OMB Control Number: 3060-1038.

Type of Review: New collection.

Title: Digital Television Transition Information Questionnaires.

Form Number: N/A.

Respondents: Business or other for-profit entities.

Number of Respondents: 844.

Estimated Time per Response: 4 to 24 hours.

Frequency of Response: One-time reporting requirement.

Total Annual Burden: 4,823 hours.

Total Annual Cost: \$251,400.

Needs and Uses: In the Telecommunications Act of 1996, Congress directed that every broadcaster be given a second channel for digital operations. At the end of the transition, broadcasters' analog channels will be returned to the government. Congress set a target date of December 31, 2006 for the end of the transition, although that date can be extended if 85% of viewers in a particular market do not have access to the digital signals. In addition, at the end of the transition the broadcast spectrum will contract from channels 2-69 to channels 2-51. This 108 MHz of spectrum (channels 52-69) can then be used by advanced wireless services and public safety authorities. There are several key building blocks to a successful transition. First, content—consumers must perceive something significantly different than what they have in analog. Second, distribution—the content must be delivered to consumers in a simple and convenient way. Third, equipment—equipment must be capable, affordable and

consumer-friendly. And fourth, education—consumers must be educated about what digital television is, and what it can do for them. These information requests are designed to gather data in these key areas.

OMB Control No.: 3060-0817.

Title: Computer III Further Remand Proceedings: BOC Provision of Enhanced Services (ONA Requirements), CC Docket No. 95-20.
