Title: Experimental Investigation of Automation-Induced Human Error in Locomotive Cab.

OMB Control Number: 2130–XXXX.

Abstract: The purpose of this collection is to identify and evaluate the potential for human error associated with the operation of systems and automation in the locomotive cab. This research addresses DOT's strategic goal of safety. Once the nature and risk of the human error in locomotive cab systems and automation is better understood, error mitigating steps can be taken to provide safer systems and reduce the risk of accidents or incidents involving these systems. FRA will use the research's results to identify training, operational procedures, or automation design standards that will improve the safety of automated systems in locomotive cabs.
