

increase and allow the current rate schedules, which are set to expire September 30, 2019, to remain in effect. The deferral of a revenue adjustment (rate change) provides for rate stability and savings on the administrative cost of implementation and recognizes that the revenue sufficiency will be re-examined in the following year's PRS.

Therefore, Southwestern is proposing an extension of all current rate schedules, for the period October 1, 2019 to September 30, 2021. In accordance with 10 CFR 903.22(h), 903.23(a)(3), and 903.23(b), as amended (84 FR 5347 (Feb. 21, 2019)), and DOE Redesignation Order No. 00-002.10D (June 4, 2019), the Assistant Secretary may extend existing and provisional rates on an interim basis beyond the period specified by the Federal Energy Regulatory Commission (FERC).

The Integrated System rate schedules (P-13, NFTS-13 and EE-13) were placed into effect on an interim basis by the Deputy Secretary of Energy effective September 1, 2013, and were confirmed and approved by FERC on a final basis on January 9, 2014, for a period that ended September 30, 2017.

Subsequently, a new section 2.3.6 was added to the Non-Federal Transmission Service (NFTS) rate schedule NFTS-13 in order to replace a stated-rate for customers taking Southwest Power Pool (SPP) Network Integration Transmission Service (NITS) with a revenue-requirement based methodology that includes determining the SPP NITS Annual Revenue Requirement (ARR) portion of Southwestern's NFTS ARR.

The change had no impact on Southwestern's Integrated System revenue requirements and the rate schedule was re-designated NFTS-13A to reflect the change to the initial rate schedule. The NFTS-13A rate schedule change was placed into effect on an interim basis by the Deputy Secretary of Energy effective January 1, 2017, and confirmed and approved on a final basis by FERC on March 9, 2017, under FERC Docket No. EF14-1-001. A two-year extension of all Integrated System rate schedules was approved on an interim basis September 13, 2017, by the Deputy Secretary for the period October 1, 2017 through September 30, 2019. Since the Integrated System rate schedules were placed into effect and subsequently extended, there has been one additional change with no impact on revenue requirements. Southwestern added section 4.2 within the Hydro Peaking Power rate schedule P-13 in order to effect a uniform shift in the time Southwestern requires its customers to submit Peaking Energy schedules. The rate schedule was re-designated P-13A

to reflect the change to the initial rate schedule. The P-13A rate schedule change was placed into effect on an interim basis by the Assistant Secretary effective July 1, 2019, and has been submitted to FERC for confirmation and approval on a final basis.

The current Sam Rayburn Dam rate schedule (SRD-15) was placed into effect on an interim basis by the Deputy Secretary on December 17, 2015, and was confirmed and approved by the FERC on a final basis on June 30, 2016, for a period that ends September 30, 2019.

The current Robert D. Willis rate schedule (RDW-15) was placed into effect on an interim basis by the Deputy Secretary of Energy on December 17, 2015, and was confirmed and approved by the FERC on a final basis on June 15, 2016, for a period that ends September 30, 2019.

The Administrator will review and consider all written comments and the information gathered when submitting the finalized Rate Schedules Extension to the Assistant Secretary for confirmation and approval on an interim basis.

Dated: June 13, 2019.

Mike Wech,
Administrator.
