SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Manlifts Standard information collection requirements codified in regulations 29 CFR 1910.68(e). More specifically the standard requires an Occupational Safety and Health Act (OSHAct) covered employer to create and maintain a certification record of each manlift inspection. The standard also provides that the employer must inspect each manlift at least once every 30 days and to check limit switches weekly. The OSHAct authorizes this information collection. *See* 29 U.S.C. 651, 657.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB

receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on December 26, 2013 (78 FR 78396).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within 30 days of publication of this notice in the **Federal Register**. SUPPLEMENTARY INFORMATION:

Background

This PEIS is being prepared in conjunction with an updated Center Master Plan (CMP) to evaluate potential environmental impacts from proposed Center-wide operations and activities for a 20-year planning horizon from 2012-2032. The PEIS will consider a range of future scenarios from repurposing existing facilities and recapitalizing infrastructure, to reorganizing KSC management of its land resources with various types of commercial partnerships. The PEIS is intended to ensure NASA is in compliance with applicable environmental statutes as it sets program priorities for future operations and activities.

A CMP for Kennedy was developed in 2002 with a 50-year planning horizon. NASA Policy Directive 8810.2, Master Planning for Real Property, requires the CMP to be updated every five years. The 2008 CMP update was based on the now cancelled Constellation Program, while the current CMP update will guide KSC as it transitions towards a multiuser spaceport over the next 20 years.

KSC History

In the late 1950s the U.S. embarked on a new era of human space exploration. The first human space flight initiative was Project Mercury in 1958. The crewed spacecraft first
