public scoping meeting.

SUPPLEMENTARY INFORMATION: GSA
intends to prepare a SEIS to analyze the
potential impacts resulting from
proposed modifications and minor
design changes to the San Ysidro LPOE
Modernization and Expansion Project.
The San Ysidro LPOE is located at the
terminus of Interstate 5 at the United
States-Mexico border in the San Ysidro
community of San Diego, California.

Background

A Final Environmental Impact
Statement (EIS) and Record of Decision
(ROD) were published in September
2009. Both addressed the
reconfiguration and expansion of the
San Ysidro LPOE in three independent
construction phases to improve overall
capacity and operational efficiency. In
May 2014, GSA published a Final SEIS
and ROD that evaluated changed
circumstances and proposed
modifications to the Project, including
(1) the incorporation of northbound
pedestrians inspections at the proposed
southbound-only pedestrian crossing
facility, on the west side of the LPOE,
and modification of the phasing/timing
of the construction of the pedestrian
crossing facility; (2) changes to the
development footprint on the west side
of the LPOE and design refinements to
the Virginia Avenue Transit Center; (3)
a change in the number of vehicle lanes
and the installation of southbound
inspection booths and overhead
canopies on the proposed southbound
roadway; and (4) minor changes in the
design and/or timing of implementation
of several Project elements. GSA
prepared a Revision to the Final SEIS in
August 2015 that addressed minor
changes to the alignment of the
southbound roadway and employee
access road, as well as specific
information that was not known or
available at the time the Final EIS or
Final SEIS were prepared (regarding the
details of the on-site wastewater
treatment facility).

Phase 1 is complete and included the
construction of a pedestrian bridge,
additional northbound vehicle lanes
and inspection facilities, a new
southbound pedestrian crossing facility
on the east side of the LPOE, a new bi-
directional pedestrian crossing facility
on the west side of the LPOE, and the
Virginia Avenue Transit Center. Phase 2
is fully funded and involves the
construction of new buildings. Phase 3
is fully funded and includes
construction of a southbound roadway
and associated inspection equipment.
Phases 2 and 3 are anticipated to be
completed in 2019.

The SEIS will address changes to the
Project, which include acquisition of
one parcel of land on the east side of the
LPOE and incorporation of this
additional land area into the LPOE.

Alternatives Under Consideration

Two action alternatives are under
consideration in addition to the No-
Action Alternative. Alternative 1 would
include demolition of the existing
building on the acquisition site and

expansion of the LPOE pedestrian plaza.
Alternative 2 would involve renovating
the existing on-site building. The No
Action Alternative assumes that the site
would not be acquired by GSA and the
additional land area would not be
incorporated into the LPOE.

Scoping Process

Scoping will be accomplished
through a public scoping meeting, direct
mail correspondence to appropriate
federal, state, and local agencies, and to
private organizations and citizens who
have previously expressed, or are
known to have, an interest in the
Project.

Dated: October 23, 2017.
