The king and Tanner crab fisheries in the exclusive economic zone of the Bering Sea and Aleutian Islands, Alaska, are managed under the Fishery Management Plan for Bering Sea and Aleutian Islands King and Tanner Crabs (FMP). The North Pacific Fishery Management Council prepared the FMP under the Magnuson-Stevens Fishery Conservation and Management Act as amended in 2006. The National Marine Fisheries Service (NMFS) manages the crab fisheries in the waters off the coast of Alaska under the FMP. Regulations implementing the FMP and all amendments to the Crab Rationalization Program (CR Program) appear at 50 CFR part 680. Program details are found at: *http://www.alaskafisheries.noaa.gov/regs/680/default.htm.*

The CR Program balances the interests of several groups who depend on the crab fisheries. The CR Program addresses conservation and management issues associated with the previous derby fishery, reduces bycatch and associated discard mortality, and increases the safety of crab fishermen by ending the race for fish. Share allocations to harvesters and processors, together with incentives to participate in fishery cooperatives, increases efficiencies, provides economic stability, and facilitates compensated reduction of excess capacities in the harvesting and processing sectors. Community interests are protected by Western Alaska Community Development Quota allocations and regional landing and processing requirements, as well as by several community protection measures.

NMFS established the CR Program as a catch share program for nine crab fisheries in the BSAI, and assigned quota share (QS) to persons and processor quota share (PQS) to processors based on their historic participation in one or more of these nine crab fisheries during a specific period. The CR Program components include QS allocation, PQS allocation, individual fishing quota (IFQ) issuance, and individual processing quota (IPQ) issuance, quota transfers, use caps, crab harvesting cooperatives, protections for Gulf of Alaska groundfish fisheries, arbitration system, monitoring, economic data collection, and cost recovery fee collection.

Affected Public: Business or other for-profit organizations; individuals or households.

Frequency: Annually and on occasion.

Respondent's Obligation: Required to obtain or retain benefits.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a new collection of information.

The objective of the web-based focus groups, phone interviews, and online survey is to collect information on the current use of NOAA's National Weather Service (NWS) Weather Prediction Center (WPC) products,

including probabilistic forecasts focusing on the 8 to 10 day timeframe, as well as forecast needs. The web-based focus groups and phone interviews will ask participants to explain their survey responses. This information will help create better 8 to 10 day weather forecast products used by the National Weather Service (NWS) to protect lives and property.

II. Method of Collection

The primary data collection vehicles will be internet-based surveys, web-based focus groups, and telephone interviews. Telephone interviews may be employed to supplement and verify survey responses.

III. Data

OMB Control Number: None.

Form Number(s): None.

Type of Review: Regular submission (request for a new information collection).

Affected Public: Members of the public.

Estimated Number of Respondents: 500–700 for the survey, 30 for the focus groups, and 20 for the phone interviews.

Estimated Time per Response: 30 minutes for the survey, 3–4 hours for the focus groups, and two hours for the phone interviews.
