

organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such genetically engineered (GE) organisms and products are considered “regulated articles.”

The regulations in § 340.6(a) provide that any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340. APHIS received a petition (APHIS Petition Number 17–292–01p) from Texas A&M AgriLife Research of College Station, TX (Texas A&M), seeking a determination of nonregulated status of cotton (*Gossypium hirsutum*) designated as event TAM66274, which has been genetically engineered for ultra-low gossypol levels in the cottonseed. The Texas A&M petition states that information collected during field trials and laboratory analyses indicates that TAM66274 cotton is not likely to be a plant pest and therefore should not be a regulated article under APHIS’ regulations in 7 CFR part 340.

According to our process¹ for soliciting public comment when considering petitions for determinations of nonregulated status of GE organisms, APHIS accepts written comments regarding a petition once APHIS deems it complete. In a notice² published in the **Federal Register** on December 5, 2017 (82 FR 57426–57427, Docket No. APHIS–2017–0097), APHIS announced the availability of the Texas A&M petition for public comment. APHIS solicited comments on the petition for 60 days ending on February 5, 2018, in order to help identify potential environmental and interrelated economic issues and impacts that APHIS may determine should be considered in our evaluation of the petition.

APHIS received 47 comments on the petition. Of those, 44 were supportive, two opposed, and one was not related to the petition.

APHIS decided, based on its review of the petition and its evaluation and analysis of the comments received during the 60-day public comment period on the petition, that the petition

¹ On March 6, 2012, we published in the **Federal Register** (77 FR 13258–13260, Docket No. APHIS–2011–0129) a notice describing our process for soliciting public comments and information when considering petitions for determinations of nonregulated status for GE organisms (see <http://www.regulations.gov/#!docketDetail;D=APHIS-2011-0129>).

involves a GE organism that raises substantive new issues. According to our public review process for such petitions (see footnote 1), APHIS is following Approach 2, where we first solicit written comments from the public on a draft environmental assessment (EA) and a draft plant pest risk assessment (PPRA) for a 30-day comment period through the publication of a **Federal Register** notice. Then, after reviewing and evaluating the comments on the draft EA and the draft PPRA and other information, APHIS revises the draft PPRA as necessary and prepares a final EA and, based on the final EA, a National Environmental Policy Act (NEPA) finding document (either a finding of no significant impact (FONSI) or a notice of intent to prepare an environmental impact statement). If a FONSI is reached, APHIS furnishes a response to the petitioner, either approving or denying the petition. APHIS also publishes a notice in the **Federal Register** announcing the regulatory status of the GE organism and the availability of APHIS’ final EA, PPRA, FONSI, and our regulatory determination.

APHIS sought public comment on a draft EA and a draft PPRA from August 1, 2018, to August 31, 2018.³ APHIS solicited comments on the draft EA, the draft PPRA, and whether the subject cotton is likely to pose a plant pest risk. APHIS received two comments on the petition, both of which supported a decision of nonregulated status for event TAM66274 cotton.

National Environmental Policy Act

After reviewing and evaluating the comments received during the comment period on the draft EA and draft PPRA and other information, APHIS has prepared a final EA. The EA has been prepared to provide the public with documentation of APHIS’ review and analysis of any potential environmental impacts associated with the determination of nonregulated status of cotton designated as event TAM66274. The EA was prepared in accordance with: (1) NEPA, as amended (42 U.S.C. 4321 *et seq.*), (2) regulations of the Council on Environmental Quality for implementing the procedural provisions of NEPA (40 CFR parts 1500–1508), (3) USDA regulations implementing NEPA (7 CFR part 1b), and (4) APHIS’ NEPA Implementing Procedures (7 CFR part 372). Based on our EA, the response to public comments, and other pertinent scientific data, APHIS has reached a FONSI with regard to the preferred alternative identified in the EA (to make

a determination of nonregulated status of cotton designated as event TAM66274).

Determination

Based on APHIS’ analysis of field and laboratory data submitted by Texas A&M, references provided in the petition, peer-reviewed publications, information analyzed in the EA, the PPRA, comments provided by the public, and information provided in APHIS’ response to those public comments, APHIS has determined that cotton designated as event TAM66274 is unlikely to pose a plant pest risk and therefore is no longer subject to our regulations governing the introduction of certain GE organisms.

Copies of the signed determination document, PPRA, final EA, FONSI, and response to comments, as well as the previously published petition and supporting documents, are available as indicated in the **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** sections of this notice.

Request for Comments on the Cross-Agency Priority Goal: Leveraging Data as a Strategic Asset: Phase 2

AGENCY: Department of Commerce.

ACTION: Notice and Request for Comments.

SUMMARY: In March 2018, President Trump launched the President's Management Agenda (PMA). It lays out a long-term vision for modernizing the Federal Government in key areas that will improve the ability of agencies to deliver mission outcomes, provide excellent service, and effectively steward taxpayer dollars on behalf of the American people. The PMA established a Cross-Agency Priority (CAP) goal of *Leveraging Data as a Strategic Asset* with an intended purpose of guiding development of a comprehensive long-term Federal Data
