be used to transport oil, gas, slurry, steam, or other fluids, liquids, or gases. It may also be used for structural purposes, including, but not limited to, piling. Specifically, not included is large diameter welded pipe produced only to specifications of the American Water Works Association (AWWA) for water and sewage pipe.

Large diameter welded pipe used to transport oil, gas, or natural gas liquids is normally produced to the American Petroleum Institute (API) specification 5L. Large diameter welded pipe may also be produced to American Society for Testing and Materials (ASTM) standards A500, A252, or A53, or other relevant domestic specifications, grades and/or standards. Large diameter welded pipe can be produced to comparable foreign specifications, grades and/or standards or to proprietary specifications, grades and/or standards, or can be non-graded material. All pipe meeting the physical description set forth above is covered by the scope of this investigation, whether or not produced according to a particular standard.

Subject merchandise also includes large diameter welded pipe that has been further processed in a third country, including but not limited to coating, painting, notching, beveling, cutting, punching, welding, or any other processing that would not otherwise remove the merchandise from the scope of the investigation if performed in the country of manufacture of the in-scope large diameter welded pipe.

The large diameter welded pipe that is subject to this investigation is currently classifiable in the Harmonized Tariff Schedule of the United States (HTSUS) under subheadings 7305.11.1030, 7305.11.1060, 7305.11.5000, 7305.12.1030, 7305.12.1060, 7305.12.5000, 7305.19.1030, 7305.19.1060, 7305.19.5000, 7305.31.4000, 7305.31.6010, 7305.31.6090, 7305.39.1000 and 7305.39.5000. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Public Conference Call Regarding Atlantic Bluefin Tuna Management Strategy Evaluation

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public conference call.

SUMMARY: NMFS is holding a stakeholder meeting by conference call to provide information on recent progress related to the International Commission for the Conservation of Atlantic Tunas (ICCAT) bluefin tuna management strategy evaluation (MSE). NMFS will also receive input on issues to be considered at an upcoming intersessional meeting of ICCAT's Panel 2, which will focus on initial operational management objectives for the bluefin tuna MSE. The conference call is open to the public.

DATES: An operator-assisted conference call that is open to the public will be held on February 28, 2019, from 1 p.m. to 2:30 p.m. EST. (phone number 800–857–9879; verbal password ''ICCAT''). Participants are strongly encouraged to dial in 15 minutes prior to the meeting.

FOR FURTHER INFORMATION CONTACT: Terra Lederhouse at (301) 427–8360.

SUPPLEMENTARY INFORMATION: The International Commission for the Conservation of Atlantic Tunas (ICCAT) is hosting an intersessional meeting of its Panel 2 on March 4–7, 2019, in Madrid, Spain. ICCAT's Panel 2 is responsible for keeping under review the conservation and management of northern temperature tunas, including albacore and Atlantic bluefin. At its March 4–7 intersessional meeting, ICCAT's Panel 2 will seek to advance ongoing development of a management strategy evaluation (MSE) for Atlantic bluefin tuna. An MSE is a simulation that allows stakeholders (*e.g.,* industry, managers, scientists, and non-governmental organizations) to assess how well different management strategies, such as harvest control rules, could meet the objectives of the fishery. Specifically, in accordance with the outcomes from the 21st Special Meeting of ICCAT, the intersessional meeting will focus on developing initial operational management objectives for the MSE.

For the conference call, NMFS will provide stakeholders with updates on the progress related to ICCAT's bluefin tuna MSE work, including recent meetings of ICCAT's Standing Committee on Research and Statistics (SCRS), ICCAT's scientific branch. Additionally, NMFS is interested in learning from stakeholders about preferred management objectives. NMFS will provide reasonable opportunity for public input and will announce the timing and format for such input at the beginning of the conference call.

Dated: February 21, 2019.
