with extremely high rates of morbidity and mortality. A list of regions where ASF exists or is reasonably believed to exist is maintained on the APHIS website at *https://www.aphis.usda.gov/aphis/ourfocus/animalhealth/animal-and-animal-product-import-information/animal-health-status-of-regions/.*

In a report dated January 15, 2019, the veterinary authorities of Mongolia reported to the OIE confirmation of an ASF outbreak on January 10, 2019. Therefore, in response to this outbreak, APHIS has added Mongolia to the list of regions where ASF exists or is reasonably believed to exist.

Although the importation of most swine commodities from Mongolia into the United States is already restricted based on that country's classical swine fever, foot-and-mouth disease, and swine vesicular disease status, APHIS has determined that it is necessary to impose ASF-related restrictions on the importation of pork and pork products from Mongolia into the United States.

As a result, pork and pork products from Mongolia, including casings, are subject to APHIS import restrictions designed to mitigate the risk of ASF introduction into the United States.
