FEDERAL REGISTER

Vol. 83 Tuesday,

No. 147 July 31, 2018

Book 1 of 2 Books

Pages 36723–37044

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

How To Cite This Publication: Use the volume number and the page number. Example: 83 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 25

[Docket No. FAA–2018–0201; Special Conditions No. 25–717A–SC]

Special Conditions: Bombardier Inc., Model BD–700–2A12 and BD–700–2A13 Series Airplanes, Flight Envelope Protection: Pitch and Roll Limiting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Amended final special conditions; request for comments.

SUMMARY: These amended special conditions are issued for the Bombardier Inc. (Bombardier), Model BD–700–2A12 and BD–700–2A13 series airplanes. These amended special conditions change paragraphs 2 and 3 of the special conditions section based on information from Bombardier that makes changes to the novel or unusual design feature of this airplane. This airplane will have a novel or unusual design feature when compared to the state of technology envisioned in the applicable airworthiness standards for transport category airplanes. This design feature is the fly-by-wire electronic flight-control system (EFCS) that will limit pitch and roll functions to prevent the airplane from attaining certain pitch attitudes and roll angles. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: This action is effective on Bombardier Inc. on July 31, 2018. Send comments on or before September 14, 2018.

ADDRESSES: Send comments identified by docket number FAA–2018–0201 using any of the following methods:

☐ *Federal eRegulations Portal:* Go to *http://www.regulations.gov/* and follow the online instructions for sending your comments electronically.

☐ *Mail:* Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.

☐ *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

☐ *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: The FAA will post all comments it receives, without change, to *http://www.regulations.gov/,* including any personal information the commenter provides. Using the search function of the docket website, anyone can find and read the electronic form of all comments received into any FAA docket, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). DOT's complete Privacy Act Statement can be found in the **Federal Register** published on April 11, 2000 (65 FR 19477–19478).

Docket: Background documents or comments received may be read at *http://www.regulations.gov/* at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Joe Jacobsen, FAA, Airplane and Flight Crew Interface Section, AIR–671, Transport Standards Branch, Policy and Innovation Division, Aircraft Certification Service, 2200 South 216th Street, Des Moines, Washington 98198; telephone 206–231–3158; email *Joe.Jacobsen@faa.gov.*

SUPPLEMENTARY INFORMATION: The FAA has determined that notice of, and opportunity for prior public comment on, these amended special conditions is impracticable because these procedures would significantly delay issuance of the design approval and thus delivery of the affected airplane. Additionally, the substance of these special conditions has been published in the **Federal Register** for public comment in several prior instances with no substantive comments received. Therefore, the FAA has determined that prior public notice and comment are impracticable and unnecessary, and finds that, for the same reasons, good cause exists for adopting these special conditions upon publication in the **Federal Register**.

Comments Invited

We invite interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the special conditions, explain the reason for any recommended change, and include supporting data.

We will consider all comments we receive by the closing date for comments. We may change these special conditions based on the comments we receive.

Background

On May 30, 2012, Bombardier applied for an amendment to Type Certificate No. T00003NY to include the new Models BD–700–2A12 and BD–700–2A13 series airplanes. The BD–700–2A12 and BD–700–2A13 series airplanes, are derivatives of the BD–700 currently approved under Type Certificate No. T00003NY, and are business jets with a maximum certified passenger capacity of 19. The maximum takeoff weight of Model BD–700–2A12 airplane is 106,250 lbs. and 104,800 lbs. for the Model BD–700–2A13 airplane.

Type Certification Basis

Under the provisions of title 14, Code of Federal Regulations (14 CFR) 21.101, Bombardier must show that the Model BD–700–2A12 and BD–700–2A13 series airplanes meet the applicable provisions of the regulations listed in Type Certificate No. T00003NY or the applicable regulations in effect on the date of application for the change except for earlier amendments as agreed upon by the FAA.

If the Administrator finds that the applicable airworthiness regulations (*i.e.,* 14 CFR part 25) do not contain adequate or appropriate safety standards for the Model BD–700–2A12 and BD–700–2A13 series airplanes because of a novel or unusual design feature, special conditions are prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other model that incorporates the same novel or unusual design feature, or should any other model already included on the same type certificate be modified to incorporate the same novel or unusual design feature, these special conditions would also apply to the other model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the Bombardier Model BD–700–2A12 and BD–700–2A13 series airplanes must comply with the fuel-vent and exhaust-emission requirements of 14 CFR part 34, and the noise-certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.101.

Novel or Unusual Design Features

The Model BD–700–2A12 and BD–700–2A13 series airplanes will incorporate the following novel or unusual design features:

Fly-by-wire EFCS that will limit pitch and roll functions to prevent the airplane from attaining certain pitch attitudes and roll angles greater than plus or minus 65 degrees, and introduce positive spiral stability introduced for roll angles greater than 30 degrees at speeds below V_{MO}/M_{MO}. This system generates the actual surface commands that provide for stability augmentation and flight control for all three airplane axes (longitudinal, lateral, and directional).

Discussion

Part 25 of title 14 of the CFR does not specifically relate to flight characteristics associated with fixed attitude limits. Bombardier proposes to implement on the airplanes pitch and roll attitude-limiting functions via the EFCS normal mode. This will prevent the airplane from attaining certain pitch attitudes and roll angles greater than plus or minus 65 degrees. In addition, positive spiral stability, introduced for roll angles greater than 30 degrees at speeds below V_{MO}/M_{MO}, and spiral stability characteristics, must not require excessive pilot strength to achieve bank angles up to the bank-angle limit.

Bombardier requested this amendment, in order to be performance-based rather than prescriptive and to more closely follow the language developed in the Aviation Rulemaking Advisory Committee (ARAC) Flight Test Harmonization Working Group (FTHWG). The FAA concurs with this request.

The basic envelope protection requirement, historically applied, is to not unduly limit the maneuver capability of the airplane, or interfere with its ability to perform maneuvers required for normal and emergency operations. Since the design details used to meet this requirement vary from airplane to airplane, this amendment recognizes and adopts that philosophy for this specific design implementation. The substance of the special conditions is unchanged, in that, for this specific design, the design details support the objective of not unduly limiting the maneuver capability, while also protecting the airplane from adverse attitudes.

These special conditions are in addition to the requirements of § 25.143. These special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

Applicability

As discussed above, these special conditions are applicable to the Model BD–700–2A12 and BD–700–2A13 series airplanes. Should Bombardier apply at a later date for a change to the type certificate to include another model incorporating the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only certain novel or unusual design features on one model series of airplanes. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 25

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702, 44704.

The Special Conditions

■ Accordingly, pursuant to the authority delegated to me by the Administrator, the following special conditions are issued as part of the type certification basis for Bombardier Model BD–700–2A12 and BD–700–2A13 series airplanes:

In addition to § 25.143, the following requirements apply to the electronic flight-control system (EFCS) pitch- and roll-limiting functions:

1. The pitch-limiting function must not impede normal maneuvering for pitch angles up to the maximum required for normal maneuvering, including a normal, all-engines-operating takeoff, plus a suitable margin to allow for satisfactory speed control.

2. The pitch- and roll-limiting functions must not restrict or prevent attaining pitch attitudes necessary for emergency maneuvering, or roll angles up to 65 degrees. Spiral stability, which is introduced above 30 degrees of roll angle, must not require excessive pilot strength to achieve these roll angles. Other protections, which further limit the roll capability under certain extreme angle-of-attack, attitude, or high-speed conditions, are acceptable, as long as the airplane is able to perform coordinated turns as per § 25.143(h). A roll attitude limit of approximately 45 degrees at high angle-of-attack conditions is acceptable.

3. A reduced roll attitude limit is acceptable at extreme nose down pitch attitudes and beyond the overspeed warning to provide protection against high-speed combined pitch and roll upsets. The airplane should be able to perform operational turns at these speeds. A roll attitude limit of approximately 30 degrees at V_{df}/M_{df} is considered acceptable.

Issued in Des Moines, Washington.

Victor Wicklund,

Manager, Transport Standards Branch, Policy and Innovation Division, Aircraft Certification Service.

Airworthiness Directives; General Electric Company Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain General Electric Company (GE) GEnx–1B54, –1B58, –1B64, –1B67, –1B70, –1B54/P1, –1B58/P1, –1B64/P1, –1B67/

P1, –1B70/P1, –1B54/P2, –1B58/P2, –1B64/P2, –1B67/P2, –1B70/P2, –1B70C/P1, –1B70/72/P1, –1B70/75/P1, –1B74/75/P1, –1B75/P1, –1B70C/P2, –1B70/72/P2, –1B70/75/P2, –1B74/75/P2, –1B75/P2, –1B76/P2, –1B76A/P2, –1B78/P2, –2B67, –2B67B, and –2B67/P turbofan engines. This AD requires removal of affected high-pressure turbine (HPT) stator cases (HPT cases) from service and their replacement with a part eligible for installation. This AD was prompted by the discovery of a quality escape at a manufacturing facility. We are issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective August 15, 2018.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of August 15, 2018.

We must receive comments on this AD by September 14, 2018.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this final rule, contact General Electric Company, GE Aviation, Room 285, 1 Neumann Way, Cincinnati, OH 45215; phone: 513–552–3272; email: *aviation.fleetsupport@ge.com.* You may view this service information at the FAA, Engine and Propeller Standards Branch, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7759. It is also available on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0630.

Examining the AD Docket

You may examine the AD docket on the internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2018–0630; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations (phone: 800–647–5527) is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Herman Mak, Aerospace Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7147; fax: 781–238–7199; email: *herman.mak@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We learned from GE of a quality escape at one of their suppliers. This supplier was performing welds on newly-manufactured components to correct errors introduced in their manufacturing process. These welds were not reviewed or approved by either GE or the FAA. GE's review of manufacturing records determined that these parts include HPT cases installed on GEnx engines. These HPT cases are life limited. The unapproved repairs reduced the material capability of these cases which requires their removal prior to reaching their published Airworthiness Limitation Section life limit. This condition, if not addressed, could result in failure of the HPT case, engine fire, and damage to the airplane. We are issuing this AD to address the unsafe condition on these products.

Related Service Information Under 1 CFR Part 51

We reviewed GE Service Bulletin (SB) GEnx–1B S/B 72–0424, Revision 03, dated June 29, 2018 and GEnx–2B S/B 72–0360, Revision 03, dated June 29, 2018. The SBs describe procedures for removing the affected HPT cases from the engine. GE SB GEnx–1B S/B 72–0424 is effective for GEnx–1B engines with the serial numbers of HPT cases listed in that SB. GE SB GEnx–2B S/B 72–0360 is effective for GEnx-2B engines with the serial numbers of HPT cases listed in that SB. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Other Related Service Information

We reviewed Inspection 001, Subtask 72–52–01–230–001 of GEnx–1B Cleaning, Inspection, and Repair Manual GEK112862, Rev 27, dated April 30, 2018, and GEnx–2B Cleaning, Inspection, and Repair Manual GEK114120, Rev 20, dated April 30, 2018. These manuals provide guidance for conducting Class A fluorescent penetrant inspections.

FAA's Determination

We are issuing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

AD Requirements

This AD requires removal of the affected HPT cases from service and their replacement with a part eligible for installation.

FAA's Justification and Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because the compliance time for the required action is shorter than the time necessary for the public to comment and for us to publish the final rule. Therefore, we find good cause that notice and opportunity for prior public comment are impracticable. In addition, for the reason stated above, we find that good cause exists for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and was not preceded by notice and an opportunity for public comment. However, we invite you to send any written data, views, or arguments about this final rule. Send your comments to an address listed under the **ADDRESSES** section. Include the docket number FAA–2018–0630 and Product Identifier 2018–NE–25–AD at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this final rule. We will consider all comments received by the closing date and may amend this final rule because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this final rule.

Costs of Compliance

We estimate that this AD affects 13 engines installed on airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Replacement of HPT case	0 work-hours × $85 per hour = $0	$362,400	$362,400	$4,711,200

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

This AD is issued in accordance with authority delegated by the Executive Director, Aircraft Certification Service, as authorized by FAA Order 8000.51C. In accordance with that order, issuance of ADs is normally a function of the Compliance and Airworthiness Division, but during this transition period, the Executive Director has delegated the authority to issue ADs applicable to engines, propellers, and associated appliances to the Manager, Engine and Propeller Standards Branch, Policy and Innovation Division.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2018–16–07 General Electric Company: Amendment 39–19347; Docket No. FAA–2018–0630; Product Identifier 2018–NE–25–AD.

(a) Effective Date

This AD is effective August 15, 2018.

(b) Affected ADs

None.

(c) Applicability

This AD applies to General Electric Company (GE) GEnx–1B54, –1B58, –1B64, –1B67, –1B70, –1B54/P1, –1B58/P1, –1B64/P1, –1B67/P1, –1B70/P1, –1B54/P2, –1B58/P2, –1B64/P2, –1B67/P2, –1B70/P2, –1B70C/P1, –1B70/72/P1, –1B70/75/P1, –1B74/75/P1, –1B75/P1, –1B70C/P2, –1B70/72/P2, –1B70/75/P2, –1B74/75/P2, –1B75/P2, –1B76/P2, –1B76A/P2, –1B78/P2, –2B67, –2B67B, and –2B67/P turbofan engines with a high-pressure turbine (HPT) stator case (HPT case), part number (P/N) 2302M90G04 installed, and with any serial number (S/N) listed in Table 1, 2, or 3, in the Planning Information section of GE Service Bulletin (SB) GEnx–2B S/B 72–0360, Revision 03, dated June 29, 2018, or GEnx–1B S/B 72–0424, Revision 03, dated June 29, 2018, installed.

(d) Subject

Joint Aircraft System Component (JASC) Code 7250, Turbine Section.

(e) Unsafe Condition

This AD was prompted by the discovery of a quality escape at a manufacturing facility involving unapproved welds on HPT cases. We are issuing this AD to prevent failure of the HPT case. The unsafe condition, if not addressed, could result in engine fire and damage to the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Required Actions

(1) For HPT cases listed in Planning Information, Table 1 or 2, of GE SBs GEnx–2B S/B 72–0360, Revision 03, dated June 29, 2018 and GEnx–1B S/B 72–0424, Revision 03, dated June 29, 2018, determine the lesser of the following: Cycles since new (CSN) or cycles since Class A fluorescent penetrant inspection (CSFPI) of the entire HPT case.

(2) Using the determination made in paragraph (g)(1) of this AD, remove from service the HPT case after the effective date of this AD as specified in Table 1 to paragraph (g) of this AD. Replace the removed HPT case with a part eligible for installation.

Table 1 to Paragraph (g) of this AD – Compliance Times

CSN or CSFPI of HPT case	Remove from Service (cycles after the effective date of this AD)
Less than 1000	150 cycles
1000 to 2000	125 cycles
2001 to 3000	100 cycles
3001 to 4000	75 cycles
4001 to 5000	50 cycles
5001 or more	25 cycles

(3) Remove from service HPT cases listed in Planning Information, Table 3, of GE SBs GEnx–2B S/B 72–0360, Revision 03, dated June 29, 2018 or GEnx–1B S/B 72–0424, Revision 03, dated June 29, 2018, prior to exceeding 10 cycles after the effective date of this AD or exceeding the CSN limits listed in Table 3, whichever comes later. Replace the removed HPT case with a part eligible for installation.

(h) Installation Prohibition

(1) After the effective date of this AD, do not install any affected HPT case onto any engine.

(2) After the effective date of this AD, HPT cases listed in Planning Information, Table 3, in GE SB GEnx–2B S/B 72–0360, Revision 03, dated June 29, 2018 or GEnx–1B S/B 72–0424, Revision 03, dated June 29, 2018, and any higher level assemblies with these parts installed, may not be removed from a GEnx–2B engine and installed on a GEnx–1B engine or removed from a GEnx–1B engine and installed on a GEnx–2B engine.

(i) Alternative Methods of Compliance (AMOCs)

(1) The Manager, ECO Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the certification office, send it to the attention of the person identified in paragraph (j) of this AD. You may email your request to: *ANE-AD-AMOC@faa.gov.*

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(j) Related Information

For more information about this AD, contact Herman Mak, Aerospace Engineer, ECO Branch, FAA, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7147; fax: 781–238–7199; email: *herman.mak@faa.gov.*

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

[Docket No. RM18–2–000; Order No. 848]

Cyber Security Incident Reporting Reliability Standards

AGENCY: Federal Energy Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) directs the North American Electric Reliability Corporation (NERC) to develop and submit modifications to the NERC Reliability Standards to augment the mandatory reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the bulk electric system (BES).

DATES: This rule will become effective October 1, 2018.

SUPPLEMENTARY INFORMATION:

Order No. 848—Final Rule (Issued July 19, 2018)

1. Pursuant to section 215(d)(5) of the Federal Power Act (FPA), the Commission directs the North American Electric Reliability Corporation (NERC) to develop and submit modifications to

the NERC Reliability Standards to augment the mandatory reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the BES.[1] The Commission directs NERC to develop and submit modifications to the Reliability Standards to require the reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's Electronic Security Perimeter (ESP) or associated Electronic Access Control or Monitoring Systems (EACMS).[2]

2. In the NOPR, the Commission observed that Cyber Security Incidents are presently reported by responsible entities in accordance with Reliability Standard CIP–008–5 (Cyber Security—Incident Reporting and Response Planning).[3] However, under the definition of Reportable Cyber Security Incident in Reliability Standard CIP–008–5, responsible entities must only report Cyber Security Incidents if they have ''compromised or disrupted one or more reliability tasks.'' The Commission explained that the current reporting threshold may understate the true scope of cyber-related threats facing the Bulk-Power System, particularly given the lack of any reportable incidents in 2015 and 2016. To improve awareness of existing and future cyber security threats and potential vulnerabilities, the Commission proposed to direct that NERC develop and submit modifications to the existing Reliability Standards to augment the reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the BES.

3. As discussed in detail below, the Commission adopts the NOPR proposal. The Commission's directive in this Final Rule consists of four elements intended to augment the current Cyber Security Incident reporting requirement: (1) Responsible entities must report Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS; (2) required information in Cyber Security Incident reports should include certain minimum information to improve the quality of reporting and allow for ease of comparison by ensuring that each report includes specified fields of information; (3) filing deadlines for Cyber Security Incident reports should be established once a compromise or disruption to reliable BES operation, or an attempted compromise or disruption, is identified by a responsible entity; and (4) Cyber Security Incident reports should continue to be sent to the Electricity Information Sharing and Analysis Center (E–ISAC), rather than the Commission, but the reports should also be sent to the Department of Homeland Security (DHS) Industrial Control Systems Cyber Emergency Response Team (ICS–CERT). Further, NERC must file an annual, public, and anonymized summary of the reports with the Commission.

4. As discussed below, after considering the comments submitted in response to the NOPR, we conclude that the proposed directive to augment the current reporting requirement for Cyber Security Incidents is appropriate to carry out FPA section 215. As NERC recognizes in its NOPR comments, ''[b]roadening the mandatory reporting of Cyber Security Incidents would help enhance awareness of cyber security risks facing entities[,] . . . would create a more extensive baseline understanding of the nature of cyber security threats and vulnerabilities[,] . . . [and] is consistent with recommendations in NERC's 2017 State of Reliability Report.'' [4] Our directive is intended to result in a measured broadening of the existing reporting requirement in Reliability Standard CIP–008–5, consistent with NERC's recommendation, rather than a wholesale change in cyber incident reporting that supplants or otherwise chills voluntary reporting, as some commenters maintain. Indeed, as NERC contends, we believe that the new ''baseline understanding, coupled with the additional context from voluntary reports received by the E–ISAC, [will] allow NERC and the E–ISAC to share that information broadly through the electric industry to better prepare entities to protect their critical infrastructure.'' [5]

5. We address in the discussion below concerns raised by commenters regarding elements of the Commission's directive and the burdens the directive might impose if NERC develops requirements that are overly broad. At the outset, we agree with NERC that ''because certain requirements in the CIP Reliability Standards already require entities to track data on compromises or attempts to compromise the ESP or EACMS, the additional burden to report that data appears reasonable.'' [6] And we do not believe that complying with the augmented reporting requirements that we direct here would be any more burdensome to industry than the alternative, responding to a perpetual data or information request to collect the same information pursuant to Section 1600 of the NERC Rules of Procedure. To ensure that the burden is reasonable with respect to including EACMS in the augmented reporting requirement, NERC should develop requirements based on the function of the EACMS and the nature of the attempted compromise or successful intrusion. Similarly, as discussed below, NERC should develop reporting timelines for Cyber Security Incidents that are commensurate with the adverse or attempted adverse impact to the BES that loss, compromise, or misuse of those BES Cyber Systems could have on the reliable operation of the BES.[7] Prioritizing incident reporting will allow responsible entities to devote resources to reporting the most significant Cyber Security Incidents faster than less significant events. With this guidance, we believe that the standard drafting team, in the first instance, is in the best position to develop the specific elements of the directed Reliability Standard requirements.

6. We have considered comments submitted by NERC and others recommending that broadened Cyber Security Incident reporting should be implemented through a request for information or data pursuant to Section 1600 of the NERC Rules of Procedure instead of through Reliability Standard requirements. However, on balance, we

[1] 16 U.S.C. 824o(d)(5). The NERC Glossary of Terms Used in NERC Reliability Standards (June 12, 2018) (NERC Glossary) defines a Cyber Security Incident as ''A malicious act or suspicious event that: Compromises, or was an attempt to compromise, the Electronic Security Perimeter or Physical Security Perimeter or, Disrupts, or was an attempt to disrupt, the operation of a BES Cyber System.''

[2] The NERC Glossary defines ''ESP'' as ''[t]he logical border surrounding a network to which BES Cyber Systems are connected using a routable protocol.'' The NERC Glossary defines ''EACMS'' as ''Cyber Assets that perform electronic access control or electronic access monitoring of the Electronic Security Perimeter(s) or BES Cyber Systems. This includes Intermediate Systems.''

[3] *Cyber Security Incident Reporting Reliability Standards,* Notice of Proposed Rulemaking, 82 FR 61499 (Dec. 28, 2017), 161 FERC ¶ 61,291, P 1 (2017) (NOPR).

[4] NERC Comments at 4.

[5] *Id.*

[6] *Id.* at 8 (citing Reliability Standard CIP–005–5 (Cyber Security—Electronic Security Perimeter(s)) and Reliability Standard CIP–007–6 (Cyber Security—System Security Management)).

[7] The NERC Glossary defines BES Cyber System as ''[o]ne or more BES Cyber Assets logically grouped by a responsible entity to perform one or more reliability tasks for a functional entity.'' Glossary of Terms Used in NERC Reliability Standards (NERC Glossary). Reliability Standard CIP–002–5.1a (Cyber Security System Categorization) provides a ''tiered'' approach to cybersecurity requirements, based on classifications of high, medium and low impact BES Cyber Systems.

believe that broadened mandatory reporting pursuant to Reliability Standard requirements as opposed to a standing data request is more aligned with the seriousness and magnitude of the current threat environment, and more likely to improve awareness of existing and future cyber security threats and potential vulnerabilities. Four main reasons inform our decision. First, a new or modified Reliability Standard will ensure that the desired goals of our directive are met because the Commission will have the ability to review and ultimately approve the standard, as opposed to the opportunity for informal review that the Commission would have of a data request under ROP Section 1600. Second, the Commission has well-defined authority and processes under section 215(e) of the FPA to audit and enforce compliance with a Reliability Standard. Third, we do not anticipate that there will be a need to change the parameters of the Cyber Security Incident report for EACMS because the parameters that we direct below are based on five static functions of EACMS and are not technology specific, so the potential flexibility provided by a Section 1600 data request may not be significantly beneficial. Finally, collecting data through a Reliability Standard is consistent with existing practices; responsible entities are currently required to maintain the types of information that would lead to a reportable Cyber Security Incident pursuant to Reliability Standard CIP–007–6, Requirement R4.1. Nonetheless, should future events require an expedited change in data collection or should NERC desire to collect data outside the scope of the proposed Reliability Standard, NERC could then use the Section 1600 process to supplement information reported under a mandatory Reliability Standard.

7. Accordingly, pursuant to section 215(d)(5) of the FPA, we adopt the NOPR proposal and direct NERC to develop modifications to the Reliability Standards to include the mandatory reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS, as well as modifications to specify the required information in Cyber Security Incident reports, their dissemination, and deadlines for filing reports. We direct NERC to submit the directed modifications within six-months of the effective date of this Final Rule.

I. Background

A. Section 215 and Mandatory Reliability Standards

8. Section 215 of the FPA requires a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards, subject to Commission review and approval. Reliability Standards may be enforced by the ERO, subject to Commission oversight, or by the Commission independently.[8] Pursuant to section 215 of the FPA, the Commission established a process to select and certify an ERO,[9] and subsequently certified NERC.[10]

B. Notice of Proposed Rulemaking

9. On December 21, 2017, the Commission issued a NOPR proposing to direct that NERC develop enhanced Cyber Security Incident reporting requirements. Specifically, pursuant to section 215(d)(5) of the FPA, the NOPR proposed to direct NERC to develop modifications to the Reliability Standards to require the reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS. The proposed directive was based in part on a lack of Reportable Cyber Security Incidents in 2015 and 2016, and NERC's assessment in the 2017 State of Reliability Report that ''[w]hile there were no reportable cyber security incidents during 2016 and therefore none that caused a loss of load, this does not necessarily suggest that the risk of a cyber security incident is low.'' [11] In addition, the NOPR stated that it agreed with the recommendation by NERC in the 2017 State of Reliability Report to ''redefine reportable incidents to be more granular and include zero-consequence incidents that might be precursors to something more serious.'' [12]

10. In justifying the proposed inclusion of ESPs and associated EACMS within the scope of the enhanced Cyber Security Incident requirement, the NOPR stated that the purpose of an ESP is to manage electronic access to BES Cyber Systems to support the protection of the BES Cyber Systems against compromise that could lead to misoperation or instability in the BES.[13] In addition, the NOPR explained that EACMS, which include, for example, firewalls, authentication servers, security event monitoring systems, intrusion detection systems and alerting systems, control electronic access into the ESP and play a significant role in the protection of high and medium impact BES Cyber Systems.[14] The NOPR indicated further that, once an EACMS is compromised, an attacker could more easily enter the ESP and effectively control the BES Cyber System or Protected Cyber Asset.

11. The NOPR discussed the scope of the present Cyber Security Incident reporting requirement. The NOPR observed that Reliability Standard CIP–008–5, Requirement R1.2 currently requires that each responsible entity shall document one or more Cyber Security Incident Plan(s) with one or more processes to determine if an identified Cyber Security Incident is a Reportable Cyber Security Incident. And where a Cyber Security Incident is determined to qualify as a Reportable Cyber Security Incident, the NOPR explained that responsible entities are required to notify the E–ISAC with initial notification within one hour from the determination of a Reportable Cyber Security Incident. The NOPR stated, however, that the NERC Glossary defines a Reportable Cyber Security Incident as ''[a] Cyber Security Incident that has compromised or disrupted one or more reliability tasks of a functional entity.'' The NOPR indicated that the definition of Reportable Cyber Security Incident, insofar as it excludes unsuccessful attempts to compromise or disrupt a responsible entity's core activities, is thus more narrow than the definition of ''cybersecurity incident'' in FPA section 215(a)(8), which encompasses ''a malicious act or suspicious event that disrupts, or was an attempt to disrupt, the operation of those programmable electronic devices and communication networks including hardware, software and data that are essential to the reliable operation of the bulk power system.'' [15]

12. The NOPR stated that altering the Cyber Security Incident reporting

[15] 16 U.S.C. 824o(a)(8).

threshold to require reporting of attempts to compromise, instead of only successful compromises, is consistent with information already logged by registered entities pursuant to current monitoring requirements in the Reliability Standards. The NOPR explained that Reliability Standard CIP–007–6, Requirement R4.1, mandates logging of detected successful login attempts, detected failed access attempts, and failed login attempts, and the Guidelines and Technical Basis for Requirement R4.1 states that events should be logged even if access attempts were blocked or otherwise unsuccessful.[16]

13. In addition to modifying the reporting threshold, the NOPR proposed to direct NERC to modify the Reliability Standards to specify the required information in Cyber Security Incident reports to improve the quality of reporting and allow for ease of comparison by ensuring that each report includes specified fields of information, as well as the deadlines for submitting a report. Specifically, the NOPR proposed that the minimum set of attributes to be reported should include: (1) The functional impact, where possible, that the Cyber Security Incident achieved or attempted to achieve; (2) the attack vector used to achieve or attempt to achieve the Cyber Security Incident; and (3) the level of intrusion achieved or attempted by the Cyber Security Incident. The NOPR explained that knowledge of these attributes regarding a specific Cyber Security Incident will improve awareness of cyber threats to BES reliability. The NOPR also noted that the proposed attributes are the same as attributes already used by DHS for its multi-sector reporting and summarized by DHS in an annual report.[17]

14. The NOPR also proposed to continue to require that Cyber Security Incident reports be sent to the E–ISAC instead of the Commission, but the NOPR proposed to require that such reports also be sent to ICS–CERT and that NERC file with the Commission an annual, public, and anonymized summary of such reports.

15. Finally, the NOPR sought comment on potential alternatives to modifying the mandatory reporting requirements in the NERC Reliability Standards. Specifically, the NOPR sought comment on whether a request for data or information pursuant to Section 1600 of the NERC Rules of Procedure would effectively address the reporting gap and current lack of awareness of cyber-related incidents among NERC, responsible entities and the Commission, and satisfy the goals of the proposed directive.

II. Discussion

16. Pursuant to section 215(d)(5) of the FPA, we adopt the NOPR proposal and direct NERC to develop and submit modifications to the NERC Reliability Standards to augment current mandatory reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the BES. We direct NERC, subject to the discussion below, to develop and submit Reliability Standard requirements that: (1) Require responsible entities to report Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS; (2) specify the required information in Cyber Security Incident reports; (3) establish deadlines for filing Cyber Security Incident reports that are commensurate with incident severity; and (4) require that Cyber Security Incident reports be sent to ICS–CERT, in addition to E–ISAC, and that NERC file with the Commission an annual, public, and anonymized summary of such reports.

17. Below, we discuss the following matters: (A) The need for broadened mandatory Cyber Security Incident reporting; (B) the threshold for a reportable Cyber Security Incident; (C) the appropriate procedural approach to augment Cyber Security Incident reporting, *i.e.,* new or modified Reliability Standards versus a NERC data request to applicable entities; (D) the content and timing of Cyber Security Incident reports; and (E) other issues.

A. Need for Broadened Mandatory Cyber Security Incident Reporting

1. NOPR

18. In the NOPR, the Commission indicated that cyber-related event reporting is currently addressed in Reliability Standard CIP–008–5, Requirement R1.2, which requires that each responsible entity shall document one or more Cyber Security Incident Plan(s) with one or more processes to determine if an identified Cyber Security Incident is a Reportable Cyber Security Incident. The NOPR noted that a Cyber Security Incident is defined in the NERC Glossary as: ''A malicious act or suspicious event that: (1) compromises, or was an attempt to compromise, the Electronic Security Perimeter or Physical Security Perimeter or (2) disrupts, or was an attempt to disrupt, the operation of a BES Cyber System.''

19. The Commission further explained that where a cyber-related event is determined to qualify as a Reportable Cyber Security Incident, responsible entities are required to notify the E–ISAC with initial notification to be made within one hour from the determination of a Reportable Cyber Security Incident.[18] However, the NOPR observed that a Reportable Cyber Security Incident is defined more narrowly in the NERC Glossary than a Cyber Security Incident because the former requires that the incident result in the compromise or disruption of one or more reliability tasks of a functional entity. As the Commission explained, in order for a cyber-related event to be considered reportable under the existing CIP Reliability Standards, it must compromise or disrupt a core activity (*e.g.,* reliability task) of a responsible entity that is intended to maintain BES reliability.[19] Therefore, under these definitions, unsuccessful attempts to compromise or disrupt a responsible entity's core activities are not subject to the current reporting requirements in Reliability Standard CIP–008–5 or elsewhere in the CIP Reliability Standards.

20. The NOPR explained that recent NERC State of Reliability Reports indicate that there were no Reportable Cyber Security Incidents in 2015 and 2016. The NOPR also highlighted NERC's conclusion that ''[w]hile there were no reportable cyber security incidents during 2016 and therefore none that caused a loss of load, this does not necessarily suggest that the risk of a cyber security incident is low.'' [20] The NOPR contrasted the results reported in the NERC reports with the 2016 annual summary of the Department of Energy's (DOE) Electric

[16] *See* Reliability Standard CIP–007–6 (Cyber Security—Systems Security Management), Requirement R4.1.

[17] NOPR, 161 FERC ¶ 61,291 at P 38 (citing 2016 ICS–CERT Year in Review, *https://ics-cert.us-cert.gov/Year-Review-2016*).

[18] *See* Reliability Standard CIP–008–5 (Cyber Security—Incident Reporting and Response Planning), Requirement R1, Part 1.2. This requirement pertains to high impact BES Cyber Systems and medium impact BES Cyber Systems.

[19] The NERC Functional Model ''describes a set of Functions that are performed to ensure the reliability of the Bulk Electric System. Each Function consists of a set of related reliability Tasks. The Model assigns each Function to a functional entity, that is, the entity that performs the function. The Model also describes the interrelationships between that functional entity and other functional entities (that perform other Functions).'' NERC, Reliability Functional Model: Function Definitions and Functional Entities, Version 5 at 7 (November 2009), *http://www.nerc.com/pa/Stand/Functional%20Model%20Archive%201/Functional_Model_V5_Final_2009Dec1.pdf.*

[20] 2017 NERC State of Reliability Report at 4.

Disturbance Reporting Form OE–417, which contained four cybersecurity incidents reported in 2016; two suspected cyber attacks and two actual cyber attacks.[21] Moreover, the NOPR noted that ICS–CERT responded to fifty-nine cybersecurity incidents within the Energy Sector in 2016.[22]

21. Based on the comparison of information reported by NERC, DOE, and ICS–CERT, the NOPR concluded that the current reporting threshold in Reliability Standard CIP–008–5 may not reflect the true scope and scale of cyber-related threats facing responsible entities. In particular, the NOPR raised a concern that the disparity in the reporting of cyber-related incidents under existing reporting requirements, in particular the lack of any incidents reported to NERC in 2015 and 2016, suggests a gap in the current reporting requirements. The NOPR highlighted the fact that this concern is echoed in the 2017 NERC State of Reliability Report, which includes a recommendation that NERC and industry should ''redefine reportable incidents to be more granular and include zero-consequence incidents that might be precursors to something more serious.'' [23] Agreeing with NERC's recommendation in the 2017 State of Reliability report, the NOPR proposed to direct NERC to address the apparent gap in cyber incident reporting.

2. Comments

22. NERC supports improving the reporting of Cyber Security Incidents, stating that ''[b]roadening the mandatory reporting of Cyber Security Incidents would help enhance awareness of cyber security risks facing entities.'' [24] NERC maintains that enhanced reporting ''would create a more extensive baseline understanding of the nature of cyber security threats and vulnerabilities.'' [25] NERC notes that broadening the scope of Cyber Security Incident reporting ''is consistent with recommendations in NERC's 2017 State of Reliability Report.'' [26] While NERC recognizes the need for enhanced Cyber Security Incident reporting, as discussed in the following sections, NERC does not support all aspects of the NOPR, including requiring enhanced cyber incident reporting through a modified Reliability Standard.

23. BPA, ITC, IRC, NYPSC, and NRG also support the NOPR proposal to direct NERC to address the gap in reporting Cyber Security Incidents. As noted by BPA, the current definition of Reportable Cyber Security Incident only addresses successful attempts to compromise or disrupt operations and, therefore, ''a broader definition of a Reportable Cyber Security incident is warranted'' because ''information about certain attempts to compromise will likely better assist the industry in preventing successful cyber attacks.'' [27] BPA, ITC, and IRC raise concerns, however, regarding the risk of over-reporting. IRC states that the proposed requirement to report all attempts to compromise an ESP or associated EACMS ''needs further clarification.'' [28] BPA states that any new reporting requirement ''must ensure that the information reported is useful and does not result in under and over reporting of information.'' [29] NRG recommends that the term ''attempt'' should be clarified (*i.e.,* as a more serious risk than a port scan) and ''should be provided in technical guidance or glossary definition relating to the context of [the] existing NERC glossary term: Cyber Security Incident.'' [30]

24. EEI/NRECA, Trade Associations, APS, Chamber, EnergySec, Eversource, Idaho Power, and LPPC do not support the NOPR proposal to direct NERC to address the gap in reporting Cyber Security Incidents. EEI/NRECA, Trade Associations, and Chamber suggest that the Commission support existing voluntary reporting practices as opposed to mandating the reporting of Cyber Security Incidents through the CIP Reliability Standards. EEI/NRECA state that ''[s]ignificant resources from responsible entities and government are engaged in [. . .] partnerships'' to share threat and vulnerability information.[31] EEI/NRECA argue that ''[m]andating such sharing will overlap with these voluntary efforts and may harm the partnerships and ability of the programs to enhance cybersecurity for the electric grid.'' [32] In addition, EEI/NRECA state that mandating Cyber Security Incident reporting ''may weaken the ability of electric companies to participate in these [voluntary reporting] programs by shifting their focus to compliance activity.'' [33] Eversource states that the NOPR proposal would ''introduce new technical and administrative challenges that will likely impact responsible entities' ability to participate in existing voluntary threat information sharing programs.'' [34] LPPC states that whatever action the Commission takes on Cyber Security Incident reporting, it ''must be done with an eye towards causing as little disruption to existing information sharing programs as possible.'' [35]

25. Trade Associations state that while improving Cyber Security Incident reporting is an appropriate objective, ''directing new or revised mandatory reliability standards is not the only tool that NERC and the Commission have for achieving that reliability objective.'' [36] Trade Associations contend that, in light of the constantly evolving state of cyber security, ''the Commission should consider and utilize the most flexible tools to achieve its reliability goals without imposing undue burden on registered entities.'' [37]

26. APS states that while it ''supports the Commission's objectives expressed in the NOPR,'' it does not agree that modifying the CIP Reliability Standards is the appropriate solution.[38] APS asserts that ''the reporting requirements that already exist under Form OE–417 meet the same objectives as the Commission is attempting to satisfy by requiring additional reporting under the CIP Standards as proposed in the NOPR.'' [39] APS instead suggests that ''the Commission . . . direct NERC to modify the CIP Standards to include a requirement for Responsible Entities to submit copies of its Form OE–417 to the E–ISAC and ICS–CERT.'' [40]

27. EnergySec states that it is ''generally in agreement with the Commission's goal of increasing the frequency and detail of incident reporting,'' but raises concerns with the specifics of the NOPR proposal.[41] EnergySec maintains that '''compromise' as used in the definition of Reportable Cybersecurity Incident does not necessarily imply harm.'' [42] Therefore, EnergySec argues that ''an incident should be considered a 'compromise' if an attacker has obtained

[39] *Id.* at 7.

[40] *Id.* at 5.

[41] EnergySec Comments at 2.

[42] *Id.* at 2.

the ability to disrupt, even if no disruption occurs.'' [43] EnergySec states further that it believes ''that a clarified understanding of the current definition of Reportable Cybersecurity Incident can sufficiently address the Commission's concerns'' since it ''can be construed to include certain non-impactful incidents, as well as incidents affecting [ESPs] and [EACMS].'' [44]

28. EnergySec also raises a concern that the NOPR proposal is too broad. EnergySec argues that determining incidents that might facilitate future cyber incidents ''would be highly subjective and could easily be construed to include systems and networks that are outside the scope of the Commission's authority.'' [45] EnergySec notes that most failed login or access attempts are benign in nature and ''the volume of such events is orders of magnitude larger than what would be an appropriate volume for mandatory reporting.'' [46] EnergySec states further that while it agrees that successful attacks against ESPs and EACMS should be reported, it does not support including attempted compromise in the reporting requirements since the ''[d]etermination of attempted compromise is highly subjective and it would therefore be difficult at best to clearly define within the standards a basis for such determinations.'' [47]

29. Eversource and Idaho Power do not support the NOPR proposal due to the anticipated increased burden that could result from increased mandatory reporting. Eversource states that ''expanding the amount of required information to be reported and increasing the number of recipients of the reports will create undue administrative burdens.'' [48] In addition, Eversource contends that ''the meaning of an attempted compromise is currently undefined and may impose significant burdens on responsible entities to identify such attempts.'' [49] Idaho Power states that even though ''additional reporting can provide some visibility into the types of threats that entities face, additional administrative burdens such as reporting requirements reduce the finite resources that entities have to monitor and defend their critical infrastructure.'' [50]

30. LPPC asserts that the NOPR proposal ''may yield a substantial quantity of unhelpful information and confusing analysis, while needlessly burdening Registered Entities.'' [51] LPPC states that it supports NERC's request for flexibility in addressing enhanced Cyber Security Incident reporting and concludes that ''a technical conference may productively explore the nature and scope of the various programs that currently exist for information sharing regarding threats and the incremental value of any new requirements.'' [52] Resilient Societies states that ''the modifications proposed to improve the reporting of cybersecurity incidents are unlikely to have any significant positive effect.'' [53] Specifically, Resilient Societies states that the proposed reporting parameters are not broad enough because ''reporting of malware infection is not necessarily within thresholds set on other criteria, such as 'compromise,' 'breach,' 'impact,' or 'disruption.' '' [54] Resilient Societies also suggests that the Commission convene a public technical conference.

3. Commission Determination

31. We adopt the NOPR proposal and, pursuant to section 215(d)(5) of the FPA, direct NERC to develop and submit modifications to the Reliability Standards to augment the mandatory reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the BES. Comments submitted by NERC and others support our determination that enhanced reporting of Cyber Security Incidents will address an existing gap in Cyber Security Incident reporting and will provide useful information on existing and future cyber security risks, as well as provide entities with better visibility into malicious activity prior to an event occurring. As noted in NERC's comments, ''[b]roadening the mandatory reporting of Cyber Security Incidents would help enhance awareness of cyber security risks facing entities.'' [55] Similarly, BPA agrees with the directive to include attempted compromises in an enhanced reporting regime, stating that ''information about certain attempts to compromise will likely better assist the industry in preventing successful cyber attacks.'' [56] Moreover, while the record reflects differing views on whether broadened Cyber Security Incident reporting should be mandatory or voluntary, there is general agreement that improved reporting is an appropriate objective.[57]

32. Some commenters contend that the directive to require mandatory reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS is vague and requires clarification. Recognizing this concern, NERC states that ''[t]he challenge is to scope any additional mandatory reporting requirements in a manner that collects meaningful data about security risks without creating an unduly burdensome reporting requirement.'' [58] While we address the threshold for a broadened reporting requirement issue in the next section, as a general matter, we agree with NERC that the scope of any new reporting requirement should be tailored to provide better information on cyber security threats and vulnerabilities without imposing an undue burden on responsible entities. Indeed, the NOPR proposal was not intended to be prescriptive or overly broad, but rather support NERC's efforts to enhance the reporting of Cyber Security Incidents as outlined in NERC's 2017 State of Reliability Report through the standards development process.

33. Some commenters assert that a broadened reporting requirement will overlap, duplicate or otherwise chill voluntary reporting programs, potentially diverting resources away from such programs. Other commenters, however, assert that voluntary reporting does not adequately address the gap identified in the NOPR because voluntary reporting and mandatory reporting under currently-effective Reliability Standard CIP–008–5 have not resulted in adequate reporting of cybersecurity threats to the BES.[59] As Appelbaum notes, ''[w]ithout mandatory reporting scheme a degraded threat image will result.'' [60]

34. Based on the record, we are not persuaded that our directive to augment current mandatory reporting requirements will adversely impact existing voluntary information sharing efforts. Instead, we agree with NERC's comment that the new ''baseline understanding [resulting from broadened mandatory reporting], coupled with the additional context from voluntary reports received by the E–ISAC, [will] allow NERC and the E–

[60] Appelbaum Comments at 7.

ISAC to share that information broadly through the electric industry to better prepare entities to protect their critical infrastructure.'' [61] Moreover, we do not anticipate that the incremental burden of the directed modifications will divert significant resources from other information sharing programs since responsible entities are already required to monitor and log successful login attempts, detected failed access attempts, and failed login attempts under Reliability Standard CIP–007–6, Requirement R4.1. Nor do we anticipate that the incremental burden of complying with the directed Reliability Standards modifications would be significantly more than the burden of responding to a standing data or information request under Section 1600. We also do not believe that broadened mandatory reporting is at cross-purposes with voluntary cybersecurity-related programs offered by DHS and other government agencies. We believe that voluntary programs that focus on cyber response and sharing of cyber threat information across industry are important initiatives that should be supported. However, the comments do not provide a compelling explanation why the broadening of mandatory reporting will supplant or inhibit voluntary programs.

35. While we agree with EnergySec that revisions to the current definition of Reportable Cyber Security Incident could address some aspects of our directive, a modified definition alone would not address the need to specify the required information in Cyber Security Incident reports to improve the quality of reporting and allow for ease of comparison, or establish deadlines for submitting a report to facilitate timely information sharing. Therefore, while we believe that a modified definition of Reportable Cyber Security Incident could address part of the Commission's concerns, additional modifications would be necessary to meet the full scope of our directive.

36. In addition, we do not agree with Resilient Societies that the detection of malware infecting a responsible entity's ESP or associated EACMS would fall outside the new reporting requirement. While Resilient Societies asserts that a malware infection would not meet the threshold of a compromise, breach, impact, or disruption, we believe that it would fall within the parameters of an attempted compromise. As discussed in the next section, however, we believe that it is appropriate for NERC to address the reporting threshold through the standards development process in order to weigh the diverse technical opinions on how to identify the appropriate assets and the level of attempted compromise that warrants reporting. Accordingly, we are not persuaded to convene a technical conference. Rather, persons interested in the development of appropriate detailed parameters of the augmented reporting requirements should participate in the NERC standards development process.

37. In sum, we conclude that the record supports our determination that directing NERC to develop and submit modifications to the Reliability Standards to require the reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP, as well as associated EACMS, is appropriate to carry out FPA section 215. Therefore, pursuant to FPA section 215(d)(5), we direct NERC to develop and submit modifications to the Reliability Standards to include the mandatory reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS. As noted above, we direct NERC to submit the directed modifications within six-months of the effective date of this Final Rule.

B. Threshold for a Reportable Cyber Security Incident

1. NOPR

38. The NOPR proposed to direct NERC to modify the Reliability Standards to include the mandatory reporting of Cyber Security Incidents that compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS. The NOPR explained that reporting attempts to compromise, instead of only successful compromises, is consistent with current monitoring requirements in Reliability Standard CIP–007–6, Requirement R4.1, which mandates logging of detected successful login attempts, detected failed access attempts and failed login attempts.[62] In addition, the NOPR identified other reporting regimes that include attempts within the general definition of a ''cyber incident.'' Specifically, DHS defines a ''cyber incident'' as ''attempts (either failed or successful) to gain unauthorized access to a system or its data. . . .'' [63] The E–ISAC defines a ''cyber incident'' as including unauthorized access through the electronic perimeter as well as ''a detected effort . . . without obvious success.'' [64] And ICS–CERT defines a ''cyber incident'' as an ''occurrence that actually or potentially results in adverse consequences. . . .'' [65]

39. As noted above, an ESP is defined in the NERC Glossary as the ''logical border surrounding a network to which BES Cyber Systems are connected using a routable protocol.'' The purpose of an ESP is to manage electronic access to BES Cyber Systems to support the protection of the BES Cyber Systems against compromise that could lead to misoperation or instability in the BES. The NOPR explained that since an ESP is intended to protect BES Cyber Systems, it is reasonable to establish the compromise of, or attempt to compromise, an ESP as the minimum reporting threshold.

40. In addition, the NOPR identified an ESP's associated EACMS as another threshold for a Reportable Cyber Security Incident. As explained in the NOPR, EACMS are defined in the NERC Glossary as ''Cyber Assets that perform electronic access control or electronic access monitoring of the Electronic Security Perimeter(s) or BES Cyber Systems. This includes Intermediate Systems.'' More specifically, EACMS include, for example, firewalls, authentication servers, security event monitoring systems, intrusion detection systems and alerting systems.

41. While the Commission proposed to include EACMS within the scope of the proposed directive, the Commission also sought comment on the possibility of excluding EACMS from the scope of the proposed directive.

2. Comments

42. NERC supports the NOPR proposal to limit the scope of Cyber Security Incident reporting to incidents that compromise or attempt to compromise a responsible entity's ESP or associated EACMS. NERC explains that any new reporting requirements ''need to be scoped in a manner that provides for meaningful reporting of cyber security risks but does not unduly burden entities.'' [66] Specifically, NERC states:

> Because the ESP protects some of the most important Cyber Assets and the EACMS control or monitor access to those Cyber

[66] NERC Comments at 6.

Assets, NERC agrees that reporting on attempts to compromise these security measures would provide valuable data while also imposing a reasonable burden on entities given the limited traffic they should experience.[67]

NERC notes that some EACMS devices ''may provide important early indicators of future compromise'' and, therefore, NERC states that it ''supports including EACMS in the reporting threshold in addition to the ESP and notes that logging attempts to compromise the ESP and some EACMS devices does not impose an unreasonable burden on entities.'' [68]

43. While NERC supports adopting the compromise or attempt to compromise a responsible entity's ESP or an EACMS associated with an ESP as a threshold for Cyber Security Incident reporting, NERC explains that ''there is still a need to refine the scope of the proposed directive to ensure that it would provide meaningful data without overburdening entities.'' [69] Specifically, NERC states that there is a need to ''outline the parameters of an 'attempt to compromise' in order to issue a precise data request.'' [70] In particular, NERC states that it ''would consider the common understanding of adverse activities that are early indicators of compromise, such as campaigns against industrial control systems, to help refine the parameters.'' [71] In addition, NERC notes that EACMS, as defined in the NERC Glossary, include a wide variety of devices that perform control and monitoring functions. NERC states further that it ''needs to consider whether to define the reporting threshold to differentiate between the various types of EACMS for reporting purposes.'' [72] Therefore, NERC requests that the Commission provide flexibility in refining the threshold for Cyber Security Incident reporting.

44. Trade Associations, APS, BPA, EnergySec, Resilient Societies, IRC, ITC, and NYPSC generally support the reporting threshold proposed in the NOPR, but caution that any new or modified requirements should be properly scoped. Trade Associations state that the NOPR proposal ''is potentially overbroad and could result in unduly burdensome reporting requirements that *reduce* awareness of significant cyber threats.'' [73] Trade Associations also contend that a new or revised Reliability Standard ''should not include the proposed generic threshold of reporting *any* incidents that compromise or attempt to compromise an ESP or EACMS.'' [74] Instead, Trade Associations recommend that the Commission ''give NERC sufficient flexibility to define appropriate reporting thresholds for attempted compromises of an ESP or EACMS.'' [75]

45. APS asserts that, given the differences among EACMS, it does not support the inclusion of all EACMS or the exclusion of all EACMS from an enhanced reporting requirement. APS states that while it ''concurs that the incidents impacting the ESP should certainly be in scope of reporting, it is concerned that the exclusion of EACMS (which includes [Electronic Access Points (EAP)]) results in a likely compromise scenario going unreported.'' [76] Specifically, APS notes that ''a user's credentials to an Intermediate System, which includes/can be classified as an EAP(s) and/or EACMS, could be compromised.'' [77] APS contends that such a compromise would not implicate the ESP, but could impact or attempt to impact a BES Cyber Asset or System. APS states, however, that ''there are numerous EACMS for which a compromise scenario would not be critical or allow potential access to an ESP.'' [78] Therefore, APS maintains that an evaluation of the functions of various EACMS is needed before they can be included in any reporting requirement.

46. BPA states that a broader definition of a Reportable Cyber Security Incident is necessary since the current definition only addresses actual compromises. BPA avers that ''information about certain attempts to compromise will likely better assist the industry in preventing successful cyber attacks.'' [79] BPA states that the current definition of a Cyber Security Incident is a good starting point for a revision since it includes attempts to compromise or disrupt. BPA cautions, however, that the current definition of Cyber Security Incident ''may be too broad and result in overreporting of information.'' [80]

47. EnergySec states that it ''generally agree[s] that successful attacks against ESPs and EACMS should be within the scope of reporting; [but] disagree[s] with the proposal to include attempted compromise in the reporting requirements.'' [81] In addition, EnergySec suggests that monitoring-only systems be excluded from any reporting requirement, stating that ''[a]lthough compromise of monitoring systems could assist an attack, such a compromise would not directly permit access.'' [82] Resilient Societies states that ''[e]xcluding [EACMS] from the Commission directive could exempt reporting of attempted compromises.'' [83] IRC states that ''adding EACMS to the requirement for mandatory reporting would be beneficial, not only because of their role as a boundary point, but also because EACMS perform other roles that support the BES Cyber Systems.'' [84] IRC cautions, however, that ''[w]ithout providing further definitions or criteria, the NOPR's proposal to require reporting of all 'attempts to compromise' the ESP or EACMS is unclear and potentially unachievable.'' [85]

48. While ITC generally supports the NOPR proposal, ITC ''requests that the Commission refrain from including unsuccessful attempts to compromise an ESP-associated EACMS in the revised definition of a Cyber Security Incident.'' [86] ITC notes that responsible entity systems with publicly-visible IP addresses ''sustain a regular stream of denial of service attempts, phishing emails, attempted firewall breaches, untargeted and targeted malware, and other common cybersecurity threats for which countermeasures are well-established and which pose a miniscule chance of success.'' [87] ITC states that including ''attempted compromises of ESP-associated EACMS would appear to require reporting for a sizeable number of these common events.'' [88] Therefore, ITC states that while it ''supports expanding the definition of Reportable Cyber Incidents to include incidents that compromise, or attempt to compromise, a responsible entity's ESP, ITC would urge the Commission to direct NERC to include only actual breaches of a responsible entity's ESP-associated EACMS, and not attempted-but-unsuccessful compromises.'' [89] NYPSC notes that ''[f]ailed cyber attacks occur on a continuous basis, all the time. . .'' and, therefore, ''[a] reporting requirement of every attempted security

[89] *Id.* at 5.

attack may be overly burdensome for reporting entities.'' [90] NYPSC ''suggests FERC consider developing clear criteria of the required reporting based on its review of the comments and recommendations from reporting entities.'' [91]

49. Idaho Power states that ''additional reporting requirements do not increase cyber security.'' [92] Idaho Power contends that ''additional administrative burdens such as reporting requirements reduce the finite resources that entities have to monitor and defend their critical infrastructure.'' [93] In addition, Idaho Power states that EACMS ''should be excluded from any additional requirements and only BES Cyber Systems and associated devices should be included in any further reporting requirements.'' [94]

50. Other commenters support expanding the enhanced reporting requirement beyond what was proposed in the NOPR. NRG supports the NOPR proposal to direct NERC to develop modifications to the CIP Reliability Standards to improve the reporting of Cyber Security Incidents. NRG also supports including EACMS as a threshold for reporting. In addition, NRG ''recommends that the scope of the NOPR avoid limiting the requirement to High and Medium Impact BES Cyber Systems.'' [95] Specifically, NRG notes that the NOPR proposal ''would limit the requirement to High and Medium Impact BES Cyber Systems as ESPs and EACMS are not required establishments at Low Impact BES Cyber Systems.'' [96] Therefore, NRG states that ''any modification to the referenced CIP Reliability Standards should be applicable to all BES Cyber Systems with External Routable Communications.'' [97]

51. Appelbaum supports the NOPR proposal to include the attempted or actual compromise of an ESP or EACMS in the mandatory reporting requirement. However, Appelbaum ''propose[s] the Commission consider adding Physical Security Perimeters and Physical Access Control Systems (PACS) as well.''[98] Simon supports the NOPR proposal, but encourages the Commission to broaden the directive to include low impact BES Cyber Systems. Specifically, Simon states that ''[o]mission of mandatory reporting for the disruption, or an attempt to disrupt, the operation of electronic access controls for BES assets with low impact BES Cyber Systems leaves a large blind spot in the Commission's effort to learn of efforts to harm the reliable operation of the bulk electric system.'' [99] Isologic does not support limiting Cyber Security Incident reporting to situations involving an entity's ESP or associated EACMS. Isologic states that ''there are few CIP standards for 'secure perimeters' and for the mass of BES Low Impact Facilities, (substations), security is at the fence line, not in ESPs.'' [100]

3. Commission Determination

52. The record in this proceeding supports establishing the compromise or attempted compromise of an ESP as the appropriate threshold for a Reportable Cyber Security incident. In addition, with exceptions, the comments support including EACMS associated with an ESP as part of the reporting threshold. As NERC notes, an ''ESP protects some of the most important Cyber Assets and the EACMS control or monitor access to those Cyber Assets.'' [101] While we believe that ESPs and EACMS should be within the scope of a broadened reporting requirement, the comments, correctly in our view, point to the need to establish an appropriate scope for reporting. As NERC states, ''there is still a need to refine the scope of the proposed directive to ensure that it would provide meaningful data without overburdening entities.'' [102] This concern is reflected in a number of comments, pointing to the need to identify the appropriate assets to monitor (for example, only EACMS associated with an ESP) and to clearly define an ''attempt to compromise.'' [103]

53. The comments generally support the view that NERC should have the flexibility to establish an appropriate reporting threshold. We recognize the need for a certain level of flexibility and believe that it is appropriate for NERC to address the specific reporting threshold through the standards development process. However, as discussed further below, we provide guidance on certain aspects of how NERC should identify EACMS for reporting purposes and what types of attempted compromise must be reported.

54. With regard to identifying EACMS for reporting purposes, NERC's reporting threshold should encompass the functions that various electronic access control and monitoring technologies provide. Those functions must include, at a minimum: (1) Authentication; (2) monitoring and logging; (3) access control; (4) interactive remote access; and (5) alerting.[104] Reporting a malicious act or suspicious event that has compromised, or attempted to compromise, a responsible entity's EACMS that perform any of these five functions would meet the intended scope of the directive by improving awareness of existing and future cyber security threats and potential vulnerabilities. Since responsible entities are already required to monitor and log system activity under Reliability Standard CIP–007–6, the incremental burden of reporting of the compromise or attempted compromise of an EACMS that performs the identified functions should be limited, especially when compared to the benefit of the enhanced situational awareness that such reporting will provide.

55. With regard to the definition of ''attempted compromise'' for reporting purposes, we consider attempted compromise to include an unauthorized access attempt or other confirmed suspicious activity. ITC raises a concern that including unsuccessful attempts to compromise an EACMS associated with an ESP would require reporting a significant number of events. We note, however, that limiting the reporting threshold to only EACMS that are associated with an ESP should limit the reporting burden since these assets should be located apart from the responsible entity's broader business IT networks. Moreover, as discussed in the next section, we also believe that a flexible reporting timeline that reflects the severity of a Cyber Security Incident could also help address the potential burden of reporting attempted compromises.

56. With regard to BPA's suggestion that a revised definition of Reportable Cyber Security Incident is necessary, as discussed above, revisions to the current definition of Reportable Cyber Security

[104] *See* NERC Glossary of Terms definition of EACMS. *See also* Reliability Standard CIP–006–6, Requirement R1.5 (Physical Security Plan) at 10 (''[i]ssue an alarm or alert in response to detected unauthorized access'' to certain High and Medium Impact BES Cyber Systems and associated EACMS); Reliability Standard CIP–007–6, Requirement R4.2 (Security Event Monitoring) at 16; and Reliability Standard CIP–007–6, Requirement R5.7 (System Access Control) at 25.

Incident could address certain aspects of the NOPR proposal, although a modified definition alone would not address the need to specify the required information in cyber security incident reports to improve the quality of reporting and allow for ease of comparison, or establish deadlines for submitting a report to facilitate timely information sharing. Therefore, although we believe that a modified definition of Reportable Cyber Security Incident could address part of the Commission's concerns, additional modifications to the Reliability Standards would be necessary to meet the security objective of the directives discussed herein.

57. A number of commenters request that we expand the directive to include a broader scope of assets, including low impact BES Cyber Systems. However, we decline to expand the scope of Cyber Security Incident reporting beyond the ESP and associated EACMS at this time. The focus on ESPs and associated EACMS is intended to provide threat information on BES Cyber Systems that have the greatest impact on BES reliability while imposing a reasonable reporting burden on responsible entities. Nevertheless, the Commission could revisit this issue if there is demonstrated need for expanded Cyber Security Incident reporting.

58. Therefore, we adopt the NOPR proposal and conclude that the compromise, or attempt to compromise, a responsible entity's ESP or associated EACMS is a reasonable threshold for augmented Cyber Security Incident reporting.

C. Appropriate Procedural Approach To Augment Cyber Security Incident Reporting

1. NOPR

59. The NOPR proposed to direct NERC to modify the CIP Reliability Standards to augment the mandatory reporting of Cyber Security Incidents, while also seeking comment on whether a request for data or information pursuant to Section 1600 of the NERC Rules of Procedure would effectively address the reporting gap.

2. Comments

60. While NERC supports broadened mandatory Cyber Security Incident reporting, NERC does not support the NOPR proposal to direct a modification to the Reliability Standards. Instead, NERC requests flexibility to determine the appropriate reporting procedure. Specifically, NERC proposes to ''use the [Rules of Procedure] Section 1600 process for gathering data used for system performance.'' [105] NERC maintains that it has ''successfully shifted to using Section 1600 for other data collection efforts, such as the collection of reports on Protection System Misoperation.'' [106] NERC explains further that the Section 1600 process would be used to ''supplement the existing voluntary reporting of cyber security threats to E–ISAC.'' [107]

61. NERC states that the Section 1600 process ''provides many of the same benefits as Reliability Standards,'' such as stakeholder and Commission staff input.[108] NERC also states that, similar to Reliability Standards, compliance with Section 1600 is mandatory. NERC explains that if a responsible entity does not respond to a Section 1600 data request, ''NERC has the authority under the [Rules of Procedure] to take such action as NERC deems appropriate to address a situation where a Rule of Procedure cannot practically be complied with or has been violated.'' [109] NERC explains that the Section 1600 data request process provides the flexibility to revise or update the data request, if necessary, as well as ''the flexibility to determine the appropriate timeline for submitting the data.'' [110] NERC states that while it may continue to use the Reliability Standards for data collection for evidence of compliance or to facilitate sharing of information between entities for BES operations, it ''has found the [Rules of Procedure] Section 1600 process to be effective for data collection to assess system performance.'' [111] NERC cites a standing Section 1600 data request for entities to submit quarterly data on Protection System Misoperations as an example.

62. LPPC supports the use of the Section 1600 process to facilitate enhanced Cyber Security Incident reporting. LPPC states that it ''supports a more flexible approach to collection of actionable information through the data request process outlined in NERC ROP Section 1600.'' [112] LPPC asserts that the data request approach offers flexibility that the standards development process does not. Specifically, LPPC states that ''compliance with a NERC data request is mandatory for applicable entities, while the data request procedures specified under [Rules of Procedure] Section 1600 also provide a more efficient process to update or revise a data request as needed to respond to rapidly-changing security threats.'' [113] Finally, LPPC opines that ''it seems appropriate to remove the data collection process from the enforcement process associated with mandatory Reliability Standards.'' [114]

63. APS, BPA, Resilient Societies, IRC, and NRG oppose the use of the Section 1600 process to facilitate enhanced Cyber Security Incident reporting. APS asserts that a request for data pursuant to Section 1600 would not effectively address the reporting gap and current lack of awareness of cyber-related incidents. Specifically, APS argues that a data request would create an independent, redundant reporting obligation to NERC or a regional entity and would subject the provisions of reported information to the confidentiality and data sharing processes set forth in Rules of Procedure Section 1500, unnecessarily delaying sharing and distribution of information.[115] APS states further that the Section 1600 process ''adds significant additional administrative burden for all involved entities, which is inefficient and unnecessary and presents a potential obstacle to the very sharing and distribution that is a critical part of the Commission's objectives set forth in the NOPR.'' [116]

64. BPA comments that a data request is not an effective means of obtaining information about cyber security incidents. BPA explains that Section 1600 data requests ''are one time requests for existing data, and [. . .] not the appropriate vehicle for ensuring ongoing reporting necessary to make data about Cyber Security Incidents effective.'' [117] Resilient Societies states that ''[e]xamination of NERC Rules of Procedure Section 1600 shows the intent of [the] rule is to facilitate one-time requests for data.'' [118] Therefore, Resilient Societies asserts that the Section 1600 reporting procedures ''would be a poor fit for a standing order for data on cybersecurity incidents that occur continually.'' [119] NRG opposes the use of the Section 1600 data request process asserting that a request for data or information would neither address the current lack of awareness of cyber-related incidents, nor satisfy the goals of the proposed directive.

65. APS, as discussed above, suggests adopting the DOE Electric Disturbance

Events, Form OE–417 as the primary reporting tool for Cyber Security Events. EnergySec, for its part, suggests that the Commission could direct NERC to require entities to develop and implement an information sharing plan.[120] According to EnergySec, such an approach should provide broad discretion to entities and ensure that compliance oversight efforts cannot result in second-guessing of decisions regarding which information to share, when, or with whom. IRC suggests, alternatively, that the Commission allow entities to comply with the reporting requirements by participating in the Cyber Risk Information Sharing program. IRC explains that the program allows entities to automatically report information to E–ISAC for analysis against classified information. IRC states that responsible entities that ''automatically report indicators of compromise through these systems will share information at machine speed, and this should be considered superior to manual reporting, which requires much slower decision-making.'' [121]

3. Commission Determination

66. As discussed above, we adopt the NOPR proposal and direct NERC to develop modifications to the NERC Reliability Standards to improve mandatory reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the BES. We have considered the arguments raised in the comments for using Reliability Standards, Section 1600 information and data requests, and other vehicles to implement augmented Cyber Security Incident reporting. On balance, we conclude that broadened mandatory reporting pursuant to Reliability Standard requirements is more aligned with the seriousness and magnitude of the current threat environment and the more effective approach to improve awareness of existing and future cyber security threats and potential vulnerabilities.

67. First, the development of a Reliability Standard provides the Commission with an opportunity to review and ultimately approve a new or modified Reliability Standard, ensuring that the desired goals of the directive are met. Moreover, the Reliability Standards development process allows for the collaboration of industry experts in developing a draft standard and also gives interested entities broader opportunity to participate and comment on any proposal that is developed. In contrast, NERC's process for developing a Section 1600 data request provides for less stakeholder input and only informal review of a draft data request by Commission staff. Thus, in this circumstance, the standards development process is preferable for the development of augmented cyber incident reporting requirements that satisfy the scope of the Commission's directive.

68. Second, the development of a Reliability Standard provides better assurance of accurate, complete, and verifiable reporting of cyber security incidents. The Commission has well-defined authority and processes under section 215(e) of the FPA to audit and enforce compliance with a Reliability Standard. While NERC notes that a responsible entity must respond to a NERC Section 1600 data request, NERC cannot impose sanctions on registered entities who fail to respond to such data requests. Rather, a failure to comply would be a violation of the Commission's regulations,[122] requiring a referral to the Commission for action. Such a process would be a departure from the clearly defined processes used to enforce compliance with the Reliability Standards. Moreover, it is unclear how NERC would even learn of such a failure since, unlike mandatory Reliability Standards, compliance with Section 1600 data requests are not subject to regular audit. Accordingly, given the importance of accurate, complete, and verifiable cyber security incident reporting, we find that the more robust and well-established compliance and enforcement processes associated with mandatory Reliability Standards are desirable in this instance.

69. Third, we are not persuaded by NERC's assertion that a Section 1600 data request is preferable in this instance because it allows for flexibility and faster modification should a need arise for future revisions to the collection of cyber incident reporting data. We do not anticipate that there would be a need to change the parameters of the event report, given that the anticipated reporting requirements should not be technology-specific, but rather, broad enough to capture basic data even as the nature of cyber security incidents evolve. Specifically, the NOPR proposed that the minimum set of attributes to be reported should include: (1) The functional impact, where possible to determine, that the Cyber Security Incident achieved or attempted to achieve; (2) the attack vector that was used to achieve or attempted to achieve the Cyber Security Incident; and (3) the level of intrusion that was achieved or attempted as a result of the Cyber Security Incident. Since these attributes are general in nature and not technology specific, they would not need to be refined as the underlying cyber threats evolve, nor would they need to be refined quickly.

70. In a similar vein, the assets (*i.e.,* EACMS) subject to the enhanced reporting requirements should be identified based on function, as opposed to a specific technology that could require a modification in the reporting requirements should the underlying technology change. As discussed above, those functions must include, at a minimum: (1) Authentication; (2) monitoring and logging; (3) access control; (4) interactive remote access; and (5) alerting. Finally, since the level of attempted compromise that warrants reporting should reflect unauthorized access attempts and other confirmed suspicious activity, we do not anticipate that a modification would be required in the future. Nevertheless, should the situation demand a more timely change in data collection or should NERC desire to collect additional information that is outside the scope of the proposed Reliability Standard, NERC could use the Section 1600 data request process to supplement information reported under a mandatory Reliability Standard.

71. Finally, requiring a data collection in a Reliability Standard is consistent with existing practices since responsible entities are currently required to maintain the types of information that would lead to a reportable Cyber Security Incident pursuant to Reliability Standard CIP–007–6, Requirement R4.1.

72. While we recognize that NERC could likely develop a Section 1600 data request more quickly than a mandatory Reliability Standard, given the potential complexity of considering reporting requirements for the various EACMS, we believe that the technical depth of a standard development process is more appropriate for this case. Although NERC states that it has successfully used ROP Section 1600 to collect data on system performance, in this circumstance the information being reported relates to threats and potential compromises that may require immediate or near-term action as opposed to retrospective reporting on Misoperations, as Section 1600 has been used.

73. We also do not support adopting the DOE Form OE–417 as the primary

[120] EnergySec Comments at 6.

[121] IRC Comments at 7.

[122] 18 CFR 39.2(b) (2017) (''All entities subject to the Commission's reliability jurisdiction . . . shall comply with applicable Reliability Standards, the Commission's regulations, and applicable Electric Reliability Organization and Regional Entity Rules made effective under this part.'').

reporting tool for reporting Cyber Security Incidents, as suggested by some commenters. The reporting criteria in our directive are distinguishable and more aligned with a risk management approach than the information requested in the DOE Form OE–417. Specifically, the DOE Form OE–417 has twelve generic criteria for filing a report to the DOE, of which only two reflect the criteria outlined in the NOPR proposal, which are discussed in the following section. The DOE Form OE–417 does not address factors such as attack vector, functional impact and level of intrusion. In addition, the definition of a ''Cyber Event'' in the DOE Form OE–417 filing instructions does not align with the definition of Cyber Security Incident in the NERC Glossary of Terms, let alone a Reportable Cyber Security Incident.[123] Nor does the DOE Form OE–417 require reporting to E–ISAC or ICS–CERT as our directive requires.

74. In sum, we conclude that modifications to the NERC Reliability Standards to improve mandatory reporting of Cyber Security Incidents, including incidents that might facilitate subsequent efforts to harm the reliable operation of the BES, is the appropriate approach to improve Cyber Security Incident reporting.

D. Content and Timing of a Cyber Security Incident Report

1. NOPR

75. The NOPR proposed to direct that NERC modify the CIP Reliability Standards to specify the required content in a Cyber Security Incident report. Specifically, the NOPR proposed that the minimum set of attributes to be reported should include: (1) The functional impact, where possible, that the Cyber Security Incident achieved or attempted to achieve; (2) the attack vector that was used to achieve or attempt to achieve the Cyber Security Incident; and (3) the level of intrusion that was achieved or attempted as a result of the Cyber Security Incident. The NOPR noted that the proposed attributes are the same as attributes already used by DHS for its multi-sector reporting and summarized by DHS in an annual report. The NOPR stated that specifying the required content should improve the quality of reporting by ensuring that basic information is provided; and allowing for ease of comparison across reports by ensuring that each report includes specified fields of information. The NOPR sought comment on the proposed attributes and, more generally, the appropriate content for Cyber Security Incident reporting to improve awareness of existing and future cyber security threats and potential vulnerabilities.

76. In addition, the NOPR proposed to direct NERC to establish requirements outlining deadlines for filing a report once a compromise or disruption to reliable BES operation, or an attempted compromise or disruption, is identified by a responsible entity. The NOPR stated that the reporting timeline should reflect the actual or potential threat to reliability, with more serious incidents reported in a more timely fashion. The NOPR explained that a reporting timeline that takes into consideration the severity of a Cyber Security Incident should minimize potential burdens on responsible entities.

77. The NOPR also proposed that the reports submitted under the enhanced mandatory reporting requirements would be provided to E–ISAC, similar to the current reporting scheme under Reliability Standard CIP–008–5, as well as ICS–CERT or any successor organization. While the NOPR stated that the detailed incident report would not be submitted to the Commission, the NOPR proposed to direct NERC to file publicly an annual report reflecting the Cyber Security Incidents reported to NERC during the previous year. Specifically, the NOPR proposed to direct NERC to file annually an anonymized report providing an aggregated summary of the reported information, similar to the ICS–CERT annual report.[124]

2. Comments

78. NERC supports the minimum set of reporting attributes proposed in the NOPR, stating that ''this level of detail regarding each reported Cyber Security Incident will not only help NERC understand the specific threat but also help NERC understand trends in threats over time.'' [125] NERC also does not oppose either filing an annual, anonymized summary of the reports with the Commission, or submitting the reports of U.S.-based entities to the ICS–CERT in addition to E–ISAC. Finally, while NERC supports the concept of imposing a deadline for entities to submit full reports of Cyber Security Incidents, NERC requests flexibility to determine the appropriate timeframe. Specifically, NERC states that it ''will determine an appropriate deadline for reports so that NERC can use the data for awareness and early indicators of potential compromise but also consider whether reporting for historical analysis can provide insight to the trends and effectiveness of industry's security controls.'' [126]

79. ITC, IRC, and NRG support the minimum set of reporting attributes proposed in the NOPR. ITC states that the NOPR proposal reflects ''a reasonable set of baseline requirements for reporting.'' [127] While ITC raises a concern that the collective information in a report could potentially lead to the identification of the reporting entity, ITC states that it ''will work within the NERC stakeholder and standards development process to ensure that the Standards submitted in response to the Commission's final rule are structured to preserve anonymity to the maximum extent practicable.'' [128] IRC asserts that ''it will be beneficial for responsible entities to report indicators of compromise that are detected in potential cyberattacks against their systems in standard form.'' [129] NRG recommends that mandatory reporting include: ''content Date, Time, Duration of Incident, Origination of the attack, threat vector, targeted system (or OS), vulnerability exploited, [and] method used to stop/prevent the attack.'' [130]

80. Appelbaum, APS, EnergySec, Resilient Societies, and Idaho Power raise concerns with the minimum set of reporting attributes proposed in the NOPR. According to Appelbaum, a count by category of asset, attack vector, and impact is sufficient for the mandatory reporting. APS contends that ''because each entity's network topology, architecture, applications, and other characteristics are different, any requirement to provide the functional impact and level of intrusion as part of reporting is of very low value and should not be included as mandatory attributes of reporting.'' [131]

81. APS, however, ''agrees that information regarding attack vectors could be more relevant, actionable information to be shared.'' [132] EnergySec expresses concern that including the proposed set of reporting attributes as a requirement could be construed to require significant forensic and analysis efforts. Resilient Societies suggests that

[123] *See* Department of Energy Electric Emergency Incident and Disturbance Report—Form OE 417. Form OE–417 defines a Cyber Event as a disruption on the electrical system and/or communication system(s) caused by unauthorized access to computer software and communications systems or networks including hardware, software, and data. *https://www.oe.netl.doe.gov/oe417.aspx.*

[132] *Id.* at 12.

the Commission leverage prior work done by the federal government as opposed to establishing new report content. Specifically, Resilient Societies suggests that the Commission adopt the US–CERT ''Federal Incident Notification Guidelines.'' Idaho Power states that a ''description of the event and the system(s) affected along with a fact pattern describing the situation and known information at the time the report is submitted should be sufficient.'' [133]

82. With regard to the timing of reports, ITC questions whether an initial report of a Cyber Security Incident would have to be submitted to ICS–CERT as well as E–ISAC. ITC opines that ''the existing one-hour reporting requirement poses a significant compliance challenge, and that requiring that the initial report also be provided to ICS–CERT would be unworkable under that timeframe.'' [134] IRC states that ''[t]he timeframe for completing a full report depends on the scale and scope of the investigation [and] FERC should consider requiring that reports be updated at a certain frequency until the full report is complete.'' [135] IRC recommends a 90-day update requirement until a report is finalized. NRG recommends that Cyber Security Incident reports should be submitted after existing industry processes have been followed relating to Incident Reporting and Response Plans. In addition, NRG recommends that the Commission consider directing NERC to file a quarterly report in addition to the annual report.

83. APS recommends aligning the timing of any mandatory reporting obligations with the timing dictated in Form OE–417. APS contends that reporting events that ''could, but didn't, cause harm to the BES and/or facilitate subsequent efforts to harm . . . should be far enough removed from the incident to not divert resources from incident response and to ensure that enough details are known about the incident to provide an accurate, thorough report.[136]

84. EnergySec agrees that clear timelines should be included in any new mandatory Cyber Security Incident requirements. EnergySec further comments that the timelines should factor in the severity of the incident and the level of effort required to complete an investigation. Resilient Societies offers that ''[i]n an ideal world, reporting of cybersecurity incidents would take place at machine speed'' and suggests that the Commission ''allow and preferably require automated reporting, at least for an initial report.'' [137] Idaho Power states that, should the Commission require timelines for reporting, it should ensure that an entity has adequate time to analyze each event before the reporting deadline.

85. Lasky supports entities being required to report Cyber Security Incidents to both E–ISAC and ICS–CERT, and states that ''it would be prudent to report all incidents to the United States Cyber Emergency Response Team (US–CERT)'' as well.[138]

3. Commission Determination

86. As discussed below, we adopt the NOPR proposal on minimum reporting attributes and timing, in response to the commenters' concerns, but we also leave discretion to NERC to develop the reporting timelines in the standards development process by considering several factors so that the timelines provide for notice based upon the severity of the event and the risk to BES reliability, with updates to follow initial reports.

87. The comments generally support the proposed minimum set of reporting attributes. For example, NERC supports the proposed content for a Cyber Security Incident report, while requesting flexibility to determine the appropriate reporting timeframe. As noted by ITC, the NOPR proposal reflects ''a reasonable set of baseline requirements for reporting.'' [139] Certain comments do raise concerns with the proposed reporting attributes, especially in the case of attempts versus actual compromises.

88. In our view, a new or revised Cyber Security Incident report should include, at a minimum, the information outlined in the NOPR proposal, where available. Specifically, the minimum set of attributes to be reported should include: (1) The functional impact, where possible, that the Cyber Security Incident achieved or attempted to achieve; (2) the attack vector that was used to achieve or attempted to achieve the Cyber Security Incident; and (3) the level of intrusion that was achieved or attempted or as a result of the Cyber Security Incident. In addition, we agree that any reporting requirement should not take away from efforts to mitigate a potential compromise.

89. With regard to timing, we conclude that NERC should establish reporting timelines for when the responsible entity must submit Cyber Security Incident reports to the E–ISAC and ICS–CERT based on a risk impact assessment and incident prioritization approach to incident reporting.[140] This approach would establish reporting timelines that are commensurate with the adverse impact to the BES that loss, compromise, or misuse of those BES Cyber Systems could have on the reliable operation of the BES. Higher risk incidents, such as detecting malware within the ESP and associated EACMS or an incident that disrupted one or more reliability tasks, could trigger the report to be submitted to the E–ISAC and ICS–CERT within a more urgent timeframe, such as within one hour, similar to the current reporting deadline in Reliability Standard CIP–008–5.[141] For lower risk incidents, such as the detection of attempts at unauthorized access to the responsible entity's ESP or associated EACMS, an initial reporting timeframe between eight and twenty-four hours would provide an early indication of potential cyber attacks.[142] For situations where a responsible entity identifies other suspicious activity associated with an ESP or associated EACMS, a monthly report could, as NERC states, assist in the analysis of trends in activity over time.[143]

90. With regard to the appropriate recipients for Cyber Security Incident reports, we determine that the reports should be provided to E–ISAC, similar to the current reporting scheme under Reliability Standard CIP–008–5, as well as ICS–CERT or its successor.[144]

[143] *See* NERC Comments at 14.

[144] The DHS ICS–CERT is undergoing a reorganization and rebranding effort. In the event

Continued

Reporting directly to E–ISAC and ICS–CERT will result in cyber threat information being provided to the organizations best suited to analyze and, to the extent necessary, timely inform responsible entities of cyber threats. In addition, reporting directly to E–ISAC and ICS–CERT addresses the concerns discussed above regarding the confidentiality of reported Cyber Security Incident information. We also find that it is reasonable for NERC to file annually an anonymized report providing an aggregated summary of the reported information, similar to the ICS–CERT annual report. The annual report will provide the Commission, NERC, and the public a better understanding of any Cyber Security Incidents that occurred during the prior year without releasing information on specific responsible entities or Cyber Security Events.

91. Therefore, we conclude that the minimum set of attributes to be reported should include: (1) The functional impact, where possible, that the Cyber Security Incident achieved or attempted to achieve; (2) the attack vector that was used to achieve or attempted to achieve the Cyber Security Incident; and (3) the level of intrusion that was achieved or attempted or as a result of the Cyber Security Incident. NERC may augment the list should it determine that additional information would benefit situational awareness of cyber threats. As discussed above, we also conclude that NERC should establish a reporting timeline that provides for notice based upon the severity of the event and the risk to BES reliability, with updates to follow initial reports. We also support the adoption of an online reporting tool to streamline reporting and reduce burdens on responsible entities to the extent the option is available.[145]

E. Other Issues

1. Comments

92. NYPSC supports the NOPR proposal, but notes that if the Commission adopts the NOPR proposal, ''the only additional information that state entities would gain is an annual compilation of incidents reported to federal entities.'' [146] NYPSC claims that an annual report would not provide states with sufficient information on a timely basis so that they can ensure that corrective actions can be taken. Therefore, NYPSC argues that appropriate state entities should also be provided with the cyber reporting information when it is filed with the ''federal authorities.''

93. Microsoft raises a concern that the NOPR proposal is not clear as to whether the modified CIP Reliability Standards would apply to responsible entities that use a commercial cloud service to operate cloud-based BES Cyber Systems. Specifically, Microsoft requests that the Commission ''confirm that cloud service providers that provide services to Registered Entities are not required to register with NERC based on their provision of [cloud-based] services, and . . . are not responsible for compliance with the CIP Reliability Standards.'' [147] Microsoft asserts that clarifying the status of cloud service providers is important to foster technical innovation.

2. Commission Determination

94. While we appreciate NYPSC's interest in receiving Cyber Security Incident reports when reported to E–ISAC and ICS–CERT, state entities will have access to the same information that is reported to the Commission (*i.e.,* the annual, anonymized summary). Should a state entity determine that it requires additional information from a responsible entity under its jurisdiction, the state entity can work within its own jurisdiction to procure additional information. Our directive is intended to enhance the quality of information received by E–ISAC and ICS–CERT, and directing additional sharing with state entities is outside the scope of this proceeding.

95. We decline to grant Microsoft's requested clarification regarding the potential registration status of cloud service providers because it is outside the scope of this proceeding. Specifically, Microsoft's requested clarification addresses a question regarding registration of cloud service providers under the NERC functional model, as opposed to the specifics of enhanced Cyber Security Incident reporting. The purpose of this proceeding is not to make a determination regarding the registration status of cloud service providers and we have not received input from other interested entities.

III. Information Collection Statement

96. The FERC–725 information collection requirements contained in this Final Rule are subject to review by the Office of Management and Budget (OMB) under section 3507(d) of the Paperwork Reduction Act of 1995.[148] OMB's regulations require approval of certain information collection requirements imposed by agency rules.[149] Upon approval of a collection of information, OMB will assign an OMB control number and expiration date. Respondents subject to the filing requirements of this rule will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number. The Commission solicits comments on the Commission's need for this information, whether the information will have practical utility, the accuracy of the burden estimates, ways to enhance the quality, utility, and clarity of the information to be collected or retained, and any suggested methods for minimizing respondents' burden, including the use of automated information techniques.

97. The Commission will submit these proposed reporting requirements to OMB for its review and approval under section 3507(d) of the PRA because the Final Rule results in nonsubstantive/non-material changes in paperwork burden. The Final Rule directs NERC to make Cyber Security reporting changes across all applicable Reliability Standards. These proposed changes will be covered by the FERC–725 information collection (Certification of Electric Reliability Organization; Procedures for Electric Reliability Standards) [OMB Control No. 1902–0225]). FERC–725 includes the ERO's overall responsibility for developing Reliability Standards to include any Reliability Standards that relate to Cyber Security Incident reporting. There will be no change to the Public Reporting Burden as it affects the FERC–725 information collection.

98. Comments are solicited on the Commission's need for the information proposed to be reported, whether the information will have practical utility, ways to enhance the quality, utility, and clarity of the information to be collected, and any suggested methods for minimizing the respondent's burden, including the use of automated information techniques.

99. Internal review: The Commission has reviewed the approved changes and has determined that the changes are necessary to ensure the reliability and integrity of the Nation's Bulk-Power System.

100. Interested persons may obtain information on the reporting requirements by contacting the

that ICS–CERT no longer exists, its successor will assume the role as incident report recipient.

[145] An online reporting tool will streamline the effort and allow for direct input into a database for a faster turnaround to those that may need to know about the information. For example, *see https://www.us-cert.gov/forms/report*.

IV. Regulatory Flexibility Act Analysis

102. The Regulatory Flexibility Act of 1980 (RFA) [150] generally requires a description and analysis of final rules that will have significant economic impact on a substantial number of small entities.

103. By only proposing to direct NERC, the Commission-certified ERO, to develop modified Reliability Standards for Cyber Security Incident reporting, this Final Rule will not have a significant or substantial impact on entities other than NERC. Therefore, the Commission certifies that this Final Rule will not have a significant economic impact on a substantial number of small entities.

104. Any Reliability Standards proposed by NERC in compliance with this rulemaking will be considered by the Commission in future proceedings. As part of any future proceedings, the Commission will make determinations pertaining to the Regulatory Flexibility Act based on the content of the Reliability Standards proposed by NERC.

V. Environmental Analysis

105. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.[151] The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment. Included in the exclusion are rules that are clarifying, corrective, or procedural or that do not substantially change the effect of the regulations being amended.[152] The actions proposed herein to augment current reporting requirements fall within this categorical exclusion in the Commission's regulations.

VI. Document Availability

106. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) and in the Commission's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE, Room 2A, Washington, DC 20426.

107. From the Commission's Home Page on the internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number of this document, excluding the last three digits, in the docket number field. User assistance is available for eLibrary and the Commission's website during normal business hours from the Commission's Online Support at (202) 502–6652 (toll free at 1–866–208–3676) or email at *ferconlinesupport@ferc.gov,* or the Public Reference Room at (202) 502–8371, TTY (202) 502–8659. Email the Public Reference Room at *public.referenceroom@ferc.gov.*

VII. Effective Date and Congressional Notification

108. The Final Rule is effective October 1, 2018. The Commission has determined that this Final Rule imposes no substantial effect upon either NERC or NERC registered entities [153] and, with the concurrence of the Administrator of the Office of Information and Regulatory Affairs of OMB, that this rule is not a ''major rule'' as defined in section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996. This Final Rule is being submitted to the Senate, House, and Government Accountability Office.

By the Commission.

Issued: July 19, 2018.

This document identifies updates to the market dominant and the competitive product lists, which appear as 39 CFR Appendix A to Subpart A of Part 3020—Market Dominant Product List and 39 CFR Appendix B to Subpart A of Part 3020—Competitive Product List, respectively. Publication of the updated product lists in the **Federal Register** is addressed in the Postal Accountability and Enhancement Act (PAEA) of 2006.

Authorization. The Commission process for periodic publication of updates was established in Docket Nos. MC2010–21 and CP2010–36, Order No. 445, April 22, 2010, at 8.

Changes. The product lists are being updated by publishing replacements in their entirety of 39 CFR Appendix A to Subpart A of Part 3020—Market Dominant Product List and 39 CFR Appendix B to Subpart A of Part 3020—Competitive Product List. The following products are being added, removed, or moved within the product lists:

Competitive Product List

1. First-Class Package Service Contract 92 (MC2018–133 and CP2018–189) (Order No. 4561), added April 2, 2018.
2. Priority Mail Contract 426 (MC2018–134 and CP2018–190) (Order No. 4564), added April 3, 2018.
3. Priority Mail & First-Class Package Service Contract 77 (MC2018–136 and CP2018–197) (Order No. 4579), added April 17, 2018.
4. Priority Mail Contract 427 (MC2018–139 and CP2018–200) (Order No. 4580), added April 17, 2018.
5. Priority Mail Express, Priority Mail & First-Class Package Service Contract 33 (MC2018–137 and CP2018–198) (Order No. 4581), added April 17, 2018.
6. Priority Mail Express & Priority Mail Contract 64 (MC2018–138 and CP2018–199) (Order No. 4582), added April 17, 2018.
7. Priority Mail Contract 429 (MC2018–141 and CP2018–202) (Order No. 4584), added April 18, 2018.
8. Priority Mail Express & First-Class Package Service Contract 3 (MC2018–135 and CP2018–196) (Order No. 4585), added April 18, 2018.
9. Priority Mail Contract 428 (MC2018–140 and CP2018–201) (Order No. 4586), added April 18, 2018.
10. Priority Mail Contract 430 (MC2018–142 and CP2018–203) (Order No. 4587), added April 18, 2018.
11. Priority Mail Contract 431 (MC2018–143 and CP2018–205) (Order No. 4590), added April 24, 2018.
12. Priority Mail Contract 432 (MC2018–144 and CP2018–207) (Order No. 4597), added April 30, 2018.
13. Priority Mail & First-Class Package Service Contract 78 (MC2018–145 and CP2018–208) (Order No. 4600), added May 3, 2018.
14. Priority Mail & First-Class Package Service Contract 79 (MC2018–146 and CP2018–209) (Order No. 4601), added May 3, 2018.
15. Priority Mail Express, Priority Mail & First-Class Package Service Contract 34 (MC2018–147 and CP2018–211) (Order No. 4603), added May 8, 2018.
16. Priority Mail Express, Priority Mail & First-Class Package Service Contract 35 (MC2018–148 and CP2018–214) (Order No. 4609), added May 18, 2018.
17. Priority Mail Express & Priority Mail Contract 65 (MC2018–151 and

CP2018–217) (Order No. 4615), added May 23, 2018.

18. Priority Mail Express, Priority Mail & First-Class Package Service Contract 36 (MC2018–153 and CP2018–219) (Order No. 4616), added May 23, 2018.

19. Priority Mail & First-Class Package Service Contract 80 (MC2018–152 and CP2018–218) (Order No. 4617), added May 23, 2018.

20. Priority Mail Express, Priority Mail & First-Class Package Service Contract 37 (MC2018–154 and CP2018–223) (Order No. 4625), added May 29, 2018.

21. Priority Mail Contract 433 (MC2018–149 and CP2018–215) (Order No. 4626), added May 30, 2018.

22. First-Class Package Service Contract 93 (MC2018–155 and CP2018–224) (Order No. 4627), added May 30, 2018.

23. Priority Mail Contract 435 (MC2018–157 and CP2018–226) (Order No. 4637), added June 7, 2018.

24. Priority Mail Contract 434 (MC2018–156 and CP2018–225) (Order No. 4638), added June 7, 2018.

25. Priority Mail Express Contract 62 (MC2018–158 and CP2018–228) (Order No. 4642), added June 13, 2018.

26. Priority Mail Contract 438 (MC2018–161 and CP2018–231) (Order No. 4643), added June 13, 2018.

27. Priority Mail Contract 436 (MC2018–159 and CP2018–229) (Order No. 4644), added June 13, 2018.

28. Priority Mail Contract 437 (MC2018–160 and CP2018–230) (Order No. 4645), added June 13, 2018.

29. Priority Mail Contract 440 (MC2018–163 and CP2018–234) (Order No. 4650), added June 19, 2018.

30. Priority Mail Contract 441 (MC2018–164 and CP2018–235) (Order No. 4651), added June 19, 2018.

31. Priority Mail Contract 439 (MC2018–162 and CP2018–233) (Order No. 4653), added June 19, 2018.

32. Priority Mail Express & Priority Mail Contract 66 (MC2018–165 and CP2018–236) (Order No. 4656), added June 20, 2018.

33. Priority Mail Contract 442 (MC2018–166 and CP2018–238) (Order No. 4657), added June 20, 2018.

34. Priority Mail Express & Priority Mail Contract 67 (MC2018–167 and CP2018–239) (Order No. 4662), added June 21, 2018.

35. Priority Mail Contract 443 (MC2018–168 and CP2018–240) (Order No. 4663), added June 21, 2018.

36. Priority Mail Express & Priority Mail Contract 68 (MC2018–169 and CP2018–241) (Order No. 4664), added June 21, 2018.

37. Priority Mail Contract 444 (MC2018–170 and CP2018–242) (Order No. 4665), added June 21, 2018.

38. Priority Mail Contract 445 (MC2018–171 and CP2018–243) (Order No. 4666), added June 21, 2018.

39. Priority Mail Express, Priority Mail & First-Class Package Service Contract 38 (MC2018–172 and CP2018–244) (Order No. 4667), added June 22, 2018.

40. First-Class Package Service Contract 94 (MC2018–173 and CP2018–245) (Order No. 4668), added June 22, 2018.

41. Priority Mail & First-Class Package Service Contract 81 (MC2018–174 and CP2018–246) (Order No. 4671), added June 25, 2018.

42. Priority Mail & First-Class Package Service Contract 82 (MC2018–175 and CP2018–247) (Order No. 4672), added June 25, 2018.

43. Priority Mail Contract 447 (MC2018–177 and CP2018–249) (Order No. 4673), added June 25, 2018.

44. Priority Mail Contract 446 (MC2018–176 and CP2018–248) (Order No. 4674), added June 25, 2018.

45. Parcel Select Contract 31 (MC2018–179 and CP2018–251) (Order No. 4676), added June 26, 2018.

46. Priority Mail Contract 448 (MC2018–178 and CP2018–250) (Order No. 4677), added June 26, 2018.

47. Priority Mail Express, Priority Mail & First-Class Package Service Contract 39 (MC2018–180 and CP2018–252) (Order No. 4678), added June 26, 2018.

48. Priority Mail Express Contract 63 (MC2018–181 and CP2018–255) (Order No. 4686), added June 28, 2018.

49. Priority Mail Contract 449 (MC2018–182 and CP2018–256) (Order No. 4687), added June 28, 2018.

50. Priority Mail Contract 450 (MC2018–183 and CP2018–257) (Order No. 4688), added June 28, 2018.

The following negotiated service agreements have expired, or have been terminated early, and are being deleted from the Competitive Product List:

1. Priority Mail Express Contract 16 (MC2014–12 and CP2014–16) (Order No. 1941).

2. Priority Mail Express Contract 23 (MC2015–16 and CP2015–20) (Order No. 2296).

3. Priority Mail Contract 94 (MC2014–48 and CP2014–84) (Order No. 2209).

4. Priority Mail Contract 110 (MC2015–29 and CP2015–38) (Order No. 2354).

5. Priority Mail Contract 119 (MC2015–39 and CP2015–50) (Order No. 2393).

6. Priority Mail Contract 121 (MC2015–43 and CP2015–54) (Order No. 2428).

7. Priority Mail Contract 291 (MC2017–85 and CP2017–114) (Order No. 3784).

8. Parcel Select Contract 18 (MC2017–65 and CP2017–93) (Order No. 3724).

9. Priority Mail & First-Class Package Service Contract 2 (MC2015–24 and CP2015–32) (Order No. 2347).

10. Priority Mail & First-Class Package Service Contract 41 (MC2017–48 and CP2017–74) (Order No. 3698).

The following negotiated service agreements have expired, or have been terminated early, and are being deleted from the Market Dominant Product List:

1. PHI Acquisitions, Inc. Negotiated Service Agreement (MC2014–21 and R2014–6) (Notice of Termination of Agreement).

Updated product lists. The referenced changes to the product lists are incorporated into 39 CFR Appendix A to Subpart A of Part 3020—Market Dominant Product List and 39 CFR Appendix B to Subpart A of Part 3020—Competitive Product List.

List of Subjects in 39 CFR Part 3020

Administrative practice and procedure, Postal Service.

For the reasons discussed in the preamble, the Postal Regulatory Commission amends chapter III of title 39 of the Code of Federal Regulations as follows:

PART 3020—PRODUCT LISTS

■ 1. The authority citation for part 3020 continues to read as follows:

Authority: 39 U.S.C. 503; 3622; 3631; 3642; 3682.

■ 2. Revise Appendix A to Subpart A of Part 3020 and Appendix B to Subpart A of Part 3020 to read as follows:

Appendix A to Subpart A of Part 3020—Market Dominant Product List

(An asterisk (*) indicates an organizational class or group, not a Postal Service product.)

BILLING CODE 7710–FW–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2016–0603; FRL–9981–45—Region 5]

Air Plan Approval; Minnesota; PSD Infrastructure SIP Requirements

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving elements of a state implementation plan (SIP) submission from Minnesota regarding the infrastructure requirements of section 110 of the Clean Air Act (CAA) relating to Prevention of Significant Deterioration (PSD) for the 1997 ozone, 1997 fine particulate ($PM_{2.5}$), 2006 $PM_{2.5}$, 2008 lead (Pb), 2008 ozone, 2010 nitrogen dioxide (NO_2), 2010 sulfur dioxide (SO_2), and 2012 $PM_{2.5}$ National Ambient Air Quality Standards (NAAQS). The Minnesota Pollution Control Agency (MPCA) submitted the SIP revision to EPA on October 4, 2016.

DATES: This final rule is effective on August 30, 2018.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2016–0603. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through *www.regulations.gov* or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Eric Svingen, Environmental Engineer, at (312) 353–4489 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Eric Svingen, Environmental Engineer, Attainment Planning and Maintenance Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 353–4489, *svingen.eric@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA. This supplementary information section is arranged as follows:

I. What is the background of this SIP submission?

This rulemaking approves a SIP submission from MPCA dated October 4, 2016, which addresses infrastructure requirements relating to PSD for the 1997 ozone, 1997 $PM_{2.5}$, 2006 $PM_{2.5}$, 2008 Pb, 2008 ozone, 2010 NO_2, 2010 SO_2, and 2012 $PM_{2.5}$ NAAQS.

The requirement for states to make infrastructure SIP submissions arises out of CAA section 110(a)(1). Pursuant to CAA section 110(a)(1), states must make SIP submissions ''within 3 years (or such shorter period as the Administrator may prescribe) after the promulgation of a national primary ambient air quality standard (or any revision thereof),'' and these SIP submissions are to provide for the ''implementation, maintenance, and enforcement'' of such NAAQS. The statute directly imposes on states the duty to make these SIP submissions, and the requirement to make the submissions is not conditioned upon EPA's taking any action other than promulgating a new or revised NAAQS. CAA section 110(a)(2) includes a list of specific elements that ''[e]ach such plan'' submission must address.

EPA has historically referred to these SIP submissions made for the purpose of satisfying the requirements of CAA section 110(a)(1) and (2) as ''infrastructure SIP'' submissions. Although the term ''infrastructure SIP'' does not appear in the CAA, EPA uses the term to distinguish this particular type of SIP submission from submissions that are intended to satisfy other SIP requirements under the CAA. This specific rulemaking is only taking action on the infrastructure SIP elements relating to PSD, provided at CAA sections 110(a)(2)(C), 110(a)(2)(D)(i)(II), 110(a)(2)(D)(ii), and 110(a)(2)(J).

In previous rulemakings, EPA addressed Minnesota's infrastructure obligations under the various NAAQS. On July 13, 2011 (76 FR 41075), EPA approved most elements of Minnesota's infrastructure SIP submittal for the 1997 ozone and 1997 $PM_{2.5}$ NAAQS. On October 29, 2012 (77 FR 65478), EPA approved most elements of Minnesota's

infrastructure SIP submittal for the 2006 $PM_{2.5}$ NAAQS. On July 16, 2014 (79 FR 41439), EPA approved most elements of Minnesota's infrastructure SIP submittal for the 2008 Pb NAAQS. Finally, on October 20, 2015 (80 FR 63436), EPA approved most elements of Minnesota's infrastructure SIP submittal for the 2008 ozone, 2010 NO_2, 2010 SO_2, and 2012 $PM_{2.5}$ NAAQS. However, because Minnesota did not have an approved PSD program at the time of these rulemakings, EPA generally disapproved infrastructure SIP elements relating to PSD in the rulemakings.[1]

MPCA's submission dated October 4, 2016, requested that EPA approve into its SIP Minnesota Rule 7007.3000, which incorporates by reference the Federal PSD rules at 40 CFR 52.21. On July 10, 2017 (82 FR 31741), EPA proposed to approve this request, and on September 26, 2017 (82 FR 44734), EPA finalized approval; the change became effective on October 26, 2017. Therefore, Minnesota is now implementing its own SIP-approved PSD program.

In this rulemaking, as requested by Minnesota, EPA is finding that Minnesota has satisfied all infrastructure SIP elements relating to PSD, at CAA sections 110(a)(2)(C), 110(a)(2)(D)(i)(II), 110(a)(2)(D)(ii), and 110(a)(2)(J), for the 1997 ozone, 1997 $PM_{2.5}$, 2006 $PM_{2.5}$, 2008 Pb, 2008 ozone, 2010 NO_2, 2010 SO_2, and 2012 $PM_{2.5}$ NAAQS.

II. What guidance is EPA using to evaluate this SIP submission?

EPA's guidance relating to infrastructure SIP submissions can be found in a guidance document entitled ''Guidance on SIP Elements Required Under Sections 110(a)(1) and (2) for the 1997 8-hour Ozone and $PM_{2.5}$ [2] National Ambient Air Quality Standards'' (2007 Guidance).[3] Further guidance is provided in a September 13, 2013, document entitled ''Guidance on Infrastructure State Implementation Plan (SIP) Elements under CAA Sections 110(a)(1) and (2)'' (2013 Guidance).[4]

III. What is the result of EPA's review of this SIP submission?

Pursuant to CAA section 110(a), states must provide reasonable notice and opportunity for public hearing for all infrastructure SIP submissions. MPCA commenced a public comment period on June 20, 2016, and closed the public comment period on July 20, 2016. Minnesota received three comments, and provided a response to comments in its submittal.

Minnesota provided a synopsis of how its SIP meets each of the applicable requirements in CAA sections 110(a)(2)(C), 110(a)(2)(D)(i)(II), 110(a)(2)(D)(ii), and 110(a)(2)(J) for the 1997 ozone, 1997 $PM_{2.5}$, 2006 $PM_{2.5}$, 2008 Pb, 2008 ozone, 2010 NO_2, 2010 SO_2, and 2012 $PM_{2.5}$ NAAQS, as applicable.

On May 17, 2018 (83 FR 22913), EPA published a proposed rule that would approve this submission into Minnesota's SIP. This proposed rule contained a detailed evaluation of how Minnesota's submission satisfies certain requirements under CAA section 110. Two comments were received; neither is relevant to this rulemaking. Therefore, EPA is finalizing this rule as proposed.

IV. What action is EPA taking?

EPA is approving the submission from Minnesota certifying that its current SIP is sufficient to meet the infrastructure SIP requirements relating to PSD, at CAA sections 110(a)(2)(C), 110(a)(2)(D)(i)(II), 110(a)(2)(D)(ii), and 110(a)(2)(J), for the 1997 ozone, 1997 $PM_{2.5}$, 2006 $PM_{2.5}$, 2008 Pb, 2008 ozone, 2010 NO_2, 2010 SO_2, and 2012 $PM_{2.5}$ NAAQS. EPA is also making some consistency and clarification edits to Minnesota's infrastructure SIP table in 40 CFR 52.1220.

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a

[1] States may develop and implement their own PSD programs, which are evaluated against EPA's requirements for each component. States may alternatively decline to develop their own program, but instead directly implement Federal PSD rules. At the time of the infrastructure rulemakings referenced above, Minnesota had chosen to implement the federally promulgated PSD rules at 40 CFR 52.21, and EPA had delegated to Minnesota the authority to implement these regulations. The federally promulgated rules satisfied all infrastructure requirements relating to PSD. However, as a delegated program, these infrastructure elements were not approved into the Minnesota SIP.

[2] $PM_{2.5}$ refers to particles with an aerodynamic diameter of less than or equal to 2.5 micrometers, oftentimes referred to as ''fine'' particles.

[3] *https://www3.epa.gov/ttn/naaqs/aqmguide/collection/cp2/20071002_harnett_110(a)_sip_guidance.pdf.*

[4] *https://www3.epa.gov/airquality/urbanair/sipstatus/docs/Guidance_on_Infrastructure_SIP_Elements_Multipollutant_FINAL_Sept_2013.pdf.*

copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 1, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: July 17, 2018.

Cathy Stepp,

Regional Administrator, Region 5.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

■ 2. In § 52.1220, the table in paragraph (e) is amended by:

■ i. Removing the entry for ''CAA 110(a)(2)(D)(i) SIP-Interstate Transport''.

■ ii. Revising the entries for ''Section 110(a)(2) Infrastructure Requirements for the 1997 8-hour ozone NAAQS''; ''Section 110(a)(2) Infrastructure Requirements for the 1997 $PM_{2.5}$ NAAQS''; ''Section 110(a)(2) Infrastructure Requirements for the 2006 24-Hour $PM_{2.5}$ NAAQS''; ''Section 110(a)(2) Infrastructure Requirements for the 2008 lead (Pb) NAAQS''; ''Section 110(a)(2) Infrastructure Requirements for the 2008 ozone NAAQS''; ''Section 110(a)(2) Infrastructure Requirements for the 2010 nitrogen dioxide (NO_2) NAAQS''; ''Section 110(a)(2) Infrastructure Requirements for the 2010 sulfur dioxide (SO_2) NAAQS''; and ''Section 110(a)(2) Infrastructure Requirements for the 2012 fine particulate matter ($PM_{2.5}$) NAAQS''.

The revisions reads as follows:

§ 52.1220 Identification of plan.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2017–0535; FRL–9981–46—Region 5]

Air Plan Approval; Indiana; Air Quality Standards Update for the 2015 Ozone Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a September 7, 2017, request by the Indiana Department of Environmental Management (IDEM) to revise the Indiana state implementation plan (SIP) for ozone. IDEM revised its ozone standard in order to be consistent with EPA's 2015 revisions to the 8-hour national ambient air quality standards (NAAQS). IDEM also revised references to the monitoring test methods in its rules to be consistent with the current EPA test methods. EPA is also approving administrative revisions to regulations addressing other ambient air quality standards.

DATES: This final rule is effective on August 30, 2018.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2017–0535. All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *i.e.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through *www.regulations.gov* or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays. We recommend that you telephone Matt Rau, Environmental Engineer, at (312) 886–6524 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT: Matt Rau, Environmental Engineer, Control Strategies Section, Air Programs Branch (AR–18J), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–6524, *rau.matthew@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document whenever ''we,'' ''us,'' or ''our'' is used, we mean EPA. This supplementary information section is arranged as follows:

I. Background

On October 26, 2015 (80 FR 65291), EPA revised the primary and secondary ozone NAAQS from 0.075 to 0.070 parts per million (ppm), daily maximum 8-hour concentration, codified at 40 CFR 50.19. EPA also revised the monitoring test methods for ozone, which are codified at 40 CFR part 50, appendices D and U, and at 40 CFR part 53.

On April 11, 2017, IDEM revised its ambient air quality primary and secondary standards for ozone to be consistent with EPA's 2015 revision, and codified that revision at 326 Indiana Administrative Code (IAC) 1–3–4, Ambient Air Quality Standards. IDEM revised 326 IAC 1–3–4(4)(B) to update its references to the Federal monitoring test methods. Indiana also made administrative revisions throughout 326 IAC 1–3–4 for ambient air quality standards other than ozone. This includes changing ''shall represent'' to ''represents'' and ''shall'' to ''must.''

On September 7, 2017, IDEM submitted the revisions of 326 IAC 1–3–4 to EPA and requested their approval into the Indiana SIP. EPA proposed approving 326 IAC 1–3–4, as revised, on May 2, 2018 (83 FR 19194).

II. Public Comment

A public comment period was provided in the May 2, 2018 (83 FR 19194) proposed rule. The comment period closed on June 1, 2018. Two comments were submitted during the comment period. Both comments raised issues outside the scope of this rulemaking.

III. What action is EPA taking?

EPA is approving revisions related to Indiana's ambient air quality standards in 326 IAC 1–3–4 into the Indiana SIP. The revisions to 326 IAC 1–3–4 include making IDEM's ozone standard consistent with the 2015 8-hour ozone NAAQS, as codified at 40 CFR part 50, and making IDEM's monitoring test methods for ozone consistent with the methods codified at 40 CFR part 50 and 40 CFR part 53. Further, administrative revisions were made to IDEM's other ambient air quality standards in 326 IAC 1–3–4. IDEM submitted the SIP revision request on September 7, 2017.

IV. Incorporation by Reference

In this rule, EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the Indiana Regulations described in the amendments to 40 CFR part 52 set forth below. EPA has made, and will continue to make, these documents generally available through *www.regulations.gov,* and at the EPA Region 5 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by EPA for inclusion in the State implementation plan, have been incorporated by reference by EPA into that plan, are fully federally enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.[1]

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities

[1] 62 FR 27968 (May 22, 1997).

under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

• Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

• Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

• Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

• Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

• Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

• Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 1, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2018–0001; FRL–9981–50-Region 10]

Air Plan Approval; Washington; Regional Haze Progress Report

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving a revision to the regional haze State Implementation Plan (SIP) submitted by Washington on November 6, 2017. Washington submitted its Regional Haze Progress Report (''progress report'' or ''report'') and a negative declaration stating that further revision of the existing regional haze SIP is not needed at this time.

Washington submitted both the progress report and the negative declaration in the form of implementation plan revisions as required by federal regulations. The progress report addresses the federal Regional Haze Rule requirements under the Clean Air Act to submit a report describing progress in achieving reasonable progress goals established for regional haze and a determination of the adequacy of the state's existing plan addressing regional haze.

DATES: This final rule is effective August 30, 2018.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R10–OAR–2018–0001. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and is publicly available only in hard copy form. Publicly available docket materials are available at *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Jeff Hunt at (206) 553–0256, or *hunt.jeff@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document wherever ''we,'' ''us,'' or ''our'' is used, it is intended to refer to the EPA.

I. Background Information

On May 31, 2018, the EPA proposed to approve Washington's Regional Haze Progress Report (83 FR 24954). An explanation of the Clean Air Act requirements, a detailed analysis of the submittal, and the EPA's reasons for proposing approval were provided in the notice of proposed rulemaking, and will not be restated here. The public comment period for the proposal ended July 2, 2018.

II. Response to Comments

We received six comments on the rulemaking. After reviewing the comments, we have determined that four of the comments are outside the scope of our proposed action and fail to identify any material issue necessitating a response. The fifth and sixth comments, submitted by TransAlta Centralia Generation LLC (TransAlta) and an anonymous commenter, are described below.

Comment 0012: In its comment, TransAlta stated: ''We write to comment on the future operations of TransAlta's Centralia Power Plant in the Regional Haze 5-Year Progress Report. The Progress Report and its supporting documents describe the 'retirement' or 'closure' of TransAlta's Centralia Power Plant in reference to reducing emissions and impacts. However, TransAlta and a number of other parties have always anticipated that when the Centralia Power Plant ceases coal-fired operations, it would likely convert one or both boilers to use gas instead of coal. Rather than shuttering the plant, TransAlta envisions retrofitting the facility to accommodate fuel-switching to natural gas as a means to supply power for Washington State until renewable energy is reliably sufficient. TransAlta estimates a reduction in emissions as a result of this fuel-switching, but does not anticipate ceasing operations or closing the Centralia Power Plant.'' TransAlta then requested that the EPA make specific wording changes to the narrative text of the state's progress report, and supporting documents, to reflect this position.

Comment 0013: Purportedly in response to TransAlta's Comment 0012, an anonymous commenter stated: ''The agreement to close a plant means that it is CLOSED. The last minute attempt to re-engineer the plant to burn a different type of fossil fuel is a contradiction of the plan.''

Response: Under the Clean Air Act the EPA has the authority to approve or disapprove SIP revisions submitted by the states. We do not have the authority to modify the narrative text of state submissions, or supporting documents, other than disapproval or partial disapproval. To the extent TransAlta believes that Washington's narrative description of the existing best available retrofit technology (BART) Order 6426 (order) is ambiguous or incorrect regarding facility operation after 2020 and 2025, this comment could have been submitted during the state public comment period. In reviewing *Appendix G. Ecology's Responses to Comments Received during the Public Comment Period,* we see no evidence of TransAlta requesting changes or commenting on this issue during the state public comment period.[1]

As discussed in the proposal for this action, the primary purpose of the progress report is to evaluate whether the existing regional haze plan is adequate for meeting the reasonable progress goals (RPGs) established for the first regional haze planning period, ending in 2018. The TransAlta BART order, as approved into the SIP states, ''Coal units BW21 and BW22 will permanently cease burning coal and be decommissioned as follows: (4.1) One coal fired unit must permanently cease burning coal no later than December 31, 2020. (4.2) The second coal fired unit must permanently cease burning coal no later than December 31, 2025.'' To the extent that TransAlta and Washington may or may not agree about the interpretation of these conditions as they relate to potential future revisions to the BART order, potential future changes under the new source review program, or potential use of the facility beyond 2020 and 2025, we note these issues are outside the scope of this action evaluating progress during the first planning period. We encourage TransAlta to resolve these issues directly with Washington as the state develops the regional haze update for the next planning period (2018–2028). In the interim, we do not believe this comment constitutes a sufficient basis for disapproving or partially disapproving Washington's progress report. As stated in our proposed approval of Washington's Regional Haze Progress Report, the progress report contained the information required by 40 CFR 51.308 and demonstrated that Washington is meeting or exceeding all reasonable progress goals for all Class I areas within Washington's borders, and implementation of the regional haze SIP has enabled other nearby states to meet RPGs for Class I areas where Washington sources are reasonably anticipated to contribute to visibility impairment. In addition, Washington's progress report contained an assessment of the status of all measures included in the SIP that were implemented during the first planning period, such as compliance with the BART emission limit for nitrogen oxides at TransAlta's Centralia Power Plant. Therefore, our position remains that the appropriate action is to approve Washington's Regional Haze Progress Report.

III. Final Action

The EPA is approving the Washington Regional Haze Progress Report, submitted on November 6, 2017, as meeting the applicable requirements of the Clean Air Act and the federal Regional Haze Rule, as set forth in 40 CFR 51.308(g). The EPA is also approving Washington's determination that the existing regional haze SIP is

[1] The EPA was sent a copy of TransAlta's December 13, 2017, letter with similar comments. This letter was written after the state public comment period closed on August 1, 2017, and also after submission of the SIP revision to the EPA on November 6, 2017.

adequate to meet the state's visibility goals established for the first planning period and requires no substantive revision at this time, as set forth in 40 CFR 51.308(h). We have also determined that Washington fulfilled the requirements in 40 CFR 51.308(i) regarding state coordination with Federal Land Managers.

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Clean Air Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because actions such as SIP approvals are exempted under Executive Order 12866;
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because this action does not involve technical standards; and
- does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land and is also not approved to apply in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 1, 2018. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements (See section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: July 23, 2018.

Chris Hladick,

Regional Administrator, Region 10.

For the reasons set forth in the preamble, 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart WW—Washington

■ 2. In § 52.2470(e), amend table 2 by adding the entry ''Regional Haze Progress Report'' after the entry ''Regional Haze State Implementation Plan—BP Cherry Point Refinery BART Revision'' to read as follows:

§ 52.2470 Identification of plan.

RIN 1018–BC82

Endangered and Threatened Wildlife and Plants; Endangered Species Status for Five Poecilotheria Tarantula Species From Sri Lanka

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), determine endangered species status under the Endangered Species Act of 1973, as amended, for the following five tarantula species from Sri Lanka: *Poecilotheria fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata.* The effect of this regulation will be to add these species to the List of Endangered and Threatened Wildlife.

DATES: This rule becomes effective August 30, 2018.

ADDRESSES: This final rule is available on the internet at *http://www.regulations.gov* at docket number FWS–HQ–ES–2016–0076. Comments and materials we received, as well as supporting documentation we used in preparing this rule, are available for public inspection at *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Don Morgan, Chief, Branch of Delisting and Foreign Species, Ecological Services, U.S. Fish and Wildlife Service, MS: ES, 5275 Leesburg Pike, Falls Church, VA 22041–3803; telephone, 703–358–2171. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Endangered Species Act of 1973, as amended (Act; 16 U.S.C. 1531 *et seq.*), a species may be protected through listing as an endangered species or threatened species if it meets the definition of an ''endangered species'' or ''threatened species'' under the Act. Listing a species as an endangered or threatened species can only be completed by issuing a rule.

What this document does. This rule will add the following five tarantula species to the List of Endangered and Threatened Wildlife in title 50 of the Code of Federal Regulations (50 CFR 17.11(h)) as endangered species: *Poecilotheria fasciata, P. ornata, P. smithi, P. subfusca, and P. vittata.*

The basis for our action. Under the Act, we use the best available scientific and commercial data to determine whether a species meets the definition of a ''threatened species'' or an ''endangered species'' because of any one or more of the following five factors or the cumulative effects thereof: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) Overutilization for commercial, recreational, scientific, or educational purposes; (C) Disease or predation; (D) The inadequacy of existing regulatory mechanisms; or (E) Other natural or manmade factors affecting its continued existence. We have determined on the basis of the best available scientific and commercial data that *P. fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata* are in danger of extinction because of ongoing habitat loss and degradation and the cumulative effects of this and other threat factors. One species, *P. smithi,* is also in danger of extinction because of the effects of stochastic (random) processes.

Peer review and public comment. We sought comments from independent peer reviewers to ensure that our designation is based on scientifically sound data and analyses. We invited these peer reviewers to comment on our listing proposal. We also considered all comments and information received from the public during the comment period.

Previous Federal Action

We received a petition, dated October 29, 2010, from WildEarth Guardians requesting that the following 11 tarantula species in the genus *Poecilotheria* be listed under the Act as endangered or threatened: *Poecilotheria fasciata, P. formosa, P. hanumavilasumica, P. metallica, P. miranda, P. ornata, P. pederseni, P. rufilata, P. smithi, P. striata,* and *P. subfusca.* The petition identified itself as such and included the information as required by 50 CFR 424.14(a). We published a 90-day finding on December 3, 2013 (78 FR 72622), indicating that the petition presents substantial scientific and commercial information indicating that listing these 11 species may be warranted. At that time we also (1) notified the public that we were initiating a review of the status of these species to determine if listing them is warranted, (2) requested from the public scientific and commercial data and other information regarding the species, and (3) notified the public that at the conclusion of our review of the status of these species, we would issue a 12-month finding on the petition, as provided in section 4(b)(3)(B) of the Act. We published a 12-month finding and proposed rule for listing the five *Poecilotheria* species that are endemic to Sri Lanka (*Poecilotheria fasciata, P. ornata, P. pederseni, P. smithi,* and *P. subfusca*) on December 14, 2016 (81 FR 90297). In our 12-month finding and proposed rule we determined that these five species were in danger of extinction throughout their ranges and proposed listing them as endangered under the Act. We requested input from the public, range country, other interested parties, and peer reviewers during a 60-day public comment period that ended February 13, 2017.

Summary of Changes From the Proposed Rule

In preparing this final rule, we reviewed and fully considered comments from the public and peer reviewers on the proposed rule. This final rule incorporates minor changes to our proposed listing based on the comments we received (See: Summary of Comments and Recommendations).

Background

Taxonomy and Species Descriptions

Poecilotheria is a genus of arboreal spiders endemic to Sri Lanka and India. The genus belongs to the family *Theraphosidae,* often referred to as tarantulas, within the infraorder *Mygalomorphae.* As with most theraphosid genera, *Poecilotheria* is a poorly understood genus. The taxonomy has never been studied using modern DNA technology; therefore, species descriptions are based solely on morphological characteristics. Consequently, there have been several revisions, additions, and subtractions to the list of *Poecilotheria* species over the last 20 years (Nanayakkara 2014a, pp. 71–72; Gabriel *et al.* 2013, entire).

The World Spider Catalog (2017, unpaginated; 2016, unpaginated) currently recognizes 14 species of *Poecilotheria.* The Integrated Taxonomic Information System currently identifies 16 species in the genus, based on the 2011 version of the same catalog. Because the World Spider Catalog is the widely accepted authority on spider taxonomy, we consider the *Poecilotheria* species recognized by the most recent (2017) version of this catalog to be valid. Based on the World

Spider Catalog, all five of the species addressed in this rule are considered valid taxon, although *P. pederseni* is now considered a junior synonym to the currently accepted name *P. vittata.* Therefore, in the remainder of this document we refer to this species as *P. vittata.* Further, all five of these species have multiple common names (see WildEarth Guardians 2010, p. 4); thus, we refer to them by their scientific names throughout this document.

Poecilotheria species are among the largest spiders in the world, with body lengths of 4 to 9 centimeters (1.5 to 3.5 inches) and maximum adult leg spans varying from 15 to 25 centimeters (6 to 10 inches) (Nanayakkara 2014a, pp. 94–129; Molur *et al.* 2006, p. 23). They are known for their fast movements and potent venom that, in humans, typically causes extended muscle cramps and severe pain (Fuchs 2014, p. 75; Nanayakkara and Adikaram 2013, p. 53). They are hairy spiders and have striking coloration, with dorsal color patterns of gray, black, brown, and in one case, a metallic blue. Ventral coloration of either sex is typically more of the same with the exception of the first pair of legs, which in some species bear bright yellow to orange aposematic (warning) markings that are visible when the spider presents a defensive display. Mature spiders exhibit some sexual dimorphism with mature males having a more drab coloration and being significantly smaller than the adult females (Siliwal 2017, unpaginated; Nanayakkara 2014a, entire; Pocock 1899, pp. 84–86).

The primary characteristics used to distinguish *Poecilotheria* species are ventral leg markings (Gabriel 2010 p. 13, citing several authors). Some authors indicate that identification via leg markings is straightforward for most *Poecilotheria* species (Nanayakkara 2014a, pp. 74–75; Gabriel 2011a, p. 25). However, the apparent consistent leg patterns observed in adults of a species could also be a function of specimens being collected from a limited number of locations (Morra 2013, p. 129). During surveys, researchers found more variation than suggested by published species descriptions and indicated that identifying *Poecilotheria* species is not as straightforward as suggested by current descriptions (Molur *et al.* 2003, unpaginated). Immature spiders (juveniles) lack the variation in coloring found in adults. As a result, they are difficult to differentiate visually; genetic analysis may be the only way to reliably identify juveniles to species (Longhorn 2014a, unpaginated).

Captive Poecilotheria

Most captive individuals of *Poecilotheria* species are in the pet trade; few specimens of the species addressed in this rule are held in zoos (Species360 2017, unpaginated). *Poecilotheria* species are commonly bred in captivity by amateur hobbyists as well as vendors, and are available as captive-bred young in the pet trade in the United States, Europe, and elsewhere (see *Trade*). However, while rearing and keeping of captive individuals by hobbyists and vendors has provided information on life history of these species, we are not aware of any existing conservation programs for these species, including any in which specimens held or sold as pets contribute to the viability of these species within their native ranges in the wild.

Individuals of these species that are held or sold as pets hold limited conservation value to the species in the wild because they are not genetically managed for conservation purposes. Individuals in the pet trade descend from wild individuals from unknown locations, have undocumented lineages, come from limited stock (*e.g.,* see Gabriel 2012, p. 18), and are bred without knowledge or consideration of their genetics. They also likely include an unknown number of hybrid individuals resulting from intentional crosses, or unintentional crosses resulting from confusion and difficulty in species taxonomy and identification (Gabriel 2011a, pp. 25–26; Gabriel *et al.* 2005, p. 4; Gabriel 2003, pp. 89–90). Further, many are likely several generations removed from wild ancestors and thus may be adversely affected by inbreeding or maladapted to conditions in the wild. In short, captive individuals held or sold as pets do not adhere to the IUCN guidelines for reintroductions and other conservation translocations (IUCN 2013, entire). Further, we are not aware of any captive-breeding programs for *Poecilotheria* that adhere to IUCN guidelines.

Because (1) the purpose of our status assessments is to determine the status of the species in the wild, (2) we are not aware of any information indicating that captive individuals are contributing to the conservation of these species in the wild, and (3) captive individuals held or sold as pets have limited value for conservation programs or for reintroduction purposes, we place little weight on the status of captive individuals in our assessment of the status of the five *Poecilotheria* species addressed in this rule.

Tarantula General Biology

Tarantulas possess life-history traits markedly different from most spiders and other arthropods (Bond *et al.* 2006, p. 145). They are long-lived, have delayed sexual maturity, and most are habitat specialists that are extremely sedentary. They also have poor dispersal ability because their mode of travel is limited to walking, and they typically do not move far from the area in which they are born. As a result, the distribution of individuals tends to be highly clumped in suitable microhabitats (a smaller habitat within a larger habitat), populations are extremely genetically structured (genetically subdivided; gene frequencies differ across the population), and the group shows a high level of endemism (species restricted to a particular geographical location) (Ferreti *et al.* 2014, p. 2; Hedin *et al.* 2013, p. 509, citing several sources; Bond *et al.* 2006, pp. 145–146, citing several sources).

Tarantulas are primarily nocturnal and typically lead a hidden life, spending much of their time concealed inside burrows or crevices (retreats) that provide protection from predators and the elements (Foelix 2011, p. 14; Molur *et al.* 2003, unpaginated; Gallon 2000, unpaginated). They are very sensitive to vibrations and climatic conditions, and usually do not come out of their retreats in conditions like rains, wind, or excessive light, or when they detect movement outside their retreat (Molur *et al.* 2003, unpaginated). Tarantulas are generalist predators that sit and wait for passing prey near the entrance of their retreats (Gallon 2000, unpaginated). With the exception of reproductive males that wander in search of females during the breeding season, they leave their retreat only briefly for capturing prey, and quickly return to it at the slightest vibration or disturbance (Foelix 2011, p. 14; Stotley and Shillington 2009, pp. 1210–1211; Molur *et al.* 2003, unpaginated). Tarantulas generally inhabit a suitable retreat for extended periods and may use the same retreat for years (Stotley and Shilling 2009, pp. 1210–1211; Stradling 1994, p. 87). Most tarantulas are solitary, with one spider occupying a retreat (Gallon 2000, unpaginated).

The lifestyle of adult male tarantulas differs from that of adult females and juveniles. Females and juveniles are sedentary, spending most of their time in or near their retreat. Adult females are long-lived and continue to grow, molt, and reproduce for several years after reaching maturity (Ferreti *et al.* 2014, p. 2, citing several sources; Costa

and Perez-Miles 2002, p. 585, citing several sources; Gallon 2000, unpaginated). They are capable of producing one brood per year, although they do not always do so (Ferreti *et al.* 2014, p. 2; Stradling 1994, pp. 92–96). Males have shorter lifespans than females and, after reaching maturity, no longer molt and usually only live one or two breeding seasons (Costa and Perez-Miles 2002, p. 585, Gallon 2000, unpaginated). Further, on reaching maturity, males leave their retreats to wander in search of receptive females with which to mate (Stotley and Shillington 2009, pp. 1210–1211). Males appear to search the landscape for females randomly and, at short range, may be able to detect females through contact sex-pheromones on silk deposited by the female at the entrance of her retreat (Ferreti *et al.* 2013, pp. 88, 90; Janowski-Bell and Horner 1999, pp. 506, 509; Yanez *et al.* 1999, pp. 165–167; Stradling 1994, p. 96). Males may cover relatively large areas when searching for females. Males of a ground-dwelling temperate species (*Aphonopelma anax*) are reported covering search areas up to 29 ha (72 acres), though the mean size of areas searched is much smaller (1.1 ± 0.5 ha one year and 8.8 ± 2.5 ha another year) (Stotley and Shillington 2009, p. 1216).

When a male locates a receptive female, the two will mate in or near the entrance to the female's retreat. After mating, the female returns to her retreat where she eventually lays eggs within an egg-sac and tends the eggs until they hatch. Spiderlings reach maturity in one or more years (Gallon 2000, unpaginated).

Poecilotheria Biology

Limited information is available on *Poecilotheria* species in the wild. While they appear to be typical tarantulas in many respects, they differ from most tarantulas in that they are somewhat social (discussed below) and reside in trees rather than ground burrows (see Microhabitat).

Poecilotheria species are patchily distributed (Siliwal *et al.* 2008, p. 8) and prey on a variety of insects, including winged termites, beetles, grasshoppers, and moths, and occasionally small vertebrates (Das *et al.* 2012, entire; Molur *et al.* 2006, p. 31; Smith *et al.* 2001, p. 57).

We are not aware of any information regarding the reproductive success of wild *Poecilotheria* species. However, reproduction may be greatly reduced during droughts (Smith *et al.* 2001, pp. 46, 49). Additionally, given the apparently random searching for females by male tarantulas, successful mating of females likely depends on the density of males in the vicinity. In a study conducted on an arboreal tropical tarantula (*Avicularia avicularia* in Trinidad), less than half of adult females produced eggs in the same year despite the fact that they were in close proximity to each other and exhibited the same weight gain, possibly due to a failure to mate (Stradling 1994, p. 96).

Time to maturity in *Poecilotheria* species varies and is influenced by the temperature at which the young are raised and amount of food provided (Gabriel 2006, entire). Based on observations of captive *Poecilotheria,* males mature from spiderlings to adults in 11 to16 months (Gabriel 2011b, p. 101; Gabriel 2005, entire). Females mature in 14 to 48 months and generally live an additional 60 to 85 months after maturing (Cowper 2017, unpaginated; Weaver 2017, unpaginated; Gabriel 2012, p. 19; Government of Sri Lanka and Government of the United States 2000, p. 3), although they have been reported living up to 14 years (Gallon 2012, p. 69). Females lay about 50 to 100 eggs, 5 to 6 months after mating (Nanayakarra 2014a, p. 79; Gabriel 2011b, entire; Gabriel 2005, p. 101). In captivity, generation time appears to be roughly 2–3 years (see Gabriel 2011b, entire; Gabriel 2006, p. 96; Gabriel 2005, entire). While captive individuals provide some indication of potential growth, longevity, and reproductive capacity of wild individuals, these variables are likely to vary with conditions in the wild. *Poecilotheria* are ectotherms and, as such, their physiological and developmental processes including growth and reproduction are strongly influenced by body temperature and it is likely that captive-rearing of these species is primarily done under ideal environmental conditions for reproduction and growth.

Unlike most tarantulas, which are solitary, most *Poecilotheria* species display a degree of sociality. Adult females often share their retreat with their spiderlings. Eventually as the young mature, they disperse to find denning areas of their own. Occasionally young remain on their natal tree to breed, or three to four adult females will share the same retreat (Nanayakkara 2014a, pp. 74, 80). These semi-social behaviors are believed to be a response to a lack of availability of suitable habitat (trees) in which individuals can reside (Nanayakkara 2014a, pp. 74, 80; Gallon 2000, unpaginated).

Poecilotheria Habitat

Microhabitat

Poecilotheria occupy preexisting holes or crevices in trees or behind loose tree bark (Molur *et al.* 2006, p. 31; Samarawckrama *et al.* 2005; Molur *et al.* 2003 unpaginated; Kirk 1996, pp. 22–23). Individuals of some species are also occasionally found in grooves or crevices in or on other substrates such as rocks or buildings that are close to wooded areas (Samarawckrama *et al.* 2005, pp. 76, 83; Molur *et al.* 2003, unpaginated). In a survey in Sri Lanka, 89 percent (31) of *Poecilotheria* spiders were found in or on trees, while 11 percent (4) were found in or on buildings (Samarawckrama *et al.* 2005, p. 76). *Poecilotheria* species are said to have a preference for residing in old, established trees with naturally occurring burrows (Nanayakkara 2014a, p. 86). Some species also appear to prefer particular tree species (Nanayakkara 2014a, p. 84; Samarawckrama *et al.* 2005, p. 76).

Macrohabitat

Most *Poecilotheria* species occur in forested areas, although some occasionally occur in other treed habitats such as plantations (Nanayakkara 2014a, p. 86; Molur *et al.* 2006, p. 10; Molur et al 2003, entire; Smith *et al.* 2001, entire). *Poecilotheria* are less abundant in degraded forest (Molur *et al.* 2004, p. 1665). Less complex, degraded forests may contain fewer trees that provide adequate retreats for these species and less cover for protection from predators and the elements. Trees with broad, dense canopy cover likely provide *Poecilotheria* in hotter, dryer habitats protection from heat and desiccation (Siliwal 2008, pp. 12, 15). We provide additional, species-specific information on habitat below.

Sri Lanka

Sri Lanka is an island nation about 65,610 square kilometers (km^2) (25,332 square miles (mi^2)) in area (Weerakoon 2012, p. xvii), or about the size of West Virginia (Fig. 1). The variation in topography, soils, and rainfall on the island has resulted in a diversity of ecosystems with high levels of species endemism (Government of Sri Lanka (GOSL) 2014, pp. xiv–xv). Sri Lanka, together with the Western Ghats of India, is identified as a global biodiversity hotspot, and is among the eight ''hottest hotspots,'' (Myers *et al.* 2000, entire).

Sri Lanka consists of a mountainous region (central highlands), reaching 2,500 meters (8,202 feet) in elevation, in

the south-central part of the island surrounded by broad lowland plains (GOSL 2012, p. 2a–3–141) (Fig. 2). The country has a tropical climate characterized by two major monsoon periods: the southwest monsoon from May to September and the northeast monsoon from December to February (GOSL 2012, pp. 7–8).

Sri Lanka's central highlands create a rain shadow effect that gives rise to two pronounced climate zones—the wet zone and dry zone—and a less extensive intermediate zone between the two (Ministry of Environment–Sri Lanka (MOE) 2010, pp. 21–22) (Fig. 2). Small arid zones also occur on the northwestern and southeastern ends of the country (Nanayakkara 2014a, p. 22). Annual rainfall ranges from less than 1,000 millimeters (mm) (39.4 inches (in)) in the arid zone to over 5,000 mm (197 in) in the wet zone of the central highlands (Jayatillake *et al.* 2005, pp. 66–67). Mean annual temperature ranges from 27 degrees Celsius (°C) (80.6 degrees Fahrenheit (°F)) in the lowlands to 15 °C (59 ;°F) in the highlands (Eriyagama *et al.* 2010, p. 2).

The wet zone is located in the southwestern quarter of the island, where high annual rainfall is maintained throughout the year by rain received during both monsoons and during inter-monsoonal periods (MOE 2010, pp. 21–22) (Fig. 2). The wet zone is divided into low, mid, and montane regions based on altitude. The dry zone, in which most of the land area of Sri Lanka occurs, is spread over much of the lowland plains and is subjected to several months of drought (MOE 2010, pp. 21–22) (Fig. 2). Most of the rain in this zone comes from the northeast monsoon and inter-monsoonal rains (MOE 2010, pp. 21–22; Malgrem 2003, p. 1236). Characteristic forest types occur within each of the different climate zones.

Species-Specific Information

Each of the five species addressed in this finding is endemic to Sri Lanka and has a range restricted to a particular region and one or two of Sri Lanka's climate zones (Nanayakkara 2014a, pp. 84–85) (Fig. 1, Fig. 2). Due to their secretive and nocturnal habits, sensitivity to vibrations, and their occurrence in structurally complex habitat (forest), *Poecilotheria* species are difficult to detect (Molur *et al.* 2003, unpaginated). Therefore, reported ranges are possibly smaller than the actual ranges of these species. However, surveys for these species were conducted at many locations throughout the country during 2009–2012 by Nanayakkara *et al.* (2012, entire), and we consider the locations reported in Nanayakkara (2014a, entire) to reflect the best available information concerning the ranges of these species.

Historical ranges for the five species addressed in this rule are unknown. Further, information on species abundance or population dynamics is not available on any of the five species; therefore, population trends are unknown. However, based upon the multitude of threats acting on these species, especially extensive and ongoing habitat loss and degradation, experts believe populations are declining, and that these species are very likely to go extinct within the next two or three decades (Nanayakkara and Adikaram 2013, p. 54). We are not aware of any existing conservation programs for these species. All five species are categorized on the National Red List of Sri Lanka as Endangered or Critically Endangered based on their area of occupancy (Critically Endangered: less than 10 km^2; Endangered: less than 500 km^2) and distribution (Critically Endangered: severely fragmented or known to exist at only a single location; Endangered: severely fragmented or known to exist at no more than five locations), and the status (continuing decline, observed, inferred or projected, in the area, extent, or quality, or any combination of the three) of their habitat (MOE 2012, p. 55; IUCN 2001, entire).

For locations discussed in species-specific information below, see Fig. 1. For locations of the ranges of the different species, see Fig. 2.

BILLING CODE 4333–15–C

P. fasciata

Poecilotheria fasciata occurs in forests below 200-m elevation in Sri Lanka's dry and intermediate zones north of Colombo and is also sometimes found in coconut plantations in this region (Nanayakkara 2014a, p. 96; Nanayakkara 2014b, unpublished data; Smith *et al.* 2001, entire). The species has a broad but patchy distribution and is estimated to occupy less than 500 km^2 (193 mi^2) of its range (MOE 2012, p. 55; Smith *et al.* 2001, p. 48). The area, extent, or quality (or a combination thereof) of *P. fasciata*'s habitat is in continuing decline, and the species is categorized on the National Red List of Sri Lanka as Endangered (MOE 2012, p. 55).

The only detailed record of the species' occurrence is provided by Smith *et al.* (2001, entire), where *Poecilotheria fasciata* colonized a coconut plantation following a prolonged drought. While *P. fasciata* in dry and intermediate zone forests, including those surrounding the coconut plantation, were found to be emaciated and without spiderlings, those in the irrigated plantation were found to have spiderlings in their retreats and wider abdomens. Smith *et al.* argue that *P. fasciata* was able to colonize the plantation due to the occurrence of *P. fasciata* in the adjacent remnant forest, the presence of coconut trees that were infested with weevils and subsequently fed on by woodpeckers that created holes suitable for *P. fasciata* retreats, and plantation irrigation that resulted in an abundant prey base for the species. The *P. fasciata* population in the plantation was apparently established in the 1980s and persisted until at least 2000 (Smith *et al.* 2001, pp. 49, 52).

During recent surveys, *P. fasciata* were detected at nine locations—two in coconut plantations and seven in forest locations. Greater than 20 adults and 100 juveniles were found in coconut plantations, and greater than 30 adults and no juveniles were found in forest locations (Nanayakkara 2014b, unpublished data). Although no

juveniles were detected in forest habitats during these surveys, recent observations of *P. fasciata* juveniles in forest habitat have been reported (Nanayakkara 2014a, p. 96; Kumarasinghe *et al.* 2013, p. 10). Therefore, based on the observations of Smith *et al.* described above, it is possible that the lack of juveniles detected in forests during recent surveys was due to drought conditions during the survey period. As indicated above, island-wide surveys for *Poecilotheria* were conducted during 2009–2012, and droughts occurred in 2010 and 2012 in the region in which *P. fasciata* occurs (Integrated Regional Information Network 2012, unpaginated; Disaster Management Center, Sri Lanka 2010, p. 12). However, while juveniles were detected only in coconut plantations during these surveys, numbers found in coconut and forest habitat cannot be directly compared because surveys were designed for determining distribution rather than species abundance or density. For instance, juveniles may be more difficult to detect in forest habitat than in coconut plantations, or a greater area of coconut plantations may have been searched compared to forest habitat.

P. ornata

Poecilotheria ornata is found in the plains and hills of the lowland wet zone in southwestern Sri Lanka (Nanayakkara 2014a, pp. 112–113; Smith *et al.* 2002, p. 90). It is one of the few solitary species in the genus (Nanayakkara 2014a, p. 112). In recent surveys, 23 adults and no juveniles were detected at 4 locations (Nanayakkara 2014b, unpublished data). *Poecilotheria ornata* is estimated to occupy less than 500 km² (193 mi²) of its range (MOE 2012, p. 55), and the area, extent, or quality (or a combination thereof) of the species' habitat is in continuing decline. *Poecilotheria ornata* is categorized on the National Red List of Sri Lanka as Endangered (MOE 2012, p. 55).

P. smithi

Poecilotherai smithi is found in the central highlands, in Kandy and Matale districts (Nanayakkara *et al.* 2013, pp. 73–74). It was originally found in the wet zone at mid elevations (Kirk 1996, p. 23), although it is described as a montane species (Jacobi 2005, entire; Smith *et al.* 2002, p. 92). *Poecilotheria smithi* appears to be very rare (Nanayakkara *et al.* 2013, p. 73; Gabriel *et al.* 2005, p. 4) and is considered ''highly threatened'' (Nanayakkara *et al.* 2013, p. 73). The species was described in 1996, and, despite several efforts to locate the species during the past 20 years, few individuals have been found (Nanayakkara *et al.* 2013, pp. 73–74; Gabriel *et al.* 2005, pp. 6–7). In 2005, three adult females and four spiderlings were reported in the Haragama, Kandy district, an area described as severely impacted by several anthropogenic factors (Nanayakkara *et al.* 2013, p. 74; Gabriel *et al.* 2005, pp. 6–7). During surveys conducted in several areas of the country during 2003–2005, no *P. smithi* were found (Samarawckrama *et al.* 2005, entire). Finally, during recent surveys, the species was found at two locations with seven adults and nine juveniles detected (Nanayakkara 2014b, unpublished data). Prior to these recent surveys, the species was known only from the Haragama, Kandy district. However, the species was recently found about 31 km (19.3 mi) away from Haragama, in three trees within a 5-km² (1.9-mi²) area of highly disturbed habitat (Nanayakkara *et al.* 2013, p. 74).

Poecilotheria smithi was estimated to occupy less than 10 km² (3.9 mi²) of its range (MOE 2012, p. 55) but a recently reported location in Matale district increases the known area of occupancy by 5 km² (1.9 mi²). The area, extent, or quality (or a combination thereof) of the species' habitat is considered to be in continuing decline, and the species is categorized on the National Red List of Sri Lanka as Critically Endangered (MOE 2012, p. 55).

P. subfusca

Poecilotheria subfusca occurs in the wet zone of the central highlands of Sri Lanka, in two disjunct regions: the montane region above 1,500-m elevation in Nuwara Eliya and Badulla districts; and at 500 to 600 m (1,640 to 1,968 ft) elevation in Kegalla, Kandy, and Matale districts (Nanayakkara 2014a, pp. 101–102, 116; Smith *et al.* 2002, entire).

During recent surveys, *P. subfusca* was found at 10 locations, and a total of 25 adult and 56 juvenile *P. subfusca* were detected (Nanayakkara 2014b, unpublished data). The area of the range occupied by *P. subfusca* is less than 500 km² (193 mi²) (MOE 2012, p. 55). Further, the area, extent, or quality (or a combination thereof) of *P. subfusca*'s habitat is in continuing decline throughout its range, and the species is categorized on the National Red List of Sri Lanka as Endangered (MOE 2012, p. 55).

P. vittata

Poecilotheria vittata occurs in the arid, dry, and intermediate zones of Hambantota and Monaragala districts in southeastern Sri Lanka (Kekulandala and Goonatilake 2015, unpaginated; Nanayakkara 2014a, pp. 106–107). The species' preferred habitat is *Manilkara hexandra* (Palu) trees (Nanayakkara 2014a, p. 106), a dominant canopy tree species in Sri Lanka's dry forest (Gunarathne and Perera 2014, p. 15). In recent surveys, the species was found at 4 locations, and 15 adults and 7 juveniles of *P. vittata* were detected (Nanayakkara 2014b, unpublished data). *Poecilotheria vittata* is estimated to occupy less than 500 km² (193 mi²) of its range (MOE 2012, p. 55), and the area, extent, or quality (or a combination thereof) of the species' habitat is considered to be in continuing decline. *Poecilotheria vittata* is categorized on the National Red List of Sri Lanka as Endangered (MOE 2012, p. 55).

Summary of Biological Status and Threats

The Act directs us to determine whether any species is an endangered species or a threatened species because of any one or more of five factors or the cumulative effects thereof: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) Overutilization for commercial, recreational, scientific, or educational purposes; (C) Disease or predation; (D) The inadequacy of existing regulatory mechanisms; or (E) Other natural or manmade factors affecting its continued existence. In this section, we summarize the biological condition of the species and its resources, and the influences on these to assess the species' overall viability and the risks to that viability.

Habitat Loss and Degradation

Habitat loss and degradation are considered primary factors negatively affecting *Poecilotheria* species (Nanayakkara and Adikaram 2013, pp. 53–54; MOE 2012, p. 55; Molur *et al.* 2008, pp. 1–2). Forest loss and degradation are likely to negatively impact the five species addressed in this rule in several ways. First, forest loss and degradation directly eliminate or reduce the availability of trees required by *Poecilotheria* species for reproduction, foraging, and protection (Samarawckrama *et al.* 2005, p. 76; Smith *et al.* 2002, entire). Second, due to the limited ability of *Poecilotheria* species to travel, as well as their sedentary habits, forest loss and degradation are also likely to result in direct mortality of individuals or populations, via physical trauma caused by the activities that result in forest loss and degradation, or the intentional killing of these spiders when they are encountered by humans during these activities (see *Intentional Killing*). Such mortality affects these species'

abundances and distributions, and also their genetic diversity. Tarantulas have highly structured populations (See *Tarantula General Biology*) and, consequently, the loss of a local population of a species—due to habitat loss or any other factor—equates to a loss of unique genetic diversity (Bond *et al.* 2006, p. 154, citing several sources). Finally, the loss of forest also often results in fragmented habitat. Due to the limited dispersal ability of these species, forest fragmentation is likely to isolate *Poecilotheria* populations, which increases their vulnerability to stochastic processes (see *Stochastic Processes*), and may also expose wandering males and dispersing juveniles to increased mortality from intentional killing or predation when they attempt to cross between forest fragments (Bond *et al.* 2006, p. 155) (see *Intentional Killing*).

Deforestation

Forests covered almost the entire island of Sri Lanka a few centuries ago (Mattsson *et al.* 2012, p. 31). However, extensive deforestation occurred during the British colonial period (1815–1948) as a result of forest-clearing for establishment of plantation crops such as tea and coffee, and also exploitation for timber, slash-and-burn agriculture (a method of agriculture in which natural vegetation is cut down and burned to clear the land for planting), and land settlement. In 1884, about midway through the British colonial period, closed-canopy (dense) forest covered 84 percent of the country and was reduced to 44 percent by 1956 (GOSL 2012, p. 2a-3–145; Nanayakkara 1996, in Mattson *et al.* 2012, p. 31). Deforestation continued after independence as the result of timber extraction, slash-and-burn agriculture, human settlements, national development projects, and encroachment (GOSL 2012, pp. 2a-3–144–145; Perera *et al.* 2012, p. 165). As a result, dense forest cover (canopy density greater than 70 percent) declined by half in about 50 years, to 22 percent in 2010 (GOSL 2012, pp. 51, 2a-3–145; Nanayakkara 1996, in Mattson *et al.* 2012, p. 31). Open-canopy forest (canopy density less than 70 percent) covered an additional 6.8 percent of the country in 2010 for an overall forest cover of 28.6 percent (GOSL 2012, p. 51).

The extent of deforestation differed in the three climate zones of the country. The impacts of anthropogenic factors on forests in the wetter regions of the island have been more extensive due to the higher density of the human population in these regions. The human population density in the wet zone is 650 people per km² (1,684 per mi²) compared to 170 people per km² (440 per km²) in the dry zone and 329 per km² (852 per mi²) nationally (GOSL 2012, p. 8). Currently about 13 percent of the wet zone, 15 percent of the intermediate zone, and 29 percent of the dry zone are densely forested (Table 1).

Recent information on forest cover in the different climate zones is provided in three reports (GOSL 2015, GOSL 2012, and FAO 2015a), all of which provide information from the Forest Department of Sri Lanka. One report (GOSL 2015) provides a map of the change in forest cover between 1992 and 2010 and a qualitative assessment of these changes. The others (GOSL 2012 and FAO 2015a) provide quantitative information on the area of forest cover by forest type for 1992, 1999, and 2010. These latter two reports differ slightly in their presentation of information but contain identical data on natural forest cover. However, the Forest Department of Sri Lanka used different rainfall criteria to separate dry and intermediate zone forests, and different altitude criteria to separate montane and submontane forests, in different years (see climate zone and forest definitions in FAO 2015a, p. 6; GOSL 2012, p. 51; FAO 2005, p. 7; FAO 2001, pp. 16, 53). Therefore, we combined the information on intermediate and dry zone forests, and the information on montane and submontane forests (see 81 FR 90307, Table 4). We discuss the information on forest cover from the various sources by climate zone below.

Wet Zone Forest

Wet zone forests in Sri Lanka are categorized as montane, submontane, or lowland forest, based on elevation. Very little wet zone forest remains in Sri Lanka. Currently, montane and submontane forests combined covers only about 733 km² (283 mi²) and is severely fragmented (GOSL 2012, pp. 51, 2a-3–142). The area remained relatively stable from 1992 to 2010 (81 FR 90307; GOSL 2012, p. 51). More recent evidence indicates these forests are currently declining: firewood collection, cutting of trees for other domestic purposes, and gem mining are ongoing in these forests, and large areas were recently illegally cleared for vegetable cultivation (Wijesundara 2012, p. 182). While these forests are protected in Sri Lanka, administering agencies do not have sufficient resources to prevent these activities (Wijesundara 2012, p. 182).

The area of lowland wet zone forests (lowland rainforest) declined from 1992 to 2010. Remaining lowland rainforests are severely fragmented, exist primarily as small, isolated patches, and declined by 13% (183 km²)(71 mi²)) during the 18-year period, though the rate of loss slowed considerably during the latter half of this period (81 FR 90307, Table 4; GOSL 2012, p. 2a-3–142; Lindstrom *et al.* 2012, p. 681). Changes in forest cover show low levels of deforestation throughout the lowland rainforest region from 1992 to 2010, and a deforestation ''hotspot'' on the border of Kalutara and Ratnapura districts, which is within the range of *P. ornata* (Fig. 1, Fig. 2) (GOSL 2015, unpaginated).

Dry and Intermediate Zone Forests

Dry and intermediate zone forests, which include most open-canopy forest (Mattsson *et al.* 2012, p. 30), declined by 8% (1,372 km² (530 mi²)) between 1992 and 2010 (81 FR 90307, Table 4). The rate of deforestation nationwide during this period was highest in Anuradhapura and Moneragala districts, in which large portions of the ranges of *P. fasciata* and *P. vittata* occur (see Fig. 1, Fig. 2) (GOSL 2015, unpaginated). Further, deforestation hotspots have been found in other districts where these species occur, including Puttalam and Hambantota (GOSL 2015, unpaginated). Natural regeneration of dry forest species is poor, and dry zone forests are heavily degraded as a result of activities such as frequent shifting cultivation and timber logging (Perera 2012, p. 165, citing several sources).

TABLE 1—THE TOTAL AREA OF SRI LANKA'S CLIMATE ZONES, AND THE COVERAGE OF DENSE FOREST (CANOPY COVER GREATER THAN 70 PERCENT) WITHIN EACH ZONE IN 2010, BASED ON INFORMATION PROVIDED IN 81 FR 90302, TABLE 2 AND GOSL 2012, P. 51

Climate zones of Sri Lanka	Area [1] (km^2)	Area covered with dense (canopy cover greater than 70 percent) closed-canopy forest in 2010 (km^2)	Proportion (percent) with dense forest [2]
Wet Zone	15,090	1,966	13
Intermediate Zone	7,873	1,179	15
Dry Zone	39,366	[3] 11,238	29
Arid Zone	3,281	.....	.....

[1] Calculated based on proportion of land area in each climate zone as provided in 81 FR 90302, Table 2, and a total land area of 65,610 km^2.
[2] Original extent of forest cover is unknown. However, each zone was likely close to 100% forested because dense forest covered 84% of the island in 1884, following several decades of deforestation.
[3] Figure is for dry monsoon forest and riverine forest. It does not include mangrove forests.

Forest Conservation Measures

Sri Lanka has taken steps in recent decades to conserve its forests, and these efforts have contributed to the slowing of deforestation in the country (GOSL 2012, pp. 54–55). In 1990, the country imposed a moratorium on logging in all natural forests, marked most reserve boundaries to stem encroachments, and implemented management plans for forest and wildlife reserves, which became legal requirements under the Forest Ordinance Amendment Act No. 65 of 2009 and the Fauna and Flora Ordinance Amendment Act No. 22 of 2009 (GOSL 2014, p. 26). The government also encourages community participation in forest and protected area management, has implemented programs to engage residents in community forestry to reduce encroachment of cash crops and tea in the wet zone and slash-and-burn agriculture in the dry zone, and encourages use of non-forest lands and private woodlots for meeting the demands for wood and wood products (GOSL 2014, p. 26). In addition to these efforts, between 12 percent (GOSL 2015, unpaginated) and 28 percent (GOSL 2014, pp. xvi, 23) of the country's land area is reported to be under protected area status.

Although considerable efforts have been undertaken in Sri Lanka in recent years to stop deforestation and forest degradation, these processes are ongoing (see Current and Future Forest Trends). The assessment of the status of natural forests during the Species Red List assessments in 2012 indicate that, despite advances in forest conservation in the country, many existing threats continue to impact forest habitats (GOSL 2014, p. 26). While laws and regulations are in place to address deforestation, several factors inhibit their implementation (GOSL 2012, pp. 55, 2a-3–148–150). For instance, lack of financial assistance for protected area management, increasing demand for land, and unplanned, after-the-fact legalization of land encroachments, result in further loss of the forest habitat of the five species addressed in this finding (GOSL 2014, p. 22; GOSL 2011, unpaginated). Also, government agencies have poor coordination with respect to forest conservation—conservation agencies are not always adequately consulted on initiatives to develop forested land (GOSL 2014, p. 22; MOE 2010, p. 31). Finally, many protected areas within the wet zone are small, degraded, and isolated (GOSL 2014, p. 31).

Current and Future Forest Trends

The current drivers of deforestation and forest degradation in Sri Lanka include a variety of factors such as small-scale encroachments, illicit timber harvesting, forest fires, destructive mining practices, and clearing of forest for developments, settlements, and agriculture (GOSL 2012, p. 12). These stressors are exacerbated by a large, dense human population that is projected to increase from 20.7 million in 2015 to 21.5 million in 2030 (United Nations 2015, p. 22). While the majority of remaining forested areas are protected, further population growth is likely to result in reduction of forested areas because (1) Sri Lanka already has a very high human density (329 people per km^2 (852 per mi^2)), (2) increases in the population will elevate an already high demand for land, and (3) little non-forested land is available for expansion of housing, development, cash crops, or subsistence agriculture (GOSL 2012, pp. 8, 14, 58). Most (72%) of the population of Sri Lanka is rural, dependence on agriculture for subsistence is widespread, and the rate of population growth is higher in rural areas. This results in an increasing demand in the country for land for subsistence (Lindstrom *et al.* 2012, p. 680; GOSL 2011, unpaginated).

The current drivers of deforestation and forest degradation are exacerbated by high economic returns from illicit land conversions, lack of alternative livelihood opportunities for those practicing slash-and-burn agriculture and, in the dry zone, poverty and the weak implementation of land-use policy (GOSL 2012, pp. 14–15). Further, in the 30 years prior to 2009, Sri Lanka was engaged in a civil war, which was fought primarily in the dry zone of the northern and eastern regions of the country, many areas of which were inaccessible. The war, along with a reduced rate of development in the country as a whole during this period, may have helped limit deforestation rates (GOSL 2012, pp. 48, 56–57).

Overall, deforestation and forest degradation in Sri Lanka are ongoing, although recent rates of deforestation are much lower than during the mid- to late-20th century—the rate of deforestation during 1992–2010 was 71 km^2 (27.4 mi^2) per year, compared to 400 km^2 (154 mi^2) per year during 1956–1992 (GOSL 2015, unpaginated). However, since the end of Sri Lanka's civil war in 2009, the government has been implementing an extensive 10-year development plan with the goal of transforming the country into a global economic and industrial hub (Buthpitiya 2013, p. ii; Central Bank of Sri Lanka 2012, p. 67; Ministry of Finance and Planning–Sri Lanka (MOFP) 2010, entire). The plan includes large infrastructure projects throughout the country (MOFP 2010, entire). Projects include, among other things, development of seaports, airports, expressways, railways, industrial parks, power plants, and water management systems that will allow for planned

expansion of agriculture, and many of these projects have already started (Buthpitiya 2013, pp. 5–6; Central Bank of Sri Lanka 2012, p. 67; MOFP 2010, entire). They also include projects located within the ranges of all five species addressed in this finding, although the plan does not provide the amount of area that will be impacted by these projects (Fig. 2 and MOFP 2010, pp. 63, 93, 101, 202–298). For example, a new dam project within the range of *P. smithi* will submerge one of the two sites at which the species is found (Nanayakkara 2017, unpaginated). The rate of loss of natural forest (primary forest and other naturally regenerated forest) increased from 60 km² (23 mi²) per year during 2000–2010 to 86 km² (33 mi²) per year during 2010–2015 (FAO 2015b, pp. 44, 50). As post-war reconstruction and development continues in Sri Lanka, deforestation and forest degradation can be expected to rise (GOSL 2012, p. 2a–3–146).

Coconut Plantations

Coconut is grown throughout Sri Lanka. Most (57 percent) of the area under coconut cultivation is in the intermediate and wet zones north of Colombo (MOE 2011, p. 14), which overlaps with the southern portion of the range of *P. fasciata.* As indicated above, *P. fasciata* are sometimes found in coconut plantations in Sri Lanka, although the extent to which coconut plantations contribute to sustaining viable populations of these species is unknown. The ability of coconut plantations to contribute to conservation of *P. fasciata* is limited because: (1) Tarantulas are poor dispersers (see *Tarantula General Biology*); (2) colonization of coconut plantations by the species appears to depend on the occurrence of occupied natural forest in relatively close proximity to coconut plantations (Smith *et al.* 2001, entire); and (3) very little natural forest remains in the coconut-growing region in which *P. fasciata* occurs (Fig. 2 and GOSL 2015, unpaginated; MOE 2014, p. 94).

The aerial extent of coconut cultivation in Sri Lanka has varied between about 3,630 and 4,200 km² (1,402 and 1,622 mi²) since 2005 (Central Bank of Sri Lanka 2014, Statistical Appendix, Table 13), with no clear directional trend. However, due to the rising human population and resulting escalating demand for land in Sri Lanka, plantations have become increasingly fragmented due to conversion of these lands to housing (GOSL 2014, pp. 26–27). As indicated above, due to their limited dispersal ability, forest fragmentation is likely to isolate *Poecilotheria* populations, which increases their vulnerability to stochastic processes (see *Stochastic Processes*), and may also expose wandering males and dispersing juveniles to increased mortality from intentional killing or predation when they attempt to cross between forest fragments (Bond *et al.* 2006, p. 155) (see *Intentional Killing*). Thus, even though *P. fasciata* uses coconut plantations to some extent, fragmentation of this habitat is likely to isolate populations and increase their vulnerability to stochastic processes, intentional killing, and predation.

Summary

Sri Lanka has lost most of its forest cover due to a variety of factors over the past several decades. Very little (1,966 km² (759 mi²)) wet zone forest—in which the ranges of *P. ornata, P. smithi,* and *P. subfusca* occur—remains in the country. The remainder is highly fragmented and continues to be deforested. Only about 35 percent (16,872 km² (6,514 mi²)) of dense and open canopy dry and intermediate zone forests—in which the ranges of *P. fasciata* and *P. vittata* occur—remain, deforestation in these forests is ongoing, and recent rates of deforestation in the country have been highest in regions constituting large portions of the ranges of these two species. Forest cover continues to decline at a rate of 86 km² (33 mi²) per year, and the rate of loss is higher in the dry zone than the wet zone. While the current rate of forest loss is much lower than in the previous century, the rate of loss of natural forest is increasing and is anticipated to increase in the future with the country's emphasis on development and the projected population increase of 800,000 people. While coconut plantations provide additional habitat for one species (*P. fasciata*) in some areas, these plantations are becoming increasingly fragmented due to demand for housing.

Tarantulas have sedentary habits, limited dispersal ability, and highly structured populations. Therefore, loss of habitat has likely resulted in direct loss of individuals or populations and, consequently, a reduction in the distribution and genetic diversity of these species. The distribution of these species is already limited—each currently occupies less than 500 km² (193 mi²) or, for *P. smithi,* less than 10 to 15 km² (3.9 to 5.8 mi²) of its range—and deforestation continues within the ranges of all five species discussed in this finding. Further, the limited distribution of these species is likely continuing to decline with ongoing loss of habitat. We conclude that habitat loss is likely currently having significant negative impacts on the viability of these species because: (1) These species have very small distributions; (2) little forest remains in Sri Lanka; (3) remaining habitat is fragmented; and (4) deforestation is ongoing within these species' ranges.

Pesticides

Pesticides are identified as a threat to *Poecilotheria* species in Sri Lanka (Nanayakkara 2014b, unpublished data; Gabriel 2014, unpaginated). The five species addressed in this finding could potentially be exposed to pesticides via pesticide drift into forests that are adjacent to crop-growing areas; by traveling over pesticide-treated land when dispersing between forest patches; or by consuming prey that have been exposed to pesticides. Populations of these species could potentially be directly affected by pesticides through increased mortality or through sublethal effects such as reduced fecundity, fertility, and offspring viability, and changes in sex ratio, behavior, and dispersal (Nash *et al.* 2010, p. 1694, citing several sources). *Poecilotheria* species may also be indirectly affected by pesticides if pesticides reduce or deplete available prey species.

Over 100 pesticide (herbicide, fungicide, and insecticide) active ingredients are registered for use in Sri Lanka. Among the most commonly used insecticides are carbofuran, diazinon, and chloropyrifos (Padmajani *et al.* 2014, pp. 11–12). These are broad-spectrum, neurotoxic insecticides, which tend to have very negative effects on nontarget organisms (Pekar 2013, p. 415). Further, sit-and-wait predators appear to be more sensitive to insecticide applications than web-making spiders (Pekar 1999, p. 1077).

The use of pesticides in Sri Lanka has been increasing steadily since the 1950s (Selvarajah and Thiruchelvam 2007, p. 381). Pesticide imports into Sri Lanka increased by 50 percent in 2011 compared to 2006 (Padmajani *et al.* 2014, p. 11). The level of misuse and overuse of pesticides in Sri Lanka is high. Depending on region and crop species, 33 to 60 percent of Sri Lankan farmers use greater amounts, higher concentrations, or more frequent applications of pesticides (or a combination of these) than is recommended (Padmajani *et al.* 2014, pp. 13, 31, citing several sources).

The susceptibility of spiders to the direct effects of different pesticides varies with pesticide type and formulation, spider species, development stage, sex, and abiotic and biotic conditions at the time of pesticide

application (Pekar 2013, pp. 416–417). Further, different classes of pesticides can cause different sublethal effects. For instance, activities such as movement, prey capture, reproduction, development, and defense are particularly disrupted by neurotoxic formulations because they are governed by complex neural interactions. However, spiders can potentially recover from sublethal effects over several days (Pekar 2013, p. 417), although the effects are complicated by the potential for cumulative effects of multiple applications across a season (Nash *et al.* 2010, p. 1694).

We are not aware of any information on the population-level effects of pesticides on *Poecilotheria* species. However, given the large proportion of Sri Lanka's human population that is reliant on farming, the high level of misuse and overuse of pesticides in the country, and the broad-spectrum and high level of toxicity of the insecticides commonly used in the country, it is likely that the species addressed in this finding are directly or indirectly negatively affected by pesticides to some extent. Therefore, while the population-level effects of pesticides on the five species addressed in this finding are uncertain, the effects of pesticides likely exacerbate the effects of other threats acting on these species.

Climate Change

The Intergovernmental Panel on Climate Change (IPCC) concluded that warming of the climate system is unequivocal (IPCC 2013, p. 4). Numerous long-term climate changes have been observed including changes in land surface temperatures, precipitation patterns, ocean temperature and salinity, sea ice extent, and sea level (IPCC 2013, pp. 4–12). Various types of changes in climate can have direct or indirect effects on species. These effects may be positive, neutral, or negative and they may change over time, depending on the species and other relevant considerations, such as the effects of interactions of climate with other variables (*e.g.,* habitat fragmentation) (IPCC 2007, pp. 8–14, 18–19). However, a large fraction of terrestrial and freshwater species face increased extinction risk under projected climate change during and beyond the current century, especially as climate change interacts with habitat modification and other factors such as overexploitation, pollution, and invasive species (Settele *et al.* 2014, p. 275).

Maintenance of body temperature and water retention by spiders is critical to their survival. All spiders, including *Poecilotheria,* are ectotherms; therefore, their body temperature varies with that of their environment. While spiders keep body temperature within tolerable limits through behaviors such as moving into shade when temperatures rise (Pulz 1987, pp. 27, 34–35), they are susceptible to rapid fluctuations in body temperature and severe depletion of body water stores due to their relatively low body mass and high surface-to-volume ratio (Pulz 1987, p. 27).

Tropical ectotherms evolved in an environment of relatively low inter- and intra-annual climate variability, and already live near their upper thermal limits (Settele *et al.* 2014, p. 301; Deutsch *et al.* 2008, p. 6669). Their capacity to acclimate is generally low. They have small thermal safety margins, and small amounts of warming may decrease their ability to perform basic physiological functions such as development, growth, and reproduction (Deutsch *et al.* 2008, pp. 6668–6669, 6671). Evidence also indicates they may have low potential to increase their resistance to desiccation (drying out) (Schilthuizen and Kellerman 2014, p. 61, citing several sources).

The general trend in temperature in Sri Lanka over the past several decades is that of increasing temperature, although with considerable variation between locations in rates and magnitudes of change (De Costa 2008, p. 87; De Silva *et al.* 2007, p. 21, citing several sources). Over the six to ten decades prior to 2007, temperatures have increased within all climate zones of the country, although rates of increase vary from 0.065 °C (0.117 °F) per decade in Ratnapura (an increase of 0.65 °C (1.17 °F) during the 97-year period analyzed) in the lowland wet zone, to 0.195 °C (0.351 °F) per decade in Anuradhapura (an increase of 1.50 °C (2.70 °F) during the 77-year period analyzed) in the dry zone. In the montane region, temperatures increased at a rate of 0.141 °C (0.254 °F) per decade at Nuwara Eliya to 0.191 °C (0.344 °F) per decade at Badulla (increases of 1.09 and 1.47 °C (1.96 and 2.65 °F) during the 77-year period analyzed, respectively) (De Costa 2008, p. 68). The rate of warming has increased in more recent years—overall temperature in the country increased at a rate of 0.003 °C (0.005 °F) per year during 1896–1996, 0.016 °C (0.029 °F) per year during 1961–1990, and 0.025 °C (0.045 °F) per year during 1987–1996 (Eriyagama *et al.* 2010, p. 2, citing several sources). Depending on future climate scenarios, temperatures are projected to increase by 2.93 to 5.44 °C (5.27 to 9.49 °F) by the end of the current century in South Asia (Cruz *et al.* 2007, in Eriyagama *et al.* 2010, p. 6). Downscaled projections for Sri Lanka using regional climate models report increases of 2.0 to 4.0 °C (3.6 to 7.2 °F) by 2100, while statistical downscaling of global climate models report increases of 0.9 to 3 °C (1.62 to 5.4 °F) by 2100 and 1.2 to 1.3 °C (2.16 to 2.34 °F) by 2050 (Eriyagama *et al.* 2010, p. 6, citing several sources).

Trends in rainfall have been decreasing in Sri Lanka over the past several decades (see De Costa 2008, p. 87; De Silva *et al.* 2007, p. 21, citing several sources) although, according to the Climate Change Secretariat of Sri Lanka (2015, p. 19), there is no consensus on this fact. However, authors appear to agree that the intensity and frequency of extreme events such as droughts and floods have increased (Imbulana *et al.* 2016 and Ratnayake and Herath 2005, in Climate Change Secretariat of Sri Lanka 2015, p. 19).

Rainfall in Sri Lanka is highly variable from year to year, across seasons and across locations within any given year (Jayatillake *et al.* 2005, p. 70). Statistically significant declines in rainfall have been observed for the period 1869–2007 at Anuradhapura in the northern dry zone (12.92 mm (0.51 in) per decade), and Badulla, Kandy, and Nuwara Eliya (19.16, 30.50, and 51.60 mm (0.75, 1.20, and 2.03 in) per decade, respectively) in the central highlands (De Costa 2008, p. 77). Significant declines have also been observed in more recent decades at Kurunegala in western Sri Lanka's intermediate zone (120.57 mm (4.75 in) per decade during 1970–2007) and Ratnapura (41.02 mm (1.61 in) per decade during 1920–2007) (De Costa 2008, p. 77). Further, a significant trend of decreasing rainfall with increasing temperature exists at Anuradhapura, Kurunegala, and Nuwara Eliya (De Costa 2008, pp. 79–81). Patterns of future rainfall in the country are highly uncertain—studies provide variable and conflicting projections (Eriyagama *et al.* p. 6, citing several sources). However, an increased frequency of dry periods and droughts are expected (MOE 2010, p. 35).

While observed and projected changes in temperature and precipitation could potentially be within the tolerance limits of the *Poecilotheria* species addressed in this finding, it is possible that climate change could directly negatively affect these species through rising land surface temperatures, changes in the amount and pattern of precipitation, and increases in the frequency and intensity of extreme climate events such as heat waves or

droughts. It is also possible that climate change could indirectly negatively affect these species by adversely impacting populations of their insect prey, which are also tropical ectotherms. The only detailed observations of a Sri Lankan *Poecilotheria* species indicated that *P. fasciata* found in natural forest were emaciated and without spiderlings during an extended drought, while those found in an irrigated plantation had wider girths and spiderlings (see *Species-Specific Information*) (Smith *et al.* 2001, entire). The lack of reproduction in natural forest during drought may have been due to desiccation stress or lack of available prey, or both, as a result of low moisture levels.

While at least one of the species addressed in this finding (*P. fasciata*) appears to be vulnerable to drought, the responses of the five *Poecilotheria* species to observed and projected climate change in Sri Lanka are largely unknown. However, the climate in Sri Lanka has already changed considerably in all climate zones of the country, and continues to change at an increasing rate. These species evolved in specific, relatively stable climates and, because they are tropical ectotherms, may be sensitive to changing environmental conditions, particularly temperature and moisture (Deutsch *et al.* 2008, pp. 6668–6669; Schilthuizen and Kellerman 2014, pp. 59–61, citing several sources). Moreover, because they have poor dispersal ability, *Peocilotheria* are unlikely to be able to escape changing climate conditions via range shifts. Therefore, while population-level responses of the five species addressed in this finding to observed and projected changes in climate are not certain, the stress imposed on these species by increasing temperatures and changing patterns of precipitation is likely exacerbating the effects of other factors acting on these species such as stochastic events and habitat loss and degradation. This is especially the case for *P. fasciata* because (1) the frequency and intensity of droughts have increased and are expected to continue increasing, (2) the species fails to reproduce in natural forest during extended droughts, and (3) although *P. fasciata* is also known to inhabit irrigated coconut plantations, most populations have been found in natural forest.

Trade

Poecilotheria species are popular in trade due to their striking coloration and large size (Nanayakkara 2014a, p. 86; Molur *et al.* 2006, p. 23). In 2000, concerned about increasing trade in these species, Sri Lanka and the United States co-sponsored a proposal to include the genus in Appendix II of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES) (Government of Sri Lanka and Government of the United States 2000, entire). However, at the 11th Conference of the Parties, the proposal was criticized as containing too little information on international trade and on the limits of the distribution of the genus. It was further noted that the genus was primarily threatened by habitat destruction, and was not protected by domestic legislation in India. Also, the delegation of Sri Lanka promised to list the genus in Appendix III if the proposal failed. No consensus was reached on the proposal and a vote failed to achieve the required two-thirds majority—there were 49 votes in favor, 30 against, and 27 abstentions—and the proposal was therefore rejected (Convention on International Trade in Endangered Species of Wild Fauna and Flora 2000, p. 50). None of the five species addressed in this rule are currently listed in the CITES Appendices (Convention on International Trade in Endangered Species of Wild Fauna and Flora 2017, p. 48).

Collection of *Poecilotheria* specimens from the wild could have significant negative impacts on *Poecilotheria* populations. Due to the patchy distributions and poor dispersal abilities of tarantulas, collection of several individuals from a single location could potentially reduce the abundance or distribution of a species, especially those with restricted distributions (Molur *et al.* 2006, p. 14; West *et al.* 2001, unpaginated). Further, because tarantula populations are highly structured, loss of individuals from a single location could result in significant loss of that species' genetic diversity (Bond 2006, p. 154). Collection of a relatively large number of individuals from a single population could also alter population demographics such that the survival of a species or population is more vulnerable to the effects of other factors, such as habitat loss.

Collection of species from the wild for trade often begins when a new species is described or when a rare species has been rediscovered. Alerted to a new or novel species, collectors arrive at the reported location and set out collecting the species from the wild (Molur *et al.* 2006, p. 15; Stuart *et al.* 2006, entire). For tarantulas, adult females may be especially vulnerable to collection pressures as collectors often attempt to capture females, which produce young that can be sold (Capannini 2003, p. 107). Collectors then sell the collected specimens or their offspring to hobbyists who captive-rear the species and provide the pet trade with captive-bred specimens (Gabriel 2014, unpaginated; Molur *et al.* 2006, p. 16). Thus, more individuals are likely to be captured from the wild during the period in which captive-breeding stocks are being established, in other words, prior to the species becoming broadly available in trade (Gabriel 2014, unpaginated).

All five of the endemic Sri Lankan species addressed in this rule are bred by hobbyists and vendors and are available in the pet trade as captive-bred individuals in the United States, Europe, and elsewhere (see Herndon 2014, *pers. comm.;* Elowsky 2014, unpaginated; Gabriel 2014, unpaginated; Longhorn 2014a, unpaginated; Longhorn 2014b, unpaginated; Mugleston 2014, unpaginated; Service 2012, *in litt.*). We are not aware of any information on numbers of these species in domestic trade within the United States or numbers solely in foreign trade outside the United States. The Service's Law Enforcement Management Information System contains information on U.S. international trade in three of these species—*P. fasciata, P. ornata,* and *P. vittata* (it does not currently collect information on *P. smithi* or *P. subfusca*). Four hundred individuals of these species were legally imported into, or exported or re-exported from, the United States during 2007–2012; 298 were imported into, and 106 were exported or re-exported from, the United States.

Captive-bred individuals appear to supply the majority of the current legal trade in these species in the United States. Of the 400 individuals legally imported into, or exported or re-exported from, the United States during 2007–2012, 392 (98 percent) were declared as captive-bred (Service 2012, *in litt.*). However, wild individuals of at least some of these species are still being collected (Nanayakkara 2014a, p. 86; Nanayakkara 2014b, unpublished data; Service 2012, *in litt.*). Two sources indicate that there is evidence of illegal smuggling from Sri Lanka, although they do not provide details (see Nanayakkara 2014, p. 85; Samarawckrama *et al.* 2005, p. 76). Further, of the 400 individuals of Sri Lankan *Poecilotheria* imported into, or exported or re-exported from, the United States during 2007–2012, 8 *P. vittata* were declared as wild-caught. It is possible that additional wild-caught individuals of the five species addressed in this rule were (or are) not included in this total because they are imported

into the United States illegally, or imported into other countries. For example, some wild-caught specimens are imported into Europe (Merzlak 2017, unpaginated; Corcoran, 2016, unpaginated), although specific information on this activity is not available.

Sri Lanka prohibits the commercial collection and exportation of all *Poecilotheria* species, under the Sri Lanka Flora and Fauna Protection (Amendment) Act, No. 22 of 2009, which is part of the Fauna and Flora Protection Ordinance No. 2 (1937) (DLA Piper 2015, p. 392; Government of Sri Lanka and Government of the United States 2000, p. 5). However, enforcement is weak and influenced by corruption (DLA Piper 2015, p. 392; GOSL 2012, p. 2a–3–149).

In sum, individuals of at least some of these species are currently being collected from the wild. However, the extent to which this activity is occurring is unknown, as is the extent to which these species have been, or are being, affected by collection. Based on the available information on U.S. imports, exports, and re-exports, a small amount of trade occurs in wild specimens of these species. However, it is likely that more wild specimens enter Europe or Asia than the United States due to the closer proximity of Sri Lanka to Europe and Asia and consequent increased ease of travel and transport of specimens. Further, even small amounts of collection of species with small populations can have a negative impact on these species. Given that collection of at least some of these species from the wild continues to occur, it is likely that collection for trade is exacerbating population effects of other factors negatively impacting these species, such as stochastic events, habitat loss, and habitat degradation.

Intentional Killing

Poecilotheria spiders are feared by humans in Sri Lanka and, as a result, are usually killed when encountered (Kekulandala and Goonatilake 2015, unpaginated; Nanayakkara 2014a, p. 86; Gabriel 2014, unpaginated; Smith *et al.* 2001, p. 49). Intentional killing of *Poecilotheria* spiders may negatively impact these five species by raising mortality rates in these species' populations to such an extent that populations decline or are more vulnerable to the effects of other factors, such as habitat loss. Adult male *Poecilotheria* are probably more vulnerable to being intentionally killed because they wander in search of females during the breeding season (see *Tarantula General Biology*) and thus are more likely to be encountered by people. Consequently, intentional killing could potentially reduce the density of males in an area. Because the mating of a female depends on a male finding her, and males search for females randomly, a reduction in the density of males could result in a reduction in the percent of females laying eggs in any given year (Stradling 1994, p. 96) and, consequently, a lower population growth rate.

We do not have any information on the number of individuals of these five species that are intentionally killed by people. However, in areas where these species occur, higher human densities are likely to result in higher human contact with these species and, consequently, higher numbers of spiders killed. The human population density in Sri Lanka is much higher in the wet zone (see *Habitat Loss and Degradation*). Therefore, it is likely that *P. ornata, P. smithi,* and *P. subfusca* are affected by intentional killing more than *P. fasciata* and *P. vittata.* Although we do not have any information indicating the numbers of individuals of these species that are intentionally killed each year, it is likely that such killing is exacerbating the negative effects of other factors on these species' populations, such as habitat loss and degradation.

Stochastic (Random) Events and Processes

Species endemic to small regions, or known from few, widely dispersed locations, are inherently more vulnerable to extinction than widespread species because of the higher risks from localized stochastic (random) events and processes, such as floods, fire, landslides, and drought (Brooks *et al.* 2008, pp. 455–456; Mangel and Tier 1994, entire; Pimm *et al.* 1988, p. 757). These problems can be further magnified when populations are very small, due to genetic bottlenecks (reduced genetic diversity resulting from fewer individuals contributing to the species' overall gene pool) and random demographic fluctuations (Lande 1988, pp. 1455–1458; Pimm *et al.* 1988, p. 757). Species with few populations, limited geographic area, and a small number of individuals face an increased likelihood of stochastic extinction due to changes in demography, the environment, genetics, or other factors, in a process described as an extinction vortex (a mutual reinforcement that occurs among biotic and abiotic processes that drives population size downward to extinction) (Gilpin and Soule´ 1986, pp. 24–25). The negative impacts associated with small population size and vulnerability to random demographic fluctuations or natural catastrophes can be further magnified by synergistic interactions with other threats.

P. smithi is known from very few widely dispersed locations and is likely very rare (see *Species-Specific Information*). Therefore, it is highly likely that *P. smithi* is extremely vulnerable to stochastic processes and that the species is highly likely negatively impacted by these processes. The remaining four species have narrow ranges within specific climate zones of Sri Lanka. It is unclear whether the range sizes of these four are so small that stochastic processes on their own are likely to have significant negative impacts on these species. However, stochastic processes may have negative impacts on these species in combination with other factors such as habitat loss, because habitat loss can further fragment and isolate populations.

Determinations

Section 4 of the Act (16 U.S.C. 1533), and its implementing regulations at 50 CFR part 424, set forth the procedures for adding species to the Federal Lists of Endangered and Threatened Wildlife and Plants. Under section 4(a)(1) of the Act, we determine whether a species meets the definition of a ''threatened species'' or an ''endangered species'' because of any one or more of the following five threat factors or the cumulative effects thereof: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) Overutilization for commercial, recreational, scientific, or educational purposes; (C) Disease or predation; (D) The inadequacy of existing regulatory mechanisms; or (E) Other natural or manmade factors affecting its continued existence.

We have carefully assessed the best scientific and commercial information available on *P. fasciata, P. ornata, P. subfusca, P. smithi,* and *P. vittata.* While information on species abundance or population dynamics is not available on these species, the best available information indicates these species' populations have experienced extensive declines in the past and their populations continue to decline. Tarantulas have limited dispersal ability and sedentary habits; therefore, the loss of habitat (Factor A) likely results in direct loss of individuals or populations and, consequently, a reduction in the distribution of the species. As a result, the extensive loss of forest (71 percent in the dry zone, 85 percent in the intermediate zone, and 87 percent in the wet zone) has reduced the amount of habitat where the species may remain,

and their populations will likely continue to decline with ongoing deforestation. Further, because these species likely have highly structured populations, reductions in these species' populations have likely resulted in coincident loss of these species' unique genetic diversities, eroding the adaptive and evolutionary potential of these species (Bond 2006, p. 154).

All five Sri Lankan *Poecilotheria* species have restricted ranges within specific regions and climates of Sri Lanka and are currently estimated to occupy areas of less than 500 km² (193 mi²), and less than 10–15 km² (4–6 mi²) for *P. smithi.* Due to the life-history traits of tarantulas—restricted range, sedentary habits, poor dispersal ability, and structured populations—these species are vulnerable to habitat loss. Extensive habitat loss (Factor A) has already occurred in all the climate zones in which these species occur, and deforestation is ongoing in the country. Further, the cumulative effects of changing climate, intentional killing, pesticides, capture for the pet trade, and stochastic processes are likely significantly exacerbating the effects of habitat loss.

Therefore, for the following reasons we conclude populations of *P. fasciata, P. ornata, P. subfusca, P. smithi,* and *P. vittata* have been and continue to be significantly reduced to the extent that the viability of each of these five species is significantly compromised:

(1) These species are closely tied to their habitats, little of their forest habitat remains, deforestation is ongoing in these habitats, and these species are vulnerable to habitat loss;

(2) these species' have poor dispersal ability, are unlikely to be able to escape changing climate conditions via range shifts, and Sri Lanka's climate is changing at increasing rates;

(3) the cumulative effects of climate change, intentional killing, pesticides, capture for the pet trade, and stochastic processes are likely significantly exacerbating the effects of habitat loss; and

(4) *P. smithi* is known from few locations, is likely rare, and very likely vulnerable to stochastic processes.

The Act defines an endangered species in section 3(6) of the Act as any species that is ''in danger of extinction throughout all or a significant portion of its range'' and a threatened species in section 3(20) of the Act as any species that is ''likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range.''

Based on the factors described above and their impacts on *P. fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata,* we find the following factors to be threats to these species (*i.e.,* factors contributing to the risk of extinction of these species): Loss of habitat (Factor A; all five species), stochastic processes (Factor E; *P. smithi*), and the cumulative effects (Factor E; all five species) of these and other threats including climate change, intentional killing, pesticide use, and capture for the pet trade. Furthermore, despite laws in place to protect these five species and the forest and other habitat they depend on, these threats continue (Factor D), in part due to lack of resources and challenges to enforcement. We consider the risk of extinction of these five species to be high because these species are vulnerable to habitat loss, this process is ongoing, and these species have limited potential to recolonize reforested areas or move to more favorable climate. We find that *P. fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata* are presently in danger of extinction throughout their ranges based on the likely severity and immediacy of threats currently impacting these species, and we are listing these five tarantula species as endangered in accordance with sections 3(6) and 4(a)(1) of the Act. We find that a threatened species status is not appropriate for these species because of their restricted ranges, limited distributions, and vulnerability to extinction and because the threats are ongoing throughout their ranges at a level that places these species in danger of extinction now, even without the worsening of the threats, that, as discussed above, is likely.

Under the Act and our implementing regulations, a species may warrant listing if it is endangered or threatened throughout all or a significant portion of its range. Because we have determined that *P. fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata* are endangered throughout all of their ranges, we do not need to conduct an analysis of whether there is any significant portion of their ranges where these species are in danger of extinction or likely to become so in the foreseeable future. This is consistent with the Act because when we find that a species is currently in danger of extinction throughout all of its range (*i.e.,* meets the definition of an endangered species), the species is experiencing high-magnitude threats across its range or threats are so high in particular areas that they severely affect the species across its range. Therefore, the species is in danger of extinction throughout every portion of its range and an analysis of whether there is any significant portion of the range that may be in danger of extinction or likely to become so would not result in a different outcome.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition of conservation status, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in public awareness and conservation actions by Federal and State governments in the United States, foreign governments, private agencies and groups, and individuals.

Section 7(a) of the Act, as amended, and as implemented by regulations at 50 CFR part 402, requires Federal agencies to evaluate their actions that are to be conducted within the United States or upon the high seas, with respect to any species that is listed as an endangered or threatened species. Because *P. fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata* are not native to the United States, no critical habitat is being designated with this rule. Regulations implementing the interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a proposed Federal action may adversely affect a listed species, the responsible Federal agency must enter into formal consultation with the Service. Currently, with respect to *P. fasciata, P. ornata, P. smithi, P. subfusca,* and *P. vittata,* no Federal activities are known that would require consultation.

Section 8(a) of the Act authorizes the provision of limited financial assistance for the development and management of programs that the Secretary of the Interior determines to be necessary or useful for the conservation of endangered or threatened species in foreign countries. Sections 8(b) and 8(c) of the Act authorize the Secretary to encourage conservation programs for foreign listed species, and to provide assistance for such programs, in the form of personnel and the training of personnel.

Section 9 of the Act and our implementing regulations at 50 CFR 17.21 set forth a series of general prohibitions that apply to all endangered wildlife. These

prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to ''take'' (which includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these) endangered wildlife within the United States or upon the high seas. It is also illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. In addition, it is illegal for any person subject to the jurisdiction of the United States to import; export; deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of commercial activity; or sell or offer for sale in interstate or foreign commerce any listed species. Certain exceptions apply to employees of the Service, the National Marine Fisheries Service, other Federal land management agencies, and State conservation agencies.

We may issue permits to carry out otherwise prohibited activities involving endangered wildlife under certain circumstances. No permit is required for activities that do not constitute prohibited acts. Regulations governing permits for endangered species are codified at 50 CFR 17.22. With regard to endangered wildlife, a permit may be issued for the following purposes: For scientific purposes, to enhance the propagation or survival of the species, and for incidental take in connection with otherwise lawful activities. The Service may also register persons subject to the jurisdiction of the United States through its captive-bred-wildlife (CBW) program if certain established requirements are met under the CBW regulations. 50 CFR 17.21(g). Through a CBW registration, the Service may allow a registrant to conduct certain otherwise prohibited activities under certain circumstances to enhance the propagation or survival of the affected species: Take; export or re-import; deliver, receive, carry, transport or ship in interstate or foreign commerce, in the course of a commercial activity; or sell or offer for sale in interstate or foreign commerce. A CBW registration may authorize interstate purchase and sale only between entities that both hold a registration for the taxon concerned. The CBW program is available for species having a natural geographic distribution not including any part of the United States and other species that the Director has determined to be eligible by regulation. The individual specimens must have been born in captivity in the United States. There are also certain statutory exemptions from the prohibitions, which are found in sections 9 and 10 of the Act.

Summary of Comments and Recommendations

In the proposed rule published on December 14, 2016 (81 FR 90297), we requested that all interested parties submit written comments on the proposal by February 13, 2017. We also contacted appropriate scientific experts and organizations, and other interested parties and invited them to comment on the proposal. We did not receive any requests for a public hearing. All substantive information provided during comment periods has either been incorporated directly into this final determination or is addressed below.

Peer Reviewer Comments

In accordance with our peer review policy published on July 1, 1994 (59 FR 34270), we solicited expert opinion from four knowledgeable individuals with scientific expertise that included familiarity with *Poecilotheria* species or other tarantulas, their habitats and biological needs, and stressors acting on their populations. We received responses from two of the peer reviewers from whom we requested comments. One did not review the rule but provided additional information regarding a threat to the habitat of *P. smithi,* and we have incorporated this information into this final rule. The second peer reviewer supported our determinations based on our assessment of some threats, but disagreed with our assessment of others. This peer reviewer also provided a technical correction pertaining to our physical description of *Poecilotheria* species, and we have incorporated this information into this final rule.

We reviewed all comments received from the peer reviewers for substantive and new information regarding the listing of the five species addressed in this rule. Peer reviewer comments are addressed in the following summary and incorporated into the final rule as appropriate.

(1) Comment: Citing the taxonomic revision done by Gabriel *et al.* (2013, entire), and the World Spider Catalog, the peer reviewer states that *P. vittata* is not endemic to Sri Lanka, but rather that *P. vittata* was synonymized with the Indian species *P. striata* and recently removed from this synonymy.

Our response: Gabriel *et al.* (2013, entire) not only remove *P. vittata* from synonymy with the Indian species *P. striata,* but also show *P. vittata* to be the senior synonym of *P. pederseni.* Further, the World Spider Catalog (2017, unpaginated) recognizes this synonymy, identifying *P. pederseni* as a synonym of *P. vittata.* Therefore, in this final rule we retain the taxonomy provided in our proposed rule.

(2) Comment: The peer reviewer indicated that our conclusions regarding the effects of climate change and pesticides on these species are speculative because no studies have been conducted on the effects of these factors on *Poecilotheria* species. The peer reviewer also indicates that *Poecilotheria* are unlikely to come in direct contact with pesticides because they live in forests, which are not generally sprayed, and are nocturnal so are not active when spraying occurs. The peer reviewer indicates that studies on spiders in agroecosystems show spiders that do not have direct contact with pesticides survive. However, the peer reviewer did not provide any new information or evidence supporting her assertions.

Our response: While no studies have been carried out specifically assessing the effects of stress factors on any *Poecilotheria* species, the Act requires that we make our determination of species status based on the best scientific and commercial data available at the time of our rulemaking. In conducting our assessment of the statuses of these species, we reviewed all relevant information available to us, including information submitted to us following the initiation of the 12-month status reviews for these species. We subsequently based our conclusions regarding the factors affecting these five species on the best available information. We acknowledged in our proposed rule that the population-level effects of climate change and pesticides on these species are uncertain. However, as indicated in our proposed rule, the best available information indicates that these stressors are likely negatively affecting these species, either directly or indirectly, to some extent. Consequently, it is reasonable to conclude, as we did in our proposed rule, that pesticides and climate change likely exacerbate the effects of other stressors acting on these species. Therefore, because we based our conclusions on the best available information, and the peer reviewer provided no evidence or new information for our review, we did not revise our conclusions regarding the effects of climate change or pesticides on these five species.

We cannot assess the studies to which the reviewer refers regarding the effects of pesticides on spiders because the reviewer did not provide copies of these studies or the citations for them. Further, while we agree that some

members of these species' populations are unlikely to have direct contact with pesticides, we do not agree that is the case for all members, particularly those inhabiting fragmented forests or remnant forest patches. As indicated in our proposed rule, these species could be exposed to pesticides via pesticide drift into forests that are adjacent to crop-growing areas, by traveling over pesticide treated land when dispersing between forest patches, or by consuming prey that have been exposed to pesticides (see *Pesticides*). Also, the most commonly used insecticides in Sri Lanka—carbofuran, chlorpyrifos, and diazinon—can remain active in the environment for days after application (Kamrin 1997, in Christensen *et al.* 2009, unpaginated; Karmin 1997, in Harper *et al.* 2009, unpaginated; U.S. National Library of Medicine 1995, in EXTOXNET 1996, unpaginated). Therefore, these five species could be directly and negatively affected by these pesticides after spraying occurs. They could also be indirectly affected by pesticides through consumption of contaminated prey, or reduction or depletion of prey populations. Taken together, and considering the extent of pesticide use and misuse in the country, it is likely that the five species addressed in this rule are directly or indirectly negatively affected by pesticides to some extent and that these effects likely exacerbate the effects of other threats acting on these species.

Public Comments

We received 115 public comments on the proposed listing of these species, most from people involved in the tarantula hobby as owners, breeders, or sellers. We reviewed all comments received from the public for substantive issues and new information regarding the listing of the five species addressed in this rule. Public comments are addressed in the following summary and incorporated into the final rule as appropriate. A few commenters provided new information on *Poecilotheria* biology or trade, and we have incorporated this information into the corresponding sections of this rule.

(1) Comment: Several commenters questioned certain information in our proposed rule. Several claimed that we inaccurately characterized the degree or effects (or both) of inbreeding or maladaptation in captive specimens of these species. Another questioned our assessment of the ability of these species to adapt to changing climate in Sri Lanka. Many of these commenters cited their own anecdotal observations of captive specimens to support their claims while the remaining commenters provided no new information. A few other commenters claimed, more generally, that we used outdated references or erroneous information, or misrepresented the findings of cited authors. However, these commenters also provided no new references or information supporting their claims.

Our Response: The Act requires that we use the best available scientific and commercial data to determine if a species meets the definition of a ''threatened species'' or an ''endangered species'' because of any one or a combination of the five factors found in section 4(a)(1) of the Act. This analysis includes an analysis of the extent to which captive-held members of a species create or contribute to threats to the species (for example, by fueling trade) or the extent to which captive-held members of a species remove or reduce threats to the species by contributing to the conservation of the species (for example, by providing specimens for population augmentation or reintroduction). In conducting our analysis, we reviewed all relevant information available to us on these species, including information submitted to us following the initiation of the 12-month status reviews for these species. We based our proposed rule, including the discussion and conclusions regarding captive *Poecilotheria,* on the best scientific and commercial data available to us at the time of our proposed rule. In addition, we reviewed all comments and information submitted by the public and peer reviewers during the public comment period for our proposed rule and base this final rule on the best available information.

Although some commenters provided anecdotal observations of captive specimens to support their assertions regarding the effects of inbreeding and maladaptation in captive specimens, or the ability of captive specimens to adapt to climate conditions, observations of health or survivability in captive conditions are not informative to predicting health or survivability in wild conditions because selection pressures in the wild differ greatly from those in captivity. Therefore, in this final rule we did not change any of our conclusions on these topics. However, we revised the section on Captive *Poecilotheria* to clarify the bases of our conclusions.

(2) Comment: A few commenters suggested that we did not consider the knowledge or efforts of hobbyists in our proposal.

Our Response: As required by the Act, we based our determinations on the best scientific and commercial information available. In doing so, we reviewed all information available to us on these species, including information submitted to us by the public following initiation of our 12-month status reviews for these species. This included information and dozens of articles from hobbyist publications. Further, we cited several of these sources in our proposal and retained these citations in this final rule.

(3) Comment: Some commenters believe that we inaccurately suggested in our proposed rule that *all* captive-bred specimens of these species have limited value to the conservation of these species—that all are inbred, maladapted to conditions in the wild, or hybridized—and that we did not acknowledge the knowledge and good practices of reputable breeders. A few suggest that genetic tests could determine which captives could potentially be useful for a conservation breeding program.

Our Response: We appreciate the level of knowledge and care taken by reputable hobbyists when breeding these species. However, we acknowledged the uncertainties pertaining to the levels of inbreeding and hybridization in pet trade specimens in our proposed rule by indicating that captive individuals of these species ''*may* be inbred or maladapted to conditions in the wild'' and ''likely include an *unknown number* of hybrids'' (see Captive *Poecilotheria*). Further, as indicated above, we have revised the section on captive *Poecilotheria* to clarify the bases of our conclusions. With respect to determining the genetic appropriateness of captive specimens for conservation via genetic testing, the Act requires us to make our decision based on the best available information at the time we make our decision, and we are not aware of any genetic studies on any individuals of these species, captive or wild. Even if such information existed, we have no information indicating that pet trade specimens are contributing to the conservation of these species in the wild, for instance, as part of a reintroduction program. Therefore, we have not changed our conclusions regarding captive specimens of these species.

(4) Comment: A few commenters assert that the extent of hybridization of these species in the pet trade is likely low because tarantula hobbyists are strongly opposed to hybridization of species, and because breeders can distinguish between species of adult specimens and take care not to cross-breed them.

Our Response: Again, we appreciate the level of knowledge and care taken by reputable hobbyists when breeding these species. However, because (1) genetic studies have not been conducted on any of these species, (2) evidence indicates that hybrids do occur in the hobby, (3) hybridization may not be visually apparent in captive individuals, and (4) the lineages of pet trade specimens of these species are not documented, the extent of hybridization in any particular captive specimen—be it high, low, or nonexistent—is unknown.

(5) Comment: Several commenters believe that captive-bred specimens in the pet trade are beneficial or necessary to the conservation of these species. They believe captive-bred specimens provide a safety net for these species to prevent extinction, increase public awareness, provide for education and research, supply zoos, and take the collection pressure off wild populations by fulling the demand for these species as pets. Two commenters assert that these species are not in danger of extinction because many exist in captivity.

Our Response: The goal of the Act is survival and recovery of endangered and threatened species and the ecosystems on which they depend. Therefore, when analyzing threats to a species, we focus our analysis on threats acting upon its survival in the wild, generally within the native range of the species. In our assessment of the status of a species, the extent to which captive-held members of a species create or contribute to threats to the species (for example, by fueling trade) or the extent to which captive-held members of a species remove or reduce threats to the species by contributing to the conservation of the species in the wild (for example, by providing specimens for population augmentation or reintroduction) is part of the analysis we conduct under section 4(a)(1) of the Act to determine if the species meets the definition of an endangered species or a threatened species. Further, the Act requires that we make our decision based on the best scientific and commercial data available at the time our decision is made. As indicated in our proposed rule, we are not aware of any existing conservation programs for these species or information indicating that pet trade specimens contribute to the viability of these species within their native ranges in the wild, and have clarified this in revisions to the Captive *Poecilotheria* section of this rule. We also determined that pet trade specimens likely hold limited value to the conservation of these species in the wild. However, we acknowledge that some pet trade specimens could potentially contribute to the conservation of these species in the wild if, for example, they became part of a genetically managed conservation breeding program. Persons seeking to engage in otherwise prohibited activities with endangered wildlife for scientific purposes or to enhance the propagation or survival of these species may seek authorization from the Service (see *Available Conservation Measures*).

We also have no information indicating that current or future education or research efforts are being conducted or planned with captive-bred pet trade specimens of these species for conservation purposes, or any evidence that populations in the wild are benefiting from current education or research efforts using captive-bred pet trade specimens. The best scientific and commercial data available indicate that as of September 2017 there were only 19 specimens in captivity in zoos worldwide (11 *P. fasciata,* 1 *P. ornata,* 2 *P. vitatta,* 5 *P. subfusca*) (Species360 2017, unpaginated).

With respect to trade, certain prohibitions, certain exceptions, and other conservation measures established through the Act are available for endangered species upon listing (see *Available Conservation Measures*). Therefore, they are provided by law to fulfill the purposes and policy of the Act. The effects of legal trade of a species on wild populations and market demand for that species is a complex phenomenon influenced by a variety of factors (Bulte and Damania 2005, entire; Fischer 2004, entire), and we are not aware of any evidence indicating that the pet trade of captive-bred specimens of these species are benefitting wild populations.

(6) Comment: One commenter expressed concern that listing these species as endangered would likely result in their extinction due to forcing breeders to stop breeding unless they apply for a permit. The commenter also indicated that specimens possessed by hobbyists that are unable to be used in repopulation efforts would not fall under the protections of the Act because they are ''unpure specimens''.

Our Response: As explained in response to comments below, captive breeding and many activities related to captive breeding are not prohibited under the Act. Persons seeking to engage in activities that are not prohibited under the Act do not need a permit under the Act. While we are not certain how this commenter defines ''unpure'', the protections of the Act apply to all members of these five species as explained in response to comments below. We recommend that breeding records be maintained to show parentage.

(7) Comment: Several commenters requested we exempt captive-bred specimens and their offspring from possession and interstate sales regulations, allowing ownership and interstate trade of these species to occur without obtaining a permit under the Act.

Our Response: Because we determined that all five of these species meet the definition of an ''endangered species'' under the Act, section 9(a)(1) of the Act and our implementing regulations at 50 CFR 17.21 set forth a series of general prohibitions that apply to all members of each of these species, whether captive or wild. The prohibitions cannot be revised through a regulation under section 4(d) of the Act, because such regulations apply to threatened species. The Act also does not allow for captive-bred specimens of these listed species to be assigned separate legal status from their wild counterparts. However, no permit is required for activities that do not constitute prohibited acts. As noted in response to comments below, the Act does not prohibit captive breeding of listed species and also does not prohibit a number of activities related to captive breeding, such as ownership. Furthermore, we may authorize otherwise prohibited activities for scientific purposes or to enhance the propagation or survival of these species, in accordance with the Act and our regulations (see *Available Conservation Measures*).

(8) Comment: Several commenters suggested that, rather than list these species as endangered species under the Act, we instead take another action such as: List them in a CITES Appendix, list them as threatened species with a section 4(d) rule that allows interstate trade, do not list them at all, or focus on ameliorating threats within these species' native ranges rather than on regulating domestic trade.

Our Response: When we receive a petition to list a species under the Act, we are required to make a determination as to whether that species meets the Act's definition of a threatened species or an endangered species. We are required to do this based solely on the best scientific and commercial data available, as it relates to the five listing factors in section 4(a)(1) of the Act. When we determine that a species meets the Act's definition of a threatened species or endangered species, we must list that species accordingly under the Act. We determined that these species

meet the definition of endangered species, and as such we must list them as endangered species. The Act and our regulations provide prohibitions and other conservation measures that apply to all endangered species as described above (see *Available Conservation Measures*). Because we found that listing these species as endangered is warranted, not listing them is not an option. We also cannot list them as threatened species with a section 4(d) rule because we found that they are endangered, not threatened species. Furthermore, because we found them warranted for listing, not listing them is not feasible. Finally, CITES has a different process and set of criteria for listing species in the CITES Appendices that is independent of listing under the Act. The portion of the comment suggesting a CITES listing is outside the scope of this agency action to consider whether these species should be listed as endangered species under the Act.

(9) Comment: One commenter asked how to acquire a permit for exemption from the prohibitions of the Act and how often permits need to be renewed.

Our Response: Information regarding permits for activities related to these five species can be obtained at our International Affairs program website at *https://www.fws.gov/international/.*

(10) Comment: Several commenters believe that trade in these species has little or no effect on wild populations and provided various reasons, including: They had never seen, or heard of others seeing, a wild-caught specimen; the captive stock is self-sustaining; wild-caught specimens are frowned upon in the hobby; and there is no financial incentive for the trade of wild-caught specimens. Others contend that listing and/or regulating trade in the United States is not necessary or useful because U.S. trade does not affect wild populations and because the primary threats to these species occur outside U.S. jurisdiction, in Sri Lanka.

Our Response: Evidence shows that wild-caught specimens of some of these species occur in trade (see *Trade*). Although the amount of trade in wild-caught specimens in the United States appears to be small, this does not mean trade, or U.S. trade, has no, or even little, effect on wild populations. As indicated in our proposed rule, collection of small numbers of individuals of these species could potentially have significant negative effects on wild populations of these species. With respect to U.S. jurisdiction and the regulation of trade, the Act requires the Service to determine if species qualify as endangered or threatened species regardless of whether a species is native to the United States. The protections of the Act include prohibitions on certain activities including import, export, take, and certain commercial activity in interstate or foreign commerce (see *Available Conservation Measures*). By regulating these activities, the Act helps to ensure that people under the jurisdiction of the United States do not contribute to the further decline of listed species.

(11) Comment: Several commenters raise concerns that listing would provide a disincentive to captive-breeding these species.

Our Response: It is not our intention to cause difficulties for breeders of these species or a decline in the pool of captive-held specimens. The Act does not prohibit or ''ban'' captive breeding of listed species. The Act also does not prohibit a number of activities related to captive breeding. For example, ownership, possession, or keeping of a listed species that was legally acquired and not taken in violation of the Act is not prohibited by the Act—nor is interstate transport of animals that are not for sale, not offered for sale, or not transported in the course of a commercial activity. Further, while the Act prohibits harassment of listed species (via the definition of ''take''), our regulations specify that, when captive animals are involved, harassment does not include generally accepted animal husbandry practices that meet or exceed AWA standards, breeding procedures, or provisions of veterinary care for confining, tranquilizing, or anesthetizing, when such practices, procedures, or provisions are not likely to result in injury (see the definition of harass at 50 CFR 17.3). In addition, activities that do not adversely affect these species, such as observations in behavioral research, are not considered take. Activities that are not prohibited by the Act do not require a permit under the Act.

The protections of the Act for endangered species include prohibitions on certain activities with any member of the listed species including import, export, take, and certain commercial activity in interstate or foreign commerce (see *Available Conservation Measures*). Permits may be issued to carry out otherwise prohibited activities, for scientific purposes or to enhance the propagation or survival of the species. For example, a permit could potentially be issued for import or export of captive-bred specimens if the activity were determined to enhance the propagation or survival of the species. Section 10(g) of the Act provides that any person claiming the benefit of any exemption or permit under the Act shall have the burden of proving that the exemption or permit is applicable, has been granted, and was valid and in force at the time of an alleged violation. While the Service may have information available to it that may assist in making required determinations prior to authorizing otherwise prohibited activities with listed species, the burden is on the applicant to provide necessary information for the Service to issue a permit.

Required Determinations

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*), need not be prepared in connection with listing a species as an endangered or threatened species under the Endangered Species Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

Regulation Promulgation

Accordingly, we amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245; unless otherwise noted.

■ 2. In § 17.11(h), add the following entries to the List of Endangered and

Threatened Wildlife in alphabetical order under Arachnids:

■ a. Spider, ivory ornamental tiger;

■ b. Spider, ornate tiger;

■ c. Spider, Pedersen's tiger;

■ d. Spider, Smith's tiger; and

■ e. Spider, Sri Lanka ornamental tiger.

The additions read as follows:

§ 17.11 Endangered and threatened wildlife.

RIN 0648–BH24

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to U.S. Navy Pier Construction Activities at Naval Submarine Base New London

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: Upon application from the U.S. Navy (Navy), NMFS is issuing regulations under the Marine Mammal Protection Act for the taking of marine mammals incidental to the pier construction activities conducted at the Naval Submarine Base New London in Groton, Connecticut, over the course of five years (2020–2025). These regulations allow NMFS to issue a Letter of Authorization (LOA) for the incidental take of marine mammals during the specified construction activities carried out during the rule's period of effectiveness, set forth the permissible methods of taking, set forth other means of effecting the least practicable adverse impact on marine mammal species or stocks and their habitat, and set forth requirements pertaining to the monitoring and reporting of the incidental take.

DATES: Effective March 1, 2020 through February 28, 2025.

ADDRESSES: To obtain an electronic copy of the Navy's LOA application or other referenced documents, visit the internet at: *www.nmfs.noaa.gov/pr/permits/incidental/construction.htm.* In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Shane Guan, Office of Protected Resources, NMFS; phone: (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Purpose and Need for Regulatory Action

This final rule establishes a framework under the authority of the MMPA (16 U.S.C. 1361 *et seq.*) to allow for the authorization of take of marine mammals incidental to the Navy's construction activities related to marine structure maintenance and pile replacement at a facility in Groton, Connecticut.

We received an application from the Navy requesting five-year regulations and authorization to take multiple species of marine mammals. Take would occur by Level A and Level B harassment incidental to impact and vibratory pile driving. Please see ''Background'' below for definitions of harassment.

Legal Authority for the Proposed Action

Section 101(a)(5)(A) of the MMPA (16 U.S.C. 1371(a)(5)(A)) directs the Secretary of Commerce to allow, upon request, the incidental, but not intentional taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region for up to five years if, after notice and public comment, the agency makes certain findings and issues regulations that set forth permissible methods of taking pursuant

to that activity and other means of effecting the ''least practicable adverse impact'' on the affected species or stocks and their habitat (see the discussion below in the ''Proposed Mitigation'' section), as well as monitoring and reporting requirements. Section 101(a)(5)(A) of the MMPA and the implementing regulations at 50 CFR part 216, subpart I, provide the legal basis for issuing this proposed rule containing five-year regulations, and for any subsequent letters of authorization (LOAs). As directed by this legal authority, this final rule contains mitigation, monitoring, and reporting requirements.

Summary of Major Provisions Within the Final Rule

Following is a summary of the major provisions of this final rule regarding Navy construction activities. These measures include:

- Required monitoring of the construction areas to detect the presence of marine mammals before beginning construction activities.
- Shutdown of construction activities under certain circumstances to avoid injury of marine mammals.
- Soft start for impact pile driving to allow marine mammals the opportunity to leave the area prior to beginning impact pile driving at full power.

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (Secretary) to allow, upon request, the incidental, but not intentional taking of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) if certain findings are made and regulations are issued or, if the taking is limited to harassment, notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such taking are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term ''take'' means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal. Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On March 22, 2017, NMFS received an application from the Navy requesting authorization to incidentally take harbor and gray seals, by Level A and Level B harassment, incidental to noise exposure resulting from conducting pier construction activities at the Navy Submarine Base New London in Groton, Connecticut, from October 2018 to March 2022. These regulations would be valid for a period of five years. On August 31, 2017, NMFS deemed the application adequate and complete. On May 23, 2018, the Navy requested that the rule be valid between March 1, 2020, and February 28, 2025, due to construction schedule changes.

The use of sound sources such as those described in the application (*e.g.,* piledriving) may result in the take of marine mammals through disruption of behavioral patterns or may cause auditory injury of marine mammals. Therefore, incidental take authorization under the MMPA is warranted.

Description of the Specified Activity

Overview

The Navy is planning to demolish Pier 32 and Pier 10 and construct a new Pier 32 at Naval Submarine Base New London (SUBASE), Groton, Connecticut.

Recent Global Shore Infrastructure Plans and Regional Shore Infrastructure Plans identified a requirement for 11 adequate submarine berths at SUBASE. There are currently six adequate berths available via Piers 6, 17, and 31, leaving a shortfall of five adequate berths. The remaining submarine berthing piers (8, 10, 12, 32, and 33) are classified as inadequate because of their narrow width and short length compared to current SSN (hull classification) berthing design standards (Unified Facilities Criteria 4–152–01, Design Standards for Piers and Wharves).

The Proposed Action is to demolish Pier 32 and Pier 10, and replace them with a new Pier 32 that meets all current Navy SSN pier standards to accommodate Virginia Class submarines. The Proposed Action includes:

- Construction of a new, larger Pier 32 to be located approximately 150 feet (ft) north of the current location.
- Upgrade of the quaywall, north of Pier 32, may be required to accommodate a crane weight test area.
- Demolition of existing Pier 32 and Pier 10.
- Dredging of the sediment mounds beneath the existing Pier 32 (approximately 9,400 cubic yards [cy]) and the existing Pier 10 (approximately 10,000 cy) to a depth of 36 ft below mean lower low water (−36 ft MLLW) plus 2 ft of over dredge (additional dredge depth that allows for varying degrees of accuracy of different types of dredging equipment). Any remaining timber piles beneath the existing piers would be pulled with a strap.
- Dredging of the berthing areas alongside the proposed new Pier 32 (approximately 74,000 sq ft) to a depth of −38 feet MLLW plus 2 feet of over dredge.
- Dredging of two additional areas (approximately 10,200 cy and 31,100 cy) in the Thames River navigation channel to a depth of −36 ft MLLW plus 2 ft of over dredge.

Two species of marine mammals are expected to potentially be present in the Thames River near SUBASE: Harbor seal (*Phoca vitulina*) and gray seal (*Halichoeris grypus*). Harbor seals and gray seals are more likely to occur at SUBASE from September to May.

Dates and Duration

Pile installation for the new Pier 32 and pile removal associated with the demolition of the existing Piers 32 and 10 is expected to take a total of approximately 3.5 years. Construction and demolition activities are expected to begin no earlier than March 2020 and proceed to completion in February 2025.

In-water activities expected to result in incidental takes of marine mammals would occur during approximately 35 non-consecutive months of the project beginning in March 2020. The estimated duration of pile installation and removal, including duration of the vibratory and impact hammer activities, is provided in Table 1 below for each year of construction and demolition. Also included in the Table are the durations for wood piles and steel fender piles to be pulled by a crane using a sling or strap attached to the pile. The durations of proposed pile driving/removal activities are primarily

derived from information provided by Naval Facilities Engineering Command (NAVFAC) Mid-Atlantic Public Works Department, Facilities Engineering and Acquisition Department (FEAD) Design Manager and the record of pile driving activities documented during the construction of SUBASE Pier 31 (American Bridge 2010–2011). The proposed new Pier 32 would be comparable to Pier 31 in design and location and would have similar sub-surface geological conditions along this reach of the Thames River.

Specified Geographical Region

SUBASE is located in the towns of Groton and Ledyard in New London County, Connecticut. SUBASE occupies approximately 687 acres along the east bank of the Thames River, 6 mi north of the river's mouth at Long Island Sound (Figure 1–1 in LOA application). The Thames River is the easternmost of Connecticut's three major rivers and is formed by the confluence of the Shetucket and Yantic rivers in Norwich, from which it flows south for 12 mi to New London Harbor. The Thames River discharges freshwater and sediment from the interior of eastern Connecticut into Long Island Sound. It is the main drainage of the Thames River Major Drainage Basin, which encompasses approximately 3,900 square mi of eastern Connecticut and central Massachusetts (USACE 2015). The lower Thames River and New London Harbor sustains a variety of military, commercial, and recreational vessel usage. New London Harbor provides protection to a number of these.

Detailed Description of Specified Activity

1. Construction of New Pier 32

Pile driving would most likely be conducted using a barge and crane. However, the contractor may choose to use a temporary pile-supported work trestle that would be constructed by driving approximately 60 steel 14-inch diameter H-piles.

Structural support piles for Pier 32 would consist of approximately 120 concrete-filled steel pipe piles measuring 36 inches in diameter. The piles would be driven between 40 ft below the mudline near the shore and 150 ft below the mudline at the end of the pier. Fender piles would also be installed and would consist of approximately 194 fiberglass-reinforced plastic piles measuring 16 inches in diameter.

Special construction features would include drilling rock sockets into bedrock in an estimated 60 places to hold the piles. A rotary drill using a rock core barrel and rock muck bucket would be used inside of the steel pipe piles to drill a minimum of 2 ft down into bedrock to create the rock socket that would be filled with concrete. Sediment would be lifted out and re-deposited within 10 ft of the pipe pile during rock socket drilling. Underwater noise from the rock drill as it is operated inside a steel pipe would be much less than that produced by vibratory and impact pile driving of the steel pipes (Martin et al. 2012).

Impact and vibratory hammers would be used for installing piles where rock sockets are not required. Based on previous construction projects at SUBASE, it is estimated that an average of one 36-inch pile per week (with driving on multiple days) and two plastic piles per day would be installed. The per-pile drive time for each pile type and method will vary based on environmental conditions (including substrate) where each pile is driven. Impact or vibratory pile driving may result in harassment of marine mammals.

Construction of Pier 32 may also require upgrade of the quaywall north of Pier 32 to provide the reinforcement needed to support a crane weight test area. Because there is potential that a work trestle would be used and the requirement for the upgrade will not be determined until final design, the pile driving is included in the analyzed activities. The quaywall upgrade would include up to approximately eighteen 30-inch diameter concrete-filled steel pipe piles that would be installed into rock sockets driven into bedrock adjacent and parallel to the existing steel sheet pile wall. Pile caps and a concrete deck would be installed above the piles. A fender system composed of approximately nine 16-inch diameter plastic piles would also be installed into rock sockets approximately 2 ft in front of the new deck.

2. Demolition and Removal of Pier 32 and Pier 10

When the new Pier 32 is operational, the existing Pier 32 would be demolished using a floating crane and a series of barges. Pier 10 would be demolished after the demolition of existing Pier 32. The concrete decks of the piers would be cut into pieces and placed on the barges. Demolition debris would be sorted and removed by barge and recycled to the maximum extent practicable. Any residual waste would be disposed of offsite in accordance with applicable federal, state, and local regulations. Once the decks are removed, the steel H piles and pipe piles that support the existing pier would be pulled using a vibratory extraction method (hammer). The vibratory hammer would be attached to the pile head with a clamp. Once attached, vibration would be applied to the pile that would liquefy the adjacent sediment allowing the pile to be removed.

Demolition of existing Pier 32 would include the removal by vibratory driver-extractor (hammer) of approximately 60 steel piles from the temporary work trestle, 120 concrete-encased steel H-piles, and 70 steel H-piles. Fifty-six wood piles would be pulled with a sling. Demolition of Pier 10 would include the removal by vibratory hammer of 24 concrete-encased, steel H-piles and 166 cast-in-place, reinforced concrete piles. Eighty-four steel fender piles and 41 wood piles would be pulled with a sling. A total of 440 piles would be removed by vibratory hammer for both piers and the work trestle.

3. Dredging of Pier Areas and Navigation Channel

The Proposed Action would also include dredging of approximately 60,000 cy of sediment in two areas of the Thames River navigation channel near Pier 32, the berthing areas alongside the new Pier 32, and underneath existing Pier 32 and Pier 10 after demolition. All dredging for the Proposed Action would support safe maneuvering for entry and departure of submarines at the proposed new Pier 32 and existing Piers 8, 12, 17, and 31. The proposed design dredge depth in all areas to be dredged is −36 ft relative to MLLW plus 2 ft of over dredge.

Dredging would be conducted in two phases. Dredging of the new Pier 32 area and the northern portion of the channel dredge areas would be conducted in the first construction year. The footprints of the demolished Pier 32 and Pier 10 and the southern portions of the channel dredge areas would be dredged after demolition of the existing piers in the fourth year of construction. Dredging would occur only during the period between October 1 and January 31 to avoid potential impacts on shellfish and fisheries resources in the area. Each dredging and disposal phase would take approximately 2 weeks to complete.

After the demolition of Pier 32, any remnant timber piles present underneath existing Pier 32 would be pulled with a strap. The sediment mound that has formed beneath the pier would be dredged (approximately 9,400 cy) to the design depth. Dredging would also be required immediately west of Piers 31 and 32 (approximately 10,200 cy) and along the eastern edge

(approximately 31,100 cy) of the navigation channel to achieve the required minimum depths to maneuver the submarines. Once the existing Pier 10 and any remnant timber piles are removed, the sediment mound beneath the old pier would be dredged (approximately 10,000 cy).

Since dredging and disposal activities would be slow moving and conspicuous to marine mammals, they pose negligible risks of physical injury. An environmental bucket would be used for dredging to minimize turbidity compared with the turbidity generated by hydraulic dredging. Noise emitted by dredging equipment is broadband, with most energy below 1 kilohertz (kHz), and would be similar to that generated by vessels and maritime industrial activities that regularly operate within the action area (Clarke et al. 2002; Todd et al. 2015). Due to the low noise output and slow and steady transiting nature of the dredging activity, NMFS does not consider it would result to the level of harassment under the MMPA. Therefore, dredging is not considered further in this document.

TABLE 1—SUMMARY OF CONSTRUCTION ACTIVITIES FOR THE NAVY SUBMARINE BASE NEW LONDON

Activity	Pile No.	Pile type	Method	Piles/day	Total driving days	Strike number (impact) or duration(s) per pile	Duration
Year 1							
Pier 32 construction	60	14″ steel H-pile temp. work trestle.	Impact	4	15	1,000 strikes	3 weeks.
	60	36″ x 100′ concrete-filled steel pipe piles.	Vibratory hammer & rock socket drilling.	0.5	120	1,200 seconds	6 months.
	20	36″ x 180′ concrete-filled steel piles.	Vibratory hammer	0.2	100	1,800 seconds	5 months.
	20	36″ x 180′ concrete-filled steel piles.	Impact hammer to last 20–40 ft.	2.5	8	1,000 strikes	2 weeks.
Quaywall upgrade	18	30″ x 100′ concrete-filled steel pipe piles.	Rock socket drilling	0.5	36	15,000 seconds	Concurrent with Pier 32.
	9	16″ fiberglass reinforced plastic piles.	Rock socket drilling	0.5	18	7,500 seconds..	
Year 2							
Pier 32 construction	40	36″ x 180′ concrete-filled steel piles.	Vibratory hammer	0.2	200	1,800 seconds	10 months.
	40	36″ x 180′ concrete-filled steel piles.	Impact hammer to drive last 20–40 ft.	2.5	16	1,000 strikes	3.5 weeks.
Year 3							
Pier 32 construction	194	16″ fiberglass reinforced plastic piles.	Vibratory hammer	2	97	1,200 seconds	5 months.
	64	16″ fiberglass reinforced plastic piles.	Impact hammer to drive last 20–40 ft.	2.5	26	1,000 strikes	1.5 months.
Year 4							
Pier 32 demolition	60	14″ steel H-piles temp. work trestle.	Vibratory hammer (removal) ..	5	14	1,200 seconds	3 weeks.
	24	33″ concrete-encased steel H piles.	Vibratory hammer (removal) ..	2	12	1,200 seconds	3.5 months.
	96	24″ concrete-encased steel H piles.	Vibratory hammer (removal) ..	2	48	1,200 seconds..	
	70	14″ steel H piles	Vibratory hammer (removal) ..	5	14	1,200 seconds..	
Pier 10 demolition	24	24″ concrete-encased steel H piles.	Vibratory hammer (removal) ..	9.5	2.5	1,200 seconds	0.5 month.
	166	24″ cast-in-place reinforced concrete piles.	Vibratory hammer (removal) ..	9.5	17.5	1,200 seconds	0.5 month.

Prescribed mitigation, monitoring, and reporting measures are described in detail later in this document (please see ''Mitigation'' and ''Monitoring and Reporting'').

Comments and Responses

NMFS published a proposed rule in the **Federal Register** on April 13, 2018 (83 FR 16027). During the 30-day public comment period on the proposed rule, NMFS received comments from the Marine Mammal Commission (Commission). We did not receive other comments.

Comment 1: The Commission recommends that NMFS require the Navy to conduct sound source verification (SSV) and the size of Level B harassment zone measurements for certain piles that data are lacking and where the zones are not based on modeling. These acoustic measurements include:

- Vibratory and impact installation of at least five 16-in fiberglass-reinforced plastic piles—measurements for source levels;
- Rock socket drilling of at least three 30-in and three 16-in piles—measurements for source levels and the extent of the Level B harassment zones;
- Vibratory installation of at least three 36-in steel piles—measurements for the extent of the Level B harassment zone; and
- Vibratory removal of at least three 24-in concrete and three 33-in concrete piles—measurements for source levels and the extent of the Level B harassment zones.

Response: NMFS discussed these recommendation with the Navy and the Navy agreed to conduct SSVs on the piles for which source level data are not already available. SSV measurements to be conducted are:

- Vibratory and impact installation of at least 5 16-in fiberglass reinforced plastic piles, and

• Rock socket drilling of at least 3 30-in and 3 16-in piles.

However, the Navy did not agree to conduct acoustic measurements to the extent of the Level B harassment zones. The Navy indicated that conducting hydroacoustic monitoring to the extent of the Level B harassment zones is not a common requirement based on the five most recent active IHAs, including U.S. Army Corps of Engineers' (USACE) Tampa Harbor Big Bend Channel expansion project, the City of Astoria's waterfront bridge replacement project, the Navy's Bravo wharf recapitalization project, and U.S. Coast Guard's (USCG) Monterey waterfront repair project. Instead, the Navy offered to conduct hydroacoustic measurements at several points between 10 and 500 m from the source and extrapolate the distance of the Level B harassment zone.

While being able to determine the extent of Level B harassment zones is critical to accurately assess the potential impacts to marine mammals, these zones can be determined by means other than direct measurements recommended by the Commission. Therefore, NMFS considers the Navy's proposal of extrapolating the Level B harassment zone using near- and far-field measurement data a valid approach.

Therefore, in the final rule, NMFS requires the Navy to conduct SSVs on the piles listed above and to conduct measurements on several locations between 10 and 500 m from the source to determine the Level B harassment zones for those zones that were not based on modeling.

These requirements are included in the final rule.

Comment 2: The Commission recommends that NMFS require the Navy to include certain metrics in the hydroacoustic monitoring report for measurements being conducted. These metrics include:

• Root-mean-square sound pressure levels (SPL_{rms}), 1-sec sound exposure levels (SELs), duration of recordings used to derive SELs, cumulative SEL (SEL_{cum}) based on the number of piles and driving duration for each scenario, and SEL source spectra for vibratory pile driving/removal source level measurements;

• Peak SPLs (SPL_{peak}), SPL_{rms}, integration time/pulse duration for SPL_{rms}, single-strike SPLs (SPL_{s-s}), SEL_{cum} based on the number of piles and driving duration for each scenario, and SEL_{s-s} spectra for impact pile driving source level measurements;

• The measured (or extrapolated, if not reached) distances at which the SPL_{rms} decays to 120 dB re 1 µPa or to ambient, whichever is higher, and integration time/pulse duration for SPL_{rms} for verification of the extent to the Level B harassment zones;

• All sound levels via medians, means, minimums, and maximums and linear average (*i.e.,* averaging the sound intensity/pressure before converting to dB); and

• Sediment type, water depth, hydrophone depth, etc.

Response: NMFS discussed this with the Navy and the Navy agreed to report these metrics in the acoustic monitoring report. These requirements are included in the final rule.

Comment 3: The Commission recommends that NMFS revise its draft rounding criteria and share it with the Commission.

Response: NMFS appreciates the Commission's ongoing concern in this matter. Calculating predicted takes is not an exact science and there are arguments for taking different mathematical approaches in different situations, and for making qualitative adjustments in other situations. We believe, however, that the methodology used for take calculation in this LOA remains appropriate and is not at odds with the 24-hour reset policy the Commission references. We look forward to continued discussion with the Commission on this matter and will share the rounding guidance as soon as is appropriate.

Description of Marine Mammals in the Area of the Specified Activities

Sections 3 and 4 of the application summarize available information regarding status and trends, distribution and habitat preferences, and behavior and life history, of the potentially affected species. Additional information regarding population trends and threats may be found in NMFS's Stock Assessment Reports (SAR; *www.nmfs.noaa.gov/pr/sars/*) and more general information about these species (*e.g.,* physical and behavioral descriptions) may be found on NMFS's website (*https://www.fisheries.noaa.gov/seals-sea-lions*).

Table 2 lists all species with expected potential for occurrence in location and summarizes information related to the population or stock, including regulatory status under the MMPA and ESA and potential biological removal (PBR), where known. For taxonomy, we follow Committee on Taxonomy (2017). PBR is defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population (as described in NMFS's SARs). While no mortality is anticipated or authorized here, PBR and annual serious injury and mortality from anthropogenic sources are included here as gross indicators of the status of the species and other threats.

Marine mammal abundance estimates presented in this document represent the total number of individuals that make up a given stock or the total number estimated within a particular study or survey area. NMFS's stock abundance estimates for most species represent the total estimate of individuals within the geographic area, if known, that comprises that stock. For some species, this geographic area may extend beyond U.S. waters. All managed stocks in this region are assessed in NMFS's U.S. Atlantic SARs (Waring et al., 2017). All values presented in Table 2 are the most recent available at the time of publication and are available in the draft 2017 SARs (Hayes et al., 2017).

TABLE 2—MARINE MAMMALS THAT MAY OCCUR WITHIN NAVY SUBMARINE BASE NEW LONDON AREA

Common name	Scientific name	Stock	ESA/MMPA status	Stock abundance best/minimum population	Occurrence in study area
Order Carnivora					
Suborder Pinnipedia					
Family Phocidae (true seals):					
Gray seal	*Halichoerus grypus*	Western North Atlantic		505,000 *	Thames River.
Harbor seal	*Phoca vitulina*	Western North Atlantic		75,834 (0.15)/66,884	Thames River.

*There are an estimated 27,131 seals in U.S. waters; however, gray seals form one population not distinguished on the basis of the U.S./Canada boundary (Waring et al., 2017).

All species that could potentially occur in the proposed survey areas are included in table 2. As described below, all two species (with two managed stocks) temporally and spatially co-occur with the activity to the degree that take is reasonably likely to occur, and we have proposed authorizing it.

Marine Mammal Hearing

Hearing is the most important sensory modality for marine mammals underwater, and exposure to anthropogenic sound can have deleterious effects. To appropriately assess the potential effects of exposure to sound, it is necessary to understand the frequency ranges marine mammals are able to hear. Current data indicate that not all marine mammal species have equal hearing capabilities (*e.g.,* Richardson et al., 1995; Wartzok and Ketten, 1999; Au and Hastings, 2008). To reflect this, Southall et al. (2007) recommended that marine mammals be divided into functional hearing groups based on directly measured or estimated hearing ranges on the basis of available behavioral response data, audiograms derived using auditory evoked potential techniques, anatomical modeling, and other data. Note that no direct measurements of hearing ability have been successfully completed for mysticetes (*i.e.,* low-frequency cetaceans). Subsequently, NMFS (2016) described generalized hearing ranges for these marine mammal hearing groups. Generalized hearing ranges were chosen based on the approximately 65 dB threshold from the normalized composite audiograms, with the exception for lower limits for low-frequency cetaceans where the lower bound was deemed to be biologically implausible and the lower bound from Southall et al. (2007) retained. The functional groups and the associated frequencies are indicated below (note that these frequency ranges correspond to the range for the composite group, with the entire range not necessarily reflecting the capabilities of every species within that group):

- Low-frequency cetaceans (mysticetes): Generalized hearing is estimated to occur between approximately 7 Hz and 35 kHz;
- Mid-frequency cetaceans (larger toothed whales, beaked whales, and most delphinids): Generalized hearing is estimated to occur between approximately 150 Hz and 160 kHz;
- High-frequency cetaceans (porpoises, river dolphins, and members of the genera Kogia and Cephalorhynchus; including two members of the genus Lagenorhynchus, on the basis of recent echolocation data and genetic data): Generalized hearing is estimated to occur between approximately 275 Hz and 160 kHz.
- Pinnipeds in water; Phocidae (true seals): Generalized hearing is estimated to occur between approximately 50 Hz to 86 kHz;
- Pinnipeds in water; Otariidae (eared seals): Generalized hearing is estimated to occur between 60 Hz and 39 kHz.

The pinniped functional hearing group was modified from Southall *et al.* (2007) on the basis of data indicating that phocid species have consistently demonstrated an extended frequency range of hearing compared to otariids, especially in the higher frequency range (Hemilä *et al.,* 2006; Kastelein *et al.,* 2009; Reichmuth and Holt, 2013).

For more detail concerning these groups and associated frequency ranges, please see NMFS (2016) for a review of available information. Two marine mammal species (both phocid species) have the reasonable potential to co-occur with the proposed survey activities. Please refer to Table 2.

Potential Impacts to Marine Mammals

The Navy's Submarine Base New London pier construction using in-water pile driving and pile removal could adversely affect marine mammal species and stocks by exposing them to elevated noise levels in the vicinity of the activity area.

Exposure to high intensity sound for a sufficient duration may result in auditory effects such as a noise-induced threshold shift (TS)—an increase in the auditory threshold after exposure to noise (Finneran *et al.,* 2005). Factors that influence the amount of threshold shift include the amplitude, duration, frequency content, temporal pattern, and energy distribution of noise exposure. The magnitude of hearing threshold shift normally decreases over time following cessation of the noise exposure. The amount of TS just after exposure is the initial TS. If the TS eventually returns to zero (*i.e.,* the threshold returns to the pre-exposure value), it is a temporary threshold shift (TTS) (Southall *et al.,* 2007).

Threshold Shift (noise-induced loss of hearing)—When animals exhibit reduced hearing sensitivity (*i.e.,* sounds must be louder for an animal to detect them) following exposure to an intense sound or sound for long duration, it is referred to as a noise-induced TS. An animal can experience TTS or permanent threshold shift (PTS). TTS can last from minutes or hours to days (*i.e.,* there is complete recovery), can occur in specific frequency ranges (*i.e.,* an animal might only have a temporary loss of hearing sensitivity between the frequencies of 1 and 10 kHz), and can be of varying amounts (for example, an animal's hearing sensitivity might be reduced initially by only 6 dB or reduced by 30 dB). PTS is permanent, but some recovery is possible. PTS can also occur in a specific frequency range and amount as mentioned above for TTS.

For marine mammals, published data are limited to the captive bottlenose dolphin, beluga, harbor porpoise, and Yangtze finless porpoise (Finneran, 2015). For pinnipeds in water, data are limited to measurements of TTS in harbor seals, an elephant seal, and California sea lions (Kastak *et al.,* 1999, 2005; Kastelein *et al.,* 2012b).

Lucke *et al.* (2009) found a TS of a harbor porpoise after exposing it to airgun noise with a received sound pressure level (SPL) at 200.2 dB (peak-to-peak) re: 1 micropascal (μPa), which corresponds to a sound exposure level of 164.5 dB re: 1 μPa^2 s after integrating exposure. Because the airgun noise is a broadband impulse, one cannot directly determine the equivalent of root mean square (rms) SPL from the reported peak-to-peak SPLs. However, applying a conservative conversion factor of 16 dB for broadband signals from seismic surveys (McCauley, *et al.,* 2000) to correct for the difference between peak-to-peak levels reported in Lucke *et al.* (2009) and rms SPLs, the rms SPL for TTS would be approximately 184 dB re: 1 μPa, and the received levels associated with PTS (Level A harassment) would be higher. Therefore, based on these studies, NMFS recognizes that TTS of harbor porpoises is lower than other cetacean species empirically tested (Finneran & Schlundt, 2010; Finneran *et al.,* 2002; Kastelein and Jennings, 2012).

Marine mammal hearing plays a critical role in communication with conspecifics, and interpretation of environmental cues for purposes such as predator avoidance and prey capture. Depending on the degree (elevation of threshold in dB), duration (*i.e.,* recovery time), and frequency range of TTS, and the context in which it is experienced, TTS can have effects on marine mammals ranging from discountable to serious (similar to those discussed in auditory masking, below). For example, a marine mammal may be able to readily compensate for a brief, relatively small amount of TTS in a non-critical frequency range that occurs during a time where ambient noise is lower and there are not as many competing sounds present. Alternatively, a larger amount and longer duration of TTS sustained during time when communication is critical for successful mother/calf interactions could have more serious

impacts. Also, depending on the degree and frequency range, the effects of PTS on an animal could range in severity, although it is considered generally more serious because it is a permanent condition. Of note, reduced hearing sensitivity as a simple function of aging has been observed in marine mammals, as well as humans and other taxa (Southall *et al.,* 2007), so one can infer that strategies exist for coping with this condition to some degree, though likely not without cost.

In addition, chronic exposure to excessive, though not high-intensity, noise could cause masking at particular frequencies for marine mammals, which utilize sound for vital biological functions (Clark *et al.,* 2009). Acoustic masking is when other noises such as from human sources interfere with animal detection of acoustic signals such as communication calls, echolocation sounds, and environmental sounds important to marine mammals. Therefore, under certain circumstances, marine mammals whose acoustical sensors or environment are being severely masked could also be impaired from maximizing their performance fitness in survival and reproduction.

Masking occurs at the frequency band that the animals utilize. Therefore, since noise generated from vibratory pile driving is mostly concentrated at low frequency ranges, it may have less effect on high frequency echolocation sounds by odontocetes (toothed whales). However, lower frequency man-made noises are more likely to affect detection of communication calls and other potentially important natural sounds such as surf and prey noise. It may also affect communication signals when they occur near the noise band and thus reduce the communication space of animals (*e.g.,* Clark *et al.,* 2009) and cause increased stress levels (*e.g.,* Foote *et al.,* 2004; Holt *et al.,* 2009).

Unlike TS, masking, which can occur over large temporal and spatial scales, can potentially affect the species at population, community, or even ecosystem levels, as well as individual levels. Masking affects both senders and receivers of the signals and could have long-term chronic effects on marine mammal species and populations. Recent science suggests that low frequency ambient sound levels have increased by as much as 20 dB (more than three times in terms of sound pressure level) in the world's ocean from pre-industrial periods, and most of these increases are from distant shipping (Hildebrand, 2009). For the Navy's Submarine Base New London pier construction, noises from vibratory pile driving and pile removal contribute to the elevated ambient noise levels in the project area, thus increasing potential for or severity of masking. Baseline ambient noise levels in the vicinity of project area are high due to ongoing shipping, construction and other activities in the Thames River.

Finally, marine mammals' exposure to certain sounds could lead to behavioral disturbance (Richardson *et al.,* 1995), such as: Changing durations of surfacing and dives, number of blows per surfacing, or moving direction and/or speed; reduced/increased vocal activities; changing/cessation of certain behavioral activities (such as socializing or feeding); visible startle response or aggressive behavior (such as tail/fluke slapping or jaw clapping); avoidance of areas where noise sources are located; and/or flight responses (*e.g.,* pinnipeds flushing into water from haulouts or rookeries).

The onset of behavioral disturbance from anthropogenic noise depends on both external factors (characteristics of noise sources and their paths) and the receiving animals (hearing, motivation, experience, demography) and is also difficult to predict (Southall *et al.,* 2007). Currently NMFS uses a received level of 160 dB re 1 µPa (rms) to predict the onset of behavioral harassment from impulse noises (such as impact pile driving), and 120 dB re 1 µPa (rms) for continuous noises (such as vibratory pile driving). For the Navy's Submarine Base New London pier construction, both 160- and 120-dB levels are considered for effects analysis because the Navy plans to use both impact pile driving and vibratory pile driving and pile removal.

The biological significance of many of these behavioral disturbances is difficult to predict, especially if the detected disturbances appear minor. However, the consequences of behavioral modification could be biologically significant if the change affects growth, survival, and/or reproduction, which depends on the severity, duration, and context of the effects.

Potential Effects on Marine Mammal Habitat

The primary potential impacts to marine mammal habitat are associated with elevated sound levels produced by vibratory pile removal and pile driving in the area. However, other potential impacts to the surrounding habitat from physical disturbance are also possible.

With regard to fish as a prey source for cetaceans and pinnipeds, fish are known to hear and react to sounds and to use sound to communicate (Tavolga *et al.,* 1981) and possibly avoid predators (Wilson and Dill, 2002). Experiments have shown that fish can sense both the strength and direction of sound (Hawkins, 1981). Primary factors determining whether a fish can sense a sound signal, and potentially react to it, are the frequency of the signal and the strength of the signal in relation to the natural background noise level.

The level of sound at which a fish will react or alter its behavior is usually well above the detection level. Fish have been found to react to sounds when the sound level increased to about 20 dB above the detection level of 120 dB (Ona, 1988); however, the response threshold can depend on the time of year and the fish's physiological condition (Engas *et al.,* 1993). In general, fish react more strongly to pulses of sound (such as noise from impact pile driving) rather than continuous signals (such as noise from vibratory pile driving) (Blaxter *et al.,* 1981), and a quicker alarm response is elicited when the sound signal intensity rises rapidly compared to sound rising more slowly to the same level.

During in-water pile driving only a small fraction of the available habitat would be ensonified at any given time. Disturbance to fish species would be short-term and fish would return to their pre-disturbance behavior once the pile driving activity ceases. Thus, the proposed construction would have little, if any, impact on marine mammals' prey availability in the area where construction work is planned.

Disposal of dredged material in the confined aquatic disposal (CAD) cell would have a direct impact to the benthos as a result of burial and suffocation. Most, if not all, sessile marine invertebrates are not expected to survive burial. Some motile marine organisms would be buried and unable to survive, while others such as burrowing specialists, may survive. Survival rates would depend primarily on burial depth. From 2010 through 2012, biannual benthic sampling of the CAD cell area was conducted to assess the timeframe for recovery of benthic populations of the CAD cells, in accordance with Water Quality Certificate conditions for the 2010 waterfront maintenance dredging project at the submarine base. The sampling results of the CAD cell were compared to sampling results of an undisturbed reference site located upriver. The degree of similarity of population and community structures was assessed. The results of the three year survey program indicated that a progressive recovery to a stable benthic population was occurring at the CAD cell. As demonstrated by the biannual

benthic survey, benthic assemblages are anticipated to recover within three to five years after the completion of the project, and disposal impacts would not be significant (CardnoTEC 2015).

Project activities would temporarily disturb benthic and water column habitats and change bottom topography to a minor degree, but effects on prey availability and foraging conditions for marine mammals would be temporary and limited to the immediate area of pier demolition/construction, dredging, and disposal. The new surfaces of piles and exposed concrete on the new pier would likely result in establishment of fouling communities on the new structures, and may attract fish and benthic organisms, resulting in small scale shifts in prey distribution.

There are no known haul outs within the vicinity of the Proposed Action.

The project activities would not permanently modify existing marine mammal habitat. The activities may kill some fish and cause other fish to leave the area temporarily, thus impacting marine mammals' foraging opportunities in a limited portion of the foraging range; but, because of the short duration of the activities and the relatively small area of the habitat that may be affected, the impacts to marine mammal habitat are not expected to cause significant or long-term negative consequences. Therefore, given the consideration of potential impacts to marine mammal prey species and their physical environment, the Navy's proposed construction activity at the submarine base would not adversely affect marine mammal habitat.

Estimated Take

Except with respect to certain activities not pertinent here, section 3(18) of the MMPA defines ''harassment'' as: Any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment). Harassment is the only type of take expected to result from these activities.

Authorized takes would be by Level A and Level B harassments, in the form of mild permanent hearing threshold shift (Level A) and disruption of behavioral patterns (Level B) for individual marine mammals resulting from exposure to noise generated from impact pile driving and vibratory pile driving and removal. Based on the nature of the activity and the anticipated effectiveness of the mitigation measures (*e.g.,* shutdown measures—discussed in detail below in Mitigation section), serious injury or mortality is neither anticipated nor authorized.

As described previously, no mortality is anticipated or authorized for this activity. Below we describe how the take is estimated.

Described in the most basic way, we estimate take by considering: (1) Acoustic thresholds above which NMFS believes the best available science indicates marine mammals will be behaviorally harassed or incur some degree of permanent hearing impairment; (2) the area or volume of water that will be ensonified above these levels in a day; (3) the density or occurrence of marine mammals within these ensonified areas; and, (4) and the number of days of activities. Below, we describe these components in more detail and present the take estimate.

Acoustic Thresholds

Using the best available science, NMFS has developed acoustic thresholds that identify the received level of underwater sound above which exposed marine mammals would be reasonably expected to be behaviorally harassed (equated to Level B harassment) or to incur PTS of some degree (equated to Level A harassment).

Level B Harassment for non-explosive sources—Though significantly driven by received level, the onset of behavioral disturbance from anthropogenic noise exposure is also informed to varying degrees by other factors related to the source (*e.g.,* frequency, predictability, duty cycle), the environment (*e.g.,* bathymetry), and the receiving animals (hearing, motivation, experience, demography, behavioral context) and can be difficult to predict (Southall *et al.,* 2007, Ellison *et al.,* 2011). Based on what the available science indicates and the practical need to use a threshold based on a factor that is both predictable and measurable for most activities, NMFS uses a generalized acoustic threshold based on received level to estimate the onset of behavioral harassment. NMFS predicts that marine mammals are likely to be behaviorally harassed in a manner we consider Level B harassment when exposed to underwater anthropogenic noise above received levels of 120 dB re 1 µPa (rms) for continuous (*e.g.,* vibratory pile-driving, drilling) and above 160 dB re 1 µPa (rms) for non-explosive impulsive (*e.g.,* seismic airguns) or intermittent (*e.g.,* scientific sonar) sources.

Applicant's proposed activity includes the use of continuous (vibratory pile driving and removal) and impulsive (impact pile driving) sources, and therefore the 120 and 160 dB re 1 µPa (rms) levels are applicable.

Level A harassment for non-explosive sources—NMFS' Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing (Technical Guidance, 2016) identifies dual criteria to assess auditory injury (Level A harassment) to five different marine mammal groups (based on hearing sensitivity) as a result of exposure to noise from two different types of sources (impulsive or non-impulsive). Applicant's proposed activity includes the use of non-impulsive (vibratory pile driving and pile removal) sources.

These thresholds were developed by compiling and synthesizing the best available science and soliciting input multiple times from both the public and peer reviewers to inform the final product, and are provided in the table below. The references, analysis, and methodology used in the development of the thresholds are described in NMFS' 2016 Technical Guidance, which may be accessed at: *http://www.nmfs.noaa.gov/pr/acoustics/guidelines.htm.*

TABLE 3—CURRENT ACOUSTIC EXPOSURE CRITERIA FOR NON-EXPLOSIVE SOUND UNDERWATER

Hearing group	PTS onset thresholds		Behavioral thresholds	
	Impulsive	Non-impulsive	Impulsive	Non-impulsive
Low-Frequency (LF) Cetaceans	$L_{pk,flat}$: 219 dB ..... $L_{E,LF,24h}$: 183 dB	$L_{E,LF,24h}$: 199 dB	$L_{rms,flat}$: 160 dB	$L_{rms,flat}$: 120 dB
Mid-Frequency (MF) Cetaceans	$L_{pk,flat}$: 230 dB ..... $L_{E,MF,24h}$: 185 dB	$L_{E,MF,24h}$: 198 dB.		
High-Frequency (HF) Cetaceans	$L_{pk,flat}$: 202 dB ..... $L_{E,HF,24h}$: 155 dB	$L_{E,HF,24h}$: 173 dB.		

TABLE 3—CURRENT ACOUSTIC EXPOSURE CRITERIA FOR NON-EXPLOSIVE SOUND UNDERWATER—Continued

Hearing group	PTS onset thresholds		Behavioral thresholds	
	Impulsive	Non-impulsive	Impulsive	Non-impulsive
Phocid Pinnipeds (PW) (Underwater)	$L_{pk,flat}$: 218 dB $L_{E,PW,24h}$: 185 dB	$L_{E,PW,24h}$: 201 dB.		
Otariid Pinnipeds (OW) (Underwater)	$L_{pk,flat}$: 232 dB $L_{E,OW,24h}$: 203 dB	$L_{E,OW,24h}$: 219 dB.		

* Dual metric acoustic thresholds for impulsive sounds: Use whichever results in the largest isopleth for calculating PTS onset. If a non-impulsive sound has the potential of exceeding the peak sound pressure level thresholds associated with impulsive sounds, these thresholds should also be considered.

Note: Peak sound pressure (Lpk) has a reference value of 1 µPa, and cumulative sound exposure level (LE) has a reference value of 1µPa2s. In this Table, thresholds are abbreviated to reflect American National Standards Institute standards (ANSI 2013). However, peak sound pressure is defined by ANSI as incorporating frequency weighting, which is not the intent for this Technical Guidance. Hence, the subscript "flat" is being included to indicate peak sound pressure should be flat weighted or unweighted within the generalized hearing range. The subscript associated with cumulative sound exposure level thresholds indicates the designated marine mammal auditory weighting function (LF, MF, and HF cetaceans, and PW and OW pinnipeds) and that the recommended accumulation period is 24 hours. The cumulative sound exposure level thresholds could be exceeded in a multitude of ways (*i.e.,* varying exposure levels and durations, duty cycle). When possible, it is valuable for action proponents to indicate the conditions under which these acoustic thresholds will be exceeded.

Ensonified Area

Here, we describe operational and environmental parameters of the activity that will feed into identifying the area ensonified above the acoustic thresholds.

Source Levels

The project includes impact pile driving and vibratory pile driving and removal of various piles. Source levels of pile driving and removal activities are based on reviews of measurements of the same or similar types and dimensions of piles available in the literature (Caltrans, 2015; Martin et al., 2012; Dazey et al., 2012; WSDOT, 2007, 2012; NAVFAC Southwest, 2014). Based on this review, the following source levels are assumed for the underwater noise produced by construction activities:

- Impact driving of 14-inch steel H-piles for the temporary trestle is assumed to generate a peak SPL of 208 dB re 1µPa, and a root-mean-squared (rms) SPL of 187 dB re 1 µPa, based on adding 10 dB to a single-strike SEL of 177 dB re 1 µPa²-sec at 10 m (33 ft) reported by Caltrans (2015). This assumption is based on differences between SEL and rms values of other piles reported by Caltrans (2015).
- Impact driving of 36-inch steel piles would be assumed to generate an instantaneous peak SPL of 209 dB, an rms SPL of 198 dB, and a SEL of 183 dB at the 10 m (33 ft) distance, based on the weighted average of similar pile driving at the Bangor Naval Base, Naval Base Point Loma, Washington State Department of Transportation (WSDOT) Anacortes Ferry Terminal, and WSDOT Mukilteo Ferry Terminal.
- Vibratory driving of 36-inch steel piles would be assumed to generate a 168 dB SPLrms and a 168 dB SEL at 10 m (33 ft), based on the weighted average of similar pile driving measured at Bangor Naval Base, Naval Base Point Loma, and WSDOT Anacortes Ferry Terminal.
- Impact driving of the 16-inch plastic piles, for which no data specific to that size and composition are available, are assumed to be similar to available data on 13-inch plastic piles: 166 dB peak SPL and 153 dB rms SPL. No SEL measurements were made, but the SEL at 10 m (33 ft) can be assumed to be 9 dB less than the rms value (based on differences of rms and SEL values of in-water impact pile-driving data of other piles summarized by Caltrans 2015), which would put the SEL value for the plastic piles at 144 dB. For vibratory pile driving of the same plastic piles, the SPL rms of impact driving is used as a proxy due to lack of measurement.
- Vibratory removal of 14-inch steel H-piles is conservatively assumed to have rms and SEL values of 158 dB based on a relatively large set of measurements from the vibratory installation of 14-inch H-piles.
- Drilling the rock sockets is assumed to be an intermittent, non-impulsive, broadband noise source, similar to vibratory pile driving, but using a rotary drill inside a pipe or casing, which is expected to reduce sound levels below those of typical pile driving (Martin et al. 2012). Measurements made during a pile drilling project in 1–5 m (3–16 ft) depths at Santa Rosa Island, CA, by Dazey et al. (2012) appear to provide reasonable proxy source levels for the proposed activities. Dazey et al. (2012) reported average rms source levels ranging from 151 to 157 dB re 1µPa, normalized to a distance of 1 m (3 ft) from the pile, during activities that included casing removal and installation as well as drilling, with an average of 154 dB re 1µPa during 62 days that spanned all related drilling activities during a single season.
- Since no source level data are available for vibratory extraction of concrete or concrete encased 24-inch and 33-inch steel H-piles, conservative proxy source levels were based on the summary values reported for vibratory driving of 24-inch steel sheet piles by Caltrans (2015). There are two reasons for using 24-in steel sheet pile driving source level as a proxy: (1) In general, pile extraction generates less noise in comparison to pile driving, and (2) piling of concrete or concrete encased piles generated less noise in comparison to steel piles. Since there are no source levels available for extraction of the 24-in concrete or concrete encased piles and 33-in steel H-piles, we defer to the pile driving source level of 24-in steel sheet pile reported by Caltrans (2015). The Caltrans (2015) typical source level of 160 dB rms and SEL was used for vibratory removal of 24-inch concrete piles and 24-inch concrete encased steel H-piles, whereas the loudest source level of 165 dB rms and SEL was used for vibratory removal of 33-inch concrete encased steel piles.

A summary of source levels from different pile driving and pile removal activities is provided in Table 4.

TABLE 4—SUMMARY OF IN-WATER PILE DRIVING SOURCE LEVELS

[At 10 m from source]

Method	Pile type/size	SPL_{pk} (dB re 1 μ Pa)	SPL_{rms} (dB re 1 μ Pa)	SEL (dB re 1 μ Pa^2-s)
Impact driving	14-in steel H pile	208	187	177
Impact driving	36-in concrete-filled steel pile	209	198	183
Vibratory driving	30- and 36-in concrete-filled steel pipe pile; 16-in fiberglass plastic pile.	NA	168	168
Impact driving	16-in fiberglass plastic pile	166	153	144
Vibratory driving	16-in fiberglass plastic pile	NA	153	153
Rock socket drilling	30-in steel pile & 16-in plastic pile	NA	154	154
Vibratory removal	14-in steel H pile	NA	158	158
Vibratory removal	24-in concrete-encased steel H pile	NA	160	160
Vibratory removal	33-in concrete-encased steel H pile	NA	165	165

These source levels are used to compute the Level A injury zones and to estimate the Level B harassment zones. For Level A harassment zones, since the peak source levels for both pile driving methods are below the injury thresholds, cumulative SEL were used to do the calculations using the NMFS acoustic guidance (NMFS 2016).

Estimating Injury Zones

When NMFS' Technical Guidance (2016) was published, in recognition of the fact that ensonified area/volume could be more technically challenging to predict because of the duration component in the new thresholds, we developed a User Spreadsheet that includes tools to help predict a simple isopleth that can be used in conjunction with marine mammal density or occurrence to help predict takes. We note that because of some of the assumptions included in the methods used for these tools, we anticipate that isopleths produced are typically going to be overestimates of some degree, which will result in some degree of overestimate of Level A take. However, these tools offer the best way to predict appropriate isopleths when more sophisticated 3D modeling methods are not available, and NMFS continues to develop ways to quantitatively refine these tools, and will qualitatively address the output where appropriate.

For cumulative SEL (L_E), distances to marine mammal injury thresholds were estimated using NMFS' Optional User Spreadsheet based on the noise exposure guidance. For impact pile driving, the single strike SEL/pulse equivalent was used, and for vibratory pile driving, the rms SPL source level was used. Per the NMFS Spreadsheet, default Weighting Factor Adjustments (WFA) were used for calculating PTS from both vibratory and impact pile driving, using 2.5 kHz and 2.0 KHz, respectively. These WFAs are acknowledged by NMFS as conservative. A transmission loss coefficient of 15 is used with reported source levels measured at 10 m.

Estimating Behavioral Harassment Zones

Isopleths to Level B behavioral zones are based on rms SPL (SPL_{rms}) that are specific for non-impulse (vibratory pile driving) sources. Distances to marine mammal behavior thresholds were calculated using practical spreading.

In addition, based on the number of piers and high density of pilings along the shoreline, the Navy concluded that underwater sound transmission through these structures would be impeded similar to the interruption of sound transmission by natural projections of the shoreline. Using this assumption, the resulting Level B behavioral harassment zone for marine mammal disturbance for most project activities would be limited to the middle reaches of the Thames River, extending no farther south than the Amtrak Bridge, 3 miles (4,642 m) upstream from the mouth of the river.

A summary of the measured and modeled harassment zones is provided in Table 5. In modeling transmission loss from the project area, the conventional assumption would be made that acoustic propagation from the source is impeded by natural and manmade features that extend into the water, resulting in acoustic shadows behind such features. While not solid structures, given the density of structural pilings under the many pile-supported piers located south of Piers 32 and 10, coupled with the docking of submarines at these piers, the piers are presumed to disrupt sound propagation southward in the river.

TABLE 5—CALCULATED AREAS OF ZONE OF INFLUENCE AND MAXIMUM DISTANCES

Year	Activity description	Source level @ 10m, dB (rms/SEL)	Level A distance (m)/area (km^2)	Level B distance (m)/area (km^2)
1	Impact driving 14″ steel H-pile 1,000 strikes per pile, 4 piles/day	187/177	536/0.4468	631/0.5468.
	Vibratory & rock socket drilling installation of 36″ concrete-filled steel piles; average 10 minutes/day.	168	<4/<0.0001	4,642/2.2002.
	Impact driving 36″ concrete-filled steel piles; 1,000 strikes per pile; average 2.5 piles per day.	198/183	984/0.886	3,415/2.037.
	Rocket socket drilling of 30″ concrete-filled steel piles and 16″ fiberglass reinforced plastic piles; average 1.04 hours/day.	154	Activity will occur concurrently with above activities that have much bigger zones	
2	Vibratory installation of 36″ concrete-filled steel piles; average 6 minutes/day.	168	<4/<0.0001	4,642/2.2002.

TABLE 5—CALCULATED AREAS OF ZONE OF INFLUENCE AND MAXIMUM DISTANCES—Continued

Year	Activity description	Source level @ 10m, dB (rms/SEL)	Level A distance (m)/area (km^2)	Level B distance (m)/area (km^2)
	Impact pile driving 36″ concrete-filled steel piles; 1,000 strikes per pile; average 2.5 piles per day.	198/183	984/0.886	3,415/2.037.
3	Vibratory installation of 16″ fiberglass plastic piles; 40 minutes/day.	153	0.9/<0.0001	1,584/1.1584.
	Impact installation of 16″ fiberglass plastic piles; 1,000 strikes per pile; average 2.5 piles per day.	153/144	2.5/<0.0001	1/<0.000.
4	Vibratory removal of 14″ steel H-piles; average 100 minutes/day	158	<4/<0.0001	3,415/1.8372.
	Vibratory removal of 24″ concrete-filled steel piles (Pier 32); average 190 minutes/day.	160	2.7/<0.0001	4,642/2.2002.
	Vibratory removal of 30″ concrete-filled steel piles (Pier 32); average 40 minutes/day.	165	5.9/<0.0001	4,642/2.2002.
	Vibratory removal of 24″ concrete-filled steel piles (Pier 10); average 40 minutes/day.	160	7.7/<0.0001	4,642/2.2002.

Marine Mammal Occurrence

In this section we provide the information about the presence, density, or group dynamics of marine mammals that will inform the take calculations.

The Navy's Marine Species Density Database (NMSDD) has density estimates for harbor and gray seals that occur in Long Island Sound. The NMSDD density estimates for harbor seals and gray seals are the same, 0.0703/km^2 during fall, winter, and spring, and 0.0174/km^2 during summer months. These estimates, however, are based on broad-scale oceanic surveys, which have not extended up the Thames River.

Marine mammal surveys were conducted in fall 2014 and winter, spring, and summer of 2015 as part of a nearshore biological survey at Submarine Base New London. No marine mammals were observed (Tetra Tech 2016). Harbor seals have been sighted in the Thames River near the submarine base by Navy personnel. Both gray and harbor seals have rookeries in Long Island Sound. A two-year detailed, systematic survey of marine mammals in the Thames River began in January 2017. During the first nine months of the survey through September, one pinniped (gray seal) was observed approximately 2¾ miles downstream of SUBASE at a fishing dock near the ferry terminal, approximately 3,000 feet south of the Gold Star Memorial Bridge (I–95).

There are no survey-based estimates of the relative abundances of the two species in the Thames River. Up to two harbor seals have been observed near the submarine base by base personnel. No gray seals have been observed by the Navy close to the submarine base. However, the Navy states that during preparation of the LOA they have learned that since the population of gray seals is generally growing in the region that gray seals are likely to also occur in the area of effect by the first year of construction, 2020, but in smaller numbers. A ratio of 3 to 1 harbor seals to gray seals was identified as a reasonable approximation of their relative abundance. No evidence is available to suggest a different ratio. There are no areas (haul outs) where seals are known to be concentrated nor have there been contemporary sightings of larger numbers of seals along this stretch of the river, and the animals seen at the submarine base are likely to move up and down as well as across the river. Given that the Thames River is about 500 m (1,640 ft) wide at the Submarine Base New London, and similarly developed areas extend about 1 km (3,280 ft) up and down the river, the Navy believes it is reasonable to extrapolate the observations at the Submarine Base New London to an area of about 1 km^2 for the purpose of estimating density. This would result in an average density of 0.45 harbor and 0.15 gray seals per km^2 within the project ZOIs from September through May. Very few animals were sighted outside the September through May time frame. Therefore, the September through May data is used for density estimates to be conservative.

Take Calculation and Estimation

Here we describe how the information provided above is brought together to produce a quantitative take estimate. For both harbor and gray seals, estimated takes are calculated based on ensonified area for a specific pile driving activity multiplied by the marine mammal density in the action area, multiplied by the number of pile driving (or removal) days. Distances to and areas of different harassment zones are listed in Table 4.

For both Level A and Level B harassment, take calculations and assumptions are as follows:

- Number of takes per activity = density (average number of seals per km^2) * area of ZOI (km^2) * number of days, rounded to the nearest whole number.
- Seal density in the project area is estimated as 0.6/km^2 from September through May (zero from June through August), consisting of 75% harbor seals (0.45/km^2) and 25% gray seals (0.15/km^2).
- Assumes as a worst case that activities will occur up to a maximum of 180 workdays (5 days per week) when seals are present (September through May) during each full construction year.
- Assumes vibratory and impact hammer pile driving would not occur on the same days.
- Level A and Level B takes are calculated separately based on the respective ZOIs for each type of activity, providing a maximum estimate for each type of take which corresponds to the authorization requested under the MMPA.
- Assumes that the effective implementation of a 10 m shutdown zone will prevent non-acoustic injuries and will prevent animals from entering acoustic harassment ZOIs that extend less than 10 m from the source.

The maximum extent of the potential injury zone (for impact pile driving of steel piles) is 984 m (3,228 ft) from the source for 36-inch concrete-filled steel piles and 536 m (1,758 ft) for 14-inch steel H-piles; other potential acoustic injury ZOIs for vibratory pile extraction and installation are only 1 to 7.7 m (3 to 25 ft) from the source (Table 4). Seals within about 10 m (33 ft) of in-water construction or demolition may also be at risk of injury from interaction with construction equipment. These potential

injury zones and the 10 m (33 ft) shutdown distance would be monitored during all in-water construction/demolition activities, and the activities would be halted if a marine mammal were to approach within these distances.

The estimated numbers of instances of acoustic harassment (takes) by year, species and severity (Level A or Level B) are shown in Table 6. Total Level A takes are estimated as 12 harbor seals and 4 gray seals (total 16), and Level B takes are estimated as 504 harbor seals and 168 gray seals (total 672).

TABLE 6—ESTIMATED NUMBERS OF MARINE MAMMALS THAT MAY BE EXPOSED TO RECEIVED NOISE LEVELS THAT CAUSE LEVEL A AND LEVEL B HARASSMENT

Year	Species	Estimated Level A take	Estimated Level B take	Estimated total take	Abundance	Percentage
1	Harbor seal	6	166	172	75,834	0.23
	Gray seal	2	55	57	27,131	0.21
2	Harbor seal	6	177	183	75,834	0.24
	Gray seal	2	59	61	505,000	0.01
3	Harbor seal	0	51	51	75,834	0.07
	Gray seal	0	17	17	27,131	0.06
4	Harbor seal	0	110	110	75,834	0.13
	Gray seal	0	37	37	27,131	0.12

Mitigation

In order to issue an LOA under section 101(a)(5)(A) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses (latter not applicable for this action). NMFS regulations require applicants for incidental take authorizations to include information about the availability and feasibility (economic and technological) of equipment, methods, and manner of conducting such activity or other means of effecting the least practicable adverse impact upon the affected species or stocks and their habitat (50 CFR 216.104(a)(11)).

In evaluating how mitigation may or may not be appropriate to ensure the least practicable adverse impact on species or stocks and their habitat, as well as subsistence uses where applicable, we carefully consider two primary factors:

(1) The manner in which, and the degree to which, the successful implementation of the measure(s) is expected to reduce impacts to marine mammals, marine mammal species or stocks, and their habitat. This considers the nature of the potential adverse impact being mitigated (likelihood, scope, range). It further considers the likelihood that the measure will be effective if implemented (probability of accomplishing the mitigating result if implemented as planned) the likelihood of effective implementation (probability implemented as planned), and;

(2) The practicability of the measures for applicant implementation, which may consider such things as cost and impact on operations.

Mitigation for Marine Mammals and Their Habitat

1. Time Restriction.

Work will occur only during daylight hours, when visual monitoring of marine mammals can be conducted.

2. Establishing and Monitoring Level A and Level B Harassment Zones, and Shutdown Zones. These zones may be adjusted as appropriate on the basis of the acoustic monitoring described below.

Before the commencement of in-water construction activities, which include impact pile driving and vibratory pile driving and pile removal, the Navy shall establish Level A harassment zones where received underwater SEL_{cum} could cause PTS (see Table 5 above).

The Navy shall also establish Level B harassment zones where received underwater SPLs are higher than 160 dB_{rms} re 1 µPa for impulsive noise sources (impact pile driving) and 120 dB_{rms} re 1 µPa for non-impulsive noise sources (vibratory pile driving and pile removal).

The Navy shall establish a 10-m (33-ft) shutdown zone for all in-water construction and demolition work.

If marine mammals are found within the shutdown zone, pile driving of the segment would be delayed until they move out of the area. If a marine mammal is seen above water and then dives below, the contractor would wait 15 minutes. If no marine mammals are seen by the observer in that time it can be assumed that the animal has moved beyond the shutdown zone.

If pile driving of a segment ceases for 30 minutes or more and a marine mammal is sighted within the designated shutdown zone prior to commencement of pile driving, the observer(s) must notify the pile driving operator (or other authorized individual) immediately and continue to monitor the shutdown zone. Operations may not resume until the marine mammal has exited the shutdown zone or 15 minutes have elapsed since the last sighting.

3. Shutdown Measures.

The Navy shall implement shutdown measures if a marine mammal is detected moving towards or entered the 10-m (33-ft) shutdown zone.

Further, the Navy shall implement shutdown measures if the number of authorized takes for any particular species reaches the limit under the LOA and such marine mammals are sighted within the vicinity of the project area and are approaching the Level B harassment zone during in-water construction activities.

In addition, the Navy shall implement shutdown measures if species not authorized to take are sighted within the vicinity of the project area and are approaching the Level B harassment zone during in-water construction activities.

4. Soft Start.

The Navy shall implement soft start techniques for impact pile driving. The Navy shall conduct an initial set of three strikes from the impact hammer at 40 percent energy, followed by a 1-minute waiting period, then two subsequent three strike sets. Soft start shall be required for any impact driving, including at the beginning of the day, and at any time following a cessation of impact pile driving of thirty minutes or longer.

Whenever there has been downtime of 30 minutes or more without impact driving, the contractor shall initiate

impact driving with soft-start procedures described above.

Based on our evaluation of the required measures, NMFS has determined that the prescribed mitigation measures provide the means effecting the least practicable adverse impact on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Monitoring and Reporting

In order to issue an LOA for an activity, section 101(a)(5)(A) of the MMPA states that NMFS must set forth, ''requirements pertaining to the monitoring and reporting of such taking.'' The MMPA implementing regulations at 50 CFR 216.104(a)(13) state that requests for authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present in the proposed action area. Effective reporting is critical both to compliance as well as ensuring that the most value is obtained from the required monitoring.

Monitoring and reporting requirements prescribed by NMFS should contribute to improved understanding of one or more of the following:

- Occurrence of marine mammal species or stocks in the area in which take is anticipated (*e.g.,* presence, abundance, distribution, density);
- Nature, scope, or context of likely marine mammal exposure to potential stressors/impacts (individual or cumulative, acute or chronic), through better understanding of: (1) Action or environment (*e.g.,* source characterization, propagation, ambient noise); (2) affected species (*e.g.,* life history, dive patterns); (3) co-occurrence of marine mammal species with the action; or (4) biological or behavioral context of exposure (*e.g.,* age, calving or feeding areas);
- Individual marine mammal responses (behavioral or physiological) to acoustic stressors (acute, chronic, or cumulative), other stressors, or cumulative impacts from multiple stressors;
- How anticipated responses to stressors impact either: (1) Long-term fitness and survival of individual marine mammals; or (2) populations, species, or stocks;
- Effects on marine mammal habitat (*e.g.,* marine mammal prey species, acoustic habitat, or other important physical components of marine mammal habitat); and
- Mitigation and monitoring effectiveness.

Monitoring Measures

The Navy shall employ trained protected species observers (PSOs) to conduct marine mammal monitoring for its Submarine Base New London pier construction project. The purposes of marine mammal monitoring are to implement mitigation measures and learn more about impacts to marine mammals from the Navy's construction activities. The PSOs will observe and collect data on marine mammals in and around the project area for 15 minutes before, during, and for 30 minutes after all pile removal and pile installation work.

Protected Species Observer Qualifications

NMFS-approved PSOs shall meet the following requirements:

1. Independent observers (*i.e.,* not construction personnel) are required;
2. At least one observer must have prior experience working as an observer;
3. Other observers may substitute education (undergraduate degree in biological science or related field) or training for experience;
4. Where a team of three or more observers are required, one observer should be designated as lead observer or monitoring coordinator. The lead observer must have prior experience working as an observer; and
5. NMFS will require submission and approval of observer CVs.

Marine Mammal Monitoring Protocols

The Navy shall conduct briefings between construction supervisors and crews and the PSO team prior to the start of all pile driving activities, and when new personnel join the work, in order to explain responsibilities, communication procedures, marine mammal monitoring protocol, and operational procedures. All personnel working in the project area shall watch the Navy's Marine Species Awareness Training video. An informal guide shall be included with the monitoring plan to aid in identifying species if they are observed in the vicinity of the project area.

The Navy will monitor the Level A and Level B harassment zones before, during, and after pile driving activities for all in-water constructions. The Marine Mammal Monitoring Plan would include the following procedures:

- PSOs will be primarily located on boats, docks, and piers at the best vantage point(s) in order to properly see the entire shutdown zone(s).
- PSOs will be located at the best vantage point(s) to observe the zone associated with behavioral impact thresholds.
- During all observation periods, PSOs will use high-magnification (25X), as well as standard handheld (7X) binoculars, and the naked eye to search continuously for marine mammals.
- Monitoring distances will be measured with range finders. Distances to animals will be based on the best estimate of the PSO, relative to known distances to objects in the vicinity of the PSO.
- Bearings to animals will be determined using a compass.
- Pile driving shall only take place when the shutdown and Level A zones are visible and can be adequately monitored. If conditions (*e.g.,* fog) prevent the visual detection of marine mammals, activities with the potential to result in Level A harassment shall not be initiated. If such conditions arise after the activity has begun, pile driving or pile removal activities shall be halted if the 10-m shutdown zone is not visible.
- Three (3) PSOs shall be posted to monitor marine mammals during in-water pile driving and pile removal. One PSO will be located on land and two will be located in a boat to monitor the farther locations.
- Pre-Activity Monitoring:

The shutdown zone will be monitored for 15 minutes prior to in-water construction/demolition activities. If a marine mammal is present within the 10-m shutdown zone, the activity will be delayed until the animal(s) leave the shutdown zone. Activity will resume only after the PSO has determined that, through sighting or by waiting 15 minutes, the animal(s) has moved outside the shutdown zone. If a marine mammal is observed approaching the shutdown zone, the PSO who sighted that animal will notify all other PSOs of its presence.

- During Activity Monitoring:

If a marine mammal is observed entering the Level A or Level B zones outside the 10-m shutdown zone, the pile segment being worked on will be completed without cessation, unless the animal enters or approaches the shutdown zone, at which point all pile driving activities will be halted. If an animal is observed within the shutdown zone during pile driving, then pile driving will be stopped as soon as it is safe to do so. Pile driving can only resume once the animal has left the shutdown zone of its own volition or

has not been re-sighted for a period of 15 minutes.

• Post-Activity Monitoring:

Monitoring of all zones will continue for 30 minutes following the completion of the activity.

Acoustic Monitoring

(1) Sound Source Verification

The Navy shall conduct pile driving sound source verification for the types and sizes of piles with no prior measurements. These piles include:

• Vibratory and impact installation of at least 5 16-in fiberglass reinforced plastic piles, and

• Rock socket drilling of at least 3 30-in and 3 16-in piles.

Sound source measurements of these piles sound be conducted at distances approximately 10 m from the source.

For vibratory pile driving/removal source level measurements, reports should include 1-s sound exposure level (SEL), source spectrum, duration of recordings used to derived the SEL, and 24-hour cumulative SEL extrapolated from measurements.

For impact pile driving source level measurements, report should include peak sound pressure level (SPL_{pk}), root-mean-square SPL (SPL_{rms}), single strike SEL (SEL_{ss}), integration time for SPL_{rms}, SEL_{ss} spectrum, and 24-hour cumulative SEL extrapolated from measurements.

(2) Level B Harassment Distance Verification

The Navy shall empirically determine the Level B harassment distance either by extrapolating from in situ measurements conducted at several points between 10 and 500 m from the source, or by direct measurements at far distance to locate the distance where the received levels reach 120 dB or below, or at the ambient noise level.

Level B behavioral harassment zones need to be empirically determined include:

• Rock socket drilling of at least 3 30-in and 3 16-in piles,

• Vibratory installation of at least 3 36-in steel piles, and

• Vibratory removal of at least 3 24-in concrete and 3 33-in concrete piles.

For extent of Level B distance verification, the Navy shall report the measured or extrapolated distances where the received levels SPL_{rms} decay to 120-dB or to the ambient noise level, whichever is higher, as well as integration time for such SPL_{rms}.

The sound levels reported should be in median and linear average (*i.e.,* taking averages of sound intensity before converting to dB).

The acoustic monitoring reports shall also include sediment type where measurements are made.

Reporting Measures

The Navy is required to submit an annual report within 90 days after each activity year, starting from the date when the LOA is issued (for the first annual report) or from the date when the previous annual report ended. These reports will detail the monitoring protocol, summarize the data recorded during monitoring, and estimate the number of marine mammals that may have been harassed during the period of the report. Results from acoustic monitoring should also be included within the monitoring report, as discussed above. NMFS will provide comments within 30 days after receiving these reports, and the Navy shall address the comments and submit revisions within 30 days after receiving NMFS comments. If no comment is received from NMFS within 30 days, the annual report is considered completed.

The Navy is also required to submit a draft monitoring report within 90 days after completion of the construction work or the expiration of the final LOA, whichever comes earlier. This report will synthesize all data recorded during marine mammal monitoring, and estimate the number of marine mammals that may have been harassed through the entire project. NMFS will provide comments within 30 days after receiving this report, and the Navy shall address the comments and submit revisions within 30 days after receiving NMFS comments. If no comment is received from NMFS within 30 days, the monitoring report is considered as final.

In addition, NMFS requires the Navy to notify NMFS' Office of Protected Resources and NMFS' Greater Atlantic Stranding Coordinator within 48 hours of sighting an injured or dead marine mammal in the construction site. The Navy shall provide NMFS and the Stranding Network with the species or description of the animal(s), the condition of the animal(s) (including carcass condition, if the animal is dead), location, time of first discovery, observed behaviors (if alive), and photo or video (if available).

In the event that the Navy finds an injured or dead marine mammal that is not in the construction area, the Navy will report the same information as listed above to NMFS as soon as operationally feasible.

Negligible Impact Analysis and Determination

NMFS has defined negligible impact as ''an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival'' (50 CFR 216.103). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population-level effects). An estimate of the number of takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be ''taken'' through harassment, NMFS considers other factors, such as the likely nature of any responses (*e.g.,* intensity, duration), the context of any responses (*e.g.,* critical reproductive time or location, migration), as well as effects on habitat, and the likely effectiveness of the mitigation. We also assess the number, intensity, and context of estimated takes by evaluating this information relative to population status. Consistent with the 1989 preamble for NMFS's implementing regulations (54 FR 40338; September 29, 1989), the impacts from other past and ongoing anthropogenic activities are incorporated into this analysis via their impacts on the environmental baseline (*e.g.,* as reflected in the regulatory status of the species, population size and growth rate where known, ongoing sources of human-caused mortality, or ambient noise levels).

To avoid repetition, this introductory discussion of our analyses applies to both of the species listed in Table 2, given that the anticipated effects of the Navy's Submarine Base New London pier construction project activities involving pile driving and pile removal on marine mammals are expected to be relatively similar in nature. There is no information about the nature or severity of the impacts, or the size, status, or structure of any species or stock that would lead to a different analysis by species for this activity, or else species-specific factors would be identified and analyzed.

Although a few individual seals (6 harbor seals and 2 gray seals each in year 1 and year 2) are estimated to experience Level A harassment in the form of PTS if they stay within the Level A harassment zone during the entire pile driving for the day, the degree of injury is expected to be mild and is not likely to affect the reproduction or survival of the individual animals. It is expected that, if hearing impairments occurs, most likely the affected animal would lose a few dB in its hearing sensitivity, which in most cases is not likely to affect its survival and

recruitment. Hearing impairment that might occur for these individual animals would be limited to the dominant frequency of the noise sources, *i.e.,* in the low-frequency region below 2 kHz. Nevertheless, as for all marine mammal species, it is known that in general these pinnipeds will avoid areas where sound levels could cause hearing impairment. Therefore it is not likely that an animal would stay in an area with intense noise that could cause severe levels of hearing damage.

Under the majority of the circumstances, anticipated takes are expected to be limited to short-term Level B harassment. Marine mammals present in the vicinity of the action area and taken by Level B harassment would most likely show overt brief disturbance (startle reaction) and avoidance of the area from elevated noise levels during pile driving and pile removal. Given the limited estimated number of incidents of Level A and Level B harassment and the limited, short-term nature of the responses by the individuals, the impacts of the estimated take cannot be reasonably expected to, and are not reasonably likely to, rise to the level that they would adversely affect either species at the population level, through effects on annual rates of recruitment or survival.

There are no known important habitats, such as rookeries or haul-outs, in the vicinity of the Navy's proposed Submarine Base New London pier construction project. The project also is not expected to have significant adverse effects on affected marine mammals' habitat, including prey, as analyzed in detail in the ''Anticipated Effects on Marine Mammal Habitat'' subsection.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the proposed monitoring and mitigation measures, NMFS finds that the total take from the proposed activity will have a negligible impact on all affected marine mammal species or stocks.

Small Numbers

As noted above, only small numbers of incidental take may be authorized under section 101(a)(5)(A) of the MMPA for specified activities other than military readiness activities. The MMPA does not define small numbers and so, in practice, NMFS compares the number of individuals taken to the most appropriate estimation of abundance of the relevant species or stock in our determination of whether an authorization is limited to small numbers of marine mammals.

The estimated takes are below one percent of the population for all marine mammals (Table 6).

Based on the analysis contained herein of the proposed activity (including the prescribed mitigation and monitoring measures) and the anticipated take of marine mammals, NMFS finds that small numbers of marine mammals will be taken relative to the population size of the affected species or stocks.

Unmitigable Adverse Impact Subsistence Analysis and Determination

There are no relevant subsistence uses of the affected marine mammal stocks or species implicated by this action. Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Adaptive Management

The regulations governing the take of marine mammals incidental to Navy maintenance construction activities would contain an adaptive management component.

The reporting requirements associated with this proposed rule are designed to provide NMFS with monitoring data from the previous year to allow consideration of whether any changes are appropriate. The use of adaptive management allows NMFS to consider new information from different sources to determine (with input from the Navy regarding practicability) on an annual or biennial basis if mitigation or monitoring measures should be modified (including additions or deletions). Mitigation measures could be modified if new data suggests that such modifications would have a reasonable likelihood of reducing adverse effects to marine mammals and if the measures are practicable.

The following are some of the possible sources of applicable data to be considered through the adaptive management process: (1) Results from monitoring reports, as required by MMPA authorizations; (2) results from general marine mammal and sound research; and (3) any information which reveals that marine mammals may have been taken in a manner, extent, or number not authorized by these regulations or subsequent LOAs.

National Environmental Policy Act (NEPA)

Issuance of an MMPA authorization requires compliance with NEPA.

In accordance with NEPA (42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, we have determined that issuance of this rule and subsequent LOAs qualifies to be categorically excluded from further NEPA review. Issuance of the rule is consistent with categories of activities identified in CE B4 of the Companion Manual and we have not identified any extraordinary circumstances listed in Chapter 4 of the Companion Manual that would preclude use of this categorical exclusion.

Endangered Species Act (ESA)

No incidental take of ESA-listed species is proposed for authorization or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Classification

Pursuant to the procedures established to implement Executive Order 12866, the Office of Management and Budget has determined that this proposed rule is not significant.

Pursuant to section 605(b) of the Regulatory Flexibility Act (RFA), the Chief Counsel for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. The U.S. Navy is the sole entity that would be subject to the requirements in these proposed regulations, and the Navy is not a small governmental jurisdiction, small organization, or small business, as defined by the RFA. Because of this certification, a regulatory flexibility analysis is not required and none has been prepared.

This proposed rule does not contain a collection-of-information requirement subject to the provisions of the Paperwork Reduction Act (PRA) because the applicant is a federal agency. Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the PRA unless that collection of information displays a currently valid OMB control number. These requirements have been approved by OMB under control number 0648–0151 and include applications for regulations, subsequent LOAs, and reports.

List of Subjects in 50 CFR Part 217

Exports, Fish, Imports, Incidental take, Indians, Labeling, Marine

mammals, Navy, Penalties, Reporting and recordkeeping requirements, Seafood, Sonar, Transportation.

Dated: July 20, 2018.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For reasons set forth in the preamble, 50 CFR part 217 is amended as follows:

PART 217—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

■ 1. The authority citation for part 217 continues to read as follows:

Authority: 16 U.S.C. 1361 *et seq.,* unless otherwise noted.

■ 2. Add subpart J to part 217 to read as follows:

Subpart J—Taking and Importing Marine Mammals; U.S. Navy's Submarine Base New London Pier Construction

Sec.

Subpart J—Taking and Importing Marine Mammals; U.S. Navy's Submarine Base New London Pier Construction

§ 217.90 Specified activity and specified geographical region.

(a) Regulations in this subpart apply only to the U.S. Navy (Navy) and those persons it authorizes or funds to conduct activities on its behalf for the taking of marine mammals that occurs in the area outlined in paragraph (b) of this section and that occurs incidental to the activities described in paragraph (c) of this section.

(b) The taking of marine mammals by the Navy may be authorized in Letters of Authorization (LOAs) only if it occurs within the Navy Submarine Base New London Study Area, which is located in the towns of Groton and Ledyard in New London County, Connecticut.

(c) The taking of marine mammals by the Navy is only authorized if it occurs incidental to the Navy's conducting in-water pier construction or demolition activities.

§ 217.91 Effective dates and definitions.

Regulations in this subpart are effective March 1, 2020 through February 28, 2025.

§ 217.92 Permissible methods of taking.

Under LOAs issued pursuant to § 216.106 of this chapter and § 217.96, the Holder of the LOAs (hereinafter ''Navy'') may incidentally, but not intentionally, take marine mammals within the area described in § 217.90(b) by Level A harassment and Level B harassment associated with in-water pile driving and pile removal activities, provided the activity is in compliance with all terms, conditions, and requirements of the regulations in this subpart and the applicable LOAs.

§ 217.93 Prohibitions.

Notwithstanding takings contemplated in § 217.92 and authorized by LOAs issued under § 216.106 of this chapter and § 217.96, no person in connection with the activities described in § 217.90 may:

(a) Violate, or fail to comply with, the terms, conditions, and requirements of this subpart or a LOA issued under § 216.106 of this chapter and § 217.96;

(b) Take any marine mammal not specified in such LOAs;

(c) Take any marine mammal specified in such LOAs in any manner other than as specified;

(d) Take a marine mammal specified in such LOAs if NMFS determines such taking results in more than a negligible impact on the species or stocks of such marine mammal; or

(e) Take a marine mammal specified in such LOAs if NMFS determines such taking results in an unmitigable adverse impact on the availability of such species or stock of marine mammal for taking for subsistence uses.

§ 217.94 Mitigation requirements.

When conducting the activities identified in § 217.90(c), the mitigation measures contained in any LOAs issued under § 216.106 of this chapter and § 217.96 must be implemented. These mitigation measures shall include but are not limited to:

(a) *Time restriction.* In-water construction and demolition work shall occur only during daylight hours.

(b) *Establishment of monitoring and shutdown zones.* (1) For all relevant in-water construction and demolition activity, the Navy shall designate Level A harassment zones with radial distances as identified in any LOA issued under § 216.106 of this chapter and § 217.96.

(2) For all relevant in-water construction and demolition activity, the Navy shall designate Level B harassment zones with radial distances as identified in any LOA issued under § 216.106 of this chapter and § 217.96.

(3) For all in-water construction and demolition activity, the Navy shall implement a minimum shutdown zone of a 10-m radius around the pile. If a marine mammal comes within or approaches the shutdown zone, such operations shall cease.

(c) *Monitoring visibility.* Pile driving shall only take place when the shutdown and Level A zones are visible and can be adequately monitored. If conditions (*e.g.,* fog) prevent the visual detection of marine mammals, activities with the potential to result in Level A harassment shall not be initiated. If such conditions arise after the activity has begun, pile driving or pile removal activities shall be halted if the 10-m shutdown zone is not visible.

(d) *Shutdown measures.* (1) The Navy shall deploy three protected species observers (PSOs) to monitor marine mammals during in-water pile driving and pile removal. One PSO shall be located on land and two shall be located in a boat to monitor the farther locations.

(2) Monitoring shall take place from 15 minutes prior to initiation of pile driving or removal activity through 30 minutes post-completion of pile driving or removal activity. Pre-activity monitoring shall be conducted for 15 minutes to ensure that the shutdown zone is clear of marine mammals, and pile driving or removal may commence when observers have declared the shutdown zone clear of marine mammals. In the event of a delay or shutdown of activity resulting from marine mammals in the shutdown zone, animals shall be allowed to remain in the shutdown zone (*i.e.,* must leave of their own volition) and their behavior shall be monitored and documented. Monitoring shall occur throughout the time required to drive or remove a pile. A determination that the shutdown zone is clear must be made during a period of good visibility (*i.e.,* the entire shutdown zone and surrounding waters must be visible to the naked eye).

(3) If a marine mammal approaches or enters the shutdown zone, or if a marine mammal not specified in the LOAs enters the Level B harassment zone, or if the take of a marine mammal species or stock has reached the take limits specified in any LOA issued under § 216.106 of this chapter and § 217.96 and enters the Level B harassment zone, all pile driving or removal activities at that location shall be halted. If pile driving or removal is halted or delayed due to the presence of a marine

mammal, the activity may not commence or resume until either the animal has voluntarily left and been visually confirmed beyond the shutdown zone or fifteen minutes have passed without re-detection of the animal.

(4) The Navy shall implement shutdown measures if the number of authorized takes for any particular species reaches the limit under the applicable LOA and if such marine mammals are sighted within the vicinity of the project area and are approaching the Level B harassment zone during in-water construction or demolition activities.

(e) *Soft start.* (1) The Navy shall implement soft start techniques for impact pile driving. The Navy shall conduct an initial set of three strikes from the impact hammer at 40 percent energy, followed by a 1-minute waiting period, then two subsequent three strike sets.

(2) Soft start shall be required for any impact driving, including at the beginning of the day, and at any time following a cessation of impact pile driving of 30 minutes or longer.

§ 217.95 Requirements for monitoring and reporting.

(a) *Marine mammal monitoring*—(1) *General requirements.* The Navy shall employ trained protected species observers (PSOs) to conduct marine mammal monitoring for its Submarine Base New London pier construction project. The PSOs shall observe and collect data on marine mammals in and around the project area for 15 minutes before, during, and for 30 minutes after all pile removal and pile installation work. PSOs shall have no other assigned tasks during monitoring periods, and shall be placed at the best vantage point(s) practicable to monitor for marine mammals and implement shutdown or delay procedures when applicable through communication with the equipment operator.

(2) *Protected species observer qualifications.* NMFS-approved PSOs shall meet the following requirements:

(i) Independent observers (*i.e.,* not construction personnel) are required;

(ii) At least one observer must have prior experience working as an observer;

(iii) Other observers may substitute education (undergraduate degree in biological science or related field) or training for experience;

(iv) Where a team of three or more observers are required, one observer should be designated as lead observer or monitoring coordinator. The lead observer must have prior experience working as an observer; and

(v) NMFS will require submission and approval of observer CVs.

(3) *Marine mammal monitoring protocols.* (i) The Navy shall conduct briefings between construction supervisors and crews and the PSO team prior to the start of all pile driving activities, and when new personnel join the work, in order to explain responsibilities, communication procedures, marine mammal monitoring protocol, and operational procedures. All personnel working in the project area shall watch the Navy's Marine Species Awareness Training video. An informal guide shall be included with the monitoring plan to aid in identifying species if they are observed in the vicinity of the project area.

(ii) The Navy shall monitor the Level A and Level B harassment zones before, during, and after pile driving activities for all in-water constructions. The Marine Mammal Monitoring Plan shall include the following procedures:

(A) *PSO location.* PSOs will be primarily located on boats, docks, and piers at the best vantage point(s) in order to properly see the entire shutdown zone(s).

(B) *PSO vantage point.* PSOs will be located at the best vantage point(s) to observe the zone associated with behavioral impact thresholds.

(C) *Observation equipment.* During all observation periods, PSOs will use high-magnification (25X), as well as standard handheld (7X) binoculars, and the naked eye to search continuously for marine mammals.

(D) *Ranging equipment.* Monitoring distances will be measured with range finders. Distances to animals will be based on the best estimate of the PSO, relative to known distances to objects in the vicinity of the PSO.

(E) *Bearing.* Bearings to animals will be determined using a compass.

(F) *Pre-activity monitoring.* The shutdown zone will be monitored for 15 minutes prior to in-water construction/demolition activities. If a marine mammal is present within the 10-m shutdown zone, the activity will be delayed until the animal(s) leaves the shutdown zone. Activity will resume only after the PSO has determined that, through sighting or by waiting 15 minutes, the animal(s) has moved outside the shutdown zone. If a marine mammal is observed approaching the shutdown zone, the PSO who sighted that animal will notify all other PSOs of its presence.

(G) *During activity monitoring.* If a marine mammal is observed entering the Level A or Level B harassment zones outside the 10-m shutdown zone, the pile segment being worked on will be completed without cessation, unless the animal enters or approaches the shutdown zone, at which point all pile driving activities will be halted. If an animal is observed within the shutdown zone during pile driving, then pile driving will be stopped as soon as it is safe to do so. Pile driving can only resume once the animal has left the shutdown zone of its own volition or has not been re-sighted for a period of 15 minutes.

(H) *Post-activity monitoring.* Monitoring of all zones will continue for 30 minutes following the completion of the activity.

(b) *Acoustic monitoring*—(1) *Sound source verification.* (i) The Navy shall conduct pile driving sound source verification for the following types and sizes of piles:

(A) Vibratory and impact installation of at least 5 16-in fiberglass reinforced plastic piles; and

(B) Rock socket drilling of at least 3 30-in and 3 16-in piles.

(ii) Sound source measurements of these piles sound shall be conducted at distances approximately 10 m from the source.

(iii) For vibratory pile driving/removal source level measurements, reports shall include 1-s sound exposure level (SEL), source spectrum, duration of recordings used to derived the SEL, and 24-hour cumulative SEL extrapolated from measurements.

(iv) For impact pile driving source level measurements, report should include peak sound pressure level (SPL_{pk}), root-mean-square SPL (SPL_{rms}), single strike SEL (SEL_{ss}), integration time for SPL_{rms}, SEL_{ss} spectrum, and 24-hour cumulative SEL extrapolated from measurements.

(2) *Level B harassment distance verification.* (i) The Navy shall empirically determine the Level B harassment distance either by extrapolating from in situ measurements conducted at several points between 10 and 500 m from the source, or by direct measurements to locate the distance where the received levels reach 120 dB or below, or at the ambient noise level.

(ii) Level B harassment zones to be empirically verified include:

(A) Rock socket drilling of at least 3 30-in and 3 16-in piles;

(B) Vibratory installation of at least 3 36-in steel piles; and

(C) Vibratory removal of at least 3 24-in concrete and 3 33-in concrete piles.

(iii) For extent of Level B harassment zone verification, the Navy shall report the measured or extrapolated distances where the received levels SPL_{rms} decay to 120-dB or to the ambient noise level,

whichever is higher, as well as integration time for such SPL_{rms}.

(3) *Source level calculation.* The sound levels reported should be in median and linear average (*i.e.,* taking averages of sound intensity before converting to dB).

(4) *Sediment type.* The passive acoustic monitoring reports shall also include sediment type where measurements are made.

(c) *Reporting measures*—(1) *Annual reports.* (i) The Navy shall submit an annual report within 90 days after each activity year, starting from the date when the LOA is issued (for the first annual report) or from the date when the previous annual report ended.

(ii) Annual reports shall detail the monitoring protocol, summarize the data recorded during monitoring, and estimate the number of marine mammals that may have been harassed during the period of the report.

(iii) Annual reports shall also include results from acoustic monitoring detailed in paragraph (b) of this section.

(iv) NMFS shall provide comments within 30 days after receiving annual reports, and the Navy shall address the comments and submit revisions within 30 days after receiving NMFS comments. If no comment is received from the NMFS within 30 days, the annual report is considered completed.

(2) *Final report.* (i) The Navy shall submit a comprehensive summary report to NMFS not later than 90 days following the conclusion of marine mammal monitoring efforts described in this subpart.

(ii) The final report shall synthesize all data recorded during marine mammal monitoring, and estimate the number of marine mammals that may have been harassed through the entire project.

(iii) NMFS would provide comments within 30 days after receiving this report, and the Navy shall address the comments and submit revisions within 30 days after receiving NMFS comments. If no comment is received from the NMFS within 30 days, the final report is considered as final.

(3) *Reporting of injured or dead marine mammals.* (i) In the unanticipated event that the construction or demolition activities clearly cause the take of a marine mammal in a prohibited manner, such as an injury, serious injury, or mortality, the Navy shall immediately cease all operations and immediately report the incident to the NMFS Office of Protected Resources, NMFS, and the Greater Atlantic Region Stranding Coordinators. The report must include the following information:

(A) Time, date, and location (latitude/longitude) of the incident;

(B) Description of the incident;

(C) Status of all sound source use in the 24 hours preceding the incident;

(D) Environmental conditions (*e.g.,* wind speed and direction, sea state, cloud cover, visibility, and water depth);

(E) Description of marine mammal observations in the 24 hours preceding the incident;

(F) Species identification or description of the animal(s) involved;

(G) The fate of the animal(s); and

(H) Photographs or video footage of the animal (if equipment is available).

(ii) Activities shall not resume until NMFS is able to review the circumstances of the prohibited take. NMFS shall work with the Navy to determine what is necessary to minimize the likelihood of further prohibited take and ensure MMPA compliance. The Navy may not resume their activities until notified by NMFS via letter, email, or telephone.

(iii) In the event that the Navy discovers an injured or dead marine mammal, and the lead PSO determines that the cause of the injury or death is unknown and the death is relatively recent (*i.e.,* in less than a moderate state of decomposition as described in the next paragraph), the Navy will immediately report the incident to the NMFS Office of Protected Resources, NMFS, and the Greater Atlantic Regional Stranding Coordinators. The report must include the same information identified in paragraph (c)(3)(i)(A) of this section. Activities may continue while NMFS reviews the circumstances of the incident. NMFS will work with the Navy to determine whether modifications in the activities are appropriate.

(iv) In the event that the Navy discovers an injured or dead marine mammal, and the lead protected species observer determines that the injury or death is not associated with or related to the activities authorized in the IHA (*e.g.,* previously wounded animal, carcass with moderate to advanced decomposition, or scavenger damage), the Navy shall report the incident to the NMFS Office of Protected Resources, NMFS, and the Greater Atlantic Regional Stranding Coordinators, within 24 hours of the discovery. The Navy shall provide photographs or video footage (if available) or other documentation of the stranded animal sighting to NMFS and the Marine Mammal Stranding Network. The Navy can continue its operations under such a case.

§ 217.96 Letters of Authorization.

(a) To incidentally take marine mammals pursuant to these regulations, the Navy must apply for and obtain LOAs in accordance with § 216.106 of this chapter for conducting the activity identified in § 217.90(c).

(b) LOAs, unless suspended or revoked, may be effective for a period of time not to extend beyond the expiration date of these regulations.

(c) If an LOAs expires prior to the expiration date of these regulations, the Navy may apply for and obtain a renewal of the LOAs.

(d) In the event of projected changes to the activity or to mitigation, monitoring, reporting (excluding changes made pursuant to the adaptive management provision of § 217.97(c)(1)) required by an LOA, the Navy must apply for and obtain a modification of LOAs as described in § 217.97.

(e) Each LOA shall set forth:

(1) Permissible methods of incidental taking;

(2) Means of effecting the least practicable adverse impact (*i.e.,* mitigation) on the species, their habitat, and the availability of the species for subsistence uses; and

(3) Requirements for monitoring and reporting.

(f) Issuance of the LOAs shall be based on a determination that the level of taking shall be consistent with the findings made for the total taking allowable under these regulations.

(g) Notice of issuance or denial of the LOAs shall be published in the **Federal Register** within 30 days of a determination.

§ 217.97 Renewals and modifications of Letters of Authorization.

(a) An LOA issued under § 216.106 of this chapter and § 217.96 for the activity identified in § 217.90(c) shall be renewed or modified upon request by the applicant, provided that:

(1) The proposed specified activity and mitigation, monitoring, and reporting measures, as well as the anticipated impacts, are the same as those described and analyzed for these regulations (excluding changes made pursuant to the adaptive management provision in paragraph (c)(1) of this section); and

(2) NMFS determines that the mitigation, monitoring, and reporting measures required by the previous LOAs under these regulations were implemented.

(b) For LOA modification or renewal requests by the applicant that include changes to the activity or the mitigation, monitoring, or reporting measures (excluding changes made pursuant to

the adaptive management provision in paragraph (c)(1) of this section) that do not change the findings made for the regulations or result in no more than a minor change in the total estimated number of takes (or distribution by species or years), NMFS may publish a notice of proposed LOA in the **Federal Register**, including the associated analysis of the change, and solicit public comment before issuing the LOA.

(c) An LOA issued under § 216.106 of this chapter and § 217.96 for the activity identified in § 217.90(c) may be modified by NMFS under the following circumstances:

(1) *Adaptive management.* After consulting with the Navy regarding the practicability of the modifications, NMFS may modify (including by adding or removing measures) the existing mitigation, monitoring, or reporting measures if doing so creates a reasonable likelihood of more effectively accomplishing the goals of the mitigation and monitoring set forth in the preamble for these regulations.

(i) Possible sources of data that could contribute to the decision to modify the mitigation, monitoring, or reporting measures in an LOA:

(A) Results from the Navy's monitoring from the previous year(s);

(B) Results from other marine mammal and/or sound research or studies; or

(C) Any information that reveals marine mammals may have been taken in a manner, extent or number not authorized by these regulations or subsequent LOAs.

(ii) If, through adaptive management, the modifications to the mitigation, monitoring, or reporting measures are substantial, NMFS shall publish a notice of proposed LOA in the **Federal Register** and solicit public comment.

(2) *Emergencies.* If NMFS determines that an emergency exists that poses a significant risk to the well-being of the species or stocks of marine mammals specified in LOAs issued pursuant to § 216.106 of this chapter and § 217.96, an LOA may be modified without prior notice or opportunity for public comment. Notice would be published in the **Federal Register** within thirty days of the action.

§ 217.98 [Reserved]

§ 217.99 [Reserved]

Proposed Rules

Federal Register
Vol. 83, No. 147
Tuesday, July 31, 2018

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

6 CFR Part 5

[Docket No. DHS–2018–0002]

Privacy Act of 1974: Implementation of Exemptions; Department of Homeland Security/U.S. Citizenship and Immigration Services–018 Immigration Biometric and Background Check (IBBC) System of Records

AGENCY: Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Homeland Security (DHS) is giving concurrent notice of a newly established system of records pursuant to the Privacy Act of 1974 for the ''Department of Homeland Security/U.S. Citizenship and Immigration Services–018 Immigration Biometric and Background Check System of Records'' and this proposed rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

DATES: Comments must be received on or before August 30, 2018.

ADDRESSES: You may submit comments, identified by docket number DHS–2018–0002 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–343–4010.
- *Mail:* Philip S. Kaplan, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

Instructions: All submissions received must include the agency name and docket number DHS–2018–0002 for this notice. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT:

For general questions please contact: Donald K. Hawkins, (202) 272–8030, *USCIS.PrivacyCompliance@uscis.dhs.gov*, Privacy Officer, U.S. Citizenship and Immigration Services, 20 Massachusetts Avenue NW, Washington, DC 20529.

For privacy questions please contact: Philip S. Kaplan, (202) 343–1717, *Privacy@hq.dhs.gov*, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the DHS U.S. Citizenship and Immigration Services (USCIS) has relied on two preexisting DHS/USCIS Privacy Act system of records notices (SORN) for the maintenance of USCIS biometric and background check records: ''DHS/USCIS 002 Background Check Service,'' 72 FR 31082 (June 5, 2007), and ''DHS/USCIS–003 Biometric Storage System,'' 72 FR 17172 (April 6, 2007). DHS plans to rescind these SORNs. Records covered under these preexisting SORNs will now be covered by one new system of records named ''DHS/USCIS–018 Immigration Biometric and Background Check System of Records'' (IBBC). This SORN consolidates all USCIS records maintained on biometric and associated biographic information it collects pursuant to its mission to process and adjudicate immigration benefit requests and other immigration request forms (*e.g.,* applications and petitions). The purpose of this system is to verify identity and conduct criminal and national security background checks in order to establish an individual's eligibility for an immigration benefit or other request, and support domestic and international data sharing efforts. USCIS determines eligibility by capturing biometric and associated biographic data from benefit requestors, beneficiaries, and other categories of individuals to facilitate three key operational functions: (1) Verify an individual's identity; (2) conduct criminal and national security background checks; and (3) produce benefit cards/documents as a proof of benefit. Further, this system permits the sharing of information covered by this system between the United States and foreign partners to prevent terrorism, including terrorist travel; prevent serious crime and other threats to national security and public safety; and assist in the administration and enforcement of immigration laws.

A description of this consolidated system is further described in DHS/USCIS's notice of a new Privacy Act systems of records published elsewhere in this **Federal Register**.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework under which Federal Government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. Additionally, the Judicial Redress Act (JRA) provides a statutory right to covered persons to make requests for access and amendment to covered records, as defined by the JRA, along with judicial review for denials of such requests. In addition, the JRA prohibits disclosures of covered records, except as otherwise permitted by the Privacy Act.

The Privacy Act allows government agencies to exempt certain records from the access and amendment subsection 552a(d) provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking and Final Rule to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/USCIS–018 Immigration Biometric and Background Check System of Records. Information in DHS/USCIS–018 Immigration Biometric and Background Check System of Records relates to official DHS national security,

law enforcement, immigration, and intelligence activities. These exemptions are needed to protect ongoing investigations and law enforcement activities. Specifically, the exemptions are required to preclude subjects of these activities from frustrating these processes; to avoid disclosure of activity techniques; to protect the identities and physical safety of confidential informants and law enforcement personnel; to ensure DHS's ability to obtain information from third parties and other sources; and to safeguard classified information. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

In appropriate circumstances, when compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

List of Subjects in 6 CFR Part 5

Freedom of information, Privacy.

For the reasons stated in the preamble, DHS proposes to amend chapter I of title 6, Code of Federal Regulations, as follows:

PART 5—DISCLOSURE OF RECORDS AND INFORMATION

■ 1. The authority citation for part 5 is revised to read as follows:

Authority: 6 U.S.C. 101 *et seq.;* Pub. L. 107–296, 116 Stat. 2135; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

■ 2. Add at the end of appendix C to part 5, the following new paragraph ''78'':

Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act

* * * * *

78. The DHS/USCIS–018 Immigration Biometric and Background Check (IBBC) System of Records covers electronic and paper records and will be used by DHS and its components. The DHS/USCIS–018 IBBC System of Records covers information held by DHS/USCIS in connection with its several and varied missions and functions, including, but not limited to, the enforcement of civil and criminal laws; investigations, inquiries, and proceedings there under; and national security and intelligence activities. The DHS/USCIS–018 IBBC System of Records contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other Federal, state, local, tribal, foreign, or international government agencies.

The Secretary of Homeland Security, pursuant to Secretary's delegation 15002 to the Director of USCIS to conduct certain law enforcement activities when necessary to protect the national security and public safety, pursuant to 5 U.S.C. 552a(j)(2), has exempted this system from the following provisions of the Privacy Act: 5 U.S.C. 552a(c)(3), (c)(4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5), (e)(8); (f); and (g). Additionally, the Secretary of Homeland Security, pursuant to 5 U.S.C. 552a(k)(2), has exempted this system from the following provisions of the Privacy Act: 5 U.S.C. 552a(c)(3); (d); (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I); and (f). Where a record received from another system has been exempted in that source system under 5 U.S.C. 552a(j)(2), DHS will claim the same exemptions for those records that are claimed for the original primary systems of records from which they originated and claims any additional exemptions set forth here.

Exemptions from these particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) and (4) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (d) (Access to Records) because access to the records contained in this system of records could inform the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of DHS or another agency. Access to the records could permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension. From subsection (d) (Amendment to Records) because permitting amendment of records could interfere with ongoing investigations and law enforcement activities and would impose an unreasonable administrative burden by requiring investigations to be continually reinvestigated. In addition, permitting access and amendment to such information could disclose security-sensitive information that could be detrimental to homeland security.

(c) From subsection (e)(1) (Relevancy and Necessity of Information) because in the course of investigations into potential violations of federal law, the accuracy of information obtained or introduced occasionally may be unclear, or the information may not be strictly relevant or necessary to a specific investigation. In the interests of effective law enforcement, it is appropriate to retain all information that may aid in establishing patterns of unlawful activity.

(d) From subsection (e)(2) (Collection of Information from Individuals) because requiring that information be collected from the subject of an investigation would alert the subject to the nature or existence of the investigation, thereby interfering with that investigation and related law enforcement activities.

(e) From subsection (e)(3) (Notice to Subjects) because providing such detailed information could impede law enforcement by compromising the existence of a confidential investigation or reveal the identity of witnesses or confidential informants.

(f) From subsections (e)(4)(G), (e)(4)(H), and (e)(4)(I) (Agency Requirements) and (f) (Agency Rules), because portions of this system are exempt from the individual access provisions of subsection (d) for the reasons noted above, and therefore DHS is not required to establish requirements, rules, or procedures with respect to such access. Providing notice to individuals with respect to existence of records pertaining to them in the system of records or otherwise setting up procedures pursuant to which individuals may access and view records pertaining to themselves in the system would undermine investigative efforts and reveal the identities of witnesses, and potential witnesses, and confidential informants.

(g) From subsection (e)(5) (Collection of Information) because with the collection of information for law enforcement purposes, it is impossible to determine in advance what information is accurate, relevant, timely, and complete. Compliance with subsection (e)(5) would preclude DHS agents from using their investigative training and exercise of good judgment to both conduct and report on investigations.

(h) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS's ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal and could result in disclosure of investigative techniques, procedures, and evidence.

(i) From subsection (g) (Civil Remedies) to the extent that the system is exempt from other specific subsections of the Privacy Act.

Philip S. Kaplan,

Chief Privacy Officer, Department of Homeland Security.

Food Safety and Inspection Service

9 CFR Part 316

[Docket No. FSIS 2018–0019]

RIN 0583–AD69

Elimination of the Requirement That Livestock Carcasses Be Marked ''U.S. Inspected and Passed'' at the Time of Inspection Within a Slaughter Establishment for Carcasses to be Further Processed Within the Same Establishment

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: FSIS is proposing to amend the Federal meat inspection regulations to eliminate the requirement that livestock carcasses be marked with the official inspection legend at the time of inspection in a slaughter establishment, if the carcasses are to be further processed in the same establishment.

DATES: Comments must be received on or before October 1, 2018.

ADDRESSES: FSIS invites interested persons to submit comments on this proposed rule. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This website provides the ability to type short comments directly into the comment field on this web page or attach a file for lengthier comments. Go to *http://www.regulations.gov.* Follow the on-line instructions at that site for submitting comments.
- *Mail, including CD–ROMs:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Room 6065, Washington, DC 20250–3700.
- *Hand- or courier-delivered submittals:* Deliver to 1400 Independence Avenue SW, Room 6065, Washington, DC 20250–3700.
- *Instructions:* All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2018–0005. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *http://www.regulations.gov.*

Docket: For access to background documents or comments received, call (202) 720–5627 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Room 6065, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Roberta Wagner, Assistant Administrator, Office of Policy and Program Development, Food Safety and Inspection Service, U.S. Department of Agriculture; Telephone: (202) 205–0495.

SUPPLEMENTARY INFORMATION:

Background

In the past, slaughter establishments often would ship carcasses to other establishments for further processing into primal, subprimal, and other meat cuts and products. Today however, most establishments that slaughter swine, cattle, or sheep also fabricate the carcasses into various primal and subprimal parts, as well as other meat products. After a carcass has passed inspection, the slaughter establishment typically moves it, under control, to another department in the same establishment for further processing. The establishment then typically ships the resulting meat food products, rather than marked carcasses, in fully labeled containers either for further processing at other establishments or into commerce.

The Federal Meat Inspection Act (FMIA) requires the inspection of all livestock carcasses and parts of livestock carcasses prepared in slaughter establishments as articles of commerce capable of use as human food (21 U.S.C. 604). In this same provision, the FMIA requires that such carcasses and parts of carcasses found to be not adulterated be stamped as ''inspected and passed'' before they enter commerce. The FMIA also gives FSIS broad authority to promulgate rules and regulations necessary to carry out its provisions (21 U.S.C. 621).

The regulations at 9 CFR 316.9 set forth more prescriptive, and partially outdated, requirements for the marking of inspected carcasses. Specifically, the regulation at 9 CFR 316.9(a) requires each carcass at an official establishment to be marked at the time of inspection with the official inspection legend. This requirement is intended to prevent uninspected carcasses from being shipped in commerce from slaughter establishments to processing establishments or elsewhere. However, given contemporary practices at slaughter establishments, marking the carcass on the slaughter floor is often unnecessary, as the carcass will be moved elsewhere in the same establishment for further processing.

Requests To Move Carcasses and Parts of Carcasses To Processing Without Marking the Carcass

Numerous slaughter establishments have requested waivers from the requirement in 9 CFR 316.9(a), *i.e.,* that the carcasses they further process in-house not be required to be marked at the time of inspection. The information presented with these requests has described the steps that establishments would take to ensure that uninspected, unmarked, or adulterated product does not enter commerce. These steps typically include: (1) Ensuring that all carcasses inspected and passed by USDA, but not marked on the slaughter floor, are stored and processed in the establishment; (2) ensuring that all products shipped from the establishment bear the mark of inspection or are shipped in fully labeled containers that bear the mark of inspection; and (3) ensuring that FSIS still maintains control over any carcasses that do not pass inspection.

FSIS has granted many of these waivers, per the regulations at 9 CFR 303.1, thereby allowing inspected and passed carcasses to move, without the mark of inspection, from the slaughter floor to processing departments in the same establishment. At one point, because of the high number of waivers granted, FSIS issued an administrative notice to inspectors (FSIS Notice 17–16) with instructions for verification activities at establishments that had received a waiver from these requirements. FSIS has allowed this notice to expire, in anticipation of this rulemaking. Further, based on discussions with FSIS District Offices, while a significant number of establishments are currently operating under such waivers, there are no reports of unmarked carcasses being shipped into commerce.

FSIS has carefully considered the available information on allowing establishments to move carcasses and parts of carcasses to processing without marking the carcass with the inspection legend. From its experience with establishments to which it has provided waivers, the Agency has concluded that controls that establishments have put in place and Agency procedures to address inspection of unmarked carcasses have been successful in preventing unmarked carcasses from leaving the establishment for processing in an outside facility. FSIS is thus proposing that establishments not be required to mark carcasses with the inspection legend when the carcasses leave the slaughter floor to be further processed within the same establishment. However, all primals, subprimals, parts and other meat food products will have to be properly labeled and bear the mark of inspection before entering commerce.

Under the proposed rule, FSIS inspection personnel will continue to

verify that the establishment has in place in its Hazard Analysis and Critical Control Point (HACCP) plan, Sanitation Standard Operating Procedures (SOPs), or other prerequisite programs, controls to ensure that unmarked carcasses are further processed in the establishment and that carcasses that are not further processed in the establishment do not leave the establishment unmarked. Additionally, should this rule become final, inspectors would verify through records review or direct observation that the establishment's procedures ensure that: (1) The establishment properly identifies and handles carcasses or parts eligible for the mark of inspection through edible channels, so that only edible, inspected and passed product proceeds to fabrication; (2) the establishment can account for the number of carcasses it slaughters and moves through its establishment and that it correctly identifies the species slaughtered on the final label; (3) retained carcasses or parts remain under FSIS control until the establishment makes corrections that render the carcass or part eligible to bear the mark of inspection (*e.g.,* carcasses retained for residue sample or pending pathology disposition are held in FSIS controlled retained cages in the cooler); and (4) whole carcasses transported to another establishment bear the mark of inspection.

Executive Orders 12866 and 13563, and the Regulatory Flexibility Act

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety benefits, distributive impacts, and equity). Executive Order (E.O.) 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This proposed rule has been designated as a ''non-significant'' regulatory action under section 3(f) of E.O. 12866. Accordingly, the rule has not been reviewed by the Office of Management and Budget (OMB) under E.O. 12866.

Economic Impact Analysis

FSIS is proposing to remove the requirement for carcasses slaughtered in an establishment to bear the mark of inspection after being inspected and passed on the slaughter floor if the carcasses are to be further processed in the same establishment. Since this requirement is no longer necessary to prevent adulterated food product from entering commerce (see explanation in the Background section above), removing it will have no negative public health impact. Nor will it impose costs on the industry or the Agency.

In regard to benefits from the rulemaking, removing an unnecessary requirement will allow establishments the flexibility to be innovative and to operate in the most efficient manner. In addition, it will also allow FSIS to utilize its resources more appropriately by relieving inspectors of unnecessary tasks. The expected benefits from this proposed rule would accrue from time and resource savings. Inspected and passed carcasses meant for further processing would not have to wait for the mark of inspection but could move directly to further processing. Thus, establishments that slaughter livestock and process livestock carcasses in the same facility would benefit from fewer delays in their operations and greater flexibility to conduct processing operations on inspected and passed carcasses.

Agency data show that there are approximately 797 meat slaughtering establishments, and approximately 676 of them (~85 percent) do both slaughtering and processing.[1] FSIS estimates that approximately 644 of these 676 establishments (~95 percent) further process the carcasses they slaughter. Given that the annual production of meat by Federal inspected establishments is approximately 150 million heads,[2] roughly 120.9 million carcasses are subject to the requirements in 9 CFR 316.9 (150 million × 85 percent × 95 percent). Assuming that it takes establishment labor, on average, 3 seconds to stamp each carcass, and that approximately half of the establishments already have waivers from the requirement, approximately 50,417 additional hours would be saved. Most establishments use hired workers to do the stamping. If we assume the average hourly pay (salary plus benefits) is $20,[3] then the time saved is equivalent to approximately $1.01 million annually.

In addition, such establishments would no longer need to replace the broken or worn out stamps previously used for marking carcasses on the slaughter floor. Typically, a stamp (usually made of bronze) costs $225 and lasts 5 years.[4] The annualized cost of the stamp is $55 (if the interest rate is 7 percent) or $50 (if the interest rate is 3 percent). Assuming each establishment (that does not already have a waiver from the requirement) uses one stamp per year, the annual savings on these stamps would be between $16,700 and $18,600.

Additionally, establishments would no longer need to make written requests for waivers from the requirement to stamp carcasses further processed within the same establishment and would no longer need to wait to have such requests approved. Further, because FSIS inspectors would no longer need to ensure that inspected and passed carcasses bear the mark of inspection before they are sent for further processing, FSIS inspectors would have greater flexibility to focus on activities that are more important in ensuring food safety, such as verifying that establishments meet HACCP regulations and collecting product samples. However, the time needed for submitting a written waiver request and waiting for approval is minimal, and the saving of that time would be offset by the increase in time needed for establishments to amend their HACCP plans, Sanitation SOPs, or prerequisite programs to add controls for the movement of these unmarked carcasses under this proposed rule. Similarly, the time saved for FSIS inspectors to ensure that inspected carcasses bear the mark of inspection would be offset by the increase in time to verify that establishments meet HACCP regulations.

There are no expected costs associated with this proposed rule. Establishments already operating under a waiver will have procedures in their HACCP plans, Sanitation SOPs, or prerequisite programs that ensure that carcasses that are not further processed in the establishment do not leave the establishment unmarked. Other establishments will need to revise these procedures. However, FSIS expects that any costs associated with revising the procedures would be offset by increased flexibility allowed to those establishments as discussed in the foregoing section.

Regulatory Flexibility Act Assessment

The FSIS Administrator has made a preliminary determination that this

[1] Data source: Public Health Inspection System as of June 2017, provided by FSIS's Office of Data Integration and Food Protection.

[2] Livestock Slaughter 2016 Summary (April 2017). USDA, National Agricultural Statistics. *http://usda.mannlib.cornell.edu/usda/current/LiveSlauSu/LiveSlauSu-04-19-2017.pdf,* p.15. accessed 06/01/2017.

[3] Data source: Bureau of Labor Statistics (BLS) most recent report of average wage of meat slaughterers and packers. *https://www.bls.gov/oes/current/oes513023.htm/*, accessed 06/2017.

[4] Data from Ketchum Manufacturing Inc., a manufacturer of meat stamps, through telephone interview on 4/17/2017.

proposed rule will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601). The proposed rule will not increase costs to the industry.

Executive Order 13771

Consistent with E.O. 13771 (82 FR 9339, February 3, 2017), FSIS has estimated that this proposed rule would yield cost savings. Therefore, if finalized as proposed, this rule is expected to be an E.O. 13771 deregulatory action.

Paperwork Reduction Act

There are no paperwork or recordkeeping requirements associated with this proposed rule under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E-Government Act

FSIS and USDA are committed to achieving the purposes of the E-Government Act (44 U.S.C. 3601, *et seq.*) by, among other things, promoting the use of the internet and other information technologies and providing increased opportunities for citizen access to Government information and services, and for other purposes.

Executive Order 12988, Civil Justice Reform

This proposed rule has been reviewed under E.O. 12988, Civil Justice Reform. Under this rule: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) no administrative proceedings will be required before parties may file suit in court challenging this rule.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of E.O. 13175, ''Consultation and Coordination with Indian Tribal Governments.'' E.O. 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

FSIS has assessed the impact of this rule on Indian tribes and determined that this rule does not, to our knowledge, have tribal implications that require tribal consultation under E.O. 13175. If a Tribe requests consultation, FSIS will work with the Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified herein are not expressly mandated by Congress.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at *http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf,* or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email: *Mail:* U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW, Washington, DC 20250–9410; *Fax:* (202) 690–7442; *Email: program.intake@usda.gov*.

Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.), should contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *http://www.fsis.usda.gov/federal-register.*

FSIS also will make copies of this publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. Constituent updates are available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *http://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

List of Subjects in 9 CFR Part 316

Food labeling, Food packaging, Meat inspection.

For the reasons set forth in the preamble, FSIS is proposing to amend 9 CFR part 316 as follows:

PART 316—MARKING PRODUCTS AND THEIR CONTAINERS

■ 1. The authority citation for part 316 is revised to read as follows:

Authority: 21 U.S.C. 601–695; 7 CFR 2.18, 2.55.

■ 2. In § 316.9, revise paragraph (a), redesignate paragraphs (b) through (d) as paragraphs (c) through (e), respectively, and add a new paragraph (b) to read as follows:

§ 316.9 Products to be marked with official marks.

(a) Each carcass that has been inspected and passed in an official establishment must be marked at the time of inspection with the official inspection legend containing the number of the official establishment, if the carcass is to be shipped into commerce from the establishment without further processing.

(b) A passed and inspected carcass that is to be further processed in the slaughtering establishment need not be marked with the official inspection legend at the time of inspection, provided the establishment develops and implements, as part of a HACCP plan, Sanitation SOPs, or other prerequisite program, procedures to ensure that:

(1) Unmarked carcasses are further processed only in the slaughtering establishment;

(2) Unmarked carcasses that, for any reason, are not further processed in the establishment do not leave the establishment unmarked; and

(3) Unmarked and retained carcasses or parts remain under FSIS control until the establishment makes any corrections that are necessary to render the carcass or part eligible to bear the mark of inspection.

9 CFR Parts 318 and 381

[Docket No. FSIS 2016–0032]

RIN 0583–AD66

Preparation of Uninspected Products Outside of the Hours of Inspectional Supervision

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: FSIS is proposing to amend the Federal meat and poultry products inspection regulations to eliminate prescriptive requirements governing the manufacture of uninspected products, such as pet food, in edible product areas of official establishments and to allow official establishments to manufacture such products outside the hours of inspection.

DATES: To receive full consideration, comments should be received by August 30, 2018.

ADDRESSES: FSIS invites interested persons to submit comments on this proposed rule. Comments may be submitted by one of the following methods:

- *Federal eRulemaking Portal:* This website provides the ability to type short comments directly into the comment field on this web page or attach a file for lengthier comments. Go to *http://www.regulations.gov.* Follow the on-line instructions at that site for submitting comments.
- *Mail, including CD–ROMs, etc.:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Room 6065, Washington, DC 20250–3700.
- *Hand- or courier-delivered submittals:* Deliver to 1400 Independence Avenue SW, Room 6065, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2018–0005. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *http://www.regulations.gov.*

Docket: For access to background documents or comments received, call (202) 720–5627 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Room 6065, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Roberta Wagner, Assistant Administrator, Office of Policy and Program Development; Telephone: (202) 205–0495.

SUPPLEMENTARY INFORMATION:

Background

FSIS regulations at 9 CFR 318.12 and 381.152 govern the manufacture of pet food and other uninspected, inedible products in official meat and poultry establishments. These regulations set forth prescriptive requirements intended to prevent the creation of insanitary conditions in official establishments, the commingling of inedible and edible meat and poultry products, and the movement of inedible meat and poultry products into commerce as human food. They also require that pet food and other inedible products be manufactured in official establishments *only* when an FSIS inspector is on premises.

These prescriptive requirements for the production of pet food and other inedible products (*e.g.,* inedible rendered fats, lungs, lung lobes, and experimental products) are incompatible with the Hazard Analysis and Critical Control Point (HACCP) regulations at 9 CFR part 417 and the related sanitation regulations at 9 CFR part 416. Under the HACCP regulations, establishments are responsible for developing and implementing HACCP plans incorporating the controls determined by the establishment to be necessary and appropriate to produce safe, unadulterated products. Specifically under HACCP, official establishments must determine the food safety hazards reasonably likely to occur in the production process; institute controls necessary to prevent those hazards from occurring or keeping them within acceptable limits; monitor the performance of controls and verify the HACCP system is working as intended; and maintain required HACCP records. HACCP is a flexible system that appropriately places the responsibility for food safety on establishments and enables them to tailor their control systems to the needs of specific processes and operating conditions.

Similarly, the Sanitation Performance Standards (SPS) and requirements for Sanitation Standard Operating Procedures (SOPs) at 9 CFR part 416 set forth sanitation objectives to be achieved, while allowing establishments to develop and employ innovative and effective sanitation procedures customized to the nature of their operations. Under the Sanitation SOP regulations, FSIS requires that all inspected establishments develop and implement written Sanitation SOPs to prevent direct contamination or adulteration of product before and during operations. An establishment's Sanitation SOP typically covers the scheduled, daily pre-operational and operational cleaning and sanitation of equipment and surfaces that may contact product directly. Under the SPS regulations, establishments must address all of the other aspects of establishment sanitation that can affect food safety, *e.g.,* pest control, adequate ventilation, lighting, and plumbing systems.

Under the HACCP and sanitation requirements, an establishment that produces both edible and inedible meat and poultry products must develop and implement the controls and procedures necessary to prevent the adulteration of edible products by insanitary conditions and product commingling, as well as the movement of inedible products into commerce as human food. FSIS inspectors verify the implementation and effectiveness of these controls through inspection, records review and, as necessary, product sampling. Thus, FSIS inspectors do not need to be present in an official establishment when it manufactures inedible products in order to verify that edible products are not adulterated as a result.

Proposed Changes

FSIS is proposing to eliminate the prescriptive regulatory requirements at 9 CFR 318.12 and 381.152 governing the manufacture of uninspected, inedible products, such as pet food, and restricting the hours during which such products may be prepared in an official establishment. Specifically, these regulations set forth specific requirements regarding the sanitary handling of inedible products and their separation from edible products, as well as the placement, movement and cleaning of equipment in areas where inedible product is manufactured. They also require that the manufacture of uninspected, inedible products be conducted only during those hours in which the establishment operates under inspectional supervision. These regulations were issued before FSIS published its HACCP and Sanitation SOP regulations, when prescriptive regulatory requirements were deemed necessary to prevent the adulteration of meat and poultry products by the

preparation of inedible products in the same establishment.

FSIS is proposing to replace the prescriptive requirements in 9 CFR 318.12 and 381.152 with general standards governing the manufacture of uninspected, inedible products in official establishments. The proposed standards require that the manufacture of uninspected products in official establishments must not result in the adulteration of meat and poultry products, create insanitary conditions whereby meat and poultry products may be adulterated, or prevent or otherwise interfere with inspection or other program tasks performed by FSIS personnel. Establishments that manufacture pet food and other inedible products should be meeting these proposed standards already, through the implementation of their HACCP plans, Sanitation SOPs or other prerequisite programs.

Executive Order 12866 and the Regulatory Flexibility Act

This proposed rule has been designated as a ''non-significant'' regulatory action under section 3(f) of Executive Order (E.O.) 12866. Accordingly, the proposed rule has not been reviewed by the Office of Management and Budget under E.O. 12866.

Economic Impact Analysis

As stated above, the HACCP and the sanitation regulations provide a framework or food safety system for establishments to produce safe, unadulterated product. Compliance with these requirements makes the prescriptive requirements in 9 CFR 318.12 and 381.151 unnecessary. Because these prescriptive requirements are no longer necessary to ensure the production of safe, unadulterated food, removing them will have no negative public health impact. In addition, this rule will not impose costs on the industry or the Agency.

Further, removing the unnecessary, prescriptive requirements should allow establishments additional flexibility to be innovative and to operate in the most efficient manner. Similarly, the rule should also allow FSIS to use its resources more appropriately by relieving inspectors of unnecessary tasks.

Regulatory Flexibility Act (RFA)

FSIS has examined the economic implications of the proposed rule as required by the RFA (5 U.S.C 601–612). If a rule has a significant economic impact on a substantial number of small entities, the RFA requires that regulatory options that would lessen the economic effect of the rule on small entities be analyzed. FSIS has determined that, should it become final, the proposed rule would not have a significant impact on a substantial number of small entities.

Executive Order 13771

This proposed rule, if finalized as proposed, is expected to be a deregulatory action under E.O. 13771. Assessment of the costs and cost savings may be found in the preceding economic analysis.

Paperwork Reduction Act

There are no paperwork or recordkeeping requirements associated with this proposed rule under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

E-Government Act

FSIS and USDA are committed to achieving the purposes of the E-Government Act (44 U.S.C. 3601, *et seq.*) by, among other things, promoting the use of the internet and other information technologies and providing increased opportunities for citizen access to Government information and services, and for other purposes.

Executive Order 12988, Civil Justice Reform

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under this rule: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) no administrative proceedings will be required before parties may file suit in court challenging this rule.

Executive Order 13175

This rule has been reviewed in accordance with the requirements of Executive Order 13175, ''Consultation and Coordination with Indian Tribal Governments.'' E.O. 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

FSIS has assessed the impact of this rule on Indian tribes and determined that this rule does not, to our knowledge, have tribal implications that require tribal consultation under E.O. 13175. If a Tribe requests consultation, the Food Safety and Inspection Service will work with the Office of Tribal Relations to ensure meaningful consultation is provided where changes, additions and modifications identified herein are not expressly mandated by Congress.

USDA Non-Discrimination Statement

No agency, officer, or employee of the USDA shall, on the grounds of race, color, national origin, religion, sex, gender identity, sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, or political beliefs, exclude from participation in, deny the benefits of, or subject to discrimination any person in the United States under any program or activity conducted by the USDA.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at *http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf,* or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email: *Mail:* U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW, Washington, DC 20250–9410; *Fax:* (202) 690–7442; Email: *program.intake@usda.gov.*

Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.), should contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *http://www.fsis.usda.gov/federal-register.*

FSIS also will make copies of this publication available through the FSIS Constituent Update, which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The Update is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In

addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *http://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves, and have the option to password protect their accounts.

List of Subjects

9 CFR Part 318

Food additives, Food packaging, Laboratories, Meat inspection, Reporting and recordkeeping requirements, Signs and symbols.

9 CFR Part 381

Administrative practice and procedure, Animal diseases, Crime, Exports, Food grades and standards, Food labeling, Food packaging, Government employees, Grant programs-agriculture, Intergovernmental relations, Laboratories, Meat inspection, Nutrition, Polychlorinated biphenyls, Poultry and poultry products, Reporting and recordkeeping requirements, Seizures and forfeitures, Signs and symbols, Technical Assistance, Transportation.

For the reasons set forth in the preamble, FSIS is proposing to amend 9 CFR parts 318 and 381 as follows:

PART 318—ENTRY INTO OFFICIAL ESTABLISHMENTS; REINSPECTION AND PREPARATION OF PRODUCTS

■ 1. The authority citation for part 318 continues to read as follows:

Authority: 7 U.S.C. 138f, 450, 1901–1906; 21 U.S.C. 601–695; 7 CFR 2.18, 2.53.

■ 2. Section 318.12 is revised to read as follows:

§ 318.12 Manufacture of uninspected, inedible products at official establishments.

(a) Official establishments may manufacture pet food or similar uninspected, inedible products in areas where edible products also are produced, provided that the manufacture of uninspected, inedible products does not:

(1) Adulterate edible products;

(2) Create insanitary conditions in the official establishment whereby edible products may be adulterated; or

(3) Prevent or interfere with inspection or other program tasks performed by FSIS personnel in the official establishment.

(b) Pet food and similar uninspected, inedible products must be distinguished from edible products so as to avoid their distribution as human food. Pet food or similar uninspected, inedible products must be labeled or otherwise identified in accordance with § 325.11(d) of this subchapter.

PART 381—POULTRY PRODUCTS INSPECTIONS REGULATIONS

■ 3. The authority citation for part 381 continues to read as follows:

Authority: 7 U.S.C. 138f; 7 U.S.C. 450; 21 U.S.C. 451–470; 7 CFR 2.18, 2.53.

■ 4. Section 381.152 is revised to read as follows:

§ 381.152 Manufacture of uninspected, inedible products at official establishments.

(a) Official establishments may manufacture pet food or similar uninspected, inedible products in areas where edible products also are produced, provided that the manufacture of uninspected, inedible products does not:

(1) Adulterate edible products;

(2) Create insanitary conditions in the official establishment whereby edible products may be adulterated; or

(3) Prevent or interfere with inspection or other program tasks performed by FSIS personnel in the official establishment.

(b) The immediate container of uninspected, inedible products manufactured in an official establishment shall be conspicuously labeled so as to distinguish them from human food.

Done in Washington, DC.

BILLING CODE 3410–DM–P

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 41

RIN 3038–AE61

Position Limits and Position Accountability for Security Futures Products

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule.

SUMMARY: The Commodity Futures Trading Commission (''CFTC'' or ''Commission'') is proposing to amend its position limits rules for security futures products (''SFPs'') by: Increasing the default level of equity SFP position limits, and modifying the criteria for setting a higher level of position limits and position accountability levels. In addition, the proposed amended position limit regulation would provide discretion to a designated contract market (''DCM'') to apply limits to either a person's net position or a person's position on the same side of the market. The Commission also proposes criteria for setting position limits on an SFP on other than an equity security, generally based on an estimate of deliverable supply.

DATES: Comments must be received on or before October 1, 2018.

ADDRESSES: You may submit comments, identified by RIN 3038–AE61 and ''Position Limits and Position Accountability for Security Futures Products,'' by any of the following methods:

- *CFTC website: http://comments.cftc.gov.* Follow the instructions for submitting comments through the Comments Online process on the website.
- *Mail:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.
- *Hand delivery/courier:* Same as Mail above.

Please submit your comments using only one method.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to *http://www.cftc.gov.* You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures set forth in section 145.9 of the Commission's regulations.[1]

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from *http://www.cftc.gov* that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the rulemaking will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other

[1] All Commission regulations referred to herein are found in chapter I of title 17 of the Code of Federal Regulations. Commission regulations are accessible on the Commission's website, *http://www.cftc.gov.*

applicable laws, and may be accessible under the Freedom of Information Act.

FOR FURTHER INFORMATION CONTACT: Thomas M. Leahy, Jr., Associate Director, Product Review, Division of Market Oversight, 202–418–5278, *TLeahy@cftc.gov;* or Riva Spear Adriance, Senior Special Counsel, Chief Counsel's Office, Division of Market Oversight, 202–418–5494, *radriance@cftc.gov;* Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW, Washington, DC 20581.

SUPPLEMENTARY INFORMATION:

I. Background

A. Overview

On December 21, 2000, the Commodity Futures Modernization Act (''CFMA'') became law and amended the Commodity Exchange Act (''CEA''). The CFMA removed a long-standing ban [2] on trading futures on single securities and narrow-based security indexes [3] in the United States. As amended by the CFMA, in order for a DCM to list SFPs,[4] the SFPs and the securities underlying the SFPs must meet a number of criteria.[5] One of the criteria requires that trading in the SFP is not readily susceptible to manipulation of the price of such SFP, nor to causing or being used in the manipulation of the price of any underlying security, option on such security, or option on a group or index including such securities.[6]

As the Commission noted when it proposed to adopt criteria for trading of SFPs:

> It is important that the listing standards and conditions in the CEA and the [Securities Exchange Act of 1934 (''Exchange Act'')] be easily understood and applied by [DCMs]. The rules proposed today address issues related to these standards and establish uniform requirements related to position limits, as well as provisions to minimize the potential for manipulation and disruption to the futures markets and underlying securities markets.[7]

Among those provisions is current Commission regulation 41.25(a)(3), which requires a DCM that lists SFPs to establish position limits or position accountability standards. The Commission's SFP position limits regulations were set at levels that are generally comparable but not identical to the limits that currently apply to options on individual securities.[8]

Under the existing regulations, a DCM is required to establish for each SFP a position limit, applicable to positions held during the last five trading days of an expiring contract month, of no greater than 13,500 (100-share) contracts, except under specific conditions.[9] If a security underlying an SFP has either (i) an average daily trading volume of at least 20 million shares; or (ii) an average daily trading volume of at least 15 million shares and at least 40 million shares outstanding, then the DCM may establish a position limit for the SFP of no more than 22,500 contracts.[10] A DCM may adopt position accountability for an SFP on a security that has: (i) An average daily trading volume of at least 20 million shares; and (ii) at least 40 million shares outstanding.[11] Under any position accountability regime, upon a request from a DCM, traders holding a position of greater than 22,500 contracts, or such lower threshold as specified by the DCM, must provide information to the exchange regarding the nature of the position.[12] Under position accountability, traders must also consent to halt increases in the size of their positions upon the direction of the DCM.[13] The position limits and position accountability trigger levels specified in the Commission's regulations are based on a contract size of 100 shares in the underlying security. DCMs may use part 150 of the Commission's regulations as guidance when approving exemptions from SFP position limit rules.[14]

B. Differences Between Initially Adopted SFP and Equity Option Position Limit Rules

In response to the 2001 Proposed SFP rules, three commenters noted several differences between the SFP position limit regulations and position limit rules for equity security options listed on national security exchanges or associations (''NSE'') approved by the Securities and Exchange Commission (''SEC''): (1) The specification that position limits for SFPs are on a net, rather than a gross,[15] basis; (2) the numerical limits on SFPs differ from those on security options; and (3) the position limits for SFPs are applicable only during the last five trading days prior to expiration, rather than at any time in the lifespan of a security option contract.[16] Commenters also requested that the Commission coordinate with the SEC so that the SFP position limit regulations are the same as those applicable to security and securities index options, or, alternatively, that such position limit regulations more closely resemble existing limits on security and securities index options.[17] The Commission noted that the provisions in Commission regulation 41.25(a)(3) as finalized were consistent with the Commission's customary approach for all other futures markets,[18] were necessary to effectively oversee the markets, and were consistent with the obligation of a DCM to prevent manipulation of the price of an SFP and its underlying security or securities.[19]

There was one other difference between the position limit rules for SFPs and security options, on which no one commented. Specifically, the volume test adopted by the Commission for position limits on SFPs was based on *average* trading volume over a six-month period while the volume test for security options was based on *total* trading volume over a six-month period. This difference typically results in position limits for SFPs that are more restrictive than those on analogous security options.[20]

---

[2] *See* section 251(a) of the CFMA. This trading previously was prohibited by 7 U.S.C. 2(a)(1)(B)(v).

[3] *See* 7 U.S.C. 1a(35) for the definition of ''narrow-based security index.''

[4] The term ''security futures product'' is defined in section 1a(45) of the CEA and section 3(a)(56) of the Exchange Act to mean a security future or any put, call, straddle, option, or privilege on any security future. The term ''security future'' is defined in section 1a(44) of the CEA and section 3(a)(55)(A) of the Exchange Act to include futures contracts on individual securities and on narrow-based security indexes. The term ''narrow-based security index'' is defined in section 1a(35) of the CEA and section 3(a)(55)(B) of the Exchange Act.

[5] *See* 7 U.S.C. 2(a)(1)(D)(i).

[6] 7 U.S.C. 2(a)(1)(D)(i)(VII).

[7] *See* Listing Standards and Conditions for Trading Security Futures Products, proposed rules, 66 FR 37932, 37933 (July 20, 2001) (''2001 Proposed SFP Rules''). The Commission further noted, ''The speculative position limit level adopted by a [DCM] should be consistent with the obligation in section 2(a)(1)(D)(i)(VII) of the CEA that the [DCM] maintain procedures to prevent manipulation of the price of the [SFP] and the underlying security or securities.'' *Id.* at 37935.

[8] *See* Listing Standards and Conditions for Trading Security Futures Products, 66 FR 55078, 55082 (November 1, 2001) (''2001 Final SFP Rules'').

[9] 17 CFR 41.25(a)(3)(i). The 13,500 limit level is premised on an SFP contract size of 100 shares of an underlying equity security.

[10] 17 CFR 41.25(a)(3)(i)(A).

[11] 17 CFR 41.25(a)(3)(i)(B).

[12] *Id.*

[13] *Id.*

[14] Although part 150 previously provided requirements for exchange-set position limits, it was rendered ''mere guidance'' by the CFMA. *See, e.g.,* 81 FR 96704, 96742 (Dec. 30, 2016); *see also* 74 FR 12178, 12183 (March 23, 2009) (noting ''the part 150 rules essentially constitute guidance for DCMs administering position limits regimes'').

[15] The Commission understands that ''gross'' in this context means on the same side of the market, as discussed *infra.*

[16] 2001 Final SFP Rules at 55081.

[17] *Id.* at 55082.

[18] *See infra* discussion regarding part 150 of the Commission's regulations.

[19] 2001 Final SFP Rules at 55082.

[20] Although DCMs may adopt for certain SFPs position accountability provisions with an accountability level of 22,500 (100-share) SFP contracts, in lieu of position limits, the analogous security option is subject to a position limit likely

C. Subsequent Developments in SFP Position Limit Regulations

Since the 2001 Final SFP Rules, the Commission's SFP position limit regulations have not been substantively amended to account for SFPs on securities other than common stock, although the statute authorizes it. CEA section 2(a)(1)(D)(i) authorizes DCMs to list for trading SFPs based upon common stock and such other equity securities as the Commission and the Securities and Exchange Commission jointly determine appropriate.[21] The CFMA further authorized the Commission and the SEC (collectively ''Commissions'') to allow SFPs to be based on securities other than equity securities.[22] The Commissions used their authority to allow SFPs on Depositary Receipts; [23] Exchange Traded Funds, Trust Issued Receipts and Closed End Funds; [24] and debt securities.[25]

D. Subsequent Equity Security Option Position Limit Increases

Since the Commission's initial adoption of SFP position limits, the SEC has granted approval to increase position limits for equity security options listed on NSEs, but the Commission has not amended its SFP regulations to reflect those changes. For example, under current position limits for equity security options that are uniform across rules of NSEs,[26] position limits are at least 25,000 option contacts.[27] Also, as noted above, NSEs set higher levels based on six-month total trading volume or, alternatively, a combination of six-month total trading volume and shares outstanding, as shown in Table A.[28]

TABLE A—NSE EQUITY SECURITY OPTION POSITION LIMITS

[As of Dec. 6, 2017]

Option contract limit (100 shares/contract)	Six-month total trading volume is at least:	Or, if six-month total trading volume and shares currently outstanding are at least:	
	Trading volume (shares)	Trading volume (shares)	Shares outstanding
25,000	Default	Default	Default.
50,000	20 million	15 million	40 million.
75,000	40 million	30 million	120 million.
200,000	80 million	60 million	240 million.
250,000	100 million	75 million	300 million.

Each equity security option contract limit is applicable on a gross basis to option positions on both sides of the market.[29] The NSEs permit certain exemptions, including for qualified hedging transactions and positions and for facilitation of orders with customers. Generally, limits for options on registered investment companies, organized as open-end management companies, unit investment trusts or similar entities, are the same as the positions limits applicable to equity options.[30]

In addition to position limits under NSE rules, NSEs establish uniform exercise limits for the aggregate exercise of a long position in any option contract within any five consecutive business days, generally at the levels of the applicable position limits.[31] This exercise limit may serve to reduce the potential for manipulation (such as a squeeze on short option position holders) by restricting the number of shares demanded for delivery by a long call option position holder, in a similar manner to a DCM's position limit, under current Commission regulation 41.25(a)(3), thus restricting the number of shares that may be demanded during the last five days of trading.

E. Commission's Position Limit Approach in Other Commodity Futures

The Commission's customary approach for position limits in futures contracts other than SFPs is found in part 150 of the Commission's regulations, which establishes a position limits regime that generally includes three components: (1) The level of the limits, which sets a threshold that restricts the number of speculative positions that a person may hold in the spot-month, individual month, and all months combined; (2) exemptions for positions that constitute bona fide hedging transactions and certain other types of transactions; and (3) rules to determine which accounts and positions a person must aggregate for the purpose of determining compliance with the position limit levels. For exchange-set position limits, on physically-delivered contracts, the spot month limit level should be no greater than one-quarter of the estimated spot month deliverable supply, calculated separately for each month to be listed, and for cash settled contracts, the spot month limit level should be no greater than necessary to minimize the potential for manipulation

to be set at a level of 250,000 (100-share) option contracts, as shown below in Table A.

[24] *See* 67 FR 42760 (June 25, 2002).

[25] *See* 17 CFR 41.21(a)(2)(iii) (providing that the underlying security of an SFP may include a note, bond, debenture, or evidence of indebtedness); *see also* 71 FR 39534 (July 13, 2006) (describing debt securities to include notes, bonds, debentures, or evidences of indebtedness).

[26] *See, e.g.,* the Cboe Exchange, Inc. (''Cboe'') rule 4.11, Nasdaq ISE, LLC (''ISE'') rule 412, NYSE American LLC (''NYSE American'') rule 904, Nasdaq PHLX LLC (''Phlx'') rule 1001.

[27] *See, e.g.,* 73 FR 10076 (February 25, 2008) (granting permanent approval of an increase in position and exercise limits for equity security options).

[28] *Id.* at 10076–77.

[29] For example, Cboe applies limits to an aggregate position in an option contract ''of the put type and call type on the same side of the market.'' Cboe rule 4.11. For this purpose, under the rule, long positions in put options are combined with short positions in call options; and short positions in put options are combined with long position in call options.

[30] NSEs have established position limits higher than shown in Table A for certain security options on products with broad-based holdings of underlying securities; for example, the Cboe position limit in the DIAMONDS Trust option is 300,000 contracts, iShares Russell 2000 Index Fund option is 500,000 contracts, PowerShares QQQ Trust option is 900,000 contracts, and iShares MSCI Emerging Markets Index Fund option is 500,000 contracts. Similarly, BOX Options Exchange, Inc., Cboe, Nasdaq ISE, LLC, Nasdaq PHLX, LLC, NYSE American, LLC, and NYSE Arca, Inc. all recently adopted position limits for security options on the Standard and Poor's Depositary Receipts Trust that are 1,800,000 contracts. *See, e.g.,* 83 FR 28274 (June 18, 2018) (allowing the SPY Pilot Program to terminate and making immediately effective the new limit).

[31] *See, e.g.,* Cboe rule 4.12, ISE rule 414, NYSE American rule 905, and Phlx rule 1001.

or distortion of the contract's or the underlying commodity's price.[32]

II. The Proposal

A. Overview

The Commission notes that SFPs and security options may serve economically equivalent or similar functions.[33] As noted above, when adopted, the Commission's SFP position limits regulations were set at levels that are generally comparable but not identical to the limits that currently apply to options on individual securities. However, over time, while the default level for position limits for SFPs did not change, those of security options on the same security have in some cases changed, allowing the position limit for the security option, as observed above, to be set at a much higher default level. This may place SFPs at a competitive disadvantage. One goal of this proposal, therefore, is to provide a level regulatory playing field.[34]

When determining appropriate limit levels, the Commission took note of the experience of NSEs over several years with higher position limit levels on security options, with no apparent significant issues, suggesting, therefore, that it may be reasonable for SFP position limits to closely resemble existing contract limits for equity options at NSEs. To allow DCMs to adapt as NSE position limits change, the current draft would be flexible, providing a formula for a DCM to set a higher level, rather than the specific levels in a current rule of an NSE.

However, as has been noted, some aspects of the position limits regime under current Commission regulation 41.25 differ from those on security options as the Commission determined certain approaches were necessary to effectively oversee the markets, and consistent with the obligation of a DCM to prevent manipulation of the price of an SFP and its underlying security or securities.[35] In light of its experience since the first adoption of a position limits regime for SFPs in 2001, the Commission believes in the merit of updating Commission regulation 41.25 under an incremental approach, for example, by providing DCMs with discretion to increase limits, generally consistent with those currently permitted for equity options listed by an NSE, while allowing the Commission to assess the impact on SFP markets.

The Commission proposes to maintain the requirement in current Commission regulation 41.25(a)(3) that DCMs establish position limits or, in certain cases, accountability standards for SFPs. The proposal would increase the default level for speculative position limits in SFPs in equity securities to 25,000 100-share contracts (or the equivalent if the contract size is different than 100 shares per contract) from 13,500 100-share contracts. The proposal would change the criterion that DCMs use to set higher levels of speculative position limits to no more than 12.5 percent of the estimated deliverable supply [36] of the relevant underlying security, from no greater than 22,500 100-share contracts if certain criteria are met in current Commission regulation 41.25(a)(3)(i).[37] The proposed 12.5 percent criterion is discussed further below. In this regard, the Commission believes that exchange-set position limits for SFPs based on estimated deliverable supply would provide flexibility to DCMs while ensuring that position limits appropriately reflect current market conditions for the specific securities that underlie their SFPs.

The Commission also proposes to amend the position accountability provisions so that a DCM could substitute position accountability for position limits when six-month total trading volume in the underlying security exceeds 2.5 billion shares and there are more than 40 million shares of estimated deliverable supply, rather than the current criteria of six-month average daily trading volume in the underlying security exceeds 20 million shares and there are more than 40 million outstanding shares. In addition, the maximum accountability level under the position accountability regime would be increased to 25,000 contracts, from the current level of 22,500 contracts.

This proposal also addresses SFPs based on products other than a single equity security. As discussed below, these products are a physically-delivered basket equity SFP, a cash-settled equity index SFP, and an SFP on one or more debt securities.[38]

The Commission proposes to maintain the provision that requires position limits to be applied during a period of time of no shorter than the last five trading days in an expiring contract month. However, the proposed regulation would require a longer period than five trading days in the event the terms of an SFP provide for delivery prior to the last five trading days.

The Commission proposes that a DCM should have discretion to apply position limits or position accountability levels either on a net basis, as under current regulations, or on the same side of the market.[39] If a DCM imposes limits on the same side of the market, then the DCM could not net positions in SFPs in the same security on opposite sides of the market.

This proposal permits DCMs to approve exemptions to limits, provided such exemptions are consistent with the guidance in current Commission regulation 150.5, which addresses exchange-set position limits, rather than consistent with current Commission regulation 150.3, which addresses exemptions to Commission-set position limits. In addition, the proposal permits DCMs to approve exemptions consistent with those of an NSE.

Under this proposal, DCMs would be required to calculate estimated deliverable supply and six-month total trading volume no less frequently than semi-annually, rather than the monthly requirement under the current regulations. The proposal requires that a DCM lower the position limit levels if the estimated deliverable supply

[32] *See* 17 CFR 150.5(b)(1); *see also supra* note 14.

[33] For example, the price of a long call option with a strike price well below the prevailing market price of the underlying security is expected to move almost in lock step with the price of a long SFP on the same underlying security. Similarly, the price of a long put option with a strike price well above the prevailing market price of the underlying security is expected to move almost in lock step with the price of a short SFP on the same underlying security.

[34] As the Commission notes above, commenters also requested that the SFP position limit regulations be the same as those applicable to security and securities index options, or, alternatively, that such position limit regulations more closely resemble existing limits on security and securities index options. *See supra* note 17 and accompanying text.

[35] *See* 2001 Final SFP Rules at 55082. The approach NSEs may use to set an equity option's position limit is not consistent with existing Commission policy and may, in the Commission's opinion, as noted previously, render position limits ineffective.

[36] *See infra* regarding proposed guidance on estimated deliverable supply.

[37] The current criteria for a level higher than 13,500 100-share contracts are six-month average daily trading volume in the underlying security exceeds 20 million shares, or exceeds 15 million shares and there are more than 40 million shares of the underlying security outstanding.

[38] The SFP definition permits the listing of SFPs on debt securities (other than exempted securities). *See supra* note 22 and accompanying text. While an SFP may not be listed on a debt security that is an exempted security, futures contracts may be listed on an exempted security. *See infra* note 69 and accompanying text.

[39] The Commission notes that, although it has not proposed an aggregation rule that would define ''person'' for purposes of SFP position limits, current 17 CFR 150.5(g) provides guidance to DCMs in setting aggregation standards for exchange-set position limits. The Commission believes a DCM should have reasonable discretion to set aggregate standards based on a person's control or ownership of SFP positions, including in the same manner as that of an NSE for equity security options.

justifies lower position limits. Similarly, the proposal requires that a DCM adopt position limits if the estimated deliverable supply or six-month total trading volume no longer supports position accountability provisions.

Finally, as discussed further below, these proposed regulations provide the definitions for ''estimated deliverable supply and ''same side of the market'', terms used in Commission regulation 41.25, by adding those definitions into a new paragraph (a).[40]

B. Section-by-Section Discussion

1. Commission Regulation 41.25(a), Definitions

The proposal includes two definitions used in Commission regulation 41.25: Estimated deliverable supply; and same side of the market. These definitions are included in new paragraph (a).

Estimated deliverable supply is defined under the proposal as the quantity of the security underlying a security futures product that reasonably can be expected to be readily available to short traders and salable by long traders at its market value in normal cash marketing channels during the specified delivery period. The proposal provides guidance for estimating deliverable supply in proposed appendix A to subpart C of part 41, as discussed below.

The proposal defines same side of the market to mean long positions in physically-delivered security futures contracts and cash settled security futures contracts, in the same security, and, separately, short positions in physically-delivered security futures contracts and cash settled security futures contracts, in the same security. The Commission invites comment on whether it should also include options on security futures contracts in this definition, although options on SFPs are not currently permitted to be listed.[41] Generally, a long call and a short put, on a futures equivalent basis, would be aggregated with a long futures contract; and a short call and a long put, on a futures equivalent basis, would be aggregated with a short futures contract.

2. Commission Regulation 41.25(b)(3), Position Limits or Accountability Rules Required

As with current Commission regulation 41.25(a)(3), under this proposal, the paragraph, as re-designated regulation 41.25(b)(3), would continue to require a DCM to establish position limits or position accountability rules in each SFP for the expiring futures contract month.

3. Commission Regulation 41.25(b)(3)(i), Limits for Equity SFPs

Proposed changes to regulation 41.25(a)(3)(i), re-designated as regulation 41.25(b)(3)(i), would increase the default level of position limits in an equity SPF to no greater than 25,000 100-share contracts (or the equivalent if the contract size is different than 100 shares per contract), either net or on the same side of the market, from the existing regulation's default level of no greater than 13,500 100-share contracts on a net basis. The default level of 25,000 100-share contracts is equal to 2,500,000 shares. The Commission notes that 12.5 percent of 20 million shares equals 2,500,000 shares. Thus, for an equity security with less than 20 million shares of estimated deliverable supply, the default position limit level for the equity SFP would be larger than 12.5 percent of estimated deliverable supply. While a DCM could adopt the default position limit for SFPs in equity securities with fewer than 20 million shares, consistent with a position limit applicable to an option on that security, the Commission would expect a DCM to assess the liquidity of trading in the underlying security to determine whether the DCM should set a lower position limit level, as appropriate to ensure compliance with DCM Core Principles 3 and 5. In this regard, the Commission seeks comment on whether it should provide greater specificity with respect to this liquidity assessment and whether there are circumstances where the position limit level should be set lower than 25,000 100-share contracts (for example, no greater than 12.5 percent of estimated deliverable supply).[42]

The Commission notes that minimum position limits for equity security option positions on NSEs are 25,000 100-share option contracts on the same side of the market. Thus, the proposal would allow a DCM to coordinate the default position limit level for SFPs to that of an equity option traded on a NSE. Accordingly, as previously requested by commenters in the context of the CFTC's adoption of its current SFP position limit requirements, this proposed default level for SFP limits would closely resemble existing minimum limit levels on security options.

As noted above, SFPs and security options may serve economically equivalent or similar functions.[43] However, under current Commission regulation 41.25(a)(3), as previously detailed, the default level for position limits for SFPs must be set no greater than 13,500 (100-share) contracts, while security options on the same security may be, and currently are, set at a much higher default level of 25,000 contracts,[44] which may place SFPs at a competitive disadvantage. Closer coordination of limit levels is intended to provide a level regulatory playing field.

However, because limit levels would not apply to a market participant's combined position between SFPs and security options, the Commission is not proposing a default limit level for an SFP higher than 12.5 percent of estimated deliverable supply. That is, under the proposal, a market participant with positions at the limits in each of an SFP and a security option on the same underlying security might be equivalent to about 25 percent of estimated deliverable supply, which is at the outer bound of where the Commission has historically permitted spot month limit levels. The Commission invites comment on whether this proposed default level is appropriate.

The proposal would include, in the requirements for limits for equity SFPs, securities such as exchange trading funds (''ETFs'') and other securities that represent ownership in a group of underlying securities. The Commission requests comment on whether this is appropriate and invites further comment, below, in the discussion of estimated deliverable supply.

This proposal would provide discretion to a DCM to apply position limits on a gross basis (''on the same side of the market'') or net basis, rather than the current regulation's net basis.

[40] In connection with adding the definitions into a new paragraph (a), paragraphs (a) through (d) would be re-designated as paragraphs (b) through (e).

[41] Under CEA section 2(a)(1)(D)(iii)(II), the CFTC and SEC may, by Order, jointly determine to permit the listing of options on SFPs; that authority has not been exercised.

[42] Core Principle 3, 7 U.S.C. 7(d)(3), provides that DCMs shall list only contracts that are not readily susceptible to manipulation, while Core Principle 5, 7 U.S.C. 7(d)(5), provides for the adoption of position limits and position accountability, as is necessary and appropriate, to deter the threat of manipulation. Moreover, 7 U.S.C. 2(a)(1)(D)(i)(VII) and 17 CFR 41.22(f) require that trading in an SFP: (i) Be not readily susceptible to manipulation of the SFP; or (ii) cause the manipulation of any underlying security, an option on such security, or an option on a group or index including such security or securities.

[43] For example, the price of a long call option with a strike price well below the prevailing market price of the underlying security is expected to move almost in lock step with the price of a long SFP on the same underlying security. Similarly, the price of a long put option with a strike price well above the prevailing market price of the underlying security is expected to move almost in lock step with the price of a short SFP on the same underlying security.

[44] *See* current Cboe rule 4.11.

For example, if there were a physically-delivered SFP on equity XYZ, a dividend-adjusted SFP on equity XYZ, and a cash-settled SFP on equity XYZ, then a DCM's rules could provide that long positions held by the same person across each of these classes of SFP based on equity XYZ would be aggregated for the purpose of determining compliance with the position limit. A gross position in a futures contract is larger than a net position in the event a person holds positions on opposite sides of the market. That is, a net basis is computed by subtracting a person's short futures position from that person's long futures positions, and, under current regulations, a single position limit applies on a net basis to that net long or net short position. Under the proposal, at the discretion of a DCM, a person's long futures position would be subject to the position limit and, separately, a person's short futures position also would be subject to the position limit. As previously requested by commenters, adding this proposed gross basis approach (in addition to net basis) to SFP limits would more closely resemble existing limits on security options that apply on the same side of the market per the rules of the NSEs. A DCM that elects to implement limits on a gross basis would be providing its market participants with the same metric for position limit compliance as is currently the case on NSEs, which may reduce compliance costs and encourage cross-market participation. However, limits on a gross basis may be more restrictive than limits on a net basis, which could reduce the position sizes that may be held, without an applicable exemption.

In addition, the Commission would continue to permit DCMs to apply limits on a net basis at the DCM's discretion. In this regard, the Commission believes it is possible for a DCM's application of limits to further the goals of the CEA whether applied on a net or a gross basis.[45] This would be true, for example, if a DCM applied limits on a net basis and did not permit netting of physically-delivered contracts with cash settled contracts. But if, instead, the DCM permitted netting of physically-delivered contracts and cash settled contracts in the same security, it would render position limits ineffective.[46] For example, a person should not be permitted to avoid limits by obtaining a large long position in a physically-delivered contract (which could be used to corner or squeeze) and a similarly large short position in a cash settled contract that would net to zero.

4. Commission Regulation 41.25(b)(3)(i)(A), Higher Position Limits in Equity SFPs[47]

For an SFP based on an underlying security with an estimated deliverable supply of more than 20 million shares, the proposal would permit a DCM to set a higher limit level based on 12.5 percent of the estimated deliverable supply of the underlying security, if appropriate in light of the liquidity of trading in the underlying security. By way of example, if the estimated deliverable supply were 40 million shares, then the proposed regulation would permit a DCM to set a limit level of no greater than 50,000 100-share contracts; computed as 40 million shares times 12.5 percent divided by 100 shares per contract.

This level of 50,000 100-share contracts is the same as permitted under current rules of NSEs for an underlying security with 40 million shares outstanding, although an NSE would also require the most recent six-month trading volume of the underlying security to have totaled at least 15 million shares. While this proposed provision for SFP position limits would more closely resemble existing limits on security options, the Commission is proposing to permit a DCM to use its discretion in assessing the liquidity of trading in the underlying security, rather than imposing a prescriptive trading volume requirement.[48] The Commission preliminarily does not believe that trading volume alone is an appropriate indicator of liquidity.[49] In this regard, the proposed regulation would permit a DCM to set a position limit at a level lower than 12.5 percent of estimated deliverable supply. The Commission invites comment on whether it is appropriate to provide a DCM with discretion in its assessment of liquidity in the underlying security, rather than the Commission imposing a liquidity requirement. Core Principle 5 requires DCMs to adopt, as is necessary and appropriate, position limits to deter the adverse market impact of manipulation. The Commission invites comment on whether estimated deliverable supply alone serves as an adequate proxy for market impact.

Although the Commission is proposing a criterion of 12.5 percent of estimated deliverable supply, the Commission expects a DCM to conduct a reasoned analysis as to whether setting a level for a limit based on such criterion is appropriate. In this regard, for example, assume security QRS and security XYZ have equal free float of shares. Assume, however, that trading in QRS is not as liquid as trading in XYZ. Under these assumptions, it may be appropriate for a DCM to adopt a position limit for XYZ equivalent to 12.5 percent of deliverable supply, but to adopt a lower limit for QRS because a lesser number of shares would be readily available for shorts to make delivery.

The Commission notes that the proposed criterion of 12.5 percent of estimated deliverable supply is half the level for DCM-set spot month speculative position limits in current Commission regulation 150.5(c),[50] which, as previously noted, has been rendered ''mere guidance'' since the CFMA.[51] That regulation provides that, for physically-delivered contracts, the spot month limit level should be no greater than one-quarter of the estimated spot month deliverable supply.[52] The Commission is proposing a lower percent of estimated deliverable supply in light of current limits on equity security options listed at NSEs. In this regard, the proposal would result in SFP position limits that closely resemble the existing 25,000 and 50,000 contract

---

[45] CEA section 2(a)(1)(D)(i)(VII) requires that trading in SFPs is not readily susceptible to manipulation of the price of the SFP, the SFP's underlying security, or an option on the SFP's underlying security.

[46] Although no DCM currently lists both physically-delivered SFPs contracts and cash-settled SFP contracts for the same underlying security, and this concern may be theoretical, the Commission believes that providing clarity reduces uncertainty regarding netting in such circumstances, which may facilitate listing of such contracts in the future. Therefore, the Commission proposes to provide in 17 CFR 41.25(b)(3)(vii) that, for a DCM applying limits on a net basis, netting of physically-delivered contracts and cash settled-contracts in the same security is not permitted as it would render position limits ineffective. This concern is not applicable to a DCM applying limits on the same side of the market, as limits are applied separately to long positions and to short positions.

[47] As noted above, the proposal would re-designate 17 CFR 41.25(a)(3)(i)(A) as 17 CFR 41.25(b)(3)(i)(A).

[48] Generally, under CEA section 5(d)(1)(B), unless otherwise restricted by a Commission regulation, a DCM has reasonable discretion in establishing the manner in which it complies with core principles, including Core Principle 5 regarding position limits or position accountability. *See* 7 U.S.C. 7(d)(1) and (5).

[49] Under current 17 CFR 41.25(a)(3)(i)(A), for example, a DCM may adopt a net position limit no greater than 22,500 shares, provided the six-month average daily trading volume exceeds 15 million shares and there are more than 40 million shares of the security outstanding. The Commission notes that almost all stocks with at least 40 million shares outstanding also had a six-month average trading volume of at least 15 million shares. Thus, the current trading volume criterion generally is not a meaningful restriction.

[50] 17 CFR 150.5(c).

[51] *See supra* discussion of the impact of the CFMA on part 150; *see also* 74 FR 12177 at 12183 (March 23, 2009).

[52] 17 CFR 150.5(c)(1).

limits for equity options at NSEs, set when certain trading volume has been reached or a combination of trading volume and shares currently outstanding, as shown in Table A above. For example, a position at a 50,000 (100-share) option contract limit is equivalent to 5 million shares. 12.5 percent of 40 million shares equals 5 million shares; that is, the proposed criterion for a DCM to set a limit would be similar to that of the criteria for an NSE to set such a limit. Under this proposal, a similar 50,000 contract position limit on an SFP on such a security would be an increase from the 22,500 contract limit currently permitted for such an SFP. The Commission believes the proposed incremental approach to increasing SFP limits is a measured response to changes in the SFP markets, while retaining consistency with the existing requirements for equity security options listed by NSEs.

However, as noted above, SFPs and equity security options in the same underlying security are not subject to a combined position limit across DCMs and NSEs. Accordingly, the Commission is proposing a maximum SFP limit level that is half the guidance level for DCM-set spot month futures contract limits of 25 percent of estimated deliverable supply.

Further, as shown in Table A above, the Commission notes that limits for equity security options at NSEs do not increase in a linear manner for all increases in shares outstanding; for example, upon a doubling of shares outstanding, the 100-share equity security option contract limit increases only to 75,000 contracts from 50,000 contracts, while, under similar circumstances of a doubling of estimated deliverable supply, the Commission proposes to permit a linear increase for a SFP limit to 100,000 contracts from 50,000 contracts. The Commission invites comments as to whether the proposed linear approach based on estimated deliverable supply is appropriate.

Alternative Criteria for Setting Levels of Limits. As an alternative to the proposed criteria for setting position limit levels based on estimated deliverable supply, the Commission invites comments on whether the Commission should permit a DCM to mirror the position limit level set by an NSE in a security option with the same underlying security or securities as that of the DCM's SFP. This alternative has the advantage of consistency in position limits across exchange-traded derivatives based on the same security.

However, the Commission notes that NSEs may set an equity option's position limit by the use of trading volume as a sole criterion. That approach is not consistent with existing Commission policy regarding use of estimated deliverable supply to support position limits in an expiring contract month, as stated in part 150 of the Commission's regulations.[53] The Commission notes that use of trading volume as a sole criterion for setting the level of a position limit could result in a position limit that exceeds the number of outstanding shares when the underlying security exhibits a very high degree of turnover. Such a resulting high limit level would render position limits ineffective.

5. Commission Regulation 41.25(b)(3)(i)(B), Position Accountability in Lieu of Limits [54]

This proposal would continue to permit a DCM to substitute position accountability for a position limit in an equity SFP that meets two criteria. The proposal would require six-month total trading volume of at least 2.5 billion shares, which generally is equivalent to the current first criterion that six-month average daily trading volume in the underlying security must exceed 20 million shares.[55] The proposal would tighten the second criterion. Rather than require that the underlying security have more than 40 million shares outstanding, under the proposal the second criterion would require the underlying security to have more than 40 million shares of estimated deliverable supply, which generally would be smaller than shares outstanding. This change conforms to the proposed use of estimated deliverable supply in setting a position limit. The Commission believes an appropriate refinement to its criterion for position accountability is to quantify those equity shares that are readily available in the market, rather than all shares outstanding. Generally, a short position holder may expect to obtain at or close to fair value shares that are readily available in the market and a long position holder may expect to sell such shares at or close to fair value. However, in contrast, shares that are issued and outstanding by a corporation may not be readily available in a timely manner, such as shares held by the corporation as treasury stock.[56] Therefore, to ensure that position holders will generally be able to obtain equity shares at or close to fair value, the DCM should consider whether the shares are readily available in the market when estimating deliverable supply.

In addition, the proposal would amend the accountability level to no greater than 25,000 contracts, either net or on the same side of the market, from 22,500 contracts net, conforming to the proposed default position limit level. The Commission notes a DCM would be able to set a lower accountability level, should it desire. The Commission preliminarily believes it is appropriate to set a position accountability level no higher than 25,000 contracts because the Commission believes a DCM should have the authority, but not the obligation, to inquire with very large position holders and to order such position holders not to increase positions.[57] The Commission preliminarily believes a maximum position accountability level of 25,000 contracts is at the outer bounds for purposes of providing a DCM with authority to obtain information from position holders; for example, a position of 25,000 100-share contracts has a notional size of $125 million when the price of the underlying stock is $50 per share.

6. Commission Regulation 41.25(b)(3)(ii), Limits for Physically-Delivered Basket Equity SFPs

This proposal would amend the existing position limits and position accountability provisions for a physically-delivered SFP comprised of more than one equity security [58] by

[53] For example, Cboe rules also permit a 50,000 contract position limit based on the total most recent six-month trading volume of 20 million shares, without regard to shares outstanding.

[54] As noted above, the proposal would re-designate 17 CFR 41.25(a)(3)(i)(B) as 17 CFR 41.25(b)(3)(i)(B).

[55] 20 million shares times 125 trading days in a typical six-month period equals 2.5 billion shares. In regards to total trading volume rather than average daily trading volume, the Commission notes that use of total trading volume is consistent with the rules of NSEs, which use six-month total trading volume in their criteria for setting position limits, as shown in Table A above.

[56] Treasury stock means any shares that a company holds itself. Such treasury stock may be authorized by the corporate charter but not yet issued to the public or, in contrast, may have been previously issued to the public but was the subject of a stock repurchase program to buy back the shares from the public.

[57] By way of comparison, under 17 CFR 15.03, the Commission's reporting level for large traders (''reportable position'') is 1,000 contracts for individual equity SFPs and 200 contracts for narrow-based SFPs. Under 17 CFR 18.05, the Commission may request any pertinent information concerning such a reportable position.

[58] The Commission notes that there is not a limit *per se* on the maximum number of securities in a narrow-based security index. Rather, under CEA section 1a(35), a narrow-based security index generally means, among other criteria, an index that

Continued

basing the criteria on the underlying equity security with the lowest estimated deliverable supply, rather than the lowest average daily trading volume.[59] Specifically, under the proposal, for an SFP on more than one security, the criteria in proposed regulations 41.25(b)(3)(i)(A) and (B)[60] would apply to the underlying security with the lowest estimated deliverable supply in the basket, with an appropriate adjustment to the level of the position limit or accountability level for a contract size different than 100 shares per underlying security.

The proposal is based on the premise that the limit on a physically-delivered basket equity SFP should be consistent with the most restrictive of each limit that would be applicable to SFPs based on each component of such basket of deliverable securities. This would restrict a person from obtaining a larger exposure to a particular security through a physically-delivered basket equity SFP, than could be obtained directly in a single equity SFP. However, this proposal would not aggregate positions in single equity SFPs with positions in basket deliverable SFPs.

7. Commission Regulation 41.25(b)(3)(iii), Limits for Cash-Settled Equity Index SFPs

For setting levels of limits on an SFP comprised of more than one security, current Commission regulation 41.25(a)(3)(ii) specifies certain criteria for trading volume and shares outstanding that must be applied to the security in the index with the lowest average daily trading volume. However, the Commission is not proposing to retain those criteria for setting levels of limits for cash-settled equity index SFPs for a number of reasons. For an equity index that is price weighted, it appears that use of shares outstanding or trading volume may result in an inappropriately restrictive level for a position limit.[61] For an equity index that is value weighted, it also appears that such use may result in an inappropriately restrictive level for a position limit.[62] The Commission observes that while trading volume, as an indicator of liquidity, may be an appropriate factor for a DCM to consider in setting position limits, trading volume is not generally used in construction of equity indexes.

Proposed appendix A to subpart C provides guidance and acceptable practices for setting the limit level for a cash-settled equity index SFP, discussed below. However, as noted above, the proposal would continue to require a DCM, for cash-settled equity index SFPs, to establish position limits or position accountability rules in each SFP for the expiring futures contract month in the last five trading days of an expiring contract month. As also discussed above, the proposal provides discretion to a DCM to set such a limit either net or on the same side of the market.

8. Commission Regulation 41.25(b)(3)(iv), Limits for Debt SFPs[63]

As previously detailed, for setting levels of limits on an SFP comprised of more than one security, current Commission regulation 41.25(a)(3)(ii) specifies certain criteria for trading volume and shares outstanding that must be applied to the security in the index with the lowest average daily trading volume. However, the Commission is not proposing to retain those criteria for setting levels of limits for debt SFPs because debt securities generally are neither issued in terms of shares nor trading volume measured in terms of shares.

Proposed appendix A to subpart C provides guidance and acceptable practices for setting the limit level for a debt SFP, discussed below. This proposal would require a DCM to set a position limit on a debt SFP, either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month, as is the case for equity SFPs under the proposal.

9. Commission Regulation 41.25(b)(3)(v), Required Minimum Position Limit Time Period

Although DCMs do not currently list SFPs where the product permits delivery before the close of trading, the Commission proposes that, for such a product, the DCM would be required to apply position limits beginning no later than the first day that long position holders may be assigned delivery notices, if such period is longer than the last five trading days of an expiring contract month. The Commission notes that the current DCM practice for other commodity futures contracts is to apply spot month position limits at the close of business before delivery notices are assigned to holders of long positions in futures contracts that provide for physical delivery prior to the close of trading. Further, this provision is analogous to provisions of NSEs that apply exercise limits for any five consecutive business days, applicable to American exercise style equity options.[64]

10. Commission Regulation 41.25(b)(3)(vi), Requirements for Re-Setting Levels of Position Limits[65]

This proposal would require a DCM to consider, on at least a semi-annual basis, whether position limits were set at appropriate levels, through consideration of estimated deliverable supply. In the event that estimated deliverable supply has decreased, then a DCM would be required to lower the level of a position limit in light of that decreased deliverable supply. In the event that estimated deliverable supply has increased, then a DCM would have discretion to increase the level of a position limit. In addition, a DCM that has substituted a position accountability rule for a position limit would be required to consider whether estimated deliverable supply and total six-month

---

has 9 or fewer component securities; in which a component security comprises more than 30 percent of the index's weighting; in which the five highest weighted component securities in the aggregate comprise more than 60 percent of the index's weight; or in which the lowest weighted component securities, comprising the lowest 25 percent of the index's weight, have an aggregate dollar value of average daily trading volume of less than $50 million.

[59] This means that, under proposed 17 CFR 41.25(b)(3)(i), the default level position limit would be no greater than 25,000 100-share contracts, unless the underlying equity security with the lowest estimated deliverable supply supports a higher level.

[60] As noted above, as proposed, 17 CFR 41.25(a)(3)(i)(A) and (B) would be re-designated as 17 CFR 41.25(b)(3)(i)(A) and (B).

[61] For example, assume the level of a simple price-weighted index is computed by adding the price of each equity security in the index and dividing by the number of different equity securities. For such a simple index, a given percentage change in the price of a company with a higher share price would have a greater impact on the index than a given percentage change in the price of a company with a lower share price. In such a circumstance, the Commission preliminarily believes the DCM should have discretion, in setting the position limit, to give consideration to the equity (or equities) with the greater weight(s) in the index, rather than only with regard to the equity with the lowest number of shares outstanding.

[62] For example, the level of a value-weighted index will change in relation to the change in the market capitalization of each component equity security. In such a circumstance, a given percentage change in the market value of a higher capitalized company would have a greater impact on the index than a given percentage change in the market value of a lower capitalized company. In such a circumstance, the Commission preliminarily believes the DCM should have discretion, in setting the position limit, to give consideration to the equity (or equities) with the greater weight(s) in the index, rather than only with regard to the equity with the lowest number of shares outstanding.

[63] As noted above, as proposed, 17 CFR 41.25(a)(3) would be re-designated as 17 CFR 41.25(b)(3).

[64] American exercise style refers to the right of an option holder to exercise the option at any time prior to, and including, expiration. In contrast, a European exercise style option only can be exercised at expiration.

[65] The proposal would re-designate 17 CFR 41.25(a)(3)(iv) to 17 CFR 41.25(b)(3)(vi).

trading volume continue to justify that position accountability rule.

Current provisions require a DCM to calculate trading volume monthly. The Commission believes that review of position limit levels and position accountability rules on at least a semi-annual basis rather than a monthly basis generally should be adequate to ensure appropriate levels because deliverable supply generally does not change to a great degree from month to month. For example, the number of shares outstanding may increase through periodic issuance of additional shares, and may decrease through stock repurchase programs, but, as a general observation, such issuance or repurchases are not a large percentage of free float. Of course, there could be situations where deliverable supply changes to a great degree before the semi-annual period and the rule does not prevent a DCM from considering those changes before such period.

The Commission also proposes a technical change to the filing requirement whenever a DCM makes such changes to limit levels. While the proposal continues to provide that changes to limit levels be filed pursuant to the requirements of Commission regulation 41.24, it removes the superfluous provision in the current regulation that provides that the change be effective no earlier than the day after the DCM has provided notification to the Commission and to the public. Instead, the regulation simply cites to Commission regulation 41.24, which specifies that changes must be received by the Commission no later than the day prior to the implementation.

11. Appendix A to Subpart C of Part 41, Guidance and Acceptable Practices for Position Limits and Position Accountability for SFPs

Section (a), Guidance on Estimating Deliverable Supply. The proposal provides guidance for estimating deliverable supply. For an equity security, deliverable supply should be no greater than the free float of the security. For a debt security, deliverable supply should not include securities that are committed for long-term agreements (*e.g.,* closed-end investment companies, structured products, or similar securities).

Regarding the guidance for estimating deliverable supply for equity securities, free float of the security generally means issued and outstanding shares less restricted shares. Restricted shares include restricted and control securities, which are not registered with the SEC to sell in a public marketplace.[66] The Commission requests comment on whether there are any other adjustments that should be made in estimating deliverable supply for equities. For example, should the guidance exclude from deliverable supply any equity shares held by ETFs, mutual funds, or similar investment vehicles? If so, how would such counts of shares be determined or estimated?

Also regarding the guidance for estimating deliverable supply for equity securities, the Commission notes that authorized participants may increase the number of outstanding shares in an ETF.[67] In setting a position limit for an ETF, the Commission has not proposed that DCMs look through the ETF to the lowest deliverable supply in an underlying security, as is the case in the proposal for limits for physically-delivered basket equity SFPs. Rather, the Commission has proposed to restrict the estimate of deliverable supply in an ETF to existing shares of the ETF. As an alternative, the Commission requests comment on whether an estimate of deliverable supply for an ETF should include an allowance for the creation of ETF shares. If so, how would one estimate such an allowance?

Section (b), Guidance on Setting Limits on Cash-Settled Equity Index SFPs. As noted above, the Commission is proposing guidance for setting limits on cash-settled equity index SFPs. This proposed guidance would permit a DCM to set the limit level for a cash-settled SFP on a narrow-based security index of equity securities to that of a similar narrow-based security index equity option listed on an NSE. As an alternative for setting the level based on that of a similar equity option, the proposal provides guidance and acceptable practices that would allow a DCM, in setting a limit, to consider the deliverable supply of securities underlying the equity index, and the equity index weighting and SFP contract multiplier.

As an example of an acceptable practice, for a cash-settled equity index SFP on a security index weighted by the number of shares outstanding, a DCM could set a position limit as follows: First, compute the limit on an SFP on each underlying security under proposed regulation (b)(3)(i)(A) (currently designated as (a)(3)(i)(A)); second, multiply each such limit by the ratio of the 100-share contract size and the shares of the security in the index; and third, determine the minimum level from step two and set the limit to that level, given a contract size of one dollar times the index, or for a larger contract size, reduce the level proportionately. As the Commission is proposing for physically-delivered basket equity SFPs, the proposal is based on the premise that the limit on a cash-settled SFP on a narrow-based security index of equity securities should be as restrictive as the limit for an SFP based on the underlying security with the most restrictive limit.

Section (c), Guidance on Setting Limits on Debt SFPs. The proposal would provide guidance that an appropriate level for limits on debt SFPs generally would be no greater than the equivalent of 12.5 percent of the par value of the estimated deliverable supply of the underlying debt security. The Commission notes that this approach is guidance because there may be other reasonable bases for setting levels of debt SFPs position limits and the Commission does not want to foreclose those bases. For example, a coupon stripped from an interest bearing corporate bond does not have a par value in terms of such corporate bond, but instead such coupon is the amount of interest due at the time the corporate issuer is scheduled to pay such coupon under the corporate bond indenture.[68]

Although no DCM currently lists an SFP based on a debt security, the Commission believes a framework for position limits may reduce uncertainty regarding acceptable practices for listing such contracts on non-exempted securities and, thereby, may facilitate listing of such contracts. The Commission notes that futures contracts in exempted securities, such as U.S. Treasury notes, have been listed for many years.[69] The Commission is proposing 12.5 percent of the par value of the estimated deliverable supply of the underlying debt security as guidance

[66] For a general discussion of restricted and control securities, *see https://www.sec.gov/reportspubs/investor-publications/investorpubsrule144htm.html.*

[67] An authorized participant generally is an institutional investor, such as a broker dealer, who acts to create or redeem ETF shares. The authorized participant buys shares that underlie the ETF and exchanges those underlying shares with the ETF sponsor for shares in the ETF, thus creating new ETF shares that it may sell to the public. An authorized participant may also purchase ETF shares in the market place and redeem those shares with the ETF sponsor, thus reducing the number of ETF shares outstanding.

[68] An interest bearing bond may be structured in a conduit and divided into separate obligations, where the cash flow from the principal of the bond and the cash flow from each coupon may be sold as separate securities. Each such separate security is a zero-coupon security.

[69] In this regard, an exempted security refers to certain exempted securities under the Securities Act of 1933 or the Securities Exchange Act of 1934. *See* CEA section 2(a)(1)(C).

on an appropriate basis based on the existing levels of limits for equity option contracts on NSEs. The Commission invites comment on whether a level based on par value is appropriate, or whether some other metric would be appropriate.

Section (d), Guidance on Position Accountability. The Commission proposes, as guidance, that a DCM may adopt a position accountability rule for any SFP, including an SFP where a position limit is required or adopted. Under the proposal, a position accountability rule would provide, at a minimum, that the DCM have authority to obtain information from a market participant with a position at or above the accountability level and that the DCM have authority, in its discretion, to order such a market participant to halt increasing their position. The Commission notes that position accountability can work in tandem with a position limit rule, particularly where the accountability level is set at a low level, in comparison to the level of the position limit. Further, the Commission notes that a DCM may adopt a position accountability rule to provide authority to the DCM to order market participants to reduce position sizes, for example, to maintain orderly trading or to ensure an orderly delivery.

Section (e), Guidance for Exemptions.[70] The proposed regulation would continue to provide a DCM with discretion to grant exemptions to position limits. The proposal provides guidance that such exemptions may be consistent with current Commission regulation 150.5 regarding exchange-set position limits or consistent with rules of an NSE regarding securities option exemptions. This guidance differs from the provisions of the current regulation, which references Commission regulation 150.3 regarding federal position limits in certain physical commodity futures contracts. The Commission believes the guidance should reference exemption provisions applicable to exchange-set limits in Commission regulation 150.5, rather than federal limits, because the exemptions for federal limits are written largely in terms of the federal limits on physical commodity contracts in Commission regulation 150.2.

[70] In addition to re-designating 17 CFR 41.25(a)(3) as 17 CFR 41.25(b)(3), the proposal would re-designate current 17 CFR 41.25(a)(3)(iii) to appendix A to subpart C.

III. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (''RFA'')[71] requires that federal agencies consider whether a proposed rule will have a significant economic impact on a substantial number of small entities and, if so, provide a regulatory flexibility analysis of the impact. The proposed amendments generally apply to exchange-set position limits. The proposed amendments would permit a DCM to increase the level of position limits for SFPs and may change the application of those limits from a trader's net position to a trader's gross position. The proposed amendments would affect DCMs. The Commission has previously established certain definitions of ''small entities'' to be used in evaluating the impact of its rules on small entities in accordance with the RFA, and has previously determined that DCMs are not small entities for purpose of the RFA.[72]

Therefore, the Commission believes that the amendments to the SFP position limits regulations would not have a significant economic impact on a substantial number of small entities. Accordingly, the Chairman, on behalf of the Commission, hereby certifies, pursuant to 5 U.S.C. 605(b), that the proposed amendments will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (''PRA'')[73] provides that a federal agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number issued by the Office of Management and Budget (''OMB''). The collection of information related to this proposed rule is OMB control number 3038–0059—Security Futures Products.[74] As a general matter, the proposed amendments to the SFP position limits regulation (1) permit a DCM to increase the level of limits; and (2) may change the application of exchange-set limits from a net basis to a gross basis. The Commission believes that the proposed amendments will not impose any new information collection requirements that require approval of OMB under the PRA. As such, the proposed amendments do not impose any new burden or any new information collection requirements in addition to those that already exist in connection with filing to list SFPs under Commission regulation 41.23 or to amend exchange rules for SFPs under Commission regulation 41.24.[75]

[73] 44 U.S.C. 3501 *et seq.*

[74] Regarding Security Futures Products (OMB Control No. 3038–0059), the Commission recently published a notice of a request for extension of the currently approved information collection. *See* 82 FR 48496 (Oct. 18, 2017).

C. Cost-Benefit Considerations

1. Introduction

Section 15(a) of the CEA requires the CFTC to consider the costs and benefits of its actions before promulgating a regulation under the CEA or issuing certain orders.[76] CEA section 15(a) further specifies that the costs and benefits shall be evaluated in light of five broad areas of market and public concern: (1) Protection of market participants and the public; (2) efficiency, competitiveness, and financial integrity of futures markets; (3) price discovery; (4) sound risk management practices; and (5) other public interest considerations. The CFTC considers the costs and benefits resulting from its discretionary determinations with respect to the section 15(a) factors below.

Where reasonably feasible, the CFTC has endeavored to estimate quantifiable costs and benefits. Where quantification is not feasible, the CFTC identifies and describes costs and benefits qualitatively.

The CFTC requests comment on the costs and benefits associated with the proposed rule amendments. In particular, the CFTC requests that commenters provide data and any other information or statistics that the commenters relied on to reach any conclusions regarding the CFTC's proposed considerations of costs and benefits.

2. Economic Baseline

The CFTC's economic baseline for this proposed rule amendment analysis is the SFP position limits rule requirement that exists today. In the 2001 Final SFP Rules, the Commission adopted an SFP position limits rule that is consistent with the statutory requirements of CEA section 2(a)(1)(D). In particular, CEA section 2(a)(1)(D)(i)(VII) requires generally that

[75] Similarly, the Commission previously determined that a rule expanding the listing standards for security futures did not require a new collection of information on the part of any entities. *See* 71 FR 39534 at 39539 (July 13, 2006) (adopting a rule to permit security futures to be based on individual debt securities or a narrow-based security index comprised of such securities).

[76] 7 U.S.C. 19(a).

trading in an SFP is not readily susceptible to manipulation of the price of that SFP or its underlying security. The CFTC regulation that is in effect currently states that, ''the [DCM] shall have rules in place establishing position limits or position accountability procedures for the expiring futures contract month.'' [77] The 2001 Final SFP Rules also provide criteria for a maximum level of position limits and criteria that permit a DCM to adopt an exchange rule for position accountability in lieu of position limits.[78] In addition, the 2001 Final SFP Rules permit a DCM to approve exemptions from position limits pursuant to exchange rules that are consistent with CFTC regulation 150.3.

The CFTC will analyze the costs and benefits of the rules in this proposal against the current default net position limit level of 13,500 (100-share) contracts; or a higher net position limit level of 22,500 (100-share) contracts for equity SFPs meeting either a criterion of at least 20 million shares of average daily trading volume, or criteria of at least 15 million shares of average daily trading volume and more than 40 million shares of the underlying security outstanding.

The current regulation permits (but does not require) a DCM to adopt an exchange rule for position accountability in lieu of position limits, provided that average daily trading volume in the underlying security exceeds 20 million shares and there are more than 40 million shares of the underlying security outstanding.

3. Summary of Proposed Requirements

For equity SFPs, the proposed amendment would increase the default position limit level from 13,500 (100-share) contracts to 25,000 (100-share) contracts. The proposed amendment also permits a DCM to establish a higher position limit level than 25,000 (100-share) contracts, equivalent to 12.5 percent of estimated deliverable supply of the underlying security (which, under proposed guidance, should not exceed the free float of the underlying security). In connection with this change, a DCM would be required to estimate deliverable supply at least semi-annually, rather than to calculate the average daily trading volume at least monthly.

Also for equity SFPs, the proposed amendment would change one of the criteria that permit a DCM to adopt an exchange rule for position accountability in lieu of position limits, from more than 40 million shares of the underlying security outstanding, to an estimated deliverable supply of more than 40 million shares. The proposal generally would retain the other criterion, namely six-month average daily trading volume in the underlying security exceeding 20 million shares, but convert that criterion to 2.5 billion shares of six-month total trading volume, based on 125 trading days in a typical six-month period.

For physically-delivered basket equity SFPs, the proposed amendment would change the criteria for the position limit to the underlying security with the lowest estimated deliverable supply, from the security in the index with the lowest average daily trading volume. The proposed amendment also would clarify that an appropriate adjustment would be made to the level of the limit for a contract size different than 100 shares per underlying security.

For SFPs that are cash settled to a narrow-based security index of equity securities, the proposed amendment provides guidance that a DCM may set the limit level to that of a similar narrow-based security index equity option. The proposal also provides guidance and an acceptable practice, which would provide a safe harbor for a DCM itself to set such a limit level.

For SFPs in debt securities, the proposal would establish a requirement that a DCM must adopt a position limit either net or on the same side of the market, and would provide guidance that the level of such limit generally should be set no greater than the equivalent of 12.5 percent of the par value of the estimated deliverable supply of the underlying debt security. There currently are no SFPs in debt securities listed for trading.

The proposal would establish a required minimum position limit time period beginning no later than the first day that a holder of a long position may be assigned a delivery notice, if such period is longer than the last five trading days, where the SFP permits delivery before the close of trading. There currently are no SFPs listed for trading that provide for delivery before the close of trading.

The proposed amendment would provide DCMs with the discretion to alter the basis for applying a position limit from a net position to a gross position on the same side of the market.[79]

The proposal would establish guidance that a DCM may adopt an exchange rule for position accountability in addition to an exchange rule for a position limit.

The proposal would amend the guidance for exemptions from position limits by changing the reference to CFTC regulation 150.3, regarding exemptions to federal position limits, to CFTC regulation 150.5, regarding guidance for exchange-set limits. The proposal also would add guidance for exemptions from position limits to permit a DCM to provide exemptions consistent with those of a NSE regarding securities options position limits or exercise limits.

The proposal would amend the requirements for re-setting levels of position limits by changing the required review period from monthly to semi-annually; and imposing a requirement that a DCM must lower the position limit for an SFP with data that no longer justifies a higher limit level, rather than guidance that a DCM may lower such position limit. The proposal also would make clear that a DCM must impose a position limit for an SFP with data that no longer justifies an exchange rule for position accountability in lieu of a position limit. The proposal would continue to permit a DCM to use discretion as to whether to increase the level of a position limit for an SFP with data that justifies a higher level.

The proposal would establish a general definition of estimated deliverable supply, consistent with the guidance on estimating deliverable supply in appendix C to part 38, and provide guidance on estimating delivery supply that is specific to an SFP.

Finally, the proposal would establish a definition of same side of the market, for clarity in the proposed limit levels on a gross basis. The definition would distinguish long positions for an SFP in the same security from short positions in an SFP in the same security.[80]

4. Costs

The proposal would as a general matter reduce costs relative to the existing Commission regulation 41.25(a)(3),[81] since it will reduce the frequency of hedge exemption requests (as discussed in the benefits section) and reduce the frequency of required DCM reviews of position limits from monthly to semi-annually. Under the

[77] 17 CFR 41.25(a)(3).

[78] 17 CFR 41.25(a)(3).

[79] In this regard, OneChicago, LLC (''OneChicago''), a DCM listing SFPs, permits concurrent long and short positions to be held. *See* OneChicago exchange rule 424, *available at https://www.onechicago.com/wp-content/uploads/content/OneChicago_Current_Rulebook.pdf.*

[80] These two definitions would be added into a new paragraph (a) of 17 CFR 41.25; in conjunction with the addition of the new paragraph (a), current paragraphs (a) through (d) would be re-designated as paragraphs (b) through (e).

[81] Re-designated under the proposal as 17 CFR 41.25(b)(3).

proposal, DCMs that list SFPs for trading would continue to be required to adopt position limits or position accountability, but the proposal would generally increase the levels of position limits. The Commission preliminarily believes that the proposal would impose certain costs on such DCMs, and that these costs are necessary to establish appropriate position limits or position accountability trigger levels based on deliverable supply and such additional criteria that the listing DCM determines to be appropriate. The Commission also believes that these costs are comparable to those incurred under current regulations (whereby DCMs must calculate average daily trading volume) and notes that these costs will be incurred only semi-annually under the proposal rather than monthly as under current regulations. The Commission believes that DCMs would be able to exercise control over the extent of these costs depending on the degree of standardization such DCMs use to determine position limits and accountability and the Commission anticipates that DCMs will choose from among the lower-cost options. For example, a DCM could, consistent with the proposal, adopt a simple rule for equity securities based on the number of free-float outstanding shares. For equity securities, free-float information is readily available on certain publicly-available market websites and on Bloomberg terminals and similar services (which DCMs are likely to have access to for other business reasons). Reducing the frequency with which DCMs are required to review position limits and accountability to semi-annually from monthly will reduce costs to DCMs. Thus, the Commission anticipates that estimating deliverable supply would not be more costly (and would likely be less costly) than estimating average daily trading volume as required under current regulations.

The Commission notes that under the proposed rule, DCMs have the discretion to implement the default position limit of 25,000 contracts regardless of deliverable supply and that this may result in position limit levels in some contracts greater than 12.5 percent of deliverable supply. However, this discretion is limited by Core Principle 5 (which requires DCMs to set position levels at necessary and appropriate levels to deter manipulation) and by Core Principle 3 (which requires that DCMs may only list contracts that are not readily susceptible to manipulation). To the extent that DCMs comply with these core principles, this DCM discretion should not impair the protection of market participants and the public or otherwise impose significant costs on the markets for SFPs market or related securities.

To the extent that a DCM lists equity SFPs on deliverable baskets, the costs of implementing the proposed position limit provisions for such SFPs would be similar to the costs of the analogous provisions for single stock SFPs, but there are no current costs associated with those proposed changes to the regulations since such SFPs are not currently listed for trading. There are also no listed SFPs at this time on debt securities. To the extent that there is less publicly-available information related to the deliverable supply of debt securities, estimating deliverable supply may be more costly for debt securities than for equity securities. However, these costs will only be incurred in the event that a DCM begins listing security futures on non-exempted debt securities. Moreover, these deliverable supply provisions are set out as guidance so that DCMs are free to implement less costly methods to comply with the rule, which provides only that futures on debt securities must have position limits. While DCMs have not listed debt security SFPs absent the proposed changes to the regulation, it is theoretically possible that the costs associated with estimating deliverable supply or otherwise determining position limit levels may affect future decisions regarding whether or not to list such SFPs. The costs of the proposed regulation for debt securities would be otherwise similar to the costs of the proposed regulation for equity securities.

The proposal to permit DCMs to implement position limits on a net basis or on positions on the same side of the market (*e.g.,* on physically-delivered and cash settled contracts on the same security, should a DCM ever list both types of contracts) would not require DCMs to change their current practice, and will thus not impose new costs on DCMs. Any change that imposes new costs on market participants would be made at the discretion of the DCM.

The proposal to establish a required minimum position limit time period beginning no later than the first day that a holder of a long position may be assigned a delivery notice, if such period is longer than the last five trading days, in instances where the SFP permits delivery before the close of trading currently imposes no costs since contracts of this nature are not currently listed for trading. If a DCM listed such contracts, the proposal would require market participants to incur the costs of complying with position limits or applying for hedge exemptions (and would require DCMs to incur the costs of reviewing such applications) earlier in the life of the contract than absent the proposal.

5. Benefits

The Commission reviews its regulations to help ensure they keep pace with technological developments and industry trends, and to reduce regulatory burden where needed. The proposal would allow DCMs to adopt position limits that they deem to be appropriate. The Commission preliminarily believes that DCMs will adopt position limits that are large enough not to significantly inhibit liquidity, but will appropriately mitigate against potential manipulations and other concerns that may be associated with overly large positions in SFPs. Moreover, to the extent that the proposal would lead to position limits that are higher than current position limits, the proposal could alleviate the costs to hedgers of filing hedge exemptions for positions that are larger than a current position limit, but lower than a new position limit under the proposal. In that regard, Commission staff reviewed the largest positions in SFPs that were held during the calendar year 2017 and found that there were 16 positions held during the last five trading days of expiring SFP contract months across all listed SFPs on OneChicago, currently the only DCM to list SFPs for trading. These positions generally appear to have been associated with securities lending agreements [82] and thus appear to have been eligible for hedge exemptions. These 16 positions exceeded the current applicable limit for their underlying securities of the default 13,500 contracts. If the proposed default position limit of 25,000 contracts had been in effect in 2017, fewer than four positions would have been above that default position limit and would have required hedge exemptions. While the Commission believes that the monetary cost of filing a hedge exemption form is very small for an entity large enough to maintain a position that exceeds a position limit (perhaps less than $100), it is possible that the burden of filing a hedge exemption may discourage hedging at sizes exceeding position limits and, thus, that raising position limits may encourage larger hedges. The Commission also notes that to the extent SFPs are now or in the future used for

[82] OneChicago describes itself on its website, *https://onechicago.com,* as ''the Securities Finance Exchange'' and states that ''single stock futures are ideally suited to replace 'agreements' in equity repo and securities lending transactions.''

speculation,[83] speculators could establish larger positions under the proposal without a need for concern about position limits and may thus increase their trading activity. Any potential increase in trading activity could improve liquidity in the SFP markets.

Requiring DCMs to set position limits and accountability based on semi-annual deliverable supply estimates should help ensure on an ongoing basis that position limits and accountability are set at levels that are necessary and appropriate to deter manipulation consistent with DCM Core Principles 3 and 5.

The Commission preliminarily believes that the proposed frameworks for position limits in SFPs on deliverable equity baskets and debt securities (all based on deliverable supply estimates) should help ensure that such products, if they are ever listed for trading, are reasonably protected from manipulation. Further, the Commission preliminarily believes that the proposal may help foster position limits consistent with those in analogous securities options (where applicable).

The proposal to permit DCMs to implement position limits on a net basis or on positions on the same side of the market (such as physically-delivered or cash settled contracts on the same security, should a DCM ever list both types of contracts) will give DCMs the discretion to implement position limits in a manner that they see fit.

The proposal to establish a required minimum position limit time period beginning no later than the first day that a holder of a long position may be assigned a delivery notice, if such period is longer than the last five trading days, where the SFP permits delivery before the close of trading currently provides no benefits since contracts of this nature are not listed for trading. If a DCM listed such contracts, the proposal would help ensure that such contracts are not readily susceptible to manipulation during the entire delivery period.

6. CEA Section 15(a) Factors

i. Protection of Market Participants and the Public

The Commission preliminarily believes that this proposal maintains the protection of market participants and the public provided by the current regulation. The proposal will continue to protect market participants and the public by maintaining the requirement that DCMs that list SFPs adopt and enforce appropriate position limits or position accountability consistent with DCM Core Principle 5 and implementing for SFPs the longstanding Commission policy that spot-month position limits should be set based on estimates of deliverable supply. Linking the levels of position limits and accountability to deliverable supply protects market participants and the public by helping prevent congestion, manipulation, or other problems that can be associated with speculative positions in expiring contracts that are overly large relative to deliverable supply.

ii. Efficiency, Competitiveness, and Financial Integrity of Markets

As discussed above, under the proposal, it is reasonable to anticipate that many or most SFPs would be subject to higher position limits compared to the current position limits. Therefore, hedgers may be able to take larger positions without the need to apply for hedge exemptions. This also could alleviate the DCM's need to review hedge exemptions improving resource allocation efficiency for exchanges and certain market participants. Moreover, with less restrictive position limits, it is theoretically possible that more traders could be enticed into the market and thus improve the liquidity and pricing efficiency of the SFP market.

The current position limit regulation (a default of 13,500 contracts) often leads to position limits that are tighter than analogous position limits for security options (a default of 25,000 contracts). The proposal would raise the default limit level in SFPs to match that in securities options. More closely aligning the position limits in SFPs to those in securities options may enhance the competitiveness of the SFP market relative to the securities option market.

iii. Price Discovery

The Commission believes that price discovery typically occurs in the liquid and generally transparent security markets underlying existing SFPs rather than the relatively low-volume SFPs themselves. Nevertheless, as noted above, to the extent that trading activity in SFP markets increases due to less restrictive position limits, the price discovery function of SFPs could be enhanced by reducing liquidity risk and thereby facilitating arbitrage between the underlying security and SFP markets.

iv. Sound Risk Management Practices

The current position limit regulation often leads to position limits that are tighter than analogous position limits for security options. It is conceivable that this could discourage potential hedgers or other risk managers from using SFPs rather than security options because of burdens associated with the hedge exemption process. Risk managers might also find that the liquidity risk in the current SFP market is too high, due to a lack of speculators in the SFP market (among other causes). In this regard, it is possible that the current position limits might be too tight for speculators to perform adequately their role of providing liquidity in a futures market. Because the proposal raises the default limit to 25,000 contracts to match the default in security options, and thus would likely lead to higher position limits for many SFPs, it is possible that both risk managers and speculators enter or increase trading in the SFP market under the proposal.

v. Other Public Interest Considerations

The Commission has not identified any additional public interest considerations associated with the proposal.

7. Consideration of Alternatives

The Commission considered regulations that would require DCMs to conform the position limits in SFPs to those in securities options to a greater degree than under the proposal (consistent with comments to the original SFP rule proposal), including applying position limits throughout the life of the contract (rather than only in the last five trading days) and no longer permitting position accountability for SFPs on securities with higher trading volume and deliverable supply. The Commission believes that permitting position accountability for certain SFPs and only requiring spot month limits is consistent with Core Principle 5 and that these requirements are sufficient to ensure that SFPs are not readily susceptible to manipulation as required by Core Principle 3. Thus, not permitting position accountability and requiring DCMs to apply position limits throughout the life of the contract would significantly increase costs on market participants while not significantly enhancing protection of market participants and the public or providing significant benefits beyond those of the proposed position limits framework.

The Commission also considered not setting default position limits for equity

[83] As noted above, SFPs may be used for securities finance transactions that are not speculative in nature.

SFPs and simply requiring that position limits and accountability be set based on deliverable supply, as is done in many other futures products. However, the Commission preliminarily determined not to make such a proposal because some exchanges and market participants (based on past comments)[84] appear to believe that there are benefits to conforming position limits in SFPs to those in securities options to the extent practicable.

8. Request for Comments

The Commission invites public comment on its cost-benefit considerations, including the CEA section 15(a) factors described above. Commenters are also invited to submit any data or other information that they may have quantifying or qualifying the costs and benefits of the proposal with their comment letters.

The Commission specifically seeks comment on the following:

1. Are there alternatives to the proposal (whether discussed in this release or not) that would be superior from a cost-benefit standpoint?

2. Would the proposal affect costs for those market participants that seek hedge exemptions?

3. Would DCMs that list for trading SFPs face additional costs in adopting and setting position limits and position accountability levels for SFPs under the proposal that are not discussed in this consideration of costs and benefits?

4. Do DCMs and market participants expect to see benefits under the proposal that are not discussed in this consideration of costs and benefits? Please quantify or describe such benefits.

5. Should the Commission eliminate default position limits for equity SFPs and instead simply require that position limits and accountability be set based on deliverable supply, as is done in many other futures products?

6. Is it feasible to estimate deliverable supply for debt securities at reasonable cost?

7. Are there benefits associated with the Commission implementing rules for types of SFPs that are not currently listed for trading? Does implementing such rules have the potential to impose costs associated with possibly deterring innovation?

D. Anti-Trust Considerations

CEA Section 15(b) requires the Commission to take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means of achieving the objectives, polices and purposes of the CEA, in issuing any order or adopting any Commission rule or regulation (including any exemption under section 4(c) or 4c(b)), or in requiring or approving any bylaw, rule, or regulation of a contract market or registered futures association established pursuant to CEA section 17.[85]

The Commission believes that the public interest to be protected by the antitrust laws is generally to protect competition. The Commission requests comment on whether the proposal implicates any other specific public interest to be protected by the antitrust laws. The Commission has considered the proposal to determine whether it is anticompetitive and has preliminarily identified no anticompetitive effects. The Commission requests comment on whether the proposal is anticompetitive and, if it is, what the anticompetitive effects are.

Because the Commission has preliminarily determined that the proposal is not anticompetitive and has no anticompetitive effects, the Commission has not identified any less anticompetitive means of achieving the purposes of the Act. The Commission requests comment on whether there are less anticompetitive means of achieving the relevant purposes of the Act that would further the objective of this proposal, such as leveling the regulatory playing field between SFPs and security options listed on NSEs.

List of Subjects in 17 CFR Part 41

Position accountability, Position limits, Security futures products.

For the reasons discussed in the preamble, the Commodity Futures Trading Commission proposes to amend 17 CFR part 41 as set forth below:

PART 41—SECURITY FUTURES PRODUCTS

■ 1. The authority citation for part 41 continues to read as follows:

Authority: Sections 206, 251 and 252, Pub. L. 106–554, 114 Stat. 2763, 7 U.S.C. 1a, 2, 6f, 6j, 7a–2, 12a; 15 U.S.C. 78g(c)(2).

■ 2. In § 41.25:

■ a. Redesignate paragraphs (a) through (d) as paragraphs (b) through (e);

■ b. Add new paragraph (a);

■ c. Revise newly redesignated paragraphs (b)(3), (c)(2) and (3), and (e).

The addition and revisions read as follows:

§ 41.25 Additional conditions for trading for security futures products.

(a) *Definitions.* For purposes of this section:

Estimated deliverable supply means the quantity of the security underlying a security futures product that reasonably can be expected to be readily available to short traders and salable by long traders at its market value in normal cash marketing channels during the specified delivery period. For guidance on estimating deliverable supply, designated contract markets may refer to appendix A of this subpart.

Same side of the market means the aggregate of long positions in physically-delivered security futures products and cash-settled security futures products, in the same security, and, separately, the aggregate of short positions in physically-delivered security futures products and cash-settled security futures products, in the same security.

(b) * * *

(3) *Speculative position limits.* A designated contract market shall have rules in place establishing position limits or position accountability procedures for the expiring futures contract month as specified in this paragraph (b)(3).

(i) *Limits for equity security futures products.* For a security futures product on a single equity security, including a security futures product on an underlying security that represents ownership in a group of securities, *e.g.,* an exchange traded fund, a designated contract market shall adopt a position limit no greater than 25,000 100-share contracts (or the equivalent if the contract size is different than 100 shares), either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month; except where:

(A) For a security futures product on a single equity security where the estimated deliverable supply of the underlying security exceeds 20 million shares, a designated contract market may adopt, if appropriate in light of the liquidity of trading in the underlying security, a position limit no greater than the equivalent of 12.5 percent of the estimated deliverable supply of the underlying security, either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month; or

(B) For a security futures product on a single equity security where the six-month total trading volume in the underlying security exceeds 2.5 billion shares and there are more than 40

[84] *See supra* discussion of the 2001 Final SFP Rules.

[85] 7 U.S.C. 19(b).

million shares of estimated deliverable supply, a designated contract market may adopt a position accountability rule, either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month. Upon request by a designated contract market, traders who hold positions greater than 25,000 100-share contracts (or the equivalent if the contract size is different than 100 shares), or such lower level specified pursuant to the rules of the designated contract market, must provide information to the designated contract market and consent to halt increasing their positions when so ordered by the designated contract market.

(ii) *Limits for physically-delivered basket equity security futures products.* For a physically-delivered security futures product on more than one equity security, *e.g.,* a basket of deliverable securities, a designated contract market shall adopt a position limit, either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month and the criteria in paragraph (b)(3)(i) of this section must apply to the underlying security with the lowest estimated deliverable supply. For a physically-delivered security futures product on more than one equity security with a contract size different than 100 shares per underlying security, an appropriate adjustment to the limit must be made. If each of the underlying equity securities in the basket of deliverable securities is eligible for a position accountability level under paragraph (b)(3)(i)(B) of this section, then the security futures product is eligible for a position accountability level in lieu of position limits.

(iii) *Limits for cash-settled equity index security futures products.* For a security futures product cash settled to a narrow-based security index of equity securities, a designated contract market shall adopt a position limit, either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month. For guidance on setting limits for a cash-settled equity index security futures product, designated contract markets may refer to section (b) of appendix A of this subpart.

(iv) *Limits for debt security futures products.* For a security futures product on one or more debt securities, a designated contract market shall adopt a position limit, either net or on the same side of the market, applicable to positions held during the last five trading days of an expiring contract month. For guidance on setting limits for a debt security futures product, designated contract markets may refer to section (c) of appendix A of this subpart.

(v) *Required minimum position limit time period.* For position limits required under this section where the security futures product permits delivery before the termination of trading, a designated contract market shall apply such position limits for a period beginning no later than the first day that long position holders may be assigned delivery notices, if such period is longer than the last five trading days of an expiring contract month.

(vi) *Requirements for re-setting levels of position limits.* A designated contract market shall calculate estimated deliverable supply and six-month total trading volume no less frequently than semi-annually.

(A) If the estimated deliverable supply data supports a lower speculative limit for a security futures product, then the designated contract market shall lower the position limit for that security futures product pursuant to the submission requirements of § 41.24. If the data require imposition of a reduced position limit for a security futures product, the designated contract market may permit any trader holding a position in compliance with the previous position limit, but in excess of the reduced limit, to maintain such position through the expiration of the security futures contract; provided, that the designated contract market does not find that the position poses a threat to the orderly expiration of such contract.

(B) If the estimated deliverable supply or six-month total trading volume data no longer supports a position accountability rule in lieu of a position limit for a security futures product, then the designated contract market shall establish a position limit for that security futures product pursuant to the submission requirements of § 41.24.

(C) If the estimated deliverable supply data supports a higher speculative limit for a security futures product, as provided under paragraph (b)(3)(i)(A) of this section, then the designated contract market may raise the position limit for that security futures product pursuant to the submission requirements of § 41.24.

(vii) *Restriction on netting of positions.* If the designated contract market lists both physically-delivered contracts and cash settled-contracts in the same security, it shall not permit netting of positions in the physically-delivered contract with that of the cash-settled contract for purposes of determining applicability of position limits.

(c) * * *

(2) Notwithstanding paragraph (c)(1) of this section, if an opening price for one or more securities underlying a security futures product is not readily available, the final settlement price of the security futures product shall fairly reflect:

(i) The price of the underlying security or securities during the most recent regular trading session for such security or securities; or

(ii) The next available opening price of the underlying security or securities.

(3) Notwithstanding paragraph (c)(1) or (2) of this section, if a derivatives clearing organization registered under Section 5b of the Act or a clearing agency exempt from registration pursuant to Section 5b(a)(2) of the Act, to which the final settlement price of a security futures product is or would be reported determines, pursuant to its rules, that such final settlement price is not consistent with the protection of customers and the public interest, taking into account such factors as fairness to buyers and sellers of the affected security futures product, the maintenance of a fair and orderly market in such security futures product, and consistency of interpretation and practice, the clearing organization shall have the authority to determine, under its rules, a final settlement price for such security futures product.

* * * * *

(e) *Exemptions.* The Commission may exempt a designated contract market from the provisions of paragraphs (b)(2) and (c) of this section, either unconditionally or on specified terms and conditions, if the Commission determines that such exemption is consistent with the public interest and the protection of customers. An exemption granted pursuant to this paragraph shall not operate as an exemption from any Securities and Exchange Commission rules. Any exemption that may be required from such rules must be obtained separately from the Securities and Exchange Commission.

■ 3. Add appendix A to subpart C to read as follows:

Appendix A to Subpart C of Part 41—Guidance on and Acceptable Practices for Position Limits and Position Accountability for Security Futures Products

(a) *Guidance for estimating deliverable supply.* (1) For an equity security, deliverable supply should be no greater than the free float of the security.

(2) For a debt security, deliverable supply should not include securities that are committed for long-term agreements (*e.g.,* closed-end investment companies, structured products, or similar securities).

(3) Further guidance on estimating deliverable supply, including consideration of whether the underlying security is readily available, is found in appendix C to part 38 of this chapter.

(b) *Guidance and acceptable practices for setting limits on cash-settled equity index security futures products*—(1) *Guidance for setting limits on cash-settled equity index security futures products.* For a security futures product cash settled to a narrow-based security index of equity securities, a designated contract market:

(i) May set the level of a position limit to that of a similar equity index option listed on a national security exchange or association; or

(ii) Should consider the deliverable supply of equity securities underlying the index, and should consider the index weighting and contract multiplier.

(2) *Acceptable practices for setting limits on cash-settled equity index security futures products.* For a security futures product cash settled to a narrow-based security index of equity securities weighted by the number of shares outstanding, a designated contract market may set a position limit as follows: First, determine the limit on a security futures product on each underlying equity security pursuant to § 41.25(b)(3)(i); second, multiply each such limit by the ratio of the 100-share contract size and the shares of the equity securities in the index; and third, determine the minimum level from step two and set the limit to that level, given a contract size of one U.S. dollar times the index, or for a larger contract size, reduce the level proportionately. If under these procedures each of the equity securities underlying the index is determined to be eligible for position accountability levels, the security futures product on the index itself is eligible for a position accountability level.

(c) *Guidance and acceptable practices for setting limits on debt security futures products*—(1) *Guidance for setting limits on debt security futures products.* A designated contract market should set the level of a position limit to no greater than the equivalent of 12.5 percent of the par value of the estimated deliverable supply of the underlying debt security. For a security futures product on more than one debt security, the limit should be based on the underlying debt security with the lowest estimated deliverable supply.

(2) *Acceptable practices for setting limits on debt security futures products.*

[Reserved.]

(d) *Guidance on position accountability.* A designated contract market may adopt a position accountability rule for any security futures product, in addition to a position limit rule required or adopted under this section. Upon request by the designated contract market, traders who hold positions, either net or on the same side of the market, greater than such level specified pursuant to the rules of the designated contract market must provide information to the designated contract market and consent to halt increasing their positions when so ordered by the designated contract market.

(e) *Guidance on exemptions from position limits.* A designated contract market may approve exemptions from these position limits pursuant to rules that are consistent with § 150.5 of this chapter, or to rules that are consistent with rules of a national securities exchange or association regarding exemptions to securities option position limits or exercise limits.

Issued in Washington, DC, on July 24, 2018, by the Commission.

Robert Sidman,

Deputy Secretary of the Commission.

Note: The following appendices will not appear in the Code of Federal Regulations.

Appendices to Position Limits and Position Accountability for Security Futures Products—Commission Voting Summary and Commissioner's Statement

Appendix 1—Commission Voting Summary

On this matter, Chairman Giancarlo and Commissioners Quintenz and Behnam voted in the affirmative. No Commissioner voted in the negative.

Appendix 2—Concurring Statement of Commissioner Rostin Behnam

I respectfully concur with the Commodity Futures Trading Commission's approval of its proposed rule regarding Position Limits and Position Accountability for Security Futures Products (the ''Proposal''). I commend staff on their hard work in producing this Proposal, and for their thoughtful responses to my questions. I look forward to hearing from market participants and other stakeholders regarding the amendments to the existing position limits rules for security futures products. In particular, I will be interested in comments regarding the appropriateness of increasing the default level of equity security futures products position limits from 13,500 contracts to 25,000 contracts. While today's Proposal only would amend the Commission's Part 41 rules regarding security futures products, I nonetheless encourage market participants and interested stakeholders to consider how the Proposal might impact or interplay with the Commission's position limits rules in Part 150 and any future amendments to them.

BILLING CODE 6351–01–P

DEPARTMENT OF EDUCATION

34 CFR Chapter VI

[Docket ID ED–2018–OPE–0076]

Negotiated Rulemaking Committee; Public Hearings

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Intent to establish negotiated rulemaking committee.

SUMMARY: We announce our intention to establish a negotiated rulemaking committee to prepare proposed regulations for the Federal Student Aid programs authorized under title IV of the Higher Education Act of 1965, as amended (HEA) (title IV, HEA programs). We also announce our intention to create two subcommittees for this committee. In addition, we announce three public hearings at which interested parties may comment on the topics suggested by the Department and may suggest additional topics that should be considered for action by the negotiating committee. We will also accept written comments on the topics suggested by the Department and suggestions for additional topics that should be considered for action by the negotiating committee. The Department will present negotiators with proposed regulatory language at the first negotiating session.

DATES: The dates, times, and locations for the public hearings are listed under **SUPPLEMENTARY INFORMATION**. We must receive written comments on the topics suggested by the Department and additional topics that should be considered for action by the negotiating committee on or before September 14, 2018.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments by fax or by email. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''Help.''
- *Postal Mail, Commercial Delivery, or Hand Delivery:* The Department strongly encourages commenters to submit their comments electronically. However, if you mail or deliver your comments, address them to Aaron Washington, U.S. Department of Education, 400 Maryland Ave. SW, Room 294–12, Washington, DC 20202.

Privacy Note: The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov.* Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT:

For information about the public hearings, go to *www2.ed.gov/policy/highered/reg/hearulemaking/2018/index.html* or contact: Aaron Washington, U.S. Department of Education, 400 Maryland Ave. SW, Room 294–12, Washington, DC 20202. Telephone: (202) 453–7241. Email: *aaron.washington@ed.gov.*

For information about negotiated rulemaking in general, see *The Negotiated Rulemaking Process for Title IV Regulations, Frequently Asked Questions* at *www2.ed.gov/policy/highered/reg/hearulemaking/hea08/neg-reg-faq.html* or contact: Aaron Washington, U.S. Department of Education, 400 Maryland Ave. SW, Room 294–12, Washington, DC 20202. Telephone: (202) 453–7241. Email: *aaron.washington@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Section 492 of the HEA requires that, before publishing any proposed regulations to implement programs authorized under title IV of the HEA, the Secretary obtain public involvement in the development of the proposed regulations. After obtaining advice and recommendations from the public, the Secretary conducts negotiated rulemaking to develop the proposed regulations. We announce our intent to develop proposed title IV regulations by following the negotiated rulemaking procedures in section 492 of the HEA.

We intend to select participants for the negotiated rulemaking committee from nominees of organizations and groups that represent the interests significantly affected by the proposed regulations. In accordance with section 492(b)(1) of the HEA, we will select from the nominees individual negotiators who reflect the diversity among program participants.

Regulatory Issues

We intend to convene a negotiated rulemaking committee to develop proposed regulations to revise the regulations related to the Secretary's recognition of accrediting agencies in 34 CFR part 602, and related parts as described below. The proposed topics for negotiation would include:

- Requirements for accrediting agencies in their oversight of member institutions;
- Requirements for accrediting agencies to honor institutional mission;
- Criteria used by the Secretary to recognize accrediting agencies, emphasizing criteria that focus on educational quality;
- Developing a single definition for purposes of measuring and reporting job placement rates; and
- Simplifying the Department's process for recognition and review of accrediting agencies.

In addition to developing proposed regulations on the core functions of accreditation, the committee would also develop proposed regulations in a number of areas to promote greater access for students to high-quality, innovative programs by revising the regulations related to:

(1) State authorization, to address the requirements related to programs offered through distance education or correspondence courses, including disclosures about such programs to enrolled and prospective students, and other State authorization issues (34 CFR 600.9 and 668.50);

(2) The definition of ''regular and substantive interaction,'' as that term is used in the definitions of ''correspondence course'' and ''distance education'' in 34 CFR 600.2, 600.7, and 668.10;

(3) The definition of the term ''credit hour'' as it is used in 34 CFR 600.2, 602.24, 603.24, and 668.8;

(4) The requirement that an institution demonstrate a reasonable relationship between the length of a program and entry-level requirements for the recognized occupation for which the program prepares the student (34 CFR 668.8(e)(1)(iii) and 668.14(b)(26));

(5) The arrangements between an institution and another institution or organization to provide a portion of an educational program (34 CFR 668.5);

(6) The roles and responsibilities of institutions and accrediting agencies in the teach-out process (34 CFR 600.32(d) and 602.24);

(7) The barriers to innovation and competition in postsecondary education or to student completion, graduation, or employment, including, but not limited to, those contained in the Department's institutional eligibility regulations (34 CFR part 600) and student assistance general provisions (34 CFR part 668);

(8) The simplification and clarification of program requirements to minimize inadvertent grant-to-loan conversions and to improve outcomes for Teacher Education Assistance for College and Higher Education (TEACH) Grant recipients (34 CFR part 686);

(9) Direct assessment programs and competency-based education (34 CFR 668.10), focusing on the ability of institutions to develop, and students to progress through, innovative programs responsive to student, employer, and societal needs, including consideration of regulations that are barriers to the implementation of such programs, such as certain requirements for term-based academic calendars and satisfactory academic progress; and

(10) In light of the recent United States Supreme Court decision in *Trinity Lutheran Church of Columbia, Inc.* v. *Comer,* 137 S. Ct. 2012 (2017), and the October 6, 2017, Memorandum for All Executive Departments and Agencies issued by the Attorney General of the United States pursuant to Executive Order No. 13798,[1] the committee would consider revisions to the various provisions of the regulations regarding the eligibility of faith-based entities to participate in the title IV, HEA programs, including the Gaining Early Awareness and Readiness for Undergraduate Programs program, and the eligibility of students to obtain certain benefits under those programs (34 CFR 600.11 and parts 628, 674, 675, 676, 682, 685, 690, 692, and 694).

Finally, we intend to convene two subcommittees for this committee. One subcommittee would address proposed regulations related to direct assessment programs/competency-based education (34 CFR 668.10) focusing on the ability of institutions to develop, and students to progress through, innovative programs responsive to student, employer, and societal needs. This subcommittee could consider revisions to regulations that are barriers to the implementation of such programs, including certain requirements for term-based academic calendars and satisfactory academic progress, among other topics. The second subcommittee would make recommendations to the committee regarding revisions to the regulations regarding the eligibility of faith-based entities to participate in the title IV, HEA programs. Proposed subcommittees are formed to address specified issues and to make recommendations to the committee regarding proposed regulatory language. Subcommittees do not make decisions for the committee. While committee meetings are open to the public to attend in person, subcommittee meetings will be made available through a Department-provided livestream.

We intend to provide draft proposed regulatory language for discussion by the negotiating committee and the subcommittees prior to the first meeting of the committee or subcommittees.

After reviewing the public comments presented at the hearings and in the written submissions, we will publish a

[1] *https://www.justice.gov/opa/press-release/file/1001891/download.*

document (or documents) in the **Federal Register** announcing the specific topics for which we intend to establish the negotiated rulemaking committee and a request for nominations for individual negotiators for the committee who represent the communities of interest that would be significantly affected by the proposed regulations. We will also announce the specific topics for which we intend to establish subcommittees and request nominations for individuals with pertinent expertise to participate on the subcommittees. This document will also be posted on the Department's website at: *www2.ed.gov/policy/highered/reg/hearulemaking/2018/index.html.*

Public Hearings

We will hold three public hearings for interested parties to discuss the rulemaking agenda. The public hearings will be held:

- September 6, 2018, at the U.S. Department of Education, 400 Maryland Ave. SW, Barnard Auditorium, Washington, DC 20202.
- September 11, 2018, at Xavier University, Convocation Center Annex, Room 111, Building 62, 7800 Washington Ave., New Orleans, LA 70125.
- September 13, 2018, at Gateway Technical College, SC Johnson iMET Center, 2320 Renaissance Blvd., Sturtevant, WI 53177.

The Washington, DC public hearing will be held from 9:00 a.m. to 4:00 p.m., Eastern Daylight Time. The New Orleans, LA and Sturtevant, WI public hearings will be held from 9:00 a.m. to 1:00 p.m., Central Daylight Time. Further information on the public hearing sites is available at *www2.ed.gov/policy/highered/reg/hearulemaking/2018/index.html.*

Individuals who would like to present comments at the public hearings must register by sending an email to *negreghearing@ed.gov.* The email should include the name of the presenter along with the public hearing at which the individual would like to speak, the general topic(s) the individual would like to address, and a general timeframe during which the individual would like to speak (for example, a presenter could indicate morning or afternoon, or before 11:00 a.m. or after 3:00 p.m.). We will make the determination on a first-come, first-served basis, based on the time and date the email was received. Each participant will be limited to five minutes. The Department will notify registrants of the date and time slot reserved for them. An individual may make only one presentation at the public hearings. If we receive more registrations than we are able to accommodate, the Department reserves the right to reject the registration of an entity or individual that is affiliated with an entity or individual that is already scheduled to present comments, and to select among registrants to ensure that a broad range of entities and individuals is allowed to present. We will accept registrations for any remaining time slots on a first-come, first-served basis, beginning at 8:30 a.m. on the day of the public hearing at the Department's on-site registration table. Registration is not required to observe the public hearings; however, space may be limited.

The Department will post transcripts of the hearings to *www2.ed.gov/policy/highered/reg/hearulemaking/2018/index.html.* Although the Department will not be video recording the hearings, speakers should be aware that, since these are public meetings, they may be filmed or recorded by members of the public.

Speakers may submit written comments at the public hearings. In addition, the Department will accept written comments via the Federal eRulemaking portal, and by postal mail, commercial delivery, or hand delivery. (See the **ADDRESSES** section of this document for submission information.)

Schedule for Negotiations

We anticipate that any committee established after the public hearings will begin negotiations in January of 2019, with the committee meeting for up to three sessions of three days each at roughly four- to eight-week intervals. The Department will post transcripts and audio of the sessions to *www2.ed.gov/policy/highered/reg/hearulemaking/2018/index.html.* We anticipate that any subcommittees established will begin meeting in January or February, after the first meeting of the committee. The committee and subcommittees will meet in the Washington, DC area. The dates and locations of these meetings will be published in a subsequent notice in the **Federal Register**, and will be posted on the Department's website at: *www2.ed.gov/policy/highered/reg/hearulemaking/2018/index.html.*

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R02–OAR–2018–0549; FRL–9981–62—Region 2]

Approval and Promulgation of Implementation Plans; New Jersey; Elements for the 2008 8-Hour Ozone National Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve several State Implementation Plan (SIP) revisions submitted by the State of New Jersey for purposes of implementing Reasonably Available Control Technology (RACT) for the 2008 8-hour ozone National Ambient Air Quality Standard (NAAQS). The EPA is proposing to approve New Jersey's SIP revision for the control and prohibition of air pollution by volatile organic compounds (VOCs) and control and prohibition of air pollution by oxides of nitrogen (NO_X), as they are intended to satisfy certain control technique guideline (CTG) and NO_X RACT categories. The EPA is proposing to approve New Jersey's certification that there are no sources within the State for the following CTGs: Manufacture of Vegetable Oils; Manufacture of Pneumatic Rubber Tires; Aerospace

Coatings; Shipbuilding and Ship Repair Operations; Metal Furniture Coatings; Large Appliance Coatings; and Auto and Light Duty Truck Original Equipment Manufacturer Assembly Coatings. In addition, the EPA is proposing to approve New Jersey's RACT SIP as it applies to non-CTG major sources of VOCs and major sources of NO_X. The EPA is also proposing to approve the other portions of the comprehensive SIP revision submitted by New Jersey that certify that the State has satisfied the requirements for an enhanced motor vehicle Inspection and Maintenance program, certify that the State has satisfied the requirements for an emission statement program, certify that the State has satisfied the requirements for an ozone specific provisions nonattainment new source review program, and show the State has adopted all NO_X RACT and VOC RACT, as it pertains to the 2008 8-hour ozone NAAQS. These actions are being taken in accordance with the requirements of the Clean Air Act.

DATES: Written comments must be received on or before August 30, 2018.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA–R02–OAR–2018–0549 at *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Omar Hammad, Environmental Protection Agency, 290 Broadway, New York, New York 10007–1866, at (212) 637–3347, or by email at *Hammad.Omar@epa.gov.*

SUPPLEMENTARY INFORMATION: The Supplementary Information section is arranged as follows:

Table of Contents

I. What action is the EPA proposing?

The EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of New Jersey on June 11, 2015, for purposes of implementing Reasonably Available Control Technology (RACT) [1] for the 2008 8-hour ozone National Ambient Air Quality Standard (NAAQS or standard). New Jersey's June 11, 2015 SIP submittal consists of a showing that the State meets the RACT requirements for the two precursors for ground-level ozone, *i.e.,* oxides of nitrogen (NO_X) and volatile organic compounds (VOCs), set forth by the Clean Air Act (CAA or Act) with respect to the 2008 ozone standard.

This action addresses New Jersey SIP submittals dated June 11, 2015, December 14, 2017, and January 2, 2018. In the June 11, 2015 SIP submittal, the State indicates that the RACT requirements for the 2008 ozone NAAQS have been fulfilled with the exception of sources subject to four Control Techniques Guidelines (CTGs) for source categories represented in New Jersey: Industrial Cleaning Solvents (EPA 453/R–06–001); Paper, Film, and Foil Coatings (EPA 453/R–07–003); Miscellaneous Metal and Plastic Parts Coatings (EPA 453/R–08–003); and Fiberglass Boat Manufacturing Materials (EPA–453/R–08–004). The June 11, 2015 submittal also establishes new limits on NO_X emissions from existing simple cycle combustion turbines combusting natural gas and compressing gaseous fuel at major NO_X facilities and stationary reciprocating engines combusting natural gas and compressing gaseous fuel at major NO_X facilities. In a submission received by the EPA on December 14, 2017,[2] titled ''Control and Prohibition of Air Pollution by Volatile Organic Compounds and Oxides of Nitrogen,'' New Jersey indicates that the RACT requirements for the 2008 ozone NAAQS have been fulfilled for sources subject to the four CTGs identified above that were not addressed in the June 11, 2015 submittal. The EPA is proposing to approve New Jersey's June 11, 2015 RACT SIP as it applies to non-CTG major sources of VOCs and to major sources of NO_X. The EPA is proposing to approve New Jersey's December 14, 2017 submittal addressing the aforementioned four CTGs and establishing new limits on NO_X emissions.

Also, the EPA is proposing to approve the portions of New Jersey's SIP revision submitted on January 2, 2018,[3] that certifies the State has satisfied the requirements for a motor vehicle enhanced inspection and maintenance (I/M) program, an emission statement program, an ozone specific provisions nonattainment new source review (NNSR) program, and that the State has adopted all applicable NO_X RACT and VOC RACT, submitted in the ''1997 84 ppb and 2008 75 ppb 8-Hour Ozone Attainment Demonstration Northern New Jersey-New York-Connecticut Nonattainment Area and Nonattainment New Source Review (NNSR) Program Compliance Certification New Jersey Statewide'' SIP revision.

The EPA proposes that New Jersey's SIP submittals are consistent with the EPA's guidance documents as well as the EPA's CTG and Alternative Control Technique (ACT) documents and are fully approvable as SIP-strengthening measures for New Jersey's ozone SIP.

II. What is the background for this proposed rulemaking?

In 2008, the EPA revised the health based NAAQS for ozone, setting it at 0.075 parts per million (ppm), or 75 parts per billion (ppb), averaged over an 8-hour time frame. The EPA determined that the revised 8-hour standard would be more protective of human health, especially with regard to children and adults who are active outdoors and individuals with a pre-existing respiratory disease such as asthma.

On May 21, 2012 (77 FR 30087), the EPA finalized its attainment/nonattainment designations for areas across the country with respect to the 2008 8-hour ozone standard. This action became effective on July 20, 2012. The two 8-hour ozone marginal nonattainment areas located in New Jersey are the New York-Northern New Jersey-Long Island, NY–NJ–CT nonattainment area, also referred to as the New York Metropolitan Area

[1] The EPA has defined RACT as the lowest emission limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility (44 FR 53762, September 17, 1979).

[2] Submission cover letter dated November 30, 2017.

[3] Submission cover letter dated December 22, 2017.

(NYMA), and the Philadelphia-Wilmington-Atlantic City, PA–NJ–MD–DE nonattainment area. The New Jersey portion of the NYMA is comprised of Bergen, Essex, Hudson, Hunterdon, Middlesex, Monmouth, Morris, Passaic, Somerset, Sussex, Union and Warren Counties. On May 4, 2016 (81 FR 26697), the EPA determined that the NYMA did not attain the 2008 ozone standard by the applicable attainment date and is reclassified from a marginal to a moderate nonattainment area. State attainment plans for moderate nonattainment areas were due by January 1, 2017. Since the NYMA has been reclassified to a moderate nonattainment area, New Jersey submitted a new RACT determination as part of the State's attainment demonstration for the 2008 ozone standard.

In areas classified as moderate or areas located in the Ozone Transport Region (OTR) (which includes all of New Jersey) under the 8-hour ozone standard, the definition for major sources is 50 tons per year for VOC and 100 tons per year for NO_X. New Jersey, however, has an emission threshold of 25 tons per year throughout the state for purposes of the RACT analysis which results in a more stringent evaluation of RACT.

Sections 172(c)(1) and 182(b)(2) of the CAA require states to implement RACT in areas classified as moderate (and higher) nonattainment for ozone, while section 184(b)(1)(B) of the CAA requires RACT in states located in the OTR. Specifically, these areas are required to implement RACT for all major VOC and NO_X emission sources and for all sources covered by a CTG. A CTG is a document issued by the EPA which establishes a ''presumptive norm'' for RACT for a specific VOC source category. A related set of documents, ACT documents, exists primarily for NO_X control requirements. States must submit rules or negative declarations when the State has no such sources for CTG source categories, but not for sources in ACT categories. However, RACT must be imposed on major sources of NO_X, and some of those major sources may be within a sector covered by an ACT document.

On March 6, 2015 (80 FR 12264), the EPA published a final rule, herein referred to as the ''2008 ozone implementation rule,'' that outlined the obligations that areas found to be in nonattainment of the 2008 ozone NAAQS needed to address. The 2008 ozone implementation rule contains, among other things, a description of the EPA's expectations for states with RACT obligations. The 2008 ozone implementation rule indicates that states could meet RACT through the establishment of new or more stringent requirements that meet RACT control levels, through a certification that previously adopted RACT controls in their SIP approved by the EPA under a prior ozone NAAQS represents adequate RACT control levels for attainment of the 2008 ozone NAAQS, or a combination of these two approaches. In addition, a state must submit a negative declaration in instances where there are no CTG sources. The 2008 ozone implementation rule requires that states with nonattainment areas to submit RACT SIPs to EPA within two years from the effective date of nonattainment designation or by July 20, 2014.

The 2008 ozone implementation rule also states, among other things, that an attainment demonstration should consist of a list of adopted measures (including RACT) with schedules for implementation and other means and techniques necessary and appropriate for demonstrating attainment as expeditiously as practicable but no later than the outside attainment date for the area's classification. New Jersey submitted an attainment demonstration SIP and EPA will act on it in a separate rulemaking.

III. What did New Jersey submit?

On June 11, 2015, the New Jersey Department of Environmental Protection (NJDEP) submitted to the EPA a formal revision to its SIP. The SIP revision consists of information documenting how New Jersey complied with the RACT requirements for the 2008 8-hour ozone NAAQS, pertaining to the former marginal classification for the NYMA. In its June 11, 2015 submittal, New Jersey certifies that the State's submittal addresses the RACT requirements for the 2008 8-hour ozone standard except that it does not fulfill the requirements of the CTGs for industrial cleaning solvents, paper film and foil coatings, fiberglass boat manufacturing materials, and miscellaneous metal and plastic parts coatings and the requirements of the ACTs for stationary reciprocating internal combustion engines and stationary gas turbines. In New Jersey's June 2015 RACT submittal, the State commits to revise New Jersey Administrative Code, Title 7, Chapter 27 (N.J.A.C 7:27) Subchapter 16 and Subchapter 19 to address those requirements in a timely manner.

On December 14, 2017, the EPA received New Jersey's SIP revision, ''New Jersey's Control and Prohibition of Air Pollution by Volatile Organic Compounds and Control and Prohibition of Air Pollution by Oxides of Nitrogen.'' [3] The December 14, 2017 submittal includes the amendment to N.J.A.C. 7:27, Subchapter 16, ''Control and Prohibition of Air Pollution by Volatile Organic Compounds'' and Subchapter 19, ''Control and Prohibition of Air Pollution by Oxides of Nitrogen'' that New Jersey committed to propose and adopt in their June 11, 2015 submittal.

On January 2, 2018, New Jersey submitted, for inclusion in the SIP, the ''1997 84 ppb and 2008 75 ppb 8-Hour Ozone Attainment Demonstration Northern New Jersey-New York-Connecticut Nonattainment Area and Nonattainment New Source Review (NNSR) Program Compliance Certification New Jersey Statewide.'' In the January 2, 2018 submission New Jersey certifies, among other things, that the State has satisfied the requirements for an enhanced motor vehicle I/M program, an emission statement program, an ozone specific provisions NNSR program, and that the State has adopted all applicable NO_X RACT and VOC RACT for the moderate NYMA.[4]

In New Jersey's June 11, 2015 RACT submittal, the State evaluated its existing RACT regulations which were adopted to meet the 1997 8-hour ozone standard to ascertain whether the same regulations constitute RACT for the 2008 8-hour ozone standard. In making its new 8-hour ozone RACT determination, New Jersey referenced EPA's RACT guidance (''Beyond Volatile Organic Compound-Reasonably Available Control Technology-Control Technology Guidelines Requirements, EPA–453/R–95–010, April 1995) and EPA's proposed rule ''Implementation of the 2008 National Ambient Air Quality Standards for Ozone: State Implementation Plan Requirements.'' 78 FR 34178 (June 2013).[5] Accordingly, the basic framework for New Jersey's June 11, 2015 RACT SIP determination is described as follows:

- Identify all source categories covered by Control Technique Guidelines (CTG) and Alternative Control Technique (ACT) documents.
- Identify applicable regulations that implement RACT.
- Certify that the existing level of controls for the 1997 8-hour ozone standard equals RACT under the 2008 8-hour ozone standard in certain cases.

[3] Effective date November 6, 2017 (49 N.J.R. 3518).

[4] The EPA will act on the remainder of New Jersey's January 2, 2018 SIP revision submittal, including the attainment demonstrations, Reasonable Further Progress (RFP) requirements and other portions at a later date.

[5] The EPA finalized the proposed rule. 80 FR 12264 (March 6, 2015).

• Declare that sources covered by a CTG and ACT do not exist within the state and/or that RACT is not applicable in certain cases.

• Identify and evaluate applicability of RACT to individual sources whose source category does not have a presumptive emission limit covered by a state-wide regulation.

• Identify potential RACT revisions.

In New Jersey's June 11, 2015 submittal, the State certified that all statewide RACT regulations, with the exception of four CTGs and two ACTs, with SIP approved state effective dates prior to the date when the RACT analysis was performed in 2015, are RACT for the 2008 8-hour ozone NAAQS, because the RACT determinations issued by the State are consistent with the most recent control technology and economic considerations. The State's December 14, 2017 submittal addressed the requirements for the four CTGs; the CTG for ''industrial cleaning solvents,'' ''paper film and foil coatings,'' ''fiberglass boat manufacturing materials,'' and ''miscellaneous metal and plastic parts coatings'' and the two ACTs for ''stationary reciprocating internal combustion engines'' and ''stationary gas turbines.'' The following discusses the results of New Jersey's analysis of RACT under the basic framework identified above.

CTGs and ACTs

New Jersey reviewed its existing RACT regulations adopted under the 1979 1-hour and 1997 8- hour ozone standard to identify source categories covered by the EPA's CTG and ACT documents. New Jersey's 2015 RACT SIP submittal lists the CTG and ACT documents and corresponding State RACT regulations that cover the CTG and ACT sources included in New Jersey's emissions inventory.

In 2009, New Jersey adopted VOC and NO_X RACT for major non-CTG sources located in the State. Those sources for which EPA guidance was not published, but for which the State established RACT, include:

1. High Electric Demand Day boilers serving EGUs [N.J.A.C. 7:27–19.4];

2. High Electric Demand Day turbines serving EGUs [N.J.A.C. 7:27–19.5];

3. Asphalt paving production plants [N.J.A.C. 7:27–19.9];

4. Alternative VOC control requirements [N.J.A.C. 7:27–16.17];

5. Alternative and facility-specific NO_X emission limits [N.J.A.C. 7:27–19.13];

6. Municipal solid waste (MSW) incinerators [N.J.A.C. 7:27–19.12]; and

7. Sewage sludge incinerators [N.J.A.C. 7:27–19.28].

New Jersey has determined that currently effective emission limits for these source categories still represent RACT in 2015 for the marginal classification in the NYMA for the 75 ppb ozone standard.

With the exception of the source categories for which New Jersey has made negative declarations, New Jersey has implemented RACT controls state-wide for all CTGs that the EPA has issued as of June 2015 to meet the requirements of the CAA. The following table lists the RACT controls that have been promulgated in N.J.A.C. 7:27 and the corresponding EPA SIP approval dates.

N.J.A.C. 7:27 subchapter	Title	EPA latest approval date
16.2	VOC stationary storage tanks	8/3/10, 75 FR 45483
16.3	Gasoline transfer operations	8/3/10, 75 FR 45483
16.6	Open top tanks and solvent cleaning operations	8/3/10, 75 FR 45483
16.7	Surface coating and graphic arts operations	8/3/10, 75 FR 45483
16.12	Surface coating operations at mobile equipment repair and refinishing facilities	8/3/10, 75 FR 45483
16.16	Other source operations	8/3/10, 75 FR 45483
16.18	Leak detection and repair	8/3/10, 75 FR 45483
16.19	Application of cutback and emulsified asphalts	8/3/10, 75 FR 45483
16.20	Petroleum solvent dry cleaning operations	8/3/10, 75 FR 45483
19.4	Boilers serving electric generating units	8/3/10, 75 FR 45483
19.5	Stationary combustion turbines	8/3/10, 75 FR 45483
19.7	Industrial/commercial/institutional boilers and other indirect heat exchangers	8/3/10, 75 FR 45483
19.8	Stationary reciprocating engines	8/3/10, 75 FR 45483
19.10	Glass manufacturing furnaces	8/3/10, 75 FR 45483
23	Prevention of Air Pollution from Architectural Coatings Standards	12/22/10, 75 FR 80340
24	Consumer products	12/22/10, 75 FR 80340
26	Prevention of Air Pollution from Adhesives, Sealants, Adhesive Primers and Sealant Primers.	12/22/10, 75 FR 80340

New Jersey's June 11, 2015 RACT submittal contains a table (see Table II–2: RACT Certifications Based on Existing EPA Guidance) listing all the CTG and ACT categories (67 categories in total) and the corresponding State regulations or negative declarations that address the requirements. The EPA previously approved and incorporated into the SIP all of the State's regulations identified in Table II–2 that address CTGs and ACTs. New Jersey's December 14, 2017 submittal fulfilled the requirement to submit for the four CTGs and two ACTs which are identified in Table II–2 as rules that had not yet been adopted.

For many source categories, the existing New Jersey rules have more stringent emission limits and/or lower thresholds of applicability than the recommendations contained in the CTG and ACT documents. New Jersey considers and certifies that its SIP approved regulations meet the RACT requirements for the 2008 8-hour ozone standard.

Source Categories Not Applicable in New Jersey

In New Jersey's 2015 submittal, by comparing the list of existing CTGs with New Jersey's effective rules, and researching the New Jersey Environmental Management System (NJEMS) emission statements and permitting database for source categories by Standard Industrial Code (SIC), the State certifies that the following source-specific categories either do not exist in this State, or fall below significant emission unit applicability thresholds in the CTGs: (1) Manufacture of Vegetable Oils; [6] (2)

[6] The CTG for the manufacturing of vegetable oils was published in June 1978 (see EPA–450/2–78–035) but in a March 1980 guidance document,

Continued

Manufacture of Pneumatic Rubber Tires; (3) Aerospace Coatings; (4) Shipbuilding and Ship Repair Operations; (5) Metal Furniture Coatings; (6) Large Appliance Coatings; and (7) Auto and Light Duty Truck Original Equipment Manufacturer (OEM) Assembly Coatings.

Source-Specific RACT Determinations

A source-specific RACT determination applies to sources that have obtained a facility-specific emission limit or an alternative emission limit, *i.e.,* a variance. A case-by-case RACT analysis is required for sources that are not defined by a specific source category covered by an existing state regulation, that are requesting a variance, or that are not addressed by a CTG. New Jersey's RACT regulations at N.J.A.C. 7:27 Subchapter 19.13 for NO_X and at Subchapter 16.17 for VOCs outline the process and conditions for granting a source-specific RACT determination. Under the CAA, these individual source-specific RACT determinations need to be submitted by the State as a SIP revision for the EPA's approval. Therefore, New Jersey included Table II–3 in its June 2015 RACT SIP submittal, a listing of VOC and NO_X source facilities that are subject to a RACT source-specific SIP revision under the 8-hour ozone SIP and the corresponding emission limits, control technology and applicable regulation governing the RACT determinations. Consistent with the CAA, New Jersey submitted to the EPA SIP revisions that included the source-specific RACT revisions identified in Table II–3 of the 2015 RACT SIP submittal. The EPA has approved some of those revisions and is performing its technical review of the remainder of the submittals and will take separate rulemaking actions for each of the source-specific determinations (see 40 CFR 52.1570 (d) ''*EPA approved State source-specific requirements*'').

New Jersey's Control and Prohibition of Air Pollution by Volatile Organic Compounds

New Jersey's December 14, 2017 submittal, which included amendments to N.J.A.C. 7:27, Subchapter 16, addresses sources subject to four CTGs for source categories represented in New Jersey: Industrial Cleaning Solvents (ICS), CTG issued September 2006 (EPA 453/R–06–001); Paper, Film, and Foil Coatings (PFFC), CTG issued September 2007 (EPA 453/R–07–003); Miscellaneous Metal and Plastic Parts Coatings (MMPPC), CTG issued September 2008 (EPA 453/R–08–003); and Fiberglass Boat Manufacturing Materials (FBMM), CTG issued September 2008 (EPA–453/R–08–004). The VOC emission limits adopted by New Jersey and set forth in Subchapter 16 are as effective in regulating the source categories as the EPA's CTG documents.

Industrial Cleaning Solvents (ICS)

The EPA issued a CTG for industrial cleaning solvents in 2006 that includes recommended control techniques. This category includes the industrial cleaning solvents used by many industries. It includes a variety of products that are used to remove contaminants such as adhesives, inks, paint, dirt, soil, oil and grease. The recommended measures for controlling VOC emissions from the use, storage and disposal of industrial cleaning solvents include work practice standards, limitations on VOC content of the cleaning materials, and an optional alternative limit on composite vapor pressure of the cleaning materials. They also include the use of add-on controls with an overall emission reduction of at least 85 percent by mass.

Based on the EPA CTG, New Jersey adopted new rules N.J.A.C. 7:27–16.24 which specifies VOC content and vapor pressure limits for solvents used in solvent cleaning activities conducted to remove material through wiping, flushing, or spraying. Facilities can be exempt by annual industrial cleaning solvent usage, based on a purchase limit, and by source operation type. Compliance can be achieved by meeting a maximum VOC content, a maximum VOC composite vapor pressure, or a minimum control efficiency. Applicable facilities must implement best management practices, which include keeping cleaning materials in closed containers when not in use. Recordkeeping must be maintained which demonstrates compliance. The EPA proposes to find that New Jersey's adopted ICS rules are as effective in regulating the source category as the EPA's CTG document.

Paper, Film, and Foil Coatings (PFFC)

The EPA issued a 2007 CTG for paper, film and foil coatings. Previous Federal actions that affected this source category included a 1977 CTG for controlling VOC emissions from surface coating of paper, the 1983 new source performance standards (NSPS) for surface coating of pressure sensitive tape and labels (a subset of this category), and a 2002 National Emissions Standards for Hazardous Air Pollutants (NESHAP) for paper and other web coating. The EPA recommends applying the control recommendations for coatings only to individual paper, film and foil surface coating lines with the potential to emit at least 25 tons per year (tpy) of VOC from coatings, prior to controls. The EPA recommends an overall VOC control efficiency of 90 percent as RACT for each coating line.

New Jersey adopted amendments to N.J.A.C. 7:27–16.7, based on the CTG, which requires paper, film, and foil coating operations to implement best management practices if the actual VOC emissions exceed 15 pounds per day for all coating operations. The EPA proposes to find that New Jersey's adopted PFFC rules are as effective in regulating the source category as the EPA's CTG document.

Miscellaneous Metal and Plastic Parts Coatings (MMPPC)

The EPA issued a 2008 CTG for miscellaneous metal and plastic parts coatings. The CTG recommended three options for controlling VOC emissions: (1) VOC content limits for each coating category based on the use of low-VOC content coatings and specified application methods to achieve good transfer efficiency; (2) equivalent VOC emission rate limits based on the use of a combination of low-VOC coatings, specified application methods, and add-on controls; or (3) an overall VOC control efficiency of 90 percent for facilities that choose to use add-on controls instead of low-VOC Content coatings and specified application methods. In addition, the EPA recommended work practices to further reduce VOC emissions from coatings as well as to minimize emissions from cleaning materials used in miscellaneous metal product and plastic part surface coating processes.

New Jersey adopted new rules at N.J.A.C. 7:27–16.15, based on the EPA CTG, which specify an applicability limit of 2.7 tons of actual VOC emissions during any consecutive 12-month period from all miscellaneous metal and plastic part coating operations, including related cleaning activities. Compliance can be achieved by either meeting the maximum allowable VOC content, achieving a minimum 90 percent overall control efficiency, or meeting a minimum overall control efficiency which is based upon the characteristics of the coating. Exemptions include surface coating

entitled ''Guidance for the Control of Volatile Organic Compounds Emitted by Ten Selected Source Categories,'' the EPA advised that the ''states are not required, at this time, to develop regulations for the vegetable oil manufacturing industry.'' The EPA guidance has not been revised since the March 1980 guidance. At this time, the EPA considers the vegetable oil CTG as only guidance for states when they need to develop attainment plans in nonattainment areas.

operations that exclusively use powder coating and metal parts coatings which must comply with a military specification that has been formulated to meet a higher, less stringent VOC content. Applicable facilities must implement best management practices, which include keeping cleaning materials in closed containers when not in use. Recordkeeping must be maintained which demonstrates compliance. The EPA proposes to find that New Jersey's adopted MMPPC rules are as effective in regulating the source category as the EPA's CTG document.[7]

Fiberglass Boat Manufacturing Materials (FBMM)

The EPA issued a CTG in 2008 that provides control recommendations for reducing VOC emissions from the use of gel coats, resins, and materials used to clean application equipment in fiberglass boat manufacturing operations. The CTG recommends the use of low-VOC content (monomer and non-monomer VOC) resin and gel coats with specified application methods. The CTG recommends the use of covers on mixing containers to further reduce VOC emissions from gel coats and resins. The CTG also recommends the use of low-VOC and low vapor pressure cleaning materials. Because the CTG recommendations are based on the 2001 National Emission Standards for Hazardous Air Pollutants (NESHAP) for boat manufacturing, those facilities that are major sources of HAP are already complying with the 2001 NESHAP and have already adopted these control measures. Because the 2001 NESHAP does not apply to area sources, area source fiberglass boat manufacturing facilities are not currently required to implement the measures provided in the NESHAP and recommended in the CTG. There are boat manufacturing facilities in ozone nonattainment areas that meet the applicability threshold in the CTG and would provide VOC emission reductions when the CTG recommended controls are applied. These control approaches are recommended for all fiberglass boat manufacturing facilities where total actual VOC emissions from all fiberglass boat manufacturing operations are equal to or exceed 15 pounds per day.

New Jersey adopted new rules at N.J.A.C. 7:27–16.14, based on the EPA CTG, which establish an applicability limit of actual VOC emissions, before add-on control, of 15 pounds per day from all fiberglass boat manufacturing operations. Exemptions include production of vessels that must meet military specifications and production of parts of boats that do not involve the manufacture of fiberglass. Compliance can be achieved by meeting a maximum monomer VOC content standard, meeting a maximum monomer VOC mass emission rate, or installation of a VOC control apparatus. Recordkeeping must be maintained which demonstrates compliance. The EPA proposes to find that New Jersey's adopted FBMM rules are as effective in regulating the source category as the EPA's CTG document.

New Jersey's Control and Prohibition of Air Pollution by Oxides of Nitrogen (Subchapter 19)

New Jersey's December 14, 2017 submittal, which included amendments to N.J.C.A. 7:27, Subchapter 19, establishes more stringent limits on NO_X emissions from existing simple cycle combustion turbines combusting natural gas and compressing gaseous fuel at major NO_X facilities and stationary reciprocating engines combusting natural gas and compressing gaseous fuel at major NO_X facilities. The EPA proposes to find that the NOx emission limits adopted by New Jersey and set forth in their December 14, 2017 submittal are as effective in regulating the source categories as the EPA's recommendations and guidance.

Stationary Natural Gas Compressor Turbines and Reciprocating Engines

In New Jersey's December 14, 2017 submittal, New Jersey adopted amendments to its rules for stationary gas turbines and engines. New Jersey amended N.J.A.C. 7:27–19.5 by adopting new standards for NO_X emissions from existing simple cycle combustion turbines combusting natural gas and compressing gaseous fuel at major NO_X facilities (compressor turbines). The standard provides, at 7:27–19.5(l) that, beginning November 6, 2019, any simple cycle combustion turbine combustion natural gas and compressing gaseous fuel at a major NO_X facility shall not emit more than 42 ppm by volume, dry basis (ppmvd), of NO_X corrected to 15 percent oxygen. NJDEP amended N.J.A.C. 7:27–19.8 by adopting new standards for NO_X emissions from stationary reciprocating engines combusting natural gas and compressing gaseous fuel at major NO_X facilities (compressor engines). The standard provides, at 7:27–19.8 (g), that beginning November 6, 2019, the owner or operator of a two-stroke lean burn engine capable of producing an output of 200 brake horsepower (bhp) or more but less than 500 bhp, combusting natural gas, and compressing gaseous fuel at a major NO_X facility shall cause it to emit no more than 3.0 grams NO_X/brake horsepower-hour (bhp-hr). The standard also provides, at 7:27–19.8 (h), that beginning November 6, 2019, the owner or operator of a four-stroke lean burn engine or four-stroke rich burn engine capable of producing an output of 200 bhp or more but less than 500 bhp, combusting natural gas, and compressing gaseous fuel at a major NO_X facility shall cause it to emit no more than 2.0 grams NO_X/bhp-hr.

The EPA proposes to find that the adopted rules are consistent with EPA guidance and address NO_X RACT requirements by establishing new limits on NO_X emissions from existing simple cycle combustion turbines combusting natural gas and compressing gaseous fuel at major NO_X facilities and stationary reciprocating engines combusting natural gas and compressing gaseous fuel at major NO_X facilities.

Nitrogen Oxide (NO_X) Reasonably Available Control Technology (RACT) and Volatile Organic Compounds (VOC) RACT Certification

In New Jersey's January 2, 2018 submittal, the State certified that they have addressed RACT requirements for the 2008 75 ppb 8-hour ozone NAAQS supported by their June 11, 2015 and December 14, 2017 submittals. EPA proposes to find that New Jersey has demonstrated that it has met the NO_X RACT and VOC RACT requirements. In some instances, New Jersey has gone beyond RACT by adopting control measures more stringent than the Federal rules and CTGs.

New Jersey's VOC RACT rules cover source categories such as VOC stationary storage tanks, gasoline transfer operations, VOC transfer operations other than gasoline, marine tank vessel loading and ballasting operations, open tanks and solvent cleaning operations, surface coating and graphic arts operations, boilers, stationary combustion turbines, stationary reciprocating engines, asphalt pavement production plants, surface coating operations at mobile equipment repair and finishing facilities, flares, other source operations, leak detection and repair, application of cutback and emulsified asphalts, petroleum solvent

[7] New Jersey's rule includes a partial exemption for military specification coatings from the new VOC limits for metal parts and products, at N.J.A.C. 7:27–16.15(c)(1). N.J.A.C. 7:27–16.15(c)(3)(vii) exempts any military specification coating that has been formulated to meet a higher, less stringent VOC content limit. Additional exceptions include less stringent VOC content limits for extreme high gloss topcoat (craft) and other substrate antifoulant coating than those recommended in the MMPPC CTG. This departure from the MMPPC CTG recommendation is based on EPA guidance memo ''Control Technique Guidelines for Miscellaneous Metal and Plastic Part Coatings—Industry Request for Reconsideration''.

dry cleaning operations, natural gas pipelines, and their NO_X RACT cover source categories such as boilers serving electric generating units, stationary combustion turbines, industrial/commercial/institutional boilers and other indirect heat exchangers, stationary reciprocating engines, asphalt pavement production plants, glass manufacturing furnaces, emergency generators, municipal solid waste (MSW) incinerators and sewage sludge incinerators. These RACT controls that have been promulgated in N.J.A.C. 7:27, have been approved by the EPA as part of New Jersey's SIP most recently on August 3, 2010 [8] and December 22, 2010.[9]

Enhanced Motor Vehicle Inspection and Maintenance (I/M) Program Certification

In New Jersey's January 2, 2018 submission, the State certifies that its state-wide rules at N.J.A.C. 7:27–14 and 15, N.J.A.C. 7:27B–4 and B–5 and the Motor Vehicle Commission (MVC) rules at N.J.A.C. 13:20–43, satisfy Federal requirements for an enhanced motor vehicle I/M Program for the 2008 75 ppb 8-hour ozone NAAQS.

Four categories of vehicles are subject to the enhanced I/M program: light-duty gasoline-fueled vehicles, heavy-duty gasoline-fueled vehicles, light-duty diesel-powered vehicles and heavy-duty diesel-powered vehicles. Within each category are commercial and non-commercial vehicles.

EPA approved New Jersey's enhanced I/M program as meeting applicable requirements of the CAA. 67 FR 2811. On April 3, 2009 and September 9, 2016, New Jersey adopted amendments to its enhanced I/M Program. The EPA approved these amendments into the SIP. 83 FR 21174 (May 9, 2018).

Emission Statement Program Certification

In New Jersey's January 2018 submittal, the State certifies that its state-wide rules at N.J.A.C. 7:27–21 satisfy Federal requirements for an emission statement program for the 2008 75 ppb 8-hour ozone NAAQS. The EPA most recently approved a revision to Subchapter 21 into the SIP on August 3, 2010.[10]

The EPA stated in the 2008 ozone implementation rule that if an area has a previously approved emission statement rule in force for the 1997 ozone NAAQS or the 1-hour ozone NAAQS that covers all portions of the nonattainment area for the 2008 ozone NAAQS, such rule should be sufficient for purposes of the emissions statement requirement for the 2008 ozone NAAQS.

N.J.A.C. 7:27–21 requires the submission of annual emission statements from major facilities. From these statements, the Department develops reports of emissions of all criteria pollutants and submits them to the EPA pursuant to the Federal Air Emission Reporting Requirements (AERR) Rule for uploading to the EPA's National Emission Inventory (NEI).

Federal Nonattainment New Source Review (NNSR) Program Certification

In New Jersey's January 2018 submission, the State certifies that its existing state-wide NNSR rules codified at N.J.A.C. 7:27–18, which regulate the New Jersey portions of the Northern NJ–NY–CT and Southern NJ–PA–DE–MD Nonattainment Areas for the 2008 75 ppb 8-hour ozone NAAQS are at least as stringent as the Federal requirements at 40 CFR 51.165 for ozone and its precursors. See 80 FR 12264 (March 6, 2015). The EPA most recently approved a revision to Subchapter 18 into the SIP on July 25, 1996.[11] New Jersey's demonstration that its NNSR rules comply with the ozone specific Federal provisions is provided in Table 8–2 of its submission.

IV. What is the EPA's evaluation of New Jersey's SIP submittals?

New Jersey submitted a state-wide RACT assessment on June 11, 2015. The RACT submission from New Jersey consists of: (1) A certification that previously adopted RACT controls in New Jersey's SIP for various source categories that were approved by the EPA under the 1-hour and the 1997 8-hour ozone standards are based on the currently available technically and economically feasible controls and that they continue to represent RACT for the 2008 8-hour ozone standard for implementation purposes; (2) New Jersey's 14 existing case-by-case source specific limits, approved by the EPA for the 1997 8-hour ozone standard, which New Jersey indicates continue to meet RACT for the 2008 8-hour ozone standard; (3) a negative declaration that for certain CTGs and/or ACTs there are no sources within New Jersey or that there are no sources within New Jersey above the applicability threshold; and (4) a commitment to revise and adopt, and submit as a SIP revision, a new or more stringent regulation(s), incorporating four CTGs, if determined to be more effective than current New Jersey requirements, and to consider further limiting NO_X emissions from natural gas compressor engines and turbines. New Jersey's December 14, 2017 submittal addresses the commitment for the four CTGs and two ACTs. New Jersey's January 8, 2018 SIP revision submittal certified, among other things, that the State's NO_X RACT, VOC RACT, enhanced I/M program, emission statement program and ozone specific provisions NNSR program satisfy Federal regulations and are at least as stringent as the Federal requirements.

The EPA has reviewed New Jersey's RACT analysis including the state-wide RACT analysis submitted on June 11, 2015, the December 14, 2017 revisions and the January 2, 2018 certification that the State has adopted all applicable NO_X RACT and VOC RACT. EPA proposes to find that these submissions fully address the OTR RACT requirements, the moderate RACT requirements for the NYMA and address the RACT requirements consistent with sections 172(c)(1), 182(b)(2) and 182(f) of the CAA, as interpreted by the EPA's regulations, guidance and policies. Also, the EPA has reviewed portions of New Jersey's January 2, 2018 SIP submittal that certify the State has satisfied the requirements for an enhanced motor vehicle I/M program, an emission statement program and an ozone specific provisions NNSR program, and the EPA is proposing to approve the State's certifications.

V. What action is the EPA proposing?

The EPA has evaluated the information provided by New Jersey and is proposing to approve New Jersey's state-wide RACT submittal dated June 11, 2015 and the State's December 14, 2017 SIP revision rule, which include a declaration that the following source-specific categories either do not exist in this State, or fall below significant emission unit applicability thresholds in the CTGs: (1) Manufacture of Vegetable Oils; (2) Manufacture of Pneumatic Rubber Tires; (3) Aerospace Coatings; (4) Shipbuilding and Ship Repair Operations; (5) Metal Furniture Coatings; (6) Large Appliance Coatings; and (7) Auto and Light Duty Truck Original Equipment Manufacturer (OEM) Assembly Coatings. The submittals also include amendments to N.J.A.C. 7:27, Subchapter 16, ''Control and Prohibition of Air Pollution by Volatile Organic Compounds,'' Subchapter 19, ''Control and Prohibition of Air Pollution by Oxides of

[8] 75 FR 45483.

[9] 75 FR 80340.

[10] 75 FR 45483.

[11] 61 FR 38591.

Nitrogen,'' [12] for purposes of satisfying the 2008 8-hour ozone standard RACT requirements, NO_X RACT for major sources, Non-CTG VOC RACT for major sources, all VOC CTG RACT sources and relevant OTR RACT requirements. The EPA is also proposing to approve portions of New Jersey's January 2, 2018 SIP revision that certifies the State has satisfied the requirements for an enhanced motor vehicle I/M program, an emission statement program, an ozone specific provisions NNSR program. As indicated in footnote 5, above, the EPA will address the remainder of the January 2, 2018 SIP submittal in a separate rulemaking.

The EPA is soliciting public comments on the issues discussed in this proposal. These comments will be considered before the EPA takes final action. Interested parties may participate in the Federal rulemaking procedure by submitting written comments as discussed in the **ADDRESSES** section of this rulemaking.

VI. Incorporation by Reference

In this rule, the EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference of revisions to Title 7, Chapter 27: Subchapters 16 and 19 of the New Jersey Administrative Code that implements New Jersey's RACT regulations for VOCs and NO_X, as described in section III of this preamble.

The EPA has made, and will continue to make, these materials generally available through *www.regulations.gov* and at the EPA Region 2 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

VII. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 382, January 21, 2011);
- is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempt under Executive Order 12866;
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rulemaking action, pertaining to New Jersey's 2008 8-hour ozone RACT submission the is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Nitrogen Dioxide, Intergovernmental Relations, Ozone, Reporting and recordkeeping requirements, Volatile Organic Compounds.

[12] State Effective dates for both rules is November 6, 2017 (49 N.J.R. 3518).

Approval and Promulgation of Air Quality Implementation Plans; West Virginia; 2018 Amendments to West Virginia's Ambient Air Quality Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a state implementation plan (SIP) revision submitted by the State of West Virginia. This revision updates the effective date by which the state incorporates by reference the national ambient air quality standards (NAAQS) as well as their monitoring reference and equivalent methods. This action is being taken under the Clean Air Act (CAA).

DATES: Written comments must be received on or before August 30, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R03–OAR–2018–0550 at *http://www.regulations.gov,* or via email to *spielberger.susan@epa.gov.* For comments submitted at *Regulations.gov*, follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. For either manner of submission, EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be confidential business information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the

full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Joseph Schulingkamp, (215) 814–2021, or by email at *schulingkamp.joseph@epa.gov.*

SUPPLEMENTARY INFORMATION: On June 8, 2018, the West Virginia Department of Environmental Protection (WVDEP) submitted a formal revision to its SIP pertaining to amendments of Legislative Rule, 45CSR8—Ambient Air Quality Standards. The SIP revision consists of revising the effective date of the incorporation by reference of the NAAQS and the associated monitoring reference and equivalent methods.

I. Summary of SIP Revision

This SIP revision is required by WVDEP in order to update the State's incorporation by reference of the primary and secondary NAAQS and the ambient air monitoring reference and equivalent methods, found in 40 CFR parts 50 and 53, respectively. Currently, 45CSR8 incorporates by reference 40 CFR parts 50 and 53 as effective on June 1, 2016. Since that date, EPA retained the standard for lead and made a technical correction to the particulate standard. *See* 81 FR 71906 and 82 FR 14325, respectively. EPA also designated one new ambient air monitoring reference method for measuring concentrations of sulfur dioxide, four new ambient air monitoring equivalent methods for measuring concentrations of fine and coarse particulate matter ($PM_{2.5}$ and $PM_{10,}$ respectively), and two new equivalent methods for measuring concentrations of nitrogen dioxide (NO_2) in ambient air.

The amendments to the legislative rule include the following changes: To section 45–8–1 (General), the filing, effective, and incorporation by reference dates are changed to reflect the update of the legislative rule; to section 45–8–3 (Adoption of Standards), the effective dates for the incorporation by reference of the primary and secondary NAAQS and the ambient air monitoring reference and equivalent methods are changed. The filing and effective dates of the legislative rule were updated to March 22, 2018 and June 1, 2018 respectively. The effective date of the incorporation by reference of 40 CFR parts 50 and 53 changed from June 1, 2016 to June 1, 2017.

II. Proposed Action

EPA is proposing to approve the West Virginia SIP revision updating the date of incorporation by reference, which was submitted on June 8, 2018. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

III. Incorporation by Reference

In this proposed rule, EPA is proposing to include in a final EPA rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is proposing to incorporate by reference 45CSR8, as effective on June 1, 2018. EPA has made, and will continue to make, these materials generally available through *http://www.regulations.gov* and at the EPA Region III Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866.
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule, updating the effective date of West Virginia's 45CSR8, does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Lead, Nitrogen dioxide, Ozone, Particulate matter, Sulfur oxides.

Air Plan Approval; Oregon: Lane County Permitting and General Rule Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to approve, and incorporate by reference, specific changes to the Oregon State Implementation Plan as it applies in Lane County, Oregon. The local air

agency in Lane County, Lane Regional Air Protection Agency, has revised its rules to align with recent changes to Oregon state regulations. The revisions, submitted on August 29, 2014 and March 27, 2018, are related to the criteria pollutants for which the EPA has established national ambient air quality standards—carbon monoxide, lead, nitrogen dioxide, ozone, particulate matter, and sulfur dioxide. The regulatory changes address federal particulate matter requirements, update the major and minor source pre-construction permitting programs, add state-level air quality designations, update public processes, and tighten emission standards for dust and smoke.

DATES: Comments must be received on or before August 30, 2018.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R10–OAR–2018–0238, at *https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

SUPPLEMENTARY INFORMATION: Throughout this document, wherever ''we,'' ''us,'' or ''our'' is used, it is intended to refer to the EPA.

Table of Contents

I. Background

Each state has a Clean Air Act (CAA) State Implementation Plan (SIP), containing the control measures and strategies used to attain and maintain the national ambient air quality standards (NAAQS) established for the criteria pollutants (carbon monoxide, lead, nitrogen dioxide, ozone, particulate matter, sulfur dioxide). The SIP contains such elements as air pollution control regulations, emission inventories, attainment demonstrations, and enforcement mechanisms. The SIP is a living compilation of these elements and is revised and updated by a state over time—to keep pace with federal requirements and to address changing air quality issues in that state.

The Oregon Department of Environmental Quality (ODEQ) implements and enforces the Oregon SIP through rules set out in Chapter 340 of the Oregon Administrative Rules (OAR). Chapter 340 rules apply in all areas of the state, except where the Oregon Environmental Quality Commission (EQC) has designated a local agency as having primary jurisdiction.

Lane Regional Air Protection Agency (LRAPA) has been designated by the EQC to implement and enforce state rules in Lane County, and also to adopt local rules that apply within Lane County. LRAPA may promulgate a local rule in lieu of a state rule provided: (1) It is as strict as the corresponding state rule; and (2) it has been submitted to and not disapproved by the EQC.[1] This delegation of authority in the Oregon SIP is consistent with CAA section 110(a)(2)(E) requirements for state and local air agencies.

On August 29, 2014 and March 27, 2018, LRAPA and ODEQ submitted specific revisions to the Oregon SIP as it applies in Lane County. These changes align local rules with recently revised state rules, approved by the EPA on October 11, 2017 and incorporated by reference into the Code of Federal Regulations (CFR) at 40 CFR part 52, subpart MM (82 FR 47122). The changes address federal particulate matter requirements, revise the major and minor source pre-construction permitting programs, add state-level air quality designations, update public processes, and tighten emission standards for dust and smoke.

We note that the March 27, 2018, revisions partially supersede the August 29, 2014, revisions. In this action, we are reviewing and taking action on the most recent version of the submitted rules applicable in Lane County, as described below. In describing our evaluation, we have focused on the substantive rule changes. We have not described typographical corrections, minor edits, and renumbering changes.

II. Evaluation of Revisions

A. Title 12: General Provisions and Definitions

Title 12 in LRAPA's rules contains generally-applicable provisions and definitions used throughout Lane County air quality rules. The submitted revisions align the definitions in Section 12–005 with the definitions in state rules, recently reviewed and approved by the EPA.[2] In this section of our evaluation, we discuss key changes to existing definitions and substantive new terms used in multiple titles. Terms used primarily in a single title are described in the discussion section for that particular title.

Key definition changes include narrowing the definition of ''adjacent'' by limiting the use of this defined term (''interdependent facilities that are nearby to each other'') to the ''major source'' and ''source'' terms in LRAPA's program for air contaminant discharge permits. Definitions of the terms ''capture efficiency,'' ''control efficiency,'' ''destruction efficiency,''

[1] *See* OAR 340–200–0010(3), state effective April 16, 2015, codified at 40 CFR 52.1970.

[2] *See* OAR 340–200–0020, state effective April 16, 2015, and approved by the EPA on October 11, 2017 (82 FR 47122).

and ''removal efficiency'' were added to differentiate amongst similar terms.

LRAPA revised the term ''categorically insignificant activities'' to narrow when emissions may be excluded from consideration—in some aspects of source permitting—as ''insignificant.'' For example, there is a cap on the aggregate emissions from fuel burning equipment that may be considered categorically insignificant, and there is also a restriction on when emergency generators may be considered categorically insignificant (limiting the exemption to no more than 3,000 horsepower, in the aggregate). We note that LRAPA adopted a *new* category of insignificant emissions, as Oregon did, namely, fuel burning equipment brought on site for six months or less for construction, maintenance, or similar purposes, provided the equipment performs the same function as the permanent equipment, and is operated within the source's existing plant site emission limit. Importantly, however, insignificant activity emissions must be included in determining whether a source is a ''federal major source'' or a ''major modification'' subject to federal major new source review (federal major NSR).[3] In addition, categorically insignificant activities must still comply with all applicable requirements.

LRAPA revised definitions to consistently use certain terms, such as ''construction,'' ''control device,'' ''federal major source,'' ''immediately,'' ''fugitive emissions,'' ''major modification,'' ''major source,'' ''PM_{10},'' ''$PM_{2.5}$,'' and ''stationary source.'' LRAPA added definitions to align with state rules, including ''continuous compliance determination method,'' ''emergency,'' ''emission limitation,'' ''excursion,'' ''greenhouse gases,'' ''Indian governing body,'' ''Indian reservation,'' ''potential to emit,'' and ''synthetic minor source.'' The term ''internal combustion engine'' was defined to clarify the universe of regulated fuel burning equipment under local rules.

In the definition of ''opacity,'' LRAPA spelled out that visual opacity determinations are to be made using EPA Method 203B. Method 203B is designed for time-exception regulations, such as those that establish a limit on the average percent opacity for a period or periods aggregating more than three minutes in any one hour. There are a small number of LRAPA visible emissions standards that are not time-exception regulations, and in those cases, LRAPA rules specify a different test method, including, for example, EPA Method 9. All specified methods are included in the March 2015 version of the Oregon Source Sampling Manual, approved by the EPA on October 11, 2017, for purposes of the limits in the Oregon SIP (82 FR 47122). Please see our discussion of opacity standards and methods for visual opacity determinations in Section H. below.

Consistent with the state definition, LRAPA defined the term ''portable'' as ''designed and capable of being carried or moved from one location to another.'' At the same time, the definition of ''stationary source'' was updated to include portable sources required to have permits under the air contaminant discharge permitting program at Title 37.

LRAPA changed the definition of ''modification'' to differentiate it from the terms ''major modification'', ''permit modification'', and ''title I modification'', and to make clear that it applies to a change in a portion of a source, as well as a source in its entirety. LRAPA also simplified the definition of ''ozone precursor'' to remove redundant language pointing to the reference method for measuring volatile organic compounds (VOCs). The term ''VOC'' was also updated to reflect changes to the federal definition of ''VOC'' at 40 CFR 51.100(s).

LRAPA formally defined ''wood fuel-fired device'', consistent with the definition in state rules. The term was added and defined as ''a device or appliance designed for wood fuel combustion, including cordwood stoves, woodstoves, and fireplace stove inserts, fireplaces, wood fuel-fired cook stoves, pellet stoves and combination fuel furnaces and boilers that burn wood fuels.'' The remainder of the new definitions established by LRAPA in Title 12 are common dictionary terms and are not discussed in this summary.

We have evaluated these Title 12 definition changes, and the changes to definitions discussed in the sections below, and we propose to find that LRAPA's defined terms are consistent with CAA requirements and the EPA's implementing regulations. We therefore propose to approve the submitted definitions into the Oregon SIP for Lane County.

Other Provisions

The revisions also include general rules in Title 12 submitted to be consistent with state rules in Division 200. LRAPA revised Section 12–001 *General* to align with OAR 340–200–0010 *Purpose and Application,* including repealing the SIP-approved version of Section 12–001(2), state effective March 8, 1994, and renumbering the section paragraphs. Section 12–001(2) stated that ''in cases of apparent conflict between rules and regulations within these titles, the most stringent regulation applies unless otherwise expressly stated,'' and is appropriately removed from the SIP.

Section 12–010 was added to spell out abbreviations and acronyms used throughout the Lane County air quality rules, consistent with OAR 340–200–0025. LRAPA also added Section 12–020 listing activities that are not subject to local air quality regulations, comparable to OAR 340–200–0030 and Oregon Revised Statutes (ORS) 468A–020. Section 12–020(2) makes clear, however, that the exceptions in subsection (1) do not apply to the extent such local air regulations are necessary to implement CAA requirements. We note that LRAPA added Section 12–025 identifying key reference materials, including the March 2015 version of the Oregon Source Sampling Manual, approved by the EPA into the Oregon SIP on October 11, 2017 (82 FR 47122). We propose to approve and incorporate by reference these changes to Title 12.

Consistent with our recent action on OAR 340–200–0050, LRAPA did not submit Section 12–030 *Compliance Schedules* for approval into the SIP. Any compliance schedule established by LRAPA under this provision must be specifically submitted to, and approved by the EPA, before it will be federally-enforceable or change the requirements of the EPA-approved SIP.[4]

B. Title 13: General Duties and Powers of Board and Director

Title 13 sets out general authority to adopt, implement and enforce regulations in Lane County, including issuing permits. These general authority provisions were first approved into the Oregon SIP in 1993 (58 FR 47385, September 9, 1993). We note, that at the time of that original approval, the general authority provisions were located in Title 12, and were later renumbered to Title 13. These provisions contain long-standing requirements for make-up of the LRAPA Board and disclosures of potential conflicts of interest for board members and director, approved as meeting CAA

[3] This includes both the prevention of significant deterioration (PSD) new source review permitting program that applies in attainment and unclassifiable areas (40 CFR 51.166) and the nonattainment major source new source review permitting program that applies in nonattainment areas (40 CFR 51.165).

[4] 40 CFR 51.102(a)(2) and (c) and 260; 82 FR 47122, October 11, 2017.

state board requirements under section 128.[5]

We propose to find that the submitted updates to Title 13 remain consistent with CAA section 110 requirements for permit issuance, enforcement authority, state and local agencies, and state boards. In this action, we are proposing to approve Title 13 to the extent the provisions relate to the implementation of requirements in the SIP, but we note we are not incorporating these provisions by reference into 40 CFR part 52, subpart MM. These types of rules are generally not incorporated by reference into the CFR because they may conflict with the EPA's independent administrative and enforcement procedures under the CAA.

C. Title 14: Rules of Practice and Procedures

The submissions revise Title 14 to align with Oregon's SIP-approved state rules in Division 11. LRAPA's revisions follow the Oregon Attorney General Model Rules, as do the comparable Oregon rules, and address procedures for filing and serving documents in contested cases (appeals of LRAPA and ODEQ actions). Title 14 was revised to improve the clarity and completeness of contested case appeals coming before the LRAPA Board. This title provides authority needed to implement the SIP in Lane County, and is consistent with the CAA requirements for the issuance of permits and enforcement authority. The EPA therefore proposes to approve the submitted revisions to Title 14 *Rules of Practice and Procedures,* to the extent it relates to implementation of requirements contained in the Oregon SIP. We are not incorporating these rules by reference into the CFR, however, because we rely on the EPA's independent administrative and enforcement procedures under the CAA.

D. Title 29: Designation of Air Quality Areas

This division contains rules for the designation of air quality areas in Lane County. In Section 29–0010, LRAPA culled definitions to leave only those directly related to designated areas in Lane County, including Eugene-Springfield and Oakridge. Sections 29–0020, 0050, and 0060 were added to mirror state air quality region and prevention of significant deterioration area rules in OAR 340–204–0020, 0050, and 0060, respectively. Section 29–0030 addresses the two nonattainment areas in Lane County, namely the Oakridge Urban Growth Boundary (coarse particulate matter (PM_{10})) and the Oakridge Nonattainment Area (fine particulate matter ($PM_{2.5}$)). In addition, LRAPA added Sections 29–0070 *Special Control Areas,* 29–0080 *Motor Vehicle Inspection Boundary Designations,* and 29–0090 *Oxygenated Gasoline Control Areas,* to correspond to state rule sections OAR 340–204–0070, 0080, and 0090, respectively.

A significant change in this title is the introduction of three concepts: ''sustainment areas,'' ''reattainment areas,'' and ''priority'' sources.[6] Both sustainment and reattainment areas are state-level designations designed to add to federal requirements. We note that LRAPA and Oregon have both implemented a state-level designation in the past—specifically, the maintenance area designation. Following Oregon's lead, LRAPA is now defining two added state designations intended to help areas address air quality problems by further regulating emission increases from major and minor sources.

To designate an area as sustainment or reattainment, the LRAPA rule revisions create a similar process as was used in the past to designate a maintenance area. The process includes public notice, a rule change, and approval by the LRAPA Board. Oregon and LRAPA designed the new designations and associated requirements with the stated intent to help solve air quality issues while not changing attainment planning requirements or federal requirements for major stationary sources.

The sustainment area designation is designed to apply to an area where monitored values exceed, or have the potential to exceed, ambient air quality standards, but which has not been formally designated nonattainment by the EPA.[7] To construct or modify a major or minor source in a sustainment area, the owner or operator may need to offset new emissions with reductions from other sources, including the option of targeting ''priority'' sources, in that area. Priority sources are defined as sources causing or contributing to elevated emissions levels in the area. This is determined using local airshed information, such as emissions inventories and modeling results. A new major or minor stationary source seeking to construct in a sustainment area may obtain more favorable offsets from priority sources.

The reattainment area designation is designed to apply to an area that is formally designated nonattainment by the EPA, but that has achieved three years of quality-assured/quality-controlled monitoring data showing the area is attaining the relevant standard.[8] When an area has met attainment planning requirements and has attained the standard, the CAA requires that a state submit, and the EPA approve, a maintenance plan demonstrating attainment for the next ten years. The state may then request that the EPA redesignate the area to attainment. In the interim, LRAPA may designate the area a reattainment area. The submitted rules require that all elements of the area's attainment plan continue to apply with a reattainment designation. However, minor sources will be subject to less stringent state new source review permitting requirements—unless the source has been specifically identified as a significant contributor to air quality problems in the area, or the source has control requirements that are relied on as part of the attainment plan. The federal requirements for redesignation remain in place and are unchanged.

In the submissions, LRAPA included the Oakridge area as a state-designated reattainment area with respect to $PM_{2.5}$.[9] We note that at the federal level, the EPA has approved the Oakridge $PM_{2.5}$ attainment plan, determined the Oakridge area attained the 2006 24-hour $PM_{2.5}$ NAAQS by the applicable attainment date, and achieved clean data for the most recent three years of valid, certified monitoring data (83 FR 5537, February 8, 2017). However, the Oakridge area remains a federal nonattainment area for the 2006 24-hour $PM_{2.5}$ NAAQS until LRAPA and Oregon submit a maintenance plan to the EPA to ensure the area can continue to meet the standard for the next 10 years, and the EPA approves the maintenance plan and redesignates the Oakridge area to attainment.[10] We propose to determine that designation of the Oakridge area as a state reattainment area does not change federal requirements for the area, and that the Oakridge $PM_{2.5}$ attainment plan remains in effect.

We propose to approve these revisions to Title 29 because the submitted rules for state-level designations are consistent with CAA requirements and the EPA's implementing regulations for attainment planning and major source pre-construction permitting. The related changes to LRAPA's major and minor source permitting program—and our

[9] *See* Section 29–0310(2)(a).

[10] *See* 40 FR 81.338.

evaluation of those changes—are discussed in detail in Section M. below.

E. Title 30: Incinerator Regulations

The submissions made changes to LRAPA's incinerator regulations consistent with those in state rule at Division 230. Most changes were minor; however, a significant change was made to tighten limits and clarify the appropriate method of compliance for crematory incinerators. Consistent with our previous action on August 3, 2001, we propose to approve the revisions to Title 30, except as those rules relate to hazardous air pollutants and odors that are not also criteria pollutants or precursors (66 FR 40616).

F. Title 31: Public Participation

Title 31 governs public participation in the review of proposed permit actions. This title corresponds to Division 209 in state rules. LRAPA submitted this title for SIP approval, consistent with recent changes to Oregon's public participation rules. Title 31 provides four different levels of public process, depending on the type of permitting action, with Category I having the least amount of public notice and opportunities for public participation, and Category IV having the most. The majority of new source review permitting actions are subject to category III, for which LRAPA provides public notice and an opportunity for a hearing at a reasonable time and place if requested, or if LRAPA otherwise determines a public hearing is necessary. Category IV public process apply to major new source review permitting actions, and LRAPA provides an informational meeting before issuing a draft permit for public review and comment.

LRAPA has aligned the requirements for informational meetings with state rules in Division 209, to provide at least a 14-day public notice, before the scheduled informational meeting. The submitted rules also make clear that although LRAPA accepts, and will consider, comments from the public during the informational meeting, LRAPA does not maintain an official record of the informational meeting, or respond in writing to comments provided at the informational meeting. This same approach to informational meetings in state rules was approved by the EPA into the Oregon SIP on October 11, 2017 (82 FR 47122).

The submissions also addressed public participation requirements for permitting in state-designated sustainment and reattainment areas, detailed the option of email notification, and identified where public comment records are made available for review. Hearing procedures, laid out at Section 31–0070, correlate with hearing provisions at OAR 340–209–0070. We propose to approve the hearing procedures, but not incorporate them by reference, to avoid confusion or potential conflict with the EPA's independent authorities.

In sum, we have concluded that the submitted LRAPA public participation rules are consistent with the CAA and federal requirements for public notice of new source review actions in 40 CFR 51.161 *Public availability of information,* 40 CFR 51.165 *Permit requirements,* and 40 CFR 51.166 *Prevention of significant deterioration of air quality,* and we propose to approve them.

G. Title 32: Emission Standards

This title contains emission standards and provisions of general applicability, including requirements for highest and best practicable treatment and control, operating and maintenance, typically achievable control technology, additional requirements imposed on a permit by permit basis, particulate emission limits for process equipment and other sources (other than fuel or refuse burning equipment or fugitive emissions), and alternative emission limits (bubbles).

LRAPA made changes to Section 32–001 to clarify what definitions apply to this section (those in Titles 12 and 29) in addition to more specific definitions for ''distillate fuel oil'' and ''residual fuel oil.'' In Section 32–007, LRAPA clarified that pressure drop and ammonia slip are operational, maintenance, and work practice requirements that may be established in a permit condition or notice of construction approval. Section 32–008 *Typically Achievable Control Technology* was also updated by moving procedural requirements from the definitions section to this section, and revising them to account for Oregon's changes to NSR, Major NSR and Type A State NSR, discussed below in Section M.

Notably, LRAPA retained its general, SIP-approved visible emission standards in the form of an aggregate exception of three minutes in a 60-minute period. Three-minute aggregate periods are to be measured by EPA Method 203B, a continuous opacity monitoring system, or an alternative monitoring method approved by LRAPA and that has been determined by the EPA to be equivalent to Method 203B. While LRAPA's form and method for evaluating visible emissions from sources are different than those in Oregon's corresponding SIP-approved rules (OAR 340–208–0110 was recently revised to a 6-minute block average as measured by EPA Method 9), both forms and their associated test methods are equally-valid means to measure opacity and determine compliance with standards.[11]

LRAPA also made changes to phase in tighter visible emission limits granted to wood-fired boilers in operation before 1970. These sources are required to meet a 40% visible emission limit. However, starting in 2020, these sources must meet a 20% visible emissions limit, except for certain, limited situations where a boiler-specific, short-term limit may be established in a source's operating permit, if appropriate and allowed under the SIP-approved permitting program.

Notably, LRAPA revised particulate emission limits under Section 32–015 to reduce emissions from certain non-fuel-burning sources built before June 1970. The rules in this section phase in tighter standards for older sources, generally tightening grain loading standards for existing sources from 0.2 grains per dry standard cubic foot (gr/dscf) to between 0.10 and 0.15 gr/dscf, depending on whether there is existing source test data for the source, and what that data shows. Timelines to achieve these rates depend on whether sources were built before or after June 1, 1970. Existing sources that operate equipment less frequently (less than 867 hours a year) must meet less stringent standards. For new sources, LRAPA has increased the stringency of the grain loading standard by adding a significant digit, revising the standard from 0.1 gr/dscf to 0.10 gr/dscf. Compliance with the grain loading standards is determined using test methods specifically identified in the March 2015 version of the Oregon Source Testing Manual, approved on October 11, 2017 (82 FR 47122).

LRAPA also tightened grain loading standards for fuel burning equipment (Sections 32–020 and 025) in the same manner as described above. Process weight provisions in Section 32–045 were aligned with state rules, and the listing of process weight limitations was moved to Section 32–8010. Sulfur content of fuels and sulfur dioxide emission limits in Section 32–065 were also updated by removing a coal space-heating exemption that expired in 1983, and clarifying that recovery furnaces are regulated in Title 33.

We propose to approve the revisions to Title 32 because they are consistent with the CAA and strengthen the SIP.

[11] The EPA approved OAR 340–208–0110, state effective April 16, 2015 on October 11, 2017 (82 FR 47122).

We note we are taking no action on Sections 32–050, and 32–055 because they are nuisance provisions related to concealment and masking of emissions and particle fallout. We are also taking no action on the acid rain provision in Section 32–075. These types of provisions are generally not appropriate for SIP approval because they are not related to attainment and maintenance of the NAAQS under CAA section 110 and the SIP.

H. Title 33: Prohibited Practices and Control of Special Classes of Industry

Title 33 establishes controls on specific sectors, including board products facilities, charcoal plants, Kraft pulp mills, and hot mix asphalt plants. LRAPA clarified that Title 12 definitions apply to this section, except where specific definitions are established in Title 33. Throughout this title, LRAPA removed open burning provisions made obsolete now that LRAPA limits open burning through regulations established in Title 47, most recently approved by the EPA on October 23, 2015 (80 FR 64346).

In Section 33–060, LRAPA made changes to improve the enforceability of opacity limits on veneer dryers and hardboard manufacturing operations. Section 33–070 was updated to ensure local rules for Kraft pulp mills are as stringent as the state equivalent. LRAPA also revised what was formerly referred to as ''replacement or significant upgrading'' of equipment for purposes of determining whether more restrictive standards apply. Alternative temperatures for hardboard tempering ovens must be approved using the procedures in the federal NESHAP for *Plywood and Composite Wood Products,* 40 CFR part 63, subpart DDDD. LRAPA added source test methods for particulate matter and demonstrations of oxygen concentrations in recovery furnace and lime kiln gases. Under the reporting section, LRAPA removed the alternative sampling option where transmissometers are not feasible because all pulp mills in Oregon now have transmissometers. Minor changes were made under a provision in this section authorizing LRAPA to determine that upset conditions at a subject source are chronic and correctable by the installation of new or modified process or control equipment, and the establishment of a program and schedule to effectively eliminate the deficiencies causing the upset conditions. This provision is consistent with the corresponding state provision at OAR 340–234–0270.[12]

LRAPA revised Section 33–075 *Hot Mix Asphalt Plants* to specify the appropriate test method to determine compliance. In addition, LRAPA added a requirement that hot mix asphalt plants must develop a fugitive emissions control plan if requested.

Except for the requirements relating to total reduced sulfur, odor, and reduction of animal matter, we propose to approve the submitted changes to Title 33 because they strengthen the SIP and are consistent with CAA requirements. Total reduced sulfur, odor, and reduction of animal matter requirements are not appropriate for SIP approval because they are not criteria pollutants, not related to the criteria pollutants regulated under title I of the CAA, not essential for meeting and maintaining the NAAQS, nor related to the requirements for SIPs under section 110 of the CAA. We are therefore excluding from the SIP the following parts of Section 33–070: The definitions of ''Other sources'' and ''Total Reduced Sulfur (TRS)'' in paragraph (1), and paragraphs (3)(a), (4)(b), (5)(b), (6)(a), and (6)(b); and Section 33–080 *Reduction of Animal Matter.*

I. Title 34: Stationary Source Notification Requirements

Title 34 contains a registration program for sources not subject to one of LRAPA's operating permit programs, as well as some of the requirements for the construction of new and modified sources. In Section 34–010, LRAPA broadened the applicability of this title, as Oregon did in Division 210, so that it applies to ''air contaminant sources'' and to ''modifications of existing portable sources that are required to have permits under title 37'', in addition to stationary sources. Sections 34–016 and 34–017 were added for recordkeeping and reporting, and enforcement, respectively.[13] LRAPA also added a new section for general source registration requirements and detailed the information an owner or operator must submit to register and re-register. Sections 34–034, 035, and 036 were added to clarify when a *Notice of Construction* application is required, how the construction/modification is categorized for purposes of process and public review, and what to include in a notice to construct.

LRAPA added Sections 34–037 and 038 to spell out when sources may proceed with construction or modification, and that construction approval does not mean approval to operate the source, unless the source is not required to obtain an ACDP under Title 37.

We propose to approve the revisions to Title 34 because we have determined they are consistent with CAA requirements and correct or clarify existing source notification requirements to help ensure that changes to sources go through the appropriate approval process. We note that Section 34–170 through 200 are not appropriate for SIP approval because they are related to title V of the CAA, not title I and the SIP.

J. Title 35: Stationary Source Testing and Monitoring

This title contains general requirements for source testing and monitoring. Title 35 was recently established to correlate closely with state provisions in Division 212. LRAPA clarified the term ''stationary source'' to include portable sources that require permits under Title 37. This change is consistent with the term as used in other titles. LRAPA also clarified, with respect to stack height and dispersion technique requirements, the procedures referenced in 40 CFR 51.164 are the major and minor NSR review procedures used in Oregon, as applicable.

Section 35–0140 sets forth test methods, and requires that sampling, testing, or measurements performed pursuant to this title conform to the methods in Oregon's March 2015 revised versions of the *Source Sampling Manual, Volumes I and II,* and *Continuous Monitoring Manual.* The revised manuals were approved by the EPA into the Oregon SIP on October 11, 2017 (82 FR 47122). In that action we concluded that the revised manuals are consistent with the EPA's monitoring requirements for criteria pollutants and we approved them for the purpose of the limits approved into the SIP.

We note that the submitted provisions in Section 35–0200 through 0280 are related to compliance assurance monitoring, and are not appropriate for SIP approval. The specified rules apply to title V sources only and implement the requirements of 40 CFR parts 64 and 70. We are taking no action on these rules because they are not appropriate for SIP approval under section 110 of title I of the CAA.

K. Title 36: Excess Emissions

LRAPA made several revisions to the excess emissions and emergency provision requirements in Title 36 and

[12] *See* EPA proposed approval of OAR 340–234–0270, state effective April 16, 2015 (March 22, 2017, 82 FR 14654 at page 14667).

[13] *See* OAR 340–214–0114, and OAR 340–214–0120.

submitted them for approval into the SIP. We are deferring action on the Title 36 revisions. We intend to address the submitted provisions of Title 36 in a separate, future action.

L. Title 37: Air Contaminant Discharge Permits

The Air Contaminant Discharge Permit (ACDP) program is both the federally-enforceable non-title V state operating permit program, and also the administrative mechanism used to implement the notice of construction and new source review programs. There are six types of ACDPs under state and LRAPA rules: Construction, General, Short Term Activity, Basic, Simple, and Standard. The types of ACDPs have not changed, but LRAPA has made some changes and clarifications to the criteria and requirements for the various ACDPs. LRAPA also revised application requirements to set application renewal deadlines, and to clarify the required contents of applications.

The applicability rules at Section 37–0020 reference the table of applicability criteria for the types of permits in Section 37–8010 *Table 1.* The associated fees are listed at Section 37–8020 *Table 2.* These sections are consistent with OAR 340–216–8010 *Table 1* and OAR 216–8020 *Table 2,* respectively, including the type of ACDP (Basic, General, Simple, or Standard) each source category is required to obtain prior to construction and operation. Overall, the list of sources required to obtain Basic, General, Simple, or Standard ACDPs was slightly expanded, with one exception. LRAPA removed the requirement that greenhouse gas-only sources obtain a Standard ACDP, and pay the associated permitting fees, consistent with the federal court decision described below in Section M.

For Construction ACDPs at Section 37–0052, LRAPA added a qualifier to the rule that construction commence within 18 months after the permit is issued. This deadline now applies only if a source is subject to federal major NSR and certain state major NSR permitting, which we have discussed in more detail below. LRAPA also added language to the public notice requirements for a modified Construction ACDP, making clear when public notice as a Category I permit action is appropriate, as opposed to a Category II permit action under Title 31. Although the construction permit itself expires, the requirements remain in effect and must be added to the subsequent operating permit.[14]

General ACDP requirements at Section 37–0060 were updated to refer to the appropriate public notice procedures, reference the fee class for specific source categories, and confirm the procedures that will be used to rescind a source's General ACDP, if the source no longer qualifies and must obtain a Simple or Standard ACDP instead. LRAPA also changed the rule section to make clear that the agency may rescind an individual source's assignment to a General Permit. When notified, the source has 60 days to submit an application for a Simple or Standard ACDP. *General ACDP Attachments,* Section 37–0062, was updated to clarify public notice requirements and fees.

For Simple ACDPs, it is now clear that LRAPA may determine a source ineligible for a Simple ACDP with generic emission limits, and instead, require the source obtain a Standard ACDP with source-specific emission limits, as necessary. LRAPA also clarified the public notice requirements and fees for Simple ACDPs and removed redundant requirements from the section that are also in Section 37–0020.

The requirements at Section 37–0066 were updated to lay out the different application requirements for sources seeking a Standard ACDP permit when they are subject to federal major versus minor NSR. LRAPA also changed this section to allow sources with multiple activities or processes at a single site, covered by more than one General ACDP or that has multiple processes, to obtain a Standard ACDP.

For processing permits, LRAPA's provision at Section 37–0082 now expressly provide that sources with expired ACDP permits may continue operating under the expired permit if they have submitted a timely and complete renewal application. Sources may also request a contested case hearing, if LRAPA revokes a permit or denies a permit renewal. We have determined in our review that LRAPA's Title 37 provisions are consistent with the Division 216 rule sections recently approved by the EPA on October 11, 2017 (82 FR 47122). Therefore, we find Title 37 is consistent with CAA requirements and propose to approve the submitted provisions.

M. Title 38: New Source Review

Parts C and D of title I of the CAA, 42 U.S.C. 7470–7515, set forth preconstruction review and permitting program requirements that apply to new and modified major stationary sources of air pollutants, known as major new source review (major NSR). The CAA major NSR programs include a combination of air quality planning and air pollution control technology program requirements. States adopt major NSR programs as part of their SIP. Part C is the Prevention of Significant Deterioration (PSD) program, which applies in areas that meet the NAAQS (attainment areas), as well as in areas for which there is insufficient information to determine whether the area meets the NAAQS (unclassifiable areas). Part D is the nonattainment new source review (nonattainment NSR) program, which applies in areas that are not in attainment of the NAAQS (nonattainment areas).

The EPA regulations for SIPs implementing these programs are contained in 40 CFR 51.165 and 51.166, and appendix S to part 51. Regulations addressing the EPA's minor new source review (NSR) requirements are located at 40 CFR 51.160 through 164. We note that states generally have more flexibility in designing minor NSR programs. Minor NSR programs, however, must still ensure that emissions from the construction or modification of a facility, building, structure, or installation (or any combination thereof) will not interfere with attainment and maintenance of the NAAQS, or violate an applicable portion of a control strategy approved into the SIP.

Oregon and LRAPA's major NSR program has long differed from the federal major NSR programs in several respects. The program does not subject the same sources and modifications to major NSR as would the EPA's rules. It also has had lower major source thresholds for sources in nonattainment and maintenance areas. The program requires fugitive emissions to be included in applicability determinations for all new major sources and modifications to existing major sources. However, Oregon and LRAPA also utilize a Plant Site Emission Limit, or ''PSEL,'' approach to defining ''major'' modifications, rather than the contemporaneous net emissions increase approach used in the EPA's main major NSR program (not the EPA's plant-wide applicability limit (PAL) option). The EPA has previously determined that, overall, the major NSR program in Oregon is at least as stringent as the EPA's major NSR program and meets the requirements of 40 CFR 51.165 and 51.166.[15]

Under the previous SIP-approved program, both federal major sources and large minor sources have been covered

[14] *See* Section 37–0082.

[15] *See* 76 FR 80747, 80748 (December 27, 2011) (final action); 76 FR 59090, 59094 (Sept. 23, 2011) (proposed action).

by Title 38. The submitted changes to Title 38 revise this approach and establish distinct components within Title 38, referred to as Major New Source Review (LRAPA Major NSR—Sections 38–0045 through 0070) and State New Source Review (State NSR—Sections 38–0245 through 0270) to help clarify the requirements that apply to federal major sources and large minor sources. Pre-construction review and permitting of other minor sources continue to be covered in Title 34 *Stationary Source Notification Requirements,* Title 37 *Air Contaminant Discharge Permits,* and Title 42 *Plant Site Emission Limits.*

As discussed above, Oregon and LRAPA have created two new state designations. ''Sustainment'' areas are state-designated areas that are violating or close to violating the NAAQS but which are not formally designated nonattainment by the EPA. ''Reattainment'' areas are state-designated areas that have been designated nonattainment by the EPA, but that have achieved improved air quality, and data shows the area is attaining the NAAQS. Key changes to the LRAPA Major NSR and State NSR programs are discussed below.

Section 38–0010 Applicability, General Prohibitions, General Requirements, and Jurisdiction

LRAPA has narrowed the scope of sources that are subject to LRAPA Major NSR in nonattainment and maintenance areas by increasing the thresholds, from the significant emission rate (SER) to the major source thresholds in the CAA specified for the current nonattainment areas in Lane County.[16] At the same time, LRAPA's State NSR requirements under Title 38 apply to the construction of new sources with emissions of a regulated air pollutant at or above the SER, as well as increases in emissions of a regulated pollutant from existing sources that equal or exceed the SER over the netting basis. This is consistent with Oregon's rules in Division 224.

LRAPA has divided the State NSR program into two parts: Type A, which generally applies in nonattainment, reattainment, and maintenance areas, and Type B, for attainment, unclassifiable, and sustainment areas. Sources subject to Type A State NSR remain subject to many of the same requirements that apply to such sources under the current SIP-approved program in nonattainment [17] and maintenance areas, whereas sources subject to Type B State NSR are subject to requirements equivalent to the minor NSR requirements under the PSEL rules in the current SIP.[18] Because LRAPA's changes to the definition of ''federal major source'' in nonattainment areas are consistent with the federal definition of ''major stationary source'' at 40 CFR 51.165 for the designated areas in Lane County, and because LRAPA has retained most of the characteristics of the previous Major NSR permitting program for Type A State NSR, the EPA proposes to approve these revisions.

LRAPA also made revisions here, and in several other places in its rules, to be consistent with changes to the federal PSD rules made in response to a Supreme Court decision on greenhouse gases (May 7, 2015, 80 FR 26183).[19] Specifically, LRAPA revised definitions and procedures in Titles 12, 36, 37, 38, and 42 to remove greenhouse gas-only sources from PSD applicability. Therefore, as required by the federal PSD program, a source is now subject to the LRAPA Major NSR requirements for greenhouse gases in attainment and unclassifiable areas only when the source is subject to LRAPA Major NSR requirements anyway, for one or more criteria pollutants. As specified in the federal PSD regulations, LRAPA's rules continue to require that sources of greenhouse gases subject to LRAPA Major NSR in attainment and unclassifiable areas for a criteria pollutant, are also subject to LRAPA Major NSR for greenhouse gases.

LRAPA also made clear in this section that a source is subject to Title 38 requirements for the designated area in which the source is located—for each regulated pollutant, including precursors. Finally, revisions clarify that a subject source must not begin actual construction, continue construction, or operate without complying with the requirements of Title 38 and obtaining an ACDP permit authorizing construction or operation.

Section 38–0025 Major Modification

LRAPA moved the definition of ''major modification'' from Title 12 to Title 38, to reflect that the former definition was really a procedure for determining whether a major modification has, or will occur, rather than a true definition. The revised definition and procedure are intended to better explain how emissions increases and decreases are tracked and factored into calculations for major modifications.

LRAPA also specified that emissions from categorically insignificant activities, aggregate insignificant emissions, and fugitive emissions must be included in determining whether a major modification has occurred. In addition, LRAPA clarified that major modifications for ozone precursors, or $PM_{2.5}$ precursors, also constitute major modifications for ozone and $PM_{2.5}$, respectively. Finally, language was added stating that the PSEL, netting basis, and emissions changes must be recalculated when more accurate or reliable emissions information becomes available, to determine whether a major modification has occurred.

Section 38–0030 New Source Review Procedural Requirements

LRAPA revised this section to account for differing LRAPA Major NSR and State NSR procedures. Included are: When LRAPA will determine whether an application is complete; when a final determination will be made; when construction is permitted; how to revise a permit and extend it; and when and how LRAPA will terminate an NSR permit.

With respect to the provision in the federal PSD regulations authorizing extensions to the 18-month construction time limitation in 40 CFR 52.21(r)(2) ''upon a satisfactory showing that an extension is justified,'' LRAPA revised its extension provisions to be consistent with recent EPA guidance. This guidance sets out the EPA's views on what constitutes an adequate justification for an extension of the 18-month timeframe under 40 CFR 52.21(r)(2) for commencing construction of a source that has been issued a PSD permit.[20] LRAPA also extended the time period for making a final determination on an LRAPA Major NSR or Type A State NSR permit from six months to one year, to reflect the more complex nature of such permitting actions. The one-year time-frame for permit issuance is consistent with the EPA's requirements for major NSR permitting.[21]

Section 38–0038 Fugitive and Secondary Emissions

This section was moved and amended to account for State NSR requirements.

[16] *See* Title 12.

[17] Key changes are discussed below in the discussion of State NSR.

[18] Sources in sustainment areas subject to Section 38–0245(2) are also subject to Type A NSR.

[19] *Utility Air Regulatory Group* v. *Environmental Protection Agency,* 134 S.Ct. 2427 (2014).

[20] Memorandum from Stephen D. Page, Director of EPA's Office of Air Quality Planning and Standards, to Regional Air Division Directors, Region 1–10, entitled Guidance on Extension of Prevention of Significant Deterioration (PSD) Permits under 40 CFR 52.21(r)(2), dated January 31, 2014.

[21] *See* 40 CFR 52.21(q)(2).

For sources subject to LRAPA Major NSR and Type A State NSR, fugitive emissions are included in the calculation of emission rates and subject to the same controls and analyses required for emissions from identifiable stacks or vents. Secondary emissions are not included in potential to emit calculations for LRAPA Major NSR or Type A State NSR, but once a source is subject to LRAPA Major NSR or Type A State NSR, secondary emissions must be considered in the required air quality impact analysis in Titles 38 and 40.

Sections 38–0045 Through 0070 Major NSR

LRAPA has made changes consistent with Oregon's corresponding rules and has specified LRAPA Major NSR requirements for each of the following designations: Sustainment, nonattainment, reattainment, maintenance, and attainment/unclassifiable.

Major NSR in Sustainment Areas

New sources and modifications subject to LRAPA Major NSR in sustainment areas (areas that are classified as attainment/unclassifiable by the EPA but have air quality either violating the NAAQS or just below the NAAQS) must meet PSD requirements for each sustainment pollutant, but must also satisfy additional requirements for obtaining offsets and demonstrating a net air quality benefit to address the air quality problems in the area, as discussed in more detail below. Because such areas are designated as attainment/unclassifiable by the EPA, requiring compliance with LRAPA's PSD requirements meets federal requirements. The additional requirements for obtaining offsets and demonstrating a net air quality benefit go beyond CAA requirements for attainment/classifiable areas and are thus approvable.

Major NSR in Nonattainment Areas

For new sources and modifications subject to LRAPA Major NSR in nonattainment areas, LRAPA reorganized and clarified the requirements, aligning with state rules, including that they apply for each pollutant for which the area is designated nonattainment. Lowest Achievable Emission Rate (LAER) and offsets continue to be required for such sources and modifications. In addition, LRAPA's submitted revisions tighten offsets required in nonattainment areas (except with respect to ozone). LRAPA rules now initially require 1.2:1 offsets to emissions in non-ozone areas. If offsets are obtained from priority sources, the ratio may be reduced to 1:1, equivalent to the federal requirement in 40 CFR 51.165(a)(9)(i).

The submitted changes also tighten requirements for sources seeking construction permit extensions, and limit extension requests to two 18-month periods, with certain additional review and re-evaluation steps. We note that, beyond the federal rules, the rules applicable in Lane County extend best available control technology (BACT) and offset requirements to new and modified minor sources in nonattainment areas.

Major NSR in Reattainment Areas

In reattainment areas (areas meeting the NAAQS but not yet redesignated to attainment), new sources and modifications subject to LRAPA Major NSR must continue to meet all nonattainment LRAPA Major NSR requirements for the reattainment pollutant. In addition, to ensure air quality does not again deteriorate, LRAPA requires that sources subject to LRAPA Major NSR also meet other requirements for each reattainment pollutant. Specifically, the owner or operator of the source must demonstrate the source will not cause or contribute to a new violation of the ambient air quality standard, or PSD increment, by conducting an air quality analysis as outlined in Title 40.

Major NSR in Maintenance Areas

In maintenance areas, new sources and modifications subject to LRAPA Major NSR must continue to comply with LRAPA Major NSR requirements for attainment/unclassifiable areas (*i.e.,* PSD), and also conduct a demonstration or obtain allowances to ensure a net air quality benefit in the area. Rather than setting out the specific PSD requirements in this section, however, this section simply references the PSD requirements at Section 38–0070.

Major NSR in Attainment/Unclassifiable Areas (PSD)

For the construction of new sources and modifications subject to LRAPA Major NSR in attainment or unclassifiable areas, LRAPA revised its rules to address court decisions impacting federal PSD rules. First, as discussed above, LRAPA revised definitions and procedures in Titles 12, 36, 37, 38, and 42 to remove greenhouse gas-only sources from PSD applicability. Therefore, as required under the EPA's federal PSD program, a source is now subject to the LRAPA Major NSR requirements for greenhouse gases only when the source also is subject to LRAPA PSD requirements for one or more criteria pollutants.

Second, LRAPA revised its requirements for preconstruction monitoring to address another court decision and the resulting revisions to the EPA's PSD rules. On October 20, 2010, the EPA promulgated the 2010 PSD $PM_{2.5}$ Implementation Rule, revising the federal significant monitoring concentration (SMC) and significant impact levels (SILs) for $PM_{2.5}$ (75 FR 64864). On January 22, 2013, the U.S. Court of Appeals for the District of Columbia, in *Sierra Club* v. *EPA,*[22] issued a judgment that, among other things, vacated the provisions adding the $PM_{2.5}$ SMC to the federal regulations at 40 CFR 51.166(i)(5)(i)(c) and 52.21(i)(5)(i)(c). In its decision, the court held that the EPA did not have the authority to use SMCs to exempt permit applicants from the statutory requirement in CAA section 165(e)(2) that ambient monitoring data for $PM_{2.5}$ be included in all PSD permit applications. Although the $PM_{2.5}$ SMC was not a required element, where a state program contained an SMC and applied it to allow new permits without requiring ambient $PM_{2.5}$ monitoring data, the provision would be inconsistent with the court's opinion and CAA section 165(e)(2).

At the EPA's request, the decision also vacated and remanded the portions of the 2010 PSD $PM_{2.5}$ Implementation Rule that revised 40 CFR 51.166 and 40 CFR 52.21 related to SILs for $PM_{2.5}$. The EPA requested this vacatur and remand of two of the three provisions in the EPA regulations that contain SILs for $PM_{2.5}$ because the wording of these two SIL provisions (40 CFR 51.166(k)(2) and 40 CFR 52.21(k)(2)) was inconsistent with the explanation of when and how SILs should be used by permitting authorities, that we provided in the preamble to the **Federal Register** publication when we promulgated these provisions. Specifically, the EPA erred because the language promulgated in 2010 did not provide permitting authorities the discretion to require a cumulative impact analysis notwithstanding that the source's impact is below the SIL, where there is information that shows the proposed source would lead to a violation of the NAAQS or increments. The third SIL provision (40 CFR 51.165(b)(2)) was not vacated and remains in effect. On December 9, 2013, the EPA removed the vacated $PM_{2.5}$ SILs and SMC provisions from federal PSD regulations (78 FR 73698). On April 17, 2018, the EPA issued guidance to states on

[22] 703 F.3d 458 (D.C. Cir. 2013).

recommended $PM_{2.5}$ (and ozone) SILs.[23] As stated in this guidance, the EPA intends to use information yielded from application of this guidance by permitting authorities to determine whether a future rulemaking to codify SILs is appropriate.

In response to the vacatur and remand, LRAPA submitted revisions to several titles. LRAPA revised the $PM_{2.5}$ SMC to zero, as the EPA did, to address this issue in the federal PSD regulations. LRAPA also revised the definition of ''significant impact levels'' or ''SIL'' in state rules, removed the vacated language and added text to make clear that ''no source may cause or contribute to a new violation of an ambient air quality standard or PSD increment even if the single source impact is less than the significant impact level.'' We propose to approve LRAPA's revisions as consistent with the court decision.

LRAPA also aligned local rules with state rules to remove language allowing the substitution of post-construction monitoring for preconstruction monitoring. LRAPA added an exemption from the preconstruction ambient air monitoring requirement, with LRAPA's approval, if representative or conservative background concentration data is available, and the source demonstrates that such data is adequate to determine that the source would not cause or contribute to a violation of an ambient air quality standard or any applicable PSD increment. These revisions, along with the other existing provisions regarding preconstruction monitoring in LRAPA's PSD regulations, are consistent with 40 CFR 51.166(m)(iii) and therefore we propose to approve them.

Finally, LRAPA added the requirement to demonstrate a net air quality benefit for subject sources that will have a significant impact on air quality in a designated area other than the area in which the source is located. This demonstration of net air quality benefit is beyond federal PSD requirements, and will be discussed in more detail below.

Sections 38–0245 Through 0270 State NSR

Title 38 now also specifies State NSR requirements for sustainment, nonattainment, reattainment, maintenance, and attainment/unclassifiable areas. For sources that emit between the SER and 100 tons per year in nonattainment and maintenance areas (Type A State NSR sources), LRAPA has relaxed some of the requirements, as compared to the current SIP, that historically went beyond federal requirements. In nonattainment areas, if the increase in emissions from the source is the result of a major modification,[24] BACT rather than LAER is now required. In maintenance areas, Type A State NSR sources are no longer required to conduct preconstruction monitoring to support the ambient air impact analysis for the source.

In both nonattainment and maintenance areas, LRAPA's State NSR rules allow a reduction of the offset ratio if some of the offsets come from sources that are contributing to air quality problems in the area (which historically have been woodstoves). As we found in our 2017 action on the Oregon SIP, the State NSR requirements in sustainment and reattainment areas go beyond CAA requirements for minor NSR programs by requiring a demonstration of a net air quality benefit (discussed below).[25] (October 11, 2017, 82 FR 47122).

Because BACT, LAER, pre-construction monitoring, and offsets are not required components of a State's SIP-approved minor NSR program, and because the offset requirements now provide sources with incentives to obtain offsets from sources found to be specifically contributing to air quality problems in the area, we propose to find that LRAPA's minor NSR program continues to meet CAA requirements for approval.

Sections 38–0500 Through 0540 Net Air Quality Benefit Emission Offsets

The CAA requires that, for nonattainment NSR, the proposed major source or major modifications must obtain emissions reductions of the affected nonattainment pollutant from the same source or other sources in the area to offset the proposed emissions increase.[26] Consistent with that requirement, the EPA's nonattainment NSR regulations require that major sources and major modifications in nonattainment areas obtain emissions offsets at a ratio of at least 1 to 1 (1:1) from existing sources in the area to offset emissions from the new or modified source.[27]

LRAPA revised the criteria for demonstrating a net air quality benefit, in line with Oregon's rule revisions approved by the EPA on October 11, 2017 (82 FR 47122). In addition to the incentives provided to sources subject to Type A State NSR in sustainment and reattainment areas (to obtain offsets from priority sources discussed above) LRAPA made an additional change. Rules were revised to provide incentives for major sources to use priority source offsets for LRAPA Major NSR sources in nonattainment and reattainment areas by increasing the required offset ratio for major sources to 1.2:1 from the current 1:1. If a source subject to LRAPA Major NSR obtains offsets of some emissions increases from priority sources, the ratio may be reduced to no less than 1:1, the minimum offset level under the federal nonattainment NSR program.

We note that LRAPA did not submit Section 38–0510(3) for SIP approval because the submissions do not also include a demonstration for inter-pollutant offset ratios as recommended by the EPA's inter-pollutant offset policy.[28] LRAPA also did not submit Section 38–0520 for SIP approval, in this case because the section addresses ozone nonattainment areas, of which Lane County has none. We propose to approve the revisions to LRAPA's net air quality benefit emissions rules, except Sections 38–0510(3) and 38–0520, for which LRAPA did not request approval.

Summary

We propose to approve the submitted revisions to Title 38 because we have determined that, in conjunction with other provisions including but not limited to rules in Titles 12, 31, 34, 35, 40, 42, and 50, the revisions are consistent with the requirements of the federal PSD and minor NSR permitting programs applicable statewide. We have also determined that the submitted changes are consistent with the federal requirements for nonattainment NSR for the current designated nonattainment areas in Lane County.[29]

N. Title 40: Air Quality Analysis Requirements

This title contains the air quality analysis requirements, which are

[23] Memorandum from Peter Tsirigotis, Director of EPA's Office of Air Quality Planning and Standards, to Regional Air Division Directors, Region 1–10, entitled Guidance on Significant Impact Levels for Ozone and Fine Particles in the Prevention of Significant Deterioration Permitting Program, dated April 17, 2018.

[24] Oregon and LRAPA use the term ''major modification'' for physical and operational changes that result in significant increases to both existing major and existing minor sources.

[25] October 11, 2017, 82 FR 47122.

[26] *See* CAA section 173(c).

[27] *See* 40 CFR 51.165(a)(9)(i).

[28] Gina McCarthy, EPA Administrator. ''Revised Policy to Address Reconsideration of Inter-pollutant Trading Provisions for Fine Particles ($PM_{2.5}$),'' Memorandum to Regional Administrators, July 21, 2011.

[29] *See* 40 CFR 51.160 through 161, 51.165, and 51.166. *See* also EPA proposed approval of Oregon nonattainment NSR program (March 22, 2017, 82 FR 14654 at page 14663).

primarily used in Title 38 *New Source Review.* By its terms, this title does not apply unless a rule in another section refers to Title 40. Substantive changes include revising the definition of ''allowable emissions'' at Section 40–0020(1) to add ''40 CFR part 62'' to the list of referenced standards and clarifying the definition of ''baseline concentration year'' at Section 40–0020(2), that varies depending on the pollutant for a particular designated area. LRAPA also revised the definitions of ''competing PSD increment consuming source impacts'' and ''competing NAAQS [national ambient air quality standards] source impacts'' [30] to broaden the reference to include all of LRAPA's ambient air quality standards at Title 50 (which include the NAAQS) [31] and to specify that in calculating these concentrations, sources may factor in the distance from the new or modified source to other emission sources (range of influence or ROI), spatial distribution of existing emission sources, topography, and meteorology.

LRAPA also clarified and reorganized the defined ROI formula at Section 38–0020(10). The ROI is the distance from the new or modified source or source impact area to other emission sources that could impact that area. The ROI and source impact area are used to predict the air quality impacts of a new or modified source. LRAPA continues to limit the maximum ROI to 50 kilometers and has moved the constant values in the ROI formula from the table at the end of the division into the text of the rule.

PSD requirements were revised to align with the court decision vacating and remanding the $PM_{2.5}$ SIL. Please see Section M. above for a discussion of the court decision. This title now includes language stating that application of a SIL as a screening tool does not preclude LRAPA from requiring additional analysis to evaluate whether a proposed source or modification will cause or contribute to a violation of an air quality standard or PSD increment.

PSD requirements for demonstrating compliance with air quality related values were also updated. LRAPA made clear that, if applicable, the analysis applies to each emission unit that increases the actual emissions of a regulated pollutant above the portion of the netting basis attributable to that emission unit. In addition, the term ''air quality related values'' includes visibility, deposition, and ozone impacts. A visibility analysis for sources impacting the Columbia River Gorge National Scenic Area, is now required, where applicable, to evaluate potential impacts on that area. We propose to approve Title 40 into the LRAPA SIP as meeting CAA requirements, including the EPA's major NSR permitting regulations at 40 CFR 51.165 and 51.166, and the regional haze requirements at 40 CFR part 51, subpart P.

O. Title 41: Emission Reduction Credits

In Title 41, LRAPA submitted revisions to clarify when reductions in criteria pollutant emissions that are also hazardous air pollutant emissions are creditable. Emission reductions required to meet federal NESHAP standards in 40 CFR parts 61 or 63 are not creditable reductions for purposes of Major NSR in nonattainment or reattainment areas in Lane County. However, criteria pollutant reductions that are in excess of, or incidental to, the required hazardous air pollutant reductions can potentially earn credits—as long as all conditions are met. LRAPA also lowered the threshold for banking credits in the Oakridge area—from ten tons to one ton—to encourage trading activity. Finally, the rules were revised to specify when such credits are considered used up, and when they expire. The revisions are consistent with the CAA and the EPA's implementing regulations and we propose to approve them.

P. Title 42: Criteria for Establishing Plant Site Emission Limits

This division contains a regulatory program for managing airshed capacity through a PSEL. PSELs are used in Oregon, including Lane County, to protect ambient air quality standards, prevent significant deterioration of air quality, and to ensure protection of visibility. Establishing such a limit is a mandatory step in the Oregon and LRAPA source permitting process. A PSEL is designed to be set at the actual baseline emissions from a source plus approved emissions increases and minus required emissions reductions. This design is intended to maintain a more realistic emissions inventory. Oregon and LRAPA use a fixed baseline year of 1977 or 1978 (or a prior year if more representative of normal operation) and factor in all approved emissions increases and required emissions decreases since baseline, to set the allowable emissions in the PSEL. Increases and decreases since the baseline year do not affect the baseline, but are included in the difference between baseline and allowable emissions.

''Netting basis'' is a concept in this program that defines both the baseline emissions from which increases are measured—to determine if changes are subject to review—as well as the process for re-establishing the baseline, after changes have been through the new source review permitting process.

As noted above, the PSEL program is used, in part, to implement NSR permitting. For major NSR, if a PSEL is calculated at a level greater than an established SER over the baseline actual emission rate, an evaluation of the air quality impact and major NSR permitting are required. If not, the PSEL is set without further review (a construction permit may also be required). For minor NSR (State NSR), a similar calculation is conducted. If the difference is greater than the SER, an air quality analysis is required to evaluate whether ambient air quality standards and increments are protected. The air quality analysis results may require the source to reduce the airshed impact and/or comply with a tighter emission limit.

LRAPA submitted a number of changes to the PSEL requirements in this title, to align with similar changes to state rules. Many of the changes are organizational, centralizing requirements related to PSELs in Title 42. Other changes are more substantive. LRAPA revised the criteria for establishing PSELs at Sections 42–0035 through 0090 by consolidating requirements from other sections into these provisions, and revising them to take into account the differentiated major and State NSR requirements. LRAPA also updated the source-specific annual PSEL provision, at Section 42–0041, to account for $PM_{2.5}$ and major and State NSR requirements. We note that as previously written, the PSEL rule included provisions for PSEL increases that were not subject to New Source Review. The submissions revoke those provisions and instead make these PSEL increases subject to the State New Source Review requirements in Title 38. The comprehensive requirements for approval of such PSEL increases in sustainment, nonattainment, reattainment, maintenance, and attainment/unclassifiable areas are as stringent as the current requirements.

LRAPA updated the short-term PSEL requirements at Section 42–0042 to spell out the process a source must follow to request an increase in a short-term PSEL—and when that source must obtain offsets, or an allocation, from an available growth allowance in the area.

[30] *See* Sections 40–0020(4) and (5), respectively.

[31] Our approval of Section 38–0020(4) and (5) would not extend to those ambient standards in Title 50 that we have excluded from our approval.

At Section 42–0046, LRAPA clarified how the initial netting basis for $PM_{2.5}$ is set and how potential increases are limited. Changes were made to spell out how a source's netting basis may be reduced—when a rule, order or permit condition requires the reductions—and how unassigned emissions and emissions reduction credits are to be addressed. In addition, the submitted revisions clarify that a source may retain a netting basis if that source relocates to a different site, as opposed to an adjacent site. However, it is only allowed if LRAPA determines the different site is within or affects the same airshed, and that the time span between operation at the old site and new sites is less than six months.

At Section 42–0048, LRAPA consolidated baseline period and baseline emission rate provisions, and indicated when a baseline emission rate may be recalculated—limited to circumstances when more accurate or reliable emission factor information becomes available, or when regulatory changes require additional emissions units be addressed. Changes were also made to Section 42–0051, which addresses actual emissions, and how to appropriately calculate the mass emissions of a pollutant from an emissions source during a specified time period. LRAPA revised this provision to account for the changes in the program that differentiate major NSR from State NSR.

We note that Section 42–0055 unassigned emissions procedures were clarified. The rule section was revised to state that a source may not use emissions that are removed from the netting basis—including emission reductions required by rule, order or permit condition—for netting any future permit actions. LRAPA also updated Section 42–0090, addressing the impact on PSEL calculations and permitting requirements when sources combine, split, and change primary Standard Industrial Code. The changes make clear that sources must qualify to combine, and that it will impact the netting basis and SER, and trigger new source review and recordkeeping requirements, if applicable.

Except for Section 42–0060, we propose to approve Title 42 into the SIP because we believe the revisions to the PSEL requirements are intended to clarify and strengthen the rules. Section 42–0060 is not appropriate for SIP approval because it is applicable to sources of hazardous air pollutants addressed under CAA section 112, rather than sources of criteria pollutants addressed under CAA section 110.

Q. Title 48: Rules for Fugitive Emissions

LRAPA submitted fugitive emission requirements in Title 48 for SIP approval, consistent with Oregon's fugitive emissions rules in Division 208. This title requires sources to take reasonable precautions to prevent fugitive emissions, and may require a fugitive emissions control plan to prevent visible emissions from leaving a facility property for more than 18 seconds in a six-minute period. Compliance is based on EPA Method 22, *Visual Determination of Fugitive Emissions from Material Sources and Smoke Emissions from Flares.* We propose to approve Title 48 into the SIP because we have determined that these fugitive emissions rules are consistent with CAA requirements.

R. Title 50: Ambient Air Standards and PSD Increments

Title 50 contains ambient air quality standards and Prevention of Significant Deterioration (PSD) increments applicable in Lane County. Most notably, LRAPA updated Title 50 for all current federal national ambient air quality standards and federal reference methods.[32]

At Section 50–005(2), LRAPA added language expressly stating that no source may cause or contribute to a new violation of an ambient air quality standard or a PSD increment, even if the single source impact is less than the significant impact level. This change was made to address a court decision vacating and remanding regulatory text for the $PM_{2.5}$ significant impact level. Please see Section M for a detailed discussion of the basis for our determination that this change, along with other related changes, adequately addresses the court decision.

LRAPA updated the table of PSD increments, also known as maximum allowable increases and clarified that PSD increments are compared to aggregate increases in pollution concentrations from the new or modified source over the baseline concentration.[33] LRAPA included ambient air quality thresholds for pollutants in this title, moved from Title 38, to centralize ambient standards and thresholds. Finally, LRAPA consolidated requirements for areas subject to an approved maintenance plan, moving ambient standards and thresholds from Title 38 into Section 50–065. We propose to approve the submitted revisions to Title 50 as being consistent with CAA requirements and implementing regulations at 40 CFR parts 50 and 51.

S. Title 51: Air Pollution Emergencies

This title establishes criteria for identifying and declaring air pollution episodes at levels below the levels of significant harm. LRAPA submitted mostly minor changes to this title. However, significant changes were made to establish a significant harm level for $PM_{2.5}$, and $PM_{2.5}$ trigger levels corresponding with alert, warning, and emergency episodes. We propose to approve the submitted revisions to Title 51 because this title remains consistent with the EPA's rules at 40 CFR part 51, subpart H *Prevention of Air Pollution Emergency Episodes.*

III. Proposed Action

We propose to approve, and incorporate by reference into the SIP, specific rule revisions submitted by Oregon and LRAPA on August 29, 2014 (state effective March 31, 2014) and March 27, 2018 (state effective March 23, 2018), to apply in Lane County. We also propose to approve, but not incorporate by reference, specific provisions that provide LRAPA with authority needed for SIP approval.

As requested by LRAPA and the state, we are removing certain rules from the SIP, because they are obsolete, redundant, or replaced by equivalent or more stringent local rules. We are also deferring action on a section of rules because we intend to address them in a separate, future action.

We note that the submissions include changes to OAR 340–200–0040, a rule that describes the Oregon procedures for adopting its SIP and references all of the state air regulations that have been adopted by LRAPA and ODEQ for approval into the SIP (as a matter of state law), whether or not they have yet been submitted to or approved by the EPA. We are not approving the changes to OAR 340–200–0040 because the federally-approved SIP consists only of regulations and other requirements that have been submitted by LRAPA and ODEQ and approved by the EPA.

A. Rules Approved and Incorporated by Reference

We propose to approve into the Oregon SIP, and incorporate by reference at 40 CFR part 52, subpart MM, revisions to the following LRAPA rule sections. Each rule section listed is state effective March 23, 2018, unless marked with an asterisk, denoting it is effective March 31, 2014:

- Title 12—Definitions (001, 005, 010, 020, 025);

[32] *See* Sections 50–015 through 045.

[33] *See* Section 50–055.

• Title 29—Designation of Air Quality Areas (0010, 0020, 0030, 0040, 0050, 0060, 0070*, 0080*, 0090*, 0300, 0310, 0320);
• Title 30—Incinerator Regulations (010, 015*, 020*—except (2) and (8), 025*—except (9), 030*—except (1)(I) and (2)(E), 035*, 040*, 045*—except (3), 050*, 055*, 060*);
• Title 31—Public Participation (0010, 0020, 0030, 0040, 0050, 0060, 0070, 0080);
• Title 32—Emission Standards (001, 005, 006, 007, 008, 009, 010, 015, 020, 030, 045, 050, 060, 065, 070, 090*, 100, 8010);
• Title 33—Prohibited Practices and Control of Special Classes of Industry (005, 060, 065, 070—except, in (1), the definitions of ''non-condensables'', ''other sources'', and ''TRS'', (3)(a), (4)(b), (5)(b), (6)(a), (6)(b), 500);
• Title 34—Stationary Source Notification Requirements (005, 010, 015, 016, 017, 020, 025, 030, 034, 035, 036, 037, 038);
• Title 35—Stationary Source Testing and Monitoring (0010, 0110, 0120, 0130, 0140, 0150*);
• Title 37—Air Contaminant Discharge Permits (0010, 0020, 0025, 0030, 0040, 0052, 0054, 0056, 0060, 0062, 0064, 0066, 0068, 0070, 0082, 0084, 0090, 0094, 8010, 8020);
• Title 38—New Source Review (0010, 0020, 0025, 0030, 0034, 0038, 0040, 0045, 0050, 0055, 0060, 0070, 0245, 0250, 0255, 0260, 0270, 0500, 0510—except (3), 0530, 0540);
• Title 40—Air Quality Analysis Requirements (0010, 0020, 0030, 0040, 0045, 0050, 0060, 0070);
• Title 41—Emission Reduction Credits (0010*, 0020, 0030);
• Title 42—Stationary Source Plant Site Emission Limits (0010, 0020, 0030, 0035, 0040, 0041, 0042, 0046, 0048, 0051, 0055, 0080, 0090);
• Title 48—Rules for Fugitive Emissions (001, 005, 010, 015);
• Title 50—Ambient Air Standards and PSD Increments (001, 005, 015, 025, 030, 035, 040, 045, 050, 055, 060*, 065); and
• Title 51—Air Pollution Emergencies (005, 007, 010, 011, 015, 020, 025, Table I, Table II, Table III).

B. Rules Approved But Not Incorporated by Reference

We propose to approve, but not incorporate by reference, the following LRAPA rule sections. Each rule section is state effective March 23, 2018, unless marked with an asterisk, denoting the rule is effective March 31, 2014:
• Title 13—General Duties and Powers of Board and Director (005*, 010*, 020*, 025*, 030*, 035*); and
• Title 14—Rules of Practice and Procedures (110, 115, 120, 125, 130, 135, 140, 145, 147, 150, 155, 160, 165, 170, 175, 185, 190, 200, 205).

C. Rules Removed

We are removing the following rules from the current federally-approved Oregon SIP at 40 CFR part 52, subpart MM, because they have been repealed, replaced by rules noted in paragraph A. above, or the state has asked that they be removed:
• Title 12—Definitions (001(2)), state effective March 8, 1994;
• Title 30—Incinerator Regulations (005), state effective March 8, 1994;
• Title 33—Prohibited Practices and Control of Special Classes of Industry (030, 045), state effective November 10, 1994; and
• Title 34—Stationary Source Notification Requirements (040), state effective June 13, 2000.

We also are removing the following rules in the table entitled, ''Rules Also Approved for Lane County'', state effective April 16, 2015, because LRAPA has submitted equivalent or more stringent local rules to apply in place of those requirements:

Table 5—EPA-Approved Oregon Administrative Rules (OAR) Also Approved for Lane County

• Division 200—General Air Pollution Procedures and Definitions (0020);
• Division 202—Ambient Air Quality Standards and PSD Increments (0050);
• Division 204—Designation of Air Quality Areas (0300, 0310, 0320);
• Division 208—Visible Emissions and Nuisance Requirements (0110, 0210);
• Division 214—Stationary Source Reporting Requirements (0114)(5);
• Division 216—Air Contaminant Discharge Permits (0040, 8010);
• Division 222—Stationary Source Plant Site Emission Limits (0090);
• Division 224 –New Source Review (0030, 0530);
• Division 225—Air Quality Analysis Requirements (0010, 0020, 0030, 0040, 0045, 0050, 0060, 0070);
• Division 226—General Emissions Standards (0210); and
• Division 228—Requirements for Fuel Burning Equipment and Fuel Sulfur Content (0210).

D. Rules Deferred

We are deferring action on the following rules, state effective March 23, 2018, because we intend to address them in a separate, future action:
• Title 36—Excess Emissions (001, 005, 010, 015, 020, 025, 030).

IV. Incorporation by Reference

In this rule, we are proposing to include in a final rule regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, we are proposing to incorporate by reference the provisions described above in Section III. Proposed Action. The EPA has made, and will continue to make, these documents generally available electronically through *https://www.regulations.gov* and in hard copy at the appropriate EPA office (see the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Oregon Notice Provision

Oregon Revised Statute 468.126 prohibits ODEQ from imposing a penalty for violation of an air, water or solid waste permit unless the source has been provided five days' advanced written notice of the violation and has not come into compliance or submitted a compliance schedule within that five-day period. By its terms, the statute does not apply to Oregon's title V program or to any program if application of the notice provision would disqualify the program from federal delegation. Oregon has previously confirmed that, because application of the notice provision would preclude EPA approval of the Oregon SIP, no advance notice is required for violation of SIP requirements.

VI. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this proposed action merely approves state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:
• Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
• is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
• does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

• is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

• does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

• does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

• is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

• is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

• is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because this action does not involve technical standards; and

• does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it impose substantial direct costs on tribal governments or preempt tribal law.

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: July 23, 2018.

Chris Hladick,

Regional Administrator, Region 10.

Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notification of data availability and extension of comment period; correction.

SUMMARY: The Environmental Protection Agency (EPA) issued a proposed rule in the **Federal Register** on May 30, 2018 to request public comment on several proposed changes to the final Risk Management Program Amendments rule (Amendments rule) issued on January 13, 2017. This document is being issued to correct technical errors in the Regulatory Impact Analysis and the Notification of Data Availability and Extension of Comment Period for the proposed rule.

DATES: Comments on the proposed rule (83 FR 24850, May 30, 2018), as extended by the Notification of Data Availability and Extension of Comment Period (83 FR 34967, July 24, 2018) must be received by August 23, 2018.

ADDRESSES: Submit comments and additional materials, identified by docket EPA–HQ–OEM–2015–0725 to the Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: James Belke, United States Environmental Protection Agency, Office of Land and Emergency Management, 1200 Pennsylvania Ave. NW (Mail Code 5104A), Washington, DC 20460; telephone number: (202) 564–8023; email address: *belke.jim@epa.gov,* or Kathy Franklin, United States Environmental Protection Agency, Office of Land and Emergency Management, 1200 Pennsylvania Ave. NW (Mail Code 5104A), Washington, DC 20460; telephone number: (202) 564–7987; email address: *franklin.kathy@epa.gov.*

SUPPLEMENTARY INFORMATION: Detailed background information describing the proposed RMP Reconsideration rulemaking may be found in a previously published document: Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act; Proposed Rule (83 FR 24850, May 30, 2018).

I. What action is EPA taking?

EPA is correcting incorrect date references to the version of the Risk Management Plan (RMP) database used to extract accident history information for the years 2014 through 2016. EPA used this accident information to update the trend of accidents from RMP facilities discussed in the Regulatory Impact Analysis for the proposed Reconsideration rule (EPA. Regulatory Impact Analysis, Reconsideration of the 2017 Amendments to the Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act, Section 112(r)(7), April 27, 2018). EPA also referred to the 2014–2016 accident information in the Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act; Notification of Data Availability and Extension of Comment Period (83 FR 34967, July 24, 2018). In both documents, EPA made incorrect references to the date of the RMP database version used to extract these accident data. This document serves to correct the incorrect date references.

II. What does this correction do?

This document corrects incorrect date references to the RMP database in two locations in the regulatory record for the Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act; Proposed Rule (83 FR 24850, May 30, 2018). One location is on page 33 of the

Regulatory Impact Analysis (RIA). Page 33 of the RIA discusses the availability of annual accident data for 2014–2016, and includes a footnote (footnote 32) indicating the source of the accident data. The footnote states: ''EPA. April 2018. Risk Management Plan (RMP) Facility Accident Data, 2014–2016. USEPA, Office of Emergency Management.'' This footnote should read ''EPA. March 2018. Risk Management Plan (RMP) Facility Accident Data, 2014–2016. USEPA, Office of Emergency Management.''

The other location is on page 34968 of ''Accidental Release Prevention Requirements: Risk Management Programs Under the Clean Air Act; Notification of Data Availability and Extension of Comment Period,'' 83 FR 34967, 34968 (July 24, 2018), in the **SUPPLEMENTARY INFORMATION** section. Column two of this page also discusses the 2014–2016 accident data, but incorrectly indicates that EPA developed the docketed spreadsheet containing these data from the November 2017 version of the RMP database. The last sentence of the carryover paragraph at the top of column two should read: ''EPA developed the latter spreadsheet from the March 2018 version of the database.''

While the facility count information discussed in the Notification of Data Availability was based on the November 2017 version of the RMP database, EPA extracted the 2014–2016 accident data from the March 2018 version of the RMP database, as indicated above. EPA notes that the previously docketed 2014–2016 accident spreadsheet contains an additional 25 accident records for the 2014–2016 period that were not available when the November 2017 version of the database was created. By using a later version of the database to extract accident records, EPA provided more up-to-date accident information to support the regulatory record. However, users who attempt to replicate EPA's 2014–2016 accident spreadsheet by extracting accident data from the November 2017 version of the RMP database (which was recently added to the rulemaking docket as EPA–HQ–OEM–2015–0725–0989) would not see the additional 25 accident records.

EPA has added a memo to the rulemaking docket dated July 25, 2018, with the subject line: *Corrections to References to Risk Management Plan Accident Information for 2014–2016.* This memo explains the corrections discussed above and includes a list of the 25 accidents that are included in the 2014–2016 spreadsheet but not in the November 2017 version of the RMP database.

Dated: July 25, 2018.

Reggie Cheatham,

Director, Office of Emergency Management.

[EPA–HQ–SFUND–1983–0002; FRL–9981–39—Region 6]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the South Valley Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 6 is issuing a Notice of Intent to Delete Operable Units 1, 2, and 5 of the South Valley Superfund Site (Site) located in Albuquerque, New Mexico, from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the State of New Mexico, through the New Mexico Environment Department, have determined that all appropriate response actions at these identified parcels under CERCLA have been completed, other than five-year reviews and operation and maintenance activities. However, this deletion does not preclude future actions under Superfund. This partial deletion pertains to Operable Units 1, 2, and 5. The remaining Operable Units 3, 4, and 6 will remain on the NPL and are not being considered for deletion as part of this action.

DATES: Comments must be received by August 30, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1983–0002, by one of the following methods:

- *http://www.regulations.gov* . Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov*. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*
- *Email: hebert.michael@epa.gov.*
- *Mail:* Michael A. Hebert, Remedial Project Manager, EPA Region 6, Mail Code—6SF–RL, 1445 Ross Avenue, Dallas, Texas 75202–2733.
- *Hand delivery:*
  - Michael A. Hebert, Remedial Project Manager, EPA Region 6, Mail Code—6SF–RL, 7th Floor Reception Area, 1445 Ross Avenue, Dallas, Texas 75202–2733.
  - Such deliveries are only accepted during the Docket's normal hours of operation (Monday through Friday, 7 a.m. to 4 p.m.) and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–1983–0002. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

EPA Region 6 announces its intent to delete Operable Units 1, 2, and 5 of the South Valley Superfund Site (Site), from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as those sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). This partial deletion of the South Valley Superfund Site is proposed in accordance with 40 CFR 300.425(e) and is consistent with the Notice of Policy Change: Partial Deletion of Sites Listed on the National Priorities List. 60 FR 55466 (Nov. 1, 1995). As described in § 300.425(e)(3) of the NCP, a portion of a site deleted from the NPL remains eligible for Fund-financed remedial action if future conditions warrant such actions.

EPA will accept comments on the proposal to partially delete this site for 30 days after publication of this document in the **Federal Register**.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses Operable Units 1, 2, and 5 of the South Valley Superfund Site and demonstrates how the operable units meet the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the State, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121(c) and the NCP, EPA conducts five-year reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such five-year reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to deletion of Operable Units 1, 2, and 5 of the Site:

(1) EPA consulted with the State of New Mexico before developing this Notice of Intent for Partial Deletion.

(2) EPA has provided the State of New Mexico 30 working days for review of this notice prior to publication of it today.

(3) In accordance with the criteria discussed above, EPA has determined that no further response is appropriate.

(4) The State of New Mexico, through the New Mexico Environment Department, has concurred with the deletion of Operable Units 1, 2, and 5 of the South Valley Superfund Site, from the NPL.

(5) Concurrently, with the publication of this Notice of Intent for Partial Deletion in the **Federal Register**, a notice is being published in a major local newspaper, the *Albuquerque Journal, http://www.abqjournal.com.* The newspaper announces the 30-day public comment period concerning the Notice of Intent for Partial Deletion of the Site from the NPL.

(6) The EPA placed copies of documents supporting the proposed partial deletion in the deletion docket, made these items available for public inspection, and copying at the Site information repositories identified above.

If comments are received within the 30-day comment period on this document, EPA will evaluate and respond accordingly to the comments before making a final decision to delete Operable Units 1, 2, and 5. If necessary, EPA will prepare a Responsiveness Summary to address any significant public comments received. After the public comment period, if EPA determines it is still appropriate to delete Operable Units 1, 2, and 5 of the South Valley Superfund Site, the Regional Administrator will publish a final Notice of Partial Deletion in the **Federal Register**. Public notices, public submissions and copies of the Responsiveness Summary, if prepared, will be made available to interested parties and included in the site information repositories listed above.

Deletion of a portion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a portion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Partial Site Deletion

The following information provides EPA's rationale for deleting Operable Units 1, 2, and 5 of the South Valley Superfund Site from the NPL:

Site Background and History

The EPA ID for the South Valley Superfund Site is NMD980745558. The South Valley Superfund Site is in the southern portion of Albuquerque, in Bernillo County, New Mexico, directly across Interstate 25 from the Albuquerque International Airport and the University of New Mexico Golf Course. The South Valley Superfund Site consists of an area of approximately one square mile proximate to the intersection of South Broadway Boulevard and Woodward Road and is divided into two properties: the former Air Force Plant 83 site and the Univar site. The Air Force Plant 83 site is further divided into two parcels located north and south of Woodward Road known as North Plant 83 and South Plant 83, respectively. Various manufacturing operations occurred at the Air Force Plant 83 site from the 1940s until 1967, when the United States Air Force took ownership of the property and its contractor, General Electric Aircraft Engines (GEA), began manufacturing aircraft engine components at the property. GEA purchased the Air Force Plant 83 in 1983 and continued operations until October 1997, when North Plant 83 was closed, and until October 2010, when South Plant 83 was closed. Groundwater beneath the Site is in the Santa Fe Group which is comprised of several layers within the formation. The shallow zone aquifer (approximately 175–225 below ground surface [bgs]) beneath the North Plant 83 area has a continuous silty clay layer underneath it and is therefore primarily perched and does not have a uniform flow direction. The shallow groundwater in the South Plant 83 area flows east to west. Unlike North Plant 83, the silty clay layer beneath the South Plant 83 area is discontinuous and therefore is in hydraulic connection with the deeper aquifer zones. The deeper aquifer sand zones (approximately 225–355 bgs, 255–415 bgs, and 415–515 bgs) have discontinuous silts and clays interbedded within them which are not laterally extensive but may limit downward movement through the formation. Groundwater flows generally east to west in all the deeper aquifer zones.

Groundwater contamination was first suspected in the late 1970s in two municipal wells—San Jose No. 6 and San Jose No. 3. The wells were taken out of service after subsequent sampling indicated contamination. Groundwater monitoring results in the vicinity of the wells indicated the potential for a number of sources, including several industrial operations located in close proximity to the contaminated wells. When the Site was proposed to the NPL on December 30, 1982, (47 FR 58476), it was the number one priority of the State of New Mexico. EPA finalized the NPL listing on September 8, 1983, (48 FR 40658).

The Operable Units at the South Valley Superfund Site are as follows:

Operable Unit 1 (OU1) (included in partial deletion)—OU1 consists of the City of Albuquerque San Jose 6 (SJ–6) and San Jose 3 (SJ–3) wells, which were contaminated with volatile organic compounds (VOCs). EPA signed the Record of Decision (ROD) for OU1 on March 22, 1985 but did not identify a Potentially Responsible Party (PRP). The remedial goal was to eliminate the threat to human health posed by introducing water from the San Jose 6 and San Jose 3 wells into the City of Albuquerque drinking water supply. The objective was achieved by EPA replacing wells SJ–6 and SJ–3 with the Burton No. 4 well, which was completed in April 1987.

Operable Unit 2 (OU2) (included in partial deletion)—The remedial goals of OU2 were to eliminate the conduit(s) for contaminant migration from the shallow to the deeper aquifers and to restrict groundwater use under the Site. EPA signed the OU2 ROD on September 30, 1988 and identified GEA as a PRP. GEA implemented the remedial action by plugging SJ–6 and SJ–3 and any shallow wells that could act as conduits for contaminant transport from the shallow to the deeper aquifers, restricting groundwater use, and implementing groundwater monitoring. GEA integrated the OU2 groundwater monitoring program into Operable Unit 6 and continues the monitoring program today.

Operable Unit 3 (OU3)—The remedial goal of OU3 included reducing the concentrations of site-related VOCs in groundwater to acceptable levels (aquifer restoration) via a pump-treat-injection system. EPA signed the ROD on June 28, 1988 and identified Univar as the Potentially Responsible Party. Univar initiated groundwater recovery system in April 1992 and a vapor recovery system in November 1999. Univar shut off both systems in November 2006. Subsequent monitoring has shown that the groundwater and vapor recovery systems reduced the dissolved chlorinated VOC concentrations to levels below and compliant with applicable or relevant and appropriate requirements as defined in the ROD. On June 10, 2014, the EPA acknowledged that Univar completed all requirements of the Consent Decree dated March 27, 1990, as they relate to the constituents of concern in groundwater identified in the ROD and the subsequent Explanation of Significant Differences dated September 26, 2006, except for addressing 1,4-dioxane contamination. The EPA acknowledged that Univar is addressing 1,4-dioxane in groundwater at OU3 pursuant to Section XVI(D) of the above Consent Decree.

Operable Unit 4 (OU4)—OU4 consists of the vadose zone at the Univar site. As the PRP, Univar was required to investigate the soil around a pit on its property to establish the source of the solvents under their plant. The investigation found no evidence in the vadose zone that a release occurred at this location. EPA signed the ROD on June 28, 1988 and specified No Further Action.

Operable Unit 5 (OU5) (included in partial deletion)—OU5 consists of the unsaturated and saturated portion of the shallow zone aquifer at North Plant 83 and South Plant 83. EPA signed the ROD on September 30, 1988, and identified GEA as the PRP. The remedial goals for this operable unit were remediating shallow zone groundwater and eliminating source materials via enhanced dewatering, soil flushing, and soil vapor extraction (SVE) to result in aquifer restoration. GEA conducted soil vapor surveys and collected soil borings in the South Plant 83 area and the North Plant 83 area to identify VOC contamination. The result of these investigations indicated that the concentrations of VOCs would best be remediated using SVE. GEA operated SVE systems at the North Plant 83 and South Plant 83 areas in 1992 and 1993. Prior to remediation, the groundwater contamination encompassed approximately twelve acres at North Plant 83 and approximately seven acres at South Plant 83. GEA initiated shallow groundwater recovery systems at the North Plant 83 and South Plant 83 areas in May 1994 and completely shut down the groundwater recovery systems in July 2010. GEA completed compliance groundwater monitoring and on September 22, 2014 requested closure of OU5 stating that GEA had satisfactorily completed all requirements of the Administrative Order dated July 3, 1989. All wells and infrastructure associated with the OU5 groundwater treatment system have been plugged and

abandoned or removed as approved by EPA.

After the closure of South Plant 83 in October 2010, GEA performed additional remedial activities associated with OU5 soils. Specifically, GEA performed investigations within the North Plant 83 and South Plant 83 building footprints and excavated and disposed of hexavalent chromium contaminated soil from the East and West Tank Line area in South Plant 83. In addition, GEA filed a deed restriction in the Bernalillo County records covering areas where semi-volatile organic compounds (*i.e.,* polyaromatic hydrocarbons) or hexavalent chromium contamination remained above industrial soil screening levels.

Operable Unit 6 (OU6)—OU6 consists of the deep aquifer at North Plant 83 and South Plant 83. EPA signed the ROD on September 30, 1988 and identified GEA as the PRP. The remedial goals of OU6 are hydraulically containing the plume to protect the City of Albuquerque's water supply wells and reducing the concentrations of site-related VOC compounds in groundwater to acceptable levels (aquifer restoration). The original plume was approximately 100 acres in size but as of 2018, only two wells have constituents above cleanup levels. The groundwater remediation system at OU6 began operation in March 1996. Remedial action activities have hydraulically contained the plume and shrunk it significantly from its former volume and mass. To date, over 7.5 billion gallons of contaminated water have been recovered, treated, and reinjected back into the deep aquifer.

The South Valley area of Albuquerque has experienced ongoing development and redevelopment for decades. The proposed extension of Sunport Boulevard from east of Interstate 25 to west of Interstate 25, if constructed, is expected to spur local economic growth and redevelopment.

Remedial Investigation and Feasibility Study

Operable Unit 1 (OU1)—Other than the sampling that established that San Jose No. 6 and San Jose No. 3 municipal water supply wells had been impacted, there was no remedial investigation performed for OU1. Upon detection of contamination, the City of Albuquerque discontinued use of the water supply wells. Subsequently, the EPA, the City of Albuquerque, and other stakeholders conducted several meetings to discuss potential sites for a replacement municipal well, which culminated in the final design and ultimate installation of a replacement municipal water supply well, Burton Well No. 4. In addition, a remedial investigation was initiated which provided information utilized to develop remedial activities for the remaining operable units at the Site.

Operable Unit 2 (OU2)—GEA conducted a remedial investigation for OU2 because of the contamination identified in OU1. As part of the remedial investigation, GEA compiled existing investigative information and collected additional soil, groundwater, surface water, and sediment information associated with the one-square-mile boundary area of the South Valley Superfund Site. In addition, GEA identified contamination associated with several different sources. Based upon the remedial investigation data, GEA determined in the feasibility study that contaminated groundwater in the shallow zone was potentially migrating into the intermediate zone throughout the Site through improperly constructed groundwater wells. The contaminants of concern identified in the remedial investigation were VOCs, with the main contaminant being trichloroethylene (TCE).

Operable Unit 5 (OU5)—GEA conducted a remedial investigation for OU5 because of the contamination identified in OU1. As part of the remedial investigation GEA, compiled existing investigative information and collected additional soil, groundwater, surface water, and sediment information associated with the one-square-mile boundary area of the South Valley Superfund Site. Further, GEA identified contamination associated with several different sources. The contaminants of concern identified in the remedial investigation were VOCs, with the main contaminant being TCE.

Based upon the remedial investigation data, GEA determined in the feasibility study that OU5 soil contamination occurs in areas associated with the two areas, North Plant 83 and South Plant 83, and groundwater contamination occurs in the shallow aquifer below portions of both the North Plant 83 and South Plant 83 areas. GEA also identified groundwater contamination comprising of similar constituents of concerns as in OU5 in several other hydrogeological units beneath the Site, which are addressed in OU6.

After the closure of South Plant 83 in October 2010, GEA performed additional remedial activities associated with OU5, including soil investigations within the North Plant 83 and South Plant 83 building footprints. GEA identified 68 separate areas as a potential concern with 41 of these locations being identified for investigation. In addition, GEA sampled soil borings for VOCs, semi-volatile organic compounds, polychlorinated biphenyls, and selected metals. GEA did not detect VOCs above industrial soil screening levels and did not detect any polychlorinated biphenyls. GEA detected semi-volatile organic compounds (*i.e.,* polyaromatic hydrocarbons) and hexavalent chromium in a few of the 41 locations investigated. In addition, GEA inspected, investigated, and cleaned out sanitary sewer lines for both North Plant 83 and South Plant 83. While GEA detected concentrations of metal contaminants in sediments within the sewer lines, it did not identify impacts in the soils adjacent and beneath the sewer lines.

Selected Remedy

Operable Unit 1 (OU1)—EPA signed the ROD for OU1 on March 22, 1985. The selected remedy was installation of a new water supply well to replace the capacity of the contaminated well San Jose No. 6. The remedial goal was to eliminate the threat to human health posed by introducing water from this well into the City of Albuquerque drinking water supply.

Operable Unit 2 (OU2)—EPA signed the ROD for OU2 on September 30, 1988. The selected remedy consisted of cleaning out and sealing abandoned wells that were acting as conduits for contaminant migration, groundwater quality monitoring during and after implementation of any remedial action, and the imposition of access restrictions regarding well construction specifications and depth of completions through the State Engineer's office. The remedial goals were eliminating conduit(s) for contaminant migration from the shallow to intermediate aquifers and preventing the use of contaminated groundwater in the site area.

Operable Unit 5 (OU5)—EPA signed the ROD for OU5 on September 30, 1988. The selected remedy consisted of further investigation to define the extent of soil and groundwater contamination, soil remediation utilizing SVE on portions of North Plant 83 and South Plant 83, groundwater remediation through extraction, treatment with air stripping followed by carbon adsorption, and reinjection into the aquifer for shallow (OU5) groundwater contaminated zones located under portions of North Plant 83 and South Plant 83 along with intermediate/deep (OU6) groundwater contaminated zones on-site and off-site. The remedial goals for OU5 were remediating shallow zone groundwater and eliminating source

materials via enhanced dewatering, soil flushing, and SVE. Further, as a result of the investigations performed by GEA after closure of South Plant 83 in October 2010, GEA conducted removal of soil proximate to the East and West Tank Line area in South Plant 83 in 2011.

Response Actions

Operable Unit 1 (OU1)—The United State Corps of Engineers completed a final design for a new municipal water supply well in late 1986. The remedial action performed at OU1 was the replacement of wells SJ–6 and SJ–3 with the Burton No. 4 well, which was completed in April 1987.

Operable Unit 2 (OU2)—GEA completed a final design dated July 20, 1990, that contained plans to install monitoring wells, clean out and plug abandoned wells including the SJ–6 well (OU1), and conduct a groundwater monitoring program. GEA completed the installation of new monitoring wells and the plugging and abandonment of wells that could act as conduits for contaminant transport to lower groundwater zones by the end of 1992. GEA initiated an OU2 groundwater monitoring program, which in 1996 was combined with the OU6 groundwater monitoring program to simplify groundwater monitoring and reporting at the Site. The New Mexico State Engineer's office issued a restriction concerning groundwater well construction within the boundaries of the South Valley Superfund Site on December 19, 1988.

Operable Unit 5 (OU5)—Because the remedial investigation identified both soil and groundwater contamination, the response actions for OU5 were separated by media into soil and groundwater actions. For soils, GEA finalized the remedial design for the SVE systems in late 1991, which EPA subsequently approved on January 24, 1992. GEA installed and operated SVE systems on both the North Plant 83 and South Plant 83 areas. The North Plant 83 SVE system operated for approximately four months from June 1992 to June 1993. The South Plant 83 SVE system operated for approximately five months from October 1992 to March 1993. For groundwater, GEA's contractor, Canonie Environmental, completed a final design dated July 21, 1993, that contained construction details for the remedial systems for the shallow zone groundwater remediation on the North Plant 83 and South Plant 83 areas. The North Plant 83 system initially was comprised of seven extraction wells, and the South Plant 83 system was comprised of three wells. These systems were augmented through their operational lifetime to adapt to changes in groundwater concentrations and flow patterns.

After the closure of South Plant 83 in October 2010, GEA performed additional remedial activities associated with OU5. GEA conducted removal of soil proximate to the East and West Tank Line area in South Plant 83 in 2011. Approximately 3.5 tons of contaminated soil and concrete were removed and transported for final disposal at an off-site hazardous waste disposal facility. Following removal, GEA backfilled the area with clean fill and capped the area with a five-inch-thick, 3,000 pounds/square inch layer of reinforced concrete. GEA filed a deed restriction in the Bernalillo County records covering areas where semi-volatile organic compounds (*i.e.,* polyaromatic hydrocarbons) or hexavalent chromium contamination remained present above industrial soil screening levels. GEA removed approximately 1,750 feet of primary 4-inch to 8-inch diameter cast iron process sewer lines, 435 feet of similar smaller branch lines, and seven manholes and disposed these materials at a Resource Conservation and Recovery Act treatment, storage, and disposal facility. Finally, GEA cleaned and abandoned in place the South Plant 83 sewer system piping and plugged the connection to the City of Albuquerque sewer system.

Cleanup Levels

Operable Unit 1 (OU1)—There were no cleanup levels established for OU1, as the remedy was simply replacement of a municipal water supply well to replace the capacity lost by the contaminated SJ–6 well.

Operable Unit 2 (OU2)—There were no cleanup levels established for OU2, as the remedy was simply the installation of additional groundwater monitoring wells, the plugging and abandonment of wells that could act as conduits for contaminant transport to lower groundwater zones, the imposition of access restrictions regarding well construction specifications and depth of completions through the State Engineer's office, and the establishment of a groundwater monitoring program to obtain data concerning groundwater contamination.

Operable Unit 5 (OU5)—The investigations and remediation work for OU5 was separated by media into soil and groundwater work. For soil, the ROD required the utilization of SVE for soil remediation but did not specify cleanup levels. The ROD stated, ''Soils treatment will continue until the vapor extraction system ceases to produce volatile contaminants and will be followed by sampling to confirm soil remediation.'' GEA obtained post remediation soil samples after the SVE systems ceased operations and proposed cleanup levels for soils in April 1993. The proposed cleanup levels considered soil exposure pathways including dermal contact, inhalation, and ingestion (*i.e.,* by children ages 2 to 6) as well as the potential for contaminants to leach from soil into groundwater that would exceed drinking water standards. GEA based the cleanup levels on the assumption of an operating manufacturing facility with restricted access but also on the worst-case exposure scenario that the site could be converted to residential use. During a meeting with GEA on November 2, 1993, EPA verbally agreed to the proposed cleanup levels. In a letter dated June 21, 1994, EPA indicated that the levels of contaminants found in the soils were below limits that required removal. In addition, out of an abundance of caution, as part of the 2017 Remedial Action Report for OU5, GEA performed a comparison of the post remediation soil concentrations to the EPA Industrial and Residential Soil Screening Levels (November 2015) which indicated all the post soil remediation soil concentrations were below the EPA Industrial and Residential Soil Screening Levels. For groundwater, the ROD specified that cleanup levels would be maximum contaminant limits from the Safe Drinking Water Act and levels in the New Mexico Water Quality Control Commission regulations, whichever was more stringent. These levels were updated in an Explanation of Significant Differences dated October 16, 2006, which added a level for tetrachloroethylene promulgated under the Safe Drinking Water Act in 1992. GEA implemented and conducted a groundwater monitoring program throughout the operation of the shallow zone groundwater remediation systems. After six years of monitoring indicating that none of the off-site wells of the North Plant 83 system well network exceeded cleanup levels, EPA approved closure of the off-site wells and conveyance system. GEA flushed, cleaned, and abandoned conveyance piping in place and plugged and abandoned wells in 2010. One on-site well associated with the North Plant 83 system remained slightly above cleanup levels. In 2010, GEA performed in-situ chemical oxidation around this well which subsequent sampling confirmed that contaminant concentrations fell and

remained below cleanup levels. The South Plant 83 system experienced a similar history to the North Plant 83 system. By 1999, all wells associated with the South Plant 83 system except for two wells were below cleanup levels. By 2006, only one well had concentrations above cleanup levels. Like the North Plant 83 system, GEA performed in-situ chemical oxidation in 2010 around this well, which subsequent sampling confirmed that contaminant concentrations fell below cleanup levels shortly after the in-situ treatment and remained below cleanup levels through 2012.

After the closure of South Plant 83 in October 2010, GEA performed additional remedial activities associated with OU5. Utilizing investigations results, GEA completed an assessment of the risk for the contaminants identified in the investigation. This assessment indicated that hexavalent chromium contamination in deep soils would not pose a risk to human health and the environment assuming that an impermeable cover remained in place and institutional controls were implemented. The assessment also indicated that the semi-volatile organic compounds (*i.e.,* polyaromatic hydrocarbons) identified in soils would not pose a risk to human health and the environment if the existing concrete cap was left in place. GEA removed soil with concentrations of hexavalent chromium above 50 milligrams per kilogram (mg/kg) but did not remove soil with hexavalent chromium contamination ranging from 5.6 to 50 mg/kg at depths between 5 to 14 feet below the existing concrete slab. GEA filed a deed restriction in the Bernalillo County records covering areas where semi-volatile organic compounds or hexavalent chromium contamination remained above industrial soil screening levels.

Operation and Maintenance

Operable Unit 1 (OU1)—The operation and maintenance concerning the Burton No. 4 replacement well is performed by the City of Albuquerque.

Operable Unit 2 (OU2)—There is no operation and maintenance associated with OU2. The restriction concerning groundwater well construction within the boundaries of the South Valley Superfund Site issued by the New Mexico State Engineer's office on December 19, 1988, remains in effect but is now monitored under OU6. This restriction is not needed and does not affect the protectiveness of the actions performed at OU2.

Operable Unit 5 (OU5)—Since the soil and groundwater remediation systems associated with OU5 have met their associated cleanup levels and have been dismantled, there are no operation and maintenance activities required or ongoing for the OU5 SVE and groundwater remediation systems. In addition, while still in effect, the New Mexico State Engineer's restriction concerning groundwater well construction is no longer required for the protectiveness of the OU5 remedy because groundwater concentrations are below the maximum contaminant limits from the Safe Drinking Water Act and levels in the New Mexico Water Quality Control Commission regulations. After ceasing operations in September 2010 and completing demolition of the South Plant 83 buildings in May 2011, GEA performed investigations of the South Plant 83 property which included evaluating soil impacts near any existing sub-grade foundation features as well as the North Plant 83 and South Plant 83 sewer systems. In addition, GEA cleaned out and abandoned in place the sewer systems. Because of the soil investigation, GEA removed hexavalent chromium contamination near the location of the East and West Tank Line on the South Plant 83 property. Some contamination remained in place and, as a result, GEA filed a declaration of restrictive covenants on September 9, 2014 in the Bernalillo County property records. The declaration identified five areas where semi-volatile organic compounds or hexavalent chromium contamination exceed industrial soil screening levels. The declaration also contained the following: Identification of the abandoned sanitary sewer lines and existing sewer line locations; restriction that the property use is limited to commercial and industrial; restriction that groundwater beneath the site cannot be used; and engineered barriers must remain in place on portions of the property where semi-volatile organic compounds and hexavalent chromium remain above industrial soil screening levels. GEA performs normal property maintenance inspections of the North Plant 83 and South Plant 83 to identify fencing integrity issues and to maintain weed control. These inspections also observe the integrity of the concrete cap over the East and West Tank Line removal area to ensure it is competent. GEA also ensures that the deed restriction remains in the Bernalillo County records.

Five Year Review

Operable Unit 1 (OU1)—A five-year review is not necessary for OU1 because no hazardous substances, pollutants, or contaminants remain at the site above levels that allow for unlimited use and unrestricted exposure.

Operable Unit 2 (OU2)—A five-year review is not necessary for OU2 because no hazardous substances, pollutants, or contaminants remain at the site above levels that allow for unlimited use and unrestricted exposure. While still in effect, the New Mexico State Engineer's restriction concerning groundwater well construction is no longer required for the protectiveness of the OU5 remedy because groundwater concentrations are below the maximum contaminant limits from the Safe Drinking Water Act and levels in the New Mexico Water Quality Control Commission regulations. In 1996, the OU2 groundwater monitoring program was combined with the OU6 groundwater monitoring program, which is and has been the subject of ongoing five-year reviews associated with the Site. The next five-year review for the Site is due in July 2020.

Operable Unit 5 (OU5)—A statutory five-year review is necessary for OU5 because hazardous substances, pollutants, or contaminants remain at the site above levels that allow for unlimited use and unrestricted exposure. OU5 has been the subject of ongoing five-year reviews with the next review due in July 2020. No issues and/or recommendations were identified in the 2015 five-year review for OU5.

Community Involvement

The major community involvement activities associated with the operable units proposed for deletion are as follows:

- Open Houses and Workshops: September 1988; November 1993; July 1995; October 1997; September 1998; November 1999, October 2000; November 2001; January 2013.
- Original Proposed Plan Fact Sheet and Public Meetings: June 1988; July 1988; August 1988; February 1989.
- Public Meetings: October 2000; November 2001.
- Original ROD Fact Sheets: July 1988; November 1988; April 1989.
- Milestone Fact Sheets: May 1989; March 1990; April 1990; June 1990; March 1991; November 1993; June 1995; April 1996; December 2011; January 2013; June 2015; July 2015; June 2018.
- Citizens on Site Mailing List: 590.

Other notable community involvement activities are:

- Pre Five-Year Review public notices published in local newspapers indicating Five-Year Reviews were being initiated.
- Post Five-Year Review public notices published in local newspapers indicating Five-Year Reviews were

completed and available in the local repository or from the State or EPA.

- Monthly site status summaries that were made available to the public or more recently, updates to site activities made on the site web page available on the internet.
- September 23, 2010, newspaper article in the Albuquerque Journal concerning the closure of the General Electric plant.
- Discussion of the site at public meetings associated with the Sunport Boulevard Extension from approximately 2010 to the present.
- Fact sheets and public notices have been provided in both English and Spanish.

Determination That the Criteria for Deletion Have Been Met

The implemented remedies have achieved the degree of cleanup or protection specified in the OU1, OU2, and OU5 RODs for the portions of the Site proposed for deletion. The selected remedial action goals and associated cleanup levels for the OU1, OU2, and OU5 portions of the Site proposed for deletion are consistent with EPA policy and guidance. No further Superfund response for the OU1, OU2, and OU5 portions of the Site proposed for deletion are needed to protect human health and the environment. The State of New Mexico, in an August 11, 2017, letter from the New Mexico Environment Department, concurred with the proposed partial deletion of the OU1, OU2, and OU5 portions of the Site from the NPL.

The NCP specifies that EPA may delete a site from the NPL if all appropriate response under CERCLA has been implemented and no further response action is appropriate. 40 CFR 300.425(e)(1)(ii). EPA, with the concurrence of the State of New Mexico, through NMED, believes that this criterion for the deletion of the OU1, OU2, and OU5 portions of the Site has been met and the OU1, OU2, and OU5 portions of the Site no longer pose a threat to public health or the environment. Consequently, EPA is proposing to delete the OU1, OU2, and OU5 portions of the Site from the NPL. Documents supporting this action are available in the Docket.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

[EPA–HQ–SFUND–2002–0001; FRL–9981–51—Region 4]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Reasor Chemical Company Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 4 is issuing a Notice of Intent to Delete the Reasor Chemical Company Superfund Site (site) located in Castle Hayne, New Hanover County, North Carolina, from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the State of North Carolina, through the North Carolina Department of Environmental Quality (NCDEQ), have determined that all appropriate response actions under CERCLA have been completed. However, this deletion does not preclude future actions under Superfund.

DATES: Comments must be received by August 30, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–2002–0001, by one of the following methods:

- *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*
- *Email: URQUHART-FOSTER.SAMANTHA@EPA.GOV.*
- *Mail:* Samantha Urquhart-Foster, Remedial Project Manager, Remediation and Site Evaluation Branch, Superfund Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960.
- *Hand delivery:* U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA–HQ–SFUND–2002–0001. The *http://www.regulations.gov* website is an ''anonymous access'' system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through *http://www.regulations.gov,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the *http://www.regulations.gov* index. Although listed in the index, some information is not publicly available, *e.g.,* CBI or other information whose disclosure is restricted by statute. Certain other

material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in *http://www.regulations.gov* or in hard copy at:

- U.S. EPA Record Center, attention: Ms. Tina Terrell, Atlanta Federal Center, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Phone: 404–562–8835. Hours: 8 a.m.–4 p.m., Monday through Friday by appointment only; and
- New Hanover County Library, 201 Chestnut Street, Wilmington, North Carolina 28401. Phone: 910–798–6391. Hours: 9 a.m.–5 p.m., Monday through Saturday.

FOR FURTHER INFORMATION CONTACT: Samantha Urquhart-Foster, Remedial Project Manager, Remediation and Site Evaluation Branch, Superfund Division, U.S. Environmental Protection Agency, Region 4, 61 Forsyth Street SW, Atlanta, Georgia 30303–8960. Phone: 404–562–8760, email: *URQUHART-FOSTER.SAMANTHA@EPA.GOV.*

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

EPA Region 4 announces its intent to delete the Reasor Chemical Company Superfund Site from the National Priorities List (NPL) and requests public comment on this proposed action. The NPL constitutes Appendix B of 40 CFR part 300 which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in 40 CFR 300.425(e)(3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions if future conditions warrant such actions.

EPA will accept comments on the proposal to delete this site for thirty (30) days after publication of this document in the **Federal Register**.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Reasor Chemical Company Superfund Site and demonstrates how it meets the deletion criteria.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the State, whether any of the following criteria have been met:

i. Responsible parties or other persons have implemented all appropriate response actions required;

ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or

iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

III. Deletion Procedures

The following procedures apply to deletion of the Site:

(1) EPA consulted with the State before developing this Notice of Intent to Delete;

(2) EPA has provided the State 30 working days for review of this notice prior to publication of it today;

(3) In accordance with the criteria discussed above, EPA has determined that no further response is appropriate;

(4) The State of North Carolina, through the NCDEQ, has concurred with deletion of the Site from the NPL.

(5) Concurrently with the publication of this Notice of Intent to Delete in the **Federal Register**, a notice is being published in a major local newspaper, the *Wilmington Star-News.* The newspaper notice announces the 30-day public comment period concerning the Notice of Intent to Delete the site from the NPL.

(6) The EPA placed copies of documents supporting the proposed deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

If comments are received within the 30-day public comment period on this document, EPA will evaluate and respond appropriately to the comments before making a final decision to delete. If necessary, EPA will prepare a Responsiveness Summary to address any significant public comments received. After the public comment period, if EPA determines it is still appropriate to delete the Site, the Regional Administrator will publish a final Notice of Deletion in the **Federal Register**. Public notices, public submissions and copies of the Responsiveness Summary, if prepared, will be made available to interested parties and in the site information repositories listed above.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Site Deletion

The following information provides EPA's rationale for deleting the Site from the NPL:

Site Background and History

The Reasor Chemical Company Site (EPA ID: NCD986187094) is located at 5100 North College Road (Hwy. 132), in Castle Hayne, New Hanover County, North Carolina. Castle Hayne is approximately 13 miles north of Wilmington, NC. The site is an abandoned stump rendering facility, which operated from 1959 to 1972 under the name of Reasor Chemical Company. The site property consists of one parcel of 25.59 acres. A fire and possible explosion occurred on the property on April 7, 1972, which damaged and destroyed the remaining buildings and material on the site property. The property currently is unused, unoccupied, and covered with native brush and secondary growth forest.

The former Reasor Chemical Company reportedly produced turpentine, pine resin, pitch, tall oil, pine oil, camphor, pine tar, and charcoal from pine tree stumps. It is believed that the facility used various solvents to extract raw product from chipped stumps, distilling the extract into separate product fractions. The solvents used in the extraction process were likely stored on-site in 55-gallon drums, the remains of which were in a surface drum disposal area near the center of the property. It is thought that four of the five onsite ponds were used in the manufacturing process. Those four ponds contained sediments with elevated concentrations of volatile organic compounds (VOCs), semi-

volatile organic compounds (SVOCs) including polycyclic aromatic hydrocarbons (PAHs), and inorganic compounds. An area thought to have been used to store scrap copper metal was also present, which had elevated concentrations of copper and lead.

EPA proposed listing the site on the NPL on September 13, 2001 (66 FR 47612), and finalized the listing on September 5, 2002 (67 FR 56757). The property is currently undeveloped. The Site is currently zoned industrial.

Remedial Investigation and Feasibility Study (RI/FS)

During 1996 through 2002, Roy F. Weston, Inc. (WESTON) performed the Remedial Investigation/Feasibility Study (RI/FS) for EPA. During 2000 through 2002, EPA Region 4's Science and Ecosystem Support Division (SESD) completed the Ecological Risk Assessment (ERA). Investigations at the site revealed the presence of metals, VOCs, and SVOCs above risk-based screening values.

The human health risk assessment identified risks for potential future on-site workers and residents. These risks were primarily associated with drinking shallow groundwater and ingestion of or dermal contact with soils. The ecological risk assessment indicated that risks were posed to ecological receptors from contact with or ingestion of surface water, soil, and sediment.

Selected Remedy

EPA's Record of Decision (ROD) was signed on September 26, 2002, and the North Carolina Department of Environment and Natural Resources, (now known as the North Carolina Department of Environmental Quality (NCDEQ)), concurred with the selected remedy. EPA revised the remedy in a ROD Amendment dated June 1, 2007. The amended selected remedy included the following:

- *Soil and sediment:* Excavation and off-site disposal, backfill the excavated soil areas and vegetate with native plant species, and return the former ponds to wetland habitats.
- *Surface water:* On-site treatment and disposal.
- *Groundwater:* Backfill the drum disposal area with an alkaline substance to raise the pH of shallow groundwater, perform annual monitoring of groundwater to determine if contaminants of concern (COCs) continue to be elevated, and attach a ''Declaration of Perpetual Land Use Restrictions'' to the property title that prohibits the use of shallow groundwater for any purpose.

The Remedial Action Objectives (RAOs) for the site were:

- *Sediment:* Prevent further migration of contaminants from sediment to groundwater and surface water above levels exceeding groundwater and surface water clean-up goals; eliminate exposure of ecological receptors to contaminated sediment; achieve ecological risk-based sediment clean-up goals for: Methyl ethyl ketone, toluene, (3 and/or 4)-methylphenol, total PAHs, and copper.
- *Surface water:* Prevent further migration of contaminants above clean-up goals from Ponds 1, 2, 3 and 4, to soil, groundwater and down-gradient surface water bodies; eliminate exposure to contaminated surface water above levels exceeding clean-up goals by aquatic receptors; achieve the North Carolina Surface Water Quality Standards (NCAC Title 15A, Chapter 2, Subchapter 2B.0100 and 2B.0200) in Ponds 1, 2, 3 and 4 for: Copper, lead, iron and zinc.
- *Soil:* Prevent further migration of contaminants from soil to groundwater and surface water above levels exceeding groundwater and surface water clean-up goals; eliminate unacceptable risk to human health and the environment; achieve the human health and ecological risk based clean-up goals for: Benzo(a)pyrene, benzo(b &/or k)fluoranthene, dibenzo(a,h) anthracene, antimony, copper and lead.
- *Groundwater:* Prevent human consumption of contaminated groundwater until risk-based standards for aluminum, and Safe Drinking Water Act's Maximum Contaminant Levels (MCLs) for beryllium, chromium and nickel, are attained.

Response Actions

The Remedial Design (RD) was completed by EPA between September 2002 and January 2004. EPA and the Potentially Responsible Parties (PRPs) entered a Consent Decree in which the PRPs agreed to conduct the Remedial Action (RA). The PRPs began the RA on June 4, 2007 utilizing the remedial actions outlined in the 2007 ROD Amendment. Apex Companies, LLC (Apex) was retained by the PRPs and performed all the of the RA work described below. The RA for soil, sediment and surface water was completed in July 2007 and the Preliminary Close-Out Report was issued in September 2007. The *Interim Remedial Action and Final Remediation Report, Revision 3,* was issued in August 2008.

Approximately 140,000 gallons of contaminated water was treated and discharged on site. Approximately 2,000 tons of contaminated soils and sediments were excavated and disposed of in off-site landfills. After excavation and confirmation sampling, the ponds were allowed to naturally refill with water and vegetate. The soil excavation areas were backfilled and allowed to naturally vegetate. Lime was applied in the area of monitoring wells MW–7S and MW–7D in order to increase the groundwater pH. Increasing the pH of groundwater is intended to lower concentrations of metals in the groundwater in this area. Institutional controls in the form of a Declaration of Perpetual Land Use Restriction were filed with the property deed in 2008.

Annual sampling of groundwater monitoring wells MW–7S and MW–7D was performed when appropriate pH and turbidity levels permitted. Collection of samples for laboratory analysis was only required if the pH was between 7.2 and 8.5 using best efforts to reduce turbidity. Annual sampling events were attempted on February 11, 2008, January 28, 2009, December 7, 2009, and November 2, 2010. However, samples were not collected during any of the annual sampling events due to pH conditions recorded below 7.2 units.

Apex returned to the site on May 18, 2011, to complete a groundwater sampling event in accordance with the Amended ROD, which stated that regardless of the pH levels, samples were to be collected within five years after initiation of remedial action. The sampling event was conducted with the intent that EPA could determine if the clean-up goals had been achieved.

Based on the groundwater quality results from the May 18, 2011, sampling event, remedial actions had been successful in achieving the cleanup goals for beryllium and nickel in groundwater. However, elevated concentrations of aluminum and chromium were still present above the cleanup goals. Based on past groundwater sampling results at the site, there is a direct correlation between low sample pH, high sample turbidity, and elevated metal concentrations. Apex returned to the site on November 12, 2012, to sample for metals in MW–7D and MW–7S, collecting both an unfiltered and filtered sample to address turbidity. Due to a malfunctioning pump at MW–7S, only MW–7D could be sampled on November 12, 2012. Elevated concentrations of aluminum and chromium were still present above the Amended ROD RAOs established for the site in the unfiltered sample; however, metal concentrations were below Amended ROD RAOs established for the site in the filtered sample.

Apex conducted groundwater assessment activities at the site in December 2015 and January 2016 to fulfill the requirements of the Amended ROD. The activities included the advancement of two groundwater monitoring wells installed immediately adjacent to MW–7D and MW–7S, in addition to the collection and analysis of groundwater samples, both filtered and unfiltered.

Replacement wells MW–7SR and MW–7DR were installed to address elevated turbidity levels. It was suspected that there could have been some damage to the existing well screens which resulted in the influx of sediment. Quarterly sampling was conducted at MW–7SR and MW–7DR. Results indicated that the COCs are not present at concentration at or above applicable Amended ROD clean up goals. Based on the cancer slope factor and oral reference dose for hexavalent chromium being more stringent, chromium was speciated during the January 2016 sampling event and was not detected above laboratory detection limits in either MW–7SR or MW–7DR.

It was determined that hexavalent chromium is not a COC and concentrations of total chromium are also below the Amended ROD clean up goals. Apex completed the Final Remedial Action Report Addendum in November 2017.

As prescribed in the 2007 Amended ROD, institutional controls (ICs) were implemented in September 2008 with the placement of a Declaration of Perpetual Land Use Restrictions (DPLUR) on the property deed. The DPLUR requires annual notification to NCDEQ and EPA confirming that the DPLUR is still recorded in the Office of the New Hanover County Register of Deeds and that activities and conditions at the site remain in compliance with the land use restrictions. The land use restrictions in the DPLUR state that groundwater from the surficial aquifer underlying the site may not be used for any purpose. Groundwater located beneath the confining layer shall not be used as a source of potable water. Any groundwater well or other device for access to groundwater for any purpose other than monitoring groundwater quality must include an isolation seal between the surficial aquifer and the Peedee Formation aquifer located below. The installation of groundwater wells or other devices for access to groundwater for any purpose other than monitoring groundwater quality requires prior approval by NCDEQ, or its successor in function. The owner(s) of the property must provide written notification to EPA prior to seeking approval from NCDEQ for the installation of groundwater wells.

Cleanup Levels

Cleanup goals were established to achieve a 10^{-5} (one in 100,000) excess carcinogenic risk level for potential future resident children (most conservative risk category evaluated) and/or a hazard quotient (HQ) of 1 for potential resident children or ecological receptors.

Surface Water: Although the treatment system did not reduce contaminant concentrations in surface water to below cleanup goals during its operation in 2007, the RAOs were achieved for the following reasons:

- Migration of and aquatic receptor exposure to contaminated surface water was halted by
  - treating all surface water in ponds and land applying treated water;
  - excavating contaminated soils to residential cleanup standards;
  - excavating contaminated sediments to ecological cleanup goals and placing 18 to 60 inches of non-contaminated soil over the base of the excavated ponds; and
  - allowing the ponds to refill naturally.

Soil: Cleanup goals specified in the 2007 ROD Amendment for soil were attained.

All confirmation sample results from the soil excavation areas were below the ROD-specified cleanup goals.

Sediment: Ten samples were collected and analyzed to determine if cleanup goals were met in the four sediment excavation areas. Six confirmation samples were collected from the four excavated ponds in June 2007. One sample was a duplicate of another sample in Pond 3. The duplicate sample result was within the same order of magnitude as the sample from which it was split. Because the laboratory detection limits for (3 and/or 4)-methylphenol and methyl ethyl ketone (also known as butanone) were higher than the cleanup goals, the four ponds were resampled in August 2007 and analyzed for these two COCs.

Cleanup goals for toluene and copper were attained in all four ponds. The cleanup goal for methyl ethyl ketone (also known as 2-butanone) was attained in ponds 1–3, and possibly pond 4. The original confirmation sample collected in June 2007 from pond 4 had a concentration less than the laboratory reporting limit of 100 micrograms per kilogram (µg/kg), which is less than the cleanup goal established in the 2007 ROD Amendment. However, the sample collected in pond 4 in August 2007 did not have a detectable concentration of methyl ethyl ketone but the laboratory detection limit (268 µg/kg) was greater than the cleanup goal of 137 µg/kg. Methyl ethyl ketone was not detected in any of the ponds. All ponds had at least one sample which had a laboratory detection limit that was lower than the cleanup goal.

All samples collected from the excavated ponds had concentrations of (3 and/or 4)-methylphenol above cleanup goals or the laboratory detection limit was greater than the cleanup goal. The low-level presence of (3 and/or 4)-methylphenol in the soil does not present a significant risk to human health or the environment, and further sampling and assessment is not needed for the following reasons:

- Methylphenol is a naturally occurring substance. Cresols (methylphenols) are found in many foods and in wood in this region of North Carolina. The contaminant presence at low-levels may be naturally occurring and not site-related.
- The impacted soil was removed from the lagoons and capped with 18 to 60 inches of clean fill. Therefore, the surface water within the lagoons is not in direct contact with impacted soil.
- The ROD clean-up goal of 50 µg/kg for (3 and/or 4)-methlyphenol was established based on ecological risk, not human health risk. Any residual contamination is at depths greater than 18 inches, and therefore there is no exposure route for ecological receptors. There is no obvious or adverse impact to the ecology within the lagoons as observed through the thriving aquatic flora and fauna present within lagoons over the last 11 years, since the time the lagoons were remediated in 2007.
- The concentrations present in the soil are below the EPA Regional Screening Levels (RSLs) for residential soils for methylphenol of 3,200 milligrams per kilogram (mg/kg), which is protective of human health.

The RAOs were achieved for the following reasons:

- All confirmatory samples obtained from ponds 1–4 were collected from each basin's clay liner.
- Each basin was subsequently capped with 18 inches to 60 inches of clean soil backfill.
- The RAs performed removed the contaminated ecological exposure medium, sediment, and subsequently capped the underlying clay liner with clean soil, thereby eliminating the ecological exposure pathway for sediments in the ponds and exposure to remaining residual levels in the clay layer, and thus any associated risk.

Soil or sediment samples have not been collected since the RA. For the soil

excavation areas, restoration included backfilling with soil, grading the areas to provide drainage away from the areas, revegetation with native rye grass and spreading of wood chips over the area for erosion control. Pond restoration consisted of backfilling a portion of the ponds, covering the banks of the excavation and surrounding disturbed areas with straw matting for erosion control, and seeding with native rye grass. During the final site inspection conducted in April 2017, it was observed that the excavation areas are now restored with native brush and secondary growth forest.

Groundwater: No COCs were detected at concentrations above the Amended ROD clean up goals in either sample MW–7DR or MW–7SR during 2016 quarterly groundwater sampling. The detected concentrations of these compounds are generally significantly less than the concentrations previously identified in groundwater samples collected at the Site in May 2011 and November 2012. Aluminum, beryllium, chromium, and nickel were either detected at estimated concentrations that are below the applicable criteria, or were not detected above laboratory detections limits in both the filtered and unfiltered samples.

Due to the low turbidity of the samples, the concentrations reported for both filtered and unfiltered samples were very similar. In addition to the reductions in the observed concentrations of the COCs, the pH values were also higher than historic values. The pH was measured at 3.81 in MW–7SR versus historic values ranging from 2.31 to 3.55 in MW–7S. The pH of the sample collected at MW–7DR was 6.47 versus historic values measured as low as 3.21.

In addition, pH values measured in the newly installed wells are similar to other sites in the Castle Hayne area. Based on the findings of the January 2016 sampling event, Apex conducted three additional quarterly sampling events in April, July, and October 2016 to obtain sufficient data for site closure. During these quarterly sampling events, since the January 2016 sampling results demonstrated that hexavalent chromium was not a COC, the samples were only analyzed for total chromium.

The monitoring data demonstrates that remedial action objectives and cleanup levels specified in the 2007 ROD Amendment are achieved. There are no additional monitoring or Operations and Maintenance of the remedy required.

Five-Year Reviews

The purpose of a five-year review (FYR) is to evaluate the implementation and performance of a remedy to determine if the remedy is and will continue to be protective of human health and the environment. In addition, FYR reports identify issues found during the review, if any, and document recommendations to address them. EPA completed two policy FYRs for the site in September 2012 and September 2017. The 2017 FYR determined that the remedy was protective of human health and the environment, and there were no issues or recommendations. The 2017 FYR concluded that no further FYRs are planned for the site because all impacted media have reached Unlimited Use/Unrestricted Exposure (UU/UE) categorization.

Community Involvement

EPA has communicated with the public through Fact Sheets, meetings, internet postings, newspaper ads, and answering email and phone inquiries. Current Site information can be found at *https://cumulis.epa.gov/supercpad/cursites/csitinfo.cfm?id=0405590.*

Public participation activities have been satisfied as required in CERCLA Section 113(k), 42 U.S.C. 9613(k) and CERCLA Section 117, 42 U.S.C. 9617. Documents in the deletion docket, which the EPA relied on for recommendation of the deletion from the NPL, are available to the public in the information repositories identified above.

Determination That the Site Meets the Criteria for Deletion in the NCP

Region 4 has followed the procedures required by 40 CFR 300.425(e) as mentioned above and the implemented remedy achieves the degree of cleanup specified in the ROD for all pathways of exposure. The information presented in the Final Close-Out Report verifies that the site has achieved the ROD Amendment's RAOs, and that all cleanup actions specified in the ROD Amendment were implemented. All selected remedial action objectives and associated cleanup levels are consistent with agency policy and guidance. This site meets all the site completion requirements as specified in Office of Solid Waste and Emergency Response (OSWER) Directive 9320.22, *Close-Out Procedures for National Priorities List Sites.* No further Superfund response is needed to protect human health and the environment.

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Chapter I

[CB Docket No. 18–31; DA 18–115]

Possible Revision or Elimination of Rules

AGENCY: Federal Communications Commission.

ACTION: Review of regulations; comments requested.

SUMMARY: This document invites members of the public to comment on the Commission's rules to be reviewed pursuant to section 610 of the Regulatory Flexibility Act of 1980, as amended (RFA). The purpose of the review is to determine whether Commission rules whose ten-year anniversary dates are in the years 2015–2016, as contained in the Appendix, should be continued without change, amended, or rescinded in order to minimize any significant impact the rules may have on a substantial number of small entities. Upon receipt of comments from the public, the Commission will evaluate those comments and consider whether action should be taken to rescind or amend the relevant rule(s).

DATES: Comments may be filed on or before October 29, 2018.

FOR FURTHER INFORMATION CONTACT: Sharon K. Stewart, Women's Outreach Specialist, Office of Communications Business Opportunities (OCBO), Federal Communications Commission, (202) 418–0990. People with disabilities may contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *fcc504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

ADDRESSES: You may submit comments, identified by CB Docket No. 18–31, by any of the following methods:

- *Federal Communications Commission's Website: http://apps.fcc.gov/ecfs//.* Follow the instructions for submitting comments.
- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 888–835–5322.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

SUPPLEMENTARY INFORMATION: Each year the Commission will publish a list of ten-year old rules for review and comment by interested parties pursuant to the requirements of section 610 of the RFA.

Synopsis

1. Pursuant to the Regulatory Flexibility Act (RFA), *see* 5 U.S.C. 610, the FCC hereby publishes a plan for the review of rules adopted by the agency in calendar years 2005–2006 which have, or might have, a significant economic impact on a substantial number of small entities. The purpose of the review is to determine whether such rules should be continued without change, or should be amended or rescinded, consistent with the stated objective of section 610 of the RFA, to minimize any significant economic impact of such rules upon a substantial number of small entities.

2. This document lists the FCC regulations to be reviewed during the next twelve months. In succeeding years, as here, the Commission will publish a list for the review of regulations promulgated ten years preceding the year of review.

3. In reviewing each rule in a manner consistent with the requirements of section 610, the FCC will consider the following factors:

(a) The continued need for the rule;

(b) The nature of complaints or comments from the public concerning the rule;

(c) The complexity of the rule;

(d) The extent to which the rule overlaps, duplicates, or conflicts with other federal rules and, to the extent feasible, with state and local governmental rules; and

(e) The length of time since the rule has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the rule.

4. Appropriate information has been provided in the Appendix for each rule, as chosen for review by the FCC according to the requirements of section 610, including a *Brief Description* of the rule and the need for, and *Legal Basis* of, the rule. The public is invited to comment on these rules, and all relevant and timely comments will be considered by the FCC before final action is taken in this proceeding.

5. Pursuant to sections 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System (ECFS). *See Electronic Filing of Documents in Rulemaking Proceedings,* 63 FR 24121 (1998).

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *http://apps.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number. Filings can be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- All hand-delivered or messenger-delivered paper filings for the Commission's Secretary must be delivered to FCC Headquarters at 445 12th St. SW, Room TW–A325, Washington, DC 20554. The filing hours are 8:00 a.m. to 7:00 p.m. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes and boxes must be disposed of *before* entering the building.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
- U.S. Postal Service first-class, Express, and Priority mail must be addressed to 445 12th Street SW, Washington, DC 20554.

People with Disabilities: To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

6. The proceeding this Notice initiates shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules.[1] Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

7. For information on the requirements of the RFA, the public may contact Sharon K. Stewart, Women's Outreach Specialist, Office of Communications Business Opportunities, 202–418–0990 or visit *www.fcc.gov/ocbo.*

Federal Communications Commission.

Sanford S. Williams,

Director, Office of Communications Business Opportunities.

List of rules for review pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. Section 610, for the ten-year

[1] 47 CFR 1.1200 *et seq.*

period beginning in the year 2005 and ending in the year 2006. All listed rules are in title 47 of the Code of Federal Regulations.

PART 1—PRACTICE AND PROCEDURE

Subpart E—Complaints, Applications, Tariffs, and Reports Involving Common Carriers

Brief Description: Section 1.767 sets forth the application filing requirements for submarine cable landing licenses. Section 1.768 sets forth the notification and prior approval requirements for submarine cable landing licensees that are or propose to become affiliated with a foreign carrier.

Need: The rules are needed to implement the Commission's policies that facilitate the expansion of capacity and facilities-based competition in the submarine cable market. These measures are designed to enable international carriers to respond to the demands of the market with minimal regulatory oversight and delay, saving time and resources for both the industry and government, while preserving the Commission's ability to guard against anticompetitive behavior.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 225, 303(r), 309 and 325(e).

Section Number and Titles:

1.767(a), (a)(5), (a)(7)–(11), (g)–(n) Cable landing licenses.

1.768, (h)–(j) Notification by and prior approval for submarine cable landing licensees that are or propose to become affiliated with a foreign carrier.

Subpart F—Wireless Radio Services Applications and Proceedings

Brief Description: Part 1 states the general rules of practice and procedure before the Federal Communications Commission. Subpart F sets forth the requirements and conditions under which entities may be licensed in the Wireless Radio Services as described in parts 1, 13, 20, 22, 24, 26, 27, 74, 80, 87, 90, 95, 97 and 101.

Need: These recodifications of Part 22 rules (1.958 and 1.959) establish the required distance and terrain elevation calculation methods applicable to all Wireless Radio Services (except Parts 21 and 101) (Parts 1, 20, 22, 24, 27, 80 87, 90, 95, and 97); implement the Commission's policies with regard to the processing of applications (1.913(a)(6) and 1.919(b)(5)) and the protection of Federal Government operations (1.924(e)); and revise the procedures for the amateur service vanity call sign system (1.934(d)(5)). The need for these rules is ongoing.

Legal Basis: 15 U.S.C 79 *et seq.;* 47 U.S.C. 151, 154, 154(i), 154(j), 155, 157, 225, 227, 303, 303(r), 307, 309 and 332.

Section Number and Titles:

1.913(a)(6) Application and notification forms; electronic and manual filing.

1.919(b)(5) Ownership Information.

1.924(e)(4) Quiet zones. (Revised 2015)

1.934(d)(5) Defective applications and dismissal.

1.958 Distance computation. (Revised 2014)

1.959 Computation of average terrain elevation.

Subpart G—Schedule of Statutory Charges and Procedures for Payment

Brief Description: These rules specify the schedule of annual regulatory fees and filing locations for the designated payors.

Need: Congress sets the amount the Commission must collect each year in the Commission's fiscal year appropriations. Section 9(a)(2) of the Communications Act of 1934, as amended (Communications Act or Act) requires the Commission to collect fees sufficient to offset the amount appropriated.[2] These rules specify the fees for the Commission's regulatees.

Legal Basis: 47 U.S.C. 159.

Section Number and Titles:

1.1102 Table amended—Schedule of charges for applications and other filings in the wireless telecommunications services.

1.1107 Table corrected—Schedule of charges for applications and other filings for the international services.

1.1152 Table amended—Schedule of annual regulatory fees and filing locations for wireless radio services.

1.1153 Revised—Schedule of annual regulatory fees and filing locations for mass media services.

1.1154 Revised—Schedule of annual regulatory charges for common carrier services.

1.1155 Revised—Schedule of regulatory fees for cable television services.

1.1156 Revised—Schedule of regulatory fees for international services.

Subpart Q—Competitive Bidding Proceedings

Brief Description: Part 1 states the general rules of practice and procedure before the Federal Communications Commission. Subpart Q sets forth the provisions implementing Section 309(j) of the Communications Act of 1934, as amended, authorizing the Commission to employ competitive bidding procedures to resolve mutually exclusive applications for certain initial licenses.

Need: These rules are needed on an ongoing basis to implement the Commission's competitive bidding authority under Section 309(j) of the Communications Act of 1934, as amended, including the designated entity and tribal land bidding credit programs.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 157, 225, 303(r) and 309(j).

Section Number and Titles:

1.2104(j)(1)–(2) Competitive bidding mechanisms. (Renumbered 2014)

1.2107(g) Submission of down payment and filing of long-form applications.

1.2111(b)(2)(ii) Assignment or transfer of control: Unjust enrichment. (Renumbered 2015)

1.2112(b)(1)(iii)–(iv) Ownership disclosure requirements for applications. (Revised 2016)

1.2114 Reporting of eligibility event. (Revised 2015)

Subpart Y—International Bureau Filing System

Brief Description: Subpart Y describes the procedures for electronic filing of international and satellite services applications using the International Bureau Filing System (IBFS).

Need: Subpart Y is necessary as it codifies the use of the International Bureau Filing System (IBFS) as an official method of filing applications related to satellite and international telecommunications services with the Commission. Electronic filing improves the speed and efficiency of application processing and also expedites the availability of application information for public use and inspection.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 225, 303(r), 309 and 325(e).

Section Number and Titles: (originally codified at 1.9000–9018).

1.10000 What is the purpose of these rules?

1.10001 Definitions.

1.10002 What happens if the rules conflict?

1.10003 When can I start operating?

1.10004 What am I allowed to do if I am approved?

1.10005 What is IBFS?

1.10006 Is electronic filing mandatory?

1.10007, (a)–(c) What applications can I file electronically?

1.10008 What are IBFS file numbers?

1.10009 What are the steps for electronic filing?

[2] 47 U.S.C. 159(a)(2).

1.10010 Do I need to send paper copies with my electronic applications?
1.10011 Who may sign applications?
1.10012 When can I file on IBFS?
1.10013 How do I check the status of my application after I file it?
1.10014 What happens after officially filing my application?
1.10015 Are there exceptions for emergency filings?
1.10016 How do I apply for special temporary authority?
1.10017 How can I submit additional information?
1.10018 May I amend my application?

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

Subpart J—Equipment Authorization Procedures

Brief Description: An application for certification of a software defined radio must include the information required by section 2.944.

Need: Section 2.1033 ensures that applications for certification include information sufficient to demonstrate compliance with all pertinent requirements. Paragraph (c)(18) requires an application for certification of a software defined radio to include an exhibit that addresses the specific requirements of Section 2.944, Software defined radios. Pursuant to that section, in order to assure that the device may only operate within the radio parameters for which it was approved, manufacturers must take steps to ensure that only software that has been approved for use with the software defined radio can be loaded into the radio. This rule affects small entities that are identified as manufacturers.

Legal Basis: 47 U.S.C. 154, 302a, 303, and 336, unless otherwise noted.

Section Number and Title:

2.1033 Application for certification.

PART 15—RADIO FREQUENCY DEVICES

Subpart B—Unintentional Radiators

Brief Description: All TV broadcast receivers shipped in interstate commerce or imported into the United States, for sale or resale to the public, shall comply with the provisions of this section, except that paragraphs (f) and (g) of this section shall not apple to the features of such sets that provide for reception of digital television signals.

Need: This rule contains requirements adopted pursuant to the All-Channel Receiver Act, 47 U.S.C. 303(s), to ensure that that TV receivers are capable of adequately receiving all channels allocated for the TV broadcast service.

Legal Basis: 47 U.S.C. 154, 302a, 303, 304, 307, 336, 544a, and 549.

Section Number and Title:

15.117 TV broadcast receivers.

Subpart C—Intentional Radiators

Brief Description: Client devices that operate in a master/client network may be certified if they have the capability of operating outside permissible part 15 frequency bands, provided they operate on only permissible part 15 frequencies under the control of the master device with which they communicate.

Need: This rule benefits equipment manufacturers by allowing the certification of transmitters that can be used in multiple countries, thus reducing equipment costs, while minimizing the likelihood that these devices will operate outside permissible frequency bands within the United States and cause interference to authorized services.

Legal Basis: 47 U.S.C. 154, 302a, 303, 304, 307, 336, 544a, and 549.

Section Number and Title:

15.202 Certified operating frequency range.

Brief Description: Section 15.231(a)(5) allows remote control devices to be operated with transmission durations greater than five seconds but less than ten seconds during equipment setup.

Need: There is a need, in some cases, to allow installers of complex security systems to initiate transmissions for greater than the five seconds duration otherwise permitted under Section 15.231. To minimize the likelihood of interference to authorized users of the spectrum the rule limits setup transmissions to no more than ten seconds. This allows manufacturers flexibility in the design of complex security systems while limiting the increase in interference potential of those systems.

Legal Basis: 47 U.S.C. 154, 302a, 303(e), 303, 304, 307, 336, 544a, and 549.

Section Number and Title:

15.231 Periodic operation in the band 40.66–40.70 MHz and above 70 MHz.

PART 20—COMMERCIAL MOBILE SERVICES

Brief Description: Part 20 rules set forth the Commission's requirements and conditions for commercial mobile radio service providers under the Communications Act of 1934, as amended.

Need: These rules are needed on an ongoing basis to implement the Commission's interconnection regulations between local exchange carriers and commercial mobile radio service providers, including compensation and arbitration obligations.

Legal Basis: 47 U.S.C. 151, 152(a), 154(i), 157, 160, 201, 214, 222, 251(e), 301, 302, 303, 303(b), 303(r), 307(a), 309(j)(3), 316(a), 332, 610, 615, 615a, 615b and 615c.

Section Number and Titles:

20.11(d), (e) Interconnection to facilities of local exchange carriers.

Brief Description: Section 20.19 requires providers of covered mobile services and the manufacturers of handsets used with these services to offer a selection of hearing aid-compatible handsets. Providers and manufacturers must ensure that a certain minimum percentage or number of the handsets that they offer meet a specified rating for compatibility with hearing aids in acoustic coupling mode (coupling via the hearing aid microphone) and inductive coupling mode (coupling via a telecoil), as measured under Commission-approved technical standards. In 2005, section 20.19 was amended by adding subsection (b)(4), which directs states that adopt and enforce the Commission's hearing aid compatibility rules on delegated authority to refer to the Commission's Office of Engineering and Technology any questions involving factual determinations of whether particular equipment complies with the Commission-approved technical standards.

Need: Section 20.19 implements, for wireless handsets, the statutory requirement under 47 U.S.C. 610(b) that telephones and devices used for advanced communications services provide internal means for effective use with compatible hearing aids. The rule is also necessary to ensure reasonable access to commercial mobile services by persons with impaired hearing, as required under 47 U.S.C. 610(a).

Legal Basis: 47 U.S.C. 151, 154(i), 157, 160, 201, 202, 208, 214, 301, 302, 303, 308, 309(j), 310, and 610.

Section Number and Title:

20.19(b)(4) Hearing aid-compatible mobile handsets; technical standards.

PART 22—PUBLIC MOBILE SERVICES

Subpart E—Paging and Radiotelephone Service

Brief Description: In 2006, this rule added clarification on reimbursement and relocation expenses when an emerging technologies (ET) services

licensee relocates a paired Paging and Radiotelephone Services (PARS) link under certain conditions.

Need: As part of the effort to transition microwave channels for use by ET services, this provision promotes the transition and accomplishes regulatory parity with a similar provision in Part 27. The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154, 222, 303, 309 and 332.

Section Number and Title:

22.602(k) Transition of the 2110–2130 and 2160–2180 MHz channels to emerging technologies; Reimbursement and relocation expenses in the 2110–2130 MHz and 2160–2180 MHz bands.

Subpart G—Air-Ground Radiotelephone Service

Brief Description: These rules refined the Commercial Aviation Air-Ground Systems within the Air-Ground Radiotelephone Service. Section 22.853 limits any Air-Ground Radiotelephone Service licensee to the use of no more than 3 MHz of spectrum in the service bands. Section 22.877 defines unacceptable interference to non-cellular Part 90 licensees from this service as equivalent to the definition in Section 22.970 applicable to the Cellular Radiotelephone Service. Section 22.878 outlines the obligations to abate unacceptable interference from commercial aviation ground stations, divided into strict responsibility for single licensees, and joint and several responsibility for multiple licensees. Section 22.879 outlines the interference resolution procedures applicable to licenses for commercial aviation ground stations after a certain date, including notification, interference analysis, and mitigation. Section 22.880 enforces information exchange between this service and public safety/critical infrastructure industry licensees, requiring notification upon request of activation or modification of a ground station site. Section 22.881 defines the service to be subject to competitive bidding, according to the procedures set forth in Part 1, Subpart Q of the same Chapter. Finally, Section 22.882 establishes bidding credits for eligible designated entities to reduce the cost of winning bids for commercial Air-Ground Radiotelephone Service licenses.

Need: In refining the statutory requirements for the Commercial Aviation Air-Ground Radiotelephone Service, which remains in operation today, these rules contain various provisions that advance the interests of small businesses, including those providing for access to the spectrum and those imposing interference limitations, abatement and resolution procedures, including information exchange and notification, to provide small business licensees with further leverage to receive protection from interference. Finally, the rules establish bidding credits for eligible designated entities to encourage participation in the Air-Ground Radiotelephone Services for small and very small businesses as defined. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, 222, 303, 309 and 332.

Section Number and Titles:

22.853 Eligibility to hold interest in licenses limited to 3 MHz of spectrum.
22.877 Unacceptable interference to part 90 non-cellular 800 MHz licensees from commercial aviation air-ground systems.
22.878 Obligation to abate unacceptable interference.
22.879 Interference resolution procedures.
22.880 Information exchange.
22.881 Air-Ground Radiotelephone Service subject to competitive bidding.
22.882 Designated entities.

PART 25—SATELLITE COMMUNICATIONS

Subpart A—General

Brief Description: Part 25 contains the Commission's rules governing the licensing and operation of space stations and earth stations. It includes application requirements, technical requirements, operational requirements, and coordination requirements for various satellite services. The rules also define the Commission's processing of applications.

Need: The Part 25 rules are needed to ensure that satellite services may be provided without harmful interference and consistent with the public interest.

Legal Basis: 47 U.S.C. 154, 301, 302, 303, 307, 309, 310, 319, 332, 605, 721.

Section Number and Titles:

25.103 Definitions.
25.109(c) Cross reference.

Subpart B—Applications and Licenses

25.110 Filing of applications, fees, and number of copies.
25.111(b), (c) Additional information, ITU filings, and ITU cost recovery.
25.112(a)(3), (b) introductory text Dismissal and return of applications.
25.113 Heading and (a) [formerly partially in 25.136, 25.143(i), (j), (k)], (g), (h) Station licenses and launch authority.
25.114 Applications for space station authorizations.
25.115(a)(1), (2)(iii), (c)(1), (2), (e), (f) [formerly primarily in 25.134] Applications for earth station authorizations.
25.116(b)(5), (c) introductory text, (d), (e) Amendments to applications.
25.117(a), (c), (d)(1), (2), (3), (g) Modification of station license.
25.118(b), (e) Modifications not requiring prior authorization.
25.119(a), (c), (d), (g) Assignment or transfer of control of station authorization.
25.120(b) Application for special temporary authorization.
25.121 License term and renewals.
25.129 Equipment authorization for portable earth-station transceivers.
25.130(a), (f) Filing requirements for transmitting earth stations.
25.131(a), (b), (h), (i), (j) Filing requirements and registration for receive-only earth stations.
25.132(a) Verification of earth station antenna performance.
25.133(a), (b) Period of construction; certification of commencement of operation.
25.135(c), (d) Licensing provisions for earth station networks in the non-voice, non-geostationary Mobile-Satellite Service.
25.287 [formerly partially in 25.136] Requirements pertaining to operation of mobile stations in the NVNG, 1.5/1.6 GHz, 1.6/2.4 GHz, and 2 GHz Mobile-Satellite Service bands.
25.137 Requests for U.S. market access through non-U.S.-licensed space stations.
25.138(a) introductory text, (a)(6), (f) Licensing requirements for GSO FSS earth stations in the conventional Ka-band.
25.139 NGSO FSS coordination and information sharing between MVDDS licensees in the 12.2 GHz to 12.7 GHz band.
25.140(a) [formerly generally in 25.140(b)] Further requirements for license applications for GSO space station operation in the FSS and the 17/24 GHz BSS.
25.142(a)(1) Licensing provisions for the non-voice, non-geostationary Mobile-Satellite Service.
25.285 [formerly generally in 25.143(i), (j), (k)] Operation of MSS and ATC transmitters or transceivers on board civil aircraft.
25.143(b)(1) Licensing provisions for the 1.6/2.4 GHz mobile-satellite service and 2 GHz mobile-satellite service.

25.144(b) Licensing provisions for the 2.3 GHz satellite digital audio radio service.
25.145 Licensing provisions for the FSS in the 18.3–20.2 GHz and 28.35–30.0 GHz bands.
25.146 Licensing and operating rules for the NGSO FSS in the 10.7–14.5 GHz bands.
25.148 Licensing provisions for the Direct Broadcast Satellite Service.
25.149 (a)(1) note added Application requirements for ancillary terrestrial components in Mobile-Satellite Service networks operating in the 1.5/1.6 GHz and 1.6/2.4 GHz Mobile-Satellite Service.
25.151(c)(2), (d), (e) Public notice.
25.154(a)(3), (c), (d), (e) Opposition to applications and other pleadings.
25.155 Mutually exclusive applications.
25.156(d) Consideration of applications.
25.157 Consideration of applications for NGSO-like satellite operation.
25.158 Consideration of applications for GSO-like satellite operation.
25.159 Limits on pending applications and unbuilt satellite systems.
25.161(a) Automatic termination of station authorization.
25.164 Milestones.
25.165 Surety bonds.

Subpart C—Technical Standards

25.202(a)(1), (3), (4), (5), (6), (7), (8) Frequencies, frequency tolerance, and emission limits.
25.203(a), (b), (c), (d), (i) introductory text, (k) Choice of sites and frequencies.
25.204(a), (b), (h), (i) Power limits for earth stations.
25.205 Minimum antenna elevation angle.
25.208(a), (c), (d), (l), (m), (o), (p)–(v) Power flux density limits.
25.209(f) Earth station antenna performance standards.
25.210(c) [formerly in 25.215], (f), (j) Technical requirements for space stations.
25.211 heading, (d), (e) Analog video transmissions in the Fixed-Satellite Services.
25.212 heading, (c), (d), (e) Narrowband analog transmissions, digital transmissions and video transmissions in the GSO Fixed-Satellite Service.
25.213(b) Inter-Service coordination requirements for the 1.6/2.4 GHz mobile-satellite service.
25.216 Limits on emissions from mobile earth stations for protection of aeronautical radionavigation-satellite service.
25.217 Default service rules.
25.220 Non-routine transmit/receive earth station operations.
25.221 Blanket licensing provisions for earth stations on vessels (ESVs) receiving in the 3700–4200 MHz (Earth-to-space) frequency band and transmitting in the 5925–6426 MHz (space-to-Earth) frequency band, operating with Geostationary Satellites in the Fixed-Satellite Service.
25.222 Blanket Licensing provisions for Earth Stations on Vessels (ESVs) receiving in the 10.95–11.2 GHz (space-to-Earth), 11.45–11.7 GHz (space-to-Earth), 11.7–12.2 GHz (space-to-Earth) frequency bands and transmitting in the 14.0–14.5 GHz (Earth-to-space) frequency band, operating with Geostationary Satellites in the Fixed-Satellite Service.
25.253 Special requirements for ancillary terrestrial components operating in the 1626.5–1660.5 MHz/1525–1559 MHz bands.
25.254 Special requirements for ancillary terrestrial components operating in the 1610–1626.5 MHz/2483.5–2500 MHz bands.
25.255 Procedures for resolving harmful interference related to operation of ancillary terrestrial components operating in the 1.5/1.6 GHz and 1.6/2.4 GHz bands.
25.256 Special Requirements for operations in the 3.65–3.7 GHz band.
25.258 Sharing between NGSO MSS feeder-link stations and GSO FSS services in the 29.25–29.5 GHz band.
25.261 Procedures for avoidance of in-line interference events for Non Geostationary Satellite Orbit (NGSO) Satellite Network Operations in the Fixed-Satellite Service (FSS) Bands.

Subpart D—Technical Operations

25.271(b), (c) introductory text, (c)(5), (e), (f) Control of transmitting stations.
25.274(e), (f) [redesignated as new (g)], new (f) Procedures to be followed in the event of harmful interference.
25.277(b), (c), (d), (f) Temporary fixed earth station operations.
25.280 Inclined orbit operations.
25.282 Orbit raising maneuvers.
25.283 End-of-life disposal.
25.284 Emergency Call Center Service.

Subpart F—Competitive Bidding Procedures for DARS

25.401 Satellite DARS applications subject to competitive bidding.
25.404 Submission of down payment and filing of long-form applications.

Subpart I—Equal Employment Opportunities

25.601 Equal employment opportunities.

Subpart J—Public Interest Obligations

25.701 Other DBS Public interest obligations.

PART 27—MISCELLANEOUS WIRELESS COMMUNICATIONS SERVICE

Subpart A—General Information

Brief Description: Part 27 contains service and licensing rules for Miscellaneous Wireless Communications Services. Subpart A contains general information.

Need: The revised rules specify that the part 27 rules apply to the Broadband Radio (BRS) and Educational Broadband (EBS) service frequencies in the 2495–2690 MHz. They also add a reference to part 74, the rule part applicable to experimental radio, auxiliary, special broadcast and other program distributional services, as also being applicable to Wireless Communications Service. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, 301, 302, 303, 307, 309, 332, 336, 337, 1403, 1404 and 1451.

Section Number and Titles:

27.1(b)(9) Basis and purpose.
27.3(o) Other applicable rule parts.

Subpart C—Technical Standards

Brief Description: Part 27 contains service and licensing rules for Miscellaneous Wireless Communications Services. Subpart C contains technical standards applicable to a number of services and frequency bands.

Need: The additional rules add power limits for particular types of services that may be offered as BRS or EBS, as well as the measurement procedures and an alternative out of band emissions limit for BRS. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, 301, 302, 303, 307, 309, 332, 336, 337, 1403, 1404 and 1451.

Section Number and Titles:

27.50(h)(3), (4) Power limits and duty cycle.
27.53(m)(6), (7) Emission limits.

Subpart L—1695–1710 MHz, 1710–1755 MHz, 1755–1780 MHz, 2110–2155 MHz, 2155–2180 MHz, 2180–2200 MHz Bands

Brief Description: Part 27 contains service and licensing rules for Miscellaneous Wireless Communications Services. Subpart L contains rules that are applicable to AWS–1 (Advanced Wireless Service) stations operating in the 1710–1755/2110–2155 MHz band and rules applicable to AWS–3 stations operating in the 1695–1710 and 1755–1780/2155–2180 MHz bands and to AWS–4 stations operating in the 2000–2020/2180–2200 MHz bands.

Need: The revised rules establish the relocation and cost sharing rules for relocation of incumbent microwave stations and BRS stations out of the spectrum reallocated to create the AWS bands. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, 301, 302, 303, 307, 309, 332, 336, 337, 1403, 1404 and 1451.

Section Number and Titles:

Cost-Sharing Policies Governing Microwave Relocation from the 2110–2150 MHz and 2160–2200 MHz Bands

27.1160 Cost-sharing requirements for AWS.
27.1162 Administration of the Cost-Sharing Plan.
27.1164 The cost-sharing formula.
27.1166 Reimbursement under the Cost-Sharing Plan.
27.1168 Triggering a reimbursement obligation.
27.1170 Payment issues.
27.1172 Dispute resolution under the Cost-Sharing Plan.
27.1174 Termination of cost-sharing obligations.

Cost-Sharing Policies Governing Broadband Radio Service Relocation From the 2150–2160/62 MHz Band

27.1176 Cost-sharing requirements for AWS in the 2150–2160/62 MHz band.
27.1178 Administration of the Cost-Sharing Plan.
27.1180 The cost-sharing formula.
27.1182 Reimbursement under the Cost-Sharing Plan.
27.1184 Triggering a reimbursement obligation.
27.1186 Payment issues.
27.1188 Dispute resolution under the Cost-Sharing Plan.
27.1190 Termination of cost-sharing obligations.

Subpart M—Broadband Radio Service and Educational Broadband Service

Brief Description: Part 27 contains service and licensing rules for Miscellaneous Wireless Communications Services. Subpart M contains specific rules applicable to the Broadband Radio (BRS) and Educational Broadband (EBS) services that operate in the 2500–2690 MHz band.

Need: The rules specified in 47 CFR 27.1201–27.1221 provide grandfather rights for certain commercial EBS licenses and licensees holding channel E and F licenses, and establish maximum terms for leases of EBS frequencies. The rules in 47 CFR 27.1250–27.1255 establish procedures for relocating Broadband Radio Service licensees from the 2150–2160/62 MHz band to accommodate deployment of Advanced Wireless Service. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, 301, 302, 303, 307, 309, 332, 336, 337, 1403, 1404 and 1451.

Section Number and Titles:

27.1201(d) EBS eligibility.
27.1214(e) EBS spectrum leasing arrangements and grandfathered leases.
27.1216 Grandfathered E and F group EBS licenses.

Technical Standards

27.1221(c), (d) and (e) Interference protection.

Brief Description: Part 27 contains service and licensing rules for Miscellaneous Wireless Communications Services. Subpart M contains specific rules applicable to the Broadband Radio (BRS) and Educational Broadband (EBS) services that operate in the 2500–2690 MHz band.

Need: The rules in 47 CFR 27.1230–27.1239, including the specific provisions below, establish procedures governing the transition of the 2500–2690 MHz band from use by the Multipoint Distribution Service (MDS), the Multichannel Multipoint Distribution Service (MMDS) and the Instructional Television Fixed Service (ITFS) to use by the Broadband Radio Service (BRS) and the Educational Broadband Service (EBS). Since this transition has been completed, these rules are no longer needed.

Legal Basis: 47 U.S.C. 154, 301, 302, 303, 307, 309, 332, 336, 337, 1403, 1404 and 1451.

Section Number and Titles:

Policies Governing the Transition of the 2500–2690 MHz Band BRS and EBS

27.1232(d)(3), (4) Planning the transition.
27.1235(d) Post-transition notification.
27.1236 Self-transitions.
27.1237 Pro rata allocation of transition costs.
27.1238 Eligible costs.
27.1239 Reimbursement obligation.

Relocation Procedures for 2150–2160/62 MHz

27.1250 Transition of the 2150–2160/62 MHz band from the Broadband Radio Service to the Advanced Wireless Service.
27.1251 Mandatory negotiations.
27.1252 Involuntary relocation procedures.
27.1253 Sunset provisions.
27.1254 Eligibility.
27.1255 Relocation criteria for Broadband Radio Service licensees in the 2150–2160/62 MHz band.

PART 43—REPORTS OF COMMUNICATION COMMON CARRIERS AND CERTAIN AFFILIATES

Brief Description: Section 43.51 imposes on U.S. telecommunications carriers identified in section 43.51(b) a general obligation to file with the Commission, within 30 days of execution thereof, a copy of all contracts, agreements, concessions, licenses, authorizations, operating agreements, or other arrangements (including amendments) to which it is a party with respect to exchange of services, the interchange or routing of traffic, and matters concerning rates, accounting rates, divisions of tolls, or the basis of settlement of traffic balances. Section 43.51(b)(1) provides that the general filing rule applies to domestic dominant carriers. Section 43.51(b)(2) provides that the filing rule applies to U.S. international carriers that have been classified as dominant on any route included in the contract (other than those so classified because of a foreign-carrier affiliation under Section 63.10). Section 43.51(c) provides that contracts for domestic-only service do not need to be filed with the Commission but need to be made available upon reasonable request. Section 43.51(d) states that any U.S. carrier, other than a provider of commercial radio services, that is engaged in foreign communications, and enters into an agreement with a foreign carrier, is subject to the Commission's authority to require the U.S. carrier providing service on any U.S.-international routes to file, on an as-needed basis, a copy of each agreement to which it is a party.

Need: The general rule in section 43.51 that carriers must file copies of their contracts and operating agreements is needed to require domestic dominant carriers to file their contracts and to address issues on the U.S.-Cuba route and more generally allow the Commission to obtain contracts for routes on which there is, or has been an

allegation of, anticompetitive conduct. *ISP Reform Order,* 19 FCC Rcd 5709, 5736 (2009).

Legal Basis: 47 U.S.C. 154, 211, 219 and 220.

Section Number and Title:

43.51 Contracts and concessions.

PART 54—UNIVERSAL SERVICE

Subpart A—General Information

Brief Description: Part 54 rules implement section 254 of the Communications Act of 1934, as amended, concerning the Federal universal service program. This rule adopts a new definition of ''rural area'' for the rural health care program.

Need: This rule establishes a definition that accurately defines the rural areas eligible for support under the rural health care program.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 201–205, 214, 254, and 403.

Section Number and Title:

54.5 Terms and definitions (when adopted; now 54.600(b)(1) Terms and conditions).

Subpart C—Carriers Eligible for Universal Service Support

Brief Description: Subpart C sets forth the eligibility requirements to receive universal service support. These rules address the requirements for a telecommunications carrier to be designated as an ''eligible telecommunications carrier,'' and thus eligible to receive federal universal service support. Specifically, these rules comprise additional mandatory requirements for ETC designation proceedings in which the Commission acts pursuant to section 214(e)(6) of the Communications Act of 1934, as amended (the Act).[3]

Need: Application of these requirements allows for a more predictable ETC designation process and improve the long-term sustainability of the universal service fund.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 201–205, 214, 219, 254 303(r) and 403, and 1302.

Section Number and Title:

54.202(a)(2) and (3), (c) and (d) (when adopted; now 54.202(a)(2) and (3), (b) and (c)) Additional requirements for Commission designation of eligible telecommunications carriers.

Brief Description: These rules originally require each ETC over which the Commission has jurisdiction to submit annually certain information regarding its network and its use of universal service funds. In their current form, the rules apply to ETCs that are recipients of high cost support.

Need: These rules ensure that ETCs continue to comply with the conditions of the ETC designation and that universal service funds are used for their intended purposes.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 201–205, 214, 254, and 403.

Section Number and Title:

54.209 (a)(1)–(6) Annual reporting requirements for designated eligible telecommunications carriers (when adopted; now 54.313(a)(1)–(6); Annual reporting requirements for high cost recipients).

Subpart D—Universal Support for High Cost Areas

Brief Description: Subpart D sets forth the regulations to provide universal service in high cost areas. These rules provide that section 54.305—concerning sales or transfers of exchanges—does not apply to transfers of exchanges between non-rural carriers after the phase down of interim hold harmless support, and that rural carriers may receive safety-valve support for investment made in the first year of operating acquired exchanges.

Need: Section 54.305(a) establishes a rule provision to reflect the fact that, after the complete phasedown of interim hold-harmless support, there is no need for section 54.305 with regard to transfers between non-rural carriers. Sections 54.305(d)(1) and (2) provide incentives for carriers not to delay first year investment in order to provide more safety valve support in later years.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 214, 218–220, 254 and 405.

Section Number and Title:

54.305(a), (d)(1) and (2) Sale or transfer of exchanges.

Brief Description: These rules condition newly designated ETCs' eligibility for support upon the filing by the ETC of line-count data within 60 days of the carrier's ETC designation. Thereafter, the rules require the filing of data on a quarterly basis.

Need: These requirements enable customers of newly designated ETCs to begin to receive the benefits of universal service support as of the ETC's designation date and ensure that ETCs continue to comply with the conditions of the ETC designation and that universal service funds are used for their intended purposes. This rule is needed on an ongoing basis to provide a deadline for a newly designated competitive eligible telecommunications carrier to submit data required to receive universal service support. Other subsections of Section 54.307 require such a carrier to file the necessary data on a quarterly basis thereafter.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 201–205, 214, 219, 220, 254, 303(r), 403, and 1302.

Section Number and Title:

54.307(d) Support to a competitive eligible telecommunications carrier.

Subpart F—Universal Support for Schools and Libraries

Brief Description: These rules establish the matters to which applicants to the Universal Service E-rate program must certify in FCC Form 471 in order to have their applications considered and the certifications that service providers must make in FCC form 473 as a condition of support.

Need: These rules create certainty as to the criteria to which applicants must certify when completing Form 471 and serve to emphasize to potential service providers that practices that thwart the competitive bidding process will not be tolerated.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 201–205, 214, 254, and 403.

Section Number and Title:

54.504(c)(1)(i)–(iii), (vi)–(xi) (now 54.504(a)(1)(i)–(ix); 54.504(h) (when adopted; now 54.504(f)) Requests for services.

Subpart G—Universal Support for Health Care Providers

Brief Description: Subpart G sets forth the regulations for eligible health care providers to receive universal service support. This rule allows mobile rural health care providers to receive discounts for satellite services calculated by comparing the rate for the satellite service to the rate for an urban wireline serviced with a similar bandwidth.

Need: This rule provides the support necessary to make mobile telemedicine economical for rural health care providers to provide high-quality health care to rural and remote areas. This rule is needed on an ongoing basis to calculate the support amount for mobile rural health care providers under the universal service support rules.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 201–205, 214, 219, 220, 254, 303(r), 403, and 1302.

Section Number and Title:

54.609(e) Calculating support.

Brief Description: This rule requires providers of mobile health services to

[3] 47 U.S.C. 214(e)(6). Section 214(e)(6) of the Act directs the Commission to designate carriers when those carriers are not subject to the jurisdiction of a state commission.

maintain records for their purchases of supported services for at least five years sufficient to document their compliance with all Commission requirements.

Need: These rules further the Commission's efforts to improve its oversight of the operation of the rural health care program to ensure that the statutory goals of section 254 of the Telecommunications Act of 1996 are met.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 201–205, 214, 254, and 403.

Section Number and Title:

54.619(a)(1) and (2) Audits and recordkeeping.

Subpart H—Administration

Brief Description: Subpart H sets forth the regulations, functions, and responsibilities for the Administrator of the universal support mechanisms. These rules require interconnected voice over internet Protocol (VoIP) providers to contribute to the universal service fund.

Need: These rules help ensure the stability and sustainability of the Universal Service Fund. This rule is needed on an ongoing basis to determine which entities are considered telecommunications carriers providing interstate telecommunications service and therefore are required to contribute to the universal service support mechanisms.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 155, 201–205, 214, 219, 220, 254, 303(r), 403, and 1302.

Section Number and Title:

54.706(a)(18), (19) Contributions.

PART 63—EXTENSION OF LINES, NEW LINES, AND DISCONTINUANCE, REDUCTION, OUTAGE AND IMPAIRMENT OF SERVICE BY COMMON CARRIERS; AND GRANTS OF RECOGNIZED PRIVATE OPERATING AGENCY STATUS

Brief Description: The Part 63 rules set forth definitions, requirements, and conditions applicable to international Section 214 applications and authorizations to provide global facilities-based and global resale services, as well as provisions regarding requests for designation as a recognized private operating agency. The rules pertain to the regulatory classification of U.S. international carriers; notification and prior approval requirements for U.S. international carriers that are or propose to become affiliated with a foreign carrier; procedures for processing international Section 214 applications; special provisions for U.S. international common carriers; contents of applications for international common carriers; special procedures for discontinuances of international services; special provisions relating to temporary or emergency service by international carriers; and related issues. The rules also require carriers to file all notifications and other filings electronically through the International Bureau Filing System (IBFS).

Need: These rules are needed to provide the framework applicable to international Section 214 authorizations and establish the general applications, procedures, conditions and restrictions to ensure that carriers and affiliates providing services on international routes meet statutory requirements for designated global facilities-based and resale telecommunications services.

Legal Basis: 47 U.S.C. 151, 154(i), 154(j), 160, 201–205, 214, 218, 403, and 571, unless otherwise noted.

Section Number and Title:

63.09, Note 2 Definitions applicable to international Section 214 authorizations.

63.10(d), (e) Regulatory classification of U.S. international carriers.

63.11(d), (g)–(j) Notification by and prior approval for U.S. international carriers that are or propose to become affiliated with a foreign carrier.

63.12(c)(3) Processing of international Section 214 applications.

63.14(c) Prohibition on agreeing to accept special concessions.

63.17(b) introductory text, (b)(1)–(2), (b)(4) Special provisions for U.S. international common carriers.

63.18 introductory text, (e)(3), (g), Note to paragraph (h), (q) Contents of applications for international common carriers.

63.19, (d) Special procedures for discontinuances of international services.

63.20(a) Electronic filing, copies required; fees; and filing periods for international service providers.

63.21(a), (h)–(j) Conditions applicable to all international Section 214 authorizations.

63.22(a)–(c), (e)–(f) Facilities-based international common carriers.

63.23(a)–(b), (d) Resale-based international common carriers.

63.24, (e)(4), (f)(2)–(3), (h) Assignments and transfers of control.

63.25(b), (c) introductory text, (d)(2), (e) Special provisions relating to temporary or emergency service by international carriers.

63.51, (c) Additional information.

63.53(a)(1)–(2), (b)–(c) Form.

63.60(d) (currently (g)) Definitions.

63.701 introductory text, (j) Contents of application.

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

Subpart F—Telecommunications Relay Services and Related Customer Premises Equipment for Persons with Disabilities

Brief Description: Part 64, Subpart F implements section 225 of the Communications Act of 1934, as amended. Section 225 codifies Title IV of the Americans with Disabilities Act of 1990 (ADA) which requires that the Commission ensure that telecommunications relay services (TRS) are available, ''to the extent possible and in the most efficient manner,'' to individuals with hearing or speech disabilities in the United States. Section 225 defines TRS as telephone transmission services that provide the ability for an individual who is deaf, hard of hearing, deaf-blind, or who has a speech disability to engage in communication by wire or radio with one or more individuals, in a manner functionally equivalent to the ability of a hearing individual who does not have a speech disability to communicate using voice communication services by wire or radio. The rules provide minimum functional, operational, and technical standards for TRS programs. The rules give states a significant role in ensuring the availability of TRS by treating carriers as compliant with their statutory obligations if they operate in a state that has a relay program certified as compliant by the Commission. The rules also establish a cost recovery and a carrier contribution mechanism (TRS Fund) for the provision of interstate TRS and require states to establish cost recovery mechanisms for the provision of intrastate TRS. In 2005, the rules were amended by adding subsection (b)(2)(iii) to section 64.604, requiring Video Relay Service (VRS) providers to comply with speed of answer requirements to be eligible for compensation from the TRS Fund. Section 64.604 also was amended by adding subsection (c)(5)(iii)(F)(4) (which has been redesignated as 64.604(c)(5)(iii)(F)(2)), requiring internet-based TRS providers (*e.g.,* VRS and internet Protocol (IP) Relay providers) to be certified by the Commission pursuant to section 64.605 (which has been redesignated as 64.606) to be eligible for compensation from the TRS Fund.

Need: The rules are intended to facilitate communication by persons with hearing or speech disabilities by

ensuring that interstate and intrastate TRS are available throughout the country, and by ensuring uniform minimum functional, operational, and technical standards for TRS programs. The rules ensure that individuals with hearing or speech disabilities receive the same quality of service as hearing individuals when they make TRS calls, regardless of where their calls originate or terminate.

Legal Basis: 47 U.S.C. 151, 152, and 225.

Section Number and Titles:

64.604(b)(2)(iii) Technical standards, Speed of answer, Speed of answer requirements for VRS providers.

64.604(c)(5)(iii)(F)(2) Functional standards, Jurisdictional separation of costs, Telecommunications Relay Services Fund, Eligibility for payment from the TRS Fund.

Subpart L—Restrictions on Telemarketing, Telephone Solicitation, and Facsimile Advertising

Brief Description: The Telephone Consumer Protection Act (TCPA) was enacted to address certain telemarketing practices, including calls to wireless telephone numbers, which Congress found to be an invasion of consumer privacy and even a risk to public safety. In the TCPA, Congress created a balance between individual privacy rights and legitimate telemarketing practices. The Commission crafted rules in 1992 to achieve this balance. Subsequently, the Commission has revised and amended the rules that it adopted in 1992 pursuant to the TCPA, including the establishment of a national do-not-call list to carry out Congress' TCPA directives. In 2004, section 64.1200(a)(1) was amended to add subsection (iv), establishing a limited safe harbor period from the prohibition on autodialed or prerecorded or artificial voice calls to wireless numbers when such calls are made to numbers that have been ported from wireline service to wireless service within the previous 15 days and are voice calls, provided the numbers are not already on the national do-not-call registry or the caller's company-specific do-not-call list.

Need: Section 64.1200(a)(1)(iv) strikes an appropriate balance between maximizing consumer privacy protections and avoiding the imposition of undue burdens on telemarketers and other callers by providing a limited time period necessary for persons, including small businesses, to identify numbers that have been ported from wireline to wireless service and, therefore, allow callers to comply with the TCPA.

Legal Basis: 47 U.S.C. 151–154, 227, and 303(r).

Section Number and Title:

64.1200(a)(1)(iv) Delivery restrictions.

Subpart X—Subscriber List Information

Brief Description: These rules allow carriers to redact portions of requested contracts that are wholly unrelated to the carrier's provision of subscriber list information and allow carriers to subject their disclosure of subscriber list information contracts to confidentiality agreements that limit access to and use of the information to the purpose of determining the rates, terms and conditions under which a carrier provides subscriber list information to its own directory publishing operations.

Need: These rules ensure that any disclosure of subscriber list information contracts will not unfairly disadvantage carriers or their directory publishing operations.

Legal Basis: 47 U.S.C. 154, 254(k); secs. 403(b)(2)(B), (c), Public Law 104–104, 110 Stat. 56. Interpret or apply 47 U.S.C. 201, 218, 222, 225, 226, 228, and 254(k).

Section Number and Title:

64.2341(d) and (e) Recordkeeping.

Subpart CC—Customer Account Record Exchange Requirements

Brief Description: The rules in Part 64, Subpart CC were issued pursuant to the Communications Act of 1934, as amended, to facilitate the exchange of customer account information between local exchange carriers (LECs) and interexchange carriers (IXCs) and to establish carriers' responsibilities with respect to such exchanges.

Need: The rules help to ensure that consumers' phone service bills are accurate and that their carrier selection requests are honored and executed without undue delay. These requirements also recognize a carrier's right to be compensated for the services it provides by ensuring that providers of long distance phone services receive proper notification when customers are placed on their networks.

Legal Basis: 47 U.S.C. 154, 201, 202, 222, and 258.

Section Number and Titles:

64.4000 Basis and purpose.

64.4001 Definitions.

64.4002 Notification obligations of LECs.

64.4003 Notification obligations of IXCs.

64.4004 Timeliness of required notifications.

64.4005 Unreasonable terms or conditions on the provision of customer account information.

64.4006 Limitations on use of customer account information.

Subpart DD—Prepaid Calling Card Providers

Brief Description: These rules establish definitions for ''prepaid calling card'' and ''prepaid card providers'' and reporting and certification requirements for prepaid calling card providers. The rules include prepaid calling card providers among the entities required to contribute to the universal service fund, and create an exemption for revenues derived from prepaid calling cards sold by, to, or pursuant to contract with the Department of Defense or a DoD entity.

Need: These rules provide regulatory certainty and ensure compliance with the Commission's access charge and USF contribution requirements.

Legal Basis: 47 U.S.C. 154, 254(k); secs. 403(b)(2)(B), (c), Public Law 104–104, 110 Stat. 56. Interpret or apply 47 U.S.C. 201, 218, 222, 225, 226, 228, and 254(k).

Section Number and Titles:

64.5000 Definitions.

64.5001 Reporting and certification requirements.

PART 73—RADIO BROADCAST SERVICES

Subpart E—Television Broadcast Stations

Brief Description: This rule provides guidance on how the Commission will determine whether TV broadcast stations are in compliance with the Children's Television Act. They were adopted collectively by the Commission to modernize its rules implementing the Act in light of the Digital TV Transition (*Children's Television Obligations of Digital Television Broadcasters,* Report and Order and Further Notice of Proposed Rulemaking, FCC 04–221).

Need: These rules are necessary because they provide licensees of analog and digital stations with explicit guidance on meeting their obligations under the Children's Television Act.

Legal Basis: 47 U.S.C. 154, 303, 309, 310, 334, 336, and 339.

Section Number and Titles:

73.671(c)(7), (d), (e) (73.671(f)—removed) Educational and informational programming for children.

Brief Description: This rule provides an exception for satellite carriers from certain verification requirements. It was adopted by the Commission as part of

implementing the Satellite Home Viewer Extension and Reauthorization Act of 2004 (*Implementation of the Satellite Home Viewer Extension and Reauthorization Act of 2004, Implementation of Section 340 of the Communications Act,* Order, FCC 05–81).

Need: This rule is necessary because it provides regulatory relief for certain satellite carriers.

Legal Basis: 47 U.S.C. 154, 303, 309, 310, 334, 336, and 339.

Section Number and Title:

73.683(f) Field strength contours and presumptive determination of field strength at individual locations.

Subpart F—International Broadcast Stations

Brief Description: These rules provide frequency assignments and technical standards for certain international broadcasting stations. They were collectively adopted by the Commission to implement decisions from the World Radiocommunication Conference held in 2003 (*Amendment of Parts 2, 25, and 73 of the Commission's Rules to Implement Decisions from the World Radiocommunication Conference (Geneva, 2003) (WRC–03) Concerning Frequency Bands Between 5900 khz and 27.5 ghz and to Otherwise Update The Rules in this Frequency Range,* Report and Order, FCC 05–70).

Need: These rules are necessary for the operation of international broadcast stations and compliance with international agreements.

Legal Basis: 47 U.S.C. 154, 303, 309, 310, 334, 336, and 339.

Section Number and Titles:

73.702(g), (h) Assignment and use of frequencies. (73.702(g)—reserved, not in use)

73.702(f), (g)–(k) redesignated as (i)–(m); new (h) Assignment and use of frequencies.

73.757 System specifications for single-sideband (SSB) modulated emissions in the HF broadcasting service.

73.758 System specifications for digitally modulated emissions in the HF broadcasting service.

Subpart J—Class A Television Broadcast Stations

Brief Description: These rules provide technical standards and interference protection requirements for Class A TV stations. They were collectively adopted when the Commission established digital LPTV and digital translator stations as part of the Digital TV Transition (*Amendment of Part 73 and Part 74 of the Commission's Rules to Establish Rules for Digital Low Power Television, Television Translator, and Television Booster Stations to Amend Rules for Digital Class A Television Stations,* Report and Order, FCC 04–220).

Need: These rules are necessary to maintain localism and implement other Class A TV station rules.

Legal Basis: 47 U.S.C. 154, 303, 309, 310, 334, 336, and 339.

Section Number and Titles:

73.6000(2) Definitions.

73.6024(d) Transmission standards and system requirements.

73.6027 Class A TV notifications concerning interference to radio astronomy, research and receiving installations.

PART 74—EXPERIMENTAL RADIO, AUXILIARY, SPECIAL BROADCAST AND OTHER PROGRAM DISTRIBUTIONAL SERVICES

Subpart G—Low Power TV, TV Translator, and TV Booster Stations

Brief Description: These rules provide legal requirements and technical standards for digital low power TV (LPTV) stations, digital translator TV stations, and digital Class A TV stations. They were collectively adopted when the Commission established digital LPTV and digital translator stations as part of the Digital TV Transition (*Amendment of Part 73 and Part 74 of the Commission's Rules to Establish Rules for Digital Low Power Television, Television Translator, and Television Booster Stations to Amend Rules for Digital Class A Television Stations,* Report and Order, FCC 04–220).

Need: These rules are necessary for the licensing and operation of digital LPTV and digital translator stations, to protect the integrity of these stations, and to ensure that these stations do not cause harmful interference to other authorized services.

Legal Basis: 47 U.S.C. 154, 302a, 303, 307, 336 and 554.

Section Number and Titles:

74.701(j)–(p) Definitions.

74.703(f), (g) Interference.

74.710 Digital low power TV and TV translator station protection.

74.786 Digital channel assignments.

74.787 Digital licensing.

74.788 Digital construction period.

74.789 Broadcast regulations applicable to digital low power television and television translator stations.

74.790 Permissible service of digital TV translator and LPTV stations.

74.791 Digital call signs.

74.792 Digital low power TV and TV translator station protected contour.

74.793 Digital low power TV and TV translator station protection of broadcast stations.

74.794 Digital emissions.

74.795 Digital low power TV and TV translator transmission system facilities.

74.796 Modification of digital transmission systems and analog transmission systems for digital operation.

PART 76—MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE

Subpart D—Carriage of Television Broadcast Signals

Brief Description: These rules address obligations of and restrictions on satellite carriers retransmitting certain television broadcast signals, and provide guidance for television broadcast stations choosing between retransmission consent and mandatory carriage of significantly viewed signals. They were collectively adopted by the Commission as part of implementing the Satellite Home Viewer Extension and Reauthorization Act of 2004 (*Implementation of the Satellite Home Viewer Extension and Reauthorization Act of 2004, Implementation of Section 340 of the Communications Act,* Order, FCC 05–81; Report and Order, FCC 05–187).

Need: These rules are necessary for carrying out the Congressional mandate of the Satellite Home Viewer Extension and Reauthorization Act of 2004.

Legal Basis: 47 U.S.C. 151, 152, 153, 154, 301, 302, 302a, 303, 303a, 307, 308, 309, 312, 315, 317, 325, 338, 339, 340, 341, 503, 521, 522, 531, 532, 534, 535, 536, 537, 543, 544, 544a, 545, 548, 549, 552, 554, 556, 558, 560, 561, 571, 572, 573.

Section Number and Titles:

76.5(gg) Definitions.

76.54(e)–(k) Significantly viewed signals; method to be followed for special showings.

76.66(d)(5) Satellite broadcast signal carriage.

76.66(d)(2)(iii) Satellite broadcast signal carriage.

Subpart G—Cablecasting

Brief Description: These rules modernize rules concerning children's programming to include restrictions on displaying internet website addresses. They were adopted collectively by the Commission to modernize its rules implementing the Act in light of the Digital TV Transition (*Children's Television Obligations of Digital*

Television Broadcasters, Report and Order and Further Notice of Proposed Rulemaking, FCC 04–221).

Need: These rules are necessary to ensure that the Commission's rules continue to respond the Congressional mandate in the Children's Television Act by protecting children from advertising directing them to internet sites.

Legal Basis: 47 U.S.C. 151, 152, 153, 154, 301, 302, 302a, 303, 303a, 307, 308, 309, 312, 315, 317, 325, 338, 339, 340, 341, 503, 521, 522, 531, 532, 534, 535, 536, 537, 543, 544, 544a, 545, 548, 549, 552, 554, 556, 558, 560, 561, 571, 572, 573.

Section Number and Title:

76.225(c)–(d) Commercial limits in children's programs.

PART 80—STATIONS IN THE MARITIME SERVICES

Subpart H—Frequencies

Brief Description: The Part 80 rules set forth the conditions under which portions of the radio spectrum are made available and licensed for stations in the maritime services. Subpart H describes the carrier frequencies and general uses of radiotelegraphy for distress, urgency, safety, call and reply, digital selective calling, narrow-band direct printing, and facsimile for stations within the maritime services.

Need: This rule designates VHF maritime Channels 87B (161.975 MHz) and 88B (162.025 MHz) for Automatic Identification Systems (AIS). The designation of Channels 87B and 88B for AIS in the United States is consistent with the establishment of a seamless global AIS framework, and facilitates the broad, efficient and effective implementation of AIS in U.S. territorial waters. The intended effect is to maximize the benefits of AIS for United States homeland security and maritime safety. The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154, 303, 307, 309 and 332.

Section Number and Title:

80.393 Frequencies for AIS stations. (Revised 2009)

PART 87—AVIATION SERVICES

Subpart D—Technical Requirements

Brief Description: The Part 87 rules set forth the conditions under which radio stations may be licensed and used in the aviation services. Subpart D rules provide the technical requirements for such radio stations.

Need: The technical requirements are needed on an ongoing basis to protect the safety of life and property in air navigation and must be periodically updated to reflect technological advancements in the aviation industry and maximize spectral efficiency while important safeguards against interference.

Legal Basis: 7 U.S.C. 154, 303 and 307(e), unless otherwise noted.

Section Number and Titles:

87.139(l) Emission limitations.

87.141(k) Modulation requirements.

Subpart F—Aircraft Stations

Brief Description: Part 87 contains the Commission rules governing aviation services. Subpart F sets forth the rules governing assignment of frequencies in those services.

Need: This rule authorizes Universal Access Transceiver data transmission on 978 MHz. The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154, 303 and 307(e).

Section Number and Title:

87.187(ff) Frequencies.

Subpart L—Aeronautical Utility Mobile Stations

Brief Description: Part 87 contains the Commission rules governing aviation services. Subpart L sets forth the rules governing aeronautical utility mobile stations.

Need: Rules 87.345(f) and 87.349(e) authorize transmissions for Universal Access Transceiver service. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, 303 and 307(e), unless otherwise noted.

Section Number and Titles:

87.345(f) Scope of service.

87.349(e) Frequencies.

Subpart Q—Stations in the Radiodetermination Service

Brief Description: Part 87 contains the Commission rules governing aviation services. Subpart Q sets forth the rules governing station in the Radiodetermination Service.

Need: This rule assigns the frequencies for airborne electronic aids to air navigations and associated land stations. The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154, 303 and 307(e).

Section Number and Title:

87.475(b)(9) Frequencies.

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

Subpart C—Industrial/Business Radio Pool

Brief Description: Section 90.35(c)(90) set dates for FCC cessation of certain licenses in specific bands.

Need: This rule provision was enacted to transition Private Land Mobile Radio Services below 800 MHz to reflect changes in the international allocations, including consolidation of the services that distribute assignments between low-use and high-use groups more evenly, facilitates advanced technologies, and provides more efficiency and flexibility in spectrum use. The need for this rule is ongoing, insofar as it is a limitation on the 2000–25,000 kHz band in the I/B Frequency Pool in 90.35(b)(3).

Legal Basis: 47 U.S.C. 154, 302, 303 and 332.

Section Number and Title:

90.35 Industrial/Business Pool.

Subpart H—Policies Governing the Assignment of Frequencies

Brief Description: The addition of Section 90.175 clarified frequency coordinator requirements for applications for a new frequency assignment, a change in existing facilities, or operation at temporary locations, while excluding a certain number of categories from the requirements. In general, the rule requires applicants to provide all appropriate technical information, system requirements, and justification for requested station parameters, and clarifies that applicants bear the burden of proceeding and the burden of proof when requesting that the Commission overturn a coordinator's recommendation.

Need: This rule provision retained the frequency coordination requirement for incumbent licensees operating on 800 MHz General Category frequencies, and for site-based 800 MHz General Category applications filed after 800 MHz rebanding. The rule is part of a streamlining and harmonization of licensing provisions in the wireless radio services (WRS). The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154(i), 161, 303(g), 303(r) and 332(c)(7).

Section Number and Title:

90.175 Frequency coordinator requirements.

Subpart I—General Technical Standards

Brief Description: Part 90 contains service and licensing rules used in the Private Land Mobile Radio Services. Subpart I sets forth the general technical requirements for use of frequencies and equipment in the radio services governed by Part 90.

Need: The revised rules establish the general technical rules for Part 90 licensees. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154(i), 161, 303(g), 303(r), and 332(c)(7).

Section Number and Titles:

90.203(o) Certification required.
90.210(m) Emission masks.
90.217(e) Exemption from technical standards.

Subpart K—Standards for Special Frequencies or Frequency Bands

Brief Description: Section 90.265 made additional frequencies available to a combination of Public Safety Pool and Industrial/Business Pool licenses in the bands allocated for Federal use, including forest firefighting and conservation activities, Medical Radiocommunication Systems, and other public safety activities. It also added interference complaint procedures involving the Hydro Committee referenced in the rule part concerning hydrological or meteorological data.

Need: The rule additions generally expanded the availability of frequencies while clarifying the interference complaint procedures to protect them. The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154(i), 161, 303(g), 303(r), 332(c)(7).

Section Number and Title:

90.265(a)(5–9), (c), (d), (e) Assignment and use of frequencies in the bands allocated for Federal use.

Subpart S—Regulations Governing Licensing and Use of Frequencies in the 806–824, 851–869, 896–901, and 935–940 MHz Bands

Brief Description: Part 90 states the conditions under which radiocommunications systems may be licensed and used in the Public Safety, Industrial/Business Radio Pool, Radiolocations Radio Services, and Commercial Mobile Radio Services. Subpart S sets forth the rules governing the licensing and use of frequencies in the 806–824 MHz, 851–869 MHz, 896–901 MHz, and 935–940 MHz Bands.

Need: This rule requires Economic Areas (EA) licensees operating on certain channels to construct an Enhanced Specialized Mobile Radio (ESMR) system by the license expiration date to promote efficient use of spectrum. This is an ongoing need.

Legal Basis: 47 U.S.C. 154(i), 161, 303(g), 303(r) and 332(c)(7).

Section Number and Title:

90.685(e) Authorization, construction and implementation of EA licenses.

Subpart Z—Wireless Broadband Services in the 3650–3700 MHz Band

Brief Description: Part 90 contains service and licensing rules used in the Public Safety, Industrial/Business Radio Pool, and Radiolocation Radio Services. Subpart Z contains rules that govern broadband operations in the 3650–3700 MHz.

Need: The revised rules establish the service and licensing rules for broadband operations in the 3650–3700 MHz band. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 310.

Section Number and Titles:

90.1301 Scope.
90.1303 Eligibility.
90.1305 Permissible operations.
90.1307 Licensing.
90.1309 Regulatory status.
90.1311 License term.
90.1312 Assignment and transfer.
90.1319 Policies governing the use of the 3650–3700 MHz band.
90.1321 Power and antenna limits.
90.1323 Emission limits.
90.1331 Restrictions on the operation of base and fixed stations.
90.1333 Restrictions on the operation of mobile and portable stations.
90.1335 RF safety.
90.1337 Operation near Canadian and Mexican borders.

PART 97—AMATEUR RADIO SERVICE

Subpart B—Station Operations Standards

Brief Description: Part 97 contains the Commission rules relating to amateur radio services. Subpart B sets forth station operation standards for amateur radio services.

Need: 97.111(a)(2) is needed on an ongoing basis to ensure that reliable communications are available during emergencies. 97.115(c) is needed to permit transmission of data on behalf of a third party.

Legal Basis: 47 U.S.C. 154, 303. 47 U.S.C. 151–155 and 301–609.

Section Number and Titles:

97.111(a)(2) Authorized transmissions.
97.115(c) Third party communications.

Subpart D—Technical Standards

Brief Description: The Part 97 rules set forth the conditions under which portions of the radio spectrum are made available and licensed for amateur radio service. Subpart D outlines technical standards for the frequency bands available to amateur stations.

Need: 97.303(t) is a restatement of old 97.303(p) to clarify that amateur operations must protect Federal and foreign operations in the 23 mm band. The need for this rule is ongoing.

Legal Basis: 47 U.S.C. 154 and 303.

Section Number and Title:

97.303(t) Frequency sharing requirements. (Revised 2010)

PART 101—FIXED MICROWAVE SERVICES

Subpart B—Applications and Licenses

Brief Description: Part 101 prescribes the manner in which portions of the radio spectrum may be made available for private operational, common carrier, 24 GHz Service, Local Multipoint Distribution Service, and fixed, microwave operations that require transmitting facilities on land or in specified offshore coastal areas within the continental shelf. Subpart B governs application, licensing and transition of microwave licenses under Part 101.

Need: The revised rules are related to requirements for constructing or relocating certain microwave stations (except Multichannel Video Distribution and Data Service, Local Multipoint Distribution Service, and the 24 GHz Service) under Part 101. Section 101.63(g) provides a streamlined process for MVPDs converting from analog to digital modulation to minimize duplicative costs associated with the coordination and licensing process, which is an ongoing requirement. Though section 101.69(g) is no longer needed for relocating the 1850–1990 and 2110–2150 bands, it governs the relocation of fixed microwave services in the 2160–2200 MHz band, which is an ongoing requirement for AWS–3 and AWS–4 licensees. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154 and 303.

Section Number and Titles:

101.63(g) Period of construction; certification of completion of construction.
101.69(g) Transition of the 1850–1990 MHz, 2110–2150 MHz and 2160–2200 MHz band from the fixed microwave services to personal communications services and emerging technologies.

Subpart C—Technical Standards

Brief Description: Part 101 prescribes the manner in which portions of the radio spectrum may be made available for private operational, common carrier, 24 GHz Service, Local Multipoint Distribution Service, and fixed, microwave operations that require transmitting facilities on land or in specified offshore coastal areas within the continental shelf. Subpart C sets forth technical standards for applications and licenses in the Fixed Microwave Services.

Need: The revised rules provide the interference protection criteria for fixed stations subject to part 101 and requires that transmitters used in the private operational fixed and common carrier fixed point-to-point microwave and point-to-multipoint services under this part must be a type that has been verified for compliance. The need for these rules is ongoing.

Legal Basis: 47 U.S.C. 154, and 303.

Section Number and Titles:

101.105(a)(5) and (6) Interference protection criteria.

101.139(h) and (i) Authorization of transmitters.

Pipeline and Hazardous Materials Safety Administration

49 CFR Part 192

[Docket ID: PHMSA–2017–0151]

RIN 2137–AF29

Pipeline Safety: Class Location Change Requirements

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: PHMSA is seeking public comment on its existing class location requirements for natural gas transmission pipelines as they pertain to actions operators are required to take following class location changes due to population growth near the pipeline. Operators have suggested that performing integrity management measures on pipelines where class locations have changed due to population increases would be an equally safe but less costly alternative to the current requirements of either reducing pressure, pressure testing, or replacing pipe. This request for public comment continues a line of discussion from a Notice of Inquiry published in 2013 and a report to Congress in 2016 regarding whether expanding integrity management requirements would mitigate the need for class location requirements.

DATES: Persons interested in submitting written comments on this ANPRM must do so by October 1, 2018.

ADDRESSES: You may submit comments identified by the Docket: PHMSA–2017–0151 by any of the following methods:

E-Gov website: https://www.regulations.gov. This site allows the public to enter comments on any **Federal Register** notice issued by any agency. Follow the online instructions for submitting comments.

Fax: 1–202–493–2251.

Mail: Hand Delivery: U.S. DOT Docket Management System, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590–0001 between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays.

Instructions: Identify the Docket ID at the beginning of your comments. If you submit your comments by mail, submit two copies. If you wish to receive confirmation that PHMSA has received your comments, include a self-addressed stamped postcard. Internet users may submit comments at *https://www.regulations.gov/.*

Note: Comments are posted without changes or edits to *https://www.regulations.gov,* including any personal information provided. There is a privacy statement published on *https://www.regulations.gov.*

SUPPLEMENTARY INFORMATION:

Outline of This Document

Background

I. Class Location History and Purpose

The class location concept pre-dates Federal regulation of gas transmission pipelines [1] and was an early method of differentiating areas and risks along natural gas pipelines based on the potential consequences of a hypothetical pipeline failure. Class location designations were previously included in the American Standards Association B31.8–1968 version of the ''Gas Transmission and Distribution Pipeline Systems'' standard, which eventually became the American Society of Mechanical Engineers (ASME) International Standard, ASME B31.8 ''Gas Transmission and Distribution Pipeline Systems.'' The class location definitions incorporated into title 49, Code of Federal Regulations (CFR) § 192.5 were initially derived from the designations in this standard and were first codified on April 19, 1970.[2] These definitions were like the original ASME B31.8 definitions for Class 1 through 3 locations but added an additional Class 4 definition and, with some modifications, still apply today.

Gas transmission pipelines are divided into classes from 1 (rural areas) to 4 (densely populated, high-rise areas) that are based on the number of buildings or dwellings for human occupancy in the area. This concept is to provide safety to people from the effects of a high-pressure natural gas pipeline leak or rupture that could explode or catch on fire. PHMSA uses class locations in 49 CFR part 192 to implement a graded approach in many areas that provides more conservative safety margins and more stringent safety standards commensurate with the potential consequences based on population density near the pipeline. When crafting the natural gas

[1] The Department of Transportation first proposed class location regulations on March 24, 1970 (35 FR 5012). The proposal was part of a series of NPRMs published in response to the Natural Gas Pipeline Safety Act of 1968 (Pub. L. 90–481). The NPRMs were directed at developing a comprehensive system of Federal safety standards for gas pipeline facilities and for the transportation of gas through such pipelines. The class location rulemaking was finalized on August 19, 1970, as part of a consolidated rulemaking establishing the first minimum Federal safety standards for the transportation of natural gas by pipelines (35 FR 13248).

[2] 35 FR 13248.

regulations, DOT's Office of Pipeline Safety (OPS) determined that these more stringent standards were necessary because a greater number of people in proximity to the pipeline substantially increases the probabilities of personal injury and property damage in the event of an accident. At the same time, the external stresses, the potential for damage from third-parties, and other factors that contribute to accidents increase along with the population; consequently, additional protective measures are often needed in areas with greater concentrations of population.

The most basic and earliest use of the class location concept focused on the design (safety) margin for the pipeline. As pipelines are designed based, in part, on the population along their pipeline route and therefore the class location of the area, it is important to decrease pipe stresses in areas where there is the potential for higher consequences or where higher pipe stresses could affect the safe operation of a pipeline in larger-populated areas. Pipeline design factors are derating factors that ensure pipelines are operated below 100 percent of the maximum pipe yield strength. From an engineering standpoint, they were developed based on risk to the public [3] and for piping that may face additional operational stresses.[4] Pipeline design factors vary, ranging from 0.72 in a Class 1 location to 0.40 in a Class 4 location. They are used in the pipeline design formula (§ 192.105) to determine the design pressure for steel pipe, and are generally reflected in the maximum allowable operating pressure (MAOP) based upon a percentage of the specified minimum yield strength (SMYS) at which the pipeline can be operated.[5] [6] Design factors are used along with pipe characteristics in engineering calculations (Barlow's Formula) to calculate the design pressure and MAOP of a steel pipeline. More specifically, the formula at § 192.105 is $P = (2St/D) \times F \times E \times T$, where P is the design pressure, S is the pipe's yield strength, t is the wall thickness of the pipe, D is the diameter of the pipe, F is the design factor per the class location, E is the longitudinal joint factor,[7] and T is the temperature derating factor.[8] The formula in § 192.105 can be used to calculate the MAOP of a 1000 psig pipeline with the same operating parameters (diameter, wall thickness, yield strength, seam type, and temperature) but in different class locations (and therefore different design factors), and the MAOP of that pipeline in the different class locations would be as follows:

- No class location—design factor = 1.0 (none); MAOP = 1000 psig
- Class 1—design factor = 0.72; MAOP = 720 psig
- Class 2—design factor = 0.60; MAOP = 600 psig
- Class 3—design factor = 0.50; MAOP = 500 psig
- Class 4—design factor = 0.40; MAOP = 400 psig

As therefore evidenced, pipelines at higher class locations will have lower operating pressures and maximum allowable operating pressures due to more stringent design factors to protect people near the pipeline.

As natural gas pipeline standards and regulations evolved, the class location concept was incorporated into many other regulatory requirements, including test pressures, mainline block valve spacing, pipeline design and construction, and operations and maintenance (O&M) requirements, to provide additional safety to populated areas. In total, class location concepts affect 12 of 16 subparts of part 192 and a total of 28 individual sections.[9]

A. Class Location Determinations

Pipeline class locations for onshore gas pipelines are determined as specified in § 192.5(a) by using a ''sliding mile.'' The ''sliding mile'' is a unit that is 1 mile in length, extends 220 yards on either side of the centerline of a pipeline, and moves along the pipeline. The number of buildings [10] within this sliding mile at any point during the mile's movement determines the class location for the entire mile of pipeline contained within the sliding mile. Class locations are not determined at any given point of a pipeline by counting the number of dwellings in static mile-long pipeline segments stacked end-to-end.

When higher dwelling concentrations are encountered during the continuous sliding of this mile-long unit, the class location of the pipeline rises commensurately. As it pertains to structure counts, a Class 1 location is a class location unit along a continuous mile containing 10 or fewer buildings intended for human occupancy, a Class 2 location is a class location unit along a continuous mile containing 11 to 45 buildings intended for human occupancy, and a Class 3 location is a class location unit along a continuous mile containing 46 or more buildings intended for human occupancy.[11] Class 4 locations exist where buildings with four or more stories above ground are prevalent. Whenever there is a change in class location that will cause an apparent overlapping of class locations, the higher-numbered class location applies.

B. Class Location—''Cluster Rule'' Adjustments

After proposing the initial natural gas safety regulations in 1970, OPS received several comments stating that the proposed class location definitions could create 2-mile stretches of higher class locations for the sole protection of small clusters of buildings at crossroads or road crossings. Because part 192 regulations become more stringent as class locations increase from Class 1 to 4 locations, pipelines in higher class location areas such as these can result in increased expenditures to the pipeline operator in areas where there is no population. When finalizing the class location definitions as a part of establishing part 192 on August 19, 1970 (35 FR 13248), OPS added a new paragraph to allow operators to adjust the boundaries of Class 2, 3, and 4

[3] For instance, the number of human dwellings near the pipeline or the type of dwelling (hospital, school, playground, nursing care facility, etc.).

[4] This can include piping at compressor stations, metering stations, fabrications, and road or railroad crossings.

[5] Design factors for steel pipe are listed in § 192.111. Class 1 locations have a 0.72 design factor, Class 2 locations have a 0.60 factor, Class 3 locations have a 0.50 factor, and Class 4 locations have a 0.40 design factor.

[6] SMYS is an indication of the minimum stress a pipe may experience that will cause plastic, or permanent, deformation of the steel pipe.

[7] The seam type of a pipeline, per this formula, has a limiting effect on the MAOP of the pipeline. While it is typically ''1.00'' and does not affect the calculation, certain types of furnace butt-welded pipe or pipe not manufactured to certain industry standards will have factors of 0.60 or 0.80, which will necessitate a reduction in design pressure.

[8] The temperature derating factor ranges from 1.000 to 0.867 depending on the operating temperature of the pipeline. Pipelines designed to operate at 250 degrees Fahrenheit and lower have a factor of 1.000, which does not affect the design pressure calculation. Pipelines designed to operate at higher temperatures, including up to 450 degrees Fahrenheit, will have derating factors that will lower the design pressure of the pipeline.

[9] §§ 192.5, 192.8, 192.9, 192.65, 192.105, 192.111, 192.123, 192.150, 192.175, 192.179, 192.243, 192.327, 192.485, 192.503, 192.505, 192.609, 192.611, 192.613, 192.619, 192.620, 192.625, 192.705, 192.706, 192.707, 192.713, 192.903, 192.933, and 192.935.

[10] Per the regulations, a ''building'' is a structure intended for human occupancy, whether it is used as a residence, for business, or for another purpose. For the purposes of this rulemaking, a ''building'' may be interchangeably referred to as a ''home,'' a ''house,'' or a ''dwelling.''

[11] Under § 192.5, Class 1 locations also include offshore areas, and Class 3 locations contain areas where the pipeline lies within 100 yards of a building or a small, well-defined outside area (including playgrounds, recreation areas, and outdoor theaters) that is occupied by 20 or more persons at least 5 days a week for 10 weeks in any 12-month period. The days and weeks need not be consecutive.

locations. Under this provision, operators can choose to end Class 4 location boundaries 220 yards from the furthest edges of a group of 4-story buildings, and operators can choose to end Class 2 and 3 boundaries up to 220 yards upstream and downstream from the furthest edges of a group or ''cluster'' of buildings.[12] ''Clustering,'' therefore, is a means of reducing the length of a Class 2, 3, or 4 location in a sliding mile unit that requires a Class 2, 3, or 4 location; in other words, it allows operators to cluster or reduce the amount of pipe that is subject to the requirements of a higher class location.[13]

It is important to note that while clustering allows for the adjustment of the length of class locations in certain areas, it does not change the length of class location units themselves nor the method by which class location units are determined. Further, clustering does not exclude ''buildings for human occupancy'' in a class location unit/sliding mile, so all buildings within a specified class location unit must be protected by the maximum class location level that was determined for the entire class location unit. This concept becomes especially important when other buildings for human occupancy are built within a class location unit/sliding mile where a cluster exists and an operator has adjusted the class location length to exclude certain lengths of pipe outside of the cluster area.

For instance, assume there is a class location unit/sliding mile containing 47 homes close to one another. The class location unit would be a Class 3 location per the definition provided at § 192.5(b). An operator can consider these homes a ''cluster'' and appropriately apply the adjustment at § 192.5(c) so that the boundaries of the Class 3 location are 220 yards upstream and downstream from the furthest edges of the clustered homes (buildings for human occupancy). Therefore, while the entirety of the pipeline is in a Class 3 class location unit, the only pipe subject to Class 3 requirements is the length of the cluster plus 220 yards on both sides of the cluster. The remaining pipe in the class location unit/sliding mile, the pipe that is outside of this clustered area, could therefore be operated at Class 1 requirements rather than at the otherwise-required Class 3 requirements.

However, what would happen if new buildings were built within that sliding mile but away from that single cluster? If, per the example above, there is a cluster of 47 homes at one end of a class location unit/sliding mile, and 3 homes are built at the other end of the class location unit, the operator must count and treat those 3 homes as a second cluster, with the length of the cluster plus 220 yards on both sides of the cluster subject to Class 3 requirements. The pipeline between these two clusters would still be in a Class 3 location per its class location unit, as there would be 50 homes within the sliding mile, but the pipeline between the clusters could be operated under Class 1 location requirements. If the 220-yard extensions of any two or more clusters intercept or overlap, the separate clusters must be considered a single cluster for purposes of applying the adjustment.

An operator must use the clustering method consistently to ensure that all buildings for human occupancy within a class location unit are covered by the appropriately determined class location requirements. Any new buildings for human occupancy built in a class location unit where clustering has been used must also be clustered, whether they form a new, independent cluster or are added to the existing cluster. Note that even a single house could form the basis of a second cluster under this requirement, as all buildings within a specified class location unit must be protected by the maximum class location level that was determined for the entire class location unit.

PHMSA's interpretation to Air Products and Chemicals, Inc., issued on March 11, 2015,[14] explains and diagrams this concept further.

II. Changes in Class Location Due to Population Growth

Class locations can change as the population living or working near a pipeline grows and, as outlined earlier, are specifically determined based on the density of dwellings within the 440-yard-wide (quarter-mile-wide) sliding mile down the pipeline centerline. Class locations are used to determine a pipeline's design factor, which is a component of the design formula equation at § 192.105 and ultimately factors into the pressure at which the pipeline is operated. As population around a pipeline increases and the pipeline's class location increases, the numeric value of the design factor decreases, which translates, via the formula at § 192.105, into a lower MAOP for the pipeline. To illustrate this, a Class 4 location containing a prevalence of 4-or-more-story buildings has a safety factor of 0.4, whereas a Class 2 location containing 11 to 45 dwellings has a safety factor of 0.6. If a Class 2 location is very quickly developed to a point where there is a prevalence of 4-or-more story buildings, the corresponding difference in safety factor when the class location changes, from a 0.6 to a 0.4, equates to a 33% reduction in MAOP per the design formula equation.

A change in class location requires operators to confirm safety factors and to recalculate the MAOP of a pipeline. If the MAOP per the newly determined class location is not commensurate with the present class location, current regulations require that pipeline operators (1) reduce the pipe's MAOP to reduce stress levels in the pipe; (2) replace the existing pipe with pipe that has thicker walls or higher yield strength to yield a lower operating stress at the same MAOP; or (3) pressure test at a higher test pressure if the pipeline segment has not previously been tested at the higher pressure and for a minimum of 8 hours.[15] Depending on the pipeline's test pressure and whether it meets the requirements in §§ 192.609 and 192.611 (''Change in class location: Required study,'' and ''Change in class location: Confirmation or revision of maximum allowable operating pressure,'' respectively), an operator can base the pipeline's MAOP on a certain safety factor times the test pressure for the new class location as long as the corresponding hoop stress of the pipeline does not exceed certain percentages of the specified minimum yield strength (SMYS) of the pipe.[16]

[12] See § 192.5(c)(1) & (2).

[13] For example, if all buildings for human occupancy in a sliding mile containing enough buildings to require a Class 3 location were clustered in the middle of that sliding mile, the Class 3 area would end 220 yards from the nearest building (on either side of the cluster through which the pipeline passes) rather than at the end of the 1-mile class location unit that would otherwise be the basis for classification. Thus, if the cluster were 200 yards in length, the total length of the Class 3 area would be 640 yards (220 + 200 + 220).

[14] PHMSA Interpretation #PI–14–0017, available at *https://www.phmsa.dot.gov/sites/phmsa.dot.gov/files/legacy/interpretations/Interpretation%20Files/Pipeline/2015/Air_Products_PI_14_0017_10_01_2014_Part_192.5.pdf.*

[15] See § 192.611 as appropriate to one-class changes (*e.g.,* Class 1 to 2 or Class 2 to 3 or Class 3 to 4). As an example, for a Class 1 to Class 2 location change, the pipeline segment would require a pressure test to 1.25 times the MAOP for 8 hours. Following a successful pressure test, the pipeline segment would not need to be replaced with new pipe, but the existing design factor of 0.72 for a Class 1 location would be acceptable for a Class 2 location.

[16] See § 192.611. Specifically, if the applicable segment has been hydrostatically tested for a period of longer than 8 hours, the MAOP is 0.8 times the test pressure in Class 2 locations, 0.667 times the test pressure in Class 3 locations, or 0.555 times the test pressure in Class 4 locations. The corresponding hoop stress may not exceed 72% of

Continued

This is often referred to as a ''one-class bump,'' as an operator can use this method when class locations change from a Class 1 to 2, a Class 2 to a 3, or a Class 3 to a 4.

The §§ 192.5 and 192.611 requirements to change-out pipe, re-pressure test, or de-rate pipe to a lower MAOP when population growth occurs and requires a class location change are the most significant reasons that operators request that class locations be revised or eliminated. Throughout the process of considering class location changes,[17] comments PHMSA received from the trade associations state that reducing a pipeline's operating pressure below that at which the pipeline historically operated may unacceptably restrict deliveries to natural gas customers. These same commenters suggest that pressure testing pipelines may be practicable in select cases, but the test pressure required for higher class locations may exceed what a pipeline is designed to accommodate. Operators also contend that they should not have to change out pipe when a class location change occurs if the operator can prove that the pipe segment is fit for service through integrity assessments.[18]

III. Class Location Change Special Permits

As population growth occurs around pipelines that were formerly in rural areas, some operators have applied for special permits to prevent the need for pipe replacement or pressure reduction when the class location changes. A special permit is an order issued under § 190.341 that waives or modifies compliance with regulatory requirements if the pipeline operator requesting it demonstrates a need and PHMSA determines that granting the special permit would be consistent with pipeline safety. PHMSA performs extensive technical analysis on special permit applications and typically grants special permits on the condition that operators will perform alternative measures to provide an equal or greater level of public safety. PHMSA publishes a notice and request for comment in the **Federal Register** for each special permit application received and tracks issued, denied, and expired special permits on its website.

Since 2004, PHMSA has approved over 15 class location special permits based on operators adopting additional conditions, including certain operating safety criteria and periodic integrity evaluations.[19] [20] Generally, the additional conditions PHMSA requires are designed to identify and mitigate integrity issues that could threaten the pipeline segment and cause failure, especially given the fact that the majority of class location special permits it receives and reviews are for older pipelines that may have manufacturing, construction, or ongoing maintenance issues, such as seam or pipe body cracking, poor external coating, insufficient soil cover, lack of material records, dents, or repairs not made to class location design safety factors.

Typically, PHMSA requires operators to incorporate the affected segments into the company's O&M procedures and integrity management plan, perform additional assessments for threats to the pipeline segments identified during an operator's risk assessment, perform additional cathodic protection [21] and corrosion control measures, and repair any discovered anomalies to a specified schedule. Therefore, the additional monitoring and maintenance requirements PHMSA prescribes through this process help to ensure the integrity of the pipe and protection of the population living near the pipeline segment at a comparable margin of safety and environmental protection throughout the life of the pipe compared to the regulations as written. The class location change special permits that PHMSA has granted have allowed operators to continue operating the pipeline segments identified under the special permits at the current MAOP based on the previous class locations. PHMSA notes that it developed its class location special permit process by adapting Integrity Management (IM) concepts and published the typical considerations for class location change special permit requests in the **Federal Register** in 2004.[22] Based on its experiences when renewing some of the earliest class location change special permits, PHMSA has extended the expiration date of its class location change special permits from 5 years to 10 years. This extension should provide additional regulatory certainty to operators that apply for these permits. Further, throughout the renewal process of existing special permits, PHMSA has not significantly changed the original conditions imposed on individual operators. While PHMSA can make modifications to its special permit conditions when it is in the interest of safety and the public to do so, PHMSA has determined that the present special permit conditions and process are consistent with public safety.

A. Special Permit Conditions

In the special permit conditions and criteria PHMSA published in the **Federal Register** on June 29, 2004, PHMSA outlines several ''threshold conditions'' pipelines must meet to be considered for a special permit when class locations change. For instance, PHMSA does not consider any pipeline segments for a special permit where the class location those segments are in changes to a Class 4 location. Typically, PHMSA receives special permit requests

SMYS of the pipe in Class 2 locations, 60% of SMYS in Class 3 locations, or 50% of SMYS in Class 4 locations.

[17] See Section IV of this document. In the context of this rulemaking, PHMSA has been considering issues related to class location requirements since publishing an ANPRM on the gas transmission regulations in 2011. Following that, PHMSA published a notice of inquiry soliciting comments on expanding gas IM program requirements and mitigating class location requirements (78 FR 46560; August 1, 2013) and held a public meeting on the notice of inquiry topics on April 16, 2014 (both actions under Docket Number PHMSA–2013–0161). PHMSA also received comments on the issues discussed in this rulemaking in the docket titled ''Transportation Infrastructure: Notice of Review of Policy, Guidance, and Regulations Affecting Transportation Infrastructure Projects'' which was noticed in the **Federal Register** on June 8, 2017 (82 FR 26734; Docket Number OST–2017–0057).

[18] Operators did not outline the type of integrity assessments that would be appropriate from their perspective nor the factors that should be considered to determine whether a pipeline segment is fit for service (such as pipe, pipe seam, or coating conditions; O&M history; material properties; pipe depth of cover; non-destructive testing of girth welds; type pipe coatings used and if they shield cathodic protection; seam type; failure or leak history; and pressure testing or acceptance criteria and any re-evaluation intervals).

[19] Special permit conditions are implemented to mitigate the causes of gas transmission incidents and are based on the type of threats pertinent to the pipeline. The conditions are generally more heavily weighted on identifying: Material, coating and cathodic protection issues, pipe wall loss, pipe and weld cracking, depth of pipe cover, third party damage prevention, marking of the pipeline and pipeline right-of-way patrols, pressure tests and documentation, data integration of integrity issues, and reassessment intervals.

[20] Examples of PHMSA's class location special permit conditions can be found at: *https://primis.phmsa.dot.gov/classloc/docs/SpecialPermit_ExampleClassLocSP_Conditions_090112_draft1.pdf,* and more information about PHMSA's special permit process for class location changes can be found at: *https://primis.phmsa.dot.gov/classloc/documents.htm*

[21] Cathodic protection is a technique used to control the corrosion of a metal surface by making it the cathode of an electrochemical cell. This can be achieved with a special coating on the external surface of the pipeline along with an electrical system and anodes buried in the ground or with a ''sacrificial'' or galvanic metal acting as an anode. In these systems, the anode will corrode before the protected metal will.

[22] **Federal Register** (69 FR 38948, June 29, 2004). Additional guidance is provided online at: *http://primis.phmsa.dot.gov/classloc/index.htm.* Public notices were published in **Federal Register**: 69 FR 22115 and 69 FR 38948, dated April 23, 2004 and June 29, 2004: Docket No. RSPA–2004–17401—Pipeline Safety: Development of Class Location Change Waiver (Special Permit).

for pipeline segments where the class location is changing from Class 1 to Class 3. PHMSA also does not consider for class location change special permits any segments that have bare pipe or wrinkle bends. Other manufacturing- and construction-related items PHMSA considers include whether the applicable segments have certain seam types that may be more prone to defects and failures, whether the pipe has certain coating types that provide an adequate level of cathodic protection, and the design strength of the pipe.

There are also operation and maintenance factors that PHMSA considers when evaluating pipeline segments for class location change special permit feasibility. For example, PHMSA doesn't consider for a Class 1 to Class 3 location change special permit any pipe segments that operate above 72 percent SMYS. Operators also need to produce a hydrostatic test record showing the segment was tested to 1.25 times the MAOP. Also, operators are required to have pipe material records to document the pipelines diameter, wall thickness, strength, seam type and coating type. For operators who do not have these records, PHMSA requires they make these records per the special permit conditions. PHMSA often requires operators to operate each applicable segment at or below its existing MAOP as well.

As part of the special permit conditions, operators are required by PHMSA to incorporate the applicable pipeline segments into their IM program and inspect them on a regular basis according to the operator's procedures. As an extension of this requirement, operators must perform in-line inspections on the applicable segments, and the segments must not have any significant anomalies that would indicate any systemic problems. Additionally, PHMSA's published special permit criteria defines a ''waiver inspection area,'' also known as a ''special permit inspection area,'' as up to 25 miles of pipe on either side of the applicable segment. Operators must incorporate these areas into their IM programs as well and inspect and repair them per the operator's IM program procedures. Some of the factors PHMSA uses when deciding the length of special permit inspection areas are based on factors including what class location the surrounding pipe is in and whether class location ''clustering'' has been used. For both the special permit segments and the special permit inspection areas, PHMSA also typically requires operators to perform assessments and surveys to identify pipe that may be susceptible to certain issues, especially seam or cracking issues in the pipe seam or pipe body, based on the coating type, vintage, or manufacturing of the pipe. Pipelines in the special permit segments or in the special permit inspection areas that have had a leak or failure history are also taken into consideration when PHMSA develops an individual special permit's conditions so as to prevent similar issues in the future. Further, PHMSA looks at the enforcement history of an operator applying for a special permit as a benchmark for how the operator has followed the Federal Pipeline Safety Regulations when developing the conditions following a special permit request.

In class location change special permit requests, PHMSA also ensures that integrity threats to pipelines in special permit segments and special permit inspection areas are addressed in operator operations and management plans, including a systematic, ongoing program to review and remediate pipeline safety concerns. Some of the typical integrity and safety threats PHMSA would expect operators to address include pipe coating quality, cathodic protection effectiveness, stress corrosion and seam cracking, and any long-term pipeline system flow reversals. To this end, PHMSA often requires coating condition surveys, the remediation of coating, and cathodic protection systems for pipelines where the operator has requested a class location change special permit. Any data gathered on the special permit area and special permit inspection area would have to be incorporated into the operator's greater IM program.

PHMSA incorporates these conditions into class location change special permit requests to ensure that operators meet or exceed the threshold requirements with equivalent safety to the provisions in the Federal Pipeline Safety Regulations that are being waived and ensure that granting the special permit will not be inconsistent with safety.

IV. Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011—Section 5

On January 3, 2012, the Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 (Pub. L. 112–90) was enacted. Among the many provisions of the Act, Section 5 required PHMSA to evaluate whether IM system requirements, or elements thereof, should be expanded beyond high-consequence areas (HCA) and, with respect to gas transmission pipeline facilities, whether applying IM program requirements, or elements thereof, to additional areas would mitigate the need for class location requirements. PHMSA was required to report the findings of this evaluation to Congress and was authorized to issue regulations pursuant to the findings of the report following a prescribed review period.

A. 2013 Notice of Inquiry: Class Location Requirements

In August 2013, through a Notice of Inquiry, PHMSA solicited comments on whether expanding IM requirements would mitigate the need for class locations in line with the Section 5 mandate of the 2011 Pipeline Safety Act.[23] Several topics were discussed, including whether class locations should be eliminated and a single design factor used, whether design factors should be increased for higher class locations, and whether pipelines without complete material records should be allowed to use a single design factor if class locations were to be eliminated.[24]

There was broad consensus among PHMSA's stakeholders that eliminating class locations entirely would not lead to improvement to pipeline safety. Further, commenters noted that establishing a single design factor in lieu of class location designations might be too complicated to implement. Many commenters noted that any changes in class location requirements would impact not only the classifications of many pipelines but would also possibly create several unintended consequences within part 192, as the class location requirements are referenced or built upon throughout the natural gas regulations.

Several industry trade groups had suggestions for changing the class location regulations, and these suggestions were developed further through subsequent discussions at advisory committee meetings and at public workshops. The Interstate Natural Gas Association of America (INGAA) noted that IM should be extended beyond HCAs with the caveat that PHMSA should examine the effects of such a change on other areas of the pipeline safety regulations. Along with this, it suggested that PHMSA revise certain operations and maintenance requirements that may no longer be necessary given technological advances and IM activities.

[23] **Federal Register** (78 FR 46560, August 1, 2013).

[24] Regarding these questions, PHMSA received 30 comment letters, available at *www.regulations.gov* at docket PHMSA–2013–0161.

B. 2014 Pipeline Advisory Committee Meeting, Class Location Workshop, and Subsequent Comments

On February 25, 2014, PHMSA hosted a joint meeting of the Gas and Liquid Pipeline Advisory Committees.[25] At that meeting, PHMSA updated the committees on its activities regarding the Section 5 mandate of the 2011 Pipeline Safety Act, and committee members and members of the public provided their comments.

INGAA, reinforcing its comments on the 2013 Notice of Inquiry, noted that the original class location definitions in ASME B31.8 were intended to provide an increased margin of safety for locations of higher population density and stated that IM is a much better risk management tool than class locations. INGAA reiterated that it intends for its members to perform elements of IM on pipelines outside of HCAs.

On April 16, 2014, PHMSA sponsored a Class Location Workshop to solicit comments on whether applying the gas pipeline IM program requirements beyond HCAs would mitigate the need for gas pipeline class location requirements. Presentations were made by representatives from PHMSA, the National Energy Board of Canada (NEB), National Association of Pipeline Safety Representatives (NAPSR), pipeline operators, industry groups, and public interest groups.[26]

During the workshop, INGAA representatives noted that the current class location regulations require changes that result in the replacement of ''good pipe,'' and the special permit process for class location changes should be embedded in part 192. Representatives from the American Gas Association (AGA) noted that applying the current class location change requirements can cost more than $1 million per change. AGA claimed the special permit process for class location changes is burdensome, the renewal process is increasingly complex, and the outcome is uncertain.[27] Therefore, AGA suggested eliminating the special permit process for class location changes and incorporating specific requirements for special permits into part 192 as part of the base regulations. AGA recommended two approach methods, one based on IM and the other using the current class location approach.

Public interest groups including Accufacts and the Pipeline Safety Trust (PST) pointed out how deeply the concept of class locations is embedded in part 192, while also noting that IM requirements and class locations overlap in densely populated areas to provide a redundant, but necessary, safety regime. The PST also suggested that, in time, the older class location method potentially could be replaced with an IM method for regulation. However, the PST noted that incidents and data suggest there is room for improvement in the IM regulations, as data shows higher incident rates in HCAs than in non-HCAs, and noted that pipe installed after 2010 has a higher incident rate than pipe installed a decade earlier. Similarly, Accufacts noted that the incident at San Bruno, CA, exposed weaknesses in the operator's IM program and demonstrated that the consequences resulting from the incident spread far beyond the potential radius in which they were expected to occur.[28] Therefore, Accufacts suggested that shifting the class location approach to solely an IM approach might decrease the protection of public safety.

Following the Class Location Workshop, INGAA submitted additional comments to the docket stating that advancements in IM technology and processes have superseded the need for mandatory pipe replacement following a class location change. It noted that, in the past, it was logical to replace a pipeline when class locations changed because of the widespread belief that thicker pipe would take longer to corrode and would withstand greater external forces, such as damage from excavators, before failure. However, given current technology, improvements in pipe quality, and ongoing regulatory processes such as IM, operators can mitigate most threats without the need for pipe replacement. Therefore, INGAA offered an approach to class locations changes to not require pipe replacement for existing pipelines if pipe segments meet certain requirements that are in line with current IM requirements. Specifically, INGAA suggested that pipelines meeting a ''fitness for service'' standard in 18 categories of requirements could address potential safety concerns and preclude the need for pipe replacement.[29] The 18 categories are very similar to the special permit conditions that PHMSA uses for a Class 1 to 3 location special permit as noted in the 2004 **Federal Register** notice.[30]

C. 2016 Class Location Report

The Pipeline Safety, Regulatory Certainty, and Job Creation Act of 2011 required that PHMSA evaluate whether IM should be expanded beyond HCAs and whether such expansion would mitigate the need for class location requirements. In its report titled ''Evaluation of Expanding Pipeline Integrity Management Beyond High-Consequence Areas and Whether Such Expansion Would Mitigate the Need for Gas Pipeline Class Location Requirements,'' [31] which was submitted to Congress in April 2016 concurrently with the publication of the NPRM titled ''Safety of Gas Transmission and Gathering Pipelines'' (81 FR 20722), PHMSA noted that the application of IM program elements, such as assessment and remediation timeframes, beyond HCAs would not warrant the elimination of class locations.

PHMSA notes that class locations affect all gas pipelines and are integral to determining MAOPs; design pressures; pipe wall thickness; valve spacing; HCAs, in certain cases; and O&M inspection, surveillance, and repair intervals. While IM measures are a critical step towards pipeline safety and are important to mitigate risk, the assessment and remediation of defects do not adequately compensate for these other aspects of class locations. Thus, as outlined in the report, PHMSA determined the existing class location

[25] The Pipeline Advisory Committees are statutorily mandated advisory committees that advise PHMSA on proposed safety standards, risk assessments, and safety policies for natural gas and hazardous liquid pipelines (49 U.S.C. 60115). These Committees were established under the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. app. 1–16) and the Federal Pipeline Safety Statutes (49 U.S.C. chap. 601–603). Each committee consists of 15 members, with membership divided among Federal and State agency representatives, the regulated industry, and the public.

[26] Meeting presentations are available online at: *http://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=95.*

[27] PHMSA notes that the special permit process is outlined in § 190.341 and is no different for the class location regulations than for any other pipeline safety regulation. Of the 18 special permits up for renewal from 2010–2017, 9 of them were for class location changes. When reviewing the class location change permits up for renewal, PHMSA found no safety reason to extensively modify any of the prior permits and made no major revisions to any of the previously imposed safety conditions.

[28] The potential impact radius for the ruptured pipe segment involved in the San Bruno incident was calculated at 414 feet. However, the NTSB, in its accident report (NTSB/PAR–11/01), noted that the subsequent fire damage extended to a radius of about 600 feet from the blast center.

[29] Those 18 categories were as follows: Baseline Engineering and Record Assessments—Girth Weld Assessment, Casing Assessment, Pipe Seam Assessment, Field Coating Assessment, Cathodic Protection, Interference Currents Control, Close Interval Survey, Stress Corrosion Cracking Assessments, In-line Inspection Assessments, Metal Loss Anomaly Management, Dent Anomaly Management, Hard Spots Anomaly Management. Ongoing Requirements—Integrity Management Program, Root Cause Analysis for Failure or Leak, Line Markers, Patrols, Damage Prevention Best Practices, Recordkeeping & Documentation.

[30] See also: *http://primis.phmsa.dot.gov/classloc/index.htm.*

[31] *https://www.regulations.gov/document?D=PHMSA-2011-0023-0153.*

requirements were appropriate for maintaining pipeline safety and should be retained. Therefore, any revisions to the class location requirements would have to be forward-looking (*i.e.,* applying to pipelines constructed after a certain effective date) and would have to comport with the existing regulatory regime to provide commensurate safety if any changes are made to aspects of pipeline safety related to design and construction, which is where key safety benefits of class locations are realized.[32]

As a part of the continuing discussion on class location changes and subsequent pipe replacement, PHMSA summarized at the end of the Class Location Report the concerns operators expressed regarding the cost of replacing pipe in locations that change from a Class 1 to a Class 3 location or a Class 2 to a Class 4 location. As discussed throughout the document, operators submitted that the safe operation of pipelines constructed in Class 1 locations that later change to Class 3 locations can be achieved using current IM practices.

However, over the past decade, PHMSA observed problems with pipe and fitting manufacturing quality, including low-strength material; [33] construction practices; welding; field coating practices; IM assessments and reassessment practices; [34] [35] and record documentation practices.[36] [37] These issues give PHMSA pause in considering approaches allowing a two-class bump (Class 1 to 3 or Class 2 to 4) without requiring pipe replacement, especially for higher-pressure transmission pipelines.

PHMSA stated in the conclusion of its Class Location Report that it would further evaluate the feasibility and the appropriateness of alternatives to address issues pertaining to pipe replacement requirements, continue to reach out to and consider input from all stakeholders, and consider future rulemaking if a cost-effective and safety-focused approach to adjusting specific aspects of class location requirements could be developed to address the issues identified by industry. In doing so, PHMSA would evaluate alternatives in the context of other issues it is addressing related to new construction quality- and safety-management systems and will also consider inspection findings, IM assessment results, and lessons learned from past incidents. Therefore, PHMSA has initiated this rulemaking to gain further information on analyzing the current requirements resulting in pipe replacement and alternatives to that practice.

V. INGAA Submission on Regulatory Reform—Proposal To Perform IM Measures in Lieu of Pipe Replacement When Class Locations Change

On July 24, 2017, INGAA submitted comments to a DOT docket regarding regulatory review actions (Docket No. OST–2017–0057). In its submission, INGAA estimated that gas transmission pipeline operators incur annual costs of $200–$300 million [38] nationwide replacing pipe solely to satisfy the class location change regulations and requested PHMSA consider revising the current class location change regulations to include an alternative beyond pressure reduction, pressure testing, or pipe replacement.

INGAA's proposed alternate approach focuses on recurring IM assessments that would leverage advanced assessment technologies to determine whether the pipe condition warrants pipe replacement in areas where the class location has changed. INGAA states that such an approach would further promote IM processes and principles throughout the nation's gas transmission pipeline network, improve economic efficiency by reducing regulatory burden, and help fulfill the purposes of Section 5 of the 2011 Pipeline Safety Act.

INGAA claims that the current alternatives to pipe replacement following a class location change do not reflect the substantial developments in IM processes, technologies, and regulations over the past 15-plus years. More specifically, in-line inspection (ILI) technologies, such as high-resolution magnetic flux leakage tools, can precisely assess the presence of corrosion and other potential defects, allowing an operator to establish whether a pipeline segment requires remediation or replacement.[39]

INGAA further notes that PHMSA's proposed rulemaking titled ''Safety of Gas Transmission and Gathering Pipelines'' aims to expand IM assessments to newly defined ''Moderate Consequence Areas'' (proposed § 192.710), and such an expansion provides a framework for developing an alternative for managing class location changes. INGAA suggests that the costs saved from avoiding pipe replacement using such an alternative could mitigate, to some degree, part of the costs of the proposed rulemaking. Additionally, INGAA notes that the proposed rulemaking contains several new provisions that will require operators to better manage the integrity of their pipelines by implementing more preventative and mitigative measures to manage the threat of corrosion. INGAA states that the inclusion of such corrosion control measures as a part of a program for managing the integrity of pipeline segments, including ones that have experienced class location changes, would further justify the development of an IM-focused alternative to class location changes.

Based on those statements, INGAA recommends PHMSA develop an alternative approach to § 192.611 that leverages the proposed § 192.710 for areas outside of HCAs and the IM requirements at § 192.921 to require recurring IM assessments and incorporation of those affected pipeline segments into IM programs. Further, INGAA suggests this approach require operators to reconfirm pipeline MAOP in a changed class location for any pipeline segment without traceable, verifiable, and complete records of a hydrostatic pressure test supporting the segment's previous MAOP.

PHMSA acknowledges that the class location change regulations predate the development of modern pipeline inspection technology such as ILI, above-ground surveys, and modern integrity management processes. In fact, it wasn't until the mid-1990s that PHMSA, following models from other industries such as nuclear power, started to explore whether a risk-based approach to regulation could improve public and environmental safety. PHMSA finalized the IM regulations for gas transmission pipelines on December

[32] In its comments following the public workshop on Class Locations in 2014, INGAA noted that, after further analysis, it appears that applying the Potential Impact Radius (PIR) method to existing pipelines may be unworkable.

[33] PHMSA has documented pipe material low-strength issues through an advisory bulletin and the following website link: *http://primis.phmsa.dot.gov/lowstrength/index.htm.*

[34] IM and operational procedures and practices were issues in the Pacific Gas & Electric (PG&E) San Bruno, CA, rupture in September 2010 and the Enbridge Marshall, MI, rupture in July 2010.

[35] PHMSA issued Advisory Bulletins ADB–11–01 and ADB–2012–10 to operators regarding IM meaningful metrics and assessments on January 10, 2011, and December 5, 2012, respectively, which can be reviewed at: *http://phmsa.dot.gov/pipeline/regs/advisory-bulletin.*

[36] PHMSA issued Advisory Bulletin, ADB–12–06, concerning documentation of MAOP on May 7, 2012, which can be reviewed at: *http://phmsa.dot.gov/pipeline/regs/advisory-bulletin.*

[37] Also note PHMSA's Advisory Bulletin titled ''Deactivation of Threats,'' issued March 16, 2017 (82 FR 14106).

[38] PHMSA requests further substantiation of this estimate. In extrapolating the national data, PHMSA estimates this number is the cost incurred for *all* pipe replacement projects on transmission lines, not just those projects triggered in response to class location changes.

[39] PHMSA notes that ILI and in-the-ditch evaluation technologies for crack identification are under development and could further be improved.

15, 2003,[40] in response to tragic incidents on pipelines in Bellingham, WA, in 1999 and near Carlsbad, NM, in 2000, which killed 3 people and 12 people, respectively. The IM regulations designated HCAs where operators would perform periodic assessments of the condition of their pipelines and make necessary repairs within specific timeframes if discovered anomalies met certain criteria. More specifically, the IM regulations outline the risk-based processes that pipeline operators must use to identify, prioritize, assess, evaluate, repair, and validate the integrity of gas transmission pipelines.

For many years, the pipeline industry used internal steel brush devices (''cleaning pigs'') moved by product flow to clean the inside of their pipelines. This pigging concept was later adapted through the application of technology to measure and record irregularities in the pipe and welds that may represent corrosion, cracks, deformations, and other defects. Now operators use ILI technology (''smart pigging or ILI'') as a backbone of the modern IM program. ILI tools are inserted into pipelines at locations, such as near valves or compressor stations, that have special configurations of pipes and valves where the ILI tools can be loaded into launchers, the launchers can be closed and sealed, and the flow of the product the pipeline is carrying can be directed to launch the tool down the pipeline. A similar setup is located downstream where the tool is directed out of the main line into a receiver so that an operator can remove the tool and retrieve the recorded data for analysis and reporting. ILI tools come in several different varieties that have distinct advantages and disadvantages over other methods of pipeline assessment. For instance, while some ILI tools might be able to reliably determine whether a pipeline has internal corrosion, the same tool might not be able to determine whether the pipeline has any crack indications. In selecting the tools most suitable for inline inspections, pipeline operators must know the type of threats that are applicable to the pipeline segment. Threats that ILI tools can identify typically include existing pipe wall thickness, pipe wall changes, pipe wall loss, cracking, and dents.

At the time the class location regulations were promulgated, it was logical to replace a pipeline when population growth resulted in a class location change in order to restore the safety margin appropriate for that location because the industry did not have the technology that is available today to learn the *in situ* material condition of the pipe. Further, since the existing pipe would not achieve a similar safety margin as replaced pipe, operators would need to use applicable inspection technology and pressure testing to ensure pipe has the correct wall thickness; strength; seam condition; toughness; no detrimental cracking or corrosion in the pipe body or seam; and a pipe coating that has not deteriorated or shields cathodic protection currents to allow corrosion or cracking issues such as girth weld cracking, stress corrosion cracking, or selective seam weld corrosion.

Currently, operators are not required to inspect pipelines or otherwise perform IM on those portions of pipelines unless they are within high consequence areas (HCAs) or the operator otherwise voluntarily assesses them and performs remediation measures for threats to the pipeline. As such, while prudent operators may know the characteristics and conditions of their pipelines outside of HCAs and can be confident that they can manage class location change expectations through the performance of IM measures, some operators may not.

PHMSA notes that while class locations and HCAs both provide additional protection to areas with high population concentrations, they were designed for different purposes. Unlike class locations, which provide blanket levels of safety throughout the nation's pipeline network at all locations by driving MAOP and design, construction, testing, and O&M requirements, the purpose of the IM regulations is to provide a structure for operators to focus their resources on improving pipeline integrity in the areas where a failure would have the greatest impact on public safety. Whereas over time the safety margins that class locations provide can be reduced due to corrosion or other types of pipe degradation, IM requirements provide a continuing minimum safety margin for more densely populated areas because operators are required to inspect and repair those applicable pipelines at a minimum of every 7 years and more frequently based upon risk assessments of threats to the segment in the HCA.

PHMSA acknowledges that applying modern IM assessments and processes could potentially be a comparable alternative to pipe change-outs. PHMSA notes that if operators perform integrity assessments on significant portions of non-HCA pipe mileage, PHMSA could further consider operators using such assessments to determine whether pipe in a changed class location is fit for service rather than having to replace it.

PHMSA is concerned, however, that some issues that result in pipeline failures, including poor construction practices[41] and operational maintenance threats, are not always being properly assessed and mitigated by operators, whether due to lack of technology or other causes. Further, as the incident at San Bruno in 2010 showed, operators may not have traceable, verifiable, and complete records of pipe properties, such as pipe material yield strength, pipe wall thickness, pipe seam type, pipe and seam toughness, and coating quality, that are critical and necessary for IM processes and pipeline safety in Class 3 and 4 locations and HCAs where there are higher population densities. PHMSA also points out that there might be instances where a pipeline may be in ''good condition'' from a visual standpoint, but it may not have the initial pipe manufacturing, pipe strength, construction quality, and O&M history requirements that add the extra level of safety required by the regulations for the higher population density area and the MAOP.[42] Section 192.611 already allows a ''one-class location'' bump for pipeline class locations that are in satisfactory physical condition and have the required pressure test.

Because of these factors, PHMSA seeks comment on the potential safety consequences of altering the current class location methodology and moving to an IM-only method in certain areas.

[40] 68 FR 69778; Pipeline Safety: Pipeline Integrity Management in High Consequence Areas (Gas Transmission Pipelines).

[41] PHMSA has met with operators constructing new pipelines on several occasions to discuss issues found during inspection. To reach out to all members of the pipeline industry, PHMSA hosted a public workshop in collaboration with our State partners, the Federal Energy Regulatory Commission (FERC) and Canada's National Energy Board (NEB) in April 2009. The objective of the workshop was to inform the public, alert the industry, review lessons learned from inspections, and to improve new pipeline construction practices prior to the 2009 construction season. This website makes available information discussed at the workshop and provides a forum in which to share additional information about pipeline construction concerns. This workshop focused on transmission pipeline construction. *http://primis.phmsa.dot.gov/construction/index.htm.*

[42] Note that the potential impact radius (PIR) in Integrity Management (IM) does not give any criteria to establish the pipelines operating pressure, anomaly repair criteria, safety surveys for leaks, 3rd party encroachments, etc. When Class locations change (from additional dwellings for human occupancy) from one-level to a higher level there are cut-off levels that may require a different design factor, pressure test, or maintenance criteria. For pipe to be replaced the class location change would have to be from a Class 1 to 3 or Class 2 to 4, which is a large increase in dwellings along the pipeline.

VI. Questions for Consideration

PHMSA is requesting comments and information that will be used to determine if revisions should be made to the Federal Pipeline Safety Regulations regarding the current requirements operators must meet when class locations change. The list of questions below is not exhaustive and represents an effort to help in the formulation of comments. Any additional information that commenters determine would be beneficial to this discussion is also welcomed.

Q1—When the population increases along a pipeline route that requires a class location change as defined at § 192.5, should PHMSA allow pipe integrity upgrades from Class 1 to Class 3 locations by methods other than pipe replacement or special permits? [43] Why or why not?

1a.—Should part 192 continue to require pipe integrity upgrades when class locations change from Class 1 to Class 3 locations or Class 2 to 4 locations? Why or why not?

1b.—Should part 192 continue to require pipe integrity upgrades from Class 1 to Class 3 locations for the ''cluster rule'' (see § 192.5(c)) when 10 or fewer buildings intended for human occupancy have been constructed along the pipeline segment? Why or why not?

1c.—Should part 192 continue to require pipe integrity upgrades for grandfathered pipe (*e.g.,* pipe segments without a pressure test or with an inadequate pressure test, operating pressures above 72% SMYS, or inadequate or missing material records; see § 192.619(c))? Why or why not?

Q2—Should PHMSA give operators the option of performing certain IM measures in lieu of the existing measures (pipe replacement, lower the operating pressure, or pressure test at a higher pressure; see § 192.611) when class locations change from Class 1 to Class 3 due to population growth within the sliding mile? Why or why not?

2a.—If so, what, if any, additional integrity management and maintenance approaches or safety measures should be applied to offset the impact on safety these proposals might create?

Q3—Should PHMSA give operators the option of performing certain IM measures in lieu of the existing measures (pipe replacement with a more conservative design safety factor or a combination of pressure test and lower MAOP) when class locations change due to additional structures being built outside of clustered areas within the sliding mile, if operators are using the cluster adjustment to class locations per § 192.5(c)(2)? Why or why not?

3a.—If so, what, if any, additional integrity management and maintenance approaches or safety measures should be applied to offset the impact on safety these proposals might create?

3b.—At what intervals and in what timeframes should operators be required to assess these pipelines and perform remediation measures?

Q4—If PHMSA allows operators to perform certain IM measures in lieu of pipe replacement when class locations change from Class 1 to Class 3, should some sort of ''fitness for service'' standard determine which pipelines are eligible? Why or why not?

4a.—If so, what factors should make a pipeline eligible or ineligible?

(i) Should grandfathered pipe (lacking records, including pressure test or material records) or pipe operating above 72% SMYS be eligible? Why or why not?

(ii) Should pipe that has experienced an in-service failure, was manufactured with a material or seam welding process during a time or by a manufacturer where there are now known integrity issues or has lower toughness in the pipe and weld seam (Charpy impact value) be eligible? Should pipe with a failure or leak history be eligible? Why or why not?

(iii) Should pipe that contains or is susceptible to cracking, including in the body, seam, or girth weld, or having disbonded coating or CP shielding coatings be eligible? Are there coating types that should disqualify pipe? Should some types of pipe, such as lap-welded, flash-welded, or low-frequency electric resistance welded pipe be ineligible? Should pipe where the seam type is unknown be ineligible? Why or why not?

(iv) Should pipe with significant corrosion (wall loss) be eligible for certain IM measures, or should it be replaced? Why or why not?

(v) Should anomalies be repaired similar to IM, allowed to grow to only a 10-percent safety factor [44] (§ 192.933(d)) before remediation in high population areas such as Class 2, 3 and 4 locations, or should they have an increased safety factor for remediation should these class location factors be eliminated? Why or why not?

(vi) Should pipe that has been damaged (dented) or has lost ground cover due to 3rd party activity (excavation or other) be eligible? Why or why not?

(vii) Should pipe lacking cathodic protection due to disbonded coating be eligible? Why or why not?

(viii) Should pipe with properties such as low frequency electric resistance weld (LF–ERW), lap welded, or other seam types that have a history of seam failure due to poor manufacturing properties or seam types that have a derating factor below 1.0 be eligible? Why or why not?

4b.—Should PHMSA base any proposed requirements off its criteria used for considering class location change waivers (69 FR 38948; June 29, 2004), including the age and manufacturing and construction processes of the pipe, and O&M history? Why or why not?

4c.—In the 2004 **Federal Register** notice (69 FR 38948), PHMSA outlines certain requirements pipelines must meet to be eligible for waiver consideration, including no bare pipe or pipe with wrinkle bends, records of a hydrostatic test to at least 1.25 times MAOP, records of ILI runs with no significant anomalies that would indicate systemic problems, and agreement that up to 25 miles of pipe both upstream and downstream of the waiver location must be included in the operator's IM program and periodically inspected using ILI technology. Further, the criteria provides no waivers for segments changing to Class 4 locations or for pipe changing to a Class 3 location that is operating above 72% SMYS. Should PHMSA require operators and pipelines to meet the threshold conditions outlined earlier in this document (Section 3A; ''Class Location Change Special Permits—Special Permit Conditions) or other thresholds to be eligible for a waiver when class locations change? Why or why not?

Q5—As it is critical for operators to have traceable, verifiable, and complete (TVC) records to perform IM, should operators be required to have TVC records as a prerequisite for performing IM measures on segments instead of replacing pipe when class locations change? Why or why not?

5a.—If so, what records should be necessary and why? Should records include pipe properties, including yield strength, seam type, and wall thickness; coating type; O&M history; leak and failure history; pressure test records; MAOP; class location; depth of cover; and ability to be in-line inspected?

5b.—If operators do not have TVC records for affected segments and TVC records were a prerequisite for performing IM measures on pipeline

[43] Sections involving class location requirements include §§ 192.5, 192.609, 192.611, 192.619 and 192.620.

[44] Section 192.933 has anomaly repair requirements based upon a predicted failure pressure being less than or equal to 1.1 times the MAOP.

segments in lieu of replacing pipe, how should those records be obtained, and when should the deadline for obtaining those records be?

Q6—Should PHMSA incorporate its special permit conditions regarding class location changes into the regulations, and would this incorporation satisfy the need for alternative approaches? Why or why not? (Examples of typical PHMSA class location special permit conditions can be found at *https://primis.phmsa.dot.gov/classloc/documents.htm*.)

6a.—What, if any, special permit conditions could be incorporated into the regulations to provide regulatory certainty and public safety in these high population density areas (Class 2, 3, and 4)?

Q7—For all new and replaced pipelines, to what extent are operators consulting growth and development plans to avoid potentially costly pipe change-outs in the future?

Q8—What is the amount of pipeline mileage per year being replaced due to class location changes for pipelines: (1) Greater than 24 inches in diameter, (2) 16–24 inches in diameter, and (3) less than 16 inches in diameter?

8a.—Of this mileage, how much is being replaced due to class locations changing when additional structures for human occupancy are built near clustered areas, if operators are using the cluster adjustment to class locations per § 192.5(c)(2)?

8b.—At how many distinct locations are pipe replacements occurring due to class location changes and that involve pipe with these diameters?

8c.—What is the average amount of pipe (in miles) being replaced and cost of replacement at the locations described in question 8b. and for these diameter ranges due to class location changes?

Q9—Should any additional pipeline safety equipment, preventative and mitigative measures, or prescribed standard pipeline predicted failure pressures more conservative than in the IM regulations be required if operators do not replace pipe when class locations change due to population growth and perform IM measures instead? Why or why not?

9a.—Should operators be required to install rupture-mitigation valves or equivalent technology? Why or why not?

9b.—Should operators be required to install SCADA systems for impacted pipeline segments? Why or why not?

Q10—Should there be any maximum diameter, pressure, or potential impact radius (PIR) limits that should disallow operators from using IM principles in lieu of the existing requirements when class locations change? For instance, PHMSA has seen construction projects where operators are putting in 42-inch-diameter pipe designed to operate at up to 3,000 psig. The PIR for that pipeline would be over 1,587 feet, which would mean the total blast diameter would be more than 3,174 feet.

VII. Regulatory Notices

A. Executive Order 12866, Executive Order 13563, Executive Order 13771, and DOT Regulatory Policies and Procedures

Executive Orders 12866 and 13563 require agencies to regulate in the ''most cost-effective manner,'' to make a ''reasoned determination that the benefits of the intended regulation justify its costs,'' and to develop regulations that ''impose the least burden on society.'' Executive Order 13771 (''Reducing Regulation and Controlling Regulatory Costs''), issued January 30, 2017, provides that ''it is essential to manage the costs associated with the governmental imposition of private expenditures required to comply with Federal regulations.'' One way to manage the costs of rulemakings is to propose new regulations that are deregulatory in nature, *i.e.* regulations that reduce the cost of regulatory compliance. PHMSA seeks information on whether this rulemaking could result in a deregulatory action under E.O. 13771, meaning that a potential final rule could have ''total costs less than zero.'' [45] We therefore request comments, including specific data if possible, concerning the costs and benefits of revising the pipeline safety regulations to accommodate any of the changes suggested in the advance notice.

B. Executive Order 13132: Federalism

Executive Order 13132 requires agencies to assure meaningful and timely input by State and local officials in the development of regulatory policies that may have a substantial, direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. PHMSA is inviting comments on the effect a possible rulemaking adopting any of the amendments discussed in this document may have on the relationship between national government and the States.

C. Regulatory Flexibility Act

Under the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*), PHMSA must consider whether a proposed rule would have a significant impact on a substantial number of small entities. ''Small entities'' include small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations under 50,000. If your business or organization is a small entity and if adoption of any of the amendments discussed in this ANPRM could have a significant economic impact on your operations, please submit a comment to explain how and to what extent your business or organization could be affected and whether there are alternative approaches to the regulations the agency should consider that would minimize any significant negative impact on small business while still meeting the agency's statutory objectives.

D. National Environmental Policy Act

The National Environmental Policy Act of 1969 requires Federal agencies to consider the consequences of Federal actions and that they prepare a detailed statement analyzing them if the action significantly affects the quality of the human environment. Interested parties are invited to address the potential environmental impacts of this ANPRM, including comments about compliance measures that would provide greater benefit to the human environment or any alternative actions the agency could take that would provide beneficial impacts.

E. Executive Order 13175: Consultation and Coordination with Indian Tribal Governments

Executive Order 13175 requires agencies to assure meaningful and timely input from Indian Tribal Government representatives in the development of rules that ''significantly or uniquely affect'' Indian communities and that impose ''substantial and direct compliance costs'' on such communities. We invite Indian Tribal governments to provide comments on any aspect of this ANPRM that may affect Indian communities.

F. Paperwork Reduction Act

Under 5 CFR part 1320, PHMSA analyzes any paperwork burdens if any information collection will be required by a rulemaking. We invite comment on the need for any collection of

[45] See OMB Memorandum M–17–21, ''Guidance Implementing Executive Order 13771, Titled 'Reducing Regulation and Controlling Regulatory Costs,' '' (April 5, 2017).

information and paperwork burdens related to this ANPRM.

G. Privacy Act Statement

Anyone can search the electronic form of comments received in response to any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). DOT's complete Privacy Act Statement was published in the **Federal Register** on April 11, 2000 (65 FR 19477).

Issued in Washington, DC, on July 25, 2018, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.

[FR Doc. 2018–16376 Filed 7–30–18; 8:45 am]

BILLING CODE 4910–60–P

Notices

Federal Register
Vol. 83, No. 147
Tuesday, July 31, 2018

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

July 25, 2018.

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 30, 2018 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), *OIRA_Submission@omb.eop.gov* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Food and Nutrition Service

Title: Request for Administrative Review.

OMB Control Number: 0584–0520.

Summary of Collection: The Food and Nutrition Service (FNS) of the U.S. Department of Agriculture is the Federal agency responsible for the Supplemental Nutrition Assistance Program (SNAP). The Food and Nutrition Act of 2008 (7 U.S.C. 2011–2036), as codified under 7 CFR parts 278 and 279, requires that the FNS determine the eligibility of retail food stores and certain food service organizations to participate in the SNAP. If a retail or wholesale firm is found to be ineligible by FNS or is otherwise aggrieved by certain FNS actions(s), that firm has the right to file a written request for review of the administrative action with FNS.

Need and Use of the Information: The request for administrative review is a formal letter, provided by the requester, with an original signature. FNS receives the letter requesting an administrative review and maintains it as part of the official review record. The designated reviewer will adjudicate the appeals process and make a final determination regarding the aggrieved action.

Description of Respondents: Business or other for profit; Farms.

Number of Respondents: 1,282.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 262.

Ruth Brown,

Departmental Information Collection Clearance Officer.

[FR Doc. 2018–16261 Filed 7–30–18; 8:45 am]

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

The Department of Agriculture has submitted the following information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding (1) whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by August 30, 2018 will be considered. Written comments should be addressed to: Desk Officer for Agriculture, Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), New Executive Office Building, 725 17th Street NW, Washington, DC 20502. Commenters are encouraged to submit their comments to OMB via email to: *OIRA_Submission@OMB.EOP.GOV* or fax (202) 395–5806 and to Departmental Clearance Office, USDA, OCIO, Mail Stop 7602, Washington, DC 20250–7602. Copies of the submission(s) may be obtained by calling (202) 720–8958.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Animal and Plant Health Inspection Service

Title: Pale Cyst Nematode.

OMB Control Number: 0579–0322.

Summary of Collection: Under the Plant Protection Act (7 U.S.C. 7701–7772), the Secretary of Agriculture is authorized to prohibit or restrict the importation, entry, or movement of plants and plant pests to prevent the introduction of plant pests into the United States or their dissemination within the United States. APHIS' ''Domestic Quarantine Notices'' in 7 CFR 301, ''Potato Cyst Nematode'' (§§ 301.86 through 301.86.9) requires quarantining parts of Bingham and Bonneville counties, ID; due to the discovery of the potato cyst nematode (PCN) and establishes restrictions on the

interstate movement of regulated articles from the quarantined area. This action is necessary to prevent the spread of the PCN via potatoes, soil, and other host material to non-infested areas of the United States.

Need and Use of the Information: APHIS will collect information using certificates, limited permits, compliance agreements, self-certification, appeal of withdrawn certificate or limited permit, appeal of withdrawn compliance agreement, and labeling to prevent the spread of PCN and to ensure that regulated articles can be moved safely from the quarantined area without spreading PCN. If APHIS did not collect this information, the spread of PCN in the United States could result in a loss of United States potatoes and other commodities from domestic and/or foreign markets.

Description of Respondents: Farms; Business or other for-profit.

Number of Respondents: 123.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 445.

Ruth Brown,

Departmental Information Collection Clearance Officer.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Forest Service

Establishment of Divided Mountain Purchase Unit, Grayson County, Virginia

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: On September 26, 2017 the Under Secretary of Natural Resources and the Environment created the Divided Mountain Unit. This purchase unit comprises 112.3 acres within Grayson County, Virginia. A legal description of lands within the purchase unit appears at the end of this notice.

APPLICABLE DATE: The Forest Service established this purchase unit on September 26, 2017.

ADDRESSES: A copy of the map showing the purchase unit is on file and available for public inspection in the Office of the Director, Lands Staff, First Floor-Southeast, Sidney R. Yates Federal Building, Forest Service, USDA, 201 14th Street SW, Washington, DC 20250, between the hours of 8:30 a.m. and 4:30 p.m. on business days. Those wishing to inspect the map are encouraged to call ahead to (202) 205–1248 to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Kevin Heikkila, Acting Director of Lands and Realty Management, by phone at 202–205–2818. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION: The Divided Mountain Project, legally described below, will provide additional road access into Cherokee National Forest and additional access to Pond Mountain State Game Lands. State game lands allow for recreational opportunities such as hiking, fishing, hunting, and cross country skiing. Acquisition of the Divided Mountain Tract will provide opportunities to extend these activities into the National Forest while conserving high-elevation open space, mitigating wildfire risks, protecting streams and water quality, and protecting the nearby Rogers Ridge Scenic Area viewshed.

All that tract or parcel of land lying and being situated in the Wilson Magisterial District of Grayson County, Virginia, being described as Tax Map No. 60–A–1A, being the same tract conveyed to The Conservation Fund by Warranty Deed signed September 16, 2016, and recorded on September 23, 2016, in Deed Book 599, Pages 589–591 Grayson County, Virginia Circuit Court Clerk Office; this Tract is identified as the portion of United States of America Tract U–1601 situated in Virginia. Bounded on the West by the Tennessee State Line (USA Tract U–1601), on the North by Robert Russell, on the East by Joseph Dalia, and on the South by the North Carolina State Line;

Bearings are oriented to Tennessee State Plane grid north,

Beginning on *Corner 1 of USA Tract U–1601,* the common corner to the States of Tennessee, Virginia and North Carolina, which is also Corner 1 of USA Tract U–137, being monumented by a brass disk in a large rock;

Thence with the Tennessee State Line (USA Tract U–1601), one (1) line;

1. *N 48°16′35″ E, 2766.22 feet* to *Corner 4 of USA Tract U–1601,* a standard Forest Service Monument situated in the Tennessee and Virginia State Line common to the lands of Russell;

Thence with the lands of Robert Russell, one (1) line;

1. *S 72°28′26″ E, 1204.95 feet* to *Corner 5 of USA Tract U–1601,* a standard Forest Service Monument common to the lands of Russell and Dalia;

Thence with the lands of Joseph Dalia, one (1) line;

1. *S 29°24′20″ E, 1962.76 feet* to *Corner 6 of USA Tract U–1601,* a standard Forest Service Monument situated in the Virginia and North Carolina State Line, common to the lands of Dalia;

Thence with the North Carolina State Line, *N 86°49′30″ W, 4183.72 feet* to *Corner 1 of USA Tract U–1601,* the POINT OF BEGINNING, containing 112.304 acres more or less, with the bearings, distances and acres here described being as shown on the plat of survey titled ''PROPERTY OF LOWELL K. HENSLEY AND BERNICE HENSLEY TO BE CONVEYED TO THE CONSERVATION FUND'' as drawn by Addison Surveyors recorded in Deed Book 599, page 591 Grayson County, Virginia Circuit Court Clerk Office.

End of Description

Dated: July 13, 2018.

Gregory C. Smith,

Acting Associate Deputy Chief, National Forest System, U.S. Forest Service.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

National Institute of Food and Agriculture

Notice of Intent To Extend a Currently Approved Information Collection

AGENCY: National Institute of Food and Agriculture, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and Office of Management and Budget (OMB) regulations, this notice announces the National Institute of Food and Agriculture (NIFA) intention to request approval for an extension of the currently approved information collection for the NIFA proposal review process.

DATES: Written comments on this notice must be received by October 1, 2018, to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Written comments concerning this notice and requests for copies of the information collection may be submitted by any of the following methods: Email: *rmartin.usda.gov;* Fax: 202–720–0857; Mail: Office of Information Technology (OIT), NIFA, USDA, STOP 2216, 1400 Independence

Avenue SW, Washington, DC 20250–2216.

FOR FURTHER INFORMATION CONTACT: Robert Martin, eGovernment Program Leader; Phone Number: 202–445–5388; Email: *rmartin@nifa.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: NIFA Proposal Review Process.

OMB Number: 0524–0041.

Expiration Date of Current Approval: 10/31/2018.

Type of Request: Extension of a currently approved information collection for three years.

Abstract: The National Institute of Food and Agriculture (NIFA) is responsible for performing a review of proposals submitted to NIFA competitive award programs in accordance with section 103(a) of the Agricultural Research, Extension, and Education Reform Act of 1998, 7 U.S.C. 7613(a). Reviews are undertaken to ensure that projects supported by NIFA are of high quality, and are consistent with the goals and requirements of the funding program.

Proposals submitted to NIFA undergo a programmatic evaluation to determine worthiness of Federal support. The evaluations consist of a peer panel review and may also entail an assessment by Federal employees and electronically submitted (ad-hoc) reviews in the Peer Review System.

Need and Use of the Information: The information collected from the evaluations is used to support NIFA grant programs. NIFA uses the results of the proposal evaluation to determine whether a proposal should be declined or recommended for award. When NIFA has rendered a decision, copies of reviews, excluding the names of the reviewers, and summaries of review panel deliberations, if any, are provided to the submitting Project Director.

Given the highly technical nature of many of these proposals, the quality of the peer review greatly depends on the appropriate matching of the subject matter of the proposal with the technical expertise of the potential reviewer. In order to obtain this information, an electronic questionnaire is used to collect information about potential panel and ad-hoc reviewers. If the reviewer is already in our database, the questionnaire asks potential reviewers to update their basic biographical information including address, contact information, professional expertise, and their availability to review for NIFA in the future. If the reviewer is new, they are prompted to complete the questionnaire. This information has been invaluable in the NIFA review process, which has been recognized by the grantee and grantor community for its quality.

The applications and associated materials made available to reviewers, as well as the discussions that take place during panel review meetings are strictly confidential and are not to be disclosed to or discussed with anyone who has not been officially designated to participate in the review process. While each panelist certifies at the time of preparing a review they do not have a conflict-of-interest with a particular application and will maintain its confidentiality in the Peer Review System, a certification of their intent at the time of the panel review proceedings is collected to emphasize and reinforce confidentiality not only of applications and reviews but also panel discussions. On the Conflict-of-Interest and Confidentiality Certification Form, the panelist affirms they understand the conflict-of-interest guidelines and will not be involved in the review of the application(s) where a conflict exists. The panelist also affirms their intent to maintain the confidentiality of the panel process and not disclose to another individual any information related to the peer review or use any information for personal benefit.

Estimate of Burden: NIFA estimates that anywhere from one hour to twenty hours may be required to review a proposal. It is estimated that approximately five hours are required to review an average proposal. Each proposal receives an average of four reviews, accounting for an annual burden of 20 hours. NIFA estimates it receives 4,600 competitive applications each year. The total annual burden on reviewers is 92,000 hours. NIFA estimates that the potential reviewer questionnaire takes an estimated 10 minutes to complete. The database consists of approximately 50,000 reviewers. The total annual burden of questionnaire is 8,330 hours. NIFA estimates that the potential Conflict-of-Interest and Confidentiality Certification Form takes an estimated 10 minutes to complete. The agency has approximately 1,000 panelists each year. The total annual burden of the certification form is 167 hours. The total annual burden of the component of the entire review process is 100,497 hours.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request to OMB for approval. All comments will become a matter of public record.

Done in Washington, DC, on July 24, 2018.

Thomas Shanower,

Acting Director, National Institute of Food and Agriculture.

BILLING CODE 3410–22–P

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Scientific Advisory Committee Public Meeting

AGENCY: Bureau of the Census, Department of Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Bureau of the Census (Census Bureau) is giving notice of a meeting of the Census Scientific Advisory Committee (CSAC). The Committee will address policy, research, and technical issues relating to a full range of Census Bureau programs and activities, including communications, decennial, demographic, economic, field operations, geographic, information technology, and statistics. The CSAC will meet in a plenary session on September 13–14, 2018. Last minute changes to the schedule are possible, which could prevent giving advance public notice of schedule adjustments. Please visit the Census Advisory Committees website for the most current meeting agenda at: *http://www.census.gov/cac/.* The meeting will be available via webcast at: *https://www.census.gov/newsroom/census-live.html.* Topics of discussion will include:

- 2020 Census Program Update
- 2018 End-to-End Test Update
- Administrative Records Update
- Efforts to Modernize Disclosure Limitation Update

DATES: September 13–14, 2018. On Thursday, September 13, the meeting will begin at 8:30 a.m. and end at approximately 5:00 p.m. On Friday, September 14, the meeting will begin at 8:30 a.m. and end at approximately 2:00 p.m.

ADDRESSES: The meeting will be held at the U.S. Census Bureau Auditorium, 4600 Silver Hill Road, Suitland, Maryland 20746.

FOR FURTHER INFORMATION CONTACT: Tara Dunlop Jackson, Branch Chief for Advisory Committees, Customer Liaison and Marketing Services Office, *census.scientific.advisory.committee@census.gov,* Department of Commerce, U.S. Census Bureau, Room 8H177, 4600 Silver Hill Road, Washington, DC 20233, telephone 301–763–5222. For TTY callers, please use the Federal Relay Service 1–800–877–8339.

SUPPLEMENTARY INFORMATION: The CSAC members are appointed by the Director, U.S. Census Bureau. The Committee provides scientific and technical expertise, as appropriate, to address Census Bureau program needs and objectives. The Committee has been established in accordance with the Federal Advisory Committee Act (Title 5, United States Code, Appendix 2, Section 10).

All meetings are open to the public. A brief period will be set aside at the meeting for public comment on September 14. However, individuals with extensive questions or statements must submit them in writing by email *census.scientific.advisory.committee@census.gov* (subject line ''September 2018 CSAC Meeting Public Comment'') or by letter to Tara Dunlop Jackson, Committee Liaison Officer, Department of Commerce, U.S. Census Bureau, Room 8H177, 4600 Silver Hill Road, Washington, DC 20233.

If you plan to attend the meeting, please register by Monday, September 10, 2018. You may access the online registration from the following link: *https://www.regonline.com/csac_meeting_sep2018.* Seating is available to the public on a first-come, first-served basis.

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should also be directed to the Committee Liaison Officer as soon as known, and preferably two weeks prior to the meeting.

Please call 301–763–9906 upon arrival at the Census Bureau on the day of the meeting. A photo ID must be presented in order to receive your visitor's badge. Visitors are not allowed beyond the first floor.

Dated: July 24, 2018.

Ron S. Jarmin,

Associate Director for Economic Programs, Performing the Non-Exclusive Functions and Duties of the Director, Bureau of the Census.

Certain Frozen Warmwater Shrimp From Thailand: Rescission of Antidumping Duty Administrative Review; 2017–2018

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty order on certain frozen warmwater shrimp (shrimp) from Thailand for the period February 1, 2017, through January 31, 2018, based on the timely withdrawal of all requests for review.

DATES: Applicable July 31, 2018.

FOR FURTHER INFORMATION CONTACT: Alice Maldonado, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4682.

SUPPLEMENTARY INFORMATION:

Background

On February 1, 2018, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on shrimp from Thailand for the period February 1, 2017, through January 31, 2018.[1] In February 2018, Commerce received timely requests, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), to conduct an administrative review of this antidumping duty order from the Ad Hoc Shrimp Trade Action Committee (the petitioner), the American Shrimp Processors Association (ASPA), and certain individual companies.[2] Based upon these requests, on April 16, 2017, in accordance with section 751(a) of the Act, Commerce published in the **Federal Register** a notice of initiation listing 160 companies for which Commerce received timely requests for review.[3]

In July 2018, all parties timely withdrew their requests for an administrative review.[4]

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if a party who requested the review withdraws the request within 90 days of the date of publication of notice of initiation of the requested review. As noted above, all parties withdrew their requests for review by the 90-day deadline. Accordingly, we are rescinding the administrative review of the antidumping duty order on frozen warmwater shrimp from Thailand covering the period February 1, 2017, through January 31, 2018.

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 15 days after publication of this notice in the **Federal Register**.

Notification to Importers

This notice serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the return or

Laminated Woven Sacks From the Socialist Republic of Vietnam: Postponement of Preliminary Determination in the Less-Than-Fair-Value Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable July 31, 2018.

FOR FURTHER INFORMATION CONTACT: Drew Jackson or Celeste Chen, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4406 or (202) 482–0890, respectively.

SUPPLEMENTARY INFORMATION:

Background

On March 27, 2018, the Department of Commerce (Commerce) initiated a less-than-fair-value (LTFV) investigation of imports of laminated woven sacks (LWS) from the Socialist Republic of Vietnam (Vietnam).[1] Currently, the preliminary determination is due no later than August 14, 2018.

Postponement of Preliminary Determination

Section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), requires Commerce to issue the preliminary determination in a LTFV investigation within 140 days after the date on which Commerce initiated the investigation. However, section 733(c)(1)(A)(b)(1) of the Act permits Commerce to postpone the preliminary determination until no later than 190 days after the date on which Commerce initiated the investigation if: (A) The petitioner makes a timely request for a postponement; or (B) Commerce concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination. Under 19 CFR 351.205(e), the petitioner must submit a request for postponement 25 days or more before the scheduled date of the preliminary determination and must state the reasons for the request. Commerce will grant the request unless it finds compelling reasons to deny the request.

On July 17, 2018, the petitioners [2] submitted a timely request that Commerce postpone the preliminary determination in the LTFV investigation.[3] The petitioners stated that they request postponement ''because the initial questionnaire responses submitted by the respondents in this investigation are substantially deficient, and it may not be possible for {Commerce} to obtain usable corrected responses within the current schedule.'' [4]

For the reasons stated above, and because there are no compelling reasons to deny the request, Commerce, in accordance with section 733(c)(1)(A) of the Act, is postponing the deadline for the preliminary determination by 50 days (*i.e.,* 190 days after the date on which this investigations was initiated). As a result, Commerce will issue its preliminary determination no later than October 3, 2018. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determination of this investigation will continue to be 75 days after the date of the preliminary determination, unless postponed at a later date.

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: July 25, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Certain Frozen Fish Fillets From the Socialist Republic of Vietnam: Notice of Court Decisions Not in Harmony With Final Results of Administrative Review and Notice of Amended Final Results of Antidumping Duty Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On May 24, 2018, the United States Court of International Trade (Court) issued final judgments in *Vinh Hoan Corporation et al.* v. *United States,* Consol. Court No. 13–00156, sustaining the Department of Commerce's (Commerce) remand results for the eighth administrative review of the antidumping duty order on certain frozen fish fillets from the Socialist Republic of Vietnam (Vietnam) covering the period of review (POR) August 1, 2010, through July 31, 2011. Commerce is notifying the public that the Court's final judgment is not in harmony with Commerce's final results of the administrative review, and that Commerce is amending the final results with respect to certain exporters.

DATES: Applicable June 3, 2018.

FOR FURTHER INFORMATION CONTACT: Javier Barrientos, AD/CVD Operations Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2243.

SUPPLEMENTARY INFORMATION:

Background

[2] *See Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Amended Final Results of Antidumping Duty Administrative Review;* 2010–

al.[3] and the petitioners [4] timely filed complaints with the Court and challenged certain aspects of the *AR8 Amended Final Results.* On February 19, 2015, the Court remanded Commerce's *AR8 Amended Final Results.*[5]

In the first remand, in accordance with the Court's instructions, Commerce reconsidered its selection of the surrogate country, and the selection of certain surrogate values (SVs), *i.e.,* whole live *pangasius* fish, surrogate financial statements, various by-products and several other SVs, as they relate to the selection of the surrogate country.[6] Additionally, and in accordance with the Court's instructions, Commerce made changes to Vinh Hoan Corporation's [7] (Vinh Hoan) margin calculation, specifically, by adjusting the denominators for Vinh Hoan's factors of production (FOPs) to exclude water weight, and adjusting the consignment expense for certain sales. Commerce made changes to the margin calculations of Vinh Hoan, Anvifish Joint Stock Company (Anvifish) and the separate rate respondents' margins to account for a small change in the whole live fish SV. Also, at Commerce's request, the Court granted Commerce a voluntary remand to reconsider the calculation of the cap applied to Vinh Hoan's fish oil by-product offset.

On May 26, 2016, the Court remanded Commerce's First Remand Results.[8] In the second remand, in accordance with the Court's instructions, Commerce reconsidered its selection of the sawdust and rice husk SVs, provided further explanation concerning the cap to the fish oil by-product offset, and discussed the use of the absolute value of by-products in the margin calculation.[9] The Court upheld our findings on these issues, except one, the fish oil by-product offset.[10]

On July 10, 2017, the Court remanded Commerce's Second Remand Results.[11] In the third remand, in accordance with the Court's instructions, Commerce provided further explanation with respect to the calculated fish oil by-product offset and its superiority with respect to the other fish oil SVs on the record.[12] On September 22, 2017, Commerce filed the Third Remand Results with the Court. On May 24, 2018, the Court upheld the Third Remand Results.

As a result of the AR8 Remand Results,[13] there are calculation changes. After accounting for all such changes and issues in the AR8 Remand Results, the resulting antidumping margin for Vinh Hoan is $0.13 per kilogram and $2.39 per kilogram for Anvifish. Because Vinh Hoan's and Anvifish's margins changed, their weighted average also becomes the margin ($1.28 per kilogram) for those companies not individually examined but receiving a separate rate. On May 24, 2018, the Court sustained the AR8 Remand Results.[14]

Consistent with the decision of the United States Court of Appeals for the Federal Circuit (CAFC) in *Timken Co.* v. *United States,* 893 F.2d 337 (Fed. Cir. 1990) (*Timken*), as clarified by *Diamond Sawblades Mfrs. Coalition* v. *United States,* 626 F.3d 1374 (Fed. Cir. 2010) (*Diamond Sawblades*), Commerce is notifying the public that the final judgment in this case is not in harmony with Commerce's final results of the antidumping duty administrative review of the antidumping duty order on fish fillets from Vietnam covering the POR. Thus, Commerce is amending the *AR8 Amended Final Results* with respect to the weighted-average dumping margins for Vinh Hoan, Anvifish and the separate rate respondents.[15]

Timken Notice

In its decision in *Timken,* 893 F.2d at 341, as clarified by *Diamond Sawblades,* the CAFC held that, pursuant to section 516A(e) of the Tariff Act of 1930, as amended (Act), Commerce must publish a notice of a court decision that is not ''in harmony'' with a Commerce determination and must suspend liquidation of entries pending a ''conclusive'' court decision. The Court's May 24, 2018, judgment sustaining the AR8 Remand constitutes a final decision of the Court that is not in harmony with Commerce's *AR8 Amended Final Results.* This notice is published in fulfillment of the publication requirement of *Timken.*

Amended Final Results

Because there is now a final court decision, Commerce is amending the *AR8 Amended Final Results* with respect to Vinh Hoan, Anvifish and the separate rate respondents. The revised weighted-average dumping margins for these exporters during the period August 1, 2010, through July 31, 2011, are as follows:

2011, 78 FR 29323 (May 20, 2013) (*AR8 Amended Final Results*) and accompanying Ministerial Error Memorandum.

[3] These include Vinh Hoan, the Vietnam Association of Seafood Exporters and Producers, Binh An Seafood Joint Stock Company (Binh An), Anvifish and Vinh Quang Fisheries Corporation (Vinh Quang).

NTSF Seafoods Joint Stock Company	1.28
QVD Food Company Ltd [18]	1.28
Saigon Mekong Fishery Co., Ltd	1.28
Southern Fisheries Industries Company Ltd	1.28
Vinh Quang Fisheries Corporation	1.28

Accordingly, Commerce will continue the suspension of liquidation of the subject merchandise pending the expiration of the period of appeal or, if appealed, pending a final and conclusive court decision. In the event the Court's ruling is not appealed or, if appealed, upheld by the CAFC, Commerce will instruct U.S. Customs and Border Protection to assess antidumping duties on unliquidated entries of subject merchandise exported by the companies mentioned above using the assessment rate calculated by Commerce in the AR8 Remand Results and listed above.

Cash Deposit Requirements

Unless the applicable cash deposit rates have been superseded by cash deposit rates calculated in an intervening administrative review of the AD order on frozen fish fillets from Vietnam, Commerce will instruct U.S. Customs and Border Protection to require a cash deposit for estimated AD duties at the rate noted above for each specified exporter and producer combination, for entries of subject merchandise, entered or withdrawn from warehouse, for consumption, on or after June 3, 2018.

[16] This rate is applicable to the Vinh Hoan Group which includes: Vinh Hoan, Van Duc, and VDTG.

[17] Includes the trade name Anvifish Co., Ltd.

[18] This rate is also applicable to QVD Dong Thap Food Co., Ltd. (Dong Thap) and Thuan Hung Co., Ltd. (THUFICO). In the second review of this order, Commerce found QVD, Dong Thap and THUFICO to be a single entity, and because there has been no evidence submitted on the record of this review that calls this determination into question, we continue to find these companies to be part of a single entity. Therefore, we will assign this rate to the companies in the single entity. *See Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Preliminary Results of Antidumping Duty Administrative Review,* 71 FR 53387 (September 11, 2006).

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(e), 751(a)(1), and 777(i)(1) of the Act.

Dated: July 20, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

Glycine From the People's Republic of China: Rescission of Antidumping Duty Administrative Review; 2017–2018

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty order on glycine from the People's Republic of China (China) for the period March 1, 2017, through February 28, 2018, based on the timely withdrawal of the request for review.

DATES: Applicable July 31, 2018.

FOR FURTHER INFORMATION CONTACT: Edythe Artman or John Drury, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3931 or (202) 482–0195, respectively.

SUPPLEMENTARY INFORMATION:

Background

On March 5, 2018, Commerce published a notice of opportunity to request an administrative review of the antidumping duty order on glycine from China in the **Federal Register.** The period of review covers March 1, 2017, through February 28, 2018.[1] On March 30, 2018, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.213(b), Commerce received a timely request from GEO Specialty Chemicals, Inc. (GEO), a domestic producer of glycine, to conduct an administrative review of the order with respect to entries of subject merchandise made by Kumar Industries, Rudraa International, Salvi Chemical Industries, Avid Organics Pvt. Ltd., and Baoding Mantong Fine Chemistry Co., Ltd.[2] On May 2, 2018, pursuant to this request, in accordance with section 751(a) of the Act and 19 CFR 351.221(c)(1)(i), we initiated a review of those companies.[3] On May 30, 2018, GEO filed a timely withdrawal of its request of review for each of the five companies.[4] No other party requested an administrative review of this order.

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if the party that requested the review withdraws the

[1] *See Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity to Request Administrative Review,* 83 FR 9284 (March 5, 2018).

[2] See GEO's Request for Review, dated March 30, 2018.

[3] *See Initiation of Antidumping and Countervailing Duty Administrative Reviews,* 83 FR 19215 (May 2, 2018).

[4] *See* Withdrawal of Request for Administrative Review, dated May 30, 2018.

request within 90 days of the date of publication of the notice of initiation of the requested review. As noted above, GEO withdrew its request for review by the 90-day deadline and no other party requested an administrative review of the antidumping duty order. Accordingly, we are rescinding the administrative review of the antidumping duty order on glycine from China for the period

March 1, 2017, through February 28, 2018, in its entirety, in accordance with 19 CFR 351.213(d)(1).

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries of glycine from China. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 15 days after the date of publication of this notice in the **Federal Register**.

Notification to Importers

This notice serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: July 23, 2018.

James Maeder,

Associate Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, performing the duties of Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

Certain Frozen Fish Fillets From the Socialist Republic of Vietnam: Notice of Court Decisions Not in Harmony With Final Results of Administrative Review and Notice of Amended Final Results of Antidumping Duty Administrative Review

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: On May 24, 2018, the United States Court of International Trade (Court) issued final judgments in *An Giang Fisheries Import and Export Joint Stock Company et al.* v. *United States,* Consol. Court No. 14–00109, sustaining the Department of Commerce's (Commerce) remand results for the ninth administrative review of the antidumping duty order on certain frozen fish fillets from the Socialist Republic of Vietnam (Vietnam) covering the period of review (POR) August 1, 2011, through July 31, 2012. Commerce is notifying the public that the Court's final judgment is not in harmony with Commerce's final results of the administrative review, and that Commerce is amending the final results with respect to certain exporters.

DATES: Applicable June 3, 2018.

FOR FURTHER INFORMATION CONTACT: Javier Barrientos, AD/CVD Operations Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2243.

SUPPLEMENTARY INFORMATION:

Background

On April 7, 2014, Commerce issued its *AR9 Final Results*.[1] On July 2, 2014, Commerce issued its *AR9 Amended Final Results*.[2] Agifish et al.[3] and the petitioners[4] timely filed complaints with the Court and challenged certain aspects of the *AR9 Amended Final Results*. On June 7, 2015, the Court remanded Commerce's *AR9 Amended Final Results*.[5]

In the first remand, in accordance with the Court's instructions, Commerce reconsidered its selection of the surrogate value (SV) for rice husk and provided further explanation concerning the cap to the fish oil by-product offset in Vinh Hoan Corporation's[6] margin calculation.[7] Additionally, and in accordance with the Court's instructions, Commerce made changes to Vinh Hoan's margin calculation, specifically, by adjusting the denominators for Vinh Hoan's factors of production (FOPs) to exclude water weight, and subsequently recalculating Vinh Hoan's net U.S. price of sales for subject merchandise on a net weight basis exclusive of water weight.[8] The Court upheld our findings on all but one of these issues, *i.e.,* the fish oil by-product offset.[9]

On July 10, 2017, the Court remanded Commerce's First Remand Results.[10] In the second remand, in accordance with the Court's instructions, Commerce provided further explanation with respect to the calculated fish oil by-

[2] *See Amended Final Results of Antidumping Duty Administrative Review; 2010–2011,* 79 FR 37714 (July 2, 2014) (*AR9 Amended Final Results*) and accompanying Ministerial Error Memorandum.

[3] These include An Giang Fisheries Import and Export Joint Stock Company, Asia Commerce Fisheries Joint Stock Company, Cuu Long Fish Joint Stock Company, Hiep Thanh Seafood Joint Stock Company, International Development and Investment Corporation, NTSF Seafoods Joint Stock Company, QVD Food Company Ltd., Southern Fishery Industries Company, Ltd., and Vinh Hoan Corporation (collectively Agifish et al.).

[4] Catfish Farmers of America and the following individual U.S. catfish processors: America's Catch, Consolidated Catfish Companies, LLC dba Country Select Catfish, Delta Pride Catfish, Inc., Harvest Select Catfish, Inc., Heartland Catfish Company, Pride of the Pond, and Simmons Farm Raised Catfish, Inc. (collectively, the petitioners).

[5] *See An Giang Fisheries Import and Export Joint Stock Company et al.* v. *United States,* Court No. 14–00109, Slip Op. 16–55 (CIT June 7, 2016).

[6] Vinh Hoan was one of two mandatory respondents selected by Commerce. (Vinh Hoan) includes Vinh Hoan Corporation and its affiliates Van Duc Food Export Joint Company and Van Duc Tien Giang (VDTG).

[7] *See* Final Results of Redetermination Pursuant to *An Giang Fisheries Import and Export Joint Stock Company et al.* v. *United States,* Consol. Court No. 14–00109, and Slip Op. 16–55, dated February 9, 2017 (First Remand Results).

[8] *Id.*

[9] *See An Giang Fisheries Import and Export Joint Stock Company et al.* v. *United States,* Consol. Court No. 14–00109, Slip Op. 17–00082 (July 10, 2017) (*An Giang Fisheries*).

[10] *See Vinh Hoan Corporation et al.* v. *United States,* Court No. 14–00109, Slip Op. 17–82 (CIT July 10, 2017).

product offset and its superiority as compared to the other fish oil SVs on the record.[11] On September 22, 2017, Commerce filed the Second Remand Results with the Court.

As a result of the AR9 Remand Results,[12] there are calculation changes. After accounting for all such changes and issues in the AR9 Remand Results, the resulting antidumping duty margin for Vinh Hoan is *de minimis.* Because Vinh Hoan's margin is now *de minimis,* Agifish's margin (unchanged) becomes the margin ($1.20 per kilogram) for those companies not individually examined but receiving a separate rate. On May 24, 2018, the Court sustained the AR9 Remand Results.[13]

Consistent with the decision of the United States Court of Appeals for the Federal Circuit (CAFC) in *Timken Co.* v. *United States,* 893 F.2d 337 (Fed. Cir. 1990) (*Timken*), as clarified by *Diamond Sawblades Mfrs. Coalition* v. *United States,* 626 F.3d 1374 (Fed. Cir. 2010) (*Diamond Sawblades*), Commerce is notifying the public that the final judgment in this cases is not in harmony with Commerce's final results of the antidumping duty administrative review of the antidumping duty order on fish fillets from Vietnam covering the POR. Thus, Commerce is amending the *AR9 Amended Final Results* with respect to the weighted-average dumping margins for Vinh Hoan, and the separate rate respondents.[14]

Timken Notice

In its decision in *Timken,* 893 F.2d at 341, as clarified by *Diamond Sawblades,* the CAFC held that, pursuant to section 516A(e) of the Tariff Act of 1930, as amended (Act), Commerce must publish a notice of a court decision that is not ''in harmony'' with a Commerce determination and must suspend liquidation of entries pending a ''conclusive'' court decision. The Court's May 24, 2018, judgment sustaining the AR9 Remand constitutes a final decision of the Court that is not in harmony with Commerce's *AR9 Amended Final Results.* This notice is published in fulfillment of the publication requirement of *Timken.*

Amended Final Results

Because there is now a final court decision, Commerce is amending the *AR9 Amended Final Results* with respect to Vinh Hoan, and the separate rate respondents. The revised weighted-average dumping margins for these exporters during the period August 1, 2011, through July 31, 2012, are as follows:

Exporter name	Weighted-average dumping margin (dollars per kilogram)
Vinh Hoan Corporation[15]	0.00
Hung Vuong Group[16]	1.20
An My Fish Joint Stock Company	1.20
Anvifish Joint Stock Company[17]	1.20
Asia Commerce Fisheries Joint Stock Company	1.20
Binh An Seafood Joint Stock Company	1.20

QVD Food Company Ltd.[20]	1.20
Saigon Mekong Fishery Co., Ltd	1.20
Seafood Joint Stock Company No.4 Branch Dongtam Fisheries Processing Company	1.20
Southern Fisheries Industries Company Ltd	1.20
Sunrise Corporation	1.20
Thien Ma Seafood Co., Ltd	1.20
To Chau Joint Stock Company	1.20
Viet Phu Food & Fish Corporation	1.20
Vinh Quang Fisheries Corporation	1.20

[11] *See* Final Results of Redetermination Pursuant To Court Remand, Consol. Court No. 14–00109, Slip Op. 17–00082 (CIT July 10, 2017), dated September 22, 2017, (Second Remand Results).

[12] *See* First Remand Results and Second Remand Results (collectively, AR9 Remand Results).

[13] *See An Giang Fisheries Import and Export Joint Stock Company et al.* v. *United States,* Consol. Court No. 14–109, Slip Op. 18–60 (CIT May 24, 2018).

[14] These include: An My Fish Joint Stock Company; Anvifish Joint Stock Company; Asia Commerce Fisheries Joint Stock Company; Binh An Seafood Joint Stock Company; Cadovimex II Seafood Import-Export and Processing Joint Stock Company; Cantho Import-Export Seafood Joint Stock Company; Cuu Long Fish Import-Export Corporation; Cuu Long Fish Joint Stock Company; East Sea Seafoods Limited Liability Company; Green Farms Seafood Joint Stock Company; Hiep Thanh Seafood Joint Stock Company; Hoa Phat Seafood Import-Export and Processing JSC; International Development & Investment Corporation; NTSF Seafoods Joint Stock Company; QVD Food Company Ltd.; Saigon Mekong Fishery Co., Ltd.; Seafood Joint Stock Company No.4 Branch Dongtam Fisheries Processing Company; Southern Fisheries Industries Company Ltd.; Sunrise Corporation; Thien Ma Seafood Co., Ltd.; To Chau Joint Stock Company; Viet Phu Food & Fish Corporation; and Vinh Quang Fisheries Corporation (collectively, separate rate respondents).

[15] This rate is applicable to the Vinh Hoan Group which includes: Vinh Hoan, Van Duc, and VDTG.

[16] This rate is applicable to the Hung Vuong Group, which includes: An Giang Fisheries Import and Export Joint Stock Company, Asia Pangasius Company Limited, Europe Joint Stock Company, Hung Vuong Joint Stock Company, Hung Vuong Mascato Company Limited, Hung Vuong—Vinh Long Co., Ltd., and Hung Vuong—Sa Dec Co., Ltd.

[17] Includes the trade name Anvifish Co., Ltd., and Anvifish JSC.

[18] Includes the trade name CL Panga Fish.

[19] Includes the trade names East Sea Seafoods LLC and ESS.

[20] This rate is also applicable to QVD Dong Thap Food Co., Ltd. (Dong Thap) and Thuan Hung Co., Ltd. (THUFICO). In the second review of this order, Commerce found QVD, Dong Thap and THUFICO to be a single entity, and because there has been no evidence submitted on the record of this review that calls this determination into question, we continue to find these companies to be part of a single entity. Therefore, we will assign this rate to the companies in the single entity. *See Certain Frozen Fish Fillets from the Socialist Republic of Vietnam: Preliminary Results of Antidumping Duty Administrative Review,* 71 FR 53387 (September 11, 2006).

Accordingly, Commerce will continue the suspension of liquidation of the subject merchandise pending the expiration of the period of appeal or, if appealed, pending a final and conclusive court decision. In the event the Court's ruling is not appealed or, if appealed, upheld by the CAFC, Commerce will instruct U.S. Customs and Border Protection to assess antidumping duties on unliquidated entries of subject merchandise exported by the companies identified above using the assessment rate calculated by Commerce in the AR9 Remand Results and listed above.

Cash Deposit Requirements

Unless the applicable cash deposit rates have been superseded by cash deposit rates calculated in an intervening administrative review of the AD order on frozen fish fillets from Vietnam, Commerce will instruct U.S. Customs and Border Protection to require a cash deposit for estimated AD duties at the rate noted above for each specified exporter and producer combination, for entries of subject merchandise, entered or withdrawn from warehouse, for consumption, on or after June 3, 2018.

Notification to Interested Parties

This notice is issued and published in accordance with sections 516A(e), 751(a)(1), and 777(i)(1) of the Act.

Dated: July 25, 2018.

Gary Taverman,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations performing the non-exclusive functions and duties of the Assistant Secretary for Enforcement and Compliance.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XG377

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will hold a four-day meeting to consider actions affecting the Gulf of Mexico fisheries in the exclusive economic zone (EEZ).

DATES: The meeting will be held on Monday, August 20 through Thursday, August 23, 2018.

ADDRESSES: The meeting will take place at the Omni Corpus Christi hotel located at 900 N. Shoreline Boulevard, Corpus Christi, TX 78401; telephone: (361) 887–1600.

Council address: Gulf of Mexico Fishery Management Council, 4107 W. Spruce Street, Suite 200, Tampa, FL 33607; telephone: (813) 348–1630.

FOR FURTHER INFORMATION CONTACT: Dr. Carrie Simmons, Executive Director, Gulf of Mexico Fishery Management Council; telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION:

Agenda

Monday, August 20, 2018; 8:30 a.m.–5:15 p.m.

The Coral Committee will receive an update on the Flower Garden Banks National Marine Sanctuary Expansion; discuss Final Action: Abbreviated Framework Action—Clarification of Fishing in Habitat Area Particular Concerns (HAPCs); and, receive an update on the Coral Reef Conservation Program Grant. The Sustainable Fisheries Committee will review a Draft Abbreviated Framework Action: Conversion of Historical Captain Endorsements to Federal For-Hire Permits; and, review of Senate Bill S. 3138—A Bill to Establish a Regulatory System for Marine Aquaculture in the United States Exclusive Economic Zone (EEZ).

After lunch, the Mackerel Committee will convene to discuss the Coastal Migratory Pelagics (CMP) Landings Update; receive an update on Cobia catch per unit effort (CPUE) Indices and Scientific and Statistic Committee (SSC) recommendations; and, review Options: CMP Framework Amendment 7—Modifications to Gulf Cobia Size and Possession Limits. The Gulf SEDAR Committee will receive an overview of the revised SEDAR process; and review and finalize the 2020 and 2021 Gulf SEDAR Schedule. The Shrimp Committee will receive an update on Council request regarding shrimp effort threshold reduction in the area monitored for juvenile red snapper bycatch and SSC recommendations. The Spiny Lobster Committee will review and discuss the Spiny Lobster Landings and review Final Action: Spiny Lobster Amendment 13—Modifications to the Spiny Lobster Gear Requirements and Cooperative Management Procedures.

Tuesday, August 21, 2018; 8:30 a.m.–5:30 p.m.

The Reef Fish Management Committee will convene and review the Reef Fish Landings; review Final Action: Framework Action to Modify Red Snapper Acceptable Catch Limits (ACL) and Acceptable Catch Targets (ACT) and Gulf Hogfish ACLs. The committee will also review Draft Amendment 36B—Modifications to Commercial Individual Fishing Quota (IFQ) Programs and Final Action: Modification to the Recreational Red Snapper ACT Buffers. After lunch, the committee will discuss the Gulf of Mexico Allocation Review Triggers; compare the Council's Allocation Policy with National Marine Fisheries Service (NMFS) Allocation Review Policy; review Scoping Document: Reallocation of the Red Snapper ACL and the revised Draft Amendment 50: State Management Program for Recreational Red Snapper and Individual State Amendments.

Wednesday, August 22, 2018; 8:30 a.m.–5 p.m.

The Reef Fish Committee will receive a presentation on the Great Red Snapper Count; and review the Scientific and Statistical Committee (SSC) Summary Report. The Data Committee will review the Gulf of Mexico 2017 Headboat Summary Report; and receive an update on Southeast For-Hire Electronic Reporting Programs (SEFHIER) Implementation Plan.

Mid-morning (approximately 10:45 a.m.), the Full Council will convene with a Call to Order, Announcements, and Introductions. The Council will hold the induction of new Council Members, followed by the Adoption of Agenda and Approval of Minutes. The Council will receive presentations on Highly Migratory Species (HMS) Amendment 11 regarding Shortfin Mako Sharks; and from Texas Law Enforcement. The Council will receive open public testimony from 1:30 p.m. until 5 p.m. on the following items: Final Action: Abbreviated Framework Action—Clarification of Fishing in HAPCs; Final Action: Framework Action to Modify Red Snapper ACLs and ACTs, and Gulf Hogfish ACLs; Final Action: Modification to the Recreational Red Snapper Annual Catch Target Buffers; Final Action: Spiny Lobster Amendment 13—Modifications to the Spiny Lobster Gear Requirements and Cooperative Management Procedures; and, on any other fishery issues or concerns. Anyone wishing to speak during public comment should sign in at the registration station located at the entrance to the meeting room.

Thursday, August 23, 2018; 8:30 a.m.–3:30 p.m.

The Council will receive reports from the following committees: Coral, Mackerel, Spiny Lobster, Sustainable Fisheries, Gulf SEDAR, Data Collection, Shrimp, and Reef Fish Management Committees. After lunch, the Council will receive updates from the following supporting agencies: South Atlantic Fishery Management Council; NOAA Office of Law Enforcement (OLE), Gulf States Marine Fisheries Commission; U.S. Coast Guard; U.S. Fish and Wildlife Service; and, the Department of State.

The Council will discuss any Other Business items. Lastly, the Council will hold an election for Chair and Vice-Chair.

—Meeting Adjourns

The meeting will be broadcast via webinar. You may register for the webinar by visiting *www.gulfcouncil.org* and clicking on the Council meeting on the calendar. *https://attendee.gotowebinar.com/register/3383291116212545537-*. The timing and order in which agenda items are addressed may change as required to effectively address the issue, and the latest version along with other meeting materials will be posted on *www.gulfcouncil.org* as they become available.

Although other non-emergency issues not contained in this agenda may come before this Council for discussion, those issues may not be the subjects of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided that the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kathy Pereira (see **ADDRESSES**) at least 5 days prior to the meeting date.

Dated: July 26, 2018.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

U.S. Integrated Ocean Observing System (IOOS®) Advisory Committee

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: Notice is hereby given of a meeting of the U.S. Integrated Ocean Observing System (IOOS®) Advisory Committee (Committee) in Juneau, Alaska.

DATES AND TIMES: The meeting will be held on Tuesday, August 28, 2018, from 9:00 a.m. to 5:30 p.m., and Wednesday, August 29, 2018 from 9:00 a.m.–3:00 p.m. These times and the agenda topics described below are subject to change. Refer to the web page listed below for the most up-to-date agenda.

ADDRESSES: On Tuesday, August 28th from 9:00 a.m. to 12:00 p.m. the meeting will be held at the Elizabeth Peratrovich Hall Conference Center, 320 W Willoughby Ave, Juneau, AK. This will be a half-day joint meeting with NOAA's Hydrographic Services Review Panel on topics of joint interest such as water level partnerships. From 2:00 to 5:30 p.m., the IOOS Advisory Committee meeting will be held at the Westmark Baranof Hotel, 127 N Franklin Street, Juneau, AK. On Wednesday, August 29th, the meeting will be held from 9:00 a.m. to 3:00 p.m. at the NOAA Fisheries Auke Bay Lab, 17109 Point Lena Loop Road, Juneau, AK. Venues may be subject to change. Refer to the web page listed below for the most up-to-date information.

FOR FURTHER INFORMATION CONTACT: Jessica Snowden, Designated Federal Official, U.S. IOOS Advisory Committee, U.S. IOOS Program, 1315 East-West Highway, Station 2612, Silver Spring, MD 20910; Phone 240–533–9466; Fax 301–713–3281; Email *jessica.snowden@noaa.gov* or visit the U.S. IOOS Advisory Committee website at *http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/.*

SUPPLEMENTARY INFORMATION: The Committee was established by the NOAA Administrator as directed by Section 12304 of the Integrated Coastal and Ocean Observation System Act, part of the Omnibus Public Land Management Act of 2009 (Pub. L. 111–11). The Committee advises the NOAA Administrator and the Interagency Ocean Observation Committee (IOOC) on matters related to the responsibilities and authorities set forth in section 12302 of the Integrated Coastal and Ocean Observation System Act of 2009 and other appropriate matters as the Under Secretary refers to the Committee for review and advice.

The Committee will provide advice on:

(a) Administration, operation, management, and maintenance of the System;

(b) expansion and periodic modernization and upgrade of technology components of the System;

(c) identification of end-user communities, their needs for information provided by the System, and the System's effectiveness in dissemination information to end-user communities and to the general public; and

(d) any other purpose identified by the Under Secretary of Commerce for Oceans and Atmosphere or the Interagency Ocean Observation Committee.

The meeting will be open to public participation with a 15-minute public comment period on August 28, 2018, from 5:00 p.m. to 5:15 p.m., and on August 29, 2018, from 2:45 p.m. to 3:00 p.m. (check agenda on website to confirm time.) The Committee expects that public statements presented at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to a total time of three (3) minutes. Written comments should be received by the Designated Federal Official by August 21, 2018 to provide sufficient time for Committee review. Written comments received after August 21st will be distributed to the Committee, but may not be reviewed prior to the meeting date. Seats will be available on a first-come, first-served basis. A webinar will be provided. Sign-up information for the webinar will be posted on the website.

Matters To Be Considered: The meeting will focus on ongoing committee priorities, including discussions of stakeholder needs specific to the Alaska and Arctic regions and developing the next set of recommendations. The latest version of the agenda will be posted at *http://ioos.noaa.gov/community/u-s-ioos-advisory-committee/.*

Special Accomodations: These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Jessica Snowden, Designated Federal

Official at 240–533–9466 by August 20, 2018.

Dated: July 17, 2018.

Carl C. Gouldman,

Director, U.S. IOOS Program, National Ocean Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Notice of 30-Day Public Comment Period on the Injury Assessment Plan for the Lower Duwamish River (''Lower Duwamish River Natural Resource Damage Assessment: Injury Assessment Plan'')

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

ACTION: Notice of public comment period.

SUMMARY: NOAA, on behalf of its co-members of the Elliott Bay Trustee Council (Trustee Council), announce the release of the Lower Duwamish River Injury Assessment Plan, which sets forward the Trustee Council's approach for assessing natural resource damages at the Lower Duwamish River. The Injury Assessment Plan is one of the first steps in the natural resources damages assessment process, and is being released to the public in accordance with the applicable regulations.

Through today's notice, NOAA is announcing: (1) The Trustees' plan to begin the assessment of natural resource damages for lost ecological and human use services resulting from releases of hazardous substances and oil to the Lower Duwamish River in Seattle, Washington; and (2) a provision of a 30-day period for public comment on the plan.

ADDRESSES: Comments are sought on the draft injury assessment plan and should be emailed to *Rebecca.Hoff@noaa.gov* with the subject line: ''Comments on Lower Duwamish River Natural Resource Damage Assessment: Injury Assessment Plan.'' Comments may also be mailed to: Rebecca Hoff of NOAA Western Region Center, 7600 Sand Point Way Building 1, Seattle, WA 98118.

SUPPLEMENTARY INFORMATION: The increasingly industrial uses of the Lower Duwamish River led to contamination of natural resources through multiple pathways from releases of hazardous substances upland and adjacent to the river. As a result of this contamination, EPA designated Harbor Island, Lockheed West Seattle, and the Lower Duwamish Waterway (collectively, the Site) as Superfund sites on the National Priority List. Examples of contaminants of concern released to the Lower Duwamish River include polychlorinated biphenyls (PCBs), metals, and polycyclic aromatic hydrocarbons (PAHs). Natural resources such as benthic invertebrates, migratory fish (such as juvenile Chinook salmon), resident fish (such as sculpin and English sole), birds, and fish eating mammals exposed to these compounds can potentially be harmed as a result. In addition, hazardous substances released to the Lower Duwamish River have potentially reduced the human use services (*e.g.,* recreational fishing, recreational boating, tribal uses) provided by the River. In addition, fish consumption advisories related to hazardous substances have been issued to the public warning of the risks associated with consumption of various fish species commonly targeted by anglers. The Injury Assessment Plan sets forth the approach the Trustee Council will apply to completing the damage assessment process to resolve natural resource damages liability with non-settling parties.

The Elliott Bay Trustee Council is comprised of Federal, state and tribal natural resource trustees. Members of the Trustee Council include the U.S. Department of the Interior; the U.S. Department of Commerce, acting through NOAA; the State of Washington; the Suquamish Tribe; and the Muckleshoot Indian Tribe. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C. §§ 9601 *et seq.;* the Oil Pollution Act (OPA) of 1990, 33 U.S.C. §§ 2701 *et seq.;* the Clean Water Act (CWA), 33 U.S.C. § 1251; the National Oil and Hazardous Substances Pollution Contingency Plan [National Contingency Plan (NCP)], 40 CFR 300, Subpart G; Executive Orders 12580 and 12777; and other applicable federal and state laws and regulations, provide a legal framework for the Trustee Council's actions.

Under the federal regulations, the Trustee Council can elect to perform a Type A or Type B injury assessment. Type A assessment procedures use simplified model assumptions to address injuries that result from a single event or short-term exposure. Releases of hazardous substances from the Site have occurred from multiple sources over many decades, resulting in complex exposure conditions impacting aquatic and upland media and associated complex food webs. Therefore, the Elliott Bay Trustee Council previously elected to perform a Type B assessment, the procedures for which require ''more extensive field observation than the Type A procedures.'' 43 CFR § 11.33(b). This assessment method includes injury determination, quantification, and damage determination. Because substantial Site-specific data already exist to support the assessment, a Type B assessment can be conducted for the Site at a reasonable cost. The federal regulations for a Type B assessment outline methods for determining (1) pathways through which hazardous substances released by potentially responsible parties expose natural resources, (2) injuries to natural resources, (3) the extent of those injuries and resultant public losses, (4) baseline conditions and time required for the resources to recover to baseline, and (5) the cost or value of restoring injured resources. These methods facilitate calculation of natural resource damages. 43 CFR §§ 11.60–11.84.

Dated: July 19, 2018.

David Westerholm,

Director, Office of Response and Restoration.

BILLING CODE 3510–JE–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Evaluation of State Coastal Management Programs

AGENCY: Office for Coastal Management (OCM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA), Office for Coastal Management will hold a public meeting to solicit comments on the performance evaluation of the Mississippi Coastal Management Program.

DATES: *Mississippi Coastal Management Program Evaluation:* The public meeting will be held on September 25, 2018, and written comments must be received on or before October 5, 2018.

For specific dates, times, and locations of the public meetings, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: You may submit comments on the program or reserve NOAA intends to evaluate by any of the following methods:

Public Meeting and Oral Comments: A public meeting will be held in Biloxi, Mississippi. For the specific location, see **SUPPLEMENTARY INFORMATION.**

Written Comments: Please direct written comments to Dr. Maria Honeycutt, Program Evaluator, NOAA Office for Coastal Management, 1305 East-West Highway N/OCM1, Silver Spring, Maryland 20910, or via email to *Maria.Honeycutt@noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Maria Honeycutt, Ph.D., CFM, NOAA Office for Coastal Management, 1305 East-West Highway N/OCM1, Silver Spring, Maryland 20910, by phone at (240) 533–0726, or via email to *Maria.Honeycutt@noaa.gov.* Copies of the previous evaluation findings and 2016–2020 Assessment and Strategy may be viewed and downloaded on the internet at *http://coast.noaa.gov/czm/evaluations.* A copy of the evaluation notification letter and most recent progress report may be obtained upon request by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**.

SUPPLEMENTARY INFORMATION: Section 312 of the Coastal Zone Management Act (CZMA) requires NOAA to conduct periodic evaluations of federally approved state and territorial coastal programs. The process includes one or more public meetings, consideration of written public comments, and consultations with interested Federal, state, and local agencies and members of the public. During the evaluation, NOAA will consider the extent to which the state has met the national objectives, adhered to the management program approved by the Secretary of Commerce, and adhered to the terms of financial assistance under the CZMA. When the evaluation is completed, NOAA's Office for Coastal Management will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings.

You may participate or submit oral comments at the public meeting scheduled as follows:

Date: September 25, 2018

Time: 6:00 p.m., local time

Location: Bolton State Building, Public Meeting Room, 1141 Bayview Avenue, Biloxi, Mississippi 39530

Written public comments must be received on or before October 5, 2018.

(Federal Domestic Assistance Catalog 11.419. Coastal Zone Management Program Administration.)

Dated: July 17, 2018.

Keelin Kuipers,

Acting Deputy Director, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Hydrographic Services Review Panel Meeting

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of open public meeting.

SUMMARY: The Hydrographic Services Review Panel (HSRP) will hold a meeting that will be open to the public and public comments are requested in advance and/or during the meeting. Information about the HSRP meeting, agenda, presentations, webinar registration, and other background documents will be posted online at: *https://www.nauticalcharts.noaa.gov/hsrp/hsrp.htm.*

DATES: The meeting is planned for two and a half days during August 28–30, 2018. The dates, agenda, and times are subject to change. For updates, please check online at: *https://www.nauticalcharts.noaa.gov/hsrp/hsrp.htm.*

Location: Juneau, Alaska. The meeting venue will be announced online at: *https://www.nauticalcharts.noaa.gov/hsrp/hsrp.htm.*

FOR FURTHER INFORMATION CONTACT: Lynne Mersfelder-Lewis, HSRP program manager, National Ocean Service, Office of Coast Survey, NOAA (N/NSD), 1315 East-West Highway, SSMC3 #6305, Silver Spring, Maryland 20910; telephone: 301–533–0064; email: *Lynne.Mersfelder@noaa.gov.*

SUPPLEMENTARY INFORMATION: The meeting is open to the public, seating will be available on a first-come, first-served basis, and public comment is encouraged. There are public comment periods scheduled each day and noted in the agenda. Each individual or group making verbal comments will be limited to a total time of five (5) minutes and will be recorded. For those not onsite, comments can be submitted via the webinar chat function or via email in writing. Individuals who would like to submit written statements in advance, during or after the meeting should email their comments to *Lynne.Mersfelder@noaa.gov.* The HSRP will provide webinar capability. Pre-registration is required to access the webinar: *https://attendee.gotowebinar.com/register/3898703691780313857.*

The Hydrographic Services Review Panel (HSRP) is a Federal Advisory Committee established to advise the Under Secretary of Commerce for Oceans and Atmosphere, the NOAA Administrator, on matters related to the responsibilities and authorities set forth in section 303 of the Hydrographic Services Improvement Act of 1998, as amended, and such other appropriate matters that the Under Secretary refers to the Panel for review and advice. The charter and other information are located online at: *https://www.nauticalcharts.noaa.gov/hsrp/CharterBylawsHSIAStatute.htm.*

Past recommendations and issue papers are at: *https://www.nauticalcharts.noaa.gov/hsrp/recommendations.htm.*

Past HSRP public meeting summary reports, agendas, presentations, transcripts, webinars, and other information is available online at: *https://www.nauticalcharts.noaa.gov/hsrp/meetings.htm.*

Matters To Be Considered: The panel is convening to hear federal, state, regional and local partners and stakeholders on issues relevant to NOAA's navigation services, focusing on Alaska and the U.S. Arctic region as well as national issues. The HSRP will have a joint session with NOAA's Integrated Ocean Observation System Advisory Committee on water level partnerships. Navigation services include the data, products, and services provided by the NOAA programs and activities that undertake geodetic observations, gravity modeling, shoreline mapping, bathymetric mapping, hydrographic surveying, nautical charting, tide and water level observations, current observations, and marine modeling. This suite of NOAA products and services support safe and efficient navigation, resilient coasts and communities, and the nationwide positioning information infrastructure to support America's commerce. The Panel will hear from state and federal agencies, non-federal organizations, stakeholders and partners about their missions and use of NOAA's navigation services, the value these services bring, and what improvements could be made. Other administrative matters may be considered. The agenda and speakers are subject to change.

Special Accommodations: This meeting is physically accessible to people with disabilities. Please direct requests for sign language interpretation

or other auxiliary aids to *Lynne.Mersfelder@noaa.gov* by August 8, 2018.

Dated: July 13, 2018.

Kathryn Ries,

Deputy Director, Office of Coast Survey, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–JE–P

DEPARTMENT OF DEFENSE

Department of the Army

Inland Waterways Users Board; Request for Nominations

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of request for nominations.

SUMMARY: The Department of the Army is publishing this notice to request nominations to serve as representatives on the Inland Waterways Users Board, sponsored by the U.S. Army Corps of Engineers. Section 302 of Public Law 99–662 established the Inland Waterways Users Board. The Board is an independent Federal advisory committee. The Secretary of the Army appoints its 11 (eleven) representative organizations. This notice is to solicit nominations for seven (7) appointments for terms that will begin by May 28, 2019. For additional information about the Board, please visit the committee's website at *http://www.iwr.usace.army.mil/Missions/Navigation/InlandWaterwaysUsersBoard.aspx.*

ADDRESSES: Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: Mr. Mark R. Pointon, Designated Federal Officer (DFO) for the Inland Waterways Users Board, CEIWR–GM, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–428–6438; and by email at *Mark.Pointon@usace.army.mil.*

FOR FURTHER INFORMATION CONTACT: Alternatively, contact Mr. Kenneth E. Lichtman, the Alternate Designated Federal Officer (ADFO), in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–GW, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–428–8083; and by email at *Kenneth.E.Lichtman@usace.army.mil.*

SUPPLEMENTARY INFORMATION: The selection, service, and appointment of representative organizations to the Board are covered by provisions of Section 302 of Public Law 99–662. The substance of those provisions is as follows:

a. Selection. Representative organizations are to be selected from the spectrum of commercial carriers and shippers using the inland and intracoastal waterways, to represent geographical regions, and to be representative of waterborne commerce as determined by commodity ton-miles and tonnage statistics.

b. Service. The Board is required to meet at least semi-annually to develop and make recommendations to the Secretary of the Army on waterways construction and major rehabilitation priorities and spending levels for commercial navigation improvements, and report its recommendations annually to the Secretary and Congress.

c. Appointment. The operation of the Board and appointment of representative organizations are subject to the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended) and departmental implementing regulations. Representative organizations serve without compensation but their expenses due to Board activities are reimbursable. The considerations specified in Section 302 for the selection of representative organizations to the Board, and certain terms used therein, have been interpreted, supplemented, or otherwise clarified as follows:

(1) Carriers and Shippers. The law uses the terms ''primary users and shippers.'' Primary users have been interpreted to mean the providers of transportation services on inland waterways such as barge or towboat operators. Shippers have been interpreted to mean the purchasers of such services for the movement of commodities they own or control. Representative companies are appointed to the Board, and they must be either a carrier or shipper or both. For that purpose a trade or regional association is neither a shipper nor primary user.

(2) Geographical Representation. The law specifies ''various'' regions. For the purposes of the Board, the waterways subjected to fuel taxes and described in Public Law 95–502, as amended, have been aggregated into six regions. They are (1) the Upper Mississippi River and its tributaries above the mouth of the Ohio; (2) the Lower Mississippi River and its tributaries below the mouth of the Ohio and above Baton Rouge; (3) the Ohio River and its tributaries; (4) the Gulf Intracoastal Waterway in Louisiana and Texas; (5) the Gulf Intracoastal Waterway east of New Orleans and associated fuel-taxed waterways including the Tennessee-Tombigbee, plus the Atlantic Intracoastal Waterway below Norfolk; and (6) the Columbia-Snake Rivers System and Upper Willamette. The intent is that each region shall be represented by at least one representative organization, with that representation determined by the regional concentration of the firm's traffic on the waterways.

(3) Commodity Representation. Waterway commerce has been aggregated into six commodity categories based on ''inland'' ton-miles shown in Waterborne Commerce of the United States. These categories are (1) Farm and Food Products; (2) Coal and Coke; (3) Petroleum, Crude and Products; (4) Minerals, Ores, and Primary Metals and Mineral Products; (5) Chemicals and Allied Products; and (6) All Other. A consideration in the selection of representative organizations to the Board will be that the commodities carried or shipped by those firms will be reasonably representative of the above commodity categories.

d. Nomination. Reflecting preceding selection criteria, the current representation by the seven (7) organizations whose terms expire includes Regions 1, 2, 4, 5 and 6, five carrier and two shipper representation and all commodity representation.

Individuals, firms or associations may nominate representative organizations to serve on the Board. Nominations will:

(1) Include the commercial operations of the carrier and/or shipper representative organization being nominated. This commercial operations information will show the actual or estimated ton-miles of each commodity carried or shipped on the inland waterways system in a recent year (or years), using the waterway regions and commodity categories previously listed.

(2) State the region(s) to be represented.

(3) State whether the nominated representative organization is a carrier, shipper or both.

(4) Provide the name of an individual to be the principle person representing the organization and information pertaining to their personal qualifications, to include a current biography or resume.

Previous nominations received in response to notices published in the **Federal Register** in prior years will not be retained for consideration. Renomination of representative organizations is required.

e. *Deadline for Nominations.* All nominations must be received at the

address shown above no later than September 15, 2018.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DOD–2018–OS–0048]

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense for Personnel and Readiness, DoD.

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Office of the Under Secretary of Defense for Personnel and Readiness announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by October 1, 2018.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Department of Defense, Office of the Chief Management Officer, Directorate for Oversight and Compliance, 4800 Mark Center Drive, Mailbox #24, Suite 08D09, Alexandria, VA 22350–1700.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to OUSD (Personnel and Readiness) Office of Total Force Planning & Requirements, ATTN: Mr. Thomas Hessel, 4000 Pentagon, Washington, DC 20301, or call (703) 697–3402.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: DoD Enterprise-Wide Contractor Manpower Reporting Application (ECMRA); OMB Control Number 0704–0491.

Needs and Uses: This information collection is necessary to achieve the collection of direct labor hours and associated costs in order to meet the requirements set for the DoD by section 2330a of Title 10, United States Code. Furthermore, ECMRA collections enable DoD organizations to understand the extent of contracted support, the associated level of effort in achieving mission, the reliance on contracted services necessary to facilitate their workforce planning processes, and to support statutory requirements set forth in sections 115a, 129a, 235, 2461, and 2463 of Title 10, United States Code.

Affected Public: Businesses or Other For-Profit.

Annual Burden Hours: 583.33 hours.

Number of Respondents: 7,000.

Responses per Respondent: 1.

Annual Responses: 7,000.

Average Burden per Response: 5 minutes.

Frequency: Annually.

Dated: July 26, 2018.

Shelly E. Finke,

Alternate OSD Federal Register, Liaison Officer, Department of Defense.

The Honorable Paul D. Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

10 JUL 2018

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 18-0A. This report relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 11-05 of 1 February 2011.

Sincerely,

Charles W. Hooper
Lieutenant General, USA
Director

Enclosures:
1. Transmittal

BILLING CODE 5001–06–C

Transmittal No. 18–0A

REPORT OF ENHANCEMENT OR UPGRADE OF SENSITIVITY OF TECHNOLOGY OR CAPABILITY (SEC. 36(B)(5)(C), AECA)

(i) *Purchaser:* Australia

(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 11–05

Date: February 1, 2011

Military Department: Navy

(iii) *Description:* On February 1, 2011, Congress was notified by Congressional certification transmittal number 11–05 of the Government of Australia's request for ten year Through-Life-Support (TLS) for Australia's fleet of twenty-four (24) MH–60R helicopters. The sustainment effort includes spare and repair parts provisioning, support and test equipment, publications and technical documentation, U.S. Government and contractor engineering, technical and logistics support services, and other related elements of logistics support. The estimated cost was $1.6 billion, with no Major Defense Equipment (MDE).

This transmittal includes the extension of the sustainment support through June 2028 as requested by Australia and includes additional spare parts. There is no increase in MDE cost. The case value will increase from $1.6 billion to $2.8 billion.

(iv) *Significance:* The proposed sale will allow Australia to effectively maintain its current force projection capability that enhances interoperability with U.S. forces well into the future.

(v) *Justification:* This sale will contribute to the foreign policy and national security of the United States by helping to improve the security of an important major non-NATO ally and partner who contributes significantly to peacekeeping, humanitarian, and combat operations around the world.

(vi) *Date Report Delivered to Congress:* July 10, 2018.

Transmittal No. 18–26

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Commonwealth of Australia

(ii) *Total Estimated Value:*

Major Defense Equipment *	$ 0.0 million
Other	$185.0 million
TOTAL	$185.0 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* Australia has requested the possible sale of long lead items, engineering and development activities, establishment of engineering development sites, and commencement of development activities associated with the integration of the CEAFAR 2 Phased Array Radar System with the AEGIS Combat System.

Major Defense Equipment (MDE): None

Non-MDE: AEGIS Weapon System Technical Equivalent Components including Command Display System (CDS) Consoles (including 2 consoles in Gun Weapon System configuration); Multi-Mission Display (MMD) systems, including projectors, sensors and cameras; Tactical Equivalent Core Computing System (CCS) Cabinets; Tactical Equivalent AEGIS LAN Interconnect System (ALIS) Cabinets; Tactical Equivalent AEGIS Conversion Equipment Group Input/Output (ACEG I/0) Cabinets; Tactical Equivalent Advanced Storage Area Network (ASAN) Cabinets; Global Command and Control System—Maritime (GCCS–M); Cooperative Engagement Capability (CEC) sites systems, to include processing rack, simulation equipment and workstation; AN/SPQ–15 Converter/Receiver and/signal data converter equipment; Defense Visual Information Distribution Service (DIVDS) cabinet; AN/SQQ–89 Sonobouy Processing Core Computing System racks, with console and laptop; AEGIS simulator racks and workstations; AEGIS Training System; and various ancillary equipment and support products, including desktop computers, displays, test units and compilations servers, printers, workstations, spares, cabling and software licenses. Also included are spare and repair parts, support and test equipment, engineering and technical services to support sites equipment, U.S. Government and contractor engineering, technical and support services, engineering technical assistance, other technical assistance, and other related elements of program and logistics support.

(iv) *Military Department:* Navy

(v) *Prior Related Cases, if any:* AT–P–LCQ, Implemented 31 Oct 05; AT–P–GTG, Implemented 31 Mar 14; AT–P–GSU, Implemented 26 Nov 15; AT–P–GSB, Implemented 2 Feb 16

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* June 26, 2018

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Australia—AEGIS Combat System Equipment for Australia Surface Combatants

The Government of Australia has requested to buy long lead items, engineering and development activities, establishment of engineering development sites, and commencement of development activities associated with the integration of the CEAFAR 2 Phased Array Radar System with the AEGIS Combat System. Included are AEGIS Weapon System Technical Equivalent Components including Command Display System (CDS) Consoles (including 2 consoles in Gun Weapon System configuration); Multi-Mission Display (MMD) systems, including projectors, sensors and cameras; Tactical Equivalent Core Computing System (CCS) Cabinets; Tactical Equivalent AEGIS LAN Interconnect System (ALIS) Cabinets; Tactical Equivalent AEGIS Conversion Equipment Group Input/Output (ACEG I/0) Cabinets; Tactical Equivalent Advanced Storage Area Network (ASAN) Cabinets; Global Command and Control System—Maritime (GCCS–M); Cooperative Engagement Capability (CEC) sites systems, to include processing rack, simulation equipment and workstation; AN/SPQ–15 Converter/Receiver and/signal data converter equipment; Defense Visual Information Distribution Service (DIVDS) cabinet; AN/SQQ–89 Sonobouy Processing Core Computing System racks, with console and laptop; AEGIS simulator racks and workstations; AEGIS Training System; and various ancillary equipment and support products, including desktop computers, displays, test units and compilations servers, printers, workstations, spares, cabling and software licenses. Also included are spare and repair parts, support and test equipment, engineering and technical services to support sites equipment, U.S. Government and contractor engineering, technical and support services, engineering technical assistance, other technical assistance, and other related elements of program and logistics support. The total estimated program cost is $185 million.

This sale will support the foreign policy and national security of the United States by helping to improve the security of a major ally that is an important force for political stability and economic progress in the Western Pacific. It is vital to the U.S. national interest to assist our ally in developing and maintaining a strong and ready self-defense capability.

The proposed sale will enhance Australia's Surface Combatant capability by adding nine AEGIS capable Future Frigates over the next 20 years and by upgrading their existing three AEGIS capable Hobart Class destroyers with the latest technology and capability. This sale enhances Australia's self-defense capability, while significantly improving interoperability with U.S. Navy AEGIS combatants in the region. By deploying a surface combatant fleet that will incorporate Cooperative Engagement Capability (CEC), Australia will significantly improve network-centric warfare capability for U.S. forces operating in the region. Australia will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Lockheed Martin, Rotary and Mission Systems, Moorestown, NJ. There are a significant number of companies under contract with the U.S. Navy that will provide components and systems as well as engineering services during the execution of this effort. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require travel of U.S. Government and/or contractor representatives to Australia on a temporary basis for program support and management oversight, consistent with the current level of effort.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–26

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AEGIS Weapon System is a multi-mission combat system providing Integrated Air and Missile Defense (IAMD) capability for surface ship combatants. This sale involves the procurement of development site equipment to support the Australian Surface Combatant Program. The equipment will be installed in U.S.-based development and testing site locations to support the continued development of the AEGIS Combat System for the Australia Surface Combatant Programs. A subsequent LOR is anticipated for procurement of combat system equipment to be exported to Australia for installation on their future surface combatants.

2. AEGIS Weapon System simulation software, documentation, training and study material will be provided a classification levels up to and including SECRET.

3. No delivery of restricted information will be provided under this LOR. Delivery of sensitive technological information, up to and including SECRET, will be limited to the minimum level of information required to progress activities associated with the integration of indigenous combat system systems into the AEGIS Combat System. This consists primarily of AEGIS Combat System requirements and integration information to support early combat system development activities, in the form of documentation, simulation software, and technical specifications. This information is sensitive as it provides limited insight into AEGIS Combat System capabilities and requirements—as tailored to the Australian AEGIS Combat System configurations.

4. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

5. A determination has been made that Australia can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

6. All defense articles and services listed on this transmittal are authorized for release and export to Australia.

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* May 4, 2018

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Government of Germany—C–130J and KC–130J Aircraft

The Government of Germany has requested to buy three (3) C–130J–30 aircraft with four (4) each Rolls Royce AE–2100D turboprop engines (installed); three (3) KC–130J aircraft with four (4) each Rolls Royce AE–2100D turboprop engines (installed); four (4) Rolls Royce AE 2100D turboprop engines (spares); and eight (8) Link-16 MIDS Terminals (one (1) per aircraft, plus two (2) spares). Also includes eight (8) AN/ALE 47 Electronic Countermeasure Dispensers (1 per aircraft, plus 2 spares); eight (8) AN/AAR–47A(V)2 Missile Warning Systems (1 per aircraft, plus spares); eight (8) AN/ALR–56M Radar Warning Receivers (1 per aircraft, plus 2 spares); eight (8) MX–20 Electro-Optical/Infrared Imaging Systems (1 per aircraft, plus 2 spares); AN/APX–114/119 Identification Friend or Foe (IFF) Mode 5; Joint Mission Planning System (JMPS); secure communications; precision navigation and cryptographic equipment; night vision devices; support and test equipment; publications and technical documentation; personnel training and training equipment; U.S. Government and contractor engineering; technical and logistics support services; and other related elements of logistical and program support. The total estimated value is $1.40 billion.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally which is an important force for political and economic stability in Europe. The proposed sale will increase the airlift, air refueling, and air drop capabilities of the German Air Force. Providing these capabilities to the German Air Force will greatly increase interoperability between the U.S. Air Force and the German Air Force as well as other NATO allies.

The German Air Force will use these aircraft to conduct airlift, air refueling, and air drop missions as part of a French-German allied squadron based in Evreux, France. This common air transport squadron will have unrestricted exchange of aircraft, air crews, and maintainers, as well as technical and logistical support based on a common pool of spare parts and a common service support contract. These exchanges would be carried out pursuant to separate authorizations from the United States. The C–130Js will provide crucial air refueling capability to German and French fighter and light transport aircraft, as well as helicopters. Germany requests these capabilities to provide for the support of its deployed troops, regional security, and interoperability with France and the United States. Germany will have no difficulty absorbing these aircraft into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be Lockheed Martin, Ft Worth, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale may require multiple trips but no long-term stationing for U.S. contractor representatives to Germany and potentially deployed locations to provide initial launch recovery, and maintenance support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–13

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The C–130J Hercules with Rolls Royce AE 2100D Turboprop Engines is a military airlift aircraft that performs primarily the tactical portion of the airlift mission. The aircraft is capable of operating from rough, dirt strips and is the prime transport for air dropping troops and equipment into hostile areas. The C–130J improvements over the C–130E include improved maximum speed, climb time, cruising altitude and range. The C–130J has 55 feet of cargo compartment length,—an additional 15 feet over the original ''short'' aircraft. Hardware is UNCLASSIFIED. Technical data and documentation to be provided is UNCLASSIFIED.

2. The KC–130J is a tanker version of the C–130J Hercules aircraft modified to provide air-to-air refueling and assault-support. Hardware is UNCLASSIFIED. Technical data and documentation to be provided is UNCLASSIFIED.

3. Multifunctional Information Distribution System (MIDS) is an advanced Link-16 command, control, communications, and intelligence (C3I) system incorporating high-capacity, jam-resistant, digital communication links for exchange of near real-time tactical information, including both data and voice, among air, ground, and sea elements. The MIDS terminal hardware, publications, performance specifications, operational capability, parameters, vulnerabilities to countermeasures, and software documentation are classified CONFIDENTIAL. The classified information to be provided consists of

that which is necessary for the operation, maintenance, and repair (through intermediate level) of the data link terminal, installed systems, and related software.

4. The AN/ALE–47 Counter-Measures Dispensing System (CMOS) is an integrated, threat-adaptive, software-programmable dispensing system capable of dispensing chaff, flares, and active radio frequency expendables. The threats countered by the CMOS include radar-directed anti-aircraft artillery (AAA), radar command-guided missiles, radar homing guided missiles, and infrared (IR) guided missiles. The system is internally mounted and may be operated as a stand-alone system or may be integrated with other on-board EW and avionics systems. The AN/ALE–47 uses threat data received over the aircraft interfaces to assess the threat situation and to determine a response. Expendable routines tailored to the immediate aircraft and threat environment may be dispensed using one of four operational modes. Hardware is UNCLASSIFIED. Technical data and documentation to be provided is UNCLASSIFIED.

5. The AN/AAR–47A(V)2 Missile Warning System is a small, lightweight, passive, electro-optic, threat warning device used to detect surface-to-air missiles fired at helicopters and low-flying fixed-wing aircraft and automatically provide countermeasures, as well as audio and visual-sector warning messages to the aircrew. The basic system consists of multiple Optical Sensor Converter (OSC) units, a Computer Processor (CP) and a Control Indicator (Cl). The set of OSC units, which normally consist of four, is mounted on the aircraft exterior to provide omni-directional protection. The OSC detects the rocket plume of missiles and sends appropriate signals to the CP for processing. The CP analyses the data from each OSC and automatically deploys the appropriate countermeasures. The CP also contains comprehensive BIT circuitry. The CI displays the incoming direction of the threat, so that the pilot can take appropriate action. Hardware is UNCLASSIFIED. Technical data and documentation to be provided is UNCLASSIFIED.

6. The AN/ALR–56M Advanced Radar Warning Receiver continuously detects and intercepts RF signals in certain frequency ranges and analyzes and separates threat signals from non-threat signals. It contributes to full-dimensional protection by providing individual aircraft probability of survival through improved aircrew situational awareness of the radar guided threat environment. The ALR–56M is designed to provide improved performance in a dense signal environment and improved detection of modern threats signals. Hardware is UNCLASSIFIED. Technical data and documentation to be provided is UNCLASSIFIED.

7. An AN/APX–114/119 Identification Friend or Foe (IFF) combined transponder interrogator system is UNCLASSIFIED unless Mode 4 or 5 operational evaluator parameters, which are SECRET, are loaded into the equipment.

8. Joint Mission Planning System (JMPS) is a multi-platform PC based mission planning system. JMPS hardware is UNCLASSIFIED but the software is classified up to SECRET.

9. This sale will involve the release of sensitive and/or classified cryptographic equipment for secure communications radios, precision navigation, and cryptographic appliques and keying equipment. The hardware is UNCLASSIFIED, except where systems are loaded with cryptographic software, which may be classified up to SECRET.

10. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

11. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

12. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Germany.

BILLING CODE 5001–06–C

Transmittal No. 18–12

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser: Government of the Netherlands*

(ii) *Total Estimated Value:*

Major Defense Equipment *	$60 million
Other	$10 million
TOTAL	$70 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE): Three thousand five hundred (3,500) M1156 Precision Guided Kit (PGK)

Non-MDE: Also included are six (6) PGK settable trainers; two (2) PGK cut away models; one hundred (100) M76 PGK fuze wrenches; ten (10) Extended Length Artillery Projectile Extractors (ELAPEs); PGK technical data and publications; U.S. Government engineering and technical support services; and other related elements of logistics and program support.

(iv) *Military Department:* Army (NE–B–WKA)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* April 24, 2018

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Netherlands—M1156 Precision Guided Kits

The Netherlands has requested to buy three thousand five hundred (3,500) M1156 Precision Guided Kits. Also included are six (6) PGK settable trainers; two (2) PGK cut away models; one hundred (100) M76 PGK fuze wrenches; ten (10) Extended Length Artillery Projectile Extractors (ELAPEs); PGK technical data and publications; U.S. Government engineering and technical support services; and other related elements of logistics and program support. The estimated total cost is $70 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of the Netherlands which is an important force for political stability and economic progress in Europe. It is important to the U.S. national interests to assist the Netherlands to develop and maintain a strong and ready self-defense capability. The Netherlands has been a consistent coalition partner supporting the United States in various coalition combat operations to include counter-ISIS, Stabilization Force in Iraq, and Afghanistan.

The proposed sale of PGK will provide a precision guided capability to 155mm artillery projectiles and improve Netherlands's capability to meet current and future enemy threats. The Netherlands will use the enhanced capability to strengthen its homeland defenses, deter regional threats, and provide direct support to coalition and security cooperation efforts. The Netherlands will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment will not impact the basic military balance in the region.

The principal contractor will be Orbital ATK. There are no known offset agreements proposed in connection with this potential sale. The purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this sale will not require the assignment of any additional U.S. or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–12

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The M1156 Precision Guidance Kit (PGK) is a Global Positioning System (GPS) Precise Positioning Service (PPS) guided 155mm artillery projectile fuze. This effort includes the qualification of PGK on the Assegai M1711 Insensitive High Explosive (IHE) Base Bleed (BB) projectile with modular charges DM92 Charge 6 and PGK on the Assegai M1712 IHE Boat Tail (BT) projectile with modular charges DM92 Charges 5 and 6, both fired from the Netherlands' PzH 2000 self-propelled howitzer.

2. The M1156 utilizes the Enhanced Portable Electronic Fuze Setter (EPEFS) to set the PGK and the Portable Electronic Fire Control System (PEFCS) both purchased previously under a previous Excalibur FMS case. The PEFCS contain an Improved Platform Integration Kit (MK) to load GPS coordinates. Both the PGK and PEFCS contain the Selective Availability Anti-Spoofing Module (SAASM). The PGK has 90% commonality with the Army's XM395 Accelerated Precision Mortar Initiative (APMI). The PGK (the end-item) is unclassified. Transfer of the PGK may reveal information up to SECRET.

3. The M1156 utilizes the Army's M782 Multi-Option for Artillery (MOFA) Proximity Height of Burst (HOB) Technology. The HOB sensor is comprised of components with technologies deemed as state of the art, requiring specialized production skills. The sensitive/critical technology is primarily in the design, development, production and manufacturing of the components (integrated circuits and assembly), and the integration methodology required to integrate those components onto an assembly to process embedded (the software-algorithm-working parameters). The HOB technology is classified SECRET.

4. Disclosure of this technology could result in an adversary developing countermeasures, thus lessening the effect of the projectile. Disclosure of test data, countermeasures, vulnerability/susceptibility analyses and threat definition could all aid reverse engineering and could be used by an adversary for possible use against U.S. and Coalition forces. Compromise could jeopardize the U.S. forces inventory through jammer development by adversaries. The risk of compromise has been accessed as moderate. Risk is reduced for fuze/munitions if adequately controlled and protected in storage and on the battlefield. Risk is mitigated by the prevention of disclosure of sensitive classified information (the know-how, software, and associated documentation).

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that the Netherlands can provide the same degree of protection for the sensitive technology being release as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

7. All defense articles and services listed in this transmittal have been

authorized for release and export to the Netherlands.

POLICY JUSTIFICATION

United Kingdom—AIM–120D Advanced Medium Range Air-to-Air Missile (AMRAAM)

The Government of the United Kingdom has requested to buy up to two hundred (200) AIM–120D Advanced Medium Range Air-to-Air Missiles (AMRAAMs). Also included in this sale are missile containers; weapon system support equipment; support and test equipment; site survey; transportation; repair and return support; warranties; spare and repair parts; publications and technical documentation; maintenance and personnel training; training equipment; U.S. Government and contractor engineering, logistics, and technical support services; and other related elements of logistics and program support. The estimated cost of the overall possible sale is $650 million.

The proposed sale will support the foreign policy and national security policies of the United States by helping to improve the security of a NATO ally which has been, and continues to be, an important partner on critical foreign policy and defense issues.

The proposed sale will improve the Royal Air Force's aircraft capabilities for mutual defense, regional security, force modernization, and U.S. and NATO interoperability. This sale will enhance the Royal Air Force's ability to defend the United Kingdom against future threats and contribute to future NATO operations. The United Kingdom will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missile Systems Company, Tucson, AZ. At this time, there are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the United Kingdom.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–03

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM–120D Advanced Medium Range Air-to-Air Missiles (AMRAAM) is a guided missile featuring digital technology and micro-miniature solid-state electronics. AMRAAM capabilities include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic countermeasures, and interception of high- and low-flying and maneuvering targets. The AMRAAM is classified CONFIDENTIAL, major components and subsystems range from UNCLASSIFIED to CONFIDENTIAL, and technical data and other documentation are classified up to SECRET.

2. The AIM–120D AMRAAM hardware, including the missile guidance section, is classified CONFIDENTIAL. State-of-the-art technology is used in the missile to provide it with unique beyond-visual-range capability. The increase in capability from the AIM–120C–7 to AIM–120D consists of a two-way data link, a more accurate navigation unit, improved High-Angle Off-Boresight (HOBS) capability, and enhanced aircraft-to-missile position handoff.

3. AIM–120D features a target detection device with embedded electronic countermeasures, and an electronics unit within the guidance section that performs all radar signal processing, mid-course and terminal guidance, flight control, target detection, and warhead burst point determination.

4. If a technologically advanced adversary obtains knowledge of the specific hardware and software elements, the information could be used to develop countermeasures or equivalent systems that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

5. A determination has been made that the Government of the United Kingdom can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This proposed sale is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

6. All defense articles and services listed in this transmittal are authorized for release and export to the Government of the United Kingdom.

BILLING CODE 5001–06–C

Transmittal No. 18–19

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Spain

(ii) *Total Estimated Value:*

Major Defense Equipment *	$324.4 million
Other	$536.0 million
TOTAL	$860.4 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

Five (5) AEGIS Weapons Systems (AWS) MK7
Six (6) Shipsets Digital Signal Processing
Five (5) Shipsets AWS Computing Infrastructure MARK 1 MOD 0
Five (5) Shipsets Operational Readiness Test Systems (ORTS)
Five (5) Shipsets MK 99 MOD 14 Fire Control System
Five (5) Shipsets MK 41 Baseline VII Vertical Launching Systems (VLS)
Two (2) All-Up-Round MK 54 Mod 0 Lightweight Torpedoes
Twenty (20) SM–2 Block IIIB Missiles and MK 13 Canisters with AN/DKT–71 Warhead Compatible Telemeter

Non-MDE: Also included are one (1) S4 AWS computer program, five (5) shipsets Ultra High Frequency (UHF) Satellite Communications (SATCOM), five (5) shipsets AN/SRQ–4 radio terminal sets, five (5) shipsets ordnance handling equipment, five (5) shipsets Selective Availability Anti-Spoofing Modules (SAASM), five (5) shipsets aviation handling and support equipment, five (5) shipsets AN/SLQ–24E Torpedo countermeasures systems, five (5) shipsets LM04 Thru-Hull XBT Launcher and test canisters, one (1) shipset MK 36 MOD 6 Decoy Launching System, five (5) shipsets Link Level COMSEC (LLC) 7M for LINK 22, five (5) shipsets Maintenance Assist Module (MAM) cabinets, five (5) shipsets technical documentation, five (5) shipsets installation support material, special purpose test equipment, system engineering, technical services, on-site vendor assistance, spare parts, systems training, foreign liaison office and staging services necessary to support ship construction and delivery, spare and repair parts, tools and test equipment, support equipment, repair and return support, personnel training and training equipment, publications and technical documentation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistic and program support.

(iv) *Military Department:* Navy (SP–P–LHM)

(v) *Prior Related Cases, if any:* SP–P–LHL, SP–P–GOL

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* June 26, 2018

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Spain—AEGIS Combat System

The Government of Spain has requested to buy five (5) AEGIS Weapons Systems (AWS) MK7, six (6) shipsets Digital Signal Processing, five (5) shipsets AWS Computing Infrastructure MARK 1 MOD 0, five (5) shipsets Operational Readiness Test Systems (ORTS), five (5) shipsets MK 99 MOD 14 Fire Control System, five (5) shipsets MK 41 Baseline VII Vertical Launching Systems (VLS), two (2) All-Up-Round MK 54 Mod 0 lightweight torpedoes, twenty (20) SM–2 Block IIIB missiles and MK 13 canisters with AN/DKT–71 warhead compatible telemeter. Also included are one (1) S4 AWS computer program, five (5) shipsets Ultra High Frequency (UHF) Satellite Communications (SATCOM), five (5) shipsets AN/SRQ–4 radio terminal sets, five (5) shipsets ordnance handling equipment, five (5) shipsets Selective Availability Anti-Spoofing Modules (SAASM), five (5) shipsets aviation handling and support equipment, five (5) shipsets AN/SLQ–24E Torpedo countermeasures systems, five (5) shipsets LM04 Thru-Hull XBT Launcher and test canisters, one (1) shipset MK 36 MOD 6 Decoy Launching System, five (5) shipsets Link Level COMSEC (LLC) 7M for LINK 22, five (5) shipsets Maintenance Assist Module (MAM) cabinets, five (5) shipsets technical documentation, five (5) shipsets installation support material, special purpose test equipment, system engineering, technical services, on-site vendor assistance, spare parts, systems training, foreign liaison office and staging services necessary to support ship construction and delivery, spare and repair parts, tools and test equipment, support equipment, repair and return support, personnel training and training equipment, publications and technical documentation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistic and program support. The total estimated program cost is $860.4 million.

The proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a NATO ally that is an important force for political stability and economic progress in Europe. It is vital to the U.S. national interest to assist Spain in developing and maintaining a strong and ready self-defense capability.

The addition of five (5) new AEGIS equipped frigates to Spain's fleet will afford more flexibility and capability to counter regional threats and continue to enhance stability in the region. Spain currently operates 5 AEGIS frigates and is proficient at using the AEGIS system to its fullest capability. Spain has demonstrated the capability, flexibility, and responsibility necessary to acquire this AEGIS system into its fleet and will continue to operate it as required to ensure interoperability as a highly valued NATO partner. Spain will have no difficulty absorbing this equipment and support into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Lockheed Martin, Moorestown, NJ, and Manassas, VA; Raytheon Company, Waltham, MA; and General Dynamics, Williston, VT. There are also a significant number of companies under contract with the U.S. Navy that will provide components and systems as well as engineering services during the execution of this effort. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require multiple trips by U.S. Government and contractor representatives to participate in program and technical reviews plus training and maintenance support in country, on a temporary basis, for a period of twenty-four (24) months. It will also require two (2) contractor representatives to reside in country for a period of two (2) years to support this program.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–19

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AEGIS Weapon System (AWS) is a multi-mission combat system

providing integrated Air and Missile Defense for surface ships. This sale involves a subset of the AWS Baseline 9 Anti-Air Warfare (AAW) capability called the International AEGIS Fire Control Loop (IAFCL); no integrated Ballistic Missile Defense will be provided. AWS Software, documentation, combat system training and technical services will be provided at the classification levels up to and including SECRET. The manuals and technical documents are limited to those necessary for operational use and organization maintenance.

2. IAFCL hardware include AWS Computing Infrastructure Equipment, including Blade Processors, Fire Control System (FCS) MK 99, Vertical Launching System (VLS) MK 41, combat system support equipment, logistics support equipment, and the Digital Signal Processing Group equipment consisting of the Signal Processor Assembly Cabinet and Radar Data Processor Cabinet. The Digital Signal Processing group will be derived from the Multi-Mission Signal Processor and will be integrated with the Solid-State S-Band Multifunction Radar which is being procured by Spain via Direct Commercial Sale contract. The Digital Signal Processing Group will be capable of Anti-Air Warfare mission only. The hardware is unclassified. The IAFCL meets Anti-Tamper Requirements.

3. The Torpedo Countermeasure Transmitting Set AN/SLQ–25 (Nixie) is a passive, electro-acoustic decoy system used to provide deceptive countermeasures against acoustic homing torpedoes. The AN/SLQ–25 employs an underwater acoustic projector housed in a streamlines body which is towed astern on a combination tow/signal-transfer coaxial cable. An onboard generated signal is used by the towed body to produce an acoustic signal to decoy the hostile torpedo away from the ship. The AN/SLW–25E included improved deceptive countermeasure capabilities, a fiber optic display LAN, a torpedo alertment capability and a towed array sensor, as well as addressing obsolescence issues in previous variants. The highest classification of the hardware to be exported is SECRET. The purchaser currently has the AN/SLQ–25A variant of this weapon system in its inventory.

4. The Common Data Link Hawklink AN/SRQ–4 radio terminal sets provide the shipboard element of a situation awareness system that links airborne terminals with surface warships. The system provides real-time use of aircraft sensors to extend situational awareness over the horizon by enabling surveillance helicopters to data-link radar, video, networking, and acoustic data to various surface ships. It provided the command and control, sensor data transfer, data link operations and built-in test functionality. It supports anti-submarine warfare and anti-ship surveillance and targeting missions. This hardware is unclassified. The purchase currently has the AN/SRQ–4 on 5 of their surface ships.

5. The version of the MK 54 Lightweight Torpedo involved in this is the MK 54 Mod 0. Although the MK 54 Mod 0 is considered state-of-the art technology, there is no Critical Program Information associated with the MK 54 Mod 0 Light Weight Torpedo hardware, technical documentation, or software. The highest classification of the hardware to be exported is SECRET. The highest classification of the technical manual that will be exported is confidential; which is required for the operation and maintenance of the MK 54 Mod 0 Lightweight Torpedo. The highest classification of the software to be exported is SECRET. The MK 54 Mod 0 Lightweight Torpedo meets Anti-Tamper Requirements. The purchaser currently does not have this weapon system in its inventory; however they have the previous version, the MK 46 Lightweight Torpedo.

6. The following MK 54 components and support equipment being conveyed by the proposed sale that is considered sensitive and are classified SECRET include: MK 54 LWT hardware, MK 695 Torpedo System Test Set Software, Torpedo Firing Evaluation equipment Software, and Data Analysis Tool Set software. The Classified MK 54 Publication with the proposed sale include: Torpedo MK 54 Mod 0 General Information Book, MK 54 Employment Manual, MK 20 Mod 1 Exploder Description, Operation, Maintenance, and Illustrated Parts Breakdown, and MK 440 Mod 1 Exploder Test Set Description, Operation and Illustrated Parts Breakdown.

7. The MK–36 Mod 6 Super Rapid Blooming Off-board Chaff (SRBOC) and Decoy Launching System is an unclassified shipboard, deck-mounted, 6 barrel mortar-type array that launched chaff countermeasures against a variety of threats. Following launch and dispersion, MK 36 SRBOC chaff and infrared countermeasure are designed to lure hostile missiles away from ships under attack by creating false target sets.

8. The Standard Missile–2 Block IIIB proposed in this purchase will be used for Anti-Air Warfare test firings during Combat System Ship Qualification Trials. The following Standard Missile–2 BLK IIIB components and support equipment being conveyed by the proposed sale that is considered sensitive and are classified CONFIDENTIAL include completely assembled Standard Missile–2 BLK IIIB with or without a conventional warhead, whether a tactical, telemetry, or inert (training) configuration: Missile component hardware Guidance Section, Target Detection Device, Autopilot Battery Unit; SM–2 operator and maintenance documentation, shipboard operation/firing guidance. The purchaser currently has this missile in its inventory.

9. UHF SATCOM, the RT–1829 UHF SATCOM terminal is a commercially available SATCOM terminal that can provide ship-to-ship or ship-to-shore communications via voice or data connectivity. The device itself is CCI but is not classified until it is keyed with the proper keying material to enable secure communications. A single RT–1829 control interface can operate multiple voice and data communications nets simultaneously. The RT–1829 terminal is KITC and HAS certified to ensure compliance with legacy DAMA Mil-STDs. The purchaser currently has this UHF SATCOM on 5 of their surface ships.

10. The Link Level COMSEC (LLC) 7M device is a GOTS product which was developed by PEO C41/PMQ 150 in coordination with Raytheon and certified by the NSA. The device itself is CCI but is not classified until it is keyed with the proper keying material to enable secure communications via the LINK 22 system. It is a Type 1 COMSEC device which is intended to enable secure interoperable communications between the US, and NATO nations and Allied Forces via the LINK 22 System. Each device is handled by only the USG and the partner Nations COMSEC Custodians/Managers per the FMS agreement and no nation has the ability to tamper with or manipulate/maintain the system. The purchaser has previously purchased the LLC 7M for future integration with LINK 22 on many of their warships.

11. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

12. A determination has been made that Spain can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy

and national security objectives outlined in the Policy Justification.

13. All defense articles and services listed on this transmittal are authorized for release and export to the Government of Spain.

BILLING CODE 5001–06–C

Transmittal No. 18–0D

REPORT OF ENHANCEMENT OR UPGRADE OF SENSITIVITY OF TECHNOLOGY OR CAPABILITY (SEC. 36(B)(5)(C)), (AECA)

(i) *Purchaser:* Government of Norway

(ii) *Sec. 36(b)(1), AECA Transmittal No.:* 13–68

Date: December 18, 2013

Military Department: Air Force

(iii) *Description:* On December 18, 2013, Congress was notified by Congressional certification transmittal number 13–68, of the possible sale under Section 36(b)(1) of the Arms Export Control Act of C–130J technical, engineering and software support; software updates and patches; familiarization training for the Portable Flight Planning System (PFPS) and Joint Mission Planning System (JMPS); spare and repair parts; U.S. Government and contractor technical support services; and other related elements of logistics and program support. The estimated cost was $107 million, with no Major Defense Equipment (MDE).

This transmittal notifies the extension of non-MDE support provided to Norway's C–130J aircraft sustainment program, including additional distribution support for unclassified and classified software. Extending the sustainment case will result in an increase in non-MDE cost of $123 million. The total case value will increase to $230 million.

(iv) *Significance:* The addition of this funding to Norway's C–130J sustainment program represents an increase in capability over what was originally notified. The proposed sale will allow Norway to continue to effectively maintain its current fleet of C–130J fleet.

(v) *Justification:* This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally. Norway intends to use this technical, engineering, and software support to provide successful operation of the PFPS and JMPS. This program will increase Norway's ability to contribute to future NATO operations, support U.S. national security interests, and strengthen a critical, long-term strategic military partnership.

(vi) *Date Report Delivered to Congress:* July 6, 2018

POLICY JUSTIFICATION

The Netherlands—F–16 Formal Training Unit at Tucson Air National Guard Base (ANGB), Arizona

The Government of the Netherlands has requested to buy defense articles and services in support of continuation of a Continental United States (CONUS) based Royal Netherlands Air Force F–16 Formal Training Unit, to include up to twenty-seven (27) GBU–12 Inert Paveway IIs. Also included are PGU–27 Inert training rounds, Impulse Cartridges, MJU–7/B Flares, RR–188 Chaff, BDU–33/B and BDU–50/B training munitions, fuel and air refueling support, airlift services, base operating support, facilities, publications and technical documentation, pilot training, personnel training and training equipment, weapon system and software support, U.S. Government and contractor technical, engineering, and logistics personnel services, and other related elements of logistics and program support. The estimated program value is $110 million.

This proposed sale will support the foreign policy and national security objectives of the United States by improving the security of a NATO Ally which is an important force for political stability and economic progress in Europe.

This potential sale will continue to improve the Royal Netherlands Air Force's (RNLAF) ability to develop mission-ready and experienced pilots to support its F–16 aircraft inventory. The well-established pilot proficiency training program at Tucson Air National Guard Base will train pilots in F–16 operations, tactics, techniques, and procedures. This training will enhance the RNLAF's ability to continue contributions to Overseas Contingency Operations and to NATO air policing operations, as well as, to possible future coalitions operations. The Netherlands will have no difficulty absorbing this training.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

There is no prime contractor involved in this proposed sale. The Tucson Air National Guard will provide instruction, flight operations, and maintenance support and facilities with defense articles anticipated to come from U.S. stocks, as needed. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government personnel or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of India

(ii) *Total Estimated Value:*

Major Defense Equipment *	$340 million
Other	$590 million
TOTAL	$930 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* The Government of India has requested the sale of the following items in support of a proposed direct commercial sale of six (6) AH–64E Apache helicopters:

Major Defense Equipment (MDE):

Fourteen (14) T700–GE–701D

Four (4) AN/APG–78 Fire Control Radars

Four (4) Radar Electronic Units (REU) Block III

Four (4) AN/APR–48B Modernized Radar Frequency Interferometers (M–RFI's)

One hundred eighty (180) AGM–114L–3 Hellfire Longbow Missiles

Ninety (90) AGM–114R–3 Hellfire II Missiles

Two hundred (200) Stinger Block I–92H Missiles

Seven (7) Modernized Target Acquisition and Designation Sights (MTADS)/Pilot Night Vision Sensors (PNVS)

Fourteen (14) Embedded Global Positioning System/Inertial Navigation Systems (EGI)

Non-MDE: Also included are 2.75'' HE M151 rockets, training and dummy missiles, 30 mm cannons and ammunition, transponders, simulators, communication equipment, spare and repair parts, tools and test equipment, support equipment, repair and return support, personnel training and training equipment, publications and technical documentation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistic and program support.

(iv) *Military Department:* Army (IN–B–UAN)

(v) *Prior Related Cases, if any:* IN–B–UAH

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* June 12, 2018

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

India—Support for Direct Commercial Sale of AH–64E Apache Helicopters

The Government of India has requested to buy the following items in support of a proposed direct commercial sale of six (6) AH–64E Apache helicopters: fourteen (14) T700–GE–701D engines; four (4) AN/APG–78 Fire Control Radars; four (4) Radar Electronic Units (REU) Block III; four (4) AN/APR–48B Modernized Radar Frequency Interferometers (M–RFI's); one hundred eighty (180) AGM–114L–3 Hellfire Longbow missiles; ninety (90) AGM–114R–3 Hellfire II missiles; two hundred (200) Stinger Block I–92H missiles; seven (7) Modernized Target Acquisition Designation Sight/Pilot Night Vision Sensors (MTADS–PNVS); and fourteen (14) Embedded GPS Inertial Navigation Systems (EGI). Also included are rockets, training and dummy missiles, 30 mm cannons and ammunition, transponders, simulators, communication equipment, spare and repair parts, tools and test equipment, support equipment, repair and return support, personnel training and training equipment, publications and technical documentation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistic and program support. The total estimated program cost is $930 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to strengthen the U.S.-Indian strategic relationship and to improve the security of an important partner which continues to be an important force for political stability, peace, and economic progress in South Asia.

The proposed sale is in conjunction with and in support of a proposed direct commercial sale of six (6) AH–64E Apache helicopters, and will strengthen India's ability to defend its homeland and deter regional threats. This support for the AH–64E will provide an increase in India's defensive capability to counter ground-armored threats and modernize its armed forces. India will have no difficulty absorbing the helicopters and support equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractors will be Lockheed Martin Corporation, Orlando, FL; General Electric Company, Cincinnati, OH; Lockheed Martin Mission Systems and Sensors, Owego, NY; Longbow Limited Liability Corporation, Orlando, FL; and Raytheon Company, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require U.S. Government or contractor representatives to travel to India for a period of one week at a time to conduct a detailed discussion of the various aspects of the hybrid program with Government of India representatives. Additional travel will be required for equipment de-processing/fielding, system checkout and new equipment training and Contractor Furnished Service Representatives (CFSR) for a period of thirty months.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–18

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AN/APG–78 Fire Control Radar (FCR) is an active, low-probability of intercept, millimeter-wave radar, combined with a passive Modernized Radar Frequency Interferometer (MRFI) mounted on top of the helicopter mast. The FCR Ground Targeting Mode detects, locates, classifies and prioritizes stationary or moving armored vehicles, tanks and mobile air defense systems as well as hovering helicopters, helicopters, and fixed wing aircraft in normal flight. The MRFI detects threat radar emissions and determines the type of radar and mode of operation. The FCR data and MRFI data are fused for maximum synergism. If desired, the radar data can be used to refer targets to the regular electro-optical Target Acquisition and Designation Sight (TADS), Modernized Target Acquisition and Designation Sight (MTADS), permitting additional visual/infrared imagery and control of weapons, including the semi active laser version of the Hellfire. Critical system information is stored in the FCR in the form of mission executable code, target detection, classification algorithms and coded threat parametrics. This information is provided in a form that cannot be extracted by the foreign user due to anti-tamper provisions built into the system. The content of these items is classified SECRET.

2. The Modernized Target Acquisition and Designation Sight/Modernized Pilot Night Vision Sensor (M–TADS/M–PNVS) provides second generation day, night, limited adverse weather target

information, as well as night navigation capabilities. The MPNVS provides second generation thermal imaging that permits nap-of-the-earth flight to, from, and within the battle area, while M–TADS provides the co-pilot gunner with improved search, detection, recognition, and designation by means of Direct View Optics (DVO), I^2 television, second generation Forward Looking Infrared (FLIR) sighting systems that may be used singularly or in combinations. Hardware and releasable technical manuals are UNCLASSIFIED.

3. The AN/APR–48B Modernized Radar Frequency Interferometer (M–RFI) is an updated version of the passive radar detection and direction finding system. It utilizes a detachable User Data Module (UDM) on the M–RFI processor, which contains the Radar Frequency (RF) threat library. The UDM, which is a hardware assemblage item, is classified CONFIDENTIAL when programmed with threat parametrics, threat priorities and/or techniques derived from U.S. intelligence information. Hardware becomes CLASSIFIED when populated with threat parametric data. Releasable technical manuals are UNCLASSIFIED.

4. The Hellfire AGM–114 missile is an air-to-surface missile with a multi-mission, multi target, precision strike capability. The Hellfire can be launched from multiple air platforms and is the primary precision weapon for the United States.

a. The Hellfire Longbow Missile (AGM–114L3) provides an adverse weather, fire-and-forget missile version of the Hellfire Missile System, incorporating a millimeter wave radar seeker on a Hellfire II aft section bus. The Hellfire Longbow Missile is designed to engage and defeat individual hardpoint targets and minimize exposure time to enemy fire, which greatly increases the AH–64E Longbow survivability factor. The AGM–114L3 non-NATO export version will be provided. The weapon system hardware, as an ''All Up Round'', is UNCLASSIFIED. The AGM–114L3 missile software is SECRET. The highest level of classified information that could be disclosed by a proposed sale or by testing of the end item is SECRET and the highest level that must be disclosed for production, maintenance, or training is CONFIDENTIAL. Vulnerability data, countermeasures, vulnerability/susceptibility analyses, and threat definitions are classified SECRET or CONFIDENTIAL.

b. The highest level for release of the AGM–114R Hellfire II missile is SECRET, based upon the software. The highest level of classified information that could be disclosed by a proposed sale or by testing the end item is SECRET; the highest level that must be disclosed for production, maintenance, or training is CONFIDENTIAL. Reverse engineering could reveal CONFIDENTIAL information. Vulnerability data, Countermeasures, vulnerability/susceptibility analyses, and threat definitions are classified up to SECRET.

5. The STINGER Block I 92H International Missile System, hardware, software and documentation contain SENSITIVE technology and are classified CONFIDENTIAL. The guidance section of the missile and captive flight trainer contain highly SENSITIVE technology and are classified CONFIDENTIAL. No man-portable grip stocks will be sold under this LOA.

Missile system hardware and fire unit components contain SENSITIVE critical technologies. STINGER critical technology is primarily in the area of design and production know-how and not end-items. This SENSITIVE/critical technology is inherent in the hybrid microcircuit assemblies; microprocessors; magnetic and amorphous metals; purification; firmware; printed circuit boards; laser range finder; dual detector assembly; detector filters; missile software; optical coatings; ultraviolet sensors; semi-conductor detectors infrared band sensors; compounding and handling of electronic, electro-optic, and optical materials; equipment operating instructions; energetic materials formulation technology; energetic materials fabrication and loading technology; and warhead components seeker assembly. Information on vulnerability to electronic countermeasures and countermeasures, system performance capabilities and effectiveness, and test data are classified up to SECRET.

6. The Stinger Captive Flight Trainer (CFT) is a Stinger missile guidance assembly in a launch tube. The CFT provides operator training in target acquisition, tracking, engagement, loading/unloading and sustainment training at the unit. The hardware is classified CONFIDENTIAL. Releasable technical manuals are UNCLASSIFIED.

7. If a technologically advanced adversary were to obtain knowledge of specific hardware, the information could be used to develop countermeasures which might reduce weapons system effectiveness or be used in the development of a system with similar or advanced capabilities.

8. A determination has been made that India can provide substantially the same degree of protection for sensitive technology being released as the U.S. Government. This proposed sustainment program is necessary to the furtherance of the U.S. foreign policy and national security objectives outlined in the policy justification.

9. All defense articles and services listed on this transmittal are authorized for release and export to the Government of the India.

BILLING CODE 5001–60–C

Transmittal No. 17–37

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Bahrain

(ii) *Total Estimated Value:*

Major Defense Equipment *	$38 million
Other	$ 7 million
TOTAL	$45 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

One thousand five hundred (1,500) MK–82 (500lbs) General Purpose (GP) Bomb Bodies

Six hundred (600) MK–83 (1,000lbs) GP Bomb Bodies

Six hundred (600) MK–84 (2,000lbs) GP Bomb Bodies

Five hundred (500) BLU–109 (2,000lbs) Penetrator Warhead Bomb Bodies

Non-MDE includes: Also included are spares, and repair parts, support equipment, personnel training and training equipment, shipping and logistics services, publications and technical documentation, U.S. Government and contractor technical support services, containers, munitions components, test equipment, and other related elements of logistics and program support.

(iv) *Military Department:* Air Force (X7–D–AAN)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* None

(viii) *Date Report Delivered to Congress:* May 17, 2018

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Government of Bahrain—Munitions

The Government of Bahrain has requested three thousand two hundred (3,200) General Purpose (GP) and Penetrator Warhead bomb bodies to include: one thousand five hundred (1,500) MK–82 (500lbs) GP bomb bodies, six hundred (600) MK–83 (1,000lbs) GP bomb bodies, six hundred (600) MK–84 (2,000lbs) GP bomb bodies, and five hundred (500) BLU–109 (2,000lbs) Penetrator Warhead bomb bodies. Also included are spares and repair parts, support equipment, personnel training and training equipment, shipping and logistics services, publications and technical documentation, U.S. Government and contractor technical support services, containers, munitions components, test equipment, and other related elements of logistics and program support. The estimated total cost is $45 million.

This proposed sale will enhance the foreign policy and national security objectives of the United States by helping to improve the security of a major non-NATO ally which is an important security partner in the region. The purchase of these munitions will bolster the Royal Bahraini Air Force's ability to conduct and sustain air operations with its F–16 combat aircraft. Our mutual defense interests anchor our relationship and the Royal Bahraini Air Force plays a significant role in Bahrain's defense.

The proposed sale will improve Bahrain's capability to meet current and future security threats. Bahrain will use these munitions as a deterrent to regional threats, strengthen its homeland defense, and execute counter-terrorism operations. The GP bomb bodies would also better equip Bahrain to operate with U.S.-led and U.S.-supported coalition operations. Bahrain will have no difficulty absorbing these munitions into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

There is no prime contractor planned for this effort; the munitions will be provided by the U.S. Government out of stock. There are no offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. or contractor representatives to Bahrain.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Denmark—AIM–120 C–7 Advanced Medium Range Air-to-Air Missile (AMRAAM)

The Government of Denmark has requested to buy twenty-eight (28) AIM–120 C–7 Advanced Medium Range Air-to-Air Missiles (AMRAAM) and one (1) AMRAAM spare guidance section. Also included are missile containers, control section spares, weapon systems support, test equipment, spare and repair parts, publications and technical documentation, personnel training, training equipment, U.S. Government and contractor engineering, logistics, and technical support services, and other related elements of logistics and program support. The total estimated program cost is $90 million.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a NATO ally that is an important force for political stability and economic progress in the European region.

This proposed sale would support Denmark's F–16 and future F–35 fighter programs and enhance Denmark's ability to provide for its own territorial defense and support coalition operations. The proposed sale also enables interoperability and standardization between the armed forces of Denmark and the United States. Denmark already maintains the AIM–120B in its inventory and will have no difficulty absorbing this additional equipment and support into its armed forces.

The proposed sale of these systems and equipment will not alter the basic military balance in the region.

The principal contractor will be Raytheon Cooperation in Tucson, Arizona. The purchaser has requested offsets. At this time, agreements are undetermined and will be defined in negotiations between the purchaser and contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Denmark.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 18–24

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. AIM–120C Advance Medium Range Air-to-Air (AMRAAM) is a radar-guided missile featuring digital technology and micro-miniature solid-state electronics. AMRAAM capabilities include look-down/shoot-down, multiple launches against multiple targets, resistance to electronic counter measures, and interception of high flying and low flying and maneuvering targets. The AMRAAM All Up Round is classified CONFIDENTIAL, major components and subsystems range from UNCLASSIFIED to CONFIDENTIAL, and technology data and other documentation are classified up to SECRET.

2. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

3. A determination has been made that Denmark can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal have been authorized for release and export to Denmark.

DEPARTMENT OF EDUCATION

Applications for New Awards; Technical Assistance and Dissemination To Improve Services and Results for Children With Disabilities—Technical Assistance and Dissemination Center on Improving Literacy Through Supporting Elementary School Leaders

AGENCY: Office of Special Education and Rehabilitative Services, Department of Education.

ACTION: Notice.

SUMMARY: The Department of Education (Department) is issuing a notice inviting applications for new awards for fiscal year (FY) 2018 for Technical Assistance and Dissemination to Improve Services and Results for Children With Disabilities—Technical Assistance and Dissemination Center on Improving Literacy through Supporting Elementary School Leaders, Catalog of Federal Domestic Assistance (CFDA) number 84.326L.

DATES:

Applications Available: July 31, 2018.

Deadline for Transmittal of Applications: August 30, 2018.

ADDRESSES: For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 12, 2018 (83 FR 6003) and available at *www.gpo.gov/fdsys/pkg/FR-2018-02-12/pdf/2018-02558.pdf.*

FOR FURTHER INFORMATION CONTACT: Kristen Rhoads, U.S. Department of Education, 400 Maryland Avenue SW, Room 5142, Potomac Center Plaza, Washington, DC 20202–5108.

Telephone: (202) 245–6715. Email: *Kristen.Rhoads@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Full Text of Announcement

I. Funding Opportunity Description

Purpose of Program: The purpose of the Technical Assistance and Dissemination to Improve Services and Results for Children with Disabilities program is to promote academic achievement and to improve results for children with disabilities by providing technical assistance (TA), supporting model demonstration projects, disseminating useful information, and implementing activities that are supported by scientifically based research.

Priority: In accordance with 34 CFR 75.105(b)(2)(v), this priority is from allowable activities specified in the statute (see sections 663 and 681(d) of the Individuals with Disabilities Education Act (IDEA); 20 U.S.C. 1463 and 1481(d)).

Absolute Priority: For FY 2018 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

Technical Assistance and Dissemination Center on Improving Literacy through Supporting Elementary School Leaders.

Background:

The mission of the Office of Special Education and Rehabilitative Services (OSERS) is to improve early childhood, educational, and employment outcomes and raise expectations for all people with disabilities, their families, their communities, and the Nation.

The National Reading Panel report (2000) and RAND report *Reading for Understanding* (Snow, 2001) have influenced reading instruction in the United States for the last two decades (Connor & Al Otaiba, 2015). During this time, reading instruction in the primary grades has improved by targeting important literacy skills highlighted in the reports and becoming more systematic in how these skills are taught (S. Baker, Fien, & Baker, 2010).

Despite noted improvements in reading instruction, the gap between students with disabilities and their peers on the National Assessment of Educational Progress (NAEP) has increased in both fourth and eighth grades since 2009 (U.S. Department of Education, 2017). In addition, less than 50 percent of teachers surveyed report that they adhere to their core reading curricula, and more than 60 percent of teachers report that they continue to use an ''eclectic approach'' combining different instructional methods for teaching reading (Kretlow & Helf, 2013). Kretlow and Helf also reported that most of the curricula teachers used had not been evaluated for impact on student learning. Also, according to the Schools and Staffing Survey (Rotermund, DeRoche, & Ottem, 2017), 43 percent of teachers reported receiving no professional development on reading instruction in the last 12 months. Further, in a separate survey, two-thirds of teachers reported receiving fewer than eight hours of professional development on reading instruction during the last year, an intensity unlikely to improve the quality of reading instruction that they provide or result in improved student outcomes (Wei, Darling-Hammond, & Adamson, 2010; Yoon, Duncan, Lee, Scarloss, & Shapley, 2007).

School leaders (as defined in this notice) have the ability to affect these trends, and research has clearly demonstrated the effects that they can have on the academic performance of their schools (Herman et al., 2017; Horng, Kalogrides, & Loeb, 2009; Leithwood, Seashore-Louis, Anderson, & Wahlstrom, 2004). The Professional Standards for Educational Leaders,[1] developed by the National Policy Board for Educational Administration (2015), illustrate the variety of activities under the purview of school leaders. School leaders' responsibilities include managing school operations and resources, including managing budgets, resources, and hiring personnel; overseeing curriculum, instruction, and assessment; striving for equity in educational opportunity for each student; developing the professional capacity and practice of school personnel; and engaging in internal and external relations including fostering a professional community of school personnel and engaging families and the community (Horng, Klasik, & Loeb, 2010; National Policy Board for Educational Administration, 2015).

School leaders' organizational management activities, such as managing budget and resources and hiring staff, make the school organization work and provide support for teaching and learning (Grissom & Loeb, 2011). These types of activities, as well as school leaders spending more time on them, have shown consistent associations with positive student academic outcomes (Grissom & Loeb, 2011).

There have been mixed findings regarding the extent to which school leaders' instruction-related activities, such as overseeing the curriculum and providing professional development for staff, are associated with improved student outcomes (Horng et al., 2010; Robinson, Lloyd, & Rowe, 2008). A number of possible explanations for this variation exist, including potential variation in the quantity of time spent on instructional management, the specific types of instruction-related activities school leaders engage in (Grissom, Loeb, & Master, 2013), and the quality of instructional management training received by school leaders. In particular, some researchers have argued that current training on instruction-related activities may be too narrow and may not include training in the organizational management skills that help school leaders target resources effectively in addressing the instructional needs of their students (Grissom & Loeb, 2011).

The Center on Improving Literacy through Supporting Elementary School Leaders (the Center) will provide TA for school leaders on instructional content and leadership skills to improve teacher implementation of evidence-based (as defined in this notice) literacy practices and literacy skills of students with, or at risk for, literacy-related disabilities. Specifically, the Center will provide TA for LEAs and their school leaders on a variety of topics, namely: Providing professional development, including coaching, to their teachers and other instructional personnel on literacy; developing education programming related to literacy; allocating resources efficiently and effectively so that students with, or at risk for, literacy-related disabilities have access to literacy instruction and interventions that meet their individual needs; and improving teacher implementation of evidence-based literacy instruction in their schools and, ultimately, literacy outcomes for their students with, or at risk for, literacy-related disabilities. The Center may build upon the work of, and collaborate with, other Department TA centers including the National Center on Improving Literacy, the National Center on Intensive Intervention, and the Center on Great Teachers and Leaders. The work of this Center will not duplicate work being conducted by

[1] For more information about the Professional Standards for Educational Leaders, please see *http://npbea.org/wp-content/uploads/2017/06/PSEL-WebinarPowerPointSlides.pdf.*

other Department TA Centers. This priority is consistent with the Secretary's Final Supplemental Priorities and Definitions for Discretionary Grant Programs, published in the **Federal Register** on March 2, 2018 (83 FR 9096) (Supplemental Priorities): Supplemental Priority 5—Meeting the Unique Needs of Students and Children With Disabilities and/or Those With Unique Gifts and Talents; Supplemental Priority 7—Promoting Literacy; and Supplemental Priority 8—Promoting Effective Instruction in Classrooms and Schools.

Priority:

The purpose of this priority is to fund a cooperative agreement to establish and operate a Center on Improving Literacy through Supporting Elementary School Leaders (Literacy through Leaders). The Center will provide targeted TA to school leaders on literacy skills and concepts (*e.g.,* phonemic awareness, comprehension) and leadership skills (*e.g.,* coaching, instructional management and programming, organizational management) related to improving teachers' implementation of evidence-based literacy practices and literacy outcomes for their students with, or at risk for, literacy-related disabilities. The Center will support school leaders in recognizing evidence-based literacy practices for students with, or at risk for, literacy-related disabilities and facilitating the implementation of these practices through developing education programming and professional development efforts, including coaching teachers. The Center must achieve, at a minimum, the following expected outcomes:

(a) Improved literacy achievement and skills of students with, or at risk for, literacy-related disabilities;

(b) Improved capacity of school leaders for identifying and supporting the implementation of evidence-based literacy practices, including assessments, that improve teachers' practices as well as literacy achievement and skills of students with, or at risk for, literacy-related disabilities;

(c) Improved capacity of teachers and other instructional personnel to implement with fidelity evidence-based literacy practices, including assessments, that improve literacy achievement and skills of students with, or at risk for, literacy-related disabilities;

(d) Improved quality of literacy instruction throughout the school; and

(e) Reduction in the number of students inappropriately referred for special education and related services.

In addition to these programmatic requirements, to be considered for funding under this priority, applicants must meet the application and administrative requirements in this priority, which are:

(a) Demonstrate, in the narrative section of the application under ''Significance of the Project,'' how the proposed project will—

(1) Address current and emerging needs of elementary school leaders to improve teacher implementation of evidence-based literacy practices and outcomes of their students with, or at risk for, literacy-related disabilities. To meet this requirement the applicant must—

(i) Present applicable national, State, regional, or local data demonstrating the need to address elementary school leaders' knowledge of evidence-based literacy practices and leadership skills with the goal of improving teacher implementation of evidence-based literacy practices and, ultimately, the literacy outcomes of their students with, or at risk for, literacy-related disabilities;

(ii) Demonstrate knowledge of current educational issues and policy initiatives relating to implementing and sustaining professional learning practices and activities for elementary school leaders that have evidence for producing positive effects on teacher implementation of evidence-based literacy practices in their schools, students' literacy achievement, or reducing the numbers of students inappropriately referred for needing special education and related services; and

(iii) Present information about the current level of implementation of:

(A) Practices and activities focused on improving leadership skills of elementary school leaders, including developing educational programming, allocating resources for instruction and intervention effectively and efficiently, and providing professional development to teachers in their schools; and

(B) Evidence-based literacy instruction, intervention, and assessment for students with, or at risk for, literacy-related disabilities in elementary schools;

(2) Improve elementary school leaders' literacy-related knowledge and leadership skills; their schools' literacy-related core instruction, supplemental intervention, and assessment; and literacy-related outcomes for students with, or at risk for, disabilities and indicate the likely magnitude or importance of the improvements.

(b) Demonstrate, in the narrative section of the application under ''Quality of the Project Services,'' how the proposed project will—

(1) Ensure equal access and treatment for members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability. To meet this requirement, the applicant must describe how it will—

(i) Identify the needs of the intended recipients for TA and information; and

(ii) Ensure that services and products meet the needs of the intended recipients of the grant;

(2) Achieve its goals, objectives, and intended outcomes. To meet this requirement, the applicant must provide—

(i) Measurable intended project outcomes; and

(ii) In Appendix A, the logic model (as defined in this notice) by which the proposed project will achieve its intended outcomes that depicts, at a minimum, the goals, activities, outputs, and intended outcomes of the proposed project;

(3) Use a conceptual framework (and provide a copy in Appendix A) to develop project plans and activities, describing any underlying concepts, assumptions, expectations, beliefs, or theories, as well as the presumed relationships or linkages among these variables, and any empirical support for this framework;

Note: The following websites provide more information on logic models and conceptual frameworks: *www.osepideasthatwork.org/logicModel* and *www.osepideasthatwork.org/resources-grantees/program-areas/ta-ta/tad-project-logic-model-and-conceptual-framework.*

(4) Be based on current research and make use of evidence-based practices (EBPs). To meet this requirement, the applicant must describe—

(i) The current research on professional learning practices for school leaders, particularly elementary school leaders, and school leader behaviors or characteristics that are associated with improved classroom teaching practices and positive student literacy-related outcomes and on related EBPs that will inform the proposed TA;

(ii) The current research about adult learning principles and implementation science that will inform the proposed TA;

(iii) How the proposed project will incorporate current research and EBPs in the development and delivery of its products and services; and

(5) Develop products and provide services that are of high quality and sufficient intensity and duration to achieve the intended outcomes of the

proposed project. To address this requirement, the applicant must describe—

(i) How it proposes to identify or develop the knowledge base on effective practices for improving literacy knowledge and instructional and organizational management capacity of elementary school leaders;

(ii) Its proposed approaches to providing varying levels of intensity of TA (*i.e.,* universal,[2] targeted,[3] intensive [4]) based on the needs of the field and available resources. The applicant must identify the intended recipients (*e.g.,* local educational agencies (LEAs) and school leaders in sites other than traditional public elementary school settings where students are supported under IDEA, including private schools), including the type and number of recipients, that will receive the products and services through each approach and how they plan to reach a variety of settings and populations (*e.g.,* urban, rural, suburban); and

(A) For implementing targeted, specialized TA, its proposed approach to measure the readiness of potential TA recipients (*e.g.,* LEAs) to work with the project, assessing, at a minimum, their current infrastructure, available resources, and ability to build capacity at the local level; and

(B) For implementing intensive, sustained TA, its proposed approach to measure the readiness of the LEAs and elementary school leaders to work with the project, including their commitment to the initiative, alignment of the initiative to their needs, current infrastructure, available resources, and ability to build capacity at the local district and school level; and its proposed plan for working with appropriate levels of the education system (*e.g.,* State education agencies (SEAs), regional TA providers, districts, schools, families) to ensure that there is communication between each level and that there are systems in place to support the use of evidence-based literacy practices;

(6) Develop products and implement services that maximize efficiency. To address this requirement, the applicant must describe—

(i) How the proposed project will use technology to achieve the intended project outcomes;

(ii) With whom the proposed project will collaborate and not duplicate (*e.g.,* The National Center on Improving Literacy, National Center on Intensive Intervention, State Implementation and Scaling-up of Evidence-based Practices Center, and related professional organizations, including those that offer training programs targeting school leaders) and the intended outcomes of this collaboration; and

(iii) How the proposed project will use non-project resources to achieve the intended project outcomes.

(c) In the narrative section of the application under ''Quality of the Evaluation Plan,'' include an evaluation plan for the project developed in consultation with and implemented by a third-party evaluator.[5] The evaluation plan must—

(1) Articulate formative and summative evaluation questions, including important process and outcome evaluation questions. These questions should be related to the project's proposed logic model required in paragraph (b)(2)(ii) of this notice;

(2) Describe how progress in and fidelity of implementation, as well as project outcomes, including how successfully materials are disseminated to, and used by, relevant stakeholder groups and professional organizations, will be measured to answer the evaluation questions. Specify the measures and associated instruments or sources for data appropriate to the evaluation questions. Include information regarding reliability and validity of measures where appropriate;

(3) Describe strategies for analyzing data and how data collected as part of this plan will be used to inform and improve service delivery over the course of the project and to refine the proposed logic model and evaluation plan, including subsequent data collection;

(4) Provide a timeline for conducting the evaluation, and include staff assignments for completing the plan. The timeline must indicate that the data will be available annually for the Annual Performance Report (APR) and at the end of Year 2 for the review process described under the heading, *Fourth and Fifth Years of the Project;*

(5) Dedicate sufficient funds in each budget year to cover the costs of developing or refining the evaluation plan in consultation with a ''third-party'' evaluator, as well as the costs associated with the implementation of the evaluation plan by the third-party evaluator.

(d) Demonstrate, in the narrative section of the application under ''Adequacy of Project Resources,'' how—

(1) The proposed project will encourage applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability, as appropriate;

(2) The proposed key project personnel, consultants, and subcontractors have the qualifications and experience to carry out the proposed activities and achieve the project's intended outcomes;

(3) The applicant and any key partners have adequate resources to carry out the proposed activities; and

(4) The proposed costs are reasonable in relation to the anticipated results and benefits.

(e) Demonstrate, in the narrative section of the application under ''Quality of the Management Plan,'' how—

(1) The proposed management plan will ensure that the project's intended outcomes will be achieved on time and within budget. To address this requirement, the applicant must describe—

(i) Clearly defined responsibilities for key project personnel, consultants, and subcontractors, as applicable; and

(ii) Timelines and milestones for accomplishing the project tasks;

(2) Key project personnel and any consultants and subcontractors will be allocated and how these allocations are

[2] ''Universal, general TA'' means TA and information provided to independent users through their own initiative, resulting in minimal interaction with TA center staff and including one-time, invited or offered conference presentations by TA center staff. This category of TA also includes information or products, such as newsletters, guidebooks, fact sheets, issues briefs, massive open online courses (MOOCs), or research syntheses, downloaded from the TA center's website by independent users. Brief communications by TA center staff with recipients, either by telephone or email, are also considered universal, general TA.

[3] ''Targeted, specialized TA'' means TA services based on needs common to multiple recipients and not extensively individualized. A relationship is established between the TA recipient and one or more TA center staff. This category of TA includes one-time, labor-intensive events, such as facilitating strategic planning or hosting regional or national conferences. It can also include episodic, less labor-intensive events that extend over a period of time, such as facilitating a series of conference calls on single or multiple topics that are designed around the needs of the recipients. Facilitating communities of practice can also be considered targeted, specialized TA.

[4] ''Intensive, sustained TA'' means TA services often provided on-site and requiring a stable, ongoing relationship between the TA center staff and the TA recipient. ''TA services'' are defined as negotiated series of activities designed to reach a valued outcome. This category of TA should result in changes to policy, program, practice, or operations that support increased recipient capacity or improved outcomes at one or more systems levels.

[5] A ''third-party'' evaluator is an independent and impartial program evaluator who is contracted by the grantee to conduct an objective evaluation of the project. This evaluator must not have participated in the development or implementation of any project activities, except for the evaluation activities, nor have any financial interest in the outcome of the evaluation.

appropriate and adequate to achieve the project's intended outcomes;

(3) The proposed management plan will ensure that the products and services provided are of high quality, relevant, and useful to recipients; and

(4) The proposed project will benefit from a diversity of perspectives, including those of families, educators, TA providers, researchers, and policy makers, among others, in its development and operation.

(f) Address the following application requirements. The applicant must—

(1) Include, in Appendix A, personnel-loading charts and timelines, as applicable, to illustrate the management plan described in the narrative;

(2) Include, in the budget, attendance at the following:

(i) A one and one-half day kick-off meeting in Washington, DC, after receipt of the award, and an annual planning meeting in Washington, DC, with the OSEP project officer and other relevant staff during each subsequent year of the project period.

Note: Within 30 days of receipt of the award, a post-award teleconference must be held between the OSEP project officer and the grantee's project director or other authorized representative;

(ii) A two and one-half day project directors' conference in Washington, DC, during each year of the project period;

(iii) One annual trip to attend Department briefings, Department-sponsored conferences, and other meetings, as requested by OSEP; and

(iv) A one-day intensive 3+2 review meeting in Washington, DC, during the last half of the second year of the project period;

(3) Include, in the budget, a line item for an annual set-aside of five percent of the grant amount to support emerging needs that are consistent with the proposed project's intended outcomes, as those needs are identified in consultation with, and approved by, the OSEP project officer. With approval from the OSEP project officer, the project must reallocate any remaining funds from this annual set-aside no later than the end of the third quarter of each budget period;

(4) Maintain a high-quality website, with an easy-to-navigate design, that meets government or industry-recognized standards for accessibility; and

(5) Include, in Appendix A, an assurance to assist OSEP with the transfer of pertinent resources and products and to maintain the continuity of services to States during the transition to this new award period and at the end of this award period, as appropriate.

Fourth and Fifth Years of the Project:

In deciding whether to continue funding the project for the fourth and fifth years, the Secretary will consider the requirements of 34 CFR 75.253(a), as well as—

(a) The recommendation of a 3+2 review team consisting of experts selected by the Secretary. This review will be conducted during a one-day intensive meeting that will be held during the last half of the second year of the project period;

(b) The timeliness with which, and how well, the requirements of the negotiated cooperative agreement have been or are being met by the project; and

(c) The quality, relevance, and usefulness of the project's products and services and the extent to which the project's products and services are aligned with the project's objectives and likely to result in the project achieving its intended outcomes.

Definitions: The following definitions are from 34 CFR 77.1 and section 8101 of the Elementary and Secondary Education Act, as amended by the Every Student Succeeds Act (ESEA), as marked.

Demonstrates a rationale (34 CFR 77.1) means a key project component included in the project's logic model is informed by research or evaluation findings that suggest the project component is likely to improve relevant outcomes.

Evidence-based (34 CFR 77.1) means the proposed project component is supported by one or more of strong evidence, moderate evidence, promising evidence, or evidence that demonstrates a rationale.

Experimental study (34 CFR 77.1) means a study that is designed to compare outcomes between two groups of individuals (such as students) that are otherwise equivalent except for their assignment to either a treatment group receiving a project component or a control group that does not. Randomized controlled trials, regression discontinuity design studies, and single-case design studies are the specific types of experimental studies that, depending on their design and implementation (*e.g.,* sample attrition in randomized controlled trials and regression discontinuity design studies), can meet What Works Clearinghouse (WWC) standards without reservations as described in the WWC Handbook:

(i) A randomized controlled trial employs random assignment of, for example, students, teachers, classrooms, or schools to receive the project component being evaluated (the treatment group) or not to receive the project component (the control group).

(ii) A regression discontinuity design study assigns the project component being evaluated using a measured variable (*e.g.,* assigning students reading below a cutoff score to tutoring or developmental education classes) and controls for that variable in the analysis of outcomes.

(iii) A single-case design study uses observations of a single case (*e.g.,* a student eligible for a behavioral intervention) over time in the absence and presence of a controlled treatment manipulation to determine whether the outcome is systematically related to the treatment.

Logic model (34 CFR 77.1) (also referred to as a theory of action) means a framework that identifies key project components of the proposed project (*i.e.,* the active ''ingredients'' that are hypothesized to be critical to achieving the relevant outcomes) and describes the theoretical and operational relationships among the key project components and relevant outcomes.

Moderate evidence (34 CFR 77.1) means that there is evidence of effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations or settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1 or 3.0 of the WWC Handbook reporting a ''strong evidence base'' or ''moderate evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1 or 3.0 of the WWC Handbook reporting a ''positive effect'' or ''potentially positive effect'' on a relevant outcome based on a ''medium to large'' extent of evidence, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study or quasi-experimental design study reviewed and reported by the WWC using version 2.1 or 3.0 of the WWC Handbook, or otherwise assessed by the Department using version 3.0 of the WWC Handbook, as appropriate, and that—

(A) Meets WWC standards with or without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1 or 3.0 of the WWC Handbook; and

(D) Is based on a sample from more than one site (*e.g.,* State, county, city, school district, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet requirements in paragraphs (iii)(A), (B), and (C) of this definition may together satisfy this requirement.

Project component (34 CFR 77.1) means an activity, strategy, intervention, process, product, practice, or policy included in a project. Evidence may pertain to an individual project component or to a combination of project components (*e.g.,* training teachers on instructional practices for English learners and follow-on coaching for these teachers).

Promising evidence (34 CFR 77.1) means that there is evidence of the effectiveness of a key project component in improving a relevant outcome, based on a relevant finding from one of the following:

(i) A practice guide prepared by WWC reporting a ''strong evidence base'' or ''moderate evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC reporting a ''positive effect'' or ''potentially positive effect'' on a relevant outcome with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single study assessed by the Department, as appropriate, that—

(A) Is an experimental study, a quasi-experimental design study, or a well-designed and well-implemented correlational study with statistical controls for selection bias (*e.g.,* a study using regression methods to account for differences between a treatment group and a comparison group); and

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome.

Quasi-experimental design study (34 CFR 77.1) means a study using a design that attempts to approximate an experimental study by identifying a comparison group that is similar to the treatment group in important respects. This type of study, depending on design and implementation (*e.g.,* establishment of baseline equivalence of the groups being compared), can meet WWC standards with reservations, but cannot meet WWC standards without reservations, as described in the WWC Handbook.

Relevant outcome (34 CFR 77.1) means the student outcome(s) or other outcome(s) the key project component is designed to improve, consistent with the specific goals of the program.

School leader (section 8101 of the ESEA) means a principal, assistant principal, or other individual who is—

(a) An employee or officer of an elementary school or secondary school, local educational agency, or other entity operating an elementary school or secondary school; and

(b) Responsible for the daily instructional leadership and managerial operations in the elementary school or secondary school building.

Strong evidence (34 CFR 77.1) means that there is evidence of the effectiveness of a key project component in improving a relevant outcome for a sample that overlaps with the populations and settings proposed to receive that component, based on a relevant finding from one of the following:

(i) A practice guide prepared by the WWC using version 2.1 or 3.0 of the WWC Handbook reporting a ''strong evidence base'' for the corresponding practice guide recommendation;

(ii) An intervention report prepared by the WWC using version 2.1 or 3.0 of the WWC Handbook reporting a ''positive effect'' on a relevant outcome based on a ''medium to large'' extent of evidence, with no reporting of a ''negative effect'' or ''potentially negative effect'' on a relevant outcome; or

(iii) A single experimental study reviewed and reported by the WWC using version 2.1 or 3.0 of the WWC Handbook, or otherwise assessed by the Department using version 3.0 of the

WWC Handbook, as appropriate, and that—

(A) Meets WWC standards without reservations;

(B) Includes at least one statistically significant and positive (*i.e.,* favorable) effect on a relevant outcome;

(C) Includes no overriding statistically significant and negative effects on relevant outcomes reported in the study or in a corresponding WWC intervention report prepared under version 2.1 or 3.0 of the WWC Handbook; and

(D) Is based on a sample from more than one site (*e.g.,* State, county, city, school district, or postsecondary campus) and includes at least 350 students or other individuals across sites. Multiple studies of the same project component that each meet requirements in paragraphs (iii)(A), (B), and (C) of this definition may together satisfy this requirement.

What Works Clearinghouse Handbook (WWC Handbook) (34 CFR 77.1) means the standards and procedures set forth in the WWC Procedures and Standards Handbook, Version 3.0 or Version 2.1 (incorporated by reference, see 34 CFR 77.2). Study findings eligible for review under WWC standards can meet WWC standards without reservations, meet WWC standards with reservations, or not meet WWC standards. WWC practice guides and intervention reports include findings from systematic reviews of evidence as described in the Handbook documentation.

Waiver of Proposed Rulemaking: Under the Administrative Procedure Act (APA) (5 U.S.C. 553) the Department generally offers interested parties the opportunity to comment on proposed priorities and requirements. Section 681(d) of IDEA, however, makes the public comment requirements of the APA inapplicable to the priority in this notice.

Program Authority: 20 U.S.C. 1463 and 1481.

Applicable Regulations: (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 79, 81, 82, 84, 86, 97, 98, and 99. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474.

Note: The regulations in 34 CFR part 79 apply to all applicants except federally recognized Indian Tribes.

Note: The regulations in 34 CFR part 86 apply to institutions of higher education (IHEs) only.

II. Award Information

Type of Award: Cooperative agreement.

Estimated Available Funds: $750,000.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2019 from the list of unfunded applications from this competition.

Maximum Award: We will not make an award exceeding $750,000 for a single budget period of 12 months.

Estimated Number of Awards: 1.

Note: The Department is not bound by any estimates in this notice.

Project Period: Up to 60 months.

III. Eligibility Information

1. *Eligible Applicants:* SEAs; State lead agencies under Part C of the IDEA; local educational agencies (LEAs), including public charter schools that operate as LEAs under State law; IHEs; other public agencies; private nonprofit organizations; freely associated States and outlying areas; Indian Tribes or Tribal organizations; and for-profit organizations.

2. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

3. *Subgrantees:* Under 34 CFR 75.708(b) and (c) a grantee under this competition may award subgrants—to directly carry out project activities described in its application—to the following types of entities: IHEs and private nonprofit organizations suitable to carry out the activities proposed in the application. The grantee may award subgrants to entities it has identified in an approved application.

4. *Other General Requirements:* (a) Recipients of funding under this competition must make positive efforts to employ and advance in employment qualified individuals with disabilities (see section 606 of IDEA).

(b) Applicants for, and recipients of, funding must, with respect to the aspects of their proposed project relating to the absolute priority, involve individuals with disabilities, or parents of individuals with disabilities ages birth through 26, in planning, implementing, and evaluating the project (see section 682(a)(1)(A) of IDEA).

IV. Application and Submission Information

1. *Application Submission Instructions:* For information on how to submit an application please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 12, 2018 (83 FR 6003) and available at *www.gpo.gov/fdsys/pkg/FR-2018-02-12/pdf/2018-02558.pdf.*

2. *Intergovernmental Review:* This competition is subject to Executive Order 12372 and the regulations in 34 CFR part 79. However, under 34 CFR 79.8(a), we waive intergovernmental review in order to make an award by the end of FY 2018.

3. *Funding Restrictions:* We reference regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Recommended Page Limit:* The application narrative (Part III of the application) is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 70 pages, and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1″ margins at the top, bottom, and both sides.
- Double-space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, reference citations, and captions, as well as all text in charts, tables, figures, graphs, and screen shots.
- Use a font that is 12 point or larger.
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to Part I, the cover sheet; Part II, the budget section, including the narrative budget justification; Part IV, the assurances and certifications; or the abstract (follow the guidance provided in the application package for completing the abstract), the table of contents, the list of priority requirements, the resumes, the reference list, the letters of support, or the appendices. However, the recommended page limit does apply to all of the application narrative, including all text in charts, tables, figures, graphs, and screen shots.

V. Application Review Information

1. *Selection Criteria:* The selection criteria for this competition are from 34 CFR 75.210 and are listed below:

(a) *Significance (10 points).*

(1) The Secretary considers the significance of the proposed project.

(2) In determining the significance of the proposed project, the Secretary considers the following factors:

(i) The extent to which specific gaps or weaknesses in services, infrastructure, or opportunities have been identified and will be addressed by the proposed project, including the nature and magnitude of those gaps or weaknesses.

(ii) The importance or magnitude of the results or outcomes likely to be attained by the proposed project.

(b) *Quality of project services (35 points).*

(1) The Secretary considers the quality of the services to be provided by the proposed project.

(2) In determining the quality of the services to be provided by the proposed project, the Secretary considers the quality and sufficiency of strategies for ensuring equal access and treatment for eligible project participants who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(3) In addition, the Secretary considers the following factors:

(i) The extent to which the goals, objectives, and outcomes to be achieved by the proposed project are clearly specified and measurable.

(ii) The extent to which there is a conceptual framework underlying the proposed research or demonstration activities and the quality of that framework.

(iii) The extent to which the services to be provided by the proposed project reflect up-to-date knowledge from research and effective practice.

(iv) The extent to which the training or professional development services to be provided by the proposed project are of sufficient quality, intensity, and duration to lead to improvements in practice among the recipients of those services.

(v) The extent to which the technical assistance services to be provided by the proposed project involve the use of efficient strategies, including the use of technology, as appropriate, and the leveraging of non-project resources.

(c) *Quality of the project evaluation (20 points).*

(1) The Secretary considers the quality of the evaluation to be conducted of the proposed project.

(2) In determining the quality of the evaluation, the Secretary considers the following factors:

(i) The extent to which the methods of evaluation are thorough, feasible, and appropriate to the goals, objectives, and outcomes of the proposed project.

(ii) The extent to which the methods of evaluation provide for examining the effectiveness of project implementation strategies.

(iii) The extent to which the methods of evaluation will provide performance feedback and permit periodic assessment of progress toward achieving intended outcomes.

(iv) The extent to which the methods of evaluation include the use of objective performance measures that are clearly related to the intended outcomes of the project and will produce quantitative and qualitative data to the extent possible.

(d) *Adequacy of resources and quality of project personnel (15 points).*

(1) The Secretary considers the adequacy of resources for the proposed project and the quality of the personnel who will carry out the proposed project.

(2) In determining the quality of project personnel, the Secretary considers the extent to which the applicant encourages applications for employment from persons who are members of groups that have traditionally been underrepresented based on race, color, national origin, gender, age, or disability.

(3) In addition, the Secretary considers the following factors:

(i) The qualifications, including relevant training and experience, of the project director or principal investigator.

(ii) The qualifications, including relevant training and experience, of key project personnel.

(iii) The qualifications, including relevant training and experience, of project consultants or subcontractors.

(iv) The qualifications, including relevant training, experience, and independence, of the evaluator.

(v) The adequacy of support, including facilities, equipment, supplies, and other resources, from the applicant organization or the lead applicant organization.

(vi) The relevance and demonstrated commitment of each partner in the proposed project to the implementation and success of the project.

(vii) The extent to which the budget is adequate to support the proposed project.

(viii) The extent to which the costs are reasonable in relation to the objectives, design, and potential significance of the proposed project.

(e) *Quality of the management plan (20 points).*

(1) The Secretary considers the quality of the management plan for the proposed project.

(2) In determining the quality of the management plan for the proposed project, the Secretary considers the following factors:

(i) The adequacy of the management plan to achieve the objectives of the proposed project on time and within budget, including clearly defined responsibilities, timelines, and milestones for accomplishing project tasks.

(ii) The extent to which the time commitments of the project director and principal investigator and other key project personnel are appropriate and adequate to meet the objectives of the proposed project.

(iii) The adequacy of mechanisms for ensuring high-quality products and services from the proposed project.

(iv) How the applicant will ensure that a diversity of perspectives are brought to bear in the operation of the proposed project, including those of parents, teachers, the business community, a variety of disciplinary and professional fields, recipients or beneficiaries of services, or others, as appropriate.

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department of Education (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

3. *Additional Review and Selection Process Factors:* In the past, the Department has had difficulty finding peer reviewers for certain competitions because so many individuals who are eligible to serve as peer reviewers have conflicts of interest. The standing panel requirements under section 682(b) of IDEA also have placed additional constraints on the availability of reviewers. Therefore, the Department has determined that for some discretionary grant competitions, applications may be separated into two or more groups and ranked and selected for funding within specific groups. This procedure will make it easier for the Department to find peer reviewers by ensuring that greater numbers of individuals who are eligible to serve as reviewers for any particular group of applicants will not have conflicts of

interest. It also will increase the quality, independence, and fairness of the review process, while permitting panel members to review applications under discretionary grant competitions for which they also have submitted applications.

4. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose specific conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

5. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $150,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

5. *Performance Measures:* Under the Government Performance and Results Act of 1993, the Department has established a set of performance measures, including long-term measures, that are designed to yield information on various aspects of the effectiveness and quality of the Technical Assistance and Dissemination to Improve Services and Results for Children With Disabilities program. These measures are:

- Program Performance Measure #1: The percentage of Technical Assistance and Dissemination products and services deemed to be of high quality by an independent review panel of experts qualified to review the substantive content of the products and services.
- Program Performance Measure #2: The percentage of Special Education Technical Assistance and Dissemination products and services deemed by an independent review panel of qualified experts to be of high relevance to educational and early intervention policy or practice.
- Program Performance Measure #3: The percentage of all Special Education Technical Assistance and Dissemination products and services deemed by an independent review panel of qualified experts to be useful in improving educational or early intervention policy or practice.
- Program Performance Measure #4: The cost efficiency of the Technical Assistance and Dissemination Program includes the percentage of milestones achieved in the current annual performance report period and the percentage of funds spent during the current fiscal year.
- Long-term Program Performance Measure: The percentage of States receiving Special Education Technical Assistance and Dissemination services regarding scientifically or evidence-based practices for infants, toddlers, children, and youth with disabilities that successfully promote the implementation of those practices in school districts and service agencies.

The measures apply to projects funded under this competition, and grantees are required to submit data on these measures as directed by OSEP.

Grantees will be required to report information on their project's performance in annual and final performance reports to the Department (34 CFR 75.590).

6. *Continuation Awards:* In making a continuation award under 34 CFR 75.253, the Secretary considers, among other things: whether a grantee has made substantial progress in achieving the goals and objectives of the project; whether the grantee has expended funds in a manner that is consistent with its approved application and budget; and,

if the Secretary has established performance measurement requirements, the performance targets in the grantee's approved application.

In making a continuation award, the Secretary also considers whether the grantee is operating in compliance with the assurances in its approved application, including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

VII. Other Information

Accessible Format: Individuals with disabilities can obtain this document and a copy of the application package in an accessible format (*e.g.,* braille, large print, audiotape, or compact disc) by contacting the Management Support Services Team, U.S. Department of Education, 400 Maryland Avenue SW, room 5113, Potomac Center Plaza, Washington, DC 20202–2500. Telephone: (202) 245–7363. If you use a TDD or a TTY, call the FRS, toll free, at 1–800–877–8339.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[OE Docket No. EA–458]

Application to Export Electric Energy; Sempra Gas & Power Marketing, LLC

AGENCY: Office of Electricity, DOE.

ACTION: Notice of application.

SUMMARY: Sempra Gas & Power Marketing, LLC (Applicant) has applied for authority to transmit electric energy from the United States to Mexico pursuant to the Federal Power Act.

DATES: Comments, protests, or motions to intervene must be submitted on or before August 30, 2018.

ADDRESSES: Comments, protests, motions to intervene, or requests for more information should be addressed to: Office of Electricity, Mail Code: OE–20, U.S. Department of Energy, 1000 Independence Avenue SW, Washington, DC 20585–0350. Because of delays in handling conventional mail, it is recommended that documents be transmitted by overnight mail, by electronic mail to *Electricity.Exports@hq.doe.gov,* or by facsimile to 202–586–8008.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated by the United States Department of Energy (DOE) pursuant to sections 301(b) and 402(f) of the Department of Energy Organization Act (42 U.S.C. 7151(b) and 7172(f)) and require authorization under section 202(e) of the Federal Power Act (16 U.S.C. 824a(e)).

On July 23, 2018, DOE received an application from the Applicant for authority to transmit electric energy from the United States to Mexico as a power marketer for a five-year term using existing international transmission facilities.

In its application, the Applicant states that it does not own or control any electric generation or transmission facilities, and it does not have a franchised service area. The electric energy that the Applicant proposes to export to Mexico would be surplus energy purchased from third parties such as electric utilities and Federal power marketing agencies pursuant to voluntary agreements. The existing international transmission facilities to be utilized by the Applicant have previously been authorized by Presidential Permits issued pursuant to Executive Order 10485, as amended, and are appropriate for open access transmission by third parties.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the application at the address provided above. Protests should be filed in accordance with Rule 211 of the Federal Energy Regulatory Commission's (FERC's) Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to these proceedings should file a motion to intervene at the above address in accordance with FERC Rule 214 (18 CFR 385.214). Five (5) copies of such comments, protests, or motions to intervene should be sent to the address provided above on or before the date listed above.

Comments and other filings concerning the Applicant's application to export electric energy to Mexico should be clearly marked with OE Docket No. EA–458. An additional copy is to be provided to both Daniel A. King, Sempra Infrastructure, LLC, 488 8th Avenue, HQ12, San Diego, CA 92101 and Kevin Ding, Sempra Infrastructure, LLC, 488 8th Avenue, HQ11, San Diego, CA 92101.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after a determination is made by DOE that the proposed action will not have an adverse impact on the sufficiency of supply or reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above, by accessing the program website at *http://energy.gov/node/11845,* or by emailing Angela Troy at *Angela.Troy@hq.doe.gov.*

Signed in Washington, DC, on July 24, 2018.

Christopher Lawrence,

Electricity Policy Analyst, Office of Electricity.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL18–188–000]

NRG Curtailment Solutions, Inc. v. New York Independent System Operator; Notice of Complaint

Take notice that on July 24, 2018, pursuant to sections 206 and 306 of the Federal Power Act, 16 U.S.C. 824e and 825e and Rule 206 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.206, NRG Curtailment Solutions, Inc. (Complainant) filed a formal complaint against New York Independent System Operator (Respondent) alleging that, Respondent's rules that Curtailment Service Providers and Responsible Interface Parties must be certified by the New York Department of Public Service is unjust and unreasonable, all as more fully explained in the complaint.

The Complainant certifies that copies of the complaint were served on the contacts for the Respondent as listed on the Commission's list of Corporate Officials.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. The Respondent's answer and all interventions, or protests must be filed on or before the comment date. The Respondent's answer, motions to intervene, and protests must be served on the Complainants.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

This filing is accessible on-line at *http://www.ferc.gov,* using the ''eLibrary'' link and is available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an ''eSubscription'' link on the website that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern Time on August 13, 2018.

Dated: July 25, 2018.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2017–0692; FRL–9980–29]

Agency Information Collection Activities; Proposed Renewal of an Existing Collection (EPA ICR No. 2507.02); Comment Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces that EPA is planning to submit an Information Collection Request (ICR) to the Office of Management and Budget (OMB). The ICR, entitled: ''Lead Training, Certification, Accreditation and Authorization Activities'' and identified by EPA ICR No. 2507.02 and OMB Control No. 2070–0195, represents the renewal of an existing ICR that is scheduled to expire on January 31, 2019. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before October 1, 2018.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2017–0692, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT:

For technical information contact: John Yowell, National Program Chemicals Division, (7404T), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001; telephone number: (202) 564–1213; email address: *yowell.john@epa.gov.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave., Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: Information Collection for Lead Training, Certification, Accreditation, and Authorization Activities (Lead-Based Paint Activities Rule and Renovation, Repair, and Painting Rule).

ICR number: EPA ICR No. 2507.02.

OMB control number: OMB Control No. 2070–0195.

ICR status: This ICR is currently scheduled to expire on January 31, 2019. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations (CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection involves third-party notification, required under section 406(b) of the Toxic Substances Control Act (TSCA), to owners and occupants of housing that will inform such individuals about the dangers of lead-contaminated dust and lead-based paint debris that are sometimes generated during renovations of housing where lead-based paint is present, thereby aiding them in avoiding potentially hazardous exposures and protecting public health. Since young children are especially susceptible to the hazards of lead, owners and occupants with children can take action to protect their children from lead poisonings. Section 406(b) of TSCA requires EPA to promulgate regulations requiring certain persons who perform renovations for compensation on target housing to provide a lead hazard information pamphlet (developed under TSCA section 406(a)) to the owner and occupants of such housing prior to beginning the renovation. Further, the firm performing the renovation must keep records acknowledging receipt of the pamphlet on file for three years after completion of work. Those who fail to provide the pamphlet or keep records as required may be subject to both civil and criminal sanctions.

This information collection also addresses the reporting and recordkeeping requirements for individuals or firms conducting lead-based paint activities or renovation in or on houses, apartments, or child-occupied facilities built before 1978, under the authority of sections 402 and 404 of TSCA. These sections and their implementing regulations require EPA to develop and administer a training and certification program as well as work practice standards for persons who perform lead-based paint activities and/or renovations. 40 CFR part 745, subpart E, covers work practice standards, recordkeeping and reporting requirements, individual and firm certification, and enforcement for renovations done in target housing or child-occupied facilities. 40 CFR part 745, subpart L, covers inspections, lead hazard screens, risk assessments, and abatement activities (referred to as ''lead-based paint activities'') done in target housing and child-occupied facilities. 40 CFR part 745, subpart Q, establishes the requirements that state or tribal programs must meet for authorization to administer the standards, regulations, or other requirements established under TSCA Section 402. Section 401 of TSCA defines target housing as any housing constructed prior to 1978, except housing for the elderly or persons with disabilities or any 0-bedroom dwelling (unless any child who is less than 6 years of age resides or is expected to reside in such housing).

Responses to the collection of information are mandatory (see 40 CFR part 745). Respondents may claim all or part of a document confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Burden statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 0.2 hours per response. Burden is defined in 5 CFR 1320.3(b).

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR

include persons who are engaged in lead-based paint activities and/or perform renovations of target housing or child-occupied facilities for compensation, dust sampling, or dust testing; or who perform lead-based paint inspections, lead hazard screens, risk assessments or abatements in target housing or child-occupied facilities; or who provide training or operate a training program for individuals who perform any of these activities; or state, territorial or tribal agencies that administer lead-based paint activities and/or renovation programs.

Estimated total number of potential respondents: 770,564.

Frequency of response: On occasion.

Estimated total average number of responses for each respondent: 30.3.

Estimated total annual burden hours: 5,251,320 hours.

Estimated total annual costs: $303,099,637. This includes an estimated burden cost of $303,099,637 and an estimated cost of $0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 1,211,977 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects adjustments in EPA's estimates of the burden. The ICR supporting statement provides a detailed analysis of the change in burden estimate. This change is an adjustment.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

Dated: July 16, 2018.

Charlotte Bertrand,

Acting Principal Deputy Assistant Administrator, Office of Chemical Safety and Pollution Prevention.

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OPPT–2017–0648; FRL–9980–28]

Agency Information Collection Activities; Proposed Renewal of an Existing Collection (EPA ICR No. 1884.10); Comment Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA), this document announces that EPA is planning to submit an Information Collection Request (ICR) to the Office of Management and Budget (OMB). The ICR, entitled: ''Partial Update of the TSCA Section 8(b) Inventory Data Base, Production and Site Reports (Chemical Data Reporting)'' and identified by EPA ICR No. 1884.10 and OMB Control No. 2070–0162, represents the renewal of an existing ICR that is scheduled to expire on October 31, 2018. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection that is summarized in this document. The ICR and accompanying material are available in the docket for public review and comment.

DATES: Comments must be received on or before October 1, 2018.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA–HQ–OPPT–2017–0648, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.
- *Mail:* Document Control Office (7407M), Office of Pollution Prevention and Toxics (OPPT), Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

For general information contact: The TSCA-Hotline, ABVI-Goodwill, 422 South Clinton Ave. Rochester, NY 14620; telephone number: (202) 554–1404; email address: *TSCA-Hotline@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. What information is EPA particularly interested in?

Pursuant to PRA section 3506(c)(2)(A) (44 U.S.C. 3506(c)(2)(A)), EPA specifically solicits comments and information to enable it to:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

2. Evaluate the accuracy of the Agency's estimates of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

3. Enhance the quality, utility, and clarity of the information to be collected.

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

II. What information collection activity or ICR does this action apply to?

Title: Partial Update of the TSCA Section 8(b) Inventory Data Base, Production and Site Reports (Chemical Data Reporting).

ICR number: EPA ICR No. 1884.10.

OMB control number: OMB Control No. 2070–0162.

ICR status: This ICR is currently scheduled to expire on October 31, 2018. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the Code of Federal Regulations

(CFR), after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: The Toxic Substances Control Act (TSCA), as amended by the Frank R. Lautenberg Chemical Safety for the 21st Century Act, requires EPA to compile and keep current a complete list of chemical substances manufactured (including imported) or processed in the United States. EPA updates this inventory of chemicals every four years by requiring manufacturers, including importers, to provide production volume, plant site information and other chemical manufacturing, processing, and use information. Through the CDR regulation, EPA collects basic exposure-related manufacturing, processing, and use information used by the Agency and others in a wide range of activities This information allows EPA to identify what chemicals are currently in commerce and to take appropriate regulatory action as necessary. The information collected enables EPA to better understand and interpret the state of U.S. chemical manufacturing, processing, and use, and further enhances EPA's ability to identify, evaluate, and manage potential chemical risks. This ICR addresses the collection of inventory-related information.

Responses to the collection of required information are mandatory (see 40 CFR part 710). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures described in TSCA section 14 and 40 CFR part 2.

Burden statement: The annual per-response public reporting and recordkeeping burden for this collection of information is estimated to average 126.44 hours per year for the average multi-chemical submission of 7.5 chemicals per site with 22% of reports consisting of partial reports. Additionally, for CDX electronic reporting activities, the average per response burden is estimated at .53 hours per registration for those respondents not already registered in CDX. Burden is defined in 5 CFR 1320.3(b).

The ICR Supporting Statement, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized here:

Respondents/Affected Entities: Entities potentially affected by this ICR are companies that manufacture (including import) or process chemical substances, mixtures or categories into the United States.

Estimated total number of potential respondents: 5,662.

Frequency of response: Every four years (estimates below are on an annual basis).

Estimated total average number of responses for each respondent: 1.

Estimated total annual burden hours: 716,024 hours.

Estimated total annual costs: $56,959,323. This includes an estimated burden cost of $59,959,323 and an estimated cost of $0 for capital investment or maintenance and operational costs.

III. Are there changes in the estimates from the last approval?

There is a decrease of 73,179 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This decrease reflects a combination of program changes and adjustments. Program changes involving updated CBI substantiation requirements as a result of the Lautenberg Act are estimated at 4,877 hours. Agency adjustments include changes due to methodology corrections at—184,158 hours, and changes due to increased counts of sites at 106,102 hours. The ICR supporting statement provides a detailed analysis of the change in burden estimate. This change is an adjustment and the result of a program change.

IV. What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** document pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Authority: 44 U.S.C. 3501 *et seq.*

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0952]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before October 1, 2018. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele at (202) 418–2991.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

OMB Control Number: 3060–0952.

Title: Proposed Demographic Information and Notifications, Second Further Notice of Proposed Rulemaking (FNPRM), CC Docket No. 98–147 and Fifth NPRM (NPRM), CC Docket No. 96–98.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 750 respondents; 1,500 responses.

Frequency of Response: On occasion reporting requirements and third-party disclosure requirement.

Estimated Time per Response: 2 hours.

Total Annual Burden: 3,000 hours.

Total Annual Cost: No cost.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151–154, 201, 202, 251–254, 256, 271, and 303(r) of the Communications Act of 1934, as amended.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission is not requesting respondents to submit confidential information to the FCC. If the applicants wish to submit information which they believe is confidential, they may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: The Commission asked whether physical collocation in remote terminals presents technical or security concerns, and if so, whether these concerns warrant modification of its collocation rules. The Commission asked whether incumbent LECs should be required to provide requesting carriers with demographic and other information regarding particular remote terminals similar to the information available regarding incumbent LEC central offices. Requesting carriers use demographic and other information obtained from incumbent LECs to determine whether they wish to collocate at particular remote terminals. This proposed information collection in the Second Further Notice of Proposed Rulemaking, FCC 98–147, will be used by the Commission, state commissions, and competitive carriers to facilitate the deployment of advanced services and other telecommunications services in implementation of section 251(c)(6) of the Communications Act of 1934, as amended. The number of respondents, annual responses, and annual burden has not changed.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

OMB Control Number: 3060–0741.

Title: Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment, GN Docket No. 17–84.

Form Number(s): N/A.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 5,357 respondents; 573,928 responses.

Estimated Time per Response: 0.5–4.5 hours.

Frequency of Response: On occasion reporting requirements; recordkeeping and third-party disclosure requirements.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 222 and 251.

Total Annual Burden: 575,448 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Commission is not requesting that the respondents submit confidential information to the FCC. Respondents may, however, request confidential treatment for information they believe to be confidential under 47 CFR 0.459 of the Commission's rules.

Needs and Uses: Section 251 of the Communications Act of 1934, as amended, 47 U.S.C. 251, is designed to accelerate private sector development and deployment of telecommunications technologies and services by spurring competition. Section 222(e) is also designed to spur competition by prescribing requirements for the sharing of subscriber list information. These information collection requirements are designed to help implement certain provisions of sections 222(e) and 251, and to eliminate operational barriers to competition in the telecommunications services market. Specifically, these information collection requirements will be used to implement (1) local exchange carriers' (''LECs'') obligations to provide their competitors with dialing parity and non-discriminatory access to certain services and functionalities; (2) incumbent local exchange carriers' (''ILECs'') duty to make network information disclosures; and (3) numbering administration. The revisions to this collection relate to changes in one of many components of the currently approved collection—specifically, certain reporting, recordkeeping and/or third-party disclosure requirements under section 251(c)(5). In November 2017, the Commission adopted new rules concerning certain information collection requirements implemented under section 251(c)(5) of the Act, pertaining to network change disclosures. Most of the changes to those rules applied specifically to a certain subset of network change disclosures, namely notices of planned copper retirements. In addition, the changes removed a rule that prohibits incumbent LECs from engaging in useful advanced coordination with entities affected by network changes. In June 2018, the Commission revised its network change disclosure rules to (1) revise the types of network changes that trigger an incumbent LEC's public notice obligation, and (2) extend the *force majeure* provisions applicable to copper retirements to all types of network changes. The changes are aimed at removing unnecessary regulatory barriers to the deployment of high-speed broadband networks. The Commission estimates that these revisions do not result in any change to the total annual burden hours or any additional outlays of funds for hiring outside contractors or procuring equipment as the changes eliminate notices that are subsumed by notice obligations that remain in force or simply codify procedures available to a small number of incumbent LECs by waiver orders.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL HOUSING FINANCE AGENCY

[No. 2018–N–08]

Proposed Collection; Comment Request

AGENCY: Federal Housing Finance Agency.

ACTION: 30-Day notice of submission of information collection for approval from Office of Management and Budget.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Housing Finance Agency (FHFA or the Agency) is seeking public comments concerning an information collection known as ''Minimum Requirements for Appraisal Management Companies,'' which has been assigned control number 2590–0013 by the Office of Management and Budget (OMB). FHFA intends to submit the information collection to OMB for review and approval of a three-year extension of the control number, which is due to expire on July 31, 2018.

DATES: Interested persons may submit comments on or before August 30, 2018.

ADDRESSES: Submit comments to the Office of Information and Regulatory Affairs of the Office of Management and Budget, Attention: Desk Officer for the Federal Housing Finance Agency, Washington, DC 20503, Fax: (202) 395–3047, Email: *OIRA_submission@omb.eop.gov.* Please also submit comments to FHFA, identified by ''Proposed Collection; Comment Request: 'Minimum Requirements for Appraisal Management Companies, (No. 2018–N–08)''' by any of the following methods:

- *Agency Website: www.fhfa.gov/open-for-comment-or-input.*
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. If you submit your comment to the *Federal eRulemaking Portal,* please also send it by *email* to FHFA at *RegComments@fhfa.gov* to ensure timely receipt by the Agency.
- *Mail/Hand Delivery:* Federal Housing Finance Agency, Eighth Floor, 400 Seventh Street SW, Washington, DC 20219, ATTENTION: Proposed Collection; Comment Request: ''Minimum Requirements for Appraisal Management Companies, (No. 2018–N–08).''

We will post all public comments we receive without change, including any personal information you provide, such as your name and address, email address, and telephone number, on the FHFA website at *http://www.fhfa.gov.* In addition, copies of all comments received will be available for examination by the public through the electronic comment docket for this PRA Notice also located on the FHFA website.

FOR FURTHER INFORMATION CONTACT: Robert Witt. The Telecommunications Device for the Hearing Impaired is (800) 877–8339.

SUPPLEMENTARY INFORMATION: FHFA is seeking comments on its upcoming request to OMB to renew the PRA clearance for the following collection of information:

Title: Minimum requirements for appraisal management companies.

OMB Number: 2590–0013.

Affected Public: Participating States and State-registered Appraisal Management Companies.

A. Need for and Use of the Information Collection

In 2015, the Federal Deposit Insurance Corporation (FDIC), the Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (Board), the Bureau of Consumer Financial Protection (Bureau), and FHFA (collectively, the Agencies) jointly issued regulations [1] to implement provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) relating to the eligibility of appraisal management companies (AMCs) to provide appraisal management services for real estate related financial transactions that are engaged in, contracted for, or regulated by a ''federal financial institutions regulatory agency'' or the Resolution Trust Corporation (''Federally related transactions'').[2] Generally, these statutory provisions provide that an AMC either be registered with a state's appraiser certifying and licensing agency or be subject to oversight by a federal financial institutions regulatory agency in order to participate in a Federally related transaction.[3]

As required by the Dodd-Frank Act provisions, the Agencies' joint AMC regulations establish minimum requirements for the registration and supervision of AMCs to be applied by states that have elected to establish an appraiser certifying and licensing agency with authority to register and supervise AMCs (participating states).[4] The joint regulations also implement the statutory requirement that states report to the Appraisal Subcommittee (ASC) of the Federal Financial Institutions Examination Council (FFIEC) the information required by the ASC to administer a national registry of AMCs (AMC National Registry or Registry).[5] When fully established, the AMC National Registry will include AMCs that are either: (1) Subsidiaries owned and controlled by an insured depository institution (as defined in 12 U.S.C. 1813) and regulated by either the FDIC, OCC, or Board (federally regulated AMCs) ;[6] or (2) registered with, and subject to supervision of, a state appraiser certifying and licensing agency. FHFA's AMC regulation, located at Subpart B of 12 CFR part 1222, is substantively identical to the AMC regulations of the FDIC, OCC, and Board and contains the recordkeeping and reporting requirements described below.[7]

1. State Reporting Requirements (IC #1)

The regulation requires that each state electing to register AMCs for purposes of permitting AMCs to provide appraisal management services relating to covered transactions in the state submit to the ASC the information regarding such AMCs required to be submitted by ASC regulations or guidance concerning AMCs that operate in the state.[8]

2. State Recordkeeping Requirements (IC #2)

States seeking to register AMCs must have an AMC registration and supervision program. The regulation requires each participating state to establish and maintain within its appraiser certifying and licensing agency a registration and supervision program with the legal authority and mechanisms to: (i) Review and approve or deny an application for initial registration; (ii) periodically review and renew, or deny renewal of, an AMC's registration; (iii) examine an AMC's books and records and require the submission of reports, information, and documents; (iv) verify an AMC's panel members' certifications or licenses; (v) investigate and assess potential violations of laws, regulations, or orders; (vi) discipline, suspend, terminate, or deny registration renewals of AMCs that violate laws, regulations, or orders; and (vii) report violations of laws, regulations, or orders, and disciplinary and enforcement actions to the ASC.[9]

The regulation requires each participating state to impose requirements on AMCs that are not federally regulated (non-federally regulated AMCs) to: (i) Register with and be subject to supervision by a state appraiser certifying and licensing agency in each state in which the AMC operates; (ii) use only state-certified or state-licensed appraisers for federally regulated transactions in conformity with any federally regulated transaction regulations; (iii) establish and comply with processes and controls reasonably designed to ensure that the AMC, in engaging an appraiser, selects an appraiser who is independent of the transaction and who has the requisite education, expertise, and experience necessary to competently complete the appraisal assignment for the particular market and property type; (iv) direct the appraiser to perform the assignment in accordance with the Uniform Standards of Professional Appraisal Practice; and (v) establish and comply with processes and controls reasonably designed to ensure that the AMC conducts its appraisal management services in accordance with sections 129E(a) through (i) of the Truth-in-Lending Act.[10]

3. AMC Reporting Requirements (IC #3)

The regulation provides that an AMC may not be registered by a state or included on the AMC National Registry if the company is owned, directly or indirectly, by any person who has had an appraiser license or certificate refused, denied, cancelled, surrendered in lieu of revocation, or revoked in any state for a substantive cause.[11] The regulation also provides that an AMC may not be registered by a state if any person that owns 10 percent or more of the AMC fails to submit to a background investigation carried out by the state appraiser certifying and licensing agency.[12] Thus, each AMC registering with a state must provide information to the state on compliance with those ownership restrictions. Further, the regulation requires that a federally regulated AMC report to the state or states in which it operates the information required to be submitted by the state pursuant to the ASC's policies, including policies regarding the determination of the AMC National

[1] *See* 80 FR 32658 (June 9, 2015). By agreement, the responsibility for clearance under the PRA of information collections contained in the joint regulations is shared only by the FDIC, OCC, Board, and FHFA.

[2] *See* 12 U.S.C. 3350(4), (5). ''Federal financial institutions regulatory agency'' includes the FDIC, OCC, Board, and National Credit Union Administration. *See* 12 U.S.C. 3350(6).

[3] Section 1117 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA), 12 U.S.C. 3346, permits states to establish an appraiser certifying and licensing agency ''to assure the availability of State certified and licensed appraisers for the performance in a State of appraisals in federally related transactions and to assure effective supervision of the activities of certified and licensed appraisers.'' The Dodd-Frank Act amended section 1117 to provide that the duties of a state appraiser certifying and licensing agency may also include the registration and supervision of AMCs. Although states are not required by federal law to register and supervise AMCs, or even to establish an appraiser certifying and licensing agency, an AMC that is not registered with such a state agency (except for those regulated by a federal financial institutions regulatory agency) may not participate in a federally-related transaction in that state. *See* 12 U.S.C. 3353(f)(1).

[12] *See* 12 CFR 1222.24(b).

Registry fee, and information regarding compliance with the ownership restrictions described above.[13]

4. AMC Recordkeeping Requirements (IC #4)

An entity meets the definition of an AMC that is subject to the requirements of the AMC regulation if, among other things, it oversees an appraiser panel of more than 15 state-certified or state-licensed appraisers in a state, or 25 or more state-certified or state-licensed appraisers in two or more states, within a given 12-month period.[14] For purposes of determining whether a company qualifies as an AMC under that definition, the regulation provides that an appraiser in an AMC's network or panel is deemed to remain on the network or panel until: (i) The AMC sends a written notice to the appraiser removing the appraiser with an explanation; or (ii) receives a written notice from the appraiser asking to be removed or a notice of the death or incapacity of the appraiser.[15] The AMC would retain these notices in its files.

B. Burden Estimate

FHFA's burden estimates for the information collections described above appear below. The estimates below remain the same as those set forth in the 60-day notice, despite one commenter's assertion that some of the assumptions underlying those burden estimates are incorrect. Those assertions and FHFA's responses are addressed below in section C of the notice.

There is no change in the existing methodology or substance of this information collection. For the information collections described above, the general methodology is to compute the industry wide burden hours for participating states and AMCs and then assign a share of the burden hours to each of the Agencies for each information collection.

As noted above, each of the Agencies' AMC regulations contains reporting and recordkeeping requirements applying to participating states and to both federally regulated and non-federally regulated AMCs. The Agencies have estimated that approximately 200 entities meet the regulatory definition of an ''appraisal management company'' [16] and that, of those 200 AMCs, approximately 120 are federally regulated and approximately 80 are non-federally regulated.[17] Unlike the insured depository institutions regulated by the OCC, FDIC, and Board, none of FHFA's regulated entities owns or controls an AMC or, by law, could ever own or control an AMC. Accordingly, the Agencies have agreed that responsibility for the burdens arising from reporting and recordkeeping requirements imposed upon federally regulated AMCs are to be split evenly among the OCC, FDIC, and Board (*i.e.,* the equivalent of 40 federally regulated AMCs for each agency) and that FHFA will not include those burdens in its totals. The four Agencies have agreed to split the total burdens imposed upon participating states and upon non-federally regulated AMCs evenly between them (*i.e.,* by taking responsibility for 25 percent of the burden per agency or, in the case of non-federally regulated AMCs, the equivalent of 20 such AMCs for each agency).

Thus, for ICs #1 and #2, which relate to reporting and recordkeeping requirements imposed upon participating states, each agency is responsible for 25 percent of the total estimated burden. For ICs #3 and #4, which relate to reporting and recordkeeping requirements imposed upon both federally regulated AMCs and non-federally regulated AMCs, the OCC, FDIC, and Board are each responsible for the burden imposed upon a total of 60 AMCs (40 federally regulated plus 20 non-federally regulated), or 30 percent of the total burden, while FHFA is responsible only for the burden imposed upon 20 non-federally regulated AMCs, or 10 percent of the total burden.

The Agencies estimate the total annualized hour burden placed on respondents by the information collection in the joint AMC regulations to be 1,445 hours. FHFA estimates its share of the hour burden to be 183 hours. The calculations on which those estimates are based are described below.

1. State Reporting Requirements (IC #1)

The total estimated burden hours for states reporting to the ASC are calculated by multiplying the number of states by the hour burden per state. The burden hours are then divided equally among the FDIC, OCC, Board, and FHFA, with each agency responsible for 25 percent of the total. For purposes of this calculation, the number of states is set at 55 which, in conformity with the regulatory definition of ''state,'' includes all 50 U.S. states as well as the Commonwealth of the Northern Mariana Islands, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands.[18] The burden estimate of 1 hour per report is unchanged from the estimate provided for the currently-approved ICR. Therefore, the estimated total state reporting burden attributable to all of the Agencies is: 55 states × 1 hour/state = 55 hours. The estimated burden hours attributable to FHFA are 55 hours × 25 percent = 14 hours (rounded to the nearest whole number).

2. State Recordkeeping Requirements (IC #2)

The estimated burden hours on participating states for developing and maintaining an AMC licensing program is calculated by multiplying the number of states without a registration and licensing program by the hour burden to develop the system. The total burden hours are then equally divided among the FDIC, OCC, Board, and FHFA. According to the Appraisal Institute, as of July 26, 2017, there were 5 states that had not developed a system to register and oversee AMCs.[19] The burden estimate of 40 hours per state without a registration system is unchanged from the estimate provided for the currently-approved ICR. Therefore, the total estimated burden attributable to all of the Agencies is: 5 states × 40 hours/state = 200 hours. The estimated burden hours attributable to FHFA are 200 hours × 25 percent = 50 hours.

3. AMC Reporting Requirements (IC #3)

The burden for AMC reporting requirements for information needed to determine the AMC National Registry fee and information regarding compliance with the AMC ownership restrictions is calculated by multiplying the number of AMCs by the frequency of response and then by the burden per response. As described above, 30 percent of the burden hours are then assigned to each of the FDIC, OCC, and Board, while 10 percent are assigned to FHFA.

The frequency of response is estimated as the number of states that do not have an AMC registration program in which the average AMC operates.[20] As discussed above, 5 states do not have AMC registration or

[13] *See* 12 CFR 1222.25(c).

[14] *See* 12 CFR 1222.21(c)(iii).

[15] *See* 12 CFR 1222.22(b).

[16] In FHFA's regulations, this definition is set forth at 12 CFR 1222.21(c).

[17] FHFA anticipates that definitive information on the total number of AMCs and on the relative number of federally regulated and non-federally regulated AMCs will become available after the AMC National Registry becomes fully operational in 2020.

[18] *See* 12 CFR 1222.21(o).

[19] Appraisal Institute ''Enacted State AMC Laws,'' *https://www.appraisalinstitute.org/advocacy/enacted-state-amc-laws1/.*

[20] The number of states includes all U.S. states, territories, and districts to include: The Commonwealth of the Northern Mariana Islands; the District of Columbia; Guam; Puerto Rico; and the U.S. Virgin Islands.

oversight programs. According to the Consumer Financial Protection Bureau (CFPB), the average AMC operates in 19.56 states.[21] Therefore, the average AMC operates in approximately 2 states that do not have AMC registration systems: (5 states/55 states) × 19.56 states = 1.778 states, rounded to 2 states. The burden estimate of one hour per response is unchanged from the estimate provided for the currently-approved ICR. Therefore, the total estimated hour burden is: 200 AMCs × 2 states × 1 hour = 400 hours. The estimated burden hours attributable to FHFA are 400 hours × 10 percent = 40 hours.

4. AMC Recordkeeping Requirements (IC #4)

The burden for recordkeeping by AMCs of written notices of appraiser removal from a network or panel is estimated to be equal to the number of appraisers who leave the profession per year multiplied by the estimated percentage of appraisers who work for AMCs, then multiplied by burden hours per notice. As described above, 30 percent of the burden hours are then assigned to each of the FDIC, OCC, and Board, while 10 percent are assigned to FHFA.

The number of appraisers who leave an AMC annually, either by resigning, being laid off, or having their licenses revoked or surrendered, is estimated to be 9,881. The burden estimate of 0.08 hours per notice is unchanged from the estimate provided for the currently-approved ICR. Therefore, the estimated total hour burden is: 9,881 notices × 0.08 hours = 790 hours (rounded to the nearest whole number). The estimated burden hours attributable to FHFA are 790 hours × 10 percent = 79 hours.

C. Response to Comments Received

In accordance with the requirements of 5 CFR 1320.8(d), FHFA published an initial notice and request for comments regarding the renewal of the PRA clearance for this information collection in the **Federal Register** on May 16, 2018 (''60-day notice'').[22] The 60-day comment period closed on July 16, 2018. FHFA received two comments.

One comment letter, from an individual, asserted that this collection of information is not necessary for the proper performance of FHFA functions because ''there is currently too much oversight which cost excessive amounts of money'' and that those costs are ''passed down to the consumers through the AMCs to cover costs to maintain regulatory compliance.'' Because these comments relate to regulatory burden generally and not to the collection of information under the joint AMC regulation, FHFA has not addressed them in this notice.

The second comment letter, from a trade association representing AMCs, addressed a number of issues relating to the collection of information under the joint AMC regulation. First, the commenter stated that the collection of information is ''necessary'' and has ''practical utility,'' but ''only to the extent that the information collected serves the proper purpose to promote appraiser independence while ensuring a healthy real estate valuation market.'' FHFA disagrees with the commenter's implication that the ''proper purpose'' of the collection of information under the joint AMC regulations is limited to the promotion of appraiser independence. In fact, as required by statute, the AMC regulations address all issues on which the Agencies were required to promulgate regulations—including minimum requirements for registration of AMCs in participating states,[23] registration limitations for AMCs,[24] and the reporting of information by AMCs to the ASC[25]—and not merely the promotion of appraiser independence. The collection of information is necessary for implementation of those requirements. To the extent that the commenter disagrees with the scope and requirements of the joint AMC regulations, FHFA notes that those regulations may not be rescinded or revised through the PRA renewal process.

The second comment letter also questioned the accuracy of FHFA's estimates of the burdens of the collection of information. Asserting that the Agencies' estimate that there are 200 AMCs currently operating in the U.S. is too low, the commenter stated, without providing any further information or support, that ''industry estimates'' as to the number of AMCs ''are closer to 400.'' As stated in the 60-day notice, because the actual number of AMCs is not currently known and will not be known until the AMC National Registry is fully operational in 2020, the Agencies made a best guess that 200 entities currently qualify as an AMC, as that term is defined under the joint AMC regulations.[26] Because the commenter has provided no support for its assertion regarding the current number of AMCs subject to the joint regulations, FHFA's estimate as to that number remains unchanged.

The commenter further asserted that, contrary to the Agencies' estimates that 60 percent of existing AMCs (or 120 out of 200) are federally regulated, it knows of only one federally regulated AMC in existence. As with respect to the total number of AMCs, the Agencies made a best guess estimate as to the relative number of federally regulated and non-federally-regulated AMCs in the absence of any available empirical data on this issue pending completion of the AMC National Registry. As explained above, that estimate has no bearing on the Agencies' estimates as to the total amount of burden imposed by the collections of information under the joint AMC regulations, but relates only to the appropriate distribution among the rulemaking Agencies of responsibility (under the PRA) for a portion of the total estimated burden. Given this, and the lack of support provided by the commenter for its estimate as to the actual number of federally regulated AMCs, FHFA's estimate as to the relative number remains unchanged from that reflected in the 60-day notice.

Other issues addressed in the second comment letter, including recommendations that the ASC issue additional guidance to states and AMCs concerning the AMC minimum requirements, find opportunities to develop reporting efficiencies in the state licensing system, and be more aggressive in supporting modernization of the outdated National Appraiser Registry do not relate to the collection of information under the joint AMC regulation. The Agencies, however, will forward these suggestions to the ASC for consideration.

D. Comments Request

In accordance with the requirements of 5 CFR 1320.10(a), FHFA is publishing

[21] The CFPB conducted a survey of 9 AMCs in 2013 regarding the provisions in the regulation and the related PRA burden.

[22] *See* 83 FR 22681 (May 16, 2018).

[23] *See* 12 U.S.C. 3353(a).

[24] *See* 12 U.S.C. 3353(d).

[25] *See* 12 U.S.C. 3353(e).

[26] The joint regulations define ''appraisal management company'' generally to mean an entity that: (1) Provides appraisal management services (for example, maintaining a panel of certified and licensed appraisers to perform appraisals, managing the process of having an appraisal performed, collecting fees, and paying appraisers) to creditors or to secondary mortgage market participants; (2) provides such services in connection with valuing a consumer's primary dwelling as security for a consumer credit transaction or incorporating such transactions into securitizations; and (3) oversees an appraiser panel of more than 15 State-certified or State-licensed appraisers in a State or 25 or more State-certified or State-licensed appraisers in two or more States within a 12-month period. *See* 12 CFR 1222.21(c)(1).

this second notice to request comments regarding the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has practical utility; (2) the accuracy of FHFA's estimates of the burdens of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Dated: July 26, 2018.

Kevin Winkler,

Chief Information Officer, Federal Housing Finance Agency.

FEDERAL MARITIME COMMISSION

Notice of Agreement Filed

The Commission hereby gives notice of the filing of the following agreement under the Shipping Act of 1984. Interested parties may submit comments on the agreement to the Secretary by email at *Secretary@fmc.gov,* or by mail, Federal Maritime Commission, Washington, DC 20573, within twelve days of the date this notice appears in the **Federal Register**. Copies of the agreement are available through the Commission's website (*www.fmc.gov*) or by contacting the Office of Agreements at (202)-523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 201263.

Agreement Name: Maersk/MSC/Zim Cooperative Working Agreement.

Parties: Maersk Line A/S; Mediterranean Shipping Company S.A.; and Zim Integrated Shipping Services Ltd.

Filing Party: Wayne Rohde, Cozen O'Connor.

Synopsis: The Agreement authorizes the parties to share space and cooperate on the provision of service strings in the trade between Asia and the U.S. East Coast.

Proposed Effective Date: 9/8/2018.

Location: https://www2.fmc.gov/FMC.Agreements.Web/Public/AgreementHistory/14256.

Dated: July 25, 2018.

Rachel Dickon,

Secretary.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 23, 2018.

A. Federal Reserve Bank of Minneapolis (Mark A. Rauzi, Vice President), 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291:

1. *Mackinac Financial Corporation, Manistique, Michigan;* to acquire 100 percent of the voting shares of Lincoln Community Bank, Merrill, Wisconsin.

Board of Governors of the Federal Reserve System, July 26, 2018.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities; Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, with revision, the Financial Statements for Holding Companies (FR Y–9 family of reports) (OMB No. 7100–0128).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

OMB Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, the Office of Management and Budget (OMB) delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collection of information requests and requirements conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the Paperwork Reduction Act Submission, supporting statements and approved collection of information instrument(s) are placed into OMB's public docket files. The Federal Reserve may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Final approval under OMB delegated authority the extension for three years, with revision, of the following reports:

Report title: Financial Statements for Holding Companies.

Agency form number: FR Y–9C, FR Y–9LP, FR Y–9SP, FR Y–9ES, and FR Y–9CS.

OMB control number: 7100–0128.

Effective Date: June 30, 2018.

Frequency: Quarterly and semiannually.

Respondents: Bank holding companies, savings and loan holding companies, securities holding companies, and U.S. intermediate holding companies (collectively, holding companies (HCs)).

Estimated number of respondents: FR Y–9C (non-advanced approaches holding companies): 638; FR Y–9C (advanced approaches holding companies): 18; FR Y–9LP: 775; FR Y–9SP: 3,837 FR Y–9ES: 82; FR Y–9CS: 236.

Estimated average hours per response: FR Y–9C (non-advanced approaches holding companies): 46.29 hours; FR Y–9C (advanced approaches holding companies HCs): 47.54 hours; FR Y–9LP: 5.27 hours; FR Y–9SP: 5.40 hours; FR Y–9ES: 0.50 hours; FR Y–9CS: 0.50 hours.

Estimated annual burden hours: FR Y–9C (non-advanced approaches holding companies): 118,132 hours; FR Y–9C (advanced approaches holding companies): 3,423 hours; FR Y–9LP: 16,337 hours; FR Y–9SP:41,440 hours; FR Y–9ES: 41 hours; FR Y–9CS: 472 hours.

General description of report: The FR Y–9C, FR Y–9LP, and FR Y 9SP serve as standardized financial statements for the consolidated holding company. The FR Y–9ES is a financial statement for HCs that are Employee Stock Ownership Plans. The Board uses the FR Y–9CS (a free-form supplement) to collect additional information deemed to be critical and needed in an expedited manner. The FR Y–9 family of reporting forms continues to be the primary source of financial data on HCs that examiners rely on between on-site inspections. Financial data from these reporting forms is used to detect emerging financial problems, review performance, conduct pre-inspection analysis, monitor and evaluate capital adequacy, evaluate HC mergers and acquisitions, and analyze an HC's overall financial condition to ensure the safety and soundness of its operations. The Board requires HCs to provide standardized financial statements to fulfill the Board's statutory obligation to supervise these organizations. HCs file the FRY–9C on a quarterly basis, the FR Y–9LP quarterly, the FR Y–9SP semiannually, the FR Y–9ES annually, and the FR Y–9CS on a schedule that is determined when this supplement is used.

Legal authorization and confidentiality: The FR Y–9 family of reports is authorized by section 5(c) of the Bank Holding Company Act (12 U.S.C. 1844(c)), section 10 of Home Owners' Loan Act (12 U.S.C. 1467a(b)), section 618 of the Dodd-Frank Wall Street Reform and Consumer Protection Act (''Dodd-Frank Act'') (12 U.S.C. 1850a(c)(1)), and section 165 of the Dodd-Frank Act (12 U.S.C. 5365). The obligation of covered institutions to report this information is mandatory. With respect to the FR Y–9LP, FR Y–9SP, FR Y–9ES, and FR Y–9CS, as well as most items on the FR Y–9C, the information collected would generally not be accorded confidential treatment. If confidential treatment is requested by a respondent, the Board will review the request to determine if confidential treatment is appropriate. With respect to the FR Y–9C, Schedule HI's item 7(g) ''FDIC deposit insurance assessments,'' Schedule HC–P's item 7(a) ''Representation and warranty reserves for 1–4 family residential mortgage loans sold to U.S. government agencies and government sponsored agencies,'' and Schedule HC–P's item 7(b) ''Representation and warranty reserves for 1–4 family residential mortgage loans sold to other parties'' are considered confidential. Such treatment is appropriate because the data is not publicly available and could cause substantial harm to the competitive position of the respondent. The public release of this confidential data may impair the Board's future ability to collect similarly confidential data. Thus, this information may be kept confidential under exemptions (b)(4) of the Freedom of Information Act, which exempts from disclosure ''trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential'' (5 U.S.C. 552(b)(4)), and (b)(8) of the Freedom of Information Act, which exempts from disclosure information related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions (5 U.S.C. 552(b)(8)). If confidential treatment is requested by a respondent for other items in the FR Y–9C, the Board will review the request to determine if confidential treatment is appropriate.

Current Actions: On April 30, 2018, the Board published a notice in the **Federal Register** (83 FR 18843) requesting public comment for 60 days on the extension, with revision, of the FR Y–9C report, and the extension, without revision, of the FR Y–9LP, FR Y–9SP, FR Y–9ES, and FR Y–9CS report. The Board proposed to implement a number of revisions to the FR Y–9C requirements, most of which were consistent with changes now implemented on the Federal Financial Institutions Examination Council (FFIEC) Consolidated Reports of Condition and Income (Call Reports) (FFIEC 031, FFIEC 041, and FFIEC 051; OMB No. 7100–0036). The proposed revisions included deleting certain data items and consolidating existing data items into new data items, as well as adding new or raising existing reporting

thresholds for certain data items to reduce reporting burden. The comment period expired June 29, 2018.

Detailed Discussion of Public Comments

The Federal Reserve received one comment from a banking association. The commenter noted several inconsistencies on the FR Y–9C report form and one inconsistency on the instructions when compared to the Call Report pertaining to Schedule HC–Q Memoranda items 4.b and 4.d, column A and Schedule HC–S Column G instructions and requested clarification on the proper reporting. The draft report form was inadvertently updated to reflect the removal of items 4.b and 4.d and a line item reference on the instructions for Schedule HC–S Column G was also inadvertently struck through. The Board has revised these items so that both the report form and instructions align with the Call Report. Additionally, the commenter noted an inconsistency between the caption on the report form and the caption on the instructions pertaining to *Equity investments without readily determinable fair values* on Schedule HC–F line item 4 on the FR Y–9C report. The Board has updated the instructions so that the report form and instructions align.

The revisions will be implemented as proposed, with the modifications described above, effective for the June 30, 2018, report date.

Board of Governors of the Federal Reserve System, July 25, 2018.

Michele Taylor Fennell,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Patient Safety Organizations: Voluntary Relinquishment From Diagnostic Quality Assurance

AGENCY: Agency for Healthcare Research and Quality (AHRQ), Department of Health and Human Services (HHS).

ACTION: Notice of delisting.

SUMMARY: The Patient Safety Rule authorizes AHRQ, on behalf of the Secretary of HHS, to list as a PSO an entity that attests that it meets the statutory and regulatory requirements for listing. A PSO can be ''delisted'' by the Secretary if it is found to no longer meet the requirements of the Patient Safety Act and Patient Safety Rule, when a PSO chooses to voluntarily relinquish its status as a PSO for any reason, or when a PSO's listing expires. AHRQ has accepted a notification of voluntary relinquishment from Diagnostic Quality Assurance of its status as a PSO, and has delisted the PSO accordingly. Diagnostic Quality Assurance, PSO number P0170, submitted this request for voluntary relinquishment after receiving a Notice of Preliminary Finding of Deficiency.

DATES: The directories for both listed and delisted PSOs are ongoing and reviewed weekly by AHRQ. The delisting was effective at 12:00 Midnight ET (2400) on July 1, 2018.

ADDRESSES: Both directories can be accessed electronically at the following HHS website: *http://www.pso.ahrq.gov/listed.*

FOR FURTHER INFORMATION CONTACT: Eileen Hogan, Center for Quality Improvement and Patient Safety, AHRQ, 5600 Fishers Lane, Room 06N94B, Rockville, MD 20857; Telephone (toll free): (866) 403–3697; Telephone (local): (301) 427–1111; TTY (toll free): (866) 438–7231; TTY (local): (301) 427–1130; Email: *pso@ahrq.hhs.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Patient Safety and Quality Improvement Act of 2005, 42 U.S.C. 299b–21 to b–26, (Patient Safety Act) and the related Patient Safety and Quality Improvement Final Rule, 42 CFR part 3 (Patient Safety Rule), published in the **Federal Register** on November 21, 2008, 73 FR 70732–70814, establish a framework by which hospitals, doctors, and other health care providers may voluntarily report information to Patient Safety Organizations (PSOs), on a privileged and confidential basis, for the aggregation and analysis of patient safety events.

The Patient Safety Act authorizes the listing of PSOs, which are entities or component organizations whose mission and primary activity are to conduct activities to improve patient safety and the quality of health care delivery.

HHS issued the Patient Safety Rule to implement the Patient Safety Act. AHRQ administers the provisions of the Patient Safety Act and Patient Safety Rule relating to the listing and operation of PSOs. The Patient Safety Rule authorizes AHRQ to list as a PSO an entity that attests that it meets the statutory and regulatory requirements for listing. A PSO can be ''delisted'' if it is found to no longer meet the requirements of the Patient Safety Act and Patient Safety Rule, when a PSO chooses to voluntarily relinquish its status as a PSO for any reason, or when a PSO's listing expires. Section 3.108(d) of the Patient Safety Rule requires AHRQ to provide public notice when it removes an organization from the list of federally approved PSOs.

AHRQ has accepted a notification from Diagnostic Quality Assurance, a component entity of Quality Star, LLC, to voluntarily relinquish its status as a PSO. Accordingly, Diagnostic Quality Assurance was delisted effective at 12:00 Midnight ET (2400) on July 1, 2018. AHRQ notes that that Diagnostic Quality Assurance submitted this request for voluntary relinquishment following receipt of the Notice of Preliminary Finding of Deficiency sent on April 10, 2018.

More information on PSOs can be obtained through AHRQ's PSO website at *http://www.pso.ahrq.gov.*

Francis D. Chesley, Jr.,

Acting Deputy Director.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2017–N–0007]

Biosimilar User Fee Rates for Fiscal Year 2019

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the rates for biosimilar user fees for fiscal year (FY) 2019. The Federal Food, Drug, and Cosmetic Act (FD&C Act), as amended by the Biosimilar User Fee Amendments of 2017 (BsUFA II), authorizes FDA to assess and collect user fees for certain activities in connection with biosimilar biological product development; review of certain applications for approval of biosimilar biological products; and each biosimilar biological product approved in a biosimilar biological product application.

BsUFA II directs FDA to establish, before the beginning of each fiscal year, the amount of initial and annual biosimilar biological product development (BPD) fees, the reactivation fee, and the biosimilar biological product application and

program fees for such year. These fees apply to the period from October 1, 2018, through September 30, 2019.

FOR FURTHER INFORMATION CONTACT: David Haas, Office of Financial Management, Food and Drug Administration, 8455 Colesville Rd., COLE–14202I, Silver Spring, MD 20993–0002, 240–402–9845.

SUPPLEMENTARY INFORMATION:

I. Background

Sections 744G, 744H, and 744I of the FD&C Act (21 U.S.C. 379j–51, 379j–52, and 379j–53), as amended by BsUFA II (title IV of the FDA Reauthorization Act of 2017, Pub. L. 115–52), authorize the collection of fees for biosimilar biological products. Under section 744H(a)(1)(A) of the FD&C Act, the initial BPD fee for a product is due when the sponsor submits an investigational new drug (IND) application that FDA determines is intended to support a biosimilar biological product application or within 5 calendar days after FDA grants the first BPD meeting, whichever occurs first. A sponsor who has paid the initial BPD fee is considered to be participating in FDA's BPD program for that product.

Under section 744H(a)(1)(B) of the FD&C Act, once a sponsor has paid the initial BPD fee for a product, the annual BPD fee is assessed beginning with the next fiscal year. The annual BPD fee is assessed for the product each fiscal year until the sponsor submits a marketing application for the product that is accepted for filing or discontinues participation in FDA's BPD program.

Under section 744H(a)(1)(D) of the FD&C Act, if a sponsor has discontinued participation in FDA's BPD program and wants to re-engage with FDA on development of the product, the sponsor must pay a reactivation fee to resume participation in the program. The sponsor must pay the reactivation fee by the earlier of the following dates: No later than 5 calendar days after FDA grants the sponsor's request for a BPD meeting for that product or upon the date of submission by the sponsor of an IND describing an investigation that FDA determines is intended to support a biosimilar biological product application for that product. The sponsor will be assessed an annual BPD fee beginning with the first fiscal year after payment of the reactivation fee.

BsUFA II also authorizes fees for certain biosimilar biological product applications and for each biosimilar biological product identified in an approved biosimilar biological product application (section 744H(a)(2) and (3) of the FD&C Act). Under certain conditions, FDA will grant a small business a waiver from its first biosimilar biological product application fee (section 744H(d)(1) of the FD&C Act).

For FY 2018 through FY 2022, the base revenue amounts for the total revenues from all BsUFA fees are established by BsUFA II. For FY 2019, the base revenue amount is the FY 2018 inflation adjusted fee revenue amount of $40,214,000. The FY 2019 base revenue amount is to be adjusted for inflation and may be reduced, as appropriate, for long-term financial planning purposes.

This document provides fee rates for FY 2019 for the initial and annual BPD fee ($185,409), for the reactivation fee ($370,818), for an application requiring clinical data ($1,746,745), for an application not requiring clinical data ($873,373), and for the program fee ($304,162). These fees are effective on October 1, 2018, and will remain in effect through September 30, 2019. For applications that are submitted on or after October 1, 2018, the new fee schedule must be used.

II. Fee Revenue Amount for FY 2019

The base revenue amount for FY 2019 is $40,214,000 prior to adjustments for inflation and operating reserves (see section 744H(c)(1) and (3) of the FD&C Act).

A. FY 2019 Statutory Fee Revenue Adjustments for Inflation

BsUFA II specifies that the $40,214,000 is to be adjusted for inflation increases for FY 2019 using two separate adjustments—one for personnel compensation and benefits (PC&B) and one for non-PC&B costs (see section 744H(c)(1) of the FD&C Act).

The component of the inflation adjustment for payroll costs shall be one plus the average annual percent change in the cost of all PC&B paid per full-time equivalent (FTE) positions at FDA for the first 3 of the preceding 4 FYs, multiplied by the proportion of PC&B costs to total FDA costs of the process for the review of biosimilar biological product applications for the first 3 of the preceding 4 FYs (see section 744H(c)(1)(B) of the FD&C Act).

Table 1 summarizes the actual cost and FTE data for the specified FYs and provides the percent changes from the previous FYs and the average percent changes over the first 3 of the 4 FYs preceding FY 2019. The 3-year average is 2.4152 percent.

TABLE 1—FDA PC&B EACH YEAR AND PERCENT CHANGES

Fiscal year	2015	2016	2017	3-year average
Total PC&B	$2,232,304,000	$2,414,728,159	$2,581,551,000	.....
Total FTE	15,484	16,381	17,022	.....
PC&B per FTE	144,168	147,408	151,660	.....
Percent Change From Previous Year	2.1136	2.2474	2.8845	2.4152

The statute specifies that this 2.4152 percent be multiplied by the proportion of PC&B costs to the total FDA costs of the process for the review of biosimilar biological product applications. Table 2 shows the PC&B and the total obligations for the process for the review of biosimilar biological product applications for the first 3 of the preceding 4 FYs.

TABLE 2—PC&B AS A PERCENT OF TOTAL COST OF THE PROCESS FOR THE REVIEW OF BIOSIMILAR BIOLOGICAL PRODUCT APPLICATIONS

Fiscal year	2015	2016	2017	3-year average
Total PC&B	$23,265,434	$26,775,674	$30,707,050	.....
Total Costs	34,817,217	45,569,430	55,814,043	.....

TABLE 2—PC&B AS A PERCENT OF TOTAL COST OF THE PROCESS FOR THE REVIEW OF BIOSIMILAR BIOLOGICAL PRODUCT APPLICATIONS—Continued

Fiscal year	2015	2016	2017	3-year average
PC&B Percent	66.8216	58.7580	55.0167	60.1988

The payroll adjustment is 2.4152 percent from table 1 multiplied by 60.1988 percent (or 1.4539 percent).

The statute specifies that the portion of the inflation adjustment for non-payroll costs is the average annual percent change that occurred in the Consumer Price Index (CPI) for urban consumers (Washington-Baltimore, DC–MD–VA–WV; not seasonally adjusted; all items; annual index) for the first 3 years of the preceding 4 years of available data multiplied by the proportion of all costs other than PC&B costs to total costs of the process for the review of biosimilar biological product applications for the first 3 years of the preceding 4 FYs (see section 744H(c)(1)(B) of the FD&C Act). Table 3 provides the summary data for the percent changes in the specified CPI for the Washington-Baltimore area. The data are published by the Bureau of Labor Statistics and can be found on its website at: *https://data.bls.gov/pdq/SurveyOutputServlet?data_tool=dropmap&series_id=CUURA311SA0, CUUSA311SA0.*

TABLE 3—ANNUAL AND THREE-YEAR AVERAGE PERCENT CHANGE IN CPI FOR WASHINGTON-BALTIMORE AREA

Year	2015	2016	2017	3-year average
Annual CPI	155.353	157.180	159.202	.....
Annual Percent Change	0.3268	1.1760	1.2864	0.9297

The statute specifies that this 0.9297 percent be multiplied by the proportion of all costs other than PC&B to total costs of the process for the review of biosimilar biological product applications obligated. Since 60.1988 percent was obligated for PC&B (as shown in table 2), 39.8012 percent is the portion of costs other than PC&B (100 percent minus 60.1988 percent equals 39.8012 percent). The non-payroll adjustment is 0.9297 percent times 39.8012 percent, 0.3700 percent.

Next, we add the payroll adjustment (1.4539 percent) to the non-payroll adjustment (0.3700 percent), for a total inflation adjustment of 1.8239 percent (rounded) for FY 2019.

We then multiply the base revenue amount for FY 2019 ($40,214,000) by one plus the inflation adjustment percentage (1.018239), yielding an inflation-adjusted amount of $40,947,463.

B. FY 2019 Statutory Fee Revenue Adjustments for Operating Reserve

BsUFA II provides for an operating reserve adjustment to allow FDA to adjust the fee revenue and fees for any given fiscal year during BsUFA II, after FY 2018, to maintain an appropriate operating reserve of carryover user fees. Beginning in FY 2019, FDA may reduce the fee revenue and fees for long-term financial planning purposes. Once the capacity planning adjustment is effective (see section 744H(c)(2) of the FD&C Act), which FDA expects to occur in FY 2021, FDA also may, if necessary, increase the fee revenue and fees to maintain not more than 21 weeks of operating reserve of carryover user fees.

As described in the BsUFA II commitment letter, *Biosimilar Biological Product Reauthorization Goals and Procedures Fiscal Years 2018 Through 2022,* FDA is committed to reducing the BsUFA carryover reserve to an amount no greater than 21 weeks of operating reserve of carryover user fees by the end of FY 2022. In support of this commitment, FDA has determined that it shall apply an operating reserve adjustment to lower the FY 2019 target revenue amount by $2,100,000. This would establish an adjusted FY 2019 BsUFA fee revenue amount of $38,847,000 (rounded to the nearest thousand dollars).

III. Fee Amounts for FY 2019

Under section 744H(b)(3)(A) of the FD&C Act, FDA must determine the percentage of the total revenue amount for a fiscal year to be derived from: (1) Initial and annual BPD fees and reactivation fees; (2) biosimilar biological product application fees; and (3) biosimilar biological product program fees. In establishing the fee amounts for the second year of BsUFA II, FDA considered how best to balance the fee allocation to provide stable funding and reasonable fee amounts. In future years, FDA will consider the most appropriate means of allocating the fee amounts to collect the adjusted target revenue amount, subject to the relevant statutory provisions.

A. Application Fees

In establishing the biosimilar biological product application fee amount for FY 2019, FDA considered historical program information as well as input from an annual industry survey. Based on the available information, FDA estimates it will receive nine biosimilar biological product applications requiring clinical data for approval in FY 2019.

FDA will maintain the biosimilar biological product application fee for FY 2019 at the same level as FY 2018, which is $1,746,745. This is estimated to provide a total of $15,720,705 representing 40 percent (rounded to the nearest whole number) of the FY 2019 target revenue amount.

B. Biosimilar Biological Product Program Fee

Under BsUFA II, FDA assesses biosimilar biological product program fees (''program fees''). An applicant in a biosimilar biological product application shall not be assessed more than five program fees for a fiscal year for biosimilar biological products identified in a single biosimilar biological product application (see FD&C Act section 744H(a)(3)(D)). Applicants are assessed a program fee for a fiscal year only for biosimilar biological products identified in a biosimilar biological product application approved as of October 1 of such fiscal year.

Based on available information, FDA estimates that 23 program fees will be

invoiced for FY 2019, including currently approved products and products with the potential to be approved in pending applications with goal dates in FY 2018. For products invoiced in the FY 2019 regular billing cycle, FDA anticipates that zero program fees will be refunded. This is based on observations dating to 2015, when the first biosimilar product was approved.

FDA will maintain the biosimilar biological product program fee for FY 2019 at the same level as FY 2018, which is $304,162. This is estimated to provide a total of $6,995,726, representing 18 percent (rounded to the nearest whole number) of the FY 2019 target revenue amount.

C. Initial and Annual BPD Fees, Reactivation Fees

To estimate the number of participants in the BPD program in FY 2019, FDA must consider the number of new participants in the BPD program (initial BPD), the number of current participants (annual BPD), and the number of participants who will re-enter the BPD program (reactivation).

FDA uses internal data and a survey of BPD sponsors to estimate the total number of participants in the BPD program. In FY 2019, FDA estimates 24 participants entering the BPD program, zero reactivations, and 63 participants to be invoiced for the annual BPD fee for a total of 87 participants in the BPD program in FY 2019.

The remainder of the target revenue of $16,130,569, or 42 percent (rounded to the nearest whole number), is to be collected from the BPD fees. Dividing this amount by the estimated 87 BPD fees to be paid equals a BPD fee amount of $185,409. The reactivation fee is set at twice the initial/annual BPD amount at $370,818. This represents a reduction of the BPD fee from the FY 2018 levels.

IV. Fee Schedule for FY 2019

The fee rates for FY 2019 are displayed in table 4.

TABLE 4—FEE SCHEDULE FOR FY 2019

Fee category	Fee rates for FY 2019
Initial BPD	$185,409
Annual BPD	185,409
Reactivation	370,818
Applications:	
Requiring clinical data	1,746,745
Not requiring clinical data	873,373
Program	304,162

V. Fee Payment Options and Procedures

A. Initial BPD, Reactivation, and Application Fees

The fees established in the new fee schedule apply to FY 2019, *i.e.,* the period from October 1, 2018, through September 30, 2019. The initial BPD fee for a product is due when the sponsor submits an IND that FDA determines is intended to support a biosimilar biological product application for the product or within 5 calendar days after FDA grants the first BPD meeting for the product, whichever occurs first. Sponsors who have discontinued participation in the BPD program for a product and seek to resume participation in such program must pay the reactivation fee by the earlier of the following dates: No later than 5 calendar days after FDA grants the sponsor's request for a BPD meeting for that product or upon the date of submission by the sponsor of an IND describing an investigation that FDA determines is intended to support a biosimilar biological product application for that product.

The application fee for a biosimilar biological product is due upon submission of the application (see section 744H(a)(2)(C) of the FD&C Act).

To make a payment of the initial BPD, reactivation, or application fee, complete the Biosimilar User Fee Cover Sheet, available on FDA's website (*https://www.fda.gov/bsufa*) and generate a user fee identification (ID) number. Payment must be made in U.S. currency by electronic check, check, bank draft, U.S. postal money order, or wire transfer. The preferred payment method is online using electronic check (Automated Clearing House (ACH) also known as eCheck) or credit card (Discover, VISA, MasterCard, American Express). Secure electronic payments can be submitted using the User Fees Payment Portal at *https://userfees.fda.gov/pay* (*Note:* only full payments are accepted. No partial payments can be made online). Once you search for your invoice, click ''Pay Now'' to be redirected to *Pay.gov*. Electronic payment options are based on the balance due. Payment by credit card is available for balances that are less than $25,000. If the balance exceeds this amount, only the ACH option is available. Payments must be made using U.S bank accounts as well as U.S. credit cards.

FDA has partnered with the U.S. Department of the Treasury to use *Pay.gov*, a web-based payment application, for online electronic payment. The *Pay.gov* feature is available on the FDA website after the user fee ID number is generated.

Please include the user fee ID number on your check, bank draft, or postal money order. Mail your payment to: Food and Drug Administration, P.O. Box 979108, St. Louis, MO 63197–9000. If a check, bank draft, or money order is to be sent by a courier that requests a street address, the courier should deliver your payment to: U.S. Bank, Attention: Government Lockbox 979108, 1005 Convention Plaza, St. Louis, MO 63101. (*Note:* This U.S. Bank address is for courier delivery only. If you have any questions concerning courier delivery, contact U.S. Bank at 314–418–4013. This telephone number is only for questions about courier delivery.) Please make sure that the FDA post office box number (P.O. Box 979108) is written on the check, bank draft, or postal money order.

If paying by wire transfer, please reference your unique user fee ID number when completing the transfer. The originating financial institution may charge a wire transfer fee. Please ask your financial institution about the fee and include it with your payment to ensure that your fee is fully paid. The account information for wire transfers is as follows: U.S. Department of the Treasury, TREAS NYC, 33 Liberty St., New York, NY 10045, Acct. No.: 75060099, Routing No.: 021030004, SWIFT: FRNYUS33. If needed, FDA's tax identification number is 53–0196965.

B. Annual BPD and Program Fees

FDA will issue invoices with payment instructions for FY 2019 annual BPD and program fees under the new fee schedule in August 2018. Payment will be due on October 1, 2018. If sponsors join the BPD program after the annual BPD invoices have been issued in August 2018, FDA will issue invoices in December 2018 to firms subject to fees for FY 2019 that qualify for the annual BPD fee after the August 2018 billing. FDA will issue invoices in December 2018 for any annual program fees for FY 2019 that qualify for fee assessments and were not issued in August 2018.

Dated: July 26, 2018.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2018–16312 Filed 7–30–18; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Committee on Vital and Health Statistics: Meeting

Pursuant to the Federal Advisory Committee Act, the Department of Health and Human Services (HHS) announces the following advisory committee meeting.

Name: National Committee on Vital and Health Statistics (NCVHS), Full Committee Meeting.

Date and Times: Thursday, September 13, 2018: 9:00 a.m.–5:00 p.m. (EDT); Friday, September 14, 2018: 8:30 a.m.–3:00 p.m. (EDT).

Place: Melrose Georgetown Hotel, 2430 Pennsylvania Avenue NW, Washington, DC 20037.

Status: Open.

Purpose: At the September 13–14, 2018 meeting, the Committee will hear presentations, hold discussions on several health data policy topics and continue work on projects outlined in the NCVHS 2018 workplan. Anticipated action items during this meeting include an Environmental Scan Report on Health Terminologies and Vocabularies (T/V); and a summary report of the health T/V expert roundtable meeting held July 17–18, 2018. The NCVHS Population Health Subcommittee will hold a session with panelists to provide input to the Committee regarding strategies and resources/tools to increase access to small area data, and in general, the challenges in making relevant sub-national level health data more readily available. Subcommittee activities for discussion include the Predictability Roadmap as part of the Standards Subcommittee's project to identify possible approaches to improve predictability and improvements in the adoption and processes related to updating standards and operating rules for electronic administrative transactions (*e.g.,* claims, eligibility, electronic funds transfer). The Privacy, Confidentiality & Security Subcommittee will continue its focus on use cases that highlight the intersection of the regulated and unregulated domains for its ''Health Information Privacy and Security Beyond HIPAA'' project, and will propose a model that depicts the opportunities to address risks to individually identifiable information through improved stewardship for consideration by the full Committee.

The Committee will initiate discussion regarding plans for the NCVHS Thirteenth Report to Congress. The agenda times and topics are subject to change. There will be a public comment period on both meeting days. Please refer to the posted agenda for any updates.

Contact Persons for More Information: Substantive program information may be obtained from Rebecca Hines, MHS, Executive Secretary, NCVHS, National Center for Health Statistics, Centers for Disease Control and Prevention, 3311 Toledo Road, Hyattsville, Maryland 20782, telephone (301) 458–4715. Summaries of meetings and a roster of Committee members are available on the home page of the NCVHS website: *www.ncvhs.hhs.gov,* where further information including an agenda and instructions to access the audio broadcast of the meetings will be posted.

Should you require reasonable accommodation, please contact the CDC Office of Equal Employment Opportunity on (770) 488–3210 as soon as possible.

Dated: July 25, 2018.

Laina Bush,

Deputy Assistant Secretary for Planning and Evaluation, Office of the Assistant Secretary for Planning and Evaluation.

BILLING CODE 4151–05–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Emergency Use of Treatment for Uncontrolled Hemorrhage Due to Agents of Military Combat; Correction

AGENCY: Office of the Secretary, Department of Health and Human Services.

ACTION: Notice, correction.

SUMMARY: The Department of Health and Human Services is correcting a notice that appeared in the **Federal Register** on July 16, 2018. The notice announced the Secretary's Declaration Regarding Emergency Use of Treatment for Uncontrolled Hemorrhage During an Emergency Involving Agents of Military Combat pursuant to section 564 of the Federal Food, Drug & Cosmetic (FD&C) Act. On July 9, 2018, the Secretary declared that circumstances exist justifying the authorization of emergency use of freeze dried plasma (FDP) for the treatment of hemorrhage or coagulopathy during an emergency involving agents of military combat (*e.g.,* firearms, projectiles, and explosive devices) when plasma is not available for use or when the use of plasma is not practical, pursuant to section 564 of the FD&C Act, subject to the terms of any authorization issued under that section. This notice is correcting the July 16, 2018 notice to correctly state the Secretary's declaration.

FOR FURTHER INFORMATION CONTACT: Robert P. Kadlec, MD, MTM&H, MS, Assistant Secretary for Preparedness and Response, Office of the Secretary, Department of Health and Human Services, 200 Independence Avenue SW, Washington, DC 20201, Telephone (202) 205–2882 (this is not a toll free number).

SUPPLEMENTARY INFORMATION: In the **Federal Register** of July 16, 2018 (83 FR 32884) appearing on page 32884 in FR Doc. 2018–15152 the following corrections are made:

1. Title, change the title of the notice to ''Declaration Regarding Emergency Use of Treatment for Hemorrhage or Coagulopathy During an Emergency Involving Agents of Military Combat.''

2. Summary section, change the second paragraph to: '' On the basis of this determination, on July 9, 2018, the Secretary declared that circumstances exist justifying the authorization of emergency use of freeze dried plasma (FDP) for the treatment of hemorrhage or coagulopathy during an emergency involving agents of military combat (*e.g.,* firearms, projectiles, and explosive devices) when plasma is not available for use or when the use of plasma is not practical, pursuant to section 564 of the FD&C Act, subject to the terms of any authorization issued under that section.''

3. **SUPPLEMENTARY INFORMATION** section, subpart I, Background, second paragraph second sentence, delete ''French'' before ''FDP.''

4. **SUPPLEMENTARY INFORMATION** section, subpart III, Determination of the Secretary of Health and Human Services, change paragraph 1 to: ''On July 9, 2018, on the basis of the Deputy Secretary of Defense's determination that there is a military emergency or significant potential for a military emergency involving a heightened risk to U.S. military forces of an attack with an agent or agents that may cause, or are otherwise associated with an imminently life-threatening and specific risk to those forces, I declared that circumstances exist justifying the authorization of emergency use of FDP for the treatment of hemorrhage or coagulopathy during an emergency involving agents of military combat (*e.g.,* firearms, projectiles, and explosive devices) when plasma is not available for use or when the use of plasma is not practical, pursuant to section 564 of the FD&C Act, subject to the terms of any authorization issued under that section.''

Dated: July 25, 2018.

Ann Agnew,

Executive Secretary to the Department, U.S. Department of Health and Human Services.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Aging; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Advisory Council on Aging.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Council on Aging.

Date: September 13–14, 2018.

Closed: September 13, 2018, 3:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Building 31, C Wing 6th Floor Conference Room 10, 9000 Rockville Pike, Bethesda, MD 20892.

Open: September 14, 2018, 8:00 a.m. to 12:45 p.m.

Agenda: Call to order and report from the Director; Discussion of future meeting dates; Consideration of minutes of last meeting; Reports from Task Force on Minority Aging Research, Working Group on Program; Council Speaker; Program Highlights.

Place: National Institutes of Health, Building 31, C Wing 6th Floor Conference Room 10, 9000 Rockville Pike, Bethesda, MD 20892.

Contact Person: Robin Barr, Director, National Institute on Aging, Office of Extramural Activities, Gateway Building, 7201 Wisconsin Avenue, Bethesda, MD 20814, (301) 496–9322, *barrr@nia.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxicabs, hotel, and airport shuttles will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit. Information is also available on the Institute's/Center's home page:*www.nia.nih.gov/about/naca,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2018–0492]

Great Lakes Pilotage Advisory Committee; Vacancy

AGENCY: U.S. Coast Guard, Department of Homeland Security.

ACTION: Request for applications; extension of application.

SUMMARY: The U.S. Coast Guard seeks applications for membership on the Great Lakes Pilotage Advisory Committee. The Great Lakes Pilotage Advisory Committee provides advice and makes recommendations to the Secretary of Homeland Security through the U.S. Coast Guard Commandant on matters relating to Great Lakes pilotage, including review of proposed Great Lakes pilotage regulations and policies.

DATES: Open until the vacancy is filled.

ADDRESSES: Applicants should send a cover letter expressing interest in an appointment to the Great Lakes Pilotage Advisory Committee that also identifies which membership category the applicant is applying under, along with a resume detailing the applicant's experience via one of the following methods:

- *By Email: Rajiv.Khandpur@uscg.mil.*
- *By Fax:* (202) 372–8387 ATTN: Mr. Rajiv Khandpur.
- *By Mail:* Commandant (CG–WWM–2), U.S. Coast Guard.

Attention: Mr. Rajiv Khandpur, Designated Federal Officer, Great Lakes Pilotage Advisory Committee, 2703 Martin Luther King Jr. Ave. SE, Stop 7509, Washington, DC 20593–7509.

FOR FURTHER INFORMATION CONTACT: Mr. Rajiv Khandpur, Designated Federal Officer, Great Lakes Pilotage Advisory Committee, 2703 Martin Luther King Jr. Ave. SE, Stop 7509, Washington, DC 20593–7509; telephone 202–372–1525, fax 202–372–8387, or email at *Rajiv.Khandpur@uscg.mil.*

SUPPLEMENTARY INFORMATION: On March 28, 2018, the U.S. Coast Guard published a request in the **Federal Register** Volume 83, Number 60, for applications for membership in the Great Lakes Pilotage Advisory Committee. The application in the notice is being extended until the vacancy is filled. Applicants who responded to the initial notice do not need to reapply.

The Great Lakes Pilotage Advisory Committee is a federal advisory committee established in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C., Appendix). The Great Lakes Pilotage Advisory Committee operates under the authority of 46 U.S.C. 9307, and makes recommendations to the Secretary and the U.S. Coast Guard on matters relating to the Great Lakes.

Meetings of the Great Lakes Pilotage Advisory Committee will be held with the approval of the Designated Federal Officer. The Committee is required to meet at least once per year. Additional meetings may be held at the request of a majority of the Committee or at the discretion of the Designated Federal Officer.

Each Great Lakes Pilotage Advisory Committee member serves a term of office of up to 3 years. Members may serve a maximum of six consecutive years. All members serve without compensation from the Federal Government; however, they may receive travel reimbursement and per diem.

We will consider applicants for one position that will become vacant on September 30, 2018.

- One member with a background in finance or accounting, who—

a. Must have been recommended to the Secretary of the Department of Homeland Security by a unanimous vote of the other members of the Committee, and

b. May be appointed without regard to the requirement that each member have five years of practical experience in maritime operations.

To be eligible, applicants should have particular expertise, knowledge, and experience regarding the regulations and policies on the pilotage vessels on the Great Lakes, and at least five years of practical experience in maritime operations.

If you are selected as a member you will be appointed and serve as a Special Government Employee as defined in 202(a) of Title 18, U.S.C. Applicants for appointment as a Special Government Employee are required to complete a Confidential Financial Disclosure Report (OGE Form 450). The U.S. Coast Guard may not release the reports or the information in them to the public except under an order issued by a Federal Court or as otherwise provided under the Privacy Act (5 U.S.C. 552a). Only the Designated U.S. Coast Guard Ethics Official or his or her designee may release a Confidential Financial Disclosure Report. Applicants can obtain this form by going to the website of the Office of Government Ethics (*www.oge.gov*) or by contacting the individual listed above in **FOR FURTHER INFORMATION CONTACT**.

Registered lobbyists are not eligible to serve on Federal Advisory Committees in an individual capacity. See ''Revised Guidance on Appointment of Lobbyists to federal advisory committees, Boards and Commissions'' (79 FR 47482, August 13, 2014). Registered lobbyists are lobbyists as defined in Title 2 U.S.C. 1602 who are required by Title 2 U.S.C. 1603 to register with the Secretary of the Senate and the Clerk of the House Representatives.

The Department of Homeland Security does not discriminate in selection of Committee members on the basis of race, color, religion, sex, national origin, political affiliation, sexual orientation, gender identity, marital status, disability and genetic information, age, membership in an employee organization, or other non-merit factor. The Department of Homeland Security strives to achieve a widely diverse candidate pool for all of its recruitment actions.

If you are interested in applying to become a member of the Committee, send your cover letter and resume to Mr. Rajiv Khandpur, Designated Federal Officer, Great Lakes Pilotage Advisory Committee, via one of the transmittal methods in the **ADDRESSES** section by the deadline in the **DATES** section of this notice. Email submittals will receive email receipt confirmation.

Dated: July 26, 2018.

Michael D. Emerson,

Director, Marine Transportation Systems.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2018–0704]

Great Lakes Pilotage Advisory Committee

AGENCY: U.S. Coast Guard, Department of Homeland Security.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The Great Lakes Pilotage Advisory Committee will meet in Cape Vincent, New York, to discuss Committee matters relating to Great Lakes pilotage, including review of proposed Great Lakes pilotage regulations and policies. The meeting will be open to the public.

DATES:

Meeting: The Great Lakes Pilotage Advisory Committee will meet on Monday, September 10, 2018, from 8 a.m. to 5:30 p.m. EDT. Please note that this meeting may adjourn early if the Committee has completed its business.

Comments and supporting documents: To ensure your comments are received by Committee members before the meeting, submit your written comments no later than September 4, 2018.

ADDRESSES: The meeting will be held at a location owned and operated by Saint Lawrence Seaway Pilots Association, 230 N Point Street, Cape Vincent, New York 13618. *https://seawaypilots.com/.*

Pre-registration Information: Pre-registration is not required for access.

All attendees will be required to provide a government-issued picture identification card in order to gain admittance to the building.

For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

Instructions: You are free to submit comments at any time, including orally at the meetings, but if you want Committee members to review your comment before the meetings, please submit your comments no later than September 4, 2018. We are particularly interested in comments on the issues in the ''Agenda'' section below. You must include the words ''Department of Homeland Security'' and the docket number USCG–0704. Written comments may also be submitted using the Federal e-Rulemaking Portal at *http://www.regulations.gov.* If you encounter technical difficulties with comment submission, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section below. Comments received will be posted without alteration at *http://www.regulations.gov,* including any personal information provided. You may review the Privacy and Security Notice for the Federal Docket Management System at *https://www.regulations.gov/privacyNotice.*

Docket Search: For access to the docket or to read documents or comments related to this notice, go to *http://www.regulations.gov,* and use ''USCG–2018–0704'' in the ''Search'' box, press Enter, and then click on the item you wish to view.

FOR FURTHER INFORMATION CONTACT: Mr. Vincent Berg, Alternate Designated Federal Officer of the Great Lakes Pilotage Advisory Committee, telephone (202) 906–0835, or email *Vincent.F.Berg@uscg.mil.*

SUPPLEMENTARY INFORMATION: Notice of this meeting is in compliance with the Federal Advisory Committee Act, Title 5, U.S.C. Appendix. The Great Lakes Pilotage Advisory Committee is established under the authority of 46 U.S.C. 9307, and makes recommendations to the Secretary of Homeland Security and the Coast Guard on matters relating to Great Lakes pilotage, including review of proposed Great Lakes pilotage regulations and policies.

Agenda: The Great Lakes Pilotage Advisory Committee will meet on Monday, September 10, 2018 to review, discuss, deliberate and formulate recommendations, as appropriate, on the following topics:

1. Annual rulemakings and financial reports—uniform system of accounts and uniform auditing practices;
2. Target pilot compensation study;
3. Use of the 10-year rolling average of traffic;
4. Weighting factors application to charges;
5. Itemized source form;
6. Working capital fund;
7. Pilot association projects;
8. Pilot association compensation practices;
9. Pilot association training for applicants and partners;
10. Labor disputes/6-hour rule;
11. Temporary registration;
12. Billing disputes/process;
13. Tug usage;

14. Competitive pilotage;
15. Recuperative rest for pilots;
16. Legislative changes;
17. Lake Ontario/Saint Lawrence River Traffic Challenges;
18. Public comment period.

A copy of all meeting documentation will be available at *https://dco.uscg.afpims.mil/Our-Organization/Assistant-Commandant-for-Prevention-Policy-CG-5P/Marine-Transportation-Systems-CG-5PW/Office-of-Waterways-and-Ocean-Policy/Office-of-Waterways-and-Ocean-Policy-Great-Laskes-Pilotage-Div/* by September 4, 2018. Alternatively, you may contact Mr. Vincent Berg as noted in the **FOR FURTHER INFORMATION CONTACT** section above.

Public comments or questions will be taken throughout the meeting as the Committee discusses the issues and prior to deliberations and voting. There will also be a public comment period at the end of the meeting. Speakers are requested to limit their comments to 5 minutes. Please note that the public comment period will end following the last call for comments. Contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section above, to register as a speaker.

Dated: July 26, 2018.

Michael D. Emerson,

Director, Marine Transportation Systems.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Notice of Availability of Updated Privacy Impact Assessment for the Southwest Border Pedestrian Exit Field Test

AGENCY: U.S. Customs and Border Protection, DHS.

ACTION: Notice of availability.

SUMMARY: U.S. Customs and Border Protection (CBP) has made available an updated Privacy Impact Assessment (PIA) for the Southwest Border Pedestrian Exit Field Test. This updated PIA, which changes the retention period for certain biometric data gathered during the test, was published on the Department of Homeland Security (DHS) Privacy Office's website on March 5, 2018.

FOR FURTHER INFORMATION CONTACT: Debra Danisek, Privacy Officer, U.S. Customs and Border Protection, at *debra.danisek@cbp.dhs.gov* or (202) 344–1191.

SUPPLEMENTARY INFORMATION: U.S. Customs and Border Protection (CBP) conducted a test to collect certain biometric information at the Otay Mesa port of entry from December 2015 through June 2016 (''Southwest Border Pedestrian Exit Field Test''). This test was announced in a notice published in the **Federal Register** on November 13, 2015 (''2015 Notice'').[1] CBP published a Privacy Impact Assessment (PIA) for this test on the Department of Homeland Security (DHS) Privacy Office's website on November 6, 2015.[2] The purpose of the test was to determine if collecting biometrics in conjunction with biographic data upon exit from the United States would assist CBP in matching subsequent border crossing information records with previously collected entry records. The biometrics collected provide CBP with a baseline of images collected in a live environment that can be compared with existing images. CBP stated in the 2015 Notice and in the PIA that it would retain data collected during the test for one year.

Since the conclusion of the Southwest Border Pedestrian Exit Field Test, CBP has continued to explore the best collection methods and modalities for a biometric entry-exit program. CBP has found that the data collected in the Southwest Border Pedestrian Exit Field Test continues to have value because it provides CBP with a rich source of data for ongoing analysis in its efforts to implement an effective biometric entry-exit program. CBP and its vendors are able to use this data for analysis prior to expending additional time and resources to test various systems in the field. Therefore, CBP revised its retention policy for this data and published an updated PIA on the DHS Privacy Office's website on March 5, 2018. The updated PIA provides that CBP is retaining the biometric data gathered under the Southwest Border Pedestrian Exit Field Test until April 2020. It further provides that CBP is not storing the associated biographic information.

The updated PIA is available at: *https://www.dhs.gov/publication/dhscbppia-027-southwest-border-pedestrian-exit-field-test.*

[1] 80 FR 70241. In the 2015 Notice, the test was referred to as the ''Test to Collect Biometric Information at the Otay Mesa Port of Entry.''

[2] This PIA is available at: *https://www.dhs.gov/publication/dhscbppia-027-southwest-border-pedestrian-exit-field-test.*

Dated: July 26, 2018.

Debra Danisek,

CBP Privacy Officer, Privacy and Diversity Office, Office of the Commissioner.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Notice of Issuance of Final Determination Concerning Subdermal Needle Electrodes

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of final determination.

SUMMARY: This document provides notice that U.S. Customs and Border Protection (''CBP'') has issued a final determination concerning the country of origin of Rhythmlink International, LLC's Subdermal Needle Electrode. Based upon the facts presented, CBP has concluded that the country of origin of the Subdermal Needle Electrode is the United States or Japan, depending on the country of origin of the needle electrode used in the assembly of the Subdermal Needle Electrode, for purposes of U.S. Government procurement.

DATES: The final determination was issued on July 13, 2018. A copy of the final determination is attached. Any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of this final determination no later than August 30, 2018.

FOR FURTHER INFORMATION CONTACT: James Kim, Valuation and Special Programs Branch, Regulations and Rulings, Office of Trade (202) 325–0158.

SUPPLEMENTARY INFORMATION: Notice is hereby given that on July 13, 2018, pursuant to subpart B of Part 177, U.S. Customs and Border Protection Regulations (19 CFR part 177, subpart B), CBP issued a final determination concerning the country of origin of Rhythmlink International, LLC's Subdermal Needle Electrode, which may be offered to the U.S. Government under an undesignated government procurement contract. This final determination, HQ H296072, was issued under procedures set forth at 19 CFR part 177, subpart B, which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. 2511–18). In the final determination, CBP concluded that the assembly and processing in China does not result in a substantial transformation. Therefore,

the country of origin of Rhythmlink International, LLC's Subdermal Needle Electrode is the United States or Japan, depending on the country of origin of the needle electrode used in the assembly of the Subdermal Needle Electrode, for purposes of U.S. Government procurement.

Section 177.29, CBP Regulations (19 CFR 177.29), provides that a notice of final determination shall be published in the **Federal Register** within 60 days of the date the final determination is issued. Section 177.30, CBP Regulations (19 CFR 177.30), provides that any party-at-interest, as defined in 19 CFR 177.22(d), may seek judicial review of a final determination within 30 days of publication of such determination in the **Federal Register**.

Dated: July 13, 2018.

Alice A. Kipel,

Executive Director, Regulations and Rulings, Office of Trade.

Raleigh, NC 27612

RE: U.S. Government Procurement; Title III, Trade Agreements Act of 1979 (19 U.S.C. § 2511); Subpart B, Part 177, CBP Regulations; Subdermal Needle Electrode; Substantial Transformation

Dear Mr. Robinson:

This is in response to your correspondence of March 29, 2018, requesting a final determination on behalf of Rhythmlink International, LLC (''Rhythmlink''), pursuant to subpart B of Part 177, U.S. Customs and Border Protection (''CBP'') Regulations (19 C.F.R. § 177.21 *et seq.*).

This final determination concerns the country of origin of the Subdermal Needle Electrode. We note that Rhythmlink is a party-at-interest within the meaning of 19 C.F.R. § 177.22(d)(1) and is entitled to request this final determination.

FACTS:

Rhythmlink is headquartered in Columbia, North Carolina and manufactures and distributes medical devices and provides custom packaging, private labeling, custom products, and contract manufacturing to its customers.

The subject merchandise is a Subdermal Needle Electrode (''Product''), a high-tensile strength stainless steel wire cleared by the U.S. Food & Drug Administration (''FDA'') for performing both stimulating and recording electrical conductor functions. The Product serves as a physical connection between a patient and medical diagnostic equipment that records and/or elicits neurophysical biopotentials. The FDA classifies and designates the Product as a ''needle electrode,'' defined in FDA regulations as ''a device which is placed subcutaneously to stimulate or to record electrical signals.'' *See* 21 C.F.R. § 882.1350.

Rhythmlink's fully assembled, packaged Product consists of the following six component parts: the needle electrode, the leadwire, a miniscule amount of solder, a heat shrink tube, a protective cover for the needle, and packaging. Rhythmlink sells the Product in varying lengths and styles, and end users can customize the color of the connecting leadwire. The leadwire acts as an electrical conductor that transfers low voltage electrical signals from the needle electrode to medical diagnostic equipment. You state that the functionality of the Product is common to all lengths and is unchanged by the color of the pre-connected leadwire. You also state that other varieties of needle electrodes are available in the market that are not pre-connected to a leadwire. Such needle electrodes may connect to a leadwire without soldering by using alligator clips and other removable connectors. Other varieties of needle electrodes may utilize wireless transmission, eliminating the need for a leadwire altogether.

You state that Rhythmlink conducts all of the engineering and design of the Product in the United States. The engineering and design of the Subdermal Needle Electrode include the following steps: research and development; design control; IP generation; regulatory clearances; specifications; engineering drawings; work instructions; tooling, fixtures, and equipment designs; functional verification testing; sterilization validation; packaging, sterile barrier and shelf life validation; and process validations.

Rhythmlink outsources the actual manufacturing and production of the FDA-compliant needle electrodes (prior to being attached to other components) to a contract manufacturer of medical devices. The contract manufacturer manufactures the needle electrode entirely in either the United States or Japan using either U.S. or Japanese stainless steel material. You state that its production processes are largely proprietary and that the manufacturing costs are unknown. Under the manufacturing process of the needle electrode, a stainless steel wire is cut to precise lengths, and the cut wire undergoes precise facet grinding, passivation, and electropolishing. The needle electrode is manufactured to Rhythmlink's precise specifications, with three facets ground onto the front end to meet sharpness and insertion force requirements. Finally, it is packaged and shipped. The country of origin of the needle electrode is marked as either the United States or Japan, depending on the country in which it was manufactured.

The Korean-origin leadwire is a commercially available 26-gauge twisted copper wire comprising 19 strands of 38-gauge copper wire with medical grade PVC covering. The leadwire is available in a total of 35 color options. The Korean supplier of this wire cuts the wire, crimps a socket pin, attaches a connector to one end of the wire, and ships the wire to China.

The needle electrodes from the United States or Japan are exported to China for additional assembly and processing. The 'naked' end of the Korean leadwire is soldered to the needle electrode using Chinese-origin solder, which is a mix of tin and copper and represents a quarter of a percent of the Product's cost. You state that the soldering process takes roughly a second, substantiated by a video you provided of the process, and that six operators can professionally solder 30,000 Products in a day. The soldered Product undergoes ultrasonic cleaning and drying (spin and convention drying) in bulk. A Japanese-origin heat shrink tube, available in almost 40 different diameters, is added to protect the solder joint. A U.S.-origin protective needle cover is placed over the needle electrode to prevent accidents. Finally, the product is packaged in a Tyvek pouch and cardboard packaging of Chinese-origin and re-exported to the United States.

In the United States, the Product is subject to sterilization and a randomized sampling and testing protocol prior to sale.

You provided a catalog of Rhythmlink's products, which includes the Subdermal Needle Electrode. You also provided a detailed process map depicting the various processing steps involved in the engineering, manufacture, and sale of the Product, along with information on the country in which each step occurs and the skill and technology level required for each step. In addition, you provided component specifications for the Product.

ISSUE:

What is the country of origin of the Subdermal Needle Electrode for purposes of U.S. Government procurement?

LAW AND ANALYSIS:

CBP issues country of origin advisory rulings and final determinations as to whether an article is or would be a product of a designated country or instrumentality for the purposes of granting waivers of certain ''Buy American'' restrictions in U.S. law or practice for products offered for sale to the U.S. Government, pursuant to subpart B of Part 177, 19 C.F.R. § 177.21 *et seq.,* which implements Title III of the Trade Agreements Act of 1979, as amended (19 U.S.C. § 2511 *et seq.*) (''TAA'').

Under the rule of origin set forth under 19 U.S.C. § 2518(4)(B):

> An article is a product of a country or instrumentality only if (i) it is wholly the growth, product, or manufacture of that country or instrumentality, or (ii) in the case of an article which consists in whole or in part of materials from another country or instrumentality, it has been substantially transformed into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was so transformed.

See also 19 C.F.R. § 177.22(a).

In rendering advisory rulings and final determinations for purposes of U.S. Government procurement, CBP applies the provisions of subpart B of Part 177 consistent with Federal Acquisition Regulations. *See* 19 C.F.R. § 177.21. In this regard, CBP recognizes that the Federal Acquisition Regulations restrict the U.S. Government's purchase of products to U.S.-made or designated country end products for acquisitions subject to the TAA. *See* 48 C.F.R. § 25.403(c)(1). The Federal Acquisition Regulations define ''U.S.-made end product'' as:

> . . . an article that is mined, produced, or manufactured in the United States or that is substantially transformed in the United States into a new and different article of commerce with a name, character, or use distinct from that of the article or articles from which it was transformed.

48 C.F.R. § 25.003.

A substantial transformation occurs when an article emerges from a process with a new name, character or use different from that possessed by the article prior to processing. A substantial transformation will not result from a minor manufacturing or combining process that leaves the identity of the article intact. *See United States* v. *Gibson-Thomsen Co.,* 27 C.C.P.A. 267 (1940); *National Juice Products Association* v. *United States,* 628 F. Supp. 978 (Ct. Int'l Trade 1986).

Courts have held that when the properties and uses of a product are predetermined by the material from which it was made, no substantial transformation occurs. For example, in *Superior Wire* v. *United States,* 669 F. Supp. 472 (Ct. Int'l Trade 1987), *aff'd,* 867 F.2d 1409 (Fed. Cir. 1989), wire rod in coils was shipped to Canada where it was drawn into wire. The tensile strength of the final product was increased by approximately 30 to 40 percent as the rod was reduced in cross-sectional area by about 30 percent and was elongated. The court determined that the drawing operation did not result in a substantial transformation, pointing out that the properties of the wire rod and its uses were determined by the chemical content of the rod and the cooling processes used in its manufacture, and that the wire rod dictated the final form of the finished wire.

For purposes of this ruling, we assume that the country of origin of the stainless steel wire used to manufacture the needle electrode is the United States or Japan. You assert that the assembly and processing that occurs in China, a non-designated country, does not substantially transform the U.S. or Japanese-origin needle electrode, claimed to be the essential character of the Product, into a new and different article of commerce.

In HQ 555774, dated December 10, 1990, Customs, a predecessor of CBP, ruled that Japanese-origin wire cut to varying length and electrical connectors crimped onto the ends of the wire in the United States did not constitute substantial transformation. Customs found that the essential character and use of the wire before and after the processing was the same, *i.e.,* to conduct electrical current.

In HQ H248851, dated July 8, 2014, CBP held that an Israeli-origin CO2 tube was not substantially transformed in China when cut to length and attached to four other components from Israel and China. CBP found that the CO2 tube performed the essential function of the finished product, which was the delivery of breath for monitoring the CO2 level in a patient's breath. By way of the assembly process in China, the CO2 tube was attached to other components that facilitated its function and did not lose its individual identity in the process.

Like the operations described in HQ 555774 and HQ H248851, the assembly and processing that occur in China are simple and minor processes that leave the identity of the needle electrode intact. The soldering of the leadwire to the needle electrode occurs in roughly one second. The remaining processing of the Product, consisting of cleaning and drying, adding a heat shrink and protective cover, and packaging, are likewise simple and minor operations involving highly repetitive, low-skill functions.

As in *Superior Wire,* the properties and uses of the Product are predetermined by the qualities of the needle electrode itself, which do not change as a result of the Chinese assembly and processing operations. The Product's main function is to penetrate the skin or other membrane to allow medical diagnostic equipment to record or stimulate neurophysical biopotentials. While the presence of a pre-connected leadwire does provide convenience for the end user, by eliminating the need to use removable connectors for attaching a leadwire, the needle electrode is nonetheless capable of performing its main function without a pre-connected leadwire. Prior to any Chinese assembly or processing, the needle electrode already meets the definition of the FDA regulated ''needle electrode.'' As in HQ H248851, the attachment of the leadwire and other components to the needle electrode may facilitate its function, but the needle electrode does not lose its individual identity in the process. As a result, we find that the U.S. or Japanese-origin needle electrode, rather than the Korean-origin leadwire, determines the essential character of the Product.

We find that the name, character, and use of the needle electrode remain unchanged after the attachment of the leadwire and other components. Accordingly, we find that the needle electrode is not substantially transformed as a result of the Chinese assembly and processing operations.

HOLDING:

The country of origin of the Subdermal Needle Electrode for U.S. Government procurement purposes is the United States or Japan, depending on the country of origin of the needle electrode.

Notice of this final determination will be given in the **Federal Register**, as required by 19 C.F.R. § 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 C.F.R. § 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 C.F.R. § 177.30, any party-at-interest may, within 30 days after publication of the **Federal Register** notice referenced above, seek judicial review of this final

determination before the Court of International Trade.

Sincerely,

Alice A. Kipel

BILLING CODE P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. DHS–2018–0003]

Privacy Act of 1974; System of Records

AGENCY: Department of Homeland Security.

ACTION: Notice of a new system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security (DHS) proposes to consolidate two legacy systems of record, Department of Homeland Security/U.S. Citizenship and Immigration Services-002 Background Check Service and Department of Homeland Security/U.S. Citizenship and Immigration Services-003 Biometric Storage System into the new DHS system of records titled, ''Department of Homeland Security/U.S. Citizenship and Immigration Services-018 Immigration Biometric and Background Check System of Records.'' This system of records notice (SORN) allows the DHS U.S. Citizenship and Immigration Services (USCIS) to collect and maintain biographic, biometric, and background check records on applicants, petitioners, sponsors, beneficiaries, or other individuals in connection with a benefit request. USCIS uses biometric and associated biographic information to verify identity, conduct criminal and national security background checks against internal and external government systems, and to support domestic and foreign data sharing agreements. The categories of individuals, categories of records, and the routine uses of these legacy systems of records notices have been consolidated and updated to better reflect the Department's biometric and biographic criminal background checks; identity enrollment, verification, and resolution; document production record systems; and data sharing efforts.

Additionally, DHS is issuing a Notice of Proposed Rulemaking (NPRM) to exempt this system of records from certain provisions of the Privacy Act, elsewhere in the **Federal Register**. This new system will be included in DHS's inventory of record systems.

DATES: Submit comments on or before August 30, 2018. This system will be effective upon publication. Routine uses will become effective August 30, 2018.

ADDRESSES: You may submit comments, identified by docket number DHS–2018–0003 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–343–4010.
- *Mail:* Philip S. Kaplan, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

Instructions: All submissions received must include the agency name and docket number DHS–2018–0003 for this notice. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For general questions, please contact: Donald K. Hawkins, (202) 272–8030, *USCIS.PrivacyCompliance@uscis.dhs.gov,* Privacy Officer, U.S. Citizenship and Immigration Services, 20 Massachusetts Avenue NW, Washington, DC 20529. For privacy questions, please contact: Philip S. Kaplan, (202) 343–1717, *Privacy@hq.dhs.gov,* Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

SUPPLEMENTARY INFORMATION:

I. Background

DHS USCIS has relied on two preexisting DHS/USCIS Privacy Act SORNs for the maintenance of USCIS biometric and background check records: ''DHS/USCIS 002 Background Check Service,'' 72 FR 31082 (June 5, 2007), and ''DHS/USCIS–003 Biometric Storage System,'' 72 FR 17172 (April 6, 2007). Such records will be covered by one new system of records named ''DHS/USCIS–018 Immigration Biometric and Background Check (IBBC) System of Records.'' USCIS processes and adjudicates most immigration benefit requests and other immigration request forms (*e.g.,* applications and petitions) for DHS. This new system of records notice consolidates and covers all of USCIS's biometric and associated biographic information it collects pursuant to that mission. The purpose of this system is to verify identity and conduct criminal and national security background checks in order to establish an individual's eligibility for an immigration benefit or other request, and support domestic and international data sharing efforts. USCIS determines eligibility by capturing biometric and associated biographic data from benefit requestors, beneficiaries, and other categories of individuals to facilitate three key operational functions: (1) Verify an individual's identity; (2) conduct criminal and national security background checks; and (3) produce benefit cards and documents as a proof of benefit.

Most individuals who file benefit requests for themselves or on the behalf of others (*i.e.,* petitioner, applicants, beneficiaries, and requestors) are subject to background, identity, and security checks to ensure eligibility for the requested benefit. Other individuals in connection with immigration benefit requests or other requests (*i.e.,* household members, sponsors) may also be subject to certain background, identity, and security checks. The biometric collection process begins with the capture of biometric data at an authorized biometric capture site, including USCIS offices, Application Support Centers, or U.S. consular offices and military installations abroad. USCIS requires applicants, petitioners, sponsors, beneficiaries, or other individuals in connection of a benefit request to submit their biometrics along with associated biographic information to USCIS for background, identity, and security checks. The types of background checks USCIS conducts vary by the benefit or request type. Standard background checks may include, but are not limited to:

Biometric based checks:

- Federal Bureau of Investigation (FBI) Next Generation Identification (NGI) Biometric Check;
- DHS Office of Biometric and Identity Management (OBIM) Automated Biometric Identification System (IDENT) Biometric Check;
- Department of Defense (DoD) Automated Biometric Identification System (ABIS) Biometric Check;

Biographic name-based checks:

- FBI Central Records System (CRS) and Universal Index (UNI) Name Check;
- U.S. Customs and Border Protection (CBP) TECS Name Checks;
- Department of State (DOS) Consular Lookout and Support System (CLASS); and
- DOS Security Advisory Opinion (SAO).

USCIS may also perform interagency checks with intelligence community partners for certain benefits. The results of these checks are used to inform

eligibility determinations, which will result in the approval or denial of a benefit. If fraudulent activity, criminal activity, or potential threats to public safety or national security are detected as a result of the biometric or name check, information may be referred to the USCIS Fraud Detection and National Security Directorate (FDNS) or appropriate law enforcement agencies for further review. These law enforcement agencies include U.S. Immigration and Customs Enforcement (ICE), CBP, FBI, or other federal, state, local, tribal, foreign, or international law enforcement agencies. USCIS may also conduct additional background and security checks against other federal, international, state, and local systems to verify the identity of the individual as part of the eligibility determination for a benefit or request, as appropriate.

USCIS sends biometric, associated biographic, and encounter-related data to IDENT to conduct biometric searches against the system. IDENT is the central DHS-wide information technology system for enrollment, storage, and processing of biometric and associated biographic information. IDENT is maintained for the purposes of national security, law enforcement, immigration and border management, intelligence, and credentialing (*e.g.,* background investigations for national security positions and certain positions of public trust), as well as for other administrative uses (*e.g.,* providing associated testing, training, management reporting, or planning and analysis). When an authorized request is received by OBIM, the program management office for IDENT, analysts search IDENT for biometric matches and assign matches as new encounters into IDENT on behalf of USCIS. Consistent with this SORN and other SORNs governing different biometric data sets in IDENT, USCIS biographic and biometric information from IDENT may be shared with federal, state, local, tribal, foreign, and international agencies for national security, law enforcement, criminal justice, immigration and border management, and intelligence purposes. In addition, information from IDENT may also be shared for background investigations for national security positions and certain positions of public trust in accordance with statutory and regulatory restrictions on disclosure.

International Biometric Sharing Initiatives

This system of records supports the biometric vetting capability outlined in data sharing agreements between DHS and certain foreign partners. USCIS may send and receive biometric requests to and from certain foreign partners through IDENT in support of its immigration mission and applicable laws. The purpose of these data sharing initiatives is to enhance the cooperation between the United States and foreign partners to prevent terrorism, including terrorist travel; prevent serious crime and other threats to national security and public safety; assist in the administration and enforcement of immigration laws; and provide the foreign partner with appropriate information for its consideration when adjudicating requests for immigration benefits including, but not limited to, asylum or refugee status. Through international sharing agreements, USCIS may share biometric and associated biographic information stored in IDENT, which it collected in determining suitability for an immigration benefit, with foreign partners. DHS does not permit third party disclosure without prior approval.

Document Production

Once the adjudication of certain immigration benefits are complete, USCIS creates official, personalized and secure identity documents to certify the grant of the requested benefit. The secure identification documents USCIS produces and issues are high-quality and state-of-the-art, incorporating tamper-resistant, machine-readable, and biometrically-enabled technologies designed to withstand document counterfeiting efforts, alteration, or efforts employed to commit fraud.

Information stored in the DHS/USCIS–018 IBBC System of Records may be shared with other DHS Components that have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions. In addition, DHS/USCIS may share information with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this system of records notice.

Additionally, DHS is issuing an NPRM to exempt this system of records from certain provisions of the Privacy Act elsewhere in the **Federal Register**. This new system of records will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework under which Federal Government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. Additionally, the Judicial Redress Act (JRA) provides statutory rights to covered persons to request access and amendment to covered records, as defined by the JRA, along with judicial review for denials of such requests. In addition, the JRA prohibits disclosures of covered records, except as otherwise permitted by the Privacy Act.

Below is the description of the DHS/USCIS–018-Immigration Biometric and Background Check (IBBC) System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

SYSTEM NAME AND NUMBER:

DHS/USCIS–018 Immigration Biometric and Background Check (IBBC) System of Records.

SECURITY CLASSIFICATION:

Unclassified and classified. The data may be retained on classified networks but this does not change the nature and character of the data until it is combined with classified information.

SYSTEM LOCATION:

DHS/USCIS maintains records in DHS-approved data centers in the Washington, DC, metropolitan area. Backups are maintained offsite. IBBC will be accessible world-wide from all USCIS field offices, service centers, and Application Service Centers that are part of the DHS Network. Paper files are located at USCIS Headquarters in Washington, DC and in DHS/USCIS service centers, domestic and international field offices, and other USCIS facilities. USCIS stores biometric records in the DHS biometrics repository, OBIM IDENT.

DHS/USCIS replicates records from the operational IT systems and maintains them in other IT systems connected on the DHS unclassified and classified networks.

SYSTEM MANAGER(S):

Associate Director, Immigration Records and Identity Services, *BD.systems@uscis.dhs.gov,* U.S. Citizenship and Immigration Services,

Department of Homeland Security, 111 Massachusetts Avenue NW, Washington, DC 20529.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

8 U.S.C. 1101 and 1103; 8 CFR 103.16(a); and 8 CFR 103.2(b)(9).

PURPOSE(S) OF THE SYSTEM:

The purpose of this system is to assist USCIS with determining an individual's eligibility for an immigration benefit request or other USCIS requests. USCIS captures biographic and biometric data from applicants, petitioners, sponsors, beneficiaries, or other individuals to facilitate three key operational functions: (1) Enroll, verify, and manage an individual's identity; (2) conduct criminal and national security background checks; and (3) produce benefit cards/documents as a proof of benefit. Also, the purpose of this system is to (4) support data sharing initiatives between DHS components, other U.S. Government agencies and foreign partners in order to prevent terrorism, including terrorist travel; prevent serious crime and other threats to national security and public safety; and assist in the administration and enforcement of immigration laws.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by this system include:

- Persons who have filed on their own behalf, or on the behalf of others, applications or petitions for immigration benefits or other requests under the Immigration and Nationality Act (INA) (*i.e.,* applicants, petitioners, and beneficiaries), as amended;
- Current, former, and potential derivative family members of benefit requestors;
- Affiliated persons who have a clearly articulated rational connection to the request, applicant, petitioner, or beneficiary, that may have an impact on the adjudication process of a request;
- Associates whose information is voluntarily provided by the applicant as part of the family tree, and which include points of contact in the United States and other individuals with whom the applicant associates (*i.e.,* household members, sponsors);
- Attorneys and representatives recognized by USCIS and/or accredited by the Board of Immigration Appeals (Representatives); and
- All individuals who meet the definition of an adult member of the household, 8 CFR 204.3(b) or 8 CFR 204.301; and/or any other individual whose presence in the applicant's or petitioner's residence is relevant to the prospective adoptive parent(s)'s suitability to adopt overseas.

CATEGORIES OF RECORDS IN THE SYSTEM:

This system covers biographic, biometric, unique machine-generated identifiers, encounter-related data, criminal and national security background check results, and card production information.

Biographic information may include:

- Full name;
- Aliases;
- Other names;
- Date of birth;
- Place of birth;
- Country of Citizenship/Nationality;
- Current and previous immigration status;
- Mailing and physical address;
- Phone number;
- Employment status;
- Travel Document Numbers (*i.e.,* passport numbers, I–94 number);
- Travel Document Information (*i.e.,* country of issuance, nationality, date of issuance, expiration date);
- Case Type (*i.e.,* refugee claimant, identity investigation, absconder, visa applicant);
- Filing date;
- Filing determination;
- Reason for filing determination;
- Gender;
- Height;
- Weight;
- Eye color;
- Hair color;
- Race/Ethnicity; and
- Unique Identifying Numbers, including, but not limited to, Alien Registration Number (Alien Number), Receipt Number, Social Security number (SSN), and USCIS Online Account Number.

Biometric information may include:

- Biometric images (including, but not limited to: Photographs/facial images, fingerprint images, iris images, voice samples, and signatures); and
- Details about images (*i.e.,* capture date, reason fingerprinted, and location).

Encounter information may include:

- Scan of marked travel document page;
- Foreign partner point of contact information;
- Watchlist indicator, indicator of derogatory information, or reason for alert;
- Arrival, Departure, and/or Removal information (date and location);
- Transaction Control Numbers Associated with FBI fingerprint checks;
- Date/time of submission;
- Type of immigration form or non-biometric encounter;
- Date of immigration form or non-biometric encounter;
- Query results (match or no match);
- Error code; and
- Transaction Identifier Data (*i.e.,* sending organization; timestamp; date; transaction type; case type; priority level; message origin; message destination; reference numbers (requesting participants subject specific reference number; or requesting participants event specific reference number); workstation; reason fingerprinted, such as entry, visa application, credentialing application, or apprehension; and any available encounter information, including an IDENT-generated encounter identification number (EID)).

BACKGROUND CHECK INFORMATION MAY INCLUDE:

- Results of criminal and national security background checks (*i.e.,* positive or negative response; and positive responses are generally accompanied with the individual's criminal history and additional information explaining the results of the response); Unique Biometric Identifier (*i.e.,* Fingerprint Identification Number (FIN) and Universal Control Number (formerly known as FBI Number)); and
- Logs associated with the requests of background checks, which may include requesting location and requesting person.

Document Production information may include:

- Identifying Transactional Information (*i.e.,* transaction control number, book number);
- Biographical Information used for Document Production;
- Document Production Status;
- Benefit Card/Document Type;
- Class of Admission;
- Document Serial Number;
- Radio Frequency Identification (RFID) with USCIS Issued Document;
- Machine-readable Barcode;
- Production Site;
- Production Status; and
- Document Issuance Time/Date and Expiration Date.

RECORD SOURCE CATEGORIES:

Records are obtained from the categories of individuals included in this SORN. Information contained in this system may also be supplied by DHS, other U.S. Federal, state, tribal, or local government agencies, foreign government agencies, and international organizations. USCIS personnel may input information as they process a case, including information from internal and external sources, and to verify whether a benefit requestor or family is eligible for the benefit requested. Records covered by other

systems of records (or their successor systems) that are ingested and covered by this SORN include the following:

1. DHS/USCIS/ICE/CBP–001 Alien File, Index, and National File Tracking System of Records, 82 FR 43556 (Sept. 18, 2017);

2. DHS/USCIS–005 Intercountry Adoptions Security, 81 FR 78614 (Nov. 8, 2016);

3. DHS/USCIS–006 Fraud Detection and National Security Records (FDNS), 77 FR 47411 (Aug. 8, 2012);

4. DHS/USCIS–007 Benefit Information System, 81 FR 72069 (Oct. 19, 2016);

5. DHS/USCIS–010 Asylum Information and Pre-Screening, 80 FR 74781 (Nov. 30, 2015);

6. DHS/USCIS–017 Refugee Case Processing and Security Screening Information, 81 FR 72075 (Oct. 19, 2016);

7. DHS/CBP–011 U.S. Customs and Border Protection TECS, 73 FR 77778 (Dec. 19, 2008);

8. DHS/ICE–011-Criminal Arrest Records and Immigration Enforcement Records (CARIER) System of Records, 81 FR 72080 (Oct. 19, 2016);

9. DHS/US–VISIT–001 DHS Automated Biometric Identification System (IDENT), 72 FR 31080 (June 5, 2007);

10. DHS/ALL–041 External Biometric Records (EBR) System of Records, 83 FR 17829 (April 24, 2018);

11. JUSTICE/FBI–002 The FBI Central Records System, 82 FR 24147 (May 25, 2017), and prior history (*https://www.justice.gov/opcl/doj-systems-records*);

12. JUSTICE/FBI–009 The Next Generation Identification (NGI) System, 81 FR 27283 (May 5, 2016), and 82 FR 24151 (May 25, 2017);

13. STATE–05 Overseas Citizens Services Records and Other Overseas Records, 81 FR 62235 (Sept. 8, 2016);

14. STATE–26 Passport Records, 80 FR 15653 (March 24, 2015);

15. STATE–39 Visa Records, 77 FR 65245 (Oct. 25, 2012);

16. STATE–59 Refugee Case Records, 77 FR 5865 (Feb. 6, 2012);

17. ODNI/NCTC–008 National Counterterrorism Center Terrorism Analysis Records, 72 FR 73895 (Dec. 28, 2007);

18. DoD/A0025–2 Defense Biometric Services, 74 FR 48237 (Sept. 22, 2009);

19. DoD/A0025–2 PMG (DFBA) Defense Biometric Identification Records System, 80 FR 8292 (Feb. 17, 2015); and

20. DoD/A0025–2a Defense Biometric Identification Records System, 74 FR 17840 (April 17, 2009).

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

Information in this system of records contains information relating to certain persons who have pending or approved benefit requests for special protected class status and should not be disclosed pursuant to a routine use unless disclosure is otherwise permissible under the confidentiality statutes, regulations, or policies applicable to that information. For example, information relating to persons who have applied for asylum or refugee status, have pending or approved benefit requests for protection under the Violence Against Women Act, Seasonal Agricultural Worker or Legalization claims, the Temporary Protected Status of an individual, and information relating to certain nonimmigrant visas. These confidentiality provisions do not prevent DHS from disclosing information to the Department of Justice (DOJ) and Offices of the United States Attorneys as part of an ongoing criminal or civil investigation.

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the DOJ, including Offices of the U.S. Attorneys, or other federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;

2. Any employee or former employee of DHS in his/her official capacity;

3. Any employee or former employee of DHS in his/her individual capacity when DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when (1) DHS suspects or has confirmed that there has been a breach of the system of records; (2) DHS has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, DHS (including its information systems, programs, and operations), the Federal Government, or national security; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed breach or to prevent, minimize, or remedy such harm.

F. To another Federal agency or Federal entity, when DHS determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (1) responding to a suspected or confirmed breach or (2) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

G. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

H. To an appropriate Federal, state, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, when a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

I. To appropriate Federal, state, local, tribal, territorial, or foreign governments, as well as to other individuals and organizations during the course of an investigation by DHS or the processing of a matter under DHS's jurisdiction, or during a proceeding within the purview of the immigration and nationality laws, when DHS deems

that such disclosure is necessary to carry out its functions and statutory mandates.

J. To a former employee of DHS, in accordance with applicable regulations, for purposes of: Responding to an official inquiry by a Federal, state, or local government entity or professional licensing authority; or facilitating communications with a former employee that may be necessary for personnel-related or other official purposes when DHS requires information or consultation assistance from the former employee regarding a matter within that person's former area of responsibility.

K. To a coroner, in accordance with applicable law and regulations, for purposes of affirmatively identifying a deceased individual (whether or not such individual is deceased as a result of a crime).

L. To a Federal, state, or local government agency seeking to verify or ascertain the citizenship or immigration status of any individual within the jurisdiction of the agency for any purpose authorized by law

M. To an appropriate domestic government agency or other appropriate authority for the purpose of providing information about an individual who has been or is about to be released from DHS custody who, due to a condition such as mental illness, may pose a health or safety risk to himself/herself or to the community. DHS will only disclose information about the individual that is relevant to the health or safety risk they may pose and/or the means to mitigate that risk (*e.g.,* the individuals need to remain on certain medication for a serious mental health condition).

N. To foreign governments for the purpose of coordinating and conducting the removal of individuals to other nations under the INA; and to international, foreign, and intergovernmental agencies, authorities, and organizations in accordance with law and formal or informal international arrangements.

O. To DOJ FBI for the purpose of conducting name and fingerprint background checks in order to verify the identity of an individual and generate information used to grant or deny an immigration benefit request or other request.

P. To U.S. Department of State for the purpose of conducting biographic and biometric based searches for identity verification in order to process requests for benefits under the INA, and all other immigration and nationality laws including treaties and reciprocal agreements; or when DOS requires information to consider and/or provide an informed response to a request for information from a foreign, international, or intergovernmental agency, authority, or organization about an alien or an enforcement operation with transnational implications.

Q. To U.S. Department of Defense for the purpose of biometric background checks to verify the identity of an individual and generate information used to grant or deny an immigration benefit request or other request.

R. To the Office of the Director of National Intelligence National Counterterrorism Center (ODNI/NCTC) and other Federal and foreign government intelligence or counterterrorism agencies when USCIS becomes aware of an indication of a threat or potential threat to national or international security, or when such use is to assist in anti-terrorism efforts and disclosure is appropriate to the proper performance of the official duties of the person making the disclosure.

S. To an individual's prospective or current employer to the extent necessary to determine employment eligibility (for example, pursuant to the Form I–140, *Immigrant Petition for Alien Worker*).

T. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information, when disclosure is necessary to preserve confidence in the integrity of DHS, or when disclosure is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent the Chief Privacy Officer determines that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

DHS/USCIS stores records in this system electronically or on paper in secure facilities in a locked drawer behind a locked door. The records may be stored on magnetic disc, tape, and digital media.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records may be retrieved by any of the data elements listed above or a combination thereof. This may include, but is not limited to, name, date of birth, Alien Number, SSN, USCIS Online Account Number, and Receipt Number.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

USCIS retains the records 100 years from the date of birth of the individual in accordance with NARA Disposition Authority Number DAA–0563–2013–0001–0005. USCIS collects and uses the information to verify the identity of the individual and support the background check process. The 100-year retention rate comes from the length of time USCIS may interact with a customer. Further, retaining the data for this period of time will enable USCIS to fight identity fraud and misappropriation of benefits.

USCIS generates secure identification documents to communicate adjudication decisions to the mailing address on file for the benefit requestor or his or her legal representative. USCIS systems that generate cards and documents retain data 10 years from the date of record creation in accordance with NARA Disposition Authority Number DAA–0566–2016–0014. Proof of benefits sent to the benefit requestor and returned to USCIS are retained by USCIS for up to one year in accordance with NARA Disposition Authority Number DAA–0566–2014–0005.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

DHS/USCIS safeguards records in this system according to applicable rules and policies, including all applicable DHS automated systems security and access policies. USCIS has imposed strict controls to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

RECORD ACCESS PROCEDURES:

The Secretary of Homeland Security has exempted this system from the notification, access, and amendment procedures of the Privacy Act, and consequently the JRA if applicable, because it may interfere with ongoing investigations and law enforcement activities. However, DHS will consider individual requests to determine whether or not information may be released. Thus, individuals seeking access to and notification of any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the Chief Privacy Officer and Headquarters or component's FOIA Officer, whose contact information can be found at *http://www.dhs.gov/foia* under

''Contacts Information.'' If an individual believes more than one component maintains Privacy Act records concerning him or her, the individual may submit the request to the Chief Privacy Officer and Chief FOIA Officer, Department of Homeland Security, Washington, DC 20528–0655. Even if neither the Privacy Act nor the Judicial Redress Act provide a right of access, certain records about the individual may be available under the Freedom of Information Act.

When an individual is seeking records about himself or herself from this system of records or any other Departmental system of records, the individual's request must conform with the Privacy Act regulations set forth in 6 CFR part 5. The individual must first verify his or her identity, meaning that the individual must provide his or her full name, current address, and date and place of birth. The individual must sign the request, and the individual's signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, an individual may obtain forms for this purpose from the Chief Privacy Officer and Chief FOIA Officer, *http://www.dhs.gov/foia* or 1–866–431–0486. In addition, the individual should:

- Explain why the individual believe the Department would have information on him or her;
- Identify which component(s) of the Department the individual believes may have the information about him or her;
- Specify when the individual believes the records would have been created; and
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records;

If an individual's request is seeking records pertaining to another living individual, the first individual must include a statement from that individual certifying his/her agreement for the first individual to access his/her records.

Without the above information, the component(s) may not be able to conduct an effective search, and the individual's request may be denied due to lack of specificity or lack of compliance with applicable regulations.

CONTESTING RECORD PROCEDURES:

For records covered by the Privacy Act or covered JRA records, see ''Records Access Procedures'' above. Any individual, regardless of immigration status, may file a request to access his or her information under the FOIA. Throughout the benefit determination process, and prior to USCIS making a determination to deny a benefit request, USCIS provides individuals with the opportunity to address and correct the information.

NOTIFICATION PROCEDURES:

See ''Record Access Procedures.''

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

The Secretary of Homeland Security, pursuant to Secretary's delegation number 15002 to the Director of USCIS to conduct certain law enforcement activities, when necessary to protect the national security and public safety, pursuant to 5 U.S.C. 552a(j)(2), is proposing to exempt this system from the following provisions of the Privacy Act: 5 U.S.C. 552a(c)(3), (c)(4); (d); (e)(1), (e)(2), (e)(3), (e)(4)(G), (e)(4)(H), (e)(4)(I), (e)(5), (e)(8); (f); and (g). Additionally, the Secretary of Homeland Security, pursuant to 5 U.S.C. 552a(k)(2), has exempted this system from the following provisions of the Privacy Act: 5 U.S.C. 552a(c)(3), (d), (e)(1), (e)(4)(G), (e)(4)(H), (e)(4)(I), and (f). When a record received from another system has been exempted in that source system under 5 U.S.C. 552a(j)(2), DHS will claim the same exemptions for those records that are claimed for the original primary systems of records from which they originated and claims any additional exemptions set forth here.

HISTORY:

DHS/USCIS–002 Background Check Service, 72 FR 31082 (June 5, 2007); DHS/USCIS–003 Biometric Storage System, 72 FR 17172 (April 6, 2007).

Philip S. Kaplan,

Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6083–N–02]

Notice of a Federal Advisory Committee Meeting: Manufactured Housing Consensus Committee

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Notice of a Federal Advisory Committee Meeting: Manufactured Housing Consensus Committee (MHCC).

SUMMARY: This notice sets forth the schedule and proposed agenda for a meeting of the MHCC. The meeting is open to the public and the site is accessible to individuals with disabilities. The agenda provides an opportunity for citizens to comment on the business before the MHCC.

DATES: The meeting will be held on September 11 through September 13, 2018, 9:00 a.m. to 5:00 p.m. Eastern Standard Time (EST) daily.

ADDRESSES: The meeting will be held at the Holiday Inn Washington—Capitol, 550 C Street SW, Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Teresa B. Payne, Acting Administrator, Office of Manufactured Housing Programs, Department of Housing and Urban Development, 451 7th Street SW, Room 9166, Washington, DC 20410, telephone (202) 708–6423 (this is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Information Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Background

Notice of this meeting is provided in accordance with the Federal Advisory Committee Act, 5. U.S.C. App. 10(a)(2) through implementing regulations at 41 CFR 102–3.150. The MHCC was established by the National Manufactured Housing Construction and Safety Standards Act of 1974, 42 U.S.C. 5403(a)(3), as amended by the Manufactured Housing Improvement Act of 2000, (Pub. L. 106–569). According to 42 U.S.C. 5403, as amended, the purposes of the MHCC are to:

- Provide periodic recommendations to the Secretary to adopt, revise, and interpret the Federal manufactured housing construction and safety standards in accordance with this subsection;
- Provide periodic recommendations to the Secretary to adopt, revise, and interpret the procedural and enforcement regulations, including regulations specifying the permissible scope and conduct of monitoring in accordance with subsection (b);
- Be organized and carry out its business in a manner that guarantees a fair opportunity for the expression and consideration of various positions and for public participation.

The MHCC is deemed an advisory committee not composed of Federal employees.

Public Comment

Citizens wishing to make comments on the business of the MHCC are

encouraged to register by or before Tuesday, August 28, 2018, by contacting Home Innovation Research Labs; *Attention:* Kevin Kauffman, 400 Prince Georges Blvd., Upper Marlboro, MD 20774, or email to *mhcc@homeinnovation.com* or call 1–888–602–4663. Written comments are encouraged. The MHCC strives to accommodate citizen comments to the extent possible within the time constraints of the meeting agenda. Advance registration is strongly encouraged. The MHCC will also provide an opportunity for public comment on specific matters before the MHCC.

Tentative Agenda

Tuesday, September 11, 2018

I. Call to Order—Chair & Designated Federal Officer (DFO)
II. Opening Remarks—Chair & HUD
A. Roll Call—Administering Organization (AO)
B. Introductions
i. HUD Staff
ii. Guests
C. Administrative Announcements—DFO & AO
III. Approve draft minutes from December 12, 2016, MHCC meeting
IV. Update on the Regulatory Process
V. Update on Approved Proposals—HUD OGC
VI. Review of Current Log & Action Items
VII. Break
VIII. Continue Review of Current Log & Action Items
IX. Public Comment Period
X. Lunch
XI. Continue Review of Current Log & Action Items
XII. Break
XIII. Continue Review of Current Log & Action Items
XIV. Daily Wrap Up—DFO & AO
XV. Adjourn

Wednesday, September 12, 2018

I. Reconvene Meeting—Chair & Designated Federal Officer (DFO)
II. Opening Remarks—Chair
A. Roll Call—Administering Organization (AO)
III. Continue Review of Current Log & Action Items
IV. Break
V. Continue Review of Current Log & Action Items
VI. Public Comment
VII. Lunch
VIII. Continue Review of Current Log & Action Items or Subcommittee/Task Group Meetings
IX. Break
X. Continue Review of Current Log & Action Items or Subcommittee/Task Group Meetings
XI. Daily Wrap Up—DFO
XII. Adjourn

Thursday, September 13, 2018

I. Reconvene Meeting—Chair & Designated Federal Officer (DFO)
II. Opening Remarks—Chair & FHA Commissioner
A. Roll Call—Administering Organization (AO)
III. Continue Review of Current Log & Action Items or Subcommittee/Task Group Meetings

BILLING CODE P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R3–ES–2018–N085; FXES11130300000–189–FF03E00000]

Endangered and Threatened Species; Receipt of Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received applications for permits to conduct activities intended to enhance the propagation or survival of endangered or threatened species under the Endangered Species Act of 1973, as amended. We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

DATES: We must receive your written comments on or before August 30, 2018.

ADDRESSES: *Document availability and comment submission:* You may, within 30 days of the date of publication of this notice (see **DATES**) submit requests for copies of the applications and related documents, and submit any comments by one of the following methods. All requests and comments should specify the applicant name(s) and application number(s) (*e.g.,* TEXXXXXX):

- *Email: permitsR3ES@fws.gov.* Please refer to the respective permit number (*e.g.,* Application No. TE*XXXXXX*) in the subject line of your email message.
- *U.S. Mail:* Regional Director, Attn: Carlita Payne, U.S. Fish and Wildlife Service, Ecological Services, 5600 American Blvd. West, Suite 990, Bloomington, MN 55437–1458.

FOR FURTHER INFORMATION CONTACT: Carlita Payne, 612–713–5343; *permitsR3ES@fws.gov.* Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite the public to comment on applications for permits under section 10(a)(1)(A) of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The requested permits would allow the applicants to conduct activities intended to promote recovery of species that are listed as endangered or threatened under the ESA.

Background

With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA's definition of ''take'' includes such activities as pursuing, harassing, trapping, capturing, or collecting in addition to hunting, shooting, harming, wounding, or killing.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found in the Code of Federal Regulations at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or

arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

Application No.	Applicant	Species	Location	Activity	Type of take	Permit action
TE81001C	Katharine Zlonis, Cass Lake, MN.	Rusty patched bumble bee (*Bombus affinis*)	MN	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	New.
TE81122C	Three Rivers Park District, Plymouth, MN.	Rusty patched bumble bee (*Bombus affinis*)	MN	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	New.
TE86137B	The Nature Conservancy, Minneapolis, MN.	Dakota skipper (*Hesperia dacotae*)	MN, ND, SD	Monitoring, habitat management.	Add new activities— propagate and reintroduce—to existing authorized activities: prescribed burns.	Amend.
TE81137C	Luther College, Decorah, IA.	Rusty patched bumble bee (*Bombus affinis*)	IA	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	New.
TE84882C	U.S. Forest Service, Deer River, MN.	Rusty patched bumble bee (*Bombus affinis*)	MN	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	New.
TE85294C	Amy Wolf, Green Bay, WI.	Rusty patched bumble bee (*Bombus affinis*)	WI	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	New.
TE86600C	National Park Service Ashland, WI, and Bad River Band of Lake Superior Tribe of Chippewa, Odanah, WI.	Piping plover (*Charadrius melodus*)	WI	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, mist-net, band, collect feather and blood samples propagate, temporary hold, release.	New.
TE98032A	James Gardner, Jefferson City, MO.	Indiana bat (*Myotis sodalis*), gray bat (*M. grisescens*), northern long-eared bat (*M. septentrionalis*), Ozark big-eared bat (*Corynorhinus townsendii ingens*).	Add new location—WV—to existing authorized locations: AR, IL, IN, IA, KS, KY, MO, OK, TN.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, mist-net, radio-tag, release.	Amend.
TE64073B	Ecological and GIS Services, Indianola, IA.	Dakota skipper (*Hesperia dacotae*), Poweshiek skipperling (*Oarisma poweshiek*).	IA, MN, ND, SD	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	Renew.

Application No.	Applicant	Species	Location	Activity	Type of take	Permit action
TE90420C	Jennifer Bonta, Melrose, MA.	Indiana bat (*Myotis sodalis*), northern long-eared bat (*M. septentrionalis*).	AL, AR, CT, DE, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, VT, VA, WV, WI, WY.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, mist-net, harp trap, release.	New.
TE64077B	Scott Krych, Minneapolis, MN.	Dakota skipper (*Hesperia dacotae*), Poweshiek skipperling (*Oarisma poweshiek*).	MN, MT, ND, SD	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	Renew.
TE90423C	Shaughn Barnett, Austin, TX.	Clubshell (*Pleurobema clava*), fanshell (*Cyprogenia stegaria*), fat pocketbook (*Potamilus capax*), Higgins eye (pearlymussel) (*Lampsilis higginsii*), pink mucket (pearlymussel) (*L. abrupta*), northern riffleshell (*Epioblasma torulosa rangiana*), purple cat's paw pearlymussel (*E. obliquata obliquata*), white catspaw (pearlymussel) (*E. o. perobliqua*), snuffbox mussel (*E. triquetra*), orangefoot pimpleback (pearlymussel) (*Plethobasus cooperianus*), sheepnose mussel (*P. cyphyus*), rayed bean (*Villosa fabalis*), scaleshell mussel (*Leptodea leptodon*), spectaclecase (mussel) (*Cumberlandia monodonta*).	IL, IN, OH	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, release.	New.
TE64239B	Nathanael Light, Ozark, MO.	Add Ozark big-eared bat (*Corynorhinus towsendii ingens*) to existing permitted species: Indiana bat (*Myotis sodalis*), gray bat (*M. grisescens*), northern long-eared bat (*M. septentrionalis*).	AL, AR, CT, DE, D.C., FL, GA, IL, IN, IA, KS, KY, LA, ME, MD, MA, MI, MN, MS, MO, MT, NE, NH, NJ, NY, NC, ND, OH, OK, PA, RI, SC, SD, TN, VT, VA, WV, WI, WY.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, mist-net, harp trap, band, radio-tag, release.	Amend.
TE90426C	Natalie Dingledine, Haslett, MI.	Hungerford's crawling water beetle (*Brychius hungerfordi*).	MI	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, hold, relocate, release.	New.
TE130900	EnviroScience, Inc., Stow, OH.	Add Texas hornshell (*Popenaias popeii*) and Yellow lance (*Elliptio lanceolata*) to existing permitted species: 70 freshwater mussel species, shortnose sturgeon (*Acipenser brevirostrum*), blue shiner (*Cyprinella caerulea*), Cherokee darter (*Etheostoma scotti*), Etowah darter (*E. etowahae*), amber darter (*Percina antesella*), goldline darter (*P. aurolineata*), Conasauga logperch (*P. jenkinsi*), snail darter (*P. tanasi*).	Add new locations—NC, TX, VA—to existing authorized locations: AR, FL, GA, IL, IN, IA, KY, MI, MN, MO, OH, TN, WI.	Conduct presence/absence surveys, document habitat use, conduct population monitoring, evaluate impacts.	Capture, handle, temporary hold, release, relocate.	Amend.

Public Availability of Comments

Written comments we receive become part of the administrative record associated with this action. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue permits to any of the applicants listed in this notice, we will publish a notice in the **Federal Register**.

Authority

Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Dated: June 15, 2018.

Lori H. Nordstrom,

Assistant Regional Director, Ecological Services, Midwest Region.

U.S. Endangered Species; Recovery Permit Applications

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit applications; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications for a permit to conduct activities intended to recover and enhance endangered species survival. With some exceptions, the Endangered Species Act of 1973, as amended (ESA), prohibits certain activities that may impact endangered species unless a Federal permit allows such activity. The ESA also requires that we invite public comment before issuing these permits.

DATES: To ensure consideration, please send your written comments by August 30, 2018.

ADDRESSES: *Document availability:* Request documents by phone or email: Susan Jacobsen, 505–248–6641, *susan_jacobsen@fws.gov.*

Comment submission: Submit comments by U.S. mail to Susan Jacobsen, Classification and Recovery Division, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, NM 87103. Please specify the permit you are interested in by number (*e.g.,* Permit No. TE–123456).

FOR FURTHER INFORMATION CONTACT: Susan Jacobsen, Chief, Classification and Restoration Division, 505–248–6641.

Background

With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA's definition of ''take'' includes hunting, shooting, harming, wounding, or killing but also such activities as pursuing, harassing, trapping, capturing, or collecting.

The ESA and our implementing regulations in the Code of Federal Regulations (CFR) title 50, part 17, provide for issuing such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A recovery permit we issue under the ESA, section 10(a)(1)(A), authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or enhance the species' propagation or survival. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

Documents and other information submitted with these applications are available for review by any party who submits a request as specified in **ADDRESSES**. Releasing documents is subject to the Privacy Act (5 U.S.C. 552a) and Freedom of Information Act (5 U.S.C. 552) requirements.

Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild. We invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies. Please refer to the application number when submitting comments.

DATES: Interested persons are invited to submit comments on or before August 30, 2018.

ADDRESSES: Send written comments on this information collection request (ICR) to the Office of Management and Budget's Desk Officer for the Department of the Interior by email at *OIRA_Submission@omb.eop.gov*; or via facsimile to (202) 395–5806. Please provide a copy of your comments to R. Lee Fleming, Director, Office of Federal Acknowledgment, Assistant Secretary—Indian Affairs, 1849 C Street NW, MS–4071 MIB, Washington, DC 20240; facsimile: (202) 219–3008; email: *Lee.Fleming@bia.gov.* Please reference OMB Control Number 1076–0104 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact R. Lee Fleming, (202) 513–7650. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the

impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provides the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on April 9, 2018 (83 FR 15171). No comments were received.

We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the AS–IA; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the AS–IA enhance the quality, utility, and clarity of the information to be collected; and (5) how might the AS–IA minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Submission of this information allows the Office of Federal Acknowledgment (OFA), within the Office of the Assistant Secretary-Indian Affairs, to review groups' documented petitions for the Federal acknowledgment as an Indian tribe. The acknowledgment regulations at 25 CFR 83 contain seven criteria that unrecognized groups seeking Federal acknowledgment as Indian tribes must demonstrate that they meet. Information collected from petitioning groups under these regulations provide anthropological, genealogical and historical data used by the AS–IA to establish whether a petitioning group has the characteristics necessary to be acknowledged as a continuously existing Indian tribe. Federal acknowledgment establishes a government-to-government relationship with the United States. Respondents are not required to retain copies of the information submitted to OFA but will probably maintain copies for their own use; therefore, there is no recordkeeping requirement included in this information collection.

Title of Collection: Documented Petitions for Federal Acknowledgment as an Indian Tribe.

OMB Control Number: 1076–0104.

Form Number: BIA–8304, BIA–8305, and BIA–8306.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Groups petitioning for Federal acknowledgment as Indian Tribes.

Total Estimated Number of Annual Respondents: 10.

Total Estimated Number of Annual Responses: 10.

Estimated Completion Time per Response: 1,436 hours, on average.

Total Estimated Number of Annual Burden Hours: 14,360, on average.

Respondent's Obligation: Required to Obtain or Retain a Benefit.

Frequency of Collection: Once.

Total Estimated Annual Nonhour Burden Cost: $21,000,000.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq*).

Elizabeth K. Appel,

Director, Office of Regulatory Affairs and Collaborative Action—Indian Affairs.

While you can ask us in your comment to

withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: Congress passed legislation specifically addressing oil and gas leasing on Osage lands and requiring Secretarial approval of leases. *See* 34 Stat. 543, section 3, as amended. The regulations art 25 CFR 226 implement that statute by specifying what information a lessee must provide related to drilling, development, and production of oil and gas on Osage reservation land. The oil, gas, and land are assets that the United States holds in trust or restricted status for Indian beneficiaries. The information collections in 25 CFR 226 are necessary to ensure that the beneficial owners of the mineral rights are provided the royalties due them, ensure that the oil and gas trust assets are protected, and to ensure that the surface estate assets are protected.

Title of Collection: Leasing of Osage Reservation lands for Oil and Gas Mining.

OMB Control Number: 1076–0180.

Form Number:

- Form A—Mining Lease
- Form B—Oil Lease
- Form C—Oil & Gas Lease
- Form D—Mining Lease Bond
- Form F—Assignment of Lease
- Form G—Collective Bond
- Form H—Assignment Bond Form
- Monthly Accounting Forms (Forms 101, 101A, 133, 157,and 300)
- Form 139—Permit to Drill or Reenter
- Easement Form
- Modification of Oil/Gas Mining Lease
- List of Corporate Officers Form
- Tank Bottom Oil Report Form
- Assignment of Liability Form
- Waterflood Operating Report Form 229
- Lease Status Report Form
- Spill Reporting and Remediation Form
- Environmental Assessment Questionnaire
- Osage Mineral Reserve Trucking Permit

Type of Review: Revision of a currently approved collection.

Respondents/Affected Public: Individual Indians, businesses, and Tribal authorities.

Total Estimated Number of Annual Respondents: 1,397.

Total Estimated Number of Annual Responses: 48,113.

Estimated Completion Time per Response: Five minutes to 28 hours.

Total Estimated Number of Annual Burden Hours: 22,776.

Respondent's Obligation: Required to Obtain or Retain a Benefit.

Frequency of Collection: As needed.

Total Estimated Annual Nonhour Burden Cost: $4,535.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq*).

DEPARTMENT OF THE INTERIOR

National Park Service

[NPS–NERO–GATE–25583; PPNEGATEB0, PPMVSCS1Z.Y00000]

Request for Nominations for the Gateway National Recreation Area Fort Hancock 21st Century Advisory Committee

AGENCY: National Park Service, Interior.

ACTION: Request for nominations.

SUMMARY: The National Park Service (NPS), U.S. Department of the Interior is requesting nominations for qualified persons to serve as members of the Committee.

DATES: Written nominations must be received by August 30, 2018.

ADDRESSES: Nominations should be sent to Daphne Yun, U.S. Department of the Interior, National Park Service, Gateway National Recreation Area, Office of the Superintendent, 210 New York Avenue, Staten Island, New York 10305, or email *daphne_yun@nps.gov.*

FOR FURTHER INFORMATION CONTACT: Daphne Yun, U.S. Department of the Interior, National Park Service, Gateway National Recreation Area, Sandy Hook Unit, 26 Hudson Road, Highlands, New Jersey 07732, or email at *daphne_yun@nps.gov,* or via telephone at (732) 872–5908.

SUPPLEMENTARY INFORMATION: The Gateway National Recreation Area Fort Hancock 21st Century Advisory Committee was established by authority of the Secretary of the Interior under 54 U.S.C. 100906, and in accordance with the Federal Advisory Committee Act (5 U.S.C. Appendix 1–16). The purpose of the Committee is to advise the Secretary of the Interior, through the Director of the National Park Service, on the development of a reuse plan and on matters relating to future uses of certain buildings at the Fort Hancock Historic District, located within the Sandy Hook Unit of Gateway National Recreation Area in New Jersey.

The Committee consists of representatives from among, but not limited to, the following interest groups to represent a range of interests concerned with the management of Fort Hancock within the park and its impact on the local area: The natural resource community, the business community, the cultural resource community, the real estate community, the recreation community, the education community, the scientific community, and hospitality organizations. The Committee will also include representatives from the following municipalities: Borough of Highlands, Borough of Sea Bright, Borough of Rumson, Middletown Township, Monmouth County Freeholders, and Borough of Monmouth Beach.

We are currently seeking members to represent all categories.

Nominations should be typed and should include a resume providing an adequate description of the nominee's qualifications, including information that would enable the Department of the Interior to make an informed decision regarding meeting the membership requirements of the Committee and permit the Department to contact a potential member. All documentation, including letters of recommendation, must be compiled and submitted in one complete package. All those interested in membership, including current members whose terms are expiring, must follow the same nomination process. Members may not appoint deputies or alternates.

Members of the Committee serve without compensation. However, while away from their homes or regular places of business in the performance of services for the Committee as approved by the NPS, members may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in Government service are allowed such expenses under section 5703 of title 5 of the United States Code.

Public Disclosure of Information: Before including your address, phone number, email address, or other personal identifying information with your nomination, you should be aware that your entire nomination—including your personal identifying information—may be made publicly available at any time. While you can ask us in your nomination to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: 54 U.S.C. 100906.

Shirley Sears,

Acting Chief, Office of Policy.

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before July 14, 2018, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by August 15, 2018.

ADDRESSES: Comments may be sent via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C St. NW, MS 7228, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before July 14, 2018. Pursuant to Section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Bureau of Safety and Environmental Enforcement

[Docket ID BSEE–2017–0006; 189E1700D2 ET1SF0000.PSB000.EEEE500000; OMB Control Number 1014–0021]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Operations in the Outer Continental Shelf for Minerals Other Than Oil, Gas, and Sulphur

AGENCY: Bureau of Safety and Environmental Enforcement, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Safety and Environmental Enforcement (BSEE) proposes to renew an information collection.

DATES: Interested persons are invited to submit comments on or before August 30, 2018.

ADDRESSES: Send written comments on this information collection request (ICR) to the Office of Management and Budget's Desk Officer for the Department of the Interior by email at *OIRA_Submission@omb.eop.gov;* or via facsimile to (202) 395–5806. Please provide a copy of your comments to the Bureau of Safety and Environmental Enforcement; Regulations and Standards Branch; ATTN: Nicole Mason; 45600 Woodland Road, Sterling, VA 20166; or by email to *kye.mason@bsee.gov.* Please reference OMB Control Number 1014–0021 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Nicole Mason by email at *kye.mason@bsee.gov,* or by telephone at (703) 787–1607. You may also view the ICR at *http://www.reginfo.gov/public/do/PRAMain.*

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, we provide the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

A **Federal Register** notice with a 60-day public comment period soliciting comments on this collection of information was published on November 16, 2017 (82 FR 53519). The BSEE received two comments pertaining to this **Federal Register** notice, but neither were germane to the collection of information.

We are again soliciting comments on the proposed ICR that is described below. We are especially interested in public comments addressing the following issues: (1) Is the collection necessary to the proper functions of BSEE; (2) Will this information be processed and used in a timely manner; (3) Is the estimate of burden accurate; (4) How might BSEE enhance the quality, utility, and clarity of the information to be collected; and (5) How might BSEE minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Abstract: BSEE will use the information required by 30 CFR part 282 to determine if lessees are complying with the regulations that implement the mining operations program for minerals other than oil, gas, and sulphur. Specifically, BSEE will use the information:

- To ensure that operations for the production of minerals other than oil, gas, and sulphur in the outer continental shelf (OCS) are conducted in a manner that will result in orderly resource recovery, development, and the protection of the human, marine, and coastal environments.
- To ensure that adequate measures will be taken during operations to prevent waste, conserve the natural resources of the OCS, and to protect the environment, human life, and correlative rights.
- To determine if suspensions of activities are in the national interest, to facilitate proper development of a lease including reasonable time to develop a mine and construct its supporting facilities, and to allow for the construction or negotiation for use of transportation facilities.
- To identify and evaluate the cause(s) of a hazard(s) generating a suspension, the potential damage from a hazard(s) and the measures available to mitigate the potential for damage.
- For technical evaluations that provide a basis for BSEE to make informed decisions to approve, disapprove, or require modification of the proposed activities.

Title of Collection: 30 CFR part 282, *Operations in the Outer Continental Shelf for Minerals Other than Oil, Gas, and Sulphur.*

OMB Control Number: 1014–0021.

Form Number: None.

Type of Review: Extension of a currently approved collection.

Respondents/Affected Public: Potential respondents comprise Federal OCS oil, gas, and sulphur lessees/operators and holders of pipeline rights-of-way.

Total Estimated Number of Annual Respondents: As there are no active respondents; we estimated the potential annual number of respondents to be one.

Total Estimated Number of Annual Responses: 16.

Estimated Completion Time per Response: Varies from 1 hour to 20 hours, depending on activity.

Total Estimated Number of Annual Burden Hours: 56.

Respondent's Obligation: Most responses are mandatory, while others are required to obtain or retain benefits, or are voluntary.

Frequency of Collection: On occasion and varies by section.

Total Estimated Annual Nonhour Burden Cost: We have identified one non-hour cost burden. Pursuant to § 282.13(e)(1), a site-specific study to determine and evaluate hazards that results in a suspension of operation would have a non-hour cost burden. Since this has not been done to date, we estimated that the cost of such a study for industry would be approximately $100,000 to comply with the requirement. We have not identified any other non-hour cost burdens associated with this collection of information.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq*).

Dated: July 11, 2018.

Doug Morris,

Chief, Office of Offshore Regulatory Programs.

BILLING CODE 4310–VH–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–582 and 731–TA–1377 (Final)]

Ripe Olives From Spain; Determinations

On the basis of the record [1] developed in the subject investigations, the United States International Trade Commission (''Commission'') determines, pursuant to the Tariff Act of 1930 (''the Act''), that an industry in the United States is materially injured by reason of imports of ripe olives from Spain, provided for in subheadings 2005.70.02, 2005.70.04, 2005.70.50, 2005.70.60, 2005.70.70, and 2005.70.75 of the Harmonized Tariff Schedule of the United States, that have been found by the U.S. Department of Commerce (''Commerce'') to be sold in the United States at less than fair value (''LTFV'') and to be subsidized by the government of Spain.[2]

Background

The Commission, pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)), instituted these investigations effective June 22, 2017, following receipt of a petition filed with the Commission and Commerce by the Coalition of Fair Trade in Ripe Olives, consisting of Bell-Carter Foods, Walnut Creek, CA, and Musco Family Olive Company, Tracy, CA. The final phase of the investigations was scheduled by the Commission following notification of preliminary determinations by Commerce that imports of ripe olives from Spain were subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)) and sold at LTFV within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)). Notice of the scheduling of the final phase of the Commission's investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on February 22, 2018 (83 FR 7774). The hearing was held in Washington, DC, on May 24, 2018, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 705(b) and 735(b) of the Act (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on July 25, 2018. The views of the Commission are contained in USITC Publication 4805 (July 2018), entitled *Ripe Olives from Spain: Investigation Nos. 701–TA–582 and 731–TA–1377 (Final).*

By order of the Commission.

Issued: July 25, 2018.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

[1] The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

[2] Commissioner Meredith M. Broadbent dissenting. Commissioner Jason E. Kearns did not participate in these investigations.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Craig S. Morris, DDS; Dismissal of Proceeding

On November 13, 2017, the Acting Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Craig S. Morris, DDS (Respondent), of Texas. The Show Cause Order proposed the revocation of Respondent's Certificates of Registration FM5300582 and FM5293294 on the ground that he ''materially falsified [his] applications for [his] DEA Certificates of Registration.'' Order to Show Cause, Government Exhibit (GX) A–8 to Request for Final Agency Action (RFAA), at 1 (citing 21 U.S.C. 824(a)(1)).

With respect to the Agency's jurisdiction, the Show Cause Order alleged that Respondent was registered at that time in schedules II through V, pursuant to DEA Certificates of Registration Nos. FM5300582 and FM5293294 at the addresses of 19121 West Lake Houston Parkway, Humble, TX, and 25130 Grogans Park Drive, The Woodlands, TX, respectively.[1] *Id.* at 1–2. The Order also alleged that these registrations would each expire on January 31, 2018. *Id.*

As substantive grounds for the proceeding, the Show Cause Order alleged that on February 9, 2015, Respondent ''submitted applications to the DEA for the above-referenced Certificates of Registration'' but materially falsified the application when he ''provided a 'no' response to Liability Question 3, which asked, '[h]as the applicant *ever* surrendered (for cause) or had a state professional license or controlled substances registration revoked, *suspended,* denied, restricted or *placed on probation,* or is any such action pending?' '' *Id.* at 2. The Order further alleged that, when he ''submitted his applications to the DEA and provided a 'no' answer to Liability Question 3, [his] Nevada license to practice dentistry had been placed on probation and was currently suspended.'' *Id.* Based on Respondent's alleged ''material falsification of [his] applications to the DEA,'' the Order asserted that ''DEA must revoke'' his registrations. *Id.* at 3.

The Show Cause Order notified Respondent of his right to request a hearing on the allegations or to submit a written statement in lieu of a hearing, the procedure for electing either option, and the consequence of failing to elect either option. *Id.* (citing 21 CFR 1301.43). The Show Cause Order also notified Respondent of his right to submit a corrective action plan. *Id.* at 3–4 (citing 21 U.S.C. 824(c)(2)(C)).

The Government represents that on November 20, 2017, a DEA Diversion Investigator (DI) served a copy of the Show Cause Order on Respondent by electronic mail to an email address that the DI had previously used to correspond with Respondent in April 2017 and that Respondent had provided to DEA as a ''contact email'' in connection with his DEA Certificates of Registration. RFAA, at 3–4 (citing Declaration of DI, attached as GX A to RFAA, at 3). There is no dispute that timely service occurred because the Government states that DEA's Diversion Control Division received Respondent's written submissions in connection with the Show Cause Order on December 19, 2017. RFAA, at 4 (citing the Diversion Control Division's Acting Assistant Administrator's December 20, 2017 letter to Respondent, attached as GX C to RFAA, at 1).

Although Respondent's submissions included a letter (dated December 12, 2017) entitled ''*Corrective Action Plan,*'' the letter stated that it was ''being submitted in response to the Order to Show Cause levied against me by your office'' and attached an affidavit in support signed by Respondent and notarized on December 15, 2017. Respondent's Written Submissions (hereinafter ''Respondent's Statement'' or ''Resp. Stat.''), attached as GX B to RFAA, at 1. Respondent did not, however, request a hearing. *See generally id.* Based on Respondent's submission, I find that he waived his right to a hearing on the allegations. 21 CFR 1301.43(c). However, pursuant to 21 CFR 1301.43(c), I deem Respondent's submission to be his ''written statement

[1] The record establishes that Respondent was registered as a ''practitioner'' with respect to each of the above DEA registrations. Certifications of Registration History for FM5300582 and FM5293294, GXs A–1 at 1, 3; A–2, at 1, 3.

[of] position on the matters of fact and law involved'' in the proceeding. *See Arthur H. Bell, D.O.,* 80 FR 50035, 50036 (2015) (deeming Respondent's letter to be a written statement pursuant to 21 CFR 1301.43(c) because the letter ''responded to each of the Government's allegations'' without requesting a hearing).[2] On March 16, 2018, the Government forwarded its Request for Final Agency Action and the evidentiary record to my Office.

Having reviewed the record, I find that this proceeding is now moot. The evidence in the record establishes that each of Respondent's registrations at issue were due to expire on January 31, 2018, and according to the Agency's registration record for Respondent, of which I take official notice,[3] Respondent has not submitted an application to renew his registrations. DEA has long held that '' 'if a registrant has not submitted a timely renewal application prior to the expiration date, then the registration expires and there is nothing to revoke.' '' *Donald Brooks Reece II, M.D.,* 77 FR 35054, 35055 (2012) (quoting *Ronald J. Riegel,* 63 FR 67312, 67133 (1998)). ''Moreover, in the absence of an application (whether timely filed or not), there is nothing to act upon.'' *Id.* at 35055.

Although the Government acknowledges that Respondent's DEA registrations expired on January 31, 2018 and prior to its March 16, 2018 Request for Final Agency Action, RFAA, at 1, the Government nonetheless argues that the ''matter is not moot.'' *Id.* at 5. Specifically, the Government claims that, prior to the issuance of the Show Cause Order, Respondent requested ''to modify his DEA Certificates of Registration and change his registered address to an address in California, where [he] holds an active dental license. That request for modification is pending.'' *Id.* at 5–6. The Government's argument that the case is not moot based on this purported modification request is unavailing for at least two reasons.

First, as a threshold matter, the record does not establish by a preponderance of the evidence that Respondent does, in fact, have a pending request to modify the address of his DEA registrations to an address in California. In its Request, the Government relies exclusively on the DI's statement in her Declaration that, ''[o]n February 17, 2017, Dr. Morris submitted a request for modification of his DEA Certificates of Registration [FM5300582 and FM5293294], seeking to change his address to 19121 Allingham Avenue, Cerritos, California.'' GX A, at 3. The DI does not cite in her Declaration to any evidence in support of this statement. *See id.* Furthermore, the Government submitted a Certification of Registration History for each of these registrations (both dated March 12, 2018), and neither certification references this modification request. GX A–1; GX A–2. In addition, the Agency's registration record for Respondent reflects no reference to these specific modification requests.[4] Indeed, not even the Show Cause Order references the modification request. *See* GX A–8. Thus, because the Government's argument against mootness relies entirely on a pending modification request not established in the record, I reject the Government's argument on this basis alone. *See* RFAA, at 3.

Second, even if the purported modification requests were made, my finding that this case is moot would not change. The Government argues that the Show Cause Order to revoke Respondent's registrations is not moot when a request to modify such registrations remains pending (even after the expiration of the very registration that Respondent seeks to modify) because DEA regulations state that ''a request for modification shall be handled in the same manner as an application for registration.'' *Id.* at 5–6 (citing 21 CFR 1301.51(c)). I disagree.

The fact that DEA handles a modification request ''in the same manner as an application for registration'' pursuant to 21 CFR 1301.51(c) does not mean that a modification request is the same as an application for a new registration in every respect. For example, although a registrant must pay a fee when he or she applies for a new registration, *see* 21 CFR 1301.14(a), ''[n]o fee shall be required for modification.'' *Id.* 1301.51(c). Most importantly, even if a modification request is approved and a new certificate of registration is issued, DEA regulations state that the new (as modified) registration expires when the original registration certificate expires. *Id.* (''If the modification of registration is approved, the Administrator shall issue a new certificate of registration . . . to the registrant, who shall maintain it with the old certificate of registration *until expiration*.'') (emphasis added). Thus, unlike a timely renewal application, a request to modify the registration address of an existing registration (whether pending or granted) does not remain pending after that registration expires, nor does it operate to extend when that registration expires. *See* 21 CFR 1301.51(c).[5]

Accordingly, because Respondent has allowed his registrations to expire and did not file an application to renew his registrations, this case is now moot and will be dismissed.

Order

Pursuant to the authority vested in me by 21 U.S.C. 824(a), as well as 28 CFR 0.100(b), I order that the Order to Show Cause issued to Craig S. Morris, DDS, be, and it hereby is, dismissed. This Order is effective immediately.

Dated: July 18, 2018.

Uttam Dhillon,

Acting Administrator.

[FR Doc. 2018–16313 Filed 7–30–18; 8:45 am]

BILLING CODE 4410–09–P

[2] In its Request for Final Agency Action, the Government properly treated Respondent's written submissions as a ''written statement'' pursuant to 21 CFR 1301.43. RFAA, at 6–8. However, because I am dismissing the Government's Show Cause Order as moot, I decline to reach the question of whether Respondent's submissions could also be deemed to have included a Corrective Action Plan pursuant to 21 U.S.C. 824(c)(2)(C).

[3] Under the Administrative Procedure Act (APA), an agency ''may take official notice of facts at any stage in a proceeding—even in the final decision.'' U.S. Dept. of Justice, *Attorney General's Manual on the Administrative Procedure Act* 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). In accordance with the APA and DEA's regulations, Respondent is ''entitled on timely request to an opportunity to show to the contrary.'' 5 U.S.C. 556(e); *see also* 21 CFR 1316.59(e). To allow Respondent the opportunity to refute the facts of which I take official notice, Respondent may file a motion for reconsideration within 15 calendar days of service of this order which shall commence on the date this order is mailed.

[4] I take official notice of this fact pursuant to the authority set forth *supra* in footnote 3.

[5] Neither of the cases that the Government relies upon supports its position. RFAA, at 5–6 (citing *Michael G. Dolin, M.D.,* 65 FR 5661, 5661 (2000); *Daniel Koller, D.V.M.,* 71 FR 66975 (2006)). *Michael G. Dolin* focused on whether Respondent lacked state authorization to handle controlled substances and does not address the issue of mootness. 65 FR at 5661. The Government's other case, *Daniel Koller,* actually cuts against its position. In that case, the registrant had separately submitted an application for a new DEA registration at a new location—in addition to prior submissions for modifications of the existing registration for the new location. 71 FR at 66979–81. Ultimately, the Agency found that ''Respondent's Registration . . . [had] expired . . . , and that Respondent did not file a renewal application, let alone a timely one, for this registration.'' *Id.* at 66981. As a result, the Agency did not revoke the expired registration nor consider the pending requests to modify that registration, as the Government requests in this case. *See id.* Instead, the Agency held, as I do here, that ''the revocation portion of this proceeding is moot.'' *Id.* The Agency properly concluded in *Koller* that only the application for a new registration ''remain[ed] a live controversy.'' *Id.*

DEPARTMENT OF JUSTICE

Foreign Claims Settlement Commission

[F.C.S.C. Meeting and Hearing Notice No. 7–18]

Sunshine Act Meeting

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR 503.25) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings as follows:

Thursday, August 9, 2018: 10:00 a.m.—Issuance of Proposed Decisions in claims against Iraq.

11:00 a.m.—Issuance of Proposed Decisions under the Guam World War II Loyalty Recognition Act, Title XVII, Public Law 114–328.

Status: Open.

All meetings are held at the Foreign Claims Settlement Commission, 601 D Street NW, Suite 10300, Washington, DC. Requests for information, or advance notices of intention to observe an open meeting, may be directed to: Patricia M. Hall, Foreign Claims Settlement Commission, 601 D Street NW, Suite 10300, Washington, DC 20579. Telephone: (202) 616–6975.

Brian M. Simkin,

Chief Counsel.

BILLING CODE 4410–BA–P

DEPARTMENT OF JUSTICE

[OMB Number 1121–0292]

Agency Information Collection Activities; Proposed Collection Comments Requested; Reinstatement with Change of an Expired Collection: 2017–19 Survey of Sexual Victimization

AGENCY: Bureau of Justice Statistics, Department of Justice.

ACTION: 30-day Notice.

SUMMARY: The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the **Federal Register** Volume 83, Number 38, page 8300, on February 26, 2018, allowing a 60-day comment period. Following publication of the 60-day notice, the Bureau of Justice Statistics received one request for survey instruments indicating proposed changes, and seven comments. These comments will be addressed in the supporting statement.

DATES: Comments are encouraged and will be accepted for an additional 30 days until August 30, 2018.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Ramona Rantala, Statistician, Bureau of Justice Statistics, 810 Seventh Street NW, Washington, DC 20531 (email: *Ramona.Rantala@usdoj.gov;* telephone: 202–307–6170).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of this information collection:

1. *Type of Information Collection:* Reinstatement with change of an expired collection.

2. *The Title of the Form/Collection:* Survey of Sexual Victimization [formerly the Survey of Sexual Violence].

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* Form numbers for the questionnaire are SSV–1, SSV–2, SSV–3, SSV–4, SSV–5, SSV–6 (Summary Form); SSV–IA, SSV–IJ, (Substantiated Incident Form). The applicable component within the Department of Justice is the Bureau of Justice Statistics, in the Office of Justice Programs.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: State, Local, or Tribal Government correctional facilities. Other: Federal Government and businesses (privately operated correctional institutions, both for-profit and not-for-profit). The data will be used to develop national estimates of the incidence and prevalence of sexual assault within correctional facilities, as well as characteristics of substantiated incidents, as required under the Prison Rape Elimination Act of 2003 (Pub. L. 108–79).

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimate of the total number of respondents is 1,574 adult and juvenile correctional systems and facilities. (This estimate assumes a response rate of 100%.) Federal and state correctional systems for adults and juveniles (102 respondents) will each take an estimated 60 minutes to complete the summary form; local, military, Immigrations and Customs Enforcement, tribal, and privately operated facilities (1,472 respondents) will each take an estimated 30 minutes to complete the summary form; and incident forms (an estimated 3,000 incident forms will be completed each year, one for each incident that was substantiated) will take about 30 minutes per form. The burden estimates are based on data from the prior administration of the SSV.

6. *An estimate of the total public burden (in hours) associated with the collection:* There is an estimated 2,338 total burden hours per year associated with this collection, with a combined total of 7,014 for the three years.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: July 26, 2018.

Melody Braswell,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410–18–P

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OJP (OJP) Docket No. 1748]

Meeting of the Public Safety Officer Medal of Valor Review Board

AGENCY: Office of Justice Programs (OJP), Bureau of Justice Assistance (BJA), Justice.

ACTION: Notice of meeting.

SUMMARY: This is an announcement of a meeting of the Public Safety Officer Medal of Valor Review Board, primarily intended to consider nominations for the 2017–2018 Medal of Valor, and to make a limited number of recommendations for submission to the U.S. Attorney General. Additional issues of importance to the Board may also be discussed. The meeting/conference call date and time is listed below.

DATES: September 10, 2018, 9:00 a.m. to 12:00 p.m. EDT.

ADDRESSES: The public may hear the proceedings of this meeting/conference call at the Office of Justice Programs, 810 7th Street NW, Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Gregory Joy, Policy Advisor, Bureau of Justice Assistance, Office of Justice Programs, 810 7th Street NW, Washington, DC 20531, by telephone at (202) 514–1369, toll free (866) 859–2687, or by email at *Gregory.joy@usdoj.gov.*

SUPPLEMENTARY INFORMATION: The Public Safety Officer Medal of Valor Review Board carries out those advisory functions specified in 42 U.S.C. 15202. Pursuant to 42 U.S.C. 15201, the President of the United States is authorized to award the Public Safety Officer Medal of Valor, the highest national award for valor by a public safety officer.

This meeting/conference call is open to the public at the offices of BJA. For security purposes, members of the public who wish to participate must register at least seven (7) days in advance of the meeting/conference call by contacting Mr. Joy. All interested participants will be required to meet at the Bureau of Justice Assistance, Office of Justice Programs; 810 7th Street NW, Washington, DC, 20531, and will be required to sign in at the front desk. *Note:* Photo identification will be required for admission. Additional identification documents may be required.

Access to the meeting/conference call will not be allowed without prior registration. Anyone requiring special accommodations should contact Mr. Joy at least seven (7) days in advance of the meeting. Please submit any comments or written statements for consideration by the Review Board in writing at least seven (7) days in advance of the meeting date.

Gregory Joy,

Policy Advisor/Designated Federal Officer, Bureau of Justice Assistance.

[FR Doc. 2018–16328 Filed 7–30–18; 8:45 am]

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Notice of Initial Determination To Remove Cotton From Uzbekistan From the List of Products Requiring Federal Contractor Certification as to Forced or Indentured Child Labor Pursuant to Executive Order 13126

AGENCY: Bureau of International Labor Affairs, Department of Labor.

ACTION: Notice of initial determination; request for comments.

SUMMARY: This initial determination proposes to revise the list required by Executive Order No. 13126 (''Prohibition of Acquisition of Products Produced by Forced or Indentured Child Labor'') (E.O. List) in accordance with the Department of Labor's (DOL) ''Procedural Guidelines for the Maintenance of the List of Products Requiring Federal Contractor Certification as to Forced or Indentured Child Labor'' (the Procedural Guidelines).[1] The E.O. List identifies a list of products, by their country of origin, that DOL, in consultation and cooperation with the Department of State and the Department of Homeland Security (hereinafter ''the three Departments''), has a reasonable basis to believe might have been mined, produced, or manufactured by forced or indentured child labor. This notice proposes to remove cotton from Uzbekistan because the three Departments have preliminarily determined that the use of forced or indentured child labor in the production of that product has been significantly reduced. The Department of Labor invites public comment on this initial determination. The three Departments will consider all public comments prior to publishing a final determination revising the E.O. List.

DATES: Comments should be submitted to the Office of Child Labor, Forced Labor, and Human Trafficking (OCFT) via one of the methods described below and must be received by no later than 5 p.m. ET, August 30, 2018, to guarantee consideration.

ADDRESSES: Information submitted to the Department of Labor should be submitted directly to OCFT, Bureau of International Labor Affairs, U.S. Department of Labor. Comments, identified as ''Docket No. DOL–2018–0004,'' may be submitted by any of the following methods:

1. *Federal eRulemaking Portal:* You may submit electronic comments to: *http://www.regulations.gov.* The portal includes instructions for submitting comments. Parties submitting responses electronically are encouraged not to submit paper copies.

2. *Facsimile (fax):* OCFT, at 202–693–4830.

3. *Mail, Express Delivery, Hand Delivery, and Messenger Service (2 copies):* Rachel Rigby/Austin Pedersen, U.S. Department of Labor, OCFT, Bureau of International Labor Affairs, 200 Constitution Avenue NW, Room S–5313, Washington, DC 20210.

4. *Email:* Email submissions should be addressed to: *EO13126@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Director, Office of Child Labor, Forced Labor, and Human Trafficking, Bureau of International Labor Affairs, U.S. Department of Labor, at (202) 693–4843 (this is not a toll free number). Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the Federal Information Relay Service at 1–877–889–5627.

SUPPLEMENTARY INFORMATION:

I. Information Sought

The Department of Labor is requesting public comment on the revisions to the list proposed below, as well as any other issue related to the fair and effective implementation of E.O. 13126. This notice is a general solicitation of comments from the public. All submitted comments will be made a part of the public record and will be available for inspection on *http://www.regulations.gov.*

In conducting research for this initial determination, the three Departments considered a wide variety of materials based on their own research, and which originates from other U.S. Government agencies, foreign governments, international organizations, non-governmental organizations (NGOs), U.S. Government-funded technical assistance and field research projects, academic and other independent research, media, and other sources. The Department of State and U.S. embassies

[1] 66 FR 5351 (Jan. 18, 2001).

and consulates abroad also provided important information by gathering data from contacts, conducting site visits, and reviewing local media sources. In developing the proposed revision to the E.O. List, the three Departments' review focused on information concerning the use of forced or indentured child labor that was available from the above sources.

As outlined in the Procedural Guidelines, several factors were weighed in determining whether a product should be placed, or remain on, the revised E.O. List: The nature of the information describing the use of forced or indentured child labor; the source of the information; the date of the information; the extent of corroboration of the information by appropriate sources; whether the information involved more than an isolated incident; and whether recent and credible efforts are being made to address forced or indentured child labor in a particular country and industry (66 FR 5351).

This notice constitutes an initial determination to revise the list issued December 1, 2014. Based on available information from various sources, the three Departments have preliminarily concluded that there is no longer a reasonable basis to believe that there is use of forced or indentured child labor in the production of the following product, identified by its country of origin:

Product: Cotton
Country: Uzbekistan

The Department of Labor has received recent, credible, and corroborated information from various sources on the use of forced or indentured child labor in cotton production in Uzbekistan. This information indicates that while children previously worked under forced labor conditions in cotton production, the use of forced child labor appears to have been significantly reduced. Therefore, the three Departments have preliminarily concluded that there is no longer a reasonable basis to believe that cotton from Uzbekistan is produced by forced or indentured child labor, except in a few isolated instances, and therefore it should not continue to be on the list.

DOL placed cotton from Uzbekistan on the List in 2010, based on 14 sources dating from 2002 to 2008. Sources indicated that school administrators, at the direction of central and local governments, systematically mobilized children as young as 7 years old for participation in the annual cotton harvest.[2] In 2013, the Government of Uzbekistan committed to working with the International Labor Organization (ILO) to address forced child labor. Over time, three forms of harvest monitoring were established: ILO-implemented Third Party Monitoring (TPM), Uzbekistan's own national monitoring led by the Coordination Council, and independent monitoring conducted by human rights activists, many of whom coordinate their reporting through the Uzbek German Forum. In 2017, ILO monitoring, Uzbekistan's national monitoring, and observation by independent human rights activists each found that forced child labor had been reduced to a few incidents in the cotton harvest, and only 32 additional children were found to be engaged in child labor, though not all in forced labor conditions, in the cotton harvest.[3] Both the U.S. Embassy in Tashkent's observation during the 2017 harvest, as well as DOL's review of available information, corroborated that forced child labor in the production of cotton had been significantly reduced to isolated incidents.[4] Further, the Government of Uzbekistan has taken steps to improve the monitoring environment for independent activists and follow up on all reports of child labor and forced labor in the cotton harvest, including those made by independent activists.[5] However, both the ILO and independent monitoring found that at least 300,000 adults were forced to work in the 2017 cotton harvest.[6]

The Department of Labor invites public comment on whether this product (and/or other products, regardless of whether they are mentioned in this notice) should be included in or removed from the revised E.O. List. To the extent possible, comments provided should address the criteria for inclusion of a product on the E.O. List contained in the Procedural Guidelines discussed above.

Following receipt and consideration of comments on the removal from the E.O. List set out above, the three Departments will issue a final determination in the **Federal Register**. The three Departments intend to continue to revise the E.O. List periodically to add and/or remove products as warranted by the receipt of new and credible information.

II. Background

E.O. 13126 was signed on June 12, 1999, and published in the **Federal Register** on June 16, 1999.[7] E.O. 13126 declared that it was ''the policy of the United States Government . . . that executive agencies shall take appropriate actions to enforce the laws prohibiting the manufacture or importation of goods, wares, articles, and merchandise mined, produced or manufactured wholly or in part by forced or indentured child labor.'' The E.O. defines ''forced or indentured child labor'' as all work or service exacted from any person under the age of 18 under the menace of any penalty for its nonperformance and for which the worker does not offer himself voluntarily, or performed by any person under the age of 18 pursuant to a contract the enforcement of which can be accomplished by process or penalties.

Pursuant to E.O. 13126, and following public notice and comment, the Department of Labor published in the January 18, 2001, **Federal Register** the first E.O. List of products, along with their respective countries of origin, that the Department, in consultation and cooperation with the Departments of State and Treasury (whose relevant responsibilities are now within the Department of Homeland Security), had a reasonable basis to believe might have been mined, produced or manufactured with forced or indentured child labor.[8] The Department also published the Procedural Guidelines on January 18, 2001, which provide procedures for the maintenance, review, and, as appropriate, revision of the E.O. List.[9]

The Procedural Guidelines provide that the E.O. List may be revised through consideration of submissions by individuals and on the three Departments' own initiative. When proposing a revision to the E.O. List, DOL must publish in the **Federal**

[9] 66 FR 5351.

Register a notice of initial determination, which includes any proposed alteration to the E.O. List. The three Departments will consider all public comments prior to the publication of a final determination of a revised E.O. List.

On January 18, 2001, pursuant to Section 3 of E.O. 13126, the Federal Acquisition Regulatory Council published a final rule to implement specific provisions of E.O. 13126 that require, among other things, that Federal contractors who supply products that appear on the list certify to the contracting officer that the contractor, or, in the case of an incorporated contractor, a responsible official of the contractor, has made a good faith effort to determine whether forced or indentured child labor was used to mine, produce, or manufacture any product furnished under the contract and that, on the basis of those efforts, the contractor is unaware of any such use of forced or indentured child labor.[10]

On September 11, 2009, the Department of Labor published an initial determination in the **Federal Register** proposing to revise the E.O. List to include 29 products from 21 countries. The Notice requested public comments for a period of 90 days. Public comments were received and reviewed by all relevant agencies and a final determination was issued on July 20, 2010. Following the same process, the E.O. List was revised again in 2011, 2012, 2013, and 2014. The most recent E.O. List, finalized on December 1, 2014, includes 35 products from 26 countries.

The current E.O. List and the Procedural Guidelines can be accessed at *http://www.dol.gov/ilab/reports/child-labor/list-of-products/* or can be obtained from: OCFT, Bureau of International Labor Affairs, Room S–5313, U.S. Department of Labor, 200 Constitution Avenue NW, Washington, DC 20210; telephone: (202) 693–4843; fax (202) 693–4830.

(Authority: E.O. 13126, 64 FR 32383)

Signed at Washington, DC, this 24 day of July 2018.

Martha E. Newton,

Deputy Undersecretary for International Affairs.

NUCLEAR REGULATORY COMMISSION

[NRC–2018–0152]

Biweekly Notice: Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Biweekly notice.

SUMMARY: Pursuant to Section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular biweekly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued, from June 30, 2018 to July 16, 2018. The last biweekly notice was published on July 17, 2018.

DATES: Comments must be filed by August 30, 2018. A request for a hearing must be filed by October 1, 2018.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Website:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2018–0152. Address questions about NRC dockets to Jennifer Borges; telephone: 301–287–9127; email: *Jennifer.Borges@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail Comments to:* May Ma, Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Shirley Rohrer, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington DC 20555–0001; telephone: 301–415–5411; email: *Shirley.Rohrer@nrc.gov*

SUPPLEMENTARY INFORMATION:

I. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in section 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of 60 days after the date of publication of this notice. The Commission may issue the license amendment before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue the amendment prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final no significant hazards consideration determination, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by this action may file a request for a hearing and petition for leave to intervene (petition) with respect to the action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. The NRC's regulations are accessible electronically from the NRC Library on the NRC's website at *http://www.nrc.gov/reading-rm/doc-collections/cfr/.* Alternatively, a copy of the regulations is available at the NRC's Public Document Room, located at One White Flint North, Room O1–F21, 11555 Rockville Pike (First Floor), Rockville, Maryland 20852. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

As required by 10 CFR 2.309(d) the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements for standing: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right under the Act to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest.

In accordance with 10 CFR 2.309(f), the petition must also set forth the specific contentions which the petitioner seeks to have litigated in the proceeding. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner must provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to the specific sources and documents on which the petitioner intends to rely to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant or licensee on a material issue of law or fact. Contentions must be limited to matters within the scope of the proceeding. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy the requirements at 10 CFR 2.309(f) with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene. Parties have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that party's admitted contentions, including the opportunity to present evidence, consistent with the NRC's regulations, policies, and procedures.

Petitions must be filed no later than 60 days from the date of publication of this notice. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii). The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document.

If a hearing is requested, and the Commission has not made a final determination on the issue of no significant hazards consideration, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to establish when the hearing is held. If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally-recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission no later than 60 days from the date of publication of this notice. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally-recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. Alternatively, a State, local governmental body, Federally-recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

If a hearing is granted, any person who is not a party to the proceeding and is not affiliated with or represented by a party may, at the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of his or her position on the issues but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings, including a request for hearing and petition for leave to intervene (petition), any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities that request to participate under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Detailed guidance on making electronic submissions may be found in the Guidance for Electronic Submissions to the NRC and on the NRC website at *http://www.nrc.gov/site-help/e-submittals.html.* Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at

hearing.docket@nrc.gov, or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *http://www.nrc.gov/site-help/e-submittals/getting-started.html.* Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit adjudicatory documents. Submissions must be in Portable Document Format (PDF). Additional guidance on PDF submissions is available on the NRC's public website at *http://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed so that they can obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, 11555 Rockville Pike, Rockville, Maryland 20852, Attention: Rulemaking and Adjudications Staff. Participants filing adjudicatory documents in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket which is available to the public at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the Commission or the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click cancel when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or personal phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. For example, in some instances, individuals provide home addresses in order to demonstrate proximity to a facility or site. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants are requested not to include copyrighted materials in their submission.

For further details with respect to these license amendment applications, see the application for amendment which is available for public inspection in ADAMS and at the NRC's PDR. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

Arizona Public Service Company (APS), et al., Docket Nos. STN 50–528, STN 50–529, and STN 50–530, Palo Verde Nuclear Generating Station, Unit Nos. 1, 2, and 3, Maricopa County, Arizona

Date of amendment request: May 25, 2018. A publicly-available version is in ADAMS under Accession No. ML18145A303.

Description of amendment request: The amendments would revise the technical specification (TS) requirement regarding response time testing of pressure transmitters.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change revises the Technical Specification (TS) Definition of Reactor Protective System (RPS) and Engineered Safety Features (ESF) system instrumentation response time to permit Arizona Public Service Company (APS) to evaluate using an NRC-approved methodology and apply a bounding response time for pressure transmitters in lieu of measurement. The requirement for the instrumentation to actuate within the response time assumed in the accident analysis is unaffected.

The response time associated with the RPS and ESF instrumentation is not an initiator of any accident. Therefore, the proposed change has no significant effect on the probability of any accident previously evaluated.

The affected RPS and ESF instrumentation are assumed to actuate their respective components within the required response time to mitigate accidents previously evaluated. Revising the TS definition for RPS and ESF instrumentation response times to allow an NRC-approved methodology for verifying response time for pressure transmitters does not alter the surveillance requirements that verify the RPS and ESF instrumentation response times are within the required limits. As such, the TS will continue to assure that the RPS and ESF instrumentation actuate their associated

components within the specified response time to accomplish the required safety functions assumed in the accident analyses. Therefore, the assumptions used in any accidents previously evaluated are unchanged and there is no significant increase in the consequences.

Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change revises the TS Definition of RPS and ESF instrumentation response time to permit APS to evaluate using an NRC-approved methodology and apply a bounding response time for pressure transmitters in lieu of measurement. The proposed change does not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed). The proposed change does not alter any assumptions made in the safety analyses. The proposed change does not alter the limiting conditions for operation for the RPS or ESF instrumentation, nor does it change the Surveillance Requirement to verify the RPS and ESF instrumentation response times are within the required limits. As such, the proposed change does not alter the operability requirements for the RPS and ESF instrumentation, and therefore, does not introduce any new failure modes.

Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in a margin of safety?

Response: No.

The proposed change revises the TS Definition of RPS and ESF instrumentation response time to permit APS to evaluate using an NRC-approved methodology and apply a bounding response time for pressure transmitters in lieu of measurement. The proposed change has no effect on the required RPS and ESF instrumentation response times or setpoints assumed in the safety analyses and the TS requirements to verify those response times and setpoints.

The proposed change does not alter any Safety Limits or analytical limits in the safety analysis. The proposed change does not alter the TS operability requirements for the RPS and ESF instrumentation. The RPS and ESF instrumentation actuation of the required systems and components at the required setpoints and within the specified response times will continue to accomplish the design basis safety functions of the associated systems and components in the same manner as before. As such, the RPS and ESF instrumentation will continue to perform the required safety functions as assumed in the safety analyses for all previously evaluated accidents.

Therefore, the proposed amendment does not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on that review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Attorney for licensee: Michael G. Green, Senior Regulatory Counsel, Pinnacle West Capital Corporation, P.O. Box 52034, Mail Station 8695, Phoenix, Arizona 85072–2034.

NRC Branch Chief: Robert J. Pascarelli.

Duke Energy Carolinas, LLC, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Unit Nos. 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: February 26, 2018. A publicly-available version is in ADAMS under Accession No. ML18065A180.

Description of amendment request: The amendments would modify Technical Specification (TS) 3.4.11, ''Pressurizer Power Operated Relief Valves (PORVs),'' to resolve non-conservative Required Actions. TS 3.8.11, Condition B for one or two PORVs inoperable and not capable of being manually cycled is revised to split it into three separate Conditions: (1) One Train B PORV inoperable and not capable of being manually cycled, (2) one Train A PORV inoperable and not capable of being manually cycled, and (3) two Train B PORVs inoperable and not capable of being manually cycled. TS 3.8.11, Condition C for one block valve inoperable is revised to split it into two separate Conditions: (1) One Train B block valve inoperable and (2) one Train A block valve inoperable. TS 3.8.11, Condition F for two block valves inoperable is revised to be new Condition I for two Train B block valves inoperable. A new Condition, Condition J, is added for one Train B PORV and the other Train B block valve inoperable. Current Condition G for three block valve inoperable is revised to be new Condition K. Current Condition D is revised and renamed as Condition E, current Condition E is revised and renamed as Condition F and current Condition H is revised and renamed as new Condition L. Surveillance Requirement (SR) 3.4.11.1 Note is revised to include additional Conditions when performing this SR is not required for inoperable block valves in these Conditions.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change revises the TS for the purpose of correcting non-conservative TS Required Actions when PORVs and associated block valves are inoperable. By requiring inoperable PORVs and block valves be returned to operable status within specified completion times, the proposed change will increase the availability of equipment for performing safety-related functions. The proposed change ensures assumptions associated with accident analyses are met. The probability of an accident previously evaluated is not affected and there is no increase in the consequences of any accident previously evaluated.

2. Does the proposed amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change revises the TS for the purpose of correcting non-conservative TS Required Actions. The proposed change does not introduce new equipment or new equipment operating modes. The proposed change does not increase the likelihood of the malfunction of any system, structure, or component, or negatively impact any analyzed accident. The proposed change ensures assumptions made in the safety analyses are met. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed amendment involve a significant reduction in the margin of safety?

Response: No.

Overall plant safety would be enhanced as a result of the additional restrictions placed on the PORVs and associated block valves. The proposed change does not alter the manner in which safety limits, limiting safety system settings, or limiting conditions for operation are determined.

The safety analysis assumptions and acceptance criteria are not affected by this change. Therefore, the proposed change does not involve a reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Kate B. Nolan, Deputy General Counsel, Duke Energy Carolinas, LLC, 550 South Tryon Street—DEC45A Charlotte, NC 28202–1802.

NRC Branch Chief: Michael T. Markley.

Entergy Louisiana, LLC, and Entergy Operations, Inc., Docket No. 50–458, River Bend Station, Unit No. 1 (RBS), West Feliciana Parish, Louisiana

Date of amendment request: April 30, 2018. A publicly-available version is in ADAMS under Accession No. ML18128A044.

Description of amendment request: The proposed change would revise the Emergency Plan for RBS to adopt the revised Emergency Action Level (EAL) scheme described in Revision 6 to Nuclear Energy Institute's (NEI's), NEI 99–01, ''Development of Emergency Action Levels for Non-Passive Reactors.'' Revision 6 to NEI 99–01 was endorsed by the NRC by letter dated March 28, 2013 (ADAMS Accession No. ML12346A463).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Do the proposed changes involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed changes to the RBS EALs do not involve any physical changes to plant equipment or systems and do not alter the assumptions of any accident analyses. The proposed changes do not adversely affect accident initiators or precursors and do not alter design assumptions, plant configuration, or the manner in which the plant is operated and maintained. The proposed changes do not adversely affect the ability of structures, systems or components (SSCs) to perform intended safety functions in mitigating the consequences of an initiating event within the assumed acceptance limits.

Therefore, the changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Do the proposed changes create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of the proposed changes. The changes do not challenge the integrity or performance of any safety-related systems. No plant equipment is installed or removed, and the changes do not alter the design, physical configuration, or method of operation of any plant SSC. Because EALs are not accident initiators and no physical changes are made to the plant, no new causal mechanisms are introduced.

Therefore, the changes do not create the possibility of a new or different kind of accident from an accident previously evaluated.

3. Do the proposed changes involve a significant reduction in a margin of safety?

Response: No.

Margin of safety is associated with the ability of the fission product barriers (*i.e.,* fuel cladding, reactor coolant system pressure boundary, and containment structure) to limit the level of radiation dose to the public. The proposed changes do not impact operation of the plant and no accident analyses are affected by the proposed changes. The changes do not affect the Technical Specifications or the method of operating the plant. Additionally, the proposed changes will not relax any criteria used to establish safety limits and will not relax any safety system settings. The safety analysis acceptance criteria are not affected by these changes. The proposed changes will not result in plant operation in a configuration outside the design basis. The proposed changes do not adversely affect systems that respond to safely shut down the plant and to maintain the plant in a safe shutdown condition.

Therefore, the changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Anna Vinson Jones, Senior Counsel—Entergy Services, Inc., 101 Constitution Avenue NW, Suite 200 East, Washington DC 20001.

NRC Branch Chief: Robert J. Pascarelli.

Entergy Operations, Inc. (Entergy), System Energy Resources, Inc., Cooperative Energy, A Mississippi Electric Cooperative, and Entergy Mississippi, Inc., Docket No. 50–416, Grand Gulf Nuclear Station, Unit No. 1, Claiborne County, Mississippi

Date of amendment request: April 12, 2018, as supplemented by letter dated June 7, 2018. Publicly-available versions are in ADAMS under Accession Nos. ML18102B445 and ML18158A514, respectively.

Description of amendment request: The proposed amendment would modify the technical specifications (TSs) by relocating specific surveillance frequencies to a licensee-controlled program with the adoption of Technical Specification Task Force (TSTF) Traveler TSTF–425, Revision 3, ''Relocate Surveillance Frequencies to Licensee Control-RITSTF [Risk-Informed TSTF] Initiative 5b.'' Additionally, the change would add a new program, the Surveillance Frequency Control Program (SFCP), to TS Chapter 5.0, ''Administrative Controls.''

The NRC staff issued a ''Notice of Availability of Technical Specification Improvement to Relocate Surveillance Frequencies to Licensee Control-Risk-Informed Technical Specification Task Force (RITSTF) Initiative 5b, Technical Specification Task Force-425, Revision 3,'' in the **Federal Register** on July 6, 2009 (74 FR 31996). The notice included a model safety evaluation, a model no significant hazards consideration (NSHC) determination, and a model license amendment request. In its application dated April 12, 2018, the licensee affirmed the applicability of the model NSHC determination, which is presented below.

Basis for proposed NSHC determination: As required by 10 CFR 50.91(a), an analysis of the issue of NSHC adopted by the licensee is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of any accident previously evaluated?

Response: No.

The proposed change relocates the specified frequencies for periodic surveillance requirements to licensee control under a new Surveillance Frequency Control Program. Surveillance frequencies are not an initiator to any accident previously evaluated. As a result, the probability of any accident previously evaluated is not significantly increased. The systems and components required by the technical specifications for which the surveillance frequencies are relocated are still required to be operable, meet the acceptance criteria for the surveillance requirements, and be capable of performing any mitigation function assumed in the accident analysis. As a result, the consequences of any accident previously evaluated are not significantly increased.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any previously evaluated?

Response: No.

No new or different accidents result from utilizing the proposed change. The changes do not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed) or a change in the methods governing normal plant operation. In addition, the changes do not impose any new or different requirements. The changes do not alter assumptions made in the safety analysis. The proposed changes are consistent with the safety analysis assumptions and current plant operating practice.

Therefore, the proposed changes do not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The design, operation, testing methods, and acceptance criteria for systems, structures, and components (SSCs), specified in applicable codes and standards (or alternatives approved for use by the NRC) will continue to be met as described in the plant licensing basis (including the final safety analysis report and bases to TS), since these are not affected by changes to the surveillance frequencies. Similarly, there is no impact to safety analysis acceptance criteria as described in the plant licensing basis. To evaluate a change in the relocated surveillance frequency, Entergy will perform a probabilistic risk evaluation using the guidance contained in NRC approved [Nuclear Energy Institute] NEI 04–10, Rev. 1 in accordance with the TS SFCP. NEI 04–10, Rev. 1, methodology provides reasonable acceptance guidelines and methods for evaluating the risk increase of proposed changes to surveillance frequencies consistent with Regulatory Guide 1.177.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the analysis adopted by the licensee and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves NSHC.

Attorney for licensee: Anna Vinson Jones, Senior Counsel/Legal Department, Entergy Services, Inc., 101 Constitution Avenue NW, Washington, DC 20001.

NRC Branch Chief: Robert J. Pascarelli.

Entergy Operations, Inc., Docket No. 50–382, Waterford Steam Electric Station, Unit No. 3 (Waterford 3), St. Charles Parish, Louisiana

Date of amendment request: March 26, 2018, as supplemented by letter dated May 17, 2018. Publicly-available versions are in ADAMS under Accession Nos. ML18085B196 and ML18137A494, respectively.

Description of amendment request: The proposed amendment would revise Waterford 3 Technical Specifications (TS) Section 3/4.7.4, ''Ultimate Heat Sink.'' Specifically, the proposed amendment would correct the wet cooling tower basin level discrepancy, revise requirements for cooling fan operation described in TS 3.7.4 Action Statements a, c, and d, and revise TS Table 3.7–3, ''Ultimate Heat Sink Minimum Fan Requirements Per Train.''

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed change modifies Technical Specification 3/4.7.4 to be consistent with the revised design basis calculations. This change is necessary to preserve the assumptions and limits of the revised ultimate heat sink design basis calculation. The calculation determines the maximum number of cooling tower fans allowed out-of-service for a given dry bulb temperature and establishes appropriate cooling tower fan operating requirements. The proposed change does not directly affect any material condition of the plant that could contribute to an accident or that could contribute to the consequences of an accident. The proposed change ensures that the mitigating effects of the ultimate heat sink will be consistent with the design basis analysis. Therefore, the proposed change will not involve a significant increase in the probability or consequences of any accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change modifies Technical Specification 3/4.7.4 to be consistent with the revised design basis calculations. [The revised calculation modifies the dry and wet cooling tower fan operability requirements to account for increased recirculation impacts for different ambient conditions and heat loads.] The proposed change to Technical Specification 3/4.7.4 does not alter the operation of the plant or the manner in which the plant is operated such that it created credible new failure mechanisms, malfunctions, or accident initiators. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The proposed change modifies Technical Specification 3/4.7.4 to be consistent with the revised design basis calculations. The modified dry and wet cooling tower fan operability requirements result from placing lower limits on the dry bulb temperatures in the Technical Specification and limits on the number of wet cooling tower out-of-service fans per cell. The proposed change preserves the margin of safety by ensuring that the minimum number of operable fans for a given temperature are capable of removing the heat duty for the ultimate heat sink. The proposed change does not exceed or alter a design basis safety limit and maintains the ultimate heat sink capability of performing its safety function. Therefore, this change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Anna Vinson Jones, Senior Counsel, Entergy Services, Inc., 101 Constitution Avenue NW, Suite 200 East, Washington, DC 20001.

NRC Branch Chief: Robert J. Pascarelli.

Exelon Generation Company, LLC, Docket No. 50–244, R. E. Ginna Nuclear Power Plant, Wayne County, New York

Date of amendment request June 25, 2018. A publicly-available version is in ADAMS under Accession No. ML18176A327.

Description of amendment request: The proposed amendment would revise the requirements on control and shutdown rods, and rod and bank position indication in Technical Specification (TS) 3.1.4, ''Rod Group Alignment Limits,'' TS 3.1.5, ''Shutdown Bank Insertion Limit,'' TS 3.1.6, ''Control Bank Insertion Limits,'' and TS 3.1.7, ''Rod Position Indication'' consistent with NRC-approved Technical Specification Task Force Traveler (TSTF)-547, Revision 1, ''Clarification of Rod Position Requirements'' dated March 4, 2016 (ADAMS Accession Package No. ML16012A126).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

Control and shutdown rods are assumed to insert into the core to shut down the reactor in evaluated accidents. Rod insertion limits ensure that adequate negative reactivity is available to provide the assumed shutdown margin (SDM). Rod alignment and overlap limits maintain an appropriate power distribution and reactivity insertion profile.

Control and shutdown rods are initiators to several accidents previously evaluated, such as rod ejection. The proposed change does not change the limiting conditions for operation for the rods or make any technical changes to the Technical Specifications (TS) Surveillance Requirements (SRs) governing the rods. Therefore, the proposed change has no effect on the probability of any accident previously evaluated.

Revising the TS Required Actions to provide a limited time to repair rod movement control has no effect on the SDM assumed in the accident analysis as the

proposed Required Actions require verification that SDM is maintained. The effects on power distribution will not cause a significant increase in the consequences of any accident previously evaluated as all TS requirements on power distribution continue to be applicable.

Revising the TS Required Actions to provide an alternative to frequent use of the moveable incore detector system to verify the position of rods with an inoperable rod position indicator does not change the requirements for the rods to be aligned and within the insertion limits.

Therefore, the assumptions used in any accidents previously evaluated are unchanged and there is no significant increase in the consequences.

The proposed change to resolve the differences in the TS ensure that the intended Actions are followed when equipment is inoperable. Actions taken with inoperable equipment are not assumptions in the accidents previously evaluated and have no significant effect on the consequences.

The proposed change to eliminate an unnecessary action has no effect on the consequences of accidents previously evaluated as the analysis of those accidents did not consider the use of the actions.

The proposed change to increase consistency within the TS has no effect on the consequences of accidents previously evaluated as the proposed change clarifies the application of the existing requirements and does not change the intent.

Therefore, the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different accident from any accident previously evaluated?

Response: No.

The proposed change does not involve a physical alteration of the plant (*i.e.,* no new or different type of equipment will be installed). The change does not alter assumptions made in the safety analyses. The proposed change does not alter the limiting conditions for operation for the rods or make any technical changes to the Surveillance Requirements governing the rods. The proposed change [to actions] maintains or improves safety when equipment is inoperable and does not introduce new failure modes.

Therefore, the proposed change does not create the possibility of a new or different accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

[The proposed change to allow time for rod position indication to stabilize after rod movement and to allow an alternative method of verifying rod position has no effect on the safety margin as actual rod position is not affected.] The proposed change to provide time to repair rods that are operable but immovable does not result in a significant reduction in the margin of safety because all rods must be verified to be operable, and all other banks must be within the insertion limits. The remaining proposed changes to make the requirements internally consistent and to eliminate unnecessary actions do not affect the margin of safety as the changes do not affect the ability of the rods to perform their specified safety function.

Therefore, the proposed change does not involve a significant reduction in a margin of safety.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Tamra Domeyer, Associate General Counsel, Exelon Generation Company, LLC, 4300 Winfield Road, Warrenville, IL 60555.

NRC Branch Chief: James G. Danna.

Southern Nuclear Operating Company, Inc., Docket Nos. 50–348 and 50–364, Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2, Houston County, Alabama

Date of amendment request: December 21, 2017, as supplemented by letter dated June 7, 2018. Publicly-available versions are in ADAMS under Accession Nos. ML17355A516, and ML18158A579, respectively.

Description of amendment request: The proposed amendment would revise TS 3.3.2, ''Engineered Safety Feature Actuation System (ESFAS) Instrumentation,'' by adding TS Actions that allow time to restore one high steam flow channel per steam line to Operable status before requiring a unit shutdown in the event two channels in one or more steam lines are discovered inoperable due to the trip setting not within Allowable Value.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The proposed amendment does not affect accident initiators or precursors nor adversely alter the design assumptions, conditions, and configuration of the facility. The proposed amendment does not alter any plant equipment or operating practices with respect to such initiators or precursors in a manner that the probability of an accident is increased.

The proposed amendment does not involve a physical change to the ESFAS, nor does it change the safety function of the ESFAS instrumentation or the equipment supported by the ESFAS instrumentation. The ESFAS high steam flow channels are not assumed in the mitigation of any previously evaluated accident or transient. Automatic steam line isolation on high steam flow, containment high pressure, or low steam pressure is assumed in the mitigation of a major secondary system pipe rupture accident which bounds minor secondary system pipe breaks and the accidental opening of a secondary system steam dump, relief, or safety valve. Manual steam line isolation capability is also provided [assumed] in the mitigation of spectra of smaller secondary system pipe ruptures. During the time proposed to normalize the high steam flow channels, automatic ESFAS steam line isolation continues to be provided from either a containment high pressure signal or a low steam pressure signal, which are not impacted by the proposed license change. Additionally, manual steam line isolation continues to be provided by the ESFAS manual channels, which are not impacted by the proposed license change. As a result, the proposed amendment does not significantly alter assumptions relative to the mitigation of an accident or transient event and the proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

With respect to a new or different kind of accident, there are no proposed design changes to the ESFAS; nor are there any changes in the method by which safety related plant structures, systems, and components perform their specified safety functions. The proposed amendment will not affect the normal method of plant operation or revise any operating parameters. No new accident scenarios, transient precursor, failure mechanisms, or limiting single failures will be introduced as a result of this proposed change and the failure modes and effects analyses of SSCs important to safety are not altered as a result of this proposed change.

The proposed amendment does not alter the design or performance of the ESFAS, rather, it adds actions that allow time to normalize the high steam flow channels associated with the ESFAS steam line isolation before requiring a unit shutdown in the event multiple channels are discovered inoperable due to the trip settings not within the required accuracy. The process to normalize the high steam flow channels uses current procedures, methods, and processes already established and currently in use and, therefore, does not constitute a new type of test.

No changes are being proposed to the procedures that operate the plant equipment and the change does not have a detrimental impact on the manner in which plant equipment operates or responds to an actuation signal.

Therefore, the proposed change will not create the possibility of a new or different accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

The margin of safety is related to the ability of the fission product barriers to perform their design functions during and following an accident. These barriers include the fuel cladding, the reactor coolant system, and the containment. The performance of these fission product barriers will not be affected by the proposed change.

Instrumentation safety margin is established by ensuring the limiting safety system settings (LSSSs) automatically actuate the applicable design function to correct an abnormal situation before a safety limit is exceeded. Safety analysis limits are established for reactor trip system and ESFAS instrumentation functions related to those variables having significant safety functions. Containment pressure and steam line pressure provide the limiting parameter values assumed in the safety and transient analyses for mitigation of previously evaluated accidents and transients, including steam line break accidents. The high steam flow in two steam lines instrument function is not used in the safety analysis and a safety analysis limit is not specified for this trip function. Therefore, the high steam flow in two steam lines instrument function does not represent an LSSS because this instrumentation does not monitor a plant variable on which a safety limit has been placed.

The controlling parameters established to isolate the steam lines during an accident or transient are not affected by the proposed amendment and no design basis or safety limit is altered as a result of the proposed change. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Attorney for licensee: Jennifer M. Buettner, Associate General Counsel, Southern Nuclear Operating Company, Inc., 40 Inverness Center Parkway, Birmingham, AL 35242.

NRC Branch Chief: Michael T. Markley.

STP Nuclear Operating Company (STPNOC), Docket Nos. 50–498 and 50–499, South Texas Project, Unit Nos. 1 and 2, Matagorda County, Texas

Date of amendment request: March 27, 2018. A publicly-available version is in ADAMS under Accession No. ML18086B761.

Description of amendment request: The proposed amendment would revise certain minimum voltage and frequency acceptance criteria for steady-state standby diesel generator (SBDG) surveillance requirement testing. Specifically, the licensee would revise several subsections of Technical Specification 3.8.1.1, ''A.C. [Alternating Current] Sources, Operating,'' to correct non-conservative acceptance criteria.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed change involve a significant increase in the probability or consequences of an accident previously evaluated?

Response: No.

The SBDGs are not initiators for any accidents evaluated in the Updated Final Safety Analysis Report (UFSAR). The proposed change provides a more conservative range of acceptable SBDG voltage and frequency values. Thus, Technical Specification Surveillance Requirements will continue to demonstrate sufficient margin such that mitigation of accidents evaluated in the UFSAR is not impacted. The proposed change does not alter the design function of the SBDGs nor does it affect how the SBDGs are operated or physically tested. Therefore, the proposed change does not involve an increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed change create the possibility of a new or different kind of accident from any accident previously evaluated?

Response: No.

The proposed change does not involve any physical alterations and no new or different types of equipment are being installed. Requiring a more conservative range of acceptable SBDG voltage and frequency values does not affect SBDG operation and does not affect the ability of the SBDGs to perform their design function. There are no new credible failure mechanisms, malfunctions, or accident initiators introduced as a result of the proposed change. Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed change involve a significant reduction in a margin of safety?

Response: No.

Since the proposed change provides a more conservative range of acceptable SBDG voltage and frequency values, the margin of safety is maintained. Where required, Technical Specification Surveillance Requirement acceptance criteria have been procedurally adjusted to ensure equipment performance meets accident analysis assumptions considering uncertainties in steady-state SBDG voltage and frequency. STPNOC has evaluated the effects of SBDG voltage and frequency variations on affected equipment and confirmed that the design basis analyses are not adversely affected. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Attorney for licensee: Kym Harshaw, Vice President and General Counsel, STP Nuclear Operating Company, P.O. Box 289, Wadsworth, TX 77483.

NRC Branch Chief: Robert J. Pascarelli.

II. Previously Published Notices of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Nebraska Public Power District, Docket No. 50–298, Cooper Nuclear Station (CNS), Nemaha County, Nebraska

Date of amendment request: May 10, 2018. A publicly-available version is in ADAMS under Accession No. ML18137A199.

Brief description of amendment request: The proposed amendment would modify the CNS technical specifications by revising the two recirculation loop and single recirculation loop Safety Limit Minimum Critical Power Ratio values to reflect the results of a cycle specific calculation.

Date of publication of individual notice in ***Federal Register:*** July 2, 2018 (83 FR 30984).

Expiration date of individual notice: August 1, 2018 (public comments); August 31, 2018 (hearing requests).

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application

complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed no significant hazards consideration determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendment, (2) the amendment, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment as indicated. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

Duke Energy Progress, LLC, Docket Nos. 50–325 and 50–324, Brunswick Steam Electric Plant (BSEP), Unit Nos. 1 and 2, Brunswick County, North Carolina

Date of amendment request: November 15, 2017, as supplemented by letter dated May 23, 2018.

Brief description of amendments: The amendments revised fire protection license condition 2.B.(6) to allow, as a performance-based method, certain currently-installed thermal insulation materials to be retained and allow future use of these insulation materials in limited applications subject to appropriate engineering reviews and controls, as a deviation from the National Fire Protection Association Standard 805, Chapter 3, Section 3.3, Prevention.

Date of issuance: July 6, 2018.

Effective date: As of the date of issuance and shall be implemented within 120 days.

Amendment Nos.: 284 (Unit 1) and 312 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18106B169; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–71 and DPR–62: Amendments revised the Renewed Facility Operating Licenses.

Date of initial notice in ***Federal Register:*** February 13, 2018 (83 FR 6221). The supplemental letter dated May 23, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated July 6, 2018.

No significant hazards consideration comments received: No.

Florida Power & Light Company, et al., Docket Nos. 50–335 and 50–389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of amendment request: September 14, 2017, as supplemented by letter dated February 14, 2018.

Brief description of amendments: The amendments revised the St. Lucie Plant, Unit Nos. 1 and 2, Technical Specifications related to inoperable Auxiliary Feedwater pump steam supply.

Date of issuance: July 9, 2018.

Effective date: As of the date of issuance and shall be implemented within 90 days of issuance.

Amendment Nos.: 245 (Unit 1) and 196 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18129A149; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Renewed Facility Operating License Nos. DPR–67 and NPF–16: The amendments revised the Renewed Facility Operating Licenses and Technical Specifications.

Date of initial notice in ***Federal Register:*** November 7, 2017 (82 FR 51652). The supplement dated February 14, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated July 9, 2018.

No significant hazards consideration comments received: No.

Indiana Michigan Power Company, Docket Nos. 50–315 and 50–316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment request: November 7, 2017, as supplemented by letter dated May 4, 2018.

Brief description of amendments: The amendments allow for deviation from National Fire Protection Association 805 requirements to allow for currently installed non-plenum listed cables routed above suspended ceilings and to allow for the use of thin wall electrical metallic tubing and embedded/buried plastic conduit.

Date of issuance: July 6, 2018.

Effective date: As of the date of issuance and shall be implemented within 90 days of issuance.

Amendment Nos.: 340 (Unit 1) and 322 (Unit 2). A publicly-available version is in ADAMS under Accession No. ML18131A253; documents related to these amendments are listed in the Safety Evaluation enclosed with the amendments.

Facility Operating License Nos. DPR–58 and DPR–74: The amendments revised the Facility Operating Licenses.

Date of initial notice in ***Federal Register:*** January 2, 2018 (83 FR 169). The supplemental letter dated May 4, 2018, provided additional information that clarified the application, did not expand the scope of the application as originally noticed, and did not change the staff's original proposed no significant hazards consideration determination as published in the **Federal Register**.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated July 6, 2018.

No significant hazards consideration comments received. No.

Tennessee Valley Authority, Docket No. 50–259, Browns Ferry Nuclear Plant, Unit No. 1, Limestone County, Alabama

Date of amendment request: March 16, 2018, as supplemented by letter dated April 19, 2018.

Brief description of amendment: The amendment revised License Condition 2.C(18)(a)3 for Unit No. 1 to alter the time for submittal of a revised replacement steam dryer analysis from at least 90 days prior to the start of the Unit No. 1 extended power uprate outage to 60 days prior to exceeding 3458 megawatt thermal after the outage.

Date of issuance: July 10, 2018.

Effective date: As of the date of issuance and shall be implemented immediately.

Amendment No.: 304. A publicly-available version is in ADAMS under Accession No. ML18171A337; documents related to this amendment are listed in the Safety Evaluation enclosed with the amendment.

Renewed Facility Operating License No. DPR–33: Amendment revised the Unit 1 operating license.

Date of initial notice in ***Federal Register:*** The license amendment request was originally noticed in the **Federal Register** on April 10, 2018 (83 FR 15418). The supplement dated April 19, 2018, was noticed on May 8, 2018 (83 FR 20862), which superseded the original notice in its entirety.

The Commission's related evaluation of the amendment is contained in the Safety Evaluation dated July 10, 2018.

No significant hazards consideration comments received: No.

Dated at Rockville, Maryland, this 18th day of July 2018.

For the Nuclear Regulatory Commission.

Tara Inverso,

Acting Deputy Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 2018–15682 Filed 7–30–18; 8:45 am]

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83708; File No. SR–NYSEARCA–2018–52]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the NYSE Arca Options Fees and Charges and the NYSE Arca Equities Fees and Charges

July 25, 2018.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 13, 2018, NYSE Arca, Inc. (''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the NYSE Arca Options Fees and Charges (the ''Options Fee Schedule'') and the NYSE Arca Equities Fees and Charges (the ''Equities Fee Schedule'' and, together with the Options Fee Schedule, the ''Fee Schedules'') related to colocation to provide Users with access to the systems, and connectivity to the data feeds, of various additional third parties. In addition, the Exchange proposes to amend its Fee Schedules to update the names of certain third parties to reflect their current names. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the co-location [4] services offered by the Exchange to provide Users [5] with access to the systems, and connectivity to the data feeds, of various additional third parties. In addition, the Exchange proposes to amend its Fee Schedules to update the names of certain third parties to reflect their current names. The Exchange proposes to make the corresponding amendments to the Exchange's Fee Schedules related to these co-location services to reflect these proposed changes.

As set forth in the Fee Schedules, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[6] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Fee Schedules.

The Exchange proposes to provide access to BM&F Bovespa, Canadian Securities Exchange (''CSE''), ITG TriAct MatchNow, NASDAQ Canada, Neo Aequitas, Omega, and OTC Markets Group as additional Third Party Systems (''Proposed Third Party Systems''). In addition, it proposes to provide connectivity to the same third parties' data feeds, with the exception of the OTC Markets Group [7] (''Proposed Third Party Data Feeds'').

BM&F Bovespa is a Brazilian national securities exchange. CSE and Neo Aequitas are Canadian national securities exchanges. NASDAQ Canada, also Canadian national securities exchange, operates three trading books for trading in Canadian securities: CXC, CXD, and CX2. ITG TriAct MatchNow and Omega are Canadian alternative markets that match customer orders in Canadian securities. OTC Markets Group operates trading platforms for over-the-counter securities.

The Exchange would provide access to the Proposed Third Party Systems (''Access''), and connectivity to the Proposed Third Party Data Feeds (''Connectivity''), as conveniences to Users. Use of Access or Connectivity would be completely voluntary. The Exchange is not aware of any impediment to third parties offering Access or Connectivity.

The Exchange does not have visibility into whether third parties currently offer, or intend to offer, Users access to the Proposed Third Party Systems and

[4] The Exchange initially filed rule changes relating to its co-location services with the Commission in 2010. *See* Securities Exchange Act Release No. 63275 (November 8, 2010), 75 FR 70048 (November 16, 2010) (SR–NYSEArca–2010–100). The Exchange operates a data center in Mahwah, New Jersey (the ''data center'') from which it provides co-location services to Users.

[5] For purposes of the Exchange's co-location services, a ''User'' means any market participant that requests to receive co-location services directly from the Exchange. *See* Securities Exchange Act Release No. 76010 (September 29, 2015), 80 FR 60197 (October 5, 2015) (SR–NYSEArca–2015–82). As specified in the Fee Schedules, a User that incurs co-location fees for a particular co-location service pursuant thereto would not be subject to co-location fees for the same co-location service charged by the Exchange's affiliates New York Stock Exchange LLC (''NYSE LLC''), NYSE National, Inc. (''NYSE National''), and NYSE American LLC (''NYSE American and, together with NYSE LLC and NYSE National, the ''Affiliate SROs''). *See* Securities Exchange Act Release No. 70173 (August 13, 2013), 78 FR 50459 (August 19, 2013) (SR–NYSEArca–2013–80).

[6] *See* Securities Exchange Act Release No. 80310 (March 24, 2017), 82 FR 15763 (March 30, 2017) (SR–NYSEArca–2016–89).

[7] The Exchange currently provides connectivity to the OTC Markets Group data feed as a Third Party Data Feed.

connectivity to the Proposed Third Party Data Feeds, as such third parties are not required to make that information public. However, if one or more third parties presently offer, or in the future opt to offer, such Access and Connectivity to Users, a User may utilize the Secure Financial Transaction Infrastructure (''SFTI'') network, a third party telecommunication network, third party wireless network, a cross connect, or a combination thereof to access such services and products through a connection to an access center outside the data center (which could be a SFTI access center, a third-party access center, or both), another User, or a third party vendor.

Access to the Proposed Third Party Systems

The Exchange proposes to revise the Fee Schedules to provide that Users may obtain connectivity to the Proposed Third Party Systems for a fee. As with the current Third Party Systems, Users would connect to the Proposed Third Party Systems over the internet protocol (''IP'') network, a local area network available in the data center.[8]

As with the current Third Party Systems, in order to obtain access to a Proposed Third Party System, the User would enter into an agreement with the relevant Proposed Third Party, pursuant to which the third party content service provider would charge the User for access to the Proposed Third Party System. The Exchange would then establish a unicast connection between the User and the Proposed Third Party System over the IP network.[9] The Exchange would charge the User for the connectivity to the Proposed Third Party System. A User would only receive, and only be charged for, access to the Proposed Third Party System for which it enters into agreements with the third party content service provider.

The Exchange has no ownership interest in any of the Proposed Third Party Systems. Establishing a User's access to a Proposed Third Party System would not give the Exchange any right to use the Proposed Third Party System. Connectivity to a Proposed Third Party System would not provide access or order entry to the Exchange's execution system, and a User's connection to the Proposed Third Party System would not be through the Exchange's execution system.

As with the existing connections to Third Party Systems, the Exchange proposes to charge a monthly recurring fee for connectivity to the Proposed Third Party Systems. Specifically, when a User requests access to a Proposed Third Party System, it would identify the applicable content service provider and what bandwidth connection it required.

The Exchange proposes to modify its Fee Schedules to add the Proposed Third Party Systems to its existing list of Third Party Systems. The Exchange does not propose to change the monthly recurring fee the Exchange charges Users for unicast connectivity to each Third Party System, including the Proposed Third Party Systems.

Connectivity to the Proposed Third Party Data Feeds

The Exchange proposes to revise the Fee Schedules to provide that Users may obtain connectivity to the Proposed Third Party Data Feeds for a fee. The Exchange would receive a Proposed Third Party Data Feed from the content service provider at the Exchange's data center. The Exchange would then provide connectivity to that data to Users for a fee. Users would connect to the Proposed Third Party Data Feeds over the IP network.[10] The Proposed Third Party Data Feeds would include trading information concerning the securities that are traded on the relevant Proposed Third Party Systems.

In order to connect to a Proposed Third Party Data Feed, a User would enter into a contract with the content service provider, pursuant to which the content service provider would charge the User for the data feed. The Exchange would receive the Proposed Third Party Data Feed over its fiber optic network and, after the content service provider and User entered into the contract and the Exchange received authorization from the content service provider, the Exchange would re-transmit the data to the User over the User's port. The Exchange would charge the User for the connectivity to the Proposed Third Party Data Feed. A User would only receive, and would only be charged for, connectivity to a Proposed Third Party Data Feed for which it entered into a contract.

The Exchange has no affiliation with the sellers of the Proposed Third Party Data Feeds. It would have no right to use the Proposed Third Party Data Feeds other than as a redistributor of the data. The Proposed Third Party Data Feeds would not provide access or order entry to the Exchange's execution system. The Proposed Third Party Data Feeds would not provide access or order entry to the execution systems of the third parties generating the feeds. The Exchange would receive the Proposed Third Party Data Feeds via arms-length agreements and it would have no inherent advantage over any other distributor of such data.

As it does with the existing Third Party Data Feeds, the Exchange proposes to charge a monthly recurring fee for connectivity to the Proposed Third Party Data Feeds. Depending on its needs and bandwidth, a User may opt to receive all or some of the feeds or services included in the Proposed Third Parties' Data Feeds.

The Exchange proposes to add the following fees for connectivity to the Proposed Third Party Data Feeds to its existing list in the Fee Schedules: (i) A $3,000 per month fee for BM&F Bovespa; (ii) a $1,500 per month fee for NASDAQ Canada; (iii) a $1,200 fee for Neo Aequitas; and (iv) a $1,000 per month fee for each of the CSE, ITG TriAct MatchNow and Omega.

Name Changes

The Exchange proposes to update references to the International Securities Exchange, LLC (''ISE'') to reflect its acquisition by NASDAQ, Inc. (''NASDAQ'').[11] The Exchange also proposes to update references to Bats and Chicago Board Options Exchange (''Cboe'') to reflect their business combination and name changes.[12] In the sections entitled, ''Connectivity to Third Party Systems'' and ''Connectivity to Third Party Data Feeds'', the Exchange proposes to replace references to ''International Securities Exchange (ISE)'' with ''NASDAQ ISE''. The

[8] *See* Securities Exchange Act Release No. 74219 (February 6, 2015), 80 FR 7899 (February 12, 2015) (SR–NYSEArca2015–03) (notice of filing and immediate effectiveness of proposed rule change to include IP network connections).

[9] Information flows over existing network connections in two formats: ''unicast'' format, which is a format that allows one-to-one communication, similar to a phone line, in which information is sent to and from the Exchange; and ''multicast'' format, which is a format in which information is sent one-way from the Exchange to multiple recipients at once, like a radio broadcast.

[10] *See supra* note 8, at 7899 (''The IP network also provides Users with access to away market data products'').

[11] *See* Securities Exchange Act Release No. 78119 (June 27, 2016), 81 FR 41611 (SR–ISE2016–11; SR–ISE Gemini–2016–05; SR–ISE Mercury–2016–10) (Order Granting Accelerated Approval of Proposed Rule Changes, Each as Modified by Amendment No. 1 Thereto, Relating to a Corporate Transaction in Which Nasdaq, Inc. Will Become the Indirect Parent of ISE, ISE Gemini, and ISE Mercury). *See also* Securities Exchange Act Release No. 80325 (March 29, 2017), 82 FR 16445 (April 4, 2017) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Rename the Exchange as Nasdaq ISE, LLC).

[12] *See, e.g.,* Securities Exchange Act Release No. 81981 (October 30, 2017), 82 FR 51309 (November 3, 2017) (SR–CBOE–2017–066); and 81962 (October 26, 2017), 82 FR 50711 (November 1, 2017) (SR–BatsBZX–2017–70).

Exchange also proposes to delete a reference to ''BATS'' and replace it with ''Cboe BYX Exchange (CboeBYX), Cboe BZX Exchange (CboeBZX), Cboe EDGA Exchange (CboeEDGA), and Cboe EDGX Exchange (CboeEDGX)'' and to replace references to ''Chicago Board Options Exchange (CBOE)'' with ''Cboe Exchange (Cboe) and Cboe C2 Exchange (C2)''. In each case, the names would be updated to their current names, clearly delineating the third parties to which the Exchange provides connectivity and access.

In a non-substantive change, the Exchange proposes to reorganize the table of Third Party Systems to ensure it remains alphabetical in light of the proposed name changes. The Exchange does not propose to amend any fee related to connectivity to ISE or Cboe systems or access to ISE or Cboe data.

General

As is the case with all Exchange co-location arrangements, (i) neither a User nor any of the User's customers would be permitted to submit orders directly to the Exchange unless such User or customer is a member organization, a Sponsored Participant or an agent thereof (*e.g.,* a service bureau providing order entry services); (ii) use of the co-location services proposed herein would be completely voluntary and available to all Users on a non-discriminatory basis; [13] and (iii) a User would only incur one charge for the particular co-location service described herein, regardless of whether the User connects only to the Exchange or to the Exchange and one or more of the Affiliate SROs.[14]

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

[13] As is currently the case, Users that receive co-location services from the Exchange will not receive any means of access to the Exchange's trading and execution systems that is separate from, or superior to, that of other Users. In this regard, all orders sent to the Exchange enter the Exchange's trading and execution systems through the same order gateway, regardless of whether the sender is co-located in the data center or not. In addition, co-located Users do not receive any market data or data service product that is not available to all Users, although Users that receive co-location services normally would expect reduced latencies in sending orders to, and receiving market data from, the Exchange.

[14] *See* SR–NYSEArca–2013–80, *supra* note 6 at 50459. The Affiliate SROs have also submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2018–32, SR–NYSEAmerican–2018–35, and SR–NYSENat–2018–15.

2. Statutory Basis

The Exchange believes that the proposed fee change is consistent with Section 6(b) of the Act,[15] in general, and furthers the objectives of Sections 6(b)(5) of the Act,[16] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed changes would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest because, by offering additional services, the Exchange would give each User additional options for addressing its access and connectivity needs, responding to User demand for access and connectivity options. Providing additional services would help each User tailor its data center operations to the requirements of its business operations by allowing it to select the form and latency of access and connectivity that best suits its needs.

The Exchange would provide Access and Connectivity as conveniences to Users. Use of Access or Connectivity would be completely voluntary. The Exchange is not aware of any impediment to third parties offering Access or Connectivity. The Exchange does not have visibility into whether third parties currently offer, or intend to offer, Users access to the Proposed Third Party Systems and connectivity to the Proposed Third Party Data Feeds. However, if one or more third parties presently offer, or in the future opt to offer, such access and connectivity to Users, a User may utilize the SFTI network, a third party telecommunication network, third party wireless network, a cross connect, or a combination thereof to access such services and products through a connection to an access center outside the data center (which could be a SFTI access center, a third-party access center, or both), another User, or a third party vendor.

The Exchange believes that the proposed changes would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest because, by offering Access and Connectivity to Users when available, the Exchange would give Users additional options for connectivity and access to new services as soon as they are available, responding to User demand for access and connectivity options.

The Exchange also believes that the proposed fee change is consistent with Section 6(b)(4) of the Act,[17] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the proposed fee changes are consistent with Section 6(b)(4) of the Act for multiple reasons. The Exchange operates in a highly competitive market in which exchanges offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Accordingly, fees charged for co-location services are constrained by the active competition for the order flow of, and other business from, such market participants. If a particular exchange charges excessive fees for co-location services, affected market participants will opt to terminate their co-location arrangements with that exchange, and adopt a possible range of alternative strategies, including placing their servers in a physically proximate location outside the exchange's data center (which could be a competing exchange), or pursuing strategies less dependent upon the lower exchange-to-participant latency associated with co-location. Accordingly, the exchange charging excessive fees would stand to lose not only co-location revenues but also the liquidity of the formerly co-located trading firms, which could have additional follow-on effects on the market share and revenue of the affected exchange.

The Exchange believes that the additional services and fees proposed herein would be equitably allocated and not unfairly discriminatory because, in addition to the services being completely voluntary, they would be

[15] 15 U.S.C. 78f(b).

[16] 15 U.S.C. 78f(b)(5).

[17] 15 U.S.C. 78f(b)(4).

available to all Users on an equal basis (*i.e.,* the same products and services would be available to all Users). All Users that voluntarily selected to receive Access or Connectivity would be charged the same amount for the same services. Users that opted to use Access or Connectivity would not receive access or connectivity that is not available to all Users, as all market participants that contracted with the relevant market or content provider would receive access or connectivity.

The Exchange believes that the proposed charges would be reasonable, equitably allocated and not unfairly discriminatory because the Exchange would offer the Access and Connectivity as conveniences to Users, but in order to do so must provide, maintain and operate the data center facility hardware and technology infrastructure. The Exchange must handle the installation, administration, monitoring, support and maintenance of such services, including by responding to any production issues. Since the inception of co-location, the Exchange has made numerous improvements to the network hardware and technology infrastructure and has established additional administrative controls. The Exchange has expanded the network infrastructure to keep pace with the increased number of services available to Users, including resilient and redundant feeds. In addition, in order to provide Access and Connectivity, the Exchange would maintain multiple connections to each Proposed Third Party Data Feed and Proposed Third Party System, allowing the Exchange to provide resilient and redundant connections; adapt to any changes made by the relevant third party; and cover any applicable fees charged by the relevant third party, such as port fees. In addition, Users would not be required to use any of their bandwidth for Access and Connectivity unless they wish to do so.

The Exchange believes the proposed fees for Access and Connectivity would be reasonable because they would allow the Exchange to defray or cover the costs associated with offering Users Access and Connectivity while providing Users the convenience of receiving such Access and Connectivity within co-location, helping them tailor their data center operations to the requirements of their business operations.

For the reasons above, the proposed changes would not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms and conditions established from time to time by the Exchange.

The Exchange also believes that the proposal to update the names of ISE, Bats and Cboe removes impediments to, and perfects the mechanisms of, a free and open market and a national market system. The Exchange does not propose to amend any fee related to connectivity to ISE or Cboe systems or access to ISE or Cboe data. The Exchange simply proposes to update its Fee Schedules to accurately reflect NASDAQ's acquisition of ISE and the business combination and name change of Bats and Cboe. Therefore, the Exchange believes the proposed rule change would avoid any potential investor confusion regarding the third parties to which the Exchange provides access and connectivity.

The Exchange believes that the non-substantive change to ensure the names in the table of Third Party Systems are in alphabetical order would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest because the amendment would clarify Exchange rules and make it easier for market participants to find Third Party Systems in the table. The Exchange believes that this proposed non-substantive change is reasonable because the change would have no impact on pricing or services offered. Rather, the change would alleviate possible market participant confusion by making it easier to find NASDAQ, ISE and Cboe in the table.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[18] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because all of the proposed services are completely voluntary.

The Exchange believes that providing Users with additional options for connectivity and access to new services would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because such proposed Access and Connectivity would satisfy User demand for access and connectivity options. The Exchange would provide Access and Connectivity as conveniences equally to all Users. The Exchange does not have visibility into whether third parties currently offer, or intend to offer, Users access to the Proposed Third Party Systems and connectivity to the Proposed Third Party Data Feeds, as third parties are not required to make that information public. However, if one or more third parties presently offer, or in the future opt to offer, such access and connectivity to Users, a User may utilize the SFTI network, a third party telecommunication network, third party wireless network, a cross connect, or a combination thereof to access such services and products through a connection to an access center outside the data center (which could be a SFTI access center, a third-party access center, or both), another User, or a third party vendor. Users that opt to use the proposed Access or Connectivity would not receive access or connectivity that is not available to all Users, as all market participants that contract with the content provider may receive access or connectivity. In this way, the proposed changes would enhance competition by helping Users tailor their Access and Connectivity to the needs of their business operations by allowing them to select the form and latency of access and connectivity that best suits their needs.

The Exchange operates in a highly competitive market in which exchanges offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Accordingly, fees charged for co-location services are constrained by the active competition for the order flow of, and other business from, such market participants. If a particular exchange charges excessive fees for co-location services, affected market participants will opt to terminate their co-location arrangements with that exchange, and adopt a possible range of alternative strategies, including placing their servers in a physically proximate location outside the exchange's data center (which could be a competing exchange), or pursuing strategies less dependent upon the lower exchange-to-participant latency associated with co-location. Accordingly, the exchange charging excessive fees would stand to lose not only co-location revenues but also the liquidity of the formerly co-located trading firms, which could have additional follow-on effects on the market share and revenue of the affected exchange. For the reasons described above, the Exchange believes that the

[18] 15 U.S.C. 78f(b)(8).

proposed rule change reflects this competitive environment.

The Exchange believes that the proposal to update the name of ISE to reflect its acquisition by NASDAQ and Bats and Cboe to reflect their business combination and name change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposal is ministerial in nature and is not designed to have any competitive impact. It simply seeks to update the Fee Schedules to accurately reference these markets in light of their recent name changes.

The Exchange believes that the proposed non-substantive change to ensure the names in the table of Third Party Systems are in alphabetical order would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because the change would have no impact on pricing or the services offered. Rather, the change would alleviate possible market participant confusion by making it easier to find Third Party Systems in the table.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [19] and Rule 19b–4(f)(6) thereunder.[20] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[21]

A proposed rule change filed under Rule 19b–4(f)(6) [22] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[23] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange represents that the proposed rule changes present no new or novel issues. According to the Exchange, waiver of the operative delay would allow Users to access the Proposed Third Party Systems and the Proposed Third Party Data Feeds without delay, which would assist Users in tailoring their data center operations to the requirements of their business operations. The Exchange also represents that the proposed changes to the Price List would provide Users with more complete information regarding their Access and Connectivity options. The Exchange further asserts that waiver of the operative delay would help avoid potential investor confusion by allowing the Exchange to immediately update the names of the exchanges noted above to reflect recent business combinations and name changes. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change operative upon filing.[24]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [25] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEARCA–2018–52 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEARCA–2018–52. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEARCA–2018–52 and should be submitted on or before August 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[26]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83707; File No. SR–NYSEAMER–2018–35]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Its NYSE American Equities Price List and the NYSE American Options Fee Schedule

July 25, 2018.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on July 13, 2018, NYSE American LLC (''Exchange'' or ''NYSE American'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its NYSE American Equities Price List (''Price List'') and the NYSE American Options Fee Schedule (''Fee Schedule'') related to colocation to provide Users with access to the systems, and connectivity to the data feeds, of various additional third parties. In addition, the Exchange proposes to amend its Price List and Fee Schedule to update the names of certain third parties to reflect their current names. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the co-location [4] services offered by the Exchange to provide Users [5] with access to the systems, and connectivity to the data feeds, of various additional third parties. In addition, the Exchange proposes to amend its Price List and Fee Schedule to update the names of certain third parties to reflect their current names. The Exchange proposes to make the corresponding amendments to the Exchange's Price List and Fee Schedule related to these co-location services to reflect these proposed changes.

As set forth in the Price List and Fee Schedule, the Exchange charges fees for connectivity to the execution systems of third party markets and other content service providers (''Third Party Systems''), and data feeds from third party markets and other content service providers (''Third Party Data Feeds'').[6] The lists of Third Party Systems and Third Party Data Feeds are set forth in the Price List and Fee Schedule.

The Exchange proposes to provide access to BM&F Bovespa, Canadian Securities Exchange (''CSE''), ITG TriAct MatchNow, NASDAQ Canada, Neo Aequitas, Omega, and OTC Markets Group as additional Third Party Systems (''Proposed Third Party Systems''). In addition, it proposes to provide connectivity to the same third parties' data feeds, with the exception of the OTC Markets Group [7] (''Proposed Third Party Data Feeds'').

BM&F Bovespa is a Brazilian national securities exchange. CSE and Neo Aequitas are Canadian national securities exchanges. NASDAQ Canada, also Canadian national securities exchange, operates three trading books for trading in Canadian securities: CXC, CXD, and CX2. ITG TriAct MatchNow and Omega are Canadian alternative markets that match customer orders in Canadian securities. OTC Markets Group operates trading platforms for over-the-counter securities.

The Exchange would provide access to the Proposed Third Party Systems (''Access''), and connectivity to the Proposed Third Party Data Feeds (''Connectivity''), as conveniences to Users. Use of Access or Connectivity would be completely voluntary. The Exchange is not aware of any impediment to third parties offering Access or Connectivity.

The Exchange does not have visibility into whether third parties currently offer, or intend to offer, Users access to the Proposed Third Party Systems and connectivity to the Proposed Third Party Data Feeds, as such third parties are not required to make that information public. However, if one or more third parties presently offer, or in the future opt to offer, such Access and Connectivity to Users, a User may utilize the Secure Financial Transaction Infrastructure (''SFTI'') network, a third party telecommunication network, third party wireless network, a cross connect, or a combination thereof to access such services and products through a connection to an access center outside the data center (which could be a SFTI access center, a third-party access center, or both), another User, or a third party vendor.

Access to the Proposed Third Party Systems

The Exchange proposes to revise the Price List and Fee Schedule to provide that Users may obtain connectivity to the Proposed Third Party Systems for a fee. As with the current Third Party Systems, Users would connect to the Proposed Third Party Systems over the internet protocol (''IP'') network, a local area network available in the data center.[8]

[4] The Exchange initially filed rule changes relating to its co-location services with the Commission in 2010. See Securities Exchange Act Release No. 62961 (September 21, 2010), 75 FR 59299 (September 27, 2010) (SR–NYSEAmex–2010–80) (the ''Original Co-location Filing''). The Exchange operates a data center in Mahwah, New Jersey (the ''data center'') from which it provides co-location services to Users.

[5] For purposes of the Exchange's co-location services, a ''User'' means any market participant that requests to receive co-location services directly from the Exchange. *See* Securities Exchange Act Release No. 76009 (September 29, 2015), 80 FR 60213 (October 5, 2015) (SR–NYSEMKT–2015–67). As specified in the Price List and Fee Schedule, a User that incurs co-location fees for a particular co-location service pursuant thereto would not be subject to co-location fees for the same co-location service charged by the Exchange's affiliates New York Stock Exchange LLC (''NYSE LLC''), NYSE Arca, Inc. (''NYSE Arca'') and NYSE National, Inc. (''NYSE National'' and, together, the ''Affiliate SROs''). *See* Securities Exchange Act Release No. 70176 (August 13, 2013), 78 FR 50471 (August 19, 2013) (SR–NYSEMKT–2013–67).

[6] *See* Securities Exchange Act Release No. 80309 (March 24, 2017), 82 FR 15725 (March 30, 2017) (SR–NYSEMKT–2016–63).

[7] The Exchange currently provides connectivity to the OTC Markets Group data feed as a Third Party Data Feed.

[8] *See* Securities Exchange Act Release No. 74220 (February 6, 2015), 80 FR 7894 (February 12, 2015) (SR–NYSEMKT–2015–08) (notice of filing and immediate effectiveness of proposed rule change to include IP network connections).

As with the current Third Party Systems, in order to obtain access to a Proposed Third Party System, the User would enter into an agreement with the relevant Proposed Third Party, pursuant to which the third party content service provider would charge the User for access to the Proposed Third Party System. The Exchange would then establish a unicast connection between the User and the Proposed Third Party System over the IP network.[9] The Exchange would charge the User for the connectivity to the Proposed Third Party System. A User would only receive, and only be charged for, access to the Proposed Third Party System for which it enters into agreements with the third party content service provider.

The Exchange has no ownership interest in any of the Proposed Third Party Systems. Establishing a User's access to a Proposed Third Party System would not give the Exchange any right to use the Proposed Third Party System. Connectivity to a Proposed Third Party System would not provide access or order entry to the Exchange's execution system, and a User's connection to the Proposed Third Party System would not be through the Exchange's execution system.

As with the existing connections to Third Party Systems, the Exchange proposes to charge a monthly recurring fee for connectivity to the Proposed Third Party Systems. Specifically, when a User requests access to a Proposed Third Party System, it would identify the applicable content service provider and what bandwidth connection it required.

The Exchange proposes to modify its Price List and Fee Schedule to add the Proposed Third Party Systems to its existing list of Third Party Systems. The Exchange does not propose to change the monthly recurring fee the Exchange charges Users for unicast connectivity to each Third Party System, including the Proposed Third Party Systems.

Connectivity to the Proposed Third Party Data Feeds

The Exchange proposes to revise the Price List and Fee Schedule to provide that Users may obtain connectivity to the Proposed Third Party Data Feeds for a fee. The Exchange would receive a Proposed Third Party Data Feed from the content service provider at the Exchange's data center. The Exchange would then provide connectivity to that data to Users for a fee. Users would connect to the Proposed Third Party Data Feeds over the IP network.[10] The Proposed Third Party Data Feeds would include trading information concerning the securities that are traded on the relevant Proposed Third Party Systems.

In order to connect to a Proposed Third Party Data Feed, a User would enter into a contract with the content service provider, pursuant to which the content service provider would charge the User for the data feed. The Exchange would receive the Proposed Third Party Data Feed over its fiber optic network and, after the content service provider and User entered into the contract and the Exchange received authorization from the content service provider, the Exchange would re-transmit the data to the User over the User's port. The Exchange would charge the User for the connectivity to the Proposed Third Party Data Feed. A User would only receive, and would only be charged for, connectivity to a Proposed Third Party Data Feed for which it entered into a contract.

The Exchange has no affiliation with the sellers of the Proposed Third Party Data Feeds. It would have no right to use the Proposed Third Party Data Feeds other than as a redistributor of the data. The Proposed Third Party Data Feeds would not provide access or order entry to the Exchange's execution system. The Proposed Third Party Data Feeds would not provide access or order entry to the execution systems of the third parties generating the feeds. The Exchange would receive the Proposed Third Party Data Feeds via arms-length agreements and it would have no inherent advantage over any other distributor of such data.

As it does with the existing Third Party Data Feeds, the Exchange proposes to charge a monthly recurring fee for connectivity to the Proposed Third Party Data Feeds. Depending on its needs and bandwidth, a User may opt to receive all or some of the feeds or services included in the Proposed Third Parties' Data Feeds.

The Exchange proposes to add the following fees for connectivity to the Proposed Third Party Data Feeds to its existing list in the Price List and Fee Schedule: (i) A $3,000 per month fee for BM&F Bovespa; (ii) a $1,500 per month fee for NASDAQ Canada; (iii) a $1,200 fee for Neo Aequitas; and (iv) a $1,000 per month fee for each of the CSE, ITG TriAct MatchNow and Omega.

Name Changes

The Exchange proposes to update references to the International Securities Exchange, LLC (''ISE'') to reflect its acquisition by NASDAQ, Inc. (''NASDAQ'').[11] The Exchange also proposes to update references to Bats and Chicago Board Options Exchange (''Cboe'') to reflect their business combination and name changes.[12] In the sections entitled, ''Connectivity to Third Party Systems'' and ''Connectivity to Third Party Data Feeds'', the Exchange proposes to replace references to ''International Securities Exchange (ISE)'' with ''NASDAQ ISE''. The Exchange also proposes to delete a reference to ''BATS'' and replace it with ''Cboe BYX Exchange (CboeBYX), Cboe BZX Exchange (CboeBZX), Cboe EDGA Exchange (CboeEDGA), and Cboe EDGX Exchange (CboeEDGX)'' and to replace references to ''Chicago Board Options Exchange (CBOE)'' with ''Cboe Exchange (Cboe) and Cboe C2 Exchange (C2)''. In each case, the names would be updated to their current names, clearly delineating the third parties to which the Exchange provides connectivity and access.

In a non-substantive change, the Exchange proposes to reorganize the table of Third Party Systems to ensure it remains alphabetical in light of the proposed name changes. The Exchange does not propose to amend any fee related to connectivity to ISE or Cboe systems or access to ISE or Cboe data.

General

As is the case with all Exchange co-location arrangements, (i) neither a User nor any of the User's customers would be permitted to submit orders directly to the Exchange unless such User or customer is a member organization, a Sponsored Participant or an agent thereof (*e.g.,* a service bureau providing order entry services); (ii) use of the co-location services proposed herein would

[9] Information flows over existing network connections in two formats: ''unicast'' format, which is a format that allows one-to-one communication, similar to a phone line, in which information is sent to and from the Exchange; and ''multicast'' format, which is a format in which information is sent one-way from the Exchange to multiple recipients at once, like a radio broadcast.

[10] *See supra* note 8, at 7894 (''The IP network also provides Users with access to away market data products'').

[11] *See* Securities Exchange Act Release No. 78119 (June 27, 2016), 81 FR 41611 (SR–ISE2016–11; SR–ISE Gemini-2016–05; SR–ISE Mercury-2016–10) (Order Granting Accelerated Approval of Proposed Rule Changes, Each as Modified by Amendment No. 1 Thereto, Relating to a Corporate Transaction in Which Nasdaq, Inc. Will Become the Indirect Parent of ISE, ISE Gemini, and ISE Mercury). *See also* Securities Exchange Act Release No. 80325 (March 29, 2017), 82 FR 16445 (April 4, 2017) (Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Rename the Exchange as Nasdaq ISE, LLC).

[12] *See, e.g.,* Securities Exchange Act Release No. 81981 (October 30, 2017), 82 FR 51309 (November 3, 2017) (SR–CBOE–2017–066); and 81962 (October 26, 2017), 82 FR 50711 (November 1, 2017) (SR–BatsBZX–2017–70).

be completely voluntary and available to all Users on a non-discriminatory basis;[13] and (iii) a User would only incur one charge for the particular co-location service described herein, regardless of whether the User connects only to the Exchange or to the Exchange and one or more of the Affiliate SROs.[14]

The proposed change is not otherwise intended to address any other issues relating to co-location services and/or related fees, and the Exchange is not aware of any problems that Users would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed fee change is consistent with Section 6(b) of the Act,[15] in general, and furthers the objectives of Sections 6(b)(5) of the Act,[16] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed changes would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest because, by offering additional services, the Exchange would give each User additional options for addressing its access and connectivity needs, responding to User demand for access and connectivity options. Providing additional services would help each User tailor its data center operations to the requirements of its business operations by allowing it to select the form and latency of access and connectivity that best suits its needs.

The Exchange would provide Access and Connectivity as conveniences to Users. Use of Access or Connectivity would be completely voluntary. The Exchange is not aware of any impediment to third parties offering Access or Connectivity. The Exchange does not have visibility into whether third parties currently offer, or intend to offer, Users access to the Proposed Third Party Systems and connectivity to the Proposed Third Party Data Feeds. However, if one or more third parties presently offer, or in the future opt to offer, such access and connectivity to Users, a User may utilize the SFTI network, a third party telecommunication network, third party wireless network, a cross connect, or a combination thereof to access such services and products through a connection to an access center outside the data center (which could be a SFTI access center, a third-party access center, or both), another User, or a third party vendor.

The Exchange believes that the proposed changes would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest because, by offering Access and Connectivity to Users when available, the Exchange would give Users additional options for connectivity and access to new services as soon as they are available, responding to User demand for access and connectivity options.

The Exchange also believes that the proposed fee change is consistent with Section 6(b)(4) of the Act,[17] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the proposed fee changes are consistent with Section 6(b)(4) of the Act for multiple reasons. The Exchange operates in a highly competitive market in which exchanges offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Accordingly, fees charged for co-location services are constrained by the active competition for the order flow of, and other business from, such market participants. If a particular exchange charges excessive fees for co-location services, affected market participants will opt to terminate their co-location arrangements with that exchange, and adopt a possible range of alternative strategies, including placing their servers in a physically proximate location outside the exchange's data center (which could be a competing exchange), or pursuing strategies less dependent upon the lower exchange-to-participant latency associated with co-location. Accordingly, the exchange charging excessive fees would stand to lose not only co-location revenues but also the liquidity of the formerly co-located trading firms, which could have additional follow-on effects on the market share and revenue of the affected exchange.

The Exchange believes that the additional services and fees proposed herein would be equitably allocated and not unfairly discriminatory because, in addition to the services being completely voluntary, they would be available to all Users on an equal basis (*i.e.,* the same products and services would be available to all Users). All Users that voluntarily selected to receive Access or Connectivity would be charged the same amount for the same services. Users that opted to use Access or Connectivity would not receive access or connectivity that is not available to all Users, as all market participants that contracted with the relevant market or content provider would receive access or connectivity.

The Exchange believes that the proposed charges would be reasonable, equitably allocated and not unfairly discriminatory because the Exchange would offer the Access and Connectivity as conveniences to Users, but in order to do so must provide, maintain and operate the data center facility hardware and technology infrastructure. The Exchange must handle the installation, administration, monitoring, support and maintenance of such services, including by responding to any production issues. Since the inception of co-location, the Exchange has made numerous improvements to the network hardware and technology infrastructure and has established additional administrative controls. The Exchange has expanded the network infrastructure to keep pace with the increased number of services available to Users, including resilient and redundant feeds. In addition, in order to provide Access and Connectivity, the Exchange would maintain multiple connections to each

[13] As is currently the case, Users that receive co-location services from the Exchange will not receive any means of access to the Exchange's trading and execution systems that is separate from, or superior to, that of other Users. In this regard, all orders sent to the Exchange enter the Exchange's trading and execution systems through the same order gateway, regardless of whether the sender is co-located in the data center or not. In addition, co-located Users do not receive any market data or data service product that is not available to all Users, although Users that receive co-location services normally would expect reduced latencies in sending orders to, and receiving market data from, the Exchange.

[14] *See* SR–NYSEMKT–2013–67, *supra* note 6 at 50471. The Affiliate SROs have also submitted substantially the same proposed rule change to propose the changes described herein. *See* SR–NYSE–2018–32, SR–NYSEArca–2018–52, and SR–NYSENat–2018–15.

[15] 15 U.S.C. 78f(b).

[16] 15 U.S.C. 78f(b)(5).

[17] 15 U.S.C. 78f(b)(4).

Proposed Third Party Data Feed and Proposed Third Party System, allowing the Exchange to provide resilient and redundant connections; adapt to any changes made by the relevant third party; and cover any applicable fees charged by the relevant third party, such as port fees. In addition, Users would not be required to use any of their bandwidth for Access and Connectivity unless they wish to do so.

The Exchange believes the proposed fees for Access and Connectivity would be reasonable because they would allow the Exchange to defray or cover the costs associated with offering Users Access and Connectivity while providing Users the convenience of receiving such Access and Connectivity within co-location, helping them tailor their data center operations to the requirements of their business operations.

For the reasons above, the proposed changes would not unfairly discriminate between or among market participants that are otherwise capable of satisfying any applicable co-location fees, requirements, terms and conditions established from time to time by the Exchange.

The Exchange also believes that the proposal to update the names of ISE, Bats and Cboe removes impediments to, and perfects the mechanisms of, a free and open market and a national market system. The Exchange does not propose to amend any fee related to connectivity to ISE or Cboe systems or access to ISE or Cboe data. The Exchange simply proposes to update its Price List and Fee Schedule to accurately reflect NASDAQ's acquisition of ISE and the business combination and name change of Bats and Cboe. Therefore, the Exchange believes the proposed rule change would avoid any potential investor confusion regarding the third parties to which the Exchange provides access and connectivity.

The Exchange believes that the non-substantive change to ensure the names in the table of Third Party Systems are in alphabetical order would remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, protect investors and the public interest because the amendment would clarify Exchange rules and make it easier for market participants to find Third Party Systems in the table. The Exchange believes that this proposed non-substantive change is reasonable because the change would have no impact on pricing or services offered. Rather, the change would alleviate possible market participant confusion by making it easier to find NASDAQ, ISE and Cboe in the table.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[18] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because all of the proposed services are completely voluntary.

The Exchange believes that providing Users with additional options for connectivity and access to new services would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because such proposed Access and Connectivity would satisfy User demand for access and connectivity options. The Exchange would provide Access and Connectivity as conveniences equally to all Users. The Exchange does not have visibility into whether third parties currently offer, or intend to offer, Users access to the Proposed Third Party Systems and connectivity to the Proposed Third Party Data Feeds, as third parties are not required to make that information public. However, if one or more third parties presently offer, or in the future opt to offer, such access and connectivity to Users, a User may utilize the SFTI network, a third party telecommunication network, third party wireless network, a cross connect, or a combination thereof to access such services and products through a connection to an access center outside the data center (which could be a SFTI access center, a third-party access center, or both), another User, or a third party vendor. Users that opt to use the proposed Access or Connectivity would not receive access or connectivity that is not available to all Users, as all market participants that contract with the content provider may receive access or connectivity. In this way, the proposed changes would enhance competition by helping Users tailor their Access and Connectivity to the needs of their business operations by allowing them to select the form and latency of access and connectivity that best suits their needs.

The Exchange operates in a highly competitive market in which exchanges offer co-location services as a means to facilitate the trading and other market activities of those market participants who believe that co-location enhances the efficiency of their operations. Accordingly, fees charged for co-location services are constrained by the active competition for the order flow of, and other business from, such market participants. If a particular exchange charges excessive fees for co-location services, affected market participants will opt to terminate their co-location arrangements with that exchange, and adopt a possible range of alternative strategies, including placing their servers in a physically proximate location outside the exchange's data center (which could be a competing exchange), or pursuing strategies less dependent upon the lower exchange-to-participant latency associated with co-location. Accordingly, the exchange charging excessive fees would stand to lose not only co-location revenues but also the liquidity of the formerly co-located trading firms, which could have additional follow-on effects on the market share and revenue of the affected exchange. For the reasons described above, the Exchange believes that the proposed rule change reflects this competitive environment.

The Exchange believes that the proposal to update the name of ISE to reflect its acquisition by NASDAQ and Bats and Cboe to reflect their business combination and name change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposal is ministerial in nature and is not designed to have any competitive impact. It simply seeks to update the Price List and Fee Schedule to accurately reference these markets in light of their recent name changes.

The Exchange believes that the proposed non-substantive change to ensure the names in the table of Third Party Systems are in alphabetical order would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act because the change would have no impact on pricing or the services offered. Rather, the change would alleviate possible market participant confusion by making it easier to find Third Party Systems in the table.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

[18] 15 U.S.C. 78f(b)(8).

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [19] and Rule 19b–4(f)(6) thereunder.[20] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.[21]

A proposed rule change filed under Rule 19b–4(f)(6) [22] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[23] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange requests that the Commission waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange represents that the proposed rule changes present no new or novel issues. According to the Exchange, waiver of the operative delay would allow Users to access the Proposed Third Party Systems and the Proposed Third Party Data Feeds without delay, which would assist Users in tailoring their data center operations to the requirements of their business operations. The Exchange also represents that the proposed changes to the Price List would provide Users with more complete information regarding their Access and Connectivity options. The Exchange further asserts that waiver of the operative delay would help avoid potential investor confusion by allowing the Exchange to immediately update the names of the exchanges noted above to reflect recent business combinations and name changes. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change operative upon filing.[24]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [25] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2018–35 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2018–35. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2018–35 and should be submitted on or before August 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[26]

Eduardo A. Aleman,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83702; File No. SR–NASDAQ–2018–057]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Fees and Credits Under Rule 7018(a)

July 25, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 12, 2018, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's transaction fees at Rule 7018(a) to amend qualification criteria for a credit tier applicable to securities of all three Tapes, and to reduce the

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

charge assessed members applicable to DOT and LIST Orders in Tape A securities, as described further below.[3]

The text of the proposed rule change is available on the Exchange's website at *http://nasdaq.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend Rule 7018(a), concerning the fees and credits provided for the use of the order execution and routing services of the Nasdaq Market Center by members for all securities priced at $1 or more that it trades. Rule 7018(a)(1) sets forth the fees and credits for the execution and routing of orders in Nasdaq-listed securities (Tape C); Rule 7018(a)(2) sets forth the fees and credits for the execution and routing of securities listed on the New York Stock Exchange LLC (Tape A); and Rule 7018(a)(3) sets forth the fees and credits for the execution and routing of securities listed on exchanges other than Nasdaq and NYSE (Tape B).

The Exchange is proposing to amend the criteria required to qualify for credits provided to a member for displayed quotes/orders that provide liquidity, and to reduce a fee applicable to Tape A securities. Currently, under Rules 7018(a)(1)–(3) the Exchange provides credits to, and assesses fees on, members for execution of displayed quotes/orders (other than Supplemental Orders or Designated Retail Orders) if they qualify by meeting the requirements of the various credit and fee tiers under those rules. As described below, the Exchange is proposing to amend the Exchange's transaction fees at Rule 7018(a)(1)–(3) to amend qualification criteria for a credit tier applicable to securities of all three Tapes, and to reduce a fee under Rule 7018(a)(2) applicable to only Tape A securities, as described further below.

First Change

The Exchange is proposing to amend the criteria required to qualify for a $0.0030 per share executed credit, which will apply to securities of all three Tapes under Rules 7018(a)(1)–(3). Currently, the Exchange provides the credit if a member has shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 0.575% or more of Consolidated Volume[4] during the month, including shares of liquidity provided with respect to securities that are listed on exchanges other than Nasdaq or NYSE that represent 0.10% or more of Consolidated Volume. The Exchange is proposing to increase the level of shares of liquidity required to be provided in all securities through one or more of its [sic] Nasdaq Market Center MPIDs from 0.575% to 0.625% or more of Consolidated Volume during the month. The Exchange is also proposing to increase the required level of shares of liquidity provided from 0.10% to 0.15% or more of Consolidated Volume with respect to securities that are listed on exchanges other than Nasdaq or NYSE.

Second Change

The purpose of the second proposed change is to reduce the fee assessed for a DOT[5] or LIST[6] Order that executes in the NYSE opening or reopening process.[7] Currently, the Exchange assesses a $0.0015 per share executed charge on a DOT or LIST Order in a Tape A security that executes in the NYSE opening or reopening process. DOT is a routing option for Orders that the entering firm wishes to route to NYSE or NYSE American. LIST is a routing option that allows an Order to participate in the opening and/or closing process of the primary listing market for a security. The Exchange is proposing to reduce the fee assessed members for DOT or LIST Order in a Tape A security that executes in the NYSE opening or reopening process from $0.0015 to $0.0010 per share executed.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[8] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[9] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

First Change

The Exchange believes that changing the Consolidated Volume qualification criteria required to qualify for the $0.0030 per share executed credit under Rules 7018(a)(1)–(3) is reasonable. Nasdaq believes that the changes to the volume thresholds are reasonable because the increased volume thresholds are more closely aligned to the corresponding credit than the current volume thresholds. This increase is also reflective of the Exchange's desire to provide incentives to attract order flow to the Exchange in return for significant market-improving behavior. By modestly increasing both the requirement that members add liquidity in all securities through one or more of its [sic] Nasdaq Market Center MPIDs from 0.575% to 0.625%, or more, of Consolidated Volume, and the requirement that the member provide shares of liquidity with respect to securities that are listed on exchanges other than Nasdaq or NYSE from 0.10% to 0.15%, or more, of Consolidated Volume, the Exchange is increasing the volume of liquidity that a member must add during the month in order to qualify for the corresponding credit. This change will help ensure that members are providing significant market-improving behavior in return for credits.

The Exchange believes that the increase in the Consolidated Volume thresholds needed to qualify for the $0.0030 per share executed credit under Rules 7018(a)(1)–(3) is an equitable allocation and is not unfairly discriminatory because the Exchange will apply the same credit to all

[3] Tape C securities are those that are listed on the Exchange, Tape A securities are those that are listed on NYSE, and Tape B securities are those that are listed on exchanges other than Nasdaq or NYSE.

[4] Rule 7018(a) defines ''Consolidated Volume'' as the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member's trading activity.

[5] *See* Rule 4758(a)(i)–(ii).

[6] *See* Rule 4758(a)(x).

[7] The Exchange is also making a minor technical correction to the rule.

[8] 15 U.S.C. 78f(b).

[9] 15 U.S.C. 78f(b)(4) and (5).

similarly-situated members that meet its requirements. The credit and its corresponding volume requirements will apply equally to transactions in securities of all the Tapes. The Exchange believes that the new volume requirements will not significantly impact the number of members that will likely qualify for the corresponding credit, since the new volume thresholds are a modest increase over the current volume thresholds. Participation in the Exchange's various credit tiers is completely voluntary, and members may always elect to either qualify for the corresponding credit by adding sufficient liquidity to the Exchange to meet the new volume requirement, or by electing to qualify for a different credit. Finally, by modestly increasing the total volume of liquidity as well as the liquidity provided with respect to securities that are listed on exchanges other than Nasdaq or NYSE that a member must add during the month in order to qualify for the corresponding credit, the proposed change will help ensure that members are providing significant market-improving behavior in return for credits.

Second Change

The Exchange believes that reducing the fee assessed for a DOT or LIST Order in a Tape A security that executes in the NYSE opening or reopening process from $0.0015 to $0.0010 per share executed is reasonable. The Exchange notes that it currently assesses a charge of $0.00095 per share executed for the execution of a LIST Order in a Tape B security in the NYSEAmex closing process.[10] This fee decrease is reflective of the Exchange's desire to provide incentives to market participants to use the routing function of the Exchange. When routing Orders to non-Nasdaq exchanges such as NYSE, the Exchange incurs costly connectivity charges related to telecommunication lines, membership and access fees, and other related costs when routing orders. Although the Exchange may realize less overall fees from [sic] proposed fee decrease for DOT and LIST Orders that execute in the NYSE opening or reopening processes, the Exchange believes that it will continue to be able to recover the costs it incurs to route such Orders to NYSE.

The Exchange believes that reducing the fee assessed for a DOT or LIST Order that executes in the NYSE opening or reopening process is an equitable allocation and is not unfairly discriminatory because the Exchange will apply the same fee to all similarly situated members that meet its requirements. The proposed fee is only available to Tape A securities because DOT and LIST Orders include Tape A securities, whereas the Exchange's fee tiers for routing and execution of Tape C and B securities are covered under Rules 7018(a)(1) and (3), respectively. These rules provide the fees assessed for execution of Tape C and B securities on the primary listing exchange, which have previously been found to be equitably allocated.[11] Moreover, the fee is more closely aligned with the fee that the Exchange assesses for the execution of LIST Orders in Tape B securities that execute in the NYSEAmex closing process. The Exchange believes that the lower fee may attract more Orders in Tape A securities to the Exchange and promote the use of the Exchange's routing functionality, while also providing all members with reduced fees for the execution of their DOT and LIST Orders. Last, the Exchange notes that participation in the Exchange's various fee and credit tiers is completely voluntary, and members may always elect to enter Orders in Tape A securities that they wish to execute on NYSE either directly or through intermediaries.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

In this instance, the proposed rule change does not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition both from other exchanges and from off-exchange venues. With respect to the first proposed change, the Exchange will apply the same volume thresholds to all members for transactions in the securities of all three of the Tapes. As noted, participation in the Exchange's various credit tiers is completely voluntary, and the Exchange does not believe that the new Consolidated Volume thresholds will significantly impact the number of members that will likely qualify for the corresponding credit. Members may always elect to either qualify for the new Consolidated Volume thresholds by adding sufficient liquidity to the Exchange to meet the new volume requirement, or by electing to qualify for a different credit. As such, the Exchange believes that the proposed Consolidated Volume thresholds will not negatively impact who will qualify for the corresponding credits, but will rather have a positive impact on overall market quality as members increase their participation in the market to qualify for the particular credit. With respect to the second proposed change, the Exchange does not believe that the reduction in the fee assessed for execution of DOT and LIST Orders in Tape A securities burdens competition, but it rather promotes competition by making the Exchange a more attractive venue to enter such Orders. If, however, the Exchange is incorrect and the changes proposed herein are unattractive to members, it is likely that Nasdaq will lose market share as a result. Accordingly, Nasdaq does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[12]

At any time within 60 days of the filing of the proposed rule change, the

[10] *See* Rule 7018(a)(3).

[11] The Commission notes that these fees were filed effective on filing pursuant to Section 19(b)(3)(A) of the Act and thus the Commission made no findings regarding the fees.

[12] 15 U.S.C. 78s(b)(3)(A)(ii).

Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2018–057 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2018–057. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2018–057, and should be submitted on or before August 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[13]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83703; File No. SR–ISE–2018–59]

Self-Regulatory Organizations; Nasdaq ISE, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Align Existing Investigatory and Disciplinary Processes and Related Rules With the Investigatory and Disciplinary Processes and Associated Rules of Nasdaq BX, Inc.

July 25, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 12, 2018, Nasdaq ISE, LLC (''ISE'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to align its existing investigatory and disciplinary processes and related rules with the investigatory and disciplinary processes and associated rules of Nasdaq BX, Inc. (''BX'').

The text of the proposed rule change is available on the Exchange's website at *http://ise.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to eliminate its existing processes for: (1) Summarily suspending and limiting or prohibiting access to Exchange services by Exchange members (''Members''), persons associated with such Members (''Associated Persons''), (2) investigating and disciplining Exchange Members and Associated Persons, and (3) adjudicating actions brought by persons economically aggrieved by certain Exchange actions. The Exchange also seeks to eliminate Chapters 15, 16, and 17[3] of the Exchange's Rules (with certain exceptions, discussed below), which set forth and govern such processes, respectively, and it proposes to eliminate the Exchange's Business Conduct Committee (''BCC''), which is a body that exists to help to enforce the Exchange's Rules. The Exchange further proposes to adopt, in place of the aforementioned Rules, the investigatory, disciplinary, and adjudicatory processes of the Exchange's sister exchange, BX. It also proposes to replace the BCC with an Exchange Review Council that is similar to one that BX has in place. Specifically, the Exchange proposes to establish new Chapters 80 and 90 of its Rules[4] and incorporate by reference into those Chapters (again with certain exceptions, described below) the BX

[13] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] As discussed below, the Exchange proposes to replace Chapter 17, which sets forth processes for persons aggrieved by Exchange actions, including adverse membership or association determinations, by adding to Exchange Rules 302 and 307 provisions adapted from BX Rules 1015 and 1016, which provide for similar adjudicative processes. Portions of proposed Chapter 90 also replace portions of Chapter 17, *e.g.,* statutory disqualification in the 9520 Series.

[4] The Exchange proposes to add Chapters 23–79 and Chapters 81–89 to its Rules, but reserve such Chapters for future use.

Rule 8000 and 9000 Series,[5] which set forth and govern the BX investigatory, disciplinary, and adjudicative processes.[6] The proposed changes, when coupled with certain changes to the Exchange's other Rules, including Rules that govern appeals of the Exchange's membership and other decisions, will render the Exchange's investigative, disciplinary, and adjudicatory processes substantially the same as those, not only of BX, but also of other Nasdaq, Inc. family of [sic] exchanges (the ''Nasdaq, Inc. Exchanges'').[7] The proposal [sic] change will also further harmonize the work that the Financial Industry Regulatory Authority (''FINRA'') conducts for all these exchanges.

Overview of the Exchange's Existing Investigatory, Disciplinary, and Adjudicatory Processes and Rules

The existing processes for investigating and disciplining Exchange Members[8] and Associated Persons,[9] for taking summary action against them, and for adjudicating Exchange actions that aggrieve them, are set forth in Existing Chapters 15–17 of the Exchange's Rulebook.

With respect to investigations, Existing Rule 1602 authorizes the Exchange's regulatory staff (hereinafter described in this filing, for consistency with the BX rules, as ''Regulation Department'' or ''Exchange Regulation Department'')[10] to investigate Members and Associated Persons based on information it receives from a variety of sources, such as surveillance reviews, examinations, industry notifications, third party complaints, and referrals.[11] Alternatively, the Rule provides that the Exchange may, and it typically does, refer such investigatory matters to FINRA.

FINRA performs, among other things, investigatory and prosecutorial work for the Exchange pursuant to a Regulatory Services Agreement between the two parties (the ''RSA'').[12] Under the RSA, FINRA is responsible[13] for the investigation of potential violations of the Exchange Rules and the Act, and for the prosecution of any such violations thereof, by Exchange Members and Associated Persons.[14] Upon completion of an investigation, FINRA analyzes the evidence and applicable law, and makes preliminary determinations, known as ''Sufficiency of Evidence'' reviews, as to whether or not violations have occurred.[15] The Sufficiency of Evidence review determines the nature of FINRA's recommendation to the Exchange's Chief Regulatory Officer (''CRO'') as to whether and how to proceed further with matters. If probable cause exists that a Member or Associated Person has violated the Exchange Rules or the Act, then the Regulation Department may file charges against the Member or Associated Person for adjudication before a Current Hearing Panel.[16] A Current Hearing Panel consists of a professional hearing officer and two members of the Exchange's BCC.

Currently, the BCC is charged with enforcing the Rules of the Exchange with respect to Members and Associated Persons. The BCC is a committee, established by the Board,[17] whose enforcement jurisdiction includes the following: (1) Ordering investigations of possible Rule violations; (2) considering letters of consent in expedited disciplinary actions; (3) making its members available to serve on Current Hearing Panels that adjudicate formal disciplinary proceedings; (4) imposing sanctions on Members or Associated Persons in disciplinary proceedings (''Respondents''); (5) reviewing Exchange actions involving minor rule violations; (6) appointing panels to conduct hearings and reviews of Exchange actions that deny membership or Member association privileges; and (7) generally overseeing all matters relating to the conduct of disciplinary hearings and hearings for review of Exchange decisions, and providing the Exchange with advice for improving disciplinary procedures.[18]

The Existing Rules provide several means by which the Exchange may pursue disciplinary actions.

First, Existing Rule 1603 permits informal disposition of disciplinary matters through ''letters of consent.'' The Existing Rule states that disciplinary matters are disposable in this manner if: (1) The Parties agree to the terms of such a letter, including any sanctions imposed therein; (2) the CRO approves of the draft letter; and (3) the BCC subsequently approves of the draft letter. If the Parties to the letter cannot reach agreement to [sic] its terms, or if the CRO or BCC reject [sic] it, then the disciplinary matter proceeds through formal channels.

Second, Existing Rules 1604–1613 provide for formal adjudication of disciplinary matters. These Existing Rules state that, whenever probable cause exists for finding that a Member or Associated Person has committed a violation within the disciplinary jurisdiction of the Exchange, regulatory staff may prepare a ''statement of charges,'' subject to the approval of the CRO. The Existing Rules further provide for Current Hearing Panels to adjudicate disciplinary matters. Current Hearing Panels are composed of a professional hearing officer, who serves as the Current Hearing Panel Chair, and two members of the BCC. The Existing Rules provide for the Parties to a disciplinary proceeding to receive at least 28 calendar days' notice prior to the occurrence of a hearing. They also provide for a pre-hearing conference to

[5] Citation herein to rules of the proposed Chapters 80 and 90 will be preceded by the term ''BX Rule'' to reflect incorporation of the BX Rule 8000 and 9000 Series. References to current rules will be preceded by the term ''Existing Rule.''

[6] The Exchange proposes to separately request an exemption from the rule filing requirements of Section 19(b) of the Act for changes to Chapters 80 and 90 to the extent such rules are effected solely by virtue of a change to the BX Rule 8000 and 9000 Series.

[7] The Exchange notes that the BX Rule 8000 and 9000 Series are substantially similar to corresponding rules of The Nasdaq Stock Market, LLC (''Nasdaq'') and Nasdaq PHLX, LLC (''Phlx''). Moreover, the Exchange notes that Nasdaq MRX, LLC and Nasdaq GEMX, LLC will propose similar changes to their respective investigatory and disciplinary processes and associated rules that will render them substantially similar to those of BX.

[8] As defined in Existing Rule 100(a)(30).

[9] As defined in Existing Rule 100(a)(4).

[10] The Exchange notes that the scope of its Regulation Department is the same as that of the BX Regulation Department.

[11] Existing Rule 1601 obligates each Member and Associated person to comply with investigatory requests by the Exchange (or FINRA, acting on its behalf) for testimony, or for written information or documentary materials.

[12] *See* RSA, dated June 10, 2013, as amended. The Exchange retains ultimate legal responsibility for the regulation of its Members, persons associated with its Members, and its market. *See* Existing Rule 1615 and its Supplementary Material.

[13] Although Existing Rule 1615 and its Supplementary Material authorizes the Exchange to contract with FINRA or another self-regulatory organization (''SRO'') to perform its disciplinary functions, the Existing Rule states that the Exchange retains ultimately legal responsibility for and control over such functions.

[14] Under the RSA, ISE's Regulation Department may elect to exercise jurisdiction over a matter involving an ISE Member or an Associated Person, performing the investigation and any resulting prosecutorial work without FINRA's involvement.

[15] *See* FINRA Regulatory Notice 09–17 (March 2009) (available at *http://www.finra.org/sites/default/files/NoticeDocument/p118171.pdf*).

[16] Both the Existing Rules and the BX Rules refer to their respective disciplinary adjudication panels as ''Hearing Panels.'' In the discussion that follows, the Exchange distinguishes between these two types of panels, which differ from one another substantively, by referring to the type of panel that exists under the Existing Rules as a ''Current Hearing Panel'' and the panel that the Exchange proposes to establish under the BX Rules as a ''New Hearing Panel.'' For purposes of the following discussion, the term New Hearing Panel shall also refer to an ''Extended Hearing Panel,'' as that term is defined in BX Rule 9120(l).

[17] *See* Resolution of the Board of Directors of the International Securities Exchange LLC Delegating Authority, dated May 11, 2000.

[18] *See* ISE Business Conduct Committee Charter, as amended, May 1, 2003.

expedite disciplinary proceedings by, among other things, seeking the Parties' agreement regarding undisputed facts. They permit non-Parties to proceedings to intervene, under certain circumstances, and they grant the Current Hearing Panel Chair broad discretion to determine the course of the proceedings, including with respect to timing, filing deadlines, if not specified in the Rules, and evidentiary matters. They generally prohibit interlocutory review of Current Hearing Panel decisions as well as *ex parte* communications among Members and Associated Persons and Panelists, the BCC, or the Board concerning the merits of a disciplinary matter. They require Current Hearing Panels to issue their decisions by majority vote and in writing.

Existing Rule 1608 permits Current Hearing Panels to engage in summary disciplinary proceedings, meaning that they may reach decisions and impose penalties without holding hearings as to violations that Respondents admit, do not dispute, or fail to answer. The Rule provides, in such instances, that Respondents have 10 calendar days following service of such summary decisions to request hearings as to matters not previously admitted or to contest the penalties imposed.

Existing Rule 1609 sets forth procedures for settlements of disciplinary matters. The Rule generally provides that a Party may submit up to two written ''offers of settlement'' at any time period prior to 120 calendar days following service of the statement of charges. Settlements must be approved by the Current Hearing Panel (or the CRO if a Current Hearing Panel has yet to be appointed).

Pursuant to Existing Rule 1610, Respondents may appeal Current Hearing Panel decisions to the Board. The Rule also permits the Board to review Current Hearing Panel decisions upon its own initiative within 30 calendar days after service of such decisions. The Rule permits the Board to delegate responsibility for its review to a committee composed of at least three of its Directors whose decision must be ratified by the Board. The Board may affirm, reverse, or modify decisions of Current Hearing Panels, and such Board decisions are final.

Third, Existing Rule 1614 provides for the disposition of certain minor disciplinary violations through the summary assessment of fines.[19] This Rule comprises violations of the Rules listed in Rule 1614(d) and that are set forth in the Exchange's Minor Rule Violation Plan (''MRVP'') approved by the Commission pursuant to SEC Rule 19d–1 (''MRVP violations'') as well as violations that are not included in the Exchange's MRVP but may be considered ''minor'' in nature (''minor rule violations'') and thus possibly resolved outside of the formal disciplinary process.[20] Existing Rule 1614(a) sets forth the Exchange's general authority to assess such fines in amounts no greater than $5,000 (up to $2,500 for MRVP violations, and up to $5,000 for minor rule violations). Existing Rule 1614(b) sets forth the notice requirements for service upon the Member or person against which the fine is to be levied (a ''Subject''). The Existing Rule requires the Exchange to serve notice upon the Subject, along with a written statement that describes the nature of the alleged violation and the basis for finding that the Subject committed the violation, the amount of the fine to be imposed for each violation, and a date, not less than 30 calendar days after service of the notice, by which such determination becomes final and such fine must be paid or contested.

Under Existing Rule 1614(c), a Subject may contest the fine by filing an answer to this written determination prior to the date when the fine is payable. Additionally, the Subject may request a hearing as part of the answer.[21] The Rule charges the BCC, or a subcommittee thereof, with adjudicating contested fines. The BCC may decide to overturn, affirm, or modify fines levied by the Exchange.[22] A Subject or the Exchange staff may appeal such determinations to the Board, and the Board may also call the matter for review on its own initiative.[23]

Existing Rule 1614(d) sets forth the list of violations and a corresponding schedule of fines that the Exchange may impose and disciplinary actions it may pursue for MRVP violations and minor rule violations.[24] They include the following:

- Violations of Rule 412 pertaining to position limits (with fines ranging from $500 for the first offense within any 24 month rolling period to $5,000 for the fourth and subsequent offenses within the same period);
- Violation of Rule 1403 for failing to file focus reports (with sanctions ranging from a $200 fine for delinquencies of up to 30 calendar days and formal disciplinary action for delinquencies of 90 or more calendar days);
- Failing to make timely responses to requests for trade data in violation of Rule 1404 (with sanctions for the first offense ranging from a $200 fine for delinquencies of up to 9 business days to formal disciplinary action for delinquencies of 30 or more business days, and sanctions for subsequent offenses ranging from a $500 fine for the second offense to formal disciplinary action beginning with the fifth offense);
- Violating Rule 717(d) and (e) regarding limits on orders entered by Electronic Access Members (with a letter of caution for the first five offenses within one calendar year, fines escalating from $500 to $2,000 for the sixth through the twentieth offenses within the same period, and formal disciplinary action thereafter);
- Violations of Rule 803 and 805(b)(1)(i) regarding pre- and post-opening quote spread parameters for market maker quotations (with a letter of caution for the first offense within any 24 month rolling period, fines escalating from $1,000 to $5,000 for the second through the fourth offenses within the same period, and formal disciplinary action thereafter);
- Violations of Rule 805, which requires market makers to execute in appointed options classes a minimum percentage of the total number of contracts executed during a quarter (with a letter of caution for the first offense within any 12 month rolling period, fines escalating from $500 to $2,500 for the second through the fourth offenses within the same period, and formal disciplinary action thereafter);
- Failure to conduct mandatory systems testing in violation of Rule 419 (with fines escalating from $250 to $2,000 for the first through the fourth offenses within one calendar year, and formal disciplinary action thereafter);
- Failure to timely submit information or instructions regarding the exercise or non-exercise of noncash-settled equity options in violation of Rule 1100 (with fines for member

[19] Generally, notice to the SEC of final disciplinary action by an SRO is required pursuant to Rule 19d–1 of the Act; however, uncontested fines of $2,500 or less assessed for violations of MRVP rules are subject to abbreviated periodic SEC reporting. None of the fines assessed in lieu of formal disciplinary action exceed $5,000.

[20] Determinations to issue a fine under Rule 1614 are made on a case-by-case basis, whereby the Exchange considers the individual facts and circumstances to determine whether a fine of more or less than the recommended amount is appropriate for the violation, or whether the violation requires formal disciplinary action.

[21] Existing Rule 1614(c).

[22] *See id.*

[23] *See id.*

[24] *See* n.20, *infra.*

organizations[25] escalating from $1,000 for the first offense within any 24 month rolling period to $5,000 for the third and subsequent offenses within the same period, and for individuals, from $500 for the first offense within any 24 month rolling period to $2,500 for the third and subsequent offenses within the same period);

• Failure to accurately report positions and account information in violation of Rule 415 (with fines escalating from $500 for the first offense within any 24 month rolling period to $5,000 for the fourth and subsequent offenses within the same period); and

• Failure of a market maker to enter continuous quotations for the option classes to which it is appointed in violation of Rule 804(e) (with fines ranging from a letter of caution for the first offense within any 24 month rolling period, to fines ranging from $1,000 to $5,000 for the second through fourth offenses within the same period, and formal disciplinary actions beginning with the fifth offense).[26]

As explained below, the Exchange proposes to retain but renumber Existing Rule 1614(d) insofar as the Exchange's MRVP and schedule of minor violations are unique to it. The Exchange cannot and does not seek to simply incorporate by reference the BX MRVP.

Existing Rule 1615 and its Supplementary Material authorizes the Exchange to contract with FINRA or another SRO to perform its disciplinary functions, but the Existing Rule states that the Exchange retains ultimately [sic] legal responsibility for and control over such functions.

Existing Rule 1616 authorizes and prescribes the process for adjudicating expedited client suspensions that may be imposed upon Members or Associated Persons that violate the prohibition in Existing Rule 403 on disruptive quoting and trading activity. Existing Rule 1616 states that the initiation of expedited suspension proceedings requires the prior written authorization of the CRO or his designees. It requires the Exchange to provide prior notice to the Respondent as well as to convene a Current Hearing Panel to adjudicate the matter. The Existing Rule provides that such hearings are to be administered generally in accordance with Existing Rule 1606. If a Respondent fails to appear at a hearing for which it receives proper notice, the Existing Rule states that the Current Hearing Panel may issue a suspension order without further proceedings, while the failure of the Exchange to appear may result in the dismissal of the suspension proceeding. Existing Rule 1616(d) requires a Current Hearing Panel to issue a written decision as to whether to order [sic] suspension not later than 10 days after receiving the hearing transcript. It further provides that a Panel may issue an order imposing suspension only if it finds, by a preponderance of the evidence, that the alleged violation specified in the notice occurred. At any time after a Respondent is served with a suspension order, a Party may apply to the Current Hearing Panel to modify, set aside, limit, or revoke the order, and the Current Hearing Panel must respond to the request within 10 days after receipt thereof, unless extended. Finally, Existing Rule 1616(f) provides for the right of a Respondent to seek Commission review of a suspension order.

Chapter 15 of the Existing Rules states that the Board, a committee thereof, or an Exchange Official designated by the Board may summarily suspend a Member or an Associated Person that has been expelled or suspended from any other SRO or has been barred or suspended from being associated with a member of another SRO, if the Board, a committee thereof, or a designated Exchange Official determines that their ongoing transaction of business on the Exchange would compromise the safety of investors, creditors, other Members of the Exchange, or the Exchange itself.[27] On the same grounds, the Board, a committee thereof, or a designated Exchange Official may summarily suspend a Member if it is experiencing operational or financial difficulties and cannot continue doing business as a member with safety to investors, creditors, other Members, or the Exchange.[28] Furthermore, the Board, committee, or Exchange Official may limit or prohibit any person's access to services offered by the Exchange for these same reasons or, as to a Member, they [sic] may take such actions if they [sic] determine that such Member does not meet the qualification requirements or other prerequisites for access with safety to investors, creditors, Members, or the Exchange.[29] Chapter 15 provides for the Exchange to notify the SEC upon imposing a summary suspension or when summarily limiting or prohibiting access to Exchange services.[30]

Chapter 15 provides that, following the imposition of a suspension or a limitation on or prohibition against accessing Exchange services, the Exchange will conduct an investigation of the affairs of the affected Member, Associated Person, or person.[31] A suspended, limited, or prohibited Member, Associated Person, or person must file with the Exchange a written statement covering all information that the Exchange may request in this regard, including a complete list of creditors and amounts owed to each as well as a complete list of positions in Exchange options contracts they [sic] maintain on their [sic] own behalf and that of their [sic] customers.[32]

Those subject to summary suspension or that are limited or prohibited with respect to access to Exchange services may petition for reinstatement within six months of their suspension, limitation, or prohibition, if they are suspended, limited, or prohibited due to operating difficulty, or within 30 days of suspension, limitation, or prohibition, if they are suspended, limited, or prohibited for reason of financial difficulty.[33] An applicant for reinstatement is afforded an opportunity for a hearing, in certain circumstances.[34] The Exchange may approve an application for reinstatement if it finds that the applicant is operationally and financially able to conduct their [sic] business with safety to investors, creditors, Members, and the Exchange.[35]

[25] The Exchange notes that it proposes to amend the term ''Member Organization'' so that it merely reads ''Member.'' These terms are synonymous.

[26] As explained below, the Exchange also proposes to retain Existing Rule 1600, which sets forth the general jurisdiction of the Exchange with respect to disciplinary matters. Existing Rule 1600 states that a Member or Associated Person who is alleged to have violated or aided and abetted a violation of the Act, the rules and regulations promulgated thereunder, and the By-Laws or Rules of the Exchange, or any interpretation thereof are subject to the disciplinary jurisdiction of the Exchange and may be, after notice and opportunity for a hearing, appropriately disciplined by expulsion, suspension, fine, censure, limitation or termination as to activities, functions, operations, or association with a Member, or any other fitting sanction in accordance with the provisions of the disciplinary rules. It also permits the Exchange to charge a supervisor with a violation of a rule within the disciplinary jurisdiction of the Exchange committed by an employee under his supervision or by the Member as though such violations were his own. Finally, it extends the disciplinary jurisdiction of the Exchange to continue after deregistration of the Member from the Exchange or a person's termination of association with a Member as to matters that occurred prior to such termination or deregistration. The Exchange must serve written notice to the former Member within one year of receipt by the Exchange of notice of such termination or deregistration that the Exchange is making inquiry into a matter or matters.

[27] *See* Existing Rule 1500.

[28] *See id.*

[29] *See id.*

[30] *See id.*

[31] *See* Existing Rule 1501.

[32] *See id.*

[33] *See* Existing Rule 1502.

[34] *See id.*

[35] *See id.*

The failure of a suspended, limited, or prohibited Member to obtain reinstatement will result in disposition of membership, unless the Member sells or leases their [sic] membership.[36] Finally, Existing Rule 1504 provides that a Member suspended under Chapter 15 shall be deprived for [sic] all of the rights and privileges of being a Member of the Exchange during the period of suspension.

Lastly, Chapter 17 of the Existing Rules sets forth a procedure by which persons who are economically aggrieved by Exchange actions, including but not limited to those organizations whose applications for membership are denied, persons who are prohibited from becoming associated with a Member, and organizations and persons that are prohibited or limited with respect to the use of Exchange services or the services of Members, may seek review of such actions.[37]

Existing Rule 1701 provides that aggrieved persons must file written applications for hearing and review within 30 days of the occurrence of relevant Exchange actions, unless the Chair of the BCC grants, in writing, an extension of time to file an appeal.

Existing Rule 1702 provides for the BCC, or a panel comprised of at least three members thereof, to review applications. The BCC, or the panel, must set a hearing date and receive materials relevant to the proceeding at least 72 hours in advance of the hearing.

Existing Rule 1703 provides for intervention in a hearing by a third party under certain circumstances. Current Rule 1703 also authorizes the panel to determine all questions concerning the admissibility of evidence and to otherwise regulate the conduct of hearings. Finally, Existing Rule 1703 directs panels to render their decisions in writing and to include in such decisions the Panel's reasons for their [sic] conclusions.

Existing Rule 1704 states that panel decisions are subject to review by the Board (or a committee composed of at least three Directors thereof), either upon the Board's own motion (within 30 days of issuance of the decision), upon written request of the President of the Exchange (within 15 days after issuance of the decision), or upon written request by the applicant. The Board has discretion to grant requests for written or oral arguments before it. The Board may affirm, reverse, or modify the decision of the panel. A decision of the Board is a final Exchange Action [sic].

Existing Rule 1705 governs the service of process for notices or other documents served pursuant to the proceedings set forth in Chapter 17 and the extension of time limits for the submission of answers, petitions, or other materials.

Existing Rule 1706 states that the Exchange may contract with another SRO to perform some or all of the functions specified in Chapter 17, provided that the Exchange shall retain ultimate legal responsibility for and control of such functions.

Overview of the Exchange Review Council and the BX Rule 8000 and 9000 Series

The Exchange proposes to amend its By-Laws to replace the BCC with a new ''Exchange Review Council.'' The Exchange also proposes, with limited exceptions described below, to delete in their entirety Chapters 15–17 of the Existing Rules, establish new Chapters 80 and 90 of the Exchange's Rulebook, and then incorporate by reference into Chapters 80 and 90 the BX Rule 8000 and 9000 Series, respectively. The principal purpose of these proposals is to harmonize the Exchange's disciplinary processes and Rules consistent with those of its sister exchanges, including not only BX, but also Nasdaq and Phlx.

Broadly speaking, the BX Rules and processes will be similar to the existing ones. Both provide processes for informal resolution and formal adjudication of disciplinary matters. Both set forth procedures that are designed to provide due process to Members and Associated Persons, including fair notice of allegations and proceedings, opportunities to be heard and to present and rebut arguments and evidence before hearing panels, and opportunities to appeal adverse determinations made by such panels.

However, in a number of respects, the new Rules and processes will differ from the existing ones. One key difference concerns the role that FINRA will play in the new regime. Not only will FINRA continue to assist the Exchange in investigating matters under the BX Rules, through FINRA's Department of Enforcement and Department of Market Regulation (collectively, the ''Departments'') [38] but it will also assist in the adjudication of matters. Specifically, the adjudicatory functions of the BCC and Current Hearing Panels will be administered by FINRA's Office of Disciplinary Affairs (''ODA'') and Office of Hearing Officers (''OHO''), respectively.[39] The ODA and OHO are offices within FINRA that are independent of the FINRA enforcement function and not involved in investigating or litigating cases. The ODA will review each proposed complaint to determine the legal and evidentiary sufficiency of proposed charges as well as proposed settlements, in certain instances.[40] A recommendation proposed by the Departments or the Exchange's Regulation Department in a matter involving formal disciplinary action will require approval by the ODA. Going forward, the ODA will authorize (pursuant to a request by the Exchange's Regulation Department or the Departments) the issuance of a complaint.[41] The OHO, in turn, will be responsible for convening and administering New Hearing Panels in lieu of the Exchange's Current Hearing Panels.

Another key difference involves the replacement of the BCC with the Exchange Review Council. The Exchange Review Council, as the successor to the BCC, will play a more limited role in disciplinary matters than does the BCC presently. As to disciplinary matters, the Exchange Review Council will not be responsible for approving the issuance of complaints (formerly, statements of charges) or routinely approving [42] letters of acceptance, waiver, and consent or offers of settlement. Instead, the

[36] *See* Existing Rule 1503.

[37] *See* Existing Rule 1700.

[38] The Departments are authorized to act on behalf of BX in investigating and administering disciplinary matters pursuant to the RSA, and will do the same for the Exchange upon adoption of the new process.

[39] *See* FINRA Rule 9211(a); *see also* BX Rule 9211(a). The Exchange notes, however, that the Board may direct the ODA to authorize a complaint when, on the basis of information and belief, it is of the opinion that a Member or Associated Person has committed a violation which the Exchange has jurisdiction to enforce. *See* BX Rule 9211(a)(2).

[40] Pursuant to BX Rule 9270, proposed settlements must be submitted to and accepted by the Exchange Review Council, except that proposed settlements involving an affiliate of the Exchange must be reviewed by the ODA. BX Rule 9216(a) provides that proposed letters of acceptance, waiver, and consent must be submitted to and accepted by either the ODA, the Review Subcommittee, or the Exchange Review Council.

[41] BX Rule 9211(a) also provides that the Board has authority to direct the issuance of a complaint.

[42] Under BX Rule 9216(a), the ODA or a Review Subcommittee of the Exchange Review Council may accept or refer letters of acceptance, waiver, and consent to the Exchange Review Council for approval or rejection. The Review Subcommittee can also reject such letters. Similarly, under BX Rule 9270, a Review Subcommittee of the Exchange Review Council may accept, reject, or refer offers of settlement to the Exchange Review Council for approval or rejection (except where the offer of settlement involves an affiliate of the Exchange, in which case the ODA must decide whether to accept or reject the offer). As a practical matter and based upon the experiences of Nasdaq and BX, the Exchange expects such referrals to the Exchange Review Council to occur infrequently.

Exchange Review Council will function principally as an intermediate appellate body for decisions rendered by the New Hearing Panels. As to non-disciplinary matters, the Exchange Review Council will assume regulatory responsibilities that currently rest with various panels, including reviews of staff determinations made as to obvious errors.

Other noteworthy differences between the Existing Rules and the BX Rules and processes include the following:

• The BX Rules generally include more comprehensive rights and detailed procedures for, among other things, discovery and service of process than do the Existing Rules.

• As to the assessment of fines for violations of the Exchange's MRVP or other minor rule violations, the BX Rules do not authorize the issuance of minor rule violation letters or the imposition of fines of more than $2,500.[43] Should a Respondent fail to consent to the imposition of a fine or if the Review Subcommittee or the Exchange Review Council reject [sic] the terms of an MRVP or minor rule violation letter, then the matter will proceed through formal disciplinary channels. The BX Rules do not allow for a fine to be reversed, modified or affirmed, prior to formal disciplinary proceedings.

The following is a more detailed overview of each of the Exchange's proposals.

Overview of the Exchange Review Council

The Exchange proposes to retire the BCC[44] and to amend its By-Laws to establish in its place an Exchange Review Council. The amended By-Laws that the Exchange proposes to adopt in this regard are substantially the same as those that BX adopted to establish the BX Exchange Review Council.[45] Thus, the By-Laws provide for the Exchange Review Council to have the same general structure and powers as does the BX Exchange Review Council.[46] The proposed By-Laws will authorize the Exchange Review Council to adjudicate disciplinary actions and approve settlements thereof as well as make recommendations to the Board on certain policy matters and rule changes. Such policy functions of the Exchange Review Council render its jurisdiction broader than that of the BCC.

Specifically, proposed Article VI, Section 1 of the proposed By-Laws provides that the Exchange Review Council may be authorized to act for the Board with respect to: an appeal or review of a disciplinary proceeding, a statutory disqualification proceeding, or a membership proceeding; a review of an offer of settlement, a letter of acceptance, waiver, and consent, and a minor rule violation plan letter; the exercise of exemptive authority; and such other proceedings or actions as may be authorized by the Exchange rules. The Exchange Review Council also may consider and make recommendations to the Board on policy and rule changes relating to business and sales practices of Exchange Members and Associated Persons and enforcement policies, including policies with respect to fines and other sanctions. It may advise the Board on regulatory proposals and industry initiatives relating to quotations, execution, trade reporting, and trading practices and it may advise the Board in its administration of programs and systems for the surveillance and enforcement of rules governing Exchange Members' conduct and trading activities in the Exchange.

Proposed Article VI, Section 2 states that the Exchange Review Council would consist of no fewer than eight and no more than 12 members. The Exchange Review Council must include a number of Member Representative members[47] that is equal to at least 20% of the total number of members of the Exchange Review Council. The number of Non-Industry members,[48] including at least three Public members,[49] shall equal or exceed the sum of the number of Industry members[50] and Member Representative members. As soon as practicable, following the appointment of members, the Exchange Review Council shall elect a Chair from among its members. The Chair shall have such powers and duties as may be determined from time to time by the Exchange Review Council. The Board, by resolution adopted by a majority of Directors then in office, may remove the Chair from such position at any time for refusal, failure, neglect, or inability to discharge the duties of Chair. No more than 50% of the members of the Exchange Review Council shall be engaged in market making activity or employed by an Exchange Member firm whose revenues from market making activity exceed 10 percent of its total revenues.

Proposed Article VI, Section 3 requires the Exchange's Secretary to collect from each nominee for the office of member of the Exchange Review Council such information as is reasonably necessary to serve as the basis for a determination of the nominee's qualifications and classification as an Industry, Member Representative, Non-Industry, or Public member. The Secretary must also certify to the Nominating Committee or the Member Nominating Committee[51] (as applicable) each nominee's qualifications and classification. After appointment to the Exchange Review Council, each member must update such information at least annually and upon request of the Exchange's Secretary, and must report immediately to the Secretary any change in such information.

Proposed Article VI, Section 4 provides that Exchange Review Council members shall serve three-year terms, or until a successor is duly appointed and qualified, except in the event of earlier

[43] As the Exchange discusses below, the Exchange proposes to retain certain of its Existing Rules to preserve its existing authorities with respect to minor rule violations, the issuance of minor rule violation letters, and the imposition of fines for such minor rule violations of up to $5,000.

[44] In a May 11, 2000 resolution, the Exchange Board delegated its authority to the President of the Exchange to establish a BCC to, among other things, conduct disciplinary hearings under Chapter 16 of the Existing Rules and conduct other hearings and reviews as set forth in Chapter 17 of the Existing Rules. On February 1, 2017, the Board passed a resolution that both revoked the President's authority to establish a BCC and authorized the establishment of an Exchange Review Council, effective upon the date when this rule filing becomes operative.

[45] The BX by-laws differ from the proposed Exchange By-Laws because the BX by-laws have a different numbering convention from the Exchange's By-Laws and, in various places, the BX by-laws refer to a Listing and Hearing Review Council, which has no analogue with respect to the Exchange.

[46] The BX by-laws do not describe in detail the process of the proceedings over which the BX Exchange Review Council presides. However, Section 7.9 of the BX by-laws state that a quorum of three BX Exchange Review Council members is necessary to adjudicate appeals of determinations made under BX Rules 4612 (appeal of denial of registration as an Equities Market Maker), 4619 (review of denial of an excused withdrawal of Equities Market Maker quotation), 4620 (appeal of denial of reinstatement of Equities Market Maker that accidentally withdraws), 11890 (appeal of clearly erroneous transaction determination), and BX Options Chapter V, Section 6 (appeal of obvious error determination). *See* BX by-laws, Article VII, Section 9. The Exchange's Rules do not have analogues to BX Rules 4612, 4620, and 11890 and, as such, the corresponding provision of the Exchange's proposed By-Laws (Article VII, Section 9) provides only that a quorum of three Exchange Review Council members is necessary for it to adjudicate appeals involving determinations made under Rules 720 (appeal of obvious error determination), 720A (appeal of determinations of erroneous trades due to system malfunctions and disruptions), and 804 (review of denial of an excused withdrawal of market maker quotation).

[47] *See* n.52, *infra*.

[48] *See id*.

[49] *See id*.

[50] *See id*.

[51] The terms ''Nominating Committee'' and ''Member Nominating Committee'' are defined in Exchange By-Laws, Article I.

termination from office by reason by death, resignation, removal, disqualification, or other reason. Members are term limited out after two consecutive terms. Proposed Article VI, Section 5 sets forth the procedures for resigning as a member of the Exchange Review Council and provides that an Exchange Review Council member may resign at any time upon written notice to the Board. Under proposed Article VI, Section 6, any member of the Exchange Review Council may be removed from office at any time for refusal, failure, neglect, or inability to discharge the duties of such office by majority vote of the Board.

Under proposed Article VI, Section 7, an Exchange Review Council member would be disqualified and removed immediately upon a determination by the Board, by a majority vote, that: (a) The member no longer satisfies the classification (Industry, Member Representative, Non-Industry, or Public) for which the member was elected; and (b) the member's continued service as such would violate the compositional requirements of the Exchange Review Council set forth in Article VI, Section 2. If the term of office of an Exchange Review Council member terminates under this Section, and the remaining term of office of such member at the time of termination is not more than six months, during the period of vacancy the Exchange Review Council shall not be deemed to be in violation of Article VI, Section 2 by virtue of such vacancy. Proposed Article VI, Section 8 contains provisions for the filling of vacancies on the Exchange Review Council and states that if a position on the Exchange Review Council becomes vacant, the Nominating Committee or the Member Nominating Committee (as applicable) shall nominate, and the Board shall appoint a person satisfying the qualifications for the position as provided in Article VI, Section 2 to fill such vacancy, except that if the remaining term of office for the vacant position is not more than six months, no replacement shall be required.

Proposed Article VI, Section 9 provides that a quorum of the Exchange Review Council will consist of a majority of its members, including not less than 50% of its Non-Industry members and one Member Representative member. Proposed Article VI, Section 10 contains provisions related to the meetings of the Exchange Review Council.

Under proposed Article VI, Section 11, the Exchange Review Council is required to establish a Review Subcommittee to determine whether disciplinary and membership proceedings decisions should be called for review by the Exchange Review Council under the disciplinary and membership rules to be proposed for the Exchange. The Review Subcommittee shall be composed of no fewer than two and no more than four members of the Exchange Review Council. The number of Non-Industry members of the Review Subcommittee shall equal or exceed the sum of the number of Industry members and Member Representative members of the Review Subcommittee, and the subcommittee must include at least one Member Representative member. At all meetings of the Review Subcommittee, a quorum for the transaction of business shall consist of not less than 50 percent of the members of the Review Subcommittee, including not less than 50 percent of the Non-Industry members of the Review Subcommittee and one Member Representative member of the Review Subcommittee.[52]

The BX Rules implement the foregoing responsibilities of the Exchange Review Council by establishing various procedures, described below, to govern its reviews. As the Exchange also describes in further detail below, the Exchange proposes to transfer to the Exchange Review Council (or panels thereof) certain responsibilities currently vested in other Exchange committees or the Board. For example, pursuant to Existing Rule 720, an Obvious Error Panel (''OEP'') is presently responsible for reviewing determinations regarding obvious and catastrophic errors. Pursuant to Existing Rule 720A, a ''Review Panel'' is responsible for reviewing determinations to nullify or adjust transactions that arise from system disruptions and malfunctions. The Exchange is proposing to eliminate the OEP and the Review Panel and to transfer their responsibilities to a panel of the new Exchange Review Council, which corresponds to the practice of BX. Subject to Chapter 90, the Exchange also proposes to transfer responsibility to the Exchange Review Council to review denials or conditions imposed upon those that seek to become or remain a Member of the Exchange or become or remain associated with a Member of the Exchange, as set forth in Existing Rule 302. Similarly, the Exchange proposes to transfer responsibility to the Exchange Review Council to review denials or conditions imposed upon Members that seek to transfer or sell market maker rights, as set forth in the Supplementary Material to Existing Rule 307.[53] In addition, the Exchange proposes to amend Existing Rule 804 to provide for the Exchange Review Council to review determinations regarding temporary withdrawals of quotations, which are not reviewable under the Existing Rules. The Exchange notes that BX vests in its Exchange Review Council responsibility for reviewing similar types of matters.[54]

The BX Rule 8000 Series

The Exchange proposes to incorporate by reference into a new Chapter 80 of its Rulebook the BX Rule 8000 Series. The BX Rule 8000 Series is entitled ''Investigation and Sanctions,'' and it governs the investigative process, including FINRA's authority under the RSA to conduct investigations of Members and Associated Persons on behalf of the Exchange.

BX Rule 8001 states that the Exchange and FINRA are parties to the RSA, pursuant to which FINRA has agreed to perform certain functions on behalf of the Exchange. It also specifies, however, that the Exchange retains ultimate legal responsibility for, and control over the functions that FINRA performs on its behalf.[55]

BX Rule 8110 requires Members to keep and maintain copies of the NASD (now known as FINRA) and Exchange Manuals in readily accessible places and make them available for examination by customers upon request.

BX Rule 8120 sets forth definitions for the BX Rule 8000 Series.

[52] In addition to adding Article VI to the By-Laws, the Exchange proposes to make changes to other articles of the By-Laws to accommodate the existence of the Exchange Review Council. For example, the Exchange proposes to amend Article I, which defines the terms that the Exchange uses in the By-Laws, to provide that the terms ''Industry member,'' ''Member representative member,'' ''Non-industry member,'' and ''Public member'' mean, in part, members of the Exchange Review Council. The Exchange also proposes to amend Article III, Section 6, to add a new subsection (a) that directs the Board to appoint an Exchange Review Council, as provided in Article VI. It also proposes to amend Article III, Section 6(b) to state that the Nominating Committee and the Member Nominating Committee of the Board shall have responsibility for nominating members of the Exchange Review Council. Finally, the Exchange proposes to amend Sections 7 and 8 of Article III, which deal with Director conflicts-of-interest/self-interested transactions and Director compensation, respectively, to ensure that the restrictions and benefits that these provisions provide apply to Exchange Review Council members.

[53] The Exchange notes that it proposes to establish procedures in Existing Rule 302 and Rule 307 to govern the review by the Exchange Review Council of adverse membership, association, or market maker sale or transfer determinations. The Exchange proposes to base these procedures upon those set forth BX Rules 1015 and 1016.

[54] *See* Securities Exchange Act Release No. 72149 (May 12, 2014), 79 FR 28564 (May 16, 2014) (SR–BX–2014–024).

[55] BX Rule 9001 also states that the Exchange has contracted with FINRA to perform some or all of the Exchange's disciplinary functions, while noting that the Exchange retains ultimate legal responsibility for and control of such functions.

BX Rule 8210 generally authorizes the Exchange's Regulation Department and FINRA, acting on the Exchange's behalf to require a Member, an Associated Person, or another person subject to the Exchange's jurisdiction to provide information orally, in writing or electronically, to provide testimony under oath, or to allow for the inspection of their [sic] books, records, and accounts, with respect to any matter associated with an investigation, complaint, examination, or proceeding of the Exchange or of other Self-Regulatory Organizations or regulators.

BX Rule 8211 requires a Member to submit certain specified trade data in an automated form, as the Regulation Department or FINRA may require or request.

BX Rule 8310 sets forth the Exchange's authority to sanction a Member or an Associated Person for violations of the federal securities laws, rules, or regulations thereunder, or the Exchange's Rules, as well as for neglect or refusal to comply with an order, direction, or decision issued under the Exchange Rules.[56] BX Rule 8310(a) provides for sanction [sic] that include censure, fine, suspension of membership or registration of a person associated with a Member, expulsion or cancellation of membership or association, suspension or bar from association with all Members, temporary or permanent cease and desist order, or any other fitting sanction. BX IM–8310–1 precludes Members from allowing Associated Persons from remaining associated with them, even in a clerical or ministerial capacity, upon issuance of orders suspending, revoking, or cancelling the registration of such Associated Persons and it prohibits payment of any salary, commission, profit, or other remuneration such Associated Persons might have earned during their periods of suspension. BX IM–8310–3 states, in part, that the Exchange's Regulation Department shall release certain information to the public regarding disciplinary complaints and decisions and release, upon request, a copy of any complaint or disciplinary decision issued by the Exchange or any committee thereof.

BX Rule 8320 states that fines and other monetary sanctions shall be paid to the Treasurer of the Exchange. It authorizes the Exchange, after seven days written notice, to in part summarily suspend or expel Members if they are delinquent in paying sanctions or fines.

BX Rule 8330 states that a Member or an Associated Person disciplined pursuant to Rule 8310 shall bear the costs of disciplinary proceedings as the New Hearing Panels or the Board deem appropriate under the circumstances.

The BX Rule 9000 Series

The Exchange proposes to incorporate by reference into a new Chapter 90 of its Rulebook the BX Rule 9000 Series. The BX Rule 9000 Series is entitled ''Code of Procedure,'' and it governs proceedings for disciplining Members and Associated Persons, proceedings for regulating Members experiencing financial or operational difficulties, proceedings for summary or non-summary suspensions, cancellations, bars, prohibitions, or limitations, and proceedings for obtaining relief from the eligibility requirements of the Exchange By-Laws and the Exchange Rules.

BX Rule 9100 Series

The BX Rule 9100 Series describes the application and purpose of the BX Rule 9000 Series, including the types of proceedings covered by the BX Rules,[57] the rights, duties, and obligations of Members and Associated Persons,[58] defined terms,[59] and rules concerning the filing and service of papers.[60] The BX Rule 9100 Series also provides rules concerning proceedings, including appearance and practice,[61] withdrawal by attorney or representative,[62] *ex parte* communications,[63] separation of functions among adjudicators and interested staff,[64] rules of evidence and official notice,[65] motions,[66] rulings on procedural matters,[67] and interlocutory review.[68]

Specifically, BX Rule 9110 sets forth the general rights, duties, and obligations of Members and Associated Persons under the Code of Procedure, including the rights, in any disciplinary matter thereunder, to be presented with specific charges, to have a hearing, to have due notice thereof, to present a defense and relevant supporting material, to be represented by counsel, to have a record kept of proceedings, and to receive a written determination that sets forth the basis therefor.

BX Rule 9120 sets forth definitions of various terms used throughout the Rule 9000 Series.

The BX Rule 9130 Series governs the requirements for service of complaints and other written documents in connection with disciplinary proceedings. The BX Rule 9130 Series prescribes the timing and form of required service based on the type of the notice. BX Rule 9134 concerns the permissible methods of service and the procedures for service. BX Rule 9134 permits personal service, service by U.S. Postal Service, or service by courier. BX Rules 9135 through 9138 set forth the form, format, and procedures for filing papers with adjudicators as well as the effect for [sic] a Party or its counsel or representative for affixing or failing to affix their [sic] signatures to such papers. Other BX Rules govern service of notices and other documents in particular situations.[69]

BX Rule 9141 concerns appearances before adjudications in proceedings, both by Parties and by their attorneys and representatives. BX Rule 9141 permits a person to represent themselves [sic] in any proceeding as

[56] The Exchange proposes to retain Existing Rule 1600, which provides a more general statement of the Exchange's disciplinary authority than that which exists in BX Rule 8310. Existing Rule 1600 states that a Member or Associated Person who is alleged to have violated or aided and abetted a violation of the Act, the rules and regulations promulgated thereunder, and the By-Laws or Rules of the Exchange, or any interpretation thereof are subject to the disciplinary jurisdiction of the Exchange and may be, after notice and opportunity for a hearing, appropriately disciplined by expulsion, suspension, fine, censure, limitation or termination as to activities, functions, operations, or association with a Member, or any other fitting sanction in accordance with the provisions of the disciplinary rules. It also permits the Exchange to charge a supervisor with a violation of a rule within the disciplinary jurisdiction of the Exchange committed by an employee under his supervision or by the Member as though such violations were his own. Finally, it extends the disciplinary jurisdiction of the Exchange to continue after termination of the Member from the Exchange or a person's termination of association with a Member as to matters that occurred prior to such termination. Staff must serve written notice to the former Member or Associated Persons within one year of receipt by the Exchange of notice of such termination that the Exchange is making inquiry into a matter or matters.

[68] *See* BX Rule 9148.

[69] *See, e.g.* BX Rule 9360 (effective dates of bars, expulsions, and permanent cease and desist orders); BX Rule 9400 (various service requirements pertaining to expedited client suspension proceedings); BX Rule 9550 Series (various service requirements pertaining to: (1) Suspensions for failures to provide information or keep information current; (2) suspensions and cancellations for failures to pay Exchange dues, fees, or other charges; (3) suspensions or cancellations for failures to comply with arbitration awards, settlements, or restitution orders or settlements; (4) suspensions, cancellations, or bars from membership or suspensions or bars from association with Members, or limitations or prohibitions of access to Exchange services; (5) suspensions, cancellations, and bars for failure to comply with cease and desist orders; (6) restrictions on Members' activities due to financial or operational difficulties; and (7) suspensions for actions authorized by Section 6(d)(3) of the Act).

well as to be represented by others (pursuant to a notice of appearance), including a licensed attorney,[70] a member of a partnership (to represent a partnership), and a bona fide officer of a corporation, trust or association (to represent a corporation, trust or association).

BX Rule 9143(a) prohibits Parties, their representatives, or Interested Staff[71] from having *ex parte* communications with adjudicators or with Exchange staff who are participating in or advising on a proceeding about the merits of the proceeding.[72] BX Rule 9143(b) also requires adjudicators participating in a proceeding to disclose and place in the record any written *ex parte* communications (or memoranda summarizing any oral *ex parte* communications) concerning the merits of the proceeding. BX Rule 9143(c) furthermore permits the Exchange Regulation Department or an adjudicator (consistent with the interests of justice, the policies, [sic] underlying the Act, and the Rules of the Exchange) to order any Party that violates the *ex parte* prohibition to show cause why the Party's claim or interest in the proceeding should not be dismissed, denied, disregarded, or otherwise adversely affected by reason of such [sic] *ex parte* communication. BX Rule 9143(d) generally specifies that the *ex parte* prohibition applies beginning with the authorization of a complaint. Finally, BX Rule 9143(e) specifies circumstances in which a Party's claim as to a violation of the *ex parte* rules are [sic] waived, including when a Respondent submits an offer of settlement, an executed letter of acceptance, waiver, and consent, or an MRVP letter.[73]

BX Rule 9145 states that formal rules of evidence do not apply to proceedings brought under the BX Rule 9000 Series. It also permits adjudicators, after providing notice and an opportunity for a Party to comment or oppose, to take official notice of matters that may be judicially noticed by courts or of other matters within the specialized knowledge of the Exchange.

BX Rules 9146 through 9148 govern motion practice before adjudicators. BX Rule 9146 provides that the filing of a motion does not stay a proceeding, unless an adjudicator orders otherwise. It also provides that, unless otherwise ordered by an adjudicator, a Party may file an opposition or response to a written motion within 14 days after service of the motion and that, if the Party fails to do so, it shall be deemed to have waived its objection to the motion. However, BX Rule 9146 states that a moving Party is not entitled to file a reply to such an opposition or response, except at the discretion of the adjudicator. BX Rule 9146 also authorizes an adjudicator to permit oral arguments on motions and to summarily deny frivolous motions. It specifically provides for motions for protective orders. Finally, along with BX Rule 9147, BX Rule 9146 designates adjudicators for procedural and summary disposition motions at both the Hearing Panel and appellate levels. BX Rule 9148 specifies that there are no interlocutory reviews of rulings on motions or orders.

BX Rule 9150 authorizes an adjudicator to exclude from disciplinary proceedings an attorney for a Party or any other person authorized to represent a Party to the extent that the adjudicator deems said attorney or persons to be engaging in contemptuous conduct, under BX Rule 9280, or unethical or improper professional conduct. The BX Rule authorizes an attorney or person so excluded to seek review of their [sic] exclusion from the Exchange Review Council. Moreover, BX Rule 9150(b) states that even if it prohibits an attorney or other person authorized to represent others from practicing or appearing in an Exchange proceeding, such action by the Exchange shall not preclude it from initiating other proceedings against such person.

BX Rule 9160 sets forth conditions for the recusal or disqualification of an adjudicator. Such conditions include a conflict of interest, bias, or other circumstances in which the adjudicator's fairness might reasonably be questioned. The Rule also designates those who are authorized to order the disqualification of Board Directors, members of the Exchange Review Council or committees thereof, or New Hearing Panels.

The BX Rule 9200 Series

The BX Rule 9200 Series sets forth the disciplinary process, providing rules concerning the issuance of a complaint, the briefing and hearings process, issuance of a decision and the settlement process. The BX Rule 9200 Series also governs permanent cease and desist orders.

BX Rule 9211(a)(1) states that if the Departments believe that a Member or an Associated Person has violated any law, rule, or regulation over which the Exchange has jurisdiction, then the Regulation Department or the Departments may request authorization from the ODA to issue a complaint. Likewise, BX Rule 9211(a)(2) states that the Board may direct the ODA to authorize and the Departments to issue a complaint when the Board is of the opinion that any Member or Associated Person has violated any law, rule, or regulation within the Exchange's jurisdiction. Unlike the Existing Rule, the BX Rules do not specify that ''probable cause'' or any other legal standard must be satisfied for the ODA to authorize issuance of a complaint.

BX Rule 9212 sets forth the requirements for the issuance of complaints. It states that if a complaint is authorized, the Departments shall issue it.[74] It furthermore states that complaints must be in writing and specify, in reasonable detail, the conduct alleged to constitute the violative activity and the rule, regulation, or statutory provision allegedly violated by such conduct.[75] The BX Rule provides that complaints must be signed by the Department of Enforcement or of Market Regulation and served by the Departments on the Parties in accordance with the Rules.[76] The BX Rules permit amendments to and withdrawals of complaints. As to amendments, BX Rule 9212(b) provides that the Departments may amend a complaint once, as a matter of course, at any time before the Respondent answers the complaint, and otherwise, upon a motion to the Hearing Officer, a showing of good cause, and a determination that the Respondent will suffer no unfair prejudice as a result of the amendment. As to withdrawals, BX Rule 9212(c) states that the Departments may withdraw a complaint with prior leave of the Hearing Officer. BX Rule

[70] Pursuant to BX Rule 9142, an attorney or representative may withdraw from a proceeding for good cause, pursuant to written notice and at least 30 days prior notice.

[71] BX Rule 9120(t) defines ''Interested Staff'' to include certain enumerated Exchange or FINRA employees. The applicable employees who constitute ''Interested Staff'' under this BX Rule vary depending upon the type of disciplinary proceeding at issue.

[72] BX Rule 9144(a) generally prohibits Interested Staff from advising adjudicators, and adjudicators from advising Interested Staff, with respect decisions of the other, including as to whether to file complaints, appeals or cross appeals. BX Rule 9144(b) also prohibits Hearing Officers and Panelists, absent waivers in certain circumstances, from participating in decisions as to whether to issue complaints, appeal or cross-appeal disciplinary proceedings to the Exchange Review Council, or call decisions for review.

[73] In the proposed introduction to Chapter 90, the Exchange states that the Exchange's procedure for handling MRVP letters, including as set forth in BX Rule 9143(e)(3), shall also apply to minor rule violation letters.

[74] *See* BX Rule 9212(a)(1).

[75] *See id.*

[76] *See id.*

9212(d) provides for the docketing of complaints.

BX Rule 9214 governs the consolidation and severance of disciplinary proceedings. Unlike Existing Rule 1606(d), BX Rule 9214 does not permit a non-Party to intervene in disciplinary proceedings, but it does permit the consolidation of proceedings. Under the BX Rule, either the Hearing Officer may order or a Party may request consolidation of two or more disciplinary proceedings if such consolidation would further the efficiency of the disciplinary process, or if the subject complaints involve common questions of law or fact or one or more of the same Respondents. When determining whether to order the consolidation of such disciplinary proceedings, BX Rule 9214(a) requires the Chief Hearing Officer to consider whether the same or similar evidence reasonably would be expected to be offered at each of the hearings, whether the proposed consolidation would conserve the time and resources of the Parties, and whether any unfair prejudice would be suffered by one or more Parties as a result of the consolidation. If consolidation is ordered, BX Rule 9214(c) provides that the Chief Hearing Officer shall issue an order specifying which New Hearing Panel will preside over the consolidated proceedings or the Chief Hearing Panel shall appoint another New Hearing Panel to do so.

BX Rule 9215 requires a Respondent to file an answer to a complaint with the OHO within 25 days after service of the complaint (unless the Hearing Officer extends that deadline for good cause) and to state in such answer whether they [sic] admit, deny, or lack sufficient information to admit or deny each allegation made in the complaint. However, the BX Rule differs in certain respects from Existing Rule 1605, which governs answers to statements of charges. For example, it specifically authorizes a Respondent to file a motion for a more definite statement of the allegations set forth in the complaint as well as to amend the answer.[77] Although the BX Rule, similar to Existing Rule 1605, permits extensions of time to respond to an amended complaint, the BX Rule provides for the greater of the original remaining answer period or 14 days to do so, rather than 25 days.[78] Finally, instead of simply providing that a failure to file an answer shall be deemed to be an admission of the matters alleged, BX Rule 9215(f) requires the Departments to send a second notice to Respondents before they may impose sanctions, which may include, not only the admission of unanswered allegations, but also the issuance of default decisions pursuant to BX Rule 9269.

BX Rule 9216 sets forth procedures to informally dispose of matters, where appropriate. Specifically, BX Rule 9216 provides that the Departments may prepare and request that a Member or Associated Person execute a letter of acceptance, waiver, and consent (''AWC'') accepting a finding of a violation and consenting to the imposition of sanctions. Unlike Existing Rule 1603, which governs analogous ''letters of consent,'' the BX Rule provides that in executing an AWS [sic] letter, a Member or Associated Person is deemed to waive their [sic] rights to a hearing, to appeal, to otherwise challenge the terms of a letter, to claim bias or prejudgment, or to claim violation of the *ex parte* prohibitions of BX Rule 9143. The BX Rule states that executed AWC letters are subject to approval by the ODA, the Exchange Review Council, or the Review Subcommittee and, if rejected, they may not be introduced into evidence in connection with any subsequent disciplinary hearing that occurs.

BX Rule 9216(b) concerns the process for assessing fines for MRVP violations.[79] Under BX Rule 9216(b), if the Departments have reason to believe that a Member or an Associated Person has violated certain specified Rules, then they may prepare an MRVP letter (for fines of up to $2,500 for violations subject to the Exchange's MRVP plan) and request that the Member or Associated Person accept [sic] the letter and the fine set forth in it.[80] BX Rule 9216(b) provides that executed MRVP letters are to be submitted for approval to the Exchange Review Council. The Review Subcommittee or the ODA may accept such letters or refer them to the Exchange Review Council for acceptance or rejection. The Review Subcommittee may also reject such letters or refer them to the Exchange Review Council. If the letter is accepted, then it is deemed to be a final decision of the Exchange. If a Member or an Associated Person chooses not to consent to the issuance of an MRVP letter, or the Review Subcommittee or the Exchange Review Council rejects the letter, then the matter becomes subject to formal disciplinary adjudication.[81]

BX Rule 9216(b) will replace Existing Rule 1614, with three exceptions. First, the Exchange proposes to retain Existing Rule 1614(a), which sets forth its authority to impose fines of up to $2,500 for MRVP violations and up to $5,000 for minor rule violations (other than those subject to an MRVP), because BX Rule 9216(b) does not authorize the imposition of fines of up to $5,000 for minor rule violations. Existing Rule 1614(a) also includes a sentence (that the BX Rules lack) clarifying that the Exchange has discretion to decide, on a case-by-case basis, whether to impose a fine for an MRVP violation or a minor rule violation or whether instead to proceed with a formal disciplinary action under proposed Chapter 90. Second and relatedly, the Exchange proposes to include in its introduction to Chapter 90 a statement that the procedures set forth in BX Rule 9216(b) for handling MRVP violations and MRVP violation letters also apply to the handling of minor rule violations and minor rule violation letters, except that the Exchange will promptly report to the Commission any final Exchange action, in accordance with SEC Rule 19d–1(c)(1). Third, the Exchange proposes to retain Existing Rule 1614(d) (renumbered as Rule 1614(b)), which presently sets forth the Exchange's schedule of MRVP violations and minor rule violations and their associated fines. This schedule is particular to the Exchange and cannot be replaced summarily with the corresponding BX schedule, which is set forth in BX IM–9216. The Exchange will not incorporate by reference BX IM–9216.

The BX Rule 9200 Series sets forth the procedures of the Exchange for holding disciplinary hearings. Although the BX hearing rules are broadly similar to the Existing Rules, the BX Rules are more comprehensive and robust. One noteworthy difference between them is that under the Existing Rule 1606, a Respondent is entitled to a hearing as a matter of course, whereas under BX Rule 9221, a Respondent must affirmatively request a hearing in their [sic] answer or else, in absence of good

[77] *See* BX Rule 9215(c) and (d).

[78] If the Respondent files an answer before the complaint is amended, the Respondent receives 14 days to respond to the amended complaint. *See* BX Rule 9215(e).

[79] As discussed previously, the Exchange proposes to retain its existing MRVP fine schedule.

[80] Pursuant to BX Rule 9216(b), if a Member or Associated Person agrees to execute an MRVP or a violation letter, they [sic] also agree [sic] to waive certain of their [sic] rights with respect to the alleged violations, including their [sic] rights to dispute the allegations or the validity of the letter, as well as to make claims of bias or prejudgment, and to raise violations of the *ex parte* and separation of functions rules.

[81] Because the minor rule violation process proceeds only to the extent that a Member or Associated Person assents to the letter and its terms, there is no provision under the BX Rules, as there is under the Existing Rules, for a Member or Associated Person to contest a minor rule violation fine.

cause shown, they are [sic] deemed to waive their [sic] right to one.[82] A Hearing Officer or the Hearing Panel may also call a hearing on their [sic] own initiative or the Hearing Panel may issue its decision on the record.[83] BX Rule 9221(d) provides for notice of a hearing to be given to the Parties at least 28 days beforehand, but the BX Rule provides an exception if the Hearing Officer determines that extraordinary circumstances require a shorter notice period or the Parties waive the notice period.

BX Rule 9231(a) states that the Chief Hearing Officer of the OHO shall appoint a New Hearing Panel or an Extended New Hearing Panel [84] to conduct formal disciplinary procedures. BX Rule 9231(b) specifies that a New Hearing Panel, in most instances, is to be composed of a Hearing Officer and two Panelists,[85] that the Hearing Officer shall preside over the hearings, and that the Chief Hearing Officer is responsible for selecting the Panelists, who must be associated with a Members or retired therefrom.[86] BX Rule 9231(e) states that the Chief Hearing Officer may appoint a replacement Hearing Officer if the Hearing Officer withdraws, is incapacitated, or otherwise is unable to continue service after being appointed.[87] Meanwhile, BX Rule 9234 authorizes the Chief Hearing Officer to appoint new Hearing Panelists under similar circumstances. Like Existing Rule 1606(a)(3), BX Rules 9233 and 9234 provide for the recusal or withdrawal of Hearing Officers and Panelists with conflicts of interest or biases and their replacement by the Chief Hearing Officer. Unlike the Existing Rule, however, BX Rules 9233 and 9234 authorize a Party to file a request that Hearing Officers or Panelists be disqualified for such reasons.[88]

BX Rule 9241 governs pre-hearing conferences. BX Rule 9241(a) states that such conferences may be held to expedite proceedings, establish efficient procedures to manage proceedings, or to improve the quality of hearings through preparation. BX Rule 9241(b) states that pre-hearing conferences may be held upon the motion of the Hearing Officer or at the request of a Party. BX Rule 9241(c) provides that subjects for discussion at pre-hearing conferences may include, not only the simplification of issues for adjudication and the expedition of proceedings, but also the exchange of witness and exhibit lists and exhibits, the stipulation of the authenticity and admissibility of evidence, taking official notice of facts, the scheduling of pre-hearing motions or briefs, the method of service, the scheduling of hearing dates, any amendments to the complaint or answers, and the production of documents. Generally, under BX Rule 9241(d), initial pre-hearing conferences, unless determined by a Hearing Officer to be unnecessary or premature, shall be held within 21 days after the filing of an answer. BX Rule 9241(e) provides for agreements and procedural determination [sic] made during pre-hearing conferences to be recorded in orders issued by the Hearing Officer. Under BX Rule 9241(f), a Hearing Officer may issue a default decision against a Party that fails to appear at a pre-hearing conference, if the Party was provided due notice.

Additionally, prior to a hearing, BX Rule 9242 authorizes a Hearing Officer to order a Party to furnish information to all other Parties and to the New Hearing Panel that may include an outline or narrative summary of the Party's case or defense, the legal theories upon which a Party will rely, a list and copies of documents that the Party intends to introduce at the hearing, a list of witnesses that the Party intends to call to testify on their [sic] behalf and a summary of the expected testimony, and if a witness is to be called as an expert witness, a statement of the witness' expertise.

The BX Rule 9250 Series governs discovery during disciplinary proceedings. The BX Rule 9250 Series provides for more extensive discovery than that which exists under the Existing Rules. BX Rule 9251(a) generally provides that the Departments must make available to Respondents information and documents obtained in connection with the investigations that led to the institution of disciplinary proceedings, such as requests for information and documents, responses thereto, and all transcripts and exhibits. BX Rule 9251(b) permits the Departments to withhold certain documents from Respondents under certain circumstances, including to the extent that they are privileged, contain attorney work product, constitute internal memoranda or examination reports, reveal examination or investigatory methods, the identities of confidential sources, or the existence of other prospective investigations or enforcement actions, or if the Hearing Officer grants leave to withhold a document.[89] The BX Rule does not permit the Departments to withhold from Respondents exculpatory evidence. The Hearing Officer may require the Departments to submit a list of withheld documents.[90] However, the Rule states that unless the Hearing Officer orders otherwise, the Departments generally must make documents available to a Respondent not later than 21 days after service of the Respondent's answer.[91] If the Departments fail to make documents or witness statements available to Respondents as required under BX Rule

[82] BX Rule 9221(a) provides that any request by a Respondent for a hearing shall be granted.

[83] *See* BX Rule 9221(b)-(c).

[84] Like Extended New Hearing Panels, Extended Proceeding Committees are established for proceedings that involve unusually complex issues or will require an extended period of time to hear. Pursuant to BX Rule 9331(a)(2), members of Extended Proceeding Committees may be entitled to compensation at the rates then in effect for arbitrators appointed under the FINRA Rule 10000 Series.

[85] BX Rule 9120(z) defines the term ''Panelist'' as used in the Rule 9200 Series, the Rule 9550 Series, and the Rule 9800 Series, to mean a ''member of a Hearing Panel or Extended Hearing Panel who is not a Hearing Officer.'' As used in the Rule 9300 Series, the term means a ''current or former member of the Exchange Review Council or a former Director who is appointed to serve on a Subcommittee or an Extended Proceeding Committee.'' The Exchange will select Panelists in accordance the requirements set forth in BX Rules 9120(z) and 9231.

[86] BX Rule 9232 sets forth other criteria for the Chief Hearing Officer to use when selecting New Hearing Panels, including their level of expertise, the absence of any conflicts of interest or bias and any appearance thereof, their availability for service, and the frequency of their prior service on New Hearing Panels (with a preference towards providing opportunities for new or infrequently-serving individuals).

[87] BX Rule 9235(b) also authorizes the Chief Hearing Officer or his or her Deputy to exercise the authority of a Hearing Officer in his or her temporary absence.

[88] BX Rule 9233(b) permits a Party to move for the disqualification of a Hearing Officer not later than 15 days after the later of: (1) When the Party learned of the facts believed to constitute the disqualification; or (2) when the Party was notified of the assignment of the Hearing Officer. Similarly, BX Rule 9234(b) permits a Party to move for the disqualification of a Hearing Panelist within 15 days after the later of: (1) When the Party learned of the facts believed to constitute the disqualification; or (2) when the Party was notified of the assignment of the Hearing Panelist. BX Rule 9233(c) provides that the Chief Hearing Officer shall promptly investigate whether disqualification is required and issue a written ruling on the motion. BX Rule 9234 provides for a similar process for motions and decisions on motions to disqualify Hearing Panelists.

[89] BX Rule 9253 provides in part that, notwithstanding BX Rule 9251(b), a Respondent may file a motion requesting that the Departments produce witness statements or witness deposition transcripts. It provides that the failure to produce such materials shall not result in rehearing or an amended decision unless the Respondent establishes that the failure was not harmless error. The Hearing Officer, or upon appeal or review, a Subcommittee, an Extended Proceeding Committee, or the Exchange Review Council, shall determine whether the failure to provide any statement was not harmless error.

[90] *See* BX Rule 9251(c).

[91] *See* BX Rule 9251(d).

9251, no rehearing or amended decision may be in order, unless the Hearing Officer determines that the failure was not harmless error.[92]

BX Rule 9252 provides for a process by which a Respondent may request that the Exchange invoke BX Rule 8210 to compel the production of documents or testimony at the hearing. Pursuant to BX Rule 9252(a), such a request must be submitted to the Hearing Officer no later than 21 days before the hearing date. The request may be granted upon a showing that the information sought is relevant, material, and non-cumulative, that the requesting Party has been unsuccessful in obtaining the requested documents or testimony despite good faith attempts to do so, and that each of the persons for whom the documents and testimony are sought is subject to the Exchange's jurisdiction.[93] The Hearing Officer shall also consider whether the request is unreasonable, oppressive, excessive, [sic] in scope, or unduly burdensome, or whether it should be denied, limited, or modified.[94] If the Hearing Officer determines that a request is unreasonable, excessive, or unduly burdensome, he or she may deny the request or grant it only upon such conditions as fairness requires.[95] If the Hearing Officer grants the request, the Hearing Officer shall order that requested documents be produced to all Parties not less than ten days before the hearing, and order that witnesses whose testimony was requested appear and testify at the hearing. If the Hearing Officer grants the request ten or fewer days before a hearing on the merits is scheduled to begin or after such hearing begins, the documents or testimony shall be produced immediately to all Parties.[96]

Several BX Rules govern the hearing process. Broadly speaking, these Rules are similar to, albeit more comprehensive than, the hearings process that exists under Existing Rule 1606(e). BX Rule 9261(a) requires a Party to submit to all other Parties and to the Hearing Officer, no later than 10 days before a hearing, or at such earlier date as may be specified by the Hearing Officer, copies of documentary evidence and the names of the witnesses that it intends to present at the hearing. BX Rule 9261(b) states that a Party is entitled to appear at a hearing in person, by counsel, or by their [sic] representative. BX Rule 9262 requires sworn testimony at hearings. BX Rule 9263(a) grants the Hearing Officer authority to receive relevant evidence and to exclude all evidence that is irrelevant, immaterial, unduly repetitious, or unduly prejudicial. BX Rule 9145(a) provides that the formal rules of evidence shall not apply in a proceeding brought under the Rule 9000 Series. BX Rule 9265 requires hearings and (unless otherwise ordered by a Hearing Officer) pre-hearing conferences to be recorded by a court reporter and for transcripts to be available for correction and purchase. BX Rule 9266 states that the Hearing Officer may require the Parties to file proposed findings of fact and conclusions of law, or post-hearing briefs, and it prescribes a procedure for doing so. BX Rule 9267 lists the contents of the evidentiary record.

BX Rule 9268 governs New Hearing Panel decisions. Similar to Existing Rule 1607, BX Rule 9268(a) requires a New Hearing Panel to make a determination in a matter based on a majority vote, which is reflected in a written decision drafted by the Hearing Officer. Also similar to the Existing Rule, BX Rule 9268(b) requires that each decision include a statement of the specific violations alleged, findings of underlying facts, and conclusions of law. Unlike the Existing Rule, however, BX Rule 9268(c) permits the Hearing Officer or a Hearing Panelist to prepare a written dissenting opinion. BX Rule 9268(a) also specifically requires that the decision be issued within 60 days of the final date allowed for filing proposed findings of fact, conclusions of law, and post hearing briefs, or by a date established by the Chief Hearing Officer. Last, under subparagraph (d) of the BX Rule, the OHO must serve the decision and any dissenting opinion on the Parties, publish notice of the decision and any dissenting opinion in the Central Registration Depository (''CRD'') and provide a copy of the decision and any dissent thereto to the each Member of the Exchange with which the Respondent is associated.

BX Rules 9264 and 9269 concern the disposition of a disciplinary matter through a summary proceeding. BX Rule 9264 states that a motion for summary disposition must be initiated by a Party. Under BX Rule 9264(a), the Respondent and/or staff may, prior to the hearing but after the Respondent has filed an answer and had opportunity to inspect documents in the record, make a motion for summary disposition of any or all the causes of action in the complaint with respect to that Respondent, as well as any defense raised in a Respondent's answer. If a hearing on the merits has begun, then BX Rule 9264(b) states that Parties may submit a motion for summary disposition only with leave of the Hearing Officer. BX Rule 9264(c) provides the process for proceeding when a summary motion does not dispose of the matter entirely. BX Rule 9264(d) requires motions for summary disposition to be supported by a statement of undisputed facts, a supporting memorandum of points and authorities, and affidavits or declarations that set forth such facts. BX Rule 9264(e) concerns rulings on motions for summary disposition. This provision of the BX Rule provides that a Hearing Officer may deny or defer a decision on any motion for summary disposition, yet only a New Hearing Panel may grant such a motion (except the Hearing Officer may grant motions for summary disposition with respect to questions of jurisdiction). BX Rule 9264(e) also provides that a motion for summary disposition may be granted if there is no genuine issue with regard to any material fact and the Party that files the motion is entitled to summary disposition as a matter of law.

Meanwhile, BX Rule 9269 governs the issuance of default decisions by the Hearing Officer against Respondents that fail to provide timely answers to complaints or any Party that fails to appear at any hearing for which they have [sic] due notice. Where the defaulting Party is the Respondent, the BX Rule specifies that the Hearing Officer may issue a default decision that deems the allegations against the Respondent to be admitted. Where the defaulting Party is the Departments, the Hearing Officer may issue a default decision that dismisses the complaint with prejudice. The Hearing Officer also may order a Party who fails to attend a pre-hearing conference or a hearing to pay the costs of attendance for the other Party. Like Existing Rule 1608, the BX Rule provides for default decisions to be set aside, but unlike the Existing Rule, BX Rule 9269 provides for the Hearing Officer to set them aside only upon a motion and a showing of good cause. The BX Rule provides, however, that default decisions may be appealed to or called for review by the Board within 25 days after service.[97]

[92] *See* BX Rule 9251(g). The Hearing Officer, or, upon appeal or review, a Subcommittee, an Extended Proceeding Committee, or the Exchange Review Council, shall determine whether the failure to make the document available was not harmless error. *See id.*

[93] *See* BX Rule 9252(b).

[94] *See id.*

[95] *See* BX Rule 9252(c).

[96] *See id.*

[97] In addition to the above, BX Rule 9280 authorizes a New Hearing Panel to exclude or impose sanctions upon a Party, an attorney for a Party, or another authorized representative of a Party that violates an order or otherwise engages in contemptuous conduct during a proceeding.

Continued

BX Rule 9270 governs settlements. It permits a Party to propose in writing an offer of settlement at any time and to do so without limit to the number of offers it proposes. Under BX Rule 9270(e), if an offer of settlement is uncontested, then the Departments must, if a hearing has not yet commenced, transmit the offer and a proposed order of acceptance to the Exchange Review Council (or the ODA, if the Respondent is an affiliate of the Exchange) for approval or rejection. If a hearing has already commenced when the offer is made, then the Departments must send the offer and proposed order to the New Hearing Panel for preliminary approval and then to the Exchange Review Council (or, if a Respondent is an affiliate of the Exchange, to the ODA) for ultimate approval or rejection. Under BX Rule 9270(f), if an offer of settlement is made and it is contested, then the Departments must provide a written opposition to the New Hearing Panel, which may issue an order approving the offer, or it may order the Parties to attend a settlement conference. If a New Hearing Panel approves a contested offer of settlement, then the Hearing Officer shall send the order of acceptance of the offer of settlement to the Exchange Review Council (or, if a Respondent is an affiliate of the Exchange, to the ODA) for ultimate acceptance or rejection. Pursuant to BX Rule 9270(h), if an offer of settlement is rejected, then the Respondent shall be notified in writing, the offer shall be withdrawn, and the rejected order shall not constitute part of the record in any subsequent proceeding against the Respondent. BX Rule 9270(j) further clarifies that a Respondent shall not be prejudiced by a rejected order of settlement.[98]

BX Rule 9280 authorizes the issuance of sanctions for Parties, their attorneys, and their representatives, for contemptuous conduct. As set forth in BX Rule 9280(a)(2), such sanctions may include exclusion of an attorney or representative from proceedings. They may also include, in part, orders that establish disputed facts in favor of the non-sanctioned Party, preclude the disobedient Party from supporting or opposing claims or defenses, or strike pleadings or portions thereof.[99] The exclusion of an attorney or representative is subject to review by the Exchange Review Council.[100]

BX Rule 9290 states that hearings shall be held and orders shall be issued as to temporary cease and desist proceedings on an expedited basis. BX Rule 9291 governs the form and delivery of permanent cease and desist orders.

The BX Rule 9300 Series

The BX Rule 9300 Series sets forth the process for review of disciplinary proceedings by the Exchange Review Council and the Board.

BX Rule 9311 sets forth the process for appellate reviews of New Hearing Panel decisions. Under BX Rule 9311, a Party may appeal a New Hearing Panel decision to the Exchange Review Council within 25 days after service of a decision.[101] Additionally, on their [sic] own motion, any member of the Exchange Review Council, a Review Subcommittee thereof, or the CRO (as to default decisions) may issue a call to review a New Hearing Panel decision within 45 days after the date of service of the decision (or within 25 days after the date of service, as to calls for review that the CRO initiates). BX Rule 9311(c) and (d) require [sic] that Parties file written notices of appeal (and cross-appeal) with the OHO and it prescribes requirements for such notices. BX Rule 9311(e) states that the Exchange Review Council, in its discretion, may waive any issues not raised in appeal or cross-appeal notices, but it provides a process by which the Parties may petition for consideration of such issues.

Meanwhile, BX Rule 9312 governs the process by which the Exchange Review Council, the Review Subcommittee, or the CRO may call a matter for review. It provides that a decision of a New Hearing Panel issued pursuant to BX Rule 9268 may be called for review by any member of the Exchange Review Council or any member of a Review Subcommittee within 45 days after service of the decision. It also provides that a default decision against a Respondent, pursuant to BX Rule 9269, may be called for review by the CRO, on his or her own motion, within 25 days after service of the decision. Additionally, it provides that a decision with respect to a Member that is an affiliate of the Exchange may not be called for review by the Exchange Review Council. BX Rule 9312(b) states that a decision to call a matter for review by the Exchange Review Council, the Review Subcommittee, or the CRO operates as a stay of a final decision until such time as the Council or Board issues its decision, except with respect to permanent cease and desist orders.

BX Rule 9321 provides for the transmission of the record of a disciplinary proceeding to the Exchange Review Council within 21 days after the filing of a notice of appeal or notice of review, or at such a later time as the Council may designate. BX Rule 9322 grants discretion, with good cause shown, to the Exchange Review Council, the Review Subcommittee, a Subcommittee, an Extended Proceeding Committee, and Counsel to the Exchange Review Council (defined below) to modify filing deadlines, adjourn appeal proceedings, and change hearing locations in certain instances and subject to certain limitations.

BX Rule 9331 states that, following the filing of a notice of appeal or a call for review, the Exchange Review Council or the Review Subcommittee shall appoint a Subcommittee or an Extended Proceeding Committee, composed of two or more persons who are or were members of the Exchange Review Council or former Directors, for the purpose of making recommendations to the full Council as to how to dispose of matters before it.[102]

Authorized sanctions include, but are not limited to, imposing orders that establish facts in favor of the opposing Party, precluding a Party from making claims or defenses, striking portions of pleadings, or staying procedures until compliance occurs. No similar provisions exist in the Existing Rules. Meanwhile, BX Rule 9150(a) authorizes an adjudicator to exclude from disciplinary proceedings an attorney for a Party or any other person authorized to represent a Party to the extent that the adjudicator deems said attorney or persons to be engaging in contemptuous conduct, under BX Rule 9280, or unethical or unprofessional conduct. The BX Rule authorizes an attorney or person so excluded to seek review of their exclusion from the Exchange Review Council.

[98] Finally, BX Rule 9270(i) states that, when a disciplinary proceeding names multiple respondents, settlement offers may be accepted or rejected as to any one or all of the Respondents submitting offers.

[99] *See* BX Rule 9280(b).

[100] *See* BX Rule 9280(c).

[101] However, the Exchange notes that a decision involving a Respondent who is an affiliate of the Exchange may not be appealed to the Exchange Review Council.

[102] Under the BX Rules, the Exchange Review Council is assigned its own counsel in appellate matters. BX Rule 9120(e) defines the term ''Counsel to the Exchange Review Committee'' as an attorney that reports to the CRO of the Exchange who is responsible for advising the Exchange Review Council, the Review Subcommittee, a Subcommittee, or an Extended Proceeding Committee regarding a disciplinary proceeding on appeal or review before the Exchange Review Council. Counsel also may decide a motion on a procedural matter in the BX Rule 9300 Series. *See* BX Rule 9146(j)(2). BX Rule 9313 describes the authority of the Counsel and the process for seeking the review of a Counsel decision. Under BX Rule 9313(a), Counsel has authority to take ministerial and administrative actions to further the efficient administration of a proceeding. A Party may seek review of a Counsel decision on motion to the Exchange Review Council, the Review Subcommittee, a Subcommittee or, if applicable, an Extended Proceeding Committee. *See* BX Rule 9313(b). Counsel is subject to the same conflict of interest prohibitions as the Exchange Review Council, *see* BX Rule 9332, which requires Counsel to withdraw from a matter any time that the Counsel has a conflict of interest or bias or circumstances otherwise exists where the fairness of the Counsel might reasonably be questioned.

Under BX Rule 9332, Exchange Review Council members, including members of the Review Subcommittee, panelists of a Subcommittee or an Extended Proceeding Committee, or Counsel to the Exchange Review Council, are subject to the same disqualification and recusal standards as the Hearing Panelists and Hearing Officers.

The BX Rule 9340 Series governs the proceedings of the Exchange Review Council, Extended Proceeding Committee, and Subcommittees. BX Rule 9341 provides for oral arguments before a Subcommittee and the Extended Proceeding Committee, upon written request of a Party or otherwise at the discretion of Subcommittee or Committee.[103] BX Rule 9343 provides that, if no oral argument is held, a matter shall be decided on the record, supplemented by any written materials submitted to or issued by the Exchange Review Council, a Subcommittee, or the Extended Proceeding Committee. BX Rule 9344 grants discretion to the Council or the Review Subcommittee to proceed with or dismiss the appeal and remand appeals of Parties that failed to participate in initial disciplinary hearings and show good cause for their failure to participate. It also prescribes circumstances under which an appeal or cross-appeal will be deemed abandoned. BX Rule 9345 states that a Subcommittee or the Extended Proceeding Committee shall present a recommended decision to the Exchange Review Council. Pursuant to BX Rule 9346, the Exchange Review Council is charged with issuing a decision based on the record, supplemented by briefs and other papers submitted to the Subcommittee, Extended Proceedings Committee, or the Exchange Review Council, any oral arguments that occur, and upon a showing of good cause and with the leave of the Council, Extended Proceeding Committee, or Subcommittee, additional evidence that is introduced on appeal.[104] It also provides that the formal rules of evidence shall not apply during the appeals process.[105] BX Rule 9347 sets forth the form, format, and filing procedures and deadlines for papers filed in Exchange Review Council proceedings. BX Rule 9348 states the powers of the Exchange Review Council to affirm, dismiss, modify, or reverse New Hearing Panel decisions with respect to each finding, or to remand the proceeding with instructions. It also provides that the Exchange Review Council may affirm, modify, reverse, increase, or reduce any sanction, or impose any other fitting sanction. The Exchange Review Council must issue a decision consistent with BX Rule 9349(b), which provides elements required to be included in an Exchange Review Council decision.

BX Rule 9351 governs discretionary review by the Board. Pursuant to BX Rule 9351(a), a Director may call for review a decision of the Exchange Review Council (other than a decision with respect to a Member that is an affiliate of the Exchange) not later than the next meeting of the Board that is at least 15 days after the date on which the Board receives the Exchange Review Council decision. As set forth in BX Rule 9351(d), the Board may affirm, modify, or reverse the proposed written decision of the Exchange Review Council and it may affirm, modify, reverse, increase, or reduce any sanction (including the terms of any permanent cease and desist order) or impose any other fitting sanction. The Board also may remand the proceeding with instructions. The Board is required to issue its decision in writing pursuant to BX Rule 9351(e).[106]

Unlike the Existing Rules, BX Rule 9370 expressly provides for a Respondent aggrieved by a final disciplinary action to apply for review by the Commission pursuant to Section 19(d)(2) of the Act.

The BX Rule 9400 and 9500 Series

The BX Rule 9400 Series provides the process for expedited client suspension proceedings involving alleged violations of Rule 403 (Disruptive Quoting and Trading Activity Prohibited). The BX Rule 9500 Series provides the process for proceedings other than formal disciplinary proceedings. The Exchange proposes that these BX Rules will replace Chapter 15 of the Existing Rules, which also provide for the Exchange to impose summary suspensions in various circumstance [sic].

BX Rule 9400 authorizes and prescribes the process for adjudicating expedited client suspensions that may be imposed upon Members or Associated Persons that violate the prohibition on disruptive quoting and trading activity.[107] BX Rule 9400 states that the Regulation Department, with the prior authorization of the CRO, may issue a notice initiating a suspension proceeding of a Member or an Associated Person for engaging in disruptive quoting and trading activity, which shall trigger the appointment of a New Hearing Panel and the occurrence of a hearing not later than 15 days after service of the notice, unless extended for good cause shown. The New Hearing Panel may issue a written decision imposing a suspension (within 10 days of receipt of the hearing transcript, unless otherwise extended) only if the New Hearing Panel finds by a preponderance of the evidence that the violation occurred and that it is likely to result in significant market disruption or harm to investors. BX Rule 9400(e) also permits a Respondent to apply to the New Hearing Panel to modify, set aside, limit, or revoke a suspension order and it requires the New Hearing Panel to respond to such a request in writing within 10 days after receiving it, unless such time period is extended with the consent of the Parties for good cause shown. Finally, BX Rule 9400(f) states that suspensions imposed by New Hearing Panels may be appealed to the Commission as set forth in Section 19 of the Act.

The BX Rule 9500 Series permits the Exchange to impose sanctions, such as suspensions, cancellations of membership, bars of association with Members, and prohibitions or restrictions on access to Exchange services, as well as the adjudication of such sanction orders, for actions or circumstances that include the following: (1) Failures to provide information, reports, data, or testimony requested or required by the Exchange or failures to keep membership applications or supporting documentation current (BX Rule 9552); (2) failures to pay Exchange dues, fees and other charges or to submit a required report or information related to such payment (BX Rule 9553); (3) failures to comply with arbitration awards or settlements or orders of restitution (BX Rule 9554); (4) failures to meet the eligibility or qualification standards or prerequisites for access to

Moreover, the Counsel may be removed on motion based upon a good faith belief that the Counsel has a conflict of interest or bias or circumstances otherwise exists where the fairness of the Counsel might reasonably be questioned.

[103] BX Rule 9342 states that if a Party requests, but fails to appear at an oral argument, then the Committee or Subcommittee may proceed with oral arguments without that Party or consider the matter on the basis of the record, without oral argument, as to that Party.

[104] BX Rule 9346(f) also permits the Council, Extended Proceeding Committee, or Subcommittee to order, on its own motion, that the record be supplemented with such additional evidence as they deem relevant.

[105] *See* BX Rule 9346(g).

[106] BX Rules 9360 and 9370 states [sic] when sanctions become effective, including when a Respondent appeals a decision to the Commission.

[107] Although BX Rule 9400 references the BX Rule that prohibits disruptive quoting and trading, the Exchange proposes to substitute reference to its own analogous provision, Rule 403.

services (BX Rule 9555); (5) failures to comply with temporary and permanent cease and desist orders (BX Rule 9556); (6) financial or operational difficulties that require limiting or ceasing certain business activities (BX Rule 9557); and (7) actions authorized by Section 6(d)(3) of the Act, including in part summary suspensions of or limitations or prohibitions with respect to services offered by the Exchange on Members, Associated Persons, or other persons subject to the Exchange's jurisdiction, including those who have been suspended or expelled from another SRO, barred or suspended from being associated with a member of another SRO, or are experiencing severe financial or operation [sic] difficulties threaten [sic] investors, creditors, other Members, or the Exchange (BX Rule 9558). The BX Rule 9520 Series also provides for adjudication of statutory disqualifications or determinations of ineligibility to become or remain a Member or associated with a Member. Generally, each of these provisions of the BX Rules require [sic] the Exchange to serve written notice to the Member or Associated Person, offer them an opportunity to request a hearing in writing, and permit them to request termination of sanctions upon achieving compliance.[108] Meanwhile, BX Rule 9559 sets forth extensive procedures governing hearings and it provides for appellate reviews by the Exchange Review Council, upon its call for review, and by the Commission, pursuant to Section 19 of the Act.

The BX Rule 9600 Series

The BX Rule 9600 Series provides procedures to be followed when a Member seeks exemptive relief pursuant to any Rule that references the BX Rule 9600 Series. As discussed below, the Exchange proposes to amend the Supplementary Material to Existing Rule 303 to provide for the BX Rule 9600 Series to govern requests to waive applicable qualification examination requirements for applicants that apply to become associated with Members of the Exchange.

The BX Rule 9800 Series[109]

The BX Rule 9800 Series provides the process followed by the Exchange in administering temporary cease and desist orders, including the initiation of proceeding to issue such an order,[110] service thereof,[111] subsequent review of the order by the Hearing Panel,[112] the consequences of non-compliance,[113] and the process for seeking Commission review of the order.[114]

The BX Rule 9800 Series provides for temporary cease and desist orders and a process for adjudicating them. BX Rule 9810 states that with the prior written authorization of the CRO and FINRA's Chief Executive Officer (or such other senior officers as he or she designates), the Departments may initiate a temporary cease and desist proceeding with respect to alleged violations of Section 10(b) of the Act and SEC Rule 10b-5, SEC Rules 15g-1 through 15g-9, and BX Rules 2110, 2120, or 2150 (references to these BX Rules will be replaced with references to Exchange Rules 400, 405, and Chapter 6, respectively). The Departments must serve written notice upon Respondents of a proposed temporary cease and desist order and file a copy of such notice with the OHO. Additionally, if a complaint has not already been issued against the Respondents, then the Departments must file and serve a complaint together with the notice of the temporary cease and desist order. BX Rule 9820 provides for the Chief Hearing Officer of the OHO to assign a New Hearing Panel to adjudicate the proposed cease and desist order. BX Rule 9830 provides for a hearing to be held, generally speaking, not later than 15 days after service of the notice. BX Rule 9840 states that the New Hearing Panel shall issue a written decision as to whether to impose a temporary cease and desist order within 10 days after receipt of the hearing transcript, unless such deadline is extended for good cause. It states that the New Hearing Panel should impose such an order if it finds that the Departments have demonstrated a likelihood of success on the merits and that the alleged misconduct or continuation thereof is likely to result in significant dissipation or conversion of assets or other significant harm to investors prior to the completion of disciplinary proceedings. BX Rule 9850 permits a Party to apply to the New Hearing Panel to modify, set aside, limit, or suspend a temporary cease and desist order. BX Rule 9860 states that a Respondent that violates a temporary cease and desist order may have its association or membership suspended or cancelled or be subject to any fitting sanction, pursuant to BX Rule 9556. Finally, BX Rule 9870 states that a Respondent may apply to the Commission to review the issuance of a temporary cease and desist order, as set forth in Section 19 of the Act.

Additional Conforming Rule Changes

As discussed above, the Exchange is amending its By-Laws to conform to the BX by-laws, largely deleting the Existing Rule 1500, 1600, and 1700 Series,[115] and adopting in their place the BX Rule 8000 and 9000 Series. As a consequence of these changes, the Exchange proposes to amend or delete certain other Existing Rules, which are either not needed, duplicated elsewhere, or reference the deleted Existing Rules. Below is a description of the specific changes the Exchange proposes to make to its Existing Rules.

Existing Rule 100 provides definitions for purposes of the Existing Rules. The Exchange is proposing to amend this Existing Rule to include definitions for several new terms. For example, the proposed Rules will define the new term ''Code of Procedure'' as the procedural rules contained in Chapter 90. The Exchange also defines the new term ''Exchange Review Council,'' which is largely copied from BX Rule 0120(m). The Exchange notes that item (6) of the new definition differs from the BX item (6) in that it cites the analogous rules of the Exchange, which have different rule numbers. Finally, the Exchange proposes to amend the

[108] The BX Rule 9520 Series provides for a somewhat different process from the BX Rule 9550 Series. BX Rule 9522 requires Members and Associated Persons to file applications for relief from statutory disqualifications or determinations of ineligibility. BX Rule 9522(e) authorizes the Department of Member Regulation, to the extent it deems consistent with the public interest and the protection of investors, to approve a written request for relief from the eligibility requirements by a disqualified Member with or without the filing of an application by such disqualified Member, under certain specified conditions. Pursuant to BX Rule 9523, the Department of Member Regulation also may recommend membership or association or continued membership or association pursuant to a supervisory plan that is subject to approval by the Chair of the Statutory Disqualification Committee (a Subcommittee of the Exchange Review Council, as defined in BX Rule 9120(cc)) or the Exchange Review Council. Pursuant to BX Rule 9523(a), the Member or Associated Person may request a hearing before a New Hearing Panel to seek relief from disqualification or conditions imposed upon continued membership or association. In such instances, the Hearing Panel shall issue a recommended decision to the Statutory Disqualification Committee, which in turn shall issue a recommended decision to the Exchange Review Council for ultimate determination. The decision of the Exchange Review Council is subject to discretionary review by the Board. *See id.* The BX Rule also provides for the Exchange Review Council to conduct an expedited review of a recommended decision of the Statutory Disqualification Committee. *See id.* Finally, it provides for review by the Commission of any action taken pursuant to the BX Rule 9520 Series. *See id.*

[109] The BX Rule 9700 Series is reserved.

[110] BX Rule 9810.

[111] *Id.*

[112] BX Rule 9850.

[113] BX Rule 9860.

[114] BX Rule 9870.

[115] As noted elsewhere, the Exchange proposes to retain Existing Rules 1600 and 1614(a) and (d) in their current form (and to renumber Rule 1614(d) as 1614(b)).

definition of ''SEC'' so that it also includes the word ''Commission.''

Existing Rule 210 concerns the consequences of a Member's or an Associated Person's failure to pay dues, fees and other charges. The Exchange proposes to delete this Existing Rule in favor of BX Rule 9553, which is more comprehensive than the Existing Rule and differs from it in several respects. Existing Rule 210 provides that instances of nonpayment shall be reported to the Exchange President when they are 30 days past due, and that the President thereafter shall provide reasonable notice to the delinquent Member that continued non-payment will result in suspension of trading privileges. An Associated Person that fails to pay may be suspended from association with a Member. Moreover, although Existing Rule 210(a) does not specify a time period for a reasonable notice that precedes suspension, it nevertheless provides that the Exchange shall dispose of the memberships of Members who are more than six months delinquent. By contrast, BX Rule 9553 states that the Regulation Department, within an unspecified period of time period [sic] after the onset of a delinquency, may issue a written notice to the delinquent Member or Associated Person that failure to comply within 21 days of service of the notice will result in suspension or cancellation of membership or suspension or bar of association with a Member, as applicable. BX Rule 9553 also provides for detailed provisions for serving such notice, a provision for requesting a hearing with respect to such a notice, a provision declaring the effectiveness of such notices (21 days after service) when no hearing is requested, and a means to request termination of a suspension, which may be granted for good cause shown.

Existing Rule 302 sets forth circumstances in which the Exchange may deny or condition approval of membership applications or applications to associate with Members. Existing Rule 302(c) also sets forth circumstances in which the Exchange may determine not to permit a Member or Associated Person from continuing their [sic] membership or association with a Member, including because they become [sic] subject to [sic] statutory disqualification under the Act. Existing Rule 302(f) furthermore permits a Member or Associated Person that becomes subject to [sic] statutory disqualification under the Act to apply to the Exchange to continue as a Member or as an Associated Person, within 30 days of becoming subject to the statutory disqualification. Existing Rule 302(g) states that, subject to the summary suspension rules in Chapter 15, any applicant for membership or association with a Member whose application is denied or conditioned or who is not permitted to continue as a Member or Associated Person may appeal such determinations under Chapter 17 of the Existing Rules.

The Exchange proposes to modify Existing Rule 302(f) so that it refers to new and more robust procedures, set forth in the BX Rule 9520 series, by which a Member or an Associated Person may obtain relief from disqualification or ineligibility determinations (BX Rule 9522).

The Exchange also proposes to amend Existing Rule 302(g), which states that subject to Chapter 15, the BCC may review in part Exchange determinations to deny membership or association with a Member pursuant to Chapter 17 of the Existing Rules. The Exchange proposes to re-assign responsibility for these reviews from the BCC to the Exchange Review Council and replace the review process presently set forth in Chapter 17 of the Existing Rules with processes that are substantially the same as those set forth in BX Rules 1015 and 1016. Specifically, the proposed amendments to Exchange Rule 302(g) state that, subject to Chapter 90, the Exchange Review Council will have jurisdiction to review these decisions. Proposed Rule 302(g) states that anyone whose application for membership on the Exchange, association with an Exchange Member, or whose continuing membership or association is denied or conditioned by the Exchange's Membership Department, may file a written request for review by the Exchange Review Council within 25 days after service of the Exchange's decision.[116] The request must state specifically why the applicant believes that the Membership Department's decision is inconsistent with the permissible bases for denial set forth in Rule 302, or otherwise should be set aside and state whether a hearing is requested.[117] The request will be heard by a Subcommittee appointed by the Exchange Review Council or the Review Subcommittee composed of two or more persons who are either current or past members of the Council or former Directors of the Exchange.[118] If a hearing is requested or directed, it must be held within 45 days after the request for review is filed with the Exchange or service of the notice by the Subcommittee.[119] Applicants and the Membership Department may be represented by counsel at the hearing and formal rules of evidence will not apply during the hearing.[120] The Subcommittee must present a recommended decision in writing to the Exchange Review Council within 60 days after the date of the hearing, and not later than seven days before the meeting of the Exchange Review Council at which the proceeding shall be considered.[121] The Exchange Review Council must issue a proposed written decision that affirms, modifies, or reverses the Membership Department's decision, or remands the proceedings with instructions and provide the proposed decision to the Exchange Board.[122] If the Exchange Board does not call the decision for review, it shall become final. If the Exchange Review Council does not serve its final written decision within the time period prescribed by Rule 302(g)(10)(C), then the Applicant may file a written request with the Exchange Board for the Board to direct the Exchange Review Council to issue its decision immediately or show good cause why it needs additional time to issue its decision.[123] Proposed Rule 302(h), which mirrors BX Rule 1016, grants the Exchange Board discretion, at the request of a Director, to review decisions of the Exchange Review Council.[124]

Existing Rule 305(b) requires Members to file with the Exchange and keep current their addresses at which notices may be served. The Exchange proposes to amend this Existing Rule to incorporate the language set forth in BX Rule 1160. Rather than merely requiring Members to provide the Exchange with

[116] *See* proposed Rule 302(g)(1). The Exchange notes that the deadline for filing petitions for BCC review of an Exchange action under Existing Rule 1701(a) is 30 days from the date of such action. The Existing Rules pertaining to membership do not reference or define the terms ''Membership Department'' or ''Department.'' As part of this proposal, the Exchange proposes to amend Rule 302(g) to specify that the Exchange's Membership Department—rather than simply the ''Exchange''—makes determinations as to whether to grant, deny, or conditionally grant applications for membership or association or to continue as a Member or an Associated Person.

[117] *See id.*

[118] *See* proposed Rule 302(g)(4). The Exchange notes that Existing Rule 1702 provides for review by a BCC panel composed of two or more of its members.

[119] *See* proposed Rule 302(g)(6)(A).

[120] *See* proposed Rule 302(g)(6)(B) & (C). Unlike Existing Rule 1703, proposed Rule 302(g) does not provide for intervention in proceedings by interested non-Parties.

[121] *See* proposed Rule 302(g)(9).

[122] *See* proposed Rule 302(g)(10)(A).

[123] *See* proposed Rule 302(g)(10)(D).

[124] Unlike Existing Rule 1704, proposed Rule 302(h) does not authorize the applicant or the President of the Exchange to request that the Board review the decision of the Exchange Review Council.

their current address, the proposed amendment more broadly requires Members to report to the Exchange, through the FINRA Contact System, all of their contact information, including their mailing addresses, email addresses, facsimile numbers, and other information. It also requires members to update such contact information in the FINRA System within 30 days of any changes thereto, and to generally verify that such information remains accurate within 17 business days after the end of each calendar year. This proposed amendment to the Existing Rule will ensure that the Exchange has available to it multiple means of contacting its Members, including for purposes of serving the notices specified in the BX Rule 9550 series by email or by facsimile. The Exchange proposes, in its introduction to Chapter 90, to state that cross references in the BX Rule 9000 Series to BX Rule 1160 should be read instead to refer to Exchange Rule 305(b), as modified herein.

To maintain consistency with the BX Rules, the Exchange also proposes to eliminate Existing Rule 305(d), which requires Members to maintain a current copy of the Exchange's governing documents and Rules in an accessible place and make them available for examination by customers, and to replace it with BX Rule 8110, which is materially equivalent.

Existing Rule 307 and its Supplementary Material govern the sale and transfer of market maker rights. Item .01 of the Supplementary Material presently provides that decisions by the Exchange (and specifically, by the Membership Department) to deny approval of such sales and transfers are appealable under Chapter 17 of the Existing Rules. The Exchange proposes to state instead that these decisions are appealable to the Exchange Review Council. The Exchange notes that no analogue exists to this proposal in the BX Rules, which do not provide for the sale and transfer of such rights or reviews of decisions to deny or condition such sales or transfers. Nevertheless, the Exchange believes that the Exchange Review Council is the logical and appropriate body for reviewing such determinations given its other responsibilities. The Exchange also proposes to replace the review procedures set forth in Chapter 17 of the Existing Rules with processes that are substantially the same as those set forth in BX Rules 1015 and 1016. To accomplish the foregoing, the Exchange proposes to eliminate Supplementary Material .01 and insert its substance into the body of Rule 307 as paragraphs (c) and (d). Proposed Rule 307(d) states that the Exchange Review Council will have jurisdiction to review Membership Department decisions to deny the sale and transfer of market maker rights. Proposed Rule 307(d)(1) states that anyone [sic] is an owner or an approved applicant that is a party to an executed transfer agreement that is denied approval may file a written request for review by the Exchange Review Council within 25 days after service of the Exchange's decision. The request must state specifically why the applicant believes that the Membership Department's decision is inconsistent with the permissible bases for denial set forth in Rule 307(c), or otherwise should be set aside and state whether a hearing is requested.[125] The request will be heard by a Subcommittee composed of two or more persons who are either current or past members of the Council or former Directors of the Exchange.[126] If a hearing is requested or directed, the hearing must be held within 45 days after the request for review is filed with the Exchange or service of the notice directing a hearing by the Subcommittee.[127] Applicants and the Membership Department may be represented by counsel at the hearing and formal rules of evidence will not apply during the hearing.[128] The Subcommittee must present a recommended decision in writing to the Exchange Review Council within 60 days after the date of the hearing, and not later than seven days before the meeting of the Exchange Review Council at which the proceeding shall be considered.[129] The Exchange Review Council must issue a proposed written decision that affirms, modifies, or reverses the Membership Department's decision, or remands the proceedings with instructions and provide it to the Exchange Board.[130] If the Exchange Board does not call the decision for review, it shall become final. If the Exchange Review Council does not serve its final written decision within the time period prescribed by Rule 307(d)(9)(C), then the applicant may file a written request with the Exchange Board for the Board to direct the Exchange Review Council to issue its decision immediately or show good cause why it needs additional time to issue its decision.[131] Proposed Rule 307(d)(10), which mirrors BX Rule 1016, grants the Exchange Board discretion, at the request of a Director, to review decisions of the Exchange Review Council.

Existing Rule 310 requires a Member to notify the Exchange upon its adoption of a plan of liquidation or dissolution. The Existing Rule also provides that upon receipt of such notice, the Member's trading privileges may be suspended in accordance with Chapter 15 of the Existing Rules. The Exchange proposes to replace this reference to Chapter 15 with a reference to BX Rule 9558. Again, no analogue to this proposal exists in the BX rules insofar as those rules do not expressly address suspensions for such reasons or reviews of suspension determinations. Nevertheless, the Exchange believes that the process set forth in BX Rule 9558 is most appropriate for reviewing suspension determinations in these circumstances given that they already apply in circumstances where a Member is experiencing extreme financial or operating difficulty such that the Exchange determines that the Member cannot safely continue to do business on the Exchange.

The Supplementary Material to Existing Rule 313 concerns the Exchange's authority to waive the applicable qualification examination requirements and accept other standards as evidence of an applicant's qualifications for registration. The Exchange is amending this Rule to specify that such requests are handled pursuant to the BX Rule 9600 Series process. The BX Rule 9600 Series concerns the procedures for requesting exemptions, and the appeal of adverse decisions regarding an exemptive request. The Exchange notes that the proposed revisions will render the text of the Supplementary Material to Existing Rule 313 consistent with BX Rule 1070(d).

Existing Rule 410 provides for the summary suspension of a Member that fails to perform on its contracts or is insolvent or is in such financial or operational condition or is otherwise conducting business in such a manner that it cannot be permitted to continue in business without compromising the safety of customers, creditors, or the Exchange. The Existing Rule provides for such suspensions to be administered in accordance with Chapter 15 of the Rules. The Exchange proposes to replace this reference to Chapter 15 with a reference to BX Rule 9558, which provides procedures for summary proceedings for actions authorized by Section 6(d)(3) under [sic] the Act.

Existing Rule 413(b)(1) states that decisions denying market makers exemptions from standard position

[131] *See* proposed Rule 307(d)(9)(D).

limits in options trading on the Exchange are not subject to appeal under Chapter 17 of the Existing Rules. The Exchange proposes to remove this reference to Chapter 17 as the Exchange proposes to delete it.

Existing Rule 720 concerns obvious and catastrophic errors. Existing Rule 720(k) currently references the OEP as the body responsible for reviewing determinations made by Options Exchange Officials pursuant to the Rule and it sets forth procedures to govern OEP review proceedings. In light of the fact that the OEP's responsibilities will be incorporated into those of the Exchange Review Council,[132] the amendments to the Rule remove references to the OEP and replaces [sic] them with references to a panel of the Exchange Review Council. The amended Rule also includes language grafted from the BX Rules prescribing the composition of panels convened for purposes of these reviews.[133]

Existing Rule 720A also provides for reviews by a ''Review Panel'' of decisions nullifying or adjusting transactions arising out of system disruptions or malfunctions. The Exchange proposes to eliminate the Review Panel in the Exchange's Rules and transfer its responsibility to a panel of the Exchange Review Council. The new Rule also includes language grafted from the BX Rules prescribing the composition of Exchange Review Council panels convened for purposes of these reviews.[134]

Existing Rule 804 permits a Primary Market Maker to apply to the Exchange to withdraw temporarily from its Primary Market Maker status in an options class. The Existing Rule does not presently authorize reviews of Exchange determinations to deny requests for temporary withdrawals or to impose conditions on the reentry of quotations. However, BX Rule 4619(f) does provide for such reviews. To provide consistency, the Exchange proposes to amend Existing Rule 804(f) to state that the Exchange Review Council will have authority conduct such reviews.

Existing Rule 1000 provides for the treatment of the options contracts of suspended Members. In discussing the nature of suspensions to which the Existing Rule applies, it references Chapter 15 several times. The Exchange proposes replacing this reference with a reference to the Chapter 90, which comprises the BX Rules that govern suspensions in lieu of Chapter 15.

Existing Rule 1406 states that no Member or Associated Person may refuse to appear or testify before another exchange or SRO in connection with a regulatory investigation, examination or disciplinary proceeding or refuse to furnish documentary materials or other information or otherwise impede or delay such investigation, examination or disciplinary proceeding if the Exchange requests such information or testimony in connection with an inquiry resulting from an agreement entered into by the Exchange. Existing Rule 1406(d) states that when Members and Associated Persons respond to such requests for appearance, testimony, documents, or information, they shall have the same rights and procedural protections as they would if they were responding to requests from the Exchange pursuant to Existing Rule 1601(b). The Exchange proposes to replace the reference to Existing Rule 1601(b), which is being deleted, with a reference to BX Rule 8210. BX Rule 8210(a) authorizes the Regulation Department, including FINRA staff, to require a Member or Associated Persons to provide information and testimony and to permit inspection and copying of their [sic] books, records, and accounts as to any matters involved in an investigation, complaint, examination, or proceeding. BX Rule 8210(b) provides that the Regulation Department and FINRA may exercise the aforementioned authority with respect to investigations, complaints, examinations, or proceedings conducted by other SROs. Lastly, BX Rule 8210(c) states that no Member or Associated Person may fail to provide information or testimony or to submit to inspection and copying of books, records, or accounts.

Existing Rule 1800 states that any Member or Associated Person that fails to honor an arbitration award shall be subject to disciplinary proceedings in accordance with Chapter 16. The Exchange proposes to replace this reference to Chapter 16 with a reference to BX Rule 9554, which is the BX Rule that governs such sanctions.

Proposed Introductory Paragraphs to Chapters 80 and 90

The Exchange proposes to include introductory paragraphs to both Chapters 80 and 90 which state that they incorporate by reference the BX Rule 8000 and 9000 Series, respectively, and that such BX Rules shall be applicable to Exchange Members, Associated Persons, and other persons subject to the Exchange's jurisdiction.

These proposed introductory paragraphs also list instances in which cross references in the BX Rule 8000 and 9000 Series to other BX rules should be read to refer instead to the Exchange Rules, and references to defined BX terms shall be read to refer to the Exchange-related meanings of those terms. For example, references in both the BX Rule 8000 and 9000 Series to the following defined terms shall be read to refer to the Exchange-specific meanings of those terms: ''Exchange'' or ''Nasdaq BX'' shall be read to refer to the Exchange; ''Rule'' or ''BX Rule'' shall be read to refer to the Exchange Rules; ''Board'' or ''Exchange Board'' shall be read to refer to the Exchange Board of Directors; ''Member'' shall be read to refer to an Exchange Member; ''Associated Person'' shall be read to refer to an Exchange Associated Person; ''BX Regulatory Department'' or ''Regulation Department'' shall be read to refer to the Exchange's Regulatory Department; ''BX Regulation'' shall be read to refer to Exchange Regulation; ''Chief Regulatory Officer'' shall be read to refer to the Chief Regulatory Officer of the Exchange; and ''Equity Rule'' shall be read to refer to an Exchange Rule.

Additionally, the proposed introduction to Chapter 80 states that cross references in the BX Rule 8000 Series to the term ''Rule 0120'' shall be read to refer to Exchange Rule 100 and cross references in the BX Rule 8000 Series to ''Rule 1015'' shall be read to refer to Exchange Rule 302. Similarly, the proposed introduction to Chapter 90 states that cross-references in the BX Rule 9000 Series to the following terms shall be read to refer to the following Exchange Rules: ''Rule 0120'' shall be read to refer to Exchange Rule 100; ''Rule 1013'' shall be read to refer to Exchange Rules 305 and 306; ''Rule 1070'' shall be read to refer to the Supplementary Material to Exchange Rule 313; ''Rule 1160'' shall be read to refer to Exchange Rule 305(b); ''Equity Rule 2110'' shall be read to refer to Exchange Rule 400; ''Equity Rule 2120'' shall be read to refer to Exchange Rule 405; ''Rule 2140'' shall be read to refer to Exchange Rule 312; ''Equity Rule 2150'' shall be read to refer to Exchange Rules Chapter 6; ''Rule 2170'' shall be read to refer to Exchange Rule 403; ''Rule 4110A'' shall be read to refer to Exchange Rules Chapter 13; ''Rule 4120A'' shall be read to refer to Exchange Rules Chapter 13; ''Rule 10000 Series'' shall be read to refer to Exchange Rules Chapter 18; and ''Chapter III, Section 16'' shall be read to refer to Exchange Rule 403.

Finally, as noted above, the introduction to Chapter 90 states that BX IM–9216 in the BX Rules shall not apply to the Exchange, its Members,

[132] *See* proposed Rule 100(a)(20A).

[133] *See* BX Options Rules Ch. V, Sec. 6(l).

[134] *See id.*

Associated Persons, or other persons subject to the jurisdiction of the Exchange and that instead, references to BX IM–9216 shall be read to refer to Exchange Rule 1614(b). Similarly, the introduction states that the Exchange's procedures set forth in BX Rule 9216(b) and 9143(e)(3), which govern its handling of MRVP violations and the issuance of MRVP violation letters, shall also apply to the Exchange's handling of minor rule violations and the issuance of minor rule violation letters, except that the Exchange shall promptly report any final disciplinary action to the Commission, in accordance with SEC Rule 19d–1(c)(1).

Conclusion

The changes proposed herein will allow the Exchange to harmonize its investigatory and disciplinary processes with the processes of BX, thus providing a uniform process for the investigation and discipline of Members and Associated Persons across all of the Nasdaq, Inc. SROs, as administered by FINRA pursuant to RSAs. Harmonizing the investigatory and disciplinary processes of all of the Nasdaq, Inc. SROs will bring efficiency to FINRA's administration of its responsibilities under the RSAs because the process [sic] it must follow are nearly identical, and are all based on the process that FINRA follows. Harmonized processes will bring consistency to investigations and adjudication of rule violations, and will reduce the number of disciplinary processes and requirements with which Members and Associated Persons, as well as their counsel, must be familiar.

The Exchange believes that the new investigatory and disciplinary processes are substantially similar to the existing process, and where there are differences between the new and old processes, the Exchange believes that the new process does not disadvantage its Members or Associated Persons. To the contrary, the Exchange believes that the new process will benefit all parties as it provides greater detail and specificity than the retired Rules, and that it is consequently more transparent.

The Exchange intends to announce the operative date of the new Rules at least 30 days in advance via a regulatory alert.[135] To facilitate an orderly transition from the Existing Rules to the new Rules, the Exchange is proposing to apply the Existing Rules to all Letters of Consent that the CRO has approved and which are pending approval of the BCC prior to the operative date. The Exchange also will apply the Existing Rules to any matter for which, prior to the operative date, the Exchange has provided notice to a Subject of its determination to impose an MRVP fine or a minor rule violation fine whereby the Subject may yet or has contested the determination pursuant to Existing Rule 1614(a). In terms of formal disciplinary matters, any matter that has been approved for the issuance of a statement of charges by the CRO will continue under the Existing Rules. Moreover, any appeal of a matter that is pending before an OEP pursuant to Existing Rule 720, a Review Panel pursuant to Existing Rule 720A, or the BCC pursuant to Existing Rule 302 or Supplementary Material .01 to Existing Rule 307, will continue under the Existing Rules. As a consequence of this transition process, the Exchange will retain the BCC, the OEP, the Review Panel, and the existing processes during the transition period until such time that there are no longer any matters proceeding under the Existing Rules. To facilitate this transition process, the Exchange will retain a transitional Rulebook that will contain the Exchange's Rules as they are at the time of that this proposal is filed with the Commission. This transitional Rulebook will apply only to matters initiated prior to the operational date of the changes proposed herein and it will be posted to the Exchange's public rules website. When the transition is complete and there are no longer any Members, Associated Persons or other persons subject to the existing disciplinary processes, the Exchange will remove the transitional Rulebook from its public rules website.

The Exchange furthermore notes that it expects the transition from the BCC to the Exchange Review Council to be smooth given that it expects to nominate the existing (and common) members of the BX, Nasdaq, and Phlx exchange review councils to also become members of the Exchange Review Council.[136] The Exchange does not expect that any existing members of the BCC will be nominated to become members of the Exchange Review Council; however, the Exchange will ensure that, in advance of the operative day, the members of the Exchange Review Council will familiarize themselves with the Rules and procedures of the Exchange so that they will be prepared to fulfill their responsibilities.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[137] in general, and furthers the objectives of Section 6(b)(5) of the Act,[138] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange also believes that the proposal is consistent with Section 6(b)(6) of the Act,[139] which requires that the rules of an exchange provide that its members be appropriately disciplined for violations of the Act as well as the rules and regulations thereunder, or the rules of the Exchange, by expulsion, suspension, limitation of activities, functions, and operations, fine, censure, being suspended or barred from being associated with a member, or any other fitting sanction.

The Exchange believes that the proposed changes are consistent with these requirements because the changes harmonize the Exchange's investigative, disciplinary, and adjudicatory processes with the similar processes used by BX. The new processes are well-established as fair and designed to protect investors and the public interest, providing greater detail and transparency in the processes than is currently provided under the Existing Rules. Because the Exchange is adopting these Rules materially unchanged from the related BX Rules, with minor differences to account for the Exchange's unique MRVP and minor rule violation schedule of fines, the Exchange believes that the proposed changes should facilitate prompt, appropriate, and effective discipline of Members and Associated Persons consistent with the Act.

The proposed Rule change also makes miscellaneous changes to the Existing Rules to account for the adoption of the BX Rule 8000 and 9000 Series and the

[135] The Exchange notes that the proposed changes will not become operative unless and until the Commission approves the Exchange's request, which it has filed pursuant to Section 36 of the Exchange Act and SEC Rule 0–12 thereunder, for an exemption from the rule filing requirements of Section 19(b) of the Exchange Act as to changes to Chapters 80 and 90 that are effected solely by virtue of a change to the BX Rule 8000 or 9000 Series.

[136] The Exchange anticipates that the members of the Exchange Review Council will serve in a manner that is consistent with their tenures on the Nasdaq, BX, and Phlx review councils. That is, to the extent that the tenure of a member of these other review councils is due to expire on a particular date, then the same expiration date will apply to that member's tenure on the Exchange Review Council. All terms for members on the Exchange Review Council will comply with Article VI, Section 4 of the proposed By-Laws.

[137] 15 U.S.C. 78f(b).

[138] 15 U.S.C. 78f(b)(5).

[139] 15 U.S.C. 78f(b)(6).

replacement of the BCC with the Exchange Review Council. For example, subject to Chapter 90, proposed changes to Rule 302 re-assign responsibility to the Exchange Review Council to review decisions of the Exchange's Membership Department to deny or condition applications for membership and association with Exchange Members and to deny or condition continuing membership or association. The proposal also establishes a new process by which the Exchange Review Council will adjudicate such reviews. Likewise, the Exchange proposes to amend Rule 307 to re-assign responsibility to the Exchange Review Council to review decisions of the Exchange to deny sales or transfers of market maker rights. It also proposes to establish a new process by which the Exchange Review Council will adjudicate such reviews. The Exchange believes that these proposed changes to the Existing Rules are consistent with the Act because the new adjudicatory processes that the Exchange proposes to adopt in place of its existing processes are substantially similar to those that BX already utilizes. Moreover, the Exchange believes that the proposed processes will facilitate prompt, appropriate, and fair adjudications, consistent with the Act.

Additionally, the Exchange proposes to make minor updates, corrections, and conforming amendments to the Exchange's Rules, which are consistent with the Act because they are necessary to ensure that the Exchange's cross-references and terminology remain current and accurate.

The Exchange believes that harmonizing its investigative, disciplinary, and adjudicatory processes with those of BX will reduce the burden on Members and Associated Persons that are also members of BX, Nasdaq, Phlx, and/or FINRA. The Exchange notes that all but one of its Members are also members of BX, Nasdaq, Phlx, and/or FINRA. BX, Nasdaq, Phlx, and FINRA already have in place investigative, disciplinary, and adjudicatory processes that are the same or similar to those that the Exchange proposes to incorporate by reference.

As discussed above, the Exchange believes that the proposed Rules will benefit all parties involved in the Exchange's disciplinary and adjudicatory processes as they will include greater detail and specificity than do the Existing Rules. The proposal will render the Exchange's investigatory, disciplinary, and adjudicatory processes more transparent than the Existing Rules.

The Exchange also believes that adopting an Exchange Review Council is consistent with the Act because the Council's mandate is to, among other things, ensure consistent and fair application of the Exchange rules pertaining to discipline of Members and Associated Persons. The Exchange Review Council will be a body appointed by the Exchange Board of Directors and composed of representatives of the securities industry as well as persons from outside the securities industry. The broad membership of the new Exchange Review Council will ensure that the decisions and guidance it provides will be fair and balanced. The Exchange Review Council will be similar in structure and function to the BX exchange review council. In addition to reviewing appeals of disciplinary actions, the Exchange Review Council will also have jurisdiction to review membership decisions (proposed Rule 302) and appeals regarding limitations placed on Members or their employees that are subject to a statutory disqualification (BX Rule 9524). Additionally, the Exchange Review Council may consider and make recommendations to the Board on policy and rule changes relating to business and sales practices of Exchange Members and Associated Persons, and enforcement policies, including policies with respect to fines and other sanctions. Thus, the Exchange Review Council will provide the Exchange and market participants with a fair and impartial body overseeing disciplinary matters, as well as the rules and policies concerning the disciplinary process. For these reasons, the Exchange believes that adoption of the Exchange Review Council is consistent with the Act.

The Exchange believes that eliminating the BCC, the OEP (as provided for under Existing Rule 720), and the Review Panel (as provided for under Existing Rule 720A) is consistent with Sections 6(b)(5) and 6(b)(6) of the Act,[140] because the Exchange Review Council and the New Hearing Panels will assume the responsibilities of the BCC and the Panels. In particular, the functions of the Current Hearing Panels of the BCC will be handled by the New Hearing Panels, which the OHO shall convene. Going forward, the BCC's (and the CRO's) responsibility for approving settlements will be assumed by the Exchange Review Council and, in certain instances, the ODA. The BCC's responsibilities for hearing appeals of Exchange decisions on membership or association with a Member will be assumed by the Exchange Review Council. The responsibilities of the OEP and the Review Panel to hear appeals of Exchange determinations to nullify or adjust transactions that involve obvious errors or that result from system disruptions and malfunctions also will be assumed by the Exchange Review Council. The Exchange believes that the proposal will provide for the Exchange Review Council, the New Hearing Panels, and the ODA to execute the responsibilities of the BCC and the Panels in a manner that the Commission, within the context of the BX Rules, has already deemed to be consistent with the Act.[141] For example, the Exchange proposes to replace its existing process for handling appeals of membership decisions, as set forth in Existing Rule 302 and Chapter 17, with a process that BX already employs in BX Rules 1015 and 1016. Moreover, most Exchange Members and Associated Persons will already be familiar with the proposed responsibilities and procedures of the Exchange Review Council, the New Hearing Panels, and the ODA from their experiences as members of BX and other self-regulatory organizations whose rules provide for similar assignments of responsibilities and processes.

The Exchange believes that its proposal furthers the objectives of Section 6(b)(7) of the Act[142] in that it is designed to provide a fair procedure for the disciplining of members and Associated Persons, the denial of membership to any person seeking membership therein, the barring of any person from becoming associated with a Member thereof, and the prohibition or limitation by the Exchange of any person with respect to access to services offered by the Exchange or a Member thereof. Specifically, the Exchange believes that the proposed investigatory, disciplinary, and adjudicatory processes are consistent with Section 6(b)(7) of the Act[143] because they are based on the existing processes used by BX. The BX processes are well-established as consistent with the Act.[144]

Last, the Exchange believes that its proposal to phase-in the implementation of the new investigatory, disciplinary, and adjudicatory processes is consistent with Section 6(b)(7)[145] of the Act because both the current and proposed processes are consistent with the Act, providing fair procedures for investigating, disciplining, and

[140] 15 U.S.C. 78f(b)(5)–(6).

[144] *See* n.141, *supra.*

[145] 15 U.S.C. 78f(b)(7).

adjudicating the rights of Members and Associated Persons. The Exchange is proposing to provide advanced notice of the implementation date of the new processes, and will apply the new processes to new matters that are initiated on or after that implementation date. Any matters initiated prior to the implementation date will be completed using the current processes. As a consequence, the Exchange will delete the applicable portions of Chapters 15–17 from the Exchange's Rulebook, but it will maintain a transitional Rulebook on the Exchange's public rules website (*http://nasdaqISE.cchwallstreet.com/*), which will contain the Exchange Rules as they are at the time of filing this rule change.[146] These transitional Rules will apply exclusively to the matters initiated prior to the implementation date. Upon conclusion of the last matter to which the transitional rules apply, the Exchange will remove the defunct transitional rules from its public rules website. Thus, the transition will be conducted in a fair, orderly, and transparent manner.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended [sic]. The proposed rule change is not intended to address competitive issues, but it should reduce burdens on Members, [sic] and Associated Persons. Specifically and as described in detail above, the Exchange believes that this change will bring efficiency and consistency in application of the investigative, disciplinary, and adjudicatory processes, thereby reducing the burden on Members and Associated Persons who are also members of BX.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[147] and subparagraph (f)(6) of Rule 19b–4 thereunder.[148]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ISE–2018–59 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–ISE–2018–59. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ISE–2018–59 and should be submitted on or before August 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[149]

Eduardo A. Aleman,

Assistant Secretary.

[FR Doc. 2018–16271 Filed 7–30–18; 8:45 am]

BILLING CODE 8011–01–P

[146] The posting of the transitional rules on the public rules website will make it clear what disciplinary proceedings are governed by the transitional rules (*i.e.,* matters initiated prior to the implementation date).

[147] 15 U.S.C. 78s(b)(3)(A)(iii).

[148] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[149] 17 CFR 200.30–3(a)(12).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83704; File No. SR–GEMX–2018–24]

Self-Regulatory Organizations; Nasdaq GEMX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Align Existing Investigatory and Disciplinary Processes and Related Rules With the Investigatory and Disciplinary Processes and Associated Rules of Nasdaq BX, Inc.

July 25, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 12, 2018, Nasdaq GEMX, LLC (''GEMX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to align its existing investigatory and disciplinary processes and related rules with the investigatory and disciplinary processes and associated rules of Nasdaq BX, Inc. (''BX'').

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqgemx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt new investigatory, disciplinary, and adjudicatory processes that are substantially the same as those of its sister exchange, BX. Specifically, the Exchange proposes to establish new Chapters 80 and 90 of its Rules [3] and then incorporate by reference into those Chapters the BX Rule 8000 and 9000 Series,[4] which set forth and govern the BX investigatory, disciplinary, and adjudicative processes.[5] The Exchange also proposes to amend its By-Laws to establish a new body to review disciplinary and certain other matters (the ''Exchange Review Council'') that is similar to the exchange review council that BX utilizes for such purposes.[6] These proposals, when coupled with certain changes to the Exchange's other Rules, including Rules that govern appeals of the Exchange's membership and other decisions, will render the Exchange's investigative, disciplinary, and adjudicatory processes substantially the same as those, not only of BX, but also of other Nasdaq, Inc. exchanges.[7] The proposal [sic] change will also further harmonize the work that the Financial Industry Regulatory Authority (''FINRA'') conducts for all these exchanges.

The Exchange's current investigatory, disciplinary, and adjudicatory processes are set forth in Chapters 15–17 of its Rules. Chapters 15–17 of the Exchange's Rules, in turn, incorporate by reference the investigatory, disciplinary, and adjudicatory processes of Nasdaq ISE, LLC (''Nasdaq ISE'') that are set forth in the corresponding chapters of the Nasdaq ISE rulebook. As part of a parallel Nasdaq ISE filing that also proposes to adopt the investigatory, disciplinary, and adjudicatory processes and rules of BX (and incorporate them by reference into new chapters 80 and 90 of the Nasdaq ISE rules), Nasdaq ISE proposes to eliminate chapters 15 and 17 of its rules, and to largely eliminate chapter 16.[8] These proposed changes to ISE chapters 15–17 will apply automatically to Chapters 15–17 of the Exchange's Rules. Accordingly, reference should be made to SR–ISE–2018–59 for a detailed explanation of the proposed changes to Chapters 15–17 and the purposes of those changes. Likewise, reference should be made to SR–ISE–2018–59 for a detailed discussion of the BX Rule 8000 and 9000 Series, which will largely replace Chapters 15–17 for both Nasdaq ISE and the Exchange. Lastly, reference should be made to SR–ISE–2018–59 for a discussion of proposed changes to certain other ISE rules that the Exchange also incorporates by reference and that are relevant to the Exchange's adoption of its new investigatory, disciplinary, and adjudicatory processes.[9]

The following is a discussion of proposed changes that are specific to the Rules of the Exchange and that are not otherwise addressed in or accomplished by the corresponding Nasdaq ISE filing. These changes include: (1) The elimination of the Exchange's BCC and its replacement with the Exchange Review Council; and (2) changes to Exchange Rules that are necessary to accommodate the new investigatory, disciplinary, and adjudicatory processes and rules and to harmonize those processes and rules with those of BX.

Elimination of the Business Conduct Committee and Establishment of the Exchange Review Council

The Exchange presently utilizes the BCC to help it enforce its Rules with respect to its members (''Members'') and persons associated with its members (''Associated Persons''). The BCC is a committee, established by the Board of Directors,[10] whose enforcement jurisdiction includes the following: (1) Ordering investigations of possible Rule violations; (2) considering letters of consent in expedited disciplinary actions; (3) making its members available to serve on Hearing Panels that adjudicate formal disciplinary proceedings; (4) imposing sanctions on Members or Associated Persons in disciplinary proceedings; (5) reviewing Exchange actions involving minor rule violations; (6) appointing panels to conduct hearings and reviews of Exchange actions that deny membership or Member association privileges; and (7) generally overseeing all matters relating to the conduct of disciplinary hearings and hearings for review of Exchange decisions, and providing the Exchange with advice for improving disciplinary procedures.[11]

The Exchange proposes to retire the BCC [12] and to amend its By-Laws to

[3] The Exchange proposes to add Chapters 23–79 and Chapters 81–89 to its Rules, but reserve such Chapters for future use.

[4] Citation herein to rules of the proposed Chapters 80 and 90 will be preceded by the term ''BX Rule'' to reflect incorporation of the BX Rule 8000 and 9000 Series. References to current rules will be preceded by the term ''Existing Rule.''

[5] The Exchange proposes to separately request an exemption from the rule filing requirements of Section 19(b) of the Act for changes to Chapters 80 and 90 to the extent such rules are effected solely by virtue of a change to the BX Rule 8000 and 9000 Series.

[6] As discussed below, the Exchange Review Council will assume responsibilities that presently reside with the Business Conduct Committee (the ''BCC''). The Exchange also proposes to eliminate the BCC.

[7] The Exchange notes that the BX Rule 8000 and 9000 Series are substantially similar to corresponding rules of The Nasdaq Stock Market, LLC (''Nasdaq'') and Nasdaq PHLX, LLC (''Phlx''). Moreover, the Exchange notes that Nasdaq ISE, LLC and Nasdaq MRX, LLC will propose similar changes to their respective investigatory, disciplinary, and adjudicatory processes and associated rules that will render them substantially similar to those of BX.

[8] *See* SR–ISE–2018–59. Nasdaq ISE proposes to retain Rule 1600, which sets forth the general jurisdiction of the Exchange with respect to disciplinary matters. It also proposes to retain Existing Rule 1614(a), which sets forth its authority to impose fines of up to $2,500 for violations of the Exchange's Minor Rule Violation Plan (''MRVP'') and up to $5,000 for minor rule violations (other than those subject to an MRVP). Nasdaq ISE also proposes to retain Existing Rule 1614(d) (to be renumbered as Rule 1614(b)), which sets forth the Exchange's schedule of MRVP violations and minor rule violations and their associated fines.

[9] The proposed changes involve Nasdaq ISE Rules 410, 413(b)(1), 1000, 1406, and 1800.

[10] *See* Resolution of the Board of Directors of the ISE Gemini Delegating Authority, dated July 30, 2013.

[11] *See* GEMX Business Conduct Committee Charter, as amended, May 1, 2003.

[12] In a February 4, 2016 resolution, the Exchange Board delegated its authority to the President of the Exchange to establish a BCC to, among other things, conduct disciplinary hearings under Chapter 16 of the Existing Rules and conduct other hearings and

Continued

establish in its place the Exchange Review Council. The amended By-Laws that the Exchange proposes to adopt in this regard are substantially the same as those that BX adopted to establish the BX Exchange Review Council.[13] Thus, the By-Laws provide for the Exchange Review Council to have the same general structure and powers as does the BX Exchange Review Council.[14] The proposed By-Laws will authorize the Exchange Review Council to adjudicate disciplinary actions and approve settlements thereof as well as make recommendations to the Board on certain policy matters and rule changes. Such policy functions of the Exchange Review Council render its jurisdiction broader than that of the BCC.

Specifically, proposed Article VI, Section 1 of the proposed By-Laws provides that the Exchange Review Council may be authorized to act for the Board with respect to: An appeal or review of a disciplinary proceeding, a statutory disqualification proceeding, or a membership proceeding; a review of an offer of settlement, a letter of acceptance, waiver, and consent, and a minor rule violation plan letter; the exercise of exemptive authority; and such other proceedings or actions as may be authorized by the Exchange rules. The Exchange Review Council also may consider and make recommendations to the Board on policy and rule changes relating to business and sales practices of Exchange Members and Associated Persons and enforcement policies, including policies with respect to fines and other sanctions. It may advise the Board on regulatory proposals and industry initiatives relating to quotations, execution, trade reporting, and trading practices and it may advise the Board in its administration of programs and systems for the surveillance and enforcement of rules governing Exchange Members' conduct and trading activities in the Exchange.

Proposed Article VI, Section 2 states that the Exchange Review Council would consist of no fewer than eight and no more than 12 members. The Exchange Review Council must include a number of Member Representative members [15] that is equal to at least 20% of the total number of members of the Exchange Review Council. The number of Non-Industry members,[16] including at least three Public members,[17] shall equal or exceed the sum of the number of Industry members [18] and Member Representative members. As soon as practicable, following the appointment of members, the Exchange Review Council shall elect a Chair from among its members. The Chair shall have such powers and duties as may be determined from time to time by the Exchange Review Council. The Board, by resolution adopted by a majority of Directors then in office, may remove the Chair from such position at any time for refusal, failure, neglect, or inability to discharge the duties of Chair. No more than 50% of the members of the Exchange Review Council shall be engaged in market making activity or employed by an Exchange Member firm whose revenues from market making activity exceed 10 percent of its total revenues.

Proposed Article VI, Section 3 requires the Exchange's Secretary to collect from each nominee for the office of member of the Exchange Review Council such information as is reasonably necessary to serve as the basis for a determination of the nominee's qualifications and classification as an Industry, Member Representative, Non-Industry, or Public member. The Secretary must also certify to the Nominating Committee or the Member Nominating Committee [19] (as applicable) each nominee's qualifications and classification. After appointment to the Exchange Review Council, each member must update such information at least annually and upon request of the Exchange's Secretary, and must report immediately to the Secretary any change in such information.

Proposed Article VI, Section 4 provides that Exchange Review Council members shall serve three-year terms, or until a successor is duly appointed and qualified, except in the event of earlier termination from office by reason by death, resignation, removal, disqualification, or other reason. Members are term limited out after two consecutive terms. Proposed Article VI, Section 5 sets forth the procedures for resigning as a member of the Exchange Review Council and provides that an Exchange Review Council member may resign at any time upon written notice to the Board. Under proposed Article VI, Section 6, any member of the Exchange Review Council may be removed from office at any time for refusal, failure, neglect, or inability to discharge the duties of such office by majority vote of the Board.

Under proposed Article VI, Section 7, an Exchange Review Council member would be disqualified and removed immediately upon a determination by the Board, by a majority vote, (a) that the member no longer satisfies the classification (Industry, Member Representative, Non-Industry, or Public) for which the member was elected; and (b) that the member's continued service as such would violate the compositional requirements of the Exchange Review Council set forth in Article VI, Section 2. If the term of office of an Exchange Review Council member terminates under this Section, and the remaining term of office of such member at the time of termination is not more than six months, during the period of vacancy the Exchange Review Council shall not be deemed to be in violation of Article VI, Section 2 by virtue of such vacancy. Proposed Article VI, Section 8 contains provisions for the filling of vacancies on the Exchange Review Council and states that if a position on the Exchange Review Council becomes vacant, the Nominating Committee or the Member Nominating Committee (as applicable) shall nominate, and the Board shall appoint a person satisfying the qualifications for the position as provided in Article VI, Section 2 to fill

reviews as set forth in Chapter 17 of the Existing Rules. On February 1, 2017, the Board passed a resolution that both revoked the President's authority to establish a BCC and authorized the establishment of an Exchange Review Council, effective upon the date when this rule filing becomes operative.

[13] The BX by-laws differ from the proposed Exchange By-Laws because the BX by-laws have a different numbering convention from the Exchange's By-Laws and, in various places, the BX by-laws refer to a Listing and Hearing Review Council, which has no analogue with respect to the Exchange.

[14] The BX by-laws do not describe in detail the process of the proceedings over which the BX Exchange Review Council presides. However, Section 7.9 of the BX by-laws state [sic] that a quorum of three BX Exchange Review Council members is necessary to adjudicate appeals of determinations made under BX Rules 4612 (appeal of denial of registration as an Equities Market Maker), 4619 (review of denial of an excused withdrawal of Equities Market Maker quotation), 4620 (appeal of denial of reinstatement of Equities Market Maker that accidentally withdraws), 11890 (appeal of clearly erroneous transaction determination), and BX Options Chapter V, Section 6 (appeal of obvious error determination). *See* BX by-laws, Article VII, Section 9. The Exchange's Rules do not have analogues to BX Rules 4612, 4620, and 11890 and, as such, the corresponding provision of the Exchange's proposed By-Laws (Article VII, Section 9) provides only that a quorum of three Exchange Review Council members is necessary for it to adjudicate appeals involving determinations made under Rules 720 (appeal of obvious error determination), 720A (appeal of determinations of erroneous trades due to system malfunctions and disruptions), and 804 (review of denial of an excused withdrawal of market maker quotation).

[15] *See* n.20, *infra.*

[16] *See id.*

[17] *See id.*

[18] *See id.*

[19] The terms ''Nominating Committee'' and ''Member Nominating Committee'' are defined in Exchange By-Laws, Article I.

such vacancy, except that if the remaining term of office for the vacant position is not more than six months, no replacement shall be required.

Proposed Article VI, Section 9 provides that a quorum of the Exchange Review Council will consist of a majority of its members, including not less than 50% of its Non-Industry members and one Member Representative member. Proposed Article VI, Section 10 contains provisions related to the meetings of the Exchange Review Council.

Under proposed Article VI, Section 11, the Exchange Review Council is required to establish a Review Subcommittee to determine whether disciplinary and membership proceedings decisions should be called for review by the Exchange Review Council under the disciplinary and membership rules to be proposed for the Exchange. The Review Subcommittee shall be composed of no fewer than two and no more than four members of the Exchange Review Council. The number of Non-Industry members of the Review Subcommittee shall equal or exceed the sum of the number of Industry members and Member Representative members of the Review Subcommittee, and the subcommittee must include at least one Member Representative member. At all meetings of the Review Subcommittee, a quorum for the transaction of business shall consist of not less than 50 percent of the members of the Review Subcommittee, including not less than 50 percent of the Non-Industry members of the Review Subcommittee and one Member Representative member of the Review Subcommittee.[20]

The BX Rules implement the foregoing responsibilities of the Exchange Review Council by establishing various procedures to govern its reviews. As the Exchange describes in further detail below, the Exchange proposes to transfer to the Exchange Review Council (or panels thereof) certain responsibilities currently vested in other Exchange committees or the Board. For example, pursuant to Existing Rule 720, an Obvious Error Panel (''OEP'') is presently responsible for reviewing determinations regarding obvious and catastrophic errors. Pursuant to Existing Rule 720A, a ''Review Panel'' is responsible for reviewing determinations to nullify or adjust transactions that arise from system disruptions and malfunctions. The Exchange is proposing to eliminate the OEP and the Review Panel and to transfer their responsibilities to a panel of the new Exchange Review Council, which corresponds to the practice of BX. Subject to Chapter 90, the Exchange also proposes to transfer responsibility to the Exchange Review Council to review denials or conditions imposed upon those that seek to become or remain a Member of the Exchange or become or remain associated with a Member of the Exchange, as set forth in Existing Rule 303.[21] In addition, the Exchange proposes to amend Existing Rule 804 to provide for the Exchange Review Council to review determinations regarding temporary withdrawals of quotations, which are not reviewable under the Existing Rules. The Exchange notes that BX vests in its Exchange Review Council responsibility for reviewing similar types of matters.[22]

Other Conforming Rule Changes

The Exchange proposes to amend or delete certain other Existing Rules, which are either not needed, duplicated elsewhere, or reference the deleted Existing Rules. Below is a description of the specific changes the Exchange proposes to make to its Existing Rules.

Existing Rule 100 provides definitions for purposes of the Existing Rules. The Exchange is proposing to amend this Existing Rule to include definitions for several new terms. For example, the proposed Rules will define the new term ''Code of Procedure'' as the procedural rules contained in Chapter 90. The Exchange also defines the new term ''Exchange Review Council,'' which is largely copied from BX Rule 0120(m). The Exchange notes that item (6) of the new definition differs from the BX item (6) in that it cites the analogous rules of the Exchange, which have different rule numbers. Finally, the Exchange proposes to amend the definition of ''SEC'' so that it also includes the word ''Commission.''

Existing Rule 206 concerns the consequences of a Member's or an Associated Person's failure to pay dues, fees and other charges. The Exchange proposes to delete this Existing Rule in favor of BX Rule 9553, which is more comprehensive than the Existing Rule and differs from it in several respects. Existing Rule 206 provides that instances of nonpayment shall be reported to the Exchange's Chief Executive Officer and President when they are 30 days past due, and that the Chief Executive Officer and President thereafter shall provide reasonable notice to the delinquent Member that continued non-payment will result in suspension of trading privileges. An Associated Person that fails to pay may be suspended from association with a Member. By contrast, BX Rule 9553 states that the Exchange's Regulation Department, within an unspecified period of time period [sic] after the onset of a delinquency, may issue a written notice to the delinquent Member or Associated Person that failure to comply within 21 days of service of the notice will result in suspension or cancellation of membership or suspension or bar of association with a Member, as applicable. BX Rule 9553 also provides for detailed provisions for serving such notice, a provision for requesting a hearing with respect to such a notice, a provision declaring the effectiveness of such notices (21 days after service) when no hearing is requested, and a means to request termination of a suspension, which may be granted for good cause shown.

Existing Rule 303 sets forth circumstances in which the Exchange may deny or condition approval of membership applications or applications to associate with Members. Existing Rule 303(c) also sets forth circumstances in which the Exchange may determine not to permit a Member or Associated Person from continuing their [sic] membership or association with a Member, including because they become [sic] subject to [sic] statutory disqualification under the Act. Existing Rule 303(f) furthermore permits a Member or Associated Person that becomes subject to [sic] statutory disqualification under the Act to apply to the Exchange to continue as a Member or as an Associated Person, within 30 days of becoming subject to the statutory disqualification. Existing

[20] In addition to adding Article VI to the By-Laws, the Exchange proposes to make changes to other articles of the By-Laws to accommodate the existence of the Exchange Review Council. For example, the Exchange proposes to amend Article I, which defines the terms that the Exchange uses in the By-Laws, to provide that the terms ''Industry member,'' ''Member representative member,'' ''Non-industry member,'' and ''Public member'' mean, in part, members of the Exchange Review Council. The Exchange also proposes to amend Article III, Section 6, to add a new subsection (a) that directs the Board to appoint an Exchange Review Council, as provided in Article VI. It also proposes to amend Article III, Section 6(b) to state that the Nominating Committee and the Member Nominating Committee of the Board shall have responsibility for nominating members of the Exchange Review Council. Finally, the Exchange proposes to amend Sections 7 and 8 of Article III, which deal with Director conflicts-of-interest/self-interested transactions and Director compensation, respectively, to ensure that the restrictions and benefits that these provisions provide apply to Exchange Review Council members.

[21] The Exchange notes that it proposes to establish procedures in Existing Rule 303 to govern the review by the Exchange Review Council of adverse membership and association determinations. The Exchange proposes to base these procedures upon those set forth BX Rules 1015 and 1016.

[22] *See* Securities Exchange Act Release No. 72149 (May 12, 2014), 79 FR 28564 (May 16, 2014) (SR–BX–2014–024).

Rule 303(g) states that, subject to the summary suspension rules in Chapter 15, any applicant for membership or association with a Member whose application is denied or conditioned or who is not permitted to continue as a Member or Associated Person may appeal such determinations under Chapter 17 of the Existing Rules.

The Exchange proposes to modify Existing Rule 303(f) so that it refers to new and more robust procedures, set forth in the BX Rule 9520 series, by which a Member or an Associated Person may obtain relief from disqualification or ineligibility determinations (BX Rule 9522).

The Exchange also proposes to amend Existing Rule 303(g), which states that subject to Chapter 15, the BCC may review, in part, Exchange determinations to deny membership or association with a Member pursuant to Chapter 17 of the Existing Rules. The Exchange proposes to re-assign responsibility for these reviews from the BCC to the Exchange Review Council and replace the review process presently set forth in Chapter 17 of the Existing Rules with processes that are substantially the same as those set forth in BX Rules 1015 and 1016. Specifically, the proposed amendments to Exchange Rule 303(g) state that, subject to Chapter 90, the Exchange Review Council will have jurisdiction to review these decisions. Proposed Rule 303(g) states that anyone whose application for membership on the Exchange, association with an Exchange Member, or whose continuing membership or association is denied or conditioned by the Exchange's Membership Department, may file a written request for review by the Exchange Review Council within 25 days after service of the Exchange's decision.[23] The request must state specifically why the applicant believes that the Membership Department's decision is inconsistent with the permissible bases for denial set forth in Rule 303, or otherwise should be set aside and state whether a hearing is requested.[24] The request will be heard by a Subcommittee appointed by the Exchange Review Council or the Review Subcommittee composed of two or more persons who are either current or past members of the Council or former Directors of the Exchange.[25] If a hearing is requested or directed, it must be held within 45 days after the request for review is filed with the Exchange or service of the notice by the Subcommittee.[26] Applicants and the Membership Department may be represented by counsel at the hearing and formal rules of evidence will not apply during the hearing.[27] The Subcommittee must present a recommended decision in writing to the Exchange Review Council within 60 days after the date of the hearing, and not later than seven days before the meeting of the Exchange Review Council at which the proceeding shall be considered.[28] The Exchange Review Council must issue a proposed written decision that affirms, modifies, or reverses the Membership Department's decision, or remands the proceedings with instructions and provide the proposed decision to the Exchange Board.[29] If the Exchange Board does not call the decision for review, it shall become final. If the Exchange Review Council does not serve its final written decision within the time period prescribed by Rule 303(g)(10)(C), then the Applicant may file a written request with the Exchange Board for the Board to direct the Exchange Review Council to issue its decision immediately or show good cause why it needs additional time to issue its decision.[30] Proposed Rule 303(h), which mirrors BX Rule 1016, grants the Exchange Board discretion, at the request of a Director, to review decisions of the Exchange Review Council.[31]

Existing Rule 307(b) requires Members to file with the Exchange and keep current their addresses at which notices may be served. The Exchange proposes to amend this Existing Rule to incorporate the language set forth in BX Rule 1160. Rather than merely requiring Members to provide the Exchange with their current address, the proposed amendment more broadly requires Members to report to the Exchange, through the FINRA Contact System, all of their contact information, including their mailing addresses, email addresses, facsimile numbers, and other information. It also requires members to update such contact information in the FINRA System within 30 days of any changes thereto, and to generally verify that such information remains accurate within 17 business days after the end of each calendar year. This proposed amendment to the Existing Rule will ensure that the Exchange has available to it multiple means of contacting its Members, including for purposes of serving the notices specified in the BX Rule 9550 series by email or by facsimile. The Exchange proposes, in its introduction to Chapter 90, to state that cross references in the BX Rule 9000 Series to BX Rule 1160 should be read instead to refer to Exchange Rule 307(b), as modified herein.

To maintain consistency with the BX Rules, the Exchange also proposes to eliminate Existing Rule 307(d), which requires Members to maintain a current copy of the Exchange's governing documents and Rules in an accessible place and make them available for examination by customers, and to replace it with BX Rule 8110, which is materially equivalent.

Existing Rule 308 requires a Member to notify the Exchange upon its adoption of a plan of liquidation or dissolution. The Existing Rule also provides that upon receipt of such notice, the Member's trading privileges may be suspended in accordance with Chapter 15 of the Existing Rules. The Exchange proposes to replace this reference to Chapter 15 with a reference to BX Rule 9558. Again, no analogue to this proposal exists in the BX rules insofar as those rules do not expressly address suspensions for such reasons or reviews of suspension determinations. Nevertheless, the Exchange believes that the process set forth in BX Rule 9558 is most appropriate for reviewing suspension determinations in these circumstances given that they already apply in circumstances where a Member is experiencing extreme financial or operating difficulty such that the Exchange determines that the Member cannot safely continue to do business on the Exchange.

The Supplementary Material to Existing Rule 306 concerns the Exchange's authority to waive the applicable qualification examination requirements and accept other standards as evidence of an applicant's qualifications for registration. The

[23] *See* proposed Rule 303(g)(1). The Exchange notes that the deadline for filing petitions for BCC review of an Exchange action under Existing Rule 1701(a) is 30 days from the date of such action. The Existing Rules pertaining to membership do not reference or define the terms ''Membership Department'' or ''Department.'' As part of this proposal, the Exchange proposes to amend Rule 303(g) to specify that the Exchange's Membership Department—rather than simply the ''Exchange''—makes determinations as to whether to grant, deny, or conditionally grant applications for membership or association or to continue as a Member or an Associated Person.

[24] *See* proposed Rule 303(g)(1).

[25] *See* proposed Rule 303(g)(4). The Exchange notes that Existing Rule 1702 provides for review by a BCC panel composed of two or more of its members.

[26] *See* proposed Rule 303(g)(6)(A).

[27] *See* proposed Rule 303(g)(6)(B) & (C). Unlike Existing Rule 1703, proposed Rule 303(g) does not provide for intervention in proceedings by interested non-parties.

[28] *See* proposed Rule 303(g)(9).

[29] *See* proposed Rule 303(g)(10)(A).

[30] *See* proposed Rule 303(g)(10)(D).

[31] Unlike Existing Rule 1704, proposed Rule 303(h) does not authorize the applicant or the President of the Exchange to request that the Board review the decision of the Exchange Review Council.

Exchange is amending this Rule to specify that such requests are handled pursuant to the BX Rule 9600 Series process. The BX Rule 9600 Series concerns the procedures for requesting exemptions, and the appeal of adverse decisions regarding an exemptive request. The Exchange notes that the proposed revisions will render the text of the Supplementary Material to Existing Rule 306 consistent with BX Rule 1070(d).

Existing Rule 720 concerns obvious and catastrophic errors. Existing Rule 720(k) currently references the OEP as the body responsible for reviewing determinations made by Options Exchange Officials pursuant to the Rule and it sets forth procedures to govern OEP review proceedings. In light of the fact that the OEP's responsibilities will be incorporated into those of the Exchange Review Council,[32] the amendments to the Rule remove references to the OEP and replaces [sic] them with references to a panel of the Exchange Review Council. The amended Rule also includes language grafted from the BX Rules prescribing the composition of panels convened for purposes of these reviews.[33]

Existing Rule 720A also provides for reviews by a ''Review Panel'' of decisions nullifying or adjusting transactions arising out of system disruptions or malfunctions. The Exchange proposes to eliminate the Review Panel in the Exchange's Rules and transfer its responsibility to a panel of the Exchange Review Council. The new Rule also includes language grafted from the BX Rules prescribing the composition of Exchange Review Council panels convened for purposes of these reviews.[34]

Existing Rule 804 permits a Primary Market Maker to apply to the Exchange to withdraw temporarily from its Primary Market Maker status in an options class. The Existing Rule does not presently authorize reviews of Exchange determinations to deny requests for temporary withdrawals or to impose conditions on the reentry of quotations. However, BX Rule 4619(f) does provide for such reviews. To provide consistency, the Exchange proposes to amend Existing Rule 804(f) to state that the Exchange Review Council will have authority conduct such reviews.

As discussed above, Chapter 16 of the Exchange's Rules incorporates by reference Chapter 16 of the ISE rules. However, Chapter 16 of the Exchange's Rules contains an introductory paragraph that references the incorporation by reference and provides instructions for cross-references. The Exchange proposes to delete the last line of this introductory paragraph, which specifies that a reference in the ISE Rule 1615 to Nasdaq ISE's contract with FINRA shall be read to refer to the Exchange's contract with FINRA. The Exchange proposes to delete this sentence because Nasdaq ISE is proposing to delete its Rule 1615, such that this sentence will no longer be necessary. The Exchange also proposes to change the title of Chapter 16 from ''Discipline'' to ''Disciplinary Jurisdiction and Minor Rule Violation Fines'' so that it conforms to the new title of Chapter 16 of the Nasdaq ISE Rules and to the content of that Chapter that Nasdaq ISE proposes to revise.[35]

Proposed Introductory Paragraphs to Chapters 80 and 90

The Exchange proposes to include introductory paragraphs to both Chapters 80 and 90 which state that they incorporate by reference the BX Rule 8000 and 9000 Series, respectively, and that such BX Rules shall be applicable to Exchange Members, Associated Persons, and other persons subject to the Exchange's jurisdiction.

These proposed introductory paragraphs also list instances in which cross references in the BX Rule 8000 and 9000 Series to other BX rules should be read to refer instead to the Exchange Rules, and references to defined BX terms shall be read to refer to the Exchange-related meanings of those terms. For example, references in both the BX Rule 8000 and 9000 Series to the following defined terms shall be read to refer to the Exchange-specific meanings of those terms: ''Exchange'' or ''Nasdaq BX'' shall be read to refer to the Exchange; ''Rule'' or ''BX Rule'' shall be read to refer to the Exchange Rules; ''Board'' or ''Exchange Board'' shall be read to refer to the Exchange Board of Directors; ''Member'' shall be read to refer to an Exchange Member; ''Associated Person'' shall be read to refer to an Exchange Associated Person; ''BX Regulatory Department'' or ''Regulation Department'' shall be read to refer to the Exchange's Regulatory Department; ''BX Regulation'' shall be read to refer to Exchange Regulation; ''Chief Regulatory Officer'' shall be read to refer to the Chief Regulatory Officer of the Exchange; and ''Equity Rule'' shall be read to refer to an Exchange Rule.

Additionally, the proposed introduction to Chapter 80 states that cross references in the BX Rule 8000 Series to the term ''Rule 0120'' shall be read to refer to Exchange Rule 100 and cross references in the BX Rule 8000 Series to ''Rule 1015'' shall be read to refer to Exchange Rule 303. Similarly, the proposed introduction to Chapter 90 states that cross-references in the BX Rule 9000 Series to the following terms shall be read to refer to the following Exchange Rules: ''Rule 0120'' shall be read to refer to Exchange Rule 100; ''Rule 1013'' shall be read to refer to Exchange Rules 302 and 307; ''Rule 1070'' shall be read to refer to the Supplementary Material to Exchange Rule 306; ''Rule 1160'' shall be read to refer to Exchange Rule 307(b); ''Equity Rule 2110'' shall be read to refer to Exchange Rule 400; ''Equity Rule 2120'' shall be read to refer to Exchange Rule 405; ''Rule 2140'' shall be read to refer to Exchange Rule 309; ''Equity Rule 2150'' shall be read to refer to Exchange Rules Chapter 6; ''Rule 2170'' shall be read to refer to Exchange Rule 403; ''Rule 4110A'' shall be read to refer to Exchange Rules Chapter 13; ''Rule 4120A'' shall be read to refer to Exchange Rules Chapter 13; ''Rule 10000 Series'' shall be read to refer to Exchange Rules Chapter 18; and ''Chapter III, Section 16'' shall be read to refer to Exchange Rule 403.

Finally, the introduction to Chapter 90 states that BX IM–9216 in the BX Rules shall not apply to the Exchange, its Members, Associated Persons, or other persons subject to the jurisdiction of the Exchange and that instead, references to BX IM–9216 shall be read to refer to Exchange Rule 1614(b). Similarly, the introduction states that the procedures set forth in BX Rule 9216(b) and 9143(e)(3), which govern the handling of violations of rules subject to the MRVP (''MRVP violations'') and the issuance of MRVP violation letters, shall also apply to the Exchange's handling of other violations of Rules listed in Rule 1614(b) that are not subject to the MRVP (''minor rule violations'') and the issuance of minor rule violation letters, except that the Exchange shall promptly report any final disciplinary action to the Commission, in accordance with SEC Rule 19d–1(c)(1). These proposed references are necessary to account for Nasdaq ISE's proposed revisions to Chapter 16 of its rules, which will retain the Exchange's existing authority to impose fines of up to $2,500 for MRVP violations and up to $5,000 for minor rule violations, as well as the Exchange's existing fine schedule for

[32] *See* proposed Rule 100(a)(21A).

[33] *See* BX Options Rules Ch. V, Sec. 6(l).

[34] *See id.*

[35] *See* SR–ISE–2018–59.

such violations, which will be set forth in Rule 1614(b).

Conclusion

The changes proposed herein will allow the Exchange to harmonize its investigatory and disciplinary processes with the processes of BX, thus providing a uniform process for the investigation and discipline of Members and Associated Persons across all of the Nasdaq, Inc. exchanges, as administered by FINRA pursuant to Regulatory Services Agreements. Harmonizing the investigatory and disciplinary processes of all of the Nasdaq, Inc. exchanges will bring efficiency to FINRA's administration of its responsibilities under the RSAs because the process [sic] it must follow are nearly identical, and are all based on the process that FINRA follows. Harmonized processes will bring consistency to investigations and adjudication of rule violations, and will reduce the number of disciplinary processes and requirements with which Members and Associated Persons, as well as their counsel, must be familiar.

The Exchange believes that the new investigatory and disciplinary processes are substantially similar to the existing process, and where there are differences between the new and old processes, the Exchange believes that the new process does not disadvantage its Members or Associated Persons. To the contrary, the Exchange believes that the new process will benefit all parties as it provides greater detail and specificity than the retired Rules, and that it is consequently more transparent.

The Exchange intends to announce the operative date of the new Rules at least 30 days in advance via a regulatory alert.[36] To facilitate an orderly transition from the Existing Rules to the new Rules, the Exchange is proposing to apply the Existing Rules to all Letters of Consent[37] that the Chief Regulatory Officer of the Exchange has approved and which are pending approval of the BCC prior to the operative date. The Exchange also will apply the Existing Rules to any matter for which, prior to the operative date, the Exchange has provided notice to a subject of its determination to impose an MRVP violation fine or a minor rule violation fine whereby the subject may yet or has contested the determination pursuant to Existing Rule 1614(a). In terms of formal disciplinary matters, any matter that has been approved for the issuance of a statement of charges[38] by the CRO will continue under the Existing Rules. Moreover, any appeal of a matter that is pending before an OEP pursuant to Existing Rule 720, a Review Panel pursuant to Existing Rule 720A, or the BCC pursuant to Existing Rule 303 will continue under the Existing Rules. As a consequence of this transition process, the Exchange will retain the BCC, the OEP, the Review Panel, and the existing processes during the transition period until such time that there are no longer any matters proceeding under the Existing Rules. To facilitate this transition process, the Exchange will retain a transitional Rulebook that will contain the Exchange's Rules as they are at the time of that this proposal is filed with the Commission. This transitional Rulebook will apply only to matters initiated prior to the operational date of the changes proposed herein and it will be posted to the Exchange's public rules website. When the transition is complete and there are no longer any Members, Associated Persons, or other persons subject to the existing disciplinary processes, the Exchange will remove the transitional Rulebook from its public rules website.

The Exchange furthermore notes that it expects the transition from the BCC to the Exchange Review Council to be smooth given that it expects to nominate the existing (and shared) membership of the BX, Nasdaq, and Phlx Review Councils to also become members of the Exchange Review Council.[39] The Exchange does not expect that any existing members of the BCC will be nominated to become members of the Exchange Review Council; however, the Exchange will ensure that, in advance of the operative day, the members of the Exchange Review Council will familiarize themselves with the Rules and procedures of the Exchange so that they will be prepared to fulfill their responsibilities.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[40] in general, and furthers the objectives of Section 6(b)(5) of the Act,[41] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, and are [sic] not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange also believes that the proposal is consistent with Section 6(b)(6) of the Act,[42] which requires that the rules of an exchange provide that its members be appropriately disciplined for violations of the Act as well as the rules and regulations thereunder, or the rules of the Exchange, by expulsion, suspension, limitation of activities, functions, and operations, fine, censure, being suspended or barred from being associated with a member, or any other fitting sanction.

First, the Exchange's proposals are consistent with the Act to [sic] make miscellaneous changes to the Existing Rules to account for the adoption of the BX Rule 8000 and 9000 Series and the replacement of the BCC with the Exchange Review Council. For example, subject to Chapter 90, proposed changes to Rule 303 re-assign responsibility to the Exchange Review Council to review decisions of the Exchange's Membership Department to deny or condition applications for membership and association with Exchange Members and to deny or condition continuing membership or association. The proposal also establishes a new process by which the Exchange Review Council will adjudicate such reviews. The Exchange believes that these proposed changes to the Existing Rules are consistent with the Act because the new adjudicatory processes that the Exchange proposes to adopt in place of its existing processes are substantially similar to those that BX already utilizes. Moreover, the Exchange believes that the proposed processes will facilitate prompt, appropriate, and fair adjudications, consistent with the Act.

Second, the Exchange's proposals are consistent with the Act to [sic] make minor updates, corrections, and conforming amendments to the Exchange's Rules because they are necessary to ensure that the Exchange's

[36] The Exchange notes that the proposed changes will not become operative unless and until the Commission approves the Exchange's request, which it has filed pursuant to Section 36 of the Exchange Act and SEC Rule 0–12 thereunder, for an exemption from the rule filing requirements of Section 19(b) of the Exchange Act as to changes to Chapters 80 and 90 that are effected solely by virtue of a change to the BX Rule 8000 or 9000 Series.

[37] A ''Letter of Consent'' is a means by which the Exchange may consensually address a violation of its Rules without resort to the formal disciplinary process. *See* Existing Rule 1603.

[38] A ''statement of charges'' is formal disciplinary complaint. *See* Existing Rule 1604.

[39] The Exchange anticipates that the members of the Exchange Review Council will serve in a manner that is consistent with their tenures on the Nasdaq, BX, and Phlx review councils. That is, to the extent that the tenure of a member of these other review councils is due to expire on a particular date, then the same expiration date will apply to that member's tenure on the Exchange Review Council. All terms for members on the Exchange Review Council will comply with Article VI, Section 4 of the proposed By-Laws.

[40] 15 U.S.C. 78f(b).

[41] 15 U.S.C. 78f(b)(5).

[42] 15 U.S.C. 78f(b)(6).

cross-references and terminology remain current and accurate.

Third, the proposed rule change is necessary to ensure that the Exchange maintains a disciplinary process, in accordance with Section 6(b)(5) and (6) of the Act,[43] once Nasdaq ISE deletes its disciplinary rules from chapters 15–17 of the Nasdaq ISE rulebook, which the Exchange presently incorporates by reference. The proposed rule change will also ensure that going forward, the Exchange's disciplinary rules will continue to exist in harmony with those of Nasdaq ISE. As noted earlier, Nasdaq ISE is similarly proposing to incorporate by reference the BX Rule 8000 and 9000 Series into new chapters 80 and 90 of its rulebook as to well make similar conforming changes to its other rules.

The Exchange believes that harmonizing its investigative, disciplinary, and adjudicatory processes with those of BX will reduce the burden on Members and Associated Persons that are also members of BX, Nasdaq, Phlx, and/or FINRA. The Exchange notes that all of its Members are also members of BX, Nasdaq, Phlx, and/or FINRA. BX, Nasdaq, Phlx, and FINRA already have in place investigative, disciplinary, and adjudicatory processes that are the same or similar to those that the Exchange proposes to incorporate by reference.

As discussed above, the Exchange believes that the proposed Rules will benefit all parties involved in the Exchange's disciplinary and adjudicatory processes as they will include greater detail and specificity than do the Existing Rules. The proposal will render the Exchange's investigatory, disciplinary, and adjudicatory processes more transparent than the Existing Rules.

The Exchange also believes that adopting an Exchange Review Council is consistent with the Act because the Council's mandate is to, among other things, ensure consistent and fair application of the Exchange rules pertaining to discipline of Members and Associated Persons. The Exchange Review Council will be a body appointed by the Exchange Board of Directors and composed of representatives of the securities industry as well as persons from outside the securities industry. The broad membership of the new Exchange Review Council will ensure that the decisions and guidance it provides will be fair and balanced. The Exchange Review Council will be similar in structure and function to the BX exchange review council. In addition to reviewing appeals of disciplinary actions, the Exchange Review Council will also have jurisdiction to review membership decisions (proposed Rule 303), and appeals regarding limitations placed on Members or their employees that are subject to a statutory disqualification (BX Rule 9524). Additionally, the Exchange Review Council may consider and make recommendations to the Board on policy and rule changes relating to business and sales practices of Exchange Members and Associated Persons, and enforcement policies, including policies with respect to fines and other sanctions. Thus, the Exchange Review Council will provide the Exchange and market participants with a fair and impartial body overseeing disciplinary matters, as well as the rules and policies concerning the disciplinary process. For these reasons, the Exchange believes that adoption of the Exchange Review Council is consistent with the Act.

The Exchange believes that eliminating the BCC, the OEP (as provided for under Existing Rule 720), and the Review Panel (as provided for under Existing Rule 720A) is consistent with Sections 6(b)(5) and 6(b)(6) of the Act,[44] because the Exchange Review Council and the New Hearing Panels will assume the responsibilities of the BCC and the Panels. In particular, the functions of the current Hearing Panels of the BCC (''Current Hearing Panels'')—which include adjudicating disciplinary actions—will be handled by new Hearing Panels, which FINRA's Office of Hearing Officers (''OHO'') shall convene (''New Hearing Panels'').[45] Going forward, the BCC's (and the CRO's) responsibility for approving settlements will be assumed by the Exchange Review Council and, in certain instances, FINRA's Office of Disciplinary Affairs (the ''ODA'').[46] The BCC's responsibilities for hearing appeals of Exchange decisions on membership or association with a Member will be assumed by the Exchange Review Council. The responsibilities of the OEP and the Review Panel to hear appeals of Exchange determinations to nullify or adjust transactions that involve obvious errors or that result from system disruptions and malfunctions also will be assumed by the Exchange Review Council. The Exchange believes that the proposal will provide for the Exchange Review Council, the New Hearing Panels, and the ODA to execute the responsibilities of the BCC and the Panels in a manner that the Commission, within the context of the BX Rules, has already deemed to be consistent with the Act.[47] For example, the Exchange proposes to replace its existing process for handling appeals of membership decisions, as set forth in Existing Rule 303 and Chapter 17, with a process that BX already employs in BX Rules 1015 and 1016. Moreover, Exchange Members and Associated Persons will already be familiar with the proposed responsibilities and procedures of the Exchange Review Council, the New Hearing Panels, and the ODA from their experiences as members of BX and other SROs whose rules provide for similar assignments of responsibilities and processes.

The Exchange believes that its proposal furthers the objectives of Section 6(b)(7) of the Act[48] in that it is designed to provide a fair procedure for the disciplining of Members and Associated Persons, the denial of membership to any person seeking membership therein, the barring of any person from becoming associated with a Member thereof, and the prohibition or limitation by the Exchange of any person with respect to access to services offered by the Exchange or a Member thereof. Specifically, the Exchange believes that the proposed investigatory, disciplinary, and adjudicatory processes are consistent with Section 6(b)(7) of the Act[49] because they are based on the existing processes used by BX. The BX processes are well-established as consistent with the Act.[50]

Last, the Exchange believes that its proposal to phase-in the implementation of the new investigatory, disciplinary, and adjudicatory processes is consistent with Section 6(b)(7)[51] of the Act because both the current and proposed processes are consistent with the Act, providing fair procedures for investigating, disciplining, and adjudicating the rights of Members and Associated Persons. The Exchange is proposing to provide advanced notice of the implementation date of the new processes, and will apply the new

[43] 15 U.S.C. 78f(b)(5)–(6).

[44] *Id.*

[45] The OHO is an office within FINRA that is independent of the FINRA enforcement function and not involved in investigating or litigating cases.

[46] Pursuant to BX Rule 9270, proposed settlements must be submitted to and accepted by the Exchange Review Council, except that proposed settlements involving an affiliate of the Exchange must be reviewed by the ODA. Like the OHO, the ODA is an office within FINRA that is independent of the FINRA enforcement function and not involved in investigating or litigating cases.

[51] 15 U.S.C. 78f(b)(7).

processes to new matters that are initiated on or after that implementation date. Any matters initiated prior to the implementation date will be completed using the current processes. As a consequence, the Exchange will delete the applicable portions of Chapters 15–17 from the Exchange's Rulebook, but it will maintain a transitional Rulebook on the Exchange's public rules website (*http://http://nasdaqgemx.cchwallstreet.com/*), which will contain the Exchange Rules as they are at the time of filing this rule change.[52] These transitional Rules will apply exclusively to the matters initiated prior to the implementation date. Upon conclusion of the last matter to which the transitional rules apply, the Exchange will remove the defunct transitional rules from its public rules website. Thus, the transition will be conducted in a fair, orderly, and transparent manner.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended [sic]. The proposed rule change is not intended to address competitive issues, but it should reduce burdens on Members, [sic] and Associated Persons. Specifically and as described in detail above, the Exchange believes that this change will bring efficiency and consistency in application of the investigative, disciplinary, and adjudicatory processes, thereby reducing the burden on Members and Associated Persons who are also members of BX and the other Nasdaq, Inc. Exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act[53] and subparagraph (f)(6) of Rule 19b–4 thereunder.[54]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–GEMX–2018–24 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–GEMX–2018–24. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–GEMX–2018–24 and should be submitted on or before August 21, 2018.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[55]

Eduardo A. Aleman,

Assistant Secretary.

BILLING CODE 8011–01–P

[52] The posting of the transitional rules on the public rules website will make it clear what disciplinary proceedings are governed by the transitional rules (*i.e.,* matters initiated prior to the implementation date).

[53] 15 U.S.C. 78s(b)(3)(A)(iii).

[54] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[55] 17 CFR 200.30–3(a)(12).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–83705; File No. SR–MRX–2018–23]

Self-Regulatory Organizations; Nasdaq MRX, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Align Existing Investigatory and Disciplinary Processes and Related Rules With the Investigatory and Disciplinary Processes and Associated Rules of Nasdaq BX, Inc.

July 25, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on July 16, 2018, Nasdaq MRX, LLC (''MRX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to align its existing investigatory and disciplinary processes and related rules with the investigatory and disciplinary processes and associated rules of Nasdaq BX, Inc. (''BX'').

The text of the proposed rule change is available on the Exchange's website at *http://nasdaqmrx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt new investigatory, disciplinary, and adjudicatory processes that are substantially the same as those of its sister exchange, BX. Specifically, the Exchange proposes to establish new Chapters 80 and 90 of its Rules [3] and then incorporate by reference into those Chapters the BX Rule 8000 and 9000 Series,[4] which set forth and govern the BX investigatory, disciplinary, and adjudicative processes.[5] The Exchange also proposes to amend its By-Laws to establish a new body to review disciplinary and certain other matters (the ''Exchange Review Council'') that is similar to the exchange review council that BX utilizes for such purposes.[6] These proposals, when coupled with certain changes to the Exchange's other Rules, including Rules that govern appeals of the Exchange's membership and other decisions, will render the Exchange's investigative, disciplinary, and adjudicatory processes substantially the same as those, not only of BX, but also of other Nasdaq, Inc. exchanges.[7] The proposal [sic] change will also further harmonize the work that the Financial Industry Regulatory Authority (''FINRA'') conducts for all these exchanges.

The Exchange's current investigatory, disciplinary, and adjudicatory processes are set forth in Chapters 15–17 of its Rules. Chapters 15–17 of the Exchange's Rules, in turn, incorporate by reference the investigatory, disciplinary, and adjudicatory processes of Nasdaq ISE, LLC (''Nasdaq ISE'') that are set forth in the corresponding chapters of the Nasdaq ISE rulebook. As part of a parallel Nasdaq ISE filing that also proposes to adopt the investigatory, disciplinary, and adjudicatory processes and rules of BX (and incorporate them by reference into new chapters 80 and 90 of the Nasdaq ISE rules), Nasdaq ISE proposes to eliminate chapters 15 and 17 of its rules, and to largely eliminate chapter 16.[8] These proposed changes to ISE chapters 15–17 will apply automatically to Chapters 15–17 of the Exchange's Rules. Accordingly, reference should be made to SR–ISE–2018–59 for a detailed explanation of the proposed changes to Chapters 15–17 and the purposes of those changes. Likewise, reference should be made to SR–ISE–2018–59 for a detailed discussion of the BX Rule 8000 and 9000 Series, which will largely replace Chapters 15–17 for both Nasdaq ISE and the Exchange. Lastly, reference should be made to SR–ISE–2018–59 for a discussion of proposed changes to certain other ISE rules that the Exchange also incorporates by reference and that are relevant to the Exchange's adoption of its new investigatory, disciplinary, and adjudicatory processes.[9]

The following is a discussion of proposed changes that are specific to the Rules of the Exchange and that are not otherwise addressed in or accomplished by the corresponding Nasdaq ISE filing. These changes include: (1) The elimination of the Exchange's BCC and its replacement with the Exchange Review Council; and (2) changes to Exchange Rules that are necessary to accommodate the new investigatory, disciplinary, and adjudicatory processes and rules and to harmonize those processes and rules with those of BX.

Elimination of the Business Conduct Committee and Establishment of the Exchange Review Council

The Exchange presently utilizes the BCC to help it enforce its Rules with respect to its members (''Members'') and persons associated with its members (''Associated Persons''). The BCC is a committee, established by the Board of Directors,[10] whose enforcement jurisdiction includes the following: (1) Ordering investigations of possible Rule violations; (2) considering letters of consent in expedited disciplinary actions; (3) making its members available to serve on Hearing Panels that adjudicate formal disciplinary proceedings; (4) imposing sanctions on Members or Associated Persons in disciplinary proceedings; (5) reviewing Exchange actions involving minor rule violations; (6) appointing panels to conduct hearings and reviews of Exchange actions that deny membership or Member association privileges; and (7) generally overseeing all matters relating to the conduct of disciplinary hearings and hearings for review of Exchange decisions, and providing the Exchange with advice for improving disciplinary procedures.[11]

The Exchange proposes to retire the BCC [12] and to amend its By-Laws to

[3] The Exchange proposes to add Chapters 23–79 and Chapters 81–89 to its Rules, but reserve such Chapters for future use.

[4] Citation herein to rules of the proposed Chapters 80 and 90 will be preceded by the term ''BX Rule'' to reflect incorporation of the BX Rule 8000 and 9000 Series. References to current rules will be preceded by the term ''Existing Rule.''

[5] The Exchange proposes to separately request an exemption from the rule filing requirements of Section 19(b) of the Act for changes to Chapters 80 and 90 to the extent such rules are effected solely by virtue of a change to the BX Rule 8000 and 9000 Series.

[6] As discussed below, the Exchange Review Council will assume responsibilities that presently reside with the Business Conduct Committee (the ''BCC''). The Exchange also proposes to eliminate the BCC.

[7] The Exchange notes that the BX Rule 8000 and 9000 Series are substantially similar to corresponding rules of The Nasdaq Stock Market, LLC (''Nasdaq'') and Nasdaq PHLX, LLC (''Phlx''). Moreover, the Exchange notes that Nasdaq ISE, LLC and Nasdaq GEMX, LLC will propose similar changes to their respective investigatory, disciplinary, and adjudicatory processes and associated rules that will render them substantially similar to those of BX.

[8] *See* SR–ISE–2018–59. Nasdaq ISE proposes to retain Rule 1600, which sets forth the general jurisdiction of the Exchange with respect to disciplinary matters. It also proposes to retain Existing Rule 1614(a), which sets forth its authority to impose fines of up to $2,500 for violations of the Exchange's Minor Rule Violation Plan (''MRVP'') and up to $5,000 for minor rule violations (other than those subject to an MRVP). Nasdaq ISE also proposes to retain Existing Rule 1614(d) (to be renumbered as Rule 1614(b)), which sets forth the Exchange's schedule of MRVP violations and minor rule violations and their associated fines.

[9] The proposed changes involve Nasdaq ISE Rules 410, 413(b)(1), 1000, 1406, and 1800.

[10] *See* Resolution of the Board of Directors of the ISE Mercury Delegating Authority, dated February 4, 2016.

[11] *See* MRX Business Conduct Committee Charter, dated May 22, 2018.

[12] In a February 4, 2016 resolution, the Exchange Board delegated its authority to the President of the Exchange to establish a BCC to, among other things, conduct disciplinary hearings under Chapter 16 of the Existing Rules and conduct other hearings and

Continued

establish in its place the Exchange Review Council. The amended By-Laws that the Exchange proposes to adopt in this regard are substantially the same as those that BX adopted to establish the BX Exchange Review Council.[13] Thus, the By-Laws provide for the Exchange Review Council to have the same general structure and powers as does the BX Exchange Review Council.[14] The proposed By-Laws will authorize the Exchange Review Council to adjudicate disciplinary actions and approve settlements thereof as well as make recommendations to the Board on certain policy matters and rule changes. Such policy functions of the Exchange Review Council render its jurisdiction broader than that of the BCC.

Specifically, proposed Article VI, Section 1 of the proposed By-Laws provides that the Exchange Review Council may be authorized to act for the Board with respect to: an appeal or review of a disciplinary proceeding, a statutory disqualification proceeding, or a membership proceeding; a review of an offer of settlement, a letter of acceptance, waiver, and consent, and a minor rule violation plan letter; the exercise of exemptive authority; and such other proceedings or actions as may be authorized by the Exchange rules. The Exchange Review Council also may consider and make recommendations to the Board on policy and rule changes relating to business and sales practices of Exchange Members and Associated Persons and enforcement policies, including policies with respect to fines and other sanctions. It may advise the Board on regulatory proposals and industry initiatives relating to quotations, execution, trade reporting, and trading practices and it may advise the Board in its administration of programs and systems for the surveillance and enforcement of rules governing Exchange Members' conduct and trading activities in the Exchange.

Proposed Article VI, Section 2 states that the Exchange Review Council would consist of no fewer than eight and no more than 12 members. The Exchange Review Council must include a number of Member Representative members [15] that is equal to at least 20% of the total number of members of the Exchange Review Council. The number of Non-Industry members,[16] including at least three Public members,[17] shall equal or exceed the sum of the number of Industry members [18] and Member Representative members. As soon as practicable, following the appointment of members, the Exchange Review Council shall elect a Chair from among its members. The Chair shall have such powers and duties as may be determined from time to time by the Exchange Review Council. The Board, by resolution adopted by a majority of Directors then in office, may remove the Chair from such position at any time for refusal, failure, neglect, or inability to discharge the duties of Chair. No more than 50% of the members of the Exchange Review Council shall be engaged in market making activity or employed by an Exchange Member firm whose revenues from market making activity exceed 10 percent of its total revenues.

Proposed Article VI, Section 3 requires the Exchange's Secretary to collect from each nominee for the office of member of the Exchange Review Council such information as is reasonably necessary to serve as the basis for a determination of the nominee's qualifications and classification as an Industry, Member Representative, Non-Industry, or Public member. The Secretary must also certify to the Nominating Committee or the Member Nominating Committee [19] (as applicable) each nominee's qualifications and classification. After appointment to the Exchange Review Council, each member must update such information at least annually and upon request of the Exchange's Secretary, and must report immediately to the Secretary any change in such information.

Proposed Article VI, Section 4 provides that Exchange Review Council members shall serve three-year terms, or until a successor is duly appointed and qualified, except in the event of earlier termination from office by reason by death, resignation, removal, disqualification, or other reason. Members are term limited out after two consecutive terms. Proposed Article VI, Section 5 sets forth the procedures for resigning as a member of the Exchange Review Council and provides that an Exchange Review Council member may resign at any time upon written notice to the Board. Under proposed Article VI, Section 6, any member of the Exchange Review Council may be removed from office at any time for refusal, failure, neglect, or inability to discharge the duties of such office by majority vote of the Board.

Under proposed Article VI, Section 7, an Exchange Review Council member would be disqualified and removed immediately upon a determination by the Board, by a majority vote, (a) that the member no longer satisfies the classification (Industry, Member Representative, Non-Industry, or Public) for which the member was elected; and (b) that the member's continued service as such would violate the compositional requirements of the Exchange Review Council set forth in Article VI, Section 2. If the term of office of an Exchange Review Council member terminates under this Section, and the remaining term of office of such member at the time of termination is not more than six months, during the period of vacancy the Exchange Review Council shall not be deemed to be in violation of Article VI, Section 2 by virtue of such vacancy. Proposed Article VI, Section 8 contains provisions for the filling of vacancies on the Exchange Review Council and states that if a position on the Exchange Review Council becomes vacant, the Nominating Committee or the Member Nominating Committee (as applicable) shall nominate, and the Board shall appoint a person satisfying the qualifications for the position as provided in Article VI, Section 2 to fill

reviews as set forth in Chapter 17 of the Existing Rules. On February 1, 2017, the Board passed a resolution that both revoked the President's authority to establish a BCC and authorized the establishment of an Exchange Review Council, effective upon the date when this rule filing becomes operative.

[13] The BX by-laws differ from the proposed Exchange By-Laws because the BX by-laws have a different numbering convention from the Exchange's By-Laws and, in various places, the BX by-laws refer to a Listing and Hearing Review Council, which has no analogue with respect to the Exchange.

[14] The BX by-laws do not describe in detail the process of the proceedings over which the BX Exchange Review Council presides. However, Section 7.9 of the BX by-laws state [sic] that a quorum of three BX Exchange Review Council members is necessary to adjudicate appeals of determinations made under BX Rules 4612 (appeal of denial of registration as an Equities Market Maker), 4619 (review of denial of an excused withdrawal of Equities Market Maker quotation), 4620 (appeal of denial of reinstatement of Equities Market Maker that accidentally withdraws), 11890 (appeal of clearly erroneous transaction determination), and BX Options Chapter V, Section 6 (appeal of obvious error determination). *See* BX by-laws, Article VII, Section 9. The Exchange's Rules do not have analogues to BX Rules 4612, 4620, and 11890 and, as such, the corresponding provision of the Exchange's proposed By-Laws (Article VII, Section 9) provides only that a quorum of three Exchange Review Council members is necessary for it to adjudicate appeals involving determinations made under Rules 720 (appeal of obvious error determination), 720A (appeal of determinations of erroneous trades due to system malfunctions and disruptions), and 804 (review of denial of an excused withdrawal of market maker quotation).

[15] *See* n.20, *infra.*

[16] *See id.*

[17] *See id.*

[18] *See id.*

[19] The terms ''Nominating Committee'' and ''Member Nominating Committee'' are defined in Exchange By-Laws, Article I.

such vacancy, except that if the remaining term of office for the vacant position is not more than six months, no replacement shall be required.

Proposed Article VI, Section 9 provides that a quorum of the Exchange Review Council will consist of a majority of its members, including not less than 50% of its Non-Industry members and one Member Representative member. Proposed Article VI, Section 10 contains provisions related to the meetings of the Exchange Review Council.

Under proposed Article VI, Section 11, the Exchange Review Council is required to establish a Review Subcommittee to determine whether disciplinary and membership proceedings decisions should be called for review by the Exchange Review Council under the disciplinary and membership rules to be proposed for the Exchange. The Review Subcommittee shall be composed of no fewer than two and no more than four members of the Exchange Review Council. The number of Non-Industry members of the Review Subcommittee shall equal or exceed the sum of the number of Industry members and Member Representative members of the Review Subcommittee, and the subcommittee must include at least one Member Representative member. At all meetings of the Review Subcommittee, a quorum for the transaction of business shall consist of not less than 50 percent of the members of the Review Subcommittee, including not less than 50 percent of the Non-Industry members of the Review Subcommittee and one Member Representative member of the Review Subcommittee.[20]

The BX Rules implement the foregoing responsibilities of the Exchange Review Council by establishing various procedures to govern its reviews. As the Exchange describes in further detail below, the Exchange proposes to transfer to the Exchange Review Council (or panels thereof) certain responsibilities currently vested in other Exchange committees or the Board. For example, pursuant to Existing Rule 720, an Obvious Error Panel (''OEP'') is presently responsible for reviewing determinations regarding obvious and catastrophic errors. Pursuant to Existing Rule 720A, a ''Review Panel'' is responsible for reviewing determinations to nullify or adjust transactions that arise from system disruptions and malfunctions. The Exchange is proposing to eliminate the OEP and the Review Panel and to transfer their responsibilities to a panel of the new Exchange Review Council, which corresponds to the practice of BX. Subject to Chapter 90, the Exchange also proposes to transfer responsibility to the Exchange Review Council to review denials or conditions imposed upon those that seek to become or remain a Member of the Exchange or become or remain associated with a Member of the Exchange, as set forth in Existing Rule 303.[21] In addition, the Exchange proposes to amend Existing Rule 804 to provide for the Exchange Review Council to review determinations regarding temporary withdrawals of quotations, which are not reviewable under the Existing Rules. The Exchange notes that BX vests in its Exchange Review Council responsibility for reviewing similar types of matters.[22]

Other Conforming Rule Changes

The Exchange proposes to amend or delete certain other Existing Rules, which are either not needed, duplicated elsewhere, or reference the deleted Existing Rules. Below is a description of the specific changes the Exchange proposes to make to its Existing Rules.

Existing Rule 100 provides definitions for purposes of the Existing Rules. The Exchange is proposing to amend this Existing Rule to include definitions for several new terms. For example, the proposed Rules will define the new term ''Code of Procedure'' as the procedural rules contained in Chapter 90. The Exchange also defines the new term ''Exchange Review Council,'' which is largely copied from BX Rule 0120(m). The Exchange notes that item (6) of the new definition differs from the BX item (6) in that it cites the analogous rules of the Exchange, which have different rule numbers. Finally, the Exchange proposes to amend the definition of ''SEC'' so that it also includes the word ''Commission.''

Existing Rule 206 concerns the consequences of a Member's or an Associated Person's failure to pay dues, fees and other charges. The Exchange proposes to delete this Existing Rule in favor of BX Rule 9553, which is more comprehensive than the Existing Rule and differs from it in several respects. Existing Rule 206 provides that instances of nonpayment shall be reported to the Exchange's Chief Executive Officer and President when they are 30 days past due, and that the Chief Executive Officer and President thereafter shall provide reasonable notice to the delinquent Member that continued non-payment will result in suspension of trading privileges. An Associated Person that fails to pay may be suspended from association with a Member. By contrast, BX Rule 9553 states that the Exchange's Regulation Department, within an unspecified period of time period [sic] after the onset of a delinquency, may issue a written notice to the delinquent Member or Associated Person that failure to comply within 21 days of service of the notice will result in suspension or cancellation of membership or suspension or bar of association with a Member, as applicable. BX Rule 9553 also provides for detailed provisions for serving such notice, a provision for requesting a hearing with respect to such a notice, a provision declaring the effectiveness of such notices (21 days after service) when no hearing is requested, and a means to request termination of a suspension, which may be granted for good cause shown.

Existing Rule 303 sets forth circumstances in which the Exchange may deny or condition approval of membership applications or applications to associate with Members. Existing Rule 303(c) also sets forth circumstances in which the Exchange may determine not to permit a Member or Associated Person from continuing their [sic] membership or association with a Member, including because they become [sic] subject to [sic] statutory disqualification under the Act. Existing Rule 303(f) furthermore permits a Member or Associated Person that becomes subject to [sic] statutory disqualification under the Act to apply to the Exchange to continue as a Member or as an Associated Person, within 30 days of becoming subject to the statutory disqualification. Existing

[20] In addition to adding Article VI to the By-Laws, the Exchange proposes to make changes to other articles of the By-Laws to accommodate the existence of the Exchange Review Council. For example, the Exchange proposes to amend Article I, which defines the terms that the Exchange uses in the By-Laws, to provide that the terms ''Industry member,'' ''Member representative member,'' ''Non-industry member,'' and ''Public member'' mean, in part, members of the Exchange Review Council. The Exchange also proposes to amend Article III, Section 6, to add a new subsection (a) that directs the Board to appoint an Exchange Review Council, as provided in Article VI. It also proposes to amend Article III, Section 6(b) to state that the Nominating Committee and the Member Nominating Committee of the Board shall have responsibility for nominating members of the Exchange Review Council. Finally, the Exchange proposes to amend Sections 7 and 8 of Article III, which deal with Director conflicts-of-interest/self-interested transactions and Director compensation, respectively, to ensure that the restrictions and benefits that these provisions provide apply to Exchange Review Council members.

[21] The Exchange notes that it proposes to establish procedures in Existing Rule 303 to govern the review by the Exchange Review Council of adverse membership and association determinations. The Exchange proposes to base these procedures upon those set forth BX Rules 1015 and 1016.

[22] *See* Securities Exchange Act Release No. 72149 (May 12, 2014), 79 FR 28564 (May 16, 2014) (SR–BX–2014–024).

Rule 303(g) states that, subject to the summary suspension rules in Chapter 15, any applicant for membership or association with a Member whose application is denied or conditioned or who is not permitted to continue as a Member or Associated Person may appeal such determinations under Chapter 17 of the Existing Rules.

The Exchange proposes to modify Existing Rule 303(f) so that it refers to new and more robust procedures, set forth in the BX Rule 9520 series, by which a Member or an Associated Person may obtain relief from disqualification or ineligibility determinations (BX Rule 9522).

The Exchange also proposes to amend Existing Rule 303(g), which states that subject to Chapter 15, the BCC may review, in part, Exchange determinations to deny membership or association with a Member pursuant to Chapter 17 of the Existing Rules. The Exchange proposes to re-assign responsibility for these reviews from the BCC to the Exchange Review Council and replace the review process presently set forth in Chapter 17 of the Existing Rules with processes that are substantially the same as those set forth in BX Rules 1015 and 1016. Specifically, the proposed amendments to Exchange Rule 303(g) state that, subject to Chapter 90, the Exchange Review Council will have jurisdiction to review these decisions. Proposed Rule 303(g) states that anyone whose application for membership on the Exchange, association with an Exchange Member, or whose continuing membership or association is denied or conditioned by the Exchange's Membership Department, may file a written request for review by the Exchange Review Council within 25 days after service of the Exchange's decision.[23] The request must state specifically why the applicant believes that the Membership Department's decision is inconsistent with the permissible bases for denial set forth in Rule 303, or otherwise should be set aside and state whether a hearing is requested.[24] The request will be heard by a Subcommittee appointed by the Exchange Review Council or the Review Subcommittee composed of two or more persons who are either current or past members of the Council or former Directors of the Exchange.[25] If a hearing is requested or directed, it must be held within 45 days after the request for review is filed with the Exchange or service of the notice by the Subcommittee.[26] Applicants and the Membership Department may be represented by counsel at the hearing and formal rules of evidence will not apply during the hearing.[27] The Subcommittee must present a recommended decision in writing to the Exchange Review Council within 60 days after the date of the hearing, and not later than seven days before the meeting of the Exchange Review Council at which the proceeding shall be considered.[28] The Exchange Review Council must issue a proposed written decision that affirms, modifies, or reverses the Membership Department's decision, or remands the proceedings with instructions and provide the proposed decision to the Exchange Board.[29] If the Exchange Board does not call the decision for review, it shall become final. If the Exchange Review Council does not serve its final written decision within the time period prescribed by Rule 303(g)(10)(C), then the Applicant may file a written request with the Exchange Board for the Board to direct the Exchange Review Council to issue its decision immediately or show good cause why it needs additional time to issue its decision.[30] Proposed Rule 303(h), which mirrors BX Rule 1016, grants the Exchange Board discretion, at the request of a Director, to review decisions of the Exchange Review Council.[31]

Existing Rule 307(b) requires Members to file with the Exchange and keep current their addresses at which notices may be served. The Exchange proposes to amend this Existing Rule to incorporate the language set forth in BX Rule 1160. Rather than merely requiring Members to provide the Exchange with their current address, the proposed amendment more broadly requires Members to report to the Exchange, through the FINRA Contact System, all of their contact information, including their mailing addresses, email addresses, facsimile numbers, and other information. It also requires members to update such contact information in the FINRA System within 30 days of any changes thereto, and to generally verify that such information remains accurate within 17 business days after the end of each calendar year. This proposed amendment to the Existing Rule will ensure that the Exchange has available to it multiple means of contacting its Members, including for purposes of serving the notices specified in the BX Rule 9550 series by email or by facsimile. The Exchange proposes, in its introduction to Chapter 90, to state that cross references in the BX Rule 9000 Series to BX Rule 1160 should be read instead to refer to Exchange Rule 307(b), as modified herein.

To maintain consistency with the BX Rules, the Exchange also proposes to eliminate Existing Rule 307(d), which requires Members to maintain a current copy of the Exchange's governing documents and Rules in an accessible place and make them available for examination by customers, and to replace it with BX Rule 8110, which is materially equivalent.

Existing Rule 308 requires a Member to notify the Exchange upon its adoption of a plan of liquidation or dissolution. The Existing Rule also provides that upon receipt of such notice, the Member's trading privileges may be suspended in accordance with Chapter 15 of the Existing Rules. The Exchange proposes to replace this reference to Chapter 15 with a reference to BX Rule 9558. Again, no analogue to this proposal exists in the BX rules insofar as those rules do not expressly address suspensions for such reasons or reviews of suspension determinations. Nevertheless, the Exchange believes that the process set forth in BX Rule 9558 is most appropriate for reviewing suspension determinations in these circumstances given that they already apply in circumstances where a Member is experiencing extreme financial or operating difficulty such that the Exchange determines that the Member cannot safely continue to do business on the Exchange.

The Supplementary Material to Existing Rule 306 concerns the Exchange's authority to waive the applicable qualification examination requirements and accept other standards as evidence of an applicant's qualifications for registration. The

[23] *See* proposed Rule 303(g)(1). The Exchange notes that the deadline for filing petitions for BCC review of an Exchange action under Existing Rule 1701(a) is 30 days from the date of such action. The Existing Rules pertaining to membership do not reference or define the terms ''Membership Department'' or ''Department.'' As part of this proposal, the Exchange proposes to amend Rule 303(g) to specify that the Exchange's Membership Department—rather than simply the ''Exchange''—makes determinations as to whether to grant, deny, or conditionally grant applications for membership or association or to continue as a Member or an Associated Person.

[24] *See* proposed Rule 303(g)(1).

[25] *See* proposed Rule 303(g)(4). The Exchange notes that Existing Rule 1702 provides for review by a BCC panel composed of two or more of its members.

[26] *See* proposed Rule 303(g)(6)(A).

[27] *See* proposed Rule 303(g)(6)(B) & (C). Unlike Existing Rule 1703, proposed Rule 303(g) does not provide for intervention in proceedings by interested non-parties.

[28] *See* proposed Rule 303(g)(9).

[29] *See* proposed Rule 303(g)(10)(A).

[30] *See* proposed Rule 303(g)(10)(D).

[31] Unlike Existing Rule 1704, proposed Rule 303(h) does not authorize the applicant or the President of the Exchange to request that the Board review the decision of the Exchange Review Council.

Exchange is amending this Rule to specify that such requests are handled pursuant to the BX Rule 9600 Series process. The BX Rule 9600 Series concerns the procedures for requesting exemptions, and the appeal of adverse decisions regarding an exemptive request. The Exchange notes that the proposed revisions will render the text of the Supplementary Material to Existing Rule 306 consistent with BX Rule 1070(d).

Existing Rule 720 concerns obvious and catastrophic errors. Existing Rule 720(k) currently references the OEP as the body responsible for reviewing determinations made by Options Exchange Officials pursuant to the Rule and it sets forth procedures to govern OEP review proceedings. In light of the fact that the OEP's responsibilities will be incorporated into those of the Exchange Review Council,[32] the amendments to the Rule remove references to the OEP and replaces [sic] them with references to a panel of the Exchange Review Council. The amended Rule also includes language grafted from the BX Rules prescribing the composition of panels convened for purposes of these reviews.[33]

Existing Rule 720A also provides for reviews by a ''Review Panel'' of decisions nullifying or adjusting transactions arising out of system disruptions or malfunctions. The Exchange proposes to eliminate the Review Panel in the Exchange's Rules and transfer its responsibility to a panel of the Exchange Review Council. The new Rule also includes language grafted from the BX Rules prescribing the composition of Exchange Review Council panels convened for purposes of these reviews.[34]

Existing Rule 804 permits a Primary Market Maker to apply to the Exchange to withdraw temporarily from its Primary Market Maker status in an options class. The Existing Rule does not presently authorize reviews of Exchange determinations to deny requests for temporary withdrawals or to impose conditions on the reentry of quotations. However, BX Rule 4619(f) does provide for such reviews. To provide consistency, the Exchange proposes to amend Existing Rule 804(f) to state that the Exchange Review Council will have authority conduct such reviews.

As discussed above, Chapter 16 of the Exchange's Rules incorporates by reference Chapter 16 of the ISE rules. However, Chapter 16 of the Exchange's Rules contains an introductory paragraph that references the incorporation by reference and provides instructions for cross-references. The Exchange proposes to delete the last line of this introductory paragraph, which specifies that a reference in the ISE Rule 1615 to Nasdaq ISE's contract with FINRA shall be read to refer to the Exchange's contract with FINRA. The Exchange proposes to delete this sentence because Nasdaq ISE is proposing to delete its Rule 1615, such that this sentence will no longer be necessary. The Exchange also proposes to change the title of Chapter 16 from ''Discipline'' to ''Disciplinary Jurisdiction and Minor Rule Violation Fines'' so that it conforms to the new title of Chapter 16 of the Nasdaq ISE Rules and to the content of that Chapter that Nasdaq ISE proposes to revise.[35]

Proposed Introductory Paragraphs to Chapters 80 and 90

The Exchange proposes to include introductory paragraphs to both Chapters 80 and 90 which state that they incorporate by reference the BX Rule 8000 and 9000 Series, respectively, and that such BX Rules shall be applicable to Exchange Members, Associated Persons, and other persons subject to the Exchange's jurisdiction.

These proposed introductory paragraphs also list instances in which cross references in the BX Rule 8000 and 9000 Series to other BX rules should be read to refer instead to the Exchange Rules, and references to defined BX terms shall be read to refer to the Exchange-related meanings of those terms. For example, references in both the BX Rule 8000 and 9000 Series to the following defined terms shall be read to refer to the Exchange-specific meanings of those terms: ''Exchange'' or ''Nasdaq BX'' shall be read to refer to the Exchange; ''Rule'' or ''BX Rule'' shall be read to refer to the Exchange Rules; ''Board'' or ''Exchange Board'' shall be read to refer to the Exchange Board of Directors; ''Member'' shall be read to refer to an Exchange Member; ''Associated Person'' shall be read to refer to an Exchange Associated Person; ''BX Regulatory Department'' or ''Regulation Department'' shall be read to refer to the Exchange's Regulatory Department; ''BX Regulation'' shall be read to refer to Exchange Regulation; ''Chief Regulatory Officer'' shall be read to refer to the Chief Regulatory Officer of the Exchange; and ''Equity Rule'' shall be read to refer to an Exchange Rule.

Additionally, the proposed introduction to Chapter 80 states that cross references in the BX Rule 8000 Series to the term ''Rule 0120'' shall be read to refer to Exchange Rule 100 and cross references in the BX Rule 8000 Series to ''Rule 1015'' shall be read to refer to Exchange Rule 303. Similarly, the proposed introduction to Chapter 90 states that cross-references in the BX Rule 9000 Series to the following terms shall be read to refer to the following Exchange Rules: ''Rule 0120'' shall be read to refer to Exchange Rule 100; ''Rule 1013'' shall be read to refer to Exchange Rules 302 and 307; ''Rule 1070'' shall be read to refer to the Supplementary Material to Exchange Rule 306; ''Rule 1160'' shall be read to refer to Exchange Rule 307(b); ''Equity Rule 2110'' shall be read to refer to Exchange Rule 400; ''Equity Rule 2120'' shall be read to refer to Exchange Rule 405; ''Rule 2140'' shall be read to refer to Exchange Rule 309; ''Equity Rule 2150'' shall be read to refer to Exchange Rules Chapter 6; ''Rule 2170'' shall be read to refer to Exchange Rule 403; ''Rule 4110A'' shall be read to refer to Exchange Rules Chapter 13; ''Rule 4120A'' shall be read to refer to Exchange Rules Chapter 13; ''Rule 10000 Series'' shall be read to refer to Exchange Rules Chapter 18; and ''Chapter III, Section 16'' shall be read to refer to Exchange Rule 403.

Finally, the introduction to Chapter 90 states that BX IM–9216 in the BX Rules shall not apply to the Exchange, its Members, Associated Persons, or other persons subject to the jurisdiction of the Exchange and that instead, references to BX IM–9216 shall be read to refer to Exchange Rule 1614(b). Similarly, the introduction states that the procedures set forth in BX Rule 9216(b) and 9143(e)(3), which govern the handling of violations of rules subject to the MRVP (''MRVP violations'') and the issuance of MRVP violation letters, shall also apply to the Exchange's handling of other violations of Rules listed in Rule 1614(b) that are not subject to the MRVP (''minor rule violations'') and the issuance of minor rule violation letters, except that the Exchange shall promptly report any final disciplinary action to the Commission, in accordance with SEC Rule 19d–1(c)(1). These proposed references are necessary to account for Nasdaq ISE's proposed revisions to Chapter 16 of its rules, which will retain the Exchange's existing authority to impose fines of up to $2,500 for MRVP violations and up to $5,000 for minor rule violations, as well as the Exchange's existing fine schedule for

[32] *See* proposed Rule 100(a)(21A).

[34] *See id.*

[35] *See* SR–ISE–2018–59.

such violations, which will be set forth in Rule 1614(b).

Conclusion

The changes proposed herein will allow the Exchange to harmonize its investigatory and disciplinary processes with the processes of BX, thus providing a uniform process for the investigation and discipline of Members and Associated Persons across all of the Nasdaq, Inc. exchanges, as administered by FINRA pursuant to Regulatory Services Agreements. Harmonizing the investigatory and disciplinary processes of all of the Nasdaq, Inc. exchanges will bring efficiency to FINRA's administration of its responsibilities under the RSAs because the process [sic] it must follow are nearly identical, and are all based on the process that FINRA follows. Harmonized processes will bring consistency to investigations and adjudication of rule violations, and will reduce the number of disciplinary processes and requirements with which Members and Associated Persons, as well as their counsel, must be familiar.

The Exchange believes that the new investigatory and disciplinary processes are substantially similar to the existing process, and where there are differences between the new and old processes, the Exchange believes that the new process does not disadvantage its Members or Associated Persons. To the contrary, the Exchange believes that the new process will benefit all parties as it provides greater detail and specificity than the retired Rules, and that it is consequently more transparent.

The Exchange intends to announce the operative date of the new Rules at least 30 days in advance via a regulatory alert.[36] To facilitate an orderly transition from the Existing Rules to the new Rules, the Exchange is proposing to apply the Existing Rules to all Letters of Consent[37] that the Chief Regulatory Officer of the Exchange has approved and which are pending approval of the BCC prior to the operative date. The Exchange also will apply the Existing Rules to any matter for which, prior to the operative date, the Exchange has provided notice to a subject of its determination to impose an MRVP violation fine or a minor rule violation fine whereby the subject may yet or has contested the determination pursuant to Existing Rule 1614(a). In terms of formal disciplinary matters, any matter that has been approved for the issuance of a statement of charges[38] by the CRO will continue under the Existing Rules. Moreover, any appeal of a matter that is pending before an OEP pursuant to Existing Rule 720, a Review Panel pursuant to Existing Rule 720A, or the BCC pursuant to Existing Rule 303 will continue under the Existing Rules. As a consequence of this transition process, the Exchange will retain the BCC, the OEP, the Review Panel, and the existing processes during the transition period until such time that there are no longer any matters proceeding under the Existing Rules. To facilitate this transition process, the Exchange will retain a transitional Rulebook that will contain the Exchange's Rules as they are at the time of [sic] that this proposal is filed with the Commission. This transitional Rulebook will apply only to matters initiated prior to the operational date of the changes proposed herein and it will be posted to the Exchange's public rules website. When the transition is complete and there are no longer any Members, Associated Persons, or other persons subject to the existing disciplinary processes, the Exchange will remove the transitional Rulebook from its public rules website.

The Exchange furthermore notes that it expects the transition from the BCC to the Exchange Review Council to be smooth given that it expects to nominate the existing (and shared) membership of the BX, Nasdaq, and Phlx Review Councils to also become members of the Exchange Review Council.[39] The Exchange does not expect that any existing members of the BCC will be nominated to become members of the Exchange Review Council; however, the Exchange will ensure that, in advance of the operative day, the members of the Exchange Review Council will familiarize themselves with the Rules and procedures of the Exchange so that they will be prepared to fulfill their responsibilities.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[40] in general, and furthers the objectives of Section 6(b)(5) of the Act,[41] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange also believes that the proposal is consistent with Section 6(b)(6) of the Act,[42] which requires that the rules of an exchange provide that its members be appropriately disciplined for violations of the Act as well as the rules and regulations thereunder, or the rules of the Exchange, by expulsion, suspension, limitation of activities, functions, and operations, fine, censure, being suspended or barred from being associated with a member, or any other fitting sanction.

First, the Exchange's proposals are consistent with the Act to [sic] make miscellaneous changes to the Existing Rules to account for the adoption of the BX Rule 8000 and 9000 Series and the replacement of the BCC with the Exchange Review Council. For example, subject to Chapter 90, proposed changes to Rule 303 re-assign responsibility to the Exchange Review Council to review decisions of the Exchange's Membership Department to deny or condition applications for membership and association with Exchange Members and to deny or condition continuing membership or association. The proposal also establishes a new process by which the Exchange Review Council will adjudicate such reviews. The Exchange believes that these proposed changes to the Existing Rules are consistent with the Act because the new adjudicatory processes that the Exchange proposes to adopt in place of its existing processes are substantially similar to those that BX already utilizes. Moreover, the Exchange believes that the proposed processes will facilitate prompt, appropriate, and fair adjudications, consistent with the Act.

Second, the Exchange's proposals are consistent with the Act to [sic] make minor updates, corrections, and conforming amendments to the Exchange's Rules because they are necessary to ensure that the Exchange's

[36] The Exchange notes that the proposed changes will not become operative unless and until the Commission approves the Exchange's request, which it has filed pursuant to Section 36 of the Exchange Act and SEC Rule 0–12 thereunder, for an exemption from the rule filing requirements of Section 19(b) of the Exchange Act as to changes to Chapters 80 and 90 that are effected solely by virtue of a change to the BX Rule 8000 or 9000 Series.
