a. Identify the sectors in which U.S. exports of goods and services to SSA have increased the most, in both value and percentage terms, and indicate major factors behind this growth.

b. Identify the SSA countries to which U.S. exports of goods and services have increased the most, in both value and percentage terms, and indicate the major factors behind this growth.

c. Identify SSA countries to which U.S. outward FDI has increased the most, in both value and percentage terms, and indicate major factors behind this growth.

2. An overview of U.S. imports of goods and services from SSA, which

should, to the extent information is available:

a. Identify the sectors in which U.S. imports of goods and services from SSA have increased the most, in both value and percentage terms, and indicate major factors behind this growth. Data on goods should include both AGOA (including GSP) imports and total imports.

b. Identify the SSA countries in which exports of goods and services to the United States have increased the most, in both value and percentage terms, and indicate the major factors behind this growth. Data on goods should include both AGOA (including GSP) imports and total imports.

3. To the extent information is available, describe the intellectual property environment, including national and regional laws, enforcement measures, and infringement issues, in key SSA markets. Through case studies describe the effects of the intellectual property environment on trade and investment in the key SSA markets.

4. Provide a broad overview and examples of technological innovation in the SSA food and agricultural production, processing, and marketing system. This should include a broad description of SSA food and agricultural producers' use of technological improvements in such areas as crop and livestock nutrition and genetics (including biotechnology); machinery and equipment; data processing and analytics; and digital market information and risk management systems. Through case studies, describe how the adoption of such technological improvements has affected certain SSA food and agricultural producers' overall production and export performance. Additionally, describe current national and regional regulatory policies and market conditions in key countries in SSA that may affect the adoption of technological improvements in the SSA food and agricultural sector.
