These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public; and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This subcommittee is charged with providing consensus advice and recommendations to the Director, CDC, and the Administrator ATSDR, regarding community concerns pertaining to CDC's and ATSDR's public health activities and research at this DOE site.
