SUPPLEMENTARY INFORMATION:

I. Discussion

On June 20, 2013 (78 FR 37281), the NRC published a final rule in the **Federal Register** amending its environmental protection regulations by updating the Commission's 1996 findings on the environmental effect of renewing the operating license of a nuclear power plant. This document is necessary to clarify and correct the revisions made to the statutory authority that is cited in the authority citation for part 51 of Title 10 of the *Code of Federal Regulations* (10 CFR). The revisions made to the authority citation in the final rule were administrative in nature and did not change the statutory authority. The authority citation for 10 CFR part 51 is corrected by inserting missing punctuation and changing incorrect punctuation.

II. Rulemaking Procedure

Because this amendment constitutes a minor technical correction to the NRC's authority citation for the prior final rule amending its environmental protection regulations, the Commission finds that the notice and comment provisions of the Administrative Procedure Act are unnecessary and is exercising its authority under 5 U.S.C. 553(b)(3)(B) to publish this amendment as a final rule. This amendment does not require action by any person or entity regulated by the NRC. Also, the final rule does not change the substantive responsibilities of any person or entity regulated by the NRC.

List of Subjects in 10 CFR Part 51
