BILLING CODE P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and
Atmospheric Administration (NOAA).

Title: Southeast Region Dealer and
Interview Family of Forms.

OMB Control Number: 0648–0013.

Form Number(s): None.

Type of Request: Regular (revision
and extension of a currently approved
information collection).

Number of Respondents: 7,494.

Average Hours per Response: Dealer
reporting for monitoring Federal fishery
annual catch limits (ACLs): Coastal
fisheries dealers reporting, 10 minutes;
mackerel dealer reporting (non-gillnet),
10 minutes; mackerel dealer reporting
(gillnet), 10 minutes; mackerel vessel
reporting (gillnet), 10 minutes;
wreckfish dealer reporting, 10 minutes.

**Bioprofile data from Trip Interview
programs (TIP):** Shrimp Interviews, 10
minutes; Fin Fish interviews, 10
minutes.

Burden Hours: 5,028.

Needs and Uses: This request is for
revision and extension of a current
information collection.

Fishery quotas are established for
many species in the fishery management
plans developed by the Gulf of Mexico
Reef Fish Fishery Management Council,
the South Atlantic Fishery Management
Council, and The Caribbean Fishery
Management Council. The Southeast
Fisheries Science Center has been
delegated the responsibility to monitor
these quotas. To do so in a timely
manner, seafood dealers that handle
these species are required to report the
purchases (landings) of these species.
The frequency of these reporting
requirements varies depending on the
magnitude of the quota (e.g., lower
quota usually require more frequent
reporting) and the intensity of fishing
effort. The most common reporting
frequency is twice a month; however,
some fishery quotas, (e.g., the mackerel
gill net) necessitate weekly or by the trip
reporting.

In addition, information collection
included in this family of forms
includes interview with fishermen to
gather information on the fishing effort,
location and type of gear used on
individual trips. This data collection is
conducted for a subsample of the fishing
trips and vessel/trips in selected
commercial fisheries in the Southeast
region and commercial fisheries of the
US Caribbean. Fishing trips and
individuals are selected at random to
provide a viable statistical sample.
These data are used for scientific
analyses that support critical
conservation and management decisions
made by national and international
fishery management organizations.

A revision to this collection is
requested because the Caribbean Fishery
Management Council has asked that
commercial trip interviews be
conducted for the fisheries of the
Caribbean. In order to support this
