

multispectral, remotely-sensed imagery through the Landsat program. Landsat satellite imagery has been available at no cost to the public since 2008, which has resulted in the distribution of millions of scenes each subsequent year, as well tens of thousands of Landsat users registering with USGS to access the data. In order to continue to provide high quality imagery that meets the needs of users, LRS is collecting current and future user requirements for sensor and satellite attributes. These attributes include spatial resolution, spectral bands, frequency of acquisition, and many others. LRS will use the information from this collection to understand if they are currently meeting the needs of their user community and to help determine the features of future Landsat satellites. Questions will be asked to determine user characteristics, current uses of imagery, preferred attributes of Landsat imagery, and benefits of Landsat imagery. All current U.S. Landsat imagery users who are registered with USGS will be invited to take part in the survey and a large sample of international Landsat users will also be invited.

To protect the confidentiality and privacy of survey respondents, the data from the survey will not be associated with any respondent's email address at any time and will only be analyzed and reported in aggregate. All files containing PII will be password-protected, housed on secure USGS servers, and only accessible to the research team. The data from the survey will be aggregated and statistically analyzed and the results will be published in publically available USGS reports.

OMB Control Number: 1028-NEW.

Title: Current and Future Landsat User Requirements.

Type of Request: New information collection.

Respondent Obligation: None.

Participation is voluntary.

Frequency of Collection: One time only.

Description of Respondents: General public.

Estimated Total Number of Annual Responses: 11,660

Estimated Time per Response: We estimate that it will take 20 minutes per person to complete the full survey and 5 minutes per person to complete the non-response survey.

Estimated Annual Burden Hours: 3,335

Estimated Annual Reporting and Recordkeeping "Non-Hour Cost": There are no "non-hour cost" burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number. Until the OMB approves a collection of information, you are not obliged to respond.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501, *et seq.*).

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-361 and 50-362; NRC-2018-0003]

Southern California Edison Company, San Onofre Nuclear Generating Station, Units 2 and 3

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an

exemption from certain power reactor financial protection requirements in response to a September 16, 2015, request from the Southern California Edison Company (the licensee). The exemption would permit the San Onofre Nuclear Generating Station, Units 2 and 3 (SONGS), to reduce the required level of primary financial protection from \$450 million to \$100 million, as well as to withdraw from participation in the secondary layer of financial protection effective immediately.
