the basis for the proposed increases to the I–901 SEVIS fee and the school certification petition fee.

A. Activities Funded Under the 2008 Fee Rule

In the 2008 rulemaking that resulted in the most recent agency adjustment, ''Adjusting Program Fees and Establishing Procedures for Out-of-Cycle Review and Recertification of Schools Certified by the Student and Exchange Visitor Program To Enroll F and/or M Nonimmigrant Students'' (2008 Fee Rule), DHS outlined its rationale for a fee increase by identifying a set of organizational initiatives essential to its mission: Improving SEVIS functionality, improving oversight and enforcement, implementing recertification procedures, and developing school liaison activity. 73 FR 55683. SEVP, in accordance with its commitment to the goals prescribed in that rule, has implemented the following actions since then:

1. Improved SEVIS Functionality

SEVP's original plan to roll out a comprehensive overhaul of SEVIS (known as SEVIS II) was replaced by an approach that focused on a series of smaller and more targeted SEVIS enhancements—now termed SEVIS Modernization. New technologies have become available since the comprehensive SEVIS overhaul was first envisioned. The use of these technologies enables SEVP to apply many of the functionalities that were planned for SEVIS II to the current system. At the same time, this approach eliminates potential risks and complications that result from migrating mass quantities of critical data from one system to the next, which would have been necessary if the SEVIS II approach had been fully implemented. Building on the experience, knowledge, and stakeholder feedback acquired during the planning process, SEVP has launched hundreds of smaller-scale SEVIS enhancements. These efforts have addressed the majority of national security vulnerabilities previously identified, by improving critical system functionalities that support data integrity in SEVIS, including establishing system functions that support standardization of student and exchange visitor name and address data entry. The enhancements have also improved system performance for end users. With the introduction of more detailed SEVIS event history and new abilities for DSOs to create student data reports, these enhancements enable action on multiple student records simultaneously.

As an example, SEVP, in collaboration with CBP, developed and implemented an admissibility indicator tool that links to real-time SEVIS data to assist CBP officers at ports of entry in determining whether F, M, and J nonimmigrants may enter the United States based on their SEVIS record status. Prior to the availability of the admissibility indicator, first-line CBP officers relied on paper documentation that the nonimmigrant student or exchange visitor presented. Today, the admissibility indicator gives CBP officers a quick assessment of the most pertinent and current SEVIS data that are necessary in determining whether nonimmigrant students, exchange visitors, and their dependents are eligible to enter the United States or require further investigation. As a result, CBP officers are able to use the admissibility indicator at points of inspection to quickly verify the information contained on the paper documentation that is also required for entry. This assists in reducing long wait times, aids with detecting and preventing visa fraud, and otherwise enhances compliance efforts and national security.

2. Oversight and Enforcement

A dedicated compliance enforcement program that includes criminal investigative efforts is an integral part of ensuring the operational effectiveness of SEVP. By analyzing SEVIS data, SEVP identifies indicators of potential misuse or abuse of nonimmigrant status and provides leads to Counterterrorism and Criminal Exploitation Unit (CTCEU) law enforcement personnel for further investigation. At the time the 2008 Fee Rule was published, the Compliance Enforcement Unit (CEU), the predecessor of CTCEU, was not sufficiently staffed to address all leads generated from SEVIS. As a result, only the highest priority leads were investigated, which left open unaddressed vulnerabilities. With the increased I–901 SEVIS fee revenue, DHS has hired additional personnel and currently funds 234 Homeland Security Investigations (HSI) positions with primary responsibility for nonimmigrant violator investigations. The increased number of HSI personnel assigned to support CTCEU investigations has enabled more robust coordination between SEVP and CTCEU and has successfully reduced the exploitation of the laws and programs relating to nonimmigrant students and exchange visitors. An example of the result of such close and extensive cross-coordination was the conviction of the founder and president of Tri-Valley University (TVU) on 31 counts in March 2014, ranging from conspiracy to commit visa fraud and alien harboring to money laundering.[6] SEVP will continue to support cooperation and coordination with CTCEU to maintain the viability of F, M, and J student and exchange visitor programs within the United States.

3. Recertification

SEVP implemented the recertification procedure prescribed in the 2008 Fee Rule beginning with its first recertification cycle in 2010. Institutions that participated in the first cycle have been reviewed several times and will continue to undergo the recertification process every two years. Because there are thousands of schools, recertification is a rolling process allowing adjudicators to address issues with one school before moving on to the next.

Each school is notified 2 years to the month following the date of its last recertification or certification about its need to file for recertification in order to maintain its certification. From that date, the school has 180 days to file for recertification. 8 CFR 214.3(h)(2)(i). This cycle helps ensure that only schools that operate in accordance with the law remain certified by SEVP.

4. School Liaisons

SEVP deployed the first group of field representatives in April 2014, followed by three additional groups later in 2014 and 2015, bringing the national total to 60 field representatives distributed among three geographically determined units. The field representatives serve as liaisons between SEVP and SEVP-certified schools that enroll F and M

[6] *See* Sentencing Memorandum, Docket Item No. 195 (Oct. 24, 2014), *United States* v. *Su,* Case No.11-cr-00288 (N.D. Cal.), 2, 8, available at *https://www.courtlistener.com/docket/4178123/195/united-states-v-su/; see also* Jury Verdict, Docket Item No. 119 (Mar. 24, 2014), *United States* v. *Su, supra,* available at *https://www.courtlistener.com/docket/4178123/119/united-states-v-su/.*

nonimmigrant students and have conducted more than 32,500 school visits since the unit launch. Field representatives serve as a key resource for schools by providing individualized instruction on the SEVP certification and recertification processes. They also educate DSOs on Federal statutes, regulations, and guidance pertinent to F and M students studying in the United States. Because DSOs are responsible for entering F and M nonimmigrant data into SEVIS, the data integrity of the system depends heavily on the DSOs' understanding the importance of accurate and timely reporting of the required information. By providing individualized assistance to DSOs, the field representatives enhance national security by maintaining and improving the data integrity of SEVIS.

B. Continuing SEVP Activities Funded With Proposed Fees

In developing this proposed rule, SEVP reviewed its current and projected costs, identified goals for services, analyzed projected future workload, and allocated costs to specific services. In addition to the full SEVP operating costs described in the following sections, the proposed fees would fund the continuing efforts identified in the 2008 rule, now updated to reflect technological refinements and operational enhancements. These updated activities include SEVIS modernization and increases in adjudication support and investigatory and compliance personnel.

1. SEVIS Modernization

SEVIS is a web-based system that schools and program sponsors use to transmit information about their programs and participating F, M, and J nonimmigrants. It became fully operational in February of 2003, replacing a paper-based F, M, and J nonimmigrant process.

Since its inception, SEVIS has evolved well beyond its original purpose as a data collection tool. Today, approximately 35,000 officials from approved schools and program sponsors use SEVIS data to manage 1.4 million F, M, and J nonimmigrants and their dependents during their stays in the United States. SEVIS provides real-time administrative and enforcement information to DHS components, including CBP and USCIS, as well as DoS. SEVIS also receives information about F, M, and J nonimmigrant visa applications, entry and exit records, and benefit applications from these entities through various interfaces. This makes SEVIS a critical national security component and a primary resource for law enforcement and intelligence communities to extract the data necessary to conduct counterterrorism and counterintelligence threat analysis.

The threat of new forms of terrorism and other criminal activity exploiting the Nation's immigration laws continues to be a public safety and national security concern in the United States. As a result, there is an increasing need for sophisticated SEVIS data analysis to detect individuals who engage in immigration fraud or otherwise pose a risk to national security through willful misrepresentation. In addition, end users from schools and program sponsors have expressed concerns and provided feedback reflecting the necessity to create SEVIS functionalities that enable the accurate reporting of new and innovative educational program models. While SEVIS has been modified to meet the most critical needs through hundreds of upgrades and patches, including adding abilities for the system to preemptively address data input errors, system functionality concerns (due to time lags, system constraints, and other system design limitations) continue to affect all SEVIS users and necessitate continuous development of SEVIS design. In response, SEVP has begun an effort—known as SEVIS Modernization—that involves redesigning the entire system over time in prioritized increments. Continued Modernization will increase security by providing real-time, person-centric data. This data will reduce fraud and increase awareness by providing government officials with actionable intelligence with which to make decisions and initiate immigration actions. Informed decisions and efficient investigations allow for better management of F, M, and J nonimmigrant data and preventing high-risk individuals from entering the United States.

To address critical system limitations and improve the SEVIS user experience, SEVP has identified the following list of key SEVIS modernization priorities for continued funding through the increased I–901 SEVIS Fee revenue:

- *Student Portal.* F–1 students engaged in authorized optional practical training are required to report their contact and employer information to DHS. *See* 8 CFR 214.2(f)(12), (f)(17). At present, students report the required information to their DSOs, who then report the information in SEVIS. By regulation, students must report any new required information to their DSOs within 10 days of the change, and the DSOs must report such information in SEVIS within 21 days. 8 CFR 214.2(f)(17).

This external SEVIS student portal will enable students to directly add or edit the required contact and employer information so that their SEVIS record would be updated in real time. This will reduce processing redundancies and lessen the potential for data entry errors by eliminating the need for the student to first report such information to the DSO who will then enter the reported data into SEVIS. The portal will also consequently reduce the workload of DSOs and make the reported data available to DHS sooner. With future expansion, the portal will address SEVIS vulnerabilities related to accurate monitoring of F, M, and J nonimmigrant status and location of nonimmigrant students and exchange visitors by closing national security vulnerabilities related to person-centric, paperless, people-matching capabilities. In establishing a portal for student use in this manner, DHS will encourage students to assume responsibility for maintaining their immigration status, reduce the system's reliance on paper-driven processes, and reinforce the operational premise and security advantages of "one person, one record." Through use of a record-matching protocol, all SEVIS records will be collated and presented as a unified, person-centric statement of information and activity. These summaries will be available to all operational entities, including school officials, who will have access in the SEVIS record to the same up-to-date information, including all student history.

- *Support of the Adjudication Process.* As part of maintaining their SEVP certification, schools are required to update certain information in SEVIS about their operations and programs any time such information changes. *See* 8 CFR 214.3(g)(2). SEVP is required to adjudicate such changes. SEVP currently receives, on average, 350 weekly updates from schools; each update may contain several subparts, including school contact information changes and additions of new programs. At present, system constraints require SEVP adjudicators to adjudicate all parts of the update simultaneously and to deny the entire update if even one part of the update cannot be approved. This causes additional workload and delays for schools and adjudicators due to resubmissions of updates. The new SEVIS functionality that supports adjudication will provide SEVP and DoS with enhanced flexibility to adjudicate school certification and exchange visitor sponsor designation updates and applications and consequently enable SEVP and DoS to adjudicate updates and applications more efficiently.

- *Automated Data Tracking.* Currently, SEVP and DoS manually monitor SEVIS data for potential noncompliance indicators with regard to schools, students, and exchange visitor program participants and sponsors. In FY 2016, manual monitoring yielded 75 compliance investigations, which resulted in withdrawal of certification for 21 noncompliant schools. Automated SEVIS data tracking functionality would provide SEVP and DoS with enhanced abilities to track and monitor compliance. This additional capability would allow SEVP and DoS to more quickly detect data trends that are potential indicators of fraudulent activities. With the use of automation, SEVP anticipates a 100 percent increase in fraudulent activity flags (from 75 to 150 per year), which is estimated to significantly increase the detection rate of noncompliant schools and subsequent withdrawals of SEVP certification due to noncompliance. Such functionality would play an important role in ensuring the integrity of the Nation's immigration system.

SEVIS Access Approval Tracking System (SAATS). School officials (PDSOs and DSOs) and program officials (AROs and ROs) constitute the largest and most critical component of SEVIS users as they are responsible for entering the initial student and exchange visitor data into SEVIS. Their need to access the system is confirmed by petition through their sponsoring school or program. Once granted access, designated school and program officials confirm their ongoing need for access in a yearly validation exercise in which a delayed response or no response results in automatic system access denial.

Unlike government employees who need access to SEVIS to perform official functions, school and program officials have not had to meet uniform security requirements. Recently, SEVP began conducting national criminal background checks on designated school officials (DSOs). SEVP has vetted all DSOs at K–12 schools and, since May 2017, has vetted all newly designated DSOs, helping to ensure the safety of nonimmigrant students and exchange visitors and preserve the integrity of SEVIS data. SEVP is considering eventually extending this screening and security review to DSOs and ROs who were appointed prior to May 2017 and other school and program officials through regulatory action. SEVP will bear the upfront cost of this security review. When fully implemented, all individuals who require access to SEVIS will be vetted prior to being granted such access. DHS will complete the vetting adjudication for the RO or ARO and provide a copy of its decision to the DoS Bureau of Educational and Cultural Affairs.

This initiative will strengthen the mechanism for approving user access to SEVIS. DHS and DoS rely on PDSOs, DSOs, ROs, and AROs as key links in the process to mitigate potential threats to national security and ensure compliance with immigration law. DHS would require that anyone nominated to serve as a PDSO, DSO, RO, or ARO receive a favorable SEVIS Access Approval Process (SAAP) assessment prior to their appointment and subsequent approval for access to SEVIS.

- *Information Sharing.* SEVIS currently shares information and exchanges data with 11 intra-governmental interface partners. The modernized Information Sharing module will be capable of sharing data contained in modernized SEVIS data stores with existing interface partners. Other interfaces to support modernized capabilities in other modules, including paperless capabilities, are being considered to address SEVIS vulnerabilities. The centralization of all information-sharing capabilities in a single module will allow for efficiencies in development efforts, system performance, and sustainability.
- *Use of Cloud Technologies.* The cloud infrastructure effort supports the program by providing flexible, efficient, and cost-effective cloud services and infrastructure to facilitate and enable agile development and testing processes. While SEVIS actively mitigates known security threats, it lacks functionalities to proactively analyze end user data to detect potential misuse. The use of cloud technologies will permit increased analysis of SEVIS end user data and increase the efficiency and security of controlling and managing access to SEVIS by users not affiliated with DHS, both governmental and nongovernmental. In addition, it will enable more efficient management of user names and passwords and allow credentials to be safely passed among system components. Such analysis is necessary to create defined alerts about user activity that is indicative of risk factors to prompt timely criminal and compliance investigations. The cloud infrastructure module supports the program by providing flexible, efficient, and cost-effective cloud services and infrastructure to facilitate and enable agile development and testing processes.

This planned modernization effort, with implementation during FY 2018–2021, is expected to greatly enhance the capability of DHS to identify and reduce national security threats; reduce the possibility for reporting errors by prospective and approved F, M, and J nonimmigrants, as well as their schools and programs; and better provide updated, correct, real-time information to academic, law enforcement, and other government users. SEVP projects that the cost for developing and deploying these SEVIS modifications is $53.19 million. SEVP would incur $13.15 million of that cost in FY 2018, $13.75 million in FY 2019, $13.14 million in FY 2020, and $13.15 million in FY 2021.

2. Increased SEVP Adjudication Personnel

In 2008, DHS proposed to recertify all schools approved for attendance by F and M students every 2 years, pursuant to title V, section 502 of EBSVERA and HSPD–2, and established procedures for the review of each SEVP-certified school every 2 years, as well as out-of-cycle reviews whenever it determines that clarification or investigation of school performance or eligibility is necessary. Recertification is a determination of performance and compliance with required standards in the period since the previous certification. In this comprehensive review of an SEVP-certified school by an SEVP adjudicator, SEVP affirms that the school remains eligible and is complying with regulatory recordkeeping, retention, reporting, and other requirements.

Performance is monitored through SEVIS, DHS records, submissions from the school, and possible onsite reviews. If noncompliance is discovered, SEVP requires schools, as appropriate, to make corrections immediately. SEVP reviews the school's compliance with Federal law and regulations.

In recent years, the scope of work of SEVP adjudication has expanded to include administrative compliance enforcement, support of criminal investigations, and adjudication of school petitions, including certification petitions, recertification petitions, and updates to school information. As a result, SEVP adjudicators have experienced significant workload increases, which in turn have resulted in longer SEVP adjudication processing times of school petitions and student compliance issues.

Since initiating recertification, SEVP has determined that the current number of SEVP adjudication personnel is inadequate to meet the congressional requirement for recertifying or withdrawing all currently certified schools every 2 years. At present staffing levels, SEVP is able to process 1,939, or 44 percent, of the required annual projected 4,400 recertification cases.

3. Additional Investigatory Support

Investigations of violations of immigration status, as well as criminal investigations of F and M students and J exchange visitors, are primarily coordinated by CTCEU. Information is received, collated, and analyzed from a number of DHS and other information sources, including SEVIS, to generate national security leads for field personnel and prevent terrorists and other criminals from exploiting the Nation's immigration system through fraud. In its continuing support of compliance efforts, SEVP seeks to fund activities in two key areas: Support for and integration of technological advances and surge support for critical incidents.

New technologies have enabled sophisticated methods of extracting and analyzing data. To make best use of these technology force multipliers, personnel would use the available technologies to develop investigative packages based on SEVIS research and use of other designated government computer systems, open source websites, and other pertinent information sources related to individual students, exchange visitors, and SEVP-certified schools. To the extent that adequate resources are allocated and employed for this purpose, increased support levels would reduce the vulnerability of the United States to terrorist attacks and reduce the potential for exploitation of certified schools and designated exchange visitor programs.

Through the fee adjustments proposed in this rule, SEVP would continue ensuring funding to enable a surge for investigatory efforts, including increased contract overtime or surge staffing, in advance of planned critical overstay enforcement operations. SEVP would also fund the surge of continuous and extended analytic support to HSI field operations in the event of a terrorist attack or during imminent threat situations. This direct operational support to field elements during heightened threat situations or in the aftermath of an attack would enable CTCEU to quickly assess subjects of investigative interest and to share information to further investigations with its law enforcement partners, ICE legal counsel, and the U.S. Attorney's Office. Such surge support has been used successfully and has proven critical in furthering investigative efforts and providing investigative focus in recent threat situations and terrorist attacks, including attacks in San Bernardino, California; Orlando, Florida; Columbus, Ohio; Baltimore, Maryland; New York; New Jersey; and Fort Lauderdale, Florida.

C. Basis for Fee Schedule

As previously noted, the proposed amended fees comply with statutory and regulatory requirements that SEVP review its fee structure every 2 years to ensure that the cost of the services provided are fully captured by fees assessed on those receiving the services. The new fees are an estimate of the current and projected costs of funding needed to continue enhancing SEVP's capability to achieve programmatic goals associated with its statutory mandate—supporting national security and countering immigration fraud through the continued development and implementation of critical system and programmatic enhancements. This proposed rule would establish the following fee structure detailed in Table 3.

TABLE 3—PROPOSED FEE STRUCTURE

Fee type	Responsible party
I–901 SEVIS Fee	Student or exchange visitor issued an initial Form I–20 or DS–2019 seeking an F, M, or J visa.
I–17 Certification Fee	Institutions petitioning for SEVP certification to enroll international students.
Site Visit Fee	Institutions applying for initial certification or certified schools changing locations or adding a campus/location.
Recertification Fee	Certified institutions seeking recertification every 2 years.
Appeal or Motion Fee	Institutions that have had certification or recertification denied by SEVP, including denied I–17 updates, or that have had certification withdrawn, and which are filing an appeal or motion regarding the SEVP decision.

The current fee structure includes the I–901 SEVIS fee, I–17 certification fee, and the site visit fee. The proposed rule would allow SEVP to fully fund activities and institute critical near-term program and system enhancements in a more equitable manner. The proposed fee structure would also include the addition of a recertification fee and a fee for filing a motion or appeal.

With this rule SEVP proposes to impose a fee for a Form I–290B, *Notice of Appeal or Motion,* filed with SEVP at a level that is comparable to the fee for the Form I–290B when filed with USCIS. DHS proposes to eliminate regulations that currently state there is no fee required for an appeal by a school, to maintain consistency with this clarification in the motions context and to more fairly balance allocation of the recovery of SEVP operational costs between beneficiary classes. Under this proposal, SEVP would charge the fee for all appeals and motions.

The proposed rule would ensure the full recovery of SEVP operational costs in a manner that fairly allocates costs between beneficiary classes and would facilitate the development of activities designed to achieve defined program goals. For example, the proposed rule would continue funding for critical SEVIS modernization efforts and would incorporate the added cost of increased analytical support for investigative and enforcement operations into the I–901 SEVIS fee. The proposed fee schedule would also allow SEVP to fully fund additional SEVP adjudication personnel.

D. SEVP Baseline Costs and Fees

SEVP fees are paid by individuals and organizations. DHS certifies schools that enroll F and M students; recertifies schools with active certifications; conducts site visits; administers, maintains, and develops SEVIS; collects fees from prospective F and M students and J exchange visitors, as well as from schools; adjudicates motions and appeals in regard to certification petitions; undertakes investigatory initiatives; and provides overall guidance to schools about program enrollment and compliance, as well as the use of SEVIS. These activities are funded solely through the collection of fees.

The I–901 SEVIS fee, collected from students and exchange visitors, currently underwrites the operation of

SEVP; the cost of administering, maintaining, and developing SEVIS; the cost of school recertification; and all activities related to individual and organizational compliance issues within the jurisdiction of SEVP. These activities include the cost of investigating the compliance of schools participating in SEVP and exchange visitor programs, as well as investigations in which F, M, or J nonimmigrants are identified as potential threats to national security or where it is suspected that an immigration violation or fraud may be occurring.

The certification fee is paid by schools that petition for the authority to issue Certificates of Eligibility (COE), commonly referred to as Forms I–20, to prospective nonimmigrant students for the purpose of their applying for F or M visas and admission to the United States in those statuses. These monies fund the base internal cost for SEVP to process and adjudicate the initial school certification petition (Form I–17, ''Petition for Approval of School for Attendance by Nonimmigrant Student''). The proposed recertification fee paid by schools to remain certified would fund the cost of adjudicating the recertification petition.

If SEVP finds that a petitioning or certified school does not meet regulatory standards, it will deny the affected school's Form I–17 or withdraw its SEVP certification. 8 CFR 214.4. When SEVP sends a school a notice of denial or withdrawal, the notice also includes reasons for the unfavorable decision(s), an explanation of the school's rights, and the applicable appeal and motion filing information and deadlines. In many cases, a school may file an appeal or motion to reopen and/or reconsider unfavorable decisions issued by SEVP by filing the Form I–290B, ''Notice of Appeal or Motion,'' pursuant to the process set forth in 8 CFR 103.3(a) or 103.5(a).[7] A school may initiate a motion to reopen or reconsider to request that the original deciding body review the unfavorable decision, including an appeals decision, pursuant to requirements in 8 CFR 103.5(a). A school may also initiate an appeal in order to request review of the unfavorable Notice of Denial, Automatic Withdrawal, or Withdrawal on Notice by an authority independent of the original deciding body. Currently, DHS uses I–901 funds to offset the costs of SEVP appeals and motions. This offset is a result of the DHS determination in the 2008 final fee rule to state in regulations that no fee would be required for appeals relating to SEVP certification or recertification or a withdrawal of SEVP certification. *See* 8 CFR 214.4(a)(1), (h). DHS proposes to remove the SEVP-related exceptions to the payment of the I–290B fee and add regulatory text at proposed 8 CFR 103.7(b)(1)(ii)(O) providing for the fee of $675 when the Form I–290B is filed with SEVP. This fee would apply when schools or institutions file an appeal or motion with regard to a denied petition for initial certification or recertification or a withdrawal of certification.

In proposing these regulatory changes for the I–290B filing fee, DHS would more fairly balance allocation of the recovery of SEVP operational costs among beneficiary classes. To date, the cost of adjudicating appeals and motions has never been placed directly upon the beneficiaries of those adjudications—the schools seeking to obtain or maintain SEVP-certification. The fee for filing the Form I–290B with SEVP is being proposed at a level that requires those who file the Form I–290B to pay for at least a portion of the operating expenses for DHS to adjudicate the I–290B, while preventing the fee from becoming cost prohibitive.

The site visit fee is currently paid by schools that petition for certification to issue Forms I–20 or by a certified school when it physically moves to a new location. DHS established this fee in the 2008 Fee Rule and with that rule codified SEVP's authority to charge the fee when a school changes its physical location or adds a new physical location or campus. *See* 8 CFR 103.7(b)(3)(ii)(B), 8 CFR 214.3(h)(3)(i), (h)(3)(ii). Specifically, the 2008 Fee Rule imposed a site visit fee of $655 for each location listed on the Form I–17, and required the Form I–17 to include ''any physical location in which a nonimmigrant can attend classes through the school (*i.e.,* campus, extension campuses, satellite campuses, etc.).'' *See* 73 FR 55683, 55698–55699 (amending 8 CFR 103.7(b)(3)(ii)(B) and 214.3(a)(1), respectively). The 2008 Fee Rule also imposed a continuing duty on schools to update school locations as changes arise, *i.e.,* even after initial certification, a school must update SEVIS within 21 days of a change to a range of information types, including school location and campus location. *See* 73 FR 55683, 55700 (amending 8 CFR 214.3(g)(2), (h)(3)). Consistent with the aforementioned regulatory amendments, the preamble to the 2008 Fee Rule made clear that these provisions require the imposition of a site visit fee for each location listed on the initial SEVP certification, as well as each location added as part of an initial event, such as a SEVIS update requesting approval of a changed or new location or campus. 73 FR 55683, 55691.

But SEVP is not currently collecting the fee when a certified school adds a new physical location or campus. SEVP intends to begin imposing the fee following the effective date of any final rule. The site visit fee would apply when a certified school updates its Form I–17 in SEVIS to indicate, pursuant to 8 CFR 214.3(h)(3)(ii), it is changing its physical location or adding a new physical location or campus. This revenue would assist in recovering the costs DHS incurs for site visits of these locations, including collecting evidence on school eligibility for certification, reviewing the facilities, and interviewing personnel nominated on the petition to become DSOs, including the person nominated to be the PDSO.

E. Methodology

SEVP captured and allocated cost using an ABC approach to define full cost, outline the sources of SEVP cost, and define the fees. The ABC approach also provides detailed information on the cost and activities allocated to each fee.

1. ABC Approach

SEVP used CostPerform ABC modeling software, Version 9.3 (0147), to determine the full cost associated with updating and maintaining SEVIS to collect and maintain information on F, M, and J nonimmigrants; certifying schools; overseeing school compliance; recertifying schools; adjudicating appeals; investigating suspected violations of immigration law and other potential threats to national security by F, M, or J nonimmigrants; providing outreach and education to users; and performing regulatory and policy analysis. SEVP also used the model to identify management and overhead costs associated with the program.

ABC is a business management methodology that links inputs (cost) and outputs (products and services) by quantifying how work is performed in an organization (activities). The ABC methodology allows fee-funded organizations to trace service costs and to calculate an appropriate fee for the service, based on the cost of activities associated with the services for which the fee is levied.

Using the ABC methodology, SEVP identified and defined the activities needed to support SEVP functions to include current and future initiatives. SEVP captured the full cost of

[7] Form I–290B is managed by USCIS and not ICE. USCIS has agreed to the use of the form by ICE for SEVP appeals and the use has been approved by the Office of Management and Budget under control number 1615–0095.

operations and apportioned that full cost to the appropriate program activities. The full cost of each activity is then assigned to the appropriate fee category based on the nature of the activity, as described further below. By tracking costs to the various fee categories, SEVP was able to use forecasted payments to determine the appropriate fee amount for each fee type. SEVP examined historical data and performed statistical payment analysis to forecast payments in future years.

SEVP used an independent contractor and commercially available ABC software to compute the fees. The structure of the software was tailored to SEVP needs for continual and real-time fee review and cost management.

2. Full Cost

In building the ABC model, it was critical for SEVP to identify the sources and cost for all elements of the program. Consistent with instructive legislative and regulatory guidance, SEVP fees recoup the full cost of providing the agency's overall resources and services.[8]

To the extent applicable, SEVP used the cost accounting concepts and standards recommended in the FASAB Handbook, Version 15, ''Statement of Financial Accounting Standards Number 4, Managerial Cost Accounting Concepts and Standards for the Federal Government'' (2016). FASAB Standard Number 4 sets the following five standards as fundamental elements of managerial cost accounting: (1) Accumulate and report cost of activities on a regular basis for management information purposes; (2) establish responsibility segments and match the cost of each segment with its outputs; (3) determine the full cost of government goods and services;[9] (4) recognize the costs of goods and services provided among federal entities; and (5) use appropriate costing methodologies to accumulate and assign costs to outputs.

SEVP calculates projected fees using the full cost of operations, as defined by a regularly updated spend plan. The projected spend plans for FY 2019 and FY 2020 were used in calculation of SEVP's proposed fee structure. Tables 4 through 7 detail the full cost of SEVP operations, consistent with the spend plan, from various perspectives: By program category, by cost initiative, by fee type, and by activity.

3. Cost Basis for SEVP Fees Based on Current Services

The FY 2019 and FY 2020 budgets provide the cost basis for the fees. These budgets reflect the required revenue to sustain current initiatives. The revenue is also assessed to ensure a sufficient level of continued funding for program enhancements as discussed above, such as enhanced vetting and investigative analysis to support enforcement operations, SEVIS Modernization, and increased numbers of adjudication personnel. Finally, the past budgets provide the cost basis for adjusting annualized cost-of-living increases.

Determining the projected cost for continuation of current efforts involved routine budget projection processes. The budget establishes the current services of the program and projects the mandatory and cost-of-living adjustments necessary to maintain current services. The budget adjusts the services provided by SEVP to include enhancements that reflect program policy decisions. Table 4 reflects the FY 2017 final budget, the FY 2018 approved budget, and the FY 2019 and FY 2020 planned budget requests.

TABLE 4—STUDENT AND EXCHANGE VISITOR PROGRAM SUMMARY OF REQUIREMENTS BY ORGANIZATION AND PROGRAM CATEGORY

[Dollars in thousands]

SEVP expenses	2017 spend plan	2018 spend plan	2019 spend plan	2020 spend plan
SEVP Payroll				
Full-Time Equivalent Personnel	134	175	221	221
Executive Office	$1,735	$1,744	$2,048	$2,084
Fee Management Section	$1,350	$1,597	$1,775	$1,806
Field Representative Unit	$6,480	$6,958	$7,641	$7,776
Policy Section	$1,178	$969	$1,283	$1,325
Systems Management Unit	$1,258	$1,299	$1,391	$1,416
SEVP Response Center Section	$652	$652	$931	$941
School Certification Unit	$2,993	$2,966	$3,291	$3,349
SEVP Analysis and Operations Section	$1,070	$1,226	$1,402	$1,388
New Required Positions	....	$296	$2,357	$5,610
Office of the Principal Legal Advisor	$328	$517	$642	$659
SEVP Outside Positions	$1,444	$1,776	$2,545	$2,629
Total SEVP Payroll	$18,488	$20,000	$25,306	$28,983
Program Expenses				
Advisory and Assistance Services	$58,630	$58,108	$52,755	$50,977
SEVIS (Modernization and O&M) *	$8,237	$18,722	$22,241	$21,912
Interagency Agreements with other agencies	$8,046	$9,815	$8,360	$8,583
Travel	$1,474	$1,500	$1,100	$1,100
Service-wide Costs	$3,222	$4,015	$2,400	$2,400
Total Program Expenses	$79,609	$92,160	$86,856	$84,972

[8] These include but are not limited to: Direct and indirect personnel cost, including salaries and fringe benefits, such as medical insurance and retirement; retirement cost, including all (funded or unfunded) accrued cost not covered by employee contributions, as specified in OMB Circular A–11; overhead, consulting, and other indirect cost, including material and supply cost, utilities, insurance, travel, as well as rents or imputed rents on land, buildings, and equipment; management and supervisory cost; and cost of enforcement, collection, research, establishment of standards, and regulation.

[9] Full cost includes the costs associated with resources that directly or indirectly contribute to the output and supporting services within the entity and from other entities.

TABLE 4—STUDENT AND EXCHANGE VISITOR PROGRAM SUMMARY OF REQUIREMENTS BY ORGANIZATION AND PROGRAM CATEGORY—Continued

[Dollars in thousands]

SEVP expenses	2017 spend plan	2018 spend plan	2019 spend plan	2020 spend plan
CTCEU	$67,200	$74,450	$74,450	$74,450
Total, SEVP	$165,297	$186,610	$186,612	$188,405

* Includes costs for the SEVIS Modernization and SEVIS Operations and Maintenance.

F. Summary of the Full Cost Information

The total cost projection for FY 2019 is $186,612,000 and for FY 2020 is $188,405,000. Table 4 sets out the projected current services for SEVP and supporting CTCEU personnel in FY 2019 ($74.45 million) and FY 2020 ($74.45 million). These costs are direct extensions of the FY 2018 costs that are supported by the current fees. Table 5 summarizes the enhancements and other costs, which include investigative analysis to support enforcement operations, SEVIS Modernization, increased numbers of adjudication personnel, and annualized inflation.

TABLE 5—FY 2018, FY 2019 AND FY 2020 SEVP COST BY INITIATIVE

Program cost by initiative	FY 2018 budgeted cost (thousands)	FY 2019 budgeted cost (thousands)	FY 2020 budgeted cost (thousands)
Program Base:			
SEVP (Current operational costs)	$95,097	$94,497	$95,106
CTCEU (Current operational costs)	70,200	70,200	70,200
Subtotal	165,297	164,697	165,306
Enhancements and Other Costs:			
Investigative Analysis Support	4,250	4,250	4,250
SEVIS Modernization	13,150	13,750	13,141
Increased Personnel	1,100	1,100	3,500
Annualized Inflation	2,813	2,813	2,208
Subtotal	21,313	21,913	23,099
Total	186,610	186,610	188,405

1. Fee Allocation

The purpose of the ABC methodology is to trace costs to organizational elements, as well as identify all cost components associated with the services offered. For fee-based organizations such as SEVP, this allows the assignment of cost to one or more fees. SEVP defined five fee categories: The I–901 SEVIS fee, certification fee, recertification fee, fee for motions and appeals, and site visit fee.

Historically SEVP has only collected fees from students and exchange visitors—the I–901 fee—and from schools applying for certification, to include a separate site visit fee. In this analysis, SEVP considered the creation of additional fee categories for all the distinct services it provides in deciding how to apportion fees. For example, SEVP considered charging a separate I–901 SEVIS fee to F, M, and J dependents. SEVP also examined various tiered fee structures and considered assigning some specific costs to separate fees. The ABC fee model allowed SEVP to evaluate these scenarios. DHS opted for an updated fee structure that segments program cost to the appropriate fee—F and M students, J exchange visitors, or schools.

The proposed I–901 SEVIS fee would recover the systems cost for SEVIS, including the remainder of certification, recertification, site visits, as well as appeals and motions costs that are not covered by the respective proposed fees. The fee would be apportioned between three categories—full fee of $350 for F and M students, reduced fee of $220 for most J participants, and the further reduced fee of $35 for certain J program participants. Federal Government-sponsored J program participants are fee-exempt by law, so their costs will be funded by other fee payers. 8 U.S.C. 1372(e)(3).

The proposed school certification fee would recover a portion of the costs necessary to process initial school certifications. The proposed recertification fee would recover a portion of the cost to process school recertifications and a portion of SEVP administrative costs. The site visit fee would recover the full cost of performing the site visit for initial school certification and when a school changes its physical location or adds a new physical location or campus. The proposed fee for an appeal or motion would recover a portion of the cost to process an appeal or motion.

2. SEVP FY 2019 and FY 2020 Cost Model Results

Table 6 shows the summary of SEVP FY 2019 and FY 2020 cost by source of cost.

TABLE 6—TOTAL SEVP FY 2019 AND FY 2020 COST BY FEE CATEGORY

SEVP ABC model output category	FY 2019 budgeted cost (thousands)	FY 2020 budgeted cost (thousands)
I–901 SEVIS Fee	$159,835	$160,633
I–17 Certification Fee	1,909	1,992
I–17 Recertification Fee	22,522	23,189
Site Visit Fee	385	389
Appeals Fee	1,956	2,198
Total	186,607	188,401

Table 7 shows a more detailed cost breakdown. The numbers are shown in thousands, rather than millions, of dollars due to the level of detail. There are two levels for the costs: Process and activity. Costs are allocated from payroll, contracts, and other expenses to activities through activity surveys and volume based cost allocations. The full cost of operations from the spend plans is distributed to the activities that best describe the work being performed. Table 7 details these costs from an activity perspective. To simplify the presentation, the numbers are rounded to the nearest thousand. These numbers are not rounded in the cost model.

TABLE 7—DETAILED COST BREAKDOWN

[FY 19 + FY 20, dollars in thousands]

Process	Activity	I–901	I–17 certification	I–17 re-certification	I–17 site visit	Appeals
Certify Schools	A–01: Certify schools (initial certification)		$3,115			
	A–02: Recertify schools			$4,614		
	A–03: Notify students if school is withdrawn			129		
	A–04: Withdraw schools from SEVIS			1,102		
	A–05: Process appeals/motions					$3,420
	A–06: Process petition updates			3,036		
	A–07: Monitor school compliance			3,761		
	A–08: Monitor school risk			3,446		
Enforce Compliance with Regulations and Laws.	A–28: Conduct Student and Exchange Visitor (I–901) investigations.	$93,921		16,574		
	A–29: Conduct school and sponsor investigations	34,238		6,042		
	A–30: Operate CTCEU programs	4,130		729		
	A–31: Provide CTCEU liaison support	417		74		
	A–41: Perform I–515 operations duties	1,471				
	A–43: PDSO/DSO background checks	1,038		54		
Formulate Policy	A–16: Analyze and develop policy	3,170		600		
	A–17: Develop and review rules and regulations	2,476		469		
	A–18: Implement policy	1,501		284		
	A–19: Develop future policy strategy	816		154		
Provide Stakeholder Communications.	A–11: Develop and deliver SEVP communications	9,040	118	1,224	24	130
	A–12: Respond to stakeholders' policy and technical inquiries (including Tier III Help Desk).	8,218				
	A–13: Provide Field Representative support	13,731		2,598		
	A–14: Prepare and attend conferences/workshops related to the SEVIS community.	3,404	62	644	13	68
	A–15: Develop and conduct strategic communications.	2,699	49	511		
Provide Systems Program Management Support.	A–20: Modify and enhance functionality of SEVP mission systems (*e.g.,* SEVIS, SEVPAMS[10]).	24,816				
	A–21: Operate and maintain SEVP mission systems (*e.g.,* SEVIS, SEVPAMS).	28,491				
	A–22: Provide Tier I and Tier II Help Desk support	12,814				
	A–23: Conduct systems program management	5,291				
	A–24: Analyze and disseminate program data	3,510	46	475	9	50
	A–25: Operate and maintain SEVP inter-office systems.	1,735	32	328		
Support SEVP Operations.	A–26: Maintain SEVP systems security	2,867	37	388		
	A–27: Maintain SEVP physical security	223	4	42	1	4
	A–32: Provide Executive Leadership for SEVP	2,539	33	344	7	36
	A–33: Provide SEVP administrative support	1,599	21	217	4	23
	A–34: Develop strategic plan	1,612	29	305	6	32
	A–35: Manage financial resources	7,300	95	988	20	105
	A–36: Manage procurement	1,886	25	256	5	27
	A–37: Manage personnel resources	2,065	27	280	6	30
	A–38: Manage SEVP records	3,274	60	619	12	66
	A–39: Manage facility resources	1,782	23	241	5	25
	A–40: Manage I–901 payment system	7,766				
	A–42: Manage I–901 J program	15,966				
	A–44: Site Visits				638	
Train SEVP staff, other staff, and DSOs.	A–09: Develop and deliver SEVIS training	5,936	78	803	16	85
	A–10: Develop and deliver internal training	2,613	48	494	10	52
Total		314,355	3,902	51,827	775	4,155

3. Fee Calculations

The cost model provides detailed cost information by activity and a summary cost for each, giving the aggregate fee cost by category. Next, SEVP projected the total number of fee payments of each type for FY 2019 and FY 2020 and determined the fee-recoverable budget. SEVP selected a forecasting approach to determine the total number of expected fee payments for each fee.

a. I–901 SEVIS Fee

To calculate a fee amount for the I–901 SEVIS fee, SEVP estimated the number of fee payments expected in FY 2019 and FY 2020 for each of the three fee payment types: Reduced fee for J participants (excluding the additional cost for initial certification and recertification of SEVP-certified schools); full fee for J participants (excluding the additional cost for initial certification and recertification of SEVP-certified schools); and full fee for F and M students (including additional costs for certification, recertification, and appeals).

Calculations for each of the three fee payment types vary because each fee type is treated differently in federal statutes and regulations. Section 641 of IIRIRA exempts Federal Government-sponsored J–1 exchange visitors from the fee payment. All F and M nonimmigrant students are currently required to pay $200, and nonexempt J nonimmigrant exchange visitors currently must pay $180. 8 CFR 103.7(b)(1)(ii)(H); 214.13(a). Congress modified the statute in December of 2000 to establish a reduced fee of $35 for au pairs, camp counselors, or participants in a summer work travel program, demonstrating strong congressional intent that the fee remain at that level. Act of Dec. 21, 2000, Public Law 106–553, app. B, sec. 110, 114 Stat. 2762, 2762A–51, 2762A–68. IIRIRA also provided for revising the fee once the program to collect information was expanded to include information collection on all F, M, and J nonimmigrants. As a result, the I–901 fee was revised in 2008 under the provisions of IIRIRA to take into account the actual cost of carrying out the program. *See* 73 FR 55683. The I–901 fee is now being revised a second time, through this rule, due to an increase in the actual cost of carrying out the program.

SEVP determined the number of expected I–901 SEVIS fee payments in FY 2019 and FY 2020. SEVP calculated the I–901 SEVIS fee over a 2-year period to account for potential fluctuation in the forecast. SEVP used the change in the numbers of payments received to provide the trend data used to forecast I–901 SEVIS fee payments for each I–901 payment type separately. Table 8 reflects aggregate historical payment data for all three I–901 payment types.

TABLE 8—F, M, AND J VISA ISSUANCE 2007–2017

Fiscal year	Total	Growth rate*
2007	697,054	
2008	753,065	8.0
2009	644,912	−14.4
2010	699,983	8.5
2011	749,082	7.0
2012	744,027	−0.7
2013	767,805	3.2
2014	829,636	8.1
2015	885,728	6.8
2016	866,623	−2.2
2017	796,820	−8.1

*Growth rate rounded to nearest tenth of a percent.

As indicated in Table 8, the level of payments received varied greatly over the past 10 years. This high degree of variation in the historical data, combined with the variables affecting demand for visas, called for a forecasting methodology that would capture and account for deviations.

SEVP selected a statistical forecasting method that uses trends in historical data to forecast future payments. SEVP selected ARIMA, an autoregressive integrated moving average model to forecast payments. An ARIMA model is a statistical model that uses historical time series data to predict future trends and movements. A non-seasonal model incorporates two major components: Trend and moving average. The autoregressive portion of the model, or trend, states that past values have an effect on current or future values and that values are estimated based on the weighted sum of past values. The second component is moving average which helps to smooth out the time series to filter out extreme fluctuations or outliers. In some cases a third component is needed: Seasonality. Visa data from 2004 to the present shows extreme seasonality in the number of F, M, and J visas issued. Seasonality is factored into the model to account for the U.S. academic calendar.

SEVP evaluated alternative forecasting methods; however, SEVP rejected these methods due to inaccuracy and poor fit. SEVP's chosen model provided a conservative forecast that will allow SEVP to operate with stability. The fee payment forecast, reflected in Table 9, places a balanced mix of emphasis on recent and historical data and still contains sufficient data points to smooth out some variability in the underlying data.

TABLE 9—I–901 SEVIS FEE PAYMENT FORECAST FY 2019–FY 2020

I–901 Payment type	FY 2019	FY 2020
Full Payments, F/M	418,393	407,933
Full payment, J-Full	157,550	153,611
Subsidized, J-Partial	158,945	158,945
Total	734,888	720,490

b. Certification Cost

SEVP uses historical data from FY 2012 to FY 2016 to find a 3-year moving average to forecast annual new initial certifications. SEVP predicts demand of approximately 426 initial certifications each year. SEVP assumes that the proposed higher fee will not deter schools from applying for certification.

TABLE 10—THREE-YEAR MOVING AVERAGE OF THE NUMBER OF SCHOOL CERTIFICATION PAYMENTS RECEIVED

Fiscal year	Payments received	3-Year moving average
2012	457	
2013	382	

[10] SEVP Automated Management System.

TABLE 10—THREE-YEAR MOVING AVERAGE OF THE NUMBER OF SCHOOL CERTIFICATION PAYMENTS RECEIVED—Continued

Fiscal year	Payments received	3-Year moving average
2014	446	428
2015	469	432
2016	363	426

The total fee category budget is taken directly from the FY 2019 and FY 2020 SEVP ABC model, reflected in Table 11.

TABLE 11—FY 2019–FY 2020 CERTIFICATION FEE-RECOVERABLE BUDGET

Fiscal year	Certification payments expected	Fee-recoverable budget
2019	426	$1,909,680
2020	426	1,992,878
Total ...	852	3,902,558

School certification fees are calculated by dividing the fee-recoverable budget by the anticipated number of payments. This results in a fee-recoverable amount from schools of $4,580 each. To arrive at the proposed fee, rounding was applied to the result of the fee algorithm. This results in a certification fee of $4,600 per school. Setting the certification fee at the $4,600 figure, however, leads to an increase of the current school certification fee by $2,900, resulting in a certification fee over twice the current fee amount. School certification is integral to SEVP—F and M nonimmigrant students can only attend SEVP-certified schools. DHS is concerned that such an increase of the school certification fee would appear dramatic to schools seeking initial certification and could lead to fewer schools seeking initial certification, so DHS proposes to keep the fee increase at a level that will not discourage potential new schools from seeking certification. At the same time, DHS considers that initial certification bestows upon the school a valuable asset, the ability to enroll F and M nonimmigrant students, and an increased fee amount is reasonable as the initial certification process becomes more extensive through the SEVIS modernization and other technological developments. Weighing these concerns, DHS decided to subsidize the I–17 certification fee by increasing the payment by only $1,300 to $3,000. The remainder of the costs for I–17 certification is subsidized by the I–901 F and M SEVIS fee, which is addressed below.

c. Recertification Cost

To identify a fee level that would recover the full cost of recertification operations, SEVP determined the full cost of recertification (including level of effort and contract cost) and the approximate number of schools willing to recertify. Because schools are required to recertify every 2 years, SEVP anticipates that approximately one-half of its certified schools—roughly 4,373 schools per year, given the current certified school population of 8,746—would recertify.

TABLE 12—FY 2019–FY 2020 RECERTIFICATION FEE-RECOVERABLE BUDGET

Fiscal year	Recertification payments expected	Fee-recoverable budget
2019	4,373	$25,368,650
2020	4,373	26,457,896
Total ...	8,746	51,826,546

To calculate an anticipated school recertification fee, DHS divides the fee-recoverable budget by the anticipated number of payments. This results in a fee-recoverable amount from schools of $6,000 each. To arrive at the proposed fee, rounding was applied to the result of the fee algorithm. This would result in a recertification fee of $6,000 per school. DHS desires to institute a recertification fee to more accurately assign the costs of recertification adjudication to those stakeholders who are directly requesting the adjudication—the SEVP-certified schools—particularly since the costs of recertification continue to increase as the recertification process becomes more robust. DHS considers, however, that a recertification fee instituted in this rule for the first time should not be set at a level that could discourage schools from seeking recertification. DHS also considers that the recertification amount should be less than the initial certification amount so that schools are encouraged to seek recertification instead of allowing their SEVP certification to be withdrawn and applying for initial certification anew at some later date. Withdrawal of SEVP-certification not only leads to the school losing a valuable asset, but also leads to complications for F and M nonimmigrant students enrolled in the withdrawn school, who are then forced to transfer schools, leave the United States, or risk facing immigration law penalties for violating the terms of their nonimmigrant status. Weighing all these factors, DHS proposes that the I–17 recertification fee be $1,250. DHS proposes to eliminate regulations that state that no fee is required for the school recertification process in order to recover part of this cost, as part of an effort to establish a more equitable distribution of costs and more sustainable level of cost recovery relative to services provided. The costs for I–17 recertification not recovered by the proposed fee would be subsidized by the I–901 F and M SEVIS fee. The explanation for shifting responsibility of the fee adjustment to the I–901 fee is included below.

d. Site Visit Cost

Site visits consist of initial certification site visits, change of location visits, and new campus or location site visits. The anticipated workload for these site visits is 600 per year, or 1,200 visits over a 2-year period.

TABLE 13—FY 2019–FY 2020 SITE VISIT FEE-RECOVERABLE BUDGET

Fiscal year	Site visit payments expected	Fee-recoverable budget
2019	600	$385,674
2020	600	389,689
Total ...	1,200	775,363

The current fee amount is $655 as established in the 2008 Fee Rule that codified SEVP's authority to charge the fee when a school changes its physical location or adds new physical location or campus. Following this rule's effective date, SEVP will collect the fee when a school adds a new physical location or campus. The site visit fee would apply when a certified school updates its Form I–17 in SEVIS to indicate, pursuant to 8 CFR 214.3(h)(3)(ii), an added physical location or campus. The site visit fee is based on level of effort for both SEVP staff and contracts that cover the cost of operations.

e. Appeals and Motions Cost

Determining the full cost of processing an appeal is essential to improving the fee structure. The fee for filing a motion or appeal is calculated by determining the workload of appeals and motions over the FY 2019 and FY 2020 periods. Over the past 2 years, SEVP has processed 54 appeals and motions annually. To maintain conservative estimates, SEVP anticipates that number will remain constant over the FY 2019 and FY 2020 periods.

TABLE 14—FY 2019–FY 2020 APPEALS FEE-RECOVERABLE BUDGET

Fiscal year	Appeal and motion payments expected	Fee-recoverable budget
2019	54	$1,956,375
2020	54	2,198,825
Total ...	108	4,155,200

Fees for motions or appeals are calculated by dividing the fee-recoverable budget by the anticipated number of payments over the FY 2019 and FY 2020 periods. This results in a fee-recoverable amount of $38,474 for each appeal. To arrive at the proposed final cost, rounding was applied to the result of the fee algorithm. This results in a cost for a motion or appeal of $38,500. SEVP believes that this fee, while justified, is too high to impose on the affected schools as the first fee to be established and collected for the subject appeals and motions, and that some accommodation should be made to keep the fee at a more reasonable amount. Instead, DHS proposes adding $4.76 to the Form I–901 F and M fees to counterbalance the unfunded costs of adjudicating appeals and motions. This will better ensure that cost is not a significant obstacle in pursuing an administrative appeal or motion. The Form I–290B fee when filed with SEVP would be set at $675, which is currently the same amount charged when the form is filed with USCIS. *See* 8 CFR 103.7(b)(i)(S).[11] The Form I–290B, ''Notice of Appeal or Motion,'' filed with USCIS is the same form used for appeals or motions related to any denial of school certification or recertification or a withdrawal of such certification. Although the appeal fee would not be set at the amount necessary to recover the full costs of appeals and motions, by setting a fee of $675, schools that benefit from the appeal process would bear some of its costs, and DHS would more fairly balance allocation of the recovery of SEVP operational costs between beneficiary classes. As proposed, DHS would charge the fee for all such appeals and motions.

4. Proposed Fee Levels

Viewing the SEVP fee structure and affected parties comprehensively, DHS proposes to adjust each fee in its fee structure based not only on cost of services, but also on the desire to spread the impact of fee increases reasonably among the various beneficiaries of SEVP services. Despite the ABC calculations' determination of the actual cost of each service, which is represented by each fee, DHS has determined that using the I–901 revenue to subsidize the costs of the SEVP's other fees is an appropriate course of action for two reasons. First, the number of F and M students paying the I–901 fee is substantially larger than the number of entities paying each of the school certification-related fees, allowing for SEVP to lessen the impact of fee increases in the aggregate. Second, the subsidization is reasonable because individuals paying the I–901 fee necessarily benefit from the continued certification of schools for their enrollment and prompt and accurate adjudication of appeals.

DHS proposes to increase the I–901 SEVIS fee for F and M students from $200 to $350 and the full I–901 SEVIS fee for most J exchange visitors from $180 to $220. While these increases may seem large, these fees have been unchanged since 2008. 73 FR 55683 (Sept. 26, 2008). In 2008, the first time these fees had been updated since SEVP's inception in 2004, the I–901 SEVIS fee for F and M students increased from $100 to $200, and the full I–901 SEVIS fee for most J exchange visitors increased from $100 to $180. *See id.* The I–901 SEVIS fee for special J-visa categories (au pair, camp counselor, and summer work travel) would remain at the current $35 level, consistent with the levels set by Congress in 8 U.S.C. 1372(e)(4)(A). IIRIRA also exempts from the I–901 SEVIS fee J–1 exchange visitors who participate in Federal Government-sponsored J–1 exchange programs, consistent with 8 U.S.C. 1372(e)(3).

DHS proposes to increase the initial certification fee from $1,700 to $3,000. This fee was originally set at $230, effective in 2002, prior to the reorganization of the Immigration and Naturalization Service (INS) to become part of DHS. *See* 66 FR 65811 (Dec. 21, 2001). The fee was increased in 2008 to $1,700. *See* 73 FR 55683. This is the base fee for certification and does not include the site visit fee.

DHS proposes to establish a recertification fee at $1,250, maintain the site visit fee of $655, and set the I–290B fee at $675. The cost for SEVP recertification, site visits, and motions and appeals adjudication is determined by employing ABC principles, previously described in this document, balanced with SEVP's desire to prevent recertifications, site visits, appeals, and motions filings from becoming cost prohibitive. DHS is proposing a recertification fee and a Form I–290B fee for the first time, and SEVP believes that charging recertification and appeals fees sufficient to recover, on their own, the fee-recoverable amount for such services, may result in inordinately high fees from the perspective of entities who have regularly received the benefits of these SEVP services at no additional charge. Accordingly, DHS proposes to set these fees at amounts below the fee-recoverable cost. For the I–290B fee in particular, DHS proposes to set the amount at $675. DHS believes this amount is appropriate because it is less than both the fee for initial certification and the fee for recertification. Further, the amount $675 is already associated with the Form I–290B when filing it with USCIS. DHS believes $675 is a logical starting point, because this is the fee currently being charged by USCIS for motions and appeals. While the difference between the fee-recoverable amount (approximately $38,500) and the proposed fee of $675 is substantial, subsidizing this fee by driving the additional costs to the I–901 fee results in an increase of only $4.76 to F/M students paying that fee. The proposed program fee schedule for SEVP beginning in FY 2019 is shown in Table 15.

TABLE 15—PROPOSED FY 2019 SEVP FEES

Category	Amount
I–901 SEVIS Fees:	
• I–901 Primary F/M visa holders (Full)	$350
• I–901 Primary J visa holders (Full)	220
• I–901 Special J-visa categories (Subsidized payment)	35
I–17 School Fee:	

[11] Because the underlying rationale for the amount of the I–290B fee differs between SEVP and USCIS, the cost for appealing a claim or petition using the I–290B Form could eventually be different for SEVP and USCIS 8 CFR 103.7(b)(1)(i)(S).

TABLE 15—PROPOSED FY 2019 SEVP FEES—Continued

Category	Amount
• Certification Fee	3,000
• Recertification Fee	1,250
• Site visit fee for initial certification (base fee to be multiplied by number of locations cited on the Form I–17), and for new physical locations	655
Appeal or Motion Fee:	
• Appeal or Motion Fee	675

These proposed fee amounts, the cost model outputs, and cost reallocation amounts are shown in Table 16. The cost reallocation amounts are negative for the fees that are subsidized. The cost reallocation amounts that are positive are the amounts per fee that subsidize the other fee categories.

TABLE 16—PROPOSED FEE ADJUSTMENT AMOUNTS

Fee	Current fee	Activity based cost model output	Cost reallocation	Final fee	Change in fees	% Change in fee
	(a)	(b)	(c)	(d = b + c)	(e)	(f = (d/a) −1)
Appeal or Motion Fee: I–290B	N/A	$38,475	($37,800)	$675	$675	N/A
I–901 F/M	200	290	60	350	150	75
I–901 J-Full	180	123	97	220	30	22
I–901 J-Partial	35	123	(88)	35	0	0
I–17 Initial Certification	1,700	4,600	(1,600)	3,000	1,300	76
I–17 Recertification	N/A	6,000	(4,750)	1,250	1,250	N/A
Site Visit—initial	655	650	5	655	0	0
Site Visit—new location	0	650	5	655	655	N/A

Table 17 reflects the break-even analysis based on the proposed fee schedule and the proportional fee volumes (rounded) required to generate sufficient revenue to offset projected program costs.

TABLE 17—PROJECTED REVENUE—FY 2019 AND FY 2020

Fee category	Proposed fee amount	Forecasted volume	Forecasted revenue
I–901 F/M Full	$350	826,326	$289,214,144
I–901 J-Full	210	311,162	68,455,584
I–901 J-Partial	35	317,890	11,126,150

Certification Fee	3,000	852	2,556,000
Recertification Fee	1,250	8,746	10,932,500
Site Visit	655	1,200	786,000
I–17 Subtotal:			
Appeals	675	108	72,900
Total		1,466,284	383,143,278

VI. Statutory and Regulatory Requirements

A. Executive Orders 12866, 13563, and 13771: Regulatory Review

Executive Orders 12866 (''Regulatory Planning and Review'') and 13563 (''Improving Regulation and Regulatory Review'') direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 13771 (''Reducing Regulation and Controlling Regulatory Costs'') directs agencies to reduce regulation and control regulatory costs and provides that ''for every one new regulation issued, at least two prior regulations be identified for elimination, and that the cost of planned regulations be prudently managed and controlled through a budgeting process.''

The Office of Management and Budget (OMB) has designated this rule a ''significant regulatory action,'' although not economically significant under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by OMB. This proposed rule would impose transfer payments between the public and the government. Thus, this proposed rule is not expected to be subject to the requirements of Executive Order 13771. An initial regulatory analysis follows.

1. Background and Purpose of the Proposed Rule

SEVP is a fee funded program within ICE that provides oversight of schools and nonimmigrant students in the F and M visa category. SEVP uses SEVIS to monitor and track certified schools and F, M, and J nonimmigrant students. DoS also uses SEVIS in the management of the Exchange Visitor Program for nonimmigrant exchange visitors in the J visa category. SEVIS is a web-based system administered by SEVP that retains data on international students and exchange visitors in the country. SEVP uses SEVIS to ensure accurate reporting and recordkeeping by schools and exchange visitor programs. SEVP also uses SEVIS to identify for enforcement action student and exchange visitors who are out of status.

The purpose of this proposed rule is to generate the necessary revenue to recover the full cost of the FY 2019 and FY 2020 budgets. SEVP is authorized to recover the full cost of all resources and services provided. The costs of SEVP activities have increased, and the fees collected no longer cover the costs. The fee increase is needed to meet long-term cash flow needs and achieve solvency.

SEVP projects an annual budget of $186.6 million in FY 2019 and $188.4 million in FY 2020. SEVP forecasts $121.6 million in revenue for FY 2019 and FY 2020 without a fee change. The implementation of this proposed rule would provide SEVP with additional fee revenue of $75.2 million in FY 2019 and $73.5 million in FY 2020. If DHS does not adjust the current fees to recover the costs of processing the enrollment of F and M students, certification and recertification of schools, processing relating to J exchange visitors, appeals, and site visits, it will be forced to make reductions in oversight, security, and service as compared to current projections.

To determine the full cost associated with SEVP and the management of SEVIS, SEVP used ABC methodology. ABC first identifies activities in an organization and then assigns the cost of each activity according to the resources they consume. SEVP identified the following as its primary activities: Collecting and retaining information on F, M, and J nonimmigrants; certifying schools; overseeing school compliance; recertifying schools; adjudicating appeals; investigating suspected violations of immigration law and other potential threats to national security by F, M, or J nonimmigrants; providing outreach and education to users; and performing regulatory and policy analysis. SEVP also recognizes management and overhead costs associated with the program.

SEVP proposes five fees paid by two source categories: Individuals will pay the I–901 SEVIS fee, and institutions will pay the I–17 certification fee, I–17 recertification fee, the fee for a motion or appeal, and the site visit fee. By tracing expenditures of the activities previously listed to the various fee categories, SEVP forecasted fee payments to determine the appropriate fee amount for each fee type proposed in this rule.

Table 18 presents an accounting statement summarizing the annualized transfer amounts and qualitative benefits of the proposed rule. This rule proposes that schools will pay a higher fee for initial SEVP certification and will incur a fee for recertification, a site visit when adding a new physical location or campus, and the filing of a motion or appeal. In addition, F and M students and J visitors will pay higher fees.

TABLE 18—ACCOUNTING STATEMENT FOR FY 2019

Category	Primary estimate
Qualitative Benefits	SEVP will be able to maintain the current level of service. This proposed rule will enhance SEVP's capability to support national security and counter immigration fraud through the continued development and implementation of critical system and programmatic enhancements. Enhancements to SEVIS, including the establishment of a student portal, will assist DSOs in their regulatory obligation to provide accurate and timely information and rebalance this reporting requirement by providing students an automated means to do so. Increased adjudication personnel will assist in reducing recertification processing times, while enhanced vetting protocols will ensure that only those eligible to enter and remain in the country do so
Transfers	7% Discount Rate $75,231,420 from schools and students to the government 3% Discount Rate $75,231,420 from schools and students to the government

Category	Effects	Source
Effects on State, local, and/or tribal government.	The proposed rule would increase and establish additional fees on state, local, and/or tribal government-funded educational institutions for support of SEVP operations. This rule proposes to increase the I–17 certification fee and creates the I–17 recertification fee and a fee for filing an appeal or motion. In addition, this rule announces that following completion of this rulemaking, SEVP will collect a site visit fee when an SEVP-certified school adds a campus/location.	NPRM, Executive Order 12866 analysis
Effects on small businesses	The proposed rule would increase and establish additional fees for educational institutions in support of SEVP operations. This proposed rule would increase the I–17 certification fee and create the I–17 recertification fee and a fee for filing an appeal or motion. In addition, this rule announces that following the completion of this rulemaking, SEVP will collect a site visit fee when a school certified by SEVP adds a campus/location.	Initial Regulatory Flexibility Analysis

2. Impacts of Regulatory Change

This proposed rule would amend the current fees for the individual student and exchange visitor application fee (I–901 SEVIS fee) and school certification petition for initial certification. It would maintain the current fee for site visits and extend it to any change of location or additional physical location or campus reported as an update by a certified school. It would also institute a new fee for school recertification petitions and the filing of appeals and motions by schools. The amended fee structure reflects existing and projected operating costs, program requirements, and planned program improvements.

The current I–901 SEVIS fees are based on a fee analysis performed when SEVP last increased the fees in 2008. *See* 73 FR 55683. Those cost calculations were established on the basis of projected workload. Since 2008, SEVP's program mission tasks have expanded significantly. The expansions of certification, recertification, and appeals costs and the subsidization of excess costs not recovered by fees have led to the need for the proposed fee increase. Additionally, SEVP now provides investigative analysis to support enforcement operations, has increased numbers of adjudication personnel, and is undergoing SEVIS Modernization. Concurrently, costs associated with these program tasks have been affected by increased costs due to inflation. This rule proposes fees that would result in recovery of the full cost of SEVP operations with fee-generated revenue; alignment of the fees with current and projected costs and processes that have been adjusted as the program has gained experience and sophistication; and the agency's adoption of more detailed and accurate data sources and improved management tools to align resources and workload.

a. I–901 F and M SEVIS Fee

F nonimmigrants, as defined in INA section 101(a)(15)(F), 8 U.S.C. 1101(a)(15)(F), are foreign students who come to the United States to pursue a full course of academic study in SEVP-approved schools and their dependents. M nonimmigrants, as defined in INA section 101(a)(15)(M), 8 U.S.C.1101(a)(15)(M), are foreign nationals pursuing a full course of study at an SEVP-certified vocational or other recognized nonacademic program (other than language training programs) in the United States and their dependents. International F and M nonimmigrant students seeking temporary admission into the United States to attend a U.S. educational institution must pay the I–901 F and M SEVIS fee. SEVP proposes to increase the I–901 F and M SEVIS fee from $200 to $350.

From 2007 through 2017, SEVP received an average of 450,581 I–901 F and M SEVIS payments per year. Table 19 shows the volume of I–901 F and M SEVIS fee payments received and the annual average number of fee payments from 2007 to 2017. As previously discussed, SEVP has forecasted 418,393 I–901 F and M payments in FY 2019 and 407,933 FY 2020, respectively.

TABLE 19—1–901 F AND M SEVIS FEE PAYMENTS FYS 2010–2017

Fiscal year	Fee payments
2007	358,666
2008	400,090
2009	348,815
2010	389,255
2011	431,180
2012	449,029
2013	469,986
2014	519,751
2015	574,158
2016	545,203
2017	470,261
Annual Average (2007–2017)	450,581
Forecasted 2019	
Forecasted 2020	418,393
	407,933

Table 20 illustrates the incremental increase DHS is proposing with this rule for the I–901 F and M fee. Individuals who submit a Form I–901 will pay an additional $150 under this proposed rule, which is a 75 percent increase.

TABLE 20—I–901 F AND M INCREMENTAL FEE INCREASE

Type	Current fee	Proposed fee	Difference (proposed − current)
I–901 F and M	$200	$350	$150

SEVP estimates that the fee increase would result in an annual increase of transfer payment from students who submit an I–901 form to the government of approximately $62 million per year ($150 increase × 418,393 FY 2019 number of applicants = $62,758,950; $150 increase × 407,933 FY2020 number of applicants = $61,189,950).

b. I–901 J-Full SEVIS Fee

DoS generally oversees the exchange visitor program, which includes nonimmigrants who are charged the full J SEVIS fee. J exchange visitors are nonimmigrant individuals approved to participate in an exchange visitor program in the United States and the spouse and dependents of the exchange visitors. This SEVIS fee is associated with J–1 nonimmigrants participating in a designated exchange visitor program. Certain other J–1 categories are subject to a reduced fee or are exempt from a fee in accordance with 8 U.S.C. 1372(e). SEVP and DoS have a memorandum of reimbursable agreement. DoS sends SEVP its actual expenditures, and SEVP reimburses them quarterly. Each year, SEVP and DoS review and update the memorandum. Table 21 displays the affected Exchange Visitor Program categories subject to the full SEVIS fee and the purpose of the visit.[12]

TABLE 21—J–1 EXCHANGE VISITOR PROGRAM CATEGORIES SUBJECT TO FULL SEVIS FEE

Exchange visitor program category	Purpose of visit
Short-term Scholar	Lecture, observe, consult, training, demonstrate special skills.
Professor and Research Scholar	Research Scholar: Research, observe, or consult in connection with a research project. Professor: Teach or lecture at university, observe, or consult.
Physician	Pursue graduate medical education or training at accredited schools of medicine or scientific institutions.
Intern	Structured internship program that is in the student's field of study.
Trainee	Structured training program that is in the trainee's professional field.
Specialist	Observing, consulting, or demonstrating special skills.
Teacher	Teach full-time in an accredited primary, including pre- kindergarten, or secondary (K–12) public or private school.

[12] *See* Department of State, Exchange Visitor Program Category Requirements (June 2016), *available at https://j1visa.state.gov/wp-content/uploads/2017/06/Exchange-Visitor-Program-Category-Requirements.pdf* (last visited Feb. 26, 2018).

TABLE 21—J–1 EXCHANGE VISITOR PROGRAM CATEGORIES SUBJECT TO FULL SEVIS FEE—Continued

Exchange visitor program category	Purpose of visit
Secondary School Student	Study in the U.S. at accredited public or private secondary schools for an academic semester or an academic year, while living with American host families.
College and University Student	Participate in a degree or nondegree program at an accredited postsecondary academic institution, or participate in a student internship program.
Government visitor (non-Federal)	Engage in observation tours, discussions, consultations, professional meetings, conferences, workshops and travel when selected by a state or local government agency.

SEVP receives an average of 151,958 I–901 Full J SEVIS payments per year (FYs 2007–2017). Table 22 displays the volume of Full I–901 J SEVIS fee payments received and the annual average number of fee payments. SEVP has forecasted 157,550 I–901 J-Full payments in FY 2019 and 153,611 in FY 2020.

TABLE 22—I–901 J-FULL SEVIS FEE PAYMENTS FYS 2010–2017

Fiscal year	Fee payments
2007	132,213
2008	137,173
2009	129,979
2010	139,534
2011	148,253
2012	155,008
2013	160,522
2014	172,530
2015	168,967
2016	164,401
2017	162,959
Average (2007–2017)	151,958
Forecasted 2019	157,550
Forecasted 2020	153,611

The difference between the proposed and current fees for the I–901 J-Full applicants is $40, an increase of approximately 22 percent, as shown in Table 23.

TABLE 23—I–901 J-FULL INCREMENTAL FEE

Type	Current fee	Proposed fee	Difference (proposed − current)
I–901 J-Full	$180	$220	$40

The total increase in transfer payments from I–901 J-Full applicants to the government is expected to be $12,446,440 ($40 increase in fee × 157,550 FY 2019 and 153,611 FY 2020 forecasted number of applicants). The increase in J fees is meant to recover the full cost of J program operations for SEVP, which includes the reimbursement to DoS, SEVIS costs, and other adjudication services for J exchange visitors. For the purposes of calculating fees, SEVP isolates the costs specifically incurred by operating the J visa program. As it stands, the J visa program operates at a greater cost than the revenue that J visa fees bring to the program; therefore, SEVP proposes an increase to the J-Full visa to cover the $39.4 million full cost of operating the J visa program on an annual basis.

c. I–17 Certification and Recertification Fee

For a U.S. school to enroll F and M nonimmigrant students, it is required to be certified by SEVP. A school petitions for SEVP certification to enroll these students by completing and submitting Form I–17, ''Petition for Approval of School for Attendance by Nonimmigrant Student,'' online through SEVIS.

All SEVP-certified schools are required to go through the recertification process every 2 years to ensure they remain qualified for certification and adhere to all requirements according to the regulations.

From FY 2012 to 2016, there has been an annual average of 423 schools applying for SEVP certification. As previously discussed, DHS calculated the 3-year moving average to minimize the variation in forecasting the population data. The I–17 Initial certifications from FYs 2012 through 2016 are shown in Table 24.

TABLE 24—FYS 2012–2016 I–17 INITIAL CERTIFICATIONS

Fiscal year	I–17 certification petitions	3-Year moving average
2012	457	
2013	382	
2014	446	428
2015	469	432
2016	363	426
Total	2,117	

SEVP uses the 3-year moving average to predict that there will be 426 initial certifications in both FY 2019 and FY 2020, respectively.

There are currently 8,746 SEVP-certified schools. DHS assumes that approximately half, or approximately 4,373 schools, will recertify each year, including the 1,728 schools with no active F or M students. DHS assumes that a school would prefer to recertify for a $1,250 fee instead of allowing certification to lapse and thereafter having to again pay the proposed initial certification fee of $3,000. The proposed initial certification fee is a 76 percent increase from the current fee.

The current fee to apply for initial certification is $1,700, which has not changed since 2008. SEVP does not currently charge a recertification fee; the proposed fee amount is $1,250. The I–17 initial certification and I–17 recertification incremental fees are shown in Table 25.

TABLE 25—I–17 INCREMENTAL FEES

Type	Proposed fee	Current fee	Difference (proposed – current)
I–17 Initial Certification Fee	$3,000	$1,700	$1,300
I–17 Recertification Fee	1,250	0	1,250

The annual increase in transfer payments from schools to the government from I–17 initial certifications is expected to be $553,800 ($1,300 increase in fee × 426 (FY 19 and FY 20 forecasted number of I–17 initial certifications)). The annual increase in transfer payments from schools to the government for I–17 recertification is expected to be $5,466,250 ($1,250 increase in fee × 4,373 (FY 2019 and FY 2020 forecasted number of recertifications)).

d. Fee for Motion or Appeal

When a school is denied certification or recertification, the school receives a denial letter through certified mail. The denial letter explains the reason for the denial and the steps to appeal. The school can appeal by completing the Form I–290B, ''Notice of Appeal or Motion,'' within 30 days of receipt. This rule proposes that SEVP impose a filing fee of $675, which is also the fee currently charged by USCIS upon submission of the Form I–290B.[13] SEVP does not currently collect a fee from a school that files a motion or appeal. DHS proposes to revise its regulations to institute this fee for a school filing a motion or an appeal in order to establish a more equitable distribution of costs, improve services by decreasing an appeals or motions throughput time and a more sustainable level of cost recovery relative to the services provided.

SEVP processed an average of 54 motions and appeals from schools annually from 2013 to 2016. DHS assumes that there will be the same number of appeals or motions filed in FY 2019 and FY 2020.

The total annual increase in transfer payments from schools to the government for filing a motion or appeal is expected to be $36,450 ($675 fee × 54 (FY 2019 and FY 2020 forecasted number of fee payments)).

e. Site Visit Fee

As noted above, current regulations provide authority for SEVP to charge a site visit fee to schools that apply for initial certification or report a change of physical location, or addition of a physical location or campus. The site visit allows SEVP an opportunity to gather evidence on the school's eligibility, review school facilities, and interview personnel listed on the I–17 petition as a PDSO or DSO. SEVP currently collects the $655 fee when a school files a petition for certification to issue Forms I–20 or by a certified school when it physically moves to a new location. This proposed rule notifies the public that following completion of this rulemaking, SEVP plans to also collect the fee from any certified school that adds a physical location or campus, by updating its Form I–17 in SEVIS, consistent with the above authorities and the agency's longstanding interpretation.

SEVP performs 600 site visits annually. Of these 600 visits, 426 will be at schools that apply for initial certification and currently pay the $655 site visit fee. The remaining 174 site visits may include visits when a school adds a new physical location or campus. DHS proposes that the site visit fee amount, $655, remain the same.

The annual increase in transfer payments from schools to the government due to site visits is expected to be $113,970 ($655 fee × 174 (FY 2019 and FY 2020 forecasted number of site visits)).

f. Conclusion

SEVP expects to have a total increase in fees of $68.7 million per year, discounted at 7 percent, transferred from individuals and entities for the services they receive, to the government. Table 26 shows the summary of the total annual number of payments, incremental fee amounts, and total fees transferred.

TABLE 26—ANNUAL PROPOSED INCREMENTAL FEE AMOUNTS, FY 2019

	Annual number of payments	Proposed incremental fee amounts	Annual fee transfer to government
I–901 F and M	418,393	$150	$62,758,950
I–901 J-Full	157,550	40	6,302,000
I–17 Initial Certification	426	1,300	553,800
I–17 Recertification	4,373	1,250	5,466,250
Site Visits—initial	426	0	0
Site Visits—new location	174	655	113,970
Appeals	54	675	36,450
Total	....	....	75,231,420

3. Alternatives

SEVP examined several alternatives to the proposed fee structure, including no increase to any fee, only increasing the I–901 SEVIS fee and I–17 fee, and the unsubsidized results of the ABC model.

Without an increase in fees, SEVP will be unable to maintain the level of service for students and schools that it currently provides as well as the compliance and national security activities discussed above. SEVP considered the alternative of maintaining fees at the current level but with reduced services and increased

[13] USCIS I–290B, ''Notice of Appeal or Motion,'' Filing Fee of $675, *https://www.uscis.gov/i-290b.*

processing times, but has decided that this would not be in the best interest of applicants and schools. SEVP seeks to minimize the impact on all parties, but in particular small entities. If SEVP followed this alternative scenario, there would be a shortfall of revenue of over $65.4 million in FY 2019 to cover expenses. SEVP rejected this alternative. SEVP must pay for the expenses of maintaining and improving SEVIS and adjudicating schools applying to be certified by SEVP in a timely manner.

SEVP also considered raising only the I–901 and I–17 certification fees instead of including a new proposed fee for recertification and for filing a motion or appeal. If SEVP followed this scenario, the I–901 F and M fee would increase to $350 to cover the shortfall in revenue, but the I–17 Initial Certification fee would also increase to $4,200. This would triple the existing certification fee while allowing schools with zero foreign students to remain active SEVP schools that require SEVP effort for recertification. SEVP rejected this fee structure as it would continue to add workload to SEVP's recertification branch. Without any disincentive to recertify, the list of schools recertifying would likely continue to grow. The proposed fees, however, would establish a more equitable distribution of costs and a more sustainable level of cost recovery relative to the services provided.

SEVP also considered the unsubsidized results of the ABC model as an alternative, which allocated the I–901 F and M fee, school certification fees, and the fee to file an appeal or motion as shown in Table 27.

TABLE 27—UNSUBSIDIZED FEE AMOUNTS

Fee type	Unsubsidized fee amounts
I–901 F and M	$290
I–901 J-Full	130
I–901 J-Partial	130
I–17 Initial Certification	4,600
I–17 Recertification	6,000
Appeal or Motion	38,475
Site Visit	650

SEVP rejected this alternative for several reasons. Most conspicuously, the fee to file a motion or appeal filed on the USCIS-managed Form I–290B has been set at $675. Since a fee of $38,475 would be significantly higher than any other SEVP fee it may improperly discourage schools from filing a motion or appeal. Similarly, SEVP rejected the alternative to set the recertification fee at the ABC model output amount of $6,000. A recertification fee higher than the initial certification fee would discourage schools from seeking recertification. SEVP instead proposes to set the recertification fee at a level is less than the initial certification fee. When schools can maintain their certification, F and M nonimmigrant students enrolled in the withdrawn school avoid complications such as being forced to transfer schools, leave the United States, or risk facing immigration law penalties for violating the terms of their nonimmigrant status.

SEVP also rejected the initial certification fee of $4,600 because it finds that an increase of almost three times the current fee of $1,700 is excessive. In the fee development, DHS balanced the challenge of minimizing the costs to schools and students while recovering funding to support SEVP services. The population of I–901 F and M students relative to the population of I–17 schools allows for a minimal fee adjustment to be spread over the student population to reduce the cost burden on individual institutions seeking recertification.

B. Regulatory Flexibility Act

Initial Regulatory Flexibility Analysis

The Regulatory Flexibility Act (RFA) at 5 U.S.C. 603 requires DHS to consider the economic impact its proposed rules will have on small entities. In accordance with the RFA, DHS has prepared an Initial Regulatory Flexibility Analysis (IRFA) that examines the impacts of the proposed rule on small entities. The term ‘‘small entities'' encompasses small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of fewer than 50,000.

DHS requests information and data from the public that would assist in better understanding the impact of this proposed rule on small entities. DHS also seeks alternatives that will accomplish the same objectives and minimize the proposed rule's economic impact on small entities.

1. A Description of the Reasons Why the Action by the Agency Is Being Considered

DHS proposes this rule to adjust current fees and introduce new fees to ensure that SEVP is able to recover the full costs of the management and support of its program activities. DHS's objectives and legal authority for this proposed rule are further discussed throughout this notice of proposed rulemaking (NPRM).

2. A Succinct Statement of the Objectives of, and Legal Basis for, the Proposed Rule

The objective of the proposed rule is to prevent an anticipated funding deficit in operating the SEVP. More specifically, this proposed rule would increase the SEVP funding stream by adjusting the I–901 F and M fee, I–901 J-Full fee, and I–17 Certification fee and instituting the I–17 Recertification fee and a fee for filing a motion or appeal. This proposed rule would also announce the collection of a site visit fee when an SEVP-certified school adds a new physical location or campus, at which it provides educational services to nonimmigrant students. The funding supports continuing operations and new initiatives critical to SEVP oversight of schools and the monitoring of nonimmigrant students in the F, M, and J visa classifications for national security purposes.

The legal basis for this proposed rule increasing the SEVP funding stream is grounded in the Homeland Security Act of 2002, which created DHS and imparted upon DHS the responsibility for SEVIS. DHS uses SEVIS to meet the monitoring and verification requirements under EBSVERA, Public Law 107–173, secs. 501–502, 116 Stat. 543, 560–63 (2002) (codified at 8 U.S.C. 1761–1762), and to conduct a recertification of schools every 2 years following the date of EBSVERA's enactment. The Secretary of Homeland Security is authorized to collect fees for SEVP from prospective F and M students and J exchange visitors. IIRIRA section 641(e)(1), as amended, 8 U.S.C. 1372(e)(1). Initially, fees for most groups of F, M, and J classes of prospective nonimmigrants were statutorily limited to not exceed $100, except in the case of the fee for special J visa categories—au pairs, camp counselors, and participants in summer work travel programs—which was set at $35 pursuant to 8 U.S.C. 1372(e)(4)(A). This fee level has been maintained consistent with Congressional intent. The Secretary is authorized to revise nonimmigrant fees on a periodic basis to account for changes in the cost of executing SEVP. IIRIRA section 641(g)(2), 8 U.S.C. 1372(g)(2). In addition, INA section 286(m), 8 U.S.C. 1356(m), provides that DHS may set fees ‘‘at a level that will ensure recovery of the full costs of providing [adjudication] services.''

3. A Description—and, Where Feasible, an Estimate of the Number—of Small Entities to Which the Proposed Rule Will Apply

This analysis does not apply to increases in the I–901 F and M fees because these fees are paid by individuals who are not, for purposes of the RFA, within the definition of small entities established by 5 U.S.C. 601(6). DHS believes that J fees are also paid by individuals and requests comment on this assumption.

As of May 2017, there were a total of 8,746 SEVP-certified schools that would be subject to the I–17 recertification fee, site visit fee, and fee to file a motion or an appeal. New schools applying for SEVP certification would be subject to the proposed I–17 initial certification fee. Of the 8,746 SEVP-certified schools, 2,013 have identified as public schools on their I–17 form. The remaining 6,733 schools have identified themselves on the Form I–17 as private for-profit, private nonprofit, or private unspecified entities.[14]

Of the 2,013 SEVP-certified public schools, DHS conducted a random sample of 100 [15] schools to approximate the number of public schools in a governmental jurisdiction with a population of less than 50,000. Out of the 100 public schools, 62, or 62 percent, are located in a city with a population fewer than 50,000. DHS infers 1,248 SEVP-certified public schools are considered a small entity as defined by SBA.

DHS conservatively assumes that all 1,507 private nonprofit schools certified by SEVP are small entities because they are not dominant in their fields. DHS also assumes that the 4,755 schools that are private unspecified are small entities. DHS requests comments on these assumptions.

To determine which of the remaining 471 private for-profit schools are considered a small entity, DHS references the Small Business Administration (SBA) size standards represented by business average annual receipts. Receipts are generally defined as a firm's total income or gross income. SBA's Table of Small Business Size Standards is matched to the North American Industry Classification System (NAICS) for industries.[16] DHS matches information provided by the schools in SEVIS regarding what programs of study it is engaged in with an appropriate NAICS industry description. NAICS is the standard classification used to categorize business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. economy.

DHS finds that the revenue of 332 of the 471 private, for-profit schools meet the SBA size standard of a small business according to their industry. DHS estimates each private school's annual receipts by multiplying the approximate annual cost of room, board, and tuition by the average annual number of total students, based on data provided by the schools on their Forms I–17. Every 2 years, as part of the recertification process, a school submits the approximate annual cost of room, board, and tuition per student and the average annual number of total students, both domestic and international. DHS acknowledges that this method to estimate receipts may be an incomplete account of a school's income, which may also include contributions from private individuals or other endowments. Since these data reflect a snapshot of all SEVP-certified schools as of May 24, 2017, DHS acknowledges there may be day-to-day changes in the status of a school's certification and that a school's revenue may differ from actual revenue due to a 2-year lag in school self-reporting before a school is required to recertify.

Given these assumptions, DHS estimates that 7,842 schools meet the SBA definition of a small entity. This is approximately 90 percent of the 8,746 of SEVP-certified schools included in this analysis.

Table 28 shows a summary by school type of the number of SEVP-certified schools and estimated small entities.

TABLE 28—SEVP-CERTIFIED SCHOOLS BY SCHOOL TYPE

Description	Total	Small entities
Public Schools	2,013	1,248
Private, nonprofit schools	1,507	1,507
Private, unspecified schools	4,755	4,755
Private, for-profit schools	471	332
Total Number of SEVP-Certified Schools	8,746	7,842

Table 29 provides a summary of the SEVP-certified schools by industry. The table also shows the NAICS industry description, the NAICS code, and the number of small and large schools by industry. Note that the number of small schools includes all nonprofits and unspecified private schools. Most industries with SEVP-certified schools consist of a majority of small schools.

[14] Prior to October 1, 2016, schools had two options in SEVIS to select their school type: Public or private unspecified. With the recent SEVIS update, schools can only choose one of three options: Public, private for-profit, or private nonprofit.

[15] The random sample helps ensure an accurate representation of the population with each school having an equal chance of being included. In determining the sample size DHS utilized a 90 percent confidence level (z-score), 10 percent margin of error (e), and a 50 percent population proportion (π) used as an unknown input and to maximize the estimate to overestimate sample size. The sample size equation used $n = z^2\pi(1-\pi)/e^2$ provided inputs $1.65^2(.5)(.5)/.01 = 69$ and rounded up to 100 to over sample. DHS identified geographic population data matched to the school's city address provided in SEVIS, sourced from U.S. Census Bureau 2010–2016 Cities and Towns (Incorporated Places and Minor Civil Divisions) at *https://www.census.gov/data/tables/2016/demo/popest/total-cities-and-towns.html.*

[16] U.S. Small Business Administration, Tables of Small Business Size Standards Matched to NAICS Codes (Oct. 1, 2017), available at *https://www.sba.gov/sites/default/files/files/Size_Standards_Table_2017.xlsx.*

TABLE 29—NUMBER OF SEVP-CERTIFIED SCHOOLS BY INDUSTRY

School industry	NAICS industry description	NAICS codes	Number of small schools	Number of non-small schools	Total SEVP-certified schools	Percent small schools
Elementary and Secondary Schools.	Industry primarily engaged in providing academic courses and related course work that contain a basic preparatory education. A basic preparatory education generally starts kindergarten through 12th grade.	611110	3,472	18	3,490	99
Junior Colleges	Industry primarily engaged in providing academic or technical courses and granting associate degrees, certificates, or diplomas below the baccalaureate level.	611210	11	2	13	85
Colleges, Universities, and Professional Schools.	Industry primarily engaged in providing academic courses and granting degrees at baccalaureate or graduate levels. The requirement for admission is at least a high school diploma or equivalent general academic training.	611310	2,150	57	2,207	97
Computer Training	Industry primarily engaged in providing computer training (except computer repair), such as computer programming, software packages, computerized business systems, computer electronics technology, computer operations, and local area network management.	611420	13	0	13	100
Professional and Management Development Training.	Industry primarily engaged in providing a collection of short interval courses and sessions for management and professional development. Training for career development may be provided directly to individuals or through employers' training programs, and courses may be customized or modified to meet the special needs of customers.	611430	18	0	18	100
Cosmetology and Barber Schools.	Industry primarily engaged in providing training in hair styling, barbering, or cosmetic arts, such as makeup or skin care.	611511	91	3	94	97
Flight Training	Industry primarily engaged in providing aviation and flight training.	611512	199	1	200	100
Apprenticeship Training ..	Industry primarily engaged in providing apprenticeship training programs.	611513	39	1	40	98
Other Technical and Trade Schools.	Industry primarily engaged in providing job or career vocational or technical courses (except cosmetology and barber training, aviation and flight training, and apprenticeship training).	611519	183	6	189	97
Fine Arts Schools	Establishments primarily engaged in offering instruction in the arts, including dance, art, drama, and music.	611610	79	3	82	96
Sports and Recreation Instruction.	Industry primarily contains institutions such as camps and schools, primarily engaged in providing instruction in athletic activities to groups of individuals.	611620	10	0	10	100
Language Schools	Industry primarily engaged in providing foreign language instruction (including sign language).	611630	286	44	330	87
Exam Preparation and Tutoring.	Industry primarily engaged in providing training for standardized examinations and/or educational tutoring services.	611691	8	4	12	67
All Other Misc. Schools and Instruction.	Industry primarily engaged in providing instruction (except academic schools, colleges and universities, business, computer, management, technical, trade, fine arts, athletic, language instruction, tutoring, and automobile driving instruction).	611699	32	0	32	100
Educational Support Services.	Industry primarily engaged in providing non-instructional services that support educational processes or systems.	611710	2	0	2	100
Public Schools (Elementary, Secondary, and High School).	Industry primarily engaged in providing academic courses and related course work that contain a basic public education.	N/A	1,248	765	2,013	62
Total	....	....	7,842	904	8,746	90

Table 30 presents the type of schools with active F and M students and the percent of students enrolled in small schools. Most F and M students are enrolled at small schools. Of the 8,746 SEVP-certified schools, DHS identified 1,728 with no active F or M students and determined that 1,296 of these are considered small entities as defined by SBA. Note that although there are two SEVP-certified schools in the education support services industry (shown in Table 29), there are no active F and M students in these schools. DHS applies the results of the sample of SEVP-certified public schools to the number of students in SEVP-certified public schools (619,295) to estimate that the number of students in small SEVP-certified public schools is 383,963.

TABLE 30—TOTAL NUMBER OF ACTIVE F AND M STUDENTS BY INDUSTRY

School industry	Total active F and M students in small schools	Total active F and M students	Percent of students at small schools
Elementary and Secondary Schools	60,990	63,491	96
Junior Colleges	409	418	98
Colleges, Universities, and Professional Schools	419,593	429,784	98
Computer Training	404	404	100
Professional and Management Development Training	217	217	100
Cosmetology and Barber Schools	91	93	98
Flight Training	6,598	6,605	100
Apprenticeship Training	71	75	95
Other Technical and Trade Schools	1,108	1,111	100
Fine Arts Schools	1,736	2,030	86
Sports and Recreation Instruction	13	13	100
Language Schools	33,500	41,867	80
Exam Preparation and Tutoring	1,469	1,984	74
All Other Miscellaneous Schools and Instruction	218	218	100
Educational Support Services	....	....	0
Public Schools	383,963	619,295	62

DHS estimated SEVP-certified public schools' revenue to examine the impact of the proposed fee adjustments on small public schools. The tuition provided by public schools in SEVIS may not represent a public school's total revenue because most of the U.S. students would generally not pay the tuition provided to attend public schools. Instead, DHS assumes that a public school's county or city's tax revenue is the best revenue source against which to assess the impact of the proposed fee adjustments. DHS collected local government revenue, expenditure, debt, and assets from the U.S. Census Bureau 2015 State and Local Government Survey[17] to examine the impact of the increased fees on the public schools included in the sample. A county or city's revenue may be an overestimation of a public school's capability to pay the fees related to SEVP-certification, appeals, or site visits for new locations. This revenue approximation may minimize the impact of the fee adjustments for public schools. DHS requests comments on these assumptions.

Table 31 displays the range of annual revenue by each school industry and for public schools, from the small school with the lowest revenue to the median revenue of all the small schools to the small school with the largest revenue. It also shows the average revenue of all the small schools in that industry. The Colleges, Universities, and Professional Schools industry has the widest range from maximum to minimum revenue due to the assumption that all private, unspecified schools are small entities, while the Educational Support Services industry that only has two schools included has the smallest range of maximum to minimum revenue for any one industry.

TABLE 31—RANGE OF ANNUAL REVENUE BY SCHOOL INDUSTRY

School industry	Lowest annual revenue	Median annual revenue	Largest annual revenue	Average annual revenue
Elementary and Secondary Schools	$28,800	$5,116,550	$1,680,000,000	$13,194,355
Junior Colleges	44,400	2,560,000	15,255,000	4,271,901
Colleges, Universities, and Professional Schools	26,400	28,432,500	5,002,524,120	96,761,518
Computer Training	425,000	3,000,000	14,000,000	3,881,631
Professional and Management Development Training	129,600	717,500	2,904,625	1,000,423
Cosmetology and Barber Schools	70,000	2,183,000	66,907,200	4,092,673
Flight Training	36,000	3,000,000	60,000,000	5,959,154
Apprenticeship Training	132,000	10,265,875	106,080,000	21,004,563
Other Technical and Trade Schools	64,000	2,800,000	82,800,000	7,570,939
Fine Arts Schools	66,000	2,895,000	130,000,000	9,425,304
Sports and Recreation Instruction	276,800	1,165,000	9,312,500	2,626,805
Language Schools	118,500	5,725,000	108,000,000	7,514,433
Exam Preparation and Tutoring	3,150,000	5,043,189	27,000,000	6,983,297
All Other Miscellaneous Schools and Instruction	83,250	845,000	469,050,000	18,359,767
Educational Support Services	340,000	521,750	703,500	521,750
Public Schools	4,389,000	192,353,500	17,833,251,000	1,315,830,548

4. A Description of the Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Proposed Rule, Including an Estimate of the Classes of Small Entities That Will Be Subject to the Requirement and the Types of Professional Skills Necessary for Preparation of the Report or Record

The proposed rule would increase and establish additional fees for educational institutions in support of SEVP operations. DHS estimates the annual impact to small schools based on the school cost of compliance as represented as a percentage of their annual revenue. Table 32 displays the proposed fees, the current fees, and the difference in these amounts. This analysis examines the impact that the proposed incremental fee for the Form I–17 certification and the proposed fees for recertification, site visits to add a new physical location or campus, and the filing of a motion or an appeal would have on small SEVP-certified schools.

TABLE 32—PROPOSED SCHOOL FEES BY TYPE

Fee type	Proposed fee	Current fee	Difference (proposed − current)	Percent increase
I–17 Certification Fee	$3,000	$1,700	$1,300	76
I–17 Recertification Fee	1,250	0	1,250	N/A
Site Visit Fee—initial	655	655	0	0
Site Visit Fee—new location	655	0	655	N/A
Motion or Appeal Fee	675	0	675	N/A

I–17 Certification Fee

A school files a petition and pays a certification fee to become eligible to issue the Form I–20, ‘‘Certificate of Eligibility for Nonimmigrant Student Status,’’ to prospective international students after admitting them for a course of study. Certification also authorizes the school to enroll international students after they enter the country on an F or M student visa. Schools must initially go through the vetting process for authorization by DHS to enroll F and/or M nonimmigrant students and pay the I–17 certification fee, which is currently $1,700 and proposed to increase to $3,000. The incremental fee is the difference between the proposed fee ($3,000) and current fee ($1,700), or $1,300. From 2012 to 2016, DHS processed 2,117 I–17 petitions and payments. Out of the 2,117 schools, 1,151, or 54 percent, were identified as meeting the SBA definition of a small school, or estimated to be a small public school based on the sample conducted, as illustrated in Table 33.

TABLE 33—I–17 INITIAL CERTIFICATIONS FYS 2012–2016

Fiscal year	Total I–17 initial certifications	Small school I–17 initial certifications	Percent of small school I–17 initial certifications
2012	457	236	52
2013	382	218	57
2014	446	270	60
2015	469	260	55
2016	363	167	46
Total	2,117	1,151	54
2014–2016 3-year annual average	426	232	55

SEVP forecasted the total I–17 initial certifications in FY 2019 and FY 2020 to be 426 using the 3-year annual average of FY 2014 through 2016 initial certifications. Using that same methodology, 232 small schools applied for initial I–17 certification on average each year. DHS assumes the growth of small schools per industry seeking SEVP certification will remain constant in the future. DHS multiplied the annual average number of small schools applying for initial certification by the percent of small schools in each industry, as presented in Table 29. This calculation yields the number of small schools expected to petition for initial I–17 certification by industry. The results are presented in Table 34.

TABLE 34—EXPECTED ANNUAL NUMBER OF SMALL SCHOOLS TO INITIALLY CERTIFY BY SCHOOL INDUSTRY

School industry	Annual number of small schools applying for initial certification

Public Schools	37
Total Small Schools	232

This analysis examines the impact the $1,300 incremental fee has on small schools that might seek initial certification after the final rule is effective. DHS assumes that the range of revenue of the small schools that will apply for certification is similar to the range of revenue of current SEVP-certified small schools and uses this range to show the potential impacts. Table 35 shows the impact as a percentage for the schools with the lowest annual revenue, median annual revenue, and largest annual revenue, as well as the average annual revenue for all schools in that industry. From these results, DHS does not expect the I–17 certification incremental fee to have an impact greater than 1 percent on the average small school annual revenue. However, there is an expected impact greater than 1 percent for some small schools with the lowest annual revenue in their industry. On average the estimated 194 small schools that apply for initial I–17 certification annually and pay an incremental fee of $1,300 will experience an impact of less than 1 percent of their estimated annual revenue.

TABLE 35—INITIAL CERTIFICATION FEE IMPACT FOR SMALL SCHOOLS BY TYPE OF SCHOOL

Type of school	I–17 initial certification incremental fee impact on the school with the lowest revenue (percent)	I–17 initial certification incremental fee impact on the school with the median revenue (percent)	I–17 initial certification incremental fee impact on the school with the largest revenue (percent)	I–17 initial certification incremental fee impact on the average school revenue (percent)

I–17 Recertification Fee

SEVP-certified schools are required to file for recertification every 2 years to demonstrate that they have complied with all recordkeeping, retention, reporting, and other requirements when registering F and M students. There is currently no fee charged to schools for recertification, but this proposed rule establishes a new fee for that process.

To measure the impact on small schools, DHS first estimated the number of small schools that will recertify. DHS assumes 50 percent (4,373) of the total number of schools in this analysis (8,746) will recertify each year. DHS multiplies the recertification rate of 50 percent by the total number of small schools to generate the estimation that 3,921 [18] small schools will recertify annually. DHS examined all 7,842 small SEVP-certified schools to determine the impact of the recertification fee, as it is assumed that a significant number of the schools will pursue recertification within the next 2 years.

[18] 7,842 × 50 percent = 3,921 small schools recertifying each year.

DHS assumes that the total number of SEVP-certified schools will remain static as new schools become certified and other schools withdraw certification. DHS therefore assumes that the annual increase of total recertifications will be zero.

As previously discussed, DHS identified 1,296 SBA-defined small schools with no active F or M international students. DHS included these schools in this analysis and assumes they will opt to pay the recertification fee of $1,250 rather than reapplying for initial certification with a proposed fee of $3,000 at such time in the future that they enroll F or M students.

Table 36 illustrates the number of small schools that will recertify by industry and the I–17 recertification incremental fee impact as a percent of the small school's annual revenue. From these findings, of the 7,842 small schools expected to apply for recertification and pay the proposed fee of $1,250, 50 schools, or 0.6 percent, will experience an impact greater than 1 percent but less than 3 percent of the school's annual revenue. For the remaining schools, DHS does not expect the incremental fee to have an impact of greater than 1 percent.

TABLE 36—RECERTIFICATION FEE IMPACT FOR SMALL SCHOOLS BY TYPE OF SCHOOL

Total Small Schools	7,792	36	14	7,842

Site Visit Fee

Current regulations provide authority for SEVP to charge a site visit fee to schools that apply for initial certification or add a new physical location or campus. The site visit allows SEVP an opportunity to gather evidence on the school's eligibility, review school facilities, and interview personnel listed on the I–17 petition as a PDSO or DSO. SEVP currently collects the $655 fee when a school files a petition for certification to issue Forms I–20 or by a certified school when it physically moves to a new location. This proposed rule notifies the public that SEVP plans to collect the fee from any certified school that adds a new campus or physical location by updating its Form I–17 in SEVIS, consistent with 8 CFR 214.3(h)(3) and the agency's description when it established the fee in 2008 that such a fee could apply to such an initial event. 73 FR 55683, 55691.

SEVP performs 600 site visits annually. Of these site visits, 426 would be performed as part of the forecasted initial certifications, leaving the capacity for 174 site visits to be performed when a school adds a campus. In order to estimate the impact on a school's revenue of the proposed charging of the site visit fee for a new instructional campus, DHS assumes that any of the currently SEVP-certified schools could add a campus and require a site visit. Table 37 shows the proposed site visit fee impact on estimated annual revenue for all 7,842 small schools certified by SEVP and the type of school. Of the total 7,842 small schools, 7,827, or 99.8 percent, would have a site visit fee impact of less than or equal to 1 percent of their annual revenue. Twelve small schools, or 0.2 percent of small schools, would have an impact of greater than 1 percent but less than or equal to 2 percent of their annual revenue. Three small schools would have a site visit fee impact greater than 2 percent but less than 3 percent of their annual revenue.

TABLE 37—SITE VISIT FEE IMPACT ON ESTIMATED ANNUAL REVENUE

Fee To File an Appeal or Motion

When a school is denied certification or recertification, the school receives a denial letter through certified mail. The denial letter explains the reason for the denial and the steps to appeal. The school can appeal by completing the Form I–290B, ''Notice of Appeal or Motion,'' within 30 days of receipt. This rule proposes that SEVP impose a $675 filing fee for submission of the Form I–290B.[19] Currently no fee is imposed when a school submits the Form I–290B for a motion or appeal.

DHS processed 215 motions and appeals from schools from 2013 to 2016. Out of the 215 school motions and appeals, DHS determined that 74, or 34.4 percent, were filed by small schools. Among the 74 small schools, 4 had 2 appeals within the same year or over the 4-year period. During the 4-year period, there was an average of 19 appeals and motions filed by small schools annually.

DHS examined all 7,842 small schools to estimate the impact of the proposed appeal and motion fee on estimated annual revenue. The impact is calculated by dividing the fee to file a motion or appeal by the school's estimated annual revenue. Of the 7,842 SEVP-certified small schools, 7,826, or 99.8 percent, would experience an impact less than or equal to 1 percent of their estimated annual revenue were the school to file an appeal or motion. DHS estimates 13 small schools, or 0.2 percent, would realize an impact between 1 percent and 2 percent of their estimated annual revenue. In addition, three small schools, or 0.04 percent, would experience an impact greater than 2 percent but less than 3 percent of estimated annual revenue. Table 38 shows the number of small schools within the range of impact to each school's estimated annual revenue.

TABLE 38—APPEAL AND MOTION FEE IMPACT ON ESTIMATED ANNUAL REVENUE

Total Small Schools	7,826	13	3	7,842

The potential total impact on small entities in any year can be determined by examining scenarios in which a school may pay more than one of the proposed adjustments in fees in the same year. DHS examines the following scenarios and determines that the impact on any small school's revenue is less than three percent on any school industry type: (1) A school appeals an initial certification or (2) a school appeals a recertification and adds a new location requiring a site visit.

A school may pay the initial certification fee and then it may appeal the results of the initial certification within the same year. DHS proposes that this would be an increase of $1,975 ($1,300 incremental fee for I–17 initial certification plus $675 fee for an appeal). More than 98 percent of schools would be impacted less than one percent in this scenario, as shown in Table 39. The impacts of this scenario would be greater than the impacts of scenario where a school appeals a recertification, which would add to $1,925 in increased fees ($1,250 I–17 recertification fee plus $675 for an appeal).

TABLE 39—IMPACT OF INITIAL CERTIFICATION FEE INCREASE PLUS AN APPEAL FEE

A school may seek recertification in the same year it adds a new physical location or campus that requires a site visit and then it may appeal the findings of a recertification. A recertification fee would not include a site visit to a new location. DHS proposes that this would be an increase of $2,580 ($1,250 I–17 recertification fee plus $655 for a site visit at a new location plus $675 for an appeal). Under this scenario, the impact on small schools' revenue would be less than one percent for all but 139 small schools. The impact on these 139 schools' revenues would be less than three percent as shown in Table 40.

TABLE 40—IMPACT OF RECERTIFICATION FEE PLUS A SITE VISIT—NEW LOCATION FEE PLUS AN APPEAL FEE

5. An Identification, to the Extent Practicable, of All Relevant Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rule

DHS is unaware of any relevant Federal fee rule that may duplicate, overlap, or conflict with the proposed rule.

6. A Description of Any Significant Alternatives to the Proposed Rule Which Accomplish the Stated Objectives of Applicable Statutes and Minimize Any Significant Economic Impact of the Proposed Rule on Small Entities

SEVP examined several alternatives to the proposed fee structure, including no increase to any fee, only increasing the I–901 SEVIS fee and I–17 fee, and not subsidizing the school fees with the I–901 F and M fees.

Without an increase in fees, SEVP will be unable to maintain the level of service for students and schools that it currently provides as well as the compliance and national security activities discussed above. SEVP considered the alternative of maintaining fees at the current level but with reduced services and increased processing times, but has decided that this would not be in the best interest of applicants and schools. SEVP seeks to minimize the impact on all parties, but in particular small entities. SEVP must pay for the expenses of maintaining and improving SEVIS and adjudicating schools in a timely manner. If SEVP followed this alternative scenario, there would be a shortfall of revenue to cover the expenses of over $65.4 million in FY 2019. SEVP rejected this alternative, as SEVP must pay for the expenses of maintaining and improving SEVIS and certifying and recertifying schools in a timely manner.

SEVP also considered only raising the I–901 and I–17 certification fees instead of including new proposed fees for recertification and for filing a motion or appeal. If SEVP followed this scenario, the I–901 F and M fee would increase to $350 to cover the shortfall in revenue, but the I–17 Initial Certification fee would also increase to $4,200. This would triple the existing certification fee while continuing to allow schools with no foreign students to remain active SEVP schools that require SEVP effort for recertification. SEVP rejected this fee structure as it would continue to add workload to SEVP's recertification branch. Without a disincentive to not recertify, the list of schools recertifying would never stop growing. SEVP rejected this alternative because the proposed fees would establish a more equitable distribution of costs and a more sustainable level of cost recovery relative to the services provided as compared to this alternative.

SEVP also considered the results of the ABC model as an alternative, which allocated the I–901 F and M fee, school certification fees, and the fee to file an appeal or motion as shown in Table 41.

TABLE 41—UNSUBSIDIZED FEE AMOUNTS

Fee type	Unsubsidized fee amounts
I–901 F and M	$290
I–901 J-Full	130
I–901 J-Partial	130
I–17 Initial Certification	4,600
I–17 Recertification	6,000
Appeal or Motion	38,475
Site Visit	650

SEVP rejected this alternative for several reasons. Setting the fee at $38,475 may discourage schools from filing a motion or appeal.

Similarly, SEVP rejected the alternative of setting the recertification fee at $6,000. A recertification fee higher than the initial certification fee would discourage schools from seeking recertification.

SEVP instead proposes to set the recertification fee at a level is less than the initial certification fee. When schools can maintain their certification, F and M nonimmigrant students enrolled in the withdrawn school avoid complications such as being forced to transfer schools, leave the United States, or risk facing immigration law penalties for violating the terms of their nonimmigrant status.

SEVP also rejected the initial certification fee of $4,600 because it finds that an increase of almost three times the current fee of $1,700 is excessive. In the fee development, DHS balanced the challenge of minimizing the costs to schools and students while recovering funding to support SEVP services. The population of I–901 F and M students relative to the population of I–17 schools allows for a minimal fee adjustment to be spread over the student population to reduce the cost burden on individual institutions seeking recertification. DHS requests comment on the impacts on small entities of the unsubsidized fee amounts, impacts on small entities of the proposed fee amounts, and other ways in which DHS could modify the proposed rule to reduce burdens for small entities or better ensure that the burdens on small entities, individuals, and others subject to the rule are appropriately distributed.

C. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, 109 Stat. 48 (codified at 2 U.S.C. 1501 *et seq.*), requires federal agencies to assess the effects of their discretionary regulatory actions. In particular, UMRA addresses actions that may result in the expenditure by a State, local, or tribal government in the aggregate or by the private sector of $100 million (adjusted for inflation) or more in any 1 year. 2 U.S.C. 1532(a). Though this rule would not result in such an expenditure, DHS does discuss the effects of this rule elsewhere in this preamble. In addition, DHS maintains that this rulemaking is not a ''Federal mandate,'' as defined for UMRA purposes, 2 U.S.C. 658(6), as the payment of an SEVP certification fee by individuals, local governments, or other private sector entities is (to the extent it could be termed an enforceable duty) one that arises from participation in a voluntary Federal program (*i.e.,* applying for status as F–1, F–3, M–1, or M–3 students or as a J–1 exchange visitor in the United States or seeking approval from the United States for attendance by certain aliens seeking status as F–1, F–3, or M–1 students). 2 U.S.C. 658(7)(A)(ii). For these reasons, no additional actions were deemed necessary under the provisions of the UMRA.

D. Congressional Review Act

This rulemaking is not a major rule, as defined by 5 U.S.C. 804, for purposes of congressional review of agency rulemaking pursuant to the Congressional Review Act, Public Law 104–121, sec. 251, 110 Stat. 868, 873 (codified at 5 U.S.C. 804). This rulemaking would not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based companies to compete with foreign-based companies in domestic and export markets. If implemented as proposed, DHS will submit to Congress and the Comptroller General of the United States a report about the issuance of the final rule prior to its effective date, as required by 5 U.S.C. 801(a)(1).

E. Small Business Regulatory Enforcement Fairness Act of 1996

Pursuant to Section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, 110 Stat. 847, 858–59, DHS wants to assist small entities in understanding this proposed rule so that they can better evaluate its effects and participate in the rulemaking. If the proposed rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult ICE using the contact information provided in the **FOR FURTHER INFORMATION CONTACT** section.

F. Executive Order 13132: Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. DHS has analyzed this proposed rule under that Order and has determined that it does not have implications for federalism.

G. Executive Order 12988: Civil Justice Reform

This proposed rule meets the applicable standards set forth in 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

H. Energy Effects

DHS has analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. DHS has determined that it is not a ''significant energy action'' under that order because it is a ''significant regulatory action'' under Executive Order 12866 but is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

I. Environment

The U.S. Department of Homeland Security Management Directive (MD) 023–01 Rev. 01 establishes procedures that DHS and its Components use to comply with the National Environmental Policy Act of 1969 (NEPA), Public Law 91–190, 83 Stat. 852 (codified at 42 U.S.C. 4321–4375), and the Council on Environmental Quality (CEQ) regulations for implementing NEPA, 40 CFR parts 1500 through 1508. CEQ regulations allow federal agencies to establish categories of actions that do not individually or cumulatively have a significant effect on the human environment and, therefore, do not require an Environmental Assessment or Environmental Impact Statement. 40 CFR 1508.4. The MD 023–01 Rev. 01 lists the Categorical Exclusions that DHS has found to have no such effect. MD 023–01 Rev. 01, Appendix A, Table 1.

For an action to be categorically excluded, MD 023–01 Rev. 01 requires the action to satisfy each of the following three conditions:

(1) The entire action clearly fits within one or more of the Categorical Exclusions.

(2) The action is not a piece of a larger action.

(3) No extraordinary circumstances exist that create the potential for a significant environmental effect. MD 023–01 Rev. 01 section V.B(1)–(3).

Where it may be unclear whether the action meets these conditions, MD 023–01 Rev. 01 requires the administrative record to reflect consideration of these conditions. MD 023–01 Rev. 01 section V.B.

DHS has analyzed this proposed rule under MD 023–01 Rev. 01. DHS has made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule clearly fits within the Categorical Exclusion found in MD 023–01 Rev. 01, Appendix A, Table 1, number A3(a): ‘‘Promulgation of rules . . . of a strictly administrative or procedural nature’’; and A3(d): ‘‘Promulgation of rules . . . that interpret or amend an existing regulation without changing its environmental effect.’’ This proposed rule is not part of a larger action. This proposed rule presents no extraordinary circumstances creating the potential for significant environmental effects. Therefore, this proposed rule is categorically excluded from further NEPA review.

J. Paperwork Reduction Act

All Departments are required to submit to OMB for review and approval any reporting or recordkeeping requirements inherent in a rule under the Paperwork Reduction Act of 1995, Public Law 104–13, 109 Stat. 163 (codified at 44 U.S.C. 3501 *et seq.*). Schools use SEVIS to petition for recertification. The recertification process requires schools to input data in SEVIS, print the Form I–17, and sign the form. The electronic data captured for the Form I–17 have been previously approved for use by OMB as one component of the data that are captured in SEVIS. The OMB Control Number for this collection is 1653–0038 (previously 1615–0066 before being transferred from USCIS to ICE). With the regulatory implementation of SEVIS (67 FR 60107, Sept. 25, 2002), most schools enrolled in SEVIS were petitioning for DHS recertification, rather than initial certification (*i.e.,* enrolling F or M nonimmigrant students for the first time). The workload for both certification and recertification was included under OMB 1615–0066.

The changes to the certification and recertification fees, as well as the I–901 fees, would require changes to SEVIS and the I–901 software to reflect the updated fee amounts, as these systems generate the pertinent petition and application forms. DHS would submit a revision to OMB with respect to any changes to existing information collection approvals.

DHS's institution of the fee for a motion or appeal with regard to a denial of school certification or recertification, or a withdrawal of such certification, would not require a form amendment to reflect the charging of the fee. The instructions associated with the Form I–290B, which schools can currently use for such motions and appeals, contain information regarding the use associated with Form I–17 decisions and the $675 fee.

List of Subjects

8 CFR Part 103

Administrative practice and procedure, Authority delegations (Government agencies), Freedom of Information, Immigration, Privacy, Reporting and recordkeeping requirements, Surety bonds.

8 CFR Part 214

Administrative practice and procedure, Aliens, Employment, Foreign officials, Health professions, Reporting and recordkeeping requirements, Students.

The Proposed Amendments

For the reasons set forth in the preamble, the Department of Homeland Security proposes to amend 8 CFR parts 103 and 214 of Chapter I of Title 8 of the Code of Federal Regulations as follows:

PART 103—IMMIGRATION BENEFITS; BIOMETRIC REQUIREMENTS; AVAILABILITY OF RECORDS

■ 1. The authority citation for part 103 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a; 8 U.S.C. 1101, 1103, 1304, 1356, 1365b; 31 U.S.C. 9701; Pub. L. 107–296, 116 Stat. 2135 (6 U.S.C. 1 *et seq.*); E.O. 12356, 47 FR 14874, 15557, 3 CFR, 1982 Comp., p. 166; 8 CFR part 2; Pub. L. 112–54.

■ 2. Amend § 103.7 by revising paragraphs (b)(1)(ii)(B) and (H) and adding paragraph (b)(1)(ii)(O) to read as follows:

§ 103.7 Fees.

* * * * *

(b) * * *

(1) * * *

(ii) * * *

(B) Petition for Approval of School for Attendance by Nonimmigrant Student (*Form I–17*). For filing a petition for school certification: $3,000, plus:

(*1*) A site visit fee of $655 for each location required to be listed on the form,, and

(*2*) For filing a petition for school recertification: $1,250.

* * * * *

(H) Fee Remittance for Certain F, J, and M Nonimmigrants (*Form I–901*). The fee for Form I–901 is:

(1) For F and M students: $350.

(2) For J–1 au pairs, camp counselors, and participants in a summer work or travel program: $35.

(3) For all other J exchange visitors (except those participating in a program sponsored by the Federal Government): $220.

(4) There is no Form I–901 fee for J exchange visitors in federally funded programs with a program identifier designation prefix that begins with G–1, G–2, G–3, or G–7.

* * * * *

(O) *Notice of Appeal or Motion (Form I–290B) filed with ICE SEVP.* For a Form I–290B ‘‘Notice of Appeal or Motion,’’ filed with the Student and Exchange Visitor Program (SEVP): $675.

* * * * *

PART 214—NONIMMIGRANT CLASSES

■ 3. The authority citation for part 214 is revised to read as follows:

Authority: 6 U.S.C. 202, 236; 8 U.S.C. 1101, 1102, 1103, 1182, 1184, 1186a, 1187, 1221, 1281, 1282, 1301–1305, and 1372; section 643, Pub. L. 104–208, 110 Stat. 3009–708; Pub. L. 106–386, 114 Stat. 1477–1480; section 141 of the Compacts of Free Association with the Federated States of Micronesia and the Republic of the Marshall Islands, and with the Government of Palau, 48 U.S.C. 1901 note, and 1931 note, respectively, 48 U.S.C. 1806; 8 CFR part 2.

■ 4. Amend § 214.3 by revising paragraph (h)(2) to read as follows:

§ 214.3 Approval of schools for enrollment of F and M nonimmigrants.

* * * * *

(h) * * *

(1) * * *

(2) *Recertification.* Schools are required to file a completed petition for SEVP recertification before the school's certification expiration date, which is 2 years from the date of their previous SEVP certification or recertification expiration date. The school must submit the proper nonrefundable recertification petition fee as provided in 8 CFR 103.7(b)(1)(ii)(B). SEVP will review a petitioning school's compliance with the recordkeeping, retention, and reporting, and other requirements of paragraphs (f), (g), (j), (k), and (l) of this section, as well as continued eligibility for certification, pursuant to paragraph (a)(3) of this section.

■ 5. Amend § 214.4 by revising the heading and paragraphs (a)(1) and (h) to read as follows:

§ 214.4 Denial of certification, denial of recertification, or withdrawal of SEVP certification.

(a) *General*—(1*) Denial of certification.* The petitioning school will be notified of the reasons and its appeal rights if a petition for certification is denied, in accordance with the provisions of 8 CFR 103.3(a)(1)(iii). A petitioning school denied certification may file a new petition for certification at any time.

* * * * *

(h) *Appeals.* A school may file an appeal of a denial or withdrawal no later than 15 days after the service of the decision by ICE. The appeal must state the reasons and grounds for contesting the denial or withdrawal of the approval. The appeal must be accompanied by the fee as provided in 8 CFR 103.7(b)(1)(ii)(O).

* * * * *

■ 6. Amend § 214.13 by revising paragraph (a) to read as follows:

§ 214.13 SEVIS fee for certain F, J, and M nonimmigrants.

(a) *Applicability.* The following aliens are required to submit a payment in the amount indicated for their status to the Student and Exchange Visitor Program (SEVP) in advance of obtaining nonimmigrant status as an F or M student or J exchange visitor, in addition to any other applicable fees, except as otherwise provided for in this section:

(1) An alien who applies for F–1 or F–3 status in order to enroll in a program of study at an SEVP-certified institution of higher education, as defined in section 101(a) of the Higher Education Act of 1965, as amended, or in a program of study at any other SEVP-certified academic or language training institution, including private elementary and secondary schools and public secondary schools, the amount of $350;

(2) An alien who applies for J–1 status in order to commence participation in an exchange visitor program designated by the Department of State (DoS), the amount of $210, with a reduced fee for certain exchange visitor categories as provided in paragraphs (b)(1) and (c) of this section; and

(3) An alien who applies for M–1 or M–3 status in order to enroll in a program of study at an SEVP-certified vocational educational institution, including a flight school, in the amount of $350.

* * * * *

Claire M. Grady,

Deputy Secretary (Acting).
