The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment 11 to Materials License SNM-2501 held by Virginia Electric and Power Company (Virginia Power) for the receipt, possession, transfer, and storage of spent fuel at the Surry Independent Spent Fuel Storage Installation (ISFSI), located in Surry County, Virginia. The amendment is effective the date of issuance.

By application dated April 5, 1999, as supplemented on February 29, 2000, VA Power requested to amend its ISFSI license to permit the continued storage of burnable poison rod assemblies and/or thimble plug devices within the already loaded GNSI CASTOR V/21, Westinghouse MC-10, and NAC-I28 casks used at Surry. This amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Therefore, the publication of a notice of proposed action and an opportunity for hearing or a notice of hearing is not warranted.

Notice is hereby given of the right of interested persons to request a hearing on whether the action should be rescinded or modified.

Also in connection with this action, the Commission prepared an Environmental Assessment (EA) and Finding of no Significant Impact (FONSI). The EA and FONSI were published in the **Federal Register** on July 3, 2000 (65 FR 41108).
